- CONS 320 - Conservation in Practice Credits: 3
- CONS 403 - Ecology and Conservation Theory Credits: 3
- CONS 404 - Monitoring and Assessment of Biodiversity Credits: 4
- CONS 411 - Science Communication for Conservation Credits: 3
- CONS 491 - RS: Comprehensive Conservation Planning Credits: 3

Minimum of three credits chosen from:

- BIOL 472 - Introductory Animal Behavior Credits: 3
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 421 - Marine Conservation Credits: 3
- EVPP 430 - Fundamentals of Environmental Geographic Information Systems Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3
- INTS 211 - Introduction to Conservation Studies Credits: 3-6
- INTS 311 - The Mysteries of Migration: Consequences for Conservation Credits: 6
- INTS 370 - Sustainable Food Systems Credits: 6
- INTS 371 - Food Systems and Policy Credits: 3
- INTS 403 - Conservation Behavior Credits: 6
- Other course work with advisor approval

Total: 19-22 credits

Total: 60-65 credits

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as "writing intensive" in their major at the 300 level or above. Students majoring in environmental and sustainability studies should consult an advisor to learn how to fulfill this requirement.

Mason Core (40 credits)

Note: some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Expand each item below for a link to specific course lists for each category.

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)
• Mason Core UFA - Arts Credits: 3
• Mason Core UGU - Global Understanding Credits: 3
• Mason Core ULIT - Literature Credits: 3
• Mason Core UNSL - Natural Science Credits: 7
• Mason Core USBS - Social and Behavioral Sciences Credits: 3
• Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

• Mason Core USYN - Synthesis/Capstone Credits: minimum 3

College Level Requirements for the BA degree

In addition to the Mason Core program, students pursuing a BA degree must complete the course work below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or religious studies (3 credits)

Fulfilled by any course in philosophy or religious studies (PHIL, RELI) except for PHIL 323, 324, 327, 393, 460. PHIL 253 and RELI 235 cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and behavioral science (3 credits)

3 credits in addition to the university-wide requirement in social and behavioral science for a total of 6 credits. The two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI and these courses in GGS: 101, 103, 110, 301, 303, 304, 305, 306, 315, 316, 320, 325, 330, 357, 380.

Foreign language

Intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. A three course sequence in American Sign Language (EDSE 115 - American Sign Language (ASL) I, EDSE 116 - American Sign Language (ASL) II, and EDSE 219 - American Sign Language (ASL) III will also meet the foreign language requirement. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs.

Non-Western culture (3 credits)

3 credits of an approved course in the study of a non-Western culture in addition to the course used to fulfill the Mason Core requirement in global understanding. A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs.
Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

Degree Total: Minimum 120 credits

Integrative Studies, BA

Banner Code: LA-BA-INTS
Web: integrative.gmu.edu

College: College of Humanities and Social Sciences
Department: School of Integrative Studies
The bachelor of arts degree program in integrative studies is based on intensive, interdisciplinary learning communities coordinated with traditional academic programs. The result is an integrated program of study that emphasizes collaboration, experiential learning, and self-reflection. The degree program requires mastery of eight essential competencies: communication, global understanding, group interaction, aesthetic awareness, critical thinking, civic engagement, digital literacy, and well-being.

Students must fulfill all requirements for bachelor's degrees as well as Mason Core requirements. Students who transfer into the School of Integrative Studies should consult with an advisor on what they need to take to complete the Mason Core requirements.

This undergraduate program offers students in select concentrations the option of applying to the accelerated master's in curriculum and instruction (select concentrations). See Bachelor's/Accelerated Master's Programs for listings and specific requirements.

Degree Requirements

Learning communities (24 credits)

Learning communities are interdisciplinary courses that combine different subjects into a single course that is usually 3 or 6 credits. In learning communities, faculty and students explore various ways to understand a topic. Learning communities are structured to help promote a greater sense of identity with an academic community. Hallmarks of the School of Integrative Studies learning communities are team teaching, collaborative projects, emphasis on writing and critical thinking, and opportunity for independent study. They often include experiential learning, either as an integral part of the class or as an optional add on.

Experiential learning (12-24 credits)

The requirement in experiential learning reflects the School of Integrative Studies' commitment to provide educational experiences that prepare graduates for the workplace and the demands of active and responsible citizenship. The workplace is as viewed as a site of instruction, one where students are exposed to the variety of skills needed to succeed. Through experiential learning, students combine work experience with academic study so that each will enrich the other.

Experiential learning includes internships, study abroad, community service learning, course field trips, and other field study opportunities. The learning sites may change each semester and are usually off campus. George Mason provides student liability
insurance for the experiential learning internship, but students are responsible for their own transportation and health care. Accident and health insurance is available from George Mason.

No more than 24 credits of experiential learning can count toward a student's total credits for graduation.

**Electives (0-15 credits)**

If students take courses that fulfill more than one degree requirement (e.g. learning communities, experiential learning, concentration, or Mason Core), they may need to take additional electives to reach the total of 120 credits required for a BA degree.

**Concentration (30-57 credits)**

A concentration is the equivalent of a major in a traditional degree program. Students choose from an established interdisciplinary concentration below or create with faculty an individualized program of study to fit their interests and needs. The coursework for the concentration consists of traditional courses, learning communities, independent study and experiential learning. Where applicable, courses applied to a concentration can also be used to fulfill the credits required in learning communities or experiential learning. Students must present a minimum GPA of 2.00 in courses applied to the concentration.

The bachelor's degree in integrative studies offers the concentrations in the following:

- advertising
- childhood studies
- early childhood education
- elementary education
- international studies
- language arts for education
- legal studies
- leadership and organizational development
- social innovation and enterprise
- social justice and human rights
- social science for education
- individualized concentration

▲ Advertising (ADV)

Students complete the following course work:

**Ten required courses (minimum 30 credits)**

- ACCT 203 - Survey of Accounting Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- MKTG 303 - Principles of Marketing Credits: 3
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3 or MGMT 303 - Principles of Management Credits: 3
- INTS 202 - Public Speaking and Critical Thinking Skills Credits: 4 or COMM 230 - Case Studies in Persuasion Credits: 3
• MBUS 302 - Managing Information in a Global Economy Credits: 3 or MIS 303 - Introduction to Business Information Systems Credits: 3
• INTS 249 - Digital Literacy Credits: 4 or AVT 180 - New Media in the Creative Arts Credits: 3
• COMM 202 - Media and Society Credits: 3
• MBUS 306 - Managing Projects and Operations Credits: 3
• INTS 245 - Visual Culture and Society Credits: 4 or AVT 204 - Visual Thinking Credits: 3

Two courses (6-10 credits) chosen from:

• ACCT 303 - Accounting for Decision Making Credits: 3
• AVT 104 - Two-Dimensional Design and Color Credits: 4
• AVT 280 - Introduction to New Media Arts Credits: 4
• BULE 303 - Legal Environment of Business Credits: 3
• COMM 157 - Digital Media Workshop Credits: 1
• COMM 375 - Mass Communication Advertising and Promotions Credits: 3
• COMM 430 - Persuasion Credits: 3
• FNAN 303 - Financial Management Credits: 3
• GOVT 358 - Nonprofit Financial Planning Credits: 4
• MIS 303 - Introduction to Business Information Systems Credits: 3
• MBUS 300 - Accounting in a Global Economy Credits: 3
• MBUS 303 - Marketing in a Global Economy Credits: 3
• MBUS 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3
• MBUS 305 - Introduction to International Business Credits: 3
• INTS 331 - The Nonprofit Sector Credits: 4
• INTS 348 - Digital Futures Credits: 3-6
• INTS 420 - Work Effectiveness Skills Credits: 3
• INTS 431 - Principles of Fund Raising Credits: 4
• INTS 445 - Multimedia Design Credits: 5
• SPMT 412 - Sport Marketing and Sales Credits: 3
• WMST 100 - Representations of Women Credits: 3

Total: minimum 36 credits

▲ Childhood Studies (CHDS)

Students complete the following course work:

Seven required courses (minimum of 23 credits)

• INTS 312 - Images and Experiences of Childhood: Social Construct, Literature, and Film Credits: 3-6
• INTS 316 - Introduction to Childhood Studies Credits: 4
• INTS 317 - Issues in Family Relationships Credits: 4
● PSYC 100 - Basic Concepts in Psychology Credits: 3
● PSYC 211 - Developmental Psychology Credits: 3
● PSYC 313 - Child Development Credits: 3
● STAT 250 - Introductory Statistics I Credits: 3 or SOCI 313 - Statistics for the Behavioral Sciences Credits: 4

Three courses (9-18 credits) chosen from:

● ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3
● ENGH 452 - Critical Study of Children’s Literature Credits: 3
● HEAL 350 - Interventions for Populations and Communities at Risk Credits: 3
● INTS 231 - Introduction to Community Studies Credits: 4
● INTS 305 - Conflict Resolution and Transformation Credits: 6
● INTS 310 - Violence and Gender Credits: 3-6
● INTS 319 - Contemporary Youth Studies Credits: 3
● INTS 320 - Construction of Differences: Race, Class, and Gender Credits: 6
● INTS 321 - Parent-Child Relations Credits: 3
● INTS 331 - The Nonprofit Sector Credits: 4
● NUTR 295 - Introduction to Nutrition Credits: 3
● NUTR 420 - Strategies for Nutrition Education Credits: 3
● NUTR 421 - Community Nutrition Credits: 3
● NUTR 422 - Nutrition throughout the Life Cycle Credits: 3
● NUTR 423 - Nutrition and Chronic Illnesses Credits: 3
● NUTR 466 - Nutrition and Weight Management: Obesity, Anorexia, and Bulimia Credits: 3
● PSYC 314 - Adolescent Development Credits: 3
● PSYC 324 - Personality Theory Credits: 3
● PSYC 325 - Abnormal Psychology Credits: 3
● SOCW 415 - Child and Family Welfare Credits: 3
● SOCI 302 - Sociology of Delinquency Credits: 3
● SOCI 360 - Youth Culture and Society Credits: 3

Total: minimum 32 credits

▲ Early Childhood Education (ECED)

● 6 credits of ENGH, including ENGH 101 or ENGH 302
● 3 credits of oral communication
● 9 credits of natural science (must include a lab science)
● 9 credits of MATH or STAT
● 3 credits of world history
● 3 credits of U.S. history
● 3 credits of ECON
● 3 credits of GGS
● 3 credits of ARTH, AVT, MUSI, or THR coursework
• 3 credits of PHIL, RELI, or FRLN coursework
• 3 credits of GOVT 103
• minimum of 9 credits of EDCI, ECED, EDUC, EDLE, EDSE, or EDRD coursework

Total: 57 credits

▲ Elementary Education (ELED)

• 9 credits of ENGH, including ENGH 101 or ENGH 302
• 3 credits of oral communication
• 12 credits of natural science
• 12 credits of mathematics or statistics
• 3 credits of ECON coursework
• 3 credits of U.S. history
• 3 credits of GGS coursework
• 3 credits of GOVT 103
• 3 credits of HIST 100 or HIST 125
• 3 credits of ARTH, AVT, MUSI, or THR coursework
• 3 credits of PHIL, RELI, or FRLN coursework
• minimum of 9 credits of EDCI, ECED, EDUC, EDLE, EDSE, or EDRD coursework

Total: 66 credits

▲ International Studies (INST)

Students complete the following course work:

Language proficiency

All students must demonstrate language proficiency at the intermediate level through coursework (a Mason course numbered 210) or proficiency testing.

Three foundational courses (10 credits)

• INTS 303 - Introduction to International Studies Credits: 3
• INTS 362 - Social Justice and Human Rights Credits: 3
• INTS 435 - Leadership in a Changing Environment Credits: 4

One course in religious studies (3 credits) chosen from:

• RELI 341 - Global Perspectives on Spirituality and Healing Credits: 3
• RELI 360 - Religion and Politics Credits: 3
• RELI 401 - Death and the Afterlife in World Religions Credits: 3
• RELI 405 - Religion, Values, and Globalization Credits: 3
• RELI 407 - Women in the World's Religions Credits: 3
- RELI 490 - Comparative Study of Religions Credits: 3

One course in geography (3 credits) chosen from:

- GGS 302 - Global Environmental Hazards Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3
- GGS 304 - Population Geography Credits: 3
- GGS 305 - Economic Geography Credits: 3

One course in globalization (3 credits) chosen from:

- ANTH 332 - Cross-Cultural Perspectives on Globalization Credits: 3
- CULT 320 - Globalization and Culture Credits: 3
- GLOA 101 - Introduction to Global Affairs Credits: 3
- SOCI 120 - Globalization and Society Credits: 3
- SOCI 320 - Social Structure and Globalization Credits: 3

One course in sustainability (3 to 6 credits) chosen from:

- INTS 210 - Sustainable World Credits: 4
- INTS 334 - Environmental Justice Credits: 4
- INTS 401 - Conservation Biology Credits: 6
- INTS 402 - Plants and People - Sustenance, Ceremony, and Sustainability Credits: 6
- PHIL 243 - Global Environmental Ethics Credits: 3

One course in politics (3 credits) chosen from:

- ANTH 312 - Political Anthropology Credits: 3
- GGS 301 - Political Geography Credits: 3
- GOVT 322 - International Relations Theory Credits: 3
- INTS 422 - An Experiential Approach to American Foreign Policy Credits: 3-6

One course in social action and conflict transformation (3 - 6 credits) chosen from:

- INTS 300 - Law and Justice Credits: 3
- INTS 302 - Argument and Advocacy Credits: 6
- INTS 304 - Social Movements and Community Activism Credits: 4
- INTS 314 - Conflict, Trauma and Healing Credits: 6
- INTS 315 - Spirituality and Conflict Transformation Credits: 6
- INTS 416 - Refugee and Internal Displacement Credits: 3
- SOCI 308 - Race and Ethnicity in a Changing World Credits: 3

One course (3-4 credits) in creative arts chosen from:

- DANC 118 - World Dance Credits: 3
• DANC 318 - Global Perspectives: World Dance Forms Credits: 3
• ENGH 362 - Global Voices Credits: 3
• ENGH 366 - The Idea of a World Literature Credits: 3
• ENGH 367 - World Literatures in English Credits: 3
• MUSI 103 - Musics of the World Credits: 3
• INTS 346 - Art as Social Action Credits: 4
• INTS 446 - Art, Beauty, and Culture Credits: 3-6 (Students take 3 credits.)
• THR 359 - World Stages Credits: 3

Three elective courses (9-12 credits)

Students take three additional courses focused on an international area of their interest with the advice and approval of an adviser.

Total: 40-50 credits

▲ Language Arts for Education (LAED)

Students complete the following course work:

Six required courses (18-19 credits)

• INTS 202 - Public Speaking and Critical Thinking Skills Credits: 4 or COMM 100 - Public Speaking Credits: 3 or COMM 101 - Interpersonal and Group Interaction Credits: 3
• LING 306 - General Linguistics Credits: 3
• ENGH 307 - English Grammar Credits: 3 or LING 307 - English Grammar Credits: 3
• ENGH 308 - Theory and Inquiry Credits: 3 or ENGH 408 - Topics in Criticism Credits: 3 or ENGH 409 - Literary Modes Credits: 3
• ENGH 362 - Global Voices Credits: 3 or ENGH 366 - The Idea of a World Literature Credits: 3 or ENGH 367 - World Literatures in English Credits: 3
• One of the following courses: ENGH 101 - Composition Credits: 3, ENGH 302 - Advanced Composition Credits: 3, ENGH 382 - Writing Nonfiction Genres Credits: 3, ENGH 396 - Introduction to Creative Writing Credits: 3, ENGH 388 - Professional and Technical Writing Credits: 3, ENGH 486 - RS: Writing Nonfiction for Publication Credits: 3

One course (3 credits) chosen from:

• ENGH 322 - Shakespeare Credits: 3
• ENGH 323 - Shakespeare: Special Topics Credits: 3
• ENGH 320 - Literature of the Middle Ages Credits: 3
• ENGH 321 - English Poetry and Prose of the 16th Century Credits: 3
• ENGH 325 - English Poetry and Prose of the 17th Century Credits: 3
• ENGH 330 - Augustan Age: 1660-1745 Credits: 3
• ENGH 334 - British Poetry of the Romantic Period Credits: 3
• ENGH 335 - Prose and Poetry of the Victorian Period Credits: 3
• ENGH 431 - Topics: British Literary Periods Credits: 3
• ENGH 421 - Topics in Medieval and Renaissance Literature Credits: 3
• ENGH 324 - English Renaissance Drama Credits: 3
• ENGH 332 - Restoration and 18th Century Drama Credits: 3
• ENGH 339 - British and Irish Drama after 1900 Credits: 3
• ENGH 333 - British Novel of the 18th Century Credits: 3
• ENGH 336 - British Novel of the 19th Century Credits: 3
• ENGH 338 - British Novel after 1900 Credits: 3

One course (3 credits) chosen from:

• ENGH 315 - Folklore and Folklore Credits: 3
• ENGH 348 - Beginnings of African American Literature Through 1865 Credits: 3
• ENGH 350 - African American Literature Through 1946 Credits: 3
• ENGH 351 - Contemporary African American Literature Credits: 3
• ENGH 355 - Recent American Fiction Credits: 3
• ENGH 340 - Early American Literature Credits: 3
• ENGH 341 - Literature of the American Renaissance Credits: 3
• ENGH 442 - Topics: American Literary Periods Credits: 3
• ENGH 345 - American Drama of the 20th Century Credits: 3
• ENGH 343 - Development of the American Novel to 1914 Credits: 3
• ENGH 344 - Development of the American Novel since 1914 Credits: 3

Three elective courses (9 credits) in English

Courses used to fulfill this requirement cannot be applied to any of the other requirements for this concentration.

Total: 33-34 credits

▲ Legal Studies (LGLS)

Seven required courses (22 credits)

• INTS 202 - Public Speaking and Critical Thinking Skills Credits: 4
• GOVT 103 - Introduction to American Government Credits: 3
• PHIL 173 - Logic and Critical Thinking Credits: 3
• INTS 300 - Law and Justice Credits: 3
• GOVT 301 - Public Law and the Judicial Process Credits: 3
• PHIL 311 - Philosophy of Law Credits: 3
• BULE 303 - Legal Environment of Business Credits: 3

One course (3 credits) chosen from:

• GOVT 407 - Law and Society Credits: 3
- GOVT 422 - Constitutional Interpretation Credits: 3
- GOVT 423 - Constitutional Law: Civil Rights and Liberties Credits: 3
- GOVT 443 - Law and Ethics of War Credits: 3
- GOVT 446 - International Law and Organization Credits: 3
- GOVT 452 - Administrative Law and Procedures Credits: 3
- CRIM 424 - Constitutional Law: Criminal Process and Rights Credits: 3

Three courses chosen from:

- Any undergraduate CRIM course
- Any CONF course
- COMM 100 - Public Speaking Credits: 3
- COMM 230 - Case Studies in Persuasion Credits: 3
- COMM 430 - Persuasion Credits: 3
- COMM 475 - Journalism Law Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3
- ECON 310 - Money and Banking Credits: 3
- ECON 335 - Environmental Economics Credits: 3
- ECON 390 - International Economics Credits: 3
- ECON 415 - Law and Economics Credits: 3
- GOVT 307 - Legislative Behavior Credits: 3
- GOVT 420 - American Political Thought Credits: 3
- INTS 204 - Leadership Theory and Practice Credits: 3
- INTS 304 - Social Movements and Community Activism Credits: 4
- INTS 305 - Conflict Resolution and Transformation Credits: 6
- INTS 335 - Ethics, Communication, and Freedom Credits: 3-6
- INTS 362 - Social Justice and Human Rights Credits: 3
- INTS 416 - Refugee and Internal Displacement Credits: 3
- INTS 420 - Work Effectiveness Skills Credits: 3
- PHIL 309 - Bioethics Credits: 3
- SOCI 301 - Criminology Credits: 3
- SOCI 302 - Sociology of Delinquency Credits: 3
- SOCI 471 - Prevention and Deterrence of Crime Credits: 3

Total: minimum 34 credits

▲ Leadership and Organizational Development (LODV)

Two required courses (7 credits)

*Understanding the interdisciplinary nature of leadership and its application to personal, organizational and societal development*

- INTS 204 - Leadership Theory and Practice Credits: 3
- INTS 435 - Leadership in a Changing Environment Credits: 4
One course (3 or 4 credits) chosen from:

*Developing a heightened sense of self, including: inner knowledge, core values, intersecting identities, well-being, and impact on others*

- INTS 405 - Women and Leadership Credits: 4
- INTS 355 - Consciousness, Meaning and Life Purpose Credits: 3
- HEAL 312 - Health and Wellness Choices Credits: 3
- PSYC 417 - Science of Well Being Credits: 3

One course (3 or 4 credits) chosen from:

*Understanding ethical approaches to leadership and change, and applying ethics in personal and organizational processes*

- INTS 404 - Ethics and Leadership Credits: 4
- PHIL 305 - Business Ethics Credits: 3
- PHIL 358 - Ethics and Economics Credits: 3

One course (3 or 4 credits) chosen from:

*Understanding team and organizational learning*

- INTS 420 - Work Effectiveness Skills Credits: 3
- INTS 331 - The Nonprofit Sector Credits: 4
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- MGMT 301 - People and Organizations Credits: 3
- PSYC 231 - Social Psychology Credits: 3

One course (3 or 4 credits) chosen from:

*Demonstrating competence in personal and professional communication*

- COMM 201 - Small Group Communication Credits: 3
- COMM 306 - Issues in Intercultural Communication Credits: 3
- COMM 332 - Nonverbal Communication Credits: 3
- MBUS 302 - Managing Information in a Global Economy Credits: 3
- MIS 301 - Introduction to Business Information Systems Credits: 3

Four courses chosen from:

- ACCT 203 - Survey of Accounting Credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- ACCT 303 - Accounting for Decision Making Credits: 3
- BULE 303 - Legal Environment of Business Credits: 3
- BUS 210 - Business Analytics I Credits: 3
- BUS 303 - Develop Professional Skills II: Advanced Elements Credits: 3
- BUS 310 - Business Analytics II Credits: 3
- FNAN 303 - Financial Management Credits: 3
- INTS 304 - Social Movements and Community Activism Credits: 4
- INTS 305 - Conflict Resolution and Transformation Credits: 6
- INTS 331 - The Nonprofit Sector Credits: 4
- INTS 420 - Work Effectiveness Skills Credits: 3
- INTS 431 - Principles of Fund Raising Credits: 4
- MGMT 301 - People and Organizations Credits: 3
- MIS 303 - Introduction to Business Information Systems Credits: 3
- MKTG 303 - Principles of Marketing Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4
- OM 303 - Operations Management Credits: 3
- PSYC 231 - Social Psychology Credits: 3
- SOCI 304 - The Future of Work Credits: 3
- SOM 301 - Business Models: A Communication Approach Credits: 3
- MBUS - any course

Total: 31-41 credits

▲ Social Innovation and Enterprise (SIEN)

Students complete the following course work:

One social innovation course (3-4 credits) chosen from:

- INTS 304 - Social Movements and Community Activism Credits: 4
- PSYC 427 - Community Engagement for Social Change Credits: 3
- SOCI 320 - Social Structure and Globalization Credits: 3

One enterprise course (3-4 credits) chosen from:

- MBUS 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3
- INTS 331 - The Nonprofit Sector Credits: 4
- INTS 435 - Leadership in a Changing Environment Credits: 4

One financial course (3-4 credits) chosen from:

- GOVT 358 - Nonprofit Financial Planning Credits: 4
- MBUS 300 - Accounting in a Global Economy Credits: 3
- INTS 431 - Principles of Fund Raising Credits: 4

One ethics course (3-4 credits) chosen from:
• INTS 404 - Ethics and Leadership Credits: 4
• PHIL 305 - Business Ethics Credits: 3
• PHIL 358 - Ethics and Economics Credits: 3

One creativity course (3-4 credits) chosen from:

• AVT 305 - Creative Processes Credits: 3
• INTS 200 - Visual Thinking and the Creativity Credits: 3-15
• PSYC 335 - Psychology of Creativity and Innovation Credits: 3

One social justice course (3 credits) chosen from:

• INTS 336 - Poverty, Wealth and Inequality in the US Credits: 3
• INTS 337 - Social Justice Consciousness and Personal Transformation Credits: 3
• INTS 436 - Social Justice Education Credits: 4

Electives (12 Credits)

Students choose 12 credits as approved by academic advisor.

Total: 30-35 credits

▲ Social Justice and Human Rights (SJHR)

Students complete the following course work:

Core courses (6 credits)

• INTS 337 - Social Justice Consciousness and Personal Transformation Credits: 3
• INTS 362 - Social Justice and Human Rights Credits: 3

Domestic Rights and Justice (minimum of 6 credits) chosen from:

• INTS 336 - Poverty, Wealth and Inequality in the US Credits: 3
• INTS 347 - Gender Representation in Popular Culture Credits: 3-6
• SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
• WMST 308 - Introduction to Lesbian, Gay, Bisexual, Transgender, Transsexual, and Queer Studies Credits: 3
Global Rights and Justice (6 credits) chosen from:

- INTS 416 - Refugee and Internal Displacement Credits: 3
- ANTH 331 - Refugees Credits: 3
- CONF 394 - Human Rights and Inequality Credits: 3
- CRIM 308 - Human Rights and Justice Credits: 3
- WMST 314 - Stories of Gender and Human Rights Credits: 3

Environmental and ecological justice (3-4 credits) chosen from:

- INTS 334 - Environmental Justice Credits: 4
- INTS 338 - Animal Rights and Humane Education Credits: 3

Activism and social change (7-8 credits) chosen from:

- INTS 304 - Social Movements and Community Activism Credits: 4
- INTS 346 - Art as Social Action Credits: 4
- INTS 436 - Social Justice Education Credits: 4
- PSYC 461 - Special Topics Credits: 1-3
- SOCI 307 - Social Movements and Political Protest Credits: 3

Elective courses (9 credits) chosen from:

- Any course chosen from the above categories not already taken to meet a concentration requirement
- AFAM 390 - Special Topics in African and African American Studies Credits: 3 (when topic is relevant with prior written approval of advisor)
- ANTH 365 - Human Variation Credits: 3
- ANTH 370 - Environment and Culture Credits: 3
- ANTH 488 - Gender, Sexuality, and Culture Credits: 3
- COMM 365 - Gender, Race, and Class in the Media Credits: 3
- CULT 320 - Globalization and Culture Credits: 3
- EDUC 203 - Disability in American Culture Credits: 3
- EVPP 436 - The Human Dimensions of Global Climate Change Credits: 3
- FRLN 385 - Multilingualism, Identity, and Power Credits: 3
- GCH 496 - Violence in Today's Society Credits: 3
- GOVT 445 - Human Rights Credits: 3
- HIST 337 - Race and Gender in American Sports Credits: 3
- HIST 340 - Basketball and the American Experience Credits: 3
- HIST 462 - Women in Islamic Society Credits: 3
- INTS 210 - Sustainable World Credits: 4
- INTS 302 - Argument and Advocacy Credits: 6
• INTS 305 - Conflict Resolution and Transformation Credits: 6
• INTS 310 - Violence and Gender Credits: 3-6
• INTS 315 - Spirituality and Conflict Transformation Credits: 6
• INTS 316 - Introduction to Childhood Studies Credits: 4
• INTS 320 - Construction of Differences: Race, Class, and Gender Credits: 6
• INTS 435 - Leadership in a Changing Environment Credits: 4
• INTS 361 - Neighborhood, Community, and Identity Credits: 3-6
• PHIL 243 - Global Environmental Ethics Credits: 3
• SOCI 307 - Social Movements and Political Protest Credits: 3
• SOCI 315 - Contemporary Gender Relations Credits: 3
• SOCI 320 - Social Structure and Globalization Credits: 3
• SOCI 355 - Social Inequality Credits: 3
• SOCI 382 - Education in Contemporary Society Credits: 3
• WMST 200 - Introduction to Women and Gender Studies Credits: 3
• WMST 307 - Women and Work Credits: 3
• WMST 402 - Queer Theory Credits: 3
• other relevant course with prior written approval of advisor

Total: minimum 37 credits

▲ Social Science for Education (SSED)

Complete the following:

• ECON 103 - Contemporary Microeconomic Principles Credits: 3
• ECON 104 - Contemporary Macroeconomic Principles Credits: 3
• GGS 102 - Physical Geography Credits: 3
• GOVT 103 - Introduction to American Government Credits: 3
• HIST 121 - Formation of the American Republic Credits: 3
• HIST 125 - Introduction to World History Credits: 3
• HIST 391 - History of Virginia to 1800 Credits: 3 or HIST 392 - History of Virginia Since 1800 Credits: 3 or HIST 122 - Development of Modern America Credits: 3

9 credits of upper-division HIST coursework

6 credits of GGS coursework

15 credits chosen from:

• any GOVT course
- **INTS 302** - Argument and Advocacy Credits: 6
- **INTS 422** - An Experiential Approach to American Foreign Policy Credits: 3-6

Total: 51 credits

▲ **Individualized Concentration (IND)**

With approval of the assistant dean of academic affairs, students may construct an individualized concentration.

Total: minimum 30 credits

**Electives**

Any remaining credits may be completed with elective courses to bring the degree total to 120.

**Degree Total: Minimum 120 credits**

**Bachelor of Science**

**Integrative Studies, BS**

**Banner Codes:** LA-BS-INTS  
Web: integrative.gmu.edu  

College: **College of Humanities and Social Sciences**  
Department: **School of Integrative Studies**  
The bachelor of science degree in integrative studies is based on intensive, interdisciplinary learning communities coordinated with traditional academic programs. The result is an integrated program of study that emphasizes collaboration, experiential learning, and self-reflection. The degree program requires mastery of eight essential competencies: communication, global understanding, group interaction, aesthetic awareness, critical thinking, civic engagement, digital literacy, and well-being.

Students must fulfill all requirements for bachelor's degrees as well as Mason Core requirements. Students who transfer into the School of Integrative Studies should consult with an advisor on what they need to take to complete Mason Core requirements.

**Degree Requirements**

**Learning communities (24 credits)**

Learning communities are interdisciplinary courses that combine subjects often taught in separate courses into a single course of 3-9 credits. In learning communities, faculty and students explore various ways to understand a topic. Learning communities are structured to help promote a greater sense of identity with an academic community. Hallmarks of School of Integrative Studies
learning communities are team teaching, collaborative projects, emphasis on writing and critical thinking, and opportunity for independent study. They often include experiential learning, either as an integral part of the class or as an optional add on.

Experiential learning (12 credits)

The requirement in experiential learning reflects the School of Integrative Studies' commitment to provide educational experiences that prepare graduates for the workplace and the demands of active and responsible citizenship. The workplace is as viewed as a site of instruction, one where students are exposed to the variety of skills needed to succeed. Through experiential learning, students combine work experience with academic study so that each will enrich the other.

Experiential learning includes internships, study abroad, community service learning, course field trips, and other field study opportunities. The learning sites may change each semester and are usually off campus. George Mason provides student liability insurance for the experiential learning internship, but students are responsible for their own transportation and health care. Accident and health insurance is available from George Mason.

No more than 24 credits of experiential learning can count toward a student's total credits for graduation.

Electives (0-15 credits)

If students take courses that fulfill more than one degree requirement (e.g. Learning Communities, Experiential Learning, Concentration, or Mason Core), they may need to take additional electives to reach the total of 120 credits required for a BS degree.

Concentration (30-53 credits)

A concentration is the equivalent of a major in a traditional degree program. Students choose from an established interdisciplinary concentration below or create with faculty an individualized program of study to fit their interests and needs. The coursework for the concentration consists of traditional courses, learning communities, independent study, and experiential learning. Where applicable, courses applied to a concentration can also be used to fulfill the credits required in learning communities or experiential learning. Students must present a minimum GPA of 2.00 in courses applied to the concentration.

▲ Applied Global Conservation (AGCN)

Three core courses (16 credits) in global conservation

- INTS 210 - Sustainable World Credits: 4
- INTS 401 - Conservation Biology Credits: 6
- INTS 402 - Plants and People - Sustenance, Ceremony, and Sustainability Credits: 6 or INTS 403 - Conservation Behavior Credits: 6

One additional global environmental course (3 credits) chosen from:

- ANTH 370 - Environment and Culture Credits: 3
- ANTH 400 - Engaging the World: Anthropological Perspectives Credits: 3
One course in statistics (3-4 credits) chosen from:

- STAT 250 - Introductory Statistics I Credits: 3
- BIOL 312 - Biostatistics Credits: 4

One additional learning community (3-6 credits) chosen from:

In addition to the courses below, INTS 375, 395, and 398 may be applied to the concentration when the topic is relevant to conservation studies.

- INTS 305 - Conflict Resolution and Transformation Credits: 6
- INTS 311 - The Mysteries of Migration: Consequences for Conservation Credits: 6
- INTS 334 - Environmental Justice Credits: 4
- INTS 331 - The Nonprofit Sector Credits: 4

Five courses (16 credits) in natural science and policy

Students may complete this requirement through regular coursework or through either option of the Smithsonian-Mason Semester Program.

Regular Coursework (16 credits)

- INTS 390 - Internship Credits: 1-6 or INTS 395 - Field-Based Work Credits: 3
- BIOL 308 - Foundations of Ecology and Evolution Credits: 5
- BIOL 310 - Biodiversity Credits: 3
- BIOL 330 - Biodiversity Lab and Recitation Credits: 2
- BIOL 377 - Applied Ecology Credits: 3 or EVPP 361 - Introduction to Environmental Policy Credits: 3

Smithsonian-Mason Semester Program (16 credits)

Students complete 16 credits offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute. In this integrated series of courses, taken together in one semester, students live on site at the institute in Front Royal, VA. Students who apply this coursework to the concentration cannot also apply it to the minor in Conservation Studies.

Conservation, Biodiversity and Society option

- CONS 320 - Conservation in Practice Credits: 3
- CONS 401 - Conservation Theory Credits: 3
- CONS 402 - Applied Conservation Credits: 4
- CONS 410 - Human Dimensions in Conservation Credits: 3
- CONS 490 - RS: Integrated Conservation Strategies Credits: 3

Wildlife Ecology and Conservation option

- CONS 320 - Conservation in Practice Credits: 3
- CONS 403 - Ecology and Conservation Theory Credits: 3
- CONS 404 - Monitoring and Assessment of Biodiversity Credits: 4
- CONS 411 - Science Communication for Conservation Credits: 3
- CONS 491 - RS: Comprehensive Conservation Planning Credits: 3

Total: 41-45 credits

▲ Life Sciences (LIFS)

Students must complete one of the following emphases.

Preoccupational therapy emphasis

- One SOCI course (3 credits)
- BIOL 124 - Human Anatomy and Physiology Credits: 4
- BIOL 125 - Human Anatomy and Physiology Credits: 4
- PHIL 151 - Introduction to Ethics Credits: 3 or PHIL 309 - Bioethics Credits: 3
- PSYC 100 - Basic Concepts in Psychology Credits: 3
- PSYC 211 - Developmental Psychology Credits: 3
- PSYC 325 - Abnormal Psychology Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3

At least one course chosen from:

- INTS 378 - Medicine, Justice, and Public Policy Credits: 3
- INTS 410 - Contemporary Health Issues Credits: 3-18 (must take at least 4 credits)
- INTS 440 - Death, Dying, and Decision Making Credits: 3

Emphasis Total: minimum 30 credits

Premedical emphasis
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 483 - General Biochemistry Credits: 4
- CHEM 211 - General Chemistry I Credits: 3 and CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3 and CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 314 - Organic Chemistry II Credits: 3 and CHEM 318 - Organic Chemistry Lab II Credits: 2
- MATH 110 - Introductory Probability Credits: 3 or MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 111 - Linear Mathematical Modeling Credits: 3 or MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 243 - College Physics Credits: 3 and PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3 and PHYS 246 - College Physics Lab Credits: 1
- PHIL 151 - Introduction to Ethics Credits: 3 or PHIL 309 - Bioethics Credits: 3
- PSYC 100 - Basic Concepts in Psychology Credits: 3

Emphasis Total: 50-52 credits

Predental emphasis

- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
- CHEM 211 - General Chemistry I Credits: 3 and CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 465 - Biochemistry Lab Credits: 2
- PHYS 103 - Physics and Everyday Phenomena I Credits: 4
  or PHYS 243 - College Physics Credit: 3 and PHYS 244 - College Physics Lab Credits: 1
- PHYS 104 - Physics and Everyday Phenomena II Credits: 4
  or PHYS 245 - College Physics Credits: 3 and PHYS 246 - College Physics Lab Credits: 1
- PHIL 151 - Introduction to Ethics Credits: 3 or PHIL 309 - Bioethics Credits: 3

Emphasis Total: 43 credits

Prepharmacy emphasis

- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
• CHEM 211 - General Chemistry I Credits: 3 and CHEM 213 - General Chemistry Laboratory I Credits: 1
• CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 314 - Organic Chemistry II Credits: 3
• CHEM 318 - Organic Chemistry Lab II Credits: 2
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• PHIL 151 - Introduction to Ethics Credits: 3 or PHIL 309 - Bioethics Credits: 3
• PHYS 103 - Physics and Everyday Phenomena I Credits: 4 or PHYS 243 - College Physics Credits: 3 and PHYS 244 - College Physics Lab Credits: 1
• PHYS 104 - Physics and Everyday Phenomena II Credits: 4 or PHYS 245 - College Physics Credits: 3 and PHYS 246 - College Physics Lab Credits: 1
• STAT 250 - Introductory Statistics I Credits: 3

Emphasis Total: 48 credits

Prephysical therapy emphasis

• BIOL 103 - Introductory Biology I Credits: 4
• BIOL 124 - Human Anatomy and Physiology Credits: 4
• BIOL 125 - Human Anatomy and Physiology Credits: 4
• PSYC 100 - Basic Concepts in Psychology Credits: 3
• STAT 250 - Introductory Statistics I Credits: 3
• CHEM 103 - Chemical Science in a Modern Society Credits: 4 or CHEM 211 - General Chemistry I Credits: 3 and CHEM 213 - General Chemistry Laboratory I Credits: 1
• CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 4 or CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1
• PHIL 151 - Introduction to Ethics Credits: 3 or PHIL 309 - Bioethics Credits: 3
• PHYS 103 - Physics and Everyday Phenomena I Credits: 4 or PHYS 243 - College Physics Credits: 3 and PHYS 244 - College Physics Lab Credits: 1
• PHYS 104 - Physics and Everyday Phenomena II Credits: 4 or PHYS 245 - College Physics Credits: 3 and PHYS 246 - College Physics Lab Credits: 1
• PSYC 211 - Developmental Psychology Credits: 3 or PSYC 325 - Abnormal Psychology Credits: 3

Emphasis Total: 40 credits

Prephysician’s assistant emphasis

• BIOL 124 - Human Anatomy and Physiology Credits: 4
• BIOL 125 - Human Anatomy and Physiology Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 246 - Introductory Microbiology Credits: 3
- BIOL 313 - Human Genetics for the Social Sciences Credits: 3
- CHEM 211 - General Chemistry I Credits: 3 and CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 465 - Biochemistry Lab Credits: 2
- PSYC 100 - Basic Concepts in Psychology Credits: 3
- PSYC 211 - Developmental Psychology Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3
- PHIL 151 - Introduction to Ethics Credits: 3 or PHIL 309 - Bioethics Credits: 3

Emphasis Total: 49 credits

Total: 30-49 credits

▲ Natural Science for Education (NSED)

Required science courses (19 credits)

- any PHYS course (at least 3 credits)
- BIOL 103 - Introductory Biology I Credits: 4 or BIOL 104 - Introductory Biology II Credits: 4
- CHEM 211 - General Chemistry I Credits: 3 and CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1
- GEOL 101 - Introductory Geology I Credits: 4

One analytical reasoning course (3-4 credits) chosen from:

- MATH 106 - Quantitative Reasoning Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3

Six additional science courses (20-30 credits) chosen from:
• ASTR 111 - Introductory Astronomy: The Solar System Credits: 3 and ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
• ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3 and ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1
• BIOL 124 - Human Anatomy and Physiology Credits: 4
• BIOL 125 - Human Anatomy and Physiology Credits: 4
• BIOL 213 - Cell Structure and Function Credits: 4
• BIOL 308 - Foundations of Ecology and Evolution Credits: 5
• BIOL 310 - Biodiversity Credits: 3
• CHEM 313 - Organic Chemistry Credits: 3 and CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 314 - Organic Chemistry II Credits: 3 and CHEM 318 - Organic Chemistry Lab II Credits: 2
• CHEM 321 - Elementary Quantitative Analysis Credits: 4
• CHEM 331 - Physical Chemistry I Credits: 3 and CHEM 336 - Physical Chemistry Lab I Credits: 2
• CHEM 332 - Physical Chemistry II Credits: 3 and CHEM 337 - Physical Chemistry Lab II Credits: 2
• CHEM 341 - Fundamental Inorganic Chemistry Credits: 3
• GEOL 102 - Introductory Geology II Credits: 4
• GEOL 309 - Introduction to Oceanography Credits: 3
• GGS 102 - Physical Geography Credits: 3
• GGS 309 - Meteorology and Climate Credits: 3

Total: 42-53 credits

▲ Individualized Concentration (IND)

With approval of the assistant dean of academic affairs, students may construct an individualized concentration.

Total: 30 credits (minimum)

Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

Degree Total: Minimum 120 credits

Non-Degree

Childhood Studies Minor
The interdisciplinary minor in childhood studies is designed for students who have a child-related focus in their major and for those who want to explore the topic of childhood. This minor focuses on the study of issues concerning children and their representations, including their experiences in society within historical and contemporary cultures and global contexts. The curriculum fosters thinking about childhood theory, research, policy -- and the practical applications of this knowledge to decisions regarding children and youth. The minor provides enough flexibility for students to choose relevant courses in keeping with their primary interests.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

**Minor Requirements**

Students must have a minimum grade of 2.00 in each of the courses applied to the minor. Eight credits of course work must be unique to the minor.

**Two core courses (at least 7 credits)**

- INTS 312 - Images and Experiences of Childhood: Social Construct, Literature, and Film Credits: 3-6 (Only 4 credits may be applied to the minor.)
- INTS 316 - Introduction to Childhood Studies Credits: 4

**Three elective courses (9 credits) chosen from:**

- ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3
- CRIM 302 - Delinquency Credits: 3
- CRIM 406 - Family Law and the Justice System Credits: 3
- EDUC 302 - Human Growth and Development Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- INTS 319 - Contemporary Youth Studies Credits: 3
- INTS 321 - Parent-Child Relations Credits: 3
- PSYC 211 - Developmental Psychology Credits: 3
- PSYC 313 - Child Development Credits: 3
- PSYC 314 - Adolescent Development Credits: 3
- PSYC 414 - Behavior Disorders of Childhood Credits: 3
- SOCI 302 - Sociology of Delinquency Credits: 3
- SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
The School of Integrative Studies interdisciplinary minor in consciousness and transformation provides students with a well-grounded understanding of the nature of human consciousness, including both the historical foundations and modern research findings. Through the required coursework, students develop an ability to implement personal practices that foster deeper self-awareness, the regulation of stress factors in his or her life, and an emerging sense of meaning for his or her life. Students will learn to creatively and effectively apply principles from the exploration of consciousness and transformation to his or her own field of study.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students must have a minimum grade of 2.00 in each course applied to the minor. Eight credits of course work must be unique to the minor.

Two core courses (6 credits)

- INTS 355 - Consciousness, Meaning and Life Purpose Credits: 3
- INTS 455 - Consciousness and Transformation in Action Credits: 3

Two to three electives courses (minimum 9 credits) chosen from:

- ANTH 400 - Engaging the World: Anthropological Perspectives Credits: 3
- AVT 204 - Visual Thinking Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- GCH 350 - Health Promotion and Education Credits: 3
- MUSI 401 - Impact of the Arts on Civilization Credits: 3
- INTS 305 - Conflict Resolution and Transformation Credits: 6
- INTS 315 - Spirituality and Conflict Transformation Credits: 6
- INTS 346 - Art as Social Action Credits: 4
- INTS 404 - Ethics and Leadership Credits: 4
- INTS 435 - Leadership in a Changing Environment Credits: 4
- INTS 446 - Art, Beauty, and Culture Credits: 3-6
- PHIL 378 - Reason, Science and Faith in the Modern Age Credits: 3
- PRLS 300 - People with Nature Credits: 3
- RELI 337 - Mysticism: East and West Credits: 3
- RELI 341 - Global Perspectives on Spirituality and Healing Credits: 3
- THR 395 - Theater as the Life of the Mind Credits: 3

Total: 15 credits

Conservation Studies Minor (CHSS)

Banner Code: CNST
Web: smconservation.gmu.edu

College: College of Humanities and Social Sciences
Department: School of Integrative Studies

The minor in conservation studies is designed for undergraduate students who wish to augment their main academic program with conservation studies taught in an experiential manner. There are two options by which students can complete the minor: the Semester whose focus is on "Conservation, Biodiversity and Society" or the Semester that focuses on "Wildlife Ecology and Conservation". Both Semesters are grounded in natural science, and offer a collection of five interdisciplinary courses that combine public policy, sociology, conflict resolution, and global awareness with hands-on experience. Students are in residence at the Smithsonian Conservation Biology Institute in Front Royal, Virginia, and are taught by Mason faculty, Smithsonian scientists and practitioners.

The minor is available only to students who enroll in either of the Smithsonian Mason Semesters, semester-long residential programs held at the Smithsonian Conservation Biology Institute in Front Royal, VA. The Semesters are offered jointly by the College of Humanities and Social Sciences and the College of Science under the auspices of the Smithsonian-Mason School of Conservation. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students pursuing this minor must complete either of the options described below with a minimum grade of 2.00 in each course. Eight credits of course work must be unique to the minor.

Conservation, Biodiversity and Society option (16 credits)

Students complete five required courses.

- CONS 320 - Conservation in Practice Credits: 3
- CONS 401 - Conservation Theory Credits: 3
- CONS 402 - Applied Conservation Credits: 4
- CONS 410 - Human Dimensions in Conservation Credits: 3
Wildlife Ecology and Conservation option (16 credits)

Students complete five required courses.

- CONS 320 - Conservation in Practice Credits: 3
- CONS 403 - Ecology and Conservation Theory Credits: 3
- CONS 404 - Monitoring and Assessment of Biodiversity Credits: 4
- CONS 411 - Science Communication for Conservation Credits: 3
- CONS 491 - RS: Comprehensive Conservation Planning Credits: 3

Total: 16 credits

Leadership Minor

Banner Code: LSHP
Web: integrative.gmu.edu

College: College of Humanities and Social Sciences
Department: School of Integrative Studies

Faculty

Holder, Lennon, Lucas, Owen (director), Wagner

The interdisciplinary minor in leadership prepares students for transformative leadership in campus, local, national, and global contexts. Interdisciplinary and integrative classes examine leadership from multiple perspectives and disciplines, offering an understanding of socially-responsible leadership with an emphasis on community action. Through the required coursework and experiential learning, students critically examine diverse theories, research, and perspectives on leadership and are encouraged to explore topics such as social change and globalization, creative conflict resolution, the nature of power, oppression and influence, innovation, and systemic leadership. Civic engagement and multicultural competence are viewed as necessary requirements for leadership. The Leadership Minor is open to students in all academic programs, schools, and majors.

The minor in leadership may be pursued concurrently with any undergraduate major.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students pursuing this minor must complete a minimum of 15 credits of coursework with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor.

Three or four required core courses (11 - 13 credits)
At least one elective course (3 to 4 credits) chosen from:

Other courses may be applied to this requirement with prior written approval of the director.

- AVT 309 - Art as Social Action Credits: 3
- AVT 370 - Entrepreneurship in the Arts Credits: 3
- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
- EDUC 303 - Politics of American Education Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- FNAN 401 - Advanced Financial Management Credits: 3
- GOVT 430 - Comparative Political Leadership Credits: 3
- MLSC 400 - Leadership and Management of Health Care Credits: 3
- IT 304 - IT in the Global Economy Credits: 3
- MGMT 413 - Organizational Development and Management Consulting Credits: 3
- MIS 435 - Knowledge Management Credits: 3
- MKTG 471 - Marketing Management Credits: 3
- MLSC 300 - Applied Leadership I Credits: 1
- MLSC 400 - Leadership and Management Credits: 3
- MLSC 402 - Leadership and Ethics Credits: 3
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- MBUS 302 - Managing Information in a Global Economy Credits: 3
- MBUS 305 - Introduction to International Business Credits: 3
- MBUS 306 - Managing Projects and Operations Credits: 3
- PRLS 316 - Leadership and Outdoor Education Credits: 3
- PSYC 231 - Social Psychology Credits: 3
- PSYC 333 - Industrial and Organizational Psychology Credits: 3
- SOCI 307 - Social Movements and Political Protest Credits: 3
- TOUR 330 - Resort Management Credits: 3

Total: minimum of 15 credits

**Multimedia Minor**

Banner Code: MM

College: *College of Humanities and Social Sciences*
Department: *School of Integrative Studies*

**Faculty**

Chung, Higgins, Lont, Martin, K. Scott, L. Smith (director), Weinberger, White
In the multimedia minor, students learn how to create original work and communicate with others through the fusion of images, text, sound, and video. Students analyze and incorporate into their productions contemporary design principles and current software applications. As part of this process, students are encouraged to focus on how multimedia technologies, which offer new tools for investigating and disseminating ideas, can enhance undergraduate research and writing. These skills, now important in most academic disciplines, are also increasingly valuable not only in the specialized information technology industries, but also in business, education, and politics.

This minor is not available to students majoring in AVT with a concentration in digital arts.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

**Minor Requirements**

Students pursuing this minor must complete at least 18 credits of coursework with a minimum GPA of 2.00. Eight credits of coursework must be unique to the minor.

**Core courses (8-9 credits)**

Two courses (5 credits)

- AVT 104 - Two-Dimensional Design and Color Credits: 4
- COMM 157 - Digital Media Workshop Credits: 1 or INTS 195 - Field-Based Work Credits: 1

One course (3-4 credits) chosen from:

- AVT 180 - New Media in the Creative Arts Credits: 3
- INTS 249 - Digital Literacy Credits: 4

**Elective courses (9-11 credits)**

No more than six credits can be taken in any one college or department.

- AVT 280 - Introduction to New Media Arts Credits: 4
- AVT 382 - 2D Experimental Animation Credits: 3
- COMM 360 - Digital Postproduction Credits: 3
- COMM 435 - Digital Communication Credits: 3
- INTS 345 - Introduction to Multimedia Credits: 5
- ENGH 376 - Rhetoric and New Media Credits: 3
- ENGH 377 - Digital Creative Writing Credits: 3
- ENGH 497 - Topics in Creative Writing Credits: 3
- INTS 348 - Digital Futures Credits: 3-6
- INTS 445 - Multimedia Design Credits: 5
Nonprofit Studies Minor

Banner Code: NPS
Web: integrative.gmu.edu

College: College of Humanities and Social Sciences
Department: School of Integrative Studies

Faculty

Andere, Johnson, Unruh

Nonprofit organizations significantly contribute to the provision of human services, access to the arts, education, recreation and health care, and protection of the environment. Effective nonprofit organizations provide direct services, influence public policy and build a civil society. The interdisciplinary minor in nonprofit studies is designed to introduce students to the theoretical foundations and practical skills needed to be successful in this sector. Through heavy emphasis on experiential learning with the many excellent nonprofit organizations in our region, students learn to apply theory within the context of today's complex and rapidly changing environment.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students pursuing this minor must complete 15 credits of coursework with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor.

Three core courses (11-12 credits)

Two required core courses (8 credits)

These courses are approved by the School of Integrative Studies to earn experiential learning credits.

- INTS 331 - The Nonprofit Sector Credits: 4
- INTS 431 - Principles of Fund Raising Credits: 4

One additional course (3-4 credits) chosen from:

- COMM 389 - Public Relations for Associations and Nonprofits Credits: 3
- GOVT 358 - Nonprofit Financial Planning Credits: 4
- INTS 435 - Leadership in a Changing Environment Credits: 4
Elective courses (3-4 credits) chosen from:

INTS 304, 390, and 490 are approved by the School of Integrative Studies to earn experiential learning credits.

- AVT 370 - Entrepreneurship in the Arts Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- COMM 389 - Public Relations for Associations and Nonprofits Credits: 3 (if not taken as required course)
- CONF 101 - Conflict and Our World Credits: 3
- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
- ECON 309 - Economic Problems and Public Policies Credits: 3
- GOVT 358 - Nonprofit Financial Planning Credits: 4
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- INTS 210 - Sustainable World Credits: 4
- INTS 211 - Introduction to Conservation Studies Credits: 3-6
- INTS 304 - Social Movements and Community Activism Credits: 4
- INTS 305 - Conflict Resolution and Transformation Credits: 6
- INTS 375 - Special Topics Credits: 1-18 (when the topic is relevant with prior written approval of the director)
- INTS 390 - Internship Credits: 1-6 (when the topic is relevant with prior written approval of the director)
- INTS 397 - Add-On Experiential Learning Credits: 1-3
- INTS 410 - Contemporary Health Issues Credits: 3-18
- INTS 422 - An Experiential Approach to American Foreign Policy Credits: 3-6
- INTS 435 - Leadership in a Changing Environment Credits: 4 (if not taken as required course)
- INTS 490 - Internship Credits: 1-6 (when the topic is relevant with prior written approval of the director)
- PSYC 427 - Community Engagement for Social Change Credits: 3
- SOCI 492 - Sociology of Organizations Credits: 3
- SOCW 483 - Selected Approaches to Social Work Intervention Credits: 3
- TOUR 220 - Introduction to Event Management Credits: 3

Total: 15 credits

Social Justice Minor

Banner Code: SOCJ
Web: integrative.gmu.edu

College: College of Humanities and Social Sciences
Department: School of Integrative Studies The minor in social justice engages students in both a critical examination of various forms of injustice (such as poverty, racism, and speciesism, and environmental degradation) and an exploration of strategies for creating and sustaining an equitable and just world. The minor is interdisciplinary in nature, drawing on disciplines as distinct as critical race studies, critical animal studies, and environmental science. It is designed particularly to help students consider the intersectional nature of all types of exploitation and their related movements for liberation.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements
Students pursuing this minor must complete 16-22 credits of course work with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor.

Four core courses (13-16 credits)

Social justice (6 credits)
- INTS 336 - Poverty, Wealth and Inequality in the US Credits: 3
- INTS 337 - Social Justice Consciousness and Personal Transformation Credits: 3
- INTS 362 - Social Justice and Human Rights Credits: 3

Environmental or ecological justice course (3-6 credits)
- INTS 334 - Environmental Justice Credits: 4
- INTS 338 - Animal Rights and Humane Education Credits: 3
- INTS 402 - Plants and People - Sustenance, Ceremony, and Sustainability Credits: 6

Activism and advocacy course (4 credits)
- INTS 304 - Social Movements and Community Activism Credits: 4
- INTS 346 - Art as Social Action Credits: 4
- INTS 436 - Social Justice Education Credits: 4

One elective course (3-6 credits)
- CONF 394 - Human Rights and Inequality Credits: 3
- GOVT 445 - Human Rights Credits: 3
- HIST 337 - Race and Gender in American Sports Credits: 3
- INTS 210 - Sustainable World Credits: 4
- INTS 300 - Law and Justice Credits: 3
- INTS 304 - Social Movements and Community Activism Credits: 4
- INTS 310 - Violence and Gender Credits: 3-6
- INTS 336 - Poverty, Wealth and Inequality in the US Credits: 3
- INTS 346 - Art as Social Action Credits: 4
- INTS 347 - Gender Representation in Popular Culture Credits: 3-6
- INTS 362 - Social Justice and Human Rights Credits: 3
- INTS 402 - Plants and People - Sustenance, Ceremony, and Sustainability Credits: 6
- INTS 416 - Refugee and Internal Displacement Credits: 3
- INTS 435 - Leadership in a Changing Environment Credits: 4
- INTS 436 - Social Justice Education Credits: 4
- PSYC 427 - Community Engagement for Social Change Credits: 3
- SOCI 307 - Social Movements and Political Protest Credits: 3
- SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
- SOCI 315 - Contemporary Gender Relations Credits: 3
- SOCI 320 - Social Structure and Globalization Credits: 3
- SOCI 355 - Social Inequality Credits: 3
- SOCI 382 - Education in Contemporary Society Credits: 3
- WMST 200 - Introduction to Women and Gender Studies Credits: 3
- WMST 308 - Introduction to Lesbian, Gay, Bisexual, Transgender, Transsexual, and Queer Studies Credits: 3
- WMST 330 - Theoretical Perspectives in Women and Gender Studies Credits: 3
- WMST 402 - Queer Theory Credits: 3

Total: 16-22 credits

Smithsonian Mason School of Conservation

Smithsonian Conservation Biology Institute
1500 Remount Road
Front Royal, VA 22630
Phone: 540-635-0115 (direct)
Web: smconservation.gmu.edu

Administration

Kathleen Q. Johnson, Assistant Vice President and Executive Director
Miranda Mosley, Program Support Technician
Lisa Des Jardins, Academic Program Advisor, Smithsonian-Mason Semester
Erin Brandt, Accommodations/Community Director

Faculty

Professors: Jones, Lovejoy
Associate Professors: Aguirre, Balint, Birchard, Gabel, Jonas, Parsons, Wingfield, Wood
Term Associate Professors: Sklarew
Term Assistant Professor: DeLuycker, Lessard-Pilon, McNeil, Smith, Luther

Affiliate Faculty

Akre, Alonso, Brown, Buff, Christen, Dallmeier, Kolowski, Leimgruber, McShea, Monfort, Pukazhenthi

Courses

This Smithsonian-Mason School of Conservation offers all courses designated CONS listed in the Courses section of this catalog. All courses are based at the Smithsonian Conservation Biology Institute in Front Royal, Virginia.

About Smithsonian-Mason School of Conservation

The Smithsonian Institution and George Mason University partnered to establish the Smithsonian-Mason School of Conservation (SMSC) to provide innovative education for current and future generations of global conservation professionals, leaders, and practitioners. Already the SMSC has established itself as a benchmark for innovative education, as instruction focuses on analytical and practical skill building to address the changing threats to and opportunities for conserving biodiversity. The SMSC engages undergraduates, graduate students and professionals from around the world in a range of compelling programs in conservation biology focused on developing the knowledge and implementing the practices required to address some of the greatest threats to biodiversity facing society today.
SMSC's programs, co-developed and co-taught by SCBI researchers and Mason faculty, are delivered at SCBI's 3200-acre facility along the Blue Ridge in Front Royal, Virginia, one of the premier conservation research facilities in the world, housing innovative research on some of the rarest species on earth. Students live and learn with prominent research scientists, educators, and conservation practitioners. The undergraduate program provides an innovative semester immersion approach to conservation studies in a learning community framework taking advantage of proximity to SCBI's scientists, laboratories, and charismatic fauna. Graduate programs are based on a one- to two-week intensive residential course format for geared to working professionals with the opportunity to gain a graduate certificate from multiple courses and a path to graduate degrees. The SMSC was officially dedicated on October 18th of 2012 opening major new academic, residential and dining LEED gold certified facilities. The residential and dining hall were recently named the G. T. Halpin Family Living and Learning Community.

Undergraduate Program

The Smithsonian-Mason Semester is a 16-credit undergraduate program in which students can earn a Conservation Studies Minor (CHSS), or apply all 16 credits to certain Mason degrees. There are currently two 16 credit tracks: "Conservation, Biodiversity and Society" and "Wildlife Ecology and Conservation". See the Programs of Study section of this catalog for details on the minor and the Courses section for details on the courses (select the course prefix CONS). Grounded in natural science, this interdisciplinary semester brings public policy, sociology, conflict resolution, and global awareness to the learning environment. Students majoring in the Integrative Studies, BS, Biology, BS, Environmental Science, BS, Environmental and Sustainability Studies, BA (CHSS), Applied Science, BAS, and Global Affairs, BA can fulfill major requirements and/or Mason Core requirements with Smithsonian-Mason Semester (CONS) credits subject to college approval.

Graduate Program

Smithsonian-Mason School of Conservation graduate courses offer in-depth explorations of advanced and highly specialized topics in applied conservation studies. Courses cover a diverse selection of topics focusing on biodiversity conservation, ranging from adaptive management to statistics in ecology and conservation, to non-invasive genetic techniques. All current courses take place as intensive one or two-week sessions and participants are in residence on the SMSC grounds in Front Royal, VA.

Although the Smithsonian-Mason School of Conservation does not presently offer a graduate degree, coursework may be applied to George Mason University's Environmental Science and Policy, MS concentration in Conservation Science and Policy. In many cases, graduate students will have the unique opportunity to learn alongside conservation professionals currently working in the field. The unparalleled resources at the facilities draw researchers and practitioners from around the world, and this offers a rare opportunity for students and professionals to interact to mutual benefit in a hands-on situation and to receive informal mentoring from experienced practitioners.

Graduate Certificate

Applied Conservation Science Graduate Certificate

Banner Code: LA-CERG-ACNS

Web: smconservation.gmu.edu

The graduate certificate in applied conservation science provides students with hands-on education in conservation science. The courses in this program are all residential, full-day, one- or two-week intensive courses held at the Smithsonian Mason School of Conservation in Front Royal, Virginia. This certificate is designed for early to mid-career conservation professionals working in government, non-governmental organizations, and research institutions worldwide.

Students acquire essential skills in conservation research and practice while developing a crucial understanding of the principles and philosophies underlying effective conservation and biodiversity programs. They learn how to apply analysis techniques and tools to address those questions and evaluate conservation outcomes.
Upon completion of the certificate, students will have developed practical and analytical skills applicable to a wide range of programs in applied conservation science research, policy, and practice -- from single-species protection and landscape-level restoration and management to community conservation initiatives and human-wildlife conflict mitigation.

The graduate certificate in applied conservation science may be pursued on a part-time or full-time basis.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the graduate certificate in applied conservation science, see Application Requirements and Deadlines on the departmental web site.

Certificate requirements

Two core courses (6 credits)

- CONS 620 - Spatial Ecology, Geospatial Analysis & Remote Sensing for Conservation Credits: 3
- CONS 625 - Statistics for Ecology and Conservation Biology Credits: 3

One course (3 credits) in human dimensions chosen from:

- CONS 640 - Adaptive Management for Conservation Success Credits: 3
- CONS 660 - Effective Conservation Leadership Credits: 3
- CONS 665 - Conservation Conflict Resolution Credits: 3
- CONS 697 - Special Topics in Conservation Credits: 1-3

Electives (6 credits)

CONS 630 and CONS 697 may be repeated for credit when topics are different.

- CONS 630 - Species Monitoring & Conservation Credits: 3
- CONS 635 - Non-Invasive Genetic Techniques in Wildlife Conservation Credits: 2
- CONS 640 - Adaptive Management for Conservation Success Credits: 3 (if not used to fulfill human dimensions requirement)
- CONS 660 - Effective Conservation Leadership Credits: 3 (if not used to fulfill human dimensions requirement)
- CONS 665 - Conservation Conflict Resolution Credits: 3 (if not used to fulfill human dimensions requirement)
- CONS 697 - Special Topics in Conservation Credits: 1-3

Total: 15 credits
Sociology and Anthropology

Phone: 703-993-1440

Web: soan.gmu.edu

Faculty

Emeritus faculty: Black, Dumont, Golomb, Williams (anthropology); Borkman (sociology)

Professors: Schiller, Seligmann (anthropology); Best, Dennis, Jacobs, Kurtz, Witte, Scimecca (sociology)

Associate professors: Bickford, Trencher (anthropology); Bockman, Dale, Davis, Guagnano, Hanrahan, Kim (sociology)

Assistant professors: Hughes Rinker, Klaus, Mantz, Sadana, Takahashi, Temple (anthropology)

Term associate professor: Masters

Term assistant professor: Storelli (sociology)

Adjuncts: Gerber, Hodges, Lowry (anthropology); Mitcho, Nambiar, Pearlman, Smith (sociology)

Affiliate faculty: Avruch, Blum, Usher (anthropology); Goldstone, Johnson, Nambiar, Sandole-Staroste, Smith, Spalter-Roth (sociology)

Courses

This department offers all courses designated ANTH, SOAN, and SOCI in the Courses section of this catalog.

Undergraduate Programs

Anthropology

The department offers a bachelor of arts degree in anthropology. The program draws broadly from the social sciences, humanities, and natural sciences, making it a strong undergraduate major that provides a sound interdisciplinary preparation for a variety of careers.

Honors in the Major

Highly qualified students majoring in anthropology may apply to graduate with honors in the major. To be eligible, students must have completed at least 60 credits, taken ENGH 302 for the social sciences, completed 15 credits of anthropology (including ANTH 114), and have a minimum cumulative GPA of 3.30 and a minimum grade of B+ in anthropology courses.

If accepted, students complete two honors courses. The first course is an honors section of one of these courses: ANTH 496, 420, 430, 450, 495, or another course chosen in consultation with the honors director. The second course is ANTH 499, in which students complete an honors paper written under the guidance of an anthropology faculty member. All candidates for honors in the major participate in an honors colloquium. To graduate with honors in the major, students must complete the honors coursework with a minimum GPA of 3.50.
Bachelor's/Accelerated Master's Program

The department offers highly qualified majors in anthropology the opportunity to apply to an accelerated master's degree program in anthropology. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 144 credits, sometimes within five years.

Sociology

The department offers a bachelor's degree in sociology. Sociology majors study how social movements emerge from the collective efforts of individuals and the role that social forces play in defining racial identities and gender roles. They take courses in the theories that explain social phenomena and develop strong research skills, learning how to conduct surveys, interviews, systematic observation as well as how to evaluate sources.

With the strong research skills, critical thinking, and effective writing that are the hallmark of sociology graduates, they are prepared for a variety of career paths from teaching, human service, and human resource occupations to work in the criminal justice system, marketing, and social research. The sociology major is also excellent preparation for students considering law school or graduate training in the social and behavioral sciences.

Honors in the Major

Highly qualified students majoring in sociology may apply to graduate with honors in the major. To be eligible, students must have completed at least 75 credits, taken ENGH 302 for the social sciences, completed 21 credits of sociology, and have a minimum cumulative GPA of 3.30 and a minimum grade of B+ in sociology courses. Applicants must have completed SOCI 303 and SOCI 311 with a minimum grade of B in each.

If accepted, to graduate with honors in sociology, students must complete SOCI 480 and SOCI 481 with a minimum grade of B+ in each of these courses and have an overall GPA of 3.50 in sociology courses presented for graduation. SOCI 481 includes completion of an honors thesis, which will be presented at a sociology colloquium.

Bachelor's/Accelerated Master's Program

The department offers highly qualified majors in sociology the opportunity to apply to an accelerated master's degree program in sociology. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 147 credits, sometimes within five years.

Minors

The department offers minors in anthropology and sociology available to students in any major.

The department coordinates the interdisciplinary minor in immigration studies and the faculty participate in many other minors in the college. See Minors and Interdisciplinary Minors in this section for more information.

Graduate Programs

Anthropology

The department offers a master's degree in anthropology. Students can choose one of three emphases: advanced training in sociocultural anthropology; culture, health and bioethics; or transnational and global issues. They can choose from many courses that are richly interdisciplinary covering such diverse topics as nationalism and transnationalism; bioethics; social movements,
ethnicity and identity; conflict and violence; migration, displacement, and refugees; regional ethnography; and political economy and globalization. Departmental specializations include the following regions: Central and South America, Europe, Africa, the Middle East, Asia, and the United States. Course work progresses from core courses to more advanced courses and culminates in a thesis.

Sociology

The department offers master's and doctoral degrees in sociology. Students pursuing a master's degree in sociology take required courses in theory and methods and a host of electives. Students may choose to focus their electives in one of two specializations: institutions and inequalities or sociology of globalization.

The doctoral degree in sociology provides rigorous training in public and applied social research, including skills in research design, data analysis, and substantive areas that are pertinent to various sectors in the Washington, D.C., area. Graduates have the theoretical, analytical, and professional skills that prepare them for academic positions in teaching or research. They are also well-qualified for nonacademic positions in the many settings that rely on the expertise of sociologists including human service agencies, marketing research firms, educational systems, nonprofit foundations, and law enforcement agencies.

Funding

The department has a limited number of teaching assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Nondegree Status

Applicants who do not wish to pursue a degree may apply for nondegree status. Nondegree students must meet the same admission requirements as degree-seeking students (minimum undergraduate GPA of 3.00, among other criteria). Nondegree students may later apply for admission to a degree program. Up to nine credits earned in nondegree status may transferred to the master's degrees in anthropology or sociology, subject to the approval of the program director and dean.

Bachelor of Arts

Anthropology, BA

Banner Code: LA-BA-ANTH

Web: soan.gmu.edu

College: College of Humanities and Social Sciences

Department: Sociology and Anthropology Anthropology is the study of human beings and their cultures. The bachelor of arts degree in anthropology draws broadly from the social sciences, humanities, and natural sciences. It is a strong undergraduate major that provides a sound interdisciplinary preparation for a variety of careers.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Anthropology, BA/Anthropology, Accelerated MA for specific requirements.

For policies governing all undergraduate degrees, see Academic Policies.

Degree Requirements
Students must fulfill all requirements for bachelor's degrees, including Mason Core requirements. Students pursuing a BA in anthropology must complete additional college requirements for the BA degree in the College of Humanities and Social Sciences. Students pursuing this degree must complete 36 credits within the major, with a minimum GPA of 2.00.

Students are advised to consult with an advisor to learn how they can fulfill Mason Core requirements in global understanding, information technology, and synthesis, as well as the college-level requirement in non-Western culture.

Four core courses (12 credits)

SOCl 311 may substitute for ANTH 390.

- ANTH 114 - Introduction to Cultural Anthropology Credits: 3
- ANTH 120 - Unearthing the Past: Prehistory, Culture and Evolution Credits: 3
- ANTH 390 - Theories, Methods, and Issues I Credits: 3
- ANTH 490 - Theories, Methods, and Issues II Credits: 3

Eight elective courses (24 credits)

- Students choose electives from ANTH courses at the 300- and 400-level. Students may use two SOCI courses as electives:
  - SOCI 311 - Classical Sociological Theory Credits: 3 (if not used as a substitute for core course ANTH 390)
  - SOCI 313 - Statistics for the Behavioral Sciences Credits: 4

  Note: Students wishing to pursue careers in anthropology should consider taking ANTH 492 (or subfield specialty equivalents, such as ANTH 420, 450, 495, or 496) as one of their electives.

Total: 36 credits

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in anthropology may fulfill this requirement by successfully completing ANTH 490.

Mason Core (40 credits)

Note: some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Expand each item below for a link to specific course lists for each category.

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7
Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

College Level Requirements for the BA degree

In addition to the Mason Core program, students pursuing a BA degree must complete the course work below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or religious studies (3 credits)

Fulfilled by any course in philosophy or religious studies (PHIL, RELI) except for PHIL 323, 324, 327, 393, 460. PHIL 253 and RELI 235 cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and behavioral science (3 credits)

3 credits in addition to the university-wide requirement in social and behavioral science for a total of 6 credits. The two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI and these courses in GGS: 101, 103, 110, 301, 303, 304, 305, 306, 315, 316, 320, 325, 330, 357, 380.

Foreign language

Intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. A three course sequence in American Sign Language (EDSE 115 - American Sign Language (ASL) I, EDSE 116 - American Sign Language (ASL) II, and EDSE 219 - American Sign Language (ASL) III will also meet the foreign language requirement. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs.

Non-Western culture (3 credits)

3 credits of an approved course in the study of a non-Western culture in addition to the course used to fulfill the Mason Core requirement in global understanding. A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used
simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs.

Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

Degree Total: Minimum 120 credits

Sociology, BA

Banner Code: LA-BA-SOCI
Web: soan.gmu.edu

College: College of Humanities and Social Sciences
Department: Sociology and Anthropology Sociology involves the systematic study of social structures, cultural patterns, and human relationships. The sociological imagination combines rigorous methods with theory and observation, yielding insights that challenge commonly held assumptions about the social world. Sociology also informs the practice of social and public service, aiding efforts to address important social problems. Majoring in sociology positions students so they can pursue a varied set of career paths, ranging from teaching, human service, and human resource occupations to positions in the criminal justice system, marketing, and social research. The sociology major is excellent preparation for students considering law school or graduate training in the social and behavioral sciences.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Sociology, BA/Sociology, Accelerated MA for specific requirements.

For policies governing all undergraduate degrees, see Academic Policies.

Degree Requirements

Students must fulfill all requirements for bachelor's degrees, including Mason Core requirements. Students pursuing a BA in sociology must complete additional college requirements for the BA degree in the College of Humanities and Social Sciences.

Students pursuing this degree must complete 34 credits of sociology courses with a minimum GPA of 2.00. No more than 6 credits of courses with unsatisfactory grades (C- or D) may be applied toward the degree.

One introductory core course (3 credits)

The introductory course must be completed with a minimum grade of 2.00.

- SOCI 101 - Introductory Sociology Credits: 3

Four additional core courses (13 credits)

Each of these courses must be completed with a minimum grade of 2.00.

- SOCI 303 - Methods and Logic of Inquiry Credits: 3
- SOCI 311 - Classical Sociological Theory Credits: 3
- SOCI 313 - Statistics for the Behavioral Sciences Credits: 4
- SOCI 412 - Contemporary Sociological Theory Credits: 3

One capstone experience course (3 credits) chosen from:

- SOCI 485 - RS: Sociological Analysis and Practice Credits: 3
- SOCI 416 - Internship in Sociology Credits: 1-6
- SOCI 481 - RS: Honors Seminar in Sociology II Credits: 3

Electives (15 credits)

Students complete 15 credits in sociology (SOCI) at the 300 or 400 level.

Students are strongly encouraged to focus four of their elective courses (12 credits) in one of the concentrations below chosen to suit their interests and career objectives. Students who choose a concentration will complete one remaining elective.

Concentrations

Students can focus 12 of their 15 elective credits to complete one of the following 12-credit concentrations.

Students who graduate with honors in sociology may apply 3 credits of honors course work to their selected concentration where appropriate and with prior written approval of the undergraduate director.

▲ Concentration in Childhood and Youth (CYC)

This concentration focuses on the changing social realities, experiences, and identities of children and youth as they are formed in different social and historical contexts. It emphasizes children in peer groups, youth subcultural activities, youth and children and the media, schools, families, social movements, social policy, and the welfare state. This concentration is appropriate for students interested in working directly with children and youth or in organizations serving them in a broad range of fields, such as educational counseling, teaching, policy, advocacy or clinical work, family and community services, social work, early child development, and juvenile justice.

One required course (3 credits)

- SOCI 360 - Youth Culture and Society Credits: 3

Three courses (9 credits) chosen from:

- SOCI 302 - Sociology of Delinquency Credits: 3
- SOCI 307 - Social Movements and Political Protest Credits: 3
- SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
- SOCI 314 - Sociology of Culture Credits: 3
- SOCI 315 - Contemporary Gender Relations Credits: 3
- SOCI 352 - Social Problems and Solutions Credits: 3
- SOCI 382 - Education in Contemporary Society Credits: 3
- SOCI 395 - Special Topics in Sociology Credits: 3
- SOCI 483 - The Sociology of Higher Education Credits: 3
- ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3

Total: 12 credits

▲ Concentration in Deviance, Crime, and Social Control (DCSC)

This concentration focuses on the social, legal, and political systems that underpin social control in Western societies and beyond. The emphasis is on how norms, values, and common sense regulate human action and the social forces that produce deviant behavior and societal responses to it. This concentration is appropriate for students interested in the criminal justice system and the law.

Four courses (12 credits) chosen from:

- SOCI 300 - Social Control and Freedom Credits: 3
- SOCI 301 - Criminology Credits: 3
- SOCI 302 - Sociology of Delinquency Credits: 3
- SOCI 307 - Social Movements and Political Protest Credits: 3
- SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
- SOCI 310 - Sociology of Deviance Credits: 3
- SOCI 326 - Conflict, Violence, and Peace Credits: 3
- SOCI 332 - The Urban World Credits: 3
- SOCI 340 - Power, Politics, and Society Credits: 3
- SOCI 352 - Social Problems and Solutions Credits: 3
- SOCI 355 - Social Inequality Credits: 3
- SOCI 388 - Violence and Religion Credits: 3
- SOCI 395 - Special Topics in Sociology Credits: 3 (depending on topic)

Total: 12 credits

▲ Concentration in Global Sociology (GSOC)

This concentration focuses on global interconnectedness and its effect on the nature of societies around the world. It emphasizes new technologies and social processes, migration, transnational communities, global cities, and social movements working across state borders. This concentration is appropriate for students interested in pursuing internationally oriented careers in social change, political reform, and international development.

One required course (3 credits)

- SOCI 320 - Social Structure and Globalization Credits: 3

Three courses (9 credits) chosen from:
- SOCI 307 - Social Movements and Political Protest Credits: 3
- SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
- SOCI 326 - Conflict, Violence, and Peace Credits: 3
- SOCI 330 - US Immigrants and Immigration Credits: 3
- SOCI 332 - The Urban World Credits: 3
- SOCI 340 - Power, Politics, and Society Credits: 3
- SOCI 352 - Social Problems and Solutions Credits: 3
- SOCI 388 - Violence and Religion Credits: 3
- SOCI 395 - Special Topics in Sociology Credits: 3 (depending on topic)
- ANTH 332 - Cross-Cultural Perspectives on Globalization Credits: 3

Total: 12 credits

▲ Concentration in Inequality and Social Change (INSC)

The focus is on inequalities, such as those of race, class, and sex, and on the manner in which such inequalities become structurally rooted in a society. The emphasis is on understanding the rise of the struggle for human rights, democracy, and various social movements that have sought to reverse these inequalities through protests, demonstrations, counterorganizations, and the ballot. This concentration is appropriate for students who seek careers in social justice organizations, social services, or teaching, and those who wish to participate in social and political movements.

One required course (3 credits)

- SOCI 355 - Social Inequality Credits: 3

Three courses (9 credits) chosen from:

- SOCI 300 - Social Control and Freedom Credits: 3
- SOCI 307 - Social Movements and Political Protest Credits: 3
- SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
- SOCI 310 - Sociology of Deviance Credits: 3
- SOCI 315 - Contemporary Gender Relations Credits: 3
- SOCI 330 - US Immigrants and Immigration Credits: 3
- SOCI 332 - The Urban World Credits: 3
- SOCI 340 - Power, Politics, and Society Credits: 3
- SOCI 352 - Social Problems and Solutions Credits: 3
- SOCI 360 - Youth Culture and Society Credits: 3
- SOCI 382 - Education in Contemporary Society Credits: 3
- SOCI 390 - Sociology of Health, Illness, and Disability Credits: 3
- SOCI 395 - Special Topics in Sociology Credits: 3 (depending on topic)

Total: 12 credits
Total: 34 credits

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in sociology may fulfill this requirement by successfully completing SOCI 412.

Mason Core (40 credits)

Note: some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Expand each item below for a link to specific course lists for each category.

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

College Level Requirements for the BA degree

In addition to the Mason Core program, students pursuing a BA degree must complete the course work below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or religious studies (3 credits)

Fulfilled by any course in philosophy or religious studies (PHIL, RELI) except for PHIL 323, 324, 327, 393, 460. PHIL 253 and RELI 235 cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and behavioral science (3 credits)
3 credits in addition to the university-wide requirement in social and behavioral science for a total of 6 credits. The two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI and these courses in GGS: 101, 103, 110, 301, 303, 304, 305, 306, 315, 316, 320, 325, 330, 357, 380.

Foreign language

Intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. A three course sequence in American Sign Language (EDSE 115 - American Sign Language (ASL) I, EDSE 116 - American Sign Language (ASL) II, and EDSE 219 - American Sign Language (ASL) III will also meet the foreign language requirement. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs.

Non-Western culture (3 credits)

3 credits of an approved course in the study of a non-Western culture in addition to the course used to fulfill the Mason Core requirement in global understanding. A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs.

Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

Degree Total: Minimum 120 credits

Bachelor/Accelerated Master's

Anthropology, BA/Anthropology, Accelerated MA

Web: soan.gmu.edu

College: College of Humanities and Social Sciences
Department: Sociology and Anthropology
Highly-qualified Mason anthropology majors may apply to the accelerated master's degree program. If accepted, students will be able to earn both a BA and a MA in anthropology after satisfactory completion of 144 credits, sometimes within 5 years. Students with both a BA and MA have a competitive advantage when applying to PhD programs in anthropology. See the Bachelor's/Accelerated Master's Degrees section of the catalog for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see Academic Policies.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the accelerated MA in anthropology, see Application Requirements and Deadlines on the departmental web site.

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate courses (chosen from ANTH 535, ANTH 536, and ANTH 650) as indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. Once admitted to the accelerated master's pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from ANTH 635, ANTH 650, or ANTH 699). These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See the Graduate Course Enrollment by Undergraduates section of the catalog.

Sociology, BA/Sociology, Accelerated MA

Web: soan.gmu.edu

College: College of Humanities and Social Sciences
Department: Sociology and Anthropology Highly qualified Mason sociology majors may apply to the accelerated master's degree program. If accepted, students will be able to earn both a BA and an MA in sociology following satisfactory completion of 147 credits, sometimes within five years. See Bachelor's/Accelerated Master's Degrees section of the catalog for policies related to this program.

For policies governing all graduate degrees, see Academic Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the accelerated MA in sociology, see Application Requirements and Deadlines on the departmental web site.

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate SOCI courses at the 500 and 600 level (chosen in consultation with the graduate program director and indicated on their Accelerated Master's Program Application)
with a minimum grade of 3.00 in each course. Once admitted to the accelerated master's pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits of SOCI courses as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See the Graduate Course Enrollment by Undergraduates section of the catalog.

Doctor of Philosophy

Sociology, PhD

Banner Code: LA-PHD-SOCI
Web: soan.gmu.edu

College: College of Humanities and Social Sciences
Department: Sociology and Anthropology The doctoral degree in sociology provides rigorous training in public and applied social research, including skills in research design, data analysis, and substantive areas that are pertinent to various sectors in the Washington, D.C. area. Graduates have the theoretical, analytical, and professional skills that prepare them for academic positions in teaching or research. They are also well-qualified for nonacademic positions in the many settings that rely on the expertise of sociologists including human service agencies, marketing research firms, educational systems, nonprofit foundations, and law enforcement agencies.

For policies governing all graduate degrees, see Academic Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the PhD in sociology, see Application Requirements and Deadlines on the departmental web site.

Reduction of Credit

Students who enter the program with a master's degree may be allowed a reduction of credit up to 30 credits subject to the approval of the graduate director and the dean.

Degree Requirements
Students pursuing this degree must complete a minimum of 72 graduate credits. The requirements include foundation courses in theory and methods, course work in a specialization, and electives. Following completion of all required course work and passing a candidacy exam, students are advanced to candidacy by the dean and complete a dissertation, an original and independent research project.

Nine foundation courses (27 credits)

One required foundation course (3 credits)

- SOCI 601 - Proseminar in Public and Applied Sociology Credits: 3

Two courses of theory (6 credits)

- SOCI 711 - Classical Sociological Theory Credits: 3
- SOCI 712 - Contemporary Sociological Theory Credits: 3

One course in writing (3 credits)

- SOCI 602 - Writing for the Social Sciences Credits: 3

Two required courses of methodology and analysis (6 credits)

- SOCI 620 - Methods and Logic of Social Inquiry Credits: 3
- SOCI 636 - Statistical Reasoning Credits: 3

One elective course of methodology and analysis (3 credits) chosen from:

SOCI 633 - Special Topics in Sociology Credits: 3, when topic is Critical Theory or Feminist Theory, may substitute for this requirement or for one course under the statistics/methods requirement.

- SOCI 730 - Analytic Techniques of Social Research Credits: 3
- SOCI 634 - Qualitative Research Methods Credits: 3

Two courses of statistics/methods (6 credits) chosen from:

SOCI 633 - Special Topics in Sociology Credits: 3, when topic is Critical Theory or Feminist Theory, may substitute for one course under this requirement or for the elective methodology and analysis course.

- SOCI 631 - Survey Research Credits: 3
- SOCI 632 - Evaluation Research for Social Programs Credits: 3
- SOCI 634 - Qualitative Research Methods Credits: 3
- SOCI 655 - Ethnography Credits: 3
- SOCI 660 - Historical and Comparative Sociology Credits: 3 or SOCI 860 - Historical and Comparative Sociology Credits: 3
- ANTH 650 - Methods in Anthropology Credits: 3
- WMST 610 - Feminist Approaches to Social Research Credits: 3
- WMST 611 - Feminist Research Practice Credits: 3

Two proseminars (6 credits)

- SOCI 803 - Institutions and Inequality Credits: 3
- SOCI 804 - Sociology of Globalization Credits: 3

Three courses (9 credits) in a specialization

Students specialize in either institutions and inequalities or sociology of globalization. Depending on the topic, special topics courses SOCI 633 and SOCI 833 (or others) may be applied to the specialization with prior written approval of the director. Up to two courses (6 credits) may be from outside sociology, chosen in consultation with (and with approval of) the student’s advisor or the graduate director.

Institutions and inequalities specialization

Students complete 3 courses (9 credits) toward the degree, chosen from:

- SOCI 605 - Gender and Social Structure Credits: 3
- SOCI 608 - Juvenile Delinquency Credits: 3
- SOCI 614 - Sociology of Culture Credits: 3
- SOCI 623 - Racial and Ethnic Relations: American and Selected Global Perspectives Credits: 3
- SOCI 624 - International Migration in the Age of Globalization Credits: 3
- SOCI 635 - Environment and Society Credits: 3
- SOCI 641 - Micro Sociology: Inequality and Everyday Life Credits: 3
- SOCI 670 - New Media and Social Inequality Credits: 3
- SOCI 840 - Work Organizations and Social Inequality Credits: 3
- SOCI 844 - Youth, Schooling, and Popular Culture Credits: 3
- SOCI 845 - Society and Education Credits: 3
- SOCI 853 - Cities in a Global Society Credits: 3
- SOCI 857 - Sociology of Human Rights Credits: 3
- SOCI 633 - Special Topics in Sociology Credits: 3 (with prior written approval of director)
- SOCI 833 - Special Topics in Sociology Credits: 3 (with prior written approval of director)

Sociology of Globalization specialization

Students in this specialization must demonstrate proficiency in one foreign language at an advanced level of reading and comprehension. Students complete 3 courses (9 credits) toward the degree, chosen from:

- SOCI 614 - Sociology of Culture Credits: 3
- SOCI 623 - Racial and Ethnic Relations: American and Selected Global Perspectives Credits: 3
- SOCI 624 - International Migration in the Age of Globalization Credits: 3
Six elective courses (18 credits)

Electives may include up to two courses (6 credits) from outside sociology, chosen in consultation with and approval of the graduate director.

Research Proficiency

Students must demonstrate proficiency in a range of quantitative and qualitative research methods prior to taking the qualifying exams for candidacy. Proficiency is determined by satisfactory course work or an exam.

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully pass one written qualifying examination. The comprehensive exam tests students' mastery of the foundations of sociological inquiry, linking research methods and sociological theory to public concerns, as well as material in the student's area of specialization. It is administered by a faculty committee appointed by the graduate program director. Additionally, students must have an approved dissertation committee. Evidence of completed requirements must be on file in the Dean's Office before a student can advance to candidacy.

Dissertation (12 credits)

Once enrolled in 999, students must maintain continuous registration each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in 999, students must follow the university’s continuous registration policy as specified in the Academic Policies section of the catalog. Students who defend in the summer must be registered for at least 1 credit of 999.

Students complete a minimum of 3 credits of 998 and 3 credits of 999. They may apply a maximum of 12 dissertation credits (998 and 999 combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of 999. Because students cannot register for credits of 999 until they have advanced to PhD candidacy, they may choose (but are not required) to register for additional credits of 998.

- SOCI 998 - Doctoral Dissertation Proposal Credits: 1-9 (minimum of 3 credits)
- SOCI 999 - Doctoral Dissertation Credits: 1-12 (minimum of 3 credits)

Total: 72 credits
Master of Arts

Anthropology, MA

Banner Code:  LA-MA-ANTH
Web:  soan.gmu.edu

College:  College of Humanities and Social Sciences
Department:  Sociology and Anthropology The master's degree program in anthropology prepares students for advanced work in anthropology through courses focusing on the study of culture. Students learn how to use participant-observation field work methods, as well as comparative and holistic knowledge and research methods. Areas of emphasis are advanced training in sociocultural anthropology; culture, health and bioethics; and transnationalism and globalization. Course work progresses from core courses to more advanced courses and culminates in a thesis or a project.

An accelerated master's option is available to students in the bachelor's program. See Anthropology, BA/Anthropology, Accelerated MA for specific requirements.

For policies governing all graduate degrees, see Academic Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the MA in anthropology, see Application Requirements and Deadlines on the departmental web site.

Satisfactory Progress

According to university policy, students may be terminated if they fail to achieve satisfactory progress toward their degree. Students in the MA in anthropology degree program are judged as having failed to achieve satisfactory progress toward their degree for the following reasons:

- two consecutive semesters in which academic warnings appear on their transcript
- failure to successfully complete ANTH 535, ANTH 536, and ANTH 650 within 4 semesters of first enrolling as degree-seeking students in the MA in anthropology program
- failure to enroll in graduate coursework in anthropology for 2 consecutive semesters, unless there are compelling reasons for not having done so

Like all academic policies, these provisions take effect with the publication of this catalog and apply to all graduate students in the MA in anthropology regardless of their calendar year.

Degree Requirements

Students with previously conferred graduate degrees may request a reduction of credit. Reductions of credit may not exceed six elective credits and no reductions will be given for required core courses. Evaluation of a previously conferred graduate degree for reduction of credit is not automatic and students must request this review in their first semester of matriculation in the master's program.

Four required core courses (12 credits)
Elective courses (15 credits)

Electives should be advanced courses in anthropology chosen in consultation with an advisor. Students can choose to focus their electives around an emphasis in these four areas: advanced training in sociocultural anthropology; culture, health and bioethics; museums and anthropology; or transnational and global issues. Up to six credits may be from other disciplines with the prior written approval of the graduate director.

Students may take ANTH 690 - Internship Credits: 3-6 as elective credit. An internship can serve as a primary field research site for the thesis.

Thesis (3 credits) or Research Project (3 credits)

Students should be aware of the policies governing theses. They must follow the thesis enrollment policy of the university and once enrolled in ANTH 799, maintain continuous enrollment. These policies are specified in the Academic Policies section of the catalog.

- ANTH 796 - Master's Research Project Credits: 1-6
- ANTH 799 - Master's Thesis Credits: 1-6

Total: 30 credits

Sociology, MA

Banner Code: LA-MA-SOCI
Web: soan.gmu.edu

College: College of Humanities and Social Sciences
Department: Sociology and Anthropology Students pursuing an MA in sociology may choose a specialization in either institutions and inequality, or sociology of globalization. Under the larger framework of these specializations, students may pursue studies in a wide range of areas of sociological inquiry. Faculty in our program have research specializations in culture (including music, art, new media, and consumption); family, youth and aging; gender; globalization; immigration and migration; political economy, development and economic sociology; political sociology and social movements; race/ethnicity; religion; sociological theory; and urban sociology.

Designed as a small and selective graduate program, the MA enables students to enjoy the benefits of a personal mentoring experience as they gain skills in both basic and applied research. The program is also strongly connected to various nonprofit and community groups, providing ample opportunity for research, internships, and employment in various occupations. In addition to required and elective course work, students are required to complete a master's thesis or a master's capstone paper to demonstrate their ability to carry out independent research.
An accelerated master's option is available to students in the bachelor's program. See Sociology, BA/Sociology, Accelerated MA for specific requirements.

For policies governing all graduate degrees, see Academic Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the MA in sociology, see Application Requirements and Deadlines on the departmental web site.

Degree Requirements

Two courses (6 credits) of social theory

- SOCI 711 - Classical Sociological Theory Credits: 3
- SOCI 712 - Contemporary Sociological Theory Credits: 3

Three courses (9 credits) of research methods

- SOCI 620 - Methods and Logic of Social Inquiry Credits: 3
- SOCI 631 - Survey Research Credits: 3
- SOCI 632 - Evaluation Research for Social Programs Credits: 3
- SOCI 633 - Special Topics in Sociology Credits: 3 (when topic is Feminist Methods, Feminist Theory, or Critical Ethnography)
- SOCI 634 - Qualitative Research Methods Credits: 3
- SOCI 636 - Statistical Reasoning Credits: 3
- SOCI 660 / SOCI 860 - Historical and Comparative Sociology Credits: 3
- WMST 610 - Feminist Approaches to Social Research Credits: 3
- WMST 611 - Feminist Research Practice Credits: 3

One course (3 credits) in public sociology

- SOCI 601 - Proseminar in Public and Applied Sociology Credits: 3

One course (3 credits) of writing

- SOCI 602 - Writing for the Social Sciences Credits: 3

Two to three elective courses (6 to 9 credits)
Students may choose their electives from the full range of offerings in sociology (any SOCI course) or focus their elective credits in one of two specializations.

Institutions and inequalities specialization

- SOCI 605 - Gender and Social Structure Credits: 3
- SOCI 608 - Juvenile Delinquency Credits: 3
- SOCI 614 - Sociology of Culture Credits: 3
- SOCI 623 - Racial and Ethnic Relations: American and Selected Global Perspectives Credits: 3
- SOCI 624 - International Migration in the Age of Globalization Credits: 3
- SOCI 635 - Environment and Society Credits: 3
- SOCI 641 - Micro Sociology: Inequality and Everyday Life Credits: 3
- SOCI 670 - New Media and Social Inequality Credits: 3
- SOCI 840 - Work Organizations and Social Inequality Credits: 3
- SOCI 844 - Youth, Schooling, and Popular Culture Credits: 3
- SOCI 845 - Society and Education Credits: 3
- SOCI 853 - Cities in a Global Society Credits: 3
- SOCI 857 - Sociology of Human Rights Credits: 3
- SOCI 633 - Special Topics in Sociology Credits: 3 (with prior written approval of director)
- SOCI 833 - Special Topics in Sociology Credits: 3 (with prior written approval of director)

Sociology of globalization specialization

- SOCI 614 - Sociology of Culture Credits: 3
- SOCI 623 - Racial and Ethnic Relations: American and Selected Global Perspectives Credits: 3
- SOCI 624 - International Migration in the Age of Globalization Credits: 3
- SOCI 635 - Environment and Society Credits: 3
- SOCI 670 - New Media and Social Inequality Credits: 3
- SOCI 850 - Sociology of Development Credits: 3
- SOCI 851 - Globalization and Social Movements Credits: 3
- SOCI 853 - Cities in a Global Society Credits: 3
- SOCI 857 - Sociology of Human Rights Credits: 3
- ANTH 631 - Refugees in the Contemporary World Credits: 3
- ANTH 632 - International Migration in Comparative Perspective Credits: 3
- ANTH 655 - Nationalism, Transnationalism, and States: Local and Global Perspectives Credits: 3
- SOCI 633 - Special Topics in Sociology Credits: 3 (with prior written approval of director)
- SOCI 833 - Special Topics in Sociology Credits: 3 (with prior written approval of director)

Thesis or MA Capstone Paper

Thesis (3 or 6 credits)

A master's thesis demonstrates the student's capacity to carry out independent research. The thesis consists of a substantial sociological research or theoretical project that will contribute to the advancement of knowledge in sociology.

Students must follow the thesis enrollment policy of the university and once enrolled in SOCI 799, maintain continuous enrollment as specified in the Academic Policies section of the catalog.
MA Capstone Paper (3 credits)

As an alternative to the thesis, students can elect to complete an independent, 25-page research paper. Unlike the thesis, the MA capstone paper must be completed in one semester.

- SOCI 797 - Master's Capstone Paper Credits: 3

Total: 33 credits

Non-Degree

Anthropology Minor

Banner Code: ANTH
Web: soan.gmu.edu

College: College of Humanities and Social Sciences
Department: Sociology and Anthropology

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students pursuing this minor must complete 18 credits in anthropology with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor.

Two required courses (6 credits):

- ANTH 114 - Introduction to Cultural Anthropology Credits: 3
- ANTH 120 - Unearthing the Past: Prehistory, Culture and Evolution Credits: 3
- ANTH 135 - Introduction to Biological Anthropology Credits: 3

One regional ethnography course (3 credits) chosen from:

- ANTH 301 - Native North Americans Credits: 3
- ANTH 302 - Peoples and Cultures of Latin America Credits: 3
- ANTH 306 - Peoples and Cultures of Island Asia Credits: 3
- ANTH 307 - Ancient Mesoamerica Credits: 3
• ANTH 308 - Peoples and Cultures of the Middle East Credits: 3
• ANTH 309 - Peoples and Cultures of India Credits: 3
• ANTH 330 - Peoples and Cultures of Selected Regions: Non-Western Credits: 3

Three elective courses in anthropology at the 300- or 400-level (9 credits)

Total: 18 credits

Immigration Studies Minor

Banner Code: IMMS
Phone: 703-993-1178
Web: immigrationstudies.gmu.edu

College: College of Humanities and Social Sciences
Department: Sociology and Anthropology

Faculty

Cleaveland, Haines, Ihara, Leeman, Rabin, Ritchie, Seligmann, Shutika, Trencher (director)

The minor in immigration studies combines perspectives from the humanities and social sciences to provide an interdisciplinary and comparative understanding of the immigrant experience, ethnic identity, assimilation, ethnic exclusion and conflict, and refugee situations.

This is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students pursuing this minor must complete 15 credits of coursework with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor.

One required course (3 credits) chosen from:

• ANTH 340 - Comparative Perspectives on Immigration Credits: 3
• SOCI 330 - US Immigrants and Immigration Credits: 3

One course (3 credits) focused on ethnicity in the United States chosen from:

• CHIN 328 - Asian American Women Writers Credits: 3
• SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
• ENGH 352 - Topics in Ethnic American Literature Credits: 3
• ENGH 416 - Ethnicity and Migration in Folklore Credits: 3
• SPAN 388 - Introduction to Latina/o Studies Credits: 3

One course (3 credits) focused on global perspectives on migration and ethnicity chosen from:

• ANTH 331 - Refugees Credits: 3
• GOVT 445 - Human Rights Credits: 3
• CONF 302 - Culture, Identity, and Conflict Credits: 3
• INTS 416 - Refugee and Internal Displacement Credits: 3

Two elective courses (6 credits) chosen from:

• FRLN 385 - Multilingualism, Identity, and Power Credits: 3
• GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
• INTS 361 - Neighborhood, Community, and Identity Credits: 3-6
• SOCI 332 - The Urban World Credits: 3
• SPAN 430 - Spanish in the United States Credits: 3

Total: 15 credits

Sociology Minor

Banner Code: SOCI
Web: soan.gmu.edu

College: College of Humanities and Social Sciences
Department: Sociology and Anthropology For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Eight credits of course work in this 18-credit program must be unique to the minor.

Two required courses (6 credits)

Students must complete each of these courses with a minimum grade of 2.00.

• SOCI 101 - Introductory Sociology Credits: 3
• SOCI 311 - Classical Sociological Theory Credits: 3

Four elective courses (12 credits)
Students may focus the coursework for their minor by choosing electives from one of the five concentrations offered as part of the BA in sociology.

**Total: 18 credits**

### Women and Gender Studies

Phone: 703-993-2896  
Web: wmst.gmu.edu

#### Faculty

Amireh, Baily, Baker, Beach, Bergoffen, Best, Burt, Carbonneau, Cattaneo, Censer, Cheldelin, Chen, Cherubin, Chollar, Christensen, Constantine, Copelman, Davidson, Dakake, Davis, Deshmukh, Dunne, Eby, Eckenwiler, Feerick, Garner, Gilbert, Gorski, Hamdani, Hanrahan, Harvey, Hattery, Hirsch, Hodges, Hughes, Jadallah, Jenkins, Johnsen-Neshati, Jordan, Jones, Kaplan, Karametou, King, Kirsch, Koch, Kravitz, Letiecq, Lewis, Lindley, Lockwood, Masters, McNeely, Michals, Mink, Misencik, Muir, Pascarell, Peters Burton, Regan, Reybold, Ricouart, Rosenblum, Rosenberger, Sandell, Sandole-Staroste, Schwartzstein, Scott-Constantine, Seligmann, Stearns, Tichy, Todd, Travis, Vivancos Perez, Wagner

#### Courses

The Women and Gender Studies Program offers all courses designated WMST in the Courses section of this catalog.

### About Women and Gender Studies at Mason

By choosing to pursue work in women and gender studies, students at all levels engage in an interdisciplinary exploration of gender in social, political, cultural, and economic life; gender in history; women and the media; feminist theory; the relationship between sex and gender; the impact of sex, race, class, disability, and sexual orientation on people's lives; and the ways in which gender stereotypes influence the self in relationship to others. Students in many courses have the opportunity to investigate these issues in a cross-cultural and global perspective.

### Undergraduate Programs

The Women and Gender Studies Program offers an interdisciplinary minor open to students from any major. Students have the opportunity to earn credit toward the minor while doing an internship that helps prepare them for the work place, a service learning course that combines work in a specific course with a service project, or research on gender issues on Mason's campus. Students pursuing this minor can take advantage of the many activities and resources provided by the Women and Gender Studies Center.

### Graduate Programs

The program sponsors the concentration in women and gender studies in the master's degree in interdisciplinary studies (MAIS). This concentration promotes advanced scholarship that transcends traditional boundaries. Students combine required coursework in women and gender studies with courses in a discipline of interest such as history, literature, sociology, anthropology, health,
education, philosophy, social work, conflict analysis and resolution, or the arts. See Interdisciplinary Studies, MAIS in this section.

The program also offers a graduate certificate in women and gender studies. Students may take this as a stand-alone certificate or pursue it concurrently with any graduate degree program. A portion of the certificate course work may be applied to the degree with the approval of the director of the graduate degree and dean. Students must apply and be accepted to a graduate certificate program.

**Women and Gender Studies Center**

The academic program in women and gender studies is integrated with the Women and Gender Studies Center. The center organizes a wide variety of lectures, conferences, workshops, and other public events throughout the year. The center houses a library and functions as a community space for students and faculty.

**Graduate Certificate**

**Women and Gender Studies Graduate Certificate**

**Banner Code: LA-CERG-WGST**  
Web: wmst.gmu.edu

**College: College of Humanities and Social Sciences**  
**Program: Women and Gender Studies** The graduate certificate in women and gender studies may be taken alone or in conjunction with another graduate program. Courses applied to the certificate may be applied to a degree program, subject to approval of the director of the respective program.

For policies governing all graduate certificates, see Academic Policies.

The graduate certificate in women and gender studies may be pursued on a part-time or full-time basis.

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the graduate certificate in women and gender studies, see Application Requirements and Deadlines on the departmental web site.

**Transfer Credit**

In accordance with university policy, students may transfer up to 3 graduate credits earned at another accredited institution to the certificate program with the approval of the director of the program and the dean. They may transfer up to 9 graduate credits earned at Mason in nondegree status toward the certificate, subject to approval of the director and the dean in accordance with university policy.

**Certificate Requirements**

**Two required courses (6 credits)**
• WMST 630 - Feminist Theories across the Disciplines Credits: 3
• WMST 640 - Women and Global Issues Credits: 3

Three elective courses (9 credits)

Students choose from relevant courses subject to the approval of the director. These courses may be from departments across the university that address the study of women and gender, courses in the Women and Gender Studies Program, and appropriate directed readings or independent study courses.

Capstone portfolio

Students synthesize their work in the certificate program by reflecting on how issues, ideas, and theories raised in the core courses inform their understanding of gender issues within their area of interest. The portfolio includes three to five items produced in previous course work and a 7-10 page essay discussing them. The portfolio may include course papers, performance videos, photos of exhibits, music, or other items as agreed on by the student and advisor. The portfolio must be approved by the graduate advisor and submitted to the Women and Gender Studies Program, where it will be presented, displayed, and archived.

Total: 15 credits

Non-Degree

Women and Gender Studies Minor

Banner Code: WGST
Web: wmst.gmu.edu

College: College of Humanities and Social Sciences
Program: Women and Gender Studies The minor is for students who are interested in gender, sexuality, and feminist perspectives. While it is an especially good complement to a major in the humanities, social sciences, health and human services, or natural sciences, it is open to students in any major in the university.

The interdisciplinary minor in women and gender studies consists of two required courses and four electives. Students interested in feminist and gender issues choose their elective courses from a broad range of offerings. Those who wish to focus on LGBTQ (lesbian, gay, bisexual, transgender, and queer issues) issues, take an introductory course focused on these issues and two electives that incorporate more specifically such perspectives.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students pursuing this minor must complete 18 credits with a minimum GPA of 2.00 in the minor. Eight credits of course work must be unique to the minor.

One introductory course (3 credits) chosen from:
• WMST 200 - Introduction to Women and Gender Studies Credits: 3
• WMST 308 - Introduction to Lesbian, Gay, Bisexual, Transgender, Transsexual, and Queer Studies Credits: 3

One theory course (3 credits)

• WMST 330 - Theoretical Perspectives in Women and Gender Studies Credits: 3

Elective courses (12 credits)

One WMST course (3 credits)

Additional elective courses (9 credits) chosen from:

Note: for students who choose a focus on LGBTQ, two of the four electives must be approved for that focus by the undergraduate advisor.

• CHIN 328 - Asian American Women Writers Credits: 3
• HEAL 325 - Health Aspects of Human Sexuality Credits: 3
• HEAL 327 - Women's Health Credits: 3
• HIST 350 - U.S. Women's History Credits: 3
• PSYC 362 - Psychology of Gender Credits: 3
• PSYC 466 - Psychology of Intimate Relationships Credits: 3
• INTS 310 - Violence and Gender Credits: 3-6
• INTS 312 - Images and Experiences of Childhood: Social Construct, Literature, and Film Credits: 3-6
• INTS 317 - Issues in Family Relationships Credits: 4
• INTS 320 - Construction of Differences: Race, Class, and Gender Credits: 6
• INTS 346 - Art as Social Action Credits: 4
• INTS 347 - Gender Representation in Popular Culture Credits: 3-6
• INTS 400 - Temptress: Constructs of Sex and Power Credits: 3
• INTS 405 - Women and Leadership Credits: 4
• INTS 446 - Art, Beauty, and Culture Credits: 3-6
• SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
• SOCI 315 - Contemporary Gender Relations Credits: 3
• SOCI 355 - Social Inequality Credits: 3

Total: 18 credits

Course Work

The Middle East and Islamic Studies program offers all course work designated MEIS in the Courses section of this catalog.

Middle East and Islamic Studies at Mason

The interdisciplinary program in Middle East and Islamic Studies offers a distinctive and innovative approach to the study of the Middle East, of Islam and of Muslim societies across the globe. The program seeks to situate the study of the Middle East and Islam within a globalized world. Students develop a broad understanding of the region, its history and its contemporary complexities with respect to society, politics, culture and economy.

The Middle East and Islamic Studies Program comprises four distinct curricula; a master's program in Middle East and Islamic studies (MEIS), a graduate certificate program, and two undergraduate minor programs (Middle East studies and Islamic studies). Because these programs are interdisciplinary, undergraduate and graduate students may take courses from a range of disciplines to fulfill minor, graduate degree or certificate requirements. Undergraduate students should consult the specific listing, Middle East Studies Minor or Islamic Studies Minor for more details. Graduate students should consult with the MEIS director.

Undergraduate Program

Minors

The Middle East and Islamic Studies Program offers two minors for undergraduates.

The Middle East Studies minor provides students with a firm grounding in the history, politics, and culture of this important region. Students develop an understanding of the diverse dynamics and complex forces that shape modern Middle East realities.

The Islamic Studies minor introduces students to the diverse and dynamic experience of Muslims globally and locally. Through interdisciplinary course offerings, students acquire an understanding of Islamic religious traditions, history, politics, society and culture. A three-credit course is also required in a language spoken in a Muslim majority country (Arabic, Persian, Turkish).

Graduate Program

Master's Degree

The program offers a master's degree in Middle East and Islamic studies. Students study historical and contemporary topics - as well as theory and methodology - from regional and global perspectives. The unique interdisciplinary nature of the program provides students with a thorough foundation in the major debates and issues in the study of the Middle East, of Islam and of Muslim societies across the globe.

Graduate Certificate
The graduate certificate in Middle East and Islamic studies allows students to examine the complex issues involved in understanding the Middle East and the broader Islamic world from a variety of perspectives. Students study both contemporary and historical developments in these regions; they take courses in various disciplines, including political science, history, and religious studies, and have the opportunity to take elective courses in an even broader set of disciplines, including sociology, anthropology, literature, and art history.

**Bachelor's/Accelerated Master's Program**

Highly qualified undergraduates in select majors may apply to the accelerated master's degree program in Middle East and Islamic studies. If accepted, students will be able to earn an undergraduate degree in their chosen major and a graduate degree in Middle East and Islamic studies after satisfactory completion of 144 credits, often within five years. Credit limits and course requirements require advanced planning and consultation with the student's undergraduate advisor and MEIS director. See link below for more information on the accelerated master's.

**Ali Vural Ak Center for Global Islamic Studies**

web: islamicstudies.gmu.edu

The Ali Vural Ak Center for Global Islamic Studies is an interdisciplinary research center whose goal is to provide a sound and nuanced understanding of Muslim societies and the Islamic faith, its role in world history and patterns of globalization. The center regularly sponsors lectures and conferences, runs major research projects and hosts international scholars. The center supports the academic curriculum through its on-campus and off-campus activities.

**Middle East Studies**

web: meis.gmu.edu

The interdisciplinary Middle East Studies program at George Mason provides students with a firm grounding in the history, politics, and culture of this important region. Under the guidance of internationally recognized faculty, students develop an understanding of the diverse dynamics and complex forces that shape modern Middle East realities. Students have the opportunity to examine new Middle East diasporas and transnational communities in the West, as well as the role of the Middle East in a changing geopolitical environment marked by the rise of China, India and the re-emergence of Russia.

**Bachelor/Accelerated Master's**

**Bachelor's Degree (selected)/Middle East and Islamic Studies, Accelerated MA**

Web: meis.gmu.edu

College: *College of Humanities and Social Sciences*
Program: *Middle East and Islamic Studies* Highly qualified undergraduates pursuing a BA in select majors (listed below) may apply to the accelerated master's degree in Middle East and Islamic studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor's degree in their chosen major and a master's degree in Middle East and Islamic studies after satisfactory completion of 144 credits, sometimes within five years. See Bachelor's/Accelerated Master's Degrees section of the catalog for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see the Academic Policies section of the catalog.
Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the accelerated MA in Middle East and Islamic studies, see Application Requirements and Deadlines on the program web site.

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate courses (chosen from MEIS 500, HIST 575, GOVT 632, RELI 644) as indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course. Once admitted to the accelerated master's pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Selected Majors:

Government and international politics, global affairs, history, religious studies, Russian and Eurasian studies, sociology, and anthropology. It is preferred, though not required, that the student have a minor in Middle East studies or Islamic studies.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits (chosen from MEIS 500, HIST 575, GOVT 731 [when content focus is the Middle East], GOVT 733, RELI 644) as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See the Graduate Course Enrollment by Undergraduates section of the catalog.

Graduate Certificate

Middle East and Islamic Studies Graduate Certificate

Banner Code: LA-CERG-MEIS
Web: meis.gmu.edu

College: College of Humanities and Social Sciences
Program: Middle East and Islamic Studies The graduate certificate in Middle East and Islamic studies allows students to examine the complex issues involved in understanding the Middle East and the broader Islamic world from a variety of perspectives. Students study both contemporary and historical developments in these regions; they take core courses in various disciplines, including political science, history, and religious studies, and have the opportunity to take elective courses in an even broader set of disciplines, including sociology, anthropology, literature, and art history.

The graduate certificate in Middle East and Islamic studies may be pursued on a part-time or full-time basis.
Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the graduate certificate in Middle East and Islamic Studies, see the departmental web site.

Certificate Requirements

Four core courses (12 credits)

- MEIS 500 - Critical Issues and Debates in Middle East and Islamic Studies Credits: 3
- HIST 575 - Approaches to Middle East and Islamic History Credits: 3
- GOVT 632 - Politics and Societies of the Middle East Credits: 3
- RELI 644 - Islamic Texts and Contexts Credits: 3

Two elective courses (6 credits) chosen from:

- ANTH 635 - Regional Ethnography Credits: 3 (when topic is Middle East and North Africa)
- ARTH 599 - Special Topics in Art History and the Decorative Arts Credits: 1-6 (when topic is Middle Eastern or Islamic art)
- ARTH 699 - Topics in Art History Credits: 3 (when topic is Middle East or Islamic art)
- CONF 653 - World Religions, Diplomacy, and Conflict Resolution Credits: 3
- CONF 722 - Conflict and Religion Credits: 3
- ENGH 665 - Seminar in Global Culture Credits: 3 (when topic is Middle East or Muslim world)
- FREN 553 - Topics in North African Francophone Literature and Culture Credits: 3
- FRLN 550 - Special Topics Credits: 3 (when topic is a language of the Middle East or Muslim world)
- FRLN 551 - Special Topics Credits: 3 (when topic is a language of the Middle East or Muslim world)
- GGS 533 - Issues in Regional Geography Credits: 1-6 (when topic is Middle East)
- GOVT 731 - Advanced Seminar in Comparative Politics Credits: 3 (when topic is the Middle East or a Muslim world region)
- GOVT 733 - Islam and Politics Credits: 3
- HIST 585 - Problems in Middle Eastern History Credits: 3
- MEIS 794 - Graduate Internship in Middle East and Islamic Studies Credits: 3
- MEIS 796 - Directed Readings in Middle East and Islamic Studies Credits: 3
- RELI 591 - Special Topics in Religious Studies Credits: 3 (when topic is Islam or Muslim communities)
- RELI 645 - Muslim Comparative Theologies: Sunni-Shi`i Religious Thought Credits: 3
- RELI 646 - Islam and Human Rights Credits: 3
- RELI 660 - Islamic Biomedical Ethics Credits: 3

Total: 18 credits

Master of Arts

Middle East and Islamic Studies, MA
College: College of Humanities and Social Sciences
Program: Middle East and Islamic Studies
The interdisciplinary MA in Middle East and Islamic studies introduces students to the major methodological and theoretical issues and debates in the study of the Islamic tradition and Middle Eastern societies. Students study classical and contemporary topics from both regional and global perspectives.

The expressed goal of this program is to situate the study of the Middle East and Islam within a globalized world. Accordingly, the curriculum covers topics of recent scholarly significance including the new media, political Islam, the political economy of business-government networks, the relationship between "resource wars" and the "war on terrorism," new diasporas and transnational Muslim communities in the 'West,' and the changed geopolitical environments of Muslim and Middle Eastern countries.

This interdisciplinary graduate degree prepares students for a variety of post-graduate opportunities in academia, government, and an expanding job market for people with this expertise.

An accelerated master's option is available to students in selected bachelor's programs. See Bachelor's Degree (selected)/Middle East and Islamic Studies, Accelerated MA for specific requirements.

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Degree Requirements

Five core courses (15 credits)

- MEIS 500 - Critical Issues and Debates in Middle East and Islamic Studies Credits: 3
- HIST 575 - Approaches to Middle East and Islamic History Credits: 3
- GOVT 632 - Politics and Societies of the Middle East Credits: 3
- RELI 644 - Islamic Texts and Contexts Credits: 3
- Methods course chosen from ANTH 650, HIST 610, SOCI 620, GOVT 500, or RELI 630 Credits: 3

Language proficiency

Prior to graduating, students must demonstrate professional competency in one of five major languages of the Middle East and Muslim world: Arabic, Persian, Turkish, Hebrew, or Urdu.

Five elective courses (15 credits)

Students who choose to complete a research project or write a thesis take 3 or 6 fewer elective credits.

In addition to the list below, elective courses may include special topics courses when relevant, directed readings and research, study abroad courses, internships, and other courses with the approval of the program director.

- ANTH 635 - Regional Ethnography Credits: 3 (when topic is Middle East and North Africa)
- ARTH 599 - Special Topics in Art History and the Decorative Arts Credits: 1-6 (when topic is Middle Eastern or Islamic art)
- ARTH 699 - Topics in Art History Credits: 3 (when topic is Middle East or Islamic art)
- CONF 653 - World Religions, Diplomacy, and Conflict Resolution Credits: 3
CONFLICT AND RELIGION CREDITS: 3

- ENG 665 - Seminar in Global Culture Credits: 3 (when topic is Middle East or Muslim world)
- FREN 553 - Topics in North African Francophone Literature and Culture Credits: 3
- FRLN 550 - Special Topics Credits: 3 (when topic is a language of the Middle East or Muslim world)
- FRLN 551 - Special Topics Credits: 3 (when topic is a language of the Middle East or Muslim world)
- GGS 533 - Issues in Regional Geography Credits: 1-6 (when topic is Middle East)
- GOVT 731 - Advanced Seminar in Comparative Politics Credits: 3 (when topic is the Middle East or a Muslim world region)
- GOVT 733 - Islam and Politics Credits: 3
- HIST 585 - Problems in Middle Eastern History Credits: 3
- MEIS 794 - Graduate Internship in Middle East and Islamic Studies Credits: 3
- MEIS 796 - Directed Readings in Middle East and Islamic Studies Credits: 3
- RELI 591 - Special Topics in Religious Studies Credits: 3 (when topic is Islam or Muslim communities)
- RELI 645 - Muslim Comparative Theologies: Sunni-Shi`i Religious Thought Credits: 3
- RELI 646 - Islam and Human Rights Credits: 3
- RELI 660 - Islamic Biomedical Ethics Credits: 3

**Optional Research Project (3 credits)**

Students choosing to complete a research project take one of the following courses, and one less elective course.

- GOVT 798 - Political Science Research Project Credits: 3
- HIST 798 - Directed Research and Writing in History Credits: 3
- SOCI 696 - Independent Study Credits: 1-3
- ANTH 796 - Master's Research Project Credits: 1-6
- MEIS 798 - Research Project in Middle East and Islamic Studies Credits: 3

**Optional Thesis (6 credits)**

Students who choose to write a thesis should be aware of the policies governing theses as stated in the Academic Policies section of this catalog. They must follow the thesis enrollment policy of the university and once enrolled in MEIS 799, maintain continuous enrollment.

Students choosing to complete a thesis take 6 fewer credits of elective.

- MEIS 799 - Thesis Research and Writing in Middle East and Islamic Studies Credits: 1-6

**Total: 30 credits**

**Non-Degree Islamic Studies Minor**

**Banner Code: ISLM**

Phone: 703-993-5404

Web: islamicsciences.gmu.edu
College: *College of Humanities and Social Sciences*
Program: *Middle East and Islamic Studies*

**Faculty**

Amireh, Bakhash, Butler, Dakake (director), DeCaroli, Haddad, Hamdani, Katz, Lukacs, Mandaville, McGlinchey, Paden, Salawdeh

The minor in Islamic studies is designed for students interested in the societies, cultures, history, and politics of the Islamic world. It offers students the opportunity to study the many societies that have significant Muslim populations. These societies are not just in the Middle East. They stretch from North Africa to Southeast Asia and beyond. They include Europe as well as North America. To fulfill the requirements for the minor, students take a wide variety of courses from a range of departments. These courses provide students with a broad and well-rounded understanding of Islam.

The minor will enhance students' opportunities for future study and employment, especially in the Washington, D.C. area.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

**Minor Requirements**

Students pursuing this minor must complete 21 credits with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor.

**Three core courses (9 credits)**

- GOVT 345 - Islam and Politics Credits: 3
- HIST 281 - Survey of Middle Eastern Civilization Credits: 3
- RELI 272 - Islam Credits: 3

**Three elective courses (9 credits) chosen from:**

Special topics courses, when relevant, may be used to fulfill this requirement with prior written approval of the director.

- ARAB 420 - Survey of Arabic Literature Credits: 3
- ARAB 440 - Topics in Arabic Religious Thought and Texts Credits: 3
- ANTH 308 - Peoples and Cultures of the Middle East Credits: 3
- ANTH 309 - Peoples and Cultures of India Credits: 3
- ARTH 320 - Art of the Islamic World Credits: 3
- ARTH 382 - Arts of India Credits: 3
- ARTH 386 - The Silk Road Credits: 3
- ENGH 309 - Topics in Literature Credits: 1-3 (when topic is Arab and Arab-American writers)
- FREN 453 - Topics in North African Francophone Literature and Culture Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GGS 330 - Geography of the Soviet Succession States Credits: 3
- GOVT 328 - Non-Western Political Theory Credits: 3
- GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3
One course (3 credits) in a foreign language of any country with a significant Muslim population

Arabic may be used to fulfill this requirement, but other languages of the Islamic world may be substituted with prior written approval of the director. This requirement may be waived for students who can demonstrate proficiency in a relevant foreign language. Contact the college Office of Undergraduate Affairs. Such students will be required to take 3 additional elective credits.

Total: 21 credits

Middle East Studies Minor

Banner Code: MES
Web: mes.gmu.edu

College: College of Humanities and Social Sciences
Program: Middle East and Islamic Studies

Faculty

Amireh, Bakhash, Bryant, Butler, Dakake, Gopin, Haddad (director), Hamdani, Katz, Lukacs, Mandaville, Paczynska, Rouhana, Salawdeh

Today, more than ever before, Middle East politics has become intertwined with American politics and the lives of many Americans. The minor in Middle East studies is designed to equip undergraduates with a firm multidisciplinary grounding in the region, its history, and its international relations.

This minor is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

In partial fulfillment of coursework for the minor, students are strongly encouraged to participate in a study abroad program in the Middle East.

Students pursuing this minor must complete 18 credits of coursework with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor.
Two core courses (6 credits)

- HIST 282 - Survey of Middle Eastern Civilization Credits: 3
- GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3

Four elective courses (12 credits) chosen from:

One course in a relevant language may be used as an elective. Other courses including ANTH 399 or CONF 399, when topic is relevant to the Middle East, may be used as electives with the prior written approval of the director.

- ARAB 325 - Major Arab Writers/Stories Credits: 3
- ARAB 330 - Reading and Conversation I Credits: 3
- ARAB 331 - Reading and Conversation II Credits: 3
- ANTH 330 - Peoples and Cultures of Selected Regions: Non-Western Credits: 3 (if region studied is relevant to Middle East studies)
- ARTH 319 - Art and Archaeology of the Ancient Near East Credits: 3
- ARTH 320 - Art of the Islamic World Credits: 3
- CONF 340 - Global Conflict Analysis and Resolution Credits: 3
- ENGH 362 - Global Voices Credits: 3 (if literatures studied are relevant to Middle East studies)
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GOVT 328 - Non-Western Political Theory Credits: 3
- GOVT 345 - Islam and Politics Credits: 3
- GOVT 445 - Human Rights Credits: 3

- HIST 461 - Arab-Israeli Conflict Credits: 3
- HIST 462 - Women in Islamic Society Credits: 3
- HIST 465 - The Middle East in the 20th Century Credits: 3
- RELI 211 - Religions of the West Credits: 3
- RELI 272 - Islam Credits: 3
- RELI 374 - Islamic Thought Credits: 3
- RELI 375 - Qur’an and Hadith Credits: 3

Total: 18 credits
Non-Western Culture Requirement

For the College of Humanities and Social Sciences, the College of Science, and the School for Conflict Analysis and Resolution, 3 credits of an approved course in the study of a non-Western culture is required in addition to the course used to fulfill the university-wide Mason Core requirement in global understanding.

A course used to fulfill the university-wide Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement.

A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (university-wide Mason Core requirements, college-level requirements, or requirements for the major).

Approved Non-Western Culture Courses

- ANTH 114 - Introduction to Cultural Anthropology
- ANTH 300 - Civilizations
- ANTH 301 - Native North Americans
- ANTH 302 - Peoples and Cultures of Latin America
- ANTH 303 - Peoples and Cultures of the Andes
- ANTH 306 - Peoples and Cultures of Island Asia
- ANTH 307 - Ancient Mesoamerica
- ANTH 308 - Peoples and Cultures of the Middle East
- ANTH 309 - Peoples and Cultures of India
- ANTH 313 - Myth, Magic, and Mind
- ANTH 314 - Zombies
- ANTH 316 - Peoples and Cultures of the Caribbean
- ANTH 323 - Digging and Dealing in the Dead: Ethics in Archaeology
- ANTH 330 - Peoples and Cultures of Selected Regions: Non-Western
- ANTH 332 - Cross-Cultural Perspectives on Globalization
- ANTH 381 - Medical Anthropology
- ANTH 383 - Cities of the Global South
- ANTH 396 - Issues in Anthropology: Social Sciences
- ARAB 420 - Survey of Arabic Literature
- ARAB 440 - Topics in Arabic Religious Thought and Texts
- ARTH 203 - Survey of Asian Art
- ARTH 204 - Survey of Latin American Art
- ARTH 319 - Art and Archaeology of the Ancient Near East
- ARTH 320 - Art of the Islamic World
- ARTH 380 - African Art (Topic Varies)
- ARTH 382 - Arts of India
- ARTH 383 - Arts of Southeast Asia
- ARTH 384 - Arts of China
- ARTH 385 - Arts of Japan

- Pre-Medical Undergraduate Certificate

About the College

The College of Science (COS) serves as the nexus for research and education in the natural, mathematical, and computational sciences at George Mason University. The central mission of COS is to create and disseminate scientific knowledge, provide outstanding scholarship in concert with excellent teaching, and develop the human and technical resources required to address the current and future needs of society. Through its innovative and multifaceted educational and research mission, COS offers exciting opportunities to undergraduate and graduate students, scientists, educators, and other professionals in Northern Virginia and the national capital region.

In addition to the wide variety of undergraduate degree programs offered by its departments, COS also offers many innovative graduate degrees and interdisciplinary minors. The research strength of COS provides an essential resource to graduate and
undergraduate students whose involvement in research is strongly encouraged. Many undergraduates go on to graduate school and to pursue careers in public service, nonprofit organizations, and the private sector. Graduate students engage in more specialized study at the master's and doctoral levels, preparing them for first or second careers or job advancement and providing personal enrichment.

Faculty members are committed to teaching grounded in scholarship and research. They strive to make students rigorous thinkers and clear communicators while encouraging experimentation with new approaches and ideas. Students are thus prepared for their role as informed citizens in a complex, global society and are able to adapt to an ever-changing world.

Administration

Peggy Agouris, Dean
Evans J. Mandes, Senior Associate Dean for Faculty Matters
Ali Andalibi, Associate Dean for Research
Kevin M. Curtin, Associate Dean for Academic Affairs
Donna M. Fox, Associate Dean for Student Affairs and Special Programs
Martha Wescoat-Andes, Associate Dean for Administration

College Policies

Students in COS are governed by the policies and procedures of the university. Areas where the college provides additional guidance will be found in the Undergraduate Education and Graduate Education sections below.

The college's knowledgeable staff is available if questions arise:

Office of Academic and Student Affairs
Exploratory Hall, Suite 1450
Phone: 703-993-9532; Fax: 703-993-9033
Undergraduate Student Inquiries and Information: ugradCOS@gmu.edu
Graduate Student Inquiries: COSgrad@gmu.edu

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (703-993-2474) to learn more about accommodations that may be available to them.

Undergraduate Education

The college offers numerous Bachelor of Arts and Bachelor of Science degrees. These undergraduate degrees consist of coursework in the Mason Core, in a major area of study, and in elective courses. To earn a bachelor's degree, students must at a minimum:

- Complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above).
• Complete at least one course designated as "writing intensive" (at the 300 or 400-level).
• All entering students who have not yet satisfied the Mason Core requirement in 'Quantitative Reasoning' are required to take the math placement test prior to enrollment.
• Students should also consult the Undergraduate Policies section of this catalog for information concerning university-wide requirements for undergraduate degrees.

All students are responsible for meeting with their academic advisor and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes in order to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of the requirements.

More information regarding the undergraduate programs administered by COS is available on the college's website.

College-level Degree Requirements

The baccalaureate degree is designed to provide a broad knowledge of the world, develop in students the ability to think conceptually and critically, acquaint them with many different methods of inquiry, and provide skills to continue intellectual growth throughout life.

Bachelor of Arts

The Bachelor of Arts (BA) degree provides students with a breadth of knowledge as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the Requirements for Bachelor's Degrees and the Mason Core, students pursuing a BA degree must also complete the College Requirements for the BA Degree, and the degree program's requirements, both listed in the specific degree program's section of this catalog.

Bachelor of Science

The Bachelor of Science (BS) degree provides students with a more intensive approach to the technical core knowledge and concepts in their major field of study. Therefore, this curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree in order to allow students to achieve greater depth in their majors. Students pursuing a BS degree must complete the Requirements for Bachelor's Degrees, including the Mason Core, and the requirements for their major. Requirements for each BS major are listed in the specific degree program's section of this catalog.

Teacher Licensure

Degree programs that help to prepare students for high school teaching careers are available in the following COS programs:

• Biology, BA
• Biology, BS
• Chemistry, BS
• Earth Science, BS
• Mathematics, BA
• Mathematics, BS
• Physics, BS

Students who wish to become K-12 teachers and who plan to seek teacher licensure should also consult the College of Education and Human Development's section of this catalog and attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education's website.

Minors
Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Undergraduate Policies section of this catalog. Students interested in earning a minor should complete the Minor Declaration form.

Undergraduate Policies

Students should become familiar with the university’s general academic policies in addition to those specific to each department. Please see the Undergraduate Policies section of this catalog.

Students with questions regarding exceptions to undergraduate academic policies and college-level requirements should contact the college's Office of Academic and Student Affairs (email address: ugradCOS@gmu.edu). Additional information and forms are available online from the college's Undergraduate Student Affairs webpage.

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the official add period. Calendars are available on the Office of the University Registrar's website.

Academic Load

Students should review the university policies regarding academic load in the Registration and Attendance section of this catalog.

In order to be considered for an overload, students must fulfill all of the following criteria:

- Be in good academic standing,
- Have completed the prior semester with a GPA of 2.75 or higher,
- Have a cumulative GPA of 2.75 or higher,
- No grades of 'C-' or lower in the previous semester,
- Have demonstrated in prior semesters at George Mason the ability to handle an increased and demanding course load while maintaining high performance, and
- Have no remaining incompletes ('IN') from a previous semester

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at Mason.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition and fees by the official university deadlines. Calendars are available on the Office of the University Registrar's website.

Excluded Courses

Physical Education (PHED); Parks, Recreation, and Leisure Studies (PRLS); and Recreation (RECR) activity courses cannot be used for credit towards a COS degree.

Military Science courses MLSC 400 and MLSC 402 can be used for credit towards a COS degree, but credit from other MLSC courses may not be applied towards COS degrees.

Once matriculated at Mason, students may not take CLEP exams and apply credits from those exams towards COS degrees. Students may apply credits from CLEP exams to COS degrees only if those credits were awarded and reported prior to admission.
University Consortium Registration

Students should review the university policies in the Special Registration Procedures section of this catalog, including the University Consortium listing.

In addition, students who have failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the Office of Academic and Student Affairs at least three weeks prior to the first day of classes for the relevant semester at Mason.

Permission to Study Elsewhere

Once enrolled in degree status at Mason, students with less than 60 hours of earned transfer credits (excluding any credits earned through the Washington Metropolitan Area Consortium or through the Center for Global Education) may take no more than 9 credits of coursework in COS disciplines at another institution.

Students with 60 or more hours of transfer credits are prohibited from taking additional coursework in COS disciplines at another institution. Students may request special permission for additional credits beyond these listed limits for summer registration if their permanent residence is more than 50 miles from Mason's Fairfax campus. See the Permission to Study Elsewhere listing of the Special Registration Procedures section of this catalog.

Study Abroad

In order to be considered for study through the Center for Global Education, students must plan well in advance and receive prior, written permission from the college's associate dean for student affairs. Students must also meet all of the following criteria:

- Meet all eligibility criteria for their program as specified by the Center for Global Education, including minimum GPA requirements,
- Completed the immediately preceding semester at Mason with a GPA of 2.00 or higher, and
- Completed the necessary forms and obtained all required signatures and course equivalencies

The Center for Global Education may have higher academic standards and students must meet all eligibility requirements. Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

Leave of Absence

Please consult the Registration and Attendance section of this catalog regarding the leave of absence policy.

Withdrawals

Courses for which a withdrawal is approved receive a grade of 'W'.

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended. Please review the applicable academic calendar for pertinent dates. Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the college's associate dean for student affairs, are typically allowed only for full semesters at a time (all enrolled courses), and are only permitted for non-academic reasons. Withdrawals cannot be approved for academic reasons. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes. Credits graded 'W' do not affect a student's GPA, but do count as attempted hours. The total attempted hours and cumulative GPA determine a student's academic standing. If the cumulative GPA is below 2.00, withdrawals may affect whether
a student will be on warning, probation, suspension, or dismissal. Students should be familiar with the Student Retention Categories listing in the Undergraduate Policies section of this catalog.

**Academic Clemency**

Students should review the university policies regarding academic clemency in the Academic Standing section of this catalog.

In extraordinary cases, students who (a) have been absent from Mason for a minimum of three consecutive calendar years, and (b) are currently in their first semester back at the university may request that the college's associate dean for student affairs consider allowing clemency from up to 16 hours of coursework from previous semesters.

To be considered for this clemency, students must meet all of the following criteria:

- Be absent from Mason for a minimum of three consecutive calendar years,
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return,
- Submit their request within 12 months of the first day of the re-enrollment term,
- In order to make this request, students should (a) enroll in at least 6 hours during their first 12 months back at Mason and (b) earn a minimum GPA of 2.50 each semester back prior to making the clemency request, with no grade below 2.00.

If these minimum academic requirements are not met during the first semester of return, then clemency will not be allowed under any circumstances.

**Appeals Process**

Students may appeal departmental decisions concerning academic actions to COS's Office of Academic and Student Affairs. They may further appeal the decisions of COS's Office of Academic and Student Affairs to the Dean's Council, a committee composed of college deans and faculty members. These levels of appeal are subject to the limits below concerning the final level of appeal for each type of academic action. Students who feel that the college appeal process was conducted unfairly may appeal to the Office of the Provost as specified in the Student Rights and Responsibilities section of this catalog. Grade appeals should first be made to the department or program, following the process specified in the Grading section of this catalog. If they are resolved within the department or program, that is the final level of appeal. The departmental decision may be appealed to the college's associate dean for student affairs only on the basis of procedural irregularity. Such appeals should be made through the Office of Academic and Student Affairs. If the grade appeal is not resolved within the department or program, the chair makes a recommendation to the college's associate dean for student affairs, who makes the final determination. The decision of the associate dean is not subject to review or further appeal. Departments set the requirements for the majors and minors that they administer. Substitutions and waivers of requirements require the approval of COS's Office of Academic and Student Affairs.

When a department denies a substitution or waiver of a requirement, this decision may be appealed to the Office of Academic and Student Affairs on the basis of procedural irregularity only, and is the final level of approval. The Dean's Council is the final level of appeal for course overloads, consortium registration, study elsewhere, and withdrawals after the drop deadline within the semester. The college's associate dean for student affairs is the final level of appeal for COS college-level requirements, retroactive adds, withdrawals, graduation, and return from suspension and dismissal. There is no waiver or appeal of satisfactory performance standards (minimum grades or grade point average, GPA) that have been set by the department or program faculty for the courses in their major or minor. Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes in the following semester.

**Grievances**

Grievances should be directed in writing to the college's associate dean for student affairs. The college's Office of Academic and Student Affairs may also provide guidance to students on how to resolve their concerns.
Transfer Students

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all of Mason's lower level Mason Core requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 and a synthesis course. Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a degree in the college are considered to have met all college requirements except for proficiency in a foreign language (required of BA students). Students with a bachelor's degree from an accredited institution who are pursuing a BA degree in COS are also considered to have met all college requirements except for proficiency in a foreign language.

Graduate Education

COS offers numerous graduate certificates, master's programs, and doctoral programs; the requirements for each can be found in the program's description in this catalog. More information regarding the college's graduate programs is available on the college's website.

Graduate Admission

Admissions decisions are made by the faculty committee in the respective graduate program. Denial of admission is not subject to appeal. Further information can be found in the Admissions section of this catalog.

Provisional Admission

Provisionally admitted students are not eligible to participate in any consortium coursework, studying at another institution, or study abroad programs until the conditions of the provisional contract have been met. Transfer of credit requests for coursework taken in non-degree status at Mason or another institution will not be considered until the provisional contract has been fulfilled. Further information on provisional admission can be found in Graduate Admission Policies section of this catalog.

Non-degree Enrollment

COS gladly admits qualified students for non-degree studies. Some of the factors that are considered by COS while making non-degree admissions decisions include: previous academic performance, professional experience, and academic fit. To apply, applicants are to complete the non-degree George Mason University Graduate Application and provide official transcripts from all institutions attended. Further information can be found in the Non-degree Enrollment section of this catalog and on the Office of Admissions' website.

Upon admission to graduate non-degree studies, students are considered graduate students and are charged tuition accordingly (regardless of the course's level). COS permits up to 12 credits of relevant graduate coursework earned in non-degree status to be considered for transfer into many of its graduate programs.

Reduction of Credit

Students accepted into a master's or doctoral program who have earned a degree in a relevant field from a regionally accredited institution may be eligible for a credit reduction. Students must request a reduction of credit from the graduate program director of their graduate program; reductions must be approved by both the graduate program director and the college's associate dean for student affairs. Further details and related restrictions can be found in the Graduate Policies section of this catalog.

Transfer of Credit

Graduate credit earned prior to admission may be eligible to apply towards a graduate certificate or degree program. Details and related restrictions can be found in the Graduate Policies section of this catalog. Additionally, courses with grades of 'P' or 'S' are not accepted for transfer unless the official transcript indicates that the grade is equivalent to a 3.00 ('B') or better. Some programs have more stringent standards regarding a transfer of credit; students should contact their graduate program for specific information.

Credit from Other Institutions (Permission to Study Elsewhere)

Students enrolled in a degree program may take graduate courses at another regionally accredited institution and apply these credits to a master's or doctoral degree with prior approval. Details and related restrictions can be found in the Graduate Policies section of this catalog. Students enrolling in courses at other institutions with different drop/add timetables must still abide by Mason's drop/add deadlines in terms of acquiring necessary approvals.

Academic Load

Graduate students can enroll in up to 12 credits each semester; non-degree graduate students can enroll in up to 10 credits each semester. Students should review the university's policies regarding academic load in the Registration and Attendance section of this catalog.

University Consortium

Students should review university policies regarding the University Consortium under the Special Registration Procedures section of this catalog.

In addition, in order to register for a consortium course, students must have an overall GPA of at least 3.00 and be in good academic standing. Students with grades of 'IN' on their record or who earned grades of 'C' or 'F' in the most recent semester are not eligible to register for a consortium course. Students who have received a grade less than 3.00 in a consortium course are not permitted to enroll in additional consortium courses. Newly admitted graduate students are not permitted to enroll in consortium courses during their first semester of graduate study. Students who wish to enroll in consortium courses during their second semester of study must wait until the grades for the previous semester have been posted.

Dissertation Committee

The college follows university policies regarding dissertation committees. Please see the Dissertation Committee listing in the Requirements for Doctoral Degrees section of this catalog. Please note that some programs within COS may have a more stringent policy.

Dissertation (998/999) Registration

Most programs within the college follow university policies regarding dissertation registration. Please see the Dissertation Registration listing in the Requirements for Doctoral Degrees section of this catalog. Some departments may require additional requirements.

Time Limit for Doctoral Students

The college follows university policies regarding doctoral time limits. Please see the Time Limit listing in the Requirements for Doctoral Degrees section of this catalog. If your catalog term was before this current catalog, please visit the archived catalogs page and find your catalog term's policy on time limits.
Requests for extension of time limits must be submitted in writing to the college's associate dean for student affairs. The request should explain the extenuating circumstances that prevented timely completion of the degree, corrective action that has been taken to address those circumstances, and a time line for completing the work within the limits of the extension. The request should include a letter from the student's graduate program director indicating the program's support for the extension and confirmation that the work can be completed within the limits of the extension.

**Graduate Appeals of Termination**

All graduate students should be familiar with the university's polices on termination; please see the Academic Termination listing in the Graduate Policies section of this catalog. Students who meet the criteria for academic termination may submit a written appeal to the college's associate dean for student affairs. Appeals should include all relevant information on the basis for appeal, as well as any appropriate documentation and a letter of support from the graduate program. Appeals of termination are reviewed by the college's associate dean for student affairs with input from appropriate faculty within the student's department. The ruling represents the college's final decision.

**Graduate Certificate**

**Advanced Biomedical Sciences Graduate Certificate**

**Banner Code:** SC-CERG-ABS

**College:** College of Science

The Advanced Biomedical Sciences Graduate Certificate is a premium-priced program offered jointly by George Mason University and Georgetown University. This program is aimed at students who typically have all of their prerequisites for medical, dental or other health-related fields, but otherwise may have a modest science background (non-science majors, for example), or modest grades in the sciences as undergraduates, and/or may also need to improve their Medical College Admission Test, Dental Admission Test, or other pre-professional scores. This is a 9-month full-time program that begins each fall semester. All classes are held at the Prince William Campus.

Applicants are expected to have a bachelor's degree from a regionally accredited university, the desire to pursue a career in medicine, dentistry, or other health-related career, completion of all of the prerequisite courses for medical school (biology, chemistry, organic chemistry, physics, math), and overall credentials suitable for acceptance to graduate programs in the College of Science at George Mason University and the Georgetown University Graduate School of Arts and Sciences.

The graduate certificate may be pursued on a full-time basis.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure information page at http://irr.gmu.edu/gedt/Advanced_Biomedical_Sciences/Gedt.html.

**Certificate Requirements**

**Fall Semester (11 credits)**

- BMED 601 - Cell and Molecular Physiology Credits: 4
- BMED 602 - Biomedical Statistics Credits: 3
The Pre-Medical Undergraduate Certificate is a premium program offered to enlisted members of the U.S. military who are chosen specifically from a federal program referred to as EMDP2 (Enlisted to Medical Degree Preparatory Program). This is a post-baccalaureate program aimed at active duty military enlisted members who have earned a bachelor's degree from a regionally accredited institution with a minimum cumulative GPA of 3.0, who have experience working in a health-related position in the military, and who meet all other requirements specified by the Uniformed Services University of the Health Sciences (USU), and who are interested in matriculating at the Uniformed Services University (military medical school) or another medical school. Only those individuals who are supported by EMDP2 are eligible to enroll in the Pre-Medical Undergraduate Certificate.

The Pre-Medical Undergraduate Certificate will provide a one-year undergraduate program that will allow qualified individuals to complete undergraduate pre-medical admissions requirements as currently specified by the AAMC (American Association of Medical Colleges). This is a full-time program offered during the day, located at the Science and Technology Campus of George Mason University. Students are selected by the US military and are admitted as a cohort in the fall semester only.

Admission Requirements

Applicants must be active duty military and selected by the EMDP2. Students are expected to have a bachelor's degree from a regionally accredited university, the desire to pursue a career in military medicine, and overall credentials suitable for acceptance to undergraduate study in the College of Science at George Mason University, outlined in the Admissions section of this catalog.

Applicants who do not meet the admissions requirements for this certificate may be interested in learning about the Career Changer's Biological Sciences Undergraduate Certificate.
Fall Semester (12-16 credits)

- BIOL 213 - Cell Structure and Function Credits: 4
- CHEM 211 - General Chemistry I Credits: 3 and CHEM 213 - General Chemistry Laboratory I Credits: 1
- MATH 105 - Precalculus Mathematics Credits: 4 (only if appropriate score on math placement test is not achieved)
- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1

Spring Semester (16 credits)

- BIOL 311 - General Genetics Credits: 4
- CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

Summer Session (10 credits)

- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2

Certificate Total: Minimum 38 credits

Atmospheric, Oceanic and Earth Sciences

Phone: 703-993-6069
Web: aoes.gmu.edu

Faculty

Professors: DelSole, Dirmeyer, Hazen (Robinson Professor), Hinnov, Huang, Kinter, Schneider (chair), Shukla, Straus

Associate professors: Boybeyi, Chiu, Klinger, McBride, Stan

Assistant professors: Burls, Pegion, Uhen

Term associate professors: Nord, Verardo

Term assistant professors: Kysar-Mattietti
Term research faculty: Buckley, Doty

Affiliate faculty: Houser, Lukes, Summers

Courses

The department offers all courses designated CLIM and GEOL in the Courses section of this catalog.

Honors Program for Earth Science and Geology

Earth science majors who have completed 16 credits of math and science, including GEOL 302 with a GPA of 3.00 or higher are eligible to enter the departmental honors program. Transfer students who have an incoming GPA of 3.10 or higher in math and science and a grade of 'B' or better in GEOL 302 are also eligible. To graduate with honors in Earth Science, students are required to maintain a minimum GPA of 3.00 in math and science courses and complete one of the two following sets of courses with an average GPA of 3.50 or better: (1) GEOL 410, GEOL 411, and GEOL 420 or (2) CLIM 408, CLIM 409, and GEOL 420.

Bachelor of Arts

Geology, BA

Banner Code: SC-BA-GEOL

College: College of Science
Department: Atmospheric, Oceanic and Earth Sciences Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. As outlined below, students in this bachelor's program must also complete additional College Requirements for the BA Degree.

Candidates for a degree in geology must complete the following with a minimum GPA of 2.50.

GEOL 317 fulfills the writing intensive requirement for this major.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Degree Requirements

Geology Core (38 credits)

- GEOL 101 - Introductory Geology I Credits: 4 (Mason Core: Natural Science course)
- GEOL 102 - Introductory Geology II Credits: 4 (Mason Core: Natural Science course)
- GEOL 302 - Mineralogy Credits: 4
- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 317 - Geomorphology Credits: 4 (fulfills writing intensive requirement)
- GEOL 401 - Structural Geology Credits: 4
• GEOL 404 - Geological Field Techniques Credits: 1-6 (6 credits required. A 6-credit geology field camp may be substituted for this requirement, see advisor for details)

  * Students must achieve a grade of 'C' or better in GEOL 302 before taking GEOL 304 or GEOL 308.

Chemistry (4 credits)

• CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course)
• CHEM 213 - General Chemistry Laboratory I Credits: 1

Physics (4 credits)

Choose from one of the following Mason Core: Natural Science sequences:

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
  Or
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1

Mathematics (3-4 credits)

Choose one from the following Mason Core: Quantitative Reasoning courses:

• MATH 110 - Introductory Probability Credits: 3
• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4

Computer Science (3 credits)

• GGS 311 - Introduction to Geographic Information Systems Credits: 3

Program Courses (9 credits)

Students must take 9 credits of degree-related coursework in a coherent program designed in coordination with advisor and approved by department chair.

Core Coursework Total: 61-62 credits

Mason Core, BA Requirements, and Elective Credits (58-59 credits)

In order to meet a minimum of 120 credits, this degree requires an additional 58-59 credits, which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.
College Requirements for the BA Degree

Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core.

Philosophy or Religious Studies (3 credits)

Choose any course in philosophy (PHIL) or religious studies (RELI), except for PHIL 323 and PHIL 324.

Social and Behavioral Sciences (3 credits)

Choose one approved Mason Core: Social and Behavioral Science course in addition to the Mason Core-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except HIST 100 or HIST 125), LING, PSYC, or SOCI, and the following GGS courses:

- GGS 101 - Major World Regions Credits: 3
- GGS 103 - Human Geography Credits: 3
- GGS 110 - Introduction to Geoinformation Technologies Credits: 3
- GGS 301 - Political Geography Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3
- GGS 304 - Population Geography Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 315 - Geography of the United States Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 320 - Geography of Europe Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GGS 330 - Geography of the Soviet Succession States Credits: 3
- GGS 357 - Structures in Urban Governance and Planning Credits: 3
- GGS 380 - Geography of Virginia Credits: 3

Natural Science (1 credit)

Choose one credit in addition to the Mason Core: Natural Science requirement for a total of 8 credits. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science courses that include a laboratory experience (except for BIOL 124 and BIOL 125).

Foreign Language (0-3 credits)

Intermediate-level proficiency in one foreign language is required. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher-level courses taught in the language), or by achieving a satisfactory score on an approved proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found via the college's Office of Academic and Student Affairs.
Non-western Culture (0-3 credits)

Choose one approved Non-Western Culture Requirement course in addition to the course used to fulfill the Mason Core: Global Understanding requirement. A course used to fulfill the Mason Core: Global Understanding requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major).

Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits

Bachelor of Science

Atmospheric Sciences, BS

Banner Code: SC-BS-AOES
College: College of Science
Department: Atmospheric, Oceanic and Earth Sciences

The undergraduate program in atmospheric sciences gives students a strong quantitative undergraduate education in atmospheric, climate, and related sciences to understand the basic principles behind current and emerging issues in weather, climate variability, and climate change. Students completing the atmospheric sciences degree will be prepared for a full range of career paths including forecast and analysis, operations and research support in meteorology, atmospheric sciences, and climate. The curriculum meets the American Meteorological Society's recommendations for a bachelor's degree in atmospheric sciences.

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core. In addition, a GPA of at least 2.00 is required for all core courses with an overall GPA of at least 2.50. The university's writing intensive requirement for the major will be met upon successful completion of CLIM 408.

Degree Requirements

Atmospheric Sciences Core (24 credits)

- CLIM 102 - Introduction to Global Climate Change Science Credits: 4 (Mason Core: Natural Science course)
- CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3 (Mason Core: Natural Science course)
- CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1
- CLIM 301 - Weather Analysis and Prediction Credits: 4
- CLIM 408 - Senior Research Credits: 3 (fulfills the writing intensive requirement)
- CLIM 411 - Atmospheric Dynamics Credits: 3
- CLIM 429 - Atmospheric Thermodynamics Credits: 3
- PHYS 475 - Atmospheric Physics Credits: 3

Chemistry (4 credits)

- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course)
- CHEM 213 - General Chemistry Laboratory I Credits: 1

Computer Science (3-4 credits)

Choose one from the following:

- CDS 130 - Computing for Scientists Credits: 3 (Mason Core: Information Technology course)
- CS 112 - Introduction to Computer Programming Credits: 4 (An additional information technology ethics course must be taken in order to completely fulfill the Mason Core: Information Technology requirement. Recommended courses include either CDS 151 or CS 105).

Mathematics (11 credits)
• MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 213 - Analytic Geometry and Calculus III Credits: 3

Statistics (3 credits)

• STAT 250 - Introductory Statistics I Credits: 3 (Mason Core: Quantitative Reasoning course)

Physics (8 credits)

Each is a Mason Core: Natural Science course:

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

Options (9 credits)

Students in the atmospheric sciences major will select one of the following options in addition to the required courses above. These options reflect faculty expertise and provide two areas of research emphasis. The options will help in creating educated professionals who have the requisite training to support future weather and climate research, enabling the graduate's potential for providing substantial societal benefits.

Meteorology Option

This option is designed for students who are primarily interested in weather and weather forecasting. The required classes in this option emphasize atmospheric phenomena, especially those that have the greatest impact on society. In addition to the required courses above, students choosing this option will take the following 9 credits of meteorology courses:

• CLIM 312 - Physical Climatology Credits: 3 or GGS 312 - Physical Climatology Credits: 3
• CLIM 314 - Severe and Extreme Weather Credits: 3 or GGS 314 - Severe and Extreme Weather Credits: 3
• CLIM 319 - Air Pollution Credits: 3 or GGS 319 - Air Pollution Credits: 3

Option Total: 9 credits

Computational Atmospheric Sciences Option

The computational atmospheric sciences option gives students preparation in computational science, mathematics, and elements of numerical modeling in order to undertake quantitative research or operational work in a professional or graduate setting. In addition to the required courses above, students choosing this option will take the following 9 credits:

• CLIM 440 - Climate Dynamics Credits: 3 or CLIM 470 - Numerical Weather Prediction Credits: 3
• CDS 251 - Introduction to Scientific Programming Credits: 3 or CDS 301 - Scientific Information and Data Visualization Credits: 3 or CDS 302 - Scientific Data and Databases Credits: 3 or CDS 303 - Scientific Data Mining Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3
Option Total: 9 credits

Required Electives (9 credits)

The 9 credits of required electives must be chosen from this list and be independent of courses taken in the selected option (meteorology or computational atmospheric sciences):

- CLIM 312 - Physical Climatology Credits: 3 or GGS 312 - Physical Climatology Credits: 3
- CLIM 314 - Severe and Extreme Weather Credits: 3 or GGS 314 - Severe and Extreme Weather Credits: 3
- CLIM 319 - Air Pollution Credits: 3 or GGS 319 - Air Pollution Credits: 3
- CLIM 409 - Research Internship Credits: 3
- CLIM 412 - Physical Oceanography Credits: 3
- CLIM 429 - Atmospheric Thermodynamics Credits: 3
- CLIM 438 - Atmospheric Chemistry Credits: 3
- CLIM 440 - Climate Dynamics Credits: 3
- CLIM 470 - Numerical Weather Prediction Credits: 3
- GEOL 420 - Earth Science and Policy Credits: 3 (Mason Core: Synthesis course)
- CDS 251 - Introduction to Scientific Programming Credits: 3
- CDS 301 - Scientific Information and Data Visualization Credits: 3
- GGS 354 - Data Analysis and Global Change Detection Techniques Credits: 3
- GGS 455 - Environmental Impact Assessment Credits: 3
- GGS 456 - Introduction to Atmospheric Radiation Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3

Mason Core and Elective Credits (48-49 credits)

In order to meet a minimum of 120 credits, this degree requires an additional 48-49 credits (dependent upon the course chosen for the Computer Science requirement), which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
Earth Science, BS

Banner Code: SC-BS-ESCI

College: College of Science
Department: Atmospheric, Oceanic and Earth Sciences

This degree is intended for students interested in studying the Earth and its processes. Students receive a broad background in the Earth sciences and select one of five specialty concentrations. The concentrations in Earth science education, Earth surface processes, environmental geoscience, and geology are solely offered by the Department of Atmospheric, Oceanic and Earth Sciences. The concentration in oceanography and estuarine science is offered jointly with the Department of Environmental Science and Policy, where specific advising is also available.

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. In addition, students must complete the following coursework with a minimum GPA of 2.00.

GEOL 317 fulfills the writing intensive requirement for this major- with the exception of the environmental geoscience concentration, whereby GEOL 305 fulfills the writing intensive requirement.

This undergraduate program offers students the option of applying to the accelerated master's degree program in Curriculum and Instruction (Secondary Education Earth Science Concentration).

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Degree Requirements

Core Science and Mathematics (32-33 credits)

- GEOL 101 - Introductory Geology I Credits: 4 (Mason Core: Natural Science course)
- GEOL 309 - Introduction to Oceanography Credits: 3 or BIOL 309 - Introduction to Oceanography Credits: 3
- GEOL 406 - Seminar in Earth and Environmental Science Credits: 3 or GEOL 420 - Earth Science and Policy Credits: 3
- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course) and CHEM 213 - General Chemistry Laboratory I Credits: 1
• CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course) and CHEM 214 - General Chemistry Laboratory II Credits: 1
• MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• STAT 250 - Introductory Statistics I Credits: 3 (Mason Core: Quantitative Reasoning course)

Additional Science

Choose one of the following options:

Option A (Mason Core: Natural Science courses)
• CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3
• CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1

Option B (Mason Core: Natural Science courses)
• PHYS 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3
• PHYS 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1

Option C
• GGS 309 - Meteorology and Climate Credits: 3

Physics (8 credits)

Choose one 8-credit sequence from the following Mason Core: Natural Science courses, either:

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
  Or
• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

Concentrations (29-50 credits)

Additionally, students must choose a concentration; details and credit requirements for each are noted below.

▲ Earth Surface Processes (EP)

This concentration focuses on a broad understanding of the physical processes and natural materials found at or near the Earth's surface that have produced the primary landforms and landscapes observed today. Fundamental concepts, methods and techniques of landscape analysis are also examined. Students choosing this concentration must complete the following coursework:

• GEOL 102 - Introductory Geology II Credits: 4 or EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4 (Mason Core: Natural Science course)
• GEOL 302 - Mineralogy Credits: 4
- GEOL 303 - Field Mapping Techniques Credits: 3
- GEOL 306 - Soil Science Credits: 3
- GEOL 317 - Geomorphology Credits: 4 (fulfills writing intensive requirement)
- GGS 311 - Introduction to Geographic Information Systems Credits: 3

Additional EP Courses

Choose 10-15 credits from the following courses:

- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 305 - Environmental Geology Credits: 3
- GEOL 313 - Hydrogeology Credits: 3
- GEOL 315 - Topics in Geology II Credits: 1-3
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- GEOL 401 - Structural Geology Credits: 4
- GEOL 403 - Geochemistry Credits: 3
- GEOL 417 - Geophysics Credits: 3

* Prerequisite requires a grade of 'C' or better in GEOL 302 - Mineralogy

EP Concentration Total: 31-36 credits

▲ Environmental Geoscience (EVGS)

This concentration provides the tools for applying geologic information (on soils, rocks, water, weather, and landscapes) to contemporary environmental problems (including: pollution, waste management, resource extraction, natural hazards, land-use, habitat restoration, species preservation, and human health). Environmental geoscience studies the physical environment in which biological interactions take place, whereby aiding the understanding of ecology. Students choosing this concentration must complete the following coursework:

- GEOL 102 - Introductory Geology II Credits: 4 (Mason Core: Natural Science course)
- GEOL 302 - Mineralogy Credits: 4
- GEOL 305 - Environmental Geology Credits: 3 (fulfills the writing intensive requirement for only the EVGS concentration)
- GEOL 306 - Soil Science Credits: 3
- GEOL 313 - Hydrogeology Credits: 3
- GEOL 320 - Geology of Earth Resources Credits: 3
- GEOL 321 - Geology of Energy Resources Credits: 3

Additional EVGS Courses

Choose 3 credits from the following:

- GEOL 403 - Geochemistry Credits: 3
- CHEM 427 - Aquatic Environmental Chemistry Credits: 3

Additional EVGS Courses (continued)

Choose 3 credits from the following:
• EVPP 336 - Human Dimensions of the Environment Credits: 3
• EVPP 361 - Introduction to Environmental Policy Credits: 3

Additional EVGS Courses (continued)

Choose 6-12 credits from the following:

• CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3 (Mason Core: Natural Science course)
• CLIM 412 - Physical Oceanography Credits: 3
• GEOL 304 - Sedimentary Geology Credits: 4
• EVPP 201 - Environment and You: Issues for the Twenty-First Century Credits: 3
• EVPP 336 - Human Dimensions of the Environment Credits: 3
• EVPP 361 - Introduction to Environmental Policy Credits: 3
• EVPP 432 - Energy Policy Credits: 3
• EVPP 436 - The Human Dimensions of Global Climate Change Credits: 3
• GGS 302 - Global Environmental Hazards Credits: 3
• GGS 311 - Introduction to Geographic Information Systems Credits: 3
• GGS 322 - Issues in Global Change Credits: 3
• PHYS 331 - Fundamentals of Renewable Energy Credits: 3
• CONF 101 - Conflict and Our World Credits: 3
• INTS 211 - Introduction to Conservation Studies Credits: 3-6
• PRLS 300 - People with Nature Credits: 3
• PRLS 402 - Human Behavior in Natural Environments Credits: 3

EVGS Concentration Total: 35-41 credits

▲ Geology (GEOL)

This concentration is fashioned after traditional geology bachelor's degrees. It allows graduates to be employed as geologists in the field or to pursue graduate studies in geology. Students choosing this concentration must complete the following coursework:

• GEOL 102 - Introductory Geology II Credits: 4 (Mason Core: Natural Science course)
• GEOL 302 - Mineralogy Credits: 4
• GEOL 304 - Sedimentary Geology Credits: 4 *
• GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
• GEOL 312 - Invertebrate Paleontology Credits: 4
• GEOL 317 - Geomorphology Credits: 4 (fulfills writing intensive requirement)
• GEOL 401 - Structural Geology Credits: 4
• GEOL 404 - Geological Field Techniques Credits: 1-6 (6 credits required. A 6-credit geology field camp may be substituted for this requirement, see advisor for details)

* Prerequisite requires a grade of ‘C’ or better in GEOL 302 - Mineralogy

GEOL Concentration Total: 34 credits

▲ Oceanography and Estuarine Science (OEST)

This concentration provides students with a comprehensive knowledge of oceanography. Additional coursework in physical and chemical oceanography give insight into the aquatic environment and its link to both ecosystems and climate. Within the
concentration, students can choose an open ocean or coastal ocean option. The curriculum will emphasize local and regional case studies, in particular the Chesapeake Bay. The program will provide students with the basic training required to allow them to obtain entry level positions in oceanographic and estuarine career tracks or an appropriate graduate degree program. Students choosing this concentration must complete the following coursework:

- CLIM 412 - Physical Oceanography Credits: 3 or GEOL 412 - Physical Oceanography Credits: 3
- GEOL 102 - Introductory Geology II Credits: 4 (Mason Core: Natural Science course)
- GEOL 458 - Chemical Oceanography Credits: 3 or CHEM 458 - Chemical Oceanography Credits: 3

Additional OEST Courses

Choose one of the following 8-credit sequences:

- BIOL 103 - Introductory Biology I Credits: 4 (Mason Core: Natural Science course)
- BIOL 104 - Introductory Biology II Credits: 4 (Mason Core: Natural Science course)

Or

- BIOL 213 - Cell Structure and Function Credits: 4 (Mason Core: Natural Science course)
- BIOL 303 - Animal Biology Credits: 4

Or

- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4 (Mason Core: Natural Science course)
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4 (Mason Core: Natural Science course)

Open Ocean or Coastal Ocean

Choose one of the following options:

**Open Ocean Option**

- GEOL 364 - Marine Geology Credits: 3
- BIOL 449 - Marine Ecology Credits: 3
- Choose three additional courses from the electives list below (minimum of 9 credits)

**Coastal Ocean Option**

- GEOL 363 - Coastal Morphology and Processes Credits: 4
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3
- Choose three additional courses from the electives list below (minimum of 9 credits)

Electives List

- GEOL 302 - Mineralogy Credits: 4
- GEOL 304 - Sedimentary Geology Credits: 4
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- GEOL 364 - Marine Geology Credits: 3
- GEOL 565 - Paleoceanography Credits: 3
- BIOL 440 - Field Biology Credits: 0-4 (when topic is Coral Reef Ecology)
- BIOL 449 - Marine Ecology Credits: 3
- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 377 - Applied Ecology Credits: 3
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3
- EVPP 582 - Estuarine and Coastal Ecology Laboratory Credits: 1
- INTS 395 - Field-Based Work Credits: 1-18 (when topic is Exploring Underwater Ecology)
  Additional recommended course:
- RECR 161 - Scuba Diving: Basic Credits: 2

OEST Concentration Total: 33-37 credits

▲ Paleontology (PLEO)

This concentration focuses on a broad understanding of Earth’s history and the evolution of life on Earth as revealed through the fossil record. Fundamental concepts, methods and techniques of historical geology and paleontological data and analysis are also examined. This concentration may not be taken in conjunction with the paleontology minor. Be aware that some of the courses below may have additional prerequisites. Students choosing this concentration must complete the following coursework:

- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4
- GEOL 304 - Sedimentary Geology Credits: 4
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 334 - Vertebrate Paleontology Credits: 4
- BIOL 103 - Introductory Biology I Credits: 4 or BIOL 213 - Cell Structure and Function Credits: 4

Additional Geology Courses

Choose 9-10 credits from the following courses:

- GEOL 306 - Soil Science Credits: 3
- GEOL 317 - Geomorphology Credits: 4
- GEOL 332 - Paleoclimatology Credits: 3
- GEOL 364 - Marine Geology Credits: 3
- GEOL 403 - Geochemistry Credits: 3
- GEOL 412 - Physical Oceanography Credits: 3
- GEOL 458 - Chemical Oceanography Credits: 3
- GEOL 565 - Paleoceanography Credits: 3

Additional Biology Course

Choose 3-5 credits from the following courses:

- BIOL 310 - Biodiversity Credits: 3 and BIOL 330 - Biodiversity Lab and Recitation Credits: 2
- BIOL 320 - Comparative Chordate Anatomy Credits: 4
- BIOL 331 - Invertebrate Zoology Credits: 4
- BIOL 374 - Biogeography: Space, Time, and Life Credits: 3 or GGS 321 - Biogeography Credits: 3
- BIOL 468 - Vertebrate Natural History Credits: 4 or EVPP 468 - Vertebrate Natural History Credits: 4
- BIOL 470 - Dinosaur Biology Credits: 3
• BIOL 471 - Evolution Credits: 3

PLEO Concentration Total: 36-39 credits

Mason Core and Elective Credits (29-51 credits)

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied towards any remaining Mason Core requirements (outlined below). Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

• ESE concentration without Teacher Licensure: 50-51 credits
• ESE concentration with Teacher Licensure: 29-30 credits
• EP concentration: 43-49 credits
• EVGS concentration: 38-45 credits
• GEOL concentration: 45-46 credits
• PLEO concentration: 40-44 credits
• OEST concentration: 42-47 credits

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

• Mason Core UWCU - Written Communication Credits: 6
• Mason Core UOC - Oral Communication Credits: 3
• Mason Core UQR - Quantitative Reasoning Credits: 3
• Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

• Mason Core UFA - Arts Credits: 3
• Mason Core UGU - Global Understanding Credits: 3
• Mason Core ULIT - Literature Credits: 3
• Mason Core UNSL - Natural Science Credits: 7
• Mason Core USBS - Social and Behavioral Sciences Credits: 3
• Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

• Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits
Doctor of Philosophy

Climate Dynamics, PhD

Banner Code: SC-PHD-CLIM

College: College of Science
Department: Atmospheric, Oceanic and Earth Sciences The mission of this program is to train the next generation of scientists in climate dynamics and related fields. Through a comprehensive grounding in classwork, our students learn about how the atmosphere, ocean, and land surface work together to determine the climate. In collaboration with internationally-known scientists, students conduct independent work to further our understanding of climate, how it varies, and how much of it we can predict. Tools in the program include cutting-edge climate models, superb computing facilities, sophisticated statistical techniques, and comprehensive data sets. Our graduates have gone on to work at top laboratories and universities.

Understanding climate variability and predictability poses difficult mathematical, computational, and observational questions that have generated increasing intellectual excitement in recent years. Climate variability has important ramifications for society, from planning for next year's electrical demand and forecasting agricultural production to answering complex questions involving long-term change in global climate, sea level, and biodiversity. While it is impossible to predict day-to-day weather more than a few weeks in advance, progress in predicting El Niño supports the idea that seasonal averages of temperature, rainfall, and other factors may be at least partly predictable months or even years in advance. Likewise, there is a strong scientific basis for predicting long-term changes in global climate due to changing greenhouse gas concentrations.

Climate dynamics faculty members have a blend of expertise in dynamics, statistics, and computational methods. They are heavily involved with national and international collaborations. Faculty members and students work closely with scientists at the Center for Ocean-Land-Atmosphere Studies (COLA), a national leader in climate modeling.

Faculty research focuses on the areas of climate prediction and predictability, climate variability, coupled ocean-atmosphere-land dynamics, and dynamical systems and retrospective analysis. Recent research topics include predictability of weather and climate; modeling of the complex climate system; El Niño dynamics; monsoons; atmosphere-ocean interaction; land-climate interaction; decadal climate variability; ocean circulation theory; and climate change.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Admission Requirements

Applicants should have demonstrated a high aptitude for quantitative reasoning, applied mathematics, and physical science. Applicants should have an undergraduate degree from a regionally accredited institution with a GPA of at least 3.00 in undergraduate work, and a GRE verbal plus quantitative score of 301 (1,100 on the old scale). To apply, prospective students should submit a completed Mason graduate application, a current résumé, three letters of recommendation, an expanded goals statement, and two copies of official transcripts from each college and graduate institution attended. An official report of scores obtained on the GRE-GEN should also be officially reported by ETS. The GRE requirement for admission to the doctoral programs can be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required of all international applicants who have not completed a master's degree in the United States.

Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. See the Reduction of Credits section of this catalog for more information.
Degree Requirements

In addition to the coursework as outlined below, students must fulfill all Requirements for Doctoral Degrees.

Doctoral Coursework (48 credits)

Fundamental Climate Science Courses (15 credits)

- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 711 - Introduction to Atmospheric Dynamics Credits: 3
- CLIM 712 - Physical and Dynamical Oceanography Credits: 3
- CLIM 714 - Land-Climate Interactions Credits: 3
- CLIM 751 - Predictability and Prediction of Weather and Climate Credits: 3

Core Computational Courses (9 credits)

- CSI 690 - Numerical Methods Credits: 3
- CLIM 715 - Numerical Methods for Climate Modeling Credits: 3
- CLIM 762 - Statistical Methods in Climate Research Credits: 3

Climate Seminar (3 credits)

- CLIM 991 - Climate Dynamics Seminar Credits: 1 (taken three times)

Electives (21 credits)

- 21 credits of electives, including up to 3 credits of CLIM 796 - Directed Reading and Research or CLIM 996 - Doctoral Reading and Research

Qualifying Exams

After completing the fundamental climate science courses, students take a two-part qualifying exam that includes core and specialty components. The core component is administered by an examination committee. After successfully completing the core component exam, students take the exam for the specialty component, which is administered by the dissertation committee that students typically form by the spring semester of their second year.

Advancement to Candidacy

Following successful completion of both parts of the qualifying exam, students present a written dissertation proposal to the committee. Students may enroll in CLIM 998 to complete this effort. After approval of the dissertation proposal, students are formally advanced to doctoral candidacy.

Dissertation Research (24 credits)
No more than 24 combined credits from CLIM 998 and CLIM 999 may be applied toward satisfying doctoral degree requirements, with no more than 21 credits of CLIM 998.

- CLIM 998 - Doctoral Dissertation Proposal Credits: 1-12
- CLIM 999 - Doctoral Dissertation Credits: 1-12 (minimum 3 credits)

**Dissertation Research and Defense**

After approval of the dissertation proposal, students are formally advanced to doctoral candidacy and produce the dissertation while taking CLIM 999. The degree's requirements will be fulfilled upon completion of the required coursework and approval of a dissertation that makes an original and significant contribution to the field.

**Degree Total: 72 credits**

**Master of Science**

**Earth Systems Science, MS (AOES)**

**Banner Code: SC-MS-ESSC**

**College:** College of Science  
**Departments:** Geography and Geoinformation Science and Atmospheric, Oceanic and Earth Sciences  

The program addresses the growing demand for trained professionals in the Earth sciences. The degree emphasizes a research-oriented, global systems approach to studying the Earth and its systems- the atmosphere, the hydrosphere, and the lithosphere, including their interrelationships and interactions with the biosphere. Emphasis is on the observation, measurement, and analysis of Earth's systems. Most student research projects and theses will relate to geologic and geographic topics, however studies of related topics in Earth science are welcome. Students completing the program are qualified to pursue careers that require knowledge of the basics of Earth systems science and the requisite tools, specifically pertaining to the area of Earth science that they choose to investigate. Students are encouraged to undertake a master's thesis but may choose a research project. In the latter case, students must pass a comprehensive exam.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admissions standards and Graduate Admission Policies as specified in the Admissions section of this catalog. Applicants to the Earth Systems Science, MS should have earned a BS degree in atmospheric, Earth, environmental, geological, geographical, ocean, or physical science. Previous coursework should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. Applicants should have a minimum GPA of 3.00 in their undergraduate degree.

To apply, prospective students should complete the George Mason University Graduate Application. Official transcripts from each college and graduate institution attended, a current résumé, and a goals statement are required. Applicants also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required of all international applicants.

**Degree Requirements**
Candidates must successfully complete 30 credits outlined below, being mindful that 10 of these credits must be GGS courses and 10 of these credits must be GEOL/CLIM courses ("Culminating Experience" credits do not count towards this requirement):

Earth Science Core (9 credits)
Choose one course from each of the following groups:

Atmosphere
- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 714 - Land-Climate Interactions Credits: 3
- GEOL 532 - Paleoclimatology Credits: 3
- GGS 670 - Introduction to Atmosphere and Weather Credits: 3
- PHYS 575 - Atmospheric Physics I Credits: 3

Hydrosphere
- CLIM 512 - Physical Oceanography Credits: 3
- CLIM 712 - Physical and Dynamical Oceanography Credits: 3
- GEOL 513 - Hydrogeology Credits: 3
- GGS 656 - The Hydrosphere Credits: 3

Lithosphere
- GEOL 506 - Soil Science Credits: 3
- GGS 657 - The Lithosphere Credits: 3 or GEOL 601 - The Lithosphere Credits: 3

Techniques (6 credits)
Select two courses from the following:
- GGS 553 - Geographic Information System Credits: 3
- GGS 560 - Quantitative Methods Credits: 3
- GGS 579 - Remote Sensing Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- Courses can be substituted with advisor approval.

Colloquium (2 credits)
- GEOL 536 - Paleontology Seminar Credits: 1-2 or GEOL 792 - Seminar in Earth Systems Science, Geology, & Earth Science Credits: 1 or CLIM 991 - Climate Dynamics Seminar Credits: 1
- GGS 900 - Geography and Geoinformation Science Colloquium Credits: 1

Electives (10 credits)
Complete 10 credits of other CLIM, GEOL, GGS, or EVPP courses at the 500 to 900-level (excluding 700, 798, and 799 courses).

Culminating Experience (3 credits)

Choose the culminating experience of either a thesis or a project (either must total 3 credits):

Thesis

- GGS 799 - Thesis Credits: 1-6 or GEOL 799 - Master's Thesis in Earth Systems Science Credits: 1-6 or CLIM 799 - Master's Thesis in Climate Credits: 1-6

Project

- GGS 700 - Comprehensive Exam Credits: 1 or GEOL 700 - Comprehensive Exam Credits: 1 or CLIM 700 - Climate Comprehensive Exam Credits: 1 and
- GGS 798 - Research Project in Earth Systems Science Credits: 1-6 or GEOL 798 - Master's Research Project in Earth Systems Science Credits: 1-6 or CLIM 798 - Master's Climate Research Project Credits: 1-6

Degree Total: 30 credits

Non-Degree

Atmospheric Science Minor

Banner Code: ATMS

College: College of Science
Department: Atmospheric, Oceanic and Earth Sciences Topics include weather forecasting, climate change, and the predictability of coupled ocean-atmosphere-land-variations. Students in physics, math, engineering, and computational sciences may be attracted to this minor because it provides a compelling application of the fundamental methods of analysis learned in their major. Such students are ideal candidates for research in atmospheric science and climate dynamics; the minor will facilitate entry into graduate studies in these fields.

Students in Earth science, geography and geoinformation science, and environmental science may find this minor useful because the atmosphere is an important influence on geography, ecosystems, geological strata, and plays an important role in global change.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Minor Requirements

Eight credits of coursework must be unique to the minor. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Core Courses (11 credits)

- CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
• CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3
• CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1
• CLIM 301 - Weather Analysis and Prediction Credits: 4

Electives (6 credits)

Choose from:

• CLIM 314 - Severe and Extreme Weather Credits: 3 or GGS 314 - Severe and Extreme Weather Credits: 3
• CLIM 408 - Senior Research Credits: 3
• CLIM 412 - Physical Oceanography Credits: 3
• CLIM 438 - Atmospheric Chemistry Credits: 3 or CHEM 438 - Atmospheric Chemistry Credits: 3
• PHYS 475 - Atmospheric Physics Credits: 3

Minor Total: 17 credits

Earth Science Minor

Banner Code: ESCI

College: College of Science
Department: Atmospheric, Oceanic and Earth Sciences This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Students may not receive both the Geology Minor and the Earth Science Minor.

Minor Requirements

To receive this minor, students must successfully complete 18-19 credits with a minimum GPA of 2.00. Eight credits of coursework must be unique to the minor. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Core Courses (10-11 credits)

• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 309 - Introduction to Oceanography Credits: 3 or BIOL 309 - Introduction to Oceanography Credits: 3

Core Courses (continued)

Choose one of the following options:

Option One

• CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3
• CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1

Option Two
• GGS 309 - Meteorology and Climate Credits: 3

Electives (8 credits)

• Choose 8 credits of geology electives

Minor Total: 18-19 credits

**Geology Minor**

**Banner Code:** GEOL

**College:** College of Science  
**Department:** Atmospheric, Oceanic and Earth Sciences  
For policies governing all minors, see the Undergraduate Policies section of this catalog.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

**Minor Requirements**

To receive the minor, students must successfully complete 20 credits with a minimum GPA of 2.00. Eight credits of coursework must be unique to the minor.

**Geology Courses (12 credits)**

• GEOL 101 - Introductory Geology I Credits: 4  
• GEOL 102 - Introductory Geology II Credits: 4  
• GEOL 302 - Mineralogy Credits: 4

**Additional Geology Courses (8 credits)**

Choose from:

• GEOL 304 - Sedimentary Geology Credits: 4  
• GEOL 308 - Igneous and Metamorphic Petrology Credits: 4  
• GEOL 312 - Invertebrate Paleontology Credits: 4  
• GEOL 317 -Geomorphology Credits: 4  
• GEOL 401 - Structural Geology Credits: 4  

* Students must achieve a grade of 2.00 or better in GEOL 302 before taking GEOL 304 or GEOL 308.

Minor Total: 20 credits

**Ocean and Estuarine Science Minor**

**Banner Code:** OES
College: College of Science  
Department: Atmospheric, Oceanic and Earth Sciences To receive this minor, students must successfully complete 18-22 credits with a minimum GPA of 2.00. Eight credits of coursework must be unique to the minor.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Core Requirements (9-10 credits)

- GEOL 309 - Introduction to Oceanography Credits: 3  
  And two of the following courses:
- CLIM 412 - Physical Oceanography Credits: 3
- GEOL 363 - Coastal Morphology and Processes Credits: 4  
  or EVPP 363 - Coastal Morphology and Processes Credits: 4
- GEOL 364 - Marine Geology Credits: 3
- GEOL 458 - Chemical Oceanography Credits: 3  
  or CHEM 458 - Chemical Oceanography Credits: 3
- BIOL 449 - Marine Ecology Credits: 3

Additional Courses (9-12 credits)

Courses taken to satisfy the core requirements above cannot be repeated to count towards the additional courses requirement.

- BIOL 449 - Marine Ecology Credits: 3
- BIOL 450 - Marine Conservation  
  or EVPP 421 - Marine Conservation Credits: 3
- BIOL 454 - Marine Mammal Biology and Conservation Credits: 3  
  and BIOL 455 - Marine Mammal Biology and Conservation Field Course Credits: 1*  
  or EVPP 419 - Marine Mammal Biology and Conservation Credits: 3  
  and EVPP 420 - Marine Mammal Biology and Conservation Field Course Credits: 1*
- CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
- CLIM 412 - Physical Oceanography Credits: 3
- GEOL 304 - Sedimentary Geology Credits: 4
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 363 or EVPP 363 - Coastal Morphology and Processes Credits: 4
- GEOL 364 - Marine Geology Credits: 3
- GEOL 458 or CHEM 458 - Chemical Oceanography Credits: 3
- BIOL 440 - Field Biology Credits: 0-4 (up to 4 credits of only marine or estuarine-oriented field courses)
- EVPP 536 - The Diversity of Fishes Credits: 3
- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3  
  and EVPP 420 - Marine Mammal Biology and Conservation Field Course Credits: 1*
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3  
  and EVPP 582 - Estuarine and Coastal Ecology Laboratory Credits: 1*
- INTS 495 - Field-Based Work Credits: 1-18 (up to 4 credits of only marine or estuarine-oriented field courses)

Notes:
RECR 161 - Scuba Diving: Basic is strongly recommended, but is not required.

*If chosen, students must take both lecture and lab for a total of 4 credits.

Minor Total: 18-22 credits

Paleontology Minor

Banner Code: PLEO

College: College of Science
Department: Atmospheric, Oceanic and Earth Sciences

For policies governing all minors, see the Undergraduate Policies section of this catalog.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Minor Requirements

To receive this minor, students must successfully complete 18-21 credits with a minimum GPA of 2.00. Eight credits of coursework must be unique to the minor.

Required Core (12 credits)

- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 334 - Vertebrate Paleontology Credits: 4 or BIOL 334 - Vertebrate Paleontology Credits: 4

Electives (6-9 credits)

Choose two courses from the list below or choose Option One, Option Two, Option Three, or Option Four:

Note: Many of the courses below have additional prerequisites beyond the required core courses above; please check the individual courses carefully.

- GEOL 304 - Sedimentary Geology Credits: 4
- GEOL 364 - Marine Geology Credits: 3
- GGS 321 - Biogeography Credits: 3 or BIOL 374 - Biogeography: Space, Time, and Life Credits: 3
- BIOL 377 - Applied Ecology Credits: 3
- BIOL 470 - Dinosaur Biology Credits: 3
- BIOL 471 - Evolution Credits: 3
- BIOL 468 - Vertebrate Natural History Credits: 4 or EVPP 468 - Vertebrate Natural History Credits: 4

Option One

- BIOL 310 - Biodiversity Credits: 3 and BIOL 330 - Biodiversity Lab and Recitation Credits: 2

And choose one of the following:
• BIOL 320 - Comparative Chordate Anatomy Credits: 4
• BIOL 322 - Developmental Biology Credits: 3 and BIOL 323 - Lab for Developmental Biology Credits: 1
• BIOL 331 - Invertebrate Zoology Credits: 4
• BIOL 332 - Insect Biology Credits: 4

Option Two

• BIOL 308 - Foundations of Ecology and Evolution Credits: 5
• BIOL 468 - Vertebrate Natural History Credits: 4 or EVPP 468 - Vertebrate Natural History Credits: 4

Option Three

• GEOL 309 - Introduction to Oceanography Credits: 3 or BIOL 309 - Introduction to Oceanography Credits: 3
• EVPP 419 - Marine Mammal Biology and Conservation Credits: 3

Option Four

• BIOL 305 - Biology of Microorganisms Credits: 3
• BIOL 407 - Microbial Diversity Credits: 4

Minor Total 18-21 credits

Biology

Phone: 703-993-1050
Web: biology.gmu.edu

Faculty

Chair: Rockwood

Assistant Chairs: Grant, Weeks

Director of Undergraduate Studies: Polayes

Director of Medical Laboratory Science Program: Verhoeven

Professors: Andalibi, Gillevet, Lawrey, Rockwood

Associate Professors: Birchard, Christensen, Edwards, Forkner, Grant, Weeks

Term Professor: Polayes

Term Associate Professors: Kocache, Luther, Madden, Tondi, Verhoeven

Term Assistant Professors: Crerar, Davis, Fondufe, Laemmerzahl, Masterson, Olmo, Scherer, Schwebach

Adjunct Faculty: Beck, Buckley-Beason, Einhorn, Guo, Hermoso, Hunnell, Jones, Lopez-Ocasio, Monk, Munse, Skacel, Starolis, Tomson, Van der Ham

The Department of Biology collaborates with scientists across many disciplines, such as the School of Systems Biology and the Environmental Science and Policy Department to offer a broad spectrum of coursework in the biological sciences to biology majors as well as to students in other departments, schools, and colleges.

Courses

The Department of Biology offers all undergraduate courses designated BIOL and MLAB in the Courses section of this catalog.

Undergraduate Degree Programs

The bachelor's degree programs in biology provide a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for a related profession. In addition to ensuring the strong background necessary for graduate study in the many fields of biological science, the broad range of courses available at Mason allow students to develop careers in many areas, including secondary school teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, and natural history. Alternatively, students may prepare for postgraduate studies in medicine, dentistry, veterinary medicine, wildlife management, fisheries biology, or marine science.

The department also offers the Medical Laboratory Science, BS.

Additional information can be found at the Department of Biology's website or by visiting the department in Exploratory Hall, Suite 1200.

Graduate Degree Programs

The Biology, MS is offered by the School of Systems Biology in the College of Science. The Department of Biology supports the concentration in Evolutionary Biology within the MS degree. Students interested in this concentration should consult the Department of Biology's website for a list of faculty and their research interests.

Advising

All biology majors are strongly encouraged to see an academic advisor regularly to help in planning their schedule so that they can graduate on time. Biology majors should see an advisor for permission to register prior to their first semester, again after completing 60 credits, and lastly after completing 90 credits.

Medical laboratory science majors must see the director of the medical laboratory science program to obtain permission to register each semester.

Students returning from suspension are required to meet with the director of undergraduate studies or designee prior to being allowed to register.

For more information on advising or to set up an appointment, visit the department's website.

Residency Requirement for Transfer Students

Students majoring in biology are required to complete 16 credits in the major at the 300 and 400 levels at Mason in addition to meeting the university residency requirement of at least 30 credits at Mason.
Policy on Using Biology Program Laboratories

Only authorized experiments and exercises may be carried out in any research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Policy on Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Honors Program in Biology

Admission Requirements

Minimum requirements for invitation:

- GPA in biology courses must be 3.33 or better
- GPA in supporting requirements (math and other science) must be 3.00 or better
- Grade of ‘B’ or better in BIOL 213

Students should apply for admission to the Honors Program during their first or second year at the university. Contact the Department of Biology for information on applying.

Retention Requirements

Students in honors biology must maintain a biology GPA of 3.33 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

Requirements to Graduate with Biology Honors

Students are required to take 6 to 8 credits in honors courses in BIOL including three semesters of BIOL 494 or two semesters of BIOL 494 and one semester of BIOL 493. BIOL 498 may count towards one of the semester requirements of BIOL 494. The GPA requirements are as follows:

- Minimum 3.33 GPA in honors biology courses
- Minimum 3.33 GPA in biology requirements
- Minimum 3.00 GPA in supporting requirements
- Minimum 3.00 GPA overall

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated as "writing intensive" in their majors at the 300-level or above. Students majoring in biology fulfill this requirement by successfully completing BIOL 308. Medical laboratory science majors fulfill the requirement by completing MLAB 300.
Minor in Biology

Candidates for the minor in biology must complete 19-21 credits in biology with a minimum GPA of 2.00. A grade of 'C' or better must be earned in BIOL 213 before a student can advance to upper division courses. Note: eight credits of coursework must be unique to the minor. For policies concerning minors, see the Undergraduate Policies section of this catalog.

Premedical, Predental, Prepharmacy, and Preveterinary Students

Web: prehealth.gmu.edu

Many students planning to enter medical, dental, pharmacy, veterinary, optometry, or other health professional schools choose to pursue a major in biology. These students should consult the health professions advising web site on required coursework and overall preparation.

Teacher Licensure

Students who wish to become teachers should pursue either the Biology, BA or the Biology, BS in addition to obtaining teaching certificates through the College of Education and Human Development. For more information, visit the Graduate School of Education's website.

Biology for Non-majors

Students who are not majoring in science or mathematics and wish to fulfill their natural science requirement may enroll in BIOL 103 and/or BIOL 104. With permission of the instructor, non-majors may enroll in BIOL 213 for further study. Chemistry, physics, and mathematics majors should consult their faculty advisor to determine which biology courses to take.

BS in Medical Laboratory Science

The Medical Laboratory Science, BS requires the equivalent of three years of full time professional study at the college level preceding a senior year of professional education in an affiliated school of medical laboratory sciences. All affiliated schools are accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Responsibility for applying to schools of medical laboratory sciences and gaining admission rests with the student; however, guidance is provided by the medical laboratory sciences program director. Admission to medical laboratory sciences schools is selective, so candidates should strive for strong academic standing. Students who fail to gain admission to a NAACLS-approved school are unable to complete the degree program. Such students may transfer to Biology, BA or the Biology, BS without loss of credits.

Application to medical laboratory sciences schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the pre-professional curriculum, makes it imperative that students in the program consult regularly with their faculty advisor. All medical laboratory sciences majors and prospective majors are urged to enroll in MLAB 200 as early as possible. This course provides information on the profession, as well as the educational demands placed on candidates.

Students should be aware that the senior year spent off campus requires the following special interpretation of university policies. Transfer students must present at least 16 credits of 300 to 400-level biology or chemistry coursework taken at Mason. Students may present no more than 6 credits of 'D' grades in biology and chemistry courses required in three years of pre-professional study. No unsatisfactory grades may be presented for courses in the senior year of professional study. Transfer students entering with more than 45 transfer credits are often unable to complete the pre-professional phase of their program in the usual three years of full-time study.

Senior students are registered at the university through special procedures. For details, consult the program director.
In addition to satisfying the Mason Core for the BS degree and completing MLAB 200, candidates must present all courses in their pre-professional programs with a minimum GPA of 2.00. Students must earn a 'C' or better in core BIOL courses and must earn a 'C' or better in BIOL 213 in order to advance in the major. Because of the extensive professional education requirements stipulated by NAACLS, students majoring in medical laboratory sciences are exempt from the university-wide Mason Core requirement in 'Arts'.

**Major in Medical Laboratory Science as a Second Bachelor's Degree**

While the standard program for medical laboratory sciences is three years on campus followed by a fourth year at a clinical affiliate (3+1), many students elect to complete a bachelor's degree before entering the clinical program (4+1). Students who have completed the Biology, BS or Chemistry, BS at Mason and then undertake a fifth year at a clinical affiliate may be eligible for a second bachelor's degree with a major in medical laboratory science. Students wishing to receive the second degree must apply before entering their fifth year. For further information, contact a laboratory sciences advisor.

**Student Clubs**

A variety of biologically-oriented student clubs are available for students. Each club has its own website; for more information, visit the Department of Biology's website. The Biology Club invites science majors of all kinds to participate in its activities.

**Biology, Bachelor's/Accelerated Master's Degree**

Information regarding this accelerated master's program can be found in the Biology, BS/Biology, Accelerated MS section of this catalog.

**Bachelor of Arts**

**Biology, BA**

Banner Code: SC-BA-BIOL

College: College of Science
Department: Biology

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. Additionally, the College Requirements for the BA Degree (outlined below) must also be met.

Important information and departmental policies are listed in the Department of Biology section of this catalog.

Students must complete degree requirements with:

- A minimum GPA of 2.00 in the 32 credits of BIOL courses listed below
- A minimum GPA of 2.00 in the supporting courses listed below

Additionally:

- Students may apply no more than 4 credits of BIOL 103 or BIOL 104 toward elective credit (or equivalent transfer credit at the 100 to 200-level) if taken before the successful completion of BIOL 213.
- Biology majors must earn a minimum grade of 'C' in all of the biology core courses listed below. A grade of 'C' or better must be earned in BIOL 213 in order to advance to other core requirements.
- Students may repeat BIOL 213 once, but a second time only with permission of the Department of Biology.
- Students may not count BIOL 124 and/or BIOL 125 toward any biology major requirement.
- Students who take BIOL 310 and BIOL 330 may not count BIOL 303 and/or BIOL 304 toward any biology major requirement.
- BIOL 308 meets the writing intensive requirement for this major.
- BIOL 493, BIOL 495, and BIOL 497 do not satisfy the requirements of the BA degree which state that students must complete at least one upper division course that includes a laboratory. The courses do, however, count as non-laboratory electives.

Teacher Licensure

Students majoring in biology who wish to pursue a career teaching secondary school may consider applying for the undergraduate certificate program offered by the College of Education and Human Development as an option in seeking an initial Virginia teaching license. The certificate includes current endorsement and licensure coursework embedded within your major. Students apply to add this as a secondary program during their sophomore year and complete required content and education coursework leading to initial licensure in the state of Virginia within 120 credits.

Other routes to licensure include the Biology, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Biology Concentration) or select traditional Master's programs. Please contact the Undergraduate Advisor in College of Education and Human Development for more information.

Degree Requirements

Biology Core Courses (22 credits)

All candidates for the Biology, BA must complete biology core courses as follows:

- BIOL 213 - Cell Structure and Function Credits: 4 (Mason Core: Natural Science course)
- BIOL 214 - Biostatistics for Biology Majors Credits: 4
- BIOL 308 - Foundations of Ecology and Evolution Credits: 5 (fulfills writing intensive requirement)
- BIOL 310 - Biodiversity Credits: 3 and BIOL 330 - Biodiversity Lab and Recitation Credits: 2
- BIOL 311 - General Genetics Credits: 4

Biology Electives (10 credits)

- Complete 10 credits of additional biology courses
  - Of which, at least 6 credits must be upper division, and at least one of these upper division courses must include a laboratory.

Chemistry (8 credits)

- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course) and CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course) and CHEM 214 - General Chemistry Laboratory II Credits: 1

Math (3-6 credits)

- MATH 111 - Linear Mathematical Modeling Credits: 3 or MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning courses), or both
• MATH 123 - Calculus with Algebra/Trigonometry, Part A Credits: 3 and MATH 124 - Calculus with Algebra/Trigonometry, Part B Credits: 3

Computer Science (3 credits)

• CDS 130 - Computing for Scientists Credits: 3 (Mason Core: Information Technology course and is recommended by the Department of Biology)
• Or any course(s) that fulfills the Mason Core: Information Technology requirement

Natural Science (6-8 credits)

Choose from the following Mason Core: Natural Science courses:

• ASTR 103 - Astronomy Credits: 3
• ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
• ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4
• PHYS 160 - University Physics I Credits: 3
• PHYS 243 - College Physics Credits: 3
• PHYS 245 - College Physics Credits: 3
• PHYS 260 - University Physics II Credits: 3

Note

Students expecting to enter graduate or professional school are strongly encouraged to complete:

• MATH 113 - Analytic Geometry and Calculus I and MATH 114 - Analytic Geometry and Calculus II
• CHEM 313 - Organic Chemistry and CHEM 315 - Organic Chemistry Lab I
• CHEM 314 - Organic Chemistry II and CHEM 318 - Organic Chemistry Lab II
• PHYS 243 - College Physics and PHYS 244 - College Physics Lab
• PHYS 245 - College Physics and PHYS 246 - College Physics Lab

Mason Core, BA Requirements and Elective Credits (63-68 credits)

In order to meet a minimum of 120 credits, this degree requires an additional 63-68 credits, which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

College Requirements for the BA Degree

Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core.

Philosophy or Religious Studies (3 credits)
Choose any course in philosophy (PHIL) or religious studies (RELI), except for PHIL 323 and PHIL 324.

**Social and Behavioral Sciences (3 credits)**

Choose one approved Mason Core: Social and Behavioral Science course in addition to the Mason Core-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except HIST 100 or HIST 125), LING, PSYC, or SOCI, and the following GGS courses:

- GGS 101 - Major World Regions Credits: 3
- GGS 103 - Human Geography Credits: 3
- GGS 110 - Introduction to Geoinformation Technologies Credits: 3
- GGS 301 - Political Geography Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3
- GGS 304 - Population Geography Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 315 - Geography of the United States Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 320 - Geography of Europe Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GGS 330 - Geography of the Soviet Succession States Credits: 3
- GGS 357 - Structures in Urban Governance and Planning Credits: 3
- GGS 380 - Geography of Virginia Credits: 3

**Natural Science (1 credit)**

Choose one credit in addition to the Mason Core: Natural Science requirement for a total of 8 credits. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science courses that include a laboratory experience (except for BIOL 124 and BIOL 125).

**Foreign Language (0-3 credits)**

Intermediate-level proficiency in one foreign language is required. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher-level courses taught in the language), or by achieving a satisfactory score on an approved proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found via the college's Office of Academic and Student Affairs.

**Non-western Culture (0-3 credits)**

Choose one approved Non-Western Culture Requirement course in addition to the course used to fulfill the Mason Core: Global Understanding requirement. A course used to fulfill the Mason Core: Global Understanding requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major).
Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits

Bachelor of Science

Biology, BS

Banner Code: SC-BS-BIOL

College: College of Science

Department: Biology Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. Students must complete their biology coursework and the supporting requirements below with a minimum GPA of 2.00.

Additionally:

- Students may apply no more than 8 credits of BIOL 103 or BIOL 104 toward elective credit (or equivalent transfer credit at the 100 to 200-level) if taken before successful completion of BIOL 213.
• Biology majors must earn a minimum grade of 'C' in all biology core courses listed below. A grade of 'C' or better must be earned in BIOL 213 in order to advance to other core requirements.
• Students may repeat BIOL 213 once, but a second time only with permission from the Department of Biology.
• Students may not count BIOL 124 and/or BIOL 125 toward any biology major requirement.
• Students who take BIOL 310 may not count BIOL 303 and/or BIOL 304 toward any biology major requirement.
• BIOL 308 meets the writing intensive requirement for this major.
• 44 credits must be in biology coursework.
• BIOL 493, BIOL 495, and BIOL 497 do not satisfy the requirements of the BS degree which state that students must complete at least two upper division courses that include a laboratory. The courses do, however, count as non-laboratory electives.

Several optional concentrations are available; details on each can be found below.

This undergraduate program offers students the option of applying to the accelerated master's program in biology or curriculum and instruction (SECB concentration). See each listing for specific requirements.

Important information and departmental policies are listed in the Department of Biology section of this catalog.

Teacher Licensure

Students majoring in biology who wish to pursue a career teaching secondary school may consider applying for the undergraduate certificate program offered by the College of Education and Human Development as an option in seeking an initial Virginia teaching license. The certificate includes current endorsement and licensure coursework embedded within your major. Students apply to add this as a secondary program during their sophomore year and complete required content and education coursework leading to initial licensure in the state of Virginia within 120 credits.

Other routes to licensure include the Biology, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Biology Concentration) or select traditional Master's programs. Please contact the Undergraduate Advisor in College of Education and Human Development for more information.

Degree Requirements

All students must complete the biology core, chemistry, physics, mathematics, and computer science courses listed below. Students then elect to complete the BS degree either with a concentration or without a concentration.

Biology Core Courses (22 credits)

• BIOL 213 - Cell Structure and Function Credits: 4 (Mason Core: Natural Science course)
• BIOL 214 - Biostatistics for Biology Majors Credits: 4
• BIOL 308 - Foundations of Ecology and Evolution Credits: 5 (fulfills writing intensive requirement)
• BIOL 310 - Biodiversity Credits: 3 and BIOL 330 - Biodiversity Lab and Recitation Credits: 2
• BIOL 311 - General Genetics Credits: 4

Chemistry (13 credits)

• CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course) and CHEM 213 - General Chemistry Laboratory I Credits: 1
• CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course) and CHEM 214 - General Chemistry Laboratory II Credits: 1
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
Physics (8 credits)

Choose one sequence of Mason Core: Natural Science courses:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

Or

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Mathematics (3-6 credits)

- MATH 111 - Linear Mathematical Modeling Credits: 3 or MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning courses),

  Or both

- MATH 123 - Calculus with Algebra/Trigonometry, Part A Credits: 3 and MATH 124 - Calculus with Algebra/Trigonometry, Part B Credits: 3

Computer Science (3 credits)

- CDS 130 - Computing for Scientists Credits: 3 (Mason Core: Information Technology course and is recommended by the Department of Biology)

  Or any course(s) that fulfills the Mason Core: Information Technology requirement

Biology Core and Shared Courses Total: 49-52 credits

BS without Concentration

Students who do not select an optional concentration must complete the biology core and shared courses shown above in addition to the curriculum requirements listed below.

Biology Electives (22 credits)

- Complete 22 credits of additional biology courses
  - Of which, at least 14 credits must be upper division, and at least two of the upper division courses must include a laboratory.

Additional Science Courses (3-8 credits)

Students are encouraged to consult with a biology faculty advisor to determine which option (A, B, or C) best meets their career goals.

- Option A:  CHEM 314 - Organic Chemistry II Credits: 3 and CHEM 318 - Organic Chemistry Lab II Credits: 2
• **Option B:** One 3 credit chemistry course at the 300 or 400-level (not CHEM 314)
• **Option C:** GEOL 101 - Introductory Geology I Credits: 4 and GEOL 102 - Introductory Geology II Credits: 4 (Mason Core: Natural Science courses)

**Note:**

Students expecting to enter a professional school are strongly encouraged to complete MATH 113 and MATH 114.

**Without Concentration Total: 25-30 credits**

**BS with Concentration**

Students pursuing the degree with a concentration must complete the biology core and shared courses as shown above and the requirements for the concentration. Concentration options described below include:

- Biopsychology
- Biotechnology and Molecular Biology
- Environmental and Conservation Biology
- Microbiology

▲ **Concentration in Biopsychology (BP)**

The biopsychology concentration consists of a selection of courses designed to address the needs and interest of students who wish to study biology in more depth while simultaneously exploring psychology and neurobiology. This concentration will help prepare students for the MCAT section related to psychology and provide veterinary students with a background in animal learning/behavior.

**Biopsychology Courses (12 credits)**

- BIOL 430 - Advanced Human Anatomy and Physiology I Credits: 4
- BIOL 431 - Advanced Human Anatomy and Physiology II Credits: 4
- PSYC 372 - Physiological Psychology Credits: 3
- PSYC 373 - Physiological Psychology Laboratory Credits: 1

**Additional Psychology/Neuroscience Course (3-4 credits)**

Choose from:

- PSYC 304 - Principles of Learning Credits: 4
- PSYC 376 - Brain and Behavior Credits: 3
- PSYC 406 - Psychology of Communication Credits: 3 (Mason Core: Synthesis course)
- NEUR 327 - Cellular, Neurophysiological, and Pharmacological Neuroscience Credits: 3
- NEUR 335 - Molecular, Developmental, and Systems Neuroscience Credits: 3

**Additional Biology Courses (6-7 credits)**

Choose from:
Additional Chemistry Courses (3-5 credits)

Students are encouraged to consult with a biology faculty advisor to determine which of the following options (A or B) best meets their career goals.

- **Option A:** CHEM 314 - Organic Chemistry II Credits: 3 and CHEM 318 - Organic Chemistry Lab II Credits: 2
- **Option B:** One chemistry course at the 300 or 400-level (not CHEM 314)

**BP Concentration Total: 24-28 credits**

▲ **Concentration in Biotechnology and Molecular Biology (BTMB)**

The biotechnology and molecular biology concentration consists of a selection of courses that provide essential skills to students who seek employment in the field or wish to include an applied component in their undergraduate training in biology.

**Biotechnology Courses (11 credits)**

- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
- BIOL 483 - General Biochemistry Credits: 4

**Additional Biology Courses (11 credits)**

Of these 11 credits, at least one of the courses must include a laboratory. Choose from:

**Laboratory courses:**
- BIOL 402 - Applied and Industrial Microbiology Credits: 3 and BIOL 403 - Techniques in Applied and Industrial Microbiology Credits: 1
- BIOL 405 - Microbial Genetics Credits: 4
- BIOL 406 - Microbial Physiology and Metabolism Credits: 4
- BIOL 452 - Immunology Credits: 3 and BIOL 453 - Immunology Laboratory Credits: 1
- BIOL 486 - Molecular Biology and Biotechnology Laboratory Credits: 2

**Non-laboratory courses:**
- BIOL 314 - Introduction to Research Design and Analysis Credits: 4
- BIOL 382 - Introduction to Virology Credits: 3
- BIOL 411 - Advanced General Genetics Credits: 3
- BIOL 417 - Selected Topics in Molecular and Cellular Biology Credits: 1-4 *
- BIOL 418 - Current Topics in Microbiology Credits: 3 *
- BIOL 420 - Vaccines Credits: 3
- BIOL 421 - Genetics of Human Diseases Credits: 3
- BIOL 422 - Stem Cell Biology and Regenerative Medicine Credits: 3
- BIOL 482 - Introduction to Molecular Genetics Credits: 3
- BIOL 484 - Eukaryotic Cell Biology Credits: 3
- BIOL 497 - Special Problems in Biology Credits: 1-4 *

Note:

*RRegistration for BIOL 417, BIOL 418, or BIOL 497 is subject to approval by the Director of Undergraduate Studies and the Chairman of the Department of Biology.

Additional Chemistry Courses (5 credits)

- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 318 - Organic Chemistry Lab II Credits: 2

BTMB Concentration Total: 27 credits

▲ Concentration in Environmental and Conservation Biology (ESCB)

This concentration is offered to students seeking a biology degree that focuses on ecology and organismal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology. The concentration is staffed and supported by the Department of Environmental Science and Policy.

Environmental and Conservation Biology (6 credits)

- BIOL 318 - Conservation Biology Credits: 3
- BIOL 377 - Applied Ecology Credits: 3

Biology Electives (16 credits)

Of which, two courses must be selected from the list below and must have either: 2 laboratory courses or 1 laboratory course and 1 field course (consult with an advisor for guidance).

Choose from:

- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 314 - Introduction to Research Design and Analysis Credits: 4
- BIOL 326 - Animal Physiology Credits: 3
- BIOL 331 - Invertebrate Zoology Credits: 4
- BIOL 332 - Insect Biology Credits: 4
- BIOL 344 - Plant Diversity and Evolution Credits: 4
- BIOL 345 - Plant Ecology Credits: 4
- BIOL 350 - Freshwater Ecosystems Credits: 4
• BIOL 355 - Ecological Engineering and Ecosystem Restoration Credits: 4
• BIOL 379 - RS: Ecological Sustainability Credits: 4
• BIOL 440 - Field Biology Credits: 0-4
• BIOL 446 - Ecological and Evolutionary Physiology Credits: 3
• BIOL 449 - Marine Ecology Credits: 3
• BIOL 450 - Marine Conservation Credits: 3
• BIOL 454 - Marine Mammal Biology and Conservation Credits: 3
• BIOL 455 - Marine Mammal Biology and Conservation Field Course Credits: 1
• BIOL 457 - Reproductive Strategies Credits: 3
• BIOL 459 - Fungi and Ecosystems Credits: 3
• BIOL 468 - Vertebrate Natural History Credits: 4
• BIOL 472 - Introductory Animal Behavior Credits: 3 and BIOL 473 - Introductory Laboratory in Animal Behavior Credits: 1
• BIOL 480 - The Diversity of Fishes Credits: 3

Additional Science Courses (3-8 credits)

Students are encouraged to consult with a biology faculty advisor to determine which of the following options (A, B, or C) best meets their career goals.

• Option A: CHEM 314 - Organic Chemistry II Credits: 3 and CHEM 318 - Organic Chemistry Lab II Credits: 2
• Option B: One chemistry course at the 300 or 400-level (not CHEM 314)
• Option C: GEOL 101 - Introductory Geology I Credits: 4 and GEOL 102 - Introductory Geology II Credits: 4 (Mason Core: Natural Science courses)

ESCB Concentration Total: 25-30 credits

▲ Concentration in Microbiology (MIB)

This concentration offers lecture and laboratory courses in microbiology to prepare students for employment or advanced study in microbial genetics, physiology, diversity, and related fields.

Microbiology Courses (16 credits)

• BIOL 305 - Biology of Microorganisms Credits: 3
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
• BIOL 405 - Microbial Genetics Credits: 4
• BIOL 406 - Microbial Physiology and Metabolism Credits: 4
• BIOL 407 - Microbial Diversity Credits: 4

Biology Electives (6 credits)

Choose from:

• BIOL 314 - Introduction to Research Design and Analysis Credits: 4
• BIOL 382 - Introduction to Virology Credits: 3
• BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
• BIOL 402 - Applied and Industrial Microbiology Credits: 3
- BIOL 403 - Techniques in Applied and Industrial Microbiology Credits: 1
- BIOL 404 - Medical Microbiology Credits: 3
- BIOL 418 - Current Topics in Microbiology Credits: 3
- BIOL 420 - Vaccines Credits: 3
- BIOL 452 - Immunology Credits: 3
- BIOL 453 - Immunology Laboratory Credits: 1
- BIOL 459 - Fungi and Ecosystems Credits: 3
- BIOL 483 - General Biochemistry Credits: 4

Additional Chemistry Courses (5 credits)

- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 318 - Organic Chemistry Lab II Credits: 2

MIB Concentration Total: 27 credits

Mason Core and Elective Credits (38-47 credits)

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 38-46 credits
- BP concentration: 40-47 credits
- BTMB concentration: 41-44 credits
- ESCB concentration: 38-46 credits
- MIB concentration: 41-44 credits

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
• Mason Core UNSL - Natural Science Credits: 7
• Mason Core USBS - Social and Behavioral Sciences Credits: 3
• Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)
• Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits

Medical Laboratory Science, BS

Banner Code: SC-BS-MLAB

College: College of Science
Department: Biology

This program requires the equivalent of three years of full-time pre-professional study at the college level preceding a senior year of professional education in an affiliated school of medical laboratory science. All affiliated schools (see below) are accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core*. In addition:

• Students must complete MLAB 200 and present the following courses in their biology coursework and supporting requirements with a minimum GPA of 2.00.
• A grade of 'C' or better must be earned in BIOL 213 in order to advance to other major requirements. Students may repeat BIOL 213 once and a second time only with permission of the Department of Biology.
• Medical laboratory science majors must earn a minimum of 'C' in all biology core courses listed below.

*Note: Because of the extensive pre-professional education requirements stipulated by NAACLS, students majoring in medical laboratory science are exempt from the Mason Core 'Arts' requirement.

Taking MLAB 300 fulfills this major's writing intensive requirement.

Important information and departmental policies are listed in the Department of Biology section of this catalog.

Medical Laboratory Science Schools

Responsibility for applying to schools of medical laboratory science and gaining admission rests with the student; however, guidance is provided by the medical laboratory science program director. Admission to medical laboratory science schools is selective, so candidates should strive for strong academic standing. Students who fail to gain admission to an affiliated NAACLS-approved school are unable to complete the degree program. Such students may transfer to the biology major without loss of credits.

Application to medical laboratory science schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the pre-professional curriculum, makes it imperative that students in the program consult regularly with the medical laboratory science program director. All medical laboratory science majors and prospective majors are urged to enroll in MLAB 200 as early as possible. This course provides information on the profession, as well as the educational demands placed on candidates.

Affiliated NAACLS-approved Schools
Augusta Health- School of Clinical Laboratory Science

George Washington University- School of Medicine and Health Sciences: The Medical Laboratory Sciences Program

INOVA Fairfax Hospital- Medical Laboratory Science Program

Sentara Rockingham Memorial Hospital- School of Medical Laboratory Science

Degree Requirements

Biology Core (12 credits)

- BIOL 213 - Cell Structure and Function Credits: 4 (Mason Core: Natural Science course)
- BIOL 214 - Biostatistics for Biology Majors Credits: 4
- BIOL 311 - General Genetics Credits: 4

MLAB and BIOL Additional Courses (19 credits)

- MLAB 200 - Introduction to Medical Laboratory Science Credits: 1
- MLAB 300 - Science Writing Credits: 2 (fulfills writing intensive requirement)
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 430 - Advanced Human Anatomy and Physiology I Credits: 4
- BIOL 431 - Advanced Human Anatomy and Physiology II Credits: 4
- BIOL 452 - Immunology Credits: 3
- BIOL 453 - Immunology Laboratory Credits: 1

Chemistry (17-18 credits)

- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course) and CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course) and CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
  And one of the following options:
- BIOL 483 - General Biochemistry Credits: 4
  Or
- CHEM 314 - Organic Chemistry II Credits: 3 and CHEM 318 - Organic Chemistry Lab II Credits: 2

Mathematics (3-6 credits)

- MATH 111 - Linear Mathematical Modeling Credits: 3 or MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning courses)
Or both

- MATH 123 - Calculus with Algebra/Trigonometry, Part A Credits: 3 and MATH 124 - Calculus with Algebra/Trigonometry, Part B Credits: 3

Computer Skills Course (3 credits)

- CDS 130 - Computing for Scientists Credits: 3 (Mason Core: Information Technology course and is recommended course for this major)
- Or any course(s) which fulfills the Mason Core: Information Technology requirement

Professional Study (maximum 30 credits)

Students may have up to 30 credits of professional study during the senior year awarded for clinical education at an affiliated school of medical technology. The distribution of credits in these courses varies with the school of medical technology. No more than 30 professional credits may be applied toward the degree.

Senior students are registered at the university through special procedures. For details, consult the medical laboratory science program director.

The senior year spent off campus requires the following special interpretation of university policies: transfer students must present at least 16 credits of 300 to 400-level biology or chemistry coursework taken at Mason; no unsatisfactory grades (less than 'C') may be presented for courses in the senior year of professional study. Transfer students entering with more than 45 transfer credits are often unable to complete the pre-professional phase of their program in the usual three years of full-time study.

Courses that may be awarded for the clinical year include:

- MLAB 401 - Orientation to the Problems and Practices of the Clinical Laboratory Credits: 1-2
- MLAB 402 - Clinical Hematology and Coagulation Credits: 1-8
- MLAB 403 - Clinical Microscopy Credits: 1-3
- MLAB 404 - Serology and Immunohematology Credits: 1-7
- MLAB 405 - Clinical Microbiology Credits: 1-8
- MLAB 406 - Clinical Chemistry Credits: 1-10

Notes

Students are encouraged to elect additional basic science courses during their pre-professional years. Recommended courses are BIOL 465, BIOL 483, BIOL 484, and BIOL 485; CHEM 321; and PHYS 243, PHYS 244, PHYS 245, and PHYS 246.

Mason Core and Elective Credits (32-36 credits)

In order to meet a minimum of 120 credits, this degree requires an additional 32-36 credits, which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core
Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits

Non-Degree

Biology Minor

Banner Code: BIOL

College: College of Science

Department: Biology Students should be aware that eight credits of coursework must be unique to the minor. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Candidates for the minor in biology must complete the following credits with a minimum GPA of 2.00 or better and must earn a grade of 'C' or better in BIOL 213.

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 308 - Foundations of Ecology and Evolution Credits: 5 or BIOL 310 - Biodiversity Credits: 3
- BIOL 311 - General Genetics Credits: 4
Elective courses in biology to achieve at least 19 credits (one of which may be lower-level)

Minor Total: 19-21 credits

Undergraduate Certificate

Career Changer's Biological Sciences Undergraduate Certificate

Banner Code: SC-CERB-CCBS

College: College of Science
Department: Biology This certificate is offered by the Department of Biology in the College of Science.

Post-baccalaureate students are invited to enroll in the Career Changer's Biological Sciences Undergraduate Certificate. By completing this program, students will be qualified to apply for most graduate programs in the biological sciences including medical, dental, optometry, podiatry, pharmacy, and veterinary schools. However, graduate and professional school undergraduate coursework requirements can vary; it is prudent to check the coursework requirements for each individual school.

This certificate may be pursued on a part-time or full-time basis.

Important information and departmental policies are listed in the Department of Biology section of this catalog.

Admission Requirements

In concert with the requirements outlined in the Admissions section of this catalog, admission into this certificate requires:

- The desire to pursue a career in biological sciences or the health professions (research, medicine, dentistry, teaching, law etc.);
- A conferred bachelor's degree from a regionally accredited institution with a GPA of 3.00 or higher;
- A completed Mason admission application along with a the appropriate application fee; and
- Two sets of official transcripts from each institution attended.

Standardized test scores are not required.

Certificate Fees

In addition to tuition and the usual laboratory and College of Science fees, a fee of $500 per semester will be assessed to defray the costs of the outside speakers and the additional administrative work associated with this certificate.

Notes

- Each student must see an advisor in the Department of Biology prior to registration each semester.
- The program will normally take four semesters to complete for a full-time student.
- It is recommended that students interested in healthcare professions do the following:
  - Register for the HEALTHPROFESSIONSADVISOR listserv;
  - Attend at least one group advising session conducted by the Health Professions Advisor; and
  - Consider participating in Health Professions Advising activities designed for students in a relevant application cycle.
Certificate Requirements

To earn this certificate, a student must pass all of the courses listed below with a grade no lower than 'B-' and achieve a GPA of at least 3.40. Some courses can be waived if previously taken during undergraduate training. Substitutions will be recommended where appropriate.

Cell Biology, Biostatistics, and Genetics (12 credits)

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 214 - Biostatistics for Biology Majors Credits: 4
- BIOL 311 - General Genetics Credits: 4

Additional Upper-level Biology (12 credits)

Choose three additional 300, 400, or 500-level BIOL courses (with the exception of BIOL 310) in consultation with an academic advisor.

General Chemistry (8 credits)

- CHEM 211 - General Chemistry I Credits: 3
- CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3
- CHEM 214 - General Chemistry Laboratory II Credits: 1

Organic Chemistry and Biochemistry (14 credits)

- BIOL 483 - General Biochemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2

Physics (8 credits)

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

Psychology and Sociology (6 credits)

Choose 6 credits of psychology and/or sociology courses in consultation with the biology advisor.

Mathematics (3-4 credits)

Calculus is recommended, but not required.
MATH 111 - Linear Mathematical Modeling Credits: 3 or MATH 113 - Analytic Geometry and Calculus I Credits: 4

Career Seminars

These seminars will be organized each semester and will feature outside speakers from a wide variety of biologically-oriented professions.

Certificate Total: 63-64 credits

Chemistry and Biochemistry

Phone: 703-993-1070
Web: chemistry.gmu.edu

Faculty

Professors: Cozzens, Foster, Hussam, Mose, Mushrush
Associate professors: Bishop, Couch, Honeychuck, Schreffels (chair), Slayden, Weatherspoon (associate chair)
Assistant professors: Paige, You
Term associate professor: Cooper, Hatton
Term assistant professors: Alaghmand, Pant, Sikowitz
Emeritus: Davies, Stalick

Courses

This department offers all courses designated CHEM in the Courses section of this catalog.

Writing Intensive Requirement

Mason requires all students to complete at least one course designated as "writing intensive" in their majors at the 300 level or above. Students majoring in chemistry fulfill this requirement by successfully completing CHEM 336 or CHEM 465.

Honors Program in Chemistry

Chemistry majors who have completed prerequisites for CHEM 455 and CHEM 456 and have maintained an overall GPA of at least 3.00 in mathematics and science courses are eligible to enter the departmental honors program. To graduate with honors in chemistry, a student is required to maintain a minimum GPA of 3.00 in mathematics and science courses and successfully complete the two semesters of CHEM 455 and CHEM 456 with a minimum GPA of 3.50.

Pre-Medical, Pre-Dental, Pre-Pharmacy, and Pre-Veterinary Students

Web: prehealth.gmu.edu
Many students planning medical, dental, pharmacy, veterinary, optometry, or other health professional careers choose to pursue a major in chemistry. These students should consult the health professions advising web site on required coursework and overall preparation.

Pre-Pharmacy Society

Mason students who are interested in pursuing careers in pharmacy are encouraged to participate in the Pre-Pharmacy Society. This student organization organizes supplemental programming focused toward pharmacy as a career.

Chemistry Club

The Chemistry Club provides a social and informational network for students. It serves the Department of Chemistry and Biochemistry by sponsoring informational programs and allowing students to work at university events.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development section of this catalog and attend an information session early in their undergraduate career. For more information, visit gse.gmu.edu.

Graduate Degree Programs

The department offers a Chemistry, MS with a research project (thesis option) or an all coursework program (nonthesis option). Within the MS, students may pursue a concentration in biochemistry. The PhD in all branches of chemistry is available through the Chemistry and Biochemistry, PhD. Students may also pursue Chemistry-related PhD research through the Environmental Science and Public Policy, PhD and the Biosciences, PhD. An area of emphasis in computational chemistry is available through the Computational Sciences and Informatics, PhD, offered in conjunction with the Department of Computational and Data Sciences.

Chemistry, Bachelor's/Accelerated Master's Degree

Information regarding this program can be found in the Chemistry, BS/Chemistry, Accelerated MS section of this catalog.

Bachelor of Arts

Chemistry, BA

Banner Code: SC-BA-CHEM

College: College of Science
Department: Chemistry and Biochemistry This program of study is offered by the Department of Chemistry and Biochemistry in the College of Science.

This program, when coordinated with the necessary courses in education, meets requirements for teacher licensure. It also meets requirements for entrance to medical and other professional schools.

Students must fulfill all Requirements for Bachelor's Degrees and the Mason Core. Additionally, the College Requirements for the BA Degree (outlined below) must also be met. Students majoring in chemistry must complete the chemistry program...
requirements with a minimum GPA of 2.30 and present no more than two courses with a grade of ‘D’ (1.00) in CHEM coursework at graduation.

CHEM 336 or CHEM 465 will fulfill the writing intensive requirement for students majoring in chemistry.

This undergraduate program offers students the option of applying to the accelerated master’s program in Curriculum and Instruction (Secondary Education Chemistry Concentration).

Degree Requirements

BA without Concentration

Students who do not select the optional concentration complete the curriculum requirements listed below.

Chemistry (37 credits)

- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course)
- CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course)
- CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 337 - Physical Chemistry Lab II Credits: 2
- Choose 5 credits of electives in chemistry

Mathematics (11 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Physics (8 credits)

Choose one sequence of Mason Core: Natural Science courses:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Without Concentration Total: 56 credits

▲ Concentration in Biochemistry (BC)

The concentration in biochemistry is designed for students interested in studying chemistry at its interface with the biological sciences. Those interested in health science careers can obtain an excellent science background through this concentration.

Students majoring in chemistry with a concentration in biochemistry will complete the alternative requirements for the major plus the concentration, both listed below.

Chemistry (39 credits)

- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course)
- CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course)
- CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 464 - General Biochemistry II Credits: 3
- CHEM 465 - Biochemistry Lab Credits: 2

Mathematics and Statistics (11 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3 (Mason Core: Quantitative Reasoning course)

Physics (8 credits)

Mason Core: Natural Science courses:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

Biology (4 credits)
• BIOL 213 - Cell Structure and Function Credits: 4 (Mason Core: Natural Science course)

BC Concentration Total: 62 credits

Mason Core, BA Requirements, and Elective Credits (58-64 credits)

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied towards any remaining Mason Core requirements (outlined below). Requirements for Bachelor's Degrees, College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

• Without concentration: 64 credits
• BC concentration: 58 credits

College Requirements for the BA Degree

Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core.

Philosophy or Religious Studies (3 credits)

Choose any course in philosophy (PHIL) or religious studies (RELI), except for PHIL 323 and PHIL 324.

Social and Behavioral Sciences (3 credits)

Choose one approved Mason Core: Social and Behavioral Science course in addition to the Mason Core-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except HIST 100 or HIST 125), LING, PSYC, or SOCI, and the following GGS courses:

• GGS 101 - Major World Regions Credits: 3
• GGS 103 - Human Geography Credits: 3
• GGS 110 - Introduction to Geoinformation Technologies Credits: 3
• GGS 301 - Political Geography Credits: 3
• GGS 303 - Geography of Resource Conservation Credits: 3
• GGS 304 - Population Geography Credits: 3
• GGS 305 - Economic Geography Credits: 3
• GGS 306 - Urban Geography Credits: 3
• GGS 315 - Geography of the United States Credits: 3
• GGS 316 - Geography of Latin America Credits: 3
• GGS 320 - Geography of Europe Credits: 3
• GGS 325 - Geography of North Africa and the Middle East Credits: 3
• GGS 330 - Geography of the Soviet Succession States Credits: 3
• GGS 357 - Structures in Urban Governance and Planning Credits: 3
• GGS 380 - Geography of Virginia Credits: 3
Natural Science (1 credit)

Choose one credit in addition to the Mason Core: Natural Science requirement for a total of 8 credits. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science courses that include a laboratory experience (except for BIOL 124 and BIOL 125).

Foreign Language (0-3 credits)

Intermediate-level proficiency in one foreign language is required. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher-level courses taught in the language), or by achieving a satisfactory score on an approved proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found via the college's Office of Academic and Student Affairs.

Non-western Culture (0-3 credits)

Choose one approved Non-Western Culture Requirement course in addition to the course used to fulfill the Mason Core: Global Understanding requirement. A course used to fulfill the Mason Core: Global Understanding requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major).

Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)
Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits

Bachelor of Science

Chemistry, BS

Banner Code: SC-BS-CHEM

College: College of Science
Department: Chemistry and Biochemistry This program of study is offered by the Department of Chemistry and Biochemistry in the College of Science.

This program is approved by the American Chemical Society; upon completion, students are certified to the society. Students planning professional careers in chemistry should choose this degree.

In addition to satisfying all Requirements for Bachelor's Degrees including the Mason Core, students majoring in chemistry must:

- Complete the chemistry program requirements with a minimum GPA of 2.30, and
- Present no more than two courses with a grade of ‘D’ (1.00) in CHEM coursework at graduation

CHEM 336 or CHEM 465 will fulfill the writing intensive requirement for students majoring in chemistry.

This undergraduate program offers students the option of applying to the Chemistry, BS/Chemistry, Accelerated MS or the Curriculum and Instruction (Secondary Education Chemistry Concentration).

Degree Requirements

BS without Concentration

Students who do not select an optional concentration complete the curriculum requirements listed below.

Mathematics (11 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Chemistry (1-3 credits)

Choose from:

- CHEM 355 - Undergraduate Research Credits: 1-3
- CHEM 423 - Instrumental Analysis Laboratory Credits: 2
- CHEM 451 - Special Projects in Chemistry Credits: 1-3
- CHEM 452 - Special Projects in Chemistry Credits: 1-3
- CHEM 455 - Honors Research in Chemistry Credits: 3
- CHEM 456 - Honors Research in Chemistry Credits: 3

**In-depth Electives (6 credits)**

Choose from:

- CHEM 422 - Instrumental Analysis Credits: 3
- CHEM 427 - Aquatic Environmental Chemistry Credits: 3
- CHEM 438 - Atmospheric Chemistry Credits: 3
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 458 - Chemical Oceanography Credits: 3
- CHEM 464 - General Biochemistry II Credits: 3
- CHEM 467 - The Chemistry of Enzyme-Catalyzed Reactions Credits: 3
- CHEM 468 - Bioorganic Chemistry Credits: 3

**Additional Chemistry (44 credits)**

- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course)
- CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course)
- CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 337 - Physical Chemistry Lab II Credits: 2
- CHEM 441 - Properties and Bonding of Inorganic Compounds Credits: 3
- CHEM 445 - Inorganic Preparations and Techniques Credits: 2 or CHEM 465 - Biochemistry Lab Credits: 2
- CHEM 463 - General Biochemistry I Credits: 4

- Choose 3 credits of chemistry electives

**Physics (8 credits)**

Mason Core: Natural Science courses:

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

**Without Concentration Total: 70-72 credits**
Concentration in Analytical and Environmental Chemistry (AEC)

Students planning professional careers in an industry involving chemical measurements, careers with a chemistry emphasis in the environmental science, or those seeking graduate study in analytical or environmental chemistry should choose this program.

Chemistry (52 credits)

- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course)
- CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course)
- CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 337 - Physical Chemistry Lab II Credits: 2
- CHEM 422 - Instrumental Analysis Credits: 3
- CHEM 423 - Instrumental Analysis Laboratory Credits: 2
- CHEM 427 - Aquatic Environmental Chemistry Credits: 3 or CHEM 458 - Chemical Oceanography Credits: 3
- CHEM 438 - Atmospheric Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 441 - Properties and Bonding of Inorganic Compounds Credits: 3 or CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 445 - Inorganic Preparations and Techniques Credits: 2 or CHEM 465 - Biochemistry Lab Credits: 2

Physics (8 credits)

Mason Core: Natural Science courses:

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Mathematics (11 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Supporting Science Electives (7-8 credits)

Choose from one of the following options:
Option One

- GEOL 101 - Introductory Geology I Credits: 4 (Mason Core: Natural Science course)
- GEOL 309 - Introduction to Oceanography Credits: 3

Option Two

Mason Core: Natural Science courses:

- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

Option Three

- CHEM 341 - Fundamental Inorganic Chemistry Credits: 3
  and at least an additional 4 credits chosen from:
- CHEM 355 - Undergraduate Research Credits: 1-3
- CHEM 451 - Special Projects in Chemistry Credits: 1-3
- CHEM 452 - Special Projects in Chemistry Credits: 1-3

The discipline sequences may be interchanged only with approval by the program coordinator.

AEC Concentration Total: 78-79 credits

▲ Concentration in Biochemistry (BC)

Students planning professional careers in biochemistry, the pharmaceutical industry, medicine, biotechnology, or related fields with a chemistry emphasis should choose this program instead of the Chemistry, BS without a concentration. This concentration provides students with a focus on biochemistry while retaining a strong chemistry foundation. Students are allowed to tailor the concentration to their interests with 9 credits of science electives.

Chemistry (39 credits)

- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course)
- CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course)
- CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 464 - General Biochemistry II Credits: 3
- CHEM 465 - Biochemistry Lab Credits: 2
Mathematics (8 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Physics (8 credits)

Choose one Mason Core: Natural Science sequence:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Biology (8 credits)

- BIOL 213 - Cell Structure and Function Credits: 4 (Mason Core: Natural Science course)
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1

Approved Science Electives (9 credits)

- 9 credits of approved science electives chosen from CHEM or BIOL courses numbered 302-499. Other science or math courses may be approved as electives, subject to prior approval of the coordinator.

BC Concentration Total: 72 credits

▲ Concentration in Chemistry Education (CHME)

Those interested in teaching high school chemistry should choose this concentration. Degree completion with this concentration will lead to state licensure to teach in Virginia.

Chemistry (38 credits)

- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course)
- CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course)
- CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
• CHEM 331 - Physical Chemistry I Credits: 3
• CHEM 446 - Bioinorganic Chemistry Credits: 3
• CHEM 463 - General Biochemistry I Credits: 4
• CHEM 336 - Physical Chemistry Lab I Credits: 2 or CHEM 465 - Biochemistry Lab Credits: 2
• CHEM 470 - Laboratory Instructional Methods for Chemistry Credits: 3
• Choose one 3 credit upper-level chemistry elective

Mathematics (11 credits)

• MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• STAT 250 - Introductory Statistics I Credits: 3 (Mason Core: Quantitative Reasoning course)

Physics (8 credits)

Choose one Mason Core: Natural Science sequence:

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

or

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

Other General Science (8 credits)

Mason Core: Natural Science courses:

• GEOL 101 - Introductory Geology I Credits: 4
  and
• BIOL 103 - Introductory Biology I Credits: 4 or BIOL 213 - Cell Structure and Function Credits: 4 (Mason Core: Natural Science course)

Teacher Licensure Requirement (21 credits)

A grade of ‘C’ or better is required for all licensure coursework.

• EDCI 473 - Teaching Science in the Secondary School Credits: 3
• EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
• EDCI 490 - Student Teaching in Education Credits: 6 (Mason Core: Synthesis course)
• EDRD 419 - Literacy in the Content Areas Credits: 3
• EDUC 372 - Human Development, Learning, and Teaching Credits: 3 (Mason Core: Social and Behavioral Science course)
• EDUC 422 - Foundations of Secondary Education Credits: 3
Note

During their second year, students should contact the Graduate School of Education in order to attend an information session and to prepare for taking the Praxis Core Academic Skills for Educators Test.

CHME Concentration Total: 86 credits

Mason Core and Elective Credits (34-50 credits)

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied towards any remaining Mason Core requirements (outlined below), requirements for bachelor's degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 48-50 credits
- AEC concentration: 41-42 credits
- BC concentration: 48 credits
- CHME concentration: 34 credits

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits
Bachelor/Accelerated Master's

Chemistry, BS/Chemistry, Accelerated MS

College: College of Science
Department: Chemistry and Biochemistry This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to research to obtain both the Chemistry, BS and the Chemistry, MS degrees within an accelerated timeframe. Upon completion of this 144 credit program, students will be exceptionally well prepared for entry into a professional school or a PhD program in chemistry or a related discipline. Students are eligible to enter this program and enroll in graduate courses after successfully completing 90 undergraduate credits, inclusive of prerequisites, toward the Chemistry, BS degree. This flexibility makes it possible for students to complete graduate coursework during their final year. Consult the Department of Chemistry and Biochemistry for details regarding the program.

See the Bachelor's/Accelerated Master's Degrees section of this catalog for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the bachelor's and master's degrees. For policies governing all degrees, see the Academic Policies section of this catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. Application information for this accelerated master's program can be found on the Department of Chemistry and Biochemistry website.

Successful applicants will have an overall undergraduate GPA of at least 3.00. Additionally, they will have completed the following courses with a GPA of 3.00 or higher: CHEM 313, CHEM 314, CHEM 315, CHEM 318, CHEM 321, CHEM 331, CHEM 336, CHEM 463, and CHEM 445 or CHEM 465.

Accelerated Option Requirements

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar) to the College of Science's Office of Academic and Student Affairs. Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the chemistry and biochemistry concentrations.

Reserve Graduate Credit

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

Doctor of Philosophy

Chemistry and Biochemistry, PhD
Department: Chemistry and Biochemistry

The Chemistry and Biochemistry, PhD program is intended to prepare students for advanced work in the chemical sciences and related areas. Graduates with the PhD degree in this field can seek employment in research and development, process control, or higher education. In addition to these traditional science career paths, graduates are also positioned to pursue careers in non-traditional areas such as the intellectual property and regulatory fields. The program is designed to provide students with a firm foundation in advanced coursework, which is followed by an independent research project completed under the guidance of a faculty advisor. The culmination of the program is a dissertation representing original research that is publishable in a peer-reviewed scientific journal.

Admission Requirements

The Chemistry and Biochemistry, PhD program is intended for students who have completed an undergraduate program of study in chemistry, biochemistry, or a related field. Applicants are expected to have a BS degree with a minimum GPA of 3.00, and acceptable GRE and TOEFL scores (if applicable). Applicants with a BS degree in other fields of study who have at least three years of chemistry or biochemistry coursework may be accepted provisionally and may be required to successfully complete selected remedial courses, some of which may not be applicable towards the PhD requirements. Interested students should submit a completed application, three letters of reference, official reports of GRE and TOEFL exam scores, and a personal/goals statement outlining their general research interests and career plans.

Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student affairs. See the Graduate Policies section of this catalog for more information.

Degree Requirements

Upon acceptance into the Chemistry and Biochemistry, PhD, a student will be assigned an academic advisor. Prior to registering for classes, students are required to meet with their academic advisor who will provide guidance in selecting courses that are consistent with the student's area of interest. Once a student has selected a research/dissertation advisor, that person then assumes the role of providing academic advisement to the student.

Doctoral Coursework (48 credits)

Core Courses (6 credits)

- CHEM 817 - Organic Structural Spectroscopy Credits: 3
- CHEM 833 - Physical Chemistry and Biochemistry Credits: 3

Seminar (3 credits)

- CHEM 790 - Graduate Seminar Credits: 1 (taken three times)
Electives (39 credits)

39 credits of approved elective courses chosen in consultation with the student's advisor

Dissertation Committee and Supervisor

By the end of the first year, a student in the program is expected to have selected a dissertation/research supervisor and to have formed the dissertation committee. This committee will consist of at least four graduate faculty members (including the dissertation supervisor), with at least two members from the Department of Chemistry and Biochemistry. At least one member must be from outside the department. Qualified individuals who are not members of the graduate faculty, including faculty at other universities or government laboratories, may serve on the committee with the approval of the program director and the college's associate dean.

Candidacy Examinations

The student must successfully complete separate written and oral candidacy examinations prepared and administered by the dissertation committee.

Dissertation Proposal and Advancement to Candidacy

Prior to completing the sixth semester in the program, a student is expected to have advanced to candidacy. The student's committee will determine whether a candidate is ready to begin preparation of the research proposal and approve enrollment in CHEM 998 based upon their familiarity with the student's progress.

In order to advance to candidacy, a student is required to fulfill the following requirements:

- The student will prepare and submit a research proposal (based on the thesis research) for approval by the dissertation committee.
- The student must pass a written qualifying exam prepared by the dissertation committee. The exam can be based on the student's research and/or completed coursework, with the composition of the exam being determined by the student's dissertation committee.
- The final stage is an oral defense of the student's research proposal. Questions at the proposal defense may also be drawn from material covered in the written qualifying exam.

Dissertation Research (24 credits)

No more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

- CHEM 998 - Doctoral Dissertation Proposal Credits: 1-12
- CHEM 999 - Doctoral Dissertation Research Credits: 1-12

Exit Seminar

Each PhD candidate presents his or her research in a seminar in the Department of Chemistry and Biochemistry (a departmental seminar), which takes place in the same semester as the final defense of dissertation (below). The student does not have to be registered for CHEM 790 during the semester the exit seminar is presented.

Dissertation Research and Defense
With the approval of the dissertation committee, the student will enroll in CHEM 998 and CHEM 999. The dissertation research should represent a significant contribution to the appropriate scientific field(s), and it should be deemed to represent a body of work that is publishable in a refereed scientific journal. The dissertation must be presented and defended in a public forum consisting of the dissertation committee and other interested members of the George Mason University community.

Degree Total: 72 credits

Master of Science

Chemistry, MS

Banner Code: SC-MS-CHEM

College: College of Science
Department: Chemistry and Biochemistry

The Chemistry, MS provides advanced training for recent college graduates, professionals in teaching, and technical workers in research organizations who have an interest in chemistry or biochemistry.

CHEM 500 may not be applied toward the MS degree.

CHEM courses numbered 502 through 510 may be applied toward the degree only with prior written approval of the department.

An accelerated master's option is available to students in the bachelor of science program. See the Chemistry, BS/Chemistry, Accelerated MS for specific requirements.

Admission Requirements

To be considered for admission to degree status, students must have a bachelor's degree in chemistry, biochemistry, or a related field from a regionally accredited institution and must meet general admission requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Admission is based on a departmental evaluation of the applicant's background as evidenced by transcripts, résumés, and letters of recommendation.

Degree Requirements

To receive this degree, students must complete the coursework listed below with the option of completing a thesis or completing a research project or teaching experience.

Core Courses (9 credits)

All students in the Chemistry, MS program must complete three of the following core courses. Courses must be selected from the three different core areas shown below.

Core courses may also be taken as electives beyond the stated credit requirement for each option.

Analytical

- CHEM 624 - Principles of Chemical Separation Credits: 3
Biochemistry

- CHEM 660 - Protein Biochemistry Credits: 3
- CHEM 662 - Modern Methods of Drug Discovery Credits: 3

Environmental

- CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3

Inorganic

- CHEM 641 - Solid State Chemistry Credits: 3
- CHEM 646 - Bioinorganic Chemistry Credits: 3

Organic

- CHEM 613 - Modern Polymer Chemistry Credits: 3
- CHEM 614 - Physical Organic Chemistry Credits: 3

MS without Concentration (21 credits)

General chemistry students who do not wish to pursue a concentration complete the following requirements and choose either the thesis or nonthesis option:

One Additional Core Course (3 credits)

- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3

Chemistry Electives (9 credits)

- 3 credits of CHEM designated courses
- 6 credits of courses in chemistry or related fields, approved by the graduate committee prior to registration

Seminar (3 credits)

- 3 credits of CHEM 790 - Graduate Seminar Credits: 1

Thesis or Nonthesis (6 credits)
Choose one of the following options:

**Thesis Option**

The thesis option is designed for students planning to pursue a doctoral degree or a career involving research in the chemical, biochemical, environmental, or pharmaceutical industries.

Students must choose a research laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is appointed prior to the first semester of registration in CHEM 799. Students must complete CHEM 799 and present a seminar, followed by an oral defense.

- 6 credits of CHEM 799 - Master's Thesis Credits: 1-6

**Nonthesis Option**

The nonthesis option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous.

Students selecting this option are not required to complete a laboratory-based thesis. Instead, they must complete a research project or gain teaching experience in undergraduate chemistry labs, as described below.

**Additional Chemistry Electives**

- 3 credits of CHEM designated courses

**Teaching and Research**

Any combination of CHEM 670 and CHEM 796 may be used to fulfill this requirement. However, CHEM 796 may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory or library-based research project, or must otherwise enhance the student's teaching skills.

Choose 3 credits from the following:

- CHEM 670 - Teaching Practicum Credits: 2
- CHEM 796 - Directed Reading and Research Credits: 1-6

**MS with Concentration (21 credits)**

▲ **Concentration in Biochemistry (BC)**

Students who wish to pursue an optional concentration in biochemistry complete the following requirements and choose either the thesis or nonthesis option:

**One Additional Core Course (3 credits)**

- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
Chemistry Electives (3 credits)

- 3 credits of CHEM designated courses

Seminar (3 credits)

- 3 credits of CHEM 790 - Graduate Seminar Credits: 1

Thesis or Nonthesis (12 credits)

Choose one of the following options:

Thesis Option

The thesis option is designed for students planning to pursue a doctoral degree or a career involving research in the chemical, biochemical, environmental, or pharmaceutical industries.

Students must choose a research laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is appointed prior to the first semester of registration in CHEM 799. Students must complete CHEM 799 and present a seminar, followed by an oral defense.

Biochemistry Electives

- 6 credits of electives in biochemistry or related fields with approval from department

Thesis

- 6 credits of CHEM 799 - Master's Thesis Credits: 1-6

Nonthesis Option

The nonthesis option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous.

Students selecting this option are not required to complete a laboratory-based thesis. Instead, they must complete a research project or gain teaching experience in undergraduate chemistry labs, as described below.

Biochemistry Electives

- 9 credits of electives in biochemistry or related fields with approval from department

Teaching and Research

Any combination of CHEM 670 and CHEM 796 may be used to fulfill this requirement. However, CHEM 796 may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory or library-based research project, or must otherwise enhance the student's teaching skills.

Choose 3 credits from the following:
Degree Total: 30 credits

Non-Degree

Chemistry Minor

Banner Code: CHEM

College: College of Science
Department: Chemistry and Biochemistry

Eight credits of coursework must be unique to the minor. A minimum GPA of 2.00 is required for all coursework applied to the minor.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

- 16 credits of chemistry (CHEM) at the 300-level or above

Minor Total: 16 credits

Computational and Data Sciences

Phone: 703-993-5836
Web: cds.gmu.edu

Faculty

Professors: Axtell, Blaisten-Barojas, Cioffi-Revilla, Gentle, Klimov*, Papaconstantopoulos, Wegman

Associate professors: Crooks, Griva*, Kinser, Renz, Sheng*, Zoltek

Assistant professor: Tian

Term faculty: Marr, Tryfona*

Affiliated faculty: Griva, Kennedy, Klimov, Trifona, Sheng

*Faculty holding primary appointments in other academic units

The mission of the Department of Computational and Data Sciences (CDS) is comprised of two objectives:
The first is the systematic development and application of computational techniques for modeling and simulation of scientific and social phenomena or social processes.

The second objective is the systematic development and application of techniques for mining, managing, and analyzing large sets of data.

The resulting interdisciplinary approach leads to understanding, interpretation, and prediction of phenomena that traditional theory or experiment cannot provide alone. CDS's mission aims toward excellence in faculty and graduate student state-of-the-art research activities, as well as providing modern approaches to student education at both the graduate and undergraduate levels. The educational and research directions pursued in CDS are focused to reflect the interests of neighboring federal laboratories, scientific institutions, and high-technology firms to provide the students opportunities for continued or new employment. Graduate courses are also designed to accommodate part-time students, with most courses meeting once a week in the late afternoon or early evening.

The research and teaching activities associated with CDS's programs are a reflection of the present central role of computation in the arenas of "big data" and of modeling and simulation.

Courses

This department offers all courses designated CDS, CSI, and CSS in the Courses section of this catalog.

Undergraduate Programs

This department offers the Computational and Data Sciences, BS and the Computational and Data Sciences Minor. Additionally, an accelerated master's option is available: Computational and Data Sciences, BS/Computational Science, Accelerated MS.

Many opportunities exist for undergraduate students to get involved with research. Students should consult with faculty working on research topics of interest to them, based on their exploration of the departmental website.

Graduate Programs

This department offers the Data Science Graduate Certificate, the Computational Social Science Graduate Certificate, the Computational Sciences, MS, the Computational Sciences and Informatics, PhD, and the Computational Social Science, PhD. Additionally, an accelerated master's option is available: Computational and Data Sciences, BS/Computational Science, Accelerated MS. The department also supports the Computational Social Science concentration in the Interdisciplinary Studies, MAIS. These graduate programs are strongly supported by the extensive research activities of the faculty, including their collaborations with scientists and engineers at regional government laboratories.

Bachelor of Science

Computational and Data Sciences, BS

Banner Code: SC-BS-CDS

College: College of Science

Department: Computational and Data Sciences

The aim of this degree is to provide students with technical skills and knowledge for rigorously investigating physical and social phenomena. The BS is a transformative approach that integrates science at George Mason University based on the combination of real-world computer science skills, data acquisition and analysis, scientific modeling, applied mathematics, and simulation. As
an interdisciplinary program, this degree addresses the current central role of computation in the areas of "big data," modeling, and simulation. Graduates of the program will possess the computational, scientific, and mathematical skills necessary for participating effectively as members of the scientific simulation and data analysis groups that are of increasing importance in the federal and public sectors, and in high technology firms. Additionally, graduates of the program will be well prepared to pursue graduate studies.

Students who meet Mason's admissions requirements as outlined in the Admissions section of this catalog may apply to the Computational and Data Sciences, BS.

In addition to the degree requirements listed below, students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core. The university's writing intensive requirement for the major will be met upon successful completion of CDS 302.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Computational and Data Sciences, BS/Computational Science, Accelerated MS for specific requirements.

**Degree Requirements**

**Core Required Courses (16 credits)**

- CDS 130 - Computing for Scientists Credits: 3 (Mason Core: Information Technology course)
- CDS 151 - Data Ethics in an Information Society Credits: 1 (Mason Core: Information Technology course)
- CDS 230 - Modeling and Simulation I Credits: 3
- CDS 301 - Scientific Information and Data Visualization Credits: 3
- CDS 302 - Scientific Data and Databases Credits: 3 (fulfills writing intensive requirement)
- CDS 303 - Scientific Data Mining Credits: 3

**Extended Core Courses (18 credits)**

Choose from the following courses:

- CDS 101 - Introduction to Computational and Data Sciences Credits: 3 and CDS 102 - Introduction to Computational and Data Sciences Lab Credits: 1 (Mason Core: Natural Science courses)
- CDS 201 - Introduction to Computational Social Science Credits: 3
- CDS 205 - Introduction to Agent-based Modeling and Simulation Credits: 3
- CDS 251 - Introduction to Scientific Programming Credits: 3
- CDS 290 - Topics in Computational and Data Sciences Credits: 1-4
- CDS 292 - Introduction to Social Network Analysis Credits: 3
- CDS 411 - Modeling and Simulation II Credits: 3
- CDS 486 - Topics in Computational and Data Sciences Credits: 3
- CSI 500 - Computational Science Tools Credits: 3
- CSI 501 - Introduction to Scientific Programming Credits: 3

**Mathematics Courses (10-11 credits)**

Choose from the following courses:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3 (Mason Core: Quantitative Reasoning course)
• MATH 203 - Linear Algebra Credits: 3
• MATH 446 - Numerical Analysis I Credits: 3

Statistics Courses (6 credits)

Choose from the following courses:

• STAT 250 - Introductory Statistics I Credits: 3 (Mason Core: Quantitative Reasoning course)
• STAT 350 - Introductory Statistics II Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
• STAT 346 - Probability for Engineers Credits: 3

Science and Engineering Courses (6 credits)

Choose to either:

• Build upon the courses chosen to fulfill the Mason Core requirements by choosing additional Mason Core: Natural Science or Mason Core: Information Technology courses.
• Complete any course offered by the College of Science or the Volgenau School of Engineering. Courses can be found in the Courses section of this catalog.

Mason Core and Elective Credits (63-64 credits)

In order to meet a minimum of 120 credits, this degree requires an additional 63-64 credits, which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Elective Course Suggestions

• CDS 410 - Numerical Analysis II Credits: 3 or MATH 447 - Numerical Analysis II Credits: 3
• CDS 421 - Introduction to Computational Fluid Dynamics Credits: 3
• CDS 461 - Molecular Dynamics and Monte Carlo Simulations Credits: 3
• CDS 487 - Electronic Structure Computations Credits: 3
• CDS 490 - Directed Study and Research Credits: 1-3
• CDS 491 - Internship Credits: 1-3

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

• Mason Core UWCU - Written Communication Credits: 6
• Mason Core UOC - Oral Communication Credits: 3
• Mason Core UQR - Quantitative Reasoning Credits: 3
Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits

Bachelor/Accelerated Master's

Computational and Data Sciences, BS/Computational Science, Accelerated MS

College: College of Science

Department: Computational and Data Sciences

This bachelor's/accelerated master's option enables enthusiastic, highly qualified, undergraduates to obtain the Computational and Data Sciences, BS and the Computational Sciences, MS within the accelerated timeframe of five years. The program requires 144 credits total, allowing students to undertake graduate coursework during their final year in the bachelor's degree. Upon completion of this 144 credit BS/MS combined program, students are exceptionally well prepared for undertaking doctoral studies or entering the professional workforce.

Consult the Computational and Data Sciences Department for details on the program. General policies related to the program are given in the AP.6 Graduate Policies section of this catalog. Students in an accelerated degree program must fulfill all university requirements for the bachelor's and master's degrees. For policies governing all degrees, see the Academic Policies section of this catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. Application information for this accelerated master's program can be found on the website of the Computational and Data Sciences Department. Applicants must have an overall undergraduate GPA of at least 3.00 and have completed at least 90 credits. Additionally, applicants will have completed the following courses with a GPA of 3.00 or better: CDS 230, CDS 205 or CDS 251, CDS 301, CDS 302, CDS 303, CDS 411, CDS 461 or CDS 490 or CSI 500. Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the modeling and simulation or data science emphases of the MS in Computational Science.
Reserve Graduate Credit

While in undergraduate status, a student may take a maximum of six graduate credits as reserve graduate credits and apply those credits to a master's program. Reserve graduate credits are not counted toward the 120 credits required in the undergraduate degree.

Doctor of Philosophy

Computational Sciences and Informatics, PhD

Banner Code: SC-PHD-CSI

College: College of Science
Department: Computational and Data Sciences Founded in 1992, the Computational Sciences and Informatics, PhD addresses the role of computation in science, mathematics, and engineering, and is designed around the emphases of Computer Modeling and Simulation and of Data Science. Computational science, focused on modeling and simulation, is defined as the systematic development and application of computing systems and computational solution techniques for modeling and simulation of scientific and engineering phenomena. Informatics, focused on data science, is defined as the systematic development and application of computing systems and computational solution techniques for analyzing data obtained through experiments, modeling, database searches, and instrumentation. The resulting interdisciplinary approach leads to understanding that traditional theory or experimentation alone cannot provide. The close relationship of the Computational Sciences and Informatics, PhD to the research and development activities in federal laboratories, scientific institutions, and high-technology firms affords students opportunities for continued or new employment. Scheduled courses and sequences accommodate part-time students, with most courses meeting once a week in the late afternoon or early evening. The research and teaching activities associated with the program reflect the recognized role of computation and data analysis as part of a triad with theory and experiment, leading to a better understanding of nature. The program is designed to be completed in four to five years.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Students interested in applying for admission into the Computational Sciences and Informatics, PhD program should have a bachelor's degree in any natural science, mathematics, engineering, or computer science with a minimum GPA of 3.00 in their last 60 credits of study. Applicants to the PhD program should have a mathematics background up to and including differential equations. All applicants to the PhD program should also have knowledge of a computer programming language such as C, C++, FORTRAN, etc.

The GRE is required, unless the applicant holds a master's degree from a regionally accredited school in the United States. A TOEFL score of 570 (paper-based test) or 230 (computer-based test), or 88 points total and a minimum of 20 points in each section (Internet-based test), is required for international students. The ETS code for Mason is 5827.

Students should submit a completed Mason Graduate Application along with three letters of recommendation, an expanded goals statement, and application fee in addition to the items listed above.

Applications should be received by March 1 for fall semester and November 1 for spring semester. Applications requesting financial support must be received by February 1 for the fall semester. Applications from local applicants may be accepted after these general deadlines.

For additional information, please contact the CSI graduate coordinator.

Reduction of Credit and Transfer of Credit
Reduction of Credit: For students entering the doctoral program with a master’s degree in a related field from a regionally accredited institution, the required coursework may be reduced up to 24 credits, subject to approval of the graduate coordinator and the college's associate dean.

Transfer of Credit: Students who have prior graduate coursework that has not been applied to any degree may request to have a maximum of 30 of those graduate credits transferred, with approval of the graduate coordinator, the college's associate dean, and in accord with university policy. Research-based courses and seminar courses are not eligible for reduction or transfer.

See the Graduate Policies section of this catalog for more information.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

Doctoral Coursework (48 credits)

General Core Courses (6 credits)

Select two from the following list of courses:

- CSI 690 - Numerical Methods Credits: 3
- CSI 695 - Scientific Databases Credits: 3
- CSI 702 - High-Performance Computing Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3

Areas of Emphasis Courses (18 credits)

From the list below, students are advised to select six courses that correspond to areas of emphasis in:

- *Computer Modeling and Simulation*- Including applications to the natural sciences
- *Data Science*- Including computational learning, statistics, and data analytics

When choosing courses, avoid courses previously taken to fulfill the 'General Core Courses' requirement and only choose one 500-level course:

- CSI 500 - Computational Science Tools Credits: 3
- CSI 501 - Introduction to Scientific Programming Credits: 3
- CSI 654 - Data and Data Systems in the Physical Sciences Credits: 3
- CSI 672 - Statistical Inference Credits: 3
- CSI 674 - Bayesian Inference and Decision Theory Credits: 3
- CSI 676 - Regression Analysis Credits: 3
- CSI 678 - Times Series Analysis and Forecasting Credits: 3
- CSI 685 - Fundamentals of Materials Science Credits: 3
- CSI 690 - Numerical Methods Credits: 3
- CSI 695 - Scientific Databases Credits: 3
- CSI 701 - Foundations of Computational Science Credits: 3
- CSI 702 - High-Performance Computing Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3
- CSI 709 - Topics in Computational Sciences and Informatics Credits: 3
- CSI 721 - Computational Fluid Dynamics I Credits: 3
- CSI 739 - Topics in Bioinformatics Credits: 3
- CSI 740 - Numerical Linear Algebra Credits: 3
- CSI 742 - The Mathematics of the Finite Element Method Credits: 3
- CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences Credits: 3
- CSI 747 - Nonlinear Optimization and Applications Credits: 3
- CSI 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- CSI 758 - Visualization and Modeling of Complex Systems Credits: 3
- CSI 771 - Computational Statistics Credits: 3
- CSI 772 - Statistical Learning Credits: 3
- CSI 773 - Statistical Graphics and Data Exploration Credits: 3
- CSI 777 - Principles of Knowledge Mining Credits: 3
- CSI 780 - Principles of Modeling and Simulation in Science Credits: 3
- CSI 782 - Statistical Mechanics for Modeling and Simulation Credits: 3
- CSI 783 - Computational Quantum Mechanics Credits: 3
- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 787 - Computational Materials Science Credits: 3
- CSI 788 - Simulation of Large-Scale Physical Systems Credits: 3
- CSI 873 - Computational Learning and Discovery Credits: 3
- CSI 876 - Measure and Linear Spaces Credits: 3
- CSI 877 - Geometric Methods in Statistics Credits: 3

Colloquium/Seminar (1 credit)

The department offers weekly colloquia and seminar series to ensure that students are exposed to the latest developments at area research institutions. One credit may be chosen from:

- CSI 898 - Research Colloquium in Computational Sciences and Informatics Credits: 1 or CSI 991 - Seminar in Scientific Computing Credits: 1

Elective Courses (23 credits)

Elective courses should be chosen to bring the total number of credits to 72. Courses must be approved by the student's advisor and the graduate coordinator. Additionally,

- A maximum of 2 credits of CSI 898 and/or CSI 991 may be applied as elective courses
- A maximum of two 500-level courses may be applied between both the 'Areas of Emphasis Courses' requirement and the 'Elective Courses' requirement
- CSI 796 and CSI 996 are the only allowable research-based courses that can be used as elective courses
- The following courses may not be used as elective courses: CSI 798, CSI 799, CSI 998, and CSI 999
- Students may pursue interdisciplinary research that supplements the 'Areas of Emphasis Courses' and 'Elective Courses' requirements with each other and also with geoinformation sciences, computational chemistry, climate dynamics, bioinformatics, computational social science, and several other autonomous PhD program areas within the College of Science

Doctoral Research (24 credits)

No more than 24 combined credits from CSI 998 and CSI 999 may be applied toward satisfying doctoral degree requirements, with a minimum of 6 credits of CSI 999.
Students become eligible to register for CSI 998 upon having an approved dissertation committee. Upon advancement to candidacy, students will be eligible to register for CSI 999.

- CSI 998 - Doctoral Dissertation Proposal Credits: 1-12
- CSI 999 - Doctoral Dissertation Credits: 1-12

Candidacy Examination

The student must successfully complete separate written, computational, and oral candidacy examinations prepared and administered by the dissertation committee.

Dissertation Proposal and Advancement to Candidacy

Students advance to doctoral candidacy by fulfilling the following requirements:

- The student must successfully complete candidacy examinations as stated above
- The student prepares a dissertation proposal describing in detail the planned dissertation research. The proposal must be approved by the dissertation committee
- Following successful completion of the research proposal and candidacy exams, the committee will recommend the student for advancement to doctoral candidacy to the graduate coordinator and the college's associate dean

Dissertation Research and Defense

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in CSI 999. The dissertation is a written piece of original contribution that demonstrates a doctoral candidate's mastery of the subject matter. A student is expected to produce new and original research worthy of publication in a peer-reviewed journal. After the dissertation is completed, the committee will review the dissertation and examine the student in a public oral dissertation defense.

Degree Total: 72 credits

Computational Social Science, PhD

Banner Code: SC-PHD-CSS

College: College of Science
Department: Computational and Data Sciences The core objective of the Computational Social Science (CSS) PhD program is to train graduate students to be professional computational social scientists in academia, government, or business. The program offers a unique and innovative interdisciplinary academic environment for systematically exploring, discovering, and developing skills to successfully follow careers in one of the areas of computational social science.

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Applicants should have as background a bachelor's degree in one of the social sciences; computer science, engineering, or a relevant discipline; and undergraduate courses in these and related areas. Bachelor's degrees in the physical or biological sciences are also eligible, but applicants may be advised to take additional courses in social science or computer science as prerequisites to admission. Minimal requirements also include one undergraduate course in calculus and knowledge of a computer programming language, preferably object-based.
Applicants should have an undergraduate degree from a regionally accredited institution, with a GPA of at least 3.25. To apply, prospective students should complete the Mason graduate application, one copy of official transcript from each college and graduate institution attended, a current résumé, an expanded goals statement not to exceed 2,000 words, and the names of two Mason faculty members who may be suitable advisors. Applicants should also include three letters of recommendation from faculty members or individuals with direct knowledge of the student's academic or professional capabilities. The letters must arrive directly from the senders. Applicants should also submit an official report of scores obtained on the GRE-GEN. TOEFL scores are required for all international applicants.

Students should also review the university-wide graduate admissions standards and procedures discussed in the Graduate Admission Policies section of this catalog.

**Reduction of Credit and Transfer of Credit**

**Reduction of Credit**

Students entering the doctoral program with a master's degree in a related discipline may request that the required credits for the doctoral degree be reduced by a maximum of 30 credits with approval of the director of graduate studies and the associate dean and in accordance with university policy.

**Transfer of Credit**

Students who have prior graduate coursework that has not been applied to another degree may request to have a maximum of 24 of these graduate credits transferred, with approval of the director of graduate studies and the associate dean and in accord with university policy.

**Degree Requirements**

The program requires a total of 72 credits beyond the baccalaureate degree; the credits have the functional distribution and learning objectives indicated below.

During the first year, each student will form a graduate studies committee, called the first-year committee, consisting of the student's advisor plus two or three appropriately qualified individuals. The committee assists the student in designing a specific plan of study and evaluating the student's progress by the end of the first year. During the second year, the student forms a doctoral committee, with membership approved by the CSS program director. The committee will advise the student on preparing for the doctoral candidacy exams and preparing, developing, and defending the doctoral dissertation.

**Core Courses (12 credits)**

- CSS 600 - Introduction to Computational Social Science Credits: 3
- CSS 605 - Object-Oriented Modeling in Social Science Credits: 3
- CSS 610 - Agent-based Modeling and Simulation Credits: 3
- CSS 620 - Origins of Social Complexity Credits: 3

**Extended Core Courses (6 credits)**

Choose from the following courses:

- CSS 625 - Complexity Theory in the Social Sciences Credits: 3
- CSS 645 - Spatial Agent-Based Models of Human-Environment Interactions Credits: 3
- CSS 692 - Social Network Analysis Credits: 3
Discipline-based Courses (15 credits)

Choose discipline-based social science courses in a specific area such as anthropology, economics, geography, history, linguistics, political science, or sociology, as approved by the student's advisor, to provide domain-specific knowledge.

Elective Courses (15 credits)

Choose elective courses or independent research, as approved by the student's advisor, to provide further substantive or methodological specialization as needed.

Students with a strong background in computing, for example, a prior MS in computer science, but weaker social science training will be required to use all or most of these electives in a substantive social science. Conversely, students with a strong background in social science, for example, a BS in economics, will be required to use most or all of these electives in computing courses.

Candidacy Examination

The candidacy exam is taken after students have completed all core requirements and a majority of additional coursework (18 plus 15 credits), which typically corresponds to the fifth semester in the program. The purpose of the candidacy exam is to assess the student's substantive and methodological knowledge in CSS as a whole and in the chosen focus area, the ability to integrate materials from different courses, and the potential for a successful dissertation. The exam consists of written and oral parts.

Dissertation Proposal

Upon passing the candidacy examination, each student shall prepare and, within a year, defend a dissertation proposal, written in the form of an extramural research grant proposal. The student shall develop the dissertation proposal in consultation with the dissertation committee. With successful defense of the proposal, a student becomes a PhD candidate.

Dissertation Research (24 credits)

Dissertation research credits are required in order to demonstrate doctoral-level originality and research excellence:

- CSS 998 - Doctoral Dissertation Proposal Credits: 1-12
- CSS 999 - Doctoral Dissertation Credits: 1-12

Example Dissertation Areas

Areas for dissertation research include, but are not limited to, the following:

- Agent-based computational economics: trade, finance, decision making under risk
- Computational political economy: voting, institutions, norms, inequality
- Computational linguistics: generative grammars, parsing, classifiers, inference
- Social network analysis: connectivity, structure, evolution of the Internet, social media, cyber warfare
- Computational anthropology: emergence of hierarchy, settlement patterns
- Computational political science: systems of government, conflict and war, cooperation
- Computational sociology: segregation, collective action, leadership, trust
- Complexity theory: power laws, potential theory, criticality, bifurcation
- Computational methodology: multiagent systems, evolutionary computation
• Agent-based computational geography: land use change, humanitarian assistance, urban modeling

Doctoral Dissertation Defense

The PhD dissertation is the detailed written report of an original and significant research contribution to computational social science. It is defended before the dissertation committee in a forum open to fellow students and interested faculty and staff. The dissertation committee recommends that the graduate faculty of George Mason University accept the student candidate for the PhD degree upon a successful defense and completion of any final revisions.

Degree Total: 72 credits

Graduate Certificate

Computational Social Science Graduate Certificate

Banner Code: SC-CERG-CSS

College: College of Science
Department: Computational and Data Sciences This 15-credit program is designed for students who seek training in computer simulation and related computational methods for analyzing social systems and processes. The program is open to all students with graduate standing at George Mason University and all students who hold a bachelor's degree from a regionally accredited university. The Computational Social Science (CSS) certificate allows students with social science or computational backgrounds to acquire new knowledge and modeling skills to improve their qualifications and attractiveness to employers in government, academia, or industry. The core courses provide a common foundation; additional elective courses allow for a variety of student interests across diverse social domains.

Admission Requirements

Applicants should have an undergraduate degree from a regionally accredited institution, with a GPA of at least 3.00. To apply, prospective students should forward a completed Mason graduate application, one copy of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required of all international applicants. Applicants should read the full description of university-wide graduate admissions requirements in the Admissions section of this catalog, including information regarding the admission of international students.

Students intending to obtain the CSS certificate must apply to the CSS certificate program before beginning any CSS coursework intended to satisfy requirements. They must also have their coursework plan approved by the director.

The graduate certificate in CSS may be pursued on a part-time or full-time basis.

Certificate Requirements

Core Courses (6 credits)

• CSS 600 - Introduction to Computational Social Science Credits: 3
• CSS 610 - Agent-based Modeling and Simulation Credits: 3

Elective Courses (minimum 9 credits)
An elective course may be any Mason master’s-level course in computational social science, social science, computer science, statistics, and other quantitative methods such as data visualization, information technology, and geographic information science. These courses should be selected in conjunction with, and approved by, the student’s advisor. CSS recommended courses include:

- CSS 605 - Object-Oriented Modeling in Social Science Credits: 3
- CSS 620 - Origins of Social Complexity Credits: 3
- CSS 692 - Social Network Analysis Credits: 3

**Note:** Students may include a maximum of 3 credits of programming courses to meet the elective requirements. Procedural, object-oriented languages, or other approved programming approaches may be used with permission of the director. Some courses on computational techniques, modeling, or statistics, such as visualization, graphics, and statistical and database packages may also be used to meet the requirements with prior approval of the director.

**Certificate Total: 15 credits**

**Data Science Graduate Certificate**

**Banner Code:** SC-CERG-DSCI

**College:** College of Science  
**Department:** Computational and Data Sciences

This certificate program focuses on mastering a variety of basic computational skills to manage and analyze data. The certificate is designed primarily for professionals in technical fields who seek to upgrade their expertise in data science. This program is also available as an option for prospective or currently enrolled master’s degree students.

The coursework in this program provides an accelerated introduction to concepts in modern analysis of data. Topics include computer packages, graphics, databases, data analytics, and their applications.

This certificate may be pursued on a part-time basis or full-time basis.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Applicants to this certificate should have an academic background in science, engineering, mathematics, or computer science. They should have an undergraduate degree from a regionally accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have facility in using a high-level computer programming language.

To apply, prospective students should complete the Mason Graduate Application, supply two copies of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required for all international applicants.

**Certificate Requirements**

**Tools Courses (12 credits)**

- CSI 500 - Computational Science Tools Credits: 3
- CSI 501 - Introduction to Scientific Programming Credits: 3
- CDS 501 - Scientific Information and Data Visualization Credits: 3
• CDS 502 - Introduction to Scientific Data and Databases Credits: 3

Applications Courses (3 credits)

The applications courses provide content from a specific scientific domain and demonstrate the utilization of techniques within its context. Choose one course from the following:

• CSI 695 - Scientific Databases Credits: 3
• CSI 777 - Principles of Knowledge Mining Credits: 3
• CSS 692 - Social Network Analysis Credits: 3

Certificate Total: 15 credits

Master of Science

Computational Sciences, MS

Banner Code: SC-MS-COMP

College: College of Science
Department: Computational and Data Sciences The Computational Sciences, MS addresses the growing demand for trained computational scientists and engineers, and data scientists. It combines a solid foundation in computational science skills with courses in a variety of scientific and engineering computer-intensive areas where modeling and simulation, data analysis, and high performance computing play a central role.

Working with an advisor, a student may choose to pursue an area of emphasis. The areas of emphasis are:

• Computer Modeling and Simulation: Intended for students who wish to learn computational solution techniques for modeling and simulation of scientific and engineering phenomena.
• Data Science: Intended for students who wish to learn computational methods for acquiring, extracting, and analyzing large-scale data obtained by observations, experiments, modeling, and database searches.

Students may also combine areas of emphasis to create their own customized curriculum under the guidance of a faculty advisor.

Most of the courses are offered in the late afternoon or early evening to accommodate students with full-time employment outside of the university.

An accelerated master's option is available to students in the bachelor's program. See Computational and Data Sciences, BS/Computational Science, Accelerated MS for requirements.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements as specified in the Graduate Admission Policies section of this catalog. Applicants to the Computational Sciences, MS should have academic backgrounds in physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from a regionally accredited institution with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming language.

To apply, prospective students should complete the Mason Graduate Application, supply two copies of official transcripts from each university attended, a current résumé, and an expanded goals statement. Applicants should also provide three letters of
recommendation and an official report of scores on the GRE-GEN. The GRE-SUB is recommended if it is given in the student's undergraduate major. The GRE requirement will be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required of all international applicants. For more information, see the Admission of International Students section of this catalog.

Degree Requirements

Candidates must successfully complete 30 credits chosen in the categories shown below to create a curriculum plan for an area of emphasis or combined areas of emphases in consultation with their academic advisor.

Core Courses (6 credits)

Choose from:

- CSI 690 - Numerical Methods Credits: 3
- CSI 695 - Scientific Databases Credits: 3
- CSI 702 - High-Performance Computing Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3

Computational Electives (15 credits)

Select from any graduate-level CSI, CDS, or CSS courses listed in the catalog not including: CSI 796, CSI 798, CSI 799, CSI 898, CSI 899, CSI 991, CSI 996, or from courses previously taken.

Electives (9 credits)

Typically chosen from statistics, computational sciences and informatics, information technology, engineering, mathematics, physics, and chemistry courses. No more than 6 credits may be chosen from areas outside of CSI.

Elective credits may also include:

- CSI 796 - Directed Reading and Research Credits: 1-6
- CSI 798 - Research Project Credits: 1-3
- CSI 799 - Master's Thesis Credits: 1-6

Degree Total: 30 credits

Non-Degree

Computational and Data Sciences Minor

Banner Code: CDS

College: College of Science
Department: Computational and Data Sciences The Computational and Data Sciences Minor (CDS) provides an attractive option for students majoring in science, technology, engineering, or mathematics (STEM) who wish to augment their major degree program with additional courses in modeling, simulation, data science, and scientific computing. The combination of computer science, numerical methods, science, and CDS synthesis courses will significantly enhance the practical knowledge and
computational skills of the students when compared with the major field alone. Students will acquire the knowledge, skills, and techniques commonly used across scientific disciplines, which will allow them to apply their George Mason University education in a practical way in industrial, government, and academic settings. Computational and data sciences skills are highly sought after in today's marketplace.

At least 8 credits must be unique to this minor and may not be used to fulfill requirements of the student's major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at George Mason and achieve a minimum GPA of 2.00 in courses applied to the minor. For policies governing all minors, see the Undergraduate Policies section of this catalog.

For additional information, please contact the CDS undergraduate coordinator/advisor.

**Minor Requirements**

Students should note that many of the required courses have prerequisites. Nonetheless, this minor is within efficient reach of most students majoring in science, mathematics, engineering, or computer science. It is very likely that students with these backgrounds will already have the prerequisites completed.

**CDS Courses (3 credits)**

Choose from one of the following courses:

- CDS 101 - Introduction to Computational and Data Sciences Credits: 3
- CDS 130 - Computing for Scientists Credits: 3

**CDS or CSI Courses (9 credits)**

- Choose from any CDS or CSI courses listed in the catalog

**Upper-level COS Courses (3 credits)**

- Choose from any College of Science course at the 300 level or above. Other discipline-based courses may be permitted with permission of the undergraduate program director.

**Minor Total: 15 credits**

**Environmental Science and Policy**

Phone: 703-993-1043
Web: esp.gmu.edu

**Faculty**

Professors: Jones, Lovejoy

Associate professors: Aguirre, Ahn, Crate, Jonas (Chair), Parsons, Torzilli, Visseren-Hamakers

Assistant professors: de Mutsert, Hamdan, Kennedy
Term professor: Talbot

Term associate professors: Peters, Sklarew

Term assistant professors: Kim, Largen, Smith

Research assistant professors: Spooner, Wensing

Emeritus professors: Bradley, Ernst, Kelso, Shaffer, Skog

Other Environmental Program Faculty

Professors: Adelman, Chandhoke, Conlan, Conant, Diecchio, Dukes, Foster, Gerber, Gifford, Gillevet, Gusterson, Haack, Hart, Houck, Maibach, Maxwell, Metcalf, Mose, Mushrush, Olds, Pawlowski, Perry, Posner, Qu, Regan, Rosenberger, Rowan, Seto, Storr, Stough, Taylor, Waters, Willett, Wingfield, Wong

Assistant professors: Frankenfeld, Freeman, Gilmore, Heineman-Piper, Schoeny, Uhen

Term associate professors: Nord, Verardo

Term assistant professors: Fuertes, Kysar-Mattietti, Lessard-Pilon, Luther, McNeil

Courses

This department offers all courses designated EVPP and crosslists with numerous BIOL courses, listed in the Courses section of this catalog.

Additional Undergraduate Program

In addition to its own undergraduate programs (listed below), the Department of Environmental Science and Policy also works closely with and provides administrative input to:

- Biology, BS: In concert with the Department of Biology, the Department of Environmental Science and Policy administers the Environmental and Conservation Biology (ESCB) concentration. This concentration is offered to students seeking a biology degree that focuses on ecology and organismal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology.

Bachelor of Arts

Environmental and Sustainability Studies, BA (COS)

Banner Code: LA-BA-EVSS
College: College of Humanities and Social Sciences and College of Science
Department: School of Integrative Studies and Environmental Science and Policy This degree provides students with theoretical and practical knowledge of three aspects of environmental and sustainability studies: people, prosperity, and planet. In addition to required core courses, students develop more in-depth knowledge in one of six concentrations. This degree prepares students for employment and graduate study in fields related to social justice, business and public policy, and environmental protection as they relate to the environment and sustainability.

This has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

For policies governing all undergraduate degrees, see the Academic Policies section of this catalog.

Degree Requirements

Students must fulfill all requirements for bachelor's degrees, including Mason Core requirements. Students pursuing a BA in environmental and sustainability studies must complete additional college requirements for the BA degree in the College of Humanities and Social Sciences. Students pursuing this degree must complete a minimum of 60 credits within the major, with a minimum grade of 2.00 in each course.

Of the credits required for this degree, 14 credits simultaneously fulfill core requirements for the major and Mason Core requirements, and, depending on the concentration and electives chosen, up to 9 credits may simultaneously fulfill Mason Core requirements and college BA requirements.

Twelve required core courses (42-43 credits)

Core requirements may satisfy Mason Core requirements in natural science (EVPP 110, EVPP 111) and the college BA requirement for social and behavioral science (GOVT 361).

Three courses (11 -12 credits) in environmental science and society

  OR
- EVPP 210 - Environmental Biology: Molecules and Cells Credits: 4, EVPP 301 - Environmental Science: Biological Diversity and Ecosystems Credits: 4, and EVPP 302 - Environmental Science: Biomes and Human Dimensions Credits: 4

Two courses (7 credits) in individual and group behavior

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- INTS 334 - Environmental Justice Credits: 4

Three courses (9 credits) in business and public policy

- ECON 105 - Environmental Economics for the Citizen Credits: 3
- EVPP 322 - Business and Sustainability Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3 or GOVT 361 - Introduction to Environmental Policy Credits: 3 (satisfies the college BA requirement for social and behavioral science)

One course (4 credits) in statistics chosen from:
Three courses (11 credits) in integration, analysis, innovation

- INTS 210 - Sustainable World Credits: 4
- EVPP 480 - Sustainability in Action Credits: 4
- INTS 390 - Internship Credits: 1-6 and/or INTS 490 - Internship Credits: 1-6 (minimum of 3 credits required)

One Concentration (18-22 credits)

Students must complete one concentration.

▲ Concentration in Business and Sustainability (BUSU)

The requirements for this concentration, depending on the electives chosen, may satisfy the college BA requirement in philosophy and religious studies (PHIL 243, PHIL 305).

Students who have already taken and received credit for MGMT 303 or OM 303 shall substitute MGMT 303 for MBUS 301 and OM 303 for MBUS 306. Both courses cannot be taken for credit. Students who have taken and received credit for both ACCT 203 and FNAN 303 shall substitute the combination for MBUS 300. All three courses cannot be taken for credit.

For this concentration, students may substitute OM 211 for SOCI 313 (core requirement for degree). Students cannot receive credit for more than one of these.

Four core courses (12 credits)

Three required courses (9 credits)

- MBUS 300 - Accounting in a Global Economy Credits: 3
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- MBUS 306 - Managing Projects and Operations Credits: 3

One additional course (3 credits) chosen from:

- GOVT 353 - Social Entrepreneurship Credits: 3
- IT 495 - Turning Ideas into Successful Companies Credits: 3
- MBUS 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3
- MGMT 451 - Introduction to Entrepreneurship Credits: 3

Two courses (6 credits) chosen from:

- ECON 335 - Environmental Economics Credits: 3
- EVPP 338 - Economics of Environmental Policy Credits: 3
- EVPP 362 - Intermediate Environmental Policy Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- INTS 204 - Leadership Theory and Practice Credits: 3
- PHIL 243 - Global Environmental Ethics Credits: 3
• PHIL 305 - Business Ethics Credits: 3
• Other course work with advisor approval

Total: 18 credits

▲ Concentration in Climate Change and Society (CCSO)

The requirements for this concentration, depending on the electives chosen, may satisfy the college BA requirement in philosophy and religious studies (PHIL 243, PHIL 343).

Three required courses (9-10 credits)

• CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3 or GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
• EVPP 432 - Energy Policy Credits: 3
• EVPP 436 - The Human Dimensions of Global Climate Change Credits: 3

Three courses (9 credits) chosen from:

• EVPP 362 - Intermediate Environmental Policy Credits: 3
• GGS 302 - Global Environmental Hazards Credits: 3
• GGS 304 - Population Geography Credits: 3
• GGS 309 - Meteorology and Climate Credits: 3
• GGS 312 - Physical Climatology Credits: 3
• GGS 314 - Severe and Extreme Weather Credits: 3
• PHIL 243 - Global Environmental Ethics Credits: 3 (satisfies the college BA requirement in philosophy and religious studies)
• PHIL 343 - Topics in Environmental Philosophy Credits: 3 (satisfies the college BA requirement in philosophy and religious studies)
• Other course work with advisor approval

Total: 18-19 credits

▲ Concentration in Environmental Policy and Economics (EVPE)

The requirements for this concentration satisfy the Mason Core requirement in social and behavioral science (ECO 104) and, depending on the elective chosen, may fulfill the college BA requirement in non-Western culture (ECON 362).

Four required courses (12 credits)

Completion of these courses will satisfy the Mason Core social and behavioral science requirement.

• ECON 104 - Contemporary Macroeconomic Principles Credits: 3
• EVPP 338 - Economics of Environmental Policy Credits: 3
• EVPP 362 - Intermediate Environmental Policy Credits: 3 or GOVT 362 - Intermediate Environmental Policy Credits: 3
• GOVT 351 - Administration in the Political System Credits: 3
Minimum of six credits chosen from:

- CONF 340 - Global Conflict Analysis and Resolution Credits: 3
- ECON 306 - Intermediate Microeconomics Credits: 3
- ECON 311 - Intermediate Macroeconomics Credits: 3
- ECON 330 - Public Finance Credits: 3
- ECON 345 - Introduction to Econometrics Credits: 3
- ECON 360 - Economics of Developing Areas Credits: 3
- ECON 412 - Game Theory and Economics of Institutions Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- EVPP 396 - Directed Topic in Environmental Science and Policy Credits: 1-4
- EVPP 432 - Energy Policy Credits: 3
- GEOL 420 - Earth Science and Policy Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GOVT 336 - Political Development and Change Credits: 3
- GOVT 339 - Issues in the Politics of Advanced Industrial Societies Credits: 1-3
- GOVT 343 - International Political Economy Credits: 3
- GOVT 357 - Urban Governance and Planning Credits: 3
- GOVT 364 - Public Policy Making Credits: 3
- INTS 331 - The Nonprofit Sector Credits: 4
- INTS 371 - Food Systems and Policy Credits: 3
- Other course work with advisor approval

Total: 18 credits

▲ Concentration in Equity and Environmental Justice (EQEJ)

Four required courses (12 credits)

- EVPP 362 - Intermediate Environmental Policy Credits: 3
- EVPP 436 - The Human Dimensions of Global Climate Change Credits: 3
- INTS 336 - Poverty, Wealth and Inequality in the US Credits: 3
- INTS 337 - Social Justice Consciousness and Personal Transformation Credits: 3

Minimum of six credits chosen from:

- CONF 394 - Human Rights and Inequality Credits: 3
- GGS 304 - Population Geography Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GOVT 445 - Human Rights Credits: 3
- INTS 304 - Social Movements and Community Activism Credits: 4
- INTS 331 - The Nonprofit Sector Credits: 4
- INTS 338 - Animal Rights and Humane Education Credits: 3
- INTS 362 - Social Justice and Human Rights Credits: 3
- INTS 402 - Plants and People - Sustenance, Ceremony, and Sustainability Credits: 6
- SOCI 320 - Social Structure and Globalization Credits: 3
- SOCI 355 - Social Inequality Credits: 3
- Other course work with advisor approval

Total: 18 credits

▲ Concentration in Sustainable Food and Agriculture (SFG)

Three required courses (10 credits)

- INTS 370 - Sustainable Food Systems Credits: 6
- INTS 371 - Food Systems and Policy Credits: 3
- INTS 470 - Professional Pathways in Sustainable Food Systems Credits: 1

Minimum of eight credits chosen from:

- ANTH 366 - Food and Human Evolution Credits: 3
- ANTH 376 - Food and Culture Credits: 3
- BIOL 344 - Plant Diversity and Evolution Credits: 4
- BIOL 345 - Plant Ecology Credits: 4
- EVPP 436 - The Human Dimensions of Global Climate Change Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3
- INTS 331 - The Nonprofit Sector Credits: 4
- INTS 338 - Animal Rights and Humane Education Credits: 3
- INTS 402 - Plants and People - Sustenance, Ceremony, and Sustainability Credits: 6
- NUTR 295 - Introduction to Nutrition Credits: 3
- NUTR 408 - Introduction to Food Security Credits: 3
- Other course work with advisor approval

Total: 18 credits

▲ Concentration in Conservation and Sustainability (CSUS)

Smithsonian-Mason Program (16 credits)

Students complete 16 credits offered through the Smithsonian-Mason School of Conservation in cooperation with the Smithsonian Conservation Biology Institute.

Conservation, Biodiversity and Society option

- CONS 320 - Conservation in Practice Credits: 3
- CONS 401 - Conservation Theory Credits: 3
- CONS 402 - Applied Conservation Credits: 4
- CONS 410 - Human Dimensions in Conservation Credits: 3
- CONS 490 - RS: Integrated Conservation Strategies Credits: 3

Wildlife, Ecology, and Conservation option
• CONS 320 - Conservation in Practice Credits: 3
• CONS 403 - Ecology and Conservation Theory Credits: 3
• CONS 404 - Monitoring and Assessment of Biodiversity Credits: 4
• CONS 411 - Science Communication for Conservation Credits: 3
• CONS 491 - RS: Comprehensive Conservation Planning Credits: 3

Minimum of three credits chosen from:

• BIOL 472 - Introductory Animal Behavior Credits: 3
• EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
• EVPP 421 - Marine Conservation Credits: 3
• EVPP 430 - Fundamentals of Environmental Geographic Information Systems Credits: 3
• GGS 303 - Geography of Resource Conservation Credits: 3
• INTS 211 - Introduction to Conservation Studies Credits: 3-6
• INTS 311 - The Mysteries of Migration: Consequences for Conservation Credits: 6
• INTS 370 - Sustainable Food Systems Credits: 6
• INTS 371 - Food Systems and Policy Credits: 3
• INTS 403 - Conservation Behavior Credits: 6
• Other course work with advisor approval

Total: 19-22 credits

Total: 60-65 credits

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their major at the 300 level or above. Students majoring in environmental and sustainability studies should consult an advisor to learn how to fulfill this requirement.

Mason Core (40 credits)

Note: some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Expand each item below for a link to specific course lists for each category.

Foundation Requirements (15-19 credits)

• Mason Core UWCU - Written Communication Credits: 6
• Mason Core UOC - Oral Communication Credits: 3
• Mason Core UQR - Quantitative Reasoning Credits: 3
• Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)
Mason Core UFA - Arts Credits: 3
Mason Core UGU - Global Understanding Credits: 3
Mason Core ULIT - Literature Credits: 3
Mason Core UNSL - Natural Science Credits: 7
Mason Core USBS - Social and Behavioral Sciences Credits: 3
Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

College Level Requirements for the BA degree

In addition to the Mason Core program, students pursuing a BA degree must complete the course work below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or religious studies (3 credits)

Fulfilled by any course in philosophy or religious studies (PHIL, RELI) except for PHIL 323, 324, 327, 393, 460. PHIL 253 and RELI 235 cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and behavioral science (3 credits)

3 credits in addition to the university-wide requirement in social and behavioral science for a total of 6 credits. The two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI and these courses in GGS: 101, 103, 110, 301, 303, 304, 305, 306, 315, 316, 320, 325, 330, 357, 380.

Foreign language

Intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. A three course sequence in American Sign Language (EDSE 115 - American Sign Language (ASL) I, EDSE 116 - American Sign Language (ASL) II, and EDSE 219 - American Sign Language (ASL) III will also meet the foreign language requirement. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs.

Non-Western culture (3 credits)

3 credits of an approved course in the study of a non-Western culture in addition to the course used to fulfill the Mason Core requirement in global understanding. A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs.
Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

Degree Total: Minimum 120 credits

Bachelor of Science

Environmental Science, BS

Banner Code: SC-BS-EVSC

College: College of Science
Department: Environmental Science and Policy This program of study is offered by the Department of Environmental Science and Policy in the College of Science.

The Environmental Science, BS provides students with rigorous training in the fundamental science of the environment, and in the application of the key scientific principles to the analysis of environmental processes and problems and to the development of practical responses to those problems. The program covers ecological systems, environmental policy and the fundamental techniques of environmental science and engineering, protection and improvement of environmental quality, and public and private decision-making processes. Graduates of the program are prepared to undertake careers in a variety of environmental science fields, and are also qualified to pursue advanced scientific/professional education.

Students select a concentration in Conservation, Ecological Science, Environmental Health, Human and Ecosystem Response to Climate Change, or Marine, Estuarine, and Freshwater Ecology.

Students can fulfill the writing intensive requirement for this major by taking EVPP 337.

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core.

For policies governing all undergraduate degrees, see the Academic Policies section of the catalog.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Degree Requirements

Core Requirements (60-62 credits)

All students complete the following core courses:

Environmental Science (38-39 credits)

- EVPP 210 - Environmental Biology: Molecules and Cells Credits: 4
- EVPP 301 - Environmental Science: Biological Diversity and Ecosystems Credits: 4
- EVPP 302 - Environmental Science: Biomes and Human Dimensions Credits: 4
- EVPP 305 - Environmental Microbiology Essentials Credits: 3
- EVPP 306 - Environmental Microbiology Essentials Laboratory Credits: 1
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 377 - Applied Ecology Credits: 3
- EVPP 430 - Fundamentals of Environmental Geographic Information Systems Credits: 3
- BIOL 214 - Biostatistics for Biology Majors Credits: 4

Environmental Science (continued)

Choose one course from the following:

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 338 - Economics of Environmental Policy Credits: 3
- EVPP 362 - Intermediate Environmental Policy Credits: 3

Environmental Science (continued)

Choose one course from the following (all but EVPP 378 are Mason Core: Synthesis courses):

- EVPP 378 - RS: Ecological Sustainability Credits: 4
- EVPP 480 - Sustainability in Action Credits: 4
- CONS 490 - RS: Integrated Conservation Strategies Credits: 3 **
  ** Only offered through the Smithsonian-Mason Semester.

Chemistry (8 credits)

Mason Core: Natural Science courses:

- CHEM 211 - General Chemistry I Credits: 3
- CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3
- CHEM 214 - General Chemistry Laboratory II Credits: 1

Mathematics (7-8 credits)

Choose two courses from the following:

- MATH 111 - Linear Mathematical Modeling Credits: 3 (Mason Core: Quantitative Reasoning course)
- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Geology (4 credits)

- GEOL 102 - Introductory Geology II Credits: 4 (Mason Core: Natural Science course)

Information Technology (3 credits)
Concentrations (21 credits)

Students select a concentration in Conservation, Ecological Science, Environmental Health, Human and Ecosystem Response to Climate Change, or Marine, Estuarine, and Freshwater Ecology. Students should complete coursework as indicated below for their selected concentration.

▲ Concentration in Conservation (CNSV)

Choose 21 credits from the following courses:

- EVPP 318 - Conservation Biology Credits: 3
- EVPP 378 - RS: Ecological Sustainability Credits: 4
- EVPP 395 - Undergraduate Research in Environmental Science and Policy Credits: 1-3 *
- EVPP 396 - Directed Topic in Environmental Science and Policy Credits: 1-4 *
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 420 - Marine Mammal Biology and Conservation Field Course Credits: 1
- EVPP 421 - Marine Conservation Credits: 3
- EVPP 427 - Disease Ecology and Conservation Credits: 3
- EVPP 440 - Field Environmental Science Credits: 0-4 *
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 0-4 *
- EVPP 494 - Internship Credits: 1-3 *
- BIOL 310 - Biodiversity Credits: 3 and BIOL 330 - Biodiversity Lab and Recitation Credits: 2
- BIOL 435 - Selected Topics in Biology Credits: 0-4 *
- GGS 303 - Geography of Resource Conservation Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- CONS 320 - Conservation in Practice Credits: 3 **
- CONS 401 - Conservation Theory Credits: 3 **
- CONS 402 - Applied Conservation Credits: 4 **
- CONS 403 - Ecology and Conservation Theory Credits: 3 **
- CONS 404 - Monitoring and Assessment of Biodiversity Credits: 4 **
- CONS 410 - Human Dimensions in Conservation Credits: 3 **
- CONS 411 - Science Communication for Conservation Credits: 3 **
- CONS 420 - Human-Wildlife Conflict Credits: 3 **
- CONS 490 - RS: Integrated Conservation Strategies Credits: 3 ** (Mason Core: Synthesis course)
- CONS 491 - RS: Comprehensive Conservation Planning Credits: 3 **
- CONS 497 - Special Topics in Conservation Credits: 1-3 **
- CONS 498 - Internship Credits: 1-3
- CONS 499 - Independent Study/Research Credits: 1-3
- INTS 311 - The Mysteries of Migration: Consequences for Conservation Credits: 6
- PRLS 300 - People with Nature Credits: 3
- PRLS 402 - Human Behavior in Natural Environments Credits: 3
- Additional courses as approved by the program coordinator
  * In a relevant topic
  ** Only offered through the Smithsonian-Mason Semester
CNSV Concentration Total: 21 credits

▲ Concentration in Ecological Science (ECSI)

Choose 21 credits from the following courses:

- EVPP 309 - Introduction to Oceanography Credits: 3
- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 355 - Ecological Engineering and Ecosystem Restoration Credits: 4
- EVPP 378 - RS: Ecological Sustainability Credits: 4
- EVPP 395 - Undergraduate Research in Environmental Science and Policy Credits: 1-3 *
- EVPP 396 - Directed Topic in Environmental Science and Policy Credits: 1-4 *
- EVPP 408 - Mushrooms, Molds and Society Credits: 3
- EVPP 427 - Disease Ecology and Conservation Credits: 3
- EVPP 440 - Field Environmental Science Credits: 0-4 *
- EVPP 449 - Marine Ecology Credits: 3
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 0-4 *
- EVPP 494 - Internship Credits: 1-3 *
- BIOL 310 - Biodiversity Credits: 3 and BIOL 330 - Biodiversity Lab and Recitation Credits: 2
- BIOL 345 - Plant Ecology Credits: 4
- BIOL 435 - Selected Topics in Biology Credits: 0-4 *
- BIOL 459 - Fungi and Ecosystems Credits: 3
- GEOL 305 - Environmental Geology Credits: 3
- GEOL 306 - Soil Science Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- Additional courses as approved by the program coordinator
* In a relevant topic

ESCI Concentration Total: 21 credits

▲ Concentration in Environmental Health (EVHL)

Complete the following courses:

EVHL Courses

- EVPP 427 - Disease Ecology and Conservation Credits: 3
- EVPP 445 - Principles of Environmental Toxicology Credits: 3

EVHL Courses (continued)

Choose 15 credits from the following courses:

- EVPP 395 - Undergraduate Research in Environmental Science and Policy Credits: 1-3 *
- EVPP 396 - Directed Topic in Environmental Science and Policy Credits: 1-4 *
- EVPP 409 - Medical Mycology Credits: 3
- EVPP 440 - Field Environmental Science Credits: 0-4 *
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 0-4 *
• EVPP 494 - Internship Credits: 1-3 *
• EVPP 515 - Molecular Environmental Biology I Credits: 3
• BIOL 305 - Biology of Microorganisms Credits: 3 and BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
• BIOL 402 - Applied and Industrial Microbiology Credits: 3
• BIOL 404 - Medical Microbiology Credits: 3
• BIOL 465 - Histology Credits: 4
• GGS 302 - Global Environmental Hazards Credits: 3
• GGS 304 - Population Geography Credits: 3
• GGS 307 - Sustainable Development Credits: 3
• GGS 319 - Air Pollution Credits: 3
• GGS 322 - Issues in Global Change Credits: 3
• GCH 205 - Global Health Credits: 3 (Mason Core: Global Understanding course)
• GCH 360 - Health and Environment Credits: 3
• GCH 560 - Environmental Health Credits: 3
• Additional courses as approved by the program coordinator
  * In a relevant topic

EVHL Concentration Total: 21 credits

▲ Concentration in Human and Ecosystem Response to Climate Change (HERC)

Complete the following courses:

HERC Course

• EVPP 336 - Human Dimensions of the Environment Credits: 3

HERC Courses (continued)

Choose 18 credits from the following courses:

• EVPP 309 - Introduction to Oceanography Credits: 3
• EVPP 355 - Ecological Engineering and Ecosystem Restoration Credits: 4
• EVPP 378 - RS: Ecological Sustainability Credits: 4
• EVPP 395 - Undergraduate Research in Environmental Science and Policy Credits: 1-3 *
• EVPP 396 - Directed Topic in Environmental Science and Policy Credits: 1-4 *
• EVPP 427 - Disease Ecology and Conservation Credits: 3
• EVPP 432 - Energy Policy Credits: 3
• EVPP 436 - The Human Dimensions of Global Climate Change Credits: 3
• EVPP 440 - Field Environmental Science Credits: 0-4 *
• EVPP 490 - Special Topics in Environmental Science and Policy Credits: 0-4 *
• EVPP 494 - Internship Credits: 1-3 *
• CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3 (Mason Core: Natural Science course)
• CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3 (Mason Core: Natural Science course)
• CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1 (Mason Core: Natural Science course)
• CLIM 312 - Physical Climatology Credits: 3
• CLIM 314 - Severe and Extreme Weather Credits: 3
• CLIM 319 - Air Pollution Credits: 3
• CLIM 412 - Physical Oceanography Credits: 3
• CLIM 438 - Atmospheric Chemistry Credits: 3
• GEOL 309 - Introduction to Oceanography Credits: 3
• GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4 (Mason Core: Natural Science course)
• GGS 302 - Global Environmental Hazards Credits: 3
• GGS 304 - Population Geography Credits: 3
• GGS 307 - Sustainable Development Credits: 3
• GGS 309 - Meteorology and Climate Credits: 3
• GGS 312 - Physical Climatology Credits: 3
• GGS 314 - Severe and Extreme Weather Credits: 3
• GGS 319 - Air Pollution Credits: 3
• GGS 321 - Biogeography Credits: 3
• GGS 322 - Issues in Global Change Credits: 3
• GGS 354 - Data Analysis and Global Change Detection Techniques Credits: 3
• GGS 456 - Introduction to Atmospheric Radiation Credits: 3
• Additional courses as approved by the program coordinator
  * In a relevant topic

HERC Concentration Total: 21 credits

▲ Concentration in Marine, Estuarine and Freshwater Ecology (MEFC)

Complete the following courses:

MEFC Courses

• EVPP 309 - Introduction to Oceanography Credits: 3
• EVPP 350 - Freshwater Ecosystems Credits: 4
• EVPP 421 - Marine Conservation Credits: 3
• EVPP 449 - Marine Ecology Credits: 3

MEFC Courses (continued)

Choose 8 credits from the following courses:

• EVPP 318 - Conservation Biology Credits: 3
• EVPP 363 - Coastal Morphology and Processes Credits: 4
• EVPP 380 - Wetlands of the World Credits: 4
• EVPP 395 - Undergraduate Research in Environmental Science and Policy Credits: 1-3 *
• EVPP 396 - Directed Topic in Environmental Science and Policy Credits: 1-4 *
• EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
• EVPP 420 - Marine Mammal Biology and Conservation Field Course Credits: 1
• EVPP 427 - Disease Ecology and Conservation Credits: 3
• EVPP 440 - Field Environmental Science Credits: 0-4 *
• EVPP 490 - Special Topics in Environmental Science and Policy Credits: 0-4 *
• EVPP 494 - Internship Credits: 1-3 *
• BIOL 331 - Invertebrate Zoology Credits: 4
• BIOL 480 - The Diversity of Fishes Credits: 3
• GEOL 364 - Marine Geology Credits: 3
• GEOL 458 - Chemical Oceanography Credits: 3
• GGS 307 - Sustainable Development Credits: 3
• CLIM 412 - Physical Oceanography Credits: 3
• INTS 318 - Exploring Virginia's Watersheds Credits: 4
• Additional courses as approved by the program coordinator

* In a relevant topic

MEFC Concentration Total: 21 credits

Mason Core and Elective Credits (37-39 credits)

In order to meet a minimum of 120 credits, this degree requires an additional 37-39 credits, which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

• Mason Core UWCU - Written Communication Credits: 6
• Mason Core UOC - Oral Communication Credits: 3
• Mason Core UQR - Quantitative Reasoning Credits: 3
• Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

• Mason Core UFA - Arts Credits: 3
• Mason Core UGU - Global Understanding Credits: 3
• Mason Core ULIT - Literature Credits: 3
• Mason Core UNSL - Natural Science Credits: 7
• Mason Core USBS - Social and Behavioral Sciences Credits: 3
• Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

• Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits
Bachelor/Accelerated Master's

Bachelor's Degree (Green Leaf)/Environmental Science and Policy, Accelerated MS

College: College of Science
Department: Environmental Science and Policy
This degree option allows highly qualified George Mason University students to earn an Environmental Science and Policy, MS in less time than if they had first graduated with an environmentally-focused Green Leaf-designated BA or BS degree and then applied to the MS program sequentially.

See the Bachelor's/Accelerated Master's Degrees section of this catalog for policies related to this program.

Admission Requirements

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated major or minor may apply for provisional acceptance into this accelerated master's program after completing two semesters of chemistry (including CHEM 211 and CHEM 212) and three semesters of biology, including a course in ecology, or the equivalent, for example:

- BIOL 213, BIOL 214, and BIOL 308, or
- EVPP 210, EVPP 301, EVPP 302, EVPP 305, and EVPP 306, or
- CONS 401, CONS 402, and 6 credits of BIOL or CONS electives, or
- CONS 403, CONS 404, and 6 credits of BIOL or CONS electives

By the beginning of the undergraduate's senior year, they should first submit a Graduate Application for Accelerated Master's Program form (obtained from the Office of Academic and Student Affairs). Secondly, in their senior year accelerated master's students must complete the two graduate courses indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. Upon completion and conferral of the undergraduate degree in a Green Leaf-designated program, in the semester indicated in the application, they must additionally submit the Bachelor's/Accelerated Master's Transition Form (found on the Office of the University Registrar website) and will subsequently be admitted into graduate status.

By at least the beginning of their senior year, they should seek out a faculty member in the Department of Environmental Science and Policy who is willing to serve as their advisor (unless the student is planning to enroll in the MS concentration in Environmental Management). This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master's concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason (called "program faculty") can serve as master's advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

Degree Requirements

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable (please note that a letter of endorsement from an advisor not necessary for candidates taking the Environmental Management concentration).
For information specific to the accelerated Environmental Science and Policy, MS, see "Graduate Admissions" on the departmental website.

Reserve Graduate Credits

Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate environmentally-focused graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 27-31 credits to receive the master's degree. All other master's degree requirements (AP.6 Graduate Policies) must be met.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form found on the Office of the University Registrar website (as noted above).

Students may take up to 6 additional environmentally-focused graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master's degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, an MS could be completed with 21 post-bachelor's credits).

The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

Doctor of Philosophy

Environmental Science and Public Policy, PhD

Banner Code: SC-PHD-EVPP

College: College of Science
Department: Environmental Science and Policy This interdisciplinary program draws on faculty and expertise from the Department of Environmental Science and Policy's core faculty, as well as faculty from across the university. This includes the Department of Biology, the Department of Atmospheric, Oceanic and Earth Sciences, the School of Systems Biology, the Department of Chemistry and Biochemistry, the Department of Economics, the Department of Geography and Geoinformation Science, and the Department of Sociology and Anthropology, as well as the Schar School of Policy and Government (formerly SPGIA), the Volgenau School of Engineering, and the College of Education and Human Development. Our graduates contribute to the solution of complex environmental problems, which require the development of knowledge and skills in the collection, analysis, and interpretation of scientific data, as well as in the integration of scientific understanding into the public policy process.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Admission Requirements

Applicants should have a bachelor's degree with an overall GPA of at least 3.00. They should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology.

Applicants must meet the admission standards and application requirements for graduate study at Mason as specified in the Graduate Admission Policies section of this catalog. In addition, applicants for the Environmental Science and Public Policy, PhD should submit the following:

- Scores on the aptitude portion of GRE
- Three letters of recommendation, with at least two from individuals with doctorates
Current résumé
Substantial statement of interest that includes a description of the specific area of proposed dissertation research, the potential focus (environmental science or environmental public policy), contacts that have been made with potential faculty advisors, and an explanation of career and research goals
Letter of endorsement from a prospective advisor to include how your research interests coincide with that of your advisor

All students must obtain the consent of a faculty member willing to serve as an advisor prior to being fully admitted to the program. Admission decisions are based on the student's qualifications and the availability of a faculty advisor. An advisor may be changed by mutual consent of student and advisor, or petition to the graduate program director and the associate dean for student affairs in the College of Science. Applicants with questions should contact the ESP Graduate Programs Office (703-993-3187).

Science and Ecology Background

Applicants who lack college-level coursework in biology and chemistry (two semesters of each) will be expected to complete a two semester sequence of introductory graduate level environmental chemistry and biology courses as follows:

- EVPP 506 - Science of the Environment I Credits: 3
- EVPP 507 - Science of the Environment II Credits: 3

These introductory courses will add six credits to the degree requirements listed below but cannot be added to the graduate program of study.

Students without previous coursework in general ecology will be required to take the following introductory course, which may be included in the graduate program of study.

- EVPP 607 - Fundamentals of Ecology Credits: 3

Reduction of Credit

For students entering the doctoral program with a master's degree in an academically related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. See the Graduate Policies section of this catalog for more information.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

Doctoral Coursework (48-60 credits)

Students are required to complete a coursework proposal by the end of the second semester of residency. The coursework proposal must be approved by the student's advisor and graduate program director. In keeping with the general philosophy inherent in a PhD degree, students adopt an individual program that focuses on a specific area of research. The student's coursework must provide the knowledge base from which an original research projects in their specific areas of interest can be successfully completed.

To ensure that all students obtain the necessary skills and knowledge to function as environmental professionals, the program requires all students to fulfill the following four category course requirements:

Natural Sciences (12 credits)
At least 12 credits are required in biology, chemistry, environmental science, geology, geography, or environmental engineering.

**Public Policy (12 credits)**

At least 12 credits are required in public affairs, economics, sociology, and/or business. A course in environmental law is also required as part of this category.

**Research Methods and Technology (6 credits)**

At least 6 credits are required in statistics, remote sensing, geographic information systems, analytical chemistry, molecular biology, modeling, or information technology. Students should carefully choose coursework to ensure they have the necessary skills to support dissertation research.

**Doctoral Seminar (4 credits)**

Students must present a total of 4 graduate seminar credits, with EVPP 991 taken at least once.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1
- EVPP 991 - Advanced Seminar in Environmental Science Credits: 2

**Coursework Focus (12 credits)**

Beyond the basic 12 hour natural science/public policy requirements, a student's program of study will emphasize either environmental science or environmental public policy.

- Students focusing on environmental science should take another 12 credits (for a total of 24 credits) in natural science
- Students focusing on environmental public policy should take another 12 credits (for a total of 24 credits) of public policy coursework.

Previous thesis research courses may not be applied to fulfill the coursework focus described here. See advisor for further details.

**Electives (2-14 credits)**

If necessary after doctoral coursework and dissertation research, students take additional electives to bring the total number of credits to 72.

**Dissertation Committee**

Before the end of the fourth semester of coursework, in consultation with their advisor, the student forms a dissertation committee of at least four members. Three of the committee members must be from the Mason graduate faculty. The fourth member may be from Mason or may be from outside the university provided that they hold a terminal degree in an appropriate field. The dissertation committee must be approved by the college's associate dean for student affairs.

**Program of Study**

After reviewing the student's coursework proposal, progress to date, and area of research, the committee makes final recommendations concerning coursework that will be codified in the program of study to be signed by all committee members and the graduate program director. Students are advised to work closely with their advisor and committee to develop the coursework program in order to facilitate the process of course selection. During the duration of graduate study, a student must meet with the full dissertation committee at least once a year.
Qualifying Exams

On completion of all or nearly all coursework, students may request to take the qualifying or candidacy exam. The qualifying exam has both written and oral components. The written portion consists of questions submitted by each member of the dissertation committee. Successful completion of the written exam should be followed by the oral portion within one month. The qualifying exam may be repeated once at the discretion of the student's committee.

Advancement to Candidacy

Upon approval of the program of study, completion of all or nearly all coursework, successful completion of the qualifying exam, and the approval of the dissertation proposal by the dissertation committee, the student is recommended for advancement to candidacy by the graduate program director. Students must advance to candidacy within five years of admission to the program.

Dissertation Research (12-24 credits)

Students must complete a dissertation. This may be accomplished by taking EVPP 999 alone, or in combination with EVPP 998. However, at least six of these credits must be taken as EVPP 999. Students working on dissertation research must register for a minimum of 3 credits of EVPP 999 per semester (excluding summers) until they have completed the minimum number of dissertation research credits. Then, they must register for 1 credit of EVPP 999 until the dissertation is complete and has been officially submitted to the library.

The dissertation is an original written work, demonstrating mastery of subject matter, methodologies, and conceptual foundations, on a specific problem in the general field of environmental science and public policy. The dissertation generally involves collection and analysis of original data or the substantially new analysis and reinterpretation of existing data.

- EVPP 998 - Doctoral Dissertation Proposal Credits: 1-6
- EVPP 999 - Doctoral Dissertation Research Credits: 1-12

Dissertation Research and Defense

Before students may enroll in EVPP 999, they must have advanced to candidacy and have a dissertation proposal approved by the dissertation committee, graduate program director, department chairperson, and the dean of the College of Science. Students must present the completed dissertation in a public seminar and defend the work before the dissertation committee and others who wish to attend. Awarding of the degree is contingent on approval of the dissertation by the dissertation committee, graduate program director, department chairperson, and the dean of the College of Science. The dissertation and defense must be completed a total of nine years from the date of first enrollment in the doctoral program.

Degree Total: 72 credits

Graduate Certificate

Environmental GIS and Biodiversity Conservation Graduate Certificate (ESP)

Banner Code: SC-CERG-EGBC
College: College of Science
Departments: Environmental Science and Policy, Geography and Geoinformation Science, and Smithsonian Mason School of Conservation

As biodiversity is the life support system of our planet, it is important to prepare students for careers that require knowledge of both ecology and public policy. This certificate focuses in the fields of conservation biology, land use policy, conservation planning, and modern tools and approaches used in GIS to prepare students to tackle complex environmental challenges in a changing world.

This certificate is suitable for traditional students as well as for student-professionals (such as environmental scientists, managers, practitioners in government, and experts in non-governmental organizations) who wish to acquire further knowledge to advance their careers.

This certificate may be pursued on a part-time or full-time basis.

Admission Requirements

In order to apply, prospective students should complete the George Mason University Graduate Application. Applicants to all graduate programs at George Mason must meet the admission standards and application requirements for study as specified in the Graduate Admission Policies section of this catalog. In addition, applicants should hold a BA or BS in a related discipline from a regionally accredited institution.

Requirements for Graduate Certificates

It is important for students to be aware of Mason's Graduate Policies, particularly the Requirements for Graduate Certificates.

Degree Requirements

Core Courses (9 credits)

- EVPP 607 - Fundamentals of Ecology Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- CONS 620 - Spatial Ecology, Geospatial Analysis & Remote Sensing for Conservation Credits: 3

Elective Courses (9 credits)

Choose three courses, one from each cluster:

Cluster One

- GGS 579 - Remote Sensing Credits: 3
- GGS 590 - Selected Topics in Geography Credits: 1-3 (requires the permission of advisor and instructor)
- GGS 680 - Earth Image Processing Credits: 3
- GGS 692 - Web-based Geographic Information Systems Credits: 3
- GGS 759 - Topics in Earth Systems Science Credits: 1-6 (requires the permission of advisor and instructor)
- CLIM 690 - Scientific Basis of Climate Change Credits: 3
• CONS 630 - Species Monitoring & Conservation Credits: 3
• CONS 645 - Estimating Animal Abundance and Occupancy Credits: 3
• CONS 697 - Special Topics in Conservation Credits: 1-3

Cluster Three

• EVPP 505 - Selected Topics in Environmental Science Credits: 0-4 (a conservation-oriented topic is required)
• EVPP 518 - Conservation Biology Credits: 3
• EVPP 519 - Marine Mammal Biology and Conservation Credits: 3
• EVPP 521 - Marine Conservation Credits: 3
• EVPP 619 - The Challenge of Biodiversity Credits: 3
• EVPP 641 - Environmental Science and Public Policy Credits: 3
• EVPP 648 - Population Ecology Credits: 3
• EVPP 650 - Environmental Analysis and Modeling Credits: 4

Certificate Total: 18-19 credits

Master of Science

Environmental Science and Policy, MS

Banner Code: SC-MS-EVSP

College: College of Science
Department: Environmental Science and Policy

The Environmental Science and Policy, MS meets the increasing need for trained environmental professionals who can address the problems of land and water management, land use and urbanization, wetland loss, microbial ecology, bioremediation, conservation biology, and ecosystem preservation. These professionals will also contribute to the analysis and resolution of global problems, such as deforestation, insufficient world food supplies, acid deposition, population growth and public health, global climate change/warming, and depletion of the stratospheric ozone. Areas of specific departmental focus include ecosystems; conservation; environmental biocomplexity; molecular ecology; sustainability science; environmental policy and management; and human/environmental interactions. Environmental problems are defined in the real world and do not necessarily conform to traditional academic disciplines. As such, solutions require creative combinations of diverse interests and subjects. Effective training requires rigorous, problem-focused interdisciplinary action in a setting in which research is an essential element supporting instruction. The following concentrations are available in the master's program: Aquatic Ecology (AQEC), Conservation Science and Policy (COSP), Earth Surface Processes and Environmental Geochemistry (ESEG), Environmental Biocomplexity (EVBC), Environmental Science and Policy (EVSP), Environmental Science Communication (ESCM), and Environmental Management (EVMG). Each concentration's requirements can be found below.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Admission Requirements

Admission standards and application requirements as specified in the Graduate Admission Policies section of this catalog are required. Applicants should hold a bachelor's degree from a regionally accredited institution with a GPA of 3.00 in natural or Earth sciences, engineering, resource planning, environmental studies, or a field that leads to an environmental focus.
Applicants should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. Applicants who lack this coursework should contact the graduate coordinator's office for advice. Successful completion of a two-semester sequence of introductory graduate-level environmental chemistry and biology courses can be used to satisfy the biology and chemistry prerequisites for admission. These introductory courses would be in addition to the degree requirements listed below.

Applicants should submit the following:

- Completed George Mason University Graduate Application.
- Three letters of recommendation, including at least one from a former professor or, if not available, from someone with a PhD.
- The aptitude portion of the GRE is required. Successful applicants usually have achieved a minimum score of 235/336 (70%) for verbal and quantitative combined.
- Statement of interest indicating: desired concentration, potential areas of environmental focus/research interest, interactions with potential faculty advisors, and career goals.
- Contact a potential George Mason faculty advisor (appropriate for research interests). An endorsement letter from the potential advisor must be sent to the Department of Environmental Science and Policy's graduate office; the availability of an advisor in the student's area of interest is a prerequisite for admission.

Course Selections

Some program requirements outlined below may be fulfilled by completing courses from a variety of academic units at Mason. A student's course selection should reflect a coherent individual program focus, which is stated and briefly described in the program of study. Course selections should also support the research component of the student's degree program (if applicable) and should be developed in close consultation with the supervisory committee. The supervisory committee approves a coursework program (the program of study) individually for each student.

In special cases, the graduate program director may permit the substitution of an alternative course in place of a required one.

Supervisory Committee

Students must form a supervisory committee* and submit a program of study to the graduate coordinator for approval within the first 9 credits of coursework or by the end of the second semester, whichever comes first.

The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor, and must conform to Mason's Requirements for Master's Degrees.

* Students choosing the EVMG concentration are not required to form a supervisory committee.

Degree Requirements

Students in the AQEC, COSP, ESEG, EVBC, ESCM and EVSP concentrations will complete the concentration's requirements, the research requirement, the seminar requirement, and elective courses as outlined below (for a total of 33 credits).

Students in the EVMG concentration will complete the concentration's requirements as outlined in the concentration's section below (for a total of 37 credits).

▲ Aquatic Ecology Concentration (AQEC)

This concentration will provide students with a well-grounded master's in the study of aquatic environments such as lakes, streams, watersheds, and estuaries. Emphasis is placed on food webs, biogeochemical cycles, water quality, habitat
characteristics, and life histories of aquatic organisms. Students will become proficient with research tools including literature review, field and laboratory methods, and analytical tools as well as applications to management issues.

**Aquatic Science (12 credits)**

- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 519 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 521 - Marine Conservation Credits: 3
- EVPP 536 - The Diversity of Fishes Credits: 3
- EVPP 563 - Coastal Morphology and Processes Credits: 4
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 645 - Freshwater Ecology Credits: 3
- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 648 - Population Ecology Credits: 3
- EVPP 652 - The Hydrosphere Credits: 3
- EVPP 741 - Advanced Topics in Environmental Science and Public Policy Credits: 0-4
- EVPP 745 - Environmental Toxicology Credits: 3
- CLIM 512 - Physical Oceanography Credits: 3

**Public Policy (6 credits)**

At least 6 credits are required in environmental law, human ecology, environmental ethics, environmental conflict resolution, environmental planning, or public affairs.

Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.

**Aquatic Methods (6 credits)**

At least 6 credits are required to be selected from statistics, research design, multivariate data analysis, geographic information systems, lab and field classes.

Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.

**AQEC Concentration Total: 24 credits**

▲ **Conservation Science and Policy Concentration (COSP)**

This concentration is designed to foster an interdisciplinary, research-oriented degree focusing on the conservation of threatened species and habitats, integrating biological sciences and the human dimensions of conservation practice.

Students may take courses offered by the Department of Environmental Science and Policy and other departments, including CONS courses which are offered through the Smithsonian Mason School of Conservation. This unique partnership with the Smithsonian Conservation Biology Institute (SCBI) in Front Royal, Virginia offers students hands-on education in cutting-edge conservation science and human dimensions through residential, intensive classes. SCBI is renowned for its conservation
research and training of conservation practitioners around the world and instructors for these classes are drawn from SCBI's conservation scientists and other experts from around the world.

Requirements (outlined below) may be fulfilled by completing courses from a variety of academic units at Mason.

**Conservation Science (6 credits)**

At least 6 credits of conservation science courses are required. Suggested courses include:

- EVPP 518 - Conservation Biology Credits: 3
- EVPP 519 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 520 - Marine Mammal Biology and Conservation Field Course Credits: 1
- EVPP 543 - Tropical Ecosystems Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3 (required for those without previous coursework in ecology. Can be included within the 6 credits.)
- EVPP 621 - Overview of Biodiversity Conservation Credits: 3
- CONS 630 - Species Monitoring & Conservation Credits: 3 (variable topics, may be taken more than once if the topic is different)

**Conservation Policy and Human Dimensions of Conservation (6 credits)**

At least 6 credits are required in conservation policy or social science courses. Suggested courses include:

- EVPP 521 - Marine Conservation Credits: 3
- EVPP 575 - Global Biodiversity Governance Credits: 3
- EVPP 608 - Introduction to Environmental Social Science Credits: 3
- EVPP 622 - Management of Wild Living Resources Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- CONS 660 - Effective Conservation Leadership Credits: 3
- CONS 665 - Conservation Conflict Resolution Credits: 3

**Conservation Methods (6 credits)**

At least 6 credits are required in relevant experimental methods, statistics, or conservation techniques courses. Suggested courses include:

- EVPP 555 - Lab in Waterscape Ecology Credits: 1
- CONS 620 - Spatial Ecology, Geospatial Analysis & Remote Sensing for Conservation Credits: 3
- CONS 625 - Statistics for Ecology and Conservation Biology Credits: 3

**COSP Concentration Total: 18 credits**

▲ Earth Surface Processes and Environmental Geochemistry Concentration (ESEG)
This concentration offers a specific research focus in the Earth science area and is designed for students desiring a master's with an Earth science geology theme.

Requirements (outlined below) may be fulfilled by completing courses from a variety of academic units at Mason.

**Natural Sciences (16 credits)**

Select at least one course (totaling 10 of the 16 required credits) from each of the following areas: soils science, hydrogeology, and geochemistry. Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.

The remaining courses (6 credits) may be chosen from a list of applicable EVPP, CHEM, and GEOL graduate courses, including:

- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 543 - Tropical Ecosystems Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 563 - Coastal Morphology and Processes Credits: 4
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3 (required for those without previous coursework in ecology. Can be included within the 6 credits.)
- EVPP 610 - Bioremediation: Theory and Applications Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 745 - Environmental Toxicology Credits: 3
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3
- CHEM 728 - Introduction to Solid Surfaces Credits: 3
- GEOL 500 - Selected Topics in Modern Geology Credits: 1-3
- GEOL 501 - Selected Topics in Modern Geology Credits: 1-3
- GEOL 601 - The Lithosphere Credits: 3

**Public Policy (6 credits)**

At least 6 credits are required in environmental law, human dimension of global change, environmental ethics, human ecology, or planning.

Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.

**Methods (6 credits)**

At least 6 credits are required in remote sensing, GIS, statistics, instrumentation, or modeling.

Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.

**ESEG Concentration Total: 28 credits**

▲ Environmental Biocomplexity Concentration (EVBC)
This concentration is designed for students desiring a master's with an environmental biocomplexity theme encompassing the disciplines of population genetics, microbial ecology, and/or molecular systematics.

Requirements (outlined below) may be fulfilled by completing courses from a variety of academic units at Mason. Students are encouraged to complete at least 1 credit of directed studies (EVPP 693) as a laboratory rotation to enhance their mastery of experimental techniques.

**Natural Sciences (6 credits)**

At least 6 credits are required in courses that can be drawn from offerings in ecology, biogeochemistry, biochemistry, population genetics, molecular biology, molecular systematics, molecular evolution, microbial ecology, microbial diversity, quantitative genetics, and population biology.

Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.

**Public Policy (6 credits)**

At least 6 credits are required in environmental law, human ecology, environmental ethics, patent law, or legal and ethical issues in science.

Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.

**Methods and Statistics (9 credits)**

At least 9 credits are required in statistics, bioinformatics, information systems, instrumental analysis, microbiological techniques, molecular methods, or phylogenetic methods.

Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.

**EVBC Concentration Total: 21 credits**

▲ **Environmental Science and Policy Concentration (EVSP)**

The environmental science and policy concentration is the largest within the master's and serves as a home for a broad array of research foci. It encourages an independent and creative approach to the development of curricula that reside in the general field of environmental science and policy. The concentration's requirements (outlined below) may be fulfilled by completing courses from a variety of academic units at Mason.

**Natural Sciences (6 credits)**

At least 6 credits are required in biology, geology, geography, chemistry, or environmental engineering.

Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.

**Public Policy (6 credits)**

At least 6 credits are required in environmental law, human ecology, environmental ethics, planning, or public affairs.

Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.
Methods and Statistics (6 credits)

At least 6 credits are required in statistics, remote sensing, information systems, instrumental analysis, or modeling. A course in statistics is highly recommended.

Visit the Environmental Science and Policy, MS: Course Options section of this catalog for a list of suggested courses.

EVSP Concentration Total: 18 credits

▲ Environmental Science Communication Concentration (ESCM)

A key to environmental action and behavior change is an ability to communicate environmental science and policy. This concentration is for students desiring an MS degree with an interdisciplinary approach to communicating environmental issues and solutions.

Environmental Science (6 credits)

Choose from EVPP graduate courses, suggestions include:

- EVPP 521 - Marine Conservation Credits: 3
- EVPP 543 - Tropical Ecosystems Credits: 4
- EVPP 607 - Fundamentals of Ecology Credits: 3 (required for those without previous coursework in ecology. Can be included within the 6 credits.)
- EVPP 621 - Overview of Biodiversity Conservation Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 677 - Applied Ecology and Ecosystem Management Credits: 3

Science Communication (12 credits)

- EVPP 529 - Environmental Science Communication Credits: 3
- COMM 639 - Science Communication Credits: 3

Science Communication (continued)

Choose 6 credits of science communication courses; suggestions include, but are not limited to:

- COMM 637 - Risk Communication Credits: 3
- COMM 640 - Controversies in Science Communication Credits: 3
- COMM 641 - Advanced Communication Skills for STEM Credits: 3
- COMM 642 - Science and the Public Credits: 3
- COMM 644 - Analysis and Criticism of Science Journalism Credits: 3
- COMM 660 - Climate Change and Sustainability Communication Campaigns Credits: 3
- COMM 735 - Crisis Communication Credits: 3

Research Methods (6 credits)

Choose courses in relevant experimental methods, statistics, or communication techniques. Suggested courses include, but are not limited to:
• EVPP 631 - Spatial Agent-based Models of Human-Environment Interactions Credits: 3
• EVPP 683 - Environmental Conflict Resolution and Collaboration: Situation Assessment, Process Design & Best Practices Credits: 3
• COMM 725 - Qualitative Methods Credits: 3
• COMM 775 - Media Content Analysis Credits: 3
• PUAD 511 - Problem Solving and Data Analysis I Credits: 3
• PUAD 613 - Economic Analysis in Public Administration Credits: 3
• SOCI 620 - Methods and Logic of Social Inquiry Credits: 3
• SOCI 631 - Survey Research Credits: 3
• SOCI 634 - Qualitative Research Methods Credits: 3
• SOCI 636 - Statistical Reasoning Credits: 3

ESCM Concentration Total: 24 credits

Research Requirement (1-6 credits)

The research requirement* may be satisfied in one of two ways: students may complete a research project or they may produce a formal thesis. The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities.

* Students choosing the EVMG concentration are not required to fulfill the research requirement.

Project Option

Students fulfilling the research requirement with the project option register for EVPP 798 and are required to take a comprehensive examination covering knowledge mastered throughout the program of study. This examination includes both a written and an oral component and is administered by the student's supervisory committee.

• At least 1 credit of EVPP 798 - Master's Research Project in Environmental Science and Public Policy Credits: 1-3

Thesis Option

Students fulfilling the research requirement with the thesis option register for EVPP 799, present their results in a public seminar, and defend their thesis before their supervisory committee. Students will be graded pass/no credit on the research requirement.

• At least 3 credits of EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

Seminar Requirement (1 credit)

An appropriate course topic must be taken to in order to fulfill this requirement*.

* Students choosing the EVMG concentration are not required to fulfill this seminar requirement.

• At least 1 credit of EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

Elective Courses (0-13 credits)
If necessary, students take additional elective courses to bring the degree total to 33 credits*. These courses must be approved by the student's supervisory committee and outlined on the student's program of study.

* Students choosing the EVMG concentration have a different elective course requirement and a different total credit requirement, outlined below.

▲ Environmental Management Concentration (EVMG)

This concentration combines the managerial and administrative skills developed in a traditional master of public administration degree program with the scientific knowledge and understanding normally found in a master of science degree. It serves as a terminal professional master's degree for individuals working in or aspiring to work as managers in the environmental field in government or private industry.

Students in this concentration have the graduate program director as their advisor upon admission. Full-time students can complete this degree in three semesters; part-time students can take six semesters. The requirements are as follows:

Core Courses (18-19 credits)

- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 540 - Public Policy Process Credits: 3

And one of the following methods courses:

- EVPP 650 - Environmental Analysis and Modeling Credits: 4
- GGS 550 - Geospatial Science Fundamentals Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- GGS 579 - Remote Sensing Credits: 3
- PUAD 511 - Problem Solving and Data Analysis I Credits: 3
- SOCI 636 - Statistical Reasoning Credits: 3

Environmental Law (3 credits)

At least 3 credits are required, chosen from the following:

- EVPP 670 - Environmental Law Credits: 3
- CEIE 556 - Environmental Law Credits: 3
- PRLS 501 - Introduction to Natural Resources Law Credits: 3

Field Ecology (4 credits)

At least 4 credits are required, chosen from the following:

- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 555 - Lab in Waterscape Ecology Credits: 1

Or

- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 647 - Wetland Ecology Lab and Field Credits: 1
• Or other approved 4-credit field ecology course

Capstone (3 credits)

• EVPP 677 - Applied Ecology and Ecosystem Management Credits: 3

Electives (9 credits)

Students may choose 9 credits (or more) to complete 37 credits from the following list of approved electives. Other courses may be used, subject to approval of the graduate program director.

• EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
• EVPP 525 - Economics of Human/Environment Interactions Credits: 3
• EVPP 550 - Waterscape Ecology and Management Credits: 3
• EVPP 575 - Global Biodiversity Governance Credits: 3
• EVPP 607 - Fundamentals of Ecology Credits: 3 (required for those without previous coursework in ecology)
• EVPP 608 - Introduction to Environmental Social Science Credits: 3
• EVPP 620 - Development of U.S. Environmental Policies Credits: 3
• EVPP 621 - Overview of Biodiversity Conservation Credits: 3
• EVPP 622 - Management of Wild Living Resources Credits: 3
• EVPP 626 - Environment and Development in Asia Credits: 3
• EVPP 627 - Environmental Policy in Latin America Credits: 3
• EVPP 628 - Environment and Development in Africa Credits: 3
• EVPP 630 - Methods and Logic of Social Inquiry Credits: 3
• EVPP 635 - Environment and Society Credits: 3
• EVPP 638 - Corporate Environmental Management and Policy Credits: 3
• EVPP 643 - Microbial Ecology Credits: 4
• EVPP 646 - Wetland Ecology and Management Credits: 3
• EVPP 650 - Environmental Analysis and Modeling Credits: 4
• EVPP 675 - Environmental Planning and Administration Credits: 3
• CLIM 690 - Scientific Basis of Climate Change Credits: 3
• GGS 550 - Geospatial Science Fundamentals Credits: 3 (only if not taken as part of the core courses above)
• PUAD 509 - Justice Organizations and Processes Credits: 3
• PUAD 615 - Administrative Law Credits: 3
• PUAD 622 - Program Planning and Implementation Credits: 3
• PUAD 645 - Policy Analysis Credits: 3
• PUAD 646 - Program Evaluation Credits: 3
• PUAD 657 - Association Management Credits: 3
• PUAD 729 - Issues in Public Management Credits: 3
• MBA 623 - Marketing Management Credits: 0-3
• MBA 712 - Project Management Credits: 0-3
• MBA 724 - Marketing Communications Credits: 0-3
• MBA 725 - Leadership Credits: 0-3

Degree with EVMG Concentration Total: 37 credits
Non-Degree

Conservation Biology Minor

Banner Code: CBIO

College: College of Science
Department: Environmental Science and Policy

The Conservation Biology Minor is intended for non-biology majors with an interest in wildlife and habitat conservation issues. The minor may particularly suit environmental science, environmental and sustainability studies, global and environmental change majors and Earth science majors, as well as New Century College students wishing to increase their understanding and qualifications in the field of conservation biology. The minor may also be of interest to non-science majors, for example, students taking leisure studies classes with an interest in ecotourism.

Eight credits of coursework must be unique to the minor and not counted toward the student's major. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Candidates for the minor in conservation biology must complete at least 19 credits with a minimum GPA of 2.00, distributed as follows:

Core Biology Courses (13 credits)

- BIOL 308 - Foundations of Ecology and Evolution Credits: 5
- BIOL 310 - Biodiversity Credits: 3 and BIOL 330 - Biodiversity Lab and Recitation Credits: 2
  And one from the following:
- EVPP 318 - Conservation Biology Credits: 3
- BIOL 318 - Conservation Biology Credits: 3
- INTS 401 - Conservation Biology Credits: 6 (3 of 6 credits count toward minor core. Remaining 3 credits may apply to minor electives)

Electives (6 credits)

At least 6 credits of electives from the following courses:

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 377 - Applied Ecology Credits: 3
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 420 - Marine Mammal Biology and Conservation Field Course Credits: 1
- EVPP 421 - Marine Conservation Credits: 3
- EVPP 440 - Field Environmental Science Credits: 0-4 (conservation-oriented topics only)
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 0-4 (conservation-oriented topics only)
- INTS 401 - Conservation Biology Credits: 6 (3 of 6 credits count toward electives if course taken to satisfy core requirement above)
- TOUR 312 - Ecotourism Credits: 3

Notes:

Other conservation-oriented classes may also be applicable as electives for this minor if approved by the faculty coordinator for the minor.

* These courses may have prerequisites that need to be met. See advisor for details.

Minor Total: 19 credits

Conservation Studies Minor (COS)

Banner Code: CNST

Web: smconservation.gmu.edu

This minor is designed for undergraduate students who wish to augment their main academic program with conservation studies taught in an experiential manner. There are two options by which students can complete the minor: the semester whose focus is on "Conservation, Biodiversity and Society" or the semester that focuses on "Wildlife Ecology and Conservation". Both semesters are grounded in natural science, and offer a collection of five interdisciplinary courses that combine public policy, sociology, conflict resolution, and global awareness with hands-on experience. Students are in residence at the Smithsonian Conservation Biology Institute in Front Royal, Virginia, and are taught by Mason faculty, Smithsonian scientists and practitioners.

The minor is available only to students who enroll in either of the Smithsonian Mason Semesters, semester-long residential programs held at the Smithsonian Conservation Biology Institute in Front Royal, VA. The Semesters are offered jointly by the College of Humanities and Social Sciences and the College of Science under the auspices of the Smithsonian Mason School of Conservation. For policies governing all minors, see the Undergraduate Policies section of this catalog.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Minor Requirements

Students pursuing this minor must complete either of the options described below with a minimum grade of 2.00 in each course. Eight credits of course work must be unique to the minor.

Conservation, Biodiversity and Society option (16 credits)

Students complete five required courses.

- CONS 320 - Conservation in Practice Credits: 3
- CONS 401 - Conservation Theory Credits: 3
- CONS 402 - Applied Conservation Credits: 4
- CONS 410 - Human Dimensions in Conservation Credits: 3
- CONS 490 - RS: Integrated Conservation Strategies Credits: 3
Wildlife Ecology and Conservation option (16 credits)

Students complete five required courses.

- CONS 320 - Conservation in Practice Credits: 3
- CONS 403 - Ecology and Conservation Theory Credits: 3
- CONS 404 - Monitoring and Assessment of Biodiversity Credits: 4
- CONS 411 - Science Communication for Conservation Credits: 3
- CONS 491 - RS: Comprehensive Conservation Planning Credits: 3

Total: 16 credits

Environmental Policy Minor

Banner Code: EVP

College: College of Science
Department: Environmental Science and Policy

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Minor Requirements

Students must successfully complete 21 credits with a minimum 2.00 GPA, of which at least 8 credits must be exclusive to the minor and not count toward the student's major. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Core Courses (12 credits)

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 377 - Applied Ecology Credits: 3 or BIOL 377 - Applied Ecology Credits: 3
- PHIL 343 - Topics in Environmental Philosophy Credits: 3 (environmental ethics topic only)

Additional Courses (9 credits)

Choose from the following list, other appropriate courses may be approved by the coordinator of the minor:

- EVPP 318 - Conservation Biology Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- EVPP 338 - Economics of Environmental Policy Credits: 3
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 421 - Marine Conservation Credits: 3
- EVPP 440 - Field Environmental Science Credits: 0-4 (relevant topics only)
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 0-4 (relevant topics only)
- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4 (relevant topics only)
- EVPP 543 - Tropical Ecosystems Credits: 4
• ANTH 370 - Environment and Culture Credits: 3
• ANTH 399 - Issues in Anthropology Credits: 3
• GEOL 420 - Earth Science and Policy Credits: 3
• PRLS 300 - People with Nature Credits: 3
• PRLS 402 - Human Behavior in Natural Environments Credits: 3
• PRLS 526 - Environmental Education and Resource Interpretation Credits: 3
• SOCI 320 - Social Structure and Globalization Credits: 3
• SOCI 332 - The Urban World Credits: 3
• TOUR 312 - Ecotourism Credits: 3
• TOUR 340 - Sustainable Tourism Credits: 3
• TOUR 362 - Cultural and Environmental Interpretation Credits: 3
• TOUR 540 - Sustainable Tourism Management Credits: 3

Minor Total: 21 credits

Environmental Science Minor

Banner Code: EVSC

College: College of Science
Department: Environmental Science and Policy The Environmental Science Minor aids the development of an increased awareness of the major environmental issues effecting the natural world and society. The minor is intended to compliment a major in natural science but could also be taken by non-science majors.

This minor cannot be taken in conjunction with the Earth Science, BS (concentration in environmental geoscience), the Global and Environmental Change, BS, or the Environmental Science, BS.

At least eight credits of courses taken for the minor must be exclusive to the minor and not count toward the student's major. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

EVPP or BIOL Sequence (8-12 credits)

Choose one sequence, either

• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
• EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4
  or
• BIOL 103 - Introductory Biology I Credits: 4
• BIOL 104 - Introductory Biology II Credits: 4
• GEOL 101 - Introductory Geology I Credits: 4

Applied Ecology Course (3 credits)

• EVPP 377 - Applied Ecology Credits: 3 or BIOL 377 - Applied Ecology Credits: 3
Electives (8 credits)

Students must complete a minimum of 8 credits of EVPP electives, of which 4 credits must be upper level courses.

Minor Total: 19-23 credits

Sustainability Studies Minor

Banner Code: SSTS

College: College of Science and College of Humanities and Social Sciences
Department: Environmental Science and Policy and New Century College

The core principle of sustainability is the desire to meet the basic material needs of the current generation without compromising the ability of future generations to meet their needs. In order to achieve this goal, we must recognize and address the conflicts and trade-offs involved in balancing environmental integrity, social equity, and economic stability. Such complex work necessarily involves contributions from a wide range of disciplines, and it also requires a re-examination of the relationship between human value systems and cultural practices and the associated long-term implications for the ecosystem.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Minor Requirements

Candidates for the minor in sustainability studies must complete 16 credits, eight of which must be unique to the minor, with a minimum GPA of 2.00, distributed as follows:

Core Courses (8 credits)

- EVPP 480 - Sustainability in Action Credits: 4
- INTS 210 - Sustainable World Credits: 4

Electives (8 credits)

A maximum of two courses from a single department or program can be counted for elective credit. Preapproved courses are listed here and others may be substituted. See the program coordinator for additional information.

Choose 8 credits from the following:

- ANTH 370 - Environment and Culture Credits: 3
- AVT 385 - EcoArt Credits: 3
- BIOL 379 - RS: Ecological Sustainability Credits: 4
- CEIE 355 - Environmental Engineering and Science Credits: 3
- CEIE 401 - Sustainable Land Development Credits: 3
- CEIE 450 - Environmental Engineering Systems Credits: 3
- CHEM 155 - Introduction to Environmental Chemistry 1 Credits: 4
• CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
• CONS 401 - Conservation Theory Credits: 3
• CONS 404 - Monitoring and Assessment of Biodiversity Credits: 4
• CONS 410 - Human Dimensions in Conservation Credits: 3
• CONS 411 - Science Communication for Conservation Credits: 3
• ECON 105 - Environmental Economics for the Citizen Credits: 3
• ECON 335 - Environmental Economics Credits: 3
• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
• EVPP 201 - Environment and You: Issues for the Twenty-First Century Credits: 3
• EVPP 322 - Business and Sustainability Credits: 3
• EVPP 336 - Human Dimensions of the Environment Credits: 3
• EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
• EVPP 355 - Ecological Engineering and Ecosystem Restoration Credits: 4
• EVPP 361 - Introduction to Environmental Policy Credits: 3
• EVPP 362 - Intermediate Environmental Policy Credits: 3
• EVPP 378 - RS: Ecological Sustainability Credits: 4
• EVPP 421 - Marine Conservation Credits: 3
• GEOL 305 - Environmental Geology Credits: 3
• GGS 102 - Physical Geography Credits: 3
• GGS 103 - Human Geography Credits: 3
• GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
• GGS 122 - Dynamic Geosphere and Ecosphere Credits: 4
• GGS 302 - Global Environmental Hazards Credits: 3
• GGS 303 - Geography of Resource Conservation Credits: 3
• GGS 304 - Population Geography Credits: 3
• GGS 307 - Sustainable Development Credits: 3
• GGS 312 - Physical Climatology Credits: 3 or CLIM 312 - Physical Climatology Credits: 3
• GGS 314 - Severe and Extreme Weather Credits: 3 or CLIM 314 - Severe and Extreme Weather Credits: 3
• GGS 319 - Air Pollution Credits: 3 or CLIM 319 - Air Pollution Credits: 3
• GGS 455 - Environmental Impact Assessment Credits: 3
• INTS 102 - Global Networks and Communities Credits: 6
• INTS 211 - Introduction to Conservation Studies Credits: 3-6
• INTS 311 - The Mysteries of Migration: Consequences for Conservation Credits: 6
• INTS 318 - Exploring Virginia's Watersheds Credits: 4
• INTS 334 - Environmental Justice Credits: 4
• INTS 338 - Animal Rights and Humane Education Credits: 3
• INTS 401 - Conservation Biology Credits: 6
• INTS 402 - Plants and People - Sustenance, Ceremony, and Sustainability Credits: 6
• PHIL 343 - Topics in Environmental Philosophy Credits: 3
• PHYS 331 - Fundamentals of Renewable Energy Credits: 3
• PHYS 385 - Materials Science with Applications to Renewable Energy Credits: 3
• PRLS 250 - Wilderness Travel and Sustainability Credits: 2
• PRLS 300 - People with Nature Credits: 3
• PRLS 402 - Human Behavior in Natural Environments Credits: 3
• SOCI 320 - Social Structure and Globalization Credits: 3
Minor Total: 16 credits

Sustainable Enterprise Minor

Banner Code: SSTE

College: College of Science
Department: Environmental Science and Policy Sustainable enterprises are businesses that are financially prosperous and seek to benefit the environment and society. They measure success in terms of a "triple bottom line" that focuses on 3 P's:

- Prosperity - Business profitability/value
- Planet - Ecological integrity
- People - Social equity

Sustainable enterprises balance all 3 P's simultaneously, and view solutions to environmental and social problems as investments and business opportunities. Developing sustainable business strategies therefore requires innovation and the identification of solutions that frequently "leapfrog" existing products, technologies, and best management practices.

The minor emphasizes the private sector as a critical player in helping solve pressing environmental and social problems, while capitalizing on market mechanisms and competitive opportunities. Students who obtain the Sustainable Enterprise Minor will obtain a business understanding of sustainability innovation, ethical foundations, and regulatory framework to pursue private sector triple bottom line strategies.

Eight credits of coursework must be unique to the minor and not counted toward the student's major. For policies governing all minors, see the Undergraduate Policies section of this catalog.

This has been designated a Green Leaf program. For further information, please visit Green Leaf Programs and Courses.

Minor Requirements

Students must successfully complete the following courses with a minimum GPA of 2.00:

Core Courses (7 credits)

- EVPP 322 - Business and Sustainability Credits: 3
- EVPP 480 - Sustainability in Action Credits: 4

Elective Courses (9-10 credits)

Environmental Policy and Economics

Choose at least 3 credits from:

- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 362 - Intermediate Environmental Policy Credits: 3
- EVPP 432 - Energy Policy Credits: 3
• EVPP 490 - Special Topics in Environmental Science and Policy Credits: 0-4 (if the topic is applicable- consult an advisor for guidance)
• ECON 335 - Environmental Economics Credits: 3

Business and Innovation

School of Business students should consult with their advisors regarding MBUS coursework.

Choose at least 3-4 credits from:

• CHSS 310 - Introduction to Entrepreneurship Credits: 1
• MBUS 300 - Accounting in a Global Economy Credits: 3
• MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
• MBUS 305 - Introduction to International Business Credits: 3
• MBUS 306 - Managing Projects and Operations Credits: 3
• PSYC 335 - Psychology of Creativity and Innovation Credits: 3

Social Responsibility and Ethics

Choose 3 credits from the following courses:

• PHIL 305 - Business Ethics Credits: 3
• PHIL 343 - Topics in Environmental Philosophy Credits: 3 (if the topic is applicable- consult an advisor for guidance)

Internship (1-3 credits)

The plan of work for this internship must be approved by the director of the minor.

Students who are currently employed may request that the internship requirement be waived on the basis of their job experience. Instead of the internship, these students will be required to complete a 3-credit independent study with the minor's director or another faculty member. This alternative will entail independent research by applying sustainable enterprise principles and practices in an analysis of the student's work place, and will culminate in a final project.

• EVPP 395 - Undergraduate Research in Environmental Science and Policy Credits: 1-3 or EVPP 494 - Internship Credits: 1-3

Minor Total: 17-20 credits

Forensic Science Program

Phone: 703-993-5071
Web: forensicscience.gmu.edu

Faculty

Director: O'Toole

Assistant professors: DiZinno, Knight, Pettigrew, Rancourt, Rule
Adjunct faculty: Christensen, Dyn, Echenrode, Hankinson, Mullins, O'Neal, Rodway

The Forensic Science Program is an interdisciplinary academic program with its own dedicated teaching faculty. The program is administered by the forensic science program director, and is governed by the Forensic Science Program committee.

Courses

The program offers all courses designated FRSC in the Courses section of this catalog.

Undergraduate Degree Programs

The Forensic Science Program administers the Forensic Science Minor and the Forensic Science, BS.

Graduate Degree Programs

The Forensic Science Program administers the Forensics Graduate Certificate and the Forensic Science, MS.

Bachelor of Science

Forensic Science, BS

Banner Code: SC-BS-FRSC

College: College of Science
Department: Forensic Science Program

Students planning professional careers in the field of forensic science should choose this degree.

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. In addition, students majoring in forensic science must complete the following courses with a minimum GPA of 2.30. No more than two courses with a grade of 'D' (1.00) may be applied to the major.

FRSC 302 and FRSC 304 will satisfy this major's writing-intensive requirement.

Degree Requirements

Forensic Science Core Courses (21 credits)

- FRSC 200 - Survey of Forensic Science Credits: 3
- FRSC 201 - Introduction to Criminalistics Credits: 3
- FRSC 302 - Forensic Trace Analysis Credits: 3
- FRSC 303 - Forensic Evidence and Ethics Credits: 3
- FRSC 304 - Forensic Chemistry Credits: 3
- FRSC 405 - Independent Studies / Research Credits: 3
- CRIM 100 - Introduction to Criminal Justice Credits: 3 (Mason Core: Social and Behavioral Science course)
Natural Science Core Courses (45-46 credits)

- BIOL 213 - Cell Structure and Function Credits: 4 (Mason Core: Natural Science course)
- BIOL 214 - Biostatistics for Biology Majors Credits: 4 or STAT 250 - Introductory Statistics I Credits: 3 (Mason Core: Quantitative Reasoning course)
- BIOL 430 - Advanced Human Anatomy and Physiology I Credits: 4
- BIOL 431 - Advanced Human Anatomy and Physiology II Credits: 4
- CHEM 211 - General Chemistry I Credits: 3 (Mason Core: Natural Science course) and CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 (Mason Core: Natural Science course) and CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- PHYS 243 - College Physics Credits: 3 (Mason Core: Natural Science course)
- PHYS 244 - College Physics Lab Credits: 1 (Mason Core: Natural Science course)
- PHYS 245 - College Physics Credits: 3 (Mason Core: Natural Science course)
- PHYS 246 - College Physics Lab Credits: 1 (Mason Core: Natural Science course)

Additional Courses (8 credits)

Select courses from:

- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 311 - General Genetics Credits: 4
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 422 - Instrumental Analysis Credits: 3
- CHEM 423 - Instrumental Analysis Laboratory Credits: 2
- CHEM 463 - General Biochemistry I Credits: 4

Mason Core and Electives (45-46 credits)

In order to meet a minimum of 120 credits, this degree requires an additional 45-46 credits, which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)
• Mason Core UWC - Written Communication Credits: 6
• Mason Core UOC - Oral Communication Credits: 3
• Mason Core UQR - Quantitative Reasoning Credits: 3
• Mason Core UITC - Information Technology Credits: 3

Core Requirements (22 credits)

• Mason Core UFA - Arts Credits: 3
• Mason Core UGU - Global Understanding Credits: 3
• Mason Core ULIT - Literature Credits: 3
• Mason Core UNSL - Natural Science Credits: 7
• Mason Core USBS - Social and Behavioral Sciences Credits: 3
• Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

• Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits

Graduate Certificate

Forensics Graduate Certificate

Banner Code: SC-CERG-FORS
College: College of Science
Department: Forensic Science Program

This interdisciplinary graduate certificate program is designed for students seeking training in forensic science, as well as for current professionals employed by the federal government, local law enforcement, and private security corporations. Forensics refers to the application of scientific methodologies to the analysis of crime scenes, the collection of evidence, and the laboratory analysis of that evidence in support of criminal investigations. Related legal aspects are also considered as part of a comprehensive approach to forensics.

At the time of completion, depending on the concentration, students will be able to understand the basic principles of forensics and perform a general crime scene analysis. Available concentrations include: Crime Scene, Forensic Science, and General Forensics; curriculum requirements for each concentration are listed below.

This certificate may be pursued on a part-time or full-time basis.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure information page at http://irr.gmu.edu/gedt/Forensics/Gedt.html.

Admission Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Applicants to the general forensics concentration should hold a BA or BS degree from a regionally accredited university with a minimum GPA of 3.00.

To apply, prospective students should submit a completed George Mason Graduate Application, two copies of official transcripts from all institutions attended, and a current résumé. TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from a regionally accredited institution within the US (some exceptions apply).

Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by the College of Science because this certificate program will charge students at a differential (premium) tuition rate. However, students enrolled in academic programs outside of the College of Science may enroll in this certificate program concurrently.

Certificate Requirements

Forensic Core Courses (6 credits)

- FRSC 500 - Introduction to Forensic Science Credits: 3
- FRSC 510 - Basic Crime Analysis Credits: 3

Concentrations (12 credits)

Choose one concentration from the following:

▲ Concentration in Crime Scene (CSCN)

Coursework for this concentration must be completed as follows:

Required Courses

- FRSC 511 - Advanced Crime Scene Analysis Credits: 3
- FRSC 512 - Physical Evidence Analysis Credits: 3
- FRSC 513 - Forensic Photography Credits: 3
- FRSC 530 - Law and Forensic Science Credits: 3

▲ Concentration in Forensic Science (FRSC)

Students enrolled in this concentration obtain the specific scientific skills necessary for laboratory employment in the field. Coursework must be completed as follows:

Required Courses

- FRSC 520 - Toxicology Credits: 3
- FRSC 540 - Forensic Chemistry Credits: 3
- FRSC 560 - Forensic DNA Sciences Credits: 3
- FRSC 690 - Forensics Capstone Course Credits: 3
▲ Concentration in General Forensics (FRSG)

Students enrolled in this concentration obtain a more general background in the field with a focus on criminal law and anthropology. Coursework must be completed as follows:

Required Courses

- FRSC 530 - Law and Forensic Science Credits: 3
- FRSC 550 - Issues in Forensic Anthropology Credits: 3
- FRSC 570 - Introduction to Biochemical Forensics Credits: 3
- FRSC 690 - Forensics Capstone Course Credits: 3

Certificate Total: 18 credits

Master of Science

Forensic Science, MS

Banner Code: SC-MS-FRSC

College: College of Science
Department: Forensic Science Program The interdisciplinary master's program is designed to train students in the technical and legal aspects of the field, and it is especially relevant for the many area professionals holding positions in government and private laboratories specializing in the analytical investigation of criminal and terrorist activities. Graduates will be qualified to work in high-technology forensics laboratories that analyze and interpret a wide variety of evidence and data in support of investigations and prosecutions. The demand for graduates with these skills is especially strong in the Northern Virginia region, where several new FBI and police forensics labs are being built or expanded.

Available concentrations include:

Crime Scene Investigation
Forensic Biology Analysis
Forensic Chemistry Analysis
Forensic/Biometric Identity Analysis

Students enrolled in this professional MS program are charged at a differential (premium) tuition rate, and therefore they may not enroll concurrently in any other graduate degree program or certificate program offered by the College of Science, with the exception of the Forensics Graduate Certificate.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Applicants should submit a completed Mason Graduate Application, three letters of recommendation, two copies of official transcripts from each institution of higher learning attended, a current resume, a Virginia Domicile Classification form, and an official report of TOEFL scores (foreign nationals only). Additionally:
Forensic Biology Analysis and Forensic Chemistry Analysis Concentrations: A bachelor of science degree in a forensic or natural science, computer science, computer electronic or electrical engineering, information systems, or information technology (or its equivalent coursework in a relevant field).

Forensic/Biometric Identity Analysis Concentration: A bachelor of science or bachelor of arts degree in a forensic or natural science, computer science, computer electronic or electrical engineering, information systems or information technology (or its equivalent coursework in a relevant field).

Crime Scene Investigation Concentration: A bachelor of science or bachelor of arts degree in a related field.

Degree Requirements

Students must declare their intended concentration upon application. In the event that a student wishes to change their concentration, students may request to change their concentration by submitting a letter to the Forensic Science Program Director detailing the request and justification. These requests will be considered on a case-by-case basis and only when the appropriate admissions requirements are met. However, if a student chooses to change concentrations, course substitutions/waivers will not be accepted.

▲ Concentration in Crime Scene Investigation (CSIN)

This concentration educates students for a career as a crime scene investigator.

Core Courses (29 credits)

- FRSC 500 - Introduction to Forensic Science Credits: 3
- FRSC 510 - Basic Crime Analysis Credits: 3
- FRSC 511 - Advanced Crime Scene Analysis Credits: 3
- FRSC 513 - Forensic Photography Credits: 3
- FRSC 530 - Law and Forensic Science Credits: 3
- FRSC 570 - Introduction to Biochemical Forensics Credits: 3
- FRSC 590 - Medicolegal Death Investigation and Pathology Credits: 3
- FRSC 600 - Forensics Seminar Credits: 1
- FRSC 610 - Forensics Research Project Credits: 1-4 (4 credits required)
- FRSC 690 - Forensics Capstone Course Credits: 3

Elective Courses (7 credits)

Choose 7 credits from the following courses:

- FRSC 512 - Physical Evidence Analysis Credits: 3
- FRSC 515 - Selected Topics in Forensic Science Credits: 3
- FRSC 517 - Questioned Document Examination Credits: 3
- FRSC 520 - Toxicology Credits: 3
- FRSC 540 - Forensic Chemistry Credits: 3 and FRSC 541 - Forensic Chemistry Laboratory Credits: 1
- FRSC 550 - Issues in Forensic Anthropology Credits: 3
- FRSC 560 - Forensic DNA Sciences Credits: 3 and FRSC 561 - Forensic DNA Laboratory Credits: 1
- FRSC 580 - Image Analysis in Forensic Science Credits: 3
- FRSC 600 - Forensics Seminar Credits: 1
- FRSC 620 - Face and Biometric Pattern Analysis Credits: 3
• FRSC 630 - Fingerprint Identification Credits: 3
• FRSC 640 - Legal, Privacy and Ethical Issues in Identity Analysis Credits: 3
• FRSC 650 - Identity Analysis Applications Credits: 1
• FRSC 790 - Internship in Forensic Science Credits: 1-3

▲ Concentration in Forensic Biology Analysis (FRSB)

This concentration educates students for a career as a forensic biology laboratory analyst.

Core Courses (27 credits)

• FRSC 500 - Introduction to Forensic Science Credits: 3
• FRSC 510 - Basic Crime Analysis Credits: 3
• FRSC 512 - Physical Evidence Analysis Credits: 3
• FRSC 530 - Law and Forensic Science Credits: 3
• FRSC 540 - Forensic Chemistry Credits: 3
• FRSC 560 - Forensic DNA Sciences Credits: 3 and FRSC 561 - Forensic DNA Laboratory Credits: 1
• FRSC 570 - Introduction to Biochemical Forensics Credits: 3
• FRSC 600 - Forensics Seminar Credits: 1
• FRSC 610 - Forensics Research Project Credits: 1-4 (4 credits required)

Elective Courses (9 credits)

Choose 9 credits from the following courses:

• FRSC 511 - Advanced Crime Scene Analysis Credits: 3
• FRSC 515 - Selected Topics in Forensic Science Credits: 3
• FRSC 517 - Questioned Document Examination Credits: 3
• FRSC 550 - Issues in Forensic Anthropology Credits: 3
• FRSC 580 - Image Analysis in Forensic Science Credits: 3
• FRSC 590 - Medicolegal Death Investigation and Pathology Credits: 3
• FRSC 600 - Forensics Seminar Credits: 1
• FRSC 620 - Face and Biometric Pattern Analysis Credits: 3
• FRSC 630 - Fingerprint Identification Credits: 3
• FRSC 640 - Legal, Privacy and Ethical Issues in Identity Analysis Credits: 3
• FRSC 650 - Identity Analysis Applications Credits: 1
• FRSC 690 - Forensics Capstone Course Credits: 3
• FRSC 790 - Internship in Forensic Science Credits: 1-3
• BIOL 574 - Population Genetics Credits: 4
• CHEM 563 - General Biochemistry I Credits: 4

▲ Concentration in Forensic Chemistry Analysis (FRCA)

This concentration educates students for a career as a forensic chemistry laboratory analyst.

Core Courses (30 credits)
• FRSC 500 - Introduction to Forensic Science Credits: 3
• FRSC 510 - Basic Crime Analysis Credits: 3
• FRSC 512 - Physical Evidence Analysis Credits: 3
• FRSC 520 - Toxicology Credits: 3
• FRSC 530 - Law and Forensic Science Credits: 3
• FRSC 540 - Forensic Chemistry Credits: 3 and FRSC 541 - Forensic Chemistry Laboratory Credits: 1
• FRSC 560 - Forensic DNA Sciences Credits: 3
• FRSC 570 - Introduction to Biochemical Forensics Credits: 3
• FRSC 600 - Forensics Seminar Credits: 1
• FRSC 610 - Forensics Research Project Credits: 1-4 (4 credits required)

**Elective Courses (6 credits)**

Choose 6 credits from the following courses:

• FRSC 511 - Advanced Crime Scene Analysis Credits: 3
• FRSC 515 - Selected Topics in Forensic Science Credits: 3
• FRSC 517 - Questioned Document Examination Credits: 3
• FRSC 550 - Issues in Forensic Anthropology Credits: 3
• FRSC 580 - Image Analysis in Forensic Science Credits: 3
• FRSC 590 - Medicolegal Death Investigation and Pathology Credits: 3
• FRSC 600 - Forensics Seminar Credits: 1
• FRSC 620 - Face and Biometric Pattern Analysis Credits: 3
• FRSC 630 - Fingerprint Identification Credits: 3
• FRSC 640 - Legal, Privacy and Ethical Issues in Identity Analysis Credits: 3
• FRSC 650 - Identity Analysis Applications Credits: 1
• FRSC 690 - Forensics Capstone Course Credits: 3
• FRSC 790 - Internship in Forensic Science Credits: 1-3
• CHEM 563 - General Biochemistry I Credits: 4
• CHEM 564 - General Biochemistry II Credits: 3
• CHEM 624 - Principles of Chemical Separation Credits: 3

▲ **Concentration in Forensic/Biometric Identity Analysis (FRBI)**

This concentration educates students for a career as an identity intelligence analyst.

**Core Courses (33 credits)**

• FRSC 500 - Introduction to Forensic Science Credits: 3
• FRSC 510 - Basic Crime Analysis Credits: 3
• FRSC 530 - Law and Forensic Science Credits: 3
• FRSC 560 - Forensic DNA Sciences Credits: 3
• FRSC 600 - Forensics Seminar Credits: 1
• FRSC 610 - Forensics Research Project Credits: 1-4 (4 credits required)
• FRSC 620 - Face and Biometric Pattern Analysis Credits: 3
• FRSC 630 - Fingerprint Identification Credits: 3
• FRSC 640 - Legal, Privacy and Ethical Issues in Identity Analysis Credits: 3
- FRSC 650 - Identity Analysis Applications Credits: 1
- AIT 675 - Overview of the National Intelligence Community Credits: 3
- AIT 678 - National Security Challenges Credits: 3

**Elective Courses (3 credits)**

Choose 3 credits from the following courses:

- FRSC 511 - Advanced Crime Scene Analysis Credits: 3
- FRSC 512 - Physical Evidence Analysis Credits: 3
- FRSC 513 - Forensic Photography Credits: 3
- FRSC 515 - Selected Topics in Forensic Science Credits: 3
- FRSC 517 - Questioned Document Examination Credits: 3
- FRSC 550 - Issues in Forensic Anthropology Credits: 3
- FRSC 570 - Introduction to Biochemical Forensics Credits: 3
- FRSC 590 - Medicolegal Death Investigation and Pathology Credits: 3
- FRSC 690 - Forensics Capstone Course Credits: 3
- FRSC 790 - Internship in Forensic Science Credits: 1-3

**Degree Total: 36 credits**

### Non-Degree

#### Forensic Science Minor

**Banner Code:** FRSC

**College:** College of Science  
**Department:** Forensic Science Program  
This minor is offered by the Forensic Science Program in the College of Science.

This minor addresses the growing national and regional interest in forensics by introducing students to the technical, psychological, and legal aspects of the field. The minor provides an attractive option for students with majors in the natural sciences, engineering, or computer science, and the curriculum structure makes it particularly suitable for students with majors in biology and chemistry. At least 8 credits must be applied only to this minor and may not be used to fulfill requirements of the student's major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at George Mason University and achieve a minimum GPA of 2.00 in courses applied to the minor.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

#### Minor Requirements

**Foundation Science Courses (8 credits)**

Choose two courses or course/lab pairings from the following:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3 and BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- CHEM 211 - General Chemistry 1 Credits: 3 and CHEM 213 - General Chemistry Laboratory I Credits: 1
CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1

PHYS 160 - University Physics I Credits: 3 and PHYS 161 - University Physics I Laboratory Credits: 1

PHYS 243 - College Physics Credits: 3 and PHYS 244 - College Physics Lab Credits: 1

PHYS 245 - College Physics I Credits: 3 and PHYS 246 - College Physics Lab Credits: 1

PHYS 260 - University Physics II Credits: 3 and PHYS 261 - University Physics II Laboratory Credits: 1

Forensic Science Courses (9 credits)

- FRSC 200 - Survey of Forensic Science Credits: 3
- FRSC 201 - Introduction to Criminalistics Credits: 3
- FRSC 302 - Forensic Trace Analysis Credits: 3

Supporting Courses (3 credits)

Choose one course from the following:

- FRSC 303 - Forensic Evidence and Ethics Credits: 3
- FRSC 304 - Forensic Chemistry Credits: 3
- CRIM 400 - Applied Criminal Psychology Credits: 3
- PSYC 231 - Social Psychology Credits: 3

Minor Total: 20 credits

Geography and Geoinformation Science

Phone: 703-993-1210 or 703-993-1212
Web: ggs.gmu.edu

Faculty

Professors: Agouris (dean), Di, Haack, Houser, Qu, Stefanidis (chair), Taylor, Wong, C. Yang

Associate professors: Croitoru, Curtin, Fuhrmann, Leslie (associate chair), Pfoser, Rice, D. Sun, R. Yang

Assistant professors: Delamater, Züfle

Research or contract professors: Batarseh, Feng, Li, M. Sun

Term instructors: Boudinot, Kozar

Adjunct faculty: Dillon, Grymes, Komwa, McGlone, Owen, Resmini, Self, Ward

Courses

This department offers all courses designated GGS in the Courses section of this catalog.

Undergraduate Programs
The Department of Geography and Geoinformation Science offers a Geography, BA and Geography, BS. Majors in both programs complete coursework in systematic and regional geography. Students in the BA choose a minor or a second major to complete their degree while BS students take additional courses to increase their technical and quantitative proficiency.

Minors

For students pursuing any major in the university, the department offers a Geography Minor (fully available online) as well as a Geographic Information Systems Minor.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in geography fulfill this requirement by successfully completing GGS 415.

Graduate Degrees

Graduate programs are distinguished by an emphasis on cutting-edge research and their applications toward solving practical problems in human and environmental realms. Degree options include three master's degrees and one doctoral program. The Earth Systems Science, MS (GGS) (offered jointly with the Department of Atmospheric, Oceanic and Earth Sciences) provides a global systems approach to the study of the atmosphere, hydrosphere and lithosphere. The degree emphasis is on the observation and quantitative analysis of earth systems. The Geographic and Cartographic Sciences, MS focuses on techniques to compile, display and analyze spatial data. The Geoinformatics and Geospatial Intelligence, MS focuses primarily on computational approaches that support the synthesis and analysis of diverse data types in order to identify and monitor complex events and phenomena that manifest themselves over space and time.

The Earth Systems and Geoinformation Sciences, PhD combines and extends the three scientific avenues mapped by our master's programs to provide a thorough and interdisciplinary approach to doctoral studies.

Graduate Certificates

For students wishing to pursue graduate-level specialization and skill advancement in specific, focused application areas the department offers the following graduate level certificates: Geographic Information Science Graduate Certificate, Geospatial Intelligence Graduate Certificate, and Remote Sensing and Image Processing Graduate Certificate. Students may take these as stand-alone certificates or, under certain circumstances, pursue them concurrently with another graduate degree program. Certificate coursework may be applicable towards other graduate degree requirements. In order to follow a graduate certificate program, students must hold a bachelor's degree from a regionally accredited institution and must apply for and be admitted into the corresponding program.

Non-degree Status

Applicants who have not been admitted to a specific graduate degree or certificate program and still wish to attend courses may apply for non-degree studies. This is intended for students who do not seek a specific degree. These students must apply for non-degree status and be admitted through a process comparable to the one followed by degree-seeking students.

While it may be possible to transfer some of the credits earned in non-degree status to a degree program, such transfers are not automatic. Non-degree students who intend to transfer their credits to a degree programs should discuss this in a timely manner with the appropriate department coordinator. Further information can be found on the College of Science's graduate policies section of this catalog.

Distance Education
While all courses and programs listed are offered in traditional face-to-face on campus teaching, the department offers select programs through fully online modules. These online programs include an online version of our Geography Minor and an online version of the Geospatial Intelligence Graduate Certificate. Individual courses which are currently available online (in addition to their traditional delivery modes) are: GGS 101, GGS 102, GGS 103, GGS 121, GGS 311, GGS 312, GGS 320, GGS 380, GGS 553, GGS 680, and GGS 692.

**Bachelor of Arts**

**Geography, BA**

**Banner Code:** SC-BA-GEOG

**College:** College of Science  
**Department:** Geography and Geoinformation Science

The Geography, BA is designed to offer students the opportunity to study the integrated social and environmental processes that continuously shape and reshape the world we live in. This major provides students with broad training across the core subdisciplines of geography (human, physical, and GIScience), while also offering the requisite flexibility for those students seeking a multidisciplinary educational experience. Students will find numerous opportunities for employment in both the private and public sectors, as well as in academia, as geographers are well suited to address important local, regional, and global challenges in today’s world, given their interdisciplinary approach and uniquely spatial perspective.

The Department of Geography and Geoinformation Science fosters a supportive, active learning environment in which students are encouraged to work closely with both faculty and peers. The curriculum in this major provides students with the synthesis skills and broad base of knowledge that prepares them to be successful in an ever-evolving job market. For students who wish to pursue their interest in geography with a more technical curriculum, the department also offers a Geography, BS.

The Geography, BA consists of three required components: (1) core courses; (2) systematic and regional courses; (3) GGS elective courses; and (4) an approved double major, disciplinary minor, interdisciplinary minor, or certificate.

Students must fulfill all Requirements for Bachelor’s Degrees, including the Mason Core. Additionally, students in the Geography, BA must complete the College Requirements for the BA Degree (outlined below).

GGS 415 meets the writing intensive requirement for this major.

**Degree Requirements**

Candidates for a degree in geography must complete the approved GGS geography courses with a minimum GPA of 2.00.

**Core Courses (22-23 credits)**

Select one of the following three courses:

- GGS 102 - Physical Geography Credits: 3 (Mason Core: Natural Science course)
- GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4 (Mason Core: Natural Science course)
- GGS 122 - Dynamic Geosphere and Ecosphere Credits: 4

**Core Courses (continued)**

Complete all of the following courses:
- GGS 103 - Human Geography Credits: 3
- GGS 110 - Introduction to Geoinformation Technologies Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GGS 310 - Introduction to Digital Cartography Credits: 4
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 415 - Seminar in Geography Credits: 3 (fulfills writing intensive requirement)

Systematic and Regional Geography (6 credits)

Students must take one regional course and one systematic course from the list below.

Systematic Courses

Choose one course from the following:

- GGS 301 - Political Geography Credits: 3
- GGS 302 - Global Environmental Hazards Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3 (Mason Core: Synthesis course)
- GGS 304 - Population Geography Credits: 3 (Mason Core: Synthesis course)
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GGS 309 - Meteorology and Climate Credits: 3
- GGS 312 - Physical Climatology Credits: 3
- GGS 314 - Severe and Extreme Weather Credits: 3
- GGS 319 - Air Pollution Credits: 3
- GGS 321 - Biogeography Credits: 3
- GGS 322 - Issues in Global Change Credits: 3
- GGS 357 - Structures in Urban Governance and Planning Credits: 3
- GGS 455 - Environmental Impact Assessment Credits: 3
- GGS 456 - Introduction to Atmospheric Radiation Credits: 3

Regional Courses

Choose one course from the following:

- GGS 315 - Geography of the United States Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 320 - Geography of Europe Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GGS 330 - Geography of the Soviet Succession States Credits: 3
- GGS 333 - Issues in Regional Geography Credits: 3
- GGS 380 - Geography of Virginia Credits: 3

GGS Electives (9-10 credits)

Two of the three courses selected must be upper-level GGS courses.
Additional Program (at least 15 credits)

- Students take 15 or more credits consisting of an established minor, second major, or other coherent package of courses approved by the advisor and the department chair.

Mason Core and Elective Credits (66-68 credits)

In order to meet a minimum of 120 credits, this degree requires an additional 66-68 credits, which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

College Requirements for the BA Degree

Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core.

Philosophy or Religious Studies (3 credits)

Choose any course in philosophy (PHIL) or religious studies (RELI), except for PHIL 323 and PHIL 324.

Social and Behavioral Sciences (3 credits)

Choose one approved Mason Core: Social and Behavioral Science course in addition to the Mason Core-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except HIST 100 or HIST 125), LING, PSYC, or SOCI, and the following GGS courses:

- GGS 101 - Major World Regions Credits: 3
- GGS 103 - Human Geography Credits: 3
- GGS 110 - Introduction to Geoinformation Technologies Credits: 3
- GGS 301 - Political Geography Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3
- GGS 304 - Population Geography Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 315 - Geography of the United States Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 320 - Geography of Europe Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GGS 330 - Geography of the Soviet Succession States Credits: 3
- GGS 357 - Structures in Urban Governance and Planning Credits: 3
- GGS 380 - Geography of Virginia Credits: 3

Natural Science (1 credit)
Choose one credit in addition to the Mason Core: Natural Science requirement for a total of 8 credits. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science courses that include a laboratory experience (except for BIOL 124 and BIOL 125).

Foreign Language (0-3 credits)

Intermediate-level proficiency in one foreign language is required. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher-level courses taught in the language), or by achieving a satisfactory score on an approved proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found via the college's Office of Academic and Student Affairs.

Non-western Culture (0-3 credits)

Choose one approved Non-Western Culture Requirement course in addition to the course used to fulfill the Mason Core: Global Understanding requirement. A course used to fulfill the Mason Core: Global Understanding requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major).

Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UUTC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3
Degree Total: Minimum 120 credits

Bachelor of Science

Geography, BS

Banner Code: SC-BS-GEOG

College: College of Science
Department: Geography and Geoinformation Science

The Geography, BS is designed to offer students the opportunity to study the integrated social and environmental processes that continuously shape and reshape the world we live in. This major provides students with broad training across the core subdisciplines of geography (human, physical, and GIScience), emphasizing application and technique-driven coursework, in addition to a rigorous science and mathematics curriculum. Students will find numerous opportunities for employment in both the private and public sectors, as well as in academia, as geographers are well suited to address important local, regional, and global challenges in today's world, given their interdisciplinary approach and uniquely spatial perspective.

The Department of Geography and Geoinformation Science fosters a supportive, active learning environment in which students are encouraged to work closely with both faculty and peers. The curriculum in this major provides students with the analytical, technical, and practical training that prepares them to be successful in an ever-evolving job market. For students who wish to pursue their interest in geography via a more flexible degree program, the department also offers a Geography, BA.

The Geography, BS consists of three components: (1) core courses; (2) technique, systematic, regional, and elective courses; and (3) mathematics, computer programming, and statistics courses.

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core.

GGS 415 meets the writing intensive requirement for this major.

Degree Requirements

Geography (49-50 credits)

Candidates for the Geography, BS degree must complete the following Core, Breadth and Experience, and Geography Elective courses with a minimum GPA of 2.00:

Core Courses (22-23 credits)

- GGS 102 - Physical Geography Credits: 3 or GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4 (Mason Core: Natural Science courses)
- GGS 103 - Human Geography Credits: 3
- GGS 110 - Introduction to Geoinformation Technologies Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GGS 310 - Introduction to Digital Cartography Credits: 4
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 415 - Seminar in Geography Credits: 3 (fulfills writing intensive requirement)

Breadth and Experience Courses (18 credits)
Advanced Technique Courses

- GGS 412 - Air Photography Interpretation Credits: 3

Advanced Technique (continued)

Choose three of the following courses:

- GGS 308 - Field Mapping Techniques Credits: 3
- GGS 354 - Data Analysis and Global Change Detection Techniques Credits: 3
- GGS 410 - Introduction to Hyperspectral Imaging Credits: 3
- GGS 411 - Advanced Digital Cartography Credits: 3
- GGS 416 - Satellite Image Analysis Credits: 3
- GGS 463 - Applied Geographic Information Systems Credits: 3
- GGS 470 - Special Topics in Geographic Techniques Credits: 3

Systematic Courses

Choose one from the following courses:

- GGS 301 - Political Geography Credits: 3
- GGS 302 - Global Environmental Hazards Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3
- GGS 304 - Population Geography Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GGS 309 - Meteorology and Climate Credits: 3
- GGS 312 - Physical Climatology Credits: 3
- GGS 314 - Severe and Extreme Weather Credits: 3
- GGS 319 - Air Pollution Credits: 3
- GGS 321 - Biogeography Credits: 3
- GGS 322 - Issues in Global Change Credits: 3
- GGS 357 - Structures in Urban Governance and Planning Credits: 3
- GGS 398 - Selected Topics in Global Change Credits: 3
- GGS 399 - Select Topics in GGS Credits: 3

Regional Courses

Choose one from the following courses:

- GGS 315 - Geography of the United States Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 320 - Geography of Europe Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GGS 330 - Geography of the Soviet Succession States Credits: 3
- GGS 333 - Issues in Regional Geography Credits: 3
- GGS 380 - Geography of Virginia Credits: 3
Geography Elective Courses (9 credits)

- 3 credits of undergraduate-level GGS courses
- 6 credits of 300 or 400-level GGS courses

Outside Requirements (11-12 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4 or IT 207 - Applied IT Programming Credits: 3 or STAT 250 - Introductory Statistics I Credits: 3 (Mason Core: Quantitative Reasoning course)
- CS 112 - Introduction to Computer Programming Credits: 4 (Mason Core: Information Technology course)

Mason Core and Elective Credits (58-60 credits)

In order to meet a minimum of 120 credits, this degree requires an additional 58-60 credits, which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits
Doctor of Philosophy

Earth Systems and Geoinformation Sciences, PhD

Banner Code: SC-PHD-ESGS

College: College of Science
Department: Geography and Geoinformation Science The Earth Systems and Geoinformation Sciences, PhD (ESGS) is based on the integration of the scientific disciplines in geosystems, geography, geosciences, and geoinformatics. Students receive broad-based training in systematic geosciences and geography, as well as technical courses in computation and geoinformation sciences. The ESGS doctoral program represents a gateway to an academic career for some students; for others, it facilitates career advancement in the public sector or private industry. Graduates are equipped to participate in interdisciplinary research, which is the norm in today's research arena.

Admission Requirements

This program is intended for graduates who hold a MS or MA degree in atmospheric science, climatology, meteorology, Earth science, geology, environmental science, remote sensing, hydrology, oceanography, geography, or a related field. Highly qualified students with a BS or BA in applicable fields are also encouraged to apply. Knowledge of mathematics through calculus is preferred. Interested applicants should contact the program degree coordinator or the GGS director of academic programs for more specific advice.

To apply, prospective students should complete the George Mason University Graduate Application. Official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement will be required.

Applicants will also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission to the doctoral program may be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required of all international applicants. GRE-GEN scores are required of students wishing to be considered for the Office of the Provost's Presidential Scholarship. A minimum combined math and verbal GRE score of 1200/1600 (old test) and 270/340 (new test) are needed to qualify for the Presidential Scholarship.

Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student affairs. See the Graduate Policies section for more information.

Secondary Program Options

Students enrolled in this doctoral program have the option of adding a secondary graduate certificate or master's program. Depending upon the secondary program chosen, many courses may be applicable to both programs. Before adding a secondary program, students are advised to carefully review the 'Requirements for Graduate Certificates' or the 'Requirements for Master's Degrees,' and the 'Requirements for Doctoral Degrees' in the AP.6 Graduate Policies section of this catalog. Faculty advisors should be contacted for further guidance and for secondary program suggestions.

Degree Requirements
Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

**Doctoral Coursework (48-60 credits)**

**Core Courses (24 credits)**

Students are required to take 24 credits of courses selected from the six core areas below. Of the cores, students must complete at least one course in five of the cores and two courses in at least three of those five cores.

**Quantitative Core**

- GGS 560 - Quantitative Methods Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- GGS 791 - Advanced Spatial Statistics Credits: 3

**Geoinformatics Core**

- GGS 650 - Introduction to GIS Algorithms and Programming Credits: 3
- GGS 664 - Spatial Data Structures Credits: 3
- GGS 675 - Location Science Credits: 3
- GGS 692 - Web-based Geographic Information Systems Credits: 3
- GGS 787 - Scientific Data Mining for Geoinformatics Credits: 3

**Geosciences and Physical Geography Core**

- GGS 656 - The Hydrosphere Credits: 3
- GGS 657 - The Lithosphere Credits: 3
- GGS 670 - Introduction to Atmosphere and Weather Credits: 3
- GGS 721 - Biogeography Credits: 3
- PHYS 575 - Atmospheric Physics I Credits: 3

**Human Geography Core**

- GGS 505 - Transportation Geography Credits: 3
- GGS 533 - Issues in Regional Geography Credits: 1-6
- GGS 540 - Health Geography Credits: 3
- GGS 605 - Socioeconomic Applications of GIS Credits: 3
- GGS 704 - Spatial Demography Credits: 3

**Geographic Information Science Core**
- GGS 553 - Geographic Information System Credits: 3
- GGS 563 - Advanced Geographic Information Systems Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3

Remote Sensing Core

- GGS 579 - Remote Sensing Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 756 - Physical Principles of Remote Sensing Credits: 3
- GGS 760 - Advanced Topics in Remote Sensing Credits: 3
- GGS 777 - Remote Sensing Natural Hazards Credits: 3

Research Synthesis and Colloquium (5 credits)

Research Synthesis

Choose one of the following courses:

- GGS 684 - Selected Topics in Geospatial Intelligence Credits: 3
- GGS 689 - Seminar in Geographic Thought and Methodology Credits: 3
- GGS 795 - Seminar in Regional Analysis Credits: 3

Colloquium

Complete the colloquium course twice:

- GGS 900 - Geography and Geoinformation Science Colloquium Credits: 1

Electives (19-31 credits)

- Credits necessary to reach 72 total credits. At least half of the elective credits taken at Mason must be from GGS courses.

Dissertation Research (12-24 credits)

Students take 12-24 credits, with at least 6 credits in GGS 999. After reaching candidacy, students must stay continuously enrolled GGS 999 until defending their dissertation.

- GGS 998 - Dissertation Proposal Credits: 1-12
- GGS 999 - Dissertation Credits: 1-12

Dissertation Committee
All students will be assigned a temporary academic advisor when they first enroll in the program. No later than the end of the second year, each student should identify a dissertation advisor and form a doctoral committee. The committee will be chaired by a GGS tenure or tenure-track professor and be composed of at least 50% GGS faculty. All members of the committee must be Mason Graduate Faculty and approved by the department's director of academic programs.

Candidacy Examination

After completing all required courses, each student must take a candidacy exam administered by the dissertation committee. The exam will have written and oral components. Its purpose is to determine whether the student has acquired adequate general knowledge in the selected subject area, as well as much more detailed knowledge of the specific research topic planned for the dissertation.

Dissertation Proposal and Advancement to Candidacy

After students have completed all required courses and passed the candidacy exam, they should prepare an acceptable dissertation proposal. After the dissertation proposal is approved and the appropriate paperwork is completed, the student will be advanced to candidacy.

Doctoral Dissertation

The degree will be awarded on completion of the required coursework and approval of a PhD dissertation that makes an original and significant contribution to the field.

Degree Total: 72 credits

Graduate Certificate

Data Journalism Graduate Certificate

Banner Code: SC-CERG-DJNL

College: College of Science

Department: Department of Geography and Geoinformation Science

This certificate is designed for students and professionals wishing to advance their knowledge and careers in the emerging field of Data Journalism. Data-driven journalism is about obtaining, reporting on, curating, and publishing (storifying) data in the public interest. Maps and data infographics are some of the best ways to publish data in order to inform the public and raise awareness.

Principles of journalism, methods and tools for information visualization, social media analysis, and scientific data communication topics are visited in this program.

This certificate may be pursued on a part-time and full-time basis.

Admission Requirements
To apply, prospective students should complete the George Mason University Graduate Application. Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for study as specified in the Graduate Admission Policies section of this catalog.

Certificate Requirements

Core Courses (9 credits)

- GGS 590 - Selected Topics in Geography Credits: 1-3 (when the subject is GeoSocial Analysis for 3 credits)
- GGS 692 - Web-based Geographic Information Systems Credits: 3
- COMM 642 - Science and the Public Credits: 3 or COMM 655 - Theory and Practice of Digital Communication Credits: 3

Elective Courses (6 credits)

Choose two courses from the list below or others in consultation with an advisor.

- CDS 501 - Scientific Information and Data Visualization Credits: 3
- CSI 672 - Statistical Inference Credits: 3 or STAT 652 - Statistical Inference Credits: 3
- COMM 637 - Risk Communication Credits: 3
- COMM 640 - Controversies in Science Communication Credits: 3
- COMM 641 - Advanced Communication Skills for STEM Credits: 3
- COMM 644 - Analysis and Criticism of Science Journalism Credits: 3
- COMM 660 - Climate Change and Sustainability Communication Campaigns Credits: 3
- COMM 735 - Crisis Communication Credits: 3
- STAT 554 - Applied Statistics I Credits: 3

Certificate Total: 15 credits

Environmental GIS and Biodiversity Conservation Graduate Certificate (GGS)

Banner Code: SC-CERG-EGBC

College: College of Science
Departments: Environmental Science and Policy, Geography and Geoinformation Science, and Smithsonian Mason School of Conservation

As biodiversity is the life support system of our planet, it is important to prepare students for careers that require knowledge of both ecology and public policy. This certificate focuses in the fields of conservation biology, land use policy, conservation planning, and modern tools and approaches used in GIS to prepare students to tackle complex environmental challenges in a changing world.

This certificate is suitable for traditional students as well as for student-professionals (such as environmental scientists, managers, practitioners in government, and experts in non-governmental organizations) who wish to acquire further knowledge to advance their careers.
This certificate may be pursued on a part-time or full-time basis.

**Admission Requirements**

In order to apply, prospective students should complete the George Mason University Graduate Application. Applicants to all graduate programs at George Mason must meet the admission standards and application requirements for study as specified in the Graduate Admission Policies section of this catalog. In addition, applicants should hold a BA or BS in a related discipline from a regionally accredited institution.

**Requirements for Graduate Certificates**

It is important for students to be aware of Mason's Graduate Policies, particularly the Requirements for Graduate Certificates.

**Degree Requirements**

**Core Courses (9 credits)**

- EVPP 607 - Fundamentals of Ecology Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- CONS 620 - Spatial Ecology, Geospatial Analysis & Remote Sensing for Conservation Credits: 3

**Elective Courses (9 credits)**

Choose three courses, one from each cluster:

**Cluster One**

- GGS 579 - Remote Sensing Credits: 3
- GGS 590 - Selected Topics in Geography Credits: 1-3 (requires the permission of advisor and instructor)
- GGS 680 - Earth Image Processing Credits: 3
- GGS 692 - Web-based Geographic Information Systems Credits: 3
- GGS 759 - Topics in Earth Systems Science Credits: 1-6 (requires the permission of advisor and instructor)
- CLIM 690 - Scientific Basis of Climate Change Credits: 3

**Cluster Two**

- CONS 630 - Species Monitoring & Conservation Credits: 3
- CONS 645 - Estimating Animal Abundance and Occupancy Credits: 3
- CONS 697 - Special Topics in Conservation Credits: 1-3

**Cluster Three**

- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4 (a conservation-oriented topic is required)
- EVPP 518 - Conservation Biology Credits: 3
- EVPP 519 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 521 - Marine Conservation Credits: 3
Certificate Total: 18-19 credits

Geographic Information Science Graduate Certificate

Banner Code: SC-CERG-GISC

College: College of Science
Department: Geography and Geoinformation Science This graduate certificate prepares students for employment in federal, state, and local government positions that require GIS skills. The certificate has been found suitable for the needs of business and industry, including those corporations that serve as contractors to governments in the United States and overseas.

The Geographic Information Science Graduate Certificate may be pursued on a part-time or full-time basis.

Admission Requirements

To apply, prospective students should complete the George Mason University Graduate Application. Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for study as specified in the Graduate Admission Policies section of this catalog. In addition, applicants to this certificate program must submit a current résumé. GRE scores and letters of recommendation are not required but will strengthen an application, if available. TOEFL scores are required of all international applicants.

All applicants should have a working knowledge of, or prior education or training in, computer technology. Knowledge of GIS, remote sensing technology, and cartography are preferred. Students from any discipline are welcome to apply.

This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Certificate Requirements

Students must successfully complete 15 graduate credits, distributed as follows:

Core Courses (6 credits)

- GGS 553 - Geographic Information System Credits: 3
- GGS 563 - Advanced Geographic Information Systems Credits: 3

Elective Courses (9 credits)

Choose from the courses listed below:

- GGS 505 - Transportation Geography Credits: 3
- GGS 531 - Land-Use Modeling Techniques and Applications Credits: 3
- GGS 551 - Thematic Cartography Credits: 3

Certificate Total: 15 credits

**Geospatial Intelligence Graduate Certificate**

**Banner Code:** SC-CERG-GI

**College:** College of Science  
**Department:** Geography and Geoinformation Science

This graduate certificate program is for persons employed in geospatial intelligence applications (i.e., federal agency and/or corporate or association personnel) or those interested in entering this field. Our program offers fundamental knowledge on geospatial intelligence and the ability to apply this knowledge to a diverse range of constantly evolving geospatial intelligence situations. This program has been accredited by the United States Geospatial Intelligence Foundation.

This graduate certificate is also available as a fully online program. For more information, visit George Mason University's Office of Distance Education.

The graduate certificate in geospatial intelligence may be pursued on a part-time or full-time basis, and qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure information page at http://irr.gmu.edu/gedt/Geospatial_Intelligence/Gedt.html.

**Admission Requirements**

Applicants to this graduate certificate program should hold a BA or BS degree in a discipline related to the certificate's theme from a regionally accredited university with a minimum GPA of 3.00. To apply, prospective students should complete the George Mason University Graduate Application. Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for study as specified in the Graduate Admission Policies section of this catalog. In addition, applicants to this certificate program must submit a current résumé. GRE scores and letters of recommendation are not required but will considerably strengthen an application, if available. TOEFL scores are required of all international applicants. Applicants should have undergraduate backgrounds that include courses in differential and integral calculus, and they should possess working knowledge of a computer programming language. Depending on the background of
the individual student, the coordinator may recommend remedial or preparatory courses tailored to the student's needs. This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program. Students may transfer no more than 3 credits into the certificate program with the approval of the academic director.

Certificate Requirements

The Geospatial Intelligence Graduate Certificate requires a total of 18 credits, or 6 courses. These are comprised of five mandatory core courses and one elective.

Core Courses (15 credits)

The mandatory core courses reflect the three key science emphases areas of this program, namely geospatial image analysis, spatial analysis, and information technology:

- GGS 553 - Geographic Information System Credits: 3
- GGS 650 - Introduction to GIS Algorithms and Programming Credits: 3 or GGS 664 - Spatial Data Structures Credits: 3 or GGS 692 - Web-based Geographic Information Systems Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 684 - Selected Topics in Geospatial Intelligence Credits: 3
- GGS 685 - Capstone Course in Geoinformatics Credits: 3

Elective Course (3 credits)

Choose one additional course from the following:

- GGS 563 - Advanced Geographic Information Systems Credits: 3
- GGS 579 - Remote Sensing Credits: 3
- GGS 631 - Spatial Agent-Based Models of Human-Environment Interactions Credits: 3
- GGS 650 - Introduction to GIS Algorithms and Programming Credits: 3
- GGS 658 - Terrain Mapping Credits: 3
- GGS 664 - Spatial Data Structures Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3
- GGS 675 - Location Science Credits: 3
- GGS 692 - Web-based Geographic Information Systems Credits: 3
- GGS 740 - Hyperspectral Imaging Systems Credits: 3
- GGS 772 - Cloud Geographic Information Systems Credits: 3
- GGS 787 - Scientific Data Mining for Geoinformatics Credits: 3

Certificate Total: 18 credits

Remote Sensing and Image Processing Graduate Certificate

Banner Code: SC-CERG-RSIP

College: College of Science
Department: Geography and Geoinformation Science This certificate program focuses on the skills needed to take advantage of
the enormous increase in the availability and use of remotely sensed data related to the Earth. The program requires students to complete 15 credits of GGS graduate courses. Ideal candidates for this certificate are those who have a background in Earth and environmental sciences and are working in or planning to enter into the field of remote sensing, Earth observing, or image processing.

The Remote Sensing and Image Processing Graduate Certificate may be pursued on a part-time or full-time basis.

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for study as specified in the Graduate Admission Policies section of this catalog. In addition, applicants to this certificate program must submit a current résumé. TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from a regionally accredited institution within the US (some exceptions apply). To apply, prospective students should complete the George Mason University Graduate Application.

Applicants should hold a BA or BS degree in a discipline related to the science and applications of remote sensing from a regionally accredited university, with a minimum GPA of 3.00. Applicants should have some prior education or training in remote sensing or image processing. Students with a background in one of the physical sciences (physics, chemistry, atmospheric science, hydrology, or geology), geography, or environmental science will be particularly well-suited to undertake this program. Applicants should have an undergraduate background that includes courses in differential and integral calculus, and they should possess working knowledge of a computer programming language.

This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

**Certificate Requirements**

**Core Courses (9 credits)**

- GGS 579 - Remote Sensing Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 740 - Hyperspectral Imaging Systems Credits: 3

**Elective Courses (6 credits)**

Choose two courses from the following:

- GGS 562 - Photogrammetry Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- GGS 756 - Physical Principles of Remote Sensing Credits: 3
- GGS 760 - Advanced Topics in Remote Sensing Credits: 3
- GGS 840 - Hyperspectral Imaging Applications Credits: 3

**Certificate Total: 15 credits**

**Master of Science**
Earth Systems Science, MS (GGS)

Banner Code: SC-MS-ESSC

College: College of Science
Departments: Geography and Geoinformation Science and Atmospheric, Oceanic and Earth Sciences The program addresses the growing demand for trained professionals in the Earth sciences. The degree emphasizes a research-oriented, global systems approach to studying the Earth and its systems— the atmosphere, the hydrosphere, and the lithosphere, including their interrelationships and interactions with the biosphere. Emphasis is on the observation, measurement, and analysis of Earth’s systems. Most student research projects and theses will relate to geologic and geographic topics, however studies of related topics in Earth science are welcome. Students completing the program are qualified to pursue careers that require knowledge of the basics of Earth systems science and the requisite tools, specifically pertaining to the area of Earth science that they choose to investigate. Students are encouraged to undertake a master's thesis but may choose a research project. In the latter case, students must pass a comprehensive exam.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admissions standards and Graduate Admission Policies as specified in the Admissions section of this catalog. Applicants to the Earth Systems Science, MS should have earned a BS degree in atmospheric, Earth, environmental, geological, geographical, ocean, or physical science. Previous coursework should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. Applicants should have a minimum GPA of 3.00 in their undergraduate degree.

To apply, prospective students should complete the George Mason University Graduate Application. Official transcripts from each college and graduate institution attended, a current résumé, and a goals statement are required. Applicants also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Candidates must successfully complete 30 credits outlined below, being mindful that 10 of these credits must be GGS courses and 10 of these credits must be GEOL/CLIM courses ("Culminating Experience” credits do not count towards this requirement):

Earth Science Core (9 credits)

Choose one course from each of the following groups:

Atmosphere

- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 714 - Land-Climate Interactions Credits: 3
- GEOL 532 - Paleoclimatology Credits: 3
- GGS 670 - Introduction to Atmosphere and Weather Credits: 3
- PHYS 575 - Atmospheric Physics I Credits: 3

Hydrosphere
- CLIM 512 - Physical Oceanography Credits: 3
- CLIM 712 - Physical and Dynamical Oceanography Credits: 3
- GEOL 513 - Hydrogeology Credits: 3
- GGS 656 - The Hydrosphere Credits: 3

Lithosphere

- GEOL 506 - Soil Science Credits: 3
- GGS 657 - The Lithosphere Credits: 3 or GEOL 601 - The Lithosphere Credits: 3

Techniques (6 credits)

Select two courses from the following:

- GGS 553 - Geographic Information System Credits: 3
- GGS 560 - Quantitative Methods Credits: 3
- GGS 579 - Remote Sensing Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- Courses can be substituted with advisor approval.

Colloquium (2 credits)

- GEOL 536 - Paleontology Seminar Credits: 1-2 or GEOL 792 - Seminar in Earth Systems Science, Geology, & Earth Science Credits: 1 or CLIM 991 - Climate Dynamics Seminar Credits: 1
- GGS 900 - Geography and Geoinformation Science Colloquium Credits: 1

Electives (10 credits)

Complete 10 credits of other CLIM, GEOL, GGS, or EVPP courses at the 500 to 900-level (excluding 700, 798, and 799 courses).

Culminating Experience (3 credits)

Choose the culminating experience of either a thesis or a project (either must total 3 credits):

Thesis

- GGS 799 - Thesis Credits: 1-6 or GEOL 799 - Master's Thesis in Earth Systems Science Credits: 1-6 or CLIM 799 - Master's Thesis in Climate Credits: 1-6

Project

- GGS 700 - Comprehensive Exam Credits: 1 or GEOL 700 - Comprehensive Exam Credits: 1 or CLIM 700 - Climate Comprehensive Exam Credits: 1 and
- GGS 798 - Research Project in Earth Systems Science Credits: 1-6 or GEOL 798 - Master's Research Project in Earth Systems Science Credits: 1-6 or CLIM 798 - Master's Climate Research Project Credits: 1-6
Degree Total: 30 credits

Geographic and Cartographic Sciences, MS

Banner Code: SC-MS-GECA

College: College of Science

Department: Geography and Geoinformation Science The Geographic and Cartographic Sciences, MS (GECA) focuses on the growing demand for scientists and professionals in the field of geographic information science, who use geographical approaches and tools such as geographic information systems (GIS), remote sensing, cartography, and geovisualization to address and solve geographic problems. This expertise is useful to a wide variety of employers in the federal, state, and local government sectors, as well as in business, industry, and non-profit organizations. The degree's coursework concentrates on the collection, analysis, and display of geographic data, and the use of emerging geospatial technologies to address problems in the human and environmental geographic domains. The GECA program's disciplinary domain has been recognized by the US Department of Labor as one of the three most strategic job growth areas. Students in this program benefit from a large and diverse local employment market, as well as a network of more than 700 program alumni (1978-present) who live and work in the local area.

Research Facilities

The Department of Geography and Geoinformation Science has extensive research and teaching facilities, including several labs equipped with GIS, remote sensing, cartographic, and analytical software from leading industry vendors and open source groups. Specialized instructional space for geographic information science is housed in newly renovated labs in Exploratory Hall on the Fairfax Campus.

Admission Requirements

In addition to meeting all admission requirements for graduate study at George Mason University (see the Admissions section of this catalog), applicants should have a bachelor's degree in geography, cartography, or a closely related field. Applicants without an undergraduate degree in geography may be required to take one course in each of the following: physical geography, human geography, and cartography. All applicants must have a course in statistics. The program also requires GRE test scores, three letters of recommendation, transcripts of all college coursework, and a statement of interest in the degree. The GRE requirement will be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required for all foreign applicants. Credit from courses taken at other departments and other universities may be applied to the program with prior approval.

Secondary Program Options

Students enrolled in this master's program have the option of adding a secondary graduate certificate program. Depending upon the secondary program chosen, many courses may be applicable to both the certificate and the master's. Before adding a secondary program, students are advised to carefully review the 'Requirements for Graduate Certificates' and the 'Requirements for Master's Degrees' in the AP.6 Graduate Policies section of this catalog. Faculty advisors should be contacted for further guidance and for graduate certificate program suggestions.

Degree Requirements

Students must complete either 30 graduate credits (with a thesis) or 37 graduate credits (without a thesis). If the non-thesis option is selected, students are required to pass a comprehensive exam.

Core Courses (12 credits)
Thesis or Non-thesis Options (18 or 25 credits)

Thesis Option (18 credits)

Students selecting the thesis option must complete:

- 3 credits of GGS 799 - Thesis Credits: 1-6
- 15 credits of electives in 500 to 799-level GGS courses

Non-thesis Option (25 credits)

Students selecting the non-thesis option must complete:

- 1 credit of GGS 700 - Comprehensive Exam Credits: 1
- 24 credits of electives in 500 to 799-level GGS courses

Note:

Electives should be selected in consultation with an advisor. With departmental approval, up to 9 credits from closely related disciplines may be applied to the degree.

Degree Total: 30 or 37 credits

Geoinformatics and Geospatial Intelligence, MS

Banner Code: SC-MS-GEOI

College: College of Science
Department: Geography and Geoinformation Science

The Geoinformatics and Geospatial Intelligence, MS addresses the emerging demand for scientists trained in the collection, organization, analysis, and dissemination of information about physical features, man-made structures, moving objects, people, and events that are geo-referenced or geo-located. This program focuses primarily on the computational approaches that support the synthesis and analysis of diverse types of data in order to identify and monitor complex events and phenomena that manifest over space and time. While geospatial intelligence has a strong Department of Defense connotation, the principles behind it have a significant dual use potential, addressing the needs of a broader audience, ranging for example from intelligent navigation in urban spaces to emergency response systems for natural and man-made disasters.

The Geoinformatics and Geospatial Intelligence, MS is designed to expose students to fundamental theoretical principles and practical applications involving:

- Geographic Information Science
Digital image analysis as it applies to geoinformatics and geospatial intelligence
Computational principles for geoinformatics and intelligence

The curriculum structure of the program reflects these three educational components. The Geoinformatics and Geospatial Intelligence, MS degree requires a minimum of 33 credits, including a 3-credit MS thesis.

Admission Requirements

In addition to meeting all admission requirements for graduate study at George Mason University as specified in the Graduate Admission Policies section of this catalog, applicants to the Geoinformatics and Geospatial Intelligence, MS should hold a BA or BS degree in a discipline related to the program's theme from a regionally accredited university, with a minimum GPA of 3.00, including courses in differential and integral calculus. A working knowledge of a computer programming language is a plus. When the background of an individual student does not meet the program's requirements, remedial or preparatory courses tailored to student's needs may be recommended. To apply, prospective students should complete the George Mason University Graduate Application. Official transcripts from each college and graduate institution attended, a current résumé, and a goals statement will be required.

Applicants will also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master's degree from a regionally accredited US institution. TOEFL scores are required of all international applicants.

Secondary Program Options

Students enrolled in this master's program have the option of adding a secondary graduate certificate program. Depending upon the secondary program chosen, many courses may be applicable to both the certificate and the master's. Before adding a secondary program, students are advised to carefully review the 'Requirements for Graduate Certificates' and the 'Requirements for Master's Degrees' in the AP.6 Graduate Policies section of this catalog. Faculty advisors should be contacted for further guidance and for graduate certificate program suggestions.

Degree Requirements

Core Courses (21 credits)

- GGS 550 - Geospatial Science Fundamentals Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- GGS 664 - Spatial Data Structures Credits: 3
- GGS 684 - Selected Topics in Geospatial Intelligence Credits: 3
- GGS 685 - Capstone Course in Geoinformatics Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 787 - Scientific Data Mining for Geoinformatics Credits: 3

Thesis (3 credits)

- GGS 799 - Thesis Credits: 1-6 (3 credits)

Electives (9 credits)
Students select three courses from the groups below (course selections must also be approved by the program coordinator), with no more than two from a single group (i.e. courses are taken from at least two groups).

**Image Analysis**

- GGS 562 - Photogrammetry Credits: 3
- GGS 579 - Remote Sensing Credits: 3
- GGS 740 - Hyperspectral Imaging Systems Credits: 3
- GGS 760 - Advanced Topics in Remote Sensing Credits: 3
- GGS 840 - Hyperspectral Imaging Applications Credits: 3

**Geographic Information Science (GIS)**

- GGS 563 - Advanced Geographic Information Systems Credits: 3
- GGS 653 - Geographic Information Analysis Credits: 3
- GGS 675 - Location Science Credits: 3
- GGS 772 - Cloud Geographic Information Systems Credits: 3
- GGS 791 - Advanced Spatial Statistics Credits: 3

**Computational Geoinformatics**

- GGS 650 - Introduction to GIS Algorithms and Programming Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3
- GGS 692 - Web-based Geographic Information Systems Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- GGS 773 - Interoperability of Geographic Information Systems Credits: 3

**Degree Total: 33 credits**

**Non-Degree**

**Geographic Information Systems Minor**

**Banner Code:** GIS

**College: College of Science**

**Department: Geography and Geoinformation Science** The Geographic Information Systems Minor is designed to prepare students with the basic training necessary to enter the rapidly expanding field of geographic information science. The curriculum in the minor is multidisciplinary in content and interdisciplinary in approach, drawing on a variety of geographic and computational science components. A Geographic Information System (GIS) is an integrative approach to help solving complex spatial problems in most professional fields and at different scales. GIS has irrevocably altered the way we capture, store, analyze, and visualize spatial information. Although it has its roots in cartography and the graphical display of information, its
breadth spans from geographic data acquisition, geospatial database construction and management, spatial analysis, and geovisualization. Public and private sector organizations work with an overwhelming amount of spatial data in their day-to-day operations. With so much spatial information, GIS has become essential to the effective operation of both public and private organizations.

Employment opportunities are limitless for students who are proficient in this interdisciplinary field. GIS professionals work in places like government agencies, utility companies, marketing firms, non-profit organizations, and publishing companies. Federal government agencies such as NGA, FEMA, USGS, DOD, EPA, and NASA routinely recruit individuals with strong GIS backgrounds.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

**Minor Requirements**

To receive this minor, students must complete 18 to 20 credits in geography. Of those, 8 credits must be unique to the minor, with a minimum GPA of 2.00:

**Required Courses (12 credits)**

- GGS 110 - Introduction to Geoinformation Technologies Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 463 - Applied Geographic Information Systems Credits: 3

**Elective Courses (6–8 credits)**

Choose from:

- GGS 308 - Field Mapping Techniques Credits: 3
- GGS 310 - Introduction to Digital Cartography Credits: 4
- GGS 354 - Data Analysis and Global Change Detection Techniques Credits: 3
- GGS 410 - Introduction to Hyperspectral Imaging Credits: 3
- GGS 411 - Advanced Digital Cartography Credits: 3
- GGS 412 - Air Photography Interpretation Credits: 3
- GGS 416 - Satellite Image Analysis Credits: 3
- GGS 480 - GGS Internship Credits: 1-3
- CS 112 - Introduction to Computer Programming Credits: 4

**Note:**

With departmental permission, one course with significant geographic information systems (GIS) content may be used as an elective course.

**Minor Total: 18-20 credits**

**Geography Minor**

**Banner Code:** GEOG
Minor Requirements

To receive the minor, students must complete 18 credits in geography, 8 credits of which must be unique to the minor, with a minimum GPA of 2.00, distributed as follows:

Core Courses (6-7 credits)

- GGS 102 - Physical Geography Credits: 3 or GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
- GGS 101 - Major World Regions Credits: 3 or GGS 103 - Human Geography Credits: 3

Systematic and Regional Requirement (6 credits)

Students choose two courses at the 300 and 400-level: one course in systematic geography and one course in regional geography chosen from the list below.

Systematic Geography

- GGS 301 - Political Geography Credits: 3
- GGS 302 - Global Environmental Hazards Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3
- GGS 304 - Population Geography Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GGS 309 - Meteorology and Climate Credits: 3
- GGS 312 - Physical Climatology Credits: 3
- GGS 314 - Severe and Extreme Weather Credits: 3
- GGS 319 - Air Pollution Credits: 3
- GGS 321 - Biogeography Credits: 3
- GGS 322 - Issues in Global Change Credits: 3
- GGS 357 - Structures in Urban Governance and Planning Credits: 3
- GGS 398 - Selected Topics in Global Change Credits: 3
- GGS 399 - Select Topics in GGS Credits: 3
- GGS 455 - Environmental Impact Assessment Credits: 3
- GGS 456 - Introduction to Atmospheric Radiation Credits: 3

Regional Geography

- GGS 315 - Geography of the United States Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 320 - Geography of Europe Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
GGS 330 - Geography of the Soviet Succession States Credits: 3
GGS 333 - Issues in Regional Geography Credits: 3
GGS 380 - Geography of Virginia Credits: 3

Upper-level Electives (6-7 credits)

Students must take two upper-level GGS electives chosen in consultation with minor coordinator.

Minor Total: 18-20 credits

Undergraduate Certificate

GeoManagement Undergraduate Certificate

Banner Code: SC-CERB-GEOM

College: College of Science and School of Business
Department: Geography and Geoinformation Science Considering our global environment, professionals working on large-scale GIS projects often find it only natural to couple management and marketing topics with geography. This certificate accommodates students who are pursuing a degree in the Department of Geography and Geoinformation Science who also wish to acquire more knowledge on how to manage people and organizations dealing with GIS in a global economy. By understanding marketing terms, financial matters, and also having a good understanding of how to manage people, students will be well prepared to face challenges in multidisciplinary GIS-oriented environments.

All courses are available online; further information can be found on the Office of Distance Education website.

Applicants to this program must meet the requirements outlined in the Admissions section of this catalog.

Students are advised to review all Undergraduate Policies, particularly the section on 'Undergraduate Certificates'. If also pursuing a minor, students should pay close attention to the 'Minors' section, as well.

This certificate may be pursued on a full-time or part-time basis.

Certificate Requirements

Management (6 credits)

Students in this certificate can take the following MBUS courses for certificate credit without sophomore standing (listed as a course prerequisite):

Choose two courses:

- MBUS 300 - Accounting in a Global Economy Credits: 3
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- MBUS 302 - Managing Information in a Global Economy Credits: 3
- MBUS 303 - Marketing in a Global Economy Credits: 3

Geoinformation Science (18-19 credits)
- GGS 101 - Major World Regions Credits: 3 or GGS 103 - Human Geography Credits: 3
- GGS 102 - Physical Geography Credits: 3 or GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 312 - Physical Climatology Credits: 3
- GGS 315 - Geography of the United States Credits: 3
- GGS 380 - Geography of Virginia Credits: 3

Certificate Total: 24-25 credits

Mathematical Sciences

Phone: 703-993-1460
Web: math.gmu.edu

Faculty

Professors: Alligood, Anderson (undergraduate coordinator), Colonna (graduate coordinator), Goldin, Kulesza, Lawrence, Morris, Sachs, Sander, Saperstone, Sauer (COS distinguished scholar), Seshaiyer, Shapiro, Singman (associate chair), Soltan, Walnut (chair), Wanner

Associate professors: Agnarsson, Emelianenko, Griva, Lamba, Lawton, Lin, Zoltek

Assistant professors: Antil, Carchedi, Epstein, Holzer, Manon

Admin professional: O'Brien

Term assistant professors: Fernandez, Nelson

Term instructors: Boyette, Bulancea, Crossin, Granfield, Sausville

Affiliates: Nash

Emeritus: Cabell, Kiley, Levy

The department offers undergraduate and graduate degree programs in mathematics for students with various interests and career goals. Students may pursue the standard program, or a program focused on actuarial mathematics, applied mathematics, mathematics education or mathematical statistics. Students may complement other interests by taking a double major in mathematics and a related field, such as chemistry, economics, physics, computer science, or engineering.

Graduating seniors are required to have an exit interview.

Courses

The Department of Mathematical Sciences offers all courses designated MATH in the Courses section of this catalog.

Prior to enrolling in undergraduate MATH courses, all students are strongly advised to review the Information on Undergraduate Mathematics Courses section of this catalog.

Writing-Intensive Requirement
Mason policy requires all students to complete at least one course designated as "writing intensive" in their major. Students majoring in mathematics fulfill this requirement by successfully completing MATH 290.

Math Tutoring Center

The department manages the Math Tutoring Center, which offers free tutoring for first- and second-year math courses. Tutoring is given by advanced mathematics students and is available on a drop-in basis with daytime and evening hours throughout the term.

Math Learning Center

For a fee, the Math Learning Center offers self-paced and classroom noncredit tutorial programs for students who do not place into the math course they need. Special tutors and tutorial software are available to those enrolled in the program. Successful completion of the relevant program enables students to enroll in MATH 105, MATH 108, MATH 110, MATH 111, MATH 112, or MATH 125.

Honors Program in Mathematics

Mathematics majors who have maintained a GPA of at least 3.50 in mathematics courses and a GPA of 3.50 in all courses taken at George Mason University may apply to the departmental honors program upon completion of two MATH courses at the 300+ level (excluding MATH 400), at least one of which has MATH 290 as a prerequisite. Admission to the program will be monitored by the undergraduate committee. To graduate with honors in mathematics, a student is required to maintain a minimum GPA of 3.50 in mathematics courses and successfully complete MATH 405 and MATH 406 with an average GPA of at least 3.50 in these two courses.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development section of this catalog and attend an information session early in their undergraduate career. For more information, visit gse.gmu.edu.

Certificate in College Teaching

A student enrolled in the Mathematics, MS or Mathematics, PhD who is primarily interested in pursuing a career in undergraduate education at the college level is encouraged to consider enrolling in the College Teaching Graduate Certificate offered through the College of Humanities and Social Sciences. Credit can be earned for HE 685 by working one semester as a graduate teaching assistant in the Department of Mathematical Sciences.

Bachelor's/Accelerated Master's Degree in Mathematics

Information regarding this program can be found in the Mathematics, BS/ Mathematics, Accelerated MS section of this catalog.

Bachelor of Arts

Mathematics, BA

Banner Code: SC-BA-MATH
College: College of Science
Department: Mathematical Sciences Students may select an optional concentration in mathematics education; students who do not select this concentration study traditional mathematics. Students must fulfill all Requirements for Bachelor's Degrees. In addition to satisfying the Mason Core and the College Requirements for the BA Degree (outlined below), students must also satisfy the degree requirements listed below.

MATH 290 meets the writing intensive requirement for this major.

Note: Students intending to enter graduate school in mathematics are strongly advised to take MATH 315 and MATH 321.

This undergraduate program offers students the option of applying to the Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd, (Secondary Education Mathematics Concentration). See listing for specific requirements.

Students may not receive credit for both MATH 214 and MATH 216; both MATH 213 and MATH 215; both MATH 351 and STAT 344; and both MATH 352 and STAT 354.

After receiving a grade of 'C' or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:

<table>
<thead>
<tr>
<th>MATH 113 or MATH 123</th>
<th>MATH 105 or MATH 108</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 351 or STAT 344</td>
<td>MATH 110</td>
</tr>
<tr>
<td>MATH 441</td>
<td>MATH 111</td>
</tr>
<tr>
<td>MATH 125</td>
<td>MATH 112</td>
</tr>
</tbody>
</table>

Students should carefully read the Information on Undergraduate Mathematics Courses section of this catalog before registering for courses.

Degree Requirements

Note: A maximum of 6 credits of grades below 2.00 in coursework designated MATH may be applied toward the major.

Core Courses (26 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3 (Mason Core: Quantitative Reasoning course)
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3 or MATH 215 - Analytic Geometry and Calculus III (Honors) Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3 or MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3 (fulfills writing intensive requirement)
- MATH 322 - Advanced Linear Algebra Credits: 3

BA without Concentration

In addition to completing the core courses above, students not selecting the concentration option must complete 12 additional traditional mathematics credits in MATH courses numbered above 300 (excluding MATH 400).
BA without Concentration Total: 12 credits

BA with Concentration

In addition to completing the core courses above, students may select an optional concentration in mathematics education.

▲ Concentration in Mathematics Education (MTHE)

Students selecting the mathematics education concentration take the following coursework. A grade of 'C' or better is required for all licensure coursework.

- MATH 302 - Foundations of Geometry Credits: 3 or MATH 312 - Geometry Credits: 3
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 321 - Abstract Algebra Credits: 3
- MATH 351 - Probability Credits: 3
- EDCI 372 - Teaching Mathematics in the Secondary School Credits: 3
- EDCI 472 - Advanced Methods for Teaching Mathematics in the Secondary School Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6 (Mason Core: Synthesis course)
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3 (Mason Core: Social and Behavioral Science course)
- EDUC 422 - Foundations of Secondary Education Credits: 3

MTHE Concentration Total: 33 credits

Mason Core and Elective Credits (61-82 credits)

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 82 credits
- With concentration: 61 credits

College Requirements for the BA Degree

Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core.

Philosophy or Religious Studies (3 credits)

Choose any course in philosophy (PHIL) or religious studies (RELI), except for PHIL 323 and PHIL 324.

Social and Behavioral Sciences (3 credits)
Choose one approved Mason Core: Social and Behavioral Science course in addition to the Mason Core-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except HIST 100 or HIST 125), LING, PSYC, or SOCI, and the following GGS courses:

- GGS 101 - Major World Regions Credits: 3
- GGS 103 - Human Geography Credits: 3
- GGS 110 - Introduction to Geoinformation Technologies Credits: 3
- GGS 301 - Political Geography Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3
- GGS 304 - Population Geography Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 315 - Geography of the United States Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 320 - Geography of Europe Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GGS 330 - Geography of the Soviet Succession States Credits: 3
- GGS 357 - Structures in Urban Governance and Planning Credits: 3
- GGS 380 - Geography of Virginia Credits: 3

**Natural Science (1 credit)**

Choose one credit in addition to the Mason Core: Natural Science requirement for a total of 8 credits. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science courses that include a laboratory experience (except for BIOL 124 and BIOL 125).

**Foreign Language (0-3 credits)**

Intermediate-level proficiency in one foreign language is required. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher-level courses taught in the language), or by achieving a satisfactory score on an approved proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found via the college's Office of Academic and Student Affairs.

**Non-western Culture (0-3 credits)**

Choose one approved Non-Western Culture Requirement course in addition to the course used to fulfill the Mason Core: Global Understanding requirement. A course used to fulfill the Mason Core: Global Understanding requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major).

Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.

**Mason Core**
Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

**Foundation Requirements (15-19 credits)**

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

**Core Requirements (22 credits)**

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

**Synthesis/Capstone Requirement (minimum 3 credits)**

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

**Degree Total: Minimum 120 credits**

**Bachelor of Science**

**Mathematics, BS**

*Banner Code: SC-BS-MATH*

*College: College of Science*

*Department: Mathematical Sciences* This program of study is offered by the Department of Mathematical Sciences in the College of Science.

Students may select an optional concentration in Actuarial Mathematics (ACTM), Applied Mathematics (AMT), Mathematics Education (MTHE) or Mathematical Statistics (MTHS). Students who do not select a concentration study traditional mathematics.

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. In addition, students majoring in mathematics must satisfy the requirements listed below.

A maximum of 6 credits of grades below 2.00 in coursework designated MATH may be applied toward the major.

MATH 290 meets the writing intensive requirement for this major.

The department recommends proficiency in French, German, or Russian.
Note: Students intending to enter graduate school in mathematics are strongly advised to take MATH 315 and MATH 321.

This undergraduate program offers students the option of applying to the Mathematics, BS/ Mathematics, Accelerated MS or the Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd, (Secondary Education Mathematics Concentration); see each listing for specific requirements.

Students may not receive credit for both MATH 214 and MATH 216; both MATH 213 and MATH 215; both MATH 351 and STAT 344; and both MATH 352 and STAT 354.

After receiving a grade of 'C' or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:

<table>
<thead>
<tr>
<th>Left Courses</th>
<th>Right Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 113 or MATH 123</td>
<td>MATH 105 or MATH 108</td>
</tr>
<tr>
<td>MATH 351 or STAT 344</td>
<td>MATH 110</td>
</tr>
<tr>
<td>MATH 441</td>
<td>MATH 111</td>
</tr>
<tr>
<td>MATH 125</td>
<td>MATH 112</td>
</tr>

</table>

Students should carefully read the Information on Undergraduate Mathematics Courses section of this catalog before registering for courses.

Degree Requirements

Mathematics Core (23 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3 or MATH 215 - Analytic Geometry and Calculus III (Honors) Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3 or MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3 (fulfills writing intensive requirement)
- MATH 322 - Advanced Linear Algebra Credits: 3

Science (8 credits)

All students in the major choose a one-year sequence of a laboratory science from the following Mason Core: Natural Science courses:

Chemistry Sequence

- CHEM 211 - General Chemistry I Credits: 3
- CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3
- CHEM 214 - General Chemistry Laboratory II Credits: 1

Geology Sequence
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4

Physics Sequence

• PHYS 160 - University Physics I Credits: 3 and PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3 and PHYS 261 - University Physics II Laboratory Credits: 1

Computational Skills (4 credits)
All students in the major take:

• CS 112 - Introduction to Computer Programming Credits: 4

BS without Concentration (28-32 credits)
In addition to the mathematics core, science, and computational skills requirements listed above, students who are not choosing a concentration must complete the following coursework:

Traditional Mathematics

• MATH 125 - Discrete Mathematics I Credits: 3 (Mason Core: Quantitative Reasoning course)
• MATH 315 - Advanced Calculus I Credits: 3
• MATH 316 - Advanced Calculus II Credits: 3
• MATH 321 - Abstract Algebra Credits: 3 or MATH 431 - Topology Credits: 3
• 12 additional credits of MATH courses numbered above 300 (excluding MATH 400)

Additional Science
Select additional science credits from one of the following three options:

• A second sequence from the choices under “Science (8 credits)” above
• 6 credits from more advanced courses in chemistry, geology, or physics (but only courses acceptable for credit toward a natural science major). Suggested courses include: CHEM 313 through CHEM 332, CHEM 463, GEOL 302 through GEOL 364, and PHYS 266.
• The 4-credit option of PHYS 262 - University Physics III Credits: 3 and PHYS 263 - University Physics III Laboratory Credits: 1

Without Concentration Total: 28-32 credits

BS with Concentration (28-47 credits)
In addition to the mathematics core, science, and computational skills requirements listed above, students may select an optional concentration in Actuarial Mathematics (ACTM), Applied Mathematics (AMT), Mathematics Education (MTHE) or Mathematical Statistics (MTHS).

▲ Concentration in Actuarial Mathematics (ACTM)

The following coursework is required for this concentration:

**ACTM Courses**

- MATH 351 - Probability Credits: 3
- MATH 352 - Statistics Credits: 3
- MATH 551 - Regression and Time Series Credits: 3
- MATH 554 - Financial Mathematics Credits: 3
- MATH 555 - Actuarial Modeling I Credits: 3
- MATH 556 - Actuarial Modeling II Credits: 3
- ACCT 203 - Survey of Accounting Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ECON 104 - Intermediate Microeconomics Credits: 3 (for mathematics majors, the Department of Economics has agreed to waive the ECON 104 prerequisite) or ECON 310 - Money and Banking Credits: 3 or FNAN 321 - Financial Institutions Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3

**ACTM Courses (continued)**

Select two courses from the following:

- MATH 441 - Deterministic Operations Research Credits: 3
- MATH 442 - Stochastic Operations Research Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3

**ACTM Concentration Total: 36 credits**

▲ Concentration in Applied Mathematics (AMT)

The following coursework is required for this concentration:

**AMT Courses**

- MATH 125 - Discrete Mathematics I Credits: 3 (Mason Core: Quantitative Reasoning course)
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 351 - Probability Credits: 3
- MATH 413 - Modern Applied Mathematics I Credits: 3
- MATH 414 - Modern Applied Mathematics II Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
Choose 6 credits of MATH courses numbered above 300 (excluding MATH 400)

Additional Science Courses

Select additional science credits from one of the following options:

- A second sequence from the choices under "Science (8 credits)” above
- 6 credits from more advanced courses in chemistry, geology, or physics (but only courses acceptable for credit toward a natural science major). Suggested courses include: CHEM 313 through CHEM 332, CHEM 463, GEOL 302 through GEOL 364, and PHYS 266.
- The 4-credit option of PHYS 262 - University Physics III Credits: 3 and PHYS 263 - University Physics III Laboratory Credits: 1

AMT Concentration Total: 28-32 credits

▲ Concentration in Mathematical Statistics (MTHS)

The following coursework is required for this concentration:

MTHS Courses

- MATH 125 - Discrete Mathematics I Credits: 3 (Mason Core: Quantitative Reasoning course)
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 351 - Probability Credits: 3
- MATH 352 - Statistics Credits: 3
- MATH 453 - Advanced Mathematical Statistics Credits: 3
- MATH 551 - Regression and Time Series Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3

MTHS Courses (continued)

Select two courses from the following:

- STAT 455 - Experimental Design Credits: 3
- STAT 463 - Introduction to Exploratory Data Analysis Credits: 3
- STAT 474 - Introduction to Survey Sampling Credits: 3

Additional Science Courses

Select additional science credits from one of the following options:

- A second sequence from the choices under "Science (8 credits)” above
• 6 credits from more advanced courses in chemistry, geology, or physics (but only courses acceptable for credit toward a natural science major). Suggested courses include: CHEM 313 through CHEM 332, CHEM 463, GEOL 302 through GEOL 364, and PHYS 266.
• The 4-credit option of PHYS 262 - University Physics III Credits: 3 and PHYS 263 - University Physics III Laboratory Credits: 1

MTHS Concentration Total: 31-35 credits

▲ Concentration in Mathematics Education (MTHE)

The following coursework is required for this concentration. A grade of "C" or better is required for all licensure coursework.

MTHE Courses

• MATH 125 - Discrete Mathematics I Credits: 3 (Mason Core: Quantitative Reasoning course)
• MATH 302 - Foundations of Geometry Credits: 3 or MATH 312 - Geometry Credits: 3
• MATH 315 - Advanced Calculus I Credits: 3
• MATH 321 - Abstract Algebra Credits: 3
• MATH 351 - Probability Credits: 3
• EDCI 372 - Teaching Mathematics in the Secondary School Credits: 3
• EDCI 472 - Advanced Methods for Teaching Mathematics in the Secondary School Credits: 3
• EDCI 490 - Student Teaching in Education Credits: 6 (Mason Core: Synthesis course)
• EDRD 419 - Literacy in the Content Areas Credits: 3
• EDUC 372 - Human Development, Learning, and Teaching Credits: 3 (Mason Core: Social and Behavioral Science course)
• EDUC 422 - Foundations of Secondary Education Credits: 3
• Choose one 3-credit MATH course numbered above 300 (excluding MATH 400)

Additional Science Courses

Select additional science credits from one of the following options:

• A second sequence from the choices under "Science (8 credits)" above
• 6 credits from more advanced courses in chemistry, geology, or physics (but only courses acceptable for credit toward a natural science major). Suggested courses include: CHEM 313 through CHEM 332, CHEM 463, GEOL 302 through GEOL 364, and PHYS 266.
• The 4-credit option of PHYS 262 - University Physics III Credits: 3 and PHYS 263 - University Physics III Laboratory Credits: 1

MTHE Concentration Total: 43-47 credits

Mason Core and Elective Credits (38-57 credits)
In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 53-57 credits
- ACTM concentration: 49 credits
- AMT concentration: 53-57 credits
- MTHS concentration: 50-54 credits
- MTHE concentration: 38-42 credits

Mason Core

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UUTC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Degree Total: Minimum 120 credits
College: College of Science
Department: Mathematical Sciences

This degree program allows academically strong Mathematics, BA and Mathematics, BS students to obtain their bachelor's and a Mathematics, MS by successfully completing 144 credits. Well-prepared students may be admitted to this program after the completion of 90 undergraduate credits. Upon completion and conferral of the bachelor's degree and with satisfactory graduate-level performance (3.00 GPA) in graduate courses, students are given advanced standing in the Mathematics, MS program and complete an additional 24 credits to receive the master's degree.

Upon completion and conferral of the bachelor's degree and with satisfactory graduate-level performance (3.00 GPA) in graduate courses, students are given advanced standing in the Mathematics, MS program and complete an additional 24 credits to receive the master's degree.

See the Graduate Policies section of this catalog for policies related to accelerated master's degrees.

Students in an accelerated degree program must fulfill all university requirements for the bachelor's and master's degrees. For policies governing all degrees, see the Academic Policies section of this catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. Application information for this accelerated master's program can be found on the Department of Mathematical Sciences website.

Successful applicants will have an overall undergraduate GPA of at least 3.00. Additionally, they will have completed the following courses with a GPA of 3.00 or higher: MATH 315, MATH 321, and MATH 322.

Accelerated Option Requirements

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar) to the College of Science's Office of Academic and Student Affairs. Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

Reserve Graduate Credit

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree. Additional information can be found in the Registration and Attendance section of this catalog.

Doctor of Philosophy

Mathematics, PhD

Banner Code: SC-PHD-MATH

College: College of Science
Department: Mathematical Sciences

The doctoral program begins with graduate coursework and advanced seminars and culminates in a dissertation consisting of original research in mathematics. The Mathematics, PhD is designed to train students as research mathematicians for careers in academia, government, and private industry.

Admission Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. It is expected that all applicants have a recent bachelor's degree in mathematics or an equivalent amount of undergraduate mathematics preparation, with a GPA of at least 3.00 in their last 60 credits of study. Students without this background who have had an upper-division course in linear algebra (equivalent to MATH 322), an upper-division course in advanced calculus (equivalent to MATH 315), and an upper-division course in group theory (equivalent to MATH 321) are encouraged to apply to the Mathematics, MS. Such students may subsequently apply to the Mathematics, PhD when all background issues have been addressed. It is recommended that all applicants have some familiarity with mathematical software.

To apply, prospective students should provide the completed Mason Graduate Application, two copies of official transcripts from each college and graduate institution attended, three letters of recommendation, and a goals statement. TOEFL scores are required for all international applicants. GRE scores are recommended but not required.

**Reduction of Credit**

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. Similarly, graduate mathematics courses taken elsewhere without being applied to degree conferral may be counted toward the degree as transfer credit. See the Graduate Policies section of this catalog for more information.

**Fellowships and Assistantships**

The Department of Mathematical Sciences offers a limited number of merit-based teaching assistantships. Other sources of support, such as research fellowships and assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center and the Math Learning Center.

**Degree Requirements**

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

Classes at the 500 level, MATH 600 - MATH 614, and actuarial classes MATH 653, MATH 654 and MATH 655 cannot be used for credit toward a Mathematics, PhD.

Students must complete the following curriculum requirements:

**Coursework (48-60 credits)**

**Core Courses (12 credits)**

Students must earn a grade of 'B' or better in each core course that counts towards the core requirement:

- MATH 675 - Linear Analysis Credits: 3
  Plus any three of the following:
- MATH 621 - Algebra I Credits: 3
- MATH 631 - Topology I: Topology of Metric Spaces Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3
- MATH 685 - Numerical Methods Credits: 3

**Preliminary Written Exam**
Students are required to pass preliminary written exams after completing the core courses, usually by the end of their second year. These exams are based on material presented in three of the five core courses (the student may choose which topics to exclude). These exams are offered twice a year and students may take each exam up to three times. A grade of "pass" on three preliminary written exams is sufficient to satisfy the creative component of the master's degree in mathematics.

Dissertation Advisor and Examination Committee

After passing the preliminary written exam, the student chooses a dissertation advisor and a three person examination committee. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics).

Seminar (6–9 credits)

All PhD students are required to take a 1-credit seminar each semester until they advance to candidacy or have acquired at least 6 credits of MATH 795. A student entering without a master's degree in mathematics should expect to take a total of 6 to 9 credits of MATH 795.

- MATH 795 - Graduate Seminar Credits: 1

Electives (27-42 credits)

Students complete 27-42 credits of approved MATH electives. Courses not designated as MATH courses must be approved by the graduate committee.

Qualifying Examinations

Students are required to take a qualifying exam after passing the preliminary written exam. The qualifying exam will have oral and written components. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics). The qualifying exam covers the equivalent of approximately four courses of material from the major area and three courses from the minor area.

Dissertation Proposal and Advancement to Candidacy

Approximately one semester after passing the qualifying exam, each doctoral student prepares a written dissertation proposal while taking MATH 998. The proposal must be approved by the dissertation committee, which consists of the three qualifying exam committee members, plus a fourth member from outside the Department of Mathematical Sciences. After successfully completing this requirement, the student advances to doctoral candidacy.

Dissertation Research (12–24 credits)

- MATH 998 - PhD Thesis Proposal Credits: 1-9
- MATH 999 - PhD Thesis Research Credits: 1-12

Doctoral Dissertation

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in MATH 999. The dissertation is a written piece of original mathematics that demonstrates a doctoral candidate's mastery of the subject matter. A student is
expected to produce new and original research worthy of publication in a peer-reviewed journal. After the dissertation is completed, the committee will review the dissertation and examine the student in a public oral thesis defense.

Degree Total: 72 credits

Graduate Certificate

Actuarial Sciences Graduate Certificate

Banner Code: SC-CERG-ACTS

College: College of Science
Department: Mathematical Sciences The Actuarial Sciences Graduate Certificate is designed to serve students and professionals in the Washington, D.C. area who are interested in pursuing careers as actuaries. The course content provides students with specific training related to the following exams:

- Society of Actuaries (SOA) Exam FM (formerly Course 2)
- SOA Exam MLC (formerly Course 3)
- SOA Exam C (formerly Course 4)
- VEE for applied statistics (formerly part of Course 4)
- Exam EA-1 and EA-2A (for those pursuing EA designation from the U.S. Treasury)

The courses also provide a solid foundation for the corresponding Casualty Actuary Society (CAS) exams. Preparation for the first exam is equivalent to meeting the prerequisites for the certificate courses in the area of probability and statistics.

The Actuarial Sciences Graduate Certificate may only be pursued on a part-time basis.

Admission Requirements

In addition to fulfilling the Graduate Admission Policies, applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue the Actuarial Sciences Graduate Certificate must have three semesters of calculus, a course in linear algebra (equivalent to MATH 203), a calculus-based course in probability (equivalent to MATH 351), and statistics (equivalent to MATH 352). Completion of the SOA Exam P is also sufficient preparation for the certificate program.

Certificate Requirements

Core Courses (12 credits)

- MATH 551 - Regression and Time Series Credits: 3
- MATH 554 - Financial Mathematics Credits: 3
- MATH 555 - Actuarial Modeling I Credits: 3
- MATH 556 - Actuarial Modeling II Credits: 3

Electives (6 credits)

Choose from the following:
- **MATH 557** - Financial Derivatives Credits: 3
- **MATH 653** - Construction and Evaluation of Actuarial Models I Credits: 3
- **MATH 654** - Construction and Evaluation of Actuarial Models II Credits: 3
- **MATH 655** - Pension Valuation Credits: 3 (recommended only for students who wish to pursue a career as a pension actuary)
- Any other elective course approved by the graduate committee and chosen in consultation with advisor.

**Notes**

**Preparation for the SOA, CAS, and EA Exams**

The graduate certificate coursework provides preparation for SOA, CAS, and EA exams as follows:

- **MATH 551** is the SOA VEE for Applied Statistics and is preparation for part of the CAS Exam 3
- **MATH 554** covers most of the SOA Exam FM material as well as CAS Exam 2 and much of the EA-1 exam
- **MATH 555** and **MATH 556** cover all of the Exam MLC material and most of the CAS Exam 3L as well as the remainder of the EA-1 exam
- **MATH 557** covers all of the SOA EXAM MFE material
- **MATH 653** and **MATH 654** covers all of the SOA Exam C material as well as CAS Exam 4
- **MATH 655** covers all of the EA-2A Exam material

**Counting Actuarial Courses for Other Mathematics Degrees**

A student enrolled in the Actuarial Sciences Graduate Certificate and another graduate degree program in mathematics can count actuarial mathematics courses toward the master's or doctoral degree according to the following rules:

- None of the actuarial mathematics courses MATH 551, MATH 554, MATH 555, MATH 556, MATH 557, MATH 653, MATH 654, MATH 655, can count toward the Mathematics, PhD.
- None of the actuarial mathematics courses MATH 551, MATH 554, and MATH 655 can count toward the Mathematics, MS.
- Up to two of the actuarial mathematics courses MATH 555, MATH 556, MATH 653, and MATH 654 can count toward the Mathematics, MS provided that all other courses counted toward that degree are MATH courses. An exception can be made if the student wishes to count only one actuarial mathematics course from the list toward the Mathematics, MS. In this case, at most one other non-MATH course can be counted toward the degree with approval of the graduate coordinator. An additional exception is made if the student has completed the actuarial sciences certificate before being admitted to the MS degree program: in this case, up to four of these courses can count toward the MS degree.

**Counting Actuarial Courses toward the Statistical Science MS Degree**

A student enrolled in this certificate and in the Statistical Science, MS can count MATH 555 and MATH 556 as approved non-STAT elective courses and can count MATH 653 and MATH 654 as STAT electives when designing a curriculum for this degree. The full curriculum should be designed in consultation with the student's Statistics Department advisor.

**Certificate Total: 18 credits**

**Master of Science**
Mathematics and Statistical Science Dual-Degree MS (COS)

Banner Codes: SC-MS-MATH, VS-MS-STAT

Schools: College of Science and The Volgenau School of Engineering
Departments: Department of Mathematical Sciences and Department of Statistics

This program allows students to earn a Mathematics, MS and a Statistical Science, MS by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for both the Mathematics, MS and the Statistical Science, MS programs. A joint faculty committee from the Department of Mathematical Sciences and the Department of Statistics make final admission decisions into the dual-degree program.

MS-MATH/STAT Dual-Degree Requirements

The dual-degree program requires a total of 48 credits as specified below:

- MATH 621 - Algebra I Credits: 3
- MATH 675 - Linear Analysis Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3 or MATH 678 - Partial Differential Equations Credits: 3
- MATH 685 - Numerical Methods Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics I Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 654 - Applied Statistics II Credits: 3

Elective Credits

- 12 elective credits in MATH courses numbered 615 or higher, excluding MATH 653, MATH 654, MATH 655, and MATH 799.
- 12 elective credits from any STAT courses numbered 540-775.

Total: 48 credits

Notes:

- Students in either the BS/Accelerated MS in Mathematics program or the BS(selected)/Accelerated MS in Statistical Science program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the Mathematics, MS or the Statistical Science, MS.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.
Mathematics, MS

Banner Code: SC-MS-MATH

College: College of Science
Department: Mathematical Sciences The Department of Mathematical Sciences offers courses in pure and applied mathematics leading to the master of science degree in mathematics.

An accelerated master's option is available to students in the bachelor's program. See Mathematics, BS/Mathematics, Accelerated MS for specific requirements.

Admission Requirements

In addition to meeting the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog, applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue the Mathematics, MS must have taken an upper-division course in advanced calculus (equivalent to MATH 315), an abstract algebra course (equivalent to MATH 321) and an upper-division course in linear algebra (equivalent to MATH 322). Students should have some computer knowledge.

Assistantships

A limited number of merit-based teaching assistantships are available for students taking at least 6 graduate credits each semester. Other sources of support, such as research assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center and the Math Learning Center.

Degree Requirements

Candidates for the Mathematics, MS must satisfy all requirements for master's degrees as expressed in the Graduate Policies section of this catalog.

Please note that MATH 500 through MATH 614 cannot be used for credit towards the Mathematics, MS, with the exception of MATH 555 and MATH 556.

Coursework (24 credits)

The following course is required:

- MATH 675 - Linear Analysis Credits: 3

Coursework Options

Choose three courses from the following:

- MATH 621 - Algebra I Credits: 3
- MATH 631 - Topology I: Topology of Metric Spaces Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3
- MATH 685 - Numerical Methods Credits: 3
Additional Approved Coursework

Choose four approved graduate courses (12 credits), at least two of which are MATH courses. All four courses must be approved by the student's advisor.

Courses not listed as MATH courses must be approved by the graduate committee.

Different rules apply if the student wishes to count graduate actuarial courses toward his or her degree (consult the graduate coordinator).

Research and Creative Component (6 credits)

A student may fulfill the research and creative component of the Mathematics, MS degree in any one of the following three ways:

Thesis Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the Department of Mathematical Sciences, one member may be from a related field. The student completes a thesis under the direction of the committee chair. The thesis work is typically completed while students are registered for 6 credits of MATH 799. A thesis proposal and thesis are submitted in accordance with George Mason University’s Graduate Policies. The student must give an oral defense of the thesis to the committee and the George Mason community at large. Students are expected to respond to questions on the thesis and related material. The committee determines whether the defense is satisfactory.

- MATH 799 - MS Thesis Credits: 1-6

Paper Presentation Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the Department of Mathematical Sciences, one member may be from a related field. The student gives an oral presentation of a paper (or series of papers or book chapter) chosen in consultation with the chair of the committee and approved by the full committee. The chosen material must be distinct from work completed in fulfillment of course requirements. The oral presentation is given to the committee and the Mason community at large. Students are expected to respond to questions on the paper and related material. The committee determines whether the defense is satisfactory.

- Students choosing this option take 6 additional credits of electives.

Preliminary Exams for the PhD

The research and creative component of the Mathematics, MS can also be fulfilled by passing three preliminary written examinations, as required for the Mathematics, PhD degree.

Degree Total: 30 credits

Non-Degree

Mathematics for School of Business Students Minor
Minor Requirements

To receive this minor, students must complete 20 credits, 8 of which must be unique to the minor, with a minimum GPA of 2.00, including:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 351 - Probability Credits: 3

Additional Mathematics Course

Choose from:

- MATH 352 - Statistics Credits: 3
- MATH 441 - Deterministic Operations Research Credits: 3
- MATH 554 - Financial Mathematics Credits: 3

Minor Total: 20 credits

Mathematics Minor

Banner Code: MATH

College: College of Science
Department: Mathematical Sciences To receive the Mathematics Minor, students must complete 21 credits, 8 credits of which are unique to the minor and not applied toward the major. Students must earn a minimum 2.00 GPA in courses applied to the minor.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Required Courses (15 credits)

Students must earn a 2.00 or better in MATH 290.

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3 or MATH 215 - Analytic Geometry and Calculus III (Honors) Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3 or MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3
Mathematics Elective Course (3 credits)

Students must earn a 2.00 or better in the course chosen from:

- MATH 315 - Advanced Calculus I Credits: 3
- MATH 321 - Abstract Algebra Credits: 3
- MATH 322 - Advanced Linear Algebra Credits: 3

General Elective Course (3 credits)

Choose from:

- One 3-credit math course at the 300 or 400 level (excluding MATH 400)
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Minor Total: 21 credits

Neuroscience Program

Phone: 703-993-4333
Web: neuroscience.gmu.edu/

Faculty

**Director:** Kabbani

**Professors:** Ascoli, Barreto, Blackwell, Cebral, Flinn, Houser, Jafri, Klimov, McCabe, Olds, Sander

**Associate Professors:** Dumas, Fryxell, Greenwood, Kabbani, Krueger, McDonald, Peixoto, Peterson, Sikdar, So, Thompson

**Assistant Professors:** Joiner

Neuroscience at George Mason University is an interdisciplinary field, grounded in biology, chemistry, and psychology. Research and education in neuroscience at Mason is conducted under the auspices of the Neuroscience Advisory Council (NAC). The Neuroscience, BS is administered by the Department of Psychology in the College of Humanities and Social Sciences, and the Neuroscience, PhD is administered by the College of Science. The neuroscience faculty at Mason comprise a unique blend of traditional, experimental, and theoretical scientists. They include faculty in the Psychology; Molecular Neuroscience; Molecular and Microbiology; Physics and Astronomy; Bioinformatics and Computational Biology, and Electrical Engineering departments.

Research in neuroscience focuses on the broad areas of behavior, anatomy, physiology, neuropharmacology, computational modeling, and informatics. Some of the key research initiatives currently underway at Mason include studies of:

- Plasticity mechanisms underlying neurological development
- Identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain
- Biochemical dynamics in disorders of the basal ganglia
- Computational methods for simulation of complex biological systems
- Description and generation of neuronal morphology
- Adaptive control for stabilization of epilepsy
- Role of metals in memory and Alzheimer's disease
- Biochemical/metabolic simulations at the organism level
• Cellular and sub-cellular models of associative learning

Courses

The program offers all courses designated NEUR in the Courses section of this catalog. The College of Science manages NEUR's graduate course offerings and the College of Humanities and Social Sciences manages NEUR's undergraduate course offerings.

Doctor of Philosophy

Neuroscience, PhD

Banner Code: SC-PHD-NEUR

College: College of Science, College of Humanities and Social Sciences, and Krasnow Institute for Advanced Study
Department: Neuroscience Program

The program focuses on the complexity of the brain and addresses the challenge of developing an integrative understanding of cognition and higher brain function. In response to this challenge, the rapidly developing field of neuroscience has produced an exponential increase in the amount of data available to investigators as they develop new theories of brain function and new hypotheses to test. The main objective of the program is to prepare students to participate at the cutting edge of this exciting field in academia, industry, and government. The program provides students with a rich interdisciplinary intellectual environment that fosters the development of the skills they will need to successfully pursue research careers.

Current faculty research focuses on the broad areas of behavior, anatomy, physiology, neuropharmacology, molecular biology, computational modeling, and informatics. External research collaborations exist with federal agencies, private and not-for-profit corporations, and other universities. The scope of research ranges from the subcellular and molecular level (in the context of such phenomena as drug addiction and the biological basis of schizophrenia) to the systems and behavioral level.

Current research projects include plasticity mechanisms supporting development, network formation and information processing, cellular and subcellular models of associative learning, biochemical dynamics in disorders of the basal ganglia, computational methods for simulation of complex biological systems, role of metals in memory and Alzheimer's disease, and dynamical behavior of neurons and networks of neurons, and identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain.

Admission Requirements

Applicants should have a bachelor's degree in a relevant field and undergraduate courses in organic chemistry, cell biology, and integral calculus. Coursework in biochemistry (e.g. BIOL 483) cell biology (e.g. BIOL 484) and molecular genetics (e.g. BIOL 482) is highly recommended. Admission requires a minimum GPA of 3.25 in undergraduate work and acceptable GRE scores. In addition, the applicant's goals statement should relate to the research interests of at least one faculty member in the program and include the names of two faculty members who may be suitable as advisors or supervisory committee members. To apply, complete the George Mason University Graduate Application, supply a goals statement, two copies of official transcripts from each college and graduate institution attended, three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant's academic or research capabilities, and an official report of scores obtained on the GRE-GEN. The GRE-SUB is optional. TOEFL scores are required of all international applicants.

Reduction of Credit
For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. See the Graduate Policies section for more information.

**Transfer of Credit**

An alternative to the reduction of credit is a transfer of credit. With this option, up to 24 credits of previous, relevant graduate coursework may be transferred into the program, provided those credits have not been applied toward a previous degree.

**Degree Requirements**

Students must satisfy all requirements for doctoral degrees expressed in the Graduate Policies section of this catalog in addition to the degree requirements listed below.

**Doctoral Coursework (48 credits)**

**Core Science (6-7 credits)**

- NEUR 702 - Research Methods Credits: 3  
  And one statistics course chosen from the following:  
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3  
- PSYC 611 - Advanced Statistics Credits: 4  
- STAT 535 - Analysis of Experimental Data Credits: 3  
- STAT 544 - Applied Probability Credits: 3  
- STAT 554 - Applied Statistics I Credits: 3

**Core Neuroscience (12 credits)**

- NEUR 601 - Developmental Neuroscience Credits: 3  
- NEUR 602 - Cellular Neuroscience Credits: 3  
- NEUR 603 - Mammalian Neuroanatomy Credits: 3  
- NEUR 701 - Neurophysiology Laboratory Credits: 3

**Rotations and Readings (9 credits)**

This course will be taken three times.

- NEUR 703 - Laboratory Rotation and Readings Credits: 3

**Electives (20-21 credits)**

- 20-21 credits of electives

**Publication**
An additional requirement for graduation calls for students to have at least one publication (in print or in press) in a refereed journal.

**Doctoral Committee and Proposal**

When coursework is nearing completion, the student should form a doctoral committee and start preparing their dissertation proposal. Students in consultation with their advisor identify which faculty are appropriate to be a part of their committee. The dissertation committee administers the qualifying exam and evaluates the dissertation proposal as well as the dissertation itself. At least one of the committee members must be outside of the dissertation advisor's department.

**Candidacy Examination and Advancement to Candidacy**

The doctoral candidacy examination includes written and oral components. After passing the candidacy exam and receiving committee approval for the dissertation proposal, the student is advanced to doctoral candidacy.

**Dissertation Research (24 credits)**

Note: No more than 24 combined credits from NEUR 998 and NEUR 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of NEUR 998.

- NEUR 998 - Dissertation Proposal Credits: 1-6
- NEUR 999 - Doctoral Dissertation Credits: 1-12

**Degree Total: 72 credits**

**School of Systems Biology**

Phone: 703-993-8400  
Web: ssb.gmu.edu

**Faculty**

**Professors:** Bailey (distinguished), Chandhoke, Kashanchi, Klimov, Liotta, Petricoin, Popov, Seto, Soyfer (distinguished university professor), Vaisman (Acting Director), Willett, Wu

**Associate professors:** Baranova, Fryxell, Kehn-Hall, Luchini, van Hoek

**Assistant professors:** Hakami, Narayanan

**Adjunct faculty:** Solka

**Affiliate faculty:** Ali, Bokhari, Campbell, Carneiro de Silva, Cao, Cunningham, Cowley, Cox, Ellis-Behnke, Kim, Manyam, Masso, Matson, Mayburd, Mir, Morozov, Moskalev, Munkvold, Nierman, Nikolsky, Pitt, Rajasimha, Rao, Reck, Reilly, Smith, Tang, Van Tassel, Ward, Weller, Wu

**Emeritus:** Isbister, Royt

The School of Systems Biology resulted from the merger of the Department of Molecular and Microbiology with the Department of Bioinformatics and Computational Biology. The school offers undergraduate and graduate degree programs in bioinformatics and computational biology, and graduate degree programs in biology and biosciences. The school also offers research
opportunities at the graduate and undergraduate levels. For additional details about current faculty research activities, please visit the school's website.

**Courses**

The school offers all graduate and undergraduate courses designated BINF and BIOS in the Courses section of this catalog, as well as all BIOL graduate courses.

**Other Undergraduate Programs**

The School of Systems Biology works closely with and provides faculty and administrative support to the Department of Biology, through which the Biology, BA and Biology, BS degrees are offered. Refer to the Department of Biology for more information on bachelor's degrees in biology.

**Policy on Using Laboratories**

Only authorized experiments and exercises may be carried out in the school's research and teaching laboratories and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

**Policy on Using Organisms in Classes**

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

**Biology, Bachelor's/Accelerated Master's Degree**

Information regarding this accelerated master's program can be found in the Biology, BS/Biology, Accelerated MS listing in this catalog.

**Bachelor/Accelerated Master's**

**Biology, BS/Biology, Accelerated MS**

College: College of Science
Departments: Biology and School of Systems Biology Qualified undergraduates may be provisionally admitted into an accelerated master's program in order to obtain both a BS and an MS within an accelerated time frame. This program is open only to Biology, BS students who wish to pursue the microbiology or molecular biology concentrations within the Biology, MS program. Students admitted to this accelerated master's program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these graduate courses and meet the application requirements, they are granted advanced standing in the master's program and must then complete an additional 24 credits to receive the master's degree.

See the Bachelor's/Accelerated Master's Degrees section of this catalog for policies related to this program.
Students in an accelerated degree program must fulfill all university requirements for the bachelor's and master's degrees. For policies governing all degrees, see the Academic Policies section of this catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Application information for this accelerated master's program can be found on the school's website.

Successful applicants will have an overall undergraduate GPA of at least 3.20. Additionally, they will have completed the following courses with a GPA of 3.00 or higher: BIOL 213, BIOL 214, BIOL 308, BIOL 310, BIOL 311, CHEM 313, and CHEM 315. Applicants must also have a graduate faculty advisor's written support for the application.

Accelerated Option Requirements

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar) to the College of Science's Office of Academic and Student Affairs. Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the microbiology or molecular biology concentrations.

Reserve Graduate Credit

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

Doctor of Philosophy

Bioinformatics and Computational Biology, PhD

Banner Code: SC-PHD-BCB

College: College of Science
Department: School of Systems Biology In the field of bioinformatics and computational biology, specialists collect, store, analyze, and present complex biological data. Through this work, critical contributions are made to disease detection, drug design, forensics, agriculture, and environmental sciences through the combination of biological analysis and high-performance computing. The main objective of this doctorate is to educate the next generation of computational biologists for careers in academia, industry, and government. The program provides students with interdisciplinary academic training that includes fundamental bioscience courses as well as core and advanced courses in bioinformatics. Courses are designed to be completed in approximately two years. Completion of coursework, the comprehensive exam, and a successful dissertation proposal results in advancement to candidacy status. In the final phase, students focus on research that culminates in a dissertation.

The program is structured to be accessible for full and part-time students. Many of the courses are offered in a distance-learning format, allowing students to participate in class without having to travel to campus; visit Mason Online for details.

Admission Requirements
Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a minimum GPA of 3.25 in the last earned degree. Applicants should have taken courses in molecular biology, cell biology, biochemistry, genetics, calculus, physical chemistry, computer programming and data structures, and probability and statistics. Students with deficiencies in one or more of these areas may be admitted provisionally and required to take additional courses, some of which may not be applicable to the degree's course total. Students whose undergraduate record does not include basic biochemistry will be required to take a basic course prior to BINF 701.

To apply, prospective students should submit the Mason Graduate Application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE general exam. Scores should be in the 45th percentile or above. The GRE requirement for admission to the doctoral program will be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL or IELTS scores are required of all international applicants.

Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program director and the college's associate dean for student affairs. See the Graduate Policies section for more information.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

Doctoral Coursework (48-60 credits)

Fundamental Bioscience Courses (6 credits)

- BINF 701 - Systems Biology Credits: 3
- BINF 702 - Biological Data Analysis Credits: 3

Core Bioinformatics Courses (13 credits)

- BINF 690 - Numerical Methods for Bioinformatics Credits: 3
- BINF 705 - Research Ethics Credits: 1
- BINF 730 - Biological Sequence and Genome Analysis Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 740 - Introduction to Biophysics Credits: 3

General Electives (23-35 credits)

23-35 credits of approved general electives or independent research.

Lab Rotation (3 credits)
• BINF 703 - Bioinformatics Lab Rotation Credits: 1 (taken three times)

Colloquium (3 credits)

• BINF 704 - Colloquium in Bioinformatics Credits: 1 (taken three times)

Doctoral Committee and Advancement to Candidacy

By the end of the semester when coursework is completed, the student must form a doctoral committee made up of a minimum of three graduate faculty members and take a written comprehensive exam. The exam includes written and oral components. Upon passing the comprehensive exam and submitting an acceptable dissertation proposal, the student is advanced to doctoral candidacy to begin the dissertation writing phase.

Dissertation Research (12-24 credits)

A minimum of 12 and maximum of 24 combined credits from BINF 998 and BINF 999 may be applied toward satisfying doctoral degree requirements. Students must take at least 3 credits of BINF 999.

• BINF 998 - Doctoral Dissertation Proposal Credits: 1-12
• BINF 999 - Doctoral Dissertation Credits: 1-12

Doctoral Dissertation

After advancing to doctoral candidacy, students work on their doctoral dissertation while enrolled in BINF 999. The dissertation should represent a significant contribution that is suitable for publication in a refereed scientific journal. The dissertation must be defended in a public forum before the dissertation committee and other interested faculty.

Degree Total: 72 credits

Biosciences, PhD

Banner Code: SC-PHD-BIOS

College: College of Science
Department: School of Systems Biology This program is a research-oriented field of study that prepares students for significant contributions in academic or industrial settings. It is broken down into two concentrations, Cell and Molecular Biology and Microbiology and Infectious Disease.

The academic component is a three-tiered structure. The first tier provides a set of core courses designed to advance research skills across all disciplines. The second tier comprises additional core courses and elective courses. The first two tiers are designed to be completed in approximately two years, including the comprehensive qualifying exam. Only on completion of these requirements, the qualifying exam, and a successful dissertation proposal can the students advance to candidacy status. The third tier focuses on research and culminates in a dissertation.

Admission Requirements
In addition to materials required of all applicants for graduate study as specified in the Graduate Admission Policies section of this catalog, the following is also required:

- Minimum 3.25 GPA in previous coursework with significant training in the biological sciences.
- Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant's academic or professional capabilities.
- Statement of purpose consistent with the research interests of at least one faculty member in the program.
- Scores on GRE general exam (required) and biology or biochemistry subject exam (recommended) taken within the past five years prior to date of application submission. The GRE exam is waived if applicants hold a master's Degree from a fully-accredited U.S. university at the time of their application.
- A TOEFL score of 575 on the paper-based exam or 230 on the computer-based exam is required of international students.

An interview may also be required. Applications should be submitted by January 1st for fall admission. Under unusual circumstances, applications may be considered for spring admission if they are received by October 1st. Applications will be considered until positions are filled. Students are encouraged to meet application deadlines to be considered for scholarships and stipends.

Strong candidates who lack several prerequisites may be admitted to provisional status. Removal from provisional status and continuation in the program is contingent on earning a GPA of 3.25 in the program's fundamental courses, plus completion of missing prerequisites.

Students who have not taken a course in basic biochemistry will be required to complete one prior to BIOS 701.

**Reduction and Transfer of Credit**

**Reduction of Credit**

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs.

**Transfer of Credit**

Graduate credits taken previously and not used toward another degree may be transferred, subject to the approval of the advisor, the program director, and the associate dean.

See the Graduate Policies section for more information.

**Degree Requirements**

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

Students in the doctoral program are required to present two research papers at a meeting or conference any time before graduation.

**Doctoral Coursework (48-60 credits)**

**Bioscience Core (12 credits)**

- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
• BIOS 703 - Laboratory Rotation Credits: 3 (taken twice for a total of 6 credits)
• BIOS 704 - Topics in Biosciences Credits: 1 (taken for a total of 3 credits)

Concentration (12 credits):

▲ Concentration in Cell and Molecular Biology (CMB)

This concentration prepares students for significant contributions in an academic or industrial research career. Coursework covers microarray analysis of gene expression, proteome analysis, sequencing and analysis of gene polymorphisms, gene and genome evolution, molecular studies of disease mechanisms, mechanisms of toxicology and mutagenesis, developmental neuroscience, and biotechnological applications.

Students choose 12 credits from the following courses:

• BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
• BIOS 741 - Genomics Credits: 3
• BIOS 742 - Biotechnology Credits: 3
• BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
• BIOS 744 - Molecular Genetics Credits: 3

Concentration Total: 12 credits

▲ Concentration in Microbiology and Infectious Disease (MID)

Students in this concentration will be prepared for employment in academia, government, or industry. By stressing mechanisms of pathogenicity, physiology, metabolism, and genomic and proteomic analysis of pathogens, students will have a firm foundation for future research in infectious disease. Students will also be introduced to advanced laboratory practices, such as animal research methodologies and biocontainment laboratory work.

Students choose 12 credits from the following courses:

• BIOL 553 - Advanced Topics in Immunology Credits: 3
• BIOL 563 - Virology Credits: 3
• BIOL 669 - Pathogenic Microbiology Credits: 3
• BIOL 715 - Microbial Physiology Credits: 3
• BIOL 718 - Techniques in Microbial Pathogenesis Credits: 3

Concentration Total: 12 credits

Elective Courses (24-36 credits)

24-36 credits chosen from the following to complete 72 credits:

• BIOL 564 - Techniques in Virology Credits: 2
• BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
• BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
• BIOL 580 - Computer Applications for the Life Sciences Credits: 3
• BIOL 685 - Emerging Infectious Diseases Credits: 3
• BIOS 701 - Systems Biology Credits: 3
• BIOS 702 - Research Methods Credits: 3
• BIOS 710 - Current Topics in Bioscience Credits: 1-3
• BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
• BIOS 741 - Genomics Credits: 3
• BIOS 742 - Biotechnology Credits: 3
• BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
• BIOS 744 - Molecular Genetics Credits: 3
• BIOS 760 - Seminar in Molecular Systematics Credits: 1-3
• BIOS 898 - Directed Studies in Biosciences Credits: 1-12
• BIOS 899 - Directed Research in Biosciences Credits: 1-12
• BINF 633 - Molecular Biotechnology Credits: 3
• BINF 636 - Microarray Methodology and Analysis Credits: 3
• BINF 705 - Research Ethics Credits: 1

Dissertation Committee

Upon admission to the program, each student is assigned an advisor from the bioscience faculty. The advisor may be changed by mutual consent of student and advisor, or petition to the program director and associate dean. With their advisor, students adopt an individual program that focuses on a specific area of research.

By the end of the fourth semester of coursework, students assemble a dissertation committee of four graduate faculty members with representation from at least two academic departments. The faculty advisor and the program director approve the program of study.

Qualifying Examination

On nearing completion of course requirements, students take a qualifying exam with a written and an oral component. At the discretion of the committee, the written qualifying exam may be retaken once if the student’s performance was deemed below satisfaction.

Advancement to Candidacy

Upon successful completion of the qualifying exam, the majority of all coursework, and an accepted dissertation proposal, students will be recommended for advancement to candidacy by the committee and the program director.

The semester after advancement to candidacy, students are eligible to enroll in dissertation research (BIOS 999). Students must review their progress on the dissertation with their graduate committee on a regular basis until graduation.

Dissertation Research (12–24 credits)

Note: No more than 24 combined credits from BIOS 998 and BIOS 999 may be applied toward satisfying doctoral degree requirements. Students register for a minimum of 3 credits of BIOS 999 in the first semester of advancement.

• BIOS 998 - Doctoral Dissertation Proposal Credits: 1-6
• BIOS 999 - Doctoral Dissertation Research Credits: 1-12

Doctoral Dissertation
After advancing to doctoral candidacy, students work with their dissertation committee to develop their dissertation proposal into a completed doctoral dissertation. The dissertation research should represent a significant contribution that is publishable in a refereed scientific journal. When the dissertation is complete, students will present their results to their graduate committee and defend their dissertation in a public forum.

Degree Total: 72 credits

Graduate Certificate

Bioinformatics and Computational Biology Graduate Certificate

Banner Code: SC-CERG-BCB

College: College of Science
Department: School of Systems Biology This graduate certificate program addresses the growing national and regional demand for trained computational biologists by combining a solid foundation in biotechnology with computational skills relevant to bioinformatics. With online and in-classroom courses, the flexibility of this certificate's structure permits students to custom design their curriculum under an advisor's guidance, making the Bioinformatics and Computational Biology Graduate Certificate especially relevant for students employed in today's diverse Northern Virginia high-technology workplace. Ideal candidates for this certificate are those who have a background in biological and computer sciences, and are currently working in or planning to enter the fields of biotechnology or bioinformatics. The certificate is also highly relevant for students who are interested in advancing their career goals but may not have adequate time available to undertake a graduate degree program.

All courses are also offered online, allowing students to participate in class without having to travel to campus. Further information can be found on the Office of Distance Education's website.

The Bioinformatics and Computational Biology Graduate Certificate may be pursued on a part-time or full-time basis.

Admission Requirements

Applicants should hold a BA or BS degree in a discipline related to biological or computer science from a regionally accredited university, with a minimum GPA of 3.00. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, or statistics, and should also possess working knowledge of a computer programming language. To apply, prospective students should complete a Mason Graduate Application, supply two copies of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required of all international applicants.

Tuition

The certificate program is a professional certification program that charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard George Mason University graduate tuition rate for students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition is used to fund continuing improvements in the COS educational facilities used to support the certificate program.

Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS. In addition, students may not apply previous credit hours to the certificate program from another certificate, degree, or nondegree program because of the differential (premium) tuition rate.

Certificate Requirements
Required Core Courses (9 credits)

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3

Elective Courses (6 credits)

Choose two of the following courses, or other courses as approved by the coordinator:

- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 636 - Microarray Methodology and Analysis Credits: 3
- BINF 639 - Introduction to Biometrics Credits: 3
- BINF 730 - Biological Sequence and Genome Analysis Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 732 - Genomics Credits: 3
- BINF 733 - Gene Expression Analysis Credits: 3
- BINF 734 - Advanced Bioinformatics Programming Credits: 3
- BINF 739 - Topics in Bioinformatics Credits: 1-3

Certificate Total: 15 credits

Personalized Medicine Graduate Certificate

Banner Code: SC-CERG-PRSM

College: College of Science
Department: School of Systems Biology This certificate is based upon a set of core courses that currently support the Biology, MS, the Biosciences, PhD, the Bioinformatics and Computational Biology, MS, and the Bioinformatics and Computational Biology, PhD degree programs. Students completing this certificate will receive the most up-to-date advanced education available in the region. Completion of the certificate will enhance the careers of those students who are already working in this area, and can also serve as a useful intermediate step towards later enrollment in master's or doctoral programs.

Courses are generally offered in the late afternoon or in the evening to accommodate students with full-time employment outside of the university.

Students may not enroll initially in any College of Science master's or doctoral program and later transfer into this certificate program.

This certificate charges students a differential tuition rate of $100 per credit hour, which is added to the standard graduate tuition rate (regardless of in or out of state status).

This certificate may be pursued on a part-time or full-time basis.

For policies governing all graduate degrees, see the Academic Policies section of this catalog.

Admission Requirements
Applicants to all graduate programs at George Mason University must meet the graduate admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Prospective students should hold an undergraduate GPA of 3.00 or current employment in clinical or translational research, diagnostics lab, or biological data analysis field.

To be considered for admission, applicants must submit the Mason Graduate Application, all undergraduate transcript(s), three letters of recommendation, a statement of interest, and GRE general scores or MCAT scores. Recommended minimum GRE scores are approximately 303 on the new scale, or MCAT scores that exceed 26, each section being scored five or above.

Certificate Requirements

Students are required to complete the coursework indicated below:

Required Core Courses (9 credits)

- BIOL 562 - Personalized Medicine Credits: 3
- BIOL 572 - Human Genetics Credits: 3 or BIOL 666 - Human Genetics Concepts for Health Care Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3

Elective Courses (6 credits)

Choose any of these electives:

- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 566 - Cancer Genomics Credits: 3
- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
- BIOL 575 - Selected Topics in Genetics Credits: 1-4
- BIOL 669 - Pathogenic Microbiology Credits: 3
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1
- BIOS 701 - Systems Biology Credits: 3
- BIOS 741 - Genomics Credits: 3
- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 733 - Gene Expression Analysis Credits: 3
- Students may choose to take up to 4 credits of BIOL 693 or BINF 796 or their combination. Credit for these two courses may only be applied towards the certificate's elective courses if the research topic is relevant to personalized or translational medicine.

Certificate Total: 15 credits

Master of Science

Bioinformatics and Computational Biology, MS

Banner Code: SC-MS-BCB
College: **College of Science**
Department: **School of Systems Biology** In the field of bioinformatics and computational biology, specialists collect, store, analyze and present complex biological data. Through this work, critical contributions are made to basic biology, disease detection, drug design, modeling biosystems, forensics, agriculture, and environmental sciences through the combination of biological analysis and high-performance computing. This degree addresses the growing national and regional demand for trained computational biologists. It combines a solid foundation in biotechnology with the computational skills required for bioinformatics. The flexibility of the degree structure permits students to custom design their curriculum under an advisor's guidance, making the Bioinformatics and Computational Biology, MS especially relevant for students employed in today's diverse biotechnology workplace. Students completing the program are qualified to pursue careers that require knowledge of current bioinformatics methods and applications, and the ability to develop and/or use new bioinformatics software.

Courses are generally offered in the late afternoon or early evening to accommodate students with full-time employment outside the university. Students employed at area biotechnology organizations may take up to 6 credits (out of 31) for bioinformatics work done on the job, under the guidance of a faculty member. This work-related project may be applied as either a 3-credit research project or a 6-credit master's thesis.

All courses are also offered online, allowing students to participate in class without having to travel to campus. Further information can be found on the Office of Distance Education's website.

**Admission Requirements**

Applicants should have a bachelor's degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should complete a Mason Graduate Application, supply two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and official scores obtained on the GRE general exam. The GRE requirement will be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required for all international applicants.

**Degree Requirements**

Candidates must successfully complete the following coursework:

**Bioinformatics Core Courses (12 credits)**

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
- BINF 701 - Systems Biology Credits: 3

**Advanced Bioinformatics (3 credits)**

- 3 credits of advanced bioinformatics courses numbered BINF 730 and above

**Bioinformatics Seminar (1 credit)**

- BINF 704 - Colloquium in Bioinformatics Credits: 1
Research Project or Thesis and Electives (15 credits)

Students must complete either a research project or a master's thesis and electives courses:

Research Project

- BINF 798 - Research Project Credits: 3
- 12 credits of electives in bioinformatics and computational biology, biology and biotechnology, or computational sciences, as approved by the advisor

Thesis

- BINF 799 - Master's Thesis Credits: 1-6 (6 credits required)
- 9 credits of electives in bioinformatics and computational biology, biology and biotechnology, or computational sciences, as approved by the advisor

Degree Total: 31 credits

Bioinformatics Management, MS

Banner Code: SC-MS-BNFM

College: College of Science
Department: School of Systems Biology This degree addresses the regional and national need for technically trained managers who will be able to lead teams of bioinformaticians in both the public and private sectors. The degree combines a solid foundation in bioinformatics research, tools, and techniques, with the management skills needed to address the associated legal, ethical, managerial, and business issues. The Bioinformatics Management, MS is intended for:

- Students seeking advancement in their current bioinformatics careers that requires an advanced degree in bioinformatics combined with management expertise.
- Students with a general background in biological science or computational methods who are planning to enter the field of bioinformatics as managers and would like to strengthen their bioinformatics and managerial expertise.

Admission Requirements

Applicants should have a bachelor's degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should submit the Mason Graduate Application, supply two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and official scores obtained on the GRE general exam. The GRE requirement will be waived if the student holds a master's degree from a U.S. institution. TOEFL or IELTS scores are required of all international applicants.

Degree Requirements

Candidates must successfully complete the following coursework:
Bioinformatics Core Courses (15 credits)

Foundational courses in modern biotechnology, tools and methods for bioinformatics analysis, and methods for creating customized bioinformatics tools:

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
- BINF 730 - Biological Sequence and Genome Analysis Credits: 3

One of the following:

- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 636 - Microarray Methodology and Analysis Credits: 3
- BINF 650 - Introduction to Bioinformatics Database Design Credits: 3

Management Core Courses (12 credits)

Foundational courses in management theory related directly to the management of scientific programs and personnel (3 credits required in each):

- MBA 638 - Operations Management Credits: 0-3
- MBA 712 - Project Management Credits: 0-3
- TECM 615 - Decision Making Using Accounting and Financial Data Credits: 3
- TECM 640 - Management of Consulting and Technical Professionals Credits: 1-3

Capstone Research Project (3 credits)

Focusing on bioinformatics management issues and techniques:

- BINF 798 - Research Project Credits: 3

Degree Total: 30 credits

Biology, MS

Banner Code: SC-MS-BIOL

College: College of Science

Department: School of Systems Biology This program provides advanced training for college graduates or professionals seeking careers in the biotechnology industry or biodefense, as well as more traditional careers in biomedical research, teaching, evolutionary biology, and animal biology. Master's level concentrations are available in microbiology and infectious disease, molecular biology, neuroscience, evolutionary biology, and translational and clinical research. Alternatively, students may choose the program in general biological sciences, which allows flexibility to build a degree program tailored to a specific research or career interest.

An accelerated master's option is available to students currently enrolled in the Biology, BS at George Mason University. See Biology, BS/Biology, Accelerated MS for specific requirements.
Admission Requirements

Applicants to all graduate programs at George Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Applicants to the Biology, MS program must have a bachelor's degree in biology or its equivalent. All MS concentrations require a GPA of 3.00 in biology coursework or in the last 60 credits of undergraduate study. Students must also submit three letters of recommendation and scores on the GRE general exam. Exam scores should be in the 45th percentile or above. Admission is contingent on acceptance by a faculty research advisor.

Students who choose the concentration in Microbiology and Infectious Disease (MID) must have a lecture and lab course in microbiology and a lecture course in biochemistry.

Students who choose the Translational and Clinical Research concentration may submit MCAT scores in place of GRE general exam scores.

Students who choose the Evolutionary Biology concentration must also submit a personal statement/statement of interest consistent with at least one faculty member's research program. GRE score should be approximately 303.

Degree Requirements

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Program of Study

The faculty advisor and the student work together to develop a program of study that best fits the student's background and interests. The student must submit a program of study to the program director for approval within the first 12 credits of coursework. By the end of the 2nd semester of coursework, students will form a graduate committee made up of three faculty members. At least two committee members must be faculty in the School of Systems Biology.

Concentration Options

Candidates for the Biology, MS focus their study in one of five approved concentrations below, or by completing coursework for the program in biological sciences in an area of study chosen in consultation with the student's advisor and program director.

Master's level concentrations in biology are available in:

- Microbiology and Infectious Disease (MID)
- Molecular Biology (MOB)
- Neuroscience (NEUR)
- Evolutionary Biology (EB)
- Translational and Clinical Research (TCR)

Research Options

Students have the option to complete a 3-6 credit master's thesis (BIOL 799) or a 1-3 credit research project (BIOL 798). In accordance with Mason Graduate Policies, the same quality of work is expected of students regardless of which option they choose.
• **Thesis**: In general, the MS thesis is most appropriate for students planning or considering a research career. Students pursuing the thesis option must write a formal thesis that meets the requirements of the school and must defend their thesis and present their results in a public seminar.

• **Research Project**: The MS project is most appropriate for students who have scheduling commitments, such as a full-time job, that may preclude performing a complete series of laboratory experiments. Students pursuing the project option must successfully complete written and oral comprehensive exams.

MS without Concentration (30 credits)

Program in Biological Sciences

This program is for students who wish to specialize in an area not covered by the concentrations described below.

Research Methodology (1-3 credits)

• BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2 or BIOS 702 - Research Methods Credits: 3

Seminar (2 credits)

• BIOL 692 - Seminar in Biology Credits: 1 or BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

Research (1-6 credits)

Choose either:

• 1-3 credits of BIOL 798 - Master's Research Project Credits: 1-3
• **Or** 3-6 credits of BIOL 799 - Thesis Credits: 1-6

Electives (19-26 credits)

• 19–26 credits of electives in BIOL, BIOS, or related areas as approved by the student's advisor and the program director. A partial list of recommended electives is provided at the end of the concentration listings below.

MS with Concentration (30 credits)

▲ **Concentration in Microbiology and Infectious Disease (MID)**

Students in the microbiology and infectious disease concentration complete the degree as follows:

Research Methodology (1-3 credits)

• BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2 or BIOS 702 - Research Methods Credits: 3
Core Biology (12 credits)

Choose four courses from the following:

- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 563 - Virology Credits: 3
- BIOL 669 - Pathogenic Microbiology Credits: 3
- BIOL 715 - Microbial Physiology Credits: 3
- BIOL 718 - Techniques in Microbial Pathogenesis Credits: 3

Seminar (2 credits)

- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

Research (1-6 credits)

Choose either:

- 1-3 credits of BIOL 798 - Master's Research Project Credits: 1-3
- Or 3-6 credits of BIOL 799 - Thesis Credits: 1-6

Electives (7-14 credits)

Choose from the following:

- BIOL 564 - Techniques in Virology Credits: 2
- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 710 - Current Topics in Bioscience Credits: 1-3
- Or relevant graduate level coursework selected in consultation with the advisor

▲ Concentration in Molecular Biology (MOB)

Students in the molecular biology concentration complete the degree as follows:

Research Methodology (1-3 credits)

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2 or BIOS 702 - Research Methods Credits: 3

Core Biology (13 credits)

- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3 or BIOS 744 - Molecular Genetics Credits: 3
- BIOL 583 - General Biochemistry Credits: 4
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3 or BIOS 767 - Molecular Evolution Credits: 3

Bioinformatics (3 credits)
Choose one from:

- BIOL 580 - Computer Applications for the Life Sciences Credits: 3
- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3

**Molecular Techniques (2-4 credits)**

Choose from:

- BIOL 585 - Eukaryotic Cell Biology Laboratory Credits: 1-2
- BIOL 678 - Cell-Based Assays Credits: 2
- BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
- Special topics courses, such as BIOL 575 or BIOL 691, may also be approved for this requirement by the program director, but only in semesters in which they are primarily a laboratory course of at least two credits with substantial content of techniques in molecular biology.

**Seminar (2 credits)**

- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

**Research (1-6 credits)**

Choose either:

- 1-3 credits of BIOL 798 - Master's Research Project Credits: 1-3
- Or 3-6 credits of BIOL 799 - Thesis Credits: 1-6

**Electives (0-8 credits)**

- 0-8 credits of electives in BIOL, BIOS, or related areas as approved by the student's advisor and the program director.
- A partial list of recommended electives is provided at the end of the concentration listings below.

▲ **Concentration in Neuroscience (NEUR)**

Students pursuing the concentration in neuroscience take:

**Research Methodology (1-3 credits)**

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2 or NEUR 702 - Research Methods Credits: 3

**Core Neuroscience (12-13 credits)**

Choose from the following courses:

- NEUR 600 - Chemistry and the Brain Credits: 3
- NEUR 601 - Developmental Neuroscience Credits: 3
- NEUR 602 - Cellular Neuroscience Credits: 3
- NEUR 603 - Mammalian Neuroanatomy Credits: 3
- NEUR 604 - Ethics in Scientific Research Credits: 1-3 or BINF 705 - Research Ethics Credits: 1
- NEUR 701 - Neurophysiology Laboratory Credits: 3

**Seminar (2 credits)**

Choose from the following:

- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1
- BIOS 704 - Topics in Biosciences Credits: 1
- NEUR 709 - Neuroscience Seminars Credits: 1

**Statistics (3-4 credits)**

Choose from the following:

- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- PSYC 611 - Advanced Statistics Credits: 4
- STAT 535 - Analysis of Experimental Data Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics I Credits: 3

**Research (1-6 credits)**

Choose either:

- 1-3 credits of BIOL 798 - Master's Research Project Credits: 1-3
- Or 3-6 credits of BIOL 799 - Thesis Credits: 1-6

**Electives (2-11 credits)**

Suggested electives include but are not limited to:

- BIOL 566 - Cancer Genomics Credits: 3
- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
- BIOL 583 - General Biochemistry Credits: 4
- BIOL 666 - Human Genetics Concepts for Health Care Credits: 3
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 705 - Research Ethics Credits: 1
- BIOS 741 - Genomics Credits: 3
- BIOS 742 - Biotechnology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 744 - Molecular Genetics Credits: 3
- NEUR 689 - Topics in Neuroscience Credits: 3

▲ Concentration in Evolutionary Biology (EB)
Students pursuing this concentration should work closely with their advisor to plan a program of study within the following parameters:

**Seminar (3 credits)**

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  - Plus two credits of:
    - BIOL 692 - Seminar in Biology Credits: 1 or BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

**Core Courses (6-10 credits)**

Choose at least two courses from the following:

- BIOL 574 - Population Genetics Credits: 4
- BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
- BIOL 648 - Population Ecology Credits: 3

**Organismal Biology (6-8 credits)**

Choose courses in consultation with an advisor and/or committee and the program director. Suggested courses include:

- BIOL 501 - Microbial Diversity: An Organismal Approach Credits: 3
- BIOL 507 - Selected Topics in Ecology Credits: 0-4
- BIOL 508 - Selected Topics in Animal Biology Credits: 1-4
- BIOL 518 - Conservation Biology Credits: 3
- BIOL 532 - Animal Behavior Credits: 3
- BIOL 533 - Selected Topics in Plant Biology Credits: 1-4
- BIOL 537 - Ornithology Credits: 4
- BIOL 538 - Mammalogy Credits: 4
- BIOL 539 - Herpetology Credits: 4
- BIOL 543 - Tropical Ecosystems Credits: 4
- BIOL 559 - Fungi and Ecosystems Credits: 3
- BIOL 566 - Cancer Genomics Credits: 3
- BIOL 572 - Human Genetics Credits: 3
- BIOL 581 - Estuarine and Coastal Ecology Credits: 3
- BIOL 582 - Estuarine and Coastal Ecology Laboratory Credits: 1
- BIOL 643 - Microbial Ecology Credits: 4
- EVPP 536 - The Diversity of Fishes Credits: 3

**Molecular Techniques (4-7 credits)**

- EVPP 615 - Molecular Environmental Biology II Credits: 4
- EVPP 515 - Molecular Environmental Biology I Credits: 3 (only required if not previously completed; this course is a prerequisite to EVPP 615)

**Research (1-6 credits)**
Choose either:

- BIOL 798 - Master's Research Project Credits: 1-3 (for 1-3 credits)
- BIOL 799 - Thesis Credits: 1-6 (for 3-6 credits)

**Electives (0-10 credits)**

Suggested courses are listed below, but other courses are allowed if approved by an advisor and/or committee and the program director

- BIOL 508 - Selected Topics in Animal Biology Credits: 1-4
- BIOL 518 - Conservation Biology Credits: 3
- BIOL 537 - Ornithology Credits: 4
- BIOL 538 - Mammalogy Credits: 4
- BIOL 539 - Herpetology Credits: 4
- BIOL 543 - Tropical Ecosystems Credits: 4
- BIOL 572 - Human Genetics Credits: 3
- BIOL 581 - Estuarine and Coastal Ecology Credits: 3 and BIOL 582 - Estuarine and Coastal Ecology Laboratory Credits: 1
- BIOL 666 - Human Genetics Concepts for Health Care Credits: 3
- BIOS 701 - Systems Biology Credits: 3
- BIOS 741 - Genomics Credits: 3
- BIOS 744 - Molecular Genetics Credits: 3
- BIOS 762 - Phylogenetic Analysis Credits: 4
- BIOS 765 - Molecular Systematics Credits: 4
- BIOS 767 - Molecular Evolution Credits: 3
- EVPP 536 - The Diversity of Fishes Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 551 - Fungi and Ecosystems Credits: 3
- EVPP 555 - Lab in Waterscape Ecology Credits: 1
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 651 - Multivariate Data Analysis for Ecology and Environmental Science Credits: 3
- EVPP 681 - Introduction to Bioinformatics Credits: 3

▲ Concentration in Translational and Clinical Research (TCR)

Students pursuing the translational and clinical research concentration are required to complete:

**Research Methodology (1-3 credits)**

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2 or BIOS 702 - Research Methods Credits: 3

**Seminar (2 credits)**

- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1 or BINF 704 - Colloquium in Bioinformatics Credits: 1 or BIOL 508 - Selected Topics in Animal Biology Credits: 1-4 (when the topic is research and development related to biotechnology)
Advanced Eukaryotic Cell Biology (3 credits)

- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3

Bioinformatics/Biostatistics (3 credits)

- BINF 630 - Bioinformatics Methods Credits: 3 or STAT 535 - Analysis of Experimental Data Credits: 3

Human Genes, Cells and Tissues (3 credits)

- BIOL 666 - Human Genetics Concepts for Health Care Credits: 3 or BIOL 572 - Human Genetics Credits: 3 or BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3

Biochemistry (3-4 credits)

- BIOL 583 - General Biochemistry Credits: 4 or CHEM 563 - General Biochemistry I Credits: 4 or CHEM 660 - Protein Biochemistry Credits: 3

Research (1-6 credits)

Students must complete either a 1-3 credit research project or a 3-6 credit master's thesis.

- Research Project:
  - BIOL 798 - Master's Research Project Credits: 1-3 or CHEM 798 - Research Project Credits: 3-6
  - Thesis:
  - BIOL 799 - Thesis Credits: 1-6 or CHEM 799 - Master's Thesis Credits: 1-6

Electives (6-14 credits)

Choose from the following:

- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 562 - Personalized Medicine Credits: 3
- BIOL 563 - Virology Credits: 3
- BIOL 566 - Cancer Genomics Credits: 3
- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
- BIOL 669 - Pathogenic Microbiology Credits: 3
- BIOL 715 - Microbial Physiology Credits: 3
- BIOS 741 - Genomics Credits: 3
- BIOS 742 - Biotechnology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 744 - Molecular Genetics Credits: 3
- CHEM 567 - The Chemistry of Enzyme-Catalyzed Reactions Credits: 3
- CHEM 579 - Special Topics Credits: 1-6
- CHEM 624 - Principles of Chemical Separation Credits: 3
- CHEM 660 - Protein Biochemistry Credits: 3
- CHEM 661 - Antibiotic Chemistry and Resistance Credits: 3
- CHEM 662 - Modern Methods of Drug Discovery Credits: 3
• CHEM 665 - Protein-Protein Interactions: Methods and Applications Credits: 3
• CHEM 796 - Directed Reading and Research Credits: 1-6

Curriculum Notes

• For students concurrently enrolled in the Advanced Biomedical Sciences Graduate Certificate, contact your advisor for details regarding:
  o BMED course credit that may be counted towards this concentration
  o Meeting requirements for graduate certificates and requirements for master's degrees

Recommended Electives

The following list is for students in the general biology track, the Molecular Biology concentration (MOB), or the Evolutionary Biology concentration (EB), and is provided as a suggestion only and is not intended to be complete. Note that two courses covering substantially similar topics may not both be counted in the student's program of study. Students should consult their faculty research advisor or the graduate program coordinator when preparing a program of study.

• BIOL 553 - Advanced Topics in Immunology Credits: 3
• BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
• BIOL 575 - Selected Topics in Genetics Credits: 1-4
• BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
• BIOL 583 - General Biochemistry Credits: 4
• BIOL 585 - Eukaryotic Cell Biology Laboratory Credits: 1-2
• BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
• BIOL 793 - Research in Biology Credits: 1-3
• BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
• BIOS 741 - Genomics Credits: 3
• BIOS 742 - Biotechnology Credits: 3
• BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
• BIOS 744 - Molecular Genetics Credits: 3
• BIOS 767 - Molecular Evolution Credits: 3

Degree Total: 30 credits

Non-Degree

Bioinformatics Minor

Banner Code: BNF

College: College of Science
Department: School of Systems Biology The undergraduate bioinformatics minor is an interdisciplinary program consisting of required courses in biology, programming, statistics, and bioinformatics.

Eight credits of coursework must be unique to the minor. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements
Students must complete the following courses with a minimum GPA of 2.00, distributed as follows:

- BINF 401 - Bioinformatics and Computational Biology I Credits: 3
- BINF 402 - Bioinformatics and Computational Biology II Credits: 3
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 482 - Introduction to Molecular Genetics Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3 or STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- CS 112 - Introduction to Computer Programming Credits: 4 or IT 306 - Program Design and Data Structures Credits: 3

Minor Total: 19 or 20 credits

Other Degrees

Bioinformatics Management, Professional Science Master's

Banner Code: SC-MSP-BNFM

College: College of Science

Department: School of Systems Biology

The School of Systems Biology offers a Professional Science Master's degree (PSM) in Bioinformatics Management. This degree addresses the growing demand for trained bioinformatics professionals with solid management skills able to assume leadership roles in biotechnology, pharmaceutical and health care sectors. The flexible degree structure allows students to custom design a curriculum that best suits their needs and allows a focus on the biological big data analysis, genomics, or bioinformatics software development and management. Students will receive advanced training in bioinformatics and management through coursework and an external internship. The curriculum was developed with active input from the Program Advisory Board consisting of recognized leaders in the field. Many courses are offered in a distance-learning format, allowing students to participate in class without having to travel to campus.

Admission Requirements

Applicants should have a bachelor's degree in biology, computer science, or a related field with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should submit the Mason Graduate Application, supply two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and official scores obtained on the GRE general exam. The GRE requirement will be waived if the student holds a master's degree from a U.S. institution. TOEFL or IELTS scores are required of all international applicants.

Degree Requirements

Due to the varied course options and their associated prerequisites, students are encouraged to create a program of study with their faculty advisor by the end of their first semester of studies.

Bioinformatics Courses (15 credits)
Required courses include:

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 702 - Biological Data Analysis Credits: 3

Bioinformatics Course Options

Choose two from the following courses or other BINF-prefixed courses in consultation with the faculty advisor:

- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
- BINF 650 - Introduction to Bioinformatics Database Design Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 732 - Genomics Credits: 3
- BINF 740 - Introduction to Biophysics Credits: 3

Professional Skills Courses (7 credits)

Please note: MBA-prefixed courses are offered on an alternative semester schedule (view the Schedule of Classes for details). Considering this, it may be advisable to take these courses in one semester rather than over several.

Required courses include:

- BINF 705 - Research Ethics Credits: 1
- MBA 712 - Project Management Credits: 0-3 or MBA 715 - Advanced Project and Program Management Credits: 0-3 (either course should be taken for 3 credits)

Professional Skills Course Options

Choose one course from the following that hasn't previously been taken:

- BIOL 508 - Selected Topics in Animal Biology Credits: 1-4 (when the topic is Research & Development in Biotechnology Companies)
- AIT 671 - Information System Infrastructure Lifecycle Management Credits: 3
- COMM 641 - Advanced Communication Skills for STEM Credits: 3
- GBUS 540 - Analysis of Financial Decisions Credits: 3
- GBUS 550 - Strategic Thinking Credits: 3
- MBA 712 - Project Management Credits: 0-3 (taken for 3 credits)
- MBA 715 - Advanced Project and Program Management Credits: 0-3 (taken for 3 credits)
- MBA 725 - Leadership Credits: 0-3 (taken for 3 credits) or GBUS 551 - Leadership Credits: 3
- MBA 726 - Negotiations Credits: 0-3 (taken for 3 credits)
- MBA 730 - Management of Technology and Innovation Processes Credits: 0-3 (taken for 3 credits)
- MBA 738 - Data Mining for Business Analytics Credits: 0-3 (taken for 3 credits)
- PUAD 781 - Information Management: Technology and Policy Credits: 3
- Or other courses in consultation with the faculty advisor

Scientific Electives (6 credits)
Choose 6 credits in courses that haven't previously been taken, tailored to suit interests and goals in consultation with the faculty advisor. Close attention should be paid to each course's prerequisites. Course suggestions by interest area include:

Big Data Analysis

- CSI 654 - Data and Data Systems in the Physical Sciences Credits: 3
- CSI 695 - Scientific Databases Credits: 3
- AIT 580 - Analytics: Big Data to Information Credits: 3
- AIT 581 - Problem Formation and Solving in Big Data Credits: 3
- AIT 622 - Determining Needs for Complex Big Data Systems Credits: 3

Synthetic and Systems Biology

- BIOS 701 - Systems Biology Credits: 3
- CHEM 665 - Protein-Protein Interactions: Methods and Applications Credits: 3

Human Health and Personal Genomics

- BINF 732 - Genomics Credits: 3
- BIOL 562 - Personalized Medicine Credits: 3
- BIOL 566 - Cancer Genomics Credits: 3
- BIOL 665 - Environmental Hazards to Human Health Credits: 3
- BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
- BIOS 741 - Genomics Credits: 3

Software Development and Analysis

- BINF 634 - Bioinformatics Programming Credits: 3
- SWE 510 - Object-Oriented Programming in Java Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 626 - Software Project Laboratory Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 760 - Software Analysis and Design of Real-Time Systems Credits: 3

Colloquium

If chosen, it is recommended that students take the colloquium course early in their studies so that they may be exposed to various possibilities and areas of research presented by the speakers.

- BINF 704 - Colloquium in Bioinformatics Credits: 1 (may be repeated for up to 3 credits)

Additional Internship Experience

Please note that the maximum amount of internship credits that can be applied to the degree is 6 credits.
Internship (3 credits)

The internship component is intended to provide students with the opportunity to put into practice all of the skills and knowledge accumulated throughout their studies in this program. Students must arrange an internship with a private company, a governmental agency, a non-governmental organization, or some other entity with an interest in bioinformatics and management. Students must identify a specific person within that outside entity who will be the contact and manager of the internship.

Internship credit is never given for work previously done, or for work that would have been done in any case due to an existing employment relationship.

The internship work must produce one or more products such as: a comprehensive report, a departmental presentation, a research project, or an article. Internship placement and product type must be approved by the student's faculty advisor.

Further details and procedures for completing the internship can be found with the faculty advisor.

Degree Total: 31 credits

Physics and Astronomy

Phone: 703-993-1280

Web: physics.gmu.edu

Faculty

Professors: Barreto, Becker, Dworzecka, Kan, Lieb, Lohner, Mishin, Rubin, Satija, Satyapal, K. Sauer, Summers, Trefil, C. Yang, Zhang

Associate professors: Camelli, Cressman, Kinser*, Marzougui, Nikolic, Rosenberg, Sheng, So, Tian, Weigel, Weingartner, Zhao

Assistant professors: Yigit, Vora

Term associate professor: Djordjevic, Ewell, Geller, Oerter, Wyczalkowski

Term assistant professors: Gliozzi, Vemuru, Ericson

Emeriti: Ceperley, Ehrlich, Elsworth, Evans, Mielczarek

Research faculty: Bilitza, Chung, Duxbury, Huang, Mariska, Meier, Odstrcil, Poland, Purja Pun, Richards, Shabaev, Titarchuk

*Faculty holding primary appointments in other academic units

The Department of Physics and Astronomy is dedicated to the dissemination and advancement of physics and astronomy through instruction, research, and outreach.
The department provides rigorous training for physics and astronomy students and prepares them to be successful, confident, and versatile in their ability to apply physics and astronomy principles within any chosen field. The department also aims to deliver and instill a broad-based understanding of general physics and astronomy principles and practices to the wider university community through our Mason Core (general education) courses. Our student-centric curriculum and instruction use a mixture of traditional and current pedagogical techniques informed by on-going educational research. It is our goal to help students to develop versatility and creativity through repeated analytical practices and problem-solving training in their coursework and faculty-led research projects.

Research in the department focuses on pushing the frontiers of physics and astronomy in a broad range of topics using theoretical, experimental, observational, and computational approaches. The department maintains many active collaborations with scientists across different disciplines within the university community and with other national and international institutions. The department believes strongly in incorporating both graduate as well as undergraduate students in our research programs. It is our goal to see students arriving with an enthusiasm and curiosity for physics and astronomy and leaving as true scientists ready to conduct their own scientific investigations.

Courses

This department offers all courses designated ASTR and PHYS in the Courses section of this catalog.

Undergraduate Programs

The department offers the Physics, BS and the Astronomy, BS. Also available are the Physics Minor, the Astronomy Minor, and the Renewable Energy Interdisciplinary Minor.

Undergraduate Research Opportunities

The department offers many opportunities for undergraduate students to get involved with research. Students should consult with faculty working on research topics of interest to them, based on their exploration of the department's website.

Honors Programs

Physics majors who have maintained an overall GPA of at least 3.50 in physics courses and a GPA of 3.50 in all courses taken at George Mason University may apply to the physics honors program when they complete the first semester of their junior year. To graduate with honors in physics, a student is required to maintain a minimum GPA of 3.00 in physics courses and successfully complete PHYS 405 and PHYS 406 with a GPA of at least 3.50 and a grade of at least ’A-‘ in PHYS 406.

Astronomy majors who have completed the prerequisites for ASTR 405, have a GPA of at least 3.50 in ASTR and PHYS courses taken at Mason, and have a GPA of at least 3.50 in all courses taken at Mason may apply for admission to the astronomy honors program. To graduate with honors in astronomy, a student must maintain a GPA of at least 3.50 in their ASTR/PHYS courses. Students accepted into the honors program must complete ASTR 405 and ASTR 406 with a GPA of at least 3.50 and a grade of ’A-‘ or better in ASTR 406. Students in ASTR 405/ASTR 406 will complete a research project and write a thesis working under the supervision of a faculty member. At the end of ASTR 406, the student will write a substantial thesis paper and make a presentation of results to their honors committee.

Writing Intensive Requirement

George Mason requires all students to complete at least one course designated as "writing intensive" in their majors at the 300-level or above. Students majoring in physics fulfill this requirement by successfully completing PHYS 407. Astronomy majors fulfill the requirement by completing ASTR 402.
Bachelor's/Accelerated Master's Degree

Information regarding this program can be found in the Physics, BS/Applied and Engineering Physics, Accelerated MS section of this catalog.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development section of this catalog and attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education's website.

Physics for Non-majors

PHYS 243, PHYS 244, PHYS 245, and PHYS 246 are recommended for biology, geology, and premedical students, and mathematics students who seek a BA degree. PHYS 101, PHYS 102, PHYS 103, and PHYS 104 are intended for non-science majors. PHYS 160, PHYS 161, PHYS 260, PHYS 261 or PHYS 265, PHYS 262, and PHYS 263 constitute a calculus-based sequence in general physics to be taken by physics and engineering majors, and chemistry, computer science, and mathematics students who are pursuing a BS degree. Students may receive credit for only one of the following three sequences: PHYS 243, PHYS 244, PHYS 245, PHYS 246; PHYS 103, PHYS 104; or PHYS 160, PHYS 161, PHYS 260, PHYS 261, PHYS 262, PHYS 263.

Graduate Programs

This department offers the Applied and Engineering Physics, MS. The department also supports the Energy and Sustainability concentration in the Interdisciplinary Studies, MAIS. Additionally, the department offers a Physics, PhD. These graduate programs are strongly supported by the extensive research activities of the faculty, including many collaborations with scientists and engineers at regional government laboratories.

Bachelor of Science

Astronomy, BS

Banner Code: SC-BS-ASTR

College: College of Science
Department: Physics and Astronomy The Astronomy, BS prepares students for graduate school, a career in research or teaching positions, or employment in industry, business, or education fields where analytical skills and a scientific background are advantageous. Students who are considering a double major should talk to the undergraduate coordinator. Note that at least 18 credits used to fulfill an Astronomy, BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, subject to approval from the Department of Physics and Astronomy.

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. In addition, students must complete a total of 52 credits in physics and astronomy and 14 credits in mathematics with a minimum GPA of 2.00. By taking ASTR 402, astronomy majors satisfy the university's writing-intensive requirement.

Degree Requirements

Required Astronomy Courses (10 credits)
- ASTR 210 - Introduction to Astrophysics Credits: 3
- ASTR 328 - Stars and Interstellar Medium Credits: 3
- ASTR 402 - RS: Methods of Observational Astronomy Credits: 4

Additional Astronomy Courses (6 credits)

Choose two of the following courses:

- ASTR 403 - Planetary Sciences Credits: 3
- ASTR 404 - Galaxies and Cosmology Credits: 3
- PHYS 428 - Relativity Credits: 3

Required Physics Courses (21 credits)

- PHYS 160 - University Physics I Credits: 3 (Mason Core: Natural Science course)
- PHYS 161 - University Physics I Laboratory Credits: 1 (Mason Core: Natural Science course)
- PHYS 260 - University Physics II Credits: 3 (Mason Core: Natural Science course)
- PHYS 261 - University Physics II Laboratory Credits: 1 (Mason Core: Natural Science course)
- PHYS 262 - University Physics III Credits: 3 (Mason Core: Natural Science course)
- PHYS 263 - University Physics III Laboratory Credits: 1 (Mason Core: Natural Science course)
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3

Required Math Courses (14 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3

Astronomy and Physics Courses (15 credits)

Choose from the following (at least 12 credits must be from upper-level courses):

- ASTR 301 - Astrobiology Credits: 3
- ASTR 408 - Senior Research Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- ASTR 403 - Planetary Sciences Credits: 3, ASTR 404 - Galaxies and Cosmology Credits: 3, or PHYS 428 - Relativity Credits: 3, if not taken as part of additional astronomy course requirement above, may be used here.
- Other ASTR or PHYS course with the permission of the department

Mason Core and Elective Credits (54 credits)
In order to meet a minimum of 120 credits, this degree requires an additional 54 credits, which may be applied towards any remaining Mason Core requirements (outlined below), requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

**Mason Core**

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

**Foundation Requirements (15-19 credits)**

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

**Core Requirements (22 credits)**

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

**Synthesis/Capstone Requirement (minimum 3 credits)**

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

**Degree Total: Minimum 120 credits**

**Physics, BS**

*Banner Code: SC-BS-PHYS*

*College: College of Science*

*Department: Physics and Astronomy* The Physics, BS prepares students for graduate school and careers in education, business, or industry. Students in the fields of mathematics, science, and engineering who are considering a double major in physics should discuss this option with the respective undergraduate coordinators. Note that at least 18 credits used to fulfill the Physics, BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these should be discussed in advance.

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. In addition, students must complete a total of 45 credits in the major and 17 in mathematics, with a minimum GPA of 2.00, distributed as follows. The intensive writing requirement is fulfilled by taking PHYS 407.
This undergraduate program offers students the option of applying to the Physics, BS/Applied and Engineering Physics, Accelerated MS or the Physics, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Physics Concentration). See each listing for specific requirements.

Alternative Introductory Sequence

Normally, students who intend to major in physics should take the physics introductory sequence (PHYS 160, PHYS 161, PHYS 260, PHYS 261, PHYS 262, and PHYS 263). Students who decide to major in physics after completing PHYS 243, PHYS 244, PHYS 245, and PHYS 246 may do so but only with written permission of the Department of Physics and Astronomy. Those students are required to take 4 additional credits in approved physics courses.

Degree Requirements

Physics Core Courses (27 credits)

Note: Students double majoring in engineering and physics may substitute ECE 305 for PHYS 305, and ECE 333/ECE 334 for PHYS 407.

- PHYS 160 - University Physics I Credits: 3 (Mason Core: Natural Science course)
- PHYS 161 - University Physics I Laboratory Credits: 1 (Mason Core: Natural Science course)
- PHYS 260 - University Physics II Credits: 3 (Mason Core: Natural Science course)
- PHYS 261 - University Physics II Laboratory Credits: 1 (Mason Core: Natural Science course)
- PHYS 262 - University Physics III Credits: 3 (Mason Core: Natural Science course)
- PHYS 263 - University Physics III Laboratory Credits: 1 (Mason Core: Natural Science course)
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- PHYS 407 - Senior Laboratory in Modern Physics Credits: 3

Physics Electives (6 credits)

Students take 6 credits selected from the following:

- PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 405 - Honors Thesis in Physics Credits: 3 or PHYS 406 - Honors Thesis in Physics Credits: 3
- PHYS 408 - Senior Research Credits: 2-3 or PHYS 409 - Physics Internship Credits: 3
- PHYS 416 - Special Topics in Modern Physics Credits: 1
- ASTR 328 - Stars and Interstellar Medium Credits: 3 or PHYS 428 - Relativity Credits: 3

Mathematics (17 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4 (Mason Core: Quantitative Reasoning course)
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3

Analytical Methods (3 credits)

Choose one of the following:

- PHYS 301 - Analytical Methods of Physics Credits: 3
- MATH 313 - Introduction to Applied Analysis Credits: 3
- MATH 314 - Introduction to Applied Mathematics Credits: 3

Additional Science Courses (12 credits)

Choose no more than 5 credits from the following courses:

- PHYS 121 - Uses of Physics Credits: 1
- PHYS 122 - Inside Relativity Credits: 1
- PHYS 123 - Inside the Quantum World Credits: 1
- PHYS 124 - Experimental Explorations in Physics Credits: 2
- ASTR 210 - Introduction to Astrophysics Credits: 3
- ASTR 301 - Astrobiology Credits: 3

And choose at least 7 credits from the following courses:

- CS 112 - Introduction to Computer Programming Credits: 4
- Additional approved upper-level physics, astronomy, computational and data sciences, chemistry, electrical engineering, or mathematics courses (for examples, see the areas of emphasis below)

Emphasis Options

In meeting all or part of the requirement for 12 credits of Additional Science Courses (above), students may be guided by the following model emphases. Students should plan a program of study in consultation with their advisor.

Emphases and suggested courses for each are listed below.

Emphasis in Applied Solid State Physics

This emphasis is for students who wish to pursue a career in the semiconductor industry. To complete this emphasis, students should take 12 credits selected from the following courses:

- PHYS 512 - Solid State Physics and Applications Credits: 3
- ECE 430 - Principles of Semiconductor Devices Credits: 3
- ECE 431 - Digital Circuit Design Credits: 3

And one from the following:

- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3
- PHYS 408 - Senior Research Credits: 2-3
- PHYS 409 - Physics Internship Credits: 3

Emphasis in Astrophysics
This emphasis is for students who are planning to attend graduate school in astrophysics or pursue a career in industry. To complete this emphasis, students should take 12 credits selected from the following courses:

- PHYS 428 - Relativity Credits: 3
- ASTR 328 - Stars and Interstellar Medium Credits: 3
- ASTR 404 - Galaxies and Cosmology Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3

Students may choose only one from the following:

- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3
- PHYS 408 - Senior Research Credits: 2-3
- PHYS 409 - Physics Internship Credits: 3

**Emphasis in Computational Physics**

This emphasis is for students who wish to pursue a career that applies computers to the solution of physical problems and data analysis. To complete this emphasis, students should take 12 credits selected from the following courses:

- PHYS 510 - Computational Physics I Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
- MATH 447 - Numerical Analysis II Credits: 3

And one from the following:

- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3
- PHYS 408 - Senior Research Credits: 2-3
- PHYS 409 - Physics Internship Credits: 3

**Emphasis in Electronics**

This emphasis is for students who wish to pursue a career in industry, applying a strong background in electronics to physical problems. To complete this emphasis, students should take 12 credits selected from the following courses:

- ECE 301 - Digital Electronics Credits: 3
- ECE 333 - Linear Electronics I Credits: 3
- ECE 430 - Principles of Semiconductor Devices Credits: 3
- ECE 431 - Digital Circuit Design Credits: 3
- ECE 433 - Linear Electronics II Credits: 3

Students may choose only one from the following:

- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3
- PHYS 408 - Senior Research Credits: 2-3
- PHYS 409 - Physics Internship Credits: 3

**Emphasis on Graduate School Preparation**

Although any of the options listed here provide the successful student with a fully adequate background to enter graduate school, this emphasis is for students whose career goals definitely include graduate work in physics. To complete this emphasis, students should take 12 credits selected from the following courses:

- PHYS 410 - Computational Physics I Credits: 3
- PHYS 412 - Solid State Physics and Applications Credits: 3
- PHYS 440 - Nuclear and Particle Physics Credits: 3
- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3
- PHYS 408 - Senior Research Credits: 2-3
- PHYS 409 - Physics Internship Credits: 3

Emphasis in Medical Physics

Physics majors generally have an excellent acceptance record in applying to medical, dental, or veterinary schools. Although there is no formal set of courses within physics that is uniquely suitable, students should meet with a physics advisor and Health Professions Advising.

Because schools in the health sciences vary both in their philosophies and specific requirements, it is wise for students to become aware of such information well in advance of applying for admission. Although specific requirements vary, most programs do require applicants to complete at least one year of biology. Other requirements generally include organic chemistry.

- PHYS 408 - Senior Research Credits: 2-3
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2

Emphasis in Physics Education

This emphasis is intended for students wishing to pursue a career teaching secondary school physics. The goal of the program is to allow students to receive a license to teach physics in Virginia secondary schools within 120 credits.

It is recommended that students seeking a career in physics education take PHYS 306 and PHYS 307 to fulfill the additional physics requirement (see above) for the major. In addition to the standard requirements for the physics major, students should enroll in 3 credits of directed study in physics laboratory instruction under PHYS 390.

The following courses are required to qualify for the teaching license. A grade of 'C' or better is required for all licensure coursework. Students who complete EDRD 419 and either EDCI 473 or EDCI 483 fulfill 6 of the 12 credits of the Additional Science Courses requirement (see above) and should consult the physics advisor on which courses fulfill the remainder of the requirement.

- PHYS 390 - Topics in Physics Credits: 1-4 (physics laboratory instruction) for 3 credits
- EDCI 473 - Teaching Science in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6 (Mason Core: Synthesis course)
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3 (Mason Core: Social and Behavioral Science course)
- EDUC 422 - Foundations of Secondary Education Credits: 3
- Pass the Praxis Core and Praxis II exams

Mason Core and Elective Credits (55 credits)
In order to meet a minimum of 120 credits, this degree requires an additional 55 credits, which may be applied towards any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

**Mason Core**

Please note that some Mason Core requirements may already be fulfilled by the major requirements listed above.

Expand each item below for a link to specific course lists for each category:

**Foundation Requirements (15-19 credits)**

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

**Core Requirements (22 credits)**

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

**Synthesis/Capstone Requirement (minimum 3 credits)**

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

**Degree Total: Minimum 120 credits**

**Bachelor/Accelerated Master’s**

**Physics, BS/Applied and Engineering Physics, Accelerated MS**

**College: College of Science**

**Department: Physics and Astronomy** This program allows academically strong undergraduates with a demonstrable commitment to research to obtain the Physics, BS and Applied and Engineering Physics, MS degrees by successfully completing 144 credits. Upon completion, students are well-prepared for entry into a professional school or a PhD program in physics or a related discipline. Admitted students take selected graduate courses during their senior year and are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of ‘B’ or better) in each of the graduate courses, students are given advanced standing in the master's program and complete an additional 24 credits to receive the master's degree.

See the Graduate Policies section of this catalog for policies related to this program.
Students in an accelerated degree program must fulfill all university requirements for the bachelor’s and master’s degrees. For policies governing all degrees, see the Academic Policies section of this catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog.

Successful applicants will have completed at least 90 credits toward their undergraduate degree with an overall GPA of at least 3.50 and will have completed at least 45 credits in physics major coursework. A recommendation letter from a research supervisor is also required. Interested applicants should submit a letter to the undergraduate physics coordinator requesting admission along with the aforementioned recommendation letter. Contact the physics undergraduate or graduate coordinator for further details.

Accelerated Option Requirements

At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (available from the Office of the University Registrar) to the College of Science's Office of Academic and Student Affairs. Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

Reserve Graduate Credit

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

Doctor of Philosophy

Physics, PhD

Banner Code: SC-PHD-PHYS

College: College of Science
Department: Physics and Astronomy All doctoral students accepted into the Physics, PhD take a common core of four courses (see below). By working with the dissertation committee, a student may choose to specialize in an emphasis area such as astrophysics, biophysics, nonlinear physics, planetary sciences, material physics, space weather physics, or others according to his or her particular interests. By the end of their first year, all students should pair with a faculty advisor who will guide them toward doctoral candidacy.

Admission Requirements

Those holding a baccalaureate degree in physics or astronomy from a regionally accredited institution, who earned a GPA of 3.00 (out of 4.00) or higher in their last 60 credits, and received acceptable scores on the GRE-GEN are invited to apply for admission. Three letters of recommendation must be submitted, preferably from former professors. The GRE subject test in physics is highly recommended for all interested applicants who received their baccalaureate degrees within the past five years. A degree-seeking graduate applicant with a baccalaureate degree who has not met all admission requirements may be offered provisional admission if sufficient evidence is presented to suggest that the applicant has the ability to pursue graduate work. For more details concerning admission requirements to George Mason University please refer to the Admissions section of this catalog.
Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean. See the Graduate Policies section of this catalog for more information.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Graduate Policies section of this catalog.

Doctoral Coursework (48 credits)

Physics Core (12 credits)

Note: The doctoral candidacy (qualifying) examination is based on the topics covered in these four core courses:

- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3
- PHYS 705 - Classical Mechanics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3

Qualifying Examination

All students must successfully pass the four individual sections (quantum mechanics, electromagnetic theory, classical mechanics, and statistical mechanics) of a qualifying examination. The four topics in the qualifying exam are covered in the four core courses (PHYS 684, PHYS 685, PHYS 705, and PHYS 711). All four sections of the qualifying exam will be offered twice a year, typically in the week before the start of the fall and spring semesters. A student can choose to take a particular section or a combination of sections at one sitting. Grades of "pass" or "unsatisfactory" will be given individually for each of the four sections of the exam. If a student receives a grade of "unsatisfactory" in a given section of the exam, he/she is allowed to retake that section in the next cycle but a student must satisfactorily pass all sections of the exam by the end of the third year from the date of enrollment in the PhD program. Students entering the program with equivalent courses taken at another institution can satisfy the core requirement by taking the qualifying exam without taking the course.

At the beginning of each academic year, the program director will appoint members to the qualifying examination committee. This committee is responsible for creating, administering, and grading the qualifying exams offered that year. Additional information and previous qualifying exams can be found here.

Dissertation Committee and Program of Study

Upon successful completion of the qualifying examinations, a dissertation committee should be formed by the student as soon as possible. This chair of this committee must be a graduate faculty member from the Department of Physics and Astronomy. The committee must include at least two additional members from the graduate faculty, one of whom must be from outside the Department of Physics and Astronomy. The composition of the committee must be approved by the program director. The dissertation committee is responsible for directing the student in their chosen field of research. The student should work closely with their committee to select specialty courses and electives that form a cohesive program of study. The student's program of study must be approved by the dean before advancement to candidacy.

Specialty Science Courses (6 credits)
Students must complete two out of the following four physics and astronomy electives:

- ASTR 680 - Physics of Interstellar Media Credits: 3
- ASTR 730 - Stellar Astrophysics Credits: 3
- PHYS 784 - Quantum Mechanics II Credits: 3
- PHYS 785 - Classical Electrodynamics II Credits: 3

General Science Electives (27 credits)

27 credits of approved general electives and preliminary research credits:

- ASTR 796 - Directed Reading and Research Credits: 1-12
- ASTR 798 - Research Project Credits: 3
- PHYS 796 - Directed Reading and Research Credits: 1-12
- PHYS 798 - Research Project Credits: 3

Note: PHYS 796/ASTR 796 may be repeated as needed. General electives may be any graduate-level courses chosen from physics, astronomy and/or other related disciplines approved by the student's advisor or dissertation committee.

Seminar (3 credits)

- PHYS 703 - Seminar in Physics Credits: 1 (must be taken three times)

Advancement to Candidacy

Before a student may be advanced to doctoral candidacy, he/she needs to complete all required coursework, pass the qualifying examination, have the program of study and dissertation proposal approved by the dean, and be recommended by the dissertation committee. Advancement to doctoral candidacy implies that the student has demonstrated adequate breadth and depth of knowledge in the field of study and is capable of conducting research on the boundaries of knowledge.

Dissertation Research (24 credits)

Note: No more than 24 combined credits from PHYS 998/ASTR 998 and PHYS 999/ASTR 999 may be applied toward satisfying the doctoral degree requirements, with no more than 12 credits of PHYS 998/ASTR 998.

- ASTR 998 - Doctoral Dissertation Proposal Credits: 1-12
- ASTR 999 - Doctoral Dissertation Credits: 1-12
- PHYS 998 - Doctoral Dissertation Proposal Credits: 1-12
- PHYS 999 - Doctoral Dissertation Credits: 1-12

Doctoral Dissertation

After advancing to doctoral candidacy, the student works with their dissertation committee to develop their preliminary research into a doctoral dissertation. The dissertation research should represent a significant contribution to its scientific field and should be deemed publishable in a refereed scientific journal. The dissertation must be defended in a public forum before the dissertation committee and other interested faculty.

Degree Total: 72 credits
Master of Science

Applied and Engineering Physics, MS

Banner Code: SC-MS-PHAE

College: College of Science
Department: Physics and Astronomy

This degree contains elements of traditional physics programs and the application of physics to a diversity of critical societal problems. The program is divided into three areas of emphasis, which are described below.

Many courses are offered during late afternoon or evening hours to allow students with full-time employment to attend easily. Students employed at area high-technology organizations may take up to 6 credits (out of 30) for work done on the job under the guidance of a faculty member. This employment-related research may be conducted under an optional 3-credit research project or an optional 6-credit master's thesis. Master's students who are not employed full time may apply for financial aid or a limited number of research assistantships.

An accelerated master's option is available to students in the bachelor's program. See Physics, BS/Applied and Engineering Physics, Accelerated MS for specific requirements.

Admission Requirements

Individuals holding a baccalaureate degree in physics or a related field from a regionally accredited institution and who have earned a GPA of 3.00 (out of 4.00) in their last 60 credits are invited to apply for admission. If the baccalaureate degree is in a field other than physics, applicants should have taken several courses beyond the introductory physics courses, such as junior-level classical mechanics, electricity and magnetism, or electronics. Applicants may be required to make up one or two deficiencies, based on a graduate physics advisor's assessment, and be provisionally admitted into the program. Three letters of recommendation must be submitted, preferably from former professors. The general GRE and the GRE subject test in physics are recommended for applicants who received their baccalaureate degrees within the past five years.

Degree Requirements

Candidates for the degree must successfully complete 30 credits in the categories shown below:

Required Core Courses (6 credits)

- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3

Course Substitution in Select Emphases

For the applied physics emphasis and the engineering physics emphasis, students may substitute:

- PHYS 502 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3 (for PHYS 684)
- PHYS 513 - Applied Electromagnetic Theory Credits: 3 (for PHYS 685)

Emphases (15 credits)
Choose one of the following emphases:

**Standard Emphasis**

This emphasis is intended for students who may wish to pursue further graduate study in physics leading to a PhD degree in preparation for a career in basic research. Students must take:

- PHYS 705 - Classical Mechanics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3

**Additional Courses (9 credits)**

Choose from:

- ASTR 532 - Phys Interplanetary Med Credits: 3
- ASTR 602 - Methods of Observational Astronomy Credits: 4
- ASTR 603 - Planetary Sciences Credits: 3
- ASTR 604 - Galaxies and Cosmology Credits: 3
- ASTR 660 - Plasma Physics for Space and Astrophysics Credits: 3
- ASTR 680 - Physics of Interstellar Media Credits: 3
- ASTR 730 - Stellar Astrophysics Credits: 3
- ASTR 764 - Computational Astrophysics Credits: 3
- ASTR 765 - High-Energy and Accretion Astrophysics Credits: 3
- ASTR 790 - Topics in Astronomy and Astrophysics Credits: 1-6
- PHYS 510 - Computational Physics I Credits: 3
- PHYS 512 - Solid State Physics and Applications Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3
- PHYS 540 - Nuclear and Particle Physics Credits: 3
- PHYS 575 - Atmospheric Physics I Credits: 3
- PHYS 611 - Electro-optics Credits: 3
- PHYS 612 - Physics of Modern Imaging Credits: 3
- PHYS 613 - Computational Physics II Credits: 3
- PHYS 614 - Thermodynamics and Kinetics of Materials Credits: 3
- PHYS 615 - Fundamentals of Materials Science Credits: 3
- PHYS 620 - Continuum Mechanics Credits: 3
- PHYS 628 - Relativity Credits: 3
- PHYS 630 - Introduction to Biophysics Credits: 3
- PHYS 660 - Space Weather Credits: 3
- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3
- PHYS 701 - Theoretical Physics Credits: 3
- PHYS 736 - Computational Quantum Mechanics Credits: 3
- PHYS 760 - Space Plasma Physics Credits: 3
- PHYS 780 - Advanced Selected Topics in Physics Credits: 3
- PHYS 784 - Quantum Mechanics II Credits: 3
- PHYS 785 - Classical Electrodynamics II Credits: 3
- CSI 720 - Fluid Mechanics Credits: 3
- CSI 721 - Computational Fluid Dynamics I Credits: 3
- CSI 722 - Computational Fluid Dynamics II Credits: 3
- CSI 761 - N-Body Methods and Particle Simulations Credits: 3
- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 787 - Computational Materials Science Credits: 3
- CSI 788 - Simulation of Large-Scale Physical Systems Credits: 3

Emphasis Total: 15 credits

Engineering Physics Emphasis

This emphasis allows students to select a larger number of courses from electrical engineering and other areas. Students must take:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3
- 9 credits of ECE graduate courses

Emphasis Total: 15 credits

Applied Physics Emphasis

This emphasis is intended for those who wish to apply the techniques and subject areas of physics to multifaceted problems encountered in the workplace, particularly in physics, engineering, computational science, and other related areas. Students must take:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3

Additional Courses (9 credits)

Choose from:

- PHYS 581 - Topics in Renewable Energy Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 741 - Introduction to Computer Simulations of Biomolecules Credits: 3
- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 711 - Introduction to Atmospheric Dynamics Credits: 3
- CLIM 712 - Physical and Dynamical Oceanography Credits: 3
- CLIM 713 - Atmosphere-Ocean Interactions Credits: 3
- CLIM 714 - Land-Climate Interactions Credits: 3
- CLIM 715 - Numerical Methods for Climate Modeling Credits: 3
- CLIM 750 - Geophysical Fluid Dynamics Credits: 3
- CSI 742 - The Mathematics of the Finite Element Method Credits: 3
- CSI 763 - Statistical Methods in Space Sciences Credits: 3
- CSI 782 - Statistical Mechanics for Modeling and Simulation Credits: 3
- CSI 783 - Computational Quantum Mechanics Credits: 3
- ECE 521 - Modern Systems Theory Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
• ECE 565 - Introduction to Optical Electronics Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 699 - Advanced Topics in Electrical and Computer Engineering Credits: 1-6
• Or any course listed in the Standard Emphasis

Emphasis Total: 15 credits

Electives (9 credits)

• Chosen from courses in physics, chemistry, mathematics, engineering, information technology, and computational sciences and informatics. No more than 6 credits may be chosen from areas outside ASTR, CSI, ECE, NANO, and PHYS.

Elective credits can include a project or thesis:

• PHYS 798 - Research Project Credits: 3
• PHYS 799 - Master's Thesis Credits: 1-6
• ECE 798 - Research Project Credits: 1-6
• ECE 799 - Master's Thesis Credits: 1-6

Notes:

• Students may choose to take either PHYS 798/ ECE 798 or PHYS 799/ ECE 799 (6 credits), but not both. The research project may be conducted at a student's place of employment with the concurrence of a faculty advisor.
• The thesis is a more substantial piece of work performed under the supervision of a faculty member and requires students to make an oral defense. PHYS 798/ ECE 798 may be taken only once. No more than 6 credits of PHYS 799 may be applied to the degree.
• In addition to the requirements stated above, students may also select a research focus in astrophysics, atmospheric physics, biological applications of physics, computational physics, condensed matter, instrumentation (engineering physics), or nonlinear dynamics. A focus requires that students complete 15 credits of approved courses.
• Students in the master's degree program can earn the Data Science Graduate Certificate from the Department of Computational and Data Sciences by choosing an approved sequence of courses.

Degree Total: 30 credits

Sample Course Lists for Various Focus Areas

Astrophysics

• ASTR 680 - Physics of Interstellar Media Credits: 3
• PHYS 701 - Theoretical Physics Credits: 3
• PHYS 711 - Statistical Mechanics Credits: 3

Atmospheric Physics

• PHYS 510 - Computational Physics I Credits: 3
• CLIM 710 - Introduction to Physical Climate System Credits: 3
• CLIM 713 - Atmosphere-Ocean Interactions Credits: 3

Biophysics

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 630 - Introduction to Biophysics Credits: 3
• PHYS 711 - Statistical Mechanics Credits: 3
• BINF 731 - Protein Structure Analysis Credits: 3
• NEUR 751 - Applied Dynamics in Neuroscience Credits: 3

Computational Physics

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 613 - Computational Physics II Credits: 3
• PHYS 780 - Advanced Selected Topics in Physics Credits: 3
• CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences Credits: 3
• CSI 764 - Computational Astrophysics Credits: 3

Instrumentation/Engineering Physics

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 533 - Modern Instrumentation Credits: 3
• NANO 500 - Introduction to Nanomaterials and Interactions Credits: 3
• NANO 510 - Strategies for Nanocharacterization Credits: 3
• ECE 699 - Advanced Topics in Electrical and Computer Engineering Credits: 1-6

Material Physics

• PHYS 512 - Solid State Physics and Applications Credits: 3
• PHYS 614 - Thermodynamics and Kinetics of Materials Credits: 3
• PHYS 711 - Statistical Mechanics Credits: 3
• PHYS 784 - Quantum Mechanics II Credits: 3
• PHYS 785 - Classical Electrodynamics II Credits: 3

Nonlinear Dynamics

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 701 - Theoretical Physics Credits: 3
• PHYS 705 - Classical Mechanics Credits: 3
• MATH 673 - Dynamical Systems Credits: 3
• NEUR 751 - Applied Dynamics in Neuroscience Credits: 3

Physics

• PHYS 701 - Theoretical Physics Credits: 3
• PHYS 705 - Classical Mechanics Credits: 3
Non-Degree

Astronomy Minor

Banner Code: ASTR

College: College of Science
Department: Physics and Astronomy The minor requires completion of 18 or 20 credits in physics and astronomy, with a minimum GPA of 2.00. Eight credits of coursework must be unique to the minor. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Core Courses (12 or 14 credits)

Students will take one of the following sequences listed below:

Sequence One

- PHYS 243 - College Physics Credits: 3 and PHYS 245 - College Physics Credits: 3
- PHYS 160 - University Physics I Credits: 3 and PHYS 260 - University Physics II Credits: 3
  
  Plus:
  - ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
  - ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
  - ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
  - ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1

Sequence Two

- PHYS 160 - University Physics I Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 262 - University Physics III Credits: 3
- ASTR 210 - Introduction to Astrophysics Credits: 3

Astronomy Electives (6 credits)

Chosen from the following:

- ASTR 301 - Astrobiology Credits: 3
- ASTR 302 - Foundations of Cosmological Thought Credits: 3
- ASTR 328 - Stars and Interstellar Medium Credits: 3
- ASTR 402 - RS: Methods of Observational Astronomy Credits: 4
- ASTR 403 - Planetary Sciences Credits: 3
- ASTR 404 - Galaxies and Cosmology Credits: 3
- PHYS 428 - Relativity Credits: 3

Minor Total: 18 or 20 credits

Physics Minor

Banner Code: PHYS

College: College of Science
Department: Physics and Astronomy The minor requires 18 credits with a minimum GPA of 2.00, 8 credits of which must be unique to the minor. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Two Additional Courses

Choose from:

- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- PHYS 428 - Relativity Credits: 3
- PHYS 513 - Applied Electromagnetic Theory Credits: 3

Minor Total: 18 credits

Renewable Energy Interdisciplinary Minor

Banner Code: RNRG

College: College of Science
Department: Physics and Astronomy This minor is offered by the Department of Physics and Astronomy in the College of Science.
This college-wide interdisciplinary minor administered by the Department of Physics and Astronomy is designed for students considering a career in the field of renewable energy, or as preparation for graduate work in a wide range of academic disciplines. Renewable energy, as normally understood, includes a variety of methods of energy generation, such as solar, wind, hydro, tidal, and geothermal, as well as energy storage methods and energy conservation. Jobs related to renewable energy lie in a wide range of areas including engineering, business, marketing, finance, installation, software, legal affairs, and research. Projections suggest that employment opportunities in the renewable energy field will increase dramatically in the near future. The Renewable Energy Interdisciplinary Minor is therefore ideally suited for students with majors in engineering, business, and basic science. The Renewable Energy Interdisciplinary Minor comprises 17-20 credits of coursework; eight credits of coursework must be unique to the minor. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Core Courses (10 credits)

- PHYS 331 - Fundamentals of Renewable Energy Credits: 3
- PHYS 385 - Materials Science with Applications to Renewable Energy Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Physics (1-3 credits)

Choose one from the following:

- PHYS 245 - College Physics Credits: 3
- PHYS 262 - University Physics III Credits: 3
- PHYS 266 - Introduction to Thermodynamics Credits: 1

Other Science or Engineering Course (3-4 credits)

Choose from the following in consultation with minor advisor:

- PHYS 332 - Solar Cells Credits: 3
- CHEM 212 - General Chemistry II Credits: 3 and CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 251 - General Chemistry for Engineers Credits: 4
- GEOL 321 - Geology of Energy Resources Credits: 3
- ECE 301 - Digital Electronics Credits: 3
- Or other appropriate science or engineering course

Internship (3 credits)

Students may choose one of the following options:

- PHYS 409 - Physics Internship Credits: 3 (focused on renewable energy)
- Or a 3 credit internship focusing on renewable energy in another natural science or engineering field

Minor Total: 17-20 credits
Environmental Science and Policy, MS: Course Options

The following is a list of suggested courses for the Environmental Science and Policy, MS- please consult the degree's listing for complete requirements.

Course suggestions are available for the following degree requirements:

- **Aquatic Ecology (AQEC) Concentration**
  - Public Policy
  - Aquatic Methods

- **Earth Surface Processes and Environmental Geochemistry (ESEG) Concentration**
  - Natural Sciences
  - Public Policy
  - Methods

- **Environmental Biocomplexity (EVBC) Concentration**
  - Natural Sciences
  - Public Policy
  - Methods and Statistics

- **Environmental Science and Policy (EVSP) Concentration**
  - Natural Sciences
  - Public Policy
  - Methods and Statistics

**Aquatic Ecology (AQEC) Concentration**

**Public Policy (6 credits)**

- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 521 - Marine Conservation Credits: 3
- EVPP 619 - The Challenge of Biodiversity Credits: 3
- EVPP 623 - Translating Environmental Policy into Action Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- EVPP 670 - Environmental Law Credits: 3
- EVPP 675 - Environmental Planning and Administration Credits: 3
- EVPP 741 - Advanced Topics in Environmental Science and Public Policy Credits: 0-4

**Aquatic Methods (6 credits)**

- EVPP 555 - Lab in Waterscape Ecology Credits: 1
- EVPP 582 - Estuarine and Coastal Ecology Laboratory Credits: 1
- EVPP 615 - Molecular Environmental Biology II Credits: 4
- EVPP 647 - Wetland Ecology Lab and Field Credits: 1
- EVPP 650 - Environmental Analysis and Modeling Credits: 4
- EVPP 651 - Multivariate Data Analysis for Ecology and Environmental Science Credits: 3
- CLIM 512 - Physical Oceanography Credits: 3
- CSS 600 - Introduction to Computational Social Science Credits: 3
- CSS 645 - Spatial Agent-Based Models of Human-Environment Interactions Credits: 3
- GGS 653 - Geographic Information Analysis Credits: 3
- PUAD 511 - Problem Solving and Data Analysis I Credits: 3
- PUAD 612 - Problem Solving and Data Analysis II Credits: 3
- SOCI 636 - Statistical Reasoning Credits: 3

**Earth Surface Processes and Environmental Geochemistry (ESEG) Concentration**

**Natural Sciences (16 credits)**
- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 543 - Tropical Ecosystems Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 563 - Coastal Morphology and Processes Credits: 4
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3 (required for those without previous coursework in ecology)
- EVPP 610 - Bioremediation: Theory and Applications Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 745 - Environmental Toxicology Credits: 3
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3
- CHEM 728 - Introduction to Solid Surfaces Credits: 3
- GEOL 500 - Selected Topics in Modern Geology Credits: 1-3
- GEOL 501 - Selected Topics in Modern Geology Credits: 1-3
- GEOL 601 - The Lithosphere Credits: 3

**Public Policy (6 credits)**
- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
- EVPP 619 - The Challenge of Biodiversity Credits: 3
- EVPP 620 - Development of U.S. Environmental Policies Credits: 3
- EVPP 621 - Overview of Biodiversity Conservation Credits: 3
- EVPP 623 - Translating Environmental Policy into Action Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- EVPP 670 - Environmental Law Credits: 3

**Methods (6 credits)**
- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 531 - Land-use Modeling Techniques and Applications Credits: 3
- EVPP 615 - Molecular Environmental Biology II Credits: 4
- EVPP 631 - Spatial Agent-based Models of Human-Environment Interactions Credits: 3
- EVPP 632 - Qualitative Research Methods for Environmental Scientists Credits: 3
- EVPP 650 - Environmental Analysis and Modeling Credits: 4
- EVPP 651 - Multivariate Data Analysis for Ecology and Environmental Science Credits: 3
- GGS 531 - Land-Use Modeling Techniques and Applications Credits: 3
- GGS 550 - Geospatial Science Fundamentals Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- GGS 560 - Quantitative Methods Credits: 3
- GGS 563 - Advanced Geographic Information Systems Credits: 3
- GGS 579 - Remote Sensing Credits: 3
- GGS 653 - Geographic Information Analysis Credits: 3

**Environmental Biocomplexity (EVBC) Concentration**

**Natural Sciences (6 credits)**

- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 515 - Molecular Environmental Biology I Credits: 3
- EVPP 518 - Conservation Biology Credits: 3
- EVPP 519 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 520 - Marine Mammal Biology and Conservation Field Course Credits: 1
- EVPP 521 - Marine Conservation Credits: 3
- EVPP 536 - The Diversity of Fishes Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 551 - Fungi and Ecosystems Credits: 3
- EVPP 563 - Coastal Morphology and Processes Credits: 4
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3 (required for those without previous coursework in ecology. Can be included within the 6 credits)
- EVPP 615 - Molecular Environmental Biology II Credits: 4
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 745 - Environmental Toxicology Credits: 3

**Public Policy (6 credits)**

- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 520 - Marine Mammal Biology and Conservation Field Course Credits: 1
- EVPP 521 - Marine Conservation Credits: 3
- EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
- EVPP 619 - The Challenge of Biodiversity Credits: 3
- EVPP 620 - Development of U.S. Environmental Policies Credits: 3
- EVPP 621 - Overview of Biodiversity Conservation Credits: 3
- EVPP 623 - Translating Environmental Policy into Action Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 670 - Environmental Law Credits: 3
- EVPP 741 - Advanced Topics in Environmental Science and Public Policy Credits: 0-4

**Methods and Statistics (9 credits)**

- EVPP 615 - Molecular Environmental Biology II Credits: 4
- EVPP 632 - Qualitative Research Methods for Environmental Scientists Credits: 3
- EVPP 650 - Environmental Analysis and Modeling Credits: 4
- EVPP 651 - Multivariate Data Analysis for Ecology and Environmental Science Credits: 3
- EVPP 745 - Environmental Toxicology Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- GGS 563 - Advanced Geographic Information Systems Credits: 3
- **GGS 653 - Geographic Information Analysis Credits: 3**

**Environmental Science and Policy (EVSP) Concentration**

**Natural Sciences (6 credits)**

- EVPP 515 - Molecular Environmental Biology I Credits: 3
- EVPP 518 - Conservation Biology Credits: 3
- EVPP 519 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 520 - Marine Mammal Biology and Conservation Field Course Credits: 1
- EVPP 543 - Tropical Ecosystems Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 551 - Fungi and Ecosystems Credits: 3
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3 (required for those without previous coursework in ecology. Can be included within the 6 credits)
- EVPP 622 - Management of Wild Living Resources Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 648 - Population Ecology Credits: 3
- EVPP 677 - Applied Ecology and Ecosystem Management Credits: 3
- EVPP 745 - Environmental Toxicology Credits: 3

**Public Policy (6 credits)**

- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 519 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 520 - Marine Mammal Biology and Conservation Field Course Credits: 1
- EVPP 521 - Marine Conservation Credits: 3
- EVPP 619 - The Challenge of Biodiversity Credits: 3
- EVPP 621 - Overview of Biodiversity Conservation Credits: 3
- EVPP 622 - Management of Wild Living Resources Credits: 3
- EVPP 623 - Translating Environmental Policy into Action Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 670 - Environmental Law Credits: 3

**Methods and Statistics (6 credits)**

- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 0-4
- EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
- EVPP 531 - Land-use Modeling Techniques and Applications Credits: 3
- EVPP 615 - Molecular Environmental Biology II Credits: 4
- EVPP 632 - Qualitative Research Methods for Environmental Scientists Credits: 3
- EVPP 650 - Environmental Analysis and Modeling Credits: 4
- EVPP 651 - Multivariate Data Analysis for Ecology and Environmental Science Credits: 3
- EVPP 745 - Environmental Toxicology Credits: 3
- GGS 560 - Quantitative Methods Credits: 3
- GGS 653 - Geographic Information Analysis Credits: 3
- GGS 756 - Physical Principles of Remote Sensing Credits: 3
- SOCI 631 - Survey Research Credits: 3
Information on Undergraduate MATH Courses

For Mathematics Majors:

- MATH 104, MATH 105, MATH 106, MATH 108, MATH 110, MATH 111, MATH 112, MATH 271, and MATH 272 cannot be used as substitutes for any requirements of the major in mathematics.

For Non-mathematics Majors:

- MATH 108, MATH 110, and MATH 111 are designed for students in the social and behavioral sciences.
- Liberal arts majors are advised to take MATH 106, MATH 110, or MATH 111.
- Students in the natural sciences who plan to do graduate work are advised to add courses from MATH 313, MATH 314, MATH 351, MATH 352, MATH 441, MATH 442, MATH 446, and MATH 447.

For Both Mathematics and Non-mathematics Majors:

- MATH 104, MATH 105, MATH 108, MATH 112, MATH 125 have a qualifying score on the Math Placement Test as a prerequisite. The Math Placement Test is given frequently; for the schedule, inquire at the department office or check the Department of Mathematical Sciences website.
- The sequence MATH 123 and MATH 124 is an option for students who need MATH 113 but believe they are not prepared for that course. In these two 3-credit courses, students will learn fundamental algebra and calculus so that upon completion of the sequence, students will be prepared for MATH 114.
- Students who do not achieve the necessary test score needed to take a math course may go to the Math Learning Center, or they may study and retake the test on their own. A student who does not complete the relevant program in the Math Learning Center or does not achieve the necessary score on the Math Placement Test will not be able to enroll in the class. Depending on their test scores, students who do not place into MATH 113 will be advised to take MATH 104 or MATH 105 or visit the Math Learning Center to prepare for MATH 114.
- MATH 104 and MATH 105 do not fulfill the Mason Core 'Quantitative Reasoning' requirement.
- Students may not receive credit for both MATH 214 and MATH 216; both MATH 213 and MATH 215; both MATH 351 and STAT 344; and both MATH 352 and STAT 354.
- After receiving a grade of ‘C’ or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:

<table>
<thead>
<tr>
<th>MATH 113 or MATH 123</th>
<th>MATH 105 or MATH 108</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 351 or STAT 344</td>
<td>MATH 351 or STAT 344</td>
</tr>
<tr>
<td>MATH 441</td>
<td>MATH 441</td>
</tr>
<tr>
<td>MATH 125</td>
<td>MATH 125</td>
</tr>

Andrew Bursten, Director Finance and Administration, CFO
Thomas Reynolds, Director of Artistic Programming, Marketing and Audience Services
Julie Thompson, Executive Director, Center for the Arts

The mission of the College of Visual and Performing Arts (CVPA) is to advance the study, creation, performance, and exhibition of the arts, acting on the strong belief in their transformative influence on individuals and civilizations. Fusing the academic and the professional, the campus and the community, the past and the present, CVPA seeks to engage new art forms, populations, and ways of working to meet the needs of a changing world both inside and beyond the walls of the university. The College strives to ensure that Mason's entire student population has the opportunity to experience and study the arts as a key component of a well-rounded liberal education.

Studying the arts goes hand in hand with creation and performance. Each major features strong academic preparation in the history and theory of the art form in support of discipline-based technique courses. The college's faculty of practicing artist-
teachers works closely with students in a variety of curricular and co-curricular creative projects. Once basic techniques are established, students are encouraged to stretch, grow, and experiment within this supportive environment, enhancing their experience as working artists while enriching the cultural life of the campus community.

An education in the arts is deepened by regular contact with the work of distinguished visiting artists. The college is home to the Center for the Arts (http://cfa.gmu.edu) on the Fairfax campus and the Hylton Performing Arts Center (http://hpac.gmu.edu) on the Prince William campus, both of which present diverse programs of cultural experiences for the entire university community, as well as Northern Virginia and the greater Washington, D.C., area. Artists from across the country and around the world regularly perform, give master classes, work with students during extended residencies, and interact with the community in a variety of other ways. The accessibility and vitality of the Concert Hall, Hylton Center, TheaterSpace, the School of Art Gallery, Johnson Center Cinema, Harris Theater, and other campus and regional venues provide an unparalleled educational experience in the arts.

**CVPA Courses**

Some CVPA courses transcend individual disciplines. These courses are administered by the Dean's Office and are designated CVPA in the Courses section of this catalog.

**General Academic Policies**

The requirements for each academic program offered by the college are described in the sections below. Students are ultimately responsible for their academic progress towards their degrees. All students are subject to the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

**Accommodations for Disabled Students**

Students with documented disabilities should contact the Office of Disability Services (http://ods.gmu.edu, Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

**Auditing**

Students who wish to audit a course must obtain written permission from the instructor before registering for the class. Students do not receive grades or credit for audited courses. A student who audits a course does so for the purposes of self-enrichment and academic exploration and are not required to actively participate in class assignments, presentations, or exams. The course is offered only on a space-available basis with the approval of the instructor.

The Course Audit Form can be found on the Registrar's website. The form must be submitted to the Office of the University Registrar by the last day to drop the course.

Note: A previously audited course may be taken again for credit in a later term. Students may also audit a course previously taken and passed; however, students may not change from credit to audit status nor from audit to credit status after the end of the drop period, as defined above. The usual tuition and fees apply to audit status.

**Auditing Courses under the Senior Citizen Waiver Program**

Under terms of the Senior Citizen Higher Education Act of 1974, eligible Virginia residents (requires legal domicile for one year) that are 60 years of age or older are entitled to enroll to audit (no academic credit received) up to three academic credit courses per semester and pay no tuition or fees, except fees established for the purpose of paying for course materials or laboratory fees.
For more information on policies and procedures, please refer to the Registrar's website.

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/ department/ program and other administrative units, and check it regularly for important information.

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add and drop periods.

Questions about Academic Policies

Students with questions regarding exceptions to academic policies should contact the CVPA Academic Affairs Office (College Hall, C200; 703-993-4551).

Undergraduate Policies and Information

Degree Programs

The undergraduate degree consists of course work in the Mason Core, a major area of study, and electives. To earn a bachelor's degree, students must complete a minimum of 120 credits, of which at least 45 must be upper level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated "writing intensive."

Academic Course Load

Undergraduate students earning degrees in CVPA may register for 18 credits per fall and spring semester without the dean's permission. Students are advised that they will be required to pay additional tuition beyond the 16-credit, university full-time academic load. Students should be cognizant of the time commitment when they register for their courses, especially if they register for high numbers of credits. Students are urged to consult with their advisor and familiarize themselves with Mason guidelines for work and academic load. Students are reminded that employment must not take priority over course work.

Advising

Students are assigned advisors and are strongly encouraged to meet with them periodically, and particularly when they achieve 75 credits or are two semesters before expected graduation. Undeclared CVPA students and undergraduate students in academic difficulty (cumulative GPA under 2.00) are required to see an advisor prior to registration for the semester following registration restriction.

Minimum Cumulative GPA in Major

Undergraduate students earning CVPA degrees must earn a minimum 2.00 cumulative GPA in their major, or higher, if required by their program.
Foreign Language Requirement

Some degrees within CVPA require intermediate-level proficiency in one foreign language or the completion of a minor, double major or double degree. The foreign language requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CVPA Student Academic Affairs Office about a possible waiver of this requirement.

Leave of Absence

All undergraduate students who are planning an absence from George Mason must submit a formal request for Leave of Absence to the Office of the University Registrar. Students do not need to complete the Leave of Absence form if they are participating in a George Mason University sponsored study abroad program or have received permission to study elsewhere. The maximum time allowed for a Leave of Absence is two years. A new admission application will be required if a student is away for more than 2 academic years OR a Leave of Absence form was not submitted. Re-admission is not guaranteed. See Academic Policies for full university policy.

Mason Core Program

The baccalaureate degree requires students to take a range of courses that provide a broad knowledge of the world, develop the ability to think both conceptually and critically, acquaint them with many different methods of inquiry, and provide the skills to continue intellectual growth throughout their lives. Students select from a range of courses outlined in the Mason Core section. Students accepted into the Honors College fulfill some/all of their Mason Core requirements with completion of that program of study. Students are strongly advised to consult the University Mason Core section of this catalog.

Minors

Some degrees within CVPA require a minor or intermediate-level proficiency in one foreign language. University policy states that students must earn 8 distinct credits toward their minor that are not used for their major. Some programs have more specific criteria for applying credits to a minor.

Physical Education Courses

Activity courses offered by the Health, Fitness, and Recreation Resources Department cannot be counted toward credits required for a degree in CVPA. Students may take non-activity PHED courses for elective credit for CVPA degrees.

Prerequisites

Undergraduate students must earn a C or better in prerequisite courses to proceed to the next course.

Study Elsewhere

Students with fewer than 60 hours of transfer coursework (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education) may take up to 12 hours of coursework in CVPA disciplines at another institution. A student may seek permission for additional hours beyond these limits for summer registration if his/her permanent residence is more than 50 miles from the George Mason University Fairfax campus. Students must obtain advance, written approval from the student's dean and the course dean's office. Students who enroll elsewhere without advance written permission while enrolled at Mason
will not receive transfer credit for the course work taken at another institution unless they re-apply for admission to Mason as transfer applicants and meet all priority deadlines. Re-admission is not guaranteed and transfer credit is awarded based upon course equivalences in effect at the time of re-admission. Freshmen and transfer students in their first semester at Mason are not permitted to study elsewhere. Courses previously attempted at Mason (including withdrawals) cannot be taken elsewhere. Schools and Colleges have study elsewhere criteria for courses in their disciplines in addition to University policy. Students must be in good standing with a minimum cumulative GPA of 2.00 in their Mason courses. See the University Academic Policies Special Registration Procedures for additional information.

Transfer of Credit

Transfer students must resolve transfer credit issues within the first academic year of enrollment.

Undergraduate students may transfer a maximum of 18 credits earned in nondegree status into a degree program.

Withdrawals

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Undergraduates enrolled in degree programs are eligible to withdraw from three classes through the ninth week (of a fifteen week semester) without dean's approval and at the student's own discretion during their entire undergraduate career at Mason. See University Academic Policies on "Selective Withdrawal" for further details.

Instructors do not have the authority to withdraw students from classes. Withdrawals other than Selective Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved to avoid an unsatisfactory grade. When submitting a withdrawal request, students must provide original, verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Graduate Policies and Information

For items not listed below, please refer to the university's policies: AP.6 Graduate Policies.

Admissions

CVPA follows university policies for graduate admissions. Some programs ask for additional admissions requirements. Please refer to the program for a listing of all requirements.

The College of Visual and Performing Arts does not offer an appeal process for admissions decisions. Applicants are welcome to file a new application for a future semester.

Graduate Programs

CVPA's graduate programs offer highly focused study designed to prepare students for professional work in the arts and education. The requirements for each graduate degree are described under the program's catalog entry.

Transfer of Credit
Graduate credit earned prior to admission to a certificate, master's, or doctoral program may be eligible to be transferred and applied to a CVPA graduate program, certificate or doctoral degree. Please see the Transfer of Credit portion of the catalog for more detailed information about the requirements.

Appeals Process

Appeals of Academic Procedures

See Academic Policies in George Mason University's University Catalog.

CVPA Procedures for Grade Appeal

Although faculty members are generally the best judges of student performance in their classes, circumstances may cause a student to believe that a professor has made an unfair grade decision. Therefore, a Grade Appeal process has been established to ensure a fair hearing in such cases. Grade appeals are not accepted after the last day of classes for the following semester, as indicated in the Schedule of Classes (spring for fall grades, fall for spring and summer grades).

The process for initiating and resolving a Grade Appeal is as follows:

1. The first step to resolve differences between an instructor and student concerning a grade should be a discussion with the instructor; this meeting should occur two weeks of the student's written request for a meeting; if the instructor is no longer affiliated with the University, the appeal is made to the Program Director.

2. If the instructor and student cannot resolve the issue, and the student wishes to pursue the matter further, he or she must present to the Program Director, a written appeal includes the following:
   - A description of the outcome of the informal discussion process.
   - Any relevant documents the student would like to have reviewed as part of the appeal process.
   - A copy of the course syllabus and assignment descriptions.

   The Program Director will discuss this appeal with the faculty member and will provide the student with written notification of the outcome within 1 week.

3. Failing a satisfactory resolution, the student may appeal the grade by submitting a written appeal to the CVPA Academic Affairs Office. Undergraduate students will submit their request to Assistant Dean Nicole Springer; graduate students will submit their requests to Associate Dean Dr. Lisa Kahn in the Academic Affairs Office.

   The decision of the CVPA Assistant or Associate Dean is final.

CVPA Procedures for Appeal of an Academic Action

In exceptional circumstances a student may request a meeting to review the decision of an academic action.

1. The student must state in writing the reasons for requesting further appeal of an academic action, and provide any additional or new information relevant to the appeal.

2. The Assistant Dean (undergraduate)/Associate Dean (graduate) for Academic Affairs reviews all appeals.

3. The dean will conduct a review of the documentation provided by the student, and may request additional information in order to make an informed decision.

4. A nonparticipating observer of the student's choice may attend the meeting with the dean, and the dean may also have a nonparticipating observer attend.

5. The student may follow University appeal procedures outlined in the University Catalog.

CVPA Procedure for Non-Academic Appeals or Grievance
A student who intends to file a non-academic appeal, or intends to file a grievance against a faculty member, another student, or administrator undertakes the following steps:

1. The student meets with the professor and Department Chair to discuss the non-academic appeal/grievance; this meeting should occur within two weeks of the student's written request for a meeting; if the person is no longer affiliated with the University, the request is made to the Department or Program Chair only.
2. The professor (Chair) responds to the student within three days of the meeting.
3. If the student wishes to continue the non-academic appeal/grievance, the student must submit a written explanation to Academic Affairs Office. The Associate Dean reviews all non-academic appeals and grievances, and has the final decision for the college.
4. The student may follow additional University appeal procedures outlined in the University Catalog.

**Academic Termination from an Undergraduate Program**

Termination from a major may be imposed as a result of excessive repeating of required courses without achieving the minimum standard, and for other evidence of continued failure to make adequate progress toward completion of the major. Some programs have specific criteria for termination from the major. See the program and Academic Policies sections of the catalog.

**Academic Dismissal from an Undergraduate Program**

A third suspension results in academic dismissal from the university. See Academic Policies for details.

**Academic Dismissal from a Graduate Program**

The Office of the University Registrar contacts students via e-mail if they have earned an academic warning, or dismissal. Students wishing to appeal should contact the CVPA Graduate Programs Office within three days of the e-mail date. A deadline for the appeal documentation is determined, normally two weeks. Students are to submit:

1. A written statement explaining the circumstances that led to the dismissal, along with supporting documentation from employers, physicians, or other sources as necessary;
2. Evidence that the circumstances precipitating the unsatisfactory academic performance have been remedied;
3. Statement from department and program's graduate coordinator supporting the student's continued enrollment at the University.

Upon receipt of the above,

1. The Associate Dean of Academic Affairs reviews the appeal.
2. The final decision of the Associate Dean is forwarded to the student and the Office of the University Registrar.
3. The student may follow University appeal procedures outlined in the University Catalog.

For these, and any other academic concerns, students are encouraged to contact George Mason University's **Ombudsman for Student Academic Affairs**. The ombudsman is a neutral, independent, informal, and confidential party who provides assistance to students in resolving university-related concerns. The ombudsman is an advocate for fairness and the equitable treatment of students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves all undergraduate and graduate students at the university.

**Master of Fine Arts**
Visual and Performing Arts, MFA

Banner Code: AR-MFA-VPA
Web: cvpa.gmu.edu

College: College of Visual and Performing Arts

The MFA in Visual and Performing Arts is a terminal degree which prepares students as professional artists and scholars who can work within their specialty and teach at the university level. Candidates are required to complete 60 credits, of which 30 are made up from core requirements. An additional 30 credits are based on concentration area and comprehensive experience.

MFA concentrations include:

- Dance
- Graphic Design
- Theater
- Visual Art

Creative work and skill building are at the core of the study. The curriculum is designed for serious and talented students who are prepared to examine modes of creative inquiry in an inclusive, unique environment that promotes exploration, analysis, synthesis, and development as artists.

While the faculty anticipate that students will work through their coursework as described in this catalog, individuals with extensive professional accomplishment may craft an individualized program that meets curricular requirements. Individualized programs require the recommendation of the Graduate Committee within the student's respective school as well as the approval of the CVPA Associate Dean.

▲ Concentration in Dance (DANC)

The MFA in Visual and Performing Arts, concentration in Dance, is a highly selective 60-credit program of study grounded in the modern dance genre that emphasizes mastery in performance, choreography, and teaching in higher education. Applicants must have significant (5 years or more) professional performance experience in modern or ballet at the national or international level. They must also demonstrate professional competence in choreography as exemplified by a significant body of work, and have experience teaching technique at the advanced level.

Admissions Requirements

All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

The following should be sent directly to the School of Dance via SlideRoom:

- 15-minute video of original choreography
- Artistic Goals Statement
- Resume
- Applicant must satisfy the following prerequisites: advanced dance technique, improvisation, dance composition, history, anatomy/kinesiology, and dance production. Prerequisite courses are usually fulfilled if the applicant has earned a BA or BFA in Dance.
Qualified students will be invited for an audition after review of application materials.

Core Degree Requirements (30 credits)

Research Methods (3 credits):
  - AVT 600 - Research Methodologies Credits: 3

Graduate Seminar (2 credits):
  - DANC 501 - Graduate Dance Seminar Credits: 1-3

Writing Seminar (3 credits):
  - AVT 621 - Art Writing Seminar Credits: 3

Advanced Aesthetics (3 credits):
  - DANC 598 - Philosophy and Aesthetics of Dance Credits: 3

Studies in History/Theory/Contemporary Trend (3 credits):
  - DANC 615 - Contemporary Trends Credits: 3

Teaching Practicum (3 credits):
  - DANC 627 - Advanced Teaching Seminar Credits: 3

Directed Reading (1 credit):
  - AVT 796 - Directed Reading Credits: 1

Project (6 credits):
  - DANC 798 - Directed Choreography/Project Credits: 1-3 (must be taken for 6 credits)

Thesis (6 credits):
  - DANC 799 - Thesis Credits: 1-6

Concentration Requirements (30 credits)

  - DANC 510 - Contemporary Movement Theories Credits: 3
  - DANC 560 - Advanced Choreography Credits: 3
  - DANC 570 - Advanced Dance Performance Credits: 1-3 (must be taken for 3 credits)
  - DANC 571 - Residency Workshop Credits: 3
  - DANC 790 - Internship Credits: 1-3
  - DANC 672 - Dance Production Credits: 3

Choose 12 credits from the following:
  - DANC 525 - Advanced Modern Dance Credits: 1-3 (must be taken for 6 credits)
  - DANC 545 - Advanced Ballet Credits: 1-3 (must be taken for 3 credits)

▲ Concentration in Graphic Design (GD)

The MFA in Visual and Performing Arts, concentration in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program includes courses in typography, web design, image making, and brand design, as well as prepares students for an academic career in Graphic Design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field.
Admissions Requirements

All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

Additional Requirements for Concentration in Graphic Design:

- Portfolio
- Writing Sample: A critical and historical essay or academic paper on a design- (preferred) or art-related topic.

Portfolio Guidelines

The applicant's portfolio is a major selection criterion for graduate admission and should represent the applicant's most accomplished work.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art office at 703-993-8898.

Portfolios should include 20 samples of design work submitted through SlideRoom. Samples must be labeled with: name of artist, title, and date. Videos and Flash files (no more than 4 minutes for each section) must be playable through SlideRoom. In the case of collaborative work, the applicant's role should be clearly stated.

Core Degree Requirements (30 credits)

Research Methods (4 credits):

- AVT 519 - Special Topics in Graphic Design Credits: 1-6

Graduate Seminar (5 credits):

- AVT 611 - Graduate Design Seminar Credits: 1 (must be taken 5 times)

Writing Seminar (4 credits):

- AVT 617 - Advanced Typography Credits: 4

Advanced Aesthetics (3 credits):

- AVT 613 - Experiential Design History Credits: 3

Studies in History/Theory/Contemporary Trend (2 credits):

- AVT 618 - Visual Communication Theories Credits: 2

Teaching Practicum (2 credits):

- AVT 670 - Teaching Practicum Credits: 1 (must be taken 2 times)

Directed Reading (1 credit):

- AVT 796 - Directed Reading Credits: 1

Project (6 credits):

- AVT 798 - Directed Project and Exhibition Credits: 1-6
Thesis (3 credits):

- AVT 799 - Thesis Credits: 1-3

Note:

AVT 796/798/799 involves a study of the historical basis for a studio project; an independent creative production suitable for public viewing; and a written thesis documenting the evolution of the creative problem and exploring the intention, purpose, and relative success of the finished project.

Concentration Requirements (30 credits)

- 10 - 14 credits of AVT 519 - Special Topics in Graphic Design Credits: 1-6; AVT 614 - Brand Identity Design Credits: 4; OR AVT 619 - Advanced Web Design Credits: 4
- 0-4 credits of AVT 596 - Independent Study Credits: 1-6; AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6; or other graduate studio courses as approved by director.
- AVT 641 - Graduate Graphic Design I Credits: 4
- AVT 646 - Graduate Graphic Design II Credits: 4
- AVT 647 - Advanced Graduate Graphic Design I Credits: 4
- AVT 648 - Advanced Graphic Design II Credits: 4

▲Concentration in Theater (THR)

The MFA in Visual and Performing Arts, concentration in Theater, is a terminal degree that prepares students to become professional artists, work in theater or arts-related fields, and teach at the university level. Theater MFA students are admitted to a specific emphasis: acting, design & technology, directing, musical theater, or playwriting & dramaturgy. Specific programs of study will be designed for each individual, based on previous experience and expertise.

Admissions Requirements

All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

Additional requirements for concentration in Theater:

- Portfolio
- Interview or Audition

Diversity among students accepted for study is another consideration. Applicants with degrees in areas other than Theater are welcome, although they may be required to complete undergraduate endorsement core courses. Details available on School of Theater website.

Portfolio Guidelines
The applicant's portfolio is a major selection criterion for graduate admission and should represent the applicant's most accomplished work. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Theater office at 703-993-1120.

Portfolio requirements are different for each graduate area of emphasis and are listed below. Incomplete portfolios will not be considered. Applicants' portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

**Portfolio requirements by area of emphasis**

**Design & Technology:** One fully documented design in your area of emphasis (i.e. lighting, sound, scenery, costume, etc.). This may include: script analysis, research, renderings, paperwork, drafting, diagrams, sound clips and photographs of the production. Additional examples of design work and artistic vision may also be submitted. Guidelines available on School of Theater website.

**Playwriting & Dramaturgy:** One to three writing samples, totaling no more than 25 pages. Playwrights should submit a one-page synopsis and dialogue sample. Dramaturgs may submit essays, reviews, or articles written for the general public, along with a cover letter addressing key areas of interest in the field. Guidelines available on School of Theater website.

**Directing:** Applicants for the MFA with an emphasis in Directing must submit both a portfolio of produced work, as well as a directorial analysis of a play or opera. For the latter, include at least six visual images with annotation that support your ideas. Guidelines available on School of Theater website.

**Acting and Music Theater Performance:** A three page written character analysis of one of the roles to be presented at auditions. Guidelines available on School of Theater website. Please see audition requirements.

**Audition Requirements**

**Acting:** Applicants for the MFA with an emphasis in Acting must complete an audition for the program. Applicants should be prepared with three contrasting monologues. Two monologues will be required for the audition, and a third may be requested should additional material be needed. Please prepare both classical and contemporary work. Auditors will be looking for range, transformational potential, and vocal and physical expressiveness.

**Musical Theater:** Applicants for the MFA with an emphasis in Musical Theater must complete an audition for the program. Applicants should be prepared with two songs and two monologues. Contrast between the pieces is essential. Please prepare both classical and contemporary work. Auditors will be looking for musical ability, range, transformational potential, vocal and physical expressiveness, dance and movement skills, and emotional honesty through text and song. An accompanist may be provided and requires a cash fee on the day of audition. This includes a brief rehearsal prior to appointment time. Those auditioning may provide their own accompanist.

**Core Degree Requirements (30 credits)**

**Research Methods (3 credits):**

- AVT 600 - Research Methodologies Credits: 3

**Graduate Seminar (2 credits):**

- THR 591 - Graduate Seminar Credits: 1-3

**Writing Seminar (3 credits):**

- THR 652 - Writing Seminar Credits: 3

**Advanced Aesthetics (3 credits):**
• AVT 621 - Art Writing Seminar Credits: 3  
**Studies in History/Theory/Contemporary Trend (6 credits):**

• THR 651 - Advanced Dramatic Theory and Criticism Credits: 3  
**Teaching Practicum (3 credits):**

• THR 655 - Teaching Practicum Credits: 3  
**Directed Reading (1 credit):**

• THR 796 - Directed Reading Credits: 1  
**Project (6 credits):**

• THR 797 - Project Preparation Credits: 3 and THR 798 - Project Practicum Credits: 3  
**Thesis (3 credits):**

• THR 799 - Thesis Credits: 1-3  

**Concentration Requirements (30 credits)**

**Concentration Requirements for All Emphases (12 credits)**

• THR 539 - Aesthetics for the Theater Credits: 3  
• THR 551 - Advanced Theater Pedagogy Credits: 2  
• THR 560 - Advanced Script Analysis Credits: 3  
• THR 691 - Professional Development Credits: 1  
• THR 790 - Directed Research Credits: 3  

**Track Requirements (3 credits)**

In each area of emphasis, students must pick either a professional or academic track. Students in the professional track will complete at least three additional credits in practical production experience over and above the core in the following:

• THR 694 - Graduate Field Experience Credits: 1-6  
• THR 696 - Advanced Acting Practicum Credits: 3  
• THR 697 - Advanced Playwriting and Dramaturgy Practicum Credits: 1-3  
• THR 698 - Advanced Directing Practicum Credits: 1-3  
• THR 699 - Advanced Design Practicum Credits: 1-3  

Students in the academic track will complete at least three additional credits in practical teaching over and above the core in the following:

• THR 755 - Academic Track Practicum Credits: 3  

**Emphasis Requirements (15 credits)**

With the approval of their mentor, students will have the flexibility to select courses from Emphasis areas:

**Acting Emphasis**
• THR 525 - Advanced Musical Theater Workshop Credits: 3
• THR 590 - Special Topics for Graduate Study Credits: 1-6
• THR 599 - Independent Study Credits: 1-6
• THR 610 - Acting Mentorship Credits: 3
• THR 620 - Acting Techniques Credits: 3
• THR 694 - Graduate Field Experience Credits: 1-6
• THR 696 - Advanced Acting Practicum Credits: 3

Design & Technology Emphasis

• THR 530 - Topics in Theater Design Credits: 3
• THR 590 - Special Topics for Graduate Study Credits: 1-6
• THR 599 - Independent Study Credits: 1-6
• THR 630 - Design Mentorship Credits: 3
• THR 694 - Graduate Field Experience Credits: 1-6
• THR 699 - Advanced Design Practicum Credits: 1-3
• AMGT 602 - Seminar in Arts Management Credits: 3
• AMGT 609 - Performing Arts Management Credits: 3
• AMGT 706 - Festivals and Special Events Credits: 3
• AMGT 752 - Arts Entrepreneurship Credits: 3-6
• GAME 635 - Issues in Interactive Entertainment Credits: 3
• GAME 650 - Advanced Music and Sound for Games Credits: 3
• AVT 682 - Experimental 2D Animation Credits: 4
• AVT 686 - Experimental 3D Animation Credits: 4
• AVT 687 - Advanced Topics: New Media Credits: 4
• AVT 688 - Hybrid Animation Credits: 4
• FAVS 565 - Documentary Filmmaking Credits: 3
• FAVS 575 - Fiction Film Directing Credits: 3
• FAVS 599 - Special Topics Credits: 1-6

Directing Emphasis

• THR 540 - Directing Techniques Credits: 3
• THR 590 - Special Topics for Graduate Study Credits: 1-6
• THR 599 - Independent Study Credits: 1-6
• THR 640 - Directing Mentorship Credits: 3
• THR 694 - Graduate Field Experience Credits: 1-6
• THR 698 - Advanced Directing Practicum Credits: 1-3
• THR 755 - Academic Track Practicum Credits: 3
• FAVS 565 - Documentary Filmmaking Credits: 3
• FAVS 575 - Fiction Film Directing Credits: 3
• FAVS 599 - Special Topics Credits: 1-6

Musical Theater Emphasis

• THR 525 - Advanced Musical Theater Workshop Credits: 3
• THR 590 - Special Topics for Graduate Study Credits: 1-6
Playwriting & Dramaturgy Emphasis

- THR 571 - Advanced Playwriting Workshop Credits: 3
- THR 590 - Special Topics for Graduate Study Credits: 1-6
- THR 599 - Independent Study Credits: 1-6
- THR 694 - Graduate Field Experience Credits: 1-6
- THR 697 - Advanced Playwriting and Dramaturgy Practicum Credits: 1-3
- THR 740 - Directors and Dramaturgy in Collaboration Credits: 3

▲ Concentration in Visual Art (VART)

The MFA in Visual and Performing Arts, concentration in Visual Arts, is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Students select an emphasis in one of the following: New Media, Painting, Photography, Printmaking, Sculpture, or InterArts. Students have the opportunity to combine art forms in projects that may be installation, performance, publishing, time-based, or writing-based, and combine creative and critical approaches in their work.

Admissions Requirements

All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

Additional Requirements for Concentration in Visual Arts:

- Portfolio

Portfolio Guidelines

The applicant's portfolio is a major selection criterion for graduate admission and should represent the applicant's most accomplished work.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art office at 703-993-8898.
Portfolio requirements are different for each graduate area of emphasis and are listed below. Incomplete portfolios will not be considered.

Portfolio Requirements by Area of Emphasis

**InterArts:** 20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date. Videos and Flash files (no more than four minutes for each section) must be playable through SlideRoom. In the case of collaborative work, the applicant's role should be clearly stated. If writing-based materials are submitted, they should be submitted in printed form.

**New Media Arts:** 20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date. Videos and Flash files (no more than four minutes for each section) must be playable through SlideRoom. Only the relevant parts of the video should be marked for viewing, with the applicant's role clearly stated.

**Painting:** 20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

**Photography:** 20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

**Printmaking:** 20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

**Sculpture:** 20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

Core Requirements (30 credits)

**Research Methods (3 credits):**

- AVT 600 - Research Methodologies Credits: 3

**Graduate Seminar (6 credits):**

- AVT 610 - Graduate Seminar Credits: 2

**Writing Seminar (3 credits):**

- AVT 621 - Art Writing Seminar Credits: 3

**Advanced Aesthetics (3 credits):**

- AVT 507 - Advanced Aesthetics Credits: 3 OR AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6

**Studies in History/Theory/Contemporary Trend (3 credits):**

- AVT 620 - Theory, Criticism, and the Arts Credits: 3

**Teaching Practicum (2 credits):**

- AVT 670 - Teaching Practicum Credits: 1 (must be taken two times)

**Directed Reading (1 credit):**

- AVT 796 - Directed Reading Credits: 1

**Project (6 credits):**

- AVT 798 - Directed Project and Exhibition Credits: 1-6

**Thesis (3 credits):**

- AVT 799 - Thesis Credits: 1-3

**Note:**
AVT 796/798/799 involves a study of the historical basis for a studio project; an independent creative production suitable for public viewing; and a written thesis documenting the evolution of the creative problem and exploring the intention, purpose, and relative success of the finished project.

Concentration Requirements (30 credits)

- 8 credits of AVT 596 - Independent Study Credits: 1-6 or AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6 (or other courses as approved by director)
- AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6 (must be taken for 4 credits)
- AVT 610 - Graduate Seminar Credits: 2
- AVT Emphasis Courses (16 credits)

Areas of Emphasis

InterArts

- 16 credits of any 500 - 600 level AVT course as approved by the division director. InterArts graduate students may combine courses from studio areas of emphasis (as indicated below) and work with faculty to design an interdisciplinary thesis project.

New Media Art

Any of the following courses:

- AVT 616 - Advanced Art and Interactivity Credits: 4
- AVT 676 - Graduate Sound Art Credits: 4
- AVT 682 - Experimental 2D Animation Credits: 4
- AVT 684 - Advanced Image Making Credits: 4
- AVT 685 - Video Art Credits: 4
- AVT 686 - Experimental 3D Animation Credits: 4
- AVT 687 - Advanced Topics: New Media Credits: 4
- AVT 688 - Hybrid Animation Credits: 4

Painting

- AVT 632 - Graduate Painting I Credits: 4
- AVT 633 - Graduate Painting II Credits: 4
- AVT 634 - Advanced Graduate Painting I Credits: 4
- AVT 635 - Advanced Graduate Painting II Credits: 4

Photography

- AVT 652 - Graduate Photography I Credits: 4
- AVT 653 - Graduate Photography II Credits: 4
- AVT 654 - Advanced Graduate Photography I Credits: 4
- AVT 655 - Advanced Graduate Photography II Credits: 4
Printmaking

- AVT 642 - Graduate Printmaking I Credits: 4
- AVT 643 - Graduate Printmaking II Credits: 4
- AVT 644 - Advanced Graduate Printmaking I Credits: 4
- AVT 645 - Advanced Graduate Printmaking II Credits: 4

Sculpture

- AVT 662 - Graduate Sculpture I Credits: 4
- AVT 663 - Graduate Sculpture II Credits: 4
- AVT 664 - Advanced Graduate Sculpture I Credits: 4
- AVT 665 - Advanced Graduate Sculpture II Credits: 4

Total: 60 credits

Note:

Mason does not guarantee the availability of these courses every semester; some are offered in alternate years.

School of Art

Art and Design Building, Room 2050
Phone: 703-993-8898
Web: http://soa.gmu.edu

Faculty

Peter Winant, Director

Professors: Carbonneau, Linton, White

Associate Professors: Constantine, Cooley, Crawford, Cui, Endress, Frenn, Karametou, Rothstein, Sheridan, Winant (director), Wrbican (associate director)

Assistant Professors: Debuque, Del Popolo, Starr

Research Faculty: Stanley

Adjunct Faculty: Benassi, Bisese, Booth, Bourke, Bradley, Brugnoli-Whipkey, Carr, Cushner, Desai, Dixon, Guerrieri, Hicks, Isham, Kass, Kenney, Loda, Mayhew, McCoy, McDermott, Petrine, Petzrick, Quinones, Rodriguez, Sawyer, Seawell, Watson, Yoder

Mission

George Mason University's School of Art is a collaborative academic and professional community focused on advancing creativity through traditional and new media applied to varying social contexts. The School of Art is founded on the premise that art both reflects and inspires a creative society, improving the human condition while describing the world, both as it is and could
We focus on the role of artists in that conversation. We encourage students to see art both as an individual expression and public interaction. We celebrate historical reference, current relevance and experimentation—emphasizing innovative ways of thinking that enhance the impact of art on the future of society.

Embedded in a major liberal arts university rich in learning resources, the School of Art plays a vital role in the creative climate of the institution and the region through the cross-disciplinary research it facilitates and the artwork it produces and exhibits. The School's facilities engage an exceptional faculty of practicing artists, an active visiting artist program, and a diverse and intellectually curious graduate and undergraduate student body. Artistic skills and principles of creative practice in all visual media are grounded in a forward-thinking, adaptive curriculum. Faculty and students forge cross-disciplinary experimentation, challenging conventional thinking and blurring the lines between traditional artistic disciplines, indeed, between the arts and other humanities and sciences.

The School of Art educates artists and creative professionals to be responsible contributors to society, preparing them to be agents of change in an increasingly connected, complex, inclusive world. We highly value rigor in conceptual approach, skill in art production, and imaginative methods for implementing projects and engaging audiences. Each student is given a background in aesthetic and analytical judgment, the ethical framework for professional practice, the confidence to be both self-reliant and collaborative, and the mastery of design and production necessary to thrive as a professional artist in a competitive global environment.

Courses

All School of Art courses are designated by the AVT prefix in the Courses section of this catalog.

Undergraduate Programs

Undergraduate studio degrees offered by the School of Art include the bachelor of arts (BA) and the bachelor of fine arts (BFA). An honors program enhances either degree for selected AVT majors. The school also offers undergraduate minors in art and visual technology, art and social change, graphic design, photography, and web design.

For students who are interested in a career in teaching art in the public schools, neither the BA nor the BFA program satisfies all requirements for those seeking licensure. Undergraduate students interested in this field are highly encouraged to consider the accelerated degree path for the master of art in teaching and should contact the school's art education advisor to learn more about teacher preparation.

All George Mason University students are welcome to enroll in course work in the School of Art to fulfill Mason Core for requirements for the arts or to pursue minors. Consult the course listings for prerequisites and requirements.

Undergraduate Admission to the School of Art

Students are admitted to School of Art degree programs separately from their admission to George Mason University and only by portfolio review. The College of Visual and Performing Arts strongly encourages students to apply to the university by November 1 in order to receive maximum scholarship consideration, including merit and talent-based scholarships.

Applicants apply to George Mason University. Admission to George Mason is determined by the Admissions Office and is separate from admission to the School of Art degree programs. All School of Art applicants are encouraged to apply for admission to the university prior to submitting a portfolio for review.

Successfully complete a portfolio review. Please refer to the Portfolio Review Criteria at http://soa.gmu.edu

Artsbus Requirement
All AVT majors must meet the school's requirement of travel to galleries and museums through the Artsbus program. Students meet this requirement by enrolling in AVT 300 - Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 - Artsbus Attendance are the same as for any other class.

Freshmen who enroll as AVT majors must register for AVT 300 - Artsbus Attendance 5 times during their course of study. Transfer students and students who change their majors to AVT must register for AVT 300 - Artsbus Attendance for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 - Artsbus Attendance do not have to be consecutive. Students may take AVT 300 - Artsbus Attendance up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300 - Artsbus Attendance participation are posted on the Artsbus web site: http://artsbus.gmu.edu. Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

**Visual Voices Requirement**

All AVT majors must fulfill three credits of AVT 301 - Visual Voices Colloquium Credits: 1 in order to graduate unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to register for AVT 301 - Visual Voices Colloquium Credits: 1 each semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated 'writing intensive' in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 - Writing for Artists Credits: 3.

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

**Major GPA**

All School of Art BA and BFA majors, AVT minor, and Graphic Design minor students must earn a grade of C or better in required AVT coursework, including Studio Foundation, Critical Analysis and Contemporary Practice, Breadth and Experience, Synthesis and Concentrations. All School of Art undergraduate students must earn a minimum 2.00 cumulative GPA in their major. To graduate with a BA or BFA in Art and Visual Technology with a concentration in Graphic Design, students are required to maintain a 2.40 GPA in concentration classes. Students who fail to maintain this minimum may either retake core classes (an earned higher grade replaces the old one) or take concentration special topics classes in order to raise their average to the threshold. The effect of this change will be that very weak students will have to return to required classes to master core skills, and marginally weak students will be able to meet the requirement while expanding the breadth of their education.

**Studios**

The School of Art program is located in the Art and Design Building which houses well-equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two-dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.
Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

School of Art Honors Program

Students interested in the Honors Program in School of Art should contact the director of the school. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits AVT 394 - Honors Seminar Credits: 1. They must have a cumulative GPA of at least 3.00 and at least 3.50 in AVT 394 - Honors Seminar Credits: 1 and the AVT major.

Graduate Programs

The MA in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program calls for 36 credits, which includes courses in typography, web design, image making, and brand design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field. This degree is the only MA in Graphic Design in the Capital region.

The Art Education Licensure Certificate is a post-baccalaureate program designed for those who currently hold a graduate degree in an art-related field along with those who want a more immediate entrance into the art teaching profession. This "licensure only" program, which results in a pre K-12 art certification in the Commonwealth of Virginia, is a 21 credit program consisting of graduate education courses, area endorsements, student teaching internships and seminar. There is a MAT Graduate Degree option with an additional 9 graduate credits.

The Master of Arts in Teaching in Art Education is a preservice degree program that prepares students with a BFA degree or equivalent for pre K-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work, and preservice teaching internship and seminar.

MFA, Visual and Performing Arts

The School of Art offers two concentrations under the Master of Fine Arts, Visual and Performing Arts degree: Graphic Design and Visual Art. Applicants to the program must designate which concentration they intend to apply for on the application. Each concentration has its own unique set of admissions requirements and program requirements. For specific information, please refer to the Visual and Performing Arts, MFA entry.

The MFA is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Candidates are required to complete 60 credits, of which 30 credits are made up from core requirements and 30 are made up of emphasis and studio requirements.

In the Visual Arts concentration, students may select an emphasis in new media, painting, photography, printmaking, sculpture, or InterArts. The latter offers students the opportunity to combine art forms in interdisciplinary projects that may be installation, performance, publishing, time-based, or writing-based; and combine creative and critical approaches to their work.

While it is anticipated that students will move through the MFA as described in this catalog, individuals with extensive professional accomplishment may, upon recommendation of the SOA Graduate Committee and with prior approval of the CVPA dean, craft an individualized program within their intended emphasis that meets curricular requirements.

Accelerated Master's Programs

The School of Art offers the following Accelerated Master's programs:

- Art and Visual Technology, BA/Arts Management, Accelerated MA
Each program allows undergraduate students to take graduate classes that can be used towards a designated Master's degree. Undergraduates who wish to pursue the accelerated Master's route should talk to their academic advisor first to see if they qualify. Students must be within 75-90 credits of their Bachelor's program to be eligible to apply; those who have earned more than 90 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the Master's program through an Accelerated Master's application. For more information about admissions requirements and the application process, students should visit the cvpa.gmu.edu website.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Bachelor of Arts

Art and Visual Technology, BA

Banner Code: AR-BA-AVT
Web: soa.gmu.edu/

College: College of Visual and Performing Arts
Department: School of Art

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Art and Visual Technology, BA/Arts Management, Accelerated MA for requirements.

Degree Requirements

Mason Core (37 credits)

Foundation Requirements

- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
  (Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.)
- Oral communication Credits: 3
- Quantitative reasoning Credits: 3
- Information technology Credits: 3 (all students concentrating in new media art must take AVT 180 and CS 105 or PHIL 112)

Core Requirements
Literature Credits: 3
Arts Credits: 3*
Natural science (including at least one laboratory science) Credits: 7
Western civilization Credits: 3
Global understanding Credits: 3**
Social and behavioral sciences Credits: 3

Notes:

*AVT majors may not choose AVT courses to meet this requirement, and they may not double-count ARTH courses toward both the AVT major and the Mason Core arts requirement.

**AVT majors may not double-count ARTH courses toward both AVT major requirements and the Mason Core global understanding requirement.

AVT Major Requirements (64-65 credits)

Studio Foundation (16 credits)

- AVT 101 - New Majors Colloquium Credits: 1
- AVT 104 - Two-Dimensional Design and Color Credits: 4
- AVT 105 - Three-Dimensional Design and Beyond Credits: 4
- AVT 222 - Drawing I Credits: 4
- AVT 323 - Drawing II Credits: 3 or AVT 324 - Figure Drawing Credits: 3

Art History, Critical Analysis, Contemporary Practice (18 credits)

- ARTH 200 - History of Western Art I Credits: 3 or ARTH 203 - Survey of Asian Art Credits: 3 or ARTH 204 - Survey of Latin American Art Credits: 3
- ARTH 201 - History of Western Art II Credits: 3
- ARTH 374 - Art Now Credits: 3
- AVT 301 - Visual Voices Colloquium Credits: 1 (must be taken for a total of 3 credits or each semester, if less than 3 semesters)
- AVT 307 - Aesthetics Credits: 3
- AVT 395 - Writing for Artists Credits: 3

Breadth and Experience (12-13 credits)

Choose three-four of the following classes; at least one course must be a 200-level studio course (see each concentration for individual requirements):

- AVT 215 - Typography Credits: 4
- AVT 217 - Introduction to Web Design Credits: 4
- AVT 232 - Painting I Credits: 4
- AVT 243 - Printmaking I Credits: 4
- AVT 252 - Fundamentals of Photography Credits: 4
- AVT 253 - Introduction to Digital Photography Credits: 4
- AVT 254 - Photography Credits: 4
- AVT 262 - Sculpture I Credits: 4
- AVT 272 - Interdisciplinary Arts Credits: 4
- AVT 280 - Introduction to New Media Arts Credits: 4
- AVT 326 - Nontraditional Approaches to Drawing Credits: 3
- AVT 327 - Illustration Credits: 3
- AVT 346 - Digital Printmaking Credits: 3
- AVT 374 - Sound Art I Credits: 3
- AVT 385 - EcoArt Credits: 3
- AVT 496 - Special Topics: (specific course title varies) Credits: 1-4
- Or other courses as approved by program director

**Professional Practices (3 credits)**

- AVT 413 - Professional Design Practices Credits: 3 or AVT 453 - Professional Practices Credits: 3 (all students concentrating in graphic design must complete AVT 413 - Professional Design Practices Credits: 3)

**Synthesis (3 credits)**

- AVT 497 - Senior Project Credits: 3 or AVT 498 - Senior Design Project Credits: 3

**Concentration (12 credits)**

12 credits in one of the following areas: Drawing, Graphic Design, New Media Art, Painting, Photography, Printmaking or Sculpture

▲ **Drawing (DRW)**

- AVT 422 - Drawing III Credits: 3
- AVT 423 - Drawing IV Credits: 3

6 credits from:

- AVT 324 - Figure Drawing Credits: 3
- AVT 326 - Nontraditional Approaches to Drawing Credits: 3
- AVT 328 - Mixed Media Credits: 3
- AVT 333 - Painting II Credits: 3
- AVT 336 - Experimental Painting Credits: 3
- AVT 337 - Figurative Painting Credits: 3
- AVT 432 - Painting III Credits: 3
- AVT 433 - Advanced Painting I Credits: 3
- AVT 496 - Special Topics: (specific course title varies) Credits: 1-4 (topic must be Drawing)
- Or other courses as approved by area coordinator

**Drawing Note:**

All AVT majors concentrating in drawing must complete AVT 232 - Painting I under Breadth and Experience.
▲ Graphic Design (GD)

- AVT 311 - Graphic Design Methods and Principles Credits: 3
- AVT 313 - Editorial Design Credits: 3
- AVT 414 - Corporate Design and Branding Credits: 3
  3 credits from:
- AVT 410 - Experiential Design History Credits: 3
- AVT 412 - Advanced Typography Credits: 3
- AVT 415 - Web Design and Usability Credits: 3
- AVT 416 - Advertising Design Credits: 3
- AVT 419 - Topics in Graphic Design Credits: 1-6
- Or other courses as approved by area coordinator

Graphic Design Note:

All AVT majors concentrating in graphic design must complete AVT 252 - Fundamentals of Photography or AVT 253 - Introduction to Digital Photography under Breadth and Experience.

▲ New Media Art (NMA)

12 credits from:

- AVT 374 - Sound Art I Credits: 3
- AVT 376 - Live Movies Credits: 3
- AVT 382 - 2D Experimental Animation Credits: 3
- AVT 383 - 3D Experimental Animation Credits: 3
- AVT 385 - EcoArt Credits: 3
- AVT 390 - Video Art Credits: 3
- AVT 482 - Advanced Image Making Credits: 3
- AVT 483 - RS: Art and Interactivity Credits: 3
- AVT 487 - Advanced Topics: New Media Art Credits: 3
- Or other courses as approved by area coordinator

New Media Note:

All AVT majors concentrating in new media art must complete AVT 280 under Breadth and Experience, and AVT 180 and CS 105 or PHIL 112 for their IT Mason Core requirement.

▲ Painting (PNT)

- AVT 333 - Painting II Credits: 3
- AVT 432 - Painting III Credits: 3
- AVT 433 - Advanced Painting I Credits: 3
  3 credits from:
- AVT 336 - Experimental Painting Credits: 3
- AVT 337 - Figurative Painting Credits: 3
- AVT 434 - Advanced Painting II Credits: 3
- AVT 435 - Advanced Painting III Credits: 3
- Or other courses as approved by area coordinator

Painting Note:

All AVT majors concentrating in painting must complete AVT 262 under Breadth and Experience

▲ Photography (PHO)

- AVT 353 - Traditional Photo Methods Credits: 3
- AVT 356 - Photo Studio Techniques Credits: 3
- AVT 359 - About Photography: Practice and Research Credits: 3

3 credits from:

- AVT 354 - Digital Photo Techniques Credits: 3
- AVT 355 - Color Photo Methods Credits: 3
- AVT 454 - Alternative Photo Processes Credits: 3
- AVT 455 - Digital Printing Techniques Credits: 3
- AVT 457 - Documentary Photography Credits: 3
- AVT 458 - Advanced Studio Lighting Credits: 3
- Or other courses as approved by area coordinator

Photography Note:

All AVT majors concentrating in photography must complete AVT 252 under Breadth and Experience.

▲ Printmaking (PM)

- AVT 343 - Printmaking II Credits: 3

9 credits from:

- AVT 345 - Paper/Print/Book as Language Credits: 3
- AVT 346 - Digital Printmaking Credits: 3
- AVT 442 - Printmaking III Credits: 3
- AVT 443 - Printmaking IV Credits: 3
- Or other courses as approved by area coordinator

▲ Sculpture (SCL)

- AVT 363 - Sculpture II Credits: 3
- AVT 393 - Field Experience in the Arts Credits: 1-6 or AVT 489 - Internship in Art and Visual Technology Credits: 1-6 (must be taken for 3 credits)
- AVT 462 - Sculpture III Credits: 3
- AVT 463 - Sculpture IV Credits: 3
Sculpture Note:

All AVT majors concentrating in sculpture must complete AVT 262 under Breadth and Experience.

Concentration Electives

AVT 496 - Special Topics: (specific course title varies) or AVT 491 - Independent Study in Art and Visual Technology may be taken with permission of respective Area Coordinator.

General Electives (18-19 credits)

BA students must use general electives to either complete a minor, double major or double degree outside their primary major field of study (15–20 credits) or demonstrate intermediate-level proficiency in one foreign language (0–9 credits). After fulfilling one of these options, the remaining general electives may be taken inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300 and 400 level); most students will require at least 13 elective credits at the 300 level or above.

AVT 393 - Field Experience in the Arts Credits: 1-6 and AVT 489 - Internship in Art and Visual Technology Credits: 1-6 are not required courses but are highly recommended as electives for BA students.

Total: 120 credits

Bachelor of Fine Arts

Art and Visual Technology, BFA

Banner Code: AR-BFA-AVT

• ARTH 201 - History of Western Art II Credits: 3
• ARTH 374 - Art Now Credits: 3
• 3* credits of  AVT 301 - Visual Voices Colloquium Credits: 1
• AVT 307 - Aesthetics Credits: 3
• AVT 395 - Writing for Artists Credits: 3
• AVT 472 - Critical Theory in the Visual Arts Credits: 3
  Choose one of the following:
  • ARTH 200 - History of Western Art I Credits: 3
  • ARTH 203 - Survey of Asian Art Credits: 3
  • ARTH 204 - Survey of Latin American Art Credits: 3
Choose one of the following. Students concentrating in graphic design must take either AVT 318 - History of Graphic Design Credits: 3 or AVT 410 - Experiential Design History Credits: 3 to meet this requirement:

- AVT 305 - Creative Processes Credits: 3
- AVT 309 - Art as Social Action Credits: 3
- AVT 318 - History of Graphic Design Credits: 3
- AVT 371 - Visual Perception and the Arts Credits: 3
- AVT 372 - Hip Hop Culture Credits: 3
- AVT 374 - Sound Art I Credits: 3
- AVT 380 - Thinking Through Animation Credits: 3
- AVT 407 - Advanced Aesthetics Credits: 3
- AVT 410 - Experiential Design History Credits: 3
- AVT 493 - Teaching Visual Thinking Through Media, PK-12 Credits: 3
- 3 credits of 300-400 level ARTH

*Transfer students with less than three semesters remaining must take AVT 301 - Visual Voices Colloquium Credits: 1 for each remaining semester.

Breadth and Experience (12-13 credits)

Choose three to four of the following classes, at least one of which must be a 200-level studio course. (See each concentration for individual requirements):

- AVT 215 - Typography Credits: 4
- AVT 217 - Introduction to Web Design Credits: 4
- AVT 232 - Painting I Credits: 4
- AVT 243 - Printmaking I Credits: 4
- AVT 252 - Fundamentals of Photography Credits: 4
- AVT 253 - Introduction to Digital Photography Credits: 4
- AVT 254 - Photography Credits: 4
- AVT 262 - Sculpture I Credits: 4
- AVT 272 - Interdisciplinary Arts Credits: 4
- AVT 280 - Introduction to New Media Arts Credits: 4
- AVT 326 - Nontraditional Approaches to Drawing Credits: 3
- AVT 327 - Illustration Credits: 3
- AVT 346 - Digital Printmaking Credits: 3
- AVT 374 - Sound Art I Credits: 3
- AVT 385 - EcoArt Credits: 3
- AVT 496 - Special Topics: (specific course title varies) Credits: 1-4
- Or other courses as approved by program director

Professional Practices (3 credits)

- AVT 413 - Professional Design Practices Credits: 3 or AVT 453 - Professional Practices Credits: 3 (all students concentrating in graphic design must complete AVT 413 - Professional Design Practices Credits: 3)

Synthesis (3 credits)

- AVT 497 - Senior Project Credits: 3 or AVT 498 - Senior Design Project Credits: 3
Concentration (24 credits)

Choose one of the following areas: Drawing, Graphic Design, InterArts, New Media Art, Painting, Photography, Printmaking, or Sculpture.

▲ Drawing (DRW)

- AVT 422 - Drawing III Credits: 3
- AVT 423 - Drawing IV Credits: 3
- 12 credits of 300-400 level AVT
  AND
  - 6 credits chosen from:
    - AVT 324 - Figure Drawing Credits: 3
    - AVT 326 - Nontraditional Approaches to Drawing Credits: 3
    - AVT 328 - Mixed Media Credits: 3
    - AVT 333 - Painting II Credits: 3
    - AVT 336 - Experimental Painting Credits: 3
    - AVT 337 - Figurative Painting Credits: 3
    - AVT 432 - Painting III Credits: 3
    - AVT 433 - Advanced Painting I Credits: 3
    - AVT 496 - Special Topics: (specific course title varies) Credits: 1-4 (must be in Drawing)
    - Or other courses as approved by area coordinator

Drawing Note:

All AVT majors concentrating in drawing must complete AVT 232 - Painting I Credits: 4 under Breadth and Experience.

▲ Graphic Design (GD)

- AVT 311 - Graphic Design Methods and Principles Credits: 3
- AVT 313 - Editorial Design Credits: 3
- AVT 414 - Corporate Design and Branding Credits: 3
  - 15 credits chosen from:
    - AVT 411 - Motion Design Credits: 3
    - AVT 412 - Advanced Typography Credits: 3
    - AVT 415 - Web Design and Usability Credits: 3
    - AVT 416 - Advertising Design Credits: 3
    - AVT 417 - Package Design Credits: 3
    - AVT 419 - Topics in Graphic Design Credits: 1-6
    - AVT 420 - Advanced Web Design Credits: 3
    - Or other courses as approved by area coordinator

Graphic Design Notes:

AVT 491 - Independent Study in Art and Visual Technology or AVT 496 - Special Topics: (specific course title varies) may be taken with permission of the Area Coordinator.
All AVT majors concentrating in graphic design must complete AVT 217 - Introduction to Web Design and AVT 252 - Fundamentals of Photography or AVT 253 - Introduction to Digital Photography under Breadth and Experience.

▲ InterArts (IA)

The concentration in InterArts is an individualized program of study focused on arts research with multidisciplinary goals. Students concentrating in InterArts are engaged with both creative and conceptual inquiry in the development of artistic practice bolstered by knowledge of other disciplines. Often, this work exists at the interstices of artforms, and focuses on research on areas of interest to the student. InterArts students draw on the large resources of the School of Art and the university in creating an individualized program of studio courses and complementary courses for a total of 24 credits (12 credits of disciplinary focus and 12 credits of complementary study). In consultation with a faculty advisor, the student drafts a curriculum contract outlining the course of study, which is approved by the InterArts faculty. Admission to the concentration is based on acceptance into the BFA program via a portfolio review process and project approval from the InterArts faculty.

▲ New Media Art (NMA)

- 12 credits of 300-400 level AVT
  AND
  12 credits chosen from the following:
  - AVT 374 - Sound Art I Credits: 3
  - AVT 376 - Live Movies Credits: 3
  - AVT 382 - 2D Experimental Animation Credits: 3
  - AVT 383 - 3D Experimental Animation Credits: 3
  - AVT 385 - EcoArt Credits: 3
  - AVT 390 - Video Art Credits: 3
  - AVT 482 - Advanced Image Making Credits: 3
  - AVT 483 - RS: Art and Interactivity Credits: 3
  - AVT 487 - Advanced Topics: New Media Art Credits: 3
  - Or other courses as approved by area coordinator

New Media Note:

All majors concentrating in new media art must complete AVT 280 - Introduction to New Media Arts Credits: 4 under Breadth and Experience, and AVT 180 - New Media in the Creative Arts Credits: 3 and CS 105 - Computer Ethics and Society Credits: 1 or PHIL 112 - Ethics and the Cybersociety Credits: 1 for their IT Mason Core requirement

▲ Painting (PNT)

- AVT 333 - Painting II Credits: 3
- AVT 432 - Painting III Credits: 3
- AVT 433 - Advanced Painting I Credits: 3
- 3 credits of 300-400 level AVT
  AND
  12 credits chosen from the following:
  - AVT 336 - Experimental Painting Credits: 3
  - AVT 337 - Figurative Painting Credits: 3
  - AVT 434 - Advanced Painting II Credits: 3
- AVT 435 - Advanced Painting III Credits: 3
- AVT 496 - Special Topics: (specific course title varies) Credits: 1-4 (topic must be in Painting)
- Or other courses as approved by area coordinator

Painting Note:

All majors concentrating in painting must complete AVT 262 - Sculpture I Credits: 4 under Breadth and Experience

▲ Photography (PHO)

- AVT 353 - Traditional Photo Methods Credits: 3
- AVT 356 - Photo Studio Techniques Credits: 3
- AVT 359 - About Photography: Practice and Research Credits: 3
  6 credits of 300-400 level AVT
  AND
  9 credits chosen from the following:
  - AVT 354 - Digital Photo Techniques Credits: 3
  - AVT 355 - Color Photo Methods Credits: 3
  - AVT 454 - Alternative Photo Processes Credits: 3
  - AVT 455 - Digital Printing Techniques Credits: 3
  - AVT 457 - Documentary Photography Credits: 3
  - AVT 458 - Advanced Studio Lighting Credits: 3
  - Or other courses as approved by area coordinator

Photography Note:

All AVT majors concentrating in photography must complete AVT 252 - Fundamentals of Photography Credits: 4 under Breadth and Experience.

▲ Printmaking (PM)

- AVT 343 - Printmaking II Credits: 3
- 12 credits of 300-400 level AVT
  AND
  9 credits chosen from the following:
  - AVT 345 - Paper/Print/Book as Language Credits: 3
  - AVT 346 - Digital Printmaking Credits: 3
  - AVT 442 - Printmaking III Credits: 3
  - AVT 443 - Printmaking IV Credits: 3
  - other courses as approved by area coordinator

▲ Sculpture (SCL)

- AVT 363 - Sculpture II Credits: 3
• AVT 393 - Field Experience in the Arts Credits: 1-6
• AVT 489 - Internship in Art and Visual Technology Credits: 1-6 (must be taken for 3 credits)
• AVT 462 - Sculpture III Credits: 3
• AVT 463 - Sculpture IV Credits: 3
• 12 credits of coursework as approved by area coordinator

Sculpture Note:
All AVT majors concentrating in sculpture must complete AVT 262 - Sculpture I Credits: 4 under Breadth and Experience

General Electives (0-1 credits)

Total: 120 credits

Bachelor/Accelerated Master's

Art and Visual Technology, BFA/Art Education, Accelerated MAT

Web: soa.gmu.edu
College: College of Visual and Performing Arts
Department: School of Art

Undergraduates in Art may apply to the accelerated master's degree in Art Education. If accepted, students will be able to earn an Art and Visual Technology, BFA and an Art Education, MAT after satisfactory completion of 144 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admissions Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit:

• Statement of intent and professional goals for entering the field
• Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant's academic or professional capabilities
• Official score on Praxis Core or SAT equivalent
• MAT (for BFA students) portfolio must include 15 to 20 images that reflect artistic breadth and depth, including samples of work with ample attention to drawing and painting from observation. These works must be submitted through SlideRoom. All pieces must include the title of the piece, date, medium, and size of each work. Incomplete portfolios will not be considered.
Teacher Endorsement

Students for the MAT (for BFA students) must complete ALL endorsements, as well as the Praxis Core Exam and the PLUS art education foundational courses AVT 493 - Teaching Visual Thinking Through Media, PK-12, AVT 494 - Strategies in Art Room: PK-12, and AVT 495 - Introduction to Art Teaching and Learning totaling 9 credit hours. Students must meet Virginia Department of Education's required semester credit hours in the following specific areas: 12 hours of two-dimensional media, 12 hours of three-dimensional media, 9 hours of cultural context and art history, judgment and criticism, aesthetics, and 3 hours of related areas of the fine arts. Students should work closely with their advisor to ensure they complete these course requirements through the BFA in Art and Visual Technology and MAT degrees.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Art and Visual Technology, BFA/Graphic Design, Accelerated MA

Web: soa.gmu.edu
College: College of Visual and Performing Arts
Department: School of Art

Undergraduates in Art may apply to the accelerated master's degree in Graphic Design. If accepted, students will be able to earn an Art and Visual Technology, BFA and a Graphic Design, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The standard timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admissions Requirements
Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit three letters of recommendation from faculty, or those who can evaluate the applicant's academic potential; a sample of academic writing about art or graphic design, such as a paper from an art or design history course; and 20 examples of original design works in a format that is viewable via SlideRoom.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

**Graduate Certificate**

**Art Education Licensure Graduate Certificate**

Banner Code: AR-CERG-ARTL  
Web: soa.gmu.edu  
College: College of Visual and Performing Arts  
Department: School of Art  
Following this curriculum does not guarantee entry into the Master of Art Teaching (MAT) Program. Prospective MAT students must meet all MAT admissions requirements as described in the catalog. Students must also complete a minimum of 18 credits in degree status after admission to the degree program.

Students must earn a B- or higher in all coursework.

**Admission Requirements**

In addition to meeting the general university admission requirements, admission to the licensure program is contingent on completion of a BFA, BA in art or approved equivalent along with a minimum 3.00 cumulative undergraduate GPA. Eligibility
for the Art Education Licensure Certificate program may demand additional course work to establish proficiency in visual arts. Students will be required to satisfy the required state endorsement courses prior to student teaching.

Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 1 for Spring and April 1 for Fall. Each applicant must provide the following materials:

- Completed application form
- Certified copies of all undergraduate transcripts and any graduate transcripts
- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- Official passing score on Praxis Core or SAT equivalent
- TOEFL score, if required by Mason policies
- Portfolio of 15-20 images that reflect artistic breadth and depth, including drawing skills of the applicant’s art. The work should be submitted via SlideRoom. All portfolios must include a written image sheet with the corresponding number, title, date, medium, and size of each work. Incomplete portfolios will not be considered. Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

The all application materials should be submitted to the Office of Graduate Admissions. Applicants refer to the graduate page of the School of Art website for more details.

Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core and studio and art history courses.

The Art Education Licensure Certificate is a post-baccalaureate program designed for those who currently hold an undergraduate degree in an art-related field along with those who want a more immediate entrance into the art teaching profession. This "licensure only" program, which results in a pre K-12 art certification in the Commonwealth of Virginia, is a 21-credit program consisting of graduate education courses, art endorsements, student teaching internships and seminar. There is a MAT Graduate Degree option with an additional 9 graduate credits.

International students may be required to undergo an additional audit of their undergraduate transcripts.

This certificate may be earned either on a part time or full time basis.

Certificate Requirements

- AVT 595 - Introduction to Art Teaching and Learning Credits: 3
- AVT 691 - Elementary Art Education Credits: 3
- AVT 692 - Secondary Art Education Credits: 3
- EDRD 501 - Literacy and Curriculum Integration, PK-12 Credits: 3
- EDUC 539 - Human Development and Learning PK-12 Credits: 3
- Prior to internship, student must pass: Praxis II, VCLA, technology and child abuse standards to receive placement for student teaching.
- AVT 695 - Internship in Art Education (Student Teaching) Credits: 5
- AVT 696 - Internship in Art Education Seminar Credits: 1

Total: 21 credits
All Licensure Certificate students will receive ongoing evaluations by the art education faculty to determine their readiness for student teaching.

In addition, applicants who did not take equivalent undergraduate courses will be required to take AVT 180 - New Media in the Creative Arts, art education endorsements, plus any additional studio or art history course work to meet Virginia licensure requirements.

**Master of Arts**

**Graphic Design, MA**

**Banner Code: AR-MA-GD**  
Web: soa.gmu.edu  
College: College of Visual and Performing Arts  
Department: School of Art

The MA in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program calls for 36 credits, which includes courses in typography, web design, image making, and brand design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field.

An accelerated master's degree option is available to students in the bachelor's program. See Art and Visual Technology, BFA/Graphic Design, Accelerated MA for requirements.

**Admission Requirements**

Application deadlines are as published by the University. Applicants should have an earned BA or BFA degree in Graphic Design from an accredited college or university, with a GPA of 3.00 in art courses. However, applicants with a BA or BS in another discipline, and work experience in the field may also apply for admission. Student should schedule an interview with design faculty prior to admission.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit three letters of recommendation from faculty members, or those who can evaluate the applicant's academic potential; a sample of academic writing about art or graphic design, such as a paper from an art or design history course; and a portfolio with 20 examples of design works that are SlideRoom-compatible.

**Portfolio Guidelines**

The applicant's portfolio is a major selection criterion for graduate admission and should represent the applicant's most accomplished work.

Applicants' portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art at 703-993-8898.

**Studios**

The School of Art is located in the Art and Design Building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.
Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

Core Courses (19 credits)

- 8 credits of AVT 519 - Special Topics in Graphic Design Credits: 1-6, AVT 596 - Independent Study Credits: 1-6, or AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6 (or other course as approved by director).
- AVT 611 - Graduate Design Seminar Credits: 1 (Must be taken for a total of 3 credits)
- AVT 612 - Independent Project Research Credits: 1
- AVT 613 - Experiential Design History Credits: 3
- AVT 617 - Advanced Typography Credits: 4
- CVPA 600 - CVPA Graduate ProSeminar Credits: 0 (Must be taken within the student's first 2 semesters)

Elective Courses (13 credits)

Choose from the following:

- 1-13 credits of AVT 519 - Special Topics in Graphic Design Credits: 1-6
- AVT 614 - Brand Identity Design Credits: 4
- AVT 619 - Advanced Web Design Credits: 4
- 1-5 credits of AVT 596 - Independent Study Credits: 1-6

Final Project (4 credits)

The final steps for completion of the MA in Graphic Design are a substantial final project that calls upon all the skills of a working designer.

- AVT 794 - Graphic Design Project Credits: 4

Total: 36 credits

Master of Arts in Teaching

Art Education, MAT

Banner Code: AR-MAT-ARTE
Web: soa.gmu.edu
Graduate Program

The School of Art offers a Master of Arts in Teaching in Art Education that has two concentrations: one concentration for those seeking certification (MAT I) as well as a one for licensed art teachers who are continuing education (MAT II).

The Master of Arts in Teaching in Art Education (MAT I) is a pre-service degree program that prepares students with a BFA degree or equivalent for PreK-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work, and pre-service teaching internship and seminar.

The concentration for licensed art teachers (MAT II) is designed for PreK-12 licensed art teachers who currently hold an undergraduate degree in art education and a current teaching license in Art Education. Applicants are interested in obtaining a graduate art education degree for further professional development. Students take graduate art education courses, approved graduate level studio art courses, education courses, and complete a capstone project.

Students must earn a B- or higher in licensure coursework.

An accelerated master's option is available to students in the bachelor's program. See Art and Visual Technology, BFA/Art Education, Accelerated MAT for requirements.

Admission Requirements

In addition to meeting the general university admission requirements for graduate study, admission to this program is contingent on completion of a BFA in visual art or approved equivalent. Also, candidates must have a minimum 3.00 cumulative undergraduate GPA.

Eligibility for the MAT I in Art Education program may demand additional course work to establish proficiency in visual arts. Students lacking a strong background in the visual arts or pedagogy, or those who earned a BFA or BA at an institution other than Mason, may be required to satisfy prerequisite courses prior to entry into the graduate program. Applicants must complete an endorsement worksheet through the College of Education and Human Development in order to prove that their previous coursework satisfies the prerequisite requirements for Virginia licensure and/or for entry into the Master's program.

Students interested in pursuing the degree with the concentration for licensed art teachers must meet the above with the following exceptions: admission is contingent upon the completion of a BFA or BA in art or art education with a minimum 3.00 cumulative undergraduate GPA, maintaining a current PreK-12 license to teach art education with at least one or more years of art teaching experience.

Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 1 and March 1. Each applicant must provide the following materials:

- Completed application form
- Certified copies of all undergraduate transcripts and any graduate transcripts
- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant's academic or professional capabilities
- Official scores on Praxis Core or SAT equivalent (MAT I only)
- Endorsement Worksheet (MAT I only)
- TOEFL score (for international applicants only)
- Portfolio Requirement*: 

*Portfolio Requirement is required for all applicants who are seeking financial aid or scholarships.
MAT I: portfolio must include 15 to 20 images that reflect artistic breadth and depth, including drawing skills of the applicant's art.

MAT II: portfolio must include 10 images of the applicant's personal art that reflect artistic breadth and depth, including drawing skills, along with 10 student art works displaying a variety of 2-D and 3-D media. Student artwork is to be accompanied by a brief description of the lesson content.

*All portfolios should be submitted through SlideRoom. All portfolios must include title, date, medium, and size of each work. Incomplete portfolios will not be considered.*

All application materials should be submitted to the Office of Graduate Admissions. Qualified applicants may be invited to an on-campus interview. Applicants should visit the graduate admissions page on the School of Art's website for more details.

Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete additional undergraduate core, studio, and art history courses.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Degree Requirements**

**Required Core Courses (9 credits)**

- AVT 605 - Issues and Research in Art Education Credits: 3
- AVT 667 - Two-Dimensional Art Making: Form, Theme, and Context Credits: 3
- AVT 668 - Three-Dimensional Art Making Across Cultures Credits: 3
- CVPA 600 - CVPA Graduate ProSeminar Credits: 0 (Must be taken within a student's first 2 semesters)

**MAT (I) Required Courses (21 credits)**

Course work meets licensure and Master's degree requirements. The listing below follows the recommended sequencing for licensure.

- AVT 615 - Technology for Art Teachers Credits: 3
- AVT 691 - Elementary Art Education Credits: 3
- AVT 692 - Secondary Art Education Credits: 3
  *Prior to Internship, must pass: Praxis II, VCLA, technology & child abuse standards*
- AVT 695 - Internship in Art Education (Student Teaching) Credits: 5
- AVT 696 - Internship in Art Education Seminar Credits: 1
- EDRD 501 - Literacy and Curriculum Integration, PK-12 Credits: 3
- EDUC 539 - Human Development and Learning PK-12 Credits: 3

**Professional Teaching Portfolio**

The comprehensive experience for the MAT I includes the following: (1) a group exhibition, "The Art of Teaching Art Showcase," in which MAT candidates display and formally present works of PreK–12 student art completed during the
Internship, along with exemplars of the MAT candidate's own artwork, and (2) a culminating review of the intern's competencies as reflected in a professional teaching portfolio, accomplished during the internship seminar course that accompanies student teaching.

A committee of MAT faculty will determine whether the student has mastered the field of study based on the final portfolio and exhibition. Students who are unable to successfully complete the full student teaching internship in art education and seminar for student teachers will be terminated from the MAT in Art Education program.

Teacher Endorsement

MAT I students originally admitted under provisional status must complete all endorsements and any assigned art education foundational courses (which may include AVT 493 - Teaching Visual Thinking Through Media, PK-12 Credits: 3, AVT 494 - Strategies in Art Room: PK-12 Credits: 3, or AVT 495 - Introduction to Art Teaching and Learning Credits: 3) by the date indicated on the student's provisional admission agreement and prior to admission to degree status. These courses may be taken concurrently with other MAT courses, but may not exceed a total of 9 credits. All MAT I students should meet all testing and coursework requirements prior to starting their student teaching internship. Students must have a studio major in the Visual Arts and meet the Virginia Department of Education's required semester credit hours in the following specific areas: 12 hours of two-dimensional media, 12 hours of three-dimensional media, 9 hours of cultural context and art history, judgment and criticism, aesthetics, and 3 hours of related areas of the fine arts.

Notes:

MAT I students will receive ongoing evaluation reviews by the MAT faculty to determine whether they have achieved satisfactory progress toward their degree.

▲MAT (II) Concentration for Licensed Art Teachers (LAT) Required Courses (21 credits)

- 4 credits of AVT 596 - Independent Study Credits: 1-6 or AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6 (or other courses as approved by director)
- AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6 (Topic: Prints/Paper/Books as Language Credits: 4)
- AVT 606 - Creativity and Cognition in the Arts and Media Credits: 3
- AVT 615 - Technology for Art Teachers Credits: 3
- 1 credit of AVT 698 - Independent Study/Directed Readings Credits: 1-3
- EDUC 537 - Introduction to Culturally & Linguistically Diverse Learners Credits: 3
- 3 credits of graduate Education courses selected from the following: EDUC 521 - Foundations of Education, PK-12 Credits: 3; EDUC 522 - Foundations of Secondary Education Credits: 3; EDUC 539 - Human Development and Learning PK-12 Credits: 3; EDUC 542 - Foundations of Education Credits: 3; EDUC 543 - Children, Family, Culture, and Schools, 4-12 Year Olds Credits: 3; EDUC 597 - Special Topics in Education Credits: 1-6; EDUC 606 - Education and Culture Credits: 3; EDUC 613 - How Students Learn Credits: 3; EDUC 614 - Designing and Assessing Teaching and Learning Credits: 2; EDUC 615 - Educational Change Credits: 2; or other course as approved by director.

Notes:

MAT for Licensed Art Teachers Concentration students must complete a Capstone Project. Under the guidance of a faculty advisor, students will select a topic in a personal area of interest in art education pedagogy, carry out in-depth research, and prepare a capstone final project in the form of a written report and visual presentation.
Total: 30 credits

Note:

All MAT students must pass Praxis II and Virginia Communication and Language Assessment (VCLA) to receive placement for student teaching in the final semester.

Non-Degree

Art and Visual Technology Minor

Banner Code: AVT
Web: soa.gmu.edu/

College: College of Visual and Performing Arts
Department: School of Art The minor in AVT requires 18-19 credits and offers a core of foundational studies with the opportunity for further study in the following areas: drawing, graphic design, new media arts, painting, photography, printmaking, or sculpture.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum earned GPA of 2.0

Minor Requirements

- AVT 104 - Two-Dimensional Design and Color Credits: 4 or AVT 105 - Three-Dimensional Design and Beyond Credits: 4
- AVT 222 - Drawing I Credits: 4
- 4-8 credits selected from AVT 200-299
- 3-6 credits selected from AVT 300-499

Total: 18-19 credits

Graphic Design Minor

Banner Code: GD
Web: soa.gmu.edu/

College: College of Visual and Performing Arts
Department: School of Art This minor is available to AVT majors. AVT majors must complete 12 credits unique to the minor. It is recommended that non-AVT majors take AVT 104 - Two-Dimensional Design and Color Credits: 4 for their Art Mason Core requirement as well as AVT 180 - New Media in the Creative Arts Credits: 3 for the Information Technology (IT, except ethics) requirement. These courses are prerequisites for Graphic Design coursework.

Minor Requirements
• AVT 215 - Typography Credits: 4
• AVT 311 - Graphic Design Methods and Principles Credits: 3
• AVT 313 - Editorial Design Credits: 3 or AVT 414 - Corporate Design and Branding Credits: 3
• AVT 318 - History of Graphic Design Credits: 3
• AVT 412 - Advanced Typography Credits: 3 or AVT 416 Advertising Design Credits: 3

Total: 16 credits

Web Design Minor

Banner Code: WDSN
Web: soa.gmu.edu/

College: College of Visual and Performing Arts
Department: School of Art

AVT majors must complete 12 credits unique to the minor. It is recommended that non-AVT majors take AVT 104 - Two-Dimensional Design and Color Credits: 4 for their Mason Core art requirement as well as AVT 180 - New Media in the Creative Arts Credits: 3 for the information technology (IT, except ethics) requirement. These are prerequisites for Web Design course work.

Minor Requirements

• AVT 215 - Typography Credits: 4
• AVT 217 - Introduction to Web Design Credits: 4
• AVT 311 - Graphic Design Methods and Principles Credits: 3
• AVT 411 - Motion Design Credits: 3 or AVT 420 - Advanced Web Design Credits: 3
• AVT 415 - Web Design and Usability Credits: 3

Total: 17 credits

Undergraduate Certificate

Graphic Design Undergraduate Certificate

Banner Code: AR-CERB-GD
Web: soa.gmu.edu/

College: College of Visual and Performing Arts
Department: School of Art

The Graphic Design Undergraduate Certificate is for working adults with a 4-year baccalaureate undergraduate degree from an accredited institution who seek to gain the skills and competency to advance into a career in graphic design. It encompasses a specific body of knowledge and practice that prepares candidates for rewarding positions in the design field.

Students entering the program must be able to demonstrate basic skills in visual language and should have working knowledge of professional graphic design software, or must take AVT 180 - New Media in the Creative Arts Credits: 3 in addition to other required courses.

The certificate may be completed under part or full time basis.
Certificate Requirements

Foundation Courses (15 credits)

- AVT 215 - Typography Credits: 4
- AVT 217 - Introduction to Web Design Credits: 4
- AVT 253 - Introduction to Digital Photography Credits: 4
- AVT 311 - Graphic Design Methods and Principles Credits: 3

Design Specialties Courses (6 credits)

- AVT 313 - Editorial Design Credits: 3
- AVT 414 - Corporate Design and Branding Credits: 3

Capstone (3 credits)

- AVT 413 - Professional Design Practices Credits: 3

Total: 24 credits

Other Degrees

Arts and Social Change Minor

Banner Code: ASC
Web: soa.gmu.edu/

College: College of Visual and Performing Arts
Department: School of Art

The Arts and Social Change minor leverages artistic and creative practice in an array of academic and social contexts. The goal is to infuse these practices into territories outside the traditional art world through research, participatory experimentation and documentary aesthetic aspects of social practice. With a focus on creative research and project production students experience direct engagement with communities while developing skills toward fostering positive change in communities via the arts.

Students complete 12 credits unique to the minor and must complete an approved AVT course for their Mason Core Arts requirement.

Special topics courses will be notated in Patriot Web as a designated Arts and Social Change course.

Minor Requirements

- AVT 390 - Video Art Credits: 3
• AVT 393 - Field Experience in the Arts Credits: 1-6 (must be taken for a total of 3 credits)
• AVT 496 - Special Topics: (specific course title varies) Credits: 1-4 (must be taken for a total of 3 credits and designated as an ASC course)

Select two courses from the following (6 credits)

• AVT 309 - Art as Social Action Credits: 3
• AVT 345 - Paper/Print/Book as Language Credits: 3
• AVT 363 - Sculpture II Credits: 3
• AVT 374 - Sound Art I Credits: 3
• AVT 385 - EcoArt Credits: 3
• AVT 457 - Documentary Photography Credits: 3

Select two courses from the following (6 credits)

• AMGT 410 - Arts Advocacy and Community Credits: 3
• AMGT 471 - Introduction to Grant Writing Credits: 1
• ANTH 370 - Environment and Culture Credits: 3
• CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
• CONF 302 - Culture, Identity, and Conflict Credits: 3
• CONF 325 - Dialogue and Difference Credits: 3
• FAVS 365 - Documentary Filmmaking Credits: 3
• FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3 (must be designated as an ASC course)
• FRLN 385 - Multilingualism, Identity, and Power Credits: 3
• INTS 337 - Social Justice Consciousness and Personal Transformation Credits: 3
• SOCI 320 - Social Structure and Globalization Credits: 3
• SOCI 355 - Social Inequality Credits: 3
• THR 490 - Special Topics in Theater Credits: 1-6 (must be designated as an ASC course)
• Or other courses as approved by program director

Total: 21 credits

Photography Minor

Banner Code: PHO
Web: soa.gmu.edu/

College: College of Visual and Performing Arts
Department: School of Art The photography minor provides opportunities for students to develop a personal vision in response to photography's role in contemporary art and culture. Various studio classes emphasize a range of techniques in the production of traditional, digital and experimental imagery. Critical thinking combined with studio/lab experience enhance this comprehensive introduction to the field and practice of photography.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree, with a minimum 2.00 GPA earned in all courses applied to the minor. See AP.5 Undergraduate Policies for details.

This minor is available to AVT majors. AVT majors must complete 12 credits unique to the minor.
Minor Requirements

Required Courses (10 credits)

- AVT 252 - Fundamentals of Photography Credits: 4 or AVT 253 - Introduction to Digital Photography Credits: 4
- AVT 353 - Traditional Photo Methods Credits: 3 or AVT 354 - Digital Photo Techniques Credits: 3
- AVT 356 - Photo Studio Techniques Credits: 3

Two courses from the following (6 credits):

- AVT 353 - Traditional Photo Methods Credits: 3 (if not used above)
- AVT 354 - Digital Photo Techniques Credits: 3 (if not used above)
- AVT 355 - Color Photo Methods Credits: 3
- AVT 359 - About Photography: Practice and Research Credits: 3
- AVT 453 - Professional Practices Credits: 3
- AVT 454 - Alternative Photo Processes Credits: 3
- AVT 455 - Digital Printing Techniques Credits: 3
- AVT 457 - Documentary Photography Credits: 3
- AVT 458 - Advanced Studio Lighting Credits: 3
- Or other courses as approved by program director

Total: 16 credits

Arts Management

3434 N. Washington Boulevard
Arlington, VA 22201
Phone: 703-993-8926
Web: artsmanagement.gmu.edu

Faculty

Claire Huschle, Program Director
Nicole Springer, Assistant Program Director

Professor: Reeder

Associate Professors: Rosenstein

Assistant Professors: Gao, Huschle (program director)

Adjunct Faculty: Alnouri, Berardelli, Bursten, Corbett, Cissna, Fries, Garfinkle, Hill, Hollins, MacKay, Miller, Rosenfeld, Salmon, Schoenberg, Smith, Smyers, Springer, Sweet, Thompson

Courses
The Arts Management Program offers all courses designated AMGT in the Courses section of this catalog.

**Undergraduate Program**

**Arts Management Minor**

The field of visual and performing arts offers many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management. The minor in arts management is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor.

**MA in Arts Management**

The MA in arts management responds to a growing demand for graduates who can manage and coordinate the arts, bridging the worlds of performing and visual arts with applied managerial skills. The Washington, D.C., region is home to one of the nation's largest concentrations of arts organizations. The demand for arts managers with skills in financial and budgetary management, strategic management and entrepreneurship, and public relations, including marketing and advertising, has arguably never been more acute. The need for arts managers with skills in philanthropy, fund raising, and ongoing relationship management in the private and public arts sectors also continues to grow at a fast pace.

The MA is a 36-credit program of study that provides a core curriculum in the fundamentals of arts management. Students complete a 24-credit core and then select 9 credits of approved elective courses. Students also take an internship, which affords an in-depth opportunity to work with professionals in the field. The internship provides the opportunity to work at more than 60 different visual and performing arts venues in Washington, D.C., as well as national and international locations.

Accelerated master's options are available to students pursuing a bachelor's in Art or Theater.

**Admissions Requirements**

The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that some students will come from the arts community, with experience and training in music, dance, theater, visual and technical arts and wish to add the skills of marketing, finance, strategy, fundraising, entrepreneurship, and management to their repertoire. It is also expected that some students will enter with more developed skills in business and wish to unite these skills with prior experiences in the arts.

For admissions requirements and deadlines, applicants should visit the graduate admissions page of the Arts Management website at http://artsmanagement.gmu.edu.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Bachelor/Accelerated Master's**

**Art and Visual Technology, BA/Arts Management, Accelerated MA**
Undergraduates in Art may apply to the accelerated master's degree in Arts Management. If accepted, students will be able to earn an Art and Visual Technology, BA and an Arts Management, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Admissions Requirements**

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

**Art and Visual Technology, BFA/Arts Management, Accelerated MA**
Undergraduates in Art may apply to the accelerated master's degree in Arts Management. If accepted, students will be able to earn an Art and Visual Technology, BFA and an Arts Management, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Admissions Requirements**

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

**Theater, BA/Arts Management, Accelerated MA**

Web: theater.gmu.edu or artsmanagement.gmu.edu
Undergraduates in Theater may apply to the accelerated master's degree in Arts Management. If accepted, students will be able to earn a BA in Theater and an MA in Arts Management after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and the completion in the Summer five years later, but longer time frames may also be available.

This accelerated option is offered through joint cooperation between the School of Theater and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Admission Requirements**

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. The Internal Internship (AMGT 740) will be within Theater at Mason (generally with the School of Theater). Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Theater. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

**Master of Arts**

**Arts Management, MA**
The MA in arts management responds to a growing demand for graduates who can manage and coordinate the arts, bridging the worlds of performing and visual arts with applied managerial skills. The Washington, D.C., region is home to one of the nation's largest concentrations of arts organizations. The demand for arts managers with skills in financial and budgetary management, strategic management and entrepreneurship, and public relations, including marketing and advertising, has arguably never been more acute. The need for arts managers with skills in philanthropy, fund raising, and ongoing relationship management in the private and public arts sectors also continues to grow at a fast pace.

The MA is a 36-credit program of study that provides a core curriculum in the fundamentals of arts management. Students complete a 24-credit core and then select 9 credits of approved elective courses. Students also take an internship, which affords an in-depth opportunity to work with professionals in the field. The internship provides the opportunity to work at more than 60 different visual and performing arts venues in Washington, D.C., as well as national and international locations.

Accelerated master's options are available to students who are pursuing a bachelor's in Art or Theater. See the following programs for more information:

- Art and Visual Technology, BA/Arts Management, Accelerated MA
- Art and Visual Technology, BFA/Arts Management, Accelerated MA
- Theater, BA/Arts Management, Accelerated MA

**Admissions Requirements**

The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that some students will come from the arts community, with experience and training in music, dance, theater, visual and technical arts and wish to add the skills of marketing, finance, strategy, fundraising, entrepreneurship, and management to their repertoire. It is also expected that some students will enter with more developed skills in business and wish to unite these skills with prior experiences in the arts. Completed applications must be received by February 15 for fall and October 1 for spring.

In addition to meeting general requirements for university admission for graduate study, applicants must submit the following items:

- Official undergraduate transcripts listing a four-year bachelor's degree from an accredited institution with a minimum GPA of 3.00
- Resume
- Two letters of recommendation from faculty members or individuals who have first-hand knowledge of the applicant's academic or professional capabilities
- A two-page (maximum) statement of intent and goals
- Portfolio that demonstrates work experience (optional)
- Applicants may be interviewed by at least one member of the program faculty or Admissions Committee

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements**
Core Requirements (24 credits)

Elective courses at the 600 or higher course level may be taken only after a candidate has completed and/or registered for at least 12 core course credits. Students are required to successfully complete AMGT 602 - Seminar in Arts Management within their first 12 credits.

- AMGT 601 - Fund Raising/Development I Credits: 3
- AMGT 602 - Seminar in Arts Management Credits: 3
- AMGT 603 - Arts and Society Credits: 3
- AMGT 604 - Public Relations and Marketing Strategies for the Arts I Credits: 3
- AMGT 606 - Governance and Leadership Credits: 3
- AMGT 704 - Finance and Budgeting for Arts I Credits: 3
- AMGT 705 - Finance and Budgeting for Arts II Credits: 2
- AMGT 710 - Arts Policy Credits: 3
- AMGT 795 - Capstone in Arts Management Credits: 1
- CVPA 600 - CVPA Graduate ProSeminar Credits: 0 (must be taken within the student's first 2 semesters)

Internship (3 credits)

- AMGT 742 - Internship I Credits: 3

Electives (9 credits)

Select 9 credits from the following:

- AMGT 504 - Professional Development Arts Management Credits: 1
- AMGT 511 - Introduction to Grant Writing Credits: 1
- AMGT 512 - Grant Writing in the Arts Credits: 1
- AMGT 513 - Technology in the Arts Credits: 1
- AMGT 609 - Performing Arts Management Credits: 3
- AMGT 610 - Visual Arts Management Credits: 3
- AMGT 620 - Legal Aspects in Arts Management Credits: 3
- AMGT 640 - Programming and Project Arts Management Credits: 3
- AMGT 706 - Festivals and Special Events Credits: 3
- AMGT 711 - Directed Readings and Project Credits: 1-6
- AMGT 752 - Arts Entrepreneurship Credits: 3-6
- AMGT 792 - Internship II Credits: 3

Total: 36 credits

Non-Degree

Arts Management Minor

Banner Code: AMGT
3434 N. Washington Boulevard
The fields of visual and performing arts offer many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management. The minor in arts management is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor.

University policy states that students must earn 8 distinct credits that are not used toward their major toward their minor, with a minimum 2.00 GPA earned in all courses applied to the minor. See AP.5 Undergraduate Policies for details.

Minor Requirements

The minor in arts management consists of 18 credits, including:

- AMGT 405 - Seminar in Arts Management Credits: 3
- AMGT 410 - Arts Advocacy and Community Credits: 3
- 3-4 credits of AMGT 489 - Internship in Arts Management Credits: 1-4

Mini-Courses

Choose 2-3 credits from:

- AMGT 402 - Professional Development Credits: 1
- AMGT 471 - Introduction to Grant Writing Credits: 1
- AMGT 472 - Technology in the Arts Credits: 1

Electives

Choose 6 credits from the following:

- AVT 307 - Aesthetics Credits: 3
- AVT 309 - Art as Social Action Credits: 3
- DANC 390 - Dance History I Credits: 3
- DANC 391 - Dance History II Credits: 3
- GAME 230 - History of Computer Game Design Credits: 3
- THR 201 - Stage Management Credits: 3
- THR 202 - Literary Management Credits: 1
- THR 203 - Production/Company Management Credits: 1
- THR 355 - Moral Vision in American Theater Credits: 3
- THR 359 - World Stages Credits: 3
- THR 395 - Theater as the Life of the Mind Credits: 3
- AVT 392 - Gallery Practices Credits: 3
- AVT 395 - Writing for Artists Credits: 3
- DANC 270 - Dance Production Lab Credits: 1
- DANC 318 - Global Perspectives: World Dance Forms Credits: 3
- DANC 372 - Advanced Dance Production Credits: 1
- FAVS 352 - Ethics of Film and Video Credits: 3
- MUSI 331 - Music History in Society I Credits: 3
- MUSI 332 - Music History in Society II Credits: 3
- MUSI 393 - Music Administration and Management Credits: 2
- MUSI 401 - Impact of the Arts on Civilization Credits: 3
- ARTH 374 - Art Now Credits: 3
- ARTH 394 - The Museum Credits: 3
- COMM 300 - Foundations of Public Communication Credits: 3

Note: the above courses may have prerequisites that must be met; see individual course descriptions for details.

Total: 18 credits

Computer Game Design

Art and Design Building, Room 2019
Phone: 703-993-5734
Web: http://game.gmu.edu

Faculty

Scott Martin, Program Director

Associate Professor: Martin (director), Willis

Assistant Professors: Grimsby, Hudson, Nam (associate director, graduate coordinator), Nolan, Piccione, Wren

Administrative Faculty (Instructional): Casey (associate director, Virginia Serious Game Institute)

Undergraduate Program

The 120-credit Computer Game Design program enables students to focus on the artistic components of computer game design while providing them with the technical skills prerequisite to the field. Required courses include computer science, art and visual technology, music, the humanities, and computer game design. The required internship provides students with practical experience that enhances their employability post-graduation.

Undergraduate Admissions

A writing sample will be reviewed prior to admission into the Game Design Program. Students will either be accepted, provisionally accepted, or denied. Visit http://game.gmu.edu for further instruction.
Graduate Program

The MA in Computer Game Design prepares graduate students, who may have studied game design at the undergraduate level or who have degrees in a related technology, humanities, or arts discipline, for a career in game development and design. The program's intention is to prepare students for employment and further study in the computer game design and development fields with a curriculum that reflects the gaming industry's demand for an academically rigorous, technical program coupled with an understanding of the artistic and creative elements of the evolving field of study.

Graduate Admissions

Admission is competitive. An offer of admission is valid only for the semester for which the student applies. For application requirements and deadlines, applicants should visit the Computer Game Design website at http://game.gmu.edu. Mason encourages early applications from prospective students who wish to be considered for academic scholarships or grants.

Courses

The Computer Game Design Program offers all courses designated GAME in the Courses section of this catalog.

Writing-Intensive Requirement

The university requires all undergraduate students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students in the BFA in computer game design fulfill this requirement by successfully completing GAME 332 - RS: Story Design for Computer Games Credits: 3.

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level. Fulfilling degree requirements does not guarantee this requirement will be met.

Major GPA

All GAME undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

All GAME courses except GAME 101 - Introduction to Game Design Credits: 3, GAME 250 - Music for Film and Video Credits: 3 and GAME 367 - Writing and Editing Music and Sound Credits: 3 must be passed with a grade of C or better.

Academic Policies

All GAME majors are required to adhere to the George Mason University Honor code. Failure to do so may result in academic sanctions up to an including dismissal from the University.

Please see College of Visual and Performing Arts for college academic policies.

Computer Game Design, BFA
Undergraduate Program

The 120-credit Computer Game Design program enables students to focus on the artistic components of computer game design while providing them with the technical skills prerequisite to the field.

Degree Requirements

Mason Core (40 credits)

- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as 302, to fulfill degree requirements.
- AVT 180 - New Media in the Creative Arts Credits: 3
- CS 105 - Computer Ethics and Society Credits: 1
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- PHYS 103 - Physics and Everyday Phenomena I Credits: 4 or PHYS 160 - University Physics I Credits: 3 and PHYS 161 - University Physics I Laboratory Credit: 1 or another laboratory science course approved by advisor (total Credits: 4)
- PSYC 100 - Basic Concepts in Psychology Credits: 3

Non-Specific Mason Core Requirements

- Oral Communication Credits: 3
- Fine Arts Credits: 3
- Literature Credits: 3
- Natural Science (including laboratory) Credits: 4
- Western Civilization Credits: 3
- Global Understanding Credits: 3

Approved courses may be found under the Mason Core section of this catalog.

Major Core (53-54 credits)

- AVT 104 - Two-Dimensional Design and Color Credits: 4
- CS 112 - Introduction to Computer Programming Credits: 4
- GAME 210 - Basic Game Design Credits: 3
• GAME 230 - History of Computer Game Design Credits: 3
• GAME 231 - Computer Animation for Games Credits: 3
• GAME 232 - Online and Mobile Gaming Credits: 3
• GAME 250 - Music for Film and Video Credits: 3
• GAME 300 - Portfolio Preparation Credits: 1
• GAME 310 - Game Design Studio Credits: 3
• GAME 330 - Computer Game Platform Analysis Credits: 3
• GAME 331 - Consumer Gaming Platform Analysis Lab Credits: 1
• GAME 332 - RS: Story Design for Computer Games Credits: 3
• GAME 367 - Writing and Editing Music and Sound Credits: 3
• GAME 398 - Advanced Game Design Animation Credits: 3
• GAME 410 - Advanced Game Design Studio Credits: 3
• GAME 489 - Pre-Internship Seminar Credits: 1
• GAME 490 - Senior Game Design Capstone Credits: 3 (Must be taken for 6 credits. Fulfills synthesis requirement.)
• GAME 491 - Internship Credits: 3-4

Digital Media Electives (at least 12 credits)

Complete at least 12 credits of the following (or another course approved by your advisor):

• AVT 280 - Introduction to New Media Arts Credits: 4
• AVT 354 - Digital Photo Techniques Credits: 3
• AVT 382 - 2D Experimental Animation Credits: 3
• AVT 383 - 3D Experimental Animation Credits: 3
• AVT 390 - Video Art Credits: 3
• AVT 482 - Advanced Image Making Credits: 3
• AVT 487 - Advanced Topics: New Media Art Credits: 3
• ENGH 372 - Introduction to Film Credits: 3
• FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3
• GAME 320 - Digital Painting for Games Credits: 3
• GAME 399 - Special Topics Credits: 1-4
• GAME 431 - Advanced Game Animation I Credits: 3

Visual Arts Electives (6-8 credits)

Complete 6-8 credits of the following (or another course approved by your advisor):

• AVT 215 - Typography Credits: 4
• AVT 217 - Introduction to Web Design Credits: 4
• AVT 222 - Drawing I Credits: 4
• AVT 232 - Painting I Credits: 4
• AVT 243 - Printmaking I Credits: 4
• AVT 252 - Fundamentals of Photography Credits: 4
• AVT 262 - Sculpture I Credits: 4
• AVT 311 - Graphic Design Methods and Principles Credits: 3
• AVT 323 - Drawing II Credits: 3
• AVT 324 - Figure Drawing Credits: 3
• AVT 333 - Painting II Credits: 3
• AVT 337 - Figurative Painting Credits: 3
• AVT 343 - Printmaking II Credits: 3
• AVT 353 - Traditional Photo Methods Credits: 3
• AVT 363 - Sculpture II Credits: 3

General Electives (6-9 credits)

Total: 120 credits

Master of Arts

Computer Game Design, MA

Banner Code: AR-MA-GAME
Web: game.gmu.edu

College: College of Visual and Performing Arts
Department: Computer Game Design

The MA in Computer Game Design prepares graduate students, who may have studied game design at the undergraduate level, or who have degrees in a related technology, humanities, or arts discipline. The program's intention is to prepare students for employment and further study in the computer game design and development fields, with a curriculum that reflects the gaming industry's demand for an academically rigorous, technical program coupled with an understanding of the artistic and creative elements of the evolving field of study.

Admissions Requirements

Admission is competitive. An offer of admission is valid only for the semester for which the student applies. Application for graduate admission is made to the Office of Graduate Admissions. The application deadline for fall admission is March 1; the application deadline for the spring semester is November 1. Mason encourages early applications from prospective students who wish to be considered for academic scholarships, grants or teaching assistantships.

Admission is contingent on satisfactory completion of in-progress course work, and graduation with a Bachelor degree, with a 3.0 GPA or higher, from an accredited undergraduate institute of higher education. The following items are required with applications for admission in the MA in Computer Game Design:

• Evidence of computer programming knowledge. A minimum of 3 credits (undergraduate or graduate) of Perl or Python and 3 credits of Java or C# is required (subject to change as fields develop);
• Completed online application for graduate study;
• Application fee;
• Official transcripts from all undergraduate institutions attended;
• Three letters of recommendation: letters from instructors, professional supervisors, who can evaluate the applicant's academic potential;
• International students must meet University criteria for the TOEFL (current University standard: 230 for computer-based, 88 for internet based tests), or other English proficiency examination;
• Goals statement: 1000 words, double spaced, 12 font;
• Writing sample: essay, review, project written within the last 3 years for academic course, college publication or competition, or for professional or community activity;
• Portfolio: must display 20 examples of the applicants' most accomplished work. The applicant's portfolio is a major selection criterion for graduate admission. Applicants' portfolio items are considered part of the application for admission and, thus, cannot be returned. The portfolio and all other application materials will be submitted to the Office of Graduate Admissions. See website for submission instructions.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

Core Requirements (22 credits)

• GAME 600 - Research Methodologies in Game Design Credits: 3
• 4 credits of GAME 605 - Game Design Graduate Seminar Credits: 1
• 6 credits of GAME 610 - Game Production Credits: 3
• GAME 617 - Teaching Practicum Credits: 3
• GAME 626 - Game Business, Entrepreneurship and Practice Credits: 3
• GAME 710 - Graduate Internship Credits: 3

Electives (9 credits)

Choose 9 credits from the following:

• ENGH 590 - Topics in Folk Narrative Credits: 3
• ENGH 685 - Selected Topics, Movements, or Genres of Literature in English Credits: 3
• GAME 628 - Advanced Game Art Credits: 3
• GAME 630 - Advanced Game Animation Credits: 3
• GAME 635 - Issues in Interactive Entertainment Credits: 3
• GAME 638 - Game Studio Management Credits: 3
• GAME 650 - Advanced Music and Sound for Games Credits: 3
• GAME 658 - Interactive Game Systems Design Credits: 3
• SOCI 614 - Sociology of Culture Credits: 3
• PSYC 619 - Applied Behavior Analysis: Principles, Procedures, and Philosophy Credits: 3

Comprehensive Experience (5 credits)
- 1 credit of  GAME 796 - Directed Reading Credits: 1
- GAME 797 - Proposal Writing Credits: 1
- GAME 798 - Project and Applied Research Credits: 3 or GAME 799 - Thesis Credits: 3

Total: 36 credits

Non-Degree

Computer Game Design Minor

Banner Code: GAME
Web: game.gmu.edu

College: College of Visual and Performing Arts
Department: Computer Game Design The minor (18-19 credits) embodies the core components discovered in the larger game design field. It offers a core of foundational studies with intermediate and advanced course options in game animation, game sound and music, or game design and development. Students pursuing the minor will be able to participate in game program events, special activities, game design competitions, and in most projects hosted in the Computer Game Design Research Studio.

Minor Requirements

The minor requires at least 18 credits, including:

- GAME 101 - Introduction to Game Design Credits: 3
- GAME 210 - Basic Game Design Credits: 3
- GAME 230 - History of Computer Game Design Credits: 3
- GAME 400 - Game Design Practicum Credits: 3
  and a two or three-course sequence from the following:
- GAME 231 - Computer Animation for Games Credits: 3 and GAME 398 - Advanced Game Design Animation Credits: 3
  OR
- GAME 232 - Online and Mobile Gaming Credits: 3 and GAME 330 - Computer Game Platform Analysis Credits: 3
  and GAME 331 - Consumer Gaming Platform Analysis Lab Credits: 1
  OR
- GAME 250 - Music for Film and Video Credits: 3 and GAME 367 - Writing and Editing Music and Sound Credits: 3
  OR
- 6-7 credits selected from GAME 200-499

Total: 18-19 credits

School of Dance
Faculty

Susan Shields, Director

Professors: Lepore, Miller, Shields (director)

Associate Professors: d'Amboise (Heritage Professor), Joyce, Price

Assistant Professor: Reedy

Adjunct Faculty: Adebusola, Brown, Clark, Goodson, Hansen-Honeycutt, Isaac, Matthews, Pilkington, Rocher, Spatz, Summerall, Windom

Courses

The School of Dance offers all courses designated DANC in the Courses section of this catalog.

Undergraduate Programs

The School of Dance offers a BFA and a BA. Entrance to either program is by audition. Information about the audition process, including dates and audition application, can be found on the school web page, dance.gmu.edu, or by calling the dance office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their major at the 300-level or above. Students in the BFA and BA in dance fulfill this requirement by successfully completing DANC 390 or DANC 391.

Master of Fine Arts, Visual and Performing Arts

The School of Dance offers one concentration under the Master of Fine Arts, Visual and Performing Arts degree: Dance. Applicants to the program must designate which concentration they intend to apply for on the application. Each concentration has its own unique set of admissions requirements and program requirements. For specific information, please refer to the Visual and Performing Arts, MFA entry.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Bachelor of Arts

Dance, BA
The BA degree is a 120-credit general program of dance study within a liberal arts degree framework. Entrance to the program is by audition. Information about the audition process, including dates and audition application, can be found on the school web page, dance.gmu.edu, or by calling the dance office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Degree Requirements

Mason Core (34 credits)

Foundation

Written Communication:

Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.

- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3

Foundation Requirements:

- Oral communication Credits: 3
- Quantitative reasoning Credits: 3
- Information technology Credits: 3

Core Requirements

- Literature Credits: 3
- Natural science (must include a laboratory science) Credits: 7
- Western civilization Credits: 3
- Social science Credits: 3

Synthesis Credits: 3

Dance Major Core (56 credits)
- DANC 114 - Rhythmic Analysis and Music Resources for Dance Credits: 3
- DANC 118 - World Dance Credits: 3 or DANC 318 - Global Perspectives: World Dance Forms Credits: 3 or DANC 418 - Global Dance Intensive Credits: 3 or approved university global understanding requirement (Meets Mason Core global understanding requirement)
- DANC 150 - Dance Improvisation Credits: 3
- DANC 170 - Orientation to Dance Production Credits: 1
- DANC 190 - First Year Seminar Credits: 0
- DANC 210 - Anatomy and Kinesiology for Dance Credits: 3
- DANC 251 - Dance Composition I Credits: 3
- DANC 252 - Dance Composition II Credits: 3
- DANC 270 - Dance Production Lab Credits: 1
- DANC 370 - Dance Performance Credits: 1 or DANC 371 - Residency Workshop Credits: 1 (must be taken for 2 credits)
- DANC 390 - Dance History I Credits: 3 (fulfills Writing Intensive requirement for the major)
- DANC 391 - Dance History II Credits: 3
- DANC 454 - Methods of Teaching Dance Credits: 3

Choose 9 credits from the following:

- DANC 325 - Modern/Contemporary Dance III Credits: 1-3 (3 credits will meet the Mason Core arts requirement)
- DANC 425 - Modern/Contemporary Dance IV Credits: 1-3

Choose 6 credits from the following:

- DANC 345 - Ballet III Credits: 1-3
- DANC 445 - Ballet IV Credits: 1-3

Dance Electives (10 credits)

Choose from the following:

- DANC 118 - World Dance Credits: 3
- DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
- DANC 120 - Special Topics in Dance Credits: 1-3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 225 - Modern/Contemporary Dance II Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 245 - Ballet II Credits: 3
- DANC 318 - Global Perspectives: World Dance Forms Credits: 3
- DANC 324 - Introduction to Dance Conditioning Credits: 1-3
- DANC 325 - Modern/Contemporary Dance III Credits: 1-3
- DANC 331 - Advanced Jazz Dance Credits: 3
- DANC 345 - Ballet III Credits: 1-3
- DANC 370 - Dance Performance Credits: 1
- DANC 371 - Residency Workshop Credits: 1
- DANC 399 - Independent Study Credits: 1-3
• DANC 418 - Global Dance Intensive Credits: 3
• DANC 420 - Special Topics in Dance Credits: 1-3
• DANC 425 - Modern/Contemporary Dance IV Credits: 1-3
• DANC 445 - Ballet IV Credits: 1-3
• DANC 453 - Teaching Creative Movement Credits: 3

Note:
Additional technique and performance credits beyond those required in the major core may be applied to dance electives

Electives (30 credits)
BA students must use general electives to either complete a minor, double major or double degree outside their primary field of study (15-20 credits) or demonstrate intermediate-level proficiency in one foreign language (0-9 credits)*. After fulfilling one of these options, the remaining general electives may be taken inside or outside of the school. All students are required to take a minimum of 45 credits of upper-division courses (300 and 400 level).

*See College of Visual and Performing Arts for foreign language requirement.

Total: 120 credits

Bachelor of Fine Arts

Dance, BFA

Banner Code: AR-BFA-DANC
Web: dance.gmu.edu

College: College of Visual and Performing Arts
Department: School of Dance

Undergraduate Program

The BFA in dance is a performance-oriented contemporary dance program designed to prepare students professionally as performers, choreographers, educators, and active leaders of the dance community. Students in this program demonstrate technical mastery and devote their college study to an intensive and comprehensive dance curriculum.

Daily technical training in modern dance and ballet, and numerous performance opportunities develops a versatile dancer. Student progress in the BFA program is assessed consistently. Because of the professional nature of the BFA degree, the program requires completion of 126 credits of course work.

Entrance to the program is by audition. Information about the audition process, including dates and audition application, can be found on the school web page, dance.gmu.edu, or by calling the dance office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Degree Requirements

Mason Core (28 credits)
Foundation

Written Communication:

Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.

- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3

Foundation Requirements:

- Quantitative reasoning Credits: 3
- Information technology Credits: 3

Core Requirements

- Literature Credits: 3
- Natural science (must include one laboratory science) Credits: 7
- Western civilization Credits: 3
- Social science Credits: 3

Dance Major Core (86 credits)

- DANC 114 - Rhythmic Analysis and Music Resources for Dance Credits: 3
- DANC 118 - World Dance Credits: 3 or DANC 318 - Global Perspectives: World Dance Forms Credits: 3 or DANC 418 - Global Dance Intensive Credits: 3 or approved university global understanding requirement (meets Mason Core global understanding requirement)
- DANC 150 - Dance Improvisation Credits: 3
- DANC 170 - Orientation to Dance Production Credits: 1
- DANC 190 - First Year Seminar Credits: 0
- DANC 210 - Anatomy and Kinesiology for Dance Credits: 3
- DANC 251 - Dance Composition I Credits: 3
- DANC 252 - Dance Composition II Credits: 3
- DANC 270 - Dance Production Lab Credits: 1
- DANC 360 - Choreography Credits: 3
- DANC 362 - RS: Directed Choreography Credits: 1
- DANC 370 - Dance Performance Credits: 1 or DANC 371 - Residency Workshop Credits: 1 (must be taken for 4 credits)
- DANC 372 - Advanced Dance Production Credits: 1
- DANC 390 - Dance History I Credits: 3
- DANC 391 - Dance History II Credits: 3
- DANC 410 - Introduction to Contemporary Movement Theories Credits: 3
- DANC 454 - Methods of Teaching Dance Credits: 3 (meets Mason Core communication requirement)
- DANC 490 - Senior Dance Seminar Credits: 3 (meets Mason Core synthesis requirement)
Choose 18 credits from the following:

- DANC 325 - Modern/Contemporary Dance III Credits: 1-3 (3 credits will meet the Mason Core arts requirement)
- DANC 425 - Modern/Contemporary Dance IV Credits: 1-3

Choose 9 credits from the following:

- DANC 345 - Ballet III Credits: 1-3
- DANC 445 - Ballet IV Credits: 1-3

Dance Electives (15 credits)

Chosen from the following:

- DANC 118 - World Dance Credits: 3
- DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
- DANC 120 - Special Topics in Dance Credits: 1-3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 225 - Modern/Contemporary Dance II Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 245 - Ballet II Credits: 3
- DANC 318 - Global Perspectives: World Dance Forms Credits: 3
- DANC 324 - Introduction to Dance Conditioning Credits: 1-3
- DANC 325 - Modern/Contemporary Dance III Credits: 1-3
- DANC 331 - Advanced Jazz Dance Credits: 3
- DANC 345 - Ballet III Credits: 1-3
- DANC 362 - RS: Directed Choreography Credits: 1
- DANC 370 - Dance Performance Credits: 1
- DANC 371 - Residency Workshop Credits: 1
- DANC 399 - Independent Study Credits: 1-3
- DANC 410 - Introduction to Contemporary Movement Theories Credits: 3
- DANC 418 - Global Dance Intensive Credits: 3
- DANC 420 - Special Topics in Dance Credits: 1-3
- DANC 425 - Modern/Contemporary Dance IV Credits: 1-3
- DANC 445 - Ballet IV Credits: 1-3
- DANC 453 - Teaching Creative Movement Credits: 3

Note:

Additional technique and performance credits beyond those required in the major core may be applied to dance electives.

Electives (12 credits)

BFA majors are encouraged to complete coursework in AVT/ARTH (Art or Art History), MUSI (Music) or THR (Theater) to enhance their artistry.
Total: 126 credits

Non-Degree

Dance Appreciation Minor

Banner Code: DNCA
Web: dance.gmu.edu

College: College of Visual and Performing Arts
Department: School of Dance

The minor (21 credits) offers students the opportunity to study a variety of movement styles and understand dance in its historical and cultural context. A maximum of 4 transfer credits may be applied to the dance minor.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Minor Requirements

To earn the minor, students must complete the following courses:

Core (6 credits):

- DANC 101 - Dance Appreciation Credits: 3
- DANC 118 - World Dance Credits: 3

Students must complete three of the following courses (9 credits):

- DANC 125 - Modern/Contemporary Dance I Credits: 3
- DANC 145 - Ballet I Credits: 3
- DANC 225 - Modern/Contemporary Dance II Credits: 3
- DANC 245 - Ballet II Credits: 3

Note:

Students with prior experience in ballet and/or modern dance may, with permission of instructor, take all 9 credits of technique courses at the 200 level.

All students pursuing the minor must demonstrate a basic level of training in both modern dance and ballet, and therefore, complete 9 credits of modern and ballet technique.

Students must choose two or more courses from the following (6 credits):

- DANC 118 - World Dance Credits: 3 *
- DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
- DANC 120 - Special Topics in Dance Credits: 1-3
- DANC 125 - Modern/Contemporary Dance I Credits: 3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 145 - Ballet I Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 225 - Modern/Contemporary Dance II Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 245 - Ballet II Credits: 3
- DANC 301 - What is Dance? Credits: 3
- DANC 318 - Global Perspectives: World Dance Forms Credits: 3
- DANC 331 - Advanced Jazz Dance Credits: 3
- DANC 418 - Global Dance Intensive Credits: 3
- DANC 420 - Special Topics in Dance Credits: 1-3

Total: 21 credits

Notes:

Substitutions may be proposed to department faculty for approval.

* DANC 118 fulfills the global understanding requirement. Students who choose to take this course twice for the minor must select two different world cultures.

Mason does not guarantee the availability of these courses every semester; some are offered in alternate years.

**Film and Video Studies**

Performing Arts Building, Room A407
Phone: 703-993-3287
Web: favs.gmu.edu

**Faculty**

Giovanna Chesler, Director

**Faculty:** Britt, Charles, Chesler, Constantine, Fuchs, Hinton, Kehoe, Kraus, Mcdonald, Miller, Steger, Wood

**Courses**

The Film and Video Studies Program offers all courses designated FAVS in the Courses section of this catalog.

**Undergraduate Program**

The Film and Video Studies Program offers a 120-credit multidisciplinary BA degree, which spans many units including Art and Visual Technology, Communication, Computer Game Design, English, History and Art History, Modern and Classical
Languages, School of Integrative Studies, and Theater. Students study film and video production, film theory and criticism, emerging technologies in film, ethics, screenwriting, and business practices in the film industry.

The vocabulary of film (broadly defined) pervades the intellectual, cultural, political, and social landscape. The craft of filmmaking includes fictional storytelling through genre, documentary and nonfiction, collaborative production with community organizations, the application of academic research, engagement with sound theory and design, and personal and poetic expression. Emerging technologies and mobile viewing change both the means of production and reception. This combination of factors makes film an important area for academic inquiry and professional and artistic training.

**Portfolio Requirement**

Admission to Film and Video Studies (FAVS) is considered separately from admission to the university and only by portfolio review. Information about the portfolio process, including submission due dates and portfolio application requirements, can be found on the program's web page, favs.gmu.edu or by calling the FAVS office at 703-993-3287. Admission to the university is determined by the Admissions Office.

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated "writing-intensive" in their majors at the 300 level or above. Students seeking a BA in film and video studies fulfill this requirement by completing ENGH 373, FAVS 470, FAVS 498 or THR 482.

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level.

**Termination from the Major**

No Film and Video Studies course that is required for the major may be unsuccessfully attempted more than three times. A grade lower than a C constitutes an unsuccessful attempt in any given course. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the “Termination from the Major” section under AP.5 Undergraduate Policies.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Bachelor of Arts**

**Film and Video Studies, BA**

Banner Code: AR-BA-FAVS
Web: favs.gmu.edu

College: College of Visual and Performing Arts
Department: Film and Video Studies

**Undergraduate Program**
The BA degree is a 120-credit multidisciplinary degree. All students are admitted to the Film and Video Studies (FAVS) program of study separately from their admission to the university and only by portfolio review.

Students must earn a minimum grade of C in all core and required FAVS courses.

Degree Requirements

Mason Core (37 credits)

Foundation Requirements

- Oral communication Credits: 3
- Information technology Credits: 3
- Quantitative reasoning Credits: 3
- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3

Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as 302, to fulfill degree requirements.

Core Requirements

- Literature Credits: 3
- Arts Credits: 3
- Natural science (including one laboratory science) Credits: 7
- Western civilization Credits: 3
- Global understanding Credits: 3
- Social and behavioral sciences Credits: 3

Notes:

FAVS majors may not double-count courses toward both the FAVS major and Mason Core requirements with the exception of the synthesis requirement, listed below as part of the FAVS core requirements.

Major (54-58 credits)

Film and Video Studies Core Requirements (24 credits)

- AVT 204 - Visual Thinking Credits: 3
- ENGH 373 - Film and Video Forms Credits: 3
- FAVS 225 - The History of World Cinema Credits: 3
- FAVS 250 - Business of Film and Video Credits: 3
- FAVS 255 - Video Production for Film Credits: 3
- FAVS 280 - Writing for the Moving Image Credits: 3
- FAVS 352 - Ethics of Film and Video Credits: 3 or COMM 454 - Free Speech and Ethics Credits: 3 (either course also satisfies the university Mason Core synthesis requirement)
- FAVS 450 - Internship in Film and Video Studies Credits: 3

Analysis, History, Theory (3 credits)

Take 3 credits from the following:

- AVT 377 - Cyberpunk Credits: 3
- CHIN 320 - Contemporary Chinese Film Credits: 3
- COMM 365 - Gender, Race, and Class in the Media Credits: 3
- COMM 380 - Media Criticism Credits: 3
- COMM 399 - Special Topics in Communication Credits: 1-3 (Must be approved by Program Director)
- ENGH 319 - Popular Culture Credits: 3 (Cannot be the same topic as required FAVS core course)
- ENGH 370 - Introduction to Documentary Credits: 3
- ENGH 371 - Television Studies Credits: 3
- ENGH 372 - Introduction to Film Credits: 3
- ENGH 470 - RS: Topics in Film/Media History Credits: 3
- ENGH 472 - Topics in Film/Media Theory Credits: 3
- ENGH 474 - Topics in Film/Media Studies Credits: 3
- FAVS 300 - Global Horror Film Credits: 3
- FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3 (Must be approved by Program Director)
- FREN 470 - French and Francophone Cinema Credits: 3
- HIST 389 - Topics in U.S. History Credits: 3 (Must be approved by Program Director)
- HIST 393 - Topics in Film and History Credits: 3
- JAPA 320 - Japanese Cinema Credits: 3
- MUSI 301 - Music in Motion Pictures Credits: 3
- INTS 347 - Gender Representation in Popular Culture Credits: 3-6
- RUSS 470 - Topics in (Post) Soviet Film Credits: 3
- WMST 300 - Current Issues in Women and Gender Studies Credits: 1-6
- Or other courses as approved by Program Director

Diversity of Perspectives (3 credits)

Take 3 credits from the following:

- COMM 365 - Gender, Race, and Class in the Media Credits: 3
- COMM 399 - Special Topics in Communication Credits: 1-3 (Must be approved by Program Director)
- ENGH 202 - Texts and Contexts Credits: 3 (Must be approved by Program Director. Cannot also be used for Mason Core.)
- ENGH 318 - Introduction to Cultural Studies Credits: 3 (Must be approved by Program Director)
- ENGH 319 - Popular Culture Credits: 3 (Cannot be the same topic as required FAVS core course)
- ENGH 362 - Global Voices Credits: 3 (Must be approved by Program Director)
- ENGH 418 - Cultural Constructions of Sexualities Credits: 3
- FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3 (Must be approved by Program Director)
- INTS 347 - Gender Representation in Popular Culture Credits: 3-6
- WMST 300 - Current Issues in Women and Gender Studies Credits: 1-6 (Must be approved by Program Director)
- WMST 308 - Introduction to Lesbian, Gay, Bisexual, Transgender, Transsexual, and Queer Studies Credits: 3 (Must be approved by Program Director)
- Or other courses as approved by Program Director
Concentration (24-28 credits)

Students choose one of the following concentrations:

- Producing and Directing
- Production and Post-Production
- Screenwriting

▲ Concentration in Producing and Directing (PROD) (27-28 credits)

- FAVS 260 - Video Editing for Film Credits: 3 or COMM 360 - Digital Postproduction Credits: 3
- FAVS 331 - Cinematography Credits: 3
- FAVS 333 - Sound Editing and Recording Credits: 3
- FAVS 498 - Creative Producing and Development Credits: 3
- FAVS 499 - Senior Project Credits: 3

Fundamental Electives (6-7 credits)

Choose two courses from the following:

- AVT 252 - Fundamentals of Photography Credits: 4
- AVT 354 - Digital Photo Techniques Credits: 3
- AVT 356 - Photo Studio Techniques Credits: 3
- AVT 374 - Sound Art I Credits: 3
- AVT 411 - Motion Design Credits: 3
- COMM 358 - Multi-Camera Studio Production Credits: 3
- COMM 364 - Videography Credits: 3
- COMM 366 - Visual Communication Credits: 3
- COMM 397 - Special Topics in Production Credits: 1-3 (Must be approved by Program Director)
- FAVS 311 - Producing I Credits: 3
- FAVS 356 - Film Marketing Credits: 3
- FAVS 357 - New Media and Film Distribution Credits: 3
- FAVS 460 - Advanced Video Editing Credits: 3
- GAME 250 - Music for Film and Video Credits: 3
- THR 230 - Fundamentals of Production Credits: 3
- Other courses as approved by Program Director

Authoring Electives (6 credits): 

Choose from the following:

- AVT 376 - Live Movies Credits: 3
- AVT 390 - Video Art Credits: 3
- AVT 457 - Documentary Photography Credits: 3
- FAVS 365 - Documentary Filmmaking Credits: 3
- FAVS 375 - Fiction Film Directing Credits: 3
- FAVS 378 - Web Series Credits: 3
- other courses as approved by Program Director
Concentration in Production and Post Production (PROP) (27-28 credits)

- FAVS 260 - Video Editing for Film Credits: 3 or COMM 360 - Digital Postproduction Credits: 3
- FAVS 331 - Cinematography Credits: 3
- FAVS 333 - Sound Editing and Recording Credits: 3
- FAVS 497 - Senior Film Practicum Credits: 3

Fundamental Electives (6-7 credits)

Choose from the following:

- AVT 252 - Fundamentals of Photography Credits: 4
- AVT 354 - Digital Photo Techniques Credits: 3
- AVT 356 - Photo Studio Techniques Credits: 3
- AVT 374 - Sound Art I Credits: 3
- AVT 411 - Motion Design Credits: 3
- COMM 358 - Multi-Camera Studio Production Credits: 3
- COMM 364 - Videography Credits: 3
- COMM 366 - Visual Communication Credits: 3
- COMM 397 - Special Topics in Production Credits: 1-3 (Must be approved by Program Director)
- FAVS 311 - Producing I Credits: 3
- FAVS 356 - Film Marketing Credits: 3
- FAVS 357 - New Media and Film Distribution Credits: 3
- FAVS 460 - Advanced Video Editing Credits: 3
- GAME 250 - Music for Film and Video Credits: 3
- THR 230 - Fundamentals of Production Credits: 3
- Or other courses as approved by Program Director

Authoring Electives (3 credits):

Choose from the following:

- AVT 376 - Live Movies Credits: 3
- AVT 390 - Video Art Credits: 3
- AVT 457 - Documentary Photography Credits: 3
- FAVS 365 - Documentary Filmmaking Credits: 3
- FAVS 375 - Fiction Film Directing Credits: 3
- FAVS 378 - Web Series Credits: 3
- other courses as approved by Program Director

Advanced Skills Electives (6 credits):

Choose from the following:

- AVT 382 - 2D Experimental Animation Credits: 3
- AVT 383 - 3D Experimental Animation Credits: 3
- AVT 411 - Motion Design Credits: 3
- COMM 358 - Multi-Camera Studio Production Credits: 3
• FAVS 460 - Advanced Video Editing Credits: 3
• FAVS 483 - Feature-Length Scriptwriting Credits: 3
• THR 334 - Lighting Design Credits: 3
• THR 336 - Technical Direction Credits: 3
• THR 434 - Advanced Lighting Design Credits: 3
• other courses as approved by Program Director

▲ Concentration in Screenwriting (SCWR) (24 credits)

• ENGH 396 - Introduction to Creative Writing Credits: 3
• ENGH 399 - Creative Nonfiction Writing Credits: 3
• FAVS 470 - Film and Video Screenwriting Credits: 3 or THR 482 - Advanced Screenplay Workshop Credits: 3
• FAVS 483 - Feature-Length Scriptwriting Credits: 3
• FAVS 496 - Advanced Visual Storytelling Credits: 3
• GAME 332 - RS: Story Design for Computer Games Credits: 3

Screenwriting Electives (6 credits):

Choose from the following:

• COMM 303 - Writing across the Media Credits: 3
• COMM 397 - Special Topics in Production Credits: 1-3
• ENGH 377 - Digital Creative Writing Credits: 3
• ENGH 386 - Editing for Audience, Style, and Voice Credits: 3
• ENGH 398 - Fiction Writing Credits: 3
• ENGH 492 - Advanced Fiction Writing Workshop Credits: 3
• ENGH 497 - Topics in Creative Writing Credits: 3
• FAVS 378 - Web Series Credits: 3
• FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3 (Must be approved by Program Director)
• GAME 399 - Special Topics Credits: 1-4 (Must be approved by Program Director)
• THR 380 - Playwriting I Credits: 3
• THR 381 - Playwriting II Credits: 3
• THR 480 - Advanced Playwriting Credits: 3
• Or other courses as approved by Program Director

General Electives (25-29 credits)

Students must use general electives to complete a minor, double major or second degree outside the major field of study, or demonstrate intermediate-level proficiency in one foreign language (see College of Visual and Performing Arts for foreign language requirements).

Total: 120 credits

School of Music
Faculty

Linda Monson, Managing Director

Professors: Balakerskaia, Camphouse, Carroll, Engebretson, Hearden, Layendecker (Heritage Chair), Maiello, Miller, Monson (managing director), Rendler, G. Smith

Associate Professors: Aler, R. Bergman, Billingham, Guessford, Nickens, T. Owens, G. Robinson, Wuttke

Assistant Professors: D. Purcell, Green, Kilkenny

Administrative Faculty: Freer, Kilkenny

Courses

The School of Music offers all courses designated MUSI in the Courses section of this catalog.

Undergraduate Programs

The two undergraduate degree programs offered through the School of Music, the bachelor of art (BA) in music and the bachelor of music (BM), prepare students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

Through its strategic plan, Music Outreach and the Teaching Professions, the School of Music enables students to pursue worthwhile vocational goals as teachers, performers, conductors, and composers. The School of Music also seeks to educate its students to reflect a concern for cultural and humanistic values as future ambassadors and advocates of music and other arts. Through innovative learning experiences, the School of Music provides all students in the BA and BM programs with opportunities to become effective musicians, teachers, and advocates of music. Teaching music is the principal area in which students can find employment in private studios, public and private schools, academies, and higher education within the ever-changing workplace. Because of this, all music majors at Mason receive some training in the teaching of music.

The School of Music also recognizes the critical outreach role it provides in serving students from all majors, as well as members of the community who significantly benefit from the values and experiences of an education in music. The School of Music seeks to provide unique educational opportunities through its various course offerings, workshops, presentations, and performances for those seeking music enrichment.

Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music web site: music.gmu.edu.
A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 - Theory I. Call the School of Music at 703-993-1380 for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: aural skills and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

**Termination from the Major**

No School of Music course that is required for the major may be unsuccessfully attempted more than three times. A grade of F constitutes an unsuccessful attempt in any given course. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the "Termination from the Major section under Academic Policies.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated "writing intensive" in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332 - Music History in Society II Credits: 3 or MUSI 438 - Music History in Society B Credits: 3. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

**Teacher Licensure**

Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this section. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.

**Graduate Certificates**

**Music Education Licensure for PK-12**

This graduate certificate is designed as a pathway to music education licensure for music students without an undergraduate degree in music education. Upon completing this certificate students will be equipped with the necessary skills, knowledge, and experience to obtain music teaching licensure from the Commonwealth of Virginia.

**Music and Well-Being Graduate Certificate**

The Graduate Certificate in Music and Well-Being builds on courses currently offered in the School of Music and on the school-wide initiative around well-being as an important consideration and subject of study for all musicians. The certificate allows students to explore the connections between music and consciousness and between vibration, meditation, and well-being. It is conceived as a complement to the programs focused on mindfulness and well-being that are a priority across the university.

**Instrumental Performance Artist Graduate Certificate**

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.
Piano Performance Artist Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Vocal Performance Artist Graduate Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Graduate Programs

Accelerated Master's Program

The School of Music offers the following accelerated Master's option:

- Music, BM (Performance)/Music, Accelerated MM (Performance)

This program allows undergraduate students to take graduate classes that can be used towards a designated Master's degree. Undergraduates who wish to pursue the accelerated Master's route should talk to their academic advisor first to see if they qualify. Students must be within 75-90 credits of their Bachelor's program to be eligible to apply; those who have earned more than 90 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the Master's program through an Accelerated Master's application. For more information about admissions requirements and the application process, students should visit the cvpa.gmu.edu website.

Music, MM

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, and pedagogy. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Music Education, Ph.D.

The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

The PhD in music education requires 60 credits beyond the master's degree in music.

Doctor of Musical Arts (DMA)
The DMA concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline.

The Doctor of Musical Arts (DMA) degree require 60 credits beyond the master's degree in music.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Bachelor of Arts**

**Music, BA**

**Banner Code:** AR-BA-MUSI  
Web: music.gmu.edu

College: *College of Visual and Performing Arts*  
Department: *School of Music*

**Degree Requirements**

**Mason Core (31-49 credits)**

**Foundation Requirements**

- Quantitative reasoning (mathematics) Credits: 3
- ENGH 101 - Composition Credits: 3 *
- ENGH 302 - Advanced Composition Credits: 3  
  *Nonnative speakers of English with limited proficiency may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.
- Oral Communication Credits: 3 (all students excluding Music Technology students must take MUSI 251 - Musical/Oral Communication Credits: 3 )

**Core Requirements**

- Literature Credits: 3*
- Natural science (two classes; one must contain a lab) Credits: 7* (students completing the Concentration in Music Technology must take PHYS 103 Physics and Everyday Phenomena I Credits: 4)  
- Western civilization Credits: 3
- Social or behavioral science Credits: 3*
- Global Understanding Credits: 3 (all students excluding Music Technology students must take MUSI 431 Music History in Society III Credits: 3)

**Notes:**
* Also have significant elective choices as per Mason Core listing.

Remaining Mason Core requirements are fulfilled with major course work.

Other (0-18 credits)

- Intermediate-level language proficiency*, or an academic minor, double major or double degree outside Music

Note:

* See beginning of the CVPA section for foreign language requirement.

Music Major (36-48 credits)

Musicianship (10 credits)

- MUSI 113 - Aural Skills I Credits: 1
- MUSI 114 - Aural Skills II Credits: 1-2 (must be taken for 1 credit)
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 171 - Keyboard Skills I Credits: 1 (pianists substitute MUSI 371 for MUSI 171)
- MUSI 172 - Keyboard Skills II Credits: 1 (pianists substitute MUSI 372 for MUSI 172)

Music History Courses (6-9 credits)

Required for Music Technology concentration students:
- MUSI 338 - Music History in Society A Credits: 3
- MUSI 438 - Music History in Society B Credits: 3 (meets Writing Intensive requirement in the BA in Music with a concentration in Music Technology)
- MUSI 439 - Music History in Society C Credits: 3

Required for all other students:
- MUSI 331 - Music History in Society I Credits: 3 or MUSI 432 Music History in Society IV Credits: 3
- MUSI 332 - Music History in Society II Credits: 3 (meets Writing Intensive requirement in the BA in Music)

Performance and Music Electives (17-30 credits)

- MUSI 300 - Recital Attendance Credits: 0 (five semesters)
- MUSI 490 - RS: Musical Communication in Context Credits: 3 (meets Mason Core synthesis requirement)
  And one of the following (meets Mason Core information technology requirement):
- Music Technology concentration students only: CS 112 - Introduction to Computer Programming Credits: 4 and PHIL 112 - Ethics and the Cybersociety Credits: 1
  OR
- All other students: MUSI 259 - Music in Computer Technology Credits: 3
- All students excluding Music Technology students Elective Credits: 12-13 (MUSI courses only)

Applied Music (6-8 credits)
Students in the Music Technology concentration should take 8 credits of Applied Music. All others should take 6 credits.

- Applied Music Options

**Ensemble (3 credits)**

- Music Ensemble Options

**Pedagogy (0-3 credits)**

All students (except for Music Technology students) must register for a pedagogy and literature class appropriate to their major instrument or register for a teaching internship.

- 2 credits of MUSI 395 - Teaching Internship Credits: 1-4
  
  OR one of the following:
  
  * Required for keyboard students:
    * MUSI 351 - Keyboard Pedagogy Credits: 3
  * Required for vocal students:
    * MUSI 352 - Vocal Pedagogy and Lab Credits: 3
  * Required for strings and guitar students; recommended for wind, brass, or percussion students:
    * MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
  * (Topic varies; students must register for the topic corresponding with their major instrument.)

▲ **Concentration in Music Technology (MTEC) (15 credits)**

Students who wish to complete a concentration in music technology must also complete the following:

- MUSI 252 - Popular Music Arranging Credits: 3
- MUSI 254 - Music and Technology Credits: 3
- MUSI 354 - Electronic Composition Credits: 3
- MUSI 355 - Recording Techniques Credits: 3
- MUSI 359 - Topics in Music Technology Credits: 3

**Note:**

Students pursuing this concentration may not also pursue the Music and Technology minor.

**General Electives (20-41 credits)**

For Music Technology students only General Electives Credits: 20-38

For all other students General Electives Credits: 23-41

Shall not include additional music courses.

**Total: 120 credits**
Bachelor of Music

Music, BM

Banner Code: AR-BM-MUSI
Web: music.gmu.edu

College: College of Visual and Performing Arts
Department: School of Music

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Music, BM (Performance)/Music, Accelerated MM (Performance) for specific requirements.

Degree Requirements

Mason Core (21-24 credits)

Coursework within the major and concentration fulfills the information technology, global understanding, oral communications, fine arts, and synthesis requirements. Students should consult the Mason Core guidelines for course options that fulfill the requirements remaining in the following areas:

- 3 credits of quantitative reasoning (Music Technology Concentration, see required courses)
- 6 credits of written communication
- 3 credits of literature
- 3 credits of non-lab natural science
- 3 credits of western civilization
- 3 credits of social or behavioral science
- 3 credits of IT for Music Technology Concentration

Concentrations

Students may choose from one of the following concentrations:

- Composition
- Jazz
- Music Education
- Music Technology
- Performance

Core Courses Required for All Concentrations (20 Credits)

- MUSI 113 - Aural Skills I Credits: 1
- MUSI 114 - Aural Skills II Credits: 1-2 (must be taken for 1 credit)
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 213 - Aural Skills III Credits: 2
- MUSI 215 - Theory III Credits: 3
- MUSI 251 - Musical/Oral Communication Credits: 3 (Mason Core oral communication)
- MUSI 273 - Keyboard Skills III Credits: 1
- MUSI 300 - Recital Attendance Credits: 0 (To be repeated five times)
- MUSI 431 - Music History in Society III Credits: 3 (Mason Core global understanding)

▲ Concentration in Composition (CPO):

Students must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
- String
- Voice
- Woodwind

Courses Required for All Emphases (70 credits)

- MUSI 214 - Aural Skills IV Credits: 2
- MUSI 216 - Theory IV Credits: 3
- 8 credits of MUSI 242-248 (see Applied Music Options)
- 8 credits of MUSI 442-448 (see Applied Music Options)
- MUSI 259 - Music in Computer Technology Credits: 3
- MUSI 319 - Class Composition and Arranging Credits: 3
- MUSI 324 - Junior Recital Credits: 1
- MUSI 331 - Music History in Society I Credits: 3
- MUSI 332 - Music History in Society II Credits: 3
- MUSI 354 - Electronic Composition Credits: 3
- MUSI 361 - Class Strings: Violin, Viola, Cello, and Bass Credits: 1
- MUSI 363 - Class Woodwinds Credits: 1
- MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1 or MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
- MUSI 366 - Class Percussion Credits: 1
- MUSI 379 - Jazz Improvisation Credits: 1
- MUSI 391 - Conducting I Credits: 2
- MUSI 396 - Conducting II Credits: 2
- MUSI 419 - Orchestration Credits: 3
- MUSI 424 - Senior Recital Credits: 1
- 3 credits of MUSI 454 - Jazz Arranging Credits: 3 or MUSI 485 - Chamber Ensembles Credits: 1
- 4 credits of MUSI 485 - Chamber Ensembles Credits: 1 (M3E or Healing Arts Ensemble only)
- 1 additional credit of MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 491 - Musical Communication in Performance Credits: 1 (Mason Core synthesis)
- MUSI 438 - Music History in Society B Credits: 3
- MUSI 439 - Music History in Society C Credits: 3
- MUSI 100-499 Credits: 5 (as approved by Music advisor)
Emphasis Requirement (9 credits)

Composition: Brass emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3

Choose 4 credits from the following:
- MUSI 380 - Wind Symphony Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Composition: Guitar emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3

Choose 4 credits from the following:
- MUSI 381 - University Chorale Credits: 1
- MUSI 384 - Symphonic Chorus Credits: 1
- MUSI 385 - Chamber Singers Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Composition: Keyboard emphasis

- MUSI 351 - Keyboard Pedagogy Credits: 3
- MUSI 371 - Techniques of Accompanying I Credits: 1
- MUSI 372 - Techniques of Accompanying II Credits: 1

Choose 4 credits from the following:
- MUSI 381 - University Chorale Credits: 1
- MUSI 384 - Symphonic Chorus Credits: 1
- MUSI 385 - Chamber Singers Credits: 1

Composition: Percussion emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3

Choose 4 credits from the following:
- MUSI 380 - Wind Symphony Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Composition: String emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
• 4 credits of MUSI 387 - Symphony Orchestra Credits: 1

Composition: Voice emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 352 - Vocal Pedagogy and Lab Credits: 3
Choose 4 credits from the following:
• MUSI 381 - University Chorale Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1

Composition: Woodwind emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
Choose 4 credits from the following:
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Total: 120 credits

▲ Concentration in Jazz (JAZC):

Students must complete all concentration requirements as well as requirements for one of the following emphases:

• Brass
• Guitar
• Keyboard
• Percussion
• Woodwind

Courses Required for All Emphases (69 credits)
• MUSI 107 - Jazz and Blues in America Credits: 3
• MUSI 214 - Aural Skills IV Credits: 2
• MUSI 216 - Theory IV Credits: 3
• 8 credits of MUSI 242-248 (see Applied Music Options)
• 8 credits of MUSI 442-448 (see Applied Music Options)
• MUSI 259 - Music in Computer Technology Credits: 3 (meets Mason Core Information Technology requirement)
• MUSI 311 - Jazz Studies Credits: 3
• MUSI 319 - Class Composition and Arranging Credits: 3
• MUSI 324 - Junior Recital Credits: 1
• MUSI 338 - Music History in Society A Credits: 3
• MUSI 379 - Jazz Improvisation Credits: 1
• MUSI 391 - Conducting I Credits: 2
• MUSI 424 - Senior Recital Credits: 1
• MUSI 438 - Music History in Society B Credits: 3
• MUSI 439 - Music History in Society C Credits: 3
• MUSI 450 - Jazz Improvisation I Credits: 2
• MUSI 452 - Jazz Improvisation II Credits: 2
• MUSI 454 - Jazz Arranging Credits: 3
• 6 credits of MUSI 485 - Chamber Ensembles Credits: 1 (Jazz Chamber Ensembles only)
• MUSI 491 - Musical Communication in Performance Credits: 1 (Mason Core synthesis)
• 5 credits of MUSI 492 - Selected Topics in Music Credits: 1-3 (Topics in Jazz Studies only)
• MUSI 100-499 Credits: 3 (as approved by Music advisor)

Emphasis Requirement (10 credits)

Jazz: Brass emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
Choose 8 credits from the following:
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 381 - University Chorale Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Jazz: Guitar emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
Choose 8 credits from the following:
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 381 - University Chorale Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Jazz: Keyboard emphasis

• MUSI 371 - Techniques of Accompanying I Credits: 1
• MUSI 372 - Techniques of Accompanying II Credits: 1
Choose 8 credits from the following:
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 381 - University Chorale Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Jazz: Percussion emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
Choose 8 credits from the following:
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 381 - University Chorale Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Jazz: Woodwind emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
Choose 8 credits from the following:
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 381 - University Chorale Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Total: 120 credits
Concentration in Music Education (MUE):

Certification to Teach

The music education concentration is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Minimum scores on the Praxis Core and II and VCLA tests must be achieved before state licensure is granted.

Student must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
- String
- Voice
- Woodwind

Courses Required for All Emphases (54 credits)

- MUSI 214 - Aural Skills IV Credits: 2
- MUSI 216 - Theory IV Credits: 3
- 8 credits of MUSI 242-248 (see Applied Music Options)
- 6 credits of MUSI 442-448 (see Applied Music Options)
- MUSI 259 - Music in Computer Technology Credits: 3 (meets Mason Core Information Technology requirement)
- MUSI 319 - Class Composition and Arranging Credits: 3
- MUSI 323 - Music Education Recital Credits: 0
- MUSI 331 - Music History in Society I Credits: 3
- MUSI 332 - Music History in Society II Credits: 3
- MUSI 361 - Class Strings: Violin, Viola, Cello, and Bass Credits: 1
- MUSI 366 - Class Percussion Credits: 1
- MUSI 367 - Class Guitar Credits: 1
- MUSI 393 - Music Administration and Management Credits: 2
- MUSI 432 - Music History in Society IV Credits: 3
- 6 credits of MUSI 495 - Internship in Music Education Credits: 6-12 (Mason Core synthesis)
- EDRD 300 - Literacy and Curriculum Integration Credits: 3
- EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural Credits: 3
- EDUC 302 - Human Growth and Development Credits: 3 or EDUC 539 - Human Development and Learning PK-12 Credits: 3

Emphasis Requirement (25 credits)
Music Education: Brass emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- 2 credits of MUSI 363 - Class Woodwinds Credits: 1
- MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
- MUSI 368 - Class Voice Credits: 1
- MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
- MUSI 391 - Conducting I Credits: 2
- MUSI 396 - Conducting II Credits: 2
- MUSI 464 - Instrumental Music Methods I Credits: 3
- MUSI 466 - Instrumental Music Methods II Credits: 3
- MUSI 100-499 Credit: 1 (as approved by Music advisor)

Choose 7 credits from the following:

- MUSI 380 - Wind Symphony Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Music Education: Guitar emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- 2 credits of MUSI 363 - Class Woodwinds Credits: 1
- MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
- MUSI 368 - Class Voice Credits: 1
- MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
- MUSI 391 - Conducting I Credits: 2
- MUSI 396 - Conducting II Credits: 2
- MUSI 464 - Instrumental Music Methods I Credits: 3 or MUSI 467 - Instrumental Music Methods I: Orchestra Credits: 3
- MUSI 466 - Instrumental Music Methods II Credits: 3
- MUSI 100-499 Credit: 1 (as approved by Music advisor)

Choose 7 credits from the following:

- MUSI 381 - University Chorale Credits: 1
- MUSI 384 - Symphonic Chorus Credits: 1
- MUSI 385 - Chamber Singers Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Music Education: Keyboard emphasis

- 2 credits of MUSI 223 - Applied Music in Voice Credits: 1
- MUSI 352 - Vocal Pedagogy and Lab Credits: 3
• MUSI 371 - Techniques of Accompanying I Credits: 1
• MUSI 372 - Techniques of Accompanying II Credits: 1
• MUSI 391 - Conducting I Credits: 2
• MUSI 396 - Conducting II Credits: 2
• MUSI 461 - The Teaching of General Music in the Elementary and Middle School Credits: 3
• MUSI 463 - The Teaching of Vocal Music in the Secondary School Credits: 3

Choose 1 credit from the following:
• MUSI 363 - Class Woodwinds Credits: 1
• MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
• MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1

Choose 7 credits from the following:
• MUSI 381 - University Chorale Credits: 1
• MUSI 384 - Symphonic Chorus Credits: 1
• MUSI 385 - Chamber Singers Credits: 1

Music Education: Percussion emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• 2 credits of MUSI 363 - Class Woodwinds Credits: 1
• MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
• MUSI 368 - Class Voice Credits: 1
• MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
• MUSI 391 - Conducting I Credits: 2
• MUSI 396 - Conducting II Credits: 2
• MUSI 464 - Instrumental Music Methods I Credits: 3
• MUSI 466 - Instrumental Music Methods II Credits: 3
• MUSI 100-499 Credit: 1 (as approved by Music advisor)

Choose 7 credits from the following:
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Music Education: String emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• 2 credits of MUSI 363 - Class Woodwinds Credits: 1
• MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
• MUSI 368 - Class Voice Credits: 1
• MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
• 7 credits of MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 391 - Conducting I Credits: 2
• MUSI 396 - Conducting II Credits: 2
• MUSI 466 - Instrumental Music Methods II Credits: 3
• MUSI 467 - Instrumental Music Methods I: Orchestra Credits: 3
• MUSI 100-499 Credit: 1 (as approved by Music advisor)

Music Education: Voice emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• 2 credits of MUSI 222 - Applied Music in Keyboard Credits: 1
• MUSI 352 - Vocal Pedagogy and Lab Credits: 3
• MUSI 391 - Conducting I Credits: 2
• MUSI 396 - Conducting II Credits: 2
• MUSI 461 - The Teaching of General Music in the Elementary and Middle School Credits: 3
• MUSI 463 - The Teaching of Vocal Music in the Secondary School Credits: 3

Choose 1 credit from the following:
• MUSI 363 - Class Woodwinds Credits: 1
• MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
• MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1

Choose 7 credits from the following:
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1

Music Education: Woodwind emphasis

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• 2 credits of MUSI 363 - Class Woodwinds Credits: 1
• MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
• MUSI 368 - Class Voice Credits: 1
• MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
• MUSI 391 - Conducting I Credits: 2
• MUSI 396 - Conducting II Credits: 2
• MUSI 464 - Instrumental Music Methods I Credits: 3
• MUSI 466 - Instrumental Music Methods II Credits: 3
• MUSI 100-499 Credit: 1 (as approved by Music advisor)

Choose 7 credits from the following:
• MUSI 380 - Wind Symphony Credits: 1
• MUSI 383 - Symphonic Band Credits: 1
• MUSI 387 - Symphony Orchestra Credits: 1
• MUSI 389 - Jazz Ensemble Credits: 1

Total: 120 credits

▲ Concentration in Music Technology (MTEC):

Students must complete all concentration requirements as well as requirements for one of the following emphases:

• Electroacoustic Music
• Engineering
• Recording

Courses Required for All Emphases (46-47 credits)

• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 172 - Keyboard Skills II Credits: 1
• MUSI 248 - Applied Music in Composition Credits: 2 (See Music advisor for permission and course options. Must be taken for 6 credits.)
• MUSI 252 - Popular Music Arranging Credits: 3
• MUSI 254 - Music and Technology Credits: 3
• MUSI 338 - Music History in Society A Credits: 3
• MUSI 354 - Electronic Composition Credits: 3
• MUSI 355 - Recording Techniques Credits: 3
• MUSI 358 - Music Programming Credits: 3
• MUSI 359 - Topics in Music Technology Credits: 3
• Music Ensemble Options (Must be taken for 3 credits. Transfer students must earn at lest 2 credits at Mason. Meets Mason Core arts requirement.)
• MUSI 395 - Teaching Internship Credits: 1-4 (must be taken for 2 credits)
• MUSI 438 - Music History in Society B Credits: 3
• MUSI 439 - Music History in Society C Credits: 3
• MUSI 490 - RS: Musical Communication in Context Credits: 3 (meets Mason Core synthesis requirement)
• PHYS 103 - Physics and Everyday Phenomena I Credits: 4 (fulfills part of the Mason Core natural science requirement)

Emphasis Requirement (26 credits)

Music Technology: Electroacoustic Music

• MUSI 359 - Topics in Music Technology Credits: 3 (must be Electroacoustic Music emphasis)
• MUSI 448 - Applied Music in Composition Credits: 2-3 (must be taken for 4 credits)
• MUSI 485 - Chamber Ensembles Credits: 1 (Must be Healing Arts Ensemble or M3E. Must be taken for 2 credits.)

MATH (3-4 credits)

Choose from one of the following (fulfills Mason Core quantitative reasoning requirement):

• MATH 106 - Quantitative Reasoning Credits: 3
• MATH 108 - Introductory Calculus with Business Applications Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 115 - Analytic Geometry and Calculus I (Honors) Credits: 4
• MATH 125 - Discrete Mathematics I Credits: 3

Additional Course Work Credits: 13-14

Choose from the following:

• MUSI 228 - Applied Music in Composition Credits: 1 or MUSI 248 - Applied Music in Composition Credits: 2 or MUSI 448 - Applied Music in Composition Credits: 2-3
• MUSI 359 - Topics in Music Technology Credits: 3
• MUSI 395 - Teaching Internship Credits: 1-4
• MUSI 485 - Chamber Ensembles Credits: 1 (1-3 credits)
• Coursework from any course with one of the following prefixes: CS, ECE, IT, MATH, PHYS

At least one credit of additional coursework or general electives must come from 300 or 400 level courses.

Music Technology: Engineering Emphasis

A double major in a STEM field or the following:

MATH (4 credits)

Choose one of the following (meets Mason Core quantitative reasoning requirement):

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 115 - Analytic Geometry and Calculus I (Honors) Credits: 4

Additional Course Work Credits: 22

Coursework from any course with one of the following prefixes: CS, ECE, IT, MATH, MBUS, PHYS

At least 10 credits from additional coursework or general electives must come from 300 or 400 level courses.

Music Technology: Recording Emphasis

• BUS 100 - Business and Society Credits: 3 (meets Mason Core social and behavioral science requirement)
• MUSI 359 - Topics in Music Technology Credits: 3 (must be in Recording emphasis)
• MUSI 395 - Teaching Internship Credits: 1-4 (must be taken for 2 credits)

MATH (3-4 credits)

Choose from one of the following: (meets Mason Core quantitative reasoning requirement)

• MATH 106 - Quantitative Reasoning Credits: 3
• MATH 108 - Introductory Calculus with Business Applications Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 115 - Analytic Geometry and Calculus I (Honors) Credits: 4
• MATH 125 - Discrete Mathematics I Credits: 3
Additional Course Work Credits: 14-15

- MUSI 221 - Applied Music I Credits: 1 (1-4 credits)
- MUSI 359 - Topics in Music Technology Credits: 3
- MUSI 485 - Chamber Ensembles Credits: 1 (1-3 credits)

Coursework from any course with one of the following prefixes: ECE, ECON, IT, MATH, MBUS, PHYS
At least 5 credits from additional coursework or general electives must come from 300 or 400 level courses.

General Electives (6-7 credits)

▲ Concentration in Performance (PFM):

Students must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
- String
- Voice
- Woodwind

Courses Required for All Emphases (39 credits)

- MUSI 214 - Aural Skills IV Credits: 2
- MUSI 216 - Theory IV Credits: 3
- 8 credits of MUSI 242-248 (see Applied Music Options)
- 8 credits of MUSI 442-448 (see Applied Music Options)
- MUSI 259 - Music in Computer Technology Credits: 3 (meets Mason Core Information Technology requirement)
- MUSI 319 - Class Composition and Arranging Credits: 3
- MUSI 324 - Junior Recital Credits: 1
- MUSI 331 - Music History in Society I Credits: 3
- MUSI 332 - Music History in Society II Credits: 3
- MUSI 424 - Senior Recital Credits: 1
- MUSI 432 - Music History in Society IV Credits: 3
- MUSI 491 - Musical Communication in Performance Credits: 1 (Mason Core synthesis)

Emphasis Requirement (40 credits)

Performance: Brass emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 379 - Jazz Improvisation Credits: 1
- MUSI 391 - Conducting I Credits: 2
- 2 credits of MUSI 395 - Teaching Internship Credits: 1-4
- MUSI 396 - Conducting II Credits: 2
- MUSI 419 - Orchestration Credits: 3 or MUSI 493 - Topics in Music Theory Credits: 3
- 8 credits of MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 100-499 Credits: 9 (as approved by Music advisor)

**Choose 8 credits from the following:**
- MUSI 380 - Wind Symphony Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

**Performance: Guitar emphasis**

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 379 - Jazz Improvisation Credits: 1
- MUSI 391 - Conducting I Credits: 2
- 2 credits of MUSI 395 - Teaching Internship Credits: 1-4
- MUSI 396 - Conducting II Credits: 2
- MUSI 419 - Orchestration Credits: 3 or MUSI 493 - Topics in Music Theory Credits: 3
- 8 credits of MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 100-499 Credits: 9 (as approved by Music advisor)

**Choose 8 credits from the following:**
- MUSI 381 - University Chorale Credits: 1
- MUSI 384 - Symphonic Chorus Credits: 1
- MUSI 385 - Chamber Singers Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

**Performance: Keyboard emphasis**

- MUSI 351 - Keyboard Pedagogy Credits: 3
- MUSI 371 - Techniques of Accompanying I Credits: 1
- MUSI 372 - Techniques of Accompanying II Credits: 1
- MUSI 373 - Advanced Accompanying and Musicianship Skills Credits: 3
- MUSI 379 - Jazz Improvisation Credits: 1
- MUSI 382 - Piano Ensemble Credits: 1 or MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 391 - Conducting I Credits: 2
- 2 credits of MUSI 395 - Teaching Internship Credits: 1-4
- 6 credits of MUSI 485 - Chamber Ensembles Credits: 1
- 3 credits of MUSI 492 - Selected Topics in Music Credits: 1-3
- MUSI 100-499 Credits: 9 (as approved by Music advisor)

**Choose 8 credits from the following:**
Performance: Percussion emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 379 - Jazz Improvisation Credits: 1
- MUSI 391 - Conducting I Credits: 2
- 2 credits of MUSI 395 - Teaching Internship Credits: 1-4
- MUSI 396 - Conducting II Credits: 2
- MUSI 419 - Orchestration Credits: 3 or MUSI 493 - Topics in Music Theory Credits: 3
- 8 credits of MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 100-499 Credits: 9 credits of general MUSI electives (as approved by Music advisor)

Choose 8 credits from the following:
- MUSI 380 - Wind Symphony Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Performance: String emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 379 - Jazz Improvisation Credits: 1
- 8 credits of MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 391 - Conducting I Credits: 2
- 2 credits of MUSI 395 - Teaching Internship Credits: 1-4
- MUSI 396 - Conducting II Credits: 2
- MUSI 419 - Orchestration Credits: 3 or MUSI 493 - Topics in Music Theory Credits: 3
- 8 credits of MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 100-499 Credits: 9 (as approved by Music advisor)

Performance: Voice emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 325 - Performance Seminar and Vocal Literature for Singers and Accompanists I Credits: 2
- MUSI 326 - Performance Seminar and Vocal Literature for Singers and Accompanists II - German and French Credits: 2
- MUSI 341 - Diction for Singers I: Italian Diction and English Diction Credits: 2
- MUSI 342 - Diction for Singers II: German Diction and French Diction Credits: 2
- MUSI 352 - Vocal Pedagogy and Lab Credits: 3
- MUSI 388 - Fundamental Techniques of Stagecraft for Opera and Music Theater Credits: 2
- MUSI 391 - Conducting I Credits: 2
- MUSI 396 - Conducting II Credits: 2
- 4 credits of MUSI 485 - Chamber Ensembles Credits: 1
- 9 credits of foreign language (French, German, and/or Italian)

Choose 8 credits from the following:
- MUSI 381 - University Chorale Credits: 1
- MUSI 384 - Symphonic Chorus Credits: 1
- MUSI 385 - Chamber Singers Credits: 1

Performance: Woodwind emphasis

- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 379 - Jazz Improvisation Credits: 1
- MUSI 391 - Conducting I Credits: 2
- 2 credits of MUSI 395 - Teaching Internship Credits: 1-4
- MUSI 396 - Conducting II Credits: 2
- MUSI 419 - Orchestration Credits: 3 or MUSI 493 - Topics in Music Theory Credits: 3
- 8 credits of MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 100-499 Credits: 9 (as approved by Music advisor)

Choose 8 credits from the following:
- MUSI 380 - Wind Symphony Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1

Total: 120 credits

Bachelor/Accelerated Master's

Music, BM (Performance)/Music, Accelerated MM (Performance)

Web: music.gmu.edu

Students in the Music, BM (Performance concentration) have the option of obtaining an accelerated Music, MM (Performance concentration).
Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admissions Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit the following:

- An Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies
- 1-2 page Goals Statement
- Two letters of recommendation
- In addition, all applicants must complete a live performance audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music website. Interested students should contact the Senior Academic Advisor, School of Music, for more details about the application process.

Degree Requirements & Reserve Graduate Credit

After admission and having earned 90 undergraduate credits, accelerated master's students complete 6 credits of graduate coursework in their field of study (with a 3.00 GPA or better in each course), specified by their undergraduate and graduate advisors. These credits will apply to the undergraduate degree and provide the student advanced standing in the MM Performance program. All graduate course prerequisites must be completed prior to enrollment. While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

Students in the BM (Performance)/MM (Performance) accelerated degree program must fulfill all university requirements for the master's degree, including a minimum of 18 applicable graduate credits taken after the bachelor's degree has been completed and posted to the student's academic record. Successful completion of the accelerated MM will require one summer of coursework between years 4 and 5.

Doctor of Musical Arts

Musical Arts, DMA

Banner Code: AR-DMA-MUAR
Web: music.gmu.edu

College: College of Visual and Performing Arts
Department: School of Music

The doctor of musical arts requires 90 credits, 60 credits beyond the Master's degree in music. The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required coursework, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline.
Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master's degree in music from an accredited university;
- GPA of 3.00 in master's-level music course work, 3.50 in courses related to the prospective area of doctoral study (performance, composition, or conducting);
- Three recommendations;
- Satisfactory scores on GRE;
- A sample of academic writing such as a graduate-level paper from a (musicology or music history) course taken during MM studies;
- Audition (performance and conducting students only). Specific details of those requirements are available from the advisors.
- A portfolio of recent compositions and recordings of performances (composition students only).

Applicants should refer to the graduate admissions page of the School of Music website for specific details on what is required and how to submit their materials. There is no “provisional” admission. Students must meet appropriate standards prior to commencing doctoral studies.

Reduction of Credit

Students must have a master's degree before being admitted to the Doctor of Musical Arts Program. Most students receive a reduction of study of 30 credits based on their previous master's degree.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Placement Examinations

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory. Recitals can be scheduled only after completion of any necessary prerequisites in music theory, music history, and musicianship.

Doctoral Course Work (47 credits)

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or non degree credits not formally approved for the degree.

Students must complete the following required courses as well as those in their chosen concentration:

- 3 credits of Music History or Theory elective: MUSI 610 - Topics in Music Theory Credits: 3; MUSI 613 - Graduate Orchestration Credits: 3; MUSI 614 - Music Theory Pedagogy Credits: 3; MUSI 630 - Topics in Music History and
Literature Credits: 3; MUSI 640 - Topics in World Musics Credits: 3; MUSI 710 - Advanced Topics in Music Theory Credits: 3; MUSI 730 - Advanced Topics in Music History Credits: 3; MUSI 810 - Doctoral Seminar in Analysis Credits: 3; OR MUSI 830 - Doctoral Seminar in Music History Credits: 3

- MUSI 830 - Doctoral Seminar in Music History Credits: 3
- 2 credits of MUSI 890 - Doctoral Recital Credits: 1
- CVPA 600 - CVPA Graduate ProSeminar Credits: 0 (must be taken within the student's first 2 semesters)

▲ Concentration in Composition (CPO)

- 1 credit of approved graduate electives*
- MUSI 610 - Topics in Music Theory Credits: 3 or MUSI 710 - Advanced Topics in Music Theory Credits: 3
- MUSI 614 - Music Theory Pedagogy Credits: 3
- 4 credits of MUSI 685 - Graduate Chamber Ensemble Credits: 1
- 6 credits of MUSI 810 - Doctoral Seminar in Analysis Credits: 3
- 15 credits of MUSI 828 - Doctoral Applied Music in Composition Credits: 2-3
- MUSI 880 - Doctoral Major Ensemble Credits: 1
- Choose 6 credits from the following: MUSI 630 - Topics in Music History and Literature Credits: 3; MUSI 640 - Topics in World Musics Credits: 3; OR MUSI 730 - Advanced Topics in Music History Credits: 3

▲ Concentration in Conducting (CDC)

- 5 credits of approved graduate electives*
- 6 credits of MUSI 630 - Topics in Music History and Literature Credits: 3 and/or MUSI 730 - Advanced Topics in Music History Credits: 3
- MUSI 770 - Advanced Topics in Pedagogy Credits: 3
- MUSI 810 - Doctoral Seminar in Analysis Credits: 3
- 15 credits of MUSI 829 - Doctoral Applied Music in Conducting Credits: 2-3
- 4 credits of MUSI 880 - Doctoral Major Ensemble Credits: 1
- Choose 3 credits from the following: MUSI 610 - Topics in Music Theory Credits: 3; MUSI 710 - Advanced Topics in Music Theory Credits: 3; OR MUSI 712 - Composition for Conductors and Performers Credits: 3

▲ Concentration in Performance (PFM)

- 3 credits of approved graduate electives*
- 6 credits of MUSI 630 - Topics in Music History and Literature Credits: 3 and/or MUSI 730 - Advanced Topics in Music History Credits: 3
- 2 credits of MUSI 685 - Graduate Chamber Ensemble Credits: 1 or MUSI 720 - Advanced Topics in Applied Music Credits: 3
- MUSI 770 - Advanced Topics in Pedagogy Credits: 3
- MUSI 810 - Doctoral Seminar in Analysis Credits: 3
- 4 credits of MUSI 880 - Doctoral Major Ensemble Credits: 1 and/or MUSI 720 - Advanced Topics in Applied Music Credits: 3
- Choose 3 credits from the following: MUSI 610 - Topics in Music Theory Credits: 3; MUSI 710 - Advanced Topics in Music Theory Credits: 3; OR MUSI 712 - Composition for Conductors and Performers Credits: 3
Note:

*Approved electives could be from music history, music literature, world music, music theory, conducting, music education, secondary Applied Music, ensemble (including chamber music), or relevant nonmusic courses.

Residency

More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program. One year (fall and spring) of consecutive full-time study (9 credits per semester; 18 credits per year) is recommended. Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements

Reading proficiency is required in a language appropriate to the student's major area of study. Normally, this will be German, French, or Italian. The director of graduate studies and the Graduate Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student's area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Graduate Committee

The Graduate Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group.

Comprehensive Exams

After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams will be followed by a one-hour oral exam to clarify issues included in the written exams.

Doctoral Research (13 credits)

- a minimum of 3 credits of MUSI 998 - Dissertation Proposal Credits: 1-3
- a minimum of 7 credits of MUSI 999 - Dissertation Credits: 1-12

Advancement to Candidacy

Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all course work required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Graduate Committee, the director of graduate studies, and the director of the School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.
Dissertation Committee

The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee consisting of at least three members of the music faculty. The student's major professor will chair the committee. The director of graduate studies of the School of Music may be part of the committee; if not, he or she will serve ex officio. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost. Performance and composition recitals are also subject to the approval of the Dissertation Committee.

Final Defense and Graduation

When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

Total: 90 credits

Doctor of Philosophy

Music Education, PhD

Banner Code: AR-PHD-MUE
Web: music.gmu.edu
College: College of Visual and Performing Arts
Department: School of Music

The PhD in Music Education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education. The PhD requires 90 credits, 60 beyond the master's degree in music.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master's degree in music or its equivalent from an accredited university;
- GPA of 3.00 in master's-level music course work; 3.50 in courses related to the prospective area of doctoral study (music education, performance, composition, or conducting);
- Three recommendations;
- Satisfactory scores on GRE;
- Sample of academic writing such as a graduate-level paper from a musicology or music history course taken during MM studies.
- Students in performance and conducting must audition. Specific details of those requirements are available from the advisors.
• Composition students must present a portfolio of recent compositions and recordings of performances.
• Music education majors must present a dossier of their teaching experience and activities, a video of sample classroom teaching, and they must schedule an interview with music faculty including the director of graduate studies (DGS) prior to admission.

Applicants should refer to the graduate admissions page of the School of Music website for specific details on what is required and how to submit their materials. There is no "provisional" admission. Students must meet appropriate standards prior to commencing doctoral studies.

Reduction of Credit

Students must have a master's degree before being admitted to the PhD in Music Education Program. Most students receive a reduction of study of 30 credits based on their previous master's degree.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Placement Examinations

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory.

Doctoral Course Work (48 credits)

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or nondegree credits not formally approved for the degree.

• 9 credits of research courses as approved by advisor: EDRS 810 - Problems and Methods in Education Research Credits: 3; EDRS 811 - Quantitative Methods in Educational Research Credits: 3; EDRS 812 - Qualitative Methods in Educational Research Credits: 3; EDRS 820 - Evaluation Methods for Educational Programs and Curricula Credits: 3; EDRS 821 - Advanced Applications of Quantitative Methods Credits: 3; OR EDRS 824 - Mixed Methods Research: Integrating Qualitative and Quantitative Approaches Credits: 3
• 6 credits of MUSI 610 - Topics in Music Theory Credits: 3 or MUSI 710 - Advanced Topics in Music Theory Credits: 3
• MUSI 630 - Topics in Music History and Literature Credits: 3 or MUSI 730 - Advanced Topics in Music History Credits: 3
• MUSI 640 - Topics in World Musics Credits: 3
• 3 credits of MUSI 660 - Topics in Music Education Credits: 1-6
• MUSI 810 - Doctoral Seminar in Analysis Credits: 3 or MUSI 830 - Doctoral Seminar in Music History Credits: 3
• 12 credits of MUSI 860 - Doctoral Seminar in Music Education Credits: 3
• 3 credits of MUSI 880 - Doctoral Major Ensemble Credits: 1
• CVPA 600 - CVPA Graduate ProSeminar Credits: 0 (must be taken within the student's first 2 semesters)
• 6 credits of MUSI 500 - 800 level electives as approved by advisor.

Residency

More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program. One year (fall and spring) of consecutive full-time study (9 credits per semester) is recommended (18 total credits). Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not be included. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements

Reading proficiency is required in a language appropriate to the student's major area of study. Normally, this will be German, French, or Italian. Alternatively, the student may choose to demonstrate proficiency interpreting statistical findings in quantitative-based educational research. The director of graduate studies and the Graduate Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student's area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Graduate Committee

The Graduate Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group.

Comprehensive Exams

After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams may also be followed by a one-hour oral exam if needed to clarify issues included in the written exams.

Doctoral Research (12 credits)

• A minimum of 3 credits of MUSI 998 - Dissertation Proposal Credits: 1-3
• A minimum of 6 credits of MUSI 999 - Dissertation Credits: 1-12

Advancement to Candidacy

Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all course work required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Graduate Committee, the director of graduate studies, and the director of the School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

Dissertation
The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee consisting of at least three members of the music faculty. The student's major professor will chair the committee. The director of graduate studies of the School of Music may be a part of the committee; if not, he or she will serve ex officio. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost.

Final Defense and Graduation

When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

Total: 90 credits

Graduate Certificate

Instrumental Performance Artist Graduate Certificate

Banner Code: AR-CERG-ACIP
Web: music.gmu.edu
College: College of Visual and Performing Arts
Department: School of Music

The certificate is a specialized, graduate-level option for advanced musicians who desire to further develop and refine their performance art. The certificate is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

This certificate may be earned on a full time or part time basis.

Admission Requirements

- An artist certificate application and current résumé
- A bachelor's degree in music or equivalent (as evaluated by the School of Music Admissions Committee)
- Transcripts from previous educational institutions
- One-page written statement of student's goals and interest in the program
- Two letters of recommendation
- Recording of a live performance of solo works from the standard repertory submitted via SlideRoom.

Applicants must perform an audition recital and be interviewed on the Mason Campus. Applicants will be notified of the date and time of the audition and interview.

Certificate Requirements

Studies in Performance (17 credits)
• 12 credits of Graduate Applied Music: MUSI 721 - Applied Music Credits: 2-3; MUSI 724 - Applied Music in Woodwind Credits: 2-3; MUSI 725 - Applied Music in Brass Credits: 2-3; OR MUSI 727 - Applied Music in Percussion Credits: 2-3
• 2 credits of  MUSI 592 - Topics in Music Credits: 1-6
• 3 credits of MUSI 790 - Graduate Recital Credits: 1 (two semesters of solo recitals and one semester of chamber recital)

Support Studies in Literature and Pedagogy (8 credits)

• MUSI 630 - Topics in Music History and Literature Credits: 3 or MUSI 730 - Advanced Topics in Music History Credits: 3
• MUSI 551 - Keyboard Pedagogy Credits: 3 or MUSI 553 - Instrumental Pedagogy and Literature Credits: 3
• MUSI 695 - Teaching Internship Credits: 2

Support Studies in Accompanying or Ensemble plus Electives (7 credits)

(choose A or B)

A

• MUSI 571 - Techniques of Accompanying I Credits: 1
• MUSI 685 - Graduate Chamber Ensemble Credits: 1
• 5 credits of 500 - 700 level MUSI electives

B

• MUSI 682 - Wind Symphony Credits: 1
• MUSI 683 - Symphonic Band Credits: 1
• MUSI 685 - Graduate Chamber Ensemble Credits: 1
• MUSI 687 - Symphony Orchestra Credits: 1
• MUSI 689 - Jazz Ensemble Credits: 1
• 1 credit of 500 - 700 level MUSI electives

Note:

One of MUSI 682, MUSI 683, MUSI 685, MUSI 687 or MUSI 689 must be taken twice.

Total: 32 credits

Music and Well-Being Graduate Certificate

Banner Code: AR-CERG-MUWB
Web: music.gmu.edu
College: College of Visual and Performing Arts
Department: School of Music
The Graduate Certificate in Music and Well-Being builds on courses currently offered in the School of Music and on the school-wide initiative around well-being as an important consideration and subject of study for all musicians. Expanding and supplementing courses developed in connection with the undergraduate minor in Music and Well-Being, the certificate allows students to explore the connections between music and consciousness and between vibration, meditation, and well-being. The graduate certificate gives students a thorough grounding in theory and practice and includes instruction in compositional and improvisational approaches. Although there is some overlap in subject matter, this is not intended as a program in music therapy. The certificate is conceived as a complement to the programs focused on mindfulness and well-being that are a priority across the university. The success of the long-running Healing Arts Ensemble at the graduate level as well as the undergraduate level, and the growth in the new minor in Music and Well-Being indicates the potential level of student interest in the program.

This certificate may be pursued either in part or full time status.

**Admissions Requirements**

In addition to standard university requirements, an interview with the director of the program is required for admission. Visit the School of Music website for details on what and how to submit your application.

**Certificate Requirements**

- MUSI 555 - Music as a Healing Art Credits: 3
- MUSI 577 - Music and Consciousness Credits: 3
- MUSI 685 - Graduate Chamber Ensemble Credits: 1 (Healing Arts Ensemble, 3 semesters for 1 credit each)
- MUSI 699 - Independent Study Credits: 1-3 (Music Healing Practicum for 3 credits)
- MUSI 777 - Music and Consciousness 2 Credits: 3
- 6 credits of MUSI 728 - Applied Music in Composition Credits: 2-3
- MUSI 790 - Graduate Recital Credits: 1

Total: 22 credits

**Music Education Licensure for PK-12 Graduate Certificate**

Banner Code: AR-CERG-MELP
Web: music.gmu.eduCollege: College of Visual and Performing Arts
Department: School of Music

**Note:** This certificate may be earned on a full-time or part-time basis.

**Admission Requirements**

- In addition to standard requirements through the university's online application, requirements for this program include:
  - Transcript audit that indicates: Bachelor of Music or its equivalent, minimum cumulative G.P.A. of 3.0 (Endorsement Worksheet)
  - Official copy of VCLA test scores*
  - Official copy of Praxis Core Academic Skills for Educators Test (or equivalency)*
  - One page professional goals statement submitted with application
Upon application review by music education faculty, the successful applicant will be invited to an interview and music skills proficiency exam. *Specifics regarding testing requirements and passing scores are dictated by the College of Education and Human Development (CEHD) and can be found online at http://cehd.gmu.edu/teacher/test/.*

Certificate Requirements

Required Courses (15 credits)

Upon admission to this graduate certificate the candidate must complete the following:**

- MUSI 561 - Music Curriculum and Instructional Procedures Credits: 3
- MUSI 593 - Foundations of Music Education Credits: 3
- EDUC 539 - Human Development and Learning PK-12 Credits: 3
- EDRD 501 - Literacy and Curriculum Integration, PK-12 Credits: 3

One of the following (3 credits):

Select one of the following relevant to teaching interest:

- MUSI 566 - Instrumental Methods for Band Credits: 3
- MUSI 567 - Instrumental Methods, Strings Credits: 3
- MUSI 568 - Vocal and Choral Methods Credits: 3

Internship (6 credits)

Upon completion of coursework the candidate must complete a student teaching internship at the elementary and secondary levels in a program-approved public or private school (6 credits). Prior to being permitted to student teach, the candidate must complete and pass the Praxis II Music Content Exam* and the MTEC Competency Check.***

- MUSI 595 - Internship in Music Education Credits: 6-9

*Specifics regarding testing requirements and passing scores are dictated by the College of Education and Human Development (CEHD) and can be found online at http://cehd.gmu.edu/teacher/test/.

**Coursework completed at other institutions will not be considered for transfer into this graduate certificate program. Applicants who believe they have met requirements for a license are encouraged to apply directly to the Virginia Department of Education (VDOE). Instructions and a type-and-print version of the application for a teaching license can be found on the VDOE website at: http://www.doe.virginia.gov/teaching/licensure/application.pdf

***The requirements and procedures for applying for an internship as well as the MTEC Competency Checks is outlined in the Music Education Handbook (www.music.gmu.edu). Candidates will be advised to sign up for vocal and/or instrumental technique courses during coursework as needed to help prepare them for these exams. Note that techniques courses are not required and thus cannot be transferred or counted as course substitutions for completion of the certificate.

Total: 21 credits

Piano Performance Artist Graduate Certificate
The certificate is a specialized, graduate-level option for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

This certificate may be earned on a full time or part time basis.

**Admission Requirements**

- An artist certificate application and current résumé
- A bachelor's degree in music or equivalent (as evaluated by the School of Music Admissions Committee)
- Transcripts from previous educational institutions
- One-page written statement of student's goals and interest in the program

**Certificate Requirements**

**Studies in Performance (20 credits)**
• 12 credits of MUSI 723 - Applied Music in Voice Credits: 2-3
• 4 credits of MUSI 592 - Topics in Music Credits: 1-6
• MUSI 526 - Performance Seminar and Vocal Literature for Singers and Accompanists II Credits: 2
• MUSI 541 - Diction for Singers I: Italian Diction and English Diction Credits: 2 or MUSI 542 - Diction for Singers II: German Diction and French Diction Credits: 2

Support Studies in Ensemble Performance plus Electives (12 credits)

• 9 credits of MUSI 685 - Graduate Chamber Ensemble Credits: 1 AND MUSI 688 - Opera and Musical Theater Ensemble Credits: 3
• 1 credit of MUSI 690 - Graduate Lecture Recital Credits: 1-3
• MUSI 790 - Graduate Recital Credits: 1
• 1 credit of electives

Total: 32 credits

Master of Music

Music, MM

Banner Code: AR-MM-MUSI
Web: http://music.gmu.edu
College: College of Visual and Performing Arts
Department: School of Music

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, and pedagogy. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

An accelerated master's option is available to students in the bachelor's program. See Music, BM (Performance)/Music, Accelerated MM (Performance) for requirements.

Admission Requirements

In addition to fulfilling admission requirements for graduate study, applicants are expected to hold a baccalaureate degree in music or another discipline, with courses equaling the music requirements (minus the 7- to 8-credit teaching sequence) for the BA in music offered at Mason.

The following admission requirements must also be met:

• Performance: pre-screening submitted through SlideRoom and audition
• Conducting: pre-screening submitted through SlideRoom and audition
• Composition: submission of a portfolio of compositions
• Music Education: interview with music faculty, a video of sample classroom teaching and submission of a two- to three-page paper on the applicant's philosophy of music education.
Pedagogy: audition in the primary applied teaching area is required. Applicants are expected to have large and small ensemble experience on the major instrument and should have presented a full solo recital or equivalent. All music teaching experience should be summarized.

Jazz Studies: A portfolio of at least five jazz tunes in contrasting styles, as well as a complete repertoire list of all jazz tunes studied/performed. Submit all jazz materials via SlideRoom and schedule audition.

Applicants should refer to the graduate admissions page of the School of Music website for specific details on what is required and how to submit their materials.

Diagnostic Entrance Exam

All students are required to complete diagnostic entrance examinations in music theory, music history, aural skills, and basic keyboard skills. These examinations must be taken prior to the beginning of the first semester of graduate study. A sufficient placement score can reduce or eliminate prerequisites for some of the 600-level and above courses in music theory and history. The exam is offered during a three-hour period prior to the beginning of classes of the fall and spring semesters.

Foreign Language Exams (Vocal Performance Emphasis)

Students in the MM degree program (emphasis in vocal performance) must take proficiency exams in French, German, Italian, and English to demonstrate diction competency. Students may be required to take MUSI 525, 526 Performance Seminar for Singers and Accompanists I, II.

Comprehensive Exit Exam

All students are required to pass a comprehensive exit exam administered during the graduation semester or, in the case of students selecting the thesis option in the music education concentration, on completion of 24 credits of course work and immediately before beginning work on the thesis. August graduates must take this exam during the preceding spring term. This exam is usually a three-hour written test, with questions based primarily on course work the student has taken toward the degree at Mason.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

A student must successfully complete the appropriate 30 credits in graduate music courses. With approval of the graduate advisor, 3 non-music graduate credits may be taken.

The student is admitted as concentrating in one of six areas: performance, music education, composition, conducting, jazz studies, or pedagogy. All students are required to complete the 11 credits described below as General Requirements plus 19 credits in one of the six areas identified below as Additional Requirements. There are some limited possibilities for double concentrations. For details, see the director of graduate studies.

General Requirements for all concentrations (9-11 credits):

- 2 credits of Graduate Ensemble (all concentrations except Music Education): MUSI 681 - Graduate Choral Ensembles Credits: 1; MUSI 682 - Wind Symphony Credits: 1; MUSI 683 - Symphonic Band Credits: 1; MUSI 685 - Graduate
Chamber Ensemble Credits: 1; MUSI 687 - Symphony Orchestra Credits: 1; MUSI 688 - Opera and Musical Theater Ensemble Credits: 3; MUSI 689 - Jazz Ensemble Credits: 1.

- MUSI 611 - Analytical Techniques Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 662 - Introduction to Research in Music Credits: 3
- CVPA 600 - CVPA Graduate ProSeminar Credits: 0 (must be taken within the student's first 2 semesters)

Note:

Music Education students will have 9 credits of General Requirements and 21 credits of Concentration Requirements; all other concentrations will have 11 credits of General Requirements and 19 credits of Concentration Requirements.

Concentration Requirements (19-21 credits)

Choose at least one concentration from the following:

- Composition
- Conducting
- Jazz Studies
- Music Education
- Performance
- Pedagogy

▲ Concentration in Composition (CPO):

- 9 credits of MUSI 728 - Applied Music in Composition Credits: 2-3
- MUSI 613 - Graduate Orchestration Credits: 3 *
- MUSI 630 - Topics in Music History and Literature Credits: 3 or MUSI 730 - Advanced Topics in Music History Credits: 3 or MUSI 610 - Topics in Music Theory Credits: 3 or MUSI 710 - Advanced Topics in Music Theory Credits: 3
- MUSI 790 - Graduate Recital Credits: 1
- 3 credits of graduate electives

Note:

*Students may pass out of MUSI 613 with a satisfactory score on the Graduate Orchestration Placement Exam. In this case, students will take an additional 3 credits of a theory or history elective chosen from: MUSI 610, MUSI 710, MUSI 630, or MUSI 730.

▲ Concentration in Conducting (CDC):

- 9 credits of MUSI 729 - Applied Music in Conducting Credits: 2-3
- MUSI 613 - Graduate Orchestration Credits: 3
- MUSI 790 - Graduate Recital Credits: 1
- 3 credits of graduate electives
  - and 3 credits chosen from the following:
    MUSI 610 - Topics in Music Theory Credits: 3 OR MUSI 630 - Topics in Music History and Literature Credits: 3 OR MUSI 712 - Composition for Conductors and Performers Credits: 3
Note:

The number of students accepted in the graduate conducting concentration is limited by the extent to which it is possible to provide students with practical experience.

▲ Concentration in Jazz Studies (JAZZ)

- MUSI 615 - Advanced Jazz Improvisation Credits: 3
- MUSI 650 - Topics in Jazz Studies Credits: 3
- MUSI 790 - Graduate Recital Credits: 1
- 3 credits of graduate electives

▲ Concentration in Music Education (MUE):

- MUSI 592 - Topics in Music Credits: 1-6 (must be taken for 3 credits)
- MUSI 660 - Topics in Music Education Credits: 1-6 (must be taken for 3 credits)
- MUSI 661 - Psychology of Music Teaching and Learning Credits: 3
- MUSI 663 - Aesthetics of Music Education Credits: 3
- 9 credits of 500 - 800 level MUSI courses (must be approved by advisor)

▲ Concentration in Performance (PFM):

- 1 credit of Graduate Ensemble: MUSI 681 - Graduate Choral Ensembles Credits: 1; MUSI 682 - Wind Symphony Credits: 1; MUSI 683 - Symphonic Band Credits: 1; MUSI 685 - Graduate Chamber Ensemble Credits: 1; MUSI 687 - Symphony Orchestra Credits: 1; MUSI 688 - Opera and Musical Theater Ensemble Credits: 3; OR MUSI 689 - Jazz Ensemble Credits: 1
- 8 credits of 500 - 800 level MUSI electives*
- MUSI 790 - Graduate Recital Credits: 1

Note:

*Piano Performance requires 3 credits of MUSI 573 - Accompanying and Musicianship III Credits: 3 and 5 credits of 500 - 800 level MUSIC electives.

▲ Concentration in Pedagogy (PDGY):
- MUSI 573 - Accompanying and Musicianship III Credits: 3 (piano pedagogy only; all other areas take 3 elective credits)
- 3 credits chosen from the following: MUSI 551 - Keyboard Pedagogy Credits: 3; MUSI 552 - Vocal Pedagogy and Lab Credits: 3; OR MUSI 553 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 651 - Keyboard Pedagogy II Credits: 3 (piano pedagogy only) or MUSI 652 - Vocal Pedagogy II Credits: 3 (vocal pedagogy only) or MUSI 653 - Instrumental Pedagogy II Credits: 3 (instrumental pedagogy only)
- 1 credit of MUSI 690 - Graduate Lecture Recital Credits: 1-3
- MUSI 695 - Teaching Internship Credits: 2
- MUSI 790 - Graduate Recital Credits: 1

Total: 30 credits

Non-Degree

Ethnomusicology Minor

Banner Code: EMUS
Web: music.gmu.edu

College: College of Visual and Performing Arts
Department: School of Music

Students must first demonstrate to the Ethnomusicology coordinator a basic level of knowledge and training in some area of Western or non-Western music, or earn a grade of B or higher in MUSI 103 or MUSI 431. Prerequisites for specific courses are indicated below.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree, with a minimum 2.00 GPA earned in all courses applied to the minor. See AP.5 Undergraduate Policies for details.

Minor Requirements

The minor is designed for those who wish to widen their scope of knowledge about music while deepening their understanding of the world's peoples. Students learn in the classroom, as well as experientially, in the form of applied studies and exercises in field work how music making functions within cultural contexts, conveying varied meanings in bodily action and musical sound worldwide. Students gain skills that will serve them in many fields of endeavor, from developing specific musical expertise to acquiring proficiency with technological and anthropological aspects of ethnographic enquiry.

Core (12 credits)

- MUSI 103 - Musics of the World Credits: 3 or MUSI 431 - Music History in Society III Credits: 3
- MUSI 303 - Topics in Ethnomusicology Credits: 3
• 2 credits of MUSI 394 - Ethnomusicology Internship Credits: 1-4 (subject to approval from the Ethnomusicology minor coordinator)
• ANTH 114 - Introduction to Cultural Anthropology Credits: 3

1 credit from the following:

• Applied Music Options
• Music Ensemble Options

Electives (6 credits)

Electives subject to approval from the Ethnomusicology minor coordinator and should be selected from the following:

• MUSI 102 - Popular Music in America Credits: 3
• MUSI 107 - Jazz and Blues in America Credits: 3
• MUSI 379 - Jazz Improvisation Credits: 1
• MUSI 485 - Chamber Ensembles Credits: 1
• Applied Music Options
• AFAM 200 - Introduction to African American Studies Credits: 3
• AFAM 390 - Special Topics in African and African American Studies Credits: 3
• ANTH 302 - Peoples and Cultures of Latin America Credits: 3
• ANTH 306 - Peoples and Cultures of Island Asia Credits: 3
• ANTH 309 - Peoples and Cultures of India Credits: 3
• AVT 378 - The African American Experience in the Performing Arts Credits: 3
• COMM 157 - Digital Media Workshop Credits: 1
• COMM 305 - Foundations of Intercultural Communication Credits: 3
• DANC 118 - World Dance Credits: 3
• DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
• ENGH 315 - Folklore and Folklife Credits: 3

Note:

Additional electives may include summer travel courses, as appropriate, and must be approved by the minor coordinator.

Total: 18 credits

Jazz Studies Minor

Banner Code: JAZZ
Web: music.gmu.edu

College: College of Visual and Performing Arts
Department: School of Music This minor is open to music and non music majors who wish to explore America’s unique art form. It is open to all instrumentalists and vocalists, including students who perform on instruments not normally associated with jazz.
No prior experience in jazz is needed, but candidates must pass a music audition. Students in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree, with a minimum 2.00 GPA earned in all courses applied to the minor. See AP.5 Undergraduate Policies for details.

Minor Requirements

- 2 credits of Applied Music Options
- MUSI 107 - Jazz and Blues in America Credits: 3
- MUSI 113 - Aural Skills I Credits: 1
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 300 - Recital Attendance Credits: 0 (two semesters)*
- MUSI 311 - Jazz Studies Credits: 3
- 3 credits of MUSI 485 - Chamber Ensembles Credits: 1 (Jazz Chamber Ensembles)
- MUSI 379 - Jazz Improvisation Credits: 1

Note:

*All students who enroll as music minors and jazz studies minors must take MUSI 300 for two semesters. A grade of S (satisfactory) must be earned each semester.

Total: 20 credits

Music Minor

Banner Code: MUSI
Web: music.gmu.edu

College: College of Visual and Performing Arts
Department: School of Music All students pursuing a music minor must pass a music audition. Students in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of 2.00 earned in all courses applied to the minor. See AP.5 Undergraduate Policies for more information.

Minor Requirements

- MUSI 101 - Introduction to Classical Music Credits: 3
- MUSI 113 - Aural Skills I Credits: 1
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 114 - Aural Skills II Credits: 1 or MUSI 172 - Keyboard Skills II Credits: 1
• 6 credits of Applied Music Options
• MUSI 300 - Recital Attendance Credits: 0 (two semesters)*
• 3 credits of Music Ensemble Options

Note:

*All students who enroll as music minors and jazz studies minors must take MUSI 300 for two semesters. A grade of S (satisfactory) must be earned each semester.

Total: 21 credits

Music Technology Minor

Banner Code: MTEC
Web: music.gmu.edu

College: College of Visual and Performing Arts
Department: School of Music
This minor is open to majors from throughout the university who seek to expand their knowledge and skill in this area of study.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree, with a minimum 2.00 GPA earned in all courses applied to the minor. See AP.5 Undergraduate Policies for details.

Minor Requirements (18 credits)

Required (9 credits)

• MUSI 254 - Music and Technology Credits: 3
• MUSI 300 - Recital Attendance Credits: 0 (2 semesters)
• MUSI 354 - Electronic Composition Credits: 3
• MUSI 355 - Recording Techniques Credits: 3

Music Technology Electives (9 credits)

Applied Music, Ensemble and Skills Courses (0-3 credits)

• Applied Music Options
• Music Ensemble Options
• MUSI 171 - Keyboard Skills I Credits: 1
• MUSI 367 - Class Guitar Credits: 1
• MUSI 368 - Class Voice Credits: 1

Music Theory (0-3 credits)

• MUSI 100 - Fundamentals of Music Credits: 3
• MUSI 115 - Theory I Credits: 3
Music History (0-3 credits):

- MUSI 102 - Popular Music in America Credits: 3
- MUSI 103 - Musics of the World Credits: 3
- MUSI 104 - Introduction to Twentieth-Century Music Credits: 3
- MUSI 105 - Music in the United States Credits: 3
- MUSI 107 - Jazz and Blues in America Credits: 3

Music Technology Topics (0-3 credits)

- MUSI 359 - Topics in Music Technology Credits: 3

Note:

Entrance requirements: MUSI 100 or 115 with a grade of C or higher. A music audition and interview with music technology faculty is required.

Total: 18 credits

Undergraduate Certificate

Musical Theater Undergraduate Certificate: Music

Banner Code: AR-CERB-MTHR
Web: music.gmu.edu

College: College of Visual and Performing Arts
Department: School of Music

Note: the BFA in Musical Theater is offered by the School of Theater and is presented in the Theater section of this catalog.

Students pursuing a Musical Theater Certificate: Music Concentration must satisfy all requirements for a BA or BM in the School of Music. Students fulfilling the Musical Theater Certificate: Theater Concentration (Musical Theater Undergraduate Certificate: Theater) must satisfy all requirements for a BA or BFA in the School of Theater with a concentration in performance.

Auditions are required for admission into the Musical Theater Undergraduate Certificate: Music.

Some credits required for this certificate may simultaneously fulfill learning requirements of the certificate in Musical Theater and university Mason Core requirements. Some courses require placement. Depending on electives and other learning experiences, this certificate requires up to 30 credits beyond the requirements to complete a major in the School of Music. A minimum of 15 credits must be unique to the certificate and may not count toward the major, concentration, minor, another certificate or Mason Core requirements. At least 15 credits of the certification must be earned at Mason. Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. Students with a previous bachelor's degree, who are admitted to this certificate alone, have four years to complete the certificate requirements. (See Academic Policies for more information.) This program of study is coordinated between units within the College of Visual and Performing Arts. Students will register for the following courses. Only courses with a grade of C or better are counted toward the certificate.

The certificate may be completed under part or full time basis.
Certificate Requirements

Musical Theater Dance Courses (12 credits)

Courses in DANC are selected from the following courses open to all non-dance majors. Courses may not be repeated in the certificate. At least 6 credits must be 200 level or above.

- DANC 125 - Modern/Contemporary Dance I Credits: 3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 145 - Ballet I Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 225 - Modern/Contemporary Dance II Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 245 - Ballet II Credits: 3
- DANC 331 - Advanced Jazz Dance Credits: 3

▲ Concentration for Music Students (MUSS) (18 credits)

Theater Courses

- THR 300 - Voice and Speech Credits: 3 or THR 301 - Advanced Study in Voice Credits: 3
- THR 310 - Acting II Credits: 3
- THR 427 - Musical Theater Workshop Credits: 3 (must be taken for a total of 6 credits)

Movement and Character Courses

Choose one of the following:

- THR 304 - Advanced Movement for Actors Credits: 3
- THR 305 - Unarmed Stage Combat Credits: 3
- THR 365 - Characterization Credits: 3
- THR 405 - Advanced Stage Combat Credits: 3
- THR 421 - One-Person Show Credits: 3

Advanced Acting Courses

Choose one of the following:

- THR 320 - Performance Studio Credits: 3
- THR 321 - Acting Shakespeare Credits: 3
• THR 340 - Advanced Studies in Directing Credits: 3
• THR 410 - Acting for the Camera Credits: 3
• THR 420 - Advanced Performance Studio Credits: 3

Total: 30 credits

Other Degrees

Music and Well-Being Minor

Banner Code: MUWB
Web: music.gmu.edu

College: College of Visual and Performing Arts
Department: School of Music

The minor is designed to allow participation by students with minimal formal musical training. The coursework allows students to explore the connections between music and consciousness and between vibration, mindfulness, and well-being. Admission to the Music and Well-Being minor is by interview with the minor coordinator.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of 2.00 earned in all courses applied to the minor. See AP.5 Undergraduate Policies for more information.

Minor Requirements (18 credits)

• MUSI 100 - Fundamentals of Music Credits: 3 or MUSI 115 Music Theory I Credits: 3
• MUSI 101 - Introduction to Classical Music Credits: 3
• MUSI 171 - Keyboard Skills I Credits: 1 **
• MUSI 300 - Recital Attendance Credits: 0 (2 semesters)*
• MUSI 366 - Class Percussion Credits: 1 **
• MUSI 367 - Class Guitar Credits: 1 **
• MUSI 455 - Music as a Healing Art Credits: 3
• MUSI 477 - Music and Consciousness Credits: 3
• 3 credits of MUSI 485 - Chamber Ensembles Credits: 1 Healing Arts Ensemble

Notes:

*A grade of S (satisfactory) must be earned each semester

**Students demonstrating proficiency in keyboard, percussion, or guitar may substitute other MUSI 100-499 courses at the discretion of the Program Coordinator.

Total: 18 credits
School of Theater

Performing Arts Building, Room A407
Phone: 703-993-1120
Web: theater.gmu.edu

Faculty

Ken Elston, Director

Professors: D’Andrea (Robinson Professor), Davis, Kurtz, McDonald

Associate Professors: Elston (director), Gero, Johnsen-Neshati

Assistant Professor: Casey

Administrative Faculty (Instructional): Lechter, Murray

Adjunct Faculty: Alman, Cadby, Cooke, Dunayer, Gaines, Gardner, Hurt, Kessinger, Lee, Maier, Nanni-Messegee, Wallace, Wilson

Courses

The School of Theater offers all courses designated THR in the Courses section of this catalog.

Undergraduate Programs

The School of Theater offers BA and BFA degrees.

The School of Theater prepares students for graduate study or entry into the profession through rigorous, concentrated, and individualized training; however, students are encouraged to maintain wide-ranging interests within the school and throughout the university's extensive offerings.

Students seeking to earn a BA or BFA as a second bachelor's degree, either concurrently or sequentially, must complete all theater degree requirements. Students must earn a minimum 2.00 cumulative GPA in their major. A student must earn a minimum cumulative GPA of 2.5 to complete a BA with a concentration or a BFA.

Admission Requirements

Admission to George Mason University requires application through Mason's Admissions Office. Entrance into all Theater programs is by interview and audition or portfolio review. Information about the audition, portfolio review and interview process, including dates, can be found on the College of Visual and Performing Arts web page, cvpa.gmu.edu/admissions-u.html. Please note that these are two separate processes.

Interviews will be conducted by appointment and candidates must prepare an appropriate resume.

Please contact the School of Theater at theater@gmu.edu or 703-993-1120 to schedule your interview. Students who audition or present a portfolio at theater conferences (i.e. Virginia Theatre Association, Southeastern Theater Conference, etc.) before or after applying to Mason are required to attend a separate interview on campus.
Theater BA

Theater majors organize their advanced work within the major to include classes in areas of emphasis including performance, design and technical Theater, and other theater studies.

Theater BA Concentrations

Theater majors may choose to complete their Bachelor of Arts degree with a concentration in one of the following areas: Design and Technical Theater, Performance (Acting and Directing), Playwriting and Dramaturgy, or Theater Education for Theater Arts PK-12. Students must earn a minimum 2.5 cumulative GPA to complete a BA with a concentration. There is no further audition requirement or portfolio review for theater majors electing to complete a concentration. Students may also complete the traditional Bachelor of Arts without a concentration.

Theater BFA Concentrations

In addition to the Mason Core requirements for the Bachelor of Arts degree, students in the Theater BFA must complete a minimum of 73 credits in the major: 49 credits of required core courses and 24 credits in a concentration. Concentrations are: Design for Stage and Screen, Performance for Stage and Screen (Acting and Directing), Writing and Dramaturgy for Stage and Screen. All students pursuing a BFA in Theater must earn a minimum 2.5 cumulative GPA for graduation.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated writing-intensive in their major at the 300 level or above. Students seeking a BA or BFA in theater fulfill this requirement by successfully completing THR 350 - Script Analysis Credits: 3 or THR 482 - Advanced Screenplay Workshop Credits: 3.

Certification for Theater Education for Theater Arts PK-12

The Theater Education for Theater Arts PK-12 concentration is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Upon degree conferral and completion of all requirements, students may be eligible to apply for Virginia State Licensure. Minimum scores on the Praxis Core and VCLA tests must be achieved before state licensure is granted.

Students must be formally accepted into the Theater Education for Theater Arts PK-12 concentration. See Theater Education for Theater Arts PK-12 concentration for a complete list of requirements.

Certification in Musical Theater

Students pursuing a certification in Musical Theater must satisfy all requirements for a BA or BFA in the School of Theater, with a concentration in performance, or a BA or BM in the School of Music, as reflected in the university catalog. Some credits required for the certificate may simultaneously fulfill the learning requirements of the certificate in Musical Theater and fulfill Mason Core requirements. Some courses require placement. Thus, depending on electives and other learning experiences, this certification requires up to 30 credits beyond the requirements to complete a major in the School of Theater. Please see the College of Visual and Performing Arts website for audition information at http://cvpa.gmu.edu/admissions-u.html

Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. This program of study is coordinated between units within the College of Visual and Performing Arts. See Musical Theater Certificate section for specific requirements.
Production Opportunities

Participation in Theater at Mason productions is expected of all declared majors. Students must have a minimum 2.5 cumulative GPA to participate in Theater at Mason productions.

Students must also earn four (4) practicum credits, one (1) credit for satisfactory completion (a minimum of 30 hours) of each of four (4) performance and production assignments in the major, including faculty or guest-directed Mason Players Mainstage, and student-directed Studio productions.

All freshmen, first year transfer, and new Theater majors must register for THR 198 - Theatrical Construction Practicum Credits: 1 and THR 199 - Production Run Crew Practicum Credits: 1 during their first academic year.

Assignments for THR 196 - Performance and Design Practicum Credits: 1 and THR 197 - Management/Literary Practicum Credits: 1 will include a presentation of portfolio documents demonstrating a practical analysis of the role, design, or support position to subject area mentors.

- THR 196 assignments include actor, designer, assistant designer, stage manager, and assistant stage manager.
- THR 197 assignments include director, assistant director, dramaturg, master electrician, technical director, playwright, house management, and publicity.
- THR 198 assignments include scenery construction and painting, costume construction, electrician, and props.
- THR 199 assignments include stage crew, light board operator, sound board operator, wardrobe, and fly crew.

Unless registered for a Theater course approved as directly connected to production (i.e. THR 196 - Performance and Design Practicum Credits: 1, THR 197 - Management/Literary Practicum Credits: 1, THR 198 - Theatrical Construction Practicum Credits: 1, THR 199 - Production Run Crew Practicum Credits: 1, THR 492 - Studio Project Credits: 1-3 or THR 495 - Senior Capstone Project Credits: 3) all students (including non-Theater majors) electing to participate in a Theater at Mason production must register for THR 200 - Play Production Practicum Credits: 1 concurrent with participation.

Musical Theater Production Opportunities:

Participation in Theater at Mason productions is expected of all declared Musical Theater majors.

Students must also earn four (4) practicum credits: one (1) credit for satisfactory completion (a minimum of 30 hours) in each of four (4) performance and production assignments in the major, including faculty or guest-directed Mason players Mainstage and student-directed Studio productions. Musical Theater BFA students will register for these practicum credits as MUSI 221 - Applied Music I Credits: 1. Students must see their academic advisor to identify and authorize practicum and ensemble assignments.

Theater Honors Program

Highly qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three Honors specific courses from their chosen concentration. They must also maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.

Graduate Programs

Accelerated Master's Program
The School of Theater offers the following accelerated Master's option:

- Theater, BA/Arts Management, Accelerated MA

This program allows undergraduate students to take graduate classes that can be used towards a designated Master's degree. Undergraduates who wish to pursue the accelerated Master's route should talk to their academic advisor first to see if they qualify. Students must be within 75-90 credits of their Bachelor's program to be eligible to apply; those who have earned more than 90 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the Master's program through an Accelerated Master's application. For more information about admissions requirements and the application process, students should visit the cvpa.gmu.edu website.

Master of Fine Arts, Visual and Performing Arts

The School of Theater offers one concentration under the Master of Fine Arts, Visual and Performing Arts degree: Theater. Applicants to the program must designate which concentration they intend to apply for on the application. Each concentration has its own unique set of admissions requirements and program requirements. For specific information, please refer to the Visual and Performing Arts, MFA entry.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Bachelor of Arts

Theater, BA

Banner Code: AR-BA-THR
Web: theater.gmu.edu

College: College of Visual and Performing Arts
Department: School of Theater

The BA degree stresses the breadth of a liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in theater and screen.

Students complete the theater core. To organize their advanced work within the major, students select 24 credits of 300-400-level courses, chosen from any area of emphasis in Theater or students elect a course of study from four concentrations: Performance (Acting and Directing), Design and Technical Theater, Playwriting and Dramaturgy, or Theater Education for Theater Arts PK-12.

Degree Requirements

Mason Core (40 credits)

Foundation Requirements

- Oral communication Credits: 3
- Information technology Credits: 3
• Quantitative reasoning Credits: 3
• ENGH 101 - Composition Credits: 3
• ENGH 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.

Core Requirements

• Literature Credits: 3
• Arts (outside the major) (students earning a concentration in Design and Technical Theater must take ARTH 101, ARTH 102, ARTH 200, ARTH 201) Credits: 3
• Natural science (including one laboratory science) Credits: 7
• Western civilization Credits: 3
• Global understanding Credits: 3
• Social and behavioral sciences Credits: 3
• Synthesis requirement (see concentration for specific requirement) Credits: 3

Major (64-80 credits)

Foreign Language, Minor, Double Major or Double Degree (0–16 credits)

See beginning of CVPA section for foreign language requirement.

Students may complete an academic minor, double major or double degree in lieu of the foreign language requirement.

Theater Core Requirements (43 credits)

• THR 150 - Greeks to Restoration Credits: 3
• THR 151 - Romanticism to Present Credits: 3
• THR 191 - Practical Theater Seminar Credits: 0 (Must be taken four times during course of study)
• THR 196 - Performance and Design Practicum Credits: 1
• THR 197 - Management/Literary Practicum Credits: 1
• THR 198 - Theatrical Construction Practicum Credits: 1
• THR 199 - Production Run Crew Practicum Credits: 1
• THR 201 - Stage Management Credits: 3
• THR 210 - Acting I Credits: 3
• THR 230 - Fundamentals of Production Credits: 3
• THR 300 - Voice and Speech Credits: 3
• THR 303 - Movement for Actors Credits: 3 or THR 304 Advanced Movement for Actors Credits: 3 or THR 305 Unarmed Stage Combat Credits: 3
• THR 329 - Directing Credits: 3
• THR 339 - Principles of Design Credits: 3 or THR 345 Puppetry Credits: 3
• THR 350 - Script Analysis Credits: 3
• THR 380 - Playwriting I Credits: 3 or THR 382 - Screenplay Workshop Credits: 3 or THR 482 - Advanced Screenplay Workshop Credits: 3
• THR 411 - Great Film Directors Credits: 3 or THR 412 - Great Film Performances Credits: 3

One upper-level dramatic literature course (3 credits)

• THR 351 - Dramatic Theory and Criticism Credits: 3 (May fulfill either dramatic literature requirement or PWD concentration requirement but not both)
• THR 352 - Dramatic Literature Seminar Credits: 3 (May fulfill either dramatic literature requirement or PWD concentration requirement but not both)
• THR 355 - Moral Vision in American Theater Credits: 3
• THR 359 - World Stages Credits: 3 (May fulfill either global understanding or dramatic literature requirement but not both)
• THR 395 - Theater as the Life of the Mind Credits: 3
• THR 424 - Contemporary Women Playwrights Credits: 3

Upper-Level Electives (21-24 credits)

• 21-24 credits chosen from THR 300-499
Students electing to complete a concentration will fulfill part of this requirement with concentration-specific courses.

Theater Education for Theater Arts PK-12 concentration students must take the following to fulfill part of this requirement:

• THR 449 - Elementary Theater Education Credits: 3
• THR 450 - Secondary Theater Education Credits: 3
• THR 451 - Theater Pedagogy Credits: 2

Theater Concentrations (12-16 credits)

Theater majors may apply to complete their degree with a concentration in one of the following:

• Design and Technical Theater
• Performance
• Playwriting and Dramaturgy
• Theater Education for Theater Arts PK-12

Note that theater majors are not required to complete a concentration to graduate with a Theater BA.

▲ Concentration in Design and Technical Theater (DTT)

Provides a foundation of knowledge, technique, and experience in one or more areas of theater design and technology in preparation for advanced study and professional work in the field.

Synthesis fulfilled by THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or THR 496 - Text in Production Credits: 3.

Required Core Course:

• 3 credits of THR 497 - Independent Study Credits: 1-6
Two courses from:

- THR 235 - Costume Crafts Credits: 3
- THR 313 - Event Technology Credits: 3
- THR 314 - Lighting Stagecraft Credits: 3
- THR 315 - Sound Engineering Credits: 3
- THR 330 - Seminar in Technical Theater Credits: 3
- THR 331 - Drafting and Model Making Credits: 3
- THR 332 - History of Fashion and Dress Credits: 3
- THR 343 - Costume Pattern Drafting Credits: 3

One course from:

- THR 316 - Scene Painting Credits: 3
- THR 333 - Stage Design Credits: 3
- THR 334 - Lighting Design Credits: 3
- THR 335 - Costume Design Credits: 3
- THR 337 - Sound Design Credits: 3
- THR 342 - Makeup Design Credits: 3
- THR 343 - Advanced Lighting Design Credits: 3

▲ Concentration in Performance (PFM)

Designed for the serious student of acting and directing with professional aspirations. Solid grounding in the fundamentals of performance analysis and basic training of the actor's instrument are complemented by a rigorous, sequential instruction in the various facets of the actor's craft.

At its core, the Performance Concentration is a blend of Modern and Classical actor training using a Stanislavski-grounded approach balanced with techniques for understanding texts written two hundred years before "motivation" and "characterization" entered the critical vocabulary. Rounding out the curriculum is specialized study in vocal production and movement technique. Matriculation in this program expresses a profound commitment to a rigorous intellectual, physical and emotional investigation of the discipline of performance over a two-year period. Professional development is enhanced with ongoing student progress reviews, support and advising from Performance Concentration faculty.

Synthesis fulfilled by THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or THR 496 - Text in Production Credits: 3.

Required Core Courses:

- THR 301 - Advanced Study in Voice Credits: 3
- THR 310 - Acting II Credits: 3

One course from:

- THR 320 - Performance Studio Credits: 3
- THR 321 - Acting Shakespeare Credits: 3
- THR 340 - Advanced Studies in Directing Credits: 3
- THR 342 - Makeup Design Credits: 3
- THR 410 - Acting for the Camera Credits: 3
- THR 420 - Advanced Performance Studio Credits: 3

One course from:

- THR 304 - Advanced Movement for Actors Credits: 3
- THR 305 - Unarmed Stage Combat Credits: 3
- THR 365 - Characterization Credits: 3
- THR 405 - Advanced Stage Combat Credits: 3
- THR 421 - One-Person Show Credits: 3
- THR 423 - Audition Techniques: Stage and Camera Credits: 3
- THR 427 - Musical Theater Workshop Credits: 3

▲ Concentration in Playwriting and Dramaturgy (PWD)

Acknowledges a creative and practical connection between the work of the playwright and dramaturg. Students choosing this area of specialization will focus on the literary aspects of theater, such as playwriting, dramaturgy, screenwriting, translation, adaptation, season planning, and theater criticism. Students seeking specialized experience as a playwright or dramaturg will choose from a selection of required and recommended courses designed to expose students to a broad range of contemporary and classical texts, deepen their understanding of dramatic structure, encourage collaboration, and foster opportunities for new play development. Students are encouraged to consult their advisors on complementary courses of interest outside the major, such as in the visual and performing arts, Film and Video Studies, English and Foreign Language. This concentration gives students access to a variety of hands-on opportunities within the School of Theater and the professional world.

Synthesis fulfilled by THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3

Required Core Course:

- THR 380 - Playwriting I Credits: 3

One course from:

- THR 352 - Dramatic Literature Seminar Credits: 3
- THR 355 - Moral Vision in American Theater Credits: 3
- THR 395 - Theater as the Life of the Mind Credits: 3

One course from:

- THR 381 - Playwriting II Credits: 3
- THR 382 - Screenplay Workshop Credits: 3
- THR 480 - Advanced Playwriting Credits: 3
- THR 482 - Advanced Screenplay Workshop Credits: 3
One course from:

- THR 351 - Dramatic Theory and Criticism Credits: 3 (May fulfill concentration requirement or dramatic literature requirement but not both)
- THR 484 - Translation & Adaptation for Stage & Screen Credits: 3

▲ Concentration in Theater Education for Theater Arts PK-12 (THEA)

Designed for students interested in pursuing theater education. In addition to transcript review and the submission of an essay detailing goals for the concentration, students must:

- Have earned 45 to 60 credits.
- Submit scores for the Praxis Core (Reading, Writing, and Mathematics) tests to the committee. (It is strongly recommended that students take the Praxis Core tests as soon as ENGH 302, a course in literature, and a course in mathematics have been completed.)
- Maintain an overall GPA of 2.80 in all course work completed at Mason and in course work at all institutions of higher learning combined.
- Earn no grade lower than a C in theater and professional education courses needed for graduation.

Upon fulfilling THR 448, THR 449, THR 450, EDRD 300, EDUC 301, and EDUC 302 students must complete 15 weeks of a full-time student teaching internship (THR 455). Applications for placement, subject to approval of the unit, are submitted to the Field Placement Specialist in the College of Education and Human Development at the beginning of the previous semester. In addition, students must pass the VCLA before student teaching.

Synthesis is fulfilled by THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or THR 496 - Text in Production Credits: 3.

Required Core Courses:

Required Courses:

- THR 448 - Foundations of Theater Education Credits: 3 or EDUC 422 - Foundations of Secondary Education Credits: 3
- EDRD 300 - Literacy and Curriculum Integration Credits: 3
- EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural Credits: 3
- EDUC 302 - Human Growth and Development Credits: 3
- THR 455 - Theater Education Internship Credits: 6-12 (must be taken for 6 credits)

Electives (0-16 credits)

Total: 120 credits

Bachelor of Fine Arts

Musical Theater, BFA (pending SCHEV approval)
Banner Code: AR-BFA-MTHR

Note: As of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted. Check the college/school website for current program status. Web: theater.gmu.edu

College: College of Visual and Performing Arts
Department: School of Theater

The BFA in Musical Theater requires 126 credits and students must earn a minimum 2.50 cumulative GPA to complete the degree.

Degree Requirements

Mason Core (40 credits)

Foundation Requirements

- Oral communication Credits: 3
- Information technology Credits: 3
- Quantitative reasoning Credits: 3
- ENGH 101 Composition Credits: 3
- ENGH 302 Advanced Composition Credits: 3

Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 for ENGH 101. Students must attain a minimum grade of C in ENGH 100 or 101, as well as in 302, to fulfill degree requirements.

Core Requirements

- Literature Credits: 3
- Arts (see below) Credits: 3
- Natural science (including one laboratory science) Credits: 7
- Western civilization Credits: 3
- Global understanding Credits: 3
- Social and behavioral sciences Credits: 3
- Synthesis requirement: THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or THR 496 - Text in Production Credits: 3 or MUSI 490 - RS: Musical Communication in Context Credits: 3

Mason Core Arts Requirement

Choose one of the following:

- DANC 125 - Modern/Contemporary Dance I Credits: 3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 145 - Ballet I Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 225 - Modern/Contemporary Dance II Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 245 - Ballet II Credits: 3
- DANC 331 - Advanced Jazz Dance Credits: 3 (only if repeated)

**Major (86 credits)**

- DANC 331 - Advanced Jazz Dance Credits: 3
- MUSI 113 - Aural Skills I Credits: 1
- MUSI 114 - Aural Skills II Credits: 1-2 (must be taken for 1 credit)
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 221 - Applied Music I Credits: 1 (must be taken for 4 credits)
- MUSI 243 - Applied Music in Voice Credits: 2 (must be taken for a total of 10 credits)
- MUSI 438 - Music History in Society B Credits: 3 or MUSI 439 - Music History in Society C Credits: 3
- MUSI 100-499 Credits: 3
- THR 150 - Greeks to Restoration Credits: 3 or THR 151 - Romanticism to Present Credits: 3
- THR 210 - Acting I Credits: 3
- THR 230 - Fundamentals of Production Credits: 3
- THR 300 - Voice and Speech Credits: 3
- THR 301 - Advanced Study in Voice Credits: 3
- THR 303 - Movement for Actors Credits: 3
- THR 306 - Movement in Musical Theater Credits: 3
- THR 310 - Acting II Credits: 3
- THR 329 - Directing Credits: 3
- THR 350 - Script Analysis Credits: 3
- THR 365 - Characterization Credits: 3 or THR 421 - One-Person Show Credits: 3
- THR 427 - Musical Theater Workshop Credits: 3 (must be taken for a total of 6 credits)
- THR 428 - Musical Theater Ensemble Credits: 3

**MUSI Ensemble**

Must be advisor approved and taken for a total of 5 credits

- MUSI 380 - Wind Symphony Credits: 1
- MUSI 381 - University Chorale Credits: 1
- MUSI 382 - Piano Ensemble Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 384 - Symphonic Chorus Credits: 1
- MUSI 385 - Chamber Singers Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1
- MUSI 485 - Chamber Ensembles Credits: 1

**One upper-level movement course (3 credits)**
• DANC 331 - Advanced Jazz Dance Credits: 3
• THR 304 - Advanced Movement for Actors Credits: 3
• THR 305 - Unarmed Stage Combat Credits: 3
• THR 405 - Advanced Stage Combat Credits: 3

One upper-level dramatic literature course (3 credits)

• THR 351 - Dramatic Theory and Criticism Credits: 3
• THR 352 - Dramatic Literature Seminar Credits: 3
• THR 355 - Moral Vision in American Theater Credits: 3
• THR 359 - World Stages Credits: 3 (may fulfill global understanding or upper level dramatic literature requirement but not both)
• THR 395 - Theater as the Life of the Mind Credits: 3

Total: 126 credits

Theater, BFA

Graduate Certificate

Teaching Theatre PK-12 Graduate Certificate

Banner Code: AR-CERG-THRP
Web: theater.gmu.edu

College: College of Visual and Performing Arts
Department: School of Theater

The School of Theater offers a graduate certificate program for Teaching Theatre PK-12. To apply to the program, candidates must meet the following prerequisites:

Completed a major in theater or 33 semester hours distributed among the following areas:

- Directing: 6 semester hours
- Technical theater: 9 semester hours
- Cultural context and theater history: 3 semester hours
- Performance: 6 semester hours
- Dramatic literature: 9 semester hours

Students who have completed ALL endorsements, including Praxis Core, are eligible for enrollment into the Graduate Certificate Program for Teaching Theatre PK-12. This certificate can be earned on a full time or part time basis. All Virginia requirements must be met to achieve licensure.

Students must earn a B- or higher in all coursework.

Licensure Program Requirements

- THR 548 - Advanced Foundations of Theater Education Credits: 3
- EDRD 501 - Literacy and Curriculum Integration, PK-12 Credits: 3
- EDUC 539 - Human Development and Learning PK-12 Credits: 3
- THR 549 - Advanced Elementary Theater Ed Credits: 3
- THR 550 - Advanced Secondary Education Credits: 3
- 6 credits of THR 555 - Theater Education Internship Credits: 4-12 (prior to internship, must pass: VCLA, technology & child abuse standards)

Total: 21 credits
Non-Degree

Theater Minor

Banner Code: THR
Web: theater.gmu.edu

College: College of Visual and Performing Arts
Department: School of Theater

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of 2.00 earned in all courses applied to the minor. See AP.5 Undergraduate Policies for more information.

Minor Requirements

- THR 230 - Fundamentals of Production Credits: 3
- THR 310 - Acting II Credits: 3 or THR 339 - Principles of Design Credits: 3
- THR 350 - Script Analysis Credits: 3
- THR 150 - Greeks to Restoration Credits: 3 or THR 151 - Romanticism to Present Credits: 3 or THR 380 - Playwriting I Credits: 3
- 6 credits chosen from THR 100-499

Total: 18 credits

Undergraduate Certificate

Musical Theater Undergraduate Certificate: Theater

Banner Code: AR-CERB-MTHR
Web: theater.gmu.edu

College: College of Visual and Performing Arts
Department: School of Theater

Students pursuing a certificate in Musical Theater must satisfy all requirements for a BA or BFA in the School of Theater with a concentration in performance. Students fulfilling Musical Theater Undergraduate Certificate: Music must satisfy all requirements for a BA or BM in the School of Music.

Auditions are required for admission into the Musical Theater Undergraduate Certificate: Theater.

Some credits required for this certificate may simultaneously fulfill learning requirements of the certificate in Musical Theater and Mason Core requirements. Some courses require placement. Depending on electives and other learning experiences, this certificate requires up to 30 credits beyond the requirements to complete a major in the School of Theater. A minimum of 15 credits must be unique to the certificate and may not count toward the major, concentration, minor, another certificate or Mason Core requirements. At least 15 credits of the certificate must be earned at Mason. Students receiving the certificate must hold a
baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. Students with a previous bachelor's degree, who are admitted to this certificate alone, have four years to complete the certificate requirements.

This program of study is coordinated between units within the College of Visual and Performing Arts. Students will register for courses listed below. Only courses with a grade of C or better are counted toward the certificate.

This certificate may be completed under a part or full time basis. See Academic Policies for more information.

Certificate Requirements

Musical Theater Dance Courses (12 credits)

Courses in DANC are selected from the following courses open to all non-dance majors. Courses may not be repeated in the certificate. At least 6 credits must be 200 level or above.

- DANC 125 - Modern/Contemporary Dance I Credits: 3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 145 - Ballet I Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 225 - Modern/Contemporary Dance II Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 245 - Ballet II Credits: 3
- DANC 331 - Advanced Jazz Dance Credits: 3

▲Concentration for Theater Students (THRS) (18 credits)

- MUSI 113 - Aural Skills I Credits: 1
- MUSI 114 - Aural Skills II Credits: 1-2 (must be taken for 1 credit)
- MUSI 115 - Theory I Credits: 3
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 243 - Applied Music in Voice Credits: 2 (must be taken for a total of 6 credits)
- MUSI 301 - Music in Motion Pictures Credits: 3
- MUSI 381 - University Chorale Credits: 1 or MUSI 385 - Chamber Singers Credit: 1
- MUSI 485 - Chamber Ensembles Credits: 1 (must be taken for a total of 2 credits)

Total: 30 credits

Other Degrees

Audio Production Minor
Those students interested in exploring audio production in a purely music-based experience should consider the minor in Music Technology music.gmu.edu.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of 2.00 earned in all courses applied to the minor. See AP.5 Undergraduate Policies for more information.

Minor Requirements

Required Courses (6 credits):

- MUSI 254 - Music and Technology Credits: 3
- THR 315 - Sound Engineering Credits: 3

12 credits chosen from the following:

- AVT 374 - Sound Art I Credits: 3
- FAVS 333 - Sound Editing and Recording Credits: 3
- GAME 250 - Music for Film and Video Credits: 3
- MUSI 354 - Electronic Composition Credits: 3
- MUSI 355 - Recording Techniques Credits: 3
- THR 313 - Event Technology Credits: 3
- THR 337 - Sound Design Credits: 3
- THR 415 - Advanced Sound Engineering Credits: 3

Total: 18 credits

Event Technical Production Minor (CVPA)

Minor Requirements
Required Courses (9 credits):

- THR 230 - Fundamentals of Production Credits: 3
- THR 313 - Event Technology Credits: 3 or TOUR 313 - Event Technology Credits: 3
- TOUR 220 - Introduction to Event Management Credits: 3

6 credits chosen from the following:

- THR 235 - Costume Crafts Credits: 3
- THR 314 - Lighting Stagecraft Credits: 3
- THR 315 - Sound Engineering Credits: 3
- THR 333 - Stage Design Credits: 3
- TOUR 190 - Wedding Planning Credits: 3
- TOUR 221 - Event Implementation and Evaluation Credits: 3
- TOUR 480 - Special Topics Credits: 1-3

Total: 15 credits
Music Ensemble Options

- MUSI 380 - Wind Symphony Credits: 1
- MUSI 381 - University Chorale Credits: 1
- MUSI 382 - Piano Ensemble Credits: 1
- MUSI 383 - Symphonic Band Credits: 1
- MUSI 384 - Symphonic Chorus Credits: 1
- MUSI 385 - Chamber Singers Credits: 1
- MUSI 387 - Symphony Orchestra Credits: 1
- MUSI 389 - Jazz Ensemble Credits: 1
- MUSI 485 - Chamber Ensembles Credits: 1
Applied Music Options

See Music advisor for registration permission and options.

The mission of the School of Business is to prepare a diverse student body to succeed in a global business environment. Through the faculty's creation and dissemination of business knowledge, practice, and pedagogy, we enable our students to develop analytical and communication skills and to practice ethical business behavior. Business leaders and organizations are actively involved with the School of Business through executive education programs, speaker engagements, classroom lectures, case competitions, internships, and career placement. The School of Business also maintains close connections to the business community through its advisory board and advisory councils to academic programs. 221 business leaders representing 168 different companies serve as advisory board (including Friends of the Alumni Chapter Board) or council members. The School of Business enrolls more than 3,500 undergraduate students and more than 350 graduate students in its programs. The School of Business's programs offer students a variety of opportunities to enhance their professional endeavors.

- Our innovative curriculum meets the demands of the marketplace, focused on business fundamentals, strategic thinking and teamwork.
- Our distinguished faculty are cross-disciplinary collaborators and innovative practitioners that are passionate about education. They bring both theoretical and applied expertise to the classroom.
- Our outstanding career management professionals are dedicated to providing tailored support to promote our students' professional advancement and leverage their degree over the short- and long-term.
- Our diverse student population offers unique opportunities to network and learn from your fellow classmates. Students at Mason represent over 130 different countries and all 50 states.

Courses and Programs

The School of Business offers all courses designated ACCT, BMGT, BULE, BUS, EMBA, FNAN, GBUS, MBA, MGMT, MIS, MKTG, MSEC, MSIS, MBUS, OM, REAL, SOM, and TECM in the Courses section of this catalog.

Undergraduate

The programs in business education culminate in a BS degree with a major from one of five areas: accounting, finance, information systems and operations management, management, or marketing.

Graduate

The School of Business offers an MBA, Executive MBA, and MS degrees in Accounting, Management, Real Estate Development, Technology Management, and Management of Secure Information Systems.

Centers

The School of Business houses four centers. The Center for Innovation and Entrepreneurship provides experiential learning through academic programs as well as hands-on programs for Mason students interested in innovation, invention, early stage startups, and entrepreneurship. The Center for Real Estate Entrepreneurship focuses on real estate research and education in real estate development and finance. The Investor Protection & Corporate Fraud Research Center strives to provide thought leadership on investor protection and fraud risk by sponsoring, conducting, and disseminating research in these areas. The Center for Infrastructure Protection & Homeland Security conducts research, develops projects, and provides expert analysis and insight into policy across a variety of infrastructure sectors and related fields, including energy, transportation, cybersecurity, defense and finance.

Academic Policies

Students should become familiar with the university’s general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Any course attempted elsewhere must take place more than 50 miles from the George Mason University Fairfax campus.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).
For additional information, see the George Mason University Permission to Study Elsewhere Policy in the Academic Policies section of this catalog.

**University Consortium**

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean's office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

**Undergraduate Course Overload Policy**

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Appeals Process**

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, please contact the Office of Academic and Career Services, Room 008 of Enterprise Hall (703-993-1880) or visit business.gmu.edu.

**Bachelor of Science**

**Accounting, BS**

**Banner Code:** BU-BS-ACCT  
**Phone:** 703-993-1880  
**Web:** http://business.gmu.edu

School/Department: School of Business The BS in accounting (ACCT) prepares students for professional careers in the private and public sectors. The accounting major is designed to produce accounting professionals who can both generate and apply financial information to solve business problems. Our students learn principles of business and accounting as well as the specific skills and specialized technical knowledge necessary for success in the dynamic field of accounting. Our program emphasizes ethics, critical thinking, written and verbal communication, and effective use and understanding of technology. Our graduates are employed by the assurance, tax advisory, and consulting groups of the top accounting firms as well as Fortune 100 companies.
Our proximity to the nation’s capitol provides unique opportunities for our graduates to work in government and in the federal practices of public accounting firms. The accounting degree program is separately accredited by AACSB International.

Students interested in CPA certification can apply to the MSA degree to meet the 150 hour requirement for CPA certification in most states. The MSA offers a graduate degree in accounting that allows students to meet the 150 hour requirement for CPA certification in most states in only nine months.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Accounting, BS/Accounting, Accelerated MS for specific requirements.

Degree Requirements

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as either BUS 492 or ACCT 492. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Mason Core Requirements (26 credits)

School of Business students must complete the Mason Core requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Foundation Requirements (9 credits)

- Written Communication Credits: 6
- Oral Communication Credits: 3

Core Requirements (17 credits)

- Arts Credits: 3
- Literature Credits: 3
• Natural Science Credits: 8
  (School of Business students required to complete 8 credits of natural science by completing two 4-credit laboratory sciences.)
• Western Civilization/Western History Credits: 3

Note:

Remaining Mason Core requirements are fulfilled with major course work.

Business Foundations (27-28 credits)

• ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting Credits: 3
• BUS 100 - Business and Society Credits: 3 (Satisfies Mason Core Social and Behavioral Sciences requirement.)
• BUS 103 - Develop Professional Skills I: Foundational Elements Credits: 3
• BUS 200 - Global Environment of Business Credits: 3 (Satisfies Mason Core Global Understanding requirement.)
• BUS 210 - Business Analytics I Credits: 3
• BUS 310 - Business Analytics II Credits: 3
• ECON 103 - Contemporary Microeconomic Principles Credits: 3
• ECON 104 - Contemporary Macroeconomic Principles Credits: 3
  And select one of the following*:
• MATH 108 - Introductory Calculus with Business Applications Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• HNRT 225 - Applied Calculus Credits: 3

*MATH 108 or MATH 113 satisfies the Mason Core quantitative reasoning requirement.

Business Core (24 Credits)

A grade of C or higher is required in each of the School of Business core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 or ACCT 330, BULE 303, BUS 303, FNAN 303, MGMT 303, MIS 303, MKTG 303 and OM 303. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see the “Termination from the Major” section under Academic Policies.

• ACCT 330 - Financial Accounting I Credits: 3
• BULE 303 - Legal Environment of Business Credits: 3
• BUS 303 - Develop Professional Skills II: Advanced Elements Credits: 3
• FNAN 303 - Financial Management Credits: 3
• MGMT 303 - Principles of Management Credits: 3
• MIS 303 - Introduction to Business Information Systems Credits: 3 (Satisfies Mason Core Information Technology requirement.)
• MKTG 303 - Principles of Marketing Credits: 3
• OM 303 - Operations Management Credits: 3

General Electives (18-19 credits)
General electives may be selected from any University or School of Business course, except courses designated for the Business minor (MBUS). Credits awarded as Associate Degree Elective Credit (ADEC) as part of a student's transfer evaluation are also excluded from general electives.

Major Requirements in Accounting (21 credits)

Required Courses (18 Credits)

A grade of C or higher is required in each of the upper-level accounting major courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following required Accounting courses: ACCT 311, ACCT 331, ACCT 332, ACCT 351, ACCT 361, and ACCT 461. Those who do not successfully complete these required courses within three attempts will not be eligible to receive a degree in Accounting from the School of Business. Students terminated from the BS Accounting program are prohibited from enrolling in any Accounting course.

- ACCT 311 - Managerial and Cost Accounting Credits: 3
- ACCT 331 - Financial Accounting II Credits: 3
- ACCT 332 - Financial Accounting III Credits: 3
- ACCT 351 - Taxation and Managerial Decision Making Credits: 3
- ACCT 361 - Accounting Information Systems Credits: 3
- ACCT 461 - Assurance and Audit Services Credits: 3 (Satisfies the Mason Core writing intensive requirement.)

Electives (3 credits)

Students who anticipate taking the CPA, CMA, CIA, or other professional exam should consult the applicable regulations and meet with their advisor. State regulations regarding professional examinations may dictate course selections.

- ACCT 370 - Accounting in a Global Economy Credits: 3
- ACCT 372 - Financial Statement Analysis Credits: 3
- ACCT 411 - Advanced Managerial Accounting Credits: 3
- ACCT 433 - Advanced Financial Accounting Credits: 3
- ACCT 451 - Advanced Federal Taxation Credits: 3
- ACCT 462 - Honors Seminar in Accounting Credits: 3
- ACCT 472 - Government and Not-for-Profit Accounting Credits: 3
- ACCT 491 - Seminar in Accounting Credits: 3
- ACCT 492 - Internship in Accounting Credits: 3
- ACCT 499 - Independent Study Credits: 1-3
- BULE 402 - Commercial Law Credits: 3
- ACCT 611 - Advanced Managerial Accounting Credits: 3 *
- ACCT 630 - Advanced Financial Accounting Credits: 3 *
- ACCT 633 - Identifying and Resolving Advanced Issues in Financial Accounting Credits: 3 *
- ACCT 636 - Fraud Examination Credits: 3 *
- ACCT 651 - Identifying and Resolving Advanced Issues in Taxation Credits: 3 *
- ACCT 672 - Governmental and Nonprofit Accounting Credits: 3 *
- ACCT 690 - Professional Accounting Colloquium Credits: 3 *
- ACCT 696 - Directed Studies in Accounting Credits: 1-3 *
- ACCT 697 - Special Topics in Accounting Credits: 1-3 *
* Students in the MSAccel program and select high performing undergraduates may take graduate courses for undergraduate credit. Enrollment in a graduate level course in not guaranteed. Please contact an academic advisor for additional information.

Capstone (3 credits)

Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498.

- BUS 498 - Capstone Course: Advanced Business Models Credits: 3 (Satisfies Mason Core Synthesis/Capstone requirement.)

Total: 120 credits

Second Majors in Accounting

Students declaring a second major in Accounting must complete the 18 required courses for the major in addition to ACCT 330. Students must complete ACCT 330, ACCT 311, ACCT 331, ACCT 332, ACCT 351, ACCT 361 and ACCT 461.

Honors in Accounting

The School of Business Accounting Honors Program provides highly motivated students majoring in accounting with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

Admission Requirements

- Minimum 3.0 cumulative GPA and 3.5 GPA in ACCT major.
- Two academic/professional references.
- Once admitted to the program, students with a cumulative GPA below 3.0 will be dropped from the program.

Curricular Requirements

- ACCT 330 with an A- or better.
- A grade of B or better in Business Core curriculum courses: BULE 303, BUS 303, FNAN 303, MGMT 303, MIS 303, MKTG 303, OM 303.
- Honors students must graduate with a 3.0 cumulative GPA and 3.5 GPA in the major.

Co-Curricular Requirements

The student must complete ONE of the following in addition to the curriculum requirements:

- ACCT 462 or a 600-level ACCT course.
- Study abroad (e.g., Aachen Dual Degree, Oxford Honors, China, South America).
- Internship (ACCT 492) Internships where no credit is earned also qualify.
- Significant work experience (e.g., an experience that is comparable to an internship).
• Research paper/Thesis as an independent study (ACCT 499) course. (e.g., faculty research, Mason undergraduate apprentice program, QEP).

Extra-Curricular Requirements

• Attendance at Honors Events, as determined by the Honors Program Director.
• The student must show a high degree of engagement in a School of Business student organization, preferably in a leadership role.

Requirements for students to obtain the honors designation:

• Honors students must meet all curricular, co-curricular, and extracurricular requirements mentioned above at graduation.

Finance, BS

Banner Code: BU-BS-FNAN
Phone: 703-993-1880
Web: business.gmu.edu

School/Department: School of Business The BS in finance (FNAN) prepares students for professional careers by providing a solid foundation in the financial principles necessary to make operating decisions for an organization and in financial market analysis.

Degree Requirements

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

• A minimum of 45 credits at the 300- or 400-level.
• A minimum of 30 credits of School of Business core and major courses at Mason.
• At least 9 credits required for the specific major and BUS 498 taken at Mason.
• A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as either BUS 492 or ACCT 492. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Mason Core Requirements (26 credits)
School of Business students must complete the Mason Core requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Foundation Requirements (9 credits)

- Written Communication Credits: 6
- Oral Communication Credits: 3

Core Requirements (17 credits)

- Arts Credits: 3
- Literature Credits: 3
- Natural Science Credits: 8
  (School of Business students required to complete 8 credits of natural science by completing two 4-credit laboratory sciences.)
- Western Civilization/Western History Credits: 3

Note:

Remaining Mason Core requirements are fulfilled with major course work.

Business Foundations (27-28 credits)

- ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting Credits: 3
- BUS 100 - Business and Society Credits: 3 (Satisfies Mason Core Social and Behavioral Sciences requirement.)
- BUS 103 - Develop Professional Skills I: Foundational Elements Credits: 3
- BUS 200 - Global Environment of Business Credits: 3 (Satisfies Mason Core Global Understanding requirement.)
- BUS 210 - Business Analytics I Credits: 3
- BUS 310 - Business Analytics II Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3
  And select one of the following*:
  - MATH 108 - Introductory Calculus with Business Applications Credits: 3
  - MATH 113 - Analytic Geometry and Calculus I Credits: 4
  - MATH 114 - Analytic Geometry and Calculus II Credits: 4
  - HNRT 225 - Applied Calculus Credits: 3

*MATH 108 or MATH 113 satisfies the Mason Core quantitative reasoning requirement.

Business Core (24 Credits)

A grade of C or higher is required in each of the School of Business core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 or ACCT 330, BULE 303, BUS 303, FNAN 303, MGMT 303, MIS 303, MKTG 303 and OM 303. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of...
Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see the "Termination from the Major" section under Academic Policies.

- ACCT 330 - Financial Accounting I Credits: 3
- BULE 303 - Legal Environment of Business Credits: 3
- BUS 303 - Develop Professional Skills II: Advanced Elements Credits: 3
- FNAN 303 - Financial Management Credits: 3
- MGMT 303 - Principles of Management Credits: 3
- MIS 303 - Introduction to Business Information Systems Credits: 3 (Satisfies Mason Core Information Technology requirement.)
- MKTG 303 - Principles of Marketing Credits: 3
- OM 303 - Operations Management Credits: 3

General Electives (18-19 credits)

General electives may be selected from any University or School of Business course, except courses designated for the Business minor (MBUS). Credits awarded as Associate Degree Elective Credit (ADEC) as part of a student's transfer evaluation are also excluded from general electives.

Major Requirements in Finance (21 Credits)

Required Courses (9 credits):

Note: completion of FNAN 303 with a grade of B- or higher is a required prerequisite for FNAN 311, 321, 331, and 401.

- FNAN 311 - Principles of Investment Credits: 3
- FNAN 321 - Financial Institutions Credits: 3
- FNAN 341 - Introduction to Firm Valuation Credits: 3
- FNAN 401 - Advanced Financial Management Credits: 3

Required Course (3 credits):

- FNAN 498 - Contemporary Topics in Finance Credits: 3 (Satisfies the Mason Core writing intensive requirement.)

Electives (9 credits):

Students may select any courses from the following list to fulfill the elective requirement as well as any other 300-400 level FNAN courses (except FNAN 300 & FNAN 301 & FNAN 303).

- FNAN 311 - Principles of Investment Credits: 3 (If not taken as a required course.)
- FNAN 321 - Financial Institutions Credits: 3 (If not taken as a required course.)
- FNAN 341 - Introduction to Firm Valuation Credits: 3 (If not taken as a required course.)
- FNAN 351 - Principles of Real Estate Credits: 3
- FNAN 401 - Advanced Financial Management Credits: 3 (If not taken as a required course.)
- FNAN 411 - Investment Analysis and Portfolio Management Credits: 3
- FNAN 412 - Futures and Options Markets Credits: 3
- FNAN 421 - Money and Capital Markets Credits: 3
- FNAN 430 - Empirical Methods in Finance Credits: 3
- FNAN 431 - Venture Capital and Private Financing of Startups Credits: 3
- FNAN 432 - Fixed-Income Securities Credits: 3
- FNAN 436 - Probability Methods for Finance Credits: 3
- FNAN 440 - International Financial Management Credits: 3
- FNAN 451 - Real Estate Finance Credits: 3
- FNAN 454 - Real Estate Development Credits: 3
- FNAN 462 - Honors Seminar in Finance Credits: 3
- FNAN 491 - Special Topics in Finance Credits: 3
- FNAN 499 - Independent Study Credits: 1-3
- BUS 492 - Undergraduate Internship Credits: 3

**Capstone (3 credits)**

Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498.

- BUS 498 - Capstone Course: Advanced Business Models Credits: 3 (Satisfies Mason Core Synthesis/Capstone requirement.)

**Total: 120 credits**

**Second Majors in Finance**

Students declaring a second major in Finance must complete the four required courses and two elective courses for the major.

**Information Systems and Operations Management, BS**

**Banner Code:** BU-BS-ISOM  
Phone: 703-993-1880  
Web: business.gmu.edu

School/Department: School of Business The BS in information systems and operations management (ISOM) prepares students for a range of career options by instilling skills that add value to organizations. Graduates will apply their knowledge of technology and business functions to design and improve existing operational and core business processes. They will integrate different business functions into seamless IT-enabled processes and collaborate with business users in defining requirements, identifying new IT-driven business opportunities, building prototypes to validate operations, and managing complex technology projects. The content of the ISOM major is at the intersection of technology, processes, and people.

**Degree Requirements**

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
• At least 9 credits required for the specific major and BUS 498 taken at Mason.
• A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered with the School of Business as either BUS 492 or ACCT 492. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Mason Core Requirements (26 credits)

School of Business students must complete the Mason Core requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Foundation Requirements (9 credits)

• Written Communication Credits: 6
• Oral Communication Credits: 3

Core Requirements (17 credits)

• Arts Credits: 3
• Literature Credits: 3
• Natural Science Credits: 8
  (School of Business students required to complete 8 credits of natural science by completing two 4-credit laboratory sciences.)
• Western Civilization/Western History Credits: 3

Note:

Remaining Mason Core requirements are fulfilled with major course work.

Business Foundations (27-28 credits)

• ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting Credits: 3
• BUS 100 - Business and Society Credits: 3 (Satisfies Mason Core Social and Behavioral Sciences requirement.)
• BUS 103 - Develop Professional Skills I: Foundational Elements Credits: 3
• BUS 200 - Global Environment of Business Credits: 3 (Satisfies Mason Core Global Understanding requirement.)
• BUS 210 - Business Analytics I Credits: 3
• BUS 310 - Business Analytics II Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3
And select one of the following*:
- MATH 108 - Introductory Calculus with Business Applications Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- HNRT 225 - Applied Calculus Credits: 3

(*MATH 108 or MATH 113 satisfies the Mason Core quantitative reasoning requirement.)

Business Core (24 credits)

A grade of C or higher is required in each of the School of Business core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 or ACCT 330, BULE 303, BUS 303, FNAN 303, MGMT 303, MIS 303, MKTG 303 and OM 303. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see the "Termination from the Major" section under Academic Policies.

- ACCT 303 - Accounting for Decision Making Credits: 3 or ACCT 330 - Financial Accounting I Credits: 3
- BULE 303 - Legal Environment of Business Credits: 3
- BUS 303 - Develop Professional Skills II: Advanced Elements Credits: 3
- FNAN 303 - Financial Management Credits: 3
- MGMT 303 - Principles of Management Credits: 3
- MIS 303 - Introduction to Business Information Systems Credits: 3 (Satisfies Mason Core Information Technology requirement.)
- MKTG 303 - Principles of Marketing Credits: 3
- OM 303 - Operations Management Credits: 3

General Electives (18-19 credits)

General electives may be selected from any University or School of Business course, except courses designated for the Business minor (MBUS). Credits awarded as Associate Degree Elective Credit (ADEC) as part of a student's transfer evaluation are also excluded from general electives.

Major Requirements in Information Systems and Operations Management (21 Credits)

It is strongly recommended that students planning to major in ISOM take MIS 302 as part of their program.

Required Courses (9 credits):

- MIS 310 - Database Management Systems Credits: 3
- MIS 330 - Systems Analysis and Design Credits: 3 (Satisfies the Mason Core writing intensive requirement.)
- OM 493 - Management of Technology Projects Credits: 3
Elective Courses (12 credits):

Students may select any courses from the following list to fulfill the elective requirement as well as any other 300-400 level MIS or OM courses (except MIS 301 or MIS 303 or OM 301 or OM 303).

- MIS 302 - Introduction to Programming for Business Applications Credits: 3
- MIS 320 - Networks and Security Credits: 3
- MIS 411 - Management and Control of Information Systems Credits: 3
- MIS 412 - E-Business Systems Development Credits: 3
- MIS 430 - Data Warehousing Credits: 3
- MIS 431 - Data Mining for Business Applications Credits: 3
- MIS 435 - Knowledge Management Credits: 3
- MIS 440 - E-Commerce Business Models and Applications Credits: 3
- MIS 462 - Honors Seminar in Management Information Systems (Topic Varies) Credits: 3
- MIS 491 - Seminar in Management Information Systems Credits: 3
- MIS 499 - Independent Study in Management Information Systems Credits: 1-3
- OM 320 - Supply Chain Management in a Global Economy Credits: 3
- OM 352 - Management Science Credits: 3
- OM 435 - Business Process Analysis and Simulation Credits: 3
- OM 452 - Business Forecasting Credits: 3
- OM 456 - Quality Management Credits: 3
- OM 462 - Honors Seminar in Operations Management (Topic Varies) Credits: 3
- OM 491 - Seminar in Operations Management Credits: 3
- OM 499 - Independent Study in Operations Management Credits: 1-3
- BUS 492 - Undergraduate Internship Credits: 3

Optional Concentrations:

Students have considerable flexibility in their choice of electives and may choose from two concentrations of study: one in Operations and Supply Chain Management (OSCM) and the other in Management Information Systems (MIS). Students are strongly urged to discuss their choice of electives and programs of study with their academic advisor and an ISOM faculty member. Concentrations must be declared prior to a student filing an intent to graduate.

▲ Concentration in Operations and Supply Chain Management (OSCM):

If a student has taken any four of the following seven electives, beyond the ISOM required courses, he/she can declare an OSCM concentration.

- OM 320 - Supply Chain Management in a Global Economy Credits: 3
- OM 352 - Management Science Credits: 3
- OM 435 - Business Process Analysis and Simulation Credits: 3
- OM 452 - Business Forecasting Credits: 3
- OM 456 - Quality Management Credits: 3
- OM 462 - Honors Seminar in Operations Management (Topic Varies) Credits: 3
- OM 499 - Independent Study in Operations Management Credits: 1-3

▲ Concentration in Management Information Systems (MIS):
If a student has taken any four of the following eight electives, beyond the ISOM required courses, he/she can declare an MIS concentration.

- MIS 302 - Introduction to Programming for Business Applications Credits: 3
- MIS 320 - Networks and Security Credits: 3
- MIS 411 - Management and Control of Information Systems Credits: 3
- MIS 412 - E-Business Systems Development Credits: 3
- MIS 430 - Data Warehousing Credits: 3
- MIS 440 - E-Commerce Business Models and Applications Credits: 3
- MIS 462 - Honors Seminar in Management Information Systems (Topic Varies) Credits: 3
- MIS 491 - Seminar in Management Information Systems Credits: 3

**Capstone (3 credits)**

Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498.

- BUS 498 - Capstone Course: Advanced Business Models Credits: 3 (Satisfies Mason Core Synthesis/Capstone requirement.)

**Total hours: 120**

**Second Majors in Information Systems and Operations Management**

Students declaring a second major in Information Systems and Operations Management must complete the three required courses and three elective courses for the major.

**Honors in Information Systems and Operations Management**

The School of Business Information Systems and Operations Management Honors Program provides highly motivated students majoring in ISOM with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

**Admission Requirements**

- Minimum 3.0 cumulative GPA and 3.5 GPA in the ISOM major.
- Two academic/professional references.
- Once admitted to the program, students with a cumulative GPA below 3.0 will be dropped from the program.

**Curricular Requirements:**

- MIS 303 earning a grade of A- or better.
- OM 303 earning a grade of A- or better.
- A grade of B or better in Business Core curriculum courses: ACCT 303 or ACCT 330, BULE 303, BUS 303, FNAN 303, MGMT 303, and MKTG 303.
• One of the two ISOM Honors seminars: MIS 462 or OM 462.

Extra-Curricular Requirements:

• The student must show a high degree of engagement in MISOMA or another School of Business student organization, preferably in a leadership role.

Requirements for students to obtain the honors designation:

• Honors students must graduate with a minimum 3.0 cumulative GPA and 3.5 GPA in the major.
• Honors students must meet all curricular and extra-curricular requirements mentioned above at graduation.

Management, BS

Banner Code: BU-BS-MGMT
Phone: 703-993-1880
Web: business.gmu.edu

School/Department: School of Business The BS in management (MGMT) prepares students to take leadership, management, and entrepreneurial roles in the public and private sectors. Students learn such skills as strategic thinking, motivating and managing nationally and internationally diverse workforces, building and leading team efforts, negotiating successfully, and instituting planned change in organizations.

Degree Requirements

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

• A minimum of 45 credits at the 300- or 400-level.
• A minimum of 30 credits of School of Business core and major courses at Mason.
• At least 9 credits required for the specific major and BUS 498 taken at Mason.
• A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as either BUS 492 or ACCT 492. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Mason Core Requirements (26 credits)

School of Business students must complete the Mason Core requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason
Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

**Foundation Requirements (9 credits)**

- Written Communication Credits: 6
- Oral Communication Credits: 3

**Core Requirements (17 credits)**

- Arts Credits: 3
- Literature Credits: 3
- Natural Science Credits: 8
  (School of Business students required to complete 8 credits of natural science by completing two 4-credit laboratory sciences.)
- Western Civilization/Western History Credits: 3

**Note:**

Remaining Mason Core requirements are fulfilled with major course work.

**Business Foundations (27-28 credits)**

- ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting Credits: 3
- BUS 100 - Business and Society Credits: 3 (Satisfies Mason Core Social and Behavioral Sciences requirement.)
- BUS 103 - Develop Professional Skills I: Foundational Elements Credits: 3
- BUS 200 - Global Environment of Business Credits: 3 (Satisfies Mason Core Global Understanding requirement.)
- BUS 210 - Business Analytics I Credits: 3
- BUS 310 - Business Analytics II Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3
  And select one of the following*:
  - MATH 108 - Introductory Calculus with Business Applications Credits: 3
  - MATH 113 - Analytic Geometry and Calculus I Credits: 4
  - MATH 114 - Analytic Geometry and Calculus II Credits: 4
  - HNRT 225 - Applied Calculus Credits: 3

  (*MATH 108 or MATH 113 satisfies the Mason Core quantitative reasoning requirement.)

**Business Core (24 credits)**

A grade of C or higher is required in each of the School of Business core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 or ACCT 330, BULE 303, BUS 303, FNAN 303, MGMT 303, MIS 303, MKTG 303 and OM 303. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see the "Termination from the Major" section under Academic Policies.
• ACCT 303 - Accounting for Decision Making Credits: 3 or ACCT 330 - Financial Accounting I Credits: 3
• BULE 303 - Legal Environment of Business Credits: 3
• BUS 303 - Develop Professional Skills II: Advanced Elements Credits: 3
• FNAN 303 - Financial Management Credits: 3
• MGMT 303 - Principles of Management Credits: 3
• MIS 303 - Introduction to Business Information Systems Credits: 3 (Satisfies Mason Core Information Technology requirement.)
• MKTG 303 - Principles of Marketing Credits: 3
• OM 303 - Operations Management Credits: 3

General Electives (18-19 credits)

General electives may be selected from any University or School of Business course, except courses designated for the Business minor (MBUS). Credits awarded as Associate Degree Elective Credit (ADEC) as part of a student's transfer evaluation are also excluded from general electives.

Major Requirements in Management (21 Credits)

Required Courses (6 credits):

• MGMT 313 - Organizational Behavior Credits: 3 (Satisfies the Mason Core writing intensive requirement.)
• MGMT 321 - Introduction to Human Resource Management Credits: 3

Electives Courses (15 credits):

Students may select any courses from the following list to fulfill the elective requirement as well as any other 300-400 level MGMT courses (except MGMT 301 or MGMT 303 or MGMT 312 or MGMT 313).

• MGMT 412 - Diversity in Organizations Credits: 3
• MGMT 413 - Organizational Development and Management Consulting Credits: 3
• MGMT 421 - Advanced Human Resource Management Credits: 3
• MGMT 431 - The Legal Environment for Employee and Labor Relations Credits: 3
• MGMT 441 - International Strategy Credits: 3
• MGMT 451 - Introduction to Entrepreneurship Credits: 3
• MGMT 452 - Experiential Entrepreneurship Credits: 3
• MGMT 453 - Starting a Business Credits: 3
• MGMT 456 - Cross Cultural and Global Management Credits: 3
• MGMT 462 - Honors Seminar in Management (Topic Varies) Credits: 3
• MGMT 463 - Negotiations in Organizations Credits: 3
• MGMT 464 - Teamwork and Interpersonal Skills Credits: 3
• MGMT 471 - Competitive Strategy Credits: 3
• MGMT 491 - Current Topics in Management Credits: 3
• MGMT 499 - Independent Study Credits: 1-3
• BULE 402 - Commercial Law Credits: 3
• BUS 492 - Undergraduate Internship Credits: 3

Capstone (3 credits)
Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498.

- BUS 498 - Capstone Course: Advanced Business Models Credits: 3 (Satisfies Mason Core Synthesis/Capstone requirement.)

Total hours: 120

Notes:

Management majors may focus their careers in several areas. In selecting five elective courses, students may want to consider a likely career path. Recommended courses for three possible careers are provided below.

Human Resource Management

- MGMT 421 - Advanced Human Resource Management Credits: 3
- MGMT 431 - The Legal Environment for Employee and Labor Relations Credits: 3

Front-Line Manager or Management Trainee

- MGMT 412 - Diversity in Organizations Credits: 3
- MGMT 463 - Negotiations in Organizations Credits: 3
- MGMT 464 - Teamwork and Interpersonal Skills Credits: 3

Entrepreneur

- MGMT 451 - Introduction to Entrepreneurship Credits: 3
- MGMT 452 - Experiential Entrepreneurship Credits: 3
- BULE 402 - Commercial Law Credits: 3

Honors Seminar:

Students with a GPA of at least 3.00 are offered the opportunity to further distinguish their record by participating in MGMT 462 - Honors Seminar in Management (Topic Varies), which addresses a key contemporary management issue in an intensive small group format.

To be eligible for enrollment in MGMT 462, students must be a declared management major, have a cumulative GPA of at least 3.00 with a minimum of 75 semester hours of course work, have a minimum GPA of 3.00 in course work completed for the management major, and be recommended by faculty. The class size of the Honors Seminar will be kept small. If the number of interested and qualified students exceeds the number of available spots, management area faculty will select the most qualified students to participate.

Second Majors in Management

Students declaring a second major in Management must complete the two required courses and four elective courses for the major.
Honors in Management

The Management Honors Program in the School of Business provides highly motivated students majoring in management with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

Admission Requirements

- Minimum 3.0 cumulative GPA and 3.5 GPA in the major
- Submission of a personal statement/essay (topic to be determined)
- Two academic/professional references
- Once admitted to the program, students with a cumulative GPA below a 3.0 will be dropped from the program.

Curricular Requirements:

- MGMT 303 earning a grade of A- or better.
- A grade of B or better in Business Core curriculum courses: ACCT 303 or ACCT 330, BULE 303, BUS 303, FNAN 303, MKTG 303, MIS 303, OM 303.

Co-Curricular or Work Experience Requirements:

The student must complete ONE of the following in addition to the curriculum requirements:

- MGMT 462 (Honors seminar traditionally offered each Spring)
- Study abroad (e.g., Aachen Dual Degree, Oxford Honors, China, South America)
- Internship (Internships where no credit is earned also qualify, if approved by the Management Honors Program administrator.)
- Research paper/Thesis as an independent study (MGMT 499) course (e.g., faculty research, Mason undergraduate apprentice program, QEP.)

Extra-Curricular Requirements:

The student must show a high degree of engagement in a School of Business student organization, or other on-campus student organization, preferably in a leadership role. Requirements for students to obtain the honors designation:

- Honors students must graduate with a minimum 3.0 cumulative GPA and 3.5 GPA in the MGMT major.
- Honors students must meet all curricular, co-curricular, and extra-curricular requirements mentioned above at graduation.

Marketing, BS

Banner Code: BU-BU-MKTG
Phone: 703-993-1880
Web: business.gmu.edu

School/Department: School of Business The BS in marketing (MKTG) prepares students for a broad range of global and domestic career options in market and consumer research, brand management, advertising, customer relationship management, new market
and business development, and marketing strategy. Marketing opportunities are increasing in the new economy as firms, government agencies, and nonprofit organizations adopt a market orientation.

A marketing degree provides students with a solid background in marketing concepts and practices, with emphasis on market analysis and planning, research, and consumer behavior. Because marketing draws on a variety of disciplines for its foundation and is practiced globally, marketing majors are encouraged to take electives in related fields such as psychology, sociology, economics, public policy, international studies, computer science, and foreign languages.

Degree Requirements

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered with the School of Business as either BUS 492 or ACCT 492. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Mason Core Requirements (26 credits)

School of Business students must complete the Mason Core requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Foundation Requirements (9 credits)

- Written Communication Credits: 6
- Oral Communication Credits: 3

Core Requirements (17 credits)

- Arts Credits: 3
- Literature Credits: 3
- Natural Science Credits: 8
  (School of Business students required to complete 8 credits of natural science by completing two 4-credit laboratory sciences.)
• Western Civilization/Western History Credits: 3

Note:

Remaining Mason Core requirements are fulfilled with major course work.

Business Foundations (27-28 credits)

• ACCT 203 - Survey of Accounting Credits: 3 or ACCT 204 - Honors Survey of Accounting Credits: 3
• BUS 100 - Business and Society Credits: 3 (Satisfies Mason Core Social and Behavioral Sciences requirement.)
• BUS 103 - Develop Professional Skills I: Foundational Elements Credits: 3
• BUS 200 - Global Environment of Business Credits: 3 (Satisfies Mason Core Global Understanding requirement.)
• BUS 210 - Business Analytics I Credits: 3
• BUS 310 - Business Analytics II Credits: 3
• ECON 103 - Contemporary Microeconomic Principles Credits: 3
• ECON 104 - Contemporary Macroeconomic Principles Credits: 3
  And select one of the following*:
• MATH 108 - Introductory Calculus with Business Applications Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• HNRT 225 - Applied Calculus Credits: 3

(*MATH 108 or MATH 113 satisfies the Mason Core quantitative reasoning requirement.)

Business Core (24 credits)

A grade of C or higher is required in each of the School of Business core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 or ACCT 330, BULE 303, BUS 303, FNAN 303, MGMT 303, MIS 303, MKTG 303 and OM 303. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see the "Termination from the Major" section under Academic Policies.

• ACCT 303 - Accounting for Decision Making Credits: 3 or ACCT 330 - Financial Accounting I Credits: 3
• BULE 303 - Legal Environment of Business Credits: 3
• BUS 303 - Develop Professional Skills II: Advanced Elements Credits: 3
• FNAN 303 - Financial Management Credits: 3
• MGMT 303 - Principles of Management Credits: 3
• MIS 303 - Introduction to Business Information Systems Credits: 3 (Satisfies Mason Core Information Technology requirement.)
• MKTG 303 - Principles of Marketing Credits: 3
• OM 303 - Operations Management Credits: 3

General Electives (18-19 credits)
General electives may be selected from any University or School of Business course, except courses designated for the Business minor (MBUS). Credits awarded as Associate Degree Elective Credit (ADEC) as part of a student’s transfer evaluation are also excluded from general electives.

**Major Requirements in Marketing (21 Credits)**

**Required Courses (9 credits):**

- MKTG 312 - Consumer Behavior Credits: 3
- MKTG 351 - Marketing Research Techniques and Applications Credits: 3
- MKTG 471 - Marketing Management Credits: 3 (Satisfies the Mason Core writing intensive requirement.)

**Electives (12 credits):**

Students may select any courses from the following list to fulfill the elective requirement as well as any other 300-400 level MKTG courses (except MKTG 301 or MKTG 303).

- MKTG 311 - Sales Management Credits: 3
- MKTG 313 - Integrated Marketing Communications Credits: 3
- MKTG 315 - Internet Marketing Credits: 3
- MKTG 332 - Retailing and E-Commerce Management Credits: 3
- MKTG 333 - Business to Business Marketing Credits: 3
- MKTG 352 - Marketing Analytics for New Product Development Credits: 3
- MKTG 353 - New Product Development Credits: 3
- MKTG 407 - International Marketing Credits: 3
- MKTG 455 - Ethnic and Multicultural Marketing Credits: 3
- MKTG 462 - Honors Seminar in Marketing (Topic Varies) Credits: 3
- MKTG 481 - RS: Marketing in the Nonprofit Sector Credits: 3
- MKTG 491 - Seminar in Marketing Credits: 3
- MKTG 499 - Independent Study Credits: 1-3
- BUS 492 - Undergraduate Internship Credits: 3

**Capstone (3 credits)**

Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498.

- BUS 498 - Capstone Course: Advanced Business Models Credits: 3 (Satisfies Mason Core Synthesis/Capstone requirement.)

**Total hours: 120**

**Second Majors in Marketing**

Students declaring a second major in Marketing must complete the three required courses and three elective courses for the major.
Bachelor/Accelerated Master's

Accounting, BS/Accounting, Accelerated MS

Phone: 703-993-1880
E-mail: msa@gmu.edu

School/Department: School of Business

Highly-qualified Mason Accounting majors may apply to the accelerated master's degree program and obtain both Accounting, BS and Accounting, MS degrees after satisfactory completion of a total of 144 credits. Graduates will be exceptionally well-prepared for professional school or a PhD program in accounting or a related discipline.

In the accelerated program, six credits of ACCT 600 level courses can be used to meet both bachelor's and master's degree requirements. These six credits will replace six credits of general electives in the student's undergraduate program. Students in the Accelerated MSA program may take any 600-level courses while an undergraduate.

This program of study is offered by the Accounting Area within the School of Business. For policies governing all accelerated degree programs, see the AP.6.7 Bachelor's/Accelerated Master's Degrees section of the catalog.

Application Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits earned at Mason).

Students submit an application to the MSA program director with any other supplementary application materials requested by the program. The application includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Admission requirements are as follows: 1) A minimum GPA of 3.00 in at least three accounting courses (e.g. ACCT 330, ACCT 331 and ACCT 332) with no grade less than a B- in those accounting courses* 2) Two recommendation letters from full-time Mason accounting faculty 3) Review and approval by the MSA program director. GMAT is not required.

Interested students should contact the MSA program office for more details about the application process.

*Excluding ACCT 203

Accelerated Option Requirements

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

On completion and conferral of the undergraduate degree in the semester indicated in the application, the student submits the Bachelor's/Accelerated Master's Transition Form and is admitted to graduate standing. As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program director. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

**Graduate Certificate**

**Business Analytics Graduate Certificate**

*Banner Code: BU-CERG-BUSA*

School/College: School of Business

Business analytics graduate certificate will help analysts and professionals from diverse domains to effectively analyze data through the hands-on use of decision modeling and other techniques using popular software tools. The program covers a wide array of methodologies and techniques — from data collection, organization, reporting and mining to extraction of useful and actionable information for decision makers.

This certificate may be completed on a part-time or full-time basis.

**Admissions Criteria**

Applicants must meet one of the following criteria:

- Concurrent enrollment in School of Business Graduate Program and successful completion of at least one graduate level statistics course (e.g., MBA 633, EMBA 633, BMGT 633).

- Graduate business degree from an AACSB school and corresponding evidence of statistics proficiency.

- Approval by School of Business Graduate Program Admissions Committee

**Certificate Requirements**

This is a 12 credit program and students may use the credits completed as part of their graduate degree requirements in accordance with Program requirements and Mason's Graduate Policies. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.0 to complete the certificate.

**Required Course (3 credits):**

All students must take the following course:

- MBA 738 - Data Mining for Business Analytics Credits: 0-3

**Elective Courses (9 credits):**

Choose three from the following:
• MBA 720 - Marketing Analytics Credits: 3
• MBA 739 - Advanced Data Mining for Business Analytics Credits: 3
• MBA 721 - Marketing Research Credits: 0-3
• MBA 744 - Fraud Examination Credits: 0-3

Total: 12 Credits

Chief Information Officer Graduate Certificate

Banner Code: BU-CERG-CIO

School/College: School of Business

The Chief Information Officer (CIO) Graduate Certificate is a program offered by George Mason University, School of Business. The program helps IT professionals gain core competencies necessary for advancement into executive level roles that manage IT resources and strategy within organizations. The program specifically focuses on Enterprise Architecture and IT Governance, Management of Information Security, IT Project Management, Managing IT Investments, Managing IT Operations, and Emerging Technologies.

Applicants are expected to be current students in the MS Technology Management program, or the MBA program. This is a 15 credit program and students may use the credits completed as part of their graduate degree requirements in accordance with George Mason University's Graduate Policies.

This certificate may be pursued on a part or full time basis

Certificate Requirements

The curriculum for Graduate CIO certificate would require all of the following courses:

• TECM 601 - HiTech Business Models Credits: 1
• TECM 602 - Emerging Technologies and the New CIO Credits: 1
• TECM 611 - Leadership and Change Management Credits: 2
• TECM 704 - Management of Technology Projects and Portfolios Credits: 2
• TECM 711 - Deriving Strategic Value from IT Investments Credits: 2
• TECM 745 - Leading and Managing IT Operations Credits: 2
• TECM 746 - Enterprise Architecture and IT Governance Credits: 2
• TECM 747 - Information Assurance and Security Management Credits: 2
• TECM 760 - CIO Consulting Project Credits: 1-3

Total: 15 credits

Chief Learning Officer Graduate Certificate

Banner Code: BU-CERG-CLO
Phone: 703-993-2136

School/Department: School of Business The 18-credit Chief Learning Officer Certificate program prepares Chief Learning Officers and other senior level executives for success as learning and talent development leaders. The certificate prepares
graduates to develop programs to help employees better meet their company's stated goals. The Chief Learning Officer certificate may be pursued on a part-time basis. Maintaining full-time status is not guaranteed.

Admission Requirements

Applicants must have a U.S. equivalent bachelor degree from an accredited college or university. Applicants must have a minimum of three years of experience in a position with responsibilities for talent development or talent management.

Certificate Requirements

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is six years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.0 to complete the certificate.

Required Courses (18 credits)

- GBUS 540 - Analysis of Financial Decisions Credits: 3
- GBUS 550 - Strategic Thinking Credits: 3
- GBUS 551 - Leadership Credits: 3
- EDIT 706 - Business of Learning Design and Technologies Credits: 3
- EDIT 750 - Learning Technologies and Strategies for Innovation Credits: 3
- EDIT 751 - Overview of Learning Analytics and Big Data Credits: 3

Total: 18 credits

Forensic Accounting Graduate Certificate

Banner Code: BU-CERG-FACC
Phone: 703-993-2136
Email: msa@gmu.edu

School/Department: School of Business The 12-credit Graduate Certificate in Forensic Accounting program provides an opportunity for students to acquire education in the emerging field of forensic accounting. Students with a bachelor's degree in accounting can also use the certificate program as a means of obtaining the necessary 150 hours of academic credit to qualify to sit for the Virginia CPA exam.

The Forensic Accounting Graduate Certificate may be pursued on a part-time basis. Maintaining full-time status is not guaranteed.

Admissions Requirements

In order to apply for the Graduate Certificate in Forensic Accounting program applicants are required to have, at a minimum, a U.S. equivalent bachelor's degree from an accredited college or university. Applicants must hold a bachelor's degree with a preferred GPA of 3.0 or higher on a 4.0 scale. The program is open to individuals holding degrees in any major although degrees
in accounting are preferred. All students registering in School of Business graduate courses must have graduate standing. Nondegree student status is not available.

Admission requirements include:

- Application form and application fee.
- Bachelor's degree from an accredited college or university.
- Current resume.
- Official copy of transcripts from all colleges and universities attended in the United States and abroad. International students must also submit a translation of all international transcripts into English, if applicable.
- English proficiency standards as required of all Mason graduate students. International students are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL exam can be used to meet this requirement. The minimum TOEFL scores are: 570 on paper-based exams; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam.

Certificate Requirements

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.0 to complete the certificate.

Required Courses (9 credits)

- ACCT 737 - Fraud and the Law Credits: 3
- ACCT 738 - Advanced Topics in Fraud Credits: 3
- ACCT 636 - Fraud Examination Credits: 3 or CFRS 770 - Fraud and Forensics in Accounting Credits: 3

Elective (3 credits)

- ACCT 701 - Business Valuation Credits: 3
- ACCT 742 - Corporate Governance and Ethics Credits: 3
- CFRS 500 - Introduction to Forensic Technology and Analysis Credits: 3
- CFRS 510 - Digital Forensics Analysis Credits: 3
- CFRS 660 - Network Forensics Credits: 3
- CFRS 661 - Digital Media Forensics Credits: 3

Note:

Students in the MS in Accounting (MSA) program are required to take ACCT 636 and can take ACCT 701, ACCT 737 and ACCT 738 as electives.

Total: 12 credits

Master of Business Administration

Business Administration, MBA
School/Department: School of Business The Mason MBA degree prepares the next generation of world leaders through a rigorous, stimulating business and management curriculum based on a global perspective, industry demand and leadership.

Admissions Requirements

All students registering for School of Business graduate courses must have graduate standing. Non degree student status is not available. Admission is highly competitive and available to all qualified candidates without regard to prior academic major. No previous course work in business administration is required, but a four-year undergraduate degree is required and a college-level calculus course is recommended before matriculation. Admission is based on a combination of academic, professional, and leadership factors. No portion of the portfolio is considered more important than another; careful consideration is given to every part of the application packet to ensure that the Admission Committee has an accurate profile of a candidate's professional and academic qualifications. For information on the GMAT, go to www.mba.com. A minimum of two years of professional work experience is recommended before entering the program.

The MBA program commences fall semesters. Priority is given to applicants submitting their application by March 15 for the following fall semester. Applications for admission received after March 15 will be considered on a space-available basis. International students have an application deadline of January 15.

Applicant requirements include:

- Application form and application fee.
- Bachelor's degree from an accredited college or university.
- Official copies of transcripts from all colleges and universities attended in the United States and abroad.
- Two professional letters of recommendation.
- Goal statement indicating how applicant will benefit from the program.
- A current resume.
- English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelors, masters, or doctoral degree from a regionally accredited university in the United States, Canada (excluding the province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard. All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The minimum scores are: TOEFL: IBT (93 total with 20 points minimum in each section); CBT (230); and PBT (570); IELTS- Academic: 7.0 total band score.
- GMAT (recommended minimum score: 550) or GRE (recommended minimum score: 308).
- Two years of work experience.

Degree Requirements

Students are responsible for familiarization and compliance with the Graduate Policies contained in this catalog.

Program Information

The MBA core curriculum effectively integrates functional areas with the use of IT, oral and written communication, and teamwork. The MBA program requires 48 credits: 33 credits of core courses and 15 credits of elective courses. Students complete the degree program in two years. Because of the cohort structure, students commit to attending classes a minimum of two times per week. The MBA program operates on a module structure, with four modules each year. Modules are 11 weeks long, 10 evening, weekday class sessions with a final exam on Saturday.
Core Courses: 33 credits

33 credits of core courses are completed prior to enrollment in electives. Students enroll in 6 credits per module for a total of 24 credits a year. All MBA students complete the following core courses:

- 3 credits of MBA 603 - Managerial Economics and Decisions of the Firm Credits: 0-3
- 3 credits of MBA 612 - Managing Costs and Evaluating Performance Credits: 1.5-3
- 3 credits of MBA 613 - Financial Reporting and Decision Making Credits: 0-3
- 3 credits of MBA 623 - Marketing Management Credits: 0-3
- 3 credits of MBA 633 - Statistics for Business Decision Making Credits: 0-3
- 3 credits of MBA 638 - Operations Management Credits: 0-3
- 3 credits of MBA 643 - Managerial Finance Credits: 0-3
- 3 credits of MBA 653 - Organizational Behavior Credits: 0-3
- 3 credits of MBA 662 - Management of Information Technology Credits: 1.5-3
- 3 credits of MBA 678 - Strategic Management Credits: 0-3
- 3 credits of MBA 795 - Global Business Perspectives Credits: 0-3

Travel outside the United States is required. Most travel costs, excluding cost of airfare, are included in the MBA program tuition and fees.

Elective Courses: 15 credits

Students must complete 15 credits of market-driven elective courses (MBA 700-level). 6 credit hours of electives may be taken outside the MBA Program or through the Consortium of Universities of the Washington Metropolitan Area with the permission of the program director.

Total: 48 credits

Executive MBA

Banner Code: BU-MBA-BUEX
Phone: 703-993-2136
Email: emba@gmu.edu

School/Department: School of Business

EMBA Program

The Executive MBA is designed for those with a minimum of 7 to 10 years of significant business and professional experience. The program's focus is management decision making, strategic management of business resources, and leadership. Dedicated faculty, an innovative and relevant curriculum, a global focus, a student-centered program team, and great colleagues contribute to the learning experience of a lifetime. The program is carefully designed to help students master a broad range of executive-level competencies while cultivating expert business-related knowledge of the global economy. Students complete the Executive MBA program as a cohort with the exception of track-specific coursework (below). The program is completed in 20 months, starting in August and classes are held approximately three Saturdays per month. Students enrolling in
both the in-class and online versions must have the support of their organizations to participate in global and domestic residencies.

**Diversity in Learning**

Students encounter multiple approaches to learning in the Executive MBA Program. Classroom discussions, team projects, individual reading, team presentations, team problem solving, business simulations, business case analyses, coaching, and domestic and international residencies all contribute to the creative learning environment delivered by the Mason Executive MBA Program.

**Tracks**

The Executive MBA program offers three tracks to complement core business courses. These tracks include: Global, National Security, and Critical Infrastructure Protection and Management. A brief overview of these tracks is below. Please visit http://business.gmu.edu for further information.

**Global Track**

Rapid changes in technology and geopolitics have transformed the world of commerce—every company today truly competes on a global stage. The “globalization” of business demands new kinds of leadership skills and richer multicultural perspectives. It also demands a different kind of executive MBA training. The Global track is designed to prepare today's executives for the new competitive realities. The program develops real-world skills that translate into real-world business decisions.

**National Security Track**

With America's role in the world continually evolving to meet new global challenges, the role of leadership in the security industry has never been more vital. The need for military leaders, government executives and corporate defense contractors who can provide mission critical products and services— and who understand the unique demands of the complex and dynamic national security sector—has never been more critical. Dedicated faculty from the Mason School of Business and adjunct faculty working in specialty areas of the security sector; as well as accomplished government, military, and corporate guest speakers, technical experts, and Mason alumni employed in the security industry; are a part of the National Security track. The dynamic learning environment brings contemporary challenges of the national security industry right into the classroom.

**Critical Infrastructure Protection and Management Track**

In partnership with George Mason University's Center for Infrastructure Protection and Homeland Security, our Critical Infrastructure Protection and Management track addresses the critical areas of risk analysis and management, systems analysis, and cyber security within critical infrastructure sectors such as energy, telecommunications, medical response, and critical manufacturing. The program emphasizes interagency action and intergovernmental coordination to achieve business efficiency and develop capacities to create industry/government cooperation.

**Degree Requirements**

The EMBA program requires successful completion of 48 credit hours of coursework including for-credit residencies. Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

**Modules**
Students complete seven 10-week modules. During each ten-week module, students complete two to three courses in an applications-oriented sequence that takes them from developing core management skills through the understanding and application of the tools of business performance to the talents of leadership.

Required Courses (42 credits)

- EMBA 603 - Managerial Economics Credits: 3
- EMBA 612 - Cost Accounting Credits: 1-3 (must take 3 credits)
- EMBA 613 - Financial Accounting Credits: 3
- EMBA 623 - Marketing Credits: 3
- EMBA 633 - Statistics for Business Decision Making Credits: 3
- EMBA 638 - Services and Operations Management Credits: 3
- EMBA 643 - Managerial Finance Credits: 3
- EMBA 653 - Organizational Behavior and Teams Credits: 3
- EMBA 660 - Management of Information Technology Credits: 3
- EMBA 678 - Business Strategy Credits: 3
- EMBA 703 - Financial Markets Credits: 0-3 (must take 3 credits)
- EMBA 718 - Leadership and Change Management Credits: 3
- EMBA 735 - Systems Thinking and Dynamics Credits: 1-3 (must take 1.5 credits)
- EMBA 750 - Capstone Project: Part 1 Credits: 1.5
- EMBA 754 - Capstone Project: Part 2 Credits: 1.5
- EMBA 751 - Corporate Global Strategy Credits: 1.5-3 (must take 1.5 credits)

Electives (6 credits)

The 6 credits of electives may be selected by students based on their chosen track. Courses for three tracks are provided below.

**Global Track**

- EMBA 740 - Introduction to Global Business Credits: 1-3
- EMBA 742 - Advanced Topics in Global Business Credits: 1.5
- EMBA 795 - Global Residency Credits: 0-3

**National Security Track**

- EMBA 741 - Introduction to National Security Credits: 1-3
- EMBA 743 - Advanced Topics in National Security Credits: 1.5
- EMBA 790 - National Security Residency Credits: 3

**Critical Infrastructure Protection and Management Track**

- EMBA 729 - Introduction to Critical Infrastructure Protection Credits: 1-3
- EMBA 733 - Advanced Topics in Critical Infrastructure Protection Credits: 1-3
- EMBA 734 - Critical Infrastructure Protection Residency Credits: 3

**Other EMBA Courses**

- EMBA 730 - Assessing and Managing Risk to Critical Infrastructure Systems Credits: 1-3
- EMBA 731 - Partnering and Information Sharing for Critical Infrastructure Security and Resilience Credits: 1-3
- EMBA 732 - Critical Infrastructure Security and Resilience and Cybersecurity Credits: 1-3

Master of Science

Accounting, MS

Banner Code: BU-MS-ACCT
Phone: 703-993-2136
E-mail: msa@gmu.edu

School/Department: School of Business The MS in accounting (MSA) is designed to meet the needs of new professionals entering the accounting profession. The program allows students to earn a state-of-the-art graduate degree in accounting and also meet requirements to take the Uniform CPA Examination in Virginia and in most other states. The program integrates fundamental business skills and specialized knowledge and acumen required by the accounting profession. The MSA program is pursued as a full-time face to face or a part time online option.

An accelerated master's option is available to students in the bachelor's program. See Accounting, BS/Accounting, Accelerated MS for requirements.

Admission Requirements

All students registering for School of Business graduate courses must have graduate standing. Nondegree student status is not available. Admission is highly competitive and available to qualified candidates holding a baccalaureate degree in business from an accredited university or college. Applicants with an undergraduate business degree who do not have an Accounting major or equivalent will be provisionally admitted until they have completed the following courses or equivalents with a grade of B- or better: ACCT 331, ACCT 332, ACCT 351, and ACCT 461. International students with accounting degrees that lack a course in U.S. tax will be required to take ACCT 351 prior to matriculation. Applicants are evaluated primarily on their undergraduate record and GMAT performance. For information on the GMAT, go to www.mba.com. Professional work experience is not required. Students begin the program in the fall semester. The priority deadline for application is March 15.

Applicant requirements include:

- Application form and application fee
- Bachelor's degree in business, accounting, or equivalent from an accredited college or university
- Official copies of transcripts from all college and universities attended in the United States and abroad
- Two letters of recommendation
- Goal statement indicating how applicant will benefit from the program
- English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelors, masters, or doctoral degree from a regionally accredited university in the United States, Canada (excluding the province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard. All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The minimum scores are: TOEFL: IBT (88 total with 20 points minimum in each section); CBT (230); and PBT (570); IELTS- Academic: 6.5 total band score.
- GMAT (recommended minimum score: 550) or GRE (recommended minimum score: 308)
- Current resume

Degree Requirements

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

Required Courses (15 credits)
Electives Courses (15 credits)

Any 600- or 700-level ACCT course that does not duplicate coursework taken as an undergraduate.

Total: 30 credits

Management of Secure Information Systems, MS (School of Business)

Banner Code: BU-MS-MSIS
Phone: 703-993-2136
Email: cyber@gmu.edu

School: Volgenau School of Engineering, School of Business, and Schar School of Policy and Government (formerly SPGIA)

Department: School of Business

The Executive Management of Secure Information Systems MS, an interdisciplinary program offered by the Volgenau School of Engineering, the School of Business, and the Schar School of Policy and Government (formerly SPGIA); prepares professionals for the challenges of modern computerized information systems that have become increasingly complex and vulnerable to cyber-attacks, resulting in a significant number of government regulations. Consequently, those responsible for the safe, secure, and efficient operation of such systems need to grasp their technical aspects and be familiar with both the principles of management and the public policy impact of regulatory and organizational decisions.

The program is run as a cohort with no electives. The entire program has a duration of 16 months including about seven days of study abroad, which is included in the tuition. Applicants to the program are expected to have at least three years of full-time relevant work experience.

MS-MSIS Admission Requirements

Applicant requirements include:

- Application form and application fee.
- A bachelor's degree from a recognized university or an approved institution, recognized qualifications equivalent to a degree.
- Official copy of transcripts from all colleges and universities attended in the United States and abroad.
- Two professional letters of recommendation.
- Goals statement (statement of how and why applicants would benefit from the program).
- A current resume.
- English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelors, masters, or doctoral degree from a regionally accredited university in the United States, Canada (excluding province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard.
All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The minimum scores are: TOEFL: IBT (88 total with 20 points minimum in each section); CBT (230); and PBT (570); IELTS – Academic: 6.5 total band score.

- GMAT (recommended score: the mean GMAT scores of an entering class should meet or exceed 550 with an individual minimum of 500) or GRE (recommended score: 308). The GMAT or GRE may be waived if the applicant's record demonstrates the ability to succeed in a competitive and quantitative program.
- A minimum of three years of significant full-time work experience is required.

MS-MSIS Degree Requirements

Students are responsible for familiarization and compliance with the Academic Policies in this catalog.

Required Courses (36 credits)

- MSEC 510 - Foundations of Cyber Security Credits: 2
- MSEC 511 - Security Practices in the Enterprise Credits: 2
- MSEC 520 - Networking Principles Credits: 2
- MSEC 620 - Networking Security Credits: 2
- MSEC 630 - Secure Information System Governance, Regulation, and Compliance Credits: 2
- MSEC 641 - Enterprise Security Threats Credits: 1
- MSEC 642 - Enterprise Security Technologies Credits: 2
- MSEC 650 - Seminar: Enterprise Security Case Studies Credits: 1
- PUBP 610 - Organizations, Management, and Work: Theory and Practice Credits: 2
- PUBP 611 - Critical Infrastructure Protection in Theory, Policy and Practice Credits: 2
- MSIS 611 - Leadership and Change Management Credits: 2
- MSIS 614 - Financial and Cost Accounting Credits: 2
- MSIS 620 - Economics of Technology Management Credits: 2
- MSIS 641 - Innovation, Commercialization and Entrepreneurship Credits: 2
- MSIS 643 - Managerial Finance Credits: 2
- MSIS 711 - Deriving Strategic Value from IT Investments Credits: 2
- 3 credits of MSIS 735 - Capstone Project Credits: 1-3 or MSEC 720 - Capstone Project in Management of Secure Information Systems Credits: 1-3
- 3 credits of MSIS 750 - Global Practices in Security of Information Systems Credits: 1-3 or MSEC 710 - Global Residency Credits: 1-4

Management, MS

Banner Code: BU-MS-MGMT
Phone: 703-993-2136
Email: msmtp@gmu.edu

School/Department: School of Business The Master of Science in Management prepares recent graduates of non-business majors for success in business fields. The program offers the fundamentals of business management in a global environment and is composed of the core discipline areas common to all business graduate programs that are accredited by the Association to Advance Collegiate Schools of Business (AACSB). The MS in Management is a full time, daytime program. Students will enter as a cohort and complete all degree requirements within 11 months.
Admissions Requirements

All students registering for School of Business graduate courses must have graduate standing. Non degree student status is not available. Admission to the Master of Science in Management is contingent on applicants having completed an undergraduate degree program within 24 months prior to when they would enroll in the program.

Applicant requirements include:

- Application form and application fee
- Bachelor's degree completed before matriculation from an accredited college or university
- Official copies of transcripts from all colleges and universities attended in the United States and abroad
- Two letters of recommendation, one of which must be from a professor in the applicant's major department
- Two essays
- English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelors, masters, or doctoral degree from a regionally accredited university in the United States, Canada (excluding the province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard. All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The minimum scores are: TOEFL: IBT (88 total with 20 points minimum in each section); CBT (230); and PBT (570); IELTS Academic: 6.5 total band score.
- Official GMAT score (recommended score: 550) or GRE score (recommended score: 303)
- A current resume

Degree Requirements

Students are responsible for familiarization and compliance with the Graduate Policies contained in this catalog.

Required Courses: 33 credits

- BMGT 603 - Economics for Successful Firm Management Credits: 3
- BMGT 612 - Performance Evaluation Through Cost Management Credits: 3
- BMGT 613 - Financial Reporting and Firm Analysis Credits: 3
- BMGT 623 - Marketing and Firm Performance Credits: 3
- BMGT 633 - Statistical Analysis for Management Credits: 3
- BMGT 638 - Managing Business Operations in a Global Environment Credits: 3
- BMGT 643 - Financial Management in a Global Environment Credits: 3
- BMGT 653 - Fundamentals of Behavior in Organizations Credits: 3
- BMGT 662 - Management of Information Technology Credits: 3
- BMGT 678 - Business Strategy and Firm Leadership Credits: 3
- BMGT 695 - Global Business Perspectives Credits: 3

Elective Course (3 credits):

Students must take 3 credits of Elective coursework. Choose one option from the following:

- BMGT 692 - Professional Development Experience Credits: 3
- 700-level MBA course, as approved by department
- 600 or 700-level MS Accounting course, as approved by department
Total: 36 credits

Real Estate Development, MS

Banner Code: BU-MS-REAL
Phone: 703-993-2136
Email: mred@gmu.edu

School/Department: School of Business The MS in Real Estate Development program is designed to provide real estate professionals with the knowledge essential to assume increasingly responsible leadership roles within the development industry. Areas of emphasis include real estate finance, investment analysis, project management, sustainability and economic development. The distinctiveness of the Master's program in Real Estate Development offered by Mason lies in its multidisciplinary curriculum, which incorporates coursework from the domains of business, engineering and public policy. Created in consultation with leading real estate development companies, the curriculum has been designed to strengthen the employment potential and upward mobility of industry professionals working in the areas of development, architecture, engineering, public planning, construction management, real estate finance, mortgage lending, property management, real estate law and related fields.

Admission Requirements

To be eligible for the MS in Real Estate Development program, students must have a bachelor's degree from an accredited institution. Two years of professional work experience in a real estate related field is recommended.

Applicant requirements include:

- Online application and $65 application fee.
- A current resume.
- One official copy of transcripts from all colleges or universities attended, including international.
- Two professional letters of recommendation.
- A goals statement that relates to Real Estate Development career goals.
- Additional requirements for international students include an English proficiency score (TOEFL, IELTS or Pearson), official transcript evaluation and proof of degree conferral.

Degree Requirements

The 36 hour curriculum includes 18 hours of required courses and 18 hours of electives. Students are responsible for familiarization and compliance with the university's AP.6 Graduate Policies contained in this catalog.

Required Courses (18 credits)

- REAL 500 - Real Estate Development Fundamentals Credits: 3
- REAL 502 - Real Estate Client Leadership and Project Management Credits: 3
- REAL 630 - Innovative Land Use, Approvals and Real Estate Development Credits: 3
- REAL 750 - MSRED Capstone Credits: 3
- GBUS 746 - Real Estate Analysis and Valuation Credits: 3
GBUS 747 - Real Estate Finance Credits: 3

Elective Courses (18 credits)

Electives may be selected from other REAL courses (see below) and available offerings in appropriate areas including the School of Policy, Government, and International Affairs; the School of Business; the Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering; the Department of Geography and Geoinformation Science; and the Department of Environmental Science and Policy.

Students wishing to choose a field for emphasis may select, with the approval of a faculty advisor, 3 elective courses within the field that together constitute an emphasis area. With prior approval of an advisor, students may design their own emphasis. The following are examples of fields for emphasis and courses within each field which may be selected.

Real Estate Development Emphasis

Choose the following 3 courses:

- REAL 620 - Real Estate Entrepreneurship Credits: 3
- GGS 550 - Geospatial Science Fundamentals Credits: 3
- GBUS 748 - Real Estate Investment Credits: 3
- PUBP 602 - Regional Economic Development: Strategies and Applications Credits: 3
  Note: Students choosing a field for emphasis will take 3 courses outside the selected emphasis for a total of 9 credits.

Real Estate Finance Emphasis

Choose 3 courses from among the following:

- GGS 550 - Geospatial Science Fundamentals Credits: 3
- GBUS 748 - Real Estate Investment Credits: 3
- MBA 603 - Managerial Economics and Decisions of the Firm Credits: 0-3
- PUBP 721 - Transportation Economics Credits: 3
- PUBP 781 - Entrepreneurship and Economic Development Credits: 3
  Note: Students choosing a field for emphasis will take 3 courses outside the selected emphasis for a total of 9 credits.

Environment and Sustainability Emphasis

Choose 3 courses from among the following:

- CEIE 501 - Sustainable Development Credits: 3
- CEIE 550 - Environmental Engineering Systems Credits: 3
- CEIE 556 - Environmental Law Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- PUBP 745 - Transportation and the Environment Credits: 3
  Note: Students choosing a field for emphasis will take 3 courses outside the selected emphasis for a total of 9 credits.

Electives Continued

The following courses may be included as electives by all students:
Technology Management, MS

Banner Code: BU-MS-TECM
Phone: 703-993-2136
Email: techman@gmu.edu

School/Department: School of Business The MS in technology management is designed to provide students with a graduate management education that will help them further their leadership careers in technology and technology-oriented businesses and organizations. With technology innovation and commercialization occurring at an increasing pace and industries becoming more networked and global, business success depends on the successful management of technology. Companies are succeeding with rapid innovation, insightful technology integration, creation of focused technology organizations, and skillful management of complexity. The program addresses how to succeed in this marketplace and emphasizes leadership and management; special considerations of technology innovation, commercialization, introduction, and integration; and methods and approaches of systems thinking.

Students are from the major firms and organizations in the Washington, D.C., region. They average 15 years of work experience, and almost 25 percent of the students already have graduate degrees. Approximately three-quarters of the students work for the private sector, while the remainder works for federal government agencies or departments.

The program, designed for working professionals, starts in January and lasts for 16 months. Classes are held on the Fairfax Campus on Saturdays from 8 a.m. to 5 p.m. The program is 36 credits and includes a capstone project and an international residency. The international residency is approximately 8 days abroad focusing on global topics in technology management. Previous residency locations included: Taiwan, Japan, Thailand, India, Sweden, England, Germany, Singapore and Korea. Residency cost is included in the tuition.

Admission Requirements

Students must have a bachelor's degree from an accredited institution, a minimum of three years professional work experience, two professional references, and a GMAT/GRE score or other evidence that they can perform graduate-level work.

Degree Requirements

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

Courses with variable credits (1-2) are established for each entering class to comply with the total hour requirement of 36 credit hours.

- TECM 601 - HiTech Business Models Credits: 1
- TECM 602 - Emerging Technologies and the New CIO Credits: 1
- TECM 611 - Leadership and Change Management Credits: 2
- TECM 614 - Financial and Cost Accounting Credits: 2
Total: 36 credits

Non-Degree

Business Minor

Banner Code: BUS
Phone: 703-993-1880
Web: business.gmu.edu

School/Department: School of Business The business minor provides an introduction to the skills needed for success in the rapidly changing and evolving world of business. Because it is designed for non-business students who seek to learn business essentials to enhance their own area of expertise, the minor provides broad exposure to business concepts and theories. The minor also presents and integrates the major functional areas in business to solve management problems through the use of IT. Strong written and oral communication skills are expected. Students must have sophomore standing prior to beginning the minor.

The minor consists of the following MBUS courses. Students must complete four out of the five required courses and complete one elective course for a total of 15 credits. The fifth required course may count as an elective. At least eight credits of the minor courses must be unique to the Business Minor and not applied toward any other major, minor, or concentration. *Students must achieve a grade of C or better in each course that is applied toward the minor.

For policies governing all minors, see the Academic Policies section of this catalog. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

Minor Requirements

Required Courses (12-15 credits):

Students must take at least four courses from this Required Courses list:

- MBUS 300 - Accounting in a Global Economy Credits: 3
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- MBUS 302 - Managing Information in a Global Economy Credits: 3
- MBUS 303 - Marketing in a Global Economy Credits: 3
- MBUS 308 - Corporate Finance and Investments in a Global Economy Credits: 3

**Electives (0-3 credits)**

Students may take the fifth course from the Required Courses list or may choose one of the following:

- MBUS 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3
- MBUS 305 - Introduction to International Business Credits: 3
- MBUS 306 - Managing Projects and Operations Credits: 3

**Notes**

These courses may not be taken for credit by School of Business majors.

Students who have already taken and received credit for relevant School of Business foundation or core course(s) shall substitute courses as follows and cannot receive credit for the equivalent MBUS course:

ACCT 203 for MBUS 300
FNAN 301 or FNAN 303 for MBUS 308
MGMT 301 or MGMT 313 for MBUS 301
MIS 301 or MIS 303 for MBUS 302
MKTG 301 or MKTG 303 for MBUS 303,
OM 301 or OM 303 for MBUS 306

Students may transfer a maximum of six credits toward the business minor.

**Total: 15 credits**

**Undergraduate Certificate**

**Accounting Undergraduate Certificate**

**Banner Code:** BU-CERB-ACCT
Phone: 703-993-1880
Web: http://business.gmu.edu

School/Department: School of Business This program provides an opportunity for nondegree-seeking students to earn the academic credit necessary to sit for the Uniform CPA Examination in Virginia. The requirement for enrollment is a bachelor's degree or higher from an accredited college or university.
Students are required to complete a minimum of 30 credits of accounting courses. At least 16 required credits must be taken at Mason after acceptance to the certificate program. Students have four years to complete certificate requirements. Students who are given permission to re-enroll following an absence from Mason may not count the four-year time limit as beginning on the date of re-enrollment. Successful completion of the certificate program requires a grade of C or better in accounting courses and a GPA of at least 2.00 in all courses. All students who wish to sit for the Uniform CPA Examination in Virginia are required to have completed 150 college-level credits, including at least 30 credits of accounting with courses in financial accounting, auditing, taxation, and management accounting; and at least 24 credits of non-accounting business courses. To receive the Mason accounting certificate, individuals must have completed the following required accounting courses or their equivalents.

The Accounting Undergraduate Certificate may be pursued on a part-time basis. Maintaining full-time status is not guaranteed.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure page at: http://irr.gmu.edu/gedt/Accounting/Gedt.html

Certificate Requirements

Required Courses (24 credits)

- ACCT 203 - Survey of Accounting Credits: 3
- ACCT 330 - Financial Accounting I Credits: 3

- ACCT 370 - Accounting in a Global Economy Credits: 3
- ACCT 372 - Financial Statement Analysis Credits: 3
- ACCT 411 - Advanced Managerial Accounting Credits: 3
- ACCT 433 - Advanced Financial Accounting Credits: 3
- ACCT 451 - Advanced Federal Taxation Credits: 3
- ACCT 462 - Honors Seminar in Accounting Credits: 3
- ACCT 472 - Government and Not-for-Profit Accounting Credits: 3
- ACCT 491 - Seminar in Accounting Credits: 3
- ACCT 492 - Internship in Accounting Credits: 3
- ACCT 499 - Independent Study Credits: 1-3
- FNAN 303 - Financial Management Credits: 3
- BULE 402 - Commercial Law Credits: 3

Notes:
Students with a previous degree in business or accounting are advised to take School of Business courses above the 303 level to complete the 16 Mason credits needed after acceptance to the certificate program.

Students who have not previously studied business are advised to take the following recommended courses:

- BULE 303 - Legal Environment of Business Credits: 3
- BULE 402 - Commercial Law Credits: 3
- BUS 210 - Business Analytics I Credits: 3
- BUS 310 - Business Analytics II Credits: 3
- FNAN 341 - Introduction to Firm Valuation Credits: 3
- MIS 303 - Introduction to Business Information Systems Credits: 3

Total credits: 30

Other Degrees

Business Analytics Minor

Banner Code: ABUS

School/Department: School of Business

The amount of data flowing from, to, and through enterprises of all sorts is enormous, and growing rapidly—more rapidly than the capabilities of organizations to use it. Successful enterprises are those that make effective use of the abundance of data to which they have access: to make better predictions, better decisions, and form better strategies. Business analytics—which encompasses a variety of techniques to extract useful information from different sources of data—is being embraced at an increasing rate by organizations that need to gain actionable and forward-looking insight from their data. This minor in business analytics will provide students with the cutting-edge knowledge and skills they need to use and gather data to identify, understand, and deliver insights that internal and external clients find vital to organizational success.

At least eight credits of the minor courses must be unique to the Business Analytics Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

Minor Requirements

Required Course (3 credits)

All students will take the following course:

- MIS 431 - Data Mining for Business Applications Credits: 3

Electives (12 credits)

Students are required to take four of the following courses:
Entrepreneurship Minor

Banner Code: ENTR

School/Department: School of Business This minor will prepare students to exploit potential entrepreneurial opportunities while allowing them to explore different interests they have in the entrepreneurial realm.

Students must complete five courses for a total of 15-18 credits. Students must earn credit for the two required courses and can pick three courses of electives. At least eight credits of the minor courses must be unique to the Entrepreneurship Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor. For policies governing all minors, see the Academic Policies section of this catalog. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

Minor Requirements

Required Courses (6 credits):

Business major students should take:
- MGMT 451 - Introduction to Entrepreneurship Credits: 3

Non-business major students should take one of the following courses:
- MBUS 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3 or IT 495 - Turning Ideas into Successful Companies Credits: 3

All students must take the following course:
- MGMT 452 - Experiential Entrepreneurship Credits: 3

Elective Courses (9 credits):

Students should take three courses from any of the following lists:

(Lists are organized by interest)

Commercial Entrepreneurship Courses
International Business Minor

Banner Code: IB

School/Department: School of Business The minor in International Business for School of Business majors provides an introduction for those students interested in learning more about elements of business unique to international organizations or in pursuing a career in international business. With a strong set of business skills developed through the core undergraduate curriculum and their majors, students in the International Business Minor can further develop their skills in managing and communicating across different cultures, improve their understanding of how specific business disciplines vary in an international setting, and cultivate an appreciation for international monetary issues. Students must complete five courses for a total of 15 credits. At least eight credits of the minor courses must be unique to the International Business Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied to the minor. For policies governing all minors, see the Academic Policies section of this catalog. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

Minor Requirements

Required Courses (3 credits):

- MGMT 461 - Cross Cultural and Global Management Credits: 3

Elective Courses (12 credits)
Choose 4 of the following elective courses. No more than 1 course from the Economics courses listed.

- ACCT 370 - Accounting in a Global Economy Credits: 3
- FNAN 440 - International Financial Management Credits: 3
- MGMT 441 - International Strategy Credits: 3
- MKTG 407 - International Marketing Credits: 3
- OM 320 - Supply Chain Management in a Global Economy Credits: 3
- ECON 360 - Economics of Developing Areas Credits: 3
- ECON 361 - Economic Development of Latin America Credits: 3
- ECON 362 - African Economic Development Credits: 3
- ECON 380 - Economies in Transition Credits: 3
- ECON 390 - International Economics Credits: 3
- ECON 420 - International Money and Finance Credits: 3

Co-curricular Requirement:

Students must complete ONE of the following in addition to the curriculum requirements: Global Experience

- Global residency course;
- An international internship abroad;
- A domestic internship with significant international experience;
- An approved study abroad program; or
- Study at a Mason campus or a Mason joint program overseas

OR

Foreign Language

- One language study course; or
- A course taught in foreign literature when taught in a foreign language

Total: 15 credits
Courses Excluded from any School of Business BS degree

- SWE 401 - Internship Reflection
- MUSI 394 - Ethnomusicology Internship
- COMM 450 - Internship in Communication
- FAVS 450 - Internship in Film and Video Studies
- GOVT 480 – Internship
- MUSI 496 - Internship
- CONF 370 - Internship Field Experience
- PHIL 306 - Philosophy Internship
- RELI 426 - Religious Studies Internship
- ARTH 393 - Art History Internships
- GCH 498 - Global and Community Health Internship
- GAME 491 - Internship
- HAP 498 - Health Administration Internship
- HDFS 499 - Advanced Internship & Analysis in Human Development and Family Science
- EVPP 494 - Internship
- ENGH 459 - Internship

- CRIM 480 - Internship
- HIST 399 – Internship
- RHBS 490 - RS: Clinical Research Internship
- LAS 490 - Internship
- HAP 480 - Research Internship in Health and Human Services
- KINE 341 - Kinesiology Internship I
- SOCW 480 - Research Internship in Health and Human Services
- MUSI 495 - Internship in Music Education: Student Teaching
- KINE 441 - Kinesiology Internship II
- PHYS 409 - Physics Internship
- HHS 492 - RS: Internship in Clinical Research
- EDSE 490 - Internship in Applied Behavior Analysis
- SOCI 416 - Internship in Sociology
- FRLN 490 - Internship in Foreign Language Studies
- ENGR 395 - Engineering Internship
- GEOL 480 - Internship
- AVT 453 - Professional Practices
- CVPA 489 - Field Experience in the Arts
- GLOA 495 - Global Experiential Learning
- KINE 330 - Seminar in Kinesiology
School for Conflict Analysis and Resolution

Phone: 703-993-1300
Web: scar.gmu.edu
College Code: CA

Administration

Kevin Avruch, Dean
Julie Shedd, Associate Dean for Administration
Terrence Lyons, PHD Program Director
Agnieszka Paczynska, MS Program Director
Mara Schoeny, Graduate Certificate Program Director
Mara Schoeny, Undergraduate Program Director

Faculty

Professors: Avruch, Cobb, Gopin, Hirsch, Jeong, Rothbart, Rubenstein, Sandole

Associate professors: Allen, Dwyer, Korostelina, Lyons, Maulden, Paczynska, Schoeny, Simmons

Assistant professors: Firchow, Flores, Lopez Bunyasi, Romano, Shedd

Research professors: Price, Stanton

Emeritus faculty: Cheldelin, Mitchell, Sluzki

Courses

The School for Conflict Analysis and Resolution (S-CAR) offers all courses designated CONF in the Courses section of this catalog.

Undergraduate Programs

Phone: 703-993-4165
E-mail: ugradcar@gmu.edu
Location: Fairfax Campus

Mara Schoeny, Undergraduate Program Director.
Conflict Analysis and Resolution offers students a BA, a BS, or a minor in an interdisciplinary social science field with practical applications. Conflict analysis and resolution is committed to analyzing the sources and dynamics of conflict and the means for resolution toward lasting peace. Conflict resolution students take a series of core courses that provide a background in conflict theory, analysis, and conflict resolution skills. All conflict analysis and resolution majors also choose an area of concentration. There are six concentrations: Building Peace in Divided Societies, Global Engagement, Political and Social Action, Justice and Reconciliation, Interpersonal Dynamics, and Collaborative Leadership. After selecting a concentration, students choose courses from units throughout the university that relate to the concentration and their areas of interest. The major also requires three credits of field experience in the form of an internship, a service-learning, independent research, or study abroad.

Graduate Programs

Phone: 703-993-1300  
E-mail: scarinfo@gmu.edu  
Location: Arlington Campus

PhD Program

Terrence Lyons, PhD Program Director

The PhD program in Conflict Analysis and Resolution, the first of its kind in the United States, provides advanced study for students in the fields of conflict and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and the private sectors. The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

MS Program

Agnieszka Paczynska, MS Program Director

The MS in Conflict Analysis and Resolution is a professional program that prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

Graduate Certificates

Mara Schoeny, Certificate Program Director

Four graduate certificate programs are administered by S-CAR. Each of these one-year, 15-credit programs is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for mid-career professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields.

Academic Policies
Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

Transfer Students

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all George Mason University's Mason Core requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 - Advanced Composition and a synthesis course.

Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a BA are considered to have met all school requirements except for proficiency in a foreign language.

Students with a bachelor's degree from an accredited institution who are pursuing a BA in this school are considered to have met all school requirements except for proficiency in a foreign language.

Appeal of Decisions

The policies of the School for Conflict Analysis and Resolution are designed to be consistent, equitable, and transparent. Our office strives to be thorough, timely, and open to answer any questions students may have regarding our decisions and/or the process through which they were reached. Students seeking clarification and explanation of the decision should request an appointment with the S-CAR Program Director to discuss their concerns.

Students have the right to appeal decisions regarding requests for academic actions. This step can only be taken after a request to meet with the Program Director. Students who wish to pursue an appeal after this meeting should do so only if they can provide sufficient and compelling reasons for their initial claim to be reconsidered. Such reasons include newly available documentation, proof of an irregularity in procedures, proof of inequity or inconsistency, or consequences so serious that further review is warranted. A student's dissatisfaction or disagreement with the decision does not constitute sufficient reason for a decision to be changed. Appeals are first reviewed by the Program Director. If denied, the appeal is forwarded to the S-CAR Dean. The decision of the S-CAR Dean is the final decision of the School.

If the appeal is a case involving a school-level policy, the Dean serves as the final point of appeal. If the appeal involves university level policies, students must first complete the school-level appeal process before appealing to the Provost's Office.

Undergraduate Degree(s)

Conflict Analysis and Resolution, BA

Banner Code: CA-BA-CONF

School/Department: School for Conflict Analysis and Resolution

The world is becoming increasingly connected and the ability to create and maintain cross-cultural connections is more important than ever. As the effects of violence and conflict are felt throughout the global community, we are seeing more and more opportunities for collaboration, problem solving, and peacebuilding in local communities and across international barriers. To prepare our students to make cross-cultural connections, Bachelor's of Arts in Conflict Analysis and Resolution students must demonstrate intermediate level proficiency in a foreign language.

All conflict analysis and resolution majors choose an area of concentration. There are six concentrations:
Building Peace in Divided Societies
Global Engagement
Political and Social Action
Justice and Reconciliation
Interpersonal Dynamics
Collaborative Leadership

Students must fulfill all requirements for bachelor's degrees as stated in Academic Policies including all Mason Core requirements. Students majoring in Conflict Analysis and Resolution must also complete the college-level requirements for foreign language proficiency as well as 51 major requirement credits for the BA degree.

Students pursuing a double major/degree with a program outside of the S-CAR undergraduate program will be expected to fulfill all of the Mason Core and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS for specific requirements.

Writing-Intensive Requirement

All Mason students are required to complete at least one course designated as "writing intensive" in their major at the 300-level or above. CONF 302 has been designated "writing intensive."

Major Coursework Grade Requirement

Students cannot use more than 12 credits of coursework within the major with a C- or D grade to count towards the Conflict Analysis and Resolution, BA. If a student receives C- or D grades in excess of the allowed number, they may retake courses to meet the major coursework grade requirement for graduation. Students taking a graduate course for undergraduate credit must achieve a grade of B- or higher for graduate course credits to count towards their undergraduate degree.

Physical Education Courses

PHED, PRLS, and RECR courses offered by the School of Recreation, Health, and Tourism that are activity courses cannot be counted toward the 120 credits required for a degree in S-CAR. Students may use non-activity PHED, PRLS, and RECR courses for elective credit for S-CAR degrees.

Advising

School for Conflict Analysis and Resolution advisors help students create an interdisciplinary course of study that meets their interests and career goals. All majors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Degree Requirements

Required core courses (27 credits)

- CONF 101 - Conflict and Our World Credits: 3
- CONF 210 - Theories of Conflict Analysis and Resolution Credits: 3
Field experience (3 credits)

Students can choose to fulfill this requirement through an internship, service learning, study abroad, or independent study.

Students may not be approved for field experience until they have earned at least 30 credits. It is recommended that students complete at least nine credits of conflict coursework before applying for field experience credit. Prior approval by the Director of Field Experience is required for students to receive credit through any field experience options. Students interested in trips with S-CAR can find information at scar.gmu.edu/field-experience. Students interested in study abroad through the Center for Global Education can find information at globaled.gmu.edu. Please contact an S-CAR advisor with questions or for information on the opportunities, policies, and procedures for field experience credit.

Students take a minimum of three credits from the following:

- CONF 370 - Internship Field Experience Credits: 1-9
- CONF 375 - Special Programs Field Experience Credits: 1-6
- CONF 385 - International Field Experience Credits: 3
- CONF 485 - Service Learning Intensive Credits: 1-9
- CONF 499 - Independent Research in Conflict Analysis and Resolution Credits: 1-6

Skills and Practice (3 credits)

This three credit requirement can be fulfilled by taking (1) an additional 3 credits of field experience selected from the courses above, (2) a foreign language course at the 250 level or higher, or (3) one of the 3 credit courses or three of the 1 credit courses listed below.

- CONF 325 - Dialogue and Difference Credits: 3
- CONF 398 - Special Topics in Advanced Techniques and Practices Credits: 3

A combination of 3 different 1-credit skills courses

- CONF 310 - Special Topics in Practice Credits: 1-6
- CONF 314 - Advising Seminar for Conflict Majors Credits: 1
- CONF 331 - Simulation in Community and Organizational Conflict Resolution Credits: 1
- CONF 341 - Simulation in Global Conflict Resolution Credits: 1
- CONF 499 - Independent Research in Conflict Analysis and Resolution Credits: 1-6

Courses may NOT double count for the concentration requirement and the skills and practice requirement.

Foreign Language Proficiency (0-12 credits)
Students must demonstrate intermediate-level proficiency in one foreign language. This requirement may be fulfilled by successfully completing a course in a foreign language course numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on a university approved foreign language proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement.

Concentration courses (18 credits)

There are six concentrations: Building Peace in Divided Societies, Global Engagement, Political and Social Action, Justice and Reconciliation, Interpersonal Dynamics, and Collaborative Leadership. To fulfill the concentration requirement students select six concentration courses. Four of those six courses must be taken from within their chosen concentration. The remaining two concentration courses may be taken from any of the concentration course lists. Special topics courses relevant to the concentration and/or courses that provide regional expertise can be substituted with departmental approval. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. At least two of the six concentration courses must be CONF courses. Courses may not double count for the concentration requirement and the skills and practice requirement.

▲ Concentration in Building Peace in Divided Societies (BPDS)

Focuses on how divided societies with a history of conflict seek to transform relationships and situations of violence and injustice. Examines communities and societies that have experienced conflict and how individuals and groups build peace locally and globally.

Students choose at least four of their six concentration courses from the following:

- CONF 325 - Dialogue and Difference Credits: 3
- CONF 435 - Building Peace in Divided Societies Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- CULT 320 - Globalization and Culture Credits: 3
- ECON 360 - Economics of Developing Areas Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GOVT 342 - Diplomacy Credits: 3
- HIST 373 - The Civil War and Reconstruction Credits: 3
- INTS 305 - Conflict Resolution and Transformation Credits: 6
- SOCI 320 - Social Structure and Globalization Credits: 3

▲ Concentration in Global Engagement (GLBE)

Focuses on studying the dynamics and impact of global conflict resolution. Examines domestic and international dimensions of security, state-to-state conflict, internal wars, terrorism, migration, negotiation, and diplomacy. Explores what can be done to reduce violent conflict and increase peace and security.

Students choose at least four of their six concentration courses from the following:

- CONF 345 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
- CRIM 405 - Law and Justice around the World Credits: 3
- ECON 385 - International Economic Policy Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- GGS 301 - Political Geography Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GOVT 322 - International Relations Theory Credits: 3
- GOVT 342 - Diplomacy Credits: 3
- GOVT 446 - International Law and Organization Credits: 3
- INTS 416 - Refugee and Internal Displacement Credits: 3
- SOCI 388 - Violence and Religion Credits: 3

▲ Concentration in Political and Social Action (PSA)

Focuses on the ways that people organize themselves to effect change in their societies. This concentration explores social action, social organization, social movements, and civil resistance to analyze and investigate the role of constructive conflict.

Students choose at least four of their six concentration courses from the following:

- CONF 394 - Human Rights and Inequality Credits: 3
- COMM 326 - Rhetoric of Social Movements and Political Controversy Credits: 3
- ECON 309 - Economic Problems and Public Policies Credits: 3
- GOVT 301 - Public Law and the Judicial Process Credits: 3
- GOVT 364 - Public Policy Making Credits: 3
- INTS 304 - Social Movements and Community Activism Credits: 4
- INTS 334 - Environmental Justice Credits: 4
- INTS 362 - Social Justice and Human Rights Credits: 3
- PSYC 427 - Community Engagement for Social Change Credits: 3
- SOCI 307 - Social Movements and Political Protest Credits: 3
- SOCI 340 - Power, Politics, and Society Credits: 3
- SOCI 352 - Social Problems and Solutions Credits: 3

▲ Concentration in Justice and Reconciliation (JRCN)

Students choose four of their six concentration courses from the following:

- CONF 394 - Human Rights and Inequality Credits: 3
- CONF 435 - Building Peace in Divided Societies Credits: 3
- CRIM 307 - Social Inequality, Crime, and Justice Credits: 3
- CRIM 404 - Crime Victims and Victimization Credits: 3
- CRIM 406 - Family Law and the Justice System Credits: 3
- INTS 300 - Law and Justice Credits: 3
- INTS 314 - Conflict, Trauma and Healing Credits: 6
- INTS 362 - Social Justice and Human Rights Credits: 3
- SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
- SOCI 355 - Social Inequality Credits: 3

▲ Concentration in Interpersonal Dynamics (INTD)
Focuses on the dynamics of social interaction that lead to interpersonal conflict and the processes and skills that support the transformation of these conflicts. Issues examined include intercultural communication, psychology of groups, family relationships, and other dimensions of human relations.

Students choose four of their six concentration courses from the following:

- CONF 325 - Dialogue and Difference Credits: 3
- CONF 425 - Mediating Conflict Credits: 3
- COMM 301 - Foundations of Interpersonal Communication Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- COMM 401 - Interpersonal Communication in the Workplace Credits: 3
- INTS 317 - Issues in Family Relationships Credits: 4
- PSYC 231 - Social Psychology Credits: 3
- PSYC 379 - Applied Cross-Cultural Psychology Credits: 3
- PSYC 417 - Science of Well Being Credits: 3
- PSYC 467 - The Psychology of Working in Groups and Teams Credits: 3
- SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
- SOCI 315 - Contemporary Gender Relations Credits: 3

▲ Concentration in Collaborative Leadership (CLDR)

Focuses on improving the capacity of leaders to work with conflict and manage change. Includes topics in conflict transformation, mediation, dialogue, and organizational leadership.

Students choose four of their six concentration courses from the following:

- CONF 325 - Dialogue and Difference Credits: 3
- COMM 201 - Small Group Communication Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- GOVT 351 - Administration in the Political System Credits: 3
- INTS 331 - The Nonprofit Sector Credits: 4
- INTS 404 - Ethics and Leadership Credits: 4
- INTS 435 - Leadership in a Changing Environment Credits: 4
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- PRLS 316 - Leadership and Outdoor Education Credits: 3
- PSYC 333 - Industrial and Organizational Psychology Credits: 3
- PSYC 335 - Psychology of Creativity and Innovation Credits: 3

▲ Individualized Concentration (IND)

Students interested in creating their own concentration can work with an advisor to decide upon a set of at least six courses that form a cohesive theme and will fulfill the requirements of the BA in Conflict Analysis and Resolution. Individualized concentrations must be approved by the Director of the Undergraduate Program.

Mason Core (40 credits)

Note: some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.
Expand each item below for a link to specific course lists for each category.

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Electives

Remainder credits needed to bring the degree total to 120 may be fulfilled with general elective courses. PHED and PRLS activity courses cannot be counted toward elective credits required for a degree in Conflict Analysis and Resolution.

Total: 120 credits

Conflict Analysis and Resolution, BS

Banner Code: CA-BS-CONF

School/Department: School for Conflict Analysis and Resolution

Analytical skills and techniques are critical to solving the world's toughest problems. In order to solve conflict we must first understand it. Critical thinking and research skills are the focus of our Bachelor of Science program and are in demand by employers of all sectors. Students pursuing a Bachelor's of Science in Conflict Analysis and Resolution develop research skills and have the opportunity to gain experience designing surveys, conducting interviews, analyzing statistics, and organizing data.

All conflict analysis and resolution majors choose an area of concentration. There are six concentrations:

- Building Peace in Divided Societies
• Global Engagement
• Political and Social Action
• Justice and Reconciliation
• Interpersonal Dynamics
• Collaborative Leadership

Students must fulfill all requirements for bachelor's degrees as stated in Academic Policies including all Mason Core requirements. S-CAR majors must complete the 6 credit college-level requirement in research methods as well as 51 major requirement credits for the BS degree.

Students pursuing a double major/degree with a program outside of the S-CAR undergraduate program will be expected to fulfill all of the Mason Core and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS for specific requirements.

Writing-Intensive Requirement

All Mason students are required to complete at least one course designated as "writing intensive" in their major at the 300-level or above. CONF 302 has been designated "writing intensive."

Major Coursework Grade Requirement

Students cannot use more than 12 credits of coursework within the major with a C- or D grade to count towards the Conflict Analysis and Resolution, BS. If a student receives C- or D grades in excess of the allowed number, they may retake courses to meet the major coursework grade requirement for graduation. Students taking a graduate course for undergraduate credit must achieve a grade of B- or higher for graduate course credits to count towards their undergraduate degree.

Physical Education Courses

PHED, PRLS, and RECR courses offered by the School of Recreation, Health, and Tourism that are activity courses cannot be counted toward the 120 credits required for a degree in S-CAR. Students may use non-activity PHED, PRLS, and RECR courses for elective credit for S-CAR degrees.

Advising

School for Conflict Analysis and Resolution advisors help students create an interdisciplinary course of study that meets their interests and career goals. All majors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Degree Requirements

Required core courses (27 credits)

• CONF 101 - Conflict and Our World Credits: 3
• CONF 210 - Theories of Conflict Analysis and Resolution Credits: 3
Field experience (3 credits)

Students can choose to fulfill this requirement through an internship, service learning, study abroad, or independent study.

Students may not be approved for field experience until they have earned at least 30 credits. It is recommended that students complete at least 9 credits of conflict coursework before applying for field experience credit. Prior approval by the Director of Field Experience is required for students to receive credit through any field experience options. Students interested in trips with S-CAR can find information at scar.gmu.edu/field-experience. Students interested in study abroad through the Center for Global Education can find information at globaled.gmu.edu. Please contact an S-CAR advisor with questions or for information on the opportunities, policies, and procedures for field experience credit.

Students take a minimum of three credits from the following:

- CONF 370 - Internship Field Experience Credits: 1-9
- CONF 375 - Special Programs Field Experience Credits: 1-6
- CONF 385 - International Field Experience Credits: 3
- CONF 485 - Service Learning Intensive Credits: 1-9
- CONF 499 - Independent Research in Conflict Analysis and Resolution Credits: 1-6

Skills and Practice (3 credits)

This three credit requirement can be fulfilled by taking (1) an additional 3 credits of field experience selected from the courses above, or (2) a foreign language course at the 250 level or higher, or (3) one 3 credit course or three 1 credit courses from the following.

- CONF 325 - Dialogue and Difference Credits: 3
- CONF 398 - Special Topics in Advanced Techniques and Practices Credits: 3

A combination of 3 different 1-credit skills courses chosen from the following:

- CONF 310 - Special Topics in Practice Credits: 1-6
- CONF 314 - Advising Seminar for Conflict Majors Credits: 1
- CONF 331 - Simulation in Community and Organizational Conflict Resolution Credits: 1
- CONF 341 - Simulation in Global Conflict Resolution Credits: 1
- CONF 499 - Independent Research in Conflict Analysis and Resolution Credits: 1-6

Courses may NOT double count for the concentration requirement and the skills and practice requirement.

Research methods (6 credits)
Students must take at least six credits from the following:

- ANTH 380 - Language and Culture Credits: 3
- ANTH 450 - Qualitative Methods: Nonstatistical Approaches in Culture and Social Research Credits: 3
- CRIM 315 - Research Methods and Analysis in Criminology Credits: 3
- ENGH 318 - Introduction to Cultural Studies Credits: 3
- GOVT 300 - Research Methods and Analysis Credits: 4
- GOVT 366 - Public Policy Analysis Credits: 3
- HIST 300 - Introduction to Historical Method Credits: 3
- HIST 390 - The Digital Past Credits: 3
- PHIL 357 - Philosophy of the Social Sciences Credits: 3 or SOCI 599 - Issues in Sociology Credits: 1-3
- PSYC 300 - Statistics in Psychology Credits: 4
- PSYC 301 - Research Methods in Psychology Credits: 3
- SOCI 303 - Methods and Logic of Inquiry Credits: 3
- SOCI 313 - Statistics for the Behavioral Sciences Credits: 4
- SOCI 410 - Social Surveys and Opinion Measurements Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3
- STAT 474 - Introduction to Survey Sampling Credits: 3
- WMST 410 - Feminist Approaches to Social Research Credits: 3

Concentration courses (18 credits)

There are six concentrations: Building Peace in Divided Societies, Global Engagement, Political and Social Action, Justice and Reconciliation, Interpersonal Dynamics, and Collaborative Leadership. To fulfill the concentration requirement students select six concentration courses. Four of those six courses must be taken from within their chosen concentration. The remaining two concentration courses may be taken from any of the concentration course lists. Special topics courses relevant to the concentration and/or courses that provide regional expertise can be substituted with departmental approval. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. At least two of the six concentration courses must be CONF courses. Courses may not double count for the concentration requirement and the skills and practice requirement.

▲ Concentration in Building Peace in Divided Societies (BPDS)

Focuses on how divided societies with a history of conflict seek to transform relationships and situations of violence and injustice. Examines communities and societies that have experienced conflict and how individuals and groups build peace locally and globally.

Students choose at least four of their six concentration courses from the following:

- CONF 325 - Dialogue and Difference Credits: 3
- CONF 435 - Building Peace in Divided Societies Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- CULT 320 - Globalization and Culture Credits: 3
- ECON 360 - Economics of Developing Areas Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GOVT 342 - Diplomacy Credits: 3
- HIST 373 - The Civil War and Reconstruction Credits: 3
• INTS 305 - Conflict Resolution and Transformation Credits: 6
• SOCI 320 - Social Structure and Globalization Credits: 3

▲ Concentration in Global Engagement (GLBE)

Focuses on studying the dynamics and impact of global conflict resolution. Examines domestic and international dimensions of security, state-to-state conflict, internal wars, terrorism, migration, negotiation, and diplomacy. Explores what can be done to reduce violent conflict and increase peace and security.

Students choose four of their six concentration courses from the following:

• CONF 345 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
• CRIM 405 - Law and Justice around the World Credits: 3
• ECON 385 - International Economic Policy Credits: 3
• EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
• GGS 301 - Political Geography Credits: 3
• GGS 307 - Sustainable Development Credits: 3
• GOVT 322 - International Relations Theory Credits: 3
• GOVT 342 - Diplomacy Credits: 3
• GOVT 446 - International Law and Organization Credits: 3
• INTS 416 - Refugee and Internal Displacement Credits: 3
• SOCI 388 - Violence and Religion Credits: 3

▲ Concentration in Political and Social Action (PSA)

Focuses on the ways that people organize themselves to effect change in their societies. This concentration explores social action, social organization, social movements, and civil resistance to analyze and investigate the role of constructive conflict.

Students choose four of their six concentration courses from the following:

• CONF 394 - Human Rights and Inequality Credits: 3
• COMM 326 - Rhetoric of Social Movements and Political Controversy Credits: 3
• ECON 309 - Economic Problems and Public Policies Credits: 3
• GOVT 301 - Public Law and the Judicial Process Credits: 3
• GOVT 364 - Public Policy Making Credits: 3
• INTS 304 - Social Movements and Community Activism Credits: 4
• INTS 334 - Environmental Justice Credits: 4
• INTS 362 - Social Justice and Human Rights Credits: 3
• PSYC 427 - Community Engagement for Social Change Credits: 3
• SOCI 307 - Social Movements and Political Protest Credits: 3
• SOCI 340 - Power, Politics, and Society Credits: 3
• SOCI 352 - Social Problems and Solutions Credits: 3

▲ Concentration in Justice and Reconciliation (JRCN)

Focuses on the relationships between human rights, justice, and conflict resolution. Encompasses a spectrum of coursework including legal dimensions of human rights, trauma, memory, healing, conflict transformation, and forms of restorative justice.
Students choose four of their six concentration courses from the following:

- CONF 394 - Human Rights and Inequality Credits: 3
- CONF 435 - Building Peace in Divided Societies Credits: 3
- CRIM 307 - Social Inequality, Crime, and Justice Credits: 3
- CRIM 404 - Crime Victims and Victimization Credits: 3
- CRIM 406 - Family Law and the Justice System Credits: 3
- INTS 300 - Law and Justice Credits: 3
- INTS 314 - Conflict, Trauma and Healing Credits: 6
- INTS 362 - Social Justice and Human Rights Credits: 3
- SOCI 308 - Race and Ethnicity in a Changing World Credits: 3
- SOCI 355 - Social Inequality Credits: 3

▲ Concentration in Interpersonal Dynamics (INTD)

Focuses on the dynamics of social interaction that lead to interpersonal conflict and the processes and skills that support the transformation of these conflicts. Issues examined include intercultural communication, psychology of groups, family relationships, and other dimensions of human relations.

Students choose four of their six concentration courses from the following:

- CONF 325 - Dialogue and Difference Credits: 3
- CONF 425 - Mediating Conflict Credits: 3
- COMM 301 - Foundations of Interpersonal Communication Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- COMM 401 - Interpersonal Communication in the Workplace Credits: 3
- INTS 317 - Issues in Family Relationships Credits: 4
- PSYC 231 - Social Psychology Credits: 3
- PSYC 379 - Applied Cross-Cultural Psychology Credits: 3
- PSYC 417 - Science of Well Being Credits: 3
- PSYC 467 - The Psychology of Working in Groups and Teams Credits: 3
- SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
- SOCI 315 - Contemporary Gender Relations Credits: 3

▲ Concentration in Collaborative Leadership (CLDR)

Focuses on improving the capacity of leaders to work with conflict and manage change. Includes topics in conflict transformation, mediation, dialogue, and organizational leadership.

Students choose four of their six concentration courses from the following:

- CONF 325 - Dialogue and Difference Credits: 3
- COMM 201 - Small Group Communication Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- GOVT 351 - Administration in the Political System Credits: 3
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- INTS 404 - Ethics and Leadership Credits: 4
- INTS 435 - Leadership in a Changing Environment Credits: 4
• INTS 331 - The Nonprofit Sector Credits: 4
• PRLS 316 - Leadership and Outdoor Education Credits: 3
• PSYC 333 - Industrial and Organizational Psychology Credits: 3
• PSYC 335 - Psychology of Creativity and Innovation Credits: 3

▲Individualized Concentration (IND)

Students interested in creating their own concentration can work with an advisor to decide upon a set of at least six courses that will fulfill the requirements of the BS in Conflict Analysis and Resolution.

Mason Core (40 credits)

Note: some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Expand each item below for a link to specific course lists for each category.

Foundation Requirements (15-19 credits)

• Mason Core UWCU - Written Communication Credits: 6
• Mason Core UOC - Oral Communication Credits: 3
• Mason Core UQR - Quantitative Reasoning Credits: 3
• Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

• Mason Core UFA - Arts Credits: 3
• Mason Core UGU - Global Understanding Credits: 3
• Mason Core ULIT - Literature Credits: 3
• Mason Core UNSL - Natural Science Credits: 7
• Mason Core USBS - Social and Behavioral Sciences Credits: 3
• Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

• Mason Core USYN - Synthesis/Capstone Credits: minimum 3

Electives

Remaining credits needed to bring the degree total to 120 may be fulfilled with general elective courses. PHED and PRLS activity courses cannot be counted toward elective credits required for a degree in Conflict Analysis and Resolution.

Total: 120 credits
Undergraduate Minor(s)

Conflict Analysis and Resolution Minor

Banner Code: CONF

School/Department: School for Conflict Analysis and Resolution

This minor provides students with the theory and skills to examine how and why conflicts occur and what can be done to mitigate their destructive aspects while reinforcing their constructive potential. Courses in the minor highlight relational, social, structural, and cultural factors that influence conflict and its resolution. This minor engages students in understanding the complexity of contemporary issues and problems and can be applied to many fields of study or professional careers.

The conflict analysis and resolution minor is open to students in all academic programs, schools, and majors.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Advising

School for Conflict Analysis and Resolution advisors help students create a course of study that meets their interests and career goals. All majors and minors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Minor Requirements

Students pursuing this minor must complete 15 credits of coursework in conflict analysis and resolution with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor.

Required Core Courses (9 credits)

- CONF 101 - Conflict and Our World: 3 OR CONF 210 - Theories of Conflict Analysis and Resolution: 3
- AND
- CONF 300 - Conflict Resolution Techniques and Practice: 3
- AND one of the following four courses:
  - CONF 302 - Culture, Identity, and Conflict: 3
  - CONF 320 - Interpersonal Conflict Analysis and Resolution: 3
  - CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution: 3
  - CONF 340 - Global Conflict Analysis and Resolution: 3

CONF Selective Courses (6 credits)

Students select six conflict analysis and resolution (CONF) credits from core, elective and special topic courses, in addition to the nine core credits.
Total: 15 credits

**Bachelor's/Accelerated Master's Program(s)**

**Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS**

Web: scar.gmu.edu

School/Department: *School for Conflict Analysis and Resolution*

The Accelerated Master's is designed for highly qualified and highly motivated undergraduate students majoring in Conflict Analysis and Resolution. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn the Conflict Analysis and Resolution, BA or BS and the Conflict Analysis and Resolution, MS after satisfactory completion of 155 credits, sometimes within five years. It provides a streamlined MS application process with no application fee required. See the Bachelor's/Accelerated Master's Degrees section of the catalog for George Mason University policies related to this program.

This program of study is offered by the School for Conflict Analysis and Resolution.

For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For additional application requirements and information specific to the accelerated MS in Conflict Analysis and Resolution, see Eligibility, Policies, and Deadlines on the departmental web site.

**Accelerated Option Requirements**

During the *first semester of senior year*, after completing 90 hours of undergraduate coursework, admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the *second semester of senior year*, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.

At the beginning of the last semester of undergraduate study, the *Bachelor's/Accelerated Master's Transition Form* must be submitted to the Office of the University Registrar. Upon completion and conferral of the undergraduate degree they are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. Students must begin their master's program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.

**GPA Requirements**

- Students must have a minimum cumulative GPA of a 3.5 or higher at the time of application.
- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master's program until completion of the undergraduate program.
If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master's program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master's program after conferral of the undergraduate degree however; re-application does not guarantee admission.

At the time of the undergraduate degree conferral, students' GPAs must meet the standard required for admission to the master's degree.

Course Criteria

- Students may only take courses indicated on their Accelerated Master's Program Application and approved by an academic advisor.
- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Student Requirements

- Students are responsible for ensuring the submission of the Bachelor's/Accelerated Master's Transition Form to the Registrar's office at the beginning of the last undergraduate semester.
- Students admitted to the accelerated master's program must enroll in the graduate program in the semester immediately following conferral of the undergraduate degree.

Additional policies can be found on the program website.

Dual Degree(s)

Conflict Analysis and Resolution, MS and Social Work, MSW Dual Degree (S-CAR)

Banner Codes: HH-MSW-SOCW and CA-MS-CONF

School/Department: School for Conflict Analysis and Resolution

The Department of Social Work and the School for Conflict Analysis and Resolution have joined forces to offer a three year dual-degree program. Students can earn both an MSW and an MS in Conflict Analysis and Resolution while taking advantage of the diversity of the Washington, D.C., metropolitan area and the university's proximity to the nation's capital. This is the only dual-degree program of its kind.

MSW-MS Common Requirements

Admission Requirements

Applicants must meet the admission standards and application requirements specified in the Admissions section of the catalog and apply using the online Application for Graduate Admission. The application process is competitive, and applications are considered for the fall semester only.

Students interested in the 3-year dual degree program submit one online Application for Graduate Admission, select the MSW in Social Work as a primary program, and submit all application support materials to the Office of Graduate Admission in the
College of Health and Human Services. Applicants should communicate their interest in completing the dual degree program in their essays, and recommendations should address the dual program interest. Students must be admitted to both programs in the same semester (fall only) to be admitted to the dual degree program.

For application deadlines and detailed application requirements please refer to the CHHS Admissions website. Interested students should consult the MSW program website, the MSW program catalog text, and the MSW program director for additional information prior to applying.

**Transfer of Credit**

Transfer credit is governed by university transfer of graduate credit policy and the university requirements for master's degrees, and transfer credits must be approved by the program director and the dean. Students who enroll initially through non-degree studies should seek course advising through the department prior to taking a course and plan to submit their application to the dual degree program as soon as possible. Graduate MSW Social Work courses are restricted to students who have been admitted to the program and are not open to non-degree students.

Please refer to the Transfer of Credit policy for the MSW in Social Work for departmental policy governing courses taken at another institution and the maximum number of credits allowed.

**MSW-MS Degree Requirements**

To graduate with the dual degree, students must successfully complete the following:

**Social Work Courses (51 credits)**

- SOCW 623 - Human Behavior and Social Systems I Credits: 3
- SOCW 624 - Human Behavior and Social Systems II Credits: 3
- SOCW 651 - Social Policies, Programs, and Services Credits: 3
- SOCW 652 - Influencing Social Policy Credits: 3
- SOCW 657 - Direct Social Work Practice I Credits: 3
- SOCW 658 - Direct Social Work Practice II Credits: 3
- SOCW 670 - Communication and Technology for Social Work Practice Credits: 3
- SOCW 672 - Foundation Field Practicum and Seminar I Credits: 3
- SOCW 673 - Foundation Field Practicum and Seminar II Credits: 3
- SOCW 684 - Social Work and the Law Credits: 3
- SOCW 685 - Organizational Leadership for Social Workers Credits: 3
- SOCW 687 - Empowering Communities for Change Credits: 3
- SOCW 688 - Advanced Research in Social Work Credits: 3
- SOCW 694 - Social Change Practicum I Credits: 3
- SOCW 695 - Social Change Practicum II Credits: 3

Choose two from the following courses (6 credits)

At least one of the two courses must be an Advanced Policy course.

**Advanced Policy (at least 3 credits)**

- SOCW 653 - Immigration Policy Credits: 3
• SOCW 654 - Social Policy for Children and Youth Credits: 3
• SOCW 655 - Aging Programs and Policies Credits: 3
• SOCW 663 - Global Human Rights Policy Credits: 3
• SOCW 665 - Integrated Behavioral Health Policy Credits: 3
• SOCW 676 - Selected Topics in Social Work and Social Change Credits: 3

Additional Course Options

• SOCW 630 - Forensic Social Work Practice Credits: 3
• SOCW 664 - Art Therapy and Social Work Credits: 3
• SOCW 674 - Psychopathology Credits: 3
• SOCW 675 - Selected Topics in Clinical Practice Credits: 3
• SOCW 676 - Selected Topics in Social Work and Social Change Credits: 3
• SOCW 677 - Family Therapy Credits: 3
• SOCW 678 - Trauma and Recovery Credits: 3
• SOCW 679 - Military Social Work Credits: 3
• SOCW 682 - Substance Abuse Interventions Credits: 3
• SOCW 689 - Clinical Practice with Older Adults Credits: 3
• SOCW 697 - Thesis Project Seminar Credits: 3

Conflict Analysis and Resolution Courses (35 credits)

• CONF 600 - Foundations of Conflict Analysis and Resolution Credits: 6
  Students choose 1 conflict inquiry course, either CONF 610 or CONF 660
• CONF 610 - Conflict Inquiry Credits: 3
  Or
• CONF 660 - Conflict Assessment and Program Evaluation Credits: 3
  Students take 6 credits of conflict praxis, both CONF 657 and CONF 625
• CONF 657 - Facilitation Skills Credits: 3
• CONF 625 - Engaging Conflict Credits: 3 CONF 657 should be completed before a student takes CONF 625
• CONF 694 - Internship Credits: 1-6

Professional Development Seminars (5 credits)

• CONF 795 - Professional Development Seminars Credits: 1-2

Electives (12 credits)

• 12 credits of CONF Electives, selected with approval from S-CAR

Total: 86 credits
Master's Degree(s)

Conflict Analysis and Resolution, MS

Banner Code: CA-MS-CONF

School/Department: School for Conflict Analysis and Resolution

This 42-credit, two-year professional program prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

An accelerated master's option is available to students in the bachelor's program. See Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS for specific requirements.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admission section of this catalog. In addition, applicants must submit all undergraduate and graduate transcripts; two letters of recommendation, one of which should be from a faculty member in the applicant's undergraduate or graduate major field; a resume or curriculum vitae; and a 750- to 1,000-word essay on goals and reasons for seeking admission to the program. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students sections in the Admission section. Students can be admitted to the MS program for either the Fall or Spring semesters.

Background courses in social sciences, as well as prior work experience, are desirable. Prior graduate academic work is evaluated on an individual basis for possible transfer credit and fulfillment of program requirements; however, Mason usually does not reduce the total credits required for the degree. Students may enroll on a full- or part-time basis.

Transfer of Non-Degree Credit

A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR's graduate certificate program may be transferred into the MS program. How credit will be counted will be determined in consultation with the admitted student's advisor. A maximum of six credits of non-S-CAR courses taken as non-degree credit can be counted toward the MS program. Courses counted toward another degree cannot be transferred.

Adding an S-CAR Certificate Program

Students may elect to complete an S-CAR Graduate Certificate in addition to the MS program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of conflict resolution practice. Certain graduate certificate courses can be used to fulfill MS program requirements. Students should consult with the Certificate Program Director and the Master's Program Director for policies on counting certificate courses toward the MS degree.

Peace Corps Master's International
The Master's International, a joint program of Mason and the Peace Corps enables participants to prepare for Peace Corps volunteer services while earning an MS in Conflict Analysis and Resolution. Students apply separately to the Peace Corps and to Mason. The 42-credit curriculum provides students with skills and tools to prepare them for work as community development leaders during their Peace Corps Service. An accelerated pathway is provided to allow Peace Corps volunteers to complete 30 credits prior to overseas service (including a summer term), students then receive six credits of Conflict Praxis (CONF 625 and 3 elective Praxis credits) for overseas Peace Corps service. Mason will provide tuition support for the six credits earned overseas. Students then return to Mason for a semester to complete the program. Students accepted into the academic program but waiting for notification of acceptance from the Peace Corps may begin their Master's program but will not be eligible for tuition support until they are accepted into the Peace Corps. More information on Master's International Program can be found at www.peacecorps.gov/index.cfm

**Dual Degree Program with the University of Malta**

Students have the opportunity to pursue a MS in Conflict Analysis and Resolution from George Mason University and a MA in Conflict Resolution and Mediterranean Security from the University of Malta through an innovative Dual Degree Program. Teaching faculty includes professors from both George Mason University and the University of Malta. All teaching is in English and all classes are held at the Valetta Campus of the University of Malta. The 400-year-old University of Malta Valletta campus incorporates state-of-the-art instructional technology. The entire program is delivered over three intensive semesters on a full time basis starting in late September. Classes are held on a two week intensive block basis for the first two semesters while the third semester is devoted to the completion of a thesis.

Orientation in Malta begins at the end of September. Classes run from the beginning of October through June. Students work on their theses from June until October. University of Malta graduation is in November and Mason graduation is in December. The total duration of the program is 15 months. More information is available at scar.gmu.edu/academics/maltaprogram. Students interested in pursuing the dual degree should apply through University of Malta at www.um.edu.mt/imp.

**Degree Requirements**

Students must complete 42 credits as shown below. Mason requires all students to complete the master's degree within six years of their official admission date.

Because the choice of electives can vary significantly according to individual goals or needs, each student should develop a plan of study that should be discussed once each semester with the advisor and updated as appropriate.

Please check the S-CAR student handbook for information on registration procedures.

**Required courses (15 credits)**

**Introductory Course (6 Credits)**

Students must take the introductory course in the first semester.

- CONF 600 - Foundations of Conflict Analysis and Resolution Credits: 6

**Conflict Inquiry (3 credits)**

Students choose from one of the below conflict inquiry courses.
• CONF 610 - Conflict Inquiry Credits: 3
• CONF 660 - Conflict Assessment and Program Evaluation Credits: 3

**Conflict Praxis (6 credits)**

Students must take CONF 657 and at least 3 credits of CONF 625. Additional credits of CONF 625 will count as electives.

• CONF 657 - Facilitation Skills Credits: 3
• CONF 625 - Engaging Conflict Credits: 3

**Elective courses (27 Credits)**

Electives are any 500, 600, or 700 level CONF courses, except required courses. With the advisor's approval, each student is eligible to include a maximum of six credits of electives from outside the S-CAR program, including courses in other Mason departments, consortium courses, and transfer courses from other universities.

Students wishing to complete a Master's Thesis or Internship would count these credits towards their elective requirement.

**Internship**

The CONF 694 internship course provides students with opportunities to use and develop conflict resolution skills, integrate theory and practice of conflict analysis and resolution, and network with professionals in the field to enhance employment opportunities. The internship requires 160 hours of supervised work per every 3 credits. The goals and objectives of the internship are defined in an application and memorandum of agreement to be signed by the student, the internship site supervisor, and the director of field experience before the internship begins.

Students may either take 3 or 6 credits of CONF 694.

• CONF 694 - Internship Credits: 1-6 (take 3 or 6 credits)

**Thesis**

Students wishing to complete a Master's Thesis are strongly encouraged to take CONF 797 (Proposal Development) the semester before beginning the thesis project. Before registering, students must have identified a Master's thesis committee chair to supervise the project. Students should contact S-CAR student services to receive the CRN to register for thesis.

• CONF 797 - Proposal Development Credits: 1
• CONF 799 - Thesis Credits: 1-6

**Directed Readings**

Only two directed readings may be applied toward requirements for the master's degree (maximum 6 credits).

• CONF 697 - Directed Readings and Research Credits: 1-3

**Total: 42 credits**
Master's Level Certificate(s)

Advanced Skills Graduate Certificate

Banner Code: CA-CERG-CARA

School/Department: School for Conflict Analysis and Resolution

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The Advanced Skills Certificate covers conflict resolution skills in challenging conflicts and considers innovative and emerging practices.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students in the Admission section of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer; students admitted for the spring term should expect their certificate program to take at least 18 months.

Please note that some classes for this graduate certificate are offered only on Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

The Advanced Skills Graduate Certificate may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

Certificate Requirements

Required Courses (12 credits)

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 650 - Conflict Analysis and Resolution Advanced Skills Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)
Elective Course (3 credits)

Students may choose from the following:

- CONF 657 - Facilitation Skills Credits: 3 (spring)
- CONF 658 - Diversity and Difference in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 659 - Leadership in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 665 - Special Topics in Conflict Analysis and Resolution Credits: 3

Note:

Application of any other course toward fulfillment of the elective requirement must be approved by the Certificate Program Director.

Total: 15 credits

Collaborative Leadership in Community Planning Graduate Certificate

Banner Code: CA-CERG-CARC

School/Department: School for Conflict Analysis and Resolution

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The Collaborative Leadership in Community Planning Certificate covers designing collaborative processes to work with diverse stakeholders to build meaningful and lasting shared agreements in land use, development or other community planning contexts.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students in the Admissions section of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.
Please note that some courses for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

The Collaborative Leadership in Community Planning Graduate Certificate may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

Certificate Requirements

Required Courses (12 Credits)

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 651 - Collaborative Community Planning Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)

Elective Courses (3 Credits)

Students may choose from the following:

- CONF 657 - Facilitation Skills Credits: 3 (spring)
- CONF 658 - Diversity and Difference in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 659 - Leadership in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 665 - Special Topics in Conflict Analysis and Resolution Credits: 3

Note:

Application of any other course toward fulfillment of the elective requirement must be approved by the Certificate Program Director.

Total: 15 credits

Prevention, Reconstruction, and Stabilization Contexts Graduate Certificate

Banner Code: CA-CERG-CARP

School/Department: School for Conflict Analysis and Resolution

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution
relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The Prevention, Reconstruction, and Stabilization Contexts Graduate Certificate augments development, defense, security, or humanitarian aid work experience with the theories and skills of conflict analysis and resolution for designing, implementing, and evaluating conflict-sensitive initiatives internationally in areas of potential violence and post-conflict reconstruction and stabilization. Considers cross-sectoral approaches to long-term violence prevention and constructive conflict resolution.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission requirements for graduate study and application requirements as specified in the Admission section of this catalog. Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admission section of this catalog.

Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Please note that some classes for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

The graduate certificate in prevention, reconstruction and stabilization contexts may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

Certificate Requirements

Required Courses (12 Credits)

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 652 - Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)

Elective Courses (3 Credits)

Students may choose from the following:
This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The World Religions, Diplomacy and Conflict Resolution Certificate considers strategies to reduce global violence and terrorism by incorporating the best moral practices of religious communities into policy planning, diplomacy, civil society building and democratization. Covers strategies to elicit moderate moral religious expression in conflict regions to strengthen civil society and democracy.

Admission Requirements

Applicants to all graduate programs at George Mason University must meet all application and admission requirements for graduate study as specified in the Admission section of this catalog. Applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admissions section of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Please note that some classes for this graduate certificate program are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.
The graduate certificate in world religions, diplomacy, and conflict resolution may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

Certificate Requirements

Required Courses (12 Credits)

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 653 - World Religions, Diplomacy, and Conflict Resolution Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)

Elective Courses (3 Credits)

Total: 15 credits

Doctoral Degree(s)

Conflict Analysis and Resolution, PhD

Banner Code: CA-PHD-CONF

School/Department: School for Conflict Analysis and Resolution

The doctoral program, the first of its kind in the United States, provides advanced study for students in the field of conflict
analysis and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and private sectors.

The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

Admission

A master's or equivalent degree is required for admission to the PhD program. In addition to meeting all admission requirements for graduate study, applicants must submit:

- all undergraduate and graduate transcripts
- three letters of recommendation, one of which should be from a faculty member in the applicant's undergraduate or graduate major field
- a 750 to 1,000 word essay on goals and reasons for seeking admission to the program
- a written sample of work that shows the applicant's potential for completing dissertation research in a doctoral program
- a resume or curriculum vitae.

The Graduate Record Exam (GRE) or other standardized test scores are not required but may be submitted. The Test of English as a Foreign Language (TOEFL) is required of international students.

For more information, see the Admission of International Students section in the Admission section of this catalog. Although students may enroll on a full- or part-time basis, entry into the program is in the fall semester only.

Transfer of Non-Degree Credit

A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR's graduate certificate program may be transferred into the PhD program. How credit will be counted will be determined in consultation with the student's advisor and the Doctoral Program Director. A maximum of 6 credits of non-S-CAR courses taken as non-degree credit can be counted toward the PhD program. Courses counted toward another degree cannot be transferred.

Adding a S-CAR Certificate Program

Students may elect to complete a S-CAR graduate certificate in addition to the PhD program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of Conflict Resolution practice. Certain graduate certificate courses can be used to fulfill PhD program requirements. Students should consult with the Certificate Program Director and Doctoral Program Director for policies on counting certificate courses toward the PhD degree.

Degree Requirements

The PhD in conflict analysis and resolution requires completion of 72 credits.

Since a master's degree or equivalent is required for admission, students will automatically receive a 15 credit reduction of the number of credits required.

Students may have the required number of credits reduced by up to 15 additional credits based on relevant previous coursework. The actual number of applied credits is determined in consultation with the student's advisor and the program director after a review of courses taken, subsequent to a student's admission to the program.
Students must satisfactorily complete their coursework, comprehensive paper, advance to candidacy, and complete the dissertation within 9 years of admission to the program. Students are expected to have advanced to candidacy within 6 years of admission to the program.

All doctoral students should meet with their faculty advisor before starting classes to develop a plan of study. This plan should show the sequence of courses anticipated. It should be based on a discussion between the student and the advisor about the student's interest and goals. The plan should ensure that the student completes coursework efficiently and is able to build toward candidacy. The student and the advisor should then meet at least once each semester thereafter to review and amend the plan. The Program Director should receive a copy of each new or revised plan of study.

**Foreign Language Requirement**

At the point of application to fulfill the comprehensive paper, students will indicate to the Director of the Doctoral Program the membership of their dissertation committee. This committee will determine, based on the scope and nature of the student's research, the specific language requirement a student must meet. This will be conveyed to the Director of the Doctoral Program. This language requirement must be completed prior to graduation.

**Doctoral Course Work (45 credits)**

Two courses are required for all students. Students take 15 credits of foundation coursework in the areas of theory, research and practice. Students also take 9 credits of specialization courses approved by the Program Director. Elective courses will allow students to complete the course work credit requirement.

**Two required courses (6 credits)**

- CONF 801 - Introduction to Conflict Analysis and Resolution Credits: 3 Should be taken in the first semester of coursework.
- CONF 900 - Integrating Theory, Practice, and Method in Conflict Analysis Credits: 3 Should be taken in the last semester of coursework.

**Foundation courses (15 credits)**

Students complete 15 credits of foundation courses distributed as follows:

**Theoretical foundations**

Choose two courses (6 credits) from the following:

- CONF 802 - Theories of the Person Credits: 3
- CONF 803 - Structural Theories Credits: 3
- CONF 804 - Alternate Theoretical Foundations Credits: 3

**Research foundations**

Choose two courses (6 credits) from the following:
Practice foundations

Choose one course (3 credits) from the following:

- CONF 820 - Reflective Practice in Interpersonal-Multiparty Conflicts Credits: 3
- CONF 890 - Practicum in Conflict Analysis and Resolution Credits: 3

Specialization courses (9 credits)

Students will take three courses (9 credits) of specialization courses evenly distributed across the areas of theory, research, and practice. The Doctoral Program Director must approve courses.

Elective Courses (15 credits)

Electives are any 500-, 600-, and 700-level CONF courses that are not required. With the advisor’s approval, each student may include a maximum of 6 credits of electives from outside the S-CAR Program, including courses in other Mason departments, consortium courses, and transfer courses from other universities. The intent is to allow students to have maximum flexibility in selecting courses to build skills and knowledge needed in dissertation work. CONF 897 - Directed Reading may be taken to meet the requirement. Only two directed readings classes (6 credits) can be applied toward doctoral elective requirements.

Comprehensive Paper

Students are eligible to complete the comprehensive paper when they have completed all the requirements of course work in the doctoral program with the exception of CONF 998 and 999 and the language requirement. A student is advanced to candidacy upon successful completion of the comprehensive paper. Papers can be submitted for evaluation twice each year, once in the winter and once in the summer. Students who do not pass initially should form a plan of study with the chair of their dissertation committee and the Director of the Doctoral Program that will prepare them to resubmit. The comprehensive paper may be resubmitted two times for a total of three attempts. After three unsuccessful attempts, the student should consult with the Doctoral and Master's Directors about the possibility of transferring to the MS program.

Advancement to Candidacy

Upon successfully completing course work (except dissertation) listed on the Plan of Study and passing the comprehensive paper, students will be advanced to candidacy and will be personally notified of this by the Dean of S-CAR. Students are expected to advance to candidacy within 6 years of admission to the program. Students have a total of 9 years from admission to complete all course requirements, including the dissertation.

Dissertation Research (12 credits)

Students are required to complete 12 combined credits of CONF 998 (Doctoral Dissertation Proposal) and CONF 999 (Doctoral Dissertation Research), including at least 3 credits of CONF 999. Students must have a signed dissertation proposal in order to register for CONF 999.
Dissertation Committee

Students should propose a Dissertation Committee to the Director of the Doctoral Program and the Dean who then formally appoint the committee. This must be done prior to taking the comprehensive exam. The Dissertation Committee must include a chairperson from among S-CAR graduate faculty and at least two other members of the graduate faculty, one of whom must be a non-S-CAR Mason faculty member. The Dean will inform the student, committee members, and Director of the Doctoral Program when the committee has been appointed.

Dissertation Proposal

After the student passes the comprehensive exam and advances to candidacy, the next job of the committee is to approve the candidate's dissertation proposal. The proposal is the candidate's description (in some detail) of his/her dissertation project, reflecting the successful work of the comprehensive examination paper. It will include an argument about the hypothesis/theory question being tackled and the specific methods of research to be used. It should be prepared in consultation with the chair of the committee, and must be approved by all committee members. After receiving permission from the full committee, the candidate makes an oral presentation of the dissertation proposal before the committee and the Director of the Doctoral Program that is also open to other S-CAR faculty, fellow students, and other scholars. In scheduling the defense, it is the student's responsibility to ensure that all members of the committee are available and will be present for the defense.

A signed cover page from that proposal must be filed with the Doctoral Director. Failure to complete the formation of a committee and an approved proposal by the end of the 12-month period will result in the candidate's dismissal from the doctoral program. (Candidates may appeal to the Dean a further extension of this dissertation preparation period, but such appeals will be allowed only on grounds of documented illness, family emergency, or military deployment). Candidates should consult thesis.gmu.edu/ to ensure the proposal is in the correct format and has been submitted to all the appropriate offices.

Writing the Dissertation and its Defense

The chair of the dissertation committee usually takes most of the responsibility for guiding the overall project and the writing of the dissertation, although all members (and other useful persons) should be consulted as appropriate. It is the committee's responsibility to ensure a quality piece of work. When advanced to candidacy, the Guide for Preparing Graduate Thesis, Dissertation and Projects tells exactly how to prepare an acceptable dissertation. Please visit thesis.gmu.edu/ to ensure formatting guidelines are met and submission procedures followed.

It is essential that doctoral committee members have sufficient time to read and evaluate dissertation drafts with care prior to the dissertation defense date. The committee may require no more than one month to read the final draft and provide feedback. It is also essential that students have sufficient time after the defense to do final revisions, editing and formatting. If the University determines the deadlines for final library submission deadline is May 1, for example, the defense must take place prior to April 1 and the full draft dissertation must be delivered to the full committee before March 1.

The dissertation is to be orally defended in public, minimally with the entire committee present. The S-CAR faculty and students must receive public notice of the defense at least two weeks prior. Students are welcome to invite family and friends. The University may also send a representative. The public defense helps ensure that the University's standards are met, and offers an opportunity to learn from the students' research. After a successful defense, the cover page is signed by the members of the Dissertation Committee, PhD Program Director and Dean; and the dissertation is filed with the University. An additional signed copy should be delivered to the S-CAR Burton Library.
Dissertations must be presented to the library in the proper format or they will not be accepted. Please visit the University Dissertation & Thesis Services web site at thesis.gmu.edu/ for dissertation formatting requirements and submission deadlines. Mason's Dissertation and Thesis Coordinator may be reached at udts@gmu.edu or 703-993-2222.

Total: 72 credits
Schar School of Policy and Government (formerly SPGIA)

Founders Hall
3351 Fairfax Drive, MS 3B1
Arlington, VA 22201

Web: spgia.gmu.edu
E-mail: spgia@gmu.edu
College Code: PP

Effective August 1st, the School of Policy, Government, and International Affairs (SPGIA) has been renamed to the Schar School of Policy and Government.

The School of Policy, Government, and International Affairs (SPGIA) prepares undergraduate and graduate students to be leaders who advance the public good in the private, public, and nonprofit sectors. SPGIA was created by a merger in 2014 between the School of Public Policy and the Department of Public and International Affairs. Through research and education in policy, government, and international affairs, SPGIA allows Mason to more effectively serve the region, Commonwealth, nation, and world.

The SPGIA faculty combines original research with real-world experience to connect theory and practice for the benefit of students and wider constituencies. The School employs approximately 80 full-time faculty members across a wide range of disciplines, including political science, public administration, international relations, economics, management, geography, engineering, sociology, anthropology, and law. SPGIA is a major research unit of the University, with approximately $3.5 million per year in sponsored funding. SPGIA faculty members frequently advise governments, companies, and non-profit organizations, appear in the national and international media, and participate in public debates on critical issues of the day.

SPGIA offers two undergraduate majors, ten master's degree programs, three doctoral programs, and a range of undergraduate minors and graduate certificates. Collectively, these programs enroll approximately 2000 students. SPGIA offers classes on Mason's Fairfax and Arlington campuses, and its faculty members have offices on both campuses.

Administration

Mark J. Rozell, Acting Dean
Robert L. Dudley, Associate Dean
Matthys van Schaik, Associate Dean for Academic Affairs
Ming Wan, Associate Dean
Elizabeth C. Eck, Assistant Dean for Graduate Program Management
Faculty

Associate Professors: Addleson, Anacker, Arias, Auerswald, Balint, Burt, Dueck, Haddad, Koblenz, Koizumi, Listokin, Lopez-Santana, Mayer, McGlinchey, Miller, Schintler, Sommer, Thrall, Toepfer, Victor, Zolnik

Assistant Professors: Butt, Destler, Gest, Hunzeker, Marvel, McGrath, Ouagham-Gormley, Pham, Robbins, Scherer, Terman, Washington

Research and Term Faculty: Burroughs, Daigle, Deitz, El Shazli, Ericson, Finkelstein, Griffin, Habayeb, Hayden, Kauzlarich, LaPorte, Malur, Nicogossian, Peters, Pommerening, Schneider, Shafroth, SriKanta, Stabile, Walker

Courses

SPGIA offers courses designated BIOD, GOVT, ITRN, ODKM, PUAD and PUBP in the Courses section of this catalog.

Academic Policies

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of the catalog.

Undergraduate Programs

SPGIA offers two degrees for students interested in political science, government, and international relations: a BA in Government and International Politics and a BS in Public Administration and Policy (pending SCHEV approval). Majors in Government and International Politics take core courses in American political institutions, the political systems of other countries, and international relations. Students can focus their electives to earn a concentration in American politics, international politics, political theory and law, public policy, or a higher credit concentration in Philosophy, Politics, and Economics. Majors in public administration and policy take courses in government, management, policy, and administration. Concentrations are offered in administration and management, public policy, nonprofit management, US government institutions, and economic policy analysis.

Students have an opportunity to do internships as part of their degree programs, gaining valuable work experience while earning academic credit.

Honors in the Major

Highly qualified students majoring in Government and International Politics and Public Administration and Policy may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 and GOVT 496. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Minors
SPGIA offers minors in American government, international/comparative studies, international security, legal studies, and public policy and management. In addition, faculty from the School coordinate or participate in the Asia-Pacific and Northeast Asian Studies Minor, Global Systems Minor, Latin American Studies Minor, Middle East Studies Minor, Islamic Studies Minor, and Urban and Suburban Studies Minor. It participates with the Philosophy Department in the Political Philosophy Minor and with the Communications Department in the Political Communication Minor (CHSS). See Minors and Interdisciplinary Minors below.

**Bachelor's/Accelerated Master's Programs**

The School offers qualified undergraduates in any major the opportunity to apply to several accelerated master's degree programs. If accepted, students will earn both an undergraduate and a graduate degree after satisfactory completion of 150 credits, sometimes within five years. More information about the degree options and application process may be found here.

**Policies for Undergraduate Students**

The undergraduate degree consists of course work in four areas: (a) Mason Core requirements, (b) School requirements for the School of Policy, Government, and International Affairs, (c) requirements specified for the chosen major, and (d) electives. All students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated "writing intensive." In SPGIA, GOVT 490 or 491 will satisfy this requirement.

The School requirements, (b) above, are the same as the additional requirements for the College of Humanities and Social Sciences. For the BA in Government and International Politics, there is one class in Philosophy or Religion, one additional class in social and behavioral science, one class in non-Western culture, and demonstrated foreign language proficiency at the intermediate level. Students should consult the Mason Core and College requirements page http://chss.gmu.edu/general-education/all-requirements for a detailed listing of the School/College requirements.

All students are responsible for meeting with their academic advisor, and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all their requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

Students with questions about exceptions to academic policies and about School requirements should contact SPGIA Undergraduate Student Services (Robinson Hall, Room A201; 703-993-1400; gvip@gmu.edu or puad@gmu.edu).

Additional policy information and forms are available on the SPGIA web site.

**Registration**

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the official add period.

**Academic Load**

Students should review university policies regarding academic load in the Academic Policies section of this catalog.

In order to be considered for a credit overload, students must fulfill all of the following criteria:

- Be in good academic standing
- Have completed the prior semester with a GPA of 2.33 or higher
- Have a cumulative GPA of 2.33 or higher
• Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding course load while maintaining high performance
• Have no remaining incompletes (INs) from a previous semester

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Excluded Courses and Credits**

Physical Education (PHED); Parks, Recreation, and Leisure Studies (PRLS); and Recreation (RECR) activity courses cannot be used for credit for a degree in the School of Policy, Government, and International Affairs.

Only Military Science (MLSC) courses at the 400-level can be used for credit for a degree in the School; credit for other MLSC courses may not be applied toward a degree in the School.

Once matriculated at Mason, students may not take CLEP exams and apply credits from those exams to degrees in the School. Students may apply credits from CLEP exams to degrees in the School only if those credits were awarded and reported prior to admission.

**University Consortium**

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the SPGIA Undergraduate Student Services office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

**Permission to Study at Another Regionally Accredited U.S. Institution**

Once enrolled in degree status at Mason, students with fewer than 60 hours of transfer coursework (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education) may take up to 8 hours of coursework in SPGIA disciplines at another institution. Students with 60 or more hours of transfer coursework are not permitted to take additional coursework in SPGIA disciplines at another institution. A student may seek permission for additional hours beyond these limits for summer registration if his/her permanent residence is more than 50 miles from the George Mason University Fairfax campus. See the university Permission to Study Elsewhere policy for additional information.

**Study Abroad**

In order to be considered for study through the Center for Global Education, students must plan well in advance and receive prior, written permission from the Dean. Students must also meet all of the following criteria:

• Meet all eligibility requirements for their program as specified by the Center for Global Education including course prerequisites and minimum GPA.
• Have completed the immediately preceding semester at Mason with a minimum GPA of 2.00.
• Have completed the necessary forms and have obtained all required signatures and course equivalencies.

Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.
Leave of Absence

All undergraduate students who are planning an absence from George Mason must submit a formal request for Leave of Absence to the Office of the University Registrar. Students do not need to complete the Leave of Absence form if they are participating in a George Mason University sponsored study abroad program or have received permission to study elsewhere.

The maximum time allowed for a Leave of Absence is two years. A new admission application will be required if a Leave of Absence extends beyond two years. If a Leave of Absence form was not submitted, a new admission application will be required if a student misses two graded semesters, excluding the summer term. Re-admission is not guaranteed. See Academic Policies for full university policy.

Withdrawals

Students should review the Withdrawal section in the Academic Policies section of this catalog. Courses for which a withdrawal is approved receive a grade of "W."

Students should be aware of the potential consequences of withdrawing on their academic standing. Although credits graded "W" do not affect a student's GPA, they do count towards the total attempted hours. The total attempted hours and cumulative GPA together determine a student's academic standing. These are explained in the Academic Standing section of Academic Policies.

Academic Clemency

Students should review the university policies regarding academic clemency in the Academic Standing section of Academic Policies.

To be considered for clemency, students must meet all of the following criteria:

- Be absent from George Mason for a minimum of three consecutive calendar years.
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return.
- Submit their request within 12 months of the first day of the re-enrollment term.
- Complete at least 6 credits during their first 12 months back at George Mason.
- Earn a minimum GPA of 2.50 each semester back prior to making the clemency request with no individual grade below 2.00.

If the last three minimum academic requirements are not met, clemency will not be allowed under any circumstances.

Appeals Process

Undergraduate students may appeal decisions concerning academic actions to the SPGIA Office of Undergraduate Student Services. They may appeal decisions of the Office of Undergraduate Student Services to the Dean's Council, a committee composed of SPGIA directors and chairs. Students may appeal decisions of the Dean's Council to the Associate Provost, Undergraduate Academic Affairs and Programs. Students who feel that the School's appeal process was conducted unfairly may appeal to the Provost's Office as specified in the Academic Policies section of this catalog.

The grade appeal process occurs at the Dean's Council level as discussed above.

Students should file all appeals in a timely manner,usually within the semester in which the original decision is rendered, but no later than the final day of classes of the following semester.

Second Bachelor's Degree
Students should review the university policies regarding second bachelor's degrees in the Undergraduate Admission Policies and in Academic Policies/Requirements for Undergraduate Programs sections of the catalog. Students pursuing a second bachelor's degree concurrently with their first bachelor's degree at Mason must meet all the additional requirements for the School (see second paragraph of the Policies for Undergraduate Students section) if they differ from the requirements in the School or College of their first major.

Students pursuing a second bachelor's degree in the School after already having received one or more bachelor's degrees are considered to have met all of the Mason Core requirements. Students pursuing a Bachelor of Science degree do not have additional School-level requirements. Students pursuing a Bachelor of Arts degree in the School must complete these additional School-level requirements: one additional 3-credit course each in philosophy or religious studies, in social and behavioral science, and in non-western culture (for a total of 9 credits). They must also demonstrate proficiency in a foreign language through the intermediate level.

**Minors**

Students may elect to take up to two minors in addition to their major field of study. For policies governing all minors, see the Academic Policies section of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form and submit it to the Office of the University Registrar. See All about Minors for more information.

**Concentration Courses and Minors**

Students may elect to declare a concentration, which requires four of their major field electives to be from the same designated field. Students should be aware that minors usually require between 15 and 21 credits of study, at least 8 of which must be applied only to that minor and may not be used to fulfill requirements of the student's major, concentration, an undergraduate certificate, or another minor.

**Graduate Programs**

SPGIA offers three doctoral degree programs and a number of master's degree programs, as well as numerous graduate certificate programs. Specific information on each program may be found by scrolling down to the bottom of this page.

The School of Policy, Government, and International Affairs and the Antonin Scalia Law School offer a joint JD/MPP degree program in law and public policy studies. For more information, go to [www.law.gmu.edu/academics/degrees/jd_mpp](http://www.law.gmu.edu/academics/degrees/jd_mpp).

Graduate students can take advantage of Master's International (MI), a joint program between Mason and the Peace Corps, which enables participants to combine Peace Corps volunteer service with the master's degrees in political science or public administration. See the degree programs below for more details.

**Graduate Student Appeal and Grievance Procedures**

Graduate student appeal and grievance procedures are based on George Mason University's honor system. Students are responsible for understanding the provisions of the code described in detail in the Academic Policies section of this catalog and in SPGIA's graduate student guides.

Students with grievances should direct them in writing to the Assistant Dean of Admissions and Student Services, who will provide guidance on how to resolve their concerns in accordance with established procedures.

Students may appeal decisions concerning academic actions, including termination. Written appeals must be submitted to the Assistant Dean of Admissions and Student Services. The merit of these appeals will be reviewed by the Dean or Dean's designate.
Grade appeals are made to the Dean. Students should contact the Associate Dean for Academic Affairs in writing to initiate the process. The Dean's decision is final.

A student who is facing termination from the program for non-academic reasons may appeal the decision to the Dean. This appeal must be in writing and must be received within 30 calendar days of the date on the notice of dismissal or termination. The Dean or Dean's designate will make a final determination. This determination may not be appealed.

Research Centers

The School of Policy, Government, and International Affairs' research centers focus on a wide range of issues and areas. For a full listing, see Research Centers.

Undergraduate Degree(s)

Government and International Politics, BA

Banner Code: PP-BA-GVIP

School/Department: Schar School of Policy and Government (formerly SPGIA)

For policies governing all undergraduate degrees, see Academic Policies.

This undergraduate program offers students the option of applying to the accelerated master's degree program in Biodefense, International Commerce and Policy, Political Science or Public Administration, or Public Policy. See each listing for specific requirements.

Degree Requirements

Students must fulfill all requirements for bachelor's degrees, including Mason Core requirements. Students pursuing a BA in Government and International Politics must complete additional requirements for the BA degree in the Schar School of Policy and Government (formerly SPGIA).

Students pursuing this degree must complete 43 credits in GOVT and earn a minimum grade of 2.00 in each course applied to the major.

Students pursuing a BA in Government and International Politics and wishing to narrow their focus may choose to concentrate in one of eight government fields listed below or complete a higher credit concentration in Philosophy, Politics, and Economics.

BA with or without government concentration

Five core courses (16 credits)

- GOVT 101 - Democratic Theory and Practice Credits: 3
- GOVT 103 - Introduction to American Government Credits: 3
• GOVT 132 - Introduction to International Politics Credits: 3
• GOVT 133 - Introduction to Comparative Politics Credits: 3
• GOVT 300 - Research Methods and Analysis Credits: 4

One senior seminar (3 credits) chosen from:

• GOVT 490 - Synthesis Seminar Credits: 3
• GOVT 491 - Honors Seminar Credits: 3
  This option is for students who have been accepted to pursue honors in the major.

Government Field Study (24 credits)

Students complete the degree by taking any eight advanced government field courses (24 credits), with or without a government concentration. Students may complete a government concentration (four courses) in one field, then complete any four more advanced government field courses to satisfy this requirement. Students who do not pursue a government concentration may choose 24 credits from the advanced government field courses listed below (with restriction) for a broader learning experience.

Up to three credits of GOVT 399 and GOVT 480 may be used to fulfill the field course requirement with prior advisor approval. Up to six credits of GOVT 496 may be used to fulfill this requirement with prior advisor approval. GOVT 490 or GOVT 491 may not be used to fulfill this requirement.

Advanced government field courses include courses numbered GOVT 301-499

Concentrations (0-12 credits)

Students may partially satisfy the field study requirement by completing four courses (minimum 12 credits) in any one (1) approved concentration as described below.

Students pursuing a concentration will complete the degree by taking four courses (minimum 12 credits) within one concentration, chosen from the lists of advanced field courses shown below, to complete a minimum of 24 credits of field courses.

▲Concentration in American Institutions and Processes (AMIP)

• GOVT 301 - Public Law and the Judicial Process Credits: 3
• GOVT 302 - American Political Development Credits: 3
• GOVT 304 - American State and Local Government Credits: 3
• GOVT 305 - Contemporary American Federalism Credits: 3
• GOVT 307 - Legislative Behavior Credits: 3
• GOVT 308 - The American Presidency Credits: 3
• GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
• GOVT 311 - Public Opinion and Electoral Behavior Credits: 3
• GOVT 319 - Issues in Government and Politics Credits: 1-3
• GOVT 344 - American Foreign Policy Credits: 3
• GOVT 357 - Urban Governance and Planning Credits: 3
• GOVT 364 - Public Policy Making Credits: 3
• GOVT 365 - State and Regional Public Policy Credits: 3
• GOVT 409 - Virginia Government and Politics Credits: 3
• GOVT 422 - Constitutional Interpretation Credits: 3
• GOVT 423 - Constitutional Law: Civil Rights and Liberties Credits: 3

▲Concentration in Comparative Politics (CPOL)

• GOVT 331 - Government and Politics of Latin America Credits: 3
• GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3
• GOVT 333 - Government and Politics of Asia Credits: 3
• GOVT 334 - Government and Politics of Europe Credits: 3
• GOVT 336 - Political Development and Change Credits: 3
• GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
• GOVT 338 - Government and Politics of Russia Credits: 3
• GOVT 339 - Issues in the Politics of Advanced Industrial Societies Credits: 1-3
• GOVT 340 - Central Asian Politics Credits: 3
• GOVT 341 - Chinese Foreign Policy Credits: 3
• GOVT 342 - Diplomacy Credits: 3
• GOVT 344 - American Foreign Policy Credits: 3
• GOVT 345 - Islam and Politics Credits: 3
• GOVT 430 - Comparative Political Leadership Credits: 3
• GOVT 432 - Political Change and Social Development in Sub-Saharan Africa Credits: 3
• GOVT 433 - Political Economy of East Asia Credits: 3
• GOVT 434 - Democracy in Global Perspective Credits: 3
• GOVT 443 - Law and Ethics of War Credits: 3
• GOVT 444 - Issues in International Studies Credits: 1-3
• GOVT 445 - Human Rights Credits: 3
• GOVT 447 - Revolution and International Politics Credits: 3
• GOVT 448 - Ethics and International Politics Credits: 3

▲Concentration in International Political Economy (IPE)

• GOVT 322 - International Relations Theory Credits: 3
• GOVT 339 - Issues in the Politics of Advanced Industrial Societies Credits: 1-3
• GOVT 343 - International Political Economy Credits: 3
• GOVT 366 - Public Policy Analysis Credits: 3
• GOVT 367 - Money, Markets and Economic Policy Credits: 3
• GOVT 368 - Tools for Economic Policy Analysis Credits: 3
• GOVT 433 - Political Economy of East Asia Credits: 3
• GOVT 444 - Issues in International Studies Credits: 1-3
• GOVT 446 - International Law and Organization Credits: 3
• GOVT 469 - Philosophy, Politics, and Economics Credits: 3
• ECON 385 - International Economic Policy Credits: 3
▲Concentration in International Relations (INTR)

- GOVT 322 - International Relations Theory Credits: 3
- GOVT 341 - Chinese Foreign Policy Credits: 3
- GOVT 342 - Diplomacy Credits: 3
- GOVT 344 - American Foreign Policy Credits: 3
- GOVT 345 - Islam and Politics Credits: 3
- GOVT 346 - American Security Policy Credits: 3
- GOVT 347 - International Security Credits: 3
- GOVT 443 - Law and Ethics of War Credits: 3
- GOVT 444 - Issues in International Studies Credits: 1-3
- GOVT 445 - Human Rights Credits: 3
- GOVT 446 - International Law and Organization Credits: 3
- GOVT 447 - Revolution and International Politics Credits: 3
- GOVT 448 - Ethics and International Politics Credits: 3

▲Concentration in Law, Philosophy and Governance (LPGV)

- GOVT 301 - Public Law and the Judicial Process Credits: 3
- GOVT 302 - American Political Development Credits: 3
- GOVT 307 - Legislative Behavior Credits: 3
- GOVT 322 - International Relations Theory Credits: 3
- GOVT 323 - Classical Western Political Theory Credits: 3
- GOVT 324 - Modern Western Political Theory Credits: 3
- GOVT 327 - Contemporary Western Political Theory Credits: 3
- GOVT 328 - Non-Western Political Theory Credits: 3
- GOVT 329 - Issues in Political Theories and Values Credits: 1-3
- GOVT 334 - Government and Politics of Europe Credits: 3
- GOVT 407 - Law and Society Credits: 3
- GOVT 420 - American Political Thought Credits: 3
- GOVT 421 - Contemporary Political Ideologies Credits: 3
- GOVT 422 - Constitutional Interpretation Credits: 3
- GOVT 423 - Constitutional Law: Civil Rights and Liberties Credits: 3
- GOVT 427 - Feminist Political Thought Credits: 3
- GOVT 428 - Advanced Democratic Theory Credits: 3
- GOVT 443 - Law and Ethics of War Credits: 3
- GOVT 445 - Human Rights Credits: 3
- GOVT 446 - International Law and Organization Credits: 3
- GOVT 448 - Ethics and International Politics Credits: 3
- GOVT 452 - Administrative Law and Procedures Credits: 3
- GOVT 460 - Surveillance and Privacy in Contemporary Society Credits: 3
- GOVT 469 - Philosophy, Politics, and Economics Credits: 3
- GOVT 470 - Faith and Reason in the Making of the Modern Mind Credits: 3
- GOVT 471 - Millennialism and Philosophies of History in Western Culture Credits: 3
▲ Concentration in Political Analysis (PA)

- GOVT 307 - Legislative Behavior Credits: 3
- GOVT 343 - International Political Economy Credits: 3
- GOVT 356 - Public Budgeting and Finance Credits: 3
- GOVT 357 - Urban Governance and Planning Credits: 3
- GOVT 358 - Nonprofit Financial Planning Credits: 4
- GOVT 366 - Public Policy Analysis Credits: 3
- GOVT 367 - Money, Markets and Economic Policy Credits: 3
- GOVT 368 - Tools for Economic Policy Analysis Credits: 3
- GOVT 433 - Political Economy of East Asia Credits: 3
- GOVT 469 - Philosophy, Politics, and Economics Credits: 3
- STAT 350 - Introductory Statistics II Credits: 3
- Any 400-level STAT course

▲ Concentration in Political Behavior and Identity Politics (PBIP)

- GOVT 311 - Public Opinion and Electoral Behavior Credits: 3
- GOVT 312 - Political Parties and Campaigns Credits: 3
- GOVT 313 - Political Psychology Credits: 3
- GOVT 318 - Interest Groups, Lobbying, and the Political Process Credits: 3
- GOVT 319 - Issues in Government and Politics Credits: 1-3
- GOVT 345 - Islam and Politics Credits: 3
- GOVT 353 - Social Entrepreneurship Credits: 3
- GOVT 412 - Politics and the Mass Media Credits: 3
- GOVT 414 - Politics of Race and Gender Credits: 3
- GOVT 421 - Contemporary Political Ideologies Credits: 3
- GOVT 423 - Constitutional Law: Civil Rights and Liberties Credits: 3

▲ Concentration in Public Policy and Administration (PPA)

- GOVT 304 - American State and Local Government Credits: 3
- GOVT 329 - Issues in Political Theories and Values Credits: 1-3
- GOVT 351 - Administration in the Political System Credits: 3
- GOVT 353 - Social Entrepreneurship Credits: 3
- GOVT 354 - Third-Party Government and the Nonprofit Sector Credits: 3
- GOVT 355 - Public Personnel Administration Credits: 3
- GOVT 356 - Public Budgeting and Finance Credits: 3
- GOVT 357 - Urban Governance and Planning Credits: 3
- GOVT 358 - Nonprofit Financial Planning Credits: 4
- GOVT 359 - Computers in Public Management Credits: 3
- GOVT 361 - Introduction to Environmental Policy Credits: 3
- GOVT 362 - Intermediate Environmental Policy Credits: 3
- GOVT 364 - Public Policy Making Credits: 3
- GOVT 365 - State and Regional Public Policy Credits: 3
• GOVT 366 - Public Policy Analysis Credits: 3
• GOVT 367 - Money, Markets and Economic Policy Credits: 3
• GOVT 368 - Tools for Economic Policy Analysis Credits: 3
• GOVT 452 - Administrative Law and Procedures Credits: 3
• GOVT 460 - Surveillance and Privacy in Contemporary Society Credits: 3
• GOVT 464 - Issues in Public Policy and Administration Credits: 1-3
• GOVT 467 - Current Issues in Economic Policy Credits: 3
• GOVT 469 - Philosophy, Politics, and Economics Credits: 3

▲ Individualized Concentration (IND)

Create your own concentration consisting of four upper level courses with Director approval. A minimum of two courses in this concentration must be GOVT.

Total: 43 credits

BA with non-government concentration

▲ Concentration in Philosophy, Politics, and Economics (PPE)

Five core courses (16 credits)

• GOVT 101 - Democratic Theory and Practice Credits: 3
• GOVT 103 - Introduction to American Government Credits: 3
• GOVT 132 - Introduction to International Politics Credits: 3
• GOVT 133 - Introduction to Comparative Politics Credits: 3
• GOVT 300 - Research Methods and Analysis Credits: 4

One senior seminar (3 credits) chosen from:

• GOVT 490 - Synthesis Seminar Credits: 3
• GOVT 491 - Honors Seminar Credits: 3

This option is for students who have been accepted to pursue honors in the major.

Government Field Study (24 credits)
Students complete the following coursework:

One course (3 credits) in American Politics chosen from:

- GOVT 301 - 319
- GOVT 401 - 419

One course (3 credits) in Political Theory and Law

- GOVT 323 - Classical Western Political Theory Credits: 3

One course (3 credits) in International and Comparative Politics

- GOVT 330 - 349
- GOVT 430 - 449

Two courses (6 credits) in Public Policy and Administration

- GOVT 467 - Current Issues in Economic Policy Credits: 3
- GOVT 469 - Philosophy, Politics, and Economics Credits: 3

Three courses (9 credits) of additional upper level GOVT courses

- GOVT 422 - Constitutional Interpretation Credits: 3
- Two additional upper division GOVT courses

Additional Concentration Courses (24 credits)

- PHIL 324 - Modern Western Political Theory Credits: 3 or PHIL 327 - Contemporary Western Political Theory Credits: 3
- PHIL 357 - Philosophy of the Social Sciences Credits: 3 or PHIL 371 - Philosophy of Natural Sciences credits: 3
- PHIL 358 - Ethics and Economics Credits: 3
- PHIL 411 - Theories of Decision Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3
- ECON 306 - Intermediate Microeconomics Credits: 3
- ECON 412 - Game Theory and Economics of Institutions Credits: 3

Total: 67 credits
Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors. Students majoring in government and international politics may fulfill this requirement by successfully completing GOVT 490 or GOVT 491 in their major programs.

Mason Core (40 credits)

Note: some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Expand each item below for a link to specific course lists for each category.

Foundation Requirements (15-19 credits)

- Mason Core UWCU - Written Communication Credits: 6
- Mason Core UOC - Oral Communication Credits: 3
- Mason Core UQR - Quantitative Reasoning Credits: 3
- Mason Core UITC - Information Technology Credits: 3-7

Core Requirements (22 credits)

- Mason Core UFA - Arts Credits: 3
- Mason Core UGU - Global Understanding Credits: 3
- Mason Core ULIT - Literature Credits: 3
- Mason Core UNSL - Natural Science Credits: 7
- Mason Core USBS - Social and Behavioral Sciences Credits: 3
- Mason Core UWC - Western Civilization/World History Credits: 3

Synthesis/Capstone Requirement (minimum 3 credits)

- Mason Core USYN - Synthesis/Capstone Credits: minimum 3

SPGIA Requirements in Addition to Mason Core Above

- One course in Philosophy or Religion
- One additional course in Social and Behavioral Sciences
- One course in Non-Western Culture
- Proficiency in a foreign language through the intermediate level

Degree Total: Minimum 120 credits
Public Administration, BS

Banner Code: PP-BS-PUAD

School/Department: Schar School of Policy and Government (formerly SPGIA)

For policies governing all graduate degrees, see Academic Policies.

This undergraduate program offers students the option of applying to the accelerated master's degree program in Biodefense, International Commerce and Policy, Political Science, Public Administration, or Public Policy. See each listing for specific requirements.

Degree Requirements

Students must fulfill all requirements for bachelor's degrees, including Mason Core requirements. Students pursuing a BS in Public Administration and Policy must complete additional requirements for the BS degree in the Schar School of Policy and Government (formerly SPGIA).

Students must earn a minimum grade of 2.00 in each course applied to the major, including GOVT courses as well as the supporting courses in other disciplines used to fulfill the requirements below. See an advisor before registering.

Eight core courses (25 credits)

The math or statistics core course cannot be used to fulfill the Mason Core requirement in quantitative reasoning.

- GOVT 101 - Democratic Theory and Practice Credits: 3
- GOVT 103 - Introduction to American Government Credits: 3
- GOVT 132 - Introduction to International Politics or GOVT 133 - Introduction to Comparative Politics Credits: 3
- GOVT 300 - Research Methods and Analysis Credits: 4
- GOVT 351 - Administration in the Political System Credits: 3
- GOVT 367 - Money, Markets and Economic Policy Credits: 3
- GOVT 368 - Tools for Economic Policy Analysis Credits: 3
- One course (3 credits) in math or statistics in addition to the quantitative reasoning Mason Core requirement

One senior seminar (3 credits) chosen from:

- GOVT 490 - Synthesis Seminar Credits: 3
- GOVT 491 - Honors Seminar Credits: 3

Public Administration Field Study (minimum of 24 credits)

Students complete the degree by taking a minimum of 24 credits of advanced public administration field courses, with or without concentration. Students may complete a concentration of at least 12 credits in one field to fulfill a concentration. Students who do
not wish to pursue a concentration may choose at least 24 credits from any of the advanced public administration courses listed below (with restrictions noted below) for a broader learning experience. Up to three credits of GOVT 399 and GOVT 480 may be used to fulfill the filed course requirement with prior advisor approval. Up to six credits of GOVT 496 may be used to fulfill this requirement with prior advisor approval. GOVT 490 or GOVT 491 may not be used to fulfill this requirement.

Advanced Public Administration courses include:

- ECON 309 - Economic Problems and Public Policies Credits: 3
- ECON 310 - Money and Banking Credits: 3
- ECON 320 - Labor Problems Credits: 3
- ECON 335 - Environmental Economics Credits: 3
- ECON 355 - The Political Economy of Nonprofit Institutions Credits: 3
- ECON 390 - International Economics Credits: 3
- GOVT 301 - Public Law and the Judicial Process Credits: 3
- GOVT 302 - American Political Development Credits: 3
- GOVT 304 - American State and Local Government Credits: 3
- GOVT 305 - Contemporary American Federalism Credits: 3
- GOVT 307 - Legislative Behavior Credits: 3
- GOVT 308 - The American Presidency Credits: 3
- GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
- GOVT 311 - Public Opinion and Electoral Behavior Credits: 3
- GOVT 312 - Political Parties and Campaigns Credits: 3
- GOVT 313 - Political Psychology Credits: 3
- GOVT 318 - Interest Groups, Lobbying, and the Political Process Credits: 3
- GOVT 322 - International Relations Theory Credits: 3
- GOVT 339 - Issues in the Politics of Advanced Industrial Societies Credits: 1-3
- GOVT 343 - International Political Economy Credits: 3
- GOVT 346 - American Security Policy Credits: 3
- GOVT 347 - International Security Credits: 3
- GOVT 353 - Social Entrepreneurship Credits: 3
- GOVT 354 - Third-Party Government and the Nonprofit Sector Credits: 3
- GOVT 355 - Public Personnel Administration Credits: 3
- GOVT 356 - Public Budgeting and Finance Credits: 3
- GOVT 358 - Nonprofit Financial Planning Credits: 4
- GOVT 361 - Introduction to Environmental Policy Credits: 3
- GOVT 364 - Public Policy Making Credits: 3
- GOVT 366 - Public Policy Analysis Credits: 3
- GOVT 409 - Virginia Government and Politics Credits: 3
- GOVT 412 - Politics and the Mass Media Credits: 3
- GOVT 433 - Political Economy of East Asia Credits: 3
- GOVT 446 - International Law and Organization Credits: 3
- GOVT 452 - Administrative Law and Procedures Credits: 3
- GOVT 464 - Issues in Public Policy and Administration Credits: 1-3
- GOVT 469 - Philosophy, Politics, and Economics Credits: 3
- INTS 331 - The Nonprofit Sector Credits: 4
- INTS 431 - Principles of Fund Raising Credits: 4

Concentrations (0-12 credits)
Students may partially satisfy the field focus requirement by completing at least 12 credits in any one (1) approved concentration as described below.

Students pursuing a concentration will complete the degree by taking four courses (minimum of 12 credits) within one concentration, chosen from the lists of advanced field courses shown below, to complete a minimum of 24 credits of field courses.

▲Concentration in Administration and Management (ADMM)

- GOVT 305 - Contemporary American Federalism Credits: 3
- GOVT 313 - Political Psychology Credits: 3
- GOVT 355 - Public Personnel Administration Credits: 3
- GOVT 356 - Public Budgeting and Finance Credits: 3
- GOVT 358 - Nonprofit Financial Planning Credits: 4
- GOVT 452 - Administrative Law and Procedures Credits: 3

▲Concentration in Public Policy (PUBP)

- GOVT 312 - Political Parties and Campaigns Credits: 3
- GOVT 318 - Interest Groups, Lobbying, and the Political Process Credits: 3
- GOVT 346 - American Security Policy Credits: 3
- GOVT 347 - International Security Credits: 3
- GOVT 361 - Introduction to Environmental Policy Credits: 3
- GOVT 364 - Public Policy Making Credits: 3
- GOVT 366 - Public Policy Analysis Credits: 3
- GOVT 412 - Politics and the Mass Media Credits: 3
- GOVT 464 - Issues in Public Policy and Administration Credits: 1-3
- ECON 309 - Economic Problems and Public Policies Credits: 3
- ECON 335 - Environmental Economics Credits: 3

▲Concentration in Nonprofit Management (NPMG)

- GOVT 313 - Political Psychology Credits: 3
- GOVT 353 - Social Entrepreneurship Credits: 3
- GOVT 354 - Third-Party Government and the Nonprofit Sector Credits: 3
- GOVT 358 - Nonprofit Financial Planning Credits: 4
- ECON 355 - The Political Economy of Nonprofit Institutions Credits: 3
- INTS 331 - The Nonprofit Sector Credits: 4
- INTS 431 - Principles of Fund Raising Credits: 4

▲Concentration in US Government Institutions (USGI)

- GOVT 301 - Public Law and the Judicial Process Credits: 3
- GOVT 302 - American Political Development Credits: 3
- GOVT 304 - American State and Local Government Credits: 3
- GOVT 305 - Contemporary American Federalism Credits: 3
• GOVT 307 - Legislative Behavior Credits: 3
• GOVT 308 - The American Presidency Credits: 3
• GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
• GOVT 311 - Public Opinion and Electoral Behavior Credits: 3
• GOVT 409 - Virginia Government and Politics Credits: 3

▲Economic Policy Analysis (ECPA)

• ECON 309 - Economic Problems and Public Policies Credits: 3
• ECON 310 - Money and Banking Credits: 3
• ECON 320 - Labor Problems Credits: 3
• ECON 335 - Environmental Economics Credits: 3
• ECON 355 - The Political Economy of Nonprofit Institutions Credits: 3

▲Concentration in International Political Economy (IPE)

• GOVT 322 - International Relations Theory Credits: 3
• GOVT 339 - Issues in the Politics of Advanced Industrial Societies Credits: 1-3
• GOVT 343 - International Political Economy Credits: 3
• GOVT 366 - Public Policy Analysis Credits: 3
• GOVT 433 - Political Economy of East Asia Credits: 3
• GOVT 446 - International Law and Organization Credits: 3
• GOVT 469 - Philosophy, Politics, and Economics Credits: 3
• ECON 385 - International Economic Policy Credits: 3

▲Individualized Concentration (IND)

Create your own concentration consisting of four upper level courses with Director approval. A minimum of two courses in this concentration must be advanced public administration field courses.

Total: 52 credits

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors. Students majoring in public administration may fulfill this requirement by successfully completing GOVT 490 or GOVT 491 in their major programs.

Mason Core (40 credits)

Note: some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Undergraduate Interdisciplinary Minor(s)

Global Systems Minor

Banner Code: GLOS

School/Department: Schar School of Policy and Government (formerly SPGIA)

Faculty

Lopez-Santana (coordinator)

Global systems have become increasingly important to the way we live and work, and a global perspective makes us more aware of how we are connected to others around the world and to the whole of nature.

The interdisciplinary minor in global systems is designed to complement virtually any undergraduate major. It works well for majors in business disciplines, economics, languages, geography, government and international politics, history, and other
disciplines that take a global view. Students in professional programs learn to connect their professional concerns to global issues of health care, trade and finance, or technology. Students in the liberal arts gain insights into their disciplines as they learn how the arts, humanities, sciences, and social sciences are affected by global issues such as demographic change, telecommunications, and environmental protection.

Other globally oriented courses may also fulfill or substitute for the requirements of this program with written permission of the coordinator prior to registration.

This is an interdisciplinary minor offered by the Schar School of Policy and Government (formerly SPGIA) and the College of Humanities and Social Sciences.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

**Minor Requirements**

Students pursuing this minor must complete 18 credits with a minimum GPA of 2.00. At least 9 credits must be at the 300 level or above. Eight credits of course work must be unique to the minor.

**One required course (3 credits) chosen from:**

- GLOA 101 - Introduction to Global Affairs Credits: 3
- GOVT 132 - Introduction to International Politics Credits: 3
- HIST 125 - Introduction to World History Credits: 3

**Five elective courses (15 credits) chosen from at least two of the following fields:**

Other globally-oriented courses may also be applied to this requirement with written approval of the director.

**Field A: Government, geography, and administration of justice**

- GOVT 132 - Introduction to International Politics Credits: 3
- GOVT 444 - Issues in International Studies Credits: 1-3
- CRIM 405 - Law and Justice around the World Credits: 3
- GGS 101 - Major World Regions Credits: 3
- GGS 301 - Political Geography Credits: 3
- GGS 303 - Geography of Resource Conservation Credits: 3
- GGS 304 - Population Geography Credits: 3
- GGS 305 - Economic Geography Credits: 3

**Field B: Economics, anthropology, marketing, history, and sociology**

- ANTH 300 - Civilizations Credits: 3
- ANTH 312 - Political Anthropology Credits: 3
- ANTH 331 - Refugees Credits: 3
- ANTH 375 - Culture, Power, History Credits: 3
• ECON 360 - Economics of Developing Areas Credits: 3
• ECON 361 - Economic Development of Latin America Credits: 3
• ECON 380 - Economies in Transition Credits: 3
• ECON 390 - International Economics Credits: 3
• HIST 387 - Topics in Global History Credits: 3-6
• MKTG 407 - International Marketing Credits: 3
• SOCI 332 - The Urban World Credits: 3

Field C: Environmental science, global health, systems engineering, urban and suburban studies, civil and infrastructure engineering

• BIOL 377 - Applied Ecology Credits: 3
• CEIE 100 - Environmental Engineering around the World Credits: 3
• CEIE 450 - Environmental Engineering Systems Credits: 3

• MUSI 431 - Music History in Society III Credits: 3
• THR 359 - World Stages Credits: 3

Total: 18 credits

Political Communication Minor (SPGIA)

Banner Code: PCOM

School/Department: Schar School of Policy and Government (formerly SPGIA)

The interdisciplinary minor in political communication is offered jointly by the Schar School of Policy and Government (formerly SPGIA) and the CHSS Department of Communication. This minor is available to all Mason undergraduate students with the exception of communication majors pursuing a concentration in political communication. For policies governing all minors, see the AP.5 Undergraduate Policies section of this catalog.

Political communication explores the interaction among members of the public, the media, advocacy groups, and politicians in democratic society. This minor uses a diverse approach to questions of how mass and interpersonal communication influence democratic functioning, including (1) how political actors use strategic messaging to persuade and mobilize the public, (2) how citizens make sense of these messages and their impact on engagement, deliberation, efficacy, knowledge, and participation, and (3) the role of the mass media in facilitating or hindering this relationship. Political communication includes explicitly political
activities like voting and political campaigns. It also encompasses any issue of public debate or deliberation, including culture and social movements.

**Minor Requirements**

Students pursuing this minor must complete 18 credits with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor. A minimum of 6 COMM credits and a minimum of 6 GOVT credits are required.

COMM 386 - Special Topics in Political Communication may be substituted for any other COMM course with the permission of the minor director, depending on the specific topic.

GOVT 319 - Issues in Government and Politics may be substituted for any other GOVT course with the permission of the minor director, depending on the specific topic.

Courses from the Schar School of Policy and Government (formerly SPGIA) may be substituted in the cultural politics, persuasion theory, or political process categories below, with the permission of the minor director.

**Two required courses (6 credits)**

- COMM 432 - Political Communication Credits: 3
- COMM 412 - Politics and the Mass Media Credits: 3 or GOVT 412 - Politics and the Mass Media Credits: 3

**One course (3 credits) in communication and political process chosen from:**

- COMM 326 - Rhetoric of Social Movements and Political Controversy Credits: 3
- COMM 374 - Political Journalism Credits: 3
- COMM 431 - New Media and Democracy Credits: 3
- COMM 454 - Free Speech and Ethics Credits: 3
- GOVT 311 - Public Opinion and Electoral Behavior Credits: 3

**One course (3 credits) in persuasion theory chosen from:**

- COMM 230 - Case Studies in Persuasion Credits: 3
- COMM 261 - Theories of Argumentation Credits: 3
- COMM 362 - Argument and Public Policy Credits: 3
- COMM 430 - Persuasion Credits: 3
- GOVT 342 - Diplomacy Credits: 3

**One course (3 credits) in political process chosen from:**

- GOVT 308 - The American Presidency Credits: 3
- GOVT 312 - Political Parties and Campaigns Credits: 3
- GOVT 318 - Interest Groups, Lobbying, and the Political Process Credits: 3
- GOVT 353 - Social Entrepreneurship Credits: 3
- GOVT 364 - Public Policy Making Credits: 3
• GOVT 430 - Comparative Political Leadership Credits: 3
• GOVT 445 - Human Rights Credits: 3
• GOVT 447 - Revolution and International Politics Credits: 3

One course (3 credits) in cultural politics chosen from:

• COMM 380 - Media Criticism Credits: 3
• COMM 433 - Environmental Communication Credits: 3
• COMM 465 - Topics in Communication and Gender Credits: 3
• GOVT 361 - Introduction to Environmental Policy Credits: 3
• GOVT 414 - Politics of Race and Gender Credits: 3
• GOVT 427 - Feminist Political Thought Credits: 3
• GOVT 460 - Surveillance and Privacy in Contemporary Society Credits: 3

Total: 18 credits

Urban and Suburban Studies Minor

Banner Code: USSD

School/Department: Schar School of Policy and Government (formerly SPGIA)

Faculty

Clapsaddle, Gifford, Hackler, Haynes, Hysom, Mattusch, Samara, Schintler, Schrag, Sockett, Stough, Todd, Travis, Wong

The minor offers all course work designated USST in the Courses section of this catalog.

This minor is an interdisciplinary minor offered by the Schar School of Policy and Government (formerly SPGIA) and the College of Humanities and Social Sciences.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students pursuing this minor must complete 18 credits of coursework with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor.

Three core courses (9 credits)

• USST 301 - Urban Growth in a Shrinking World Credits: 3
• USST 390 - Special Topics in Urban and Suburban Studies Credits: 3
• USST 401 - Seminar: The Future of Metropolitan America Credits: 3
Three elective courses (9 credits)

Students choose courses from a list of approved electives, which must be selected from more than one of the following categories: environment and culture, government and policy, and economy. Consult the director for a list of approved courses in each category.

Total: 18 credits

Undergraduate Minor(s)

American Government Minor

Banner Code: AMGV
Web: spgia.gmu.edu

School/Department: Schar School of Policy and Government (formerly SPGIA)

The minor in American government develops knowledge of the principles, institutions, and behaviors of the American political system.

This program is offered by the Schar School of Policy and Government (formerly SPGIA).

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students pursuing this minor must complete 18 credits in government with a minimum grade of 2.0 in each course. Eight credits of course work must be unique to the minor.

One core course (3 credits):

- GOVT 103 - Introduction to American Government Credits: 3

Five elective courses (15 credits) chosen from:

- Any course on political institutions: GOVT 301–309
- Any course on political behavior GOVT 310–319
- Any course from GOVT 409–420
- GOVT 344 - American Foreign Policy Credits: 3
- GOVT 480 - Internship Credits: 3
  (When topic is relevant, 3 credits of GOVT 480 may be applied to the minor with approval of the minor advisor.)
International Security Minor

Banner Code: INLS
Web: spgia.gmu.edu

School/Department: Schar School of Policy and Government (formerly SPGIA)

The minor in international security provides students with the theories and background to understand the institutions and processes of international security, as well as critical international security issues such as terrorism, weapons of mass destruction, and war.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students pursuing this minor must complete 18 credits in government with a minimum grade of 2.0 in each course. Eight credits of course work must be unique to the minor.

Three core courses (9 credits)

- GOVT 132 - Introduction to International Politics Credits: 3
- GOVT 346 - American Security Policy Credits: 3
- GOVT 347 - International Security Credits: 3

Three elective courses (9 credits) chosen from:

- GOVT 322 - International Relations Theory Credits: 3
- GOVT 342 - Diplomacy Credits: 3
- GOVT 344 - American Foreign Policy Credits: 3
- GOVT 444 - Issues in International Studies Credits: 1-3 (when topic is relevant with approval of the minor advisor)
- GOVT 446 - International Law and Organization Credits: 3
- GOVT 447 - Revolution and International Politics Credits: 3
- GOVT 448 - Ethics and International Politics Credits: 3
- GOVT 480 - Internship Credits: 3 (when topic is relevant with approval of the minor advisor)

Total: 18 credits
International/Comparative Studies Minor

Banner Code: ICS
Web: spgia.gmu.edu

School/Department: Schar School of Policy and Government (formerly SPGLA)

This minor increases students' awareness of the regions and current issues of the world on theoretical and practical levels.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Minor Requirements

Students pursuing this minor must complete 18 credits in government with a minimum grade of 2.0 in each course. Eight credits of course work must be unique to the minor.

Two core courses (6 credits):

- GOVT 132 - Introduction to International Politics Credits: 3
- GOVT 133 - Introduction to Comparative Politics Credits: 3

Four elective courses (12 credits) chosen from the following categories with only one from each category:

- GOVT 103 - Introduction to American Government Credits: 3
- Any GOVT 330–339 comparative politics
- Any GOVT 340–349 international studies
- Any GOVT 430–439 comparative politics
- Any GOVT 440–449 international studies
- GOVT 480 - Internship Credits: 3 (when relevant, with the prior written approval of the minor advisor)

Total: 18 credits

Legal Studies Minor

Banner Code: LGLS
Web: spgia.gmu.edu
The minor in legal studies focuses on the constitutional foundations, interpretation, processes, and functions of domestic and international law.

This minor is offered by the Schar School of Policy and Government (formerly SPGIA).

For policies governing all minors, see the Undergraduate Policies section of this catalog.

**Minor Requirements**

Students pursuing this minor must complete 18 credits in government with a minimum grade of 2.0 in each course. Eight credits of course work must be unique to the minor.

**Two core courses (6 credits)**

- GOVT 103 - Introduction to American Government Credits: 3
- GOVT 301 - Public Law and the Judicial Process Credits: 3

**Four elective courses (12 credits) chosen from:**

GOVT 480 - Internship, when relevant, may be used to partially meet this requirement with prior written approval of the minor advisor.

- GOVT 307 - Legislative Behavior Credits: 3
- GOVT 414 - Politics of Race and Gender Credits: 3
- GOVT 420 - American Political Thought Credits: 3
- GOVT 422 - Constitutional Interpretation Credits: 3
- GOVT 423 - Constitutional Law: Civil Rights and Liberties Credits: 3
- GOVT 446 - International Law and Organization Credits: 3
- GOVT 452 - Administrative Law and Procedures Credits: 3
- CRIM 424 - Constitutional Law: Criminal Process and Rights Credits: 3

**Total: 18 credits**

**Public Policy and Management Minor**

**Banner Code:** PPMG  
Web: spgia.gmu.edu

School/Department: Schar School of Policy and Government (formerly SPGIA)
This minor introduces students to the theory and process of policy formulation and implementation in the political and governmental arena.

This minor is offered by the Schar School of Policy and Government (formerly SPGIA).

For policies governing all minors, see the Undergraduate Policies section of this catalog.

**Minor Requirements**

Students pursuing this minor must complete 18 credits in government with a minimum grade of 2.0 in each course. Eight credits of course work must be unique to the minor.

**Two core courses (6 credits)**

- GOVT 103 - Introduction to American Government Credits: 3
- GOVT 351 - Administration in the Political System Credits: 3

**Four elective courses (12 credits) chosen from:**

- GOVT 350–359 public administration
- Any GOVT 360–369 public policy
- Any GOVT 450–459 public administration
- Any GOVT 460–469 public policy
- GOVT 480 - Internship, when relevant, with the prior written approval of the minor advisor

**Total: 18 credits**

**Bachelor's/Accelerated Master's Program(s)**

**Bachelor's Degree (any)/Biodefense, Accelerated MS**

School/Department: *Schar School of Policy and Government (formerly SPGIA)*

Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor's degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in the Graduate Policies AP.6.7 section of this catalog.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. The catalog contains additional information on university graduate academic policies.

**Admission**
Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the SPGIA web site.

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are BIOD 604, GOVT 500, BIOD 605 and BIOD 620. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/International Commerce and Policy, Accelerated MA

School/Department: Schar School of Policy and Government (formerly SPGIA)

Highly qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted students will be able to earn a bachelor's degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in the Graduate Policies AP.6.7 section of this catalog.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. The catalog contains additional information on university graduate academic policies.

Admission

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Information specific to the accelerated MA in International Commerce and Policy program may be found on the SPGIA web site.

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are ITRN 500, ITRN 504, ITRN 503 and PUBP 503. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).
Bachelor's Degree (any)/Political Science, Accelerated MA

School/Department: Schar School of Policy and Government (formerly SPGIA)

Highly qualified undergraduates in any major may apply to the accelerated MA degree in political science. If accepted, students will be able to earn a bachelor's degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor's/accelerated master's programs may be found in the Graduate Policies AP.6.7 section of this catalog.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. The catalog contains additional information on university graduate academic policies.

Admission

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master's program may be found on the SPGIA web site.

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are chosen from GOVT 500, GOVT 510, GOVT 520, GOVT 530, GOVT 540. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/Public Administration, Accelerated MPA

School/Department: Schar School of Policy and Government (formerly SPGIA)

Highly qualified undergraduates in any major may apply to the accelerated master's degree in public administration. If accepted, students will be able to earn a bachelor's degree in their chosen major and a master's degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in the Graduate Policies AP.6.7 section of this catalog.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. The catalog contains additional information on university graduate academic policies.

Admission

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Information specific to the accelerated MPA program may be found on the SPGIA web site.
To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are PUAD 502, PUAD 511, PUAD 520 and PUAD 540. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor's Degree (any)/Public Policy, Accelerated MPP**

School/Department: *Schar School of Policy and Government (formerly SPGIA)*

Highly qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor's degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in the Graduate Policies AP.6.7 section of this catalog.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. The catalog contains additional information on university graduate academic policies.

**Admission**

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program may be found on the SPGIA web site.

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are PUBP 500, PUBP 503, PUBP 511, ITRN 503. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Master's Degree(s)**
Biodefense, MS

Banner Code: PP-MS-BIOD

School/Department: Schar School of Policy and Government (formerly SPGIA)

The master's degree in biodefense prepares students to become the next generation of biodefense and biosecurity professionals and scholars. This program provides students with a foundation in microbiology and biotechnology combined with a broader security and organizational context.

An accelerated master's option is available to students in Mason bachelor's programs. See Bachelor's Degree (any)/Biodefense, Accelerated MS for requirements.

Admission Requirements

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Biodefense master's program may be found on the SPGIA admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Academic Policies

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in SPGIA. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

Degree Requirements

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program. The schedule of courses that students plan on taking should be approved in an education plan designed by the students and their advisor during the student’s first semester. Students must receive the permission of their advisor to take courses outside of the Biodefense Program.

Core courses (18 credits)

- BIOD 604 - Emerging Infectious Diseases I: Bacteria and Toxins Credits: 3
- BIOD 605 - Emerging Infectious Diseases II: Viral Agents Credits: 3
- BIOD 609 - Biodefense Strategy Credits: 3
- GOVT 500 - The Scientific Method and Research Design Credits: 3
- BIOD 620 - Global Health Security Policy Credits: 3
- BIOD 710 - Health Security Preparedness Credits: 3
- BIOD 700 - Biodefense Strategy Credits: 3

Electives (15 credits)
Any BIOD course can count toward elective credit. In addition, students may choose from the list below. Other courses must be approved by the program advisor. Up to six elective credits may be taken outside of SPGIA.

- PUBP 511 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 756 - Global Medical Systems Policy Analysis Credits: 3
- PUBP 757 - Public Policy in Global Health and Medical Practice Credits: 3
- PUBP 758 - Global Threats and Medical Policies Credits: 3
- PUBP 765 - Human Smuggling and Trafficking Credits: 3
- PUBP 767 - Global Comparative Medical Practices, Ethics and Law Credits: 3
- PUBP 770 - Global Health and Medical Policy Analysis Credits: 3
- PUBP 783 - Global Governance Credits: 3
- GOVT 511 - Problem Solving and Data Analysis I Credits: 3
- GOVT 540 - International Relations Credits: 3
- GOVT 641 - Global Governance Credits: 3
- GOVT 742 - International Negotiation Credits: 3
- GOVT 744 - Foundations of Security Studies Credits: 3
- GOVT 745 - International Security Credits: 3
- PUAD 630 - Emergency Planning and Preparedness Credits: 3
- PUAD 631 - Disaster Response Operations and Recovery Credits: 3
- PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination Credits: 3
- PUAD 637 - Managing Homeland Security Credits: 3
- ANTH 631 - Refugees in the Contemporary World Credits: 3
- GCH 543 - Global Health Credits: 3

Capstone (3 credits)

- BIOD 790 - Global Health Security Capstone Credits: 3

Total: 36 credits

International Commerce and Policy, MA

Banner Code: PP-MA-ICP

School/Department: Schar School of Policy and Government (formerly SPGIA)

The International Commerce and Policy, MA program (ICP) is an interdisciplinary course of study to help students from around the world prepare for jobs in the new economy. Unlike traditional international affairs programs, the degree is focused on such international economic issues as global trade and investment. The MA in international commerce and policy differs from an MBA program by providing training in the political, social, and technological aspects of the global economy. In today's world, it is critical for all participants in global markets to understand the multifaceted environment in which they work.

The core faculty is augmented by adjunct faculty members who bring a wealth of practical knowledge and experience, as well as strong academic qualifications to the program. Adjuncts are drawn from the U.S. Commerce and State Departments, the Office of
the U.S. Trade Representative, and the International Trade Commission, among other government agencies, as well as from the private sector, the think tank community, and trade associations.

Courses are offered primarily in the late afternoon and evening to fit the schedules of busy professionals. In addition to classroom study, the program emphasizes experiential learning by supporting student internships, cooperative education, and research activities with private- and public-sector employers, and sponsoring a variety of study-abroad experiences.

An accelerated master's option is available to students in Mason bachelor's programs. See Bachelor's Degree (any)/International Commerce and Policy, Accelerated MA for requirements.

**Admission Requirements**

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the ICP program may be found on the SPGIA admissions web site.

Students from all academic backgrounds are welcome to apply; however, some knowledge of economics, preferably through at least two undergraduate economics courses, is encouraged. While many students may have prior educational and work-related training in business and economics, others see the ICP Program as a bridge from government, education, and other non-business occupations to careers in the global economy.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

**Academic Policies**

Students admitted to an SPGIA graduate program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in SPGIA. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

**Degree Requirements**

The ICP Program requires 36 credits of course work. All degree candidates must take 21 credits of work in the required courses, as described below. The remaining 15 credits consist of electives that may include internships, independent studies, and study abroad. Upon entering the program students complete core courses first to prepare for higher-level elective course work.

**ICP Core Courses (21 credits)**

- ITRN 500 - Global Political Economy Credits: 1-4 (3 credits)
- ITRN 501 - Methods of Analysis for International Commerce and Policy Credits: 3
- ITRN 503 - Macroeconomic Policy in the Global Economy Credits: 1-4 (3 credits)
- ITRN 504 - Microeconomics and Trade Policy Credits: 1-4 (3 credits)
- ITRN 602 - Global Financial Crises and Institutions Credits: 3
- ITRN 603 - Global Trade Relations Credits: 3
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (3 credits)

**Electives (15 credits)**
Electives are chosen in consultation with the student's advisor. If desired, a student has the option to declare one of two concentrations, as listed below. Students without a concentration may select any ITRN course, any courses from the concentrations listed below, or other courses as approved by the advisor or program director.

**Concentrations**

Students may declare only one concentration.

▲ **Concentration in Global Finance, Investment and Trade (GFIT)**

12 credits (four courses) of the 15 elective credits must be chosen within the area of concentration. Courses must be approved by the student's academic advisor. Preapproved courses include the following:

- BIOD 622 - Negotiating in the International Arena Credits: 3
- GOVT 641 - Global Governance Credits: 3
- GOVT 742 - International Negotiation Credits: 3
- ITRN 604 - International Trade and Technology Credits: 3
- ITRN 612 - International Business Operations and the Multinational Corporation Credits: 3
- ITRN 701 - Special Topics in International Commerce and Policy Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6
- ITRN 710 - International Business Transactions: Finance and Investment Credits: 3
- ITRN 711 - United States Law and Global Trade Credits: 3
- ITRN 712 - World Trade Organization and Global Trade Credits: 3
- ITRN 731 - Business-to-Business Marketing in International Commerce Credits: 3
- ITRN 736 - Sources of Growth in East Asia Credits: 3
- ITRN 738 - Fundamentals of International Marketing Credits: 3
- ITRN 740 - ABCs of Exporting and Importing Credits: 3
- ITRN 752 - Global Business and Policy Credits: 3
- ITRN 757 - Business and Politics in Emerging Markets Credits: 3
- ITRN 758 - Global Market Planning Practicum Credits: 3
- ITRN 759 - Country Risk Analysis Credits: 3
- ITRN 761 - European Political and Economic Union Credits: 3
- ITRN 767 - Political Economy and Integration in Latin America Credits: 3
- ITRN 770 - International Contract Negotiation Credits: 3
- ITRN 771 - Trade, Investment, and Politics in South and Southeast Asia Credits: 3
- ITRN 791 - Advanced Trade Policy Credits: 3
- PUAD 739 - Issues in International Management Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 736 - International Migration and Public Policy Credits: 3
- PUBP 763 - Illicit Trade Credits: 3
- PUBP 782 - International Financial Policy Credits: 3
- PUBP 783 - Global Governance Credits: 3

▲ **Concentration in Global Development and Governance (GDGV)**

12 credits (four courses) of the 15 elective credits must be chosen within the area of concentration. Courses must be approved by the student's academic advisor. Preapproved courses include the following:
• BIOD 620 - Global Health Security Policy Credits: 3
• GOVT 641 - Global Governance Credits: 3
• GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3
• GOVT 734 - Democratization Credits: 3
• GOVT 735 - Comparative Public Management Credits: 3
• GOVT 742 - International Negotiation Credits: 3
• ITRN 701 - Special Topics in International Commerce and Policy Credits: 1-3
• ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6
• ITRN 718 - Global Economic and Human Development Credits: 3
• ITRN 736 - Sources of Growth in East Asia Credits: 3
• ITRN 757 - Business and Politics in Emerging Markets Credits: 3
• ITRN 759 - Country Risk Analysis Credits: 3
• ITRN 760 - International Environmental Politics Credits: 3
• ITRN 761 - European Political and Economic Union Credits: 3
• ITRN 767 - Political Economy and Integration in Latin America Credits: 3
• ITRN 770 - International Contract Negotiation Credits: 3
• ITRN 771 - Trade, Investment, and Politics in South and Southeast Asia Credits: 3
• PUAD 636 - The NGO: Policy and Management Credits: 3
• PUAD 739 - Issues in International Management Credits: 3
• PUBP 710 - Topics in Public Policy Credits: 1-3
• PUBP 732 - Labor Markets and Policies Credits: 3
• PUBP 736 - International Migration and Public Policy Credits: 3
• PUBP 753 - Ethics in Public Policy Credits: 3
• PUBP 757 - Public Policy in Global Health and Medical Practice Credits: 3
• PUBP 758 - Global Threats and Medical Policies Credits: 3
• PUBP 760 - Science and Technology Policy in the 21st Century Credits: 3
• PUBP 761 - Social Entrepreneurship and Public Policy Credits: 3
• PUBP 763 - Illicit Trade Credits: 3
• PUBP 764 - Transnational Crime and Corruption Credits: 3
• PUBP 765 - Human Smuggling and Trafficking Credits: 3
• PUBP 781 - Entrepreneurship and Economic Development Credits: 3
• PUBP 783 - Global Governance Credits: 3

Total: 36 credits

International Security, MA

Banner Code: PP-MA-INLS

School/Department: Schar School of Policy and Government (formerly SPGIA)

The program trains early to mid-career professionals who seek the analytical and substantive capabilities to address the security challenges of the 21st century. In addition to understanding the traditional military and diplomatic approaches that characterized the state-centric security framework of the last century, the program's core courses will provide a firm grounding with regard to public-private and international
collaborative responses to emerging and unconventional threats, ranging from transnational crime, terrorism, illicit trade, proliferation of emerging technologies and WMD, and corruption to state fragility and ethnic and sectarian conflict. Students will supplement their core courses by taking elective courses from each of three focus areas: Managing Global Risks, National Security Policies and Processes, and Regional and Transnational Security Challenges.

Admission Requirements

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MA in International Security program may be found on the SPGIA admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Academic Policies

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in SPGIA. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

Degree Requirements

The MA in International Security comprises 39 credits distributed among core courses (21 credits) and electives (18 credits).

International Security Core Courses (21 credits)

- GOVT 540 - International Relations Credits: 3
- PUBP 505 - Politics and Practice of International Security Policy Credits: 3
- PUBP 738 - Ethics and the Use of Force Credits: 3
- GOVT 745 - International Security Credits: 3
- GOVT 744 - Foundations of Security Studies Credits: 3
- PUBP 771 - Grand Strategy Credits: 3
and one of the following:
- GOVT 511 - Problem Solving and Data Analysis I Credits: 3
- PUBP 511 - Statistical Methods in Policy Analysis Credits: 3

Electives (18 credits)

Focus area courses have been selected to provide additional breadth and depth on specific security challenges or areas of policy debate. Students take six elective courses, including at least one required course (3 credits) from each of the following areas:

Managing Global Risks
Required Course

- PUBP 710 - Topics in Public Policy Credits: 1-3
  Course Title: Managing Global Risks (3 credits)

Additional Electives May Be Chosen From:

- BIOD 620 - Global Health Security Policy Credits: 3
- GOVT 641 - Global Governance Credits: 3
- GOVT 734 - Democratization Credits: 3
- GOVT 739 - Issues in Comparative and International Politics Credits: 3
- GOVT 741 - Advanced Seminar in International Politics Credits: 3
- GOVT 831 - Research Seminar in Regional Political Culture and Development Credits: 3
- PUBP 654 - Analysis for Peace Operations Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 751 - International Police Operations Credits: 3
- PUBP 777 - Critical Infrastructure Protection: Policy and Practice Credits: 3

National Security Policy and Processes

Required Course

- PUBP 743 - National Security Management and Policy Credits: 3

Additional Electives May Be Chosen From:

- BIOD 609 - Biodefense Strategy Credits: 3
- BIOD 610 - Advanced Topics in Global Health Security Credits: 1-4
- BIOD 705 - Intelligence: Theory and Practice Credits: 3
- BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security Credits: 3
- BIOD 709 - Nonproliferation and Arms Control Credits: 3
- BIOD 751 - Biosurveillance Credits: 3
- GOVT 713 - The Constitution, Criminal Procedure, and Security Credits: 3
- GOVT 742 - International Negotiation Credits: 3
- GOVT 746 - Media and International Affairs Credits: 3
- GOVT 755 - Seminar in Politics and Bureaucracy Credits: 3
- GOVT 758 - Homeland/Transportation Security Administration Credits: 3
- GOVT 759 - Issues in Public Administration and Management Credits: 1-3
- GOVT 841 - Ethics and Human Rights in International Affairs Credits: 3
- GOVT 843 - Diplomacy Credits: 3
- PUAD 504 - Managing in the International Arena: Theory and Practice Credits: 3
• PUAD 520 - Organization Theory and Management Behavior Credits: 3
• PUAD 630 - Emergency Planning and Preparedness Credits: 3
• PUAD 634 - Management of International Security Credits: 3
• PUAD 636 - The NGO: Policy and Management Credits: 3
• PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3
• PUBP 653 - Interagency Operations in Conflict and Post-Conflict Settings Credits: 3
• PUBP 710 - Topics in Public Policy Credits: 1-3
• PUBP 740 - U.S. Foreign Policy: Formulation and Practice Credits: 3
• PUBP 743 - National Security Management and Policy Credits: 3
• PUBP 759 - National Security Law and Public Policy Credits: 3
• PUBP 766 - Modern Counterinsurgency: Theory and Practice Credits: 3

Regional and Transnational Security Challenges

Required Course

• PUBP 769 - Political Violence and Terrorism Credits: 3

Additional Electives May Be Chosen From:

• BIOD 722 - Examining Terrorist Groups Credits: 3
• BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3
• BIOD 726 - Food Security Credits: 3
• GOVT 530 - Comparative Politics Credits: 3
• GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3
• GOVT 641 - Global Governance Credits: 3
• GOVT 731 - Advanced Seminar in Comparative Politics Credits: 3
• GOVT 733 - Islam and Politics Credits: 3
• GOVT 734 - Democratization Credits: 3
• GOVT 741 - Advanced Seminar in International Politics Credits: 3
• GOVT 743 - International Political Economy Credits: 3
• GOVT 746 - Media and International Affairs Credits: 3
• PUBP 710 - Topics in Public Policy Credits: 1-3
• PUBP 764 - Transnational Crime and Corruption Credits: 3
• PUBP 769 - Political Violence and Terrorism Credits: 3

Total: 39 credits

Organization Development and Knowledge Management, MS

Banner Code: PP-MS-ODKM
School/Department: Schar School of Policy and Government (formerly SPGIA)

The MS in Organization Development and Knowledge Management (ODKM) Program is an integrated program taught in executive format and designed for professionals who have several years of work experience. Providing conceptual tools and practical guidance to foster organizational change, the program focuses on three related areas: creating and leveraging knowledge through networks of people who communicate and collaborate; understanding and managing change by integrating the diverse roles of people, processes, and technology; and enhancing and facilitating collaboration by building effective relationships in technology-rich environments. A feature of this program is the group-oriented approach to learning supported by the use of web-based collaborative computer technologies. Students develop the competencies to apply these technologies to make organizations more effective.

The cohort usually completes the program on a part-time basis. Full-time study is also possible by arrangement with the program director.

Admission Requirements

Students are considered for admission for the fall term only.

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MS program in Organization Development and Knowledge Management may be found on the SPGIA admissions web site.

Academic Policies

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in SPGIA. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

Degree Requirements

ODKM is a 35- to 38-credit executive format program. Students work in teams and complete most of the courses in sequence. The second academic year includes an action learning component, in which participants undertake projects in organizations and apply research methods. Overall, the process and methods of evaluation stress the cumulative development of competencies and the capacity to apply the insights gained. Students are expected to have easy access to a computer and the Internet. Minimum computer specifications can be obtained from the program office. Successful completion of the following courses is necessary to fulfill the course requirements of the program.

Core Courses (20 credits)

- ODKM 700 - Organizations, Management and Work: Theory and Practice Credits: 3
- ODKM 710 - Social and Organizational Inquiry Credits: 4
- ODKM 715 - Creating Learning Organizations Credits: 3
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (3 credits)
- ODKM 720 - Socio-technical Systems and Collaborative Work Credits: 3
- ODKM 732 - Leadership and Social Justice Credits: 4

Additional Requirements (12 credits)
• ODKM 705 - Group Dynamics and Team Learning Credits: 3
• ODKM 725 - Knowledge Management and Strategy Credits: 3
• ODKM 735 - Organizational Development Practices Credits: 3
• ODKM 740 - Learning Community Credits: 1-3

Electives (3 credits)

The elective must be approved by the program director or advisor.

Experiential Requirement (0-3 credits)

A 3-credit internship is required. For students with appropriate work experience, this requirement can be waived with the approval of the program director or dean.

• PUBP 794 - Internship Credits: 1-6

Total: 35-38 credits

Peace Operations, MS

Banner Code: PP-MS-PO

School/Department: Schar School of Policy and Government (formerly SPGIA)

This program is designed for students and practicing professionals engaged in the planning, regulation, management, and conduct of peace operations. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently participate in or conduct a peace operation. Students also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admission Requirements

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MS in Peace Operations program may be found on the SPGIA admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis.

Academic Policies

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in SPGIA. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.
Degree Requirements

Students must complete 38 credits as follows:

Peace Operations Core Courses (23 credits)

- PUBP 650 - International Conflict and Crisis Response Credits: 3
- PUBP 651 - Peace and Stabilization Operations Credits: 3
- PUBP 652 - Strategies for Peace and Stabilization Operations Credits: 4
- PUBP 653 - Interagency Operations in Conflict and Post-Conflict Settings Credits: 3
- PUBP 654 - Analysis for Peace Operations Credits: 3
- PUBP 655 - State- and Institution-Building Credits: 4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (3 credits)

Electives (15 credits)

Electives are chosen from the list below, in consultation with the student's advisor. Other courses must be approved by the program director or academic advisor.

- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 751 - International Police Operations Credits: 3
- PUBP 765 - Human Smuggling and Trafficking Credits: 3
- PUBP 794 - Internship Credits: 1-6
- PUBP 796 - Directed Readings and Research Credits: 1-3
- PUAD 505 - Introduction to Management of Nonprofits Credits: 3
- PUAD 631 - Disaster Response Operations and Recovery Credits: 3
- PUAD 636 - The NGO: Policy and Management Credits: 3
- PUAD 738 - Issues in International Security Credits: 3
- PUAD 739 - Issues in International Management Credits: 3
- ITRN 701 - Special Topics in International Commerce and Policy Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6
- ANTH 631 - Refugees in the Contemporary World Credits: 3
- CONF 708 - Identity and Conflict Credits: 1-3
- CONF 728 - Human Rights Theory and Practice in Comparative Perspective Credits: 3

Total: 38 credits

Political Science, MA

Banner Code: PP-MA-POS

School/Department: Schar School of Policy and Government (formerly SPGLA)
The MA in political science program prepares students for advanced work in political science, teaching, and research about government; a career in government and politics; and work in domestic and international nongovernmental organizations.

The program is made up of four core courses in political science and completion of either a concentration in international security or a broader field of specialization in American government and politics, international relations, or comparative politics. Students choosing a specialization have interdisciplinary opportunities to take up to 9 credits in related fields such as history or public policy.

The master's degree is the first step in an engaging and stimulating career. Students develop a deeper understanding of political ideas and institutions, more sophisticated research skills, a better grasp of the intricacies of governments abroad, and a deeper knowledge of the complexities of international politics. This degree can lead to a career teaching about government; working with legislative bodies, government agencies, and international organizations; or doing research and writing about politics and government.

An accelerated master's option is available to students in any bachelor's degree program.

**Admission Requirements**

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the M.A. in Political Science program may be found on the SPGIA admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

**Academic Policies**

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in SPGIA. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

**Degree Requirements**

Students should develop an education plan with their advisors that lists the courses they plan to take. The plan is approved by the student's advisor. Students may include courses from other units to complement their field of specialization; they should reflect the ideas, institutions, or processes of contemporary governance.

Students who wish to begin a career in government and politics or to alter their current career path in government and politics are encouraged to take a 3-credit internship in their area of interest. Internships can be arranged through the School of Policy, Government, and International Affairs.

**Four core courses (12 credits)**

- GOVT 510 - American Government and Politics Credits: 3
- GOVT 520 - Political Theory Credits: 3
- GOVT 530 - Comparative Politics Credits: 3
- GOVT 540 - International Relations Credits: 3
Two methods courses (6 credits)

- GOVT 500 - The Scientific Method and Research Design Credits: 3
- GOVT 511 - Problem Solving and Data Analysis I Credits: 3

Three to five courses (9 to 15 credits) in the concentration or a specialization

Students complete the degree by completing additional coursework in the concentration or one of the specializations.

▲ Concentration in International Security (INLS)

Two required courses (6 credits)

- GOVT 744 - Foundations of Security Studies Credits: 3
- GOVT 745 - International Security Credits: 3

One to three elective courses (3-9 credits) chosen from:

- GOVT 640 - Strategic Responses to Terrorism: Coordinated Decision Making Credits: 3
- GOVT 641 - Global Governance Credits: 3
- GOVT 741 - Advanced Seminar in International Politics Credits: 3
- GOVT 843 - Diplomacy Credits: 3
- BIOD 621 - Ethics and International Security Credits: 3
- BIOD 622 - Negotiating in the International Arena Credits: 3
- BIOD 705 - Intelligence: Theory and Practice Credits: 3
- BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security Credits: 3
- BIOD 709 - Nonproliferation and Arms Control Credits: 3
- BIOD 722 - Examining Terrorist Groups Credits: 3
- BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3
- BIOD 760 - National Security Technology and Policy Credits: 3

American government and politics specialization

Two required field seminars (6 credits) chosen from:
• GOVT 603 - Seminar in the Courts and Constitutional Law Credits: 3
• GOVT 604 - Seminar on Congress and Legislative Behavior Credits: 3
• GOVT 605 - Seminar on the Presidency Credits: 3
• GOVT 706 - Federalism and Intergovernmental Relations Credits: 3

One to three elective courses (3 to 9 credits)

Comparative politics specialization

Two required field seminars (6 credits)

• GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3
• GOVT 731 - Advanced Seminar in Comparative Politics Credits: 3

One to three elective courses (3 to 9 credits)

International relations specialization

Two required field seminars (6 credits) chosen from:

• GOVT 641 - Global Governance Credits: 3
• GOVT 741 - Advanced Seminar in International Politics Credits: 3
• GOVT 743 - International Political Economy Credits: 3
• GOVT 745 - International Security Credits: 3

One to three elective courses (3 to 9 credits)

Up to two elective courses (0-6 credits)

The number of electives students have will depend on how many credits they took in the concentration or field of specialization and whether they choose a 3-credit project or a 6-credit thesis. Students choose the remaining credits required for the degree, if any, from other courses in SPGIA, including an internship, additional courses in the field of specialization, or from course work offered by other units.

3 credits of project or 6 credits of thesis
A project or thesis is required for the MA in political science. Students who choose to do a project take 3 credits of GOVT 798 linked to an advanced specialty course and produce a final research project. Students who choose to do a thesis should be aware of the policies governing theses. They must follow the enrollment policy of the university and, once enrolled in GOVT 799, must maintain continuous enrollment as specified in the Academic Policies section of the catalog. A thesis director and a committee of two additional faculty members appointed by the school read and approve the thesis. Students should make arrangements for doing a project or thesis with their advisor.

- GOVT 798 - Political Science Research Project Credits: 3
- GOVT 799 - Political Science Thesis Credits: 1-6

Total: 36 credits

Master's International

The Master’s International (MI), a joint program between Mason and the Peace Corps, enables participants to prepare for Peace Corps volunteer service while earning the MA. Students apply separately, but at the same time, to the Peace Corps and to Mason. Students must complete a minimum of 18 credits prior to their Peace Corps service; this will give the student a foundation to enhance their value as a Peace Corps volunteer. Six credits are earned as internship credits for the Peace Corps service. The internship requires a project, agreed upon by the student and his/her advisor, and includes a presentation delivered to faculty and students after the student returns to the US. Upon completion of the two years of service, the student will receive a tuition grant for the six internship credits. Students return to Mason after their two years of service to complete the remaining coursework required for the 36-credit MA.

Public Administration, MPA

Banner Code: PP-MPA-PUAD

School/Department: Schar School of Policy and Government (formerly SPGLA)

Mission Statement: The Master of Public Administration (MPA) is designed for people who hold or aspire to hold leadership positions in organizations that participate in the development and implementation of public policy. The mission of the MPA program is to give graduate students the opportunity to build their knowledge of politics, public policy and management and to enhance their analytic, problem solving, and communication skills.

MPA students at Mason have the research and cultural resources of the Washington, D.C. area at their disposal. Government agencies representing all levels in the U.S. federal system are located close to the campus, as are the National Archives, the Library of Congress, and the Smithsonian Institution. Another benefit is the wide range of internship opportunities available in governmental and nonprofit organizations. The MPA Program regularly has internship invitations from national, state, and local government organizations, as well as from nonprofit organizations whose principal work is at the local, state, national, or international levels. Many of these internships are paid positions.

MPA courses are held at the Fairfax and the Arlington campuses during the week and on the weekend in an accelerated format.

An accelerated master's option is available to students in any bachelor's program. See listing for specific requirements.

Admission Requirements
Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Master of Public Administration program may be found on the School of Policy, Government, and International Affairs admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university and school policy.

**Academic Policies**

Students admitted to an SPGIA graduate program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in SPGIA. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

**Degree Requirements**

The required courses emphasize the development of knowledge about public policy and management, as well as analytical problem-solving and communication skills, and third-party governance. Through these courses, students develop a shared knowledge base and skill set. The elective courses can be used by students to focus their knowledge and skill development within one concentration. Alternatively, the electives can be used to extend the breadth of study with courses drawn from a variety of concentrations or from other departments and schools across the university.

The MPA curriculum is arranged in a sequential manner. PUAD 500-level courses are foundation courses, 600-level courses are intermediate courses, and the 700-level courses are advanced courses. Students must take PUAD 500-level, or foundation courses, during the first two semesters, followed by 600-level classes. The PUAD 700-level courses should be taken during the last semester or two of enrollment in the MPA program.

For example, a full-time student should enroll in PUAD 502 and two other 500-level courses, such as PUAD 511 and PUAD 520, during the first semester. In the second semester the student should enroll in PUAD 540 and two intermediate courses such as PUAD 662 and a 600-level elective course.

Part-time students taking two courses a semester should take PUAD 502 and either PUAD 511 or 520 during the first semester, followed by either PUAD 511 or 520 and PUAD 540 in the second semester.

Requests for taking a course out of sequence must be made in writing to the student's advisor and must be approved by the advisor before enrollment.

**Six core courses (18 credits)**

- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 511 - Problem Solving and Data Analysis I Credits: 3
- PUAD 520 - Organization Theory and Management Behavior Credits: 3
- PUAD 540 - Public Policy Process Credits: 3
- PUAD 700 - Ethics and Public Administration Credits: 3
- PUAD 703 - Third-Party Governance Credits: 3

**One additional methods course (3 credits) chosen from:**
- PUAD 612 - Problem Solving and Data Analysis II Credits: 3
- PUAD 613 - Economic Analysis in Public Administration Credits: 3
- PUAD 645 - Policy Analysis Credits: 3
- PUAD 646 - Program Evaluation Credits: 3

One course (3 credits) in accounting, budgeting, and financial management chosen from:

- PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
- PUAD 662 - National Budgeting Credits: 3
- PUAD 663 - State and Local Budgeting Credits: 3
- PUAD 664 - Nonprofit Financial Management Credits: 3

Four elective courses (12 credits)

Students may take their elective courses within one of the concentrations listed below. As an alternative, with the approval of their advisor, students may select their elective courses from several concentrations or fields. Students not pursuing a concentration may select electives from SPGIA course offerings.

Concentrations

Students may declare only one concentration. PUAD 794 Internship and PUAD 796 Directed Reading and Research may be applied to a concentration where content is appropriate and with prior written approval of the student's advisor. Other courses may also be applied to a concentration with prior written approval of the advisor.

▲ Concentration in Administration of Justice (ADJ)

Four courses (12 credits) chosen from:

- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 781 - Information Management: Technology and Policy Credits: 3
- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- CRIM 509 - Justice Organizations and Processes Credits: 3
- CRIM 510 - Policing in a Democratic Society Credits: 3
- CRIM 740 - Justice Organization and Administration Credits: 3
- CRIM 741 - Conduct of Justice Organizations at the Street Level Credits: 3
- CRIM 742 - Leadership in Justice and Security Organizations Credits: 3
- CRIM 743 - Changing Justice and Security Organizations Credits: 3
- CRIM 781 - Justice Program Evaluation Credits: 3
- SOCI 607 - Criminology Credits: 3
- SOCI 608 - Juvenile Delinquency Credits: 3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 794 - Internship Credits: 1-6
- PUBP 796 - Directed Readings and Research Credits: 1-3
Total: 12 credits

▲ Concentration in Emergency Management and Homeland Security (EMHS)

Four courses (12 credits) chosen from:

- PUAD 630 - Emergency Planning and Preparedness Credits: 3
- PUAD 631 - Disaster Response Operations and Recovery Credits: 3
- PUAD 632 - Terrorism: Theory and Practice Credits: 3
- PUAD 633 - Hazard Mitigation Policy Credits: 3
- PUAD 634 - Management of International Security Credits: 3
- PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination Credits: 3
- PUAD 637 - Managing Homeland Security Credits: 3
- PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3
- PUAD 731 - Homeland/Transportation Security Administration Credits: 3
- PUAD 738 - Issues in International Security Credits: 3
- PUAD 794 - Internship Credits: 3
- PUAD 796 - Directed Readings and Research Credits: 1-3
- BIOD 723 - Legal Dimensions of Homeland Security Credits: 3
- BIOD 752 - The Role of the Military in Homeland Security Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 742 - Transportation Safety and Security Credits: 3
- PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy Credits: 3
- PUBP 758 - Global Threats and Medical Policies Credits: 3
- PUBP 794 - Internship Credits: 1-6
- PUBP 796 - Directed Readings and Research Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6
- COMM 637 - Risk Communication Credits: 3

Total: 12 credits

▲ Concentration in Environmental Science and Public Policy (EVPP)

CONF 695 - Selected Topics and COMM 590 - Seminar in Communication when topic is the environment, may be used to fulfill this requirement with the prior written approval of the student's advisor.

One required course (3 credits):

- PUAD 642 - Environmental Policy Credits: 3

Three elective courses (9 credits) chosen from:
- PUAD 645 - Policy Analysis Credits: 3
- PUAD 646 - Program Evaluation Credits: 3 (if not already taken to meet core requirements)
- PUAD 649 - Advocacy and Lobbying Credits: 3
- PUAD 794 - Internship Credits: 3
- PUAD 796 - Directed Readings and Research Credits: 1-3
- EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 670 - Environmental Law Credits: 3
- CONF 695 - Selected Topics Credits: 3
- COMM 590 - Seminar in Communication Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 794 - Internship Credits: 1-6
- PUBP 796 - Directed Readings and Research Credits: 1-3
- ITRN 701 - Special Topics in International Commerce and Policy Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6

Total: 12 credits

▲ Concentration in Human Resources Management (HRM)

One required course (3 credits):

- PUAD 670 - Human Resources Management in the Public Sector Credits: 3

Three elective courses (9 credits) chosen from:

- PUAD 623 - Managing Government Contracting Credits: 3
- PUAD 652 - Nonprofit Leadership and Change Credits: 3
- PUAD 671 - Public Employee Labor Relations Credits: 3
- PUAD 672 - Human Resources Reforms for Public Administration Credits: 3
- PUAD 729 - Issues in Public Management Credits: 3
- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 794 - Internship Credits: 3
- PUAD 796 - Directed Readings and Research Credits: 1-3
- PSYC 631 - Industrial and Personnel Testing and Evaluation Credits: 3
- PSYC 636 - Survey of Industrial Psychology Credits: 3
- PSYC 638 - Training: Psychological Contributions to Theory, Design, and Evaluation Credits: 3
- PSYC 639 - Survey of Organizational Processes Credits: 3
- PSYC 667 - Behavior in Small Groups and Teams Credits: 3
- PSYC 739 - Seminar in Industrial/Organizational Psychology Credits: 3
- ODKM 705 - Group Dynamics and Team Learning Credits: 3
OMKM 715 - Creating Learning Organizations Credits: 3
OMKM 731 - Consulting Skills for Organizational Change Credits: 3
OMKM 735 - Organizational Development Practices Credits: 3
PUBP 710 - Topics in Public Policy Credits: 1-3
PUBP 794 - Internship Credits: 1-6
PUBP 796 - Directed Readings and Research Credits: 1-3
ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6
MBA 713 - Managing Human Capital Credits: 0-3

Total: 12 credits

▲ Concentration in International Management (IM)

One required course (3 credits):

- PUAD 504 - Managing in the International Arena: Theory and Practice Credits: 3

Three elective courses (9 credits) chosen from:

- CONF and ITRN courses with written prior approval of the director
- PUAD 634 - Management of International Security Credits: 3
- PUAD 636 - The NGO: Policy and Management Credits: 3
- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 738 - Issues in International Security Credits: 3
- PUAD 739 - Issues in International Management Credits: 3
- PUAD 794 - Internship Credits: 3
- PUAD 796 - Directed Readings and Research Credits: 1-3
- GOVT 540 - International Relations Credits: 3
- GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 794 - Internship Credits: 1-6
- PUBP 796 - Directed Readings and Research Credits: 1-3
- ITRN 701 - Special Topics in International Commerce and Policy Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6

Total: 12 credits

▲ Concentration in Nonprofit Management (NPMG)
Students in the nonprofit concentration may take PUAD 505 as one of their first four courses and may take PUAD 505 simultaneously with PUAD 502. Likewise, students in the international concentration may take PUAD 504 as one of their first four courses.

Two required courses (6 credits):

- PUAD 505 - Introduction to Management of Nonprofits Credits: 3
- PUAD 659 - Nonprofit Law, Governance, and Ethics Credits: 3

Two elective courses (6 credits) chosen from:

- PUAD 636 - The NGO: Policy and Management Credits: 3
- PUAD 649 - Advocacy and Lobbying Credits: 3
- PUAD 652 - Nonprofit Leadership and Change Credits: 3
- PUAD 654 - The Community, Marketing, and Public Relations Credits: 3
- PUAD 655 - Philanthropy and Fund Raising Credits: 3
- PUAD 657 - Association Management Credits: 3
- PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise Credits: 3
- PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
- PUAD 664 - Nonprofit Financial Management Credits: 3
- PUAD 680 - Managing Information Resources Credits: 3
- PUAD 720 - Performance Measurement Credits: 3
- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 794 - Internship Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 794 - Internship Credits: 1-6
- PUBP 796 - Directed Readings and Research Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6

Total: 12 credits

▲ Concentration in Policy Studies (PS)

Four courses (12 credits) chosen from:

- PUAD 615 - Administrative Law Credits: 3
- PUAD 622 - Program Planning and Implementation Credits: 3
- PUAD 645 - Policy Analysis Credits: 3
- PUAD 646 - Program Evaluation Credits: 3
- PUAD 649 - Advocacy and Lobbying Credits: 3
- PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise Credits: 3
- PUAD 661 - Public Budgeting Systems Credits: 3
- PUAD 662 - National Budgeting Credits: 3
- PUAD 663 - State and Local Budgeting Credits: 3
• PUAD 680 - Managing Information Resources Credits: 3
• PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3
• PUAD 730 - Professional Development Workshop Credits: 1-3
• PUAD 749 - Issues in Public Policy Credits: 3
• PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
• PUAD 781 - Information Management: Technology and Policy Credits: 3
• PUAD 794 - Internship Credits: 3
• PUAD 796 - Directed Readings and Research Credits: 1-3
• GOVT 520 - Political Theory Credits: 3
• GOVT 605 - Seminar on the Presidency Credits: 3
• PUBP 710 - Topics in Public Policy Credits: 1-3
• PUBP 794 - Internship Credits: 1-6
• PUBP 796 - Directed Readings and Research Credits: 1-3
• ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6

Total: 12 credits

▲ Concentration in Public Management (PMG)

Four courses (12 credits) chosen from:

• PUAD 615 - Administrative Law Credits: 3
• PUAD 622 - Program Planning and Implementation Credits: 3
• PUAD 623 - Managing Government Contracting Credits: 3
• PUAD 646 - Program Evaluation Credits: 3
• PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise Credits: 3
• PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
• PUAD 661 - Public Budgeting Systems Credits: 3
• PUAD 662 - National Budgeting Credits: 3
• PUAD 663 - State and Local Budgeting Credits: 3
• PUAD 664 - Nonprofit Financial Management Credits: 3
• PUAD 670 - Human Resources Management in the Public Sector Credits: 3
• PUAD 672 - Human Resources Reforms for Public Administration Credits: 3
• PUAD 679 - Leadership Skills for the 21st Century Credits: 3
• PUAD 680 - Managing Information Resources Credits: 3
• PUAD 720 - Performance Measurement Credits: 3
• PUAD 729 - Issues in Public Management Credits: 3
• PUAD 730 - Professional Development Workshop Credits: 1-3
• PUAD 731 - Homeland/Transportation Security Administration Credits: 3
• PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
• PUAD 781 - Information Management: Technology and Policy Credits: 3
• PUAD 794 - Internship Credits: 3
• PUAD 796 - Directed Readings and Research Credits: 1-3
• PUBP 710 - Topics in Public Policy Credits: 1-3
• PUBP 794 - Internship Credits: 1-6
- PUBP 796 - Directed Readings and Research Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6

Total: 12 credits

▲ Concentration in Public and Nonprofit Finance (PNF)

Four courses (12 credits) chosen from:
- PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise Credits: 3
- PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
- PUAD 661 - Public Budgeting Systems Credits: 3
- PUAD 662 - National Budgeting Credits: 3
- PUAD 663 - State and Local Budgeting Credits: 3
- PUAD 664 - Nonprofit Financial Management Credits: 3
- PUAD 729 - Issues in Public Management Credits: 3
- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 769 - Issues in Public Financial Management Credits: 3
- PUAD 794 - Internship Credits: 3
- PUBP 796 - Directed Readings and Research Credits: 1-3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 794 - Internship Credits: 1-6
- PUBP 796 - Directed Readings and Research Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6

Total: 12 credits

▲ Concentration in State and Local Government (SLG)

Four courses (12 credits) chosen from:
- PUAD 505 - Introduction to Management of Nonprofits Credits: 3
- PUAD 615 - Administrative Law Credits: 3
- PUAD 623 - Managing Government Contracting Credits: 3
- PUAD 630 - Emergency Planning and Preparedness Credits: 3
- PUAD 651 - Virginia Politics, Policy, and Administration Credits: 3
- PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
- PUAD 661 - Public Budgeting Systems Credits: 3
- PUAD 662 - National Budgeting Credits: 3
- PUAD 663 - State and Local Budgeting Credits: 3
- PUAD 680 - Managing Information Resources Credits: 3
- PUAD 729 - Issues in Public Management Credits: 3
- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
- PUAD 759 - Issues in Local Government Administration Credits: 3
- PUAD 781 - Information Management: Technology and Policy Credits: 3
- PUAD 679 - Leadership Skills for the 21st Century Credits: 3
- PUAD 794 - Internship Credits: 3
- PUAD 796 - Directed Readings and Research Credits: 1-3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 794 - Internship Credits: 1-6
- PUBP 796 - Directed Readings and Research Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6

Total: 12 credits

▲ Concentration in Third-Party Governance (TPG)

Four courses (12 credits) chosen from:

- PUAD 613 - Economic Analysis in Public Administration Credits: 3
- PUAD 622 - Program Planning and Implementation Credits: 3
- PUAD 623 - Managing Government Contracting Credits: 3
- PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination Credits: 3
- PUAD 636 - The NGO: Policy and Management Credits: 3
- PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise Credits: 3
- PUAD 659 - Nonprofit Law, Governance, and Ethics Credits: 3
- PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
- PUAD 794 - Internship Credits: 3
- PUAD 796 - Directed Readings and Research Credits: 1-3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 794 - Internship Credits: 1-6
- PUBP 796 - Directed Readings and Research Credits: 1-3
- ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6

Total: 12 credits

Professional Experience Requirement (0-3 credits)

Certification that the student has experience in public administration outside the classroom and is ready to take leadership responsibilities must be exhibited by one of two ways: relevant professional experience, approved by the program director, or completion of PUAD 792.

- PUAD 792 - Advanced Seminar in Applied Public Administration Research Credits: 3
Total: 36-39 credits

Master's International

The Master's International (MI), a joint program between Mason and the Peace Corps, enables participants to prepare for Peace Corps volunteer service while earning the MPA. Students apply separately, but at the same time, to the Peace Corps and to Mason. Students must complete a minimum of 18 credits prior to their Peace Corps service; this will give the student a foundation to enhance their value as a Peace Corps volunteer. Six credits are earned as internship credits for the Peace Corps service. The internship requires a project, agreed upon by the student and his/her advisor, and includes a presentation delivered to faculty and students after the student returns to the U.S. Upon completion of the two years of service, the student will receive a tuition grant for the six internship credits. Students return to Mason after their two years of service to complete the remaining coursework required for the 36-39 credit MPA.

Public Policy, MPP

Banner Code: PP-MPP-PUBP

School/Department: Schar School of Policy and Government (formerly SPGIA)

The master's program in public policy leads to a degree for aspiring or experienced professionals who seek career advancement through cutting-edge education and training in policy analysis and development in increasingly technical and global environments. The program prepares students to be reflective practitioners who develop, implement, manage, analyze, evaluate, and effect innovative change in the public and private sectors through a course of study that emphasizes the fundamentals of policy development; the role of technology, analytic assessment, and modeling for policy evaluation; and the implications of international and global perspectives on policy formation. Courses are offered primarily in late afternoon and evening to fit the schedules of busy professionals.

An accelerated master's option is available to students in Mason bachelor's programs. See Bachelor's Degree (any)/Public Policy, Accelerated MPP for requirements.

Admission Requirements

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Master in Public Policy program may be found on the SPGIA admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Academic Policies

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in SPGIA. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.
Degree Requirements

Students must complete 36 to 39 credits of course work through a combination of core courses, electives, and a professional experience requirement. Appropriate professional experience can be demonstrated through previous employment or a supervised internship. Students will also be exposed to the global nature of public policy activity through the core requirement of international comparative policy assessment. The plan of study includes the following:

Required Public Policy Courses (21 credits)

- PUBP 500 - Theory and Practice in Public Policy Credits: 3
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (3 credits)
- PUBP 511 - Statistical Methods in Policy Analysis Credits: 3
- ITRN 503 - Macroeconomic Policy in the Global Economy Credits: 1-4 (3 credits)
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 741 - U.S. Financial Policy Processes and Procedures Credits: 3
- PUBP 705 - Advanced Statistical Methods in Policy Analysis Credits: 3
- PUBP 713 - Policy and Program Evaluation Credits: 3
- PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy Credits: 3

Electives (15 credits)

Electives are chosen from one of the following policy emphasis areas. One of the courses in the emphasis sequence should have an international focus.

- Global Medical and Health Policy
- International Governance and Institutions
- National Security and Public Policy
- Public Finance and Budgeting
- Regional Economic Development
- Science and Technology Policy
- Social Policy
- Terrorism, Transnational Crime and Corruption
- Transportation Policy
- Urban Policy and Development
- US Government Institutions and Policy Management

Electives are chosen from the list below, in consultation with the student's advisor. Other courses must be approved by the advisor or program director.

- PUBP 650 - International Conflict and Crisis Response Credits: 3
- PUBP 651 - Peace and Stabilization Operations Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 721 - Transportation Economics Credits: 3
- PUBP 723 - Metropolitan Transportation Policy Credits: 3
- PUBP 726 - Telecommunications Policy Credits: 3
- PUBP 730 - US Institutions and the Policy Process Credits: 3
- PUBP 733 - Urban Politics and Policy Credits: 3
• PUBP 737 - Cases and Concepts in E-Government Credits: 3
• PUBP 739 - Media and Public Policy Credits: 3
• PUBP 742 - Transportation Safety and Security Credits: 3
• PUBP 743 - National Security Management and Policy Credits: 3
• PUBP 747 - Air Transportation Policy, Operations and Logistics Credits: 3
• PUBP 748 - Public Transportation Policy, Operations and Logistics Credits: 3
• PUBP 750 - History of Military Operations Other than War Credits: 3
• PUBP 751 - International Police Operations Credits: 3
• PUBP 753 - Ethics in Public Policy Credits: 3
• PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy Credits: 3
• PUBP 755 - National Security Decision-Making Policy Credits: 3
• PUBP 757 - Public Policy in Global Health and Medical Practice Credits: 3
• PUBP 758 - Global Threats and Medical Policies Credits: 3
• PUBP 759 - National Security Law and Public Policy Credits: 3
• PUBP 760 - Science and Technology Policy in the 21st Century Credits: 3
• PUBP 762 - Social Institutions and Public Policy Credits: 3
• PUBP 763 - Illicit Trade Credits: 3
• PUBP 764 - Transnational Crime and Corruption Credits: 3
• PUBP 765 - Human Smuggling and Trafficking Credits: 3
• PUBP 766 - Modern Counterinsurgency: Theory and Practice Credits: 3
• PUBP 768 - Education and Public Policy (Topic Varies) Credits: 3
• PUBP 769 - Political Violence and Terrorism Credits: 3
• PUBP 771 - Grand Strategy Credits: 3
• PUBP 777 - Critical Infrastructure Protection: Policy and Practice Credits: 3
• PUBP 783 - Global Governance Credits: 3
• PUBP 796 - Directed Readings and Research Credits: 1-3
• PUAD 729 - Issues in Public Management Credits: 3
• PUAD 738 - Issues in International Security Credits: 3
• PUAD 739 - Issues in International Management Credits: 3
• PUAD 749 - Issues in Public Policy Credits: 3
• PUAD 759 - Issues in Local Government Administration Credits: 3
• PUAD 769 - Issues in Public Financial Management Credits: 3
• ITRN 602 - Global Financial Crises and Institutions Credits: 3
• ITRN 603 - Global Trade Relations Credits: 3
• ITRN 701 - Special Topics in International Commerce and Policy Credits: 1-3
• ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad Credits: 3-6
• ITRN 710 - International Business Transactions: Finance and Investment Credits: 3
• ITRN 712 - World Trade Organization and Global Trade Credits: 3
• ITRN 718 - Global Economic and Human Development Credits: 3
• ITRN 740 - ABCs of Exporting and Importing Credits: 3
• ITRN 752 - Global Business and Policy Credits: 3
• ITRN 761 - European Political and Economic Union Credits: 3
• ITRN 767 - Political Economy and Integration in Latin America Credits: 3
• ITRN 772 - International Telecommunications Credits: 3
• CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
• HAP 609 - Comparative International Health Systems Credits: 3
• HAP 678 - Introduction to the U.S. Health System Credits: 3
Professional Experience Requirement (0-3 credits)

Certification that the student has experience in the public policy process outside the classroom and is ready to take leadership responsibilities must be exhibited by one of two ways: relevant professional experience, approved by the program director, or an approved internship.

- PUBP 794 - Internship Credits: 1-6

Total: 36-39 credits

Transportation Policy, Operations, and Logistics, MA

Banner Code: PP-MA-TPOL
Phone: 703-993-2280

School/Department: Schar School of Policy and Government (formerly SPGIA)

The MA in Transportation Policy, Operations, and Logistics (TPOL) program is designed for students and practicing professionals engaged in planning, regulating, managing, and operating transportation facilities and services. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently supply and operate transportation facilities and services. They also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admission Requirements

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Biodefense master's program may be found on the SPGIA admissions web site.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Academic Policies

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in SPGIA. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. The catalog contains additional information on university graduate academic policies.

Degree Requirements

The degree requires completion of 36 credits as follows:
TPOL Core Courses (25 credits)

- PUBP 715 - Introduction to Transportation Systems Credits: 3
- PUBP 716 - Transportation Operations and Logistics Credits: 3
- PUBP 717 - Analysis for Transportation Managers Credits: 4
- PUBP 718 - Transportation Planning and Policy Credits: 3
- PUBP 721 - Transportation Economics Credits: 3
- PUBP 722 - Practicum in Transportation Policy, Operations, and Logistics Credits: 3
- PUBP 500 - Theory and Practice in Public Policy Credits: 3
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4 (3 credits)

Electives (9 credits)

Electives must be approved by the program director or academic advisor.

Total: 34 credits

Master's Level Certificate(s)

Biodefense Graduate Certificate

Banner Code: PP-CERG-BIOD

School/Department: Schar School of Policy and Government (formerly SPGIA)

The School of Policy, Government, and International Affairs offers certificate programs in conjunction with its master's programs. The certificate in biodefense provides an interdisciplinary introduction to manmade and natural biological threats, including a background in the science and technology of biodefense and the specialized areas of threat assessment, non-proliferation, and medical and public health preparedness. Students already pursuing a master's degree in the school may, after admission to a certificate program, in most cases, earn an additional six credits (two courses) in SPGIA to receive a certificate in addition to the master's degree.

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the SPGIA admissions web site.

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

The graduate certificate in biodefense may be pursued on a part-time or full-time basis.

Certificate Requirements
Two required courses (6 credits)

- BIOD 604 - Emerging Infectious Diseases I: Bacteria and Toxins Credits: 3
- BIOD 609 - Biodefense Strategy Credits: 3

Three elective courses (9 credits) chosen from:

- BIOD 605 - Emerging Infectious Diseases II: Viral Agents Credits: 3
- BIOD 610 - Advanced Topics in Global Health Security Credits: 1-4
- BIOD 620 - Global Health Security Policy Credits: 3
- BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security Credits: 3
- BIOD 709 - Nonproliferation and Arms Control Credits: 3
- BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3
- BIOD 751 - Biosurveillance Credits: 3
- BIOD 766 - Development of Vaccines and Therapeutics Credits: 3
- other course with prior written approval of program director

Total: 15 credits

Emergency Management and Homeland Security Graduate Certificate

Banner Code: PP-CERG-EMHS

School/Department: Schar School of Policy and Government (formerly SPGIA)

The School of Policy, Government, and International Affairs offers certificate programs in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in SPGIA to receive a certificate in addition to the master's degree.

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the SPGIA admissions web site.

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.
The graduate certificate in emergency management and homeland security may only be pursued on a part-time basis.

Certificate Requirements

Three required courses (9 credits)

- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 630 - Emergency Planning and Preparedness Credits: 3
- PUAD 637 - Managing Homeland Security Credits: 3

Two elective courses (6 credits)

Students choose electives in the emergency management and homeland security area. A list of relevant electives is available under the concentration in emergency management and homeland security in the MPA (master of public administration) entry of the catalog.

Total: 15 credits

Global Health and Security Graduate Certificate

Banner Code: PP-CERG-GHS

School/Department: Schar School of Policy and Government (formerly SPGIA)

The School of Policy, Government, and International Affairs offers certificate programs in conjunction with its master's programs. The certificate in global health and security provides an introduction to the intersection of global public health and security, covering topics such as emerging infectious diseases, biosurveillance, the development of vaccines, and emergency response to public health disasters. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in SPGIA to receive a certificate in addition to the master's degree.

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the SPGIA admissions web site.

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

The graduate certificate in global health and security may be pursued on a part-time or full-time basis.
Certificate Requirements

Two required courses (6 credits)

- BIOD 620 - Global Health Security Policy Credits: 3
- GCH 543 - Global Health Credits: 3

Three elective courses (9 credits) chosen from:

- COMM 620 - Health Communication Credits: 3
- GCH 560 - Environmental Health Credits: 3
- GCH 602 - Global Health Issues Related to Violence Credits: 3
- GCH 640 - Global Infectious Diseases Credits: 3
- GCH 645 - U.S. and Global Public Health Systems Credits: 3
- GCH 712 - Introduction to Epidemiology Credits: 3
- GCH 726 - Advanced Methods in Epidemiology Credits: 3
- GCH 772 - Social Epidemiology Credits: 3
- PUAD 630 - Emergency Planning and Preparedness Credits: 3
- PUAD 631 - Disaster Response Operations and Recovery Credits: 3
- other course with prior written approval of program director

Total: 15 credits

National Security and Public Policy Graduate Certificate

Banner Code: PP-CERG-NSP

School/Department: Schar School of Policy and Government (formerly SPGIA)

The School of Policy, Government, and International Affairs offers certificate programs in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in SPGIA to receive a certificate in addition to the master's degree.

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the SPGIA admissions web site.

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F
in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

The graduate certificate may be pursued on a part-time or full-time basis.

Certificate Requirements

Required Core (3 credits)

- PUBP 500 - Theory and Practice in Public Policy Credits: 3

Electives (12 credits)

Electives may be drawn from the following courses as well as any other PUBP or ITRN course approved by the academic advisor.

- PUBP 650 - International Conflict and Crisis Response Credits: 3
- PUBP 651 - Peace and Stabilization Operations Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
- PUBP 743 - National Security Management and Policy Credits: 3
- PUBP 750 - History of Military Operations Other than War Credits: 3
- PUBP 751 - International Police Operations Credits: 3
- PUBP 755 - National Security Decision-Making Policy Credits: 3
- ITRN 701 - Special Topics in International Commerce and Policy Credits: 1-3
- ITRN 756 - National Security and the Global Economy Credits: 3

* One of the four electives must have an international focus

Total: 15 credits

Nonprofit Management Graduate Certificate

Banner Code: PP-CERG-NPMG

School/Department: Schar School of Policy and Government (formerly SPGIA)

The School of Policy, Government, and International Affairs offers certificate programs in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in SPGIA to receive a certificate in addition to the master's degree.

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the SPGIA admissions web site.

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F
in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

The graduate certificate in nonprofit management may only be pursued on a part-time basis.

Certificate Requirements

Three required courses (9 credits)

- PUAD 505 - Introduction to Management of Nonprofits Credits: 3
- PUAD 659 - Nonprofit Law, Governance, and Ethics Credits: 3
- PUAD 664 - Nonprofit Financial Management Credits: 3

Two elective courses (6 credits)

Students choose electives in the nonprofit area. A list of relevant electives is available under the concentration in nonprofit management in the MPA (master of public administration) entry of the catalog.

Total: 15 credits

Public Management Graduate Certificate

Banner Code: PP-CERG-PMG

School/Department: Schar School of Policy and Government (formerly SPGIA)

The School of Policy, Government, and International Affairs offers certificate programs in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in SPGIA to receive a certificate in addition to the master's degree.

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the SPGIA admissions web site.

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

The graduate certificate in public management may only be pursued on a part-time basis.

Certificate Requirements
Three required courses (9 credits)

- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 520 - Organization Theory and Management Behavior Credits: 3
- PUAD 540 - Public Policy Process Credits: 3

Two elective courses (6 credits)

Students choose electives in the public management area. A list of relevant electives is listed on the program description for the Public Administration, MPA, Public Management Concentration (PMA) of this catalog.

Total: 15 credits

Science, Technology, and Security Graduate Certificate

**Banner Code:** PP-CERG-STS

**School/Department:** Schar School of Policy and Government (formerly SPGIA)

The School of Policy, Government, and International Affairs offers certificate programs in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in SPGIA to receive a certificate in addition to the master's degree. The certificate in science, technology, and security provides an introduction to the intersection of science and security, covering topics such as the technology of CBRN weapons, proliferation, technical countermeasures, and the role of science and technology in the policy making process.

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the SPGIA admissions web site.

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

The graduate certificate in science, technology, and security may be pursued on a part-time or full-time basis.

**Certificate Requirements**

Two required courses (6 credits)
Three elective courses (9 credits) chosen from:

- BIOD 604 - Emerging Infectious Diseases I: Bacteria and Toxins Credits: 3
- BIOD 605 - Emerging Infectious Diseases II: Viral Agents Credits: 3
- BIOD 709 - Nonproliferation and Arms Control Credits: 3
- BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3
- BIOD 751 - Biosurveillance Credits: 3
- other course with prior written approval of program director

Total: 15 credits

Terrorism and Homeland Security Graduate Certificate

Banner Code: PP-CERG-TRHS

School/Department: Schar School of Policy and Government (formerly SPGIA)

The School of Policy, Government, and International Affairs offers certificate programs in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in SPGIA to receive a certificate in addition to the master's degree. The certificate in terrorism and homeland security is an interdisciplinary introduction to the phenomenon of modern terrorism and its implications for US domestic and foreign policy. It focuses on multidisciplinary analysis and holistic cross-sectorial approaches to long-term prevention of and response to terrorism.

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the SPGIA admissions website.

Students admitted to an SPGIA program will be terminated from SPGIA upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

The graduate certificate in terrorism and homeland security may only be pursued on a part-time basis.

Certificate Requirements
Two required courses (6 credits)

- BIOD 722 - Examining Terrorist Groups Credits: 3
- BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3

Three elective courses (9 credits) related to terrorism analysis or response chosen from:

- BIOD 609 - Biodefense Strategy Credits: 3
- BIOD 610 - Advanced Topics in Global Health Security Credits: 1-4
- BIOD 705 - Intelligence: Theory and Practice Credits: 3
- BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security Credits: 3
- BIOD 709 - Nonproliferation and Arms Control Credits: 3
- BIOD 726 - Food Security Credits: 3
- GOVT 744 - Foundations of Security Studies Credits: 3
- GOVT 745 - International Security Credits: 3
- GOVT 746 - Media and International Affairs Credits: 3
- GOVT 758 - Homeland/Transportation Security Administration Credits: 3
- PUAD 630 - Emergency Planning and Preparedness Credits: 3
- PUAD 631 - Disaster Response Operations and Recovery Credits: 3
- PUAD 633 - Hazard Mitigation Policy Credits: 3
- PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination Credits: 3
- PUAD 637 - Managing Homeland Security Credits: 3
- PUAD 731 - Homeland/Transportation Security Administration Credits: 3
- PUBP 742 - Transportation Safety and Security Credits: 3
- PUBP 763 - Illicit Trade Credits: 3
- PUBP 764 - Transnational Crime and Corruption Credits: 3
- PUBP 777 - Critical Infrastructure Protection: Policy and Practice Credits: 3
- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- GGS 590 - Selected Topics in Geography Credits: 1-3 (when topic is Geography of Terrorism and Homeland Security)
- other course with prior written approval of the advisor

Total: 15 credits

Doctoral Degree(s)

Biodefense, PhD
The doctoral program in biodefense is designed to prepare students to serve as scholars and professionals in the fields of biodefense and biosecurity. The program integrates knowledge of natural and man-made biological threats with the skills to develop and analyze policies and strategies for enhancing biosecurity. Other areas of biodefense, including nonproliferation, intelligence and threat assessment, and medical and public health preparedness are integral parts of the program.

**Admission**

Applicants must hold a master's degree from a regionally accredited institution and have a GPA of 3.00 or higher. Prospective students are encouraged to attend an information session.

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Please see the SPGIA admissions web site for application requirements and deadlines for the PhD in Biodefense. Students are considered for admission for the Fall term only.

**Degree Requirements**

The catalog contains additional information on university Graduate Academic Policies.

Students are required to complete a minimum of 72 credits. Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program. The courses which students plan to take should be approved in a program of study designed by the student and their advisor during the student's first semester. Students may take up to 12 credits of courses outside of the Biodefense Program with prior written approval of their advisor. Consult with the graduate program director or coordinator for a list of BIOD electives and approved non-BIOD electives that may be used to fulfill some of the requirements below.

**Reduction of Credit**

Students who enter the doctoral program with a master's degree or other graduate credit may have their credit reduced by up to 30 credits subject to the approval of the graduate coordinator and the program director.

**Doctoral Course Work (48-60 credits)**

**Seven core courses (21 credits)**

- BIOD 604 - Emerging Infectious Diseases I: Bacteria and Toxins Credits: 3
- BIOD 605 - Emerging Infectious Diseases II: Viral Agents Credits: 3
- BIOD 609 - Biodefense Strategy Credits: 3
- GOVT 500 - The Scientific Method and Research Design Credits: 3
- GOVT 540 - International Relations Credits: 3
- PUAD 637 - Managing Homeland Security Credits: 3
• One additional advanced research course (3 credits) chosen from GOVT 712, GOVT 717, PUAD 646, or an alternative research course approved by the program director.

Four courses (12 credits) in one field of specialization

International Security

Two required field seminars (6 credits)

• GOVT 744 - Foundations of Security Studies Credits: 3
• GOVT 745 - International Security Credits: 3

Two elective courses (6 credits)

Terrorism and Homeland Security

Two required field seminars (6 credits)

• BIOD 722 - Examining Terrorist Groups Credits: 3
• BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3

Two elective courses (6 credits)

Technology and Weapons of Mass Destruction

Two required seminars (6 credits)

• BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security Credits: 3
• BIOD 760 - National Security Technology and Policy Credits: 3

Two elective courses (6 credits)

Two courses (6 credits)

Of the courses listed for the fields of specialization above, students must select two courses from those that are not in their chosen field.

Electives (9 to 21 credits)

Students complete the remaining credits through additional elective courses chosen in consultation with their advisor. These courses may be in SPGIA or may be offered by other units. SPGIA courses include the following.

• BIOD 610 - Advanced Topics in Global Health Security Credits: 1-4
• BIOD 620 - Global Health Security Policy Credits: 3
• BIOD 621 - Ethics and International Security Credits: 3
• BIOD 622 - Negotiating in the International Arena Credits: 3
• BIOD 705 - Intelligence: Theory and Practice Credits: 3
• BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security Credits: 3
• BIOD 709 - Nonproliferation and Arms Control Credits: 3
• BIOD 710 - Health Security Preparedness Credits: 3
• BIOD 722 - Examining Terrorist Groups Credits: 3
• BIOD 723 - Legal Dimensions of Homeland Security Credits: 3
• BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3
• BIOD 726 - Food Security Credits: 3
• BIOD 751 - Biosurveillance Credits: 3
• BIOD 752 - The Role of the Military in Homeland Security Credits: 3
• BIOD 760 - National Security Technology and Policy Credits: 3
• BIOD 762 - Biotechnology and Society Credits: 3
• BIOD 766 - Development of Vaccines and Therapeutics Credits: 3
• BIOD 793 - Directed Studies in Biodefense Credits: 1-3
• BIOD 810 - Advanced Seminar in Biodefense Credits: 3
• BIOD 890 - Doctoral Supervised Internship Credits: 1-6
• BIOD 899 - Directed Research in Biodefense Credits: 1-12
• GOVT 510 - American Government and Politics Credits: 3
• GOVT 641 - Global Governance Credits: 3
• GOVT 706 - Federalism and Intergovernmental Relations Credits: 3
• GOVT 739 - Issues in Comparative and International Politics Credits: 3
• GOVT 741 - Advanced Seminar in International Politics Credits: 3
• GOVT 745 - International Security Credits: 3
• GOVT 755 - Seminar in Politics and Bureaucracy Credits: 3
• GOVT 843 - Diplomacy Credits: 3
• PUAD 504 - Managing in the International Arena: Theory and Practice Credits: 3
• PUAD 630 - Emergency Planning and Preparedness Credits: 3
• PUAD 631 - Disaster Response Operations and Recovery Credits: 3
• PUAD 632 - Terrorism: Theory and Practice Credits: 3
• PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination Credits: 3
• PUAD 701 - Cross-Cultural and Ethical Dimensions of International Management Credits: 3
• PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3
• PUAD 731 - Homeland/Transportation Security Administration Credits: 3
• PUAD 738 - Issues in International Security Credits: 3
• PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
• PHIL 642 - Biomedical Ethics Credits: 3
• PUBP 757 - Public Policy in Global Health and Medical Practice Credits: 3
• PUBP 758 - Global Threats and Medical Policies Credits: 3

Qualifying Exam

The purpose of the qualifying exam is to determine if the student is ready to engage in dissertation research. Doctoral students are eligible to take the exam at the conclusion of coursework, provided an approved Degree Plan is on file with SPGIA. The exam must be completed before the student takes dissertation proposal (BIOD 998).

Advancement to Candidacy

To advance to candidacy, students must complete all coursework required in their approved program of study and pass a qualifying exam.

Dissertation Research (12-24 credits)

Once enrolled in 998, students in this degree program must maintain continuous registration in 998 or 999 each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in 999, students must follow the university's continuous registration policy as specified in the Academic Policies section of the catalog. Students who defend in the summer must be registered for at least 1 credit of 999.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of 998 and a minimum of 6 and a maximum of 18 credits of 999. They may apply a maximum of 24 dissertation credits (998 and 999 combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Before registering in BIOD 999, students must offer a successful public defense of the dissertation proposal. Students must present the results of the dissertation research to their dissertation committee in a seminar and defend their dissertation to the university community. Successful completion of a dissertation is contingent on approval of the dissertation committee and the dean.

• BIOD 998 - Doctoral Dissertation Proposal Credits: 1-12
• BIOD 999 - Doctoral Dissertation Credits: 1-12 (minimum of 6 credits)

Total: 72 credits

Political Science, PhD
The doctoral program in political science is designed to prepare students for teaching and conducting research about government, careers in government and politics, and work in domestic and international nongovernmental organizations. The program allows students to combine their academic education with experience in the kinds of complex domestic and international political organizations they are studying. This model for political science education, patterned after the American Political Science Association's Congressional Fellows Program, is designed to foster scholarship and a firsthand understanding of domestic and international institutions such as think tanks, international bodies, nongovernmental organizations, journals of political opinion, and congressional and executive branch offices.

**Admission**

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Please see the SPGIA admissions web site for application requirements and deadlines for the PhD in Public Policy. Students are considered for admission for the Fall term only.

For students who have been admitted with a bachelor's degree, the Faculty Review Committee will review each student's progress after 30 credits of course work to determine whether the student will be allowed to continue their work toward the PhD. For students entering the program with a master's degree, this review will occur after 12 credits in this program. Students who are not allowed to continue to work toward the PhD will be allowed to complete the MA degree.

**Degree Requirements**

The catalog contains additional information on university Graduate Academic Policies.

Students are required to complete a minimum of 72 graduate credits. The course work for the degree is divided among core courses, advanced courses in two major fields and one minor field, research methods courses, experiential learning, and dissertation. A total of 12 credits of supporting courses may be taken in other departments to fulfill a minority of the credits for any of the requirements below, including the methodology requirement, with prior written approval of the program director. All courses should be planned with an advisor and appear on a program of study, which requires the approval of the program director.

**Reduction of Credit (up to 30 credits)**

For students entering the program with a master's or MPA degree, the number of credits required for the doctorate may be reduced by up to 30 credits subject to approval of the graduate coordinator and the dean.

**Doctoral Course Work (48-60 credits)**

**Three core courses (9 credits) chosen from:**

- GOVT 510 - American Government and Politics Credits: 3
- GOVT 520 - Political Theory Credits: 3
- GOVT 530 - Comparative Politics Credits: 3
- GOVT 540 - International Relations Credits: 3
Seven advanced courses (21 credits) in two major fields

Students choose two major fields from the four fields below and complete all course requirements for both fields of study.

American government and politics

Two required field seminars (6 credits) chosen from:

- GOVT 603 - Seminar in the Courts and Constitutional Law Credits: 3
- GOVT 604 - Seminar on Congress and Legislative Behavior Credits: 3
- GOVT 605 - Seminar on the Presidency Credits: 3
- GOVT 706 - Federalism and Intergovernmental Relations Credits: 3

One to three elective courses (3 to 9 credits)

Comparative politics

Two required field seminars (6 credits)

- GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3
- GOVT 731 - Advanced Seminar in Comparative Politics Credits: 3

One to three elective courses (3 to 9 credits)

International relations

Two required field seminars (6 credits) chosen from:

- GOVT 641 - Global Governance Credits: 3
- GOVT 741 - Advanced Seminar in International Politics Credits: 3
- GOVT 743 - International Political Economy Credits: 3
- GOVT 745 - International Security Credits: 3

One to three elective courses (3 to 9 credits)
Public administration

Two required field seminars (6 credits)

- GOVT 753 - Third-Party Governance Credits: 3
- GOVT 755 - Seminar in Politics and Bureaucracy Credits: 3

One to three elective courses (3 to 9 credits)

Three advanced courses (9 credits) in a minor field

Students choose one minor field in consultation with an advisor. The courses in the minor field should complement the two major fields and need the prior written approval of the advisor.

Three advanced courses (9 credits) in methodology

Two required methodology courses (6 credits)

- GOVT 500 - The Scientific Method and Research Design Credits: 3
- GOVT 511 - Problem Solving and Data Analysis I Credits: 3

One elective methodology course (3 credits)

Students choose an elective methodology course to meet their dissertation research needs. Course work in language or to help achieve proficiency in quantitative or qualitative research techniques may be used to meet this requirement with prior written approval of the program director.

Electives (0-12 credits)

A maximum of 6 credits of electives may come from experience in government and politics. Students do 20 hours per week in the field for one semester or 10 hours per week for two semesters. They produce an academic paper at the conclusion of the experience discussing the implications of their observations for research in the field and how scholarship in the field might be applied to an issue faced by the organization.

Advancement to Candidacy

To advance to candidacy, students must complete all course work required by their approved program of study. Students must also successfully complete and pass two qualifying exams in major fields. In addition, students must have an approved
dissertation committee as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean's Office before a student can advance to candidacy.

**Dissertation Research (12-24 credits)**

Once enrolled in 998, students in this degree program must maintain continuous registration in 998 or 999 each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in 999, students must follow the university's continuous registration policy as specified in the Academic Policies section of the catalog. Students who defend in the summer must be registered for at least 1 credit of 999.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of 998 and a minimum of 6 credits of 999. They apply a minimum of 12 and a maximum of 24 dissertation credits (998 and 999 combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Students who do fewer than 24 credits of dissertation will complete their degree with additional elective courses.

- **GOVT 998 - Doctoral Dissertation Proposal Credits: 3-6**
- **GOVT 999 - Doctoral Dissertation Research Credits: 1-12 (minimum of 6 credits)**

**Total: 72 credits**

**Public Policy, PhD**

**Banner Code: PP-PHD-PUBP**  
**Phone: 703-993-2280**

**School/Department: Schar School of Policy and Government (formerly SPGIA)**

This program is distinctive in its heavy emphasis on the combined influence of technology, culture, and institutions on public policy. Students investigate the increasing tensions created by technologically driven organizational change. This doctoral program prepares its graduates to assume positions of significant responsibility in academia, government, and the private and public sectors. With a focus on analytical and research-based approaches to public policy, our students seek to understand the underlying determinants of public policy choices, analyze and improve the implementation of policy, and identify and assess new opportunities to address emerging issues.

To investigate the policy issues associated with substantive policy areas, students develop in-depth understanding of American institutions, values, and culture; competence in research methods and advanced analytical methodologies; and a comparative, international perspective. At the time of admission, each student is assigned a faculty advisor who assists in the design and development of the student's program.

**Admission**

The program seeks students with exceptional potential for accumulating, sorting, analyzing, and communicating information and findings effectively. Public policy is inherently complex and value laden. In the end, high-quality policy analysis requires thoughtful and judicious management of complex and incommensurate information, both quantitative and qualitative. Potential students must be able to manage and integrate both kinds of information and produce persuasive, well-organized, written syntheses and analytical insight.
The ideal applicant has demonstrated capabilities in research and writing, basic mathematical skills roughly equal to one semester of calculus, competence in statistics, some background in economics, and a theoretical and working knowledge of public policy processes. Applicants with strong records who are lacking in one or more of these areas may be admitted to the program and will receive assistance in making up deficiencies.

Applicants must hold a master's degree from a regionally accredited institution and have a GPA of 3.00 or higher. Prospective students are encouraged to attend an information session.

Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Please see the SPGIA admissions web site for application requirements and deadlines for the PhD in Public Policy. Students are considered for admission for the Fall term only.

Degree Requirements

The catalog contains additional information on university Graduate Academic Policies.

Students are required to complete a minimum of 82 credits of graduate course work, of which no more than 12 may be dissertation credits. Specific course work requirements include four foundational core courses, one semester of participation in the research colloquium (public policy seminar), two advanced methodology courses, three courses in an area of program specialization, and three advanced courses tailored to the student's research needs and interests. Courses are determined in collaboration with the student's advisor and are drawn widely not only from SPGIA, but also from other programs at Mason.

As detailed below, at the completion of core skills course work (Stage One), students must pass a qualifying exam that evaluates mastery of the first year's material, as well as the ability to integrate that material when addressing important and complex public policy problems and issues. Students must then develop their research areas through specialized course work, and pass a field exam structured around their specific field of proposed doctoral research (Stages Two and Three). Other requirements include the successful preparation and defense of a doctoral research proposal and the ensuing dissertation (Stage Four).

A complete description of the program policies, procedures, and requirements is in the PhD in Public Policy student and faculty handbook, which is published annually.

Reduction of Credit (up to 30 credits)

Students must have a master's degree before being admitted to the PhD in public policy. Up to 30 credits from a prior master's degree may be applied toward the doctoral requirements at the program director's discretion. The program director determines whether the credits are eligible for reduction of credit and the number of credits to be reduced. Students who receive less than a 30 credit reduction may take additional specialized elective credit in Stage Two.

Prerequisites: Methodological and Substantive Foundations (0 credit)

PhD students are required to have competence in the following three areas, either by taking these courses or by proving competence through a placement exam and/or evidence of previous relevant course work.

Prerequisite courses will not count as part of the 82 credit requirement.

- PUBP 511 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 730 - US Institutions and the Policy Process Credits: 3

Doctoral Course Work and Requirements (minimum 41 credits)
Stage One - Core Skills (16 credits)

- PUBP 800 - Culture and Public Policy Credits: 1-4 (4 credits)
- PUBP 801 - Research Design for Public Policy Credits: 1-4 (4 credits)
- PUBP 804 - Multivariate Statistical Analysis in Public Policy Credits: 4
- PUBP 805 - Foundations of Social Science for Public Policy Credits: 4
- Pass the comprehensive Qualifying Exam

Stage Two - Policy Fields and Skills (13 credits)

After passing the qualifying exam, students assemble a Field Research Committee. By the end of their third semester, full-time students (fourth semester for part-time) must choose a chair for their Field Committee.

By the start of their fourth semester, full-time students (fifth semester for part-time) must submit to the chair of their Field Committee a plan for their Field of Study. The Field of Study Plan will describe a proposed research area, including citations relevant to current research in that Field. The Plan must be approved by both the student's Field Committee chair and the program director.

Course work taken in Stage Two includes:

- Three courses in an area of program specialization, chosen in collaboration with advisor
- One advanced methods course. Course must be chosen from the approved list (see below) for the public policy PhD program, or approved by the program director
- PUBP 850 - Seminar in Public Policy Credits: 1

Advanced Methods Courses

- PUBP 705 - Advanced Statistical Methods in Policy Analysis Credits: 3
- PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy Credits: 3
- PUBP 791 - Advanced Field Research for Policy: Theory and Method Credits: 4
- PUBP 792 - Advanced Economic Analysis for Policy Research Credits: 4
- PUBP 793 - Large-Scale Database Construction and Management for Policy Research Credits: 4

Stage Three - Research Foundations (minimum 13 credits)

In Stage Three, students take course work approved in the Field of Study Plan. Courses in the Field of Study Plan are intended to be taken concurrently with work on the Field Statement and Field Exam. Students may not present a dissertation proposal for approval until they have passed the Field Exam.

Students may choose one of the established fields of study or work with a faculty committee to create their own field of study. The established fields in the doctoral program are: regional development and transportation; technology, science and innovation; entrepreneurship, growth and public policy; U.S. governance; culture and society; organizational and information technology; and global and international systems.
Students must complete all of the following:

- Three substantive Field of Study courses (10-12 credits) that will serve as a foundation for their Field. Courses must include at least one 800 level course offered in SPGIA (see list below) and no more than one substantive graduate course from outside SPGIA.
- One Advanced Methods course (3-4 credits) Course must be chosen from the approved list (see below) for the public policy PhD program, or approved in writing by the Field Committee Chair and program director.
- Field Statement
- Field Exam

Note: Where appropriate courses are not available from SPGIA, students may petition the program director for substitute courses to count for their Field of Study Plan.

Field of Study Courses

Eligible SPGIA 800-level courses include the following.

- PUBP 810 - Regional Development and Transportation Policy Credits: 4
- PUBP 811 - Applied Methods in Regional Development and Transportation Policy Credits: 4
- PUBP 820 - Technology, Science, and Innovation: Institutions and Governance Credits: 4
- PUBP 821 - Analytic Methods for Technology, Science, and Innovation Policy Credits: 4
- PUBP 834 - Entrepreneurship, Growth, and Public Policy Credits: 1-4
- PUBP 835 - Entrepreneurship, Creativity, and Innovation Credits: 1-4
- PUBP 840 - U.S. Policy-Making Institutions Credits: 4
- PUBP 841 - U.S. Policy-Making Processes Credits: 4
- PUBP 860 - Social Theory, Culture, and Public Policy Credits: 4
- PUBP 861 - Culture and Social Policy Analysis Credits: 4
- PUBP 880 - Global and International Public Policy I Credits: 4
- PUBP 881 - International Trade Policy Credits: 4

Advanced Methods Courses

- PUBP 705 - Advanced Statistical Methods in Policy Analysis Credits: 3
- PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy Credits: 3
- PUBP 791 - Advanced Field Research for Policy: Theory and Method Credits: 4
- PUBP 792 - Advanced Economic Analysis for Policy Research Credits: 4
- PUBP 793 - Large-Scale Database Construction and Management for Policy Research Credits: 4

Dissertation Research (12 credits)

Qualifying Exams

Students must pass both a qualifying exam which is taken after the core courses are completed and a field examination.
When students have completed all coursework, have passed both the qualifying and field exams, have an approved dissertation committee and presented and successfully defended a dissertation proposal, they advance to candidacy.

Stage Four - Dissertation

- PUBP 998 - Research/Proposal for Dissertation Credits: 1-9
- Proposal Oral Defense
- PUBP 999 - Dissertation Credits: 1-9 (998 + 999, 12 credits total, at least 6 credits from 999)
- Dissertation Oral Defense

Total: minimum 82 Credits
Research Centers

Center for Emerging Market Policies

Director: Andrew Hughes Hallett, DPhil

This center aims to be a premier research and teaching hub on international commerce, economics and public policy issues relating to emerging markets. It leverages Mason’s and the School of Policy, Government, and International Affairs’ considerable expertise on and interest in emerging markets to promote pioneering applied research on emerging markets in Asia, Central and Eastern Europe, Latin America and elsewhere.

Center for Energy Science and Policy

Co-Directors: Richard Kauzlarich, PhD and Paul R. Houser, PhD

This center, a joint initiative of the College of Science and School of Policy, Government, and International Affairs, provides objective analysis of key issues in the energy field that is grounded in original research. It serves as a center of gravity for the many researchers at George Mason whose work engages them with these issues and connects them with decision-makers in the economy, society, and government.

Center for Entrepreneurship and Public Policy

Director: Zoltan Acs, PhD

Economic development policy has shifted dramatically from a business and industry attraction strategy to a more entrepreneurial approach. The Center for Entrepreneurship and Public Policy focuses on entrepreneurship policy research and program delivery, offering programs in research, collaboration, and analysis.

Center for Global Policy

Director: Jack Goldstone, PhD

This center conducts research on a wide range of global policy issues, including foreign trade, democratization and state-building, and transnational networks. It also analyzes specific policy issues for a variety of government agencies, and develops and serves as the home to several major cross-national databases for global policy.

Center for Microeconomic Policy Research

Director: John Earle, PhD

This center is a forum for policy-relevant research using micro-economic and micro-econometric methods.

Center for Regional Analysis

Director: Terry Clower, PhD

Focusing on economic development in technologically intensive regions, the Center for Regional Analysis (CRA) maintains a corporate technology database for the national capital region. The CRA provides economic forecasting services to government agencies at all levels around the world.
Center for Science and Technology Policy

Directed by: David M. Hart, PhD

This center helps facilitate the exchange of information and ideas among the worldwide science, foreign affairs, trade, and technology communities. Areas of emphasis include international trade and science and technology.

Center for Security Policy Studies

Directed by: Audrey Kurth Cronin, DPhil

Today's security challenges—from proliferation and terrorism to climate change and cyber security—are beyond the scope of any one nation-state to address. Finding solutions requires international and multi-lateral cooperation among regional and global leaders, both state-based and outside the state, including corporate and non-governmental actors. The purpose of the Center for Security Policy Studies is to strengthen global strategic thinking by current and future policy-makers, so as to improve US and global security in the 21st century.

Center for the Study of International Medical Policies and Practices

Directed by: Arnauld Nicogossian, MD

This center provides leadership and focus on global medical and public health policies and processes, working collaboratively with health, science, and medical organizations in the public and private sectors, and academic organizations to address pressing global policy concerns.

Center for Transportation Public-Private Partnership Policy

Directed by: Jonathan L. Gifford, PhD

The Center is devoted to advancing the objective consideration of public-private partnerships for transportation system renewal and expansion through research, education and public service. The Center supports development of U.S. and international case studies of P3 projects and programs, analyses of the impact of P3s, sponsors workshops and conferences, and supports graduate students and faculty.

Centers on the Public Service

Directed by: Paul L. Posner, PhD; Alan J. Abramson, PhD; Frank H. Shafroth, JD

The Centers on the Public Service have been established to help the public sector address emerging challenges that are unprecedented in both scope and complexity. All levels of government, as well as nonprofits and contractors, are under greater pressure to deliver more with fewer resources. The three centers can play important roles through providing training, conducting research, and promoting much needed collaboration across the many officials involved in governance today.

International Center for Applied Studies in Information Technology

Directed by: Stephen Ruth, PhD

The International Center for Applied Studies in Information Technology (ICASIT) is a consulting group dedicated to delivering the power of the Internet to businesses, underserved markets, and developing countries. ICASIT has contracts in more than 20 countries.
Terrorism, Transnational Crime and Corruption Center

Director: Louise I. Shelley, PhD

The Terrorism, Transnational Crime and Corruption Center (TraCCC) is the first center in the United States devoted to understanding the links among terrorism, transnational crime and corruption. The center teaches, researches and formulates policy on these critical issues. TraCCC accomplishes its mission through international research partnerships engaging in fundamental and applied research projects. Research addresses such diverse concerns as national security, economic development and human rights.
Volgenau School of Engineering

Graduate Admissions: 703-993-1512
Graduate Student Affairs: 703-993-1505
Undergraduate Student Services: 703-993-1511

Departments

Bioengineering
Computer Science
Electrical and Computer Engineering
Information Sciences and Technology
Mechanical Engineering
Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering
Statistics
Systems Engineering and Operations Research
Multidisciplinary Programs (VS)

The mission of the Volgenau School of Engineering (VSE) is to provide a transformative learning experience for our students that integrates engineering and technology with other areas of scholarship to produce visionary stewards of society who are prepared to discover solutions to complex global challenges and make the world safer, cleaner, and more prosperous.

Our faculty members are engaged educators who lead high-impact research in critical areas such as sustainability, big data, cyber security, robotics and artificial intelligence, and healthcare. These existing and emerging areas of expertise span departmental and disciplinary boundaries and reflect the breadth of the scholarly activities of our faculty and students.

The Volgenau School of Engineering prepares students to solve complex, multidisciplinary, global challenges by leveraging innovative learning tools, the inventive capacity of our region, and Mason's global presence. The faculty and administration support the needs of the 21st century learner by providing multiple paths to success, a diverse and inclusive academic community, and real time integration of new data and technology in the classroom.

We offer bachelor's degree programs in the areas of applied computer science, bioengineering, civil and infrastructure engineering, computer engineering, computer science, cyber security engineering, electrical engineering, information technology, mechanical engineering, and systems engineering. Our undergraduate degree programs prepare students to enter directly into professional employment or continue studies at the graduate level. The requirements for the bachelor's degrees include required and elective courses in mathematics, humanities, Mason Core, and specialty courses applicable to the major. Each program strongly emphasizes English composition and communication. Minors are available in aviation flight
training and management, computer science, data analysis, environmental engineering, information technology, mechanical engineering, software engineering, statistics, and systems engineering and operations research.

The ever-increasing complexity and technical challenges in engineering, computer science, and information technology demand studies beyond the bachelor's degree. Master's degree programs are available in the following areas: applied information technology, bioengineering (pending SCHEV approval), biostatistics, civil and infrastructure engineering, computer engineering, computer forensics, computer science, electrical engineering, geotechnical construction and structural engineering, information security and assurance, information systems, operations research, software engineering, statistical science, systems engineering, telecommunications, and multidisciplinary programs in data analytics engineering and in management of secure information systems.

PhD graduates will gain comprehensive knowledge in their area of study and are prepared for careers in higher education and scientific research. They are required to demonstrate comprehensive understanding and complete research that adds significantly to the body of knowledge in engineering, computer science, information technology or statistics. Doctoral degree programs are available in the following areas: bioengineering, civil and infrastructure engineering, computer science, electrical and computer engineering, systems engineering and operations research, statistical science, and a multidisciplinary program in information technology.

Administration

Kenneth S. Ball, P.E. (Texas), Dean
Stephen G. Nash, Senior Associate Dean
Sharon A. Caraballo, Associate Dean for Undergraduate Programs
Melinda N. Barnhart, Executive Director, Finance and Administration
Martha Bushong, Director, Communications
Jonathan Goldman, Director, Computing Resources
Linda S. Kovac, Chief Advancement Officer
Terri A. Mancini, Director, Sponsored Research Administration

Bachelor of Science Programs

The Volgenau School offers 10 Bachelor of Science programs. Policies regarding admission and degree requirements specific to these majors are provided in the department sections that follow.

**Undergraduate Mission and Goals**

The undergraduate mission is to provide a quality education to support the needs of Virginia and the nation. The goal is to graduate students who are technically competent, prepared for ethical professional practice and a lifetime of learning, communicate effectively and work as members or leaders of technical teams, and understand the global nature and effect of information technology and engineering.

**Degree Requirements**

The following general requirements must be completed by all undergraduate students:

- At least 120 credits of academic work including at least 45 credits of upper-level courses (numbered 300 or above);
- At least 6 credits of English composition, 3 credits of literature, and 3 credits of oral communication (Mason Core courses);
- At least 3 credits of arts, 3 credits of Western civilization or world history, 3 credits of social and behavioral science, and 3 credits of global understanding issues (Mason Core courses);
- At least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of Mason Core courses described above;
- All requirements listed in the following sections for specific Volgenau School majors, including university requirements for mathematics, natural science, information technology including ethics, and synthesis. Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments. With approval of departmental advisors, some courses may be taken out of the indicated sequences, particularly English, literature and social science courses.

**Termination from the Major**

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the "Termination from the Major" section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.
A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Sample Schedules

Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments.

Undeclared Students in the Volgenau School of Engineering

Students who are undecided about their specific major may select Volgenau School Undeclared as their major. This should be done as soon as possible after a student enrolls at Mason. Students will be advised to follow an initial semester or two of courses that could be applicable to majors that are of interest to them. This may involve taking courses that help the student better understand different engineering and computing areas, but which may not contribute to the total credits needed for the major they eventually choose.

Students who apply to a VSE major but do not meet major admissions criteria may also be accepted into VSE Undeclared, and become eligible to declare a VSE major after meeting specific requirements as determined by that particular major.

VSE Undeclared students are advised by the Coordinator of Undergraduate Academic Advising in the Student Services Office. Students should seek advising at least once each semester.

Academic Policies

Students should become familiar with the Academic Policies in the University Catalog in addition to policies specific to each academic unit. The Academic Policies section of the catalog also lists additional university requirements for minor programs and double majors.

Academic Appeal of Policies and Actions

A student's instructor, academic advisor and/or department can resolve most academic issues. If, however, an undergraduate student disagrees with a decision at the department level and feels that there may be reasonable grounds for appeal, the student should contact the Volgenau School Undergraduate Student Services Office at 703-993-1511 for guidance in preparing a request to the Associate Dean for Undergraduate Programs or other offices as appropriate.

Academic Progression

Students majoring in Volgenau School programs are expected to have an acceptable plan of study on file, formulated with assistance from their departmental advisor. They are expected to make reasonable progress toward their degree during each semester in which they are enrolled.

Restricted Courses

Students are encouraged to take advantage of the many excellent courses available to broaden their educational experience or strengthen their background; however, some credits earned may not satisfy any degree requirements. Degree requirements for Volgenau School undergraduate programs may not include credits earned in activity courses, including military science, individual sports, physical education or team sports, and recreational activities. Exceptions in these categories are courses that meet the Mason Core requirements for the major, including global understanding. Arts courses are permitted. Whenever there is uncertainty, students must consult with an academic advisor in their department.
Generally, degree requirements for computer science and engineering majors may not be met by 100- to 400-level courses designated "IT" (and any associated cross-listed courses) in the Courses section of this catalog unless approved by the student's major department. For more information, students should contact their academic advisor.

**Writing-Intensive Requirement**

The university requires all undergraduate students to successfully complete a course, or combination of courses, designated "writing-intensive" in their majors at the 300 level or above. To determine the writing-intensive course requirements for specific degrees, refer to the major program descriptions in the following department sections.

**Graduate Admission**

Admission decisions are made by the faculty committee or graduate coordinator of the respective graduate program. Denial of admission is not subject to appeal. Applicants denied admission to a program are not permitted to enroll in courses in that graduate program, though they may apply for either non-degree enrollment or admission to another program.

If an applicant is offered graduate admission, the college reserves the right to withdraw that offer if admission:

- During his or her academic studies, the admitted applicant has a significant drop in academic performance or fails to graduate with a degree prior to the first day of classes for the term admitted.
- There has been a misrepresentation in the application process.
- Prior to the first day of classes for the term admitted, the school learns that the admitted applicant has engaged in behavior that indicates a serious lack of judgment or integrity, irrespective of the outcome of any disciplinary process related to such behavior.
- For students admitted to an accelerated master's program, the student does not maintain satisfactory progress in his or her undergraduate program, does not receive a minimum grade of 3.00 in the graduate classes taken as an undergraduate, or otherwise does not meet the conditions specified on the application and admission letter.

The university further reserves the right to require the applicant to provide additional information (and/or authorization for the release of information) about any such matter.

**Graduate Non-degree**

Non-degree graduate students taking courses in the Volgenau School may not register for classes numbered 700 or higher. All MS degree programs require at least 18 credits to be completed in degree status at Mason to be considered for graduation; as a result, a maximum of 12 credits of non-degree coursework can be transferred to a degree program.

**BS/Accelerated MS Programs**

Many of the BS degree programs offered within the Volgenau School may be packaged with some of the MS degree programs in ways that reduce the total number of credits required. Details can be found in the individual department sections of this catalog.

**Master of Science Programs**

The Volgenau School offers a number of master of science programs. Policies regarding admission and degree requirements are provided in the sections of this catalog linked below.
The Volgenau School offers seven doctoral programs. Policies regarding admission and degree requirements are provided in the sections of this catalog linked below.
Volgenau School Graduate Policy for Readmission after Termination

Graduate students who have been terminated, dismissed, or have resigned from a program in the Volgenau School and want to reapply to the same program must wait three calendar years before submitting a new application for admission. A full application for admission as well as all application materials required of that program must be submitted (or resubmitted). GRE scores, if required, cannot be older than five years. Previous admission to a program does not guarantee readmission to the same program. The circumstances of the prior termination will be a factor in the decision-making process. Graduate credit earned prior to termination can be applied to the degree program as long as the requirements for Transfer of Credit (section AP.6.5.3) are met.

Online Education Programs

In order to increase access to Volgenau School education and to meet the needs of the School's student population, a number of individual courses and select degree programs can be completed via online education. All academic policies and procedures apply to online education programs and courses; see the appropriate sections of this catalog. Some instructors may require students to come to campus or make alternate arrangements for exams and/or other meetings. Students should contact the instructor directly to resolve any questions. For online education courses that involve live online transmission of simultaneous classroom instruction, students enrolled in the online section may also be permitted to join the campus-based section in the classroom; Patriot Web will state if this option is available for a particular online education section. Please contact Mason Online for details.

Commonwealth Graduate Engineering Program (CGEP)

CGEP is a premier provider of high-quality post-baccalaureate engineering education for practicing engineers and scientists interested in maintaining and enhancing their skills. Participating universities are: George Mason University (Mason); Old Dominion University (ODU); University of Virginia (UVA); Virginia Commonwealth University (VCU); and Virginia Tech (VT). Offerings include master's degrees and certificate programs.

Each degree program is taught by one of the five participating universities, and prospective students should apply directly to the university offering the degree of interest. Mason's MS in Telecommunications degree is available through CGEP. This program follows all policies stated in this catalog for the MS in Telecommunications, with the exception that, with faculty advisor approval, up to 50% of the required credits may be completed at other CGEP institutions.
Policies for other universities' programs are determined by those institutions; please consult with the university offering the program of interest for details.

For more information about CGEP, go to: http://cgep.virginia.gov/

Bioengineering

Phone: 703-993-4190 or 703-993-5769
Web: bioengineering.gmu.edu

School: Volgenau School of Engineering

Faculty

Professors: Mark (acting chair), Cebral

Associate Professor: Sikdar

Assistant Professors: Agrawal, Bray, Chitnis, Ikonomidou, Joiner, Salvador Morales, Wei

Affiliated Professors: Civillico, Cortes, Katona, Pancrazio, Peixoto, Rangwala, Seshaiyer, Shah, Shehu

Bioengineering involves the application of tools and concepts in engineering and computation to problems in biology or medicine. The impact of engineering and computer science on biomedicine is wide ranging, from advanced biomedical imaging technologies to novel computational models of protein dynamics. With the growing costs of health care and the impact of novel technology to fundamental understanding in biosciences, the demand for bioengineers is growing. This program provides students with a solid foundation in engineering while offering in depth exposure to the life sciences. Bioengineering faculty members collaborate with colleagues at George Mason University and nearby institutions including Inova Health Center and federal laboratories such as the Naval Research Laboratory, the National Institutes of Health Clinical Center, and the National Institute of Standards and Technology. Research areas include: computational biology, bioinformatics, biosensors, magnetic resonance imaging, medical ultrasound, microdevices, nanotechnology and neuroengineering.

The BS in Bioengineering is a challenging multidisciplinary training program with the goal of enabling graduates to be competitive for an entry-level position in the biomedical industry or to continue their education in graduate school or medical school. The curriculum provides a strong background in the biological and engineering fundamentals of bioengineering as well as upper level courses in areas of biomedical measurements, biomedical systems modeling, and bioinformatics. The department offers three concentrations: Biomedical Signals and Systems, Bioengineering Healthcare Informatics, and Bioengineering Prehealth. In addition the Bioengineering, BS program offers an Honors Program to outstanding students. Entry is by invitation and based on academic performance achieved at Mason.

The Bioengineering, MS (pending SCHEV Approval) prepares students for research and professional practice in bioengineering and related fields. It is comprised of 3 different options; students can choose to focus their graduate work toward a career in academia (thesis option), or in industry (practicum or coursework option).

The Bioengineering, PhD is a research-intensive, multifaceted program which is comprised of 4 different concentrations. Students can choose to focus their graduate work in nanoscale bioengineering, neuroengineering, biomedical imaging or data-driven biomechanical modeling.

With respect to MS-driven graduate studies, students can conduct graduate-level bioengineering research and training under the mentorship of bioengineering faculty while working toward an MS degree in Electrical and Computer Engineering or Data Analytics Engineering.
Courses

The Bioengineering Department offers 100 – 900 BENG courses; these can be found in the Courses section of this catalog.

Bachelor of Science

Bioengineering, BS

Banner Code: VS-BS-BIOE

School: Volgenau School of Engineering
Department: Bioengineering

Bioengineering, also referred to as biomedical engineering, is the application of engineering tools and approaches to solve problems in biology and medicine. It is a broad and growing field that draws upon rapid advances in technology and computation, as well as on unprecedented growth in basic biological understanding.

This program concentrates on making measurements and analyzing complex data. It is challenging since it will provide a solid foundation in engineering, and also give in-depth exposure to the life sciences. The impact of engineering and computer science on biomedicine is wide, ranging from improved medical diagnosis through advanced imaging technologies, to enhanced understanding in rehabilitation gained by computational models of limb movement. With the growing demand for better health care, the need for bioengineers is expected to be high.

The multidisciplinary training in this field will make graduates competitive for a position in government or the biomedical industry. It also enables students to continue their education in graduate school or medical school.

The concentrations in the BS Bioengineering program are: Biomedical Signals and Systems (BMSS), Bioengineering Healthcare Informatics (BHI), and Bioengineering Prehealth (BMPH). The BMSS concentration emphasizes the systems and methods for acquisition and analysis of biomedical signals whereas the BHI concentration focuses on the management, analysis and visualization of data related to biomedical and healthcare applications. The BMPH concentration prepares students for continued studies as a health care professional in medicine, dentistry, or veterinary medicine.

The educational objectives of the Bioengineering undergraduate program are the following:

- Alumni electing to work after graduation (for example, in industry or government) will contribute to the development or application of new products or processes that are of benefit to society.
- Alumni electing to continue their formal education will have completed their studies, or will have made demonstrable progress toward an advanced degree in their chosen profession.
- Alumni will communicate and perform effectively as members or leaders of multi-disciplinary teams.
- Alumni will continue to enhance their skills and knowledge in a quest for further professional development.

The bachelor's program in Bioengineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Degree Requirements

Students must complete each BENG, BIOL, ECE and ENGR course presented as part of the required credits for the degree with a grade of C or better.

The 120-135 credits required for the BS in Bioengineering are listed below.
Bioengineering Credits: 29

- BENG 101 - Introduction to Bioengineering Credits: 0-3
- BENG 220 - Physical Bases of Biomedical Systems Credits: 3
- BENG 301 - Bioengineering Measurements Credits: 3
- BENG 302 - Bioengineering Measurements Lab Credits: 1
- BENG 304 - Modeling and Control of Physiological Systems Credits: 3
- BENG 320 - Bioengineering Signals and Systems Credits: 3
- BENG 380 - Introduction to Circuits and Electronics Credits: 3
- BENG 381 - Circuits and Electronics Lab Credits: 1
- BENG 420 - Bioinformatics for Engineers Credits: 3
- BENG 491 - Bioengineering Senior Seminar I Credits: 1
- BENG 492 - Senior Advanced Design Project I Credits: 2
- BENG 493 - RS: Senior Advanced Design Project II Credits: 2
- BENG 495 - Bioengineering Senior Seminar II Credits: 1

Biology Credits: 7

- BIOL 213 - Cell Structure and Function Credits: 4
- BENG 313 - Physiology for Engineers Credits: 3

Computer Science Credits: 4

- CS 112 - Introduction to Computer Programming Credits: 4

Mathematics and Statistics Credits: 20

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Physics Credits: 8

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Engineering Credits: 2

- ENGR 107 - Introduction to Engineering Credits: 2

Communication Credits: 3

- COMM 100 - Public Speaking Credits: 3 OR COMM 101 - Interpersonal and Group Interaction Credits: 3

▲Concentration in Bioengineering Healthcare Informatics (BHI) (31 credits)

This concentration requires successful completion of the following courses:

Bioengineering Credits: 3

- BENG 322 - Health Data Challenges Credits: 3

Chemistry Credits: 4

- CHEM 251 - General Chemistry for Engineers Credits: 4

Computer Science Credits: 3

- CS 222 - Computer Programming for Engineers Credits: 3

Economics Credits: 3

- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Health Administration & Policy Credits: 6

- HAP 301 - Health Care Delivery in the United States Credits: 3
- HAP 360 - Introduction to Health Information Systems Credits: 3
Information Technology Credits: 3

- IT 214 - Database Fundamentals Credits: 3

Technical Elective Credits: 9

Choose 9 credits from the following technical electives:

- BENG 341 - Introduction to Biomaterials Credits: 3
- BENG 390 - Engineering Design and Fabrication Credits: 3
- BENG 392 - Engineering Design Studio Credits: 1
- BENG 395 - RS: Mentored Research in Bioengineering Credits: 1-3
- BENG 406 - Introduction to Biomechanics Credits: 3
- BENG 441 - Nanotechnology in Health Credits: 3
- BENG 451 - Translation and Entrepreneurship in Bioengineering Credits: 3
- BENG 499 - Special Topics in Bioengineering Credits: 0-4
- BENG 525 - Neural Engineering Credits: 3
- BENG 538 - Medical Imaging Credits: 3
- ECE 305 - Electromagnetic Theory Credits: 3
- ECE 410 - Applications of Discrete-Time Signal Processing Credits: 3
- ECE 421 - Classical Systems and Control Theory Credits: 3
- ECE 450 - Introduction to Robotics Credits: 3
- ME 313 - Material Science Credits: 3

Students may choose to substitute one of the technical electives with one of the following:

- BIOL 305 - Biology of Microorganisms Credits: 3 AND BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3 AND CHEM 315 - Organic Chemistry Lab I Credits: 3
- CS 310 - Data Structures Credits: 3
- CS 444 - Introduction to Computational Biology Credits: 3
- CS 445 - Computational Methods for Genomics Credits: 3
- NEUR 327 - Cellular, Neurophysiological, and Pharmacological Neuroscience Credits: 3
- PSYC 372 - Physiological Psychology Credits: 3

▲ Concentration in Bioengineering Prehealth (BMPH) (43-44 credits)

This concentration requires successful completion of the following courses:

Biology Credits: 7-8

- BIOL 483 - General Biochemistry Credits: 4
  And one of the following:
- BIOL 305 - Biology of Microorganisms Credits: 3 AND BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 311 - General Genetics Credits: 4
- BIOL 322 - Developmental Biology Credits: 3 AND BIOL 323 - Lab for Developmental Biology Credits: 1
- BIOL 326 - Animal Physiology Credits: 3
- BIOL 382 - Introduction to Virology Credits: 3
- BIOL 430 - Advanced Human Anatomy and Physiology I Credits: 4

Chemistry Credits: 18

- CHEM 211 - General Chemistry I Credits: 3 AND CHEM 213 - General Chemistry Laboratory I Credits: 1
- CHEM 212 - General Chemistry II Credits: 3 AND CHEM 214 - General Chemistry Laboratory II Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry II Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2

Computer Science Credits: 3

- CS 211 - Object-Oriented Programming Credits: 3 OR
- CS 222 - Computer Programming for Engineers Credits: 3

Electrical and Computer Engineering Credits: 3

- ECE 301 - Digital Electronics Credits: 3

Psychology and Sociology Credits: 6

- PSYC 100 - Basic Concepts in Psychology Credits: 3
- SOCI 101 - Introductory Sociology Credits: 3

Technical Electives Credits: 6

Choose 6 credits from the following technical electives:
- BENG 341 - Introduction to Biomaterials Credits: 3
- BENG 390 - Engineering Design and Fabrication Credits: 3
- BENG 392 - Engineering Design Studio Credits: 1
- BENG 395 - RS: Mentored Research in Bioengineering Credits: 1-3
- BENG 406 - Introduction to Biomechanics Credits: 3
- BENG 441 - Nanotechnology in Health Credits: 3
- BENG 451 - Translation and Entrepreneurship in Bioengineering Credits: 3
- BENG 499 - Special Topics in Bioengineering Credits: 0-4
- BENG 525 - Neural Engineering Credits: 3
• BENG 538 - Medical Imaging Credits: 3
• ECE 305 - Electromagnetic Theory Credits: 3
• ECE 410 - Applications of Discrete-Time Signal Processing Credits: 3
• ECE 421 - Classical Systems and Control Theory Credits: 3
• ECE 450 - Introduction to Robotics Credits: 3
• ME 313 - Material Science Credits: 3

▲ Concentration in Biomedical Signals and Systems (BMSS) (29 credits)

This concentration requires successful completion of the following courses:

Chemistry Credits: 4

• CHEM 251 - General Chemistry for Engineers Credits: 4

Computer Science Credits: 3

• CS 211 - Object-Oriented Programming Credits: 3 OR CS 222 - Computer Programming for Engineers Credits: 3

Economics Credits: 3

• ECON 103 - Contemporary Microeconomic Principles Credits: 3

Electrical and Computer Engineering Credits: 3

• ECE 301 - Digital Electronics Credits: 3

Physics Credits: 4

• PHYS 262 - University Physics III Credits: 3
• PHYS 263 - University Physics III Laboratory Credits: 1

Technical Electives Credits: 12

Choose 12 credits from the following technical electives:

• BENG 341 - Introduction to Biomaterials Credits: 3
- BENG 390 - Engineering Design and Fabrication Credits: 3
- BENG 392 - Engineering Design Studio Credits: 1
- BENG 395 - RS: Mentored Research in Bioengineering Credits: 1-3
- BENG 406 - Introduction to Biomechanics Credits: 3
- BENG 441 - Nanotechnology in Health Credits: 3
- BENG 451 - Translation and Entrepreneurship in Bioengineering Credits: 3
- BENG 499 - Special Topics in Bioengineering Credits: 0-4
- BENG 525 - Neural Engineering Credits: 3
- BENG 538 - Medical Imaging Credits: 3
- ECE 305 - Electromagnetic Theory Credits: 3
- ECE 410 - Applications of Discrete-Time Signal Processing Credits: 3
- ECE 421 - Classical Systems and Control Theory Credits: 3
- ECE 450 - Introduction to Robotics Credits: 3
- ME 313 - Material Science Credits: 3

Students may choose to substitute one of the technical electives with one of the following:

- BIOL 305 - Biology of Microorganisms Credits: 3 AND BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- CHEM 313 - Organic Chemistry Credits: 3 AND CHEM 315 - Organic Chemistry Lab I Credits: 2
- CS 310 - Data Structures Credits: 3
- CS 444 - Introduction to Computational Biology Credits: 3
- CS 445 - Computational Methods for Genomics Credits: 3
- NEUR 327 - Cellular, Neurophysiological, and Pharmacological Neuroscience Credits: 3
- PSYC 372 - Physiological Psychology Credits: 3

Note:

Students may substitute

CHEM 211 - General Chemistry I and CHEM 213 - General Chemistry Laboratory I AND CHEM 212 - General Chemistry II and CHEM 214 - General Chemistry Laboratory II

FOR

PHYS 262 - University Physics III and PHYS 263 - University Physics III Laboratory AND CHEM 251 - General Chemistry for Engineers.

Additional Mason Core Credits: 18

Students must complete all Mason Core requirements not fulfilled by major requirements. BENG 492 and BENG 493 are approved to meet the Synthesis requirement.
Bioengineering Honors Program

The Department of Bioengineering offers an Honors Program that creates a community of outstanding scholars in bioengineering who share a commitment to learning, service, and leadership. The Program is based on the bioengineering curriculum, and is distinct from the University Honors Curriculum. Entry to the Honors Program is by invitation, extended to students with a declared major in Bioengineering who have completed a minimum of 30 credit hours at Mason with a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each prior semester.

The Honors Program is challenging and designed for the highly motivated student with interests in any of the bioengineering concentrations. Honors students must satisfy requirements in addition to those of the normal BS degree in bioengineering, including:

- Successful completion of BENG 395 - RS: Mentored Research in Bioengineering
- Six credits must be earned by taking a combination of BENG 5XX/6XX level courses. With permission of the Department of Bioengineering, 5XX/6XX level courses from other Volgenau School of Engineering programs may be considered.

Once admitted to the Honors Program, students must remain in good standing and maintain a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each semester for all courses counting toward the BS degree in bioengineering, maintain continuous enrollment working towards the degree, and abide by the Mason Honor Code.

Writing-Intensive Requirement

Mason's writing-intensive requirement is satisfied by BENG 304 and BENG 495 in which faculty provide feedback on student writing assignments.

Advising

All Bioengineering students are required to meet with their departmental academic advisor prior to course registration each semester. Students who are considering bioengineering as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising in 2500 Nguyen Engineering Building.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the “Termination from the Major” section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.
Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

**Doctor of Philosophy**

**Bioengineering, PhD**

*Banner Code: VS-PHD-BIOE*

*School: Volgenau School of Engineering*

*Department: Bioengineering*

The doctoral program in bioengineering is designed to prepare future leaders in bioengineering. The terms bioengineering and biomedical engineering often have been used synonymously, referring to the application of engineering techniques to solve problems in biology and medicine. Rapid advances in understanding the molecular bases of disease have opened up new opportunities to advance human health through research that integrates knowledge in modern biology, engineering, physics, and computer science. The doctoral program will prepare leaders in bioengineering in this broader, integrative sense of the discipline.

A major distinguishing feature of the curriculum is that it is designed to educate leaders who understand and appreciate how biomedical technology is translated from the bench to the bedside. Regardless whether they will eventually serve at universities, industry or government, they will understand that new types of devices and processes resulting from advanced research not only need to be "better", but that they must be "cost-effective" to reach the public. As demanded by their leadership positions, they will recognize that entrepreneurial considerations are essential for determining whether a planned diagnostic or therapeutic approach is likely to be practical and useful for society.

Four concentration areas are offered, aligned with current faculty research interests: biomedical imaging, data-driven biomechanical modeling, nano-scale bioengineering, and neuroengineering.

The bioengineering PhD program requires successful completion of a course of study, a qualifying examination, a dissertation proposal and defense, and a dissertation and defense. Additional training requirements include seminar attendance, ethics training, translational bioengineering mentorship, and a teaching assignment. All the general requirements for doctoral degrees at Mason apply to this program as well.

**Admission Requirements**

Applicants must have completed a baccalaureate degree in engineering or the sciences from an accredited program with a reputation for high academic standards and an earned GPA of 3.3 or better in their 60 highest-level credits.

In addition to fulfilling Mason's admission requirements for graduate study, applicants must:

- Have demonstrated interest in combining engineering and the natural sciences with discovery and application in the life science; i.e. via a degree which reflects the desired combination (such as bioengineering, biophysics); a degree in engineering or the natural sciences which includes course work in life sciences; a degree in biology which includes course work in mathematics, physics, or engineering; a project or research experience with combined complementary expertise.
- Provide three letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant's professional accomplishments.
- Provide a detailed statement of career goals and professional aspirations.
• If their native language is not English, students must earn a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam.
• Official GRE scores.

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a related master's degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine how many credits are eligible for the reduction of credit.

For students to remain eligible for the PhD program, they must maintain a "B" average. Grades of "C" or lower in courses cannot be counted towards degree completion.

Degree Requirements

The doctoral program consists of a minimum of 72 credit hours, distributed among the following categories:

Core Science (9-10 credits)

Biology Core (3-4 credits)

Select one from the following:

• BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
• BMED 601 - Cell and Molecular Physiology Credits: 4
• BMED 605 - Introduction to Human Anatomy Credits: 3
• RHBS 710 - Applied Physiology I Credits: 3

Computation/Mathematics Core (6 credits)

Select two courses from the following:

• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 535 - Digital Signal Processing Credits: 3
• MATH 685 - Numerical Methods Credits: 3

Core Bioengineering (6 credits)

• BENG 501 - Bioengineering Research Methods Credits: 3
• BENG 551 - Translational Bioengineering Credits: 3
Technical Electives (15 credits)

These courses develop additional technical expertise in a student's PhD concentration, and provide background for career skills in the student's chosen path for professional development. A maximum of only 6 credits can be at the 500-level.

Scientific and/or Technical Skills (12 credits):

Four courses will be scientific/technical and are to be chosen under the guidance and approval of the student's advisor.

Career Skills (3 credits):

One course will be focused on developing career skills relevant to college level teaching, entrepreneurship, or health care policy. For the career skills elective, students select a 3 credit hour course from one of the following options:

Entrepreneurship:

- PUBP 781 - Entrepreneurship and Economic Development Credits: 3

Health Care Policy:

- HAP 715 - Health Economics Credits: 3
- HAP 762 - Cost-Effectiveness for Health Care Management and Policy Decisions Credits: 3

Teaching:

- HE 602 - College Teaching Credits: 3
- HE 704 - The Scholarship of Teaching and Learning Credits: 3

Concentration Areas (18 credits)

Students must choose one from the following four areas:

▲ Concentration in Biomedical Imaging (BMI):

Required Courses (9 credits):
• BENG 538 - Medical Imaging Credits: 3
• BENG 738 - Advanced Medical Image Processing Credits: 3
• ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3

Electives (9 credits):

Three more upper-level courses are to be chosen under the guidance and approval of the student's advisor. At least two of the three classes must be at the 700-800 level.

• BENG 636 - Advanced Biomedical Signal Processing Credits: 3
• BENG 830 - Seminar in Biomedical Imaging Credits: 3
• CS 584 - Theory and Applications of Data Mining Credits: 3
• CS 657 - Mining Massive Datasets with MapReduce Credits: 3
• CS 688 - Pattern Recognition Credits: 3
• ECE 738 - Advanced Digital Signal Processing Credits: 3
• ECE 754 - Optimum Array Processing I Credits: 3
• OR 842 - Models of Probabilistic Reasoning Credits: 3
• PHYS 612 - Physics of Modern Imaging Credits: 3
• PSYC 757 - Advanced Topics in Statistical Analysis Credits: 3
• PSYC 768 - Advanced Topics in Cognitive Science Credits: 3
• STAT 760 - Advanced Biostatistical Methods Credits: 3
• SYST 842 - Models of Probabilistic Reasoning Credits: 3

▲ Concentration in Data-Driven Biomechanical Modeling (DDBM):

Required Courses (9 credits):

• BENG 538 - Medical Imaging Credits: 3
• BENG 550 - Advanced Biomechanics Credits: 3
• BENG 750 - Modeling and Simulation of Human Movement Credits: 3

Electives (9 credits):

Three more upper-level courses are to be chosen under the guidance and approval of the student's advisor. At least two of the three classes must be at the 700-800 level.

• BENG 636 - Advanced Biomedical Signal Processing Credits: 3
• BENG 725 - Computational Motor Control Credits: 3
• BENG 738 - Advanced Medical Image Processing Credits: 3
• BENG 850 - Seminar in Biomechanics Credits: 3
• CS 795 - Advanced Topics in CS Credits: 3
• CSI 742 - The Mathematics of the Finite Element Method Credits: 3
• RHBS 711 - Applied Physiology II Credits: 3
• RHBS 746 - Movement Control and Learning Credits: 3
• STAT 662 - Multivariate Statistical Methods Credits: 3
• SYST 664 - Bayesian Inference and Decision Theory Credits: 3

▲ Concentration in Nano-Scale Bioengineering (NBNR):

Required Courses (9 credits):

• BENG 541 - Biomaterials Credits: 3
• BENG 641 - Advanced Nanotechnology in Health Credits: 3
• BENG 745 - Biomedical Systems and Microdevices Credits: 3

Electives (9 credits):

Three more upper-level courses are to be chosen under the guidance and approval of the student's advisor. At least two of the three classes must be at the 700-800 level.

• BENG 840 - Seminar in Nano-scale Bioengineering Credits: 3
• BINF 740 - Introduction to Biophysics Credits: 3
• BIOL 669 - Pathogenic Microbiology Credits: 3
• CHEM 641 - Solid State Chemistry Credits: 3
• CHEM 660 - Protein Biochemistry Credits: 3
• CHEM 728 - Introduction to Solid Surfaces Credits: 3
• CHEM 814 - Advanced Bioorganic Chemistry Credits: 3
• CHEM 833 - Physical Chemistry and Biochemistry Credits: 3
• CSI 720 - Fluid Mechanics Credits: 3
• CSI 780 - Principles of Modeling and Simulation in Science Credits: 3
• NANO 620 - Computational Modeling in Nanoscience Credits: 3

▲ Concentration in Neuroengineering (NRNG):

Required Courses (9 credits):

• BENG 525 - Neural Engineering Credits: 3
• BENG 725 - Computational Motor Control Credits: 3
• NEUR 602 - Cellular Neuroscience Credits: 3
Electives (9 credits):

Three more upper-level courses are to be chosen under the guidance and approval of the student's advisor. At least two of the three classes must be at the 700-800 level.

- BENG 636 - Advanced Biomedical Signal Processing Credits: 3
- BENG 820 - Seminar in Neuroengineering Credits: 3
- BINF 740 - Introduction to Biophysics Credits: 3
- CS 688 - Pattern Recognition Credits: 3
- ECE 738 - Advanced Digital Signal Processing Credits: 3
- NEUR 634 - Neural Modeling Credits: 3
- NEUR 701 - Neurophysiology Laboratory Credits: 3
- NEUR 734 - Computational Neurobiology Credits: 3
- NEUR 735 - Computational Neuroscience Systems Credits: 3
- NEUR 751 - Applied Dynamics in Neuroscience Credits: 3
- NEUR 752 - Modern Instrumentation in Neuroscience Credits: 3
- PSYC 701 - Cognitive Bases of Behavior Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3

Qualifying Examination

All students entering the Bioengineering PhD program will be required to pass a qualifying exam any time within the first year. The goal of the qualifying exam is to test the student's preparation to undertake doctoral level research.

A committee consisting of the student's advisor and at least two other members of the bioengineering graduate faculty will administer the exam. At least one of the faculty in the Qualifying Exam Committee must be from the bioengineering core faculty. The exam will test the student's research competency as well as knowledge of core bioengineering concepts and competency in mathematics and computational methods. The exam will consist of a written research report submitted by the student, a research presentation by the student based on the report, and an oral exam by the committee.

Upon starting the PhD program, the student in consultation with their advisor will define a research topic for the qualifying exam. The topic could be a short original research project, or a review of relevant research in the student's area. The qualifying exam committee will provide the student a list of readings that the student is expected to master. The student will be expected to submit a research report to the committee and give a public research presentation. The report and presentation should demonstrate the student's ability to articulate a research question or a testable hypothesis, an understanding of the significance of the work informed by a critical review of the relevant literature, an understanding of the relevant research methods, and the ability to analyze and interpret relevant data. Following the research presentation, the committee will administer a closed-door oral exam that will probe in depth of the student's understanding of the relevant concepts.

The Bioengineering PhD Committee will review the recommendation of the qualifying exam committee and the students' academic record. At this point, the student should also submit a plan of study for the doctoral program developed in consultation with, and approved by, the students' advisor. Based on this information, the PhD Committee will determine whether or not the student is qualified for the PhD program. If the student does not qualify on their first try, they will be allowed to repeat the exam in the following semester, but the same committee will administer the exam. A student who fails to qualify on their second try will be removed from the program.

Advancement to Candidacy
Each student must present and defend a written dissertation proposal to advance to candidacy. The student is eligible to advance to candidacy after passing the qualifying exam, and satisfactorily completing the required courses in an approved plan of study filed by the student, and completing a minimum of 6 credits of BENG 998 - Doctoral Dissertation Proposal. All students must advance to candidacy within 4 years after initial enrollment in the program, unless special waiver is granted by the PhD committee for extenuating circumstances. If the student has not demonstrated satisfactory progress to the PhD committee by the end of the 4th year, they can be terminated from the program.

The proposal should at a minimum clearly articulate the research question and the specific aims of the research, provide a critical review of the literature and present the rationale and the significance of the research in addressing a gap in scientific knowledge, describe the research methods and study design in sufficient detail and present preliminary results demonstrating the feasibility of the research.

The proposal must be made available to the committee at least two weeks in advance of the presentation. The committee determines whether the proposal has merit and can lead to significant original contributions to the area.

Following the research presentation, the dissertation committee will ask the students a number of questions in a closed session to evaluate the students understanding of the relevant literature and methods that are broadly related to the chosen area of research, and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. If the dissertation committee feels that the student is not adequately prepared, they may recommend remedial measures, including additional coursework to address any gaps in knowledge, or modification of the aims of the proposal. The student can appear for advancement to candidacy a second time anytime within one year. Failure in the second attempt results in dismissal from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

Dissertation Research (24 credits)

Students are expected to complete 24 credits of BENG 998 and BENG 999 towards their degree. Students cannot enroll in BENG 998 before they have passed the qualifying exam. Students cannot enroll in BENG 999 before they have advanced to candidacy. Students who advanced to candidacy after the add period for a given semester must wait until the following semester to register for BENG 999. Students cannot advance to candidacy and defend their dissertation during the same semester. In special cases, waivers may be granted by the PhD committee. Once enrolled in BENG 999, students must maintain continuous registration in BENG 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of BENG 999 during that summer term.

Select 24 credits from the following:

- BENG 998 - Doctoral Dissertation Proposal Credits: 1-12 (Student must complete a minimum of 9 credits)
- BENG 999 - Doctoral Dissertation Credits: 1-12 (Student must complete a minimum of 3 credits)

Dissertation Committee Selection

Each student must form a dissertation committee, comprising four or five individuals. The chair of the dissertation committee must be tenured or tenure-track faculty in the Department of Bioengineering. Two other members must be from the Bioengineering graduate faculty. One member must be from outside the department. The dissertation director can be a member of the Bioengineering graduate faculty with primary appointment outside of the Department of Bioengineering. The committee and the chair must be approved by the chair of the Department of Bioengineering. It is expected that the student will form a committee shortly after passing the qualifying exam.

Dissertation Proposal

Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in BENG 998 - Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the
presentation. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Students may present their dissertation proposal only after passing the qualifying exam, and the presentation may not be on the same day as the qualifying exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in dismissal from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

Dissertation Preparation and Defense

While preparing the dissertation, the candidate enrolls in BENG 999 - Doctoral Dissertation. The candidate can proceed to a public defense of the dissertation once their dissertation has been approved by the dissertation committee.

The dissertation must make significant contributions to its area as evidenced by refereed journal and/or conference publications. All students are expected to defend their thesis within 3 years after defending their proposal, unless special waiver is granted by the PhD committee for extenuating circumstances.

The defense must be announced at least two weeks in advance. The dissertation draft must be submitted to the library and made publicly available at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Bioengineering Program in advance of the defense. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. A candidate who fails a second attempt to defend the dissertation is terminated from the program.

Additional Training Requirements

Bioengineering Seminar

All PhD students are required to attend a minimum of 3 departmental seminars per semester. Students will sign an attendance sheet available at the end of each seminar.

Ethics Training

Prior to beginning research studies in a Bioengineering laboratory, all PhD students must complete the on-line Collaborative Institutional Training Initiative (CITI) Responsible Conduct of Research course. CITI training modules provide students with an understanding of conflicts of interest, research misconduct, peer review, and authorship.

Bioengineering Mentorship

All PhD students are required to participate in mentoring at least one undergraduate Bioengineering senior design team for a duration of 1 year. PhD students work with the faculty advisor for the senior design team and are expected to apply translational and entrepreneurial concepts towards the mentorship of the team.

Teaching Requirement

All PhD students are required to participate in teaching activities in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory
assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student's advisor.

Total: 72-73 credits

Note: Students who elect to take BMED 601 in the Biology Core will complete a minimum of 73 credit hours.

Master of Science

Bioengineering, MS (pending SCHEV Approval)

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted. Check the college/school website for current program status.

Banner Code: VS-MS-BIOE

School: Volgenau School of Engineering

Department: Bioengineering

The graduate program leading to an MS in Bioengineering prepares students for research and professional practice in bioengineering and related fields. The program includes both fundamentals and advanced work to apply engineering techniques to solve problems in biology and medicine. A major distinguishing feature of the curriculum is that it is designed to educate leaders who understand and appreciate how biomedical technology is translated from bench to bedside. Regardless whether they will eventually serve at universities, industry or government, they will understand that new types of devices and processes resulting from their graduate experience need to be improved and made cost-effective to reach the public. As demanded by their leadership positions, they will recognize that entrepreneurial considerations that are essential for determining whether a planned diagnostic or therapeutic approach is practical from an investment perspective and is likely to produce societal benefit.

Three options are offered, aligned with students' interests and the job market: MS with thesis, MS with practicum, and MS with coursework.

Admission Requirements

Applicants must have completed a baccalaureate degree in engineering or the sciences from an accredited program and an earned GPA of 3.0 or better in their 60 highest-level credits.

In addition to fulfilling Mason's admission requirements for graduate study, applicants seeking to be admitted into the Bioengineering MS program must:

- Demonstrate interest in combining engineering or natural sciences with basic or applied biology as demonstrated by the BS degree, course selection, or project work.
- Provide three letters of recommendation, from references who are familiar with the applicant's professional accomplishments.
- Provide a detailed statement of career goals and professional aspirations.
- If their native language is not English, students must earn a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam.
- Official GRE scores.
Degree Requirements

The MS program consists of a minimum of 30-33 credit hours, distributed among the following categories:

Core Bioengineering (12 credits)

- BENG 525 - Neural Engineering Credits: 3
- BENG 538 - Medical Imaging Credits: 3
- BENG 541 - Biomaterials Credits: 3
- BENG 550 - Advanced Biomechanics Credits: 3

Path Options (18-21 credits)

Students must choose one from the following three options:

Thesis Option (18 credits)

Required Course (3 credits)

- BENG 501 - Bioengineering Research Methods Credits: 3

Thesis Research (6 credits)

Students are expected to complete 6 credits of thesis research towards their degree. Students cannot begin thesis research until the completion of their second semester of coursework. Once enrolled students must maintain continuous registration in thesis research until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of thesis research during that summer term.

Committee Selection

Each student must form a master's committee comprising three individuals. A minimum of two members of the committee must be tenured or tenure-track faculty in the Department of Bioengineering. The other member must be from outside the department.

Thesis Research Proposal

Each student must prepare a written thesis proposal, and it must be presented before the completion of the first semester. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. If the student fails to defend the proposal, the student may present a proposal a second time, no later than 60 days from the first attempt. Failure in the second attempt results in dismissal from the program.

Thesis Preparation and Defense
While preparing the thesis, the candidate enrolls in thesis research. The candidate can proceed to a public defense of the thesis once it has been approved by the committee.

The defense must be announced at least two weeks in advance. The thesis draft must be submitted to the library and made publicly available at least two weeks in advance of the defense. The entire committee must be present at the defense. If the candidate fails to defend the thesis, the candidate may request a second defense, following the same procedures as for the initial defense. A candidate who fails a second attempt to defend the thesis is terminated from the program.

Practicum Option (18 credits)

Required Course (3 credits)

- BENG 551 - Translational Bioengineering Credits: 3

Internship/Co-Op (6 credits)

- BENG 798 - Independent Reading and Research in Bioengineering Credits: 1-6

Students are expected to complete 6 credits of BENG 798 towards their degree. Students cannot enroll in BENG 798 until the completion of their second semester of coursework. These credits must be taken along with an internship/co-op opportunity. Therefore, a letter from the specific employer must be provided on behalf of the student.

Committee Selection

Each student must form a master's committee, comprising two or three individuals. In this case, the committee will help identify the goals of the internship and make sure that they are in line with the MS program's objectives. The committee will also be responsible to evaluate a final report and presentation to assess the successful completion of the internship. A minimum of one member of the committee must be tenured or tenure-track faculty in the Department of Bioengineering. The other two members must be representatives from the internship program.

Project Preparation and Presentation

During the internship, the candidate enrolls in BENG 798 - Independent Reading and Research in Bioengineering (Internship/Co-op) and prepares the project report and presentation. The candidate can proceed to the final presentation of the project once it has been approved by the committee.

The presentation must be announced at least two weeks in advance. The report draft must be submitted to the library and made publicly available at least two weeks in advance of the defense. The entire committee must be present at the presentation. If the candidate fails to defend the project, the candidate may request a second attempt, following the same procedures as for the initial one. A candidate who fails a second attempt is terminated from the program.

Coursework Option (21 credits)

Required Course (3 credits)

- BENG 551 - Translational Bioengineering Credits: 3
Electives (9 credits for Thesis and Practicum Options, 18 credits for Coursework Option)

Career orientation: These courses are to be chosen to give students career skills in teaching, entrepreneurship and/or health care policy. Students must choose one (thesis and practicum option) or two (coursework option) courses from the following:

Teaching:
- HE 602 - College Teaching Credits: 3
- HE 704 - The Scholarship of Teaching and Learning Credits: 3

Entrepreneurship:
- PUBP 781 - Entrepreneurship and Economic Development Credits: 3

Health Care Policy:
- HAP 715 - Health Economics Credits: 3
- HAP 742 - Health Policy Development and Analysis Credits: 3
- HAP 762 - Cost-Effectiveness for Health Care Management and Policy Decisions Credits: 3

Technical electives: These upper-level technical courses are to be chosen to give students technical depth in an area of their interest. The courses are to be selected under the guidance and with the approval of the student's advisor. Students must choose two (thesis and practicum option) or four (coursework option) more upper-level courses. At least one (two) of the two (four) classes must be at the 700 level.

- BENG 550 - Advanced Biomechanics Credits: 3
- BENG 636 - Advanced Biomedical Signal Processing Credits: 3
- BENG 641 - Advanced Nanotechnology in Health Credits: 3
- BENG 699 - Advanced Topics in Bioengineering Credits: 3
- BENG 725 - Computational Motor Control Credits: 3
- BENG 738 - Advanced Medical Image Processing Credits: 3
- BENG 745 - Biomedical Systems and Microdevices Credits: 3
- BENG 750 - Modeling and Simulation of Human Movement Credits: 3
- BINF 740 - Introduction to Biophysics Credits: 3
- BIOL 669 - Pathogenic Microbiology Credits: 3
- CHEM 641 - Solid State Chemistry Credits: 3
- CHEM 660 - Protein Biochemistry Credits: 3
- CHEM 728 - Introduction to Solid Surfaces Credits: 3
- CS 688 - Pattern Recognition Credits: 3
- CS 795 - Advanced Topics in CS Credits: 3
- CSI 720 - Fluid Mechanics Credits: 3
- CSI 742 - The Mathematics of the Finite Element Method Credits: 3
- CSI 780 - Principles of Modeling and Simulation in Science Credits: 3
- ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
- ECE 738 - Advanced Digital Signal Processing Credits: 3
- ECE 754 - Optimum Array Processing I Credits: 3
- NANO 620 - Computational Modeling in Nanoscience Credits: 3
- NEUR 602 - Cellular Neuroscience Credits: 3
- NEUR 634 - Neural Modeling Credits: 3
- NEUR 701 - Neurophysiology Laboratory Credits: 3
- NEUR 734 - Computational Neurobiology Credits: 3
- NEUR 735 - Computational Neuroscience Systems Credits: 3
- NEUR 751 - Applied Dynamics in Neuroscience Credits: 3
- NEUR 752 - Modern Instrumentation in Neuroscience Credits: 3
- PHYS 612 - Physics of Modern Imaging Credits: 3
- PSYC 701 - Cognitive Bases of Behavior Credits: 3
- PSYC 757 - Advanced Topics in Statistical Analysis Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3
- RHBS 711 - Applied Physiology II Credits: 3
- RHBS 746 - Movement Control and Learning Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 760 - Advanced Biostatistical Methods Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3

### Additional Training Requirement

### Bioengineering Seminar

All MS students are required to attend a minimum of two departmental seminars per semester. Students will sign an attendance sheet available at the end of each seminar.

**Total: 30-33 credits**

Note: Students who elect to the coursework option will complete a minimum of 33 credit hours.

### Computer Science

Phone: 703-993-1530  
Web: cs.gmu.edu

*School: Volgenau School of Engineering*

### Faculty

**Professors:** Barbara, J. Chen, Gomaa, Kerschberg, Menascé, Motro, Offutt, Pullen, Setia (chair), Simon, Sood, Tecuci, Wechsler, Wijesekera

**Associate professors:** Allbeck, Ammann, Aydin, Brodsky, Carver, S. Chen, Domeniconi, Duric, Kosecka, Li, Lien, Lin, Luke, T. Maddox, Nordstrom, Rangwala, Richards, Shehu, Stavrou, P. Wang, X. Wang, White

**Assistant professors:** Baldimiti, Dobolyi, Gingold, Gordon, Kauffman, LaToza, Snyder, Zhong

**Instructors:** Otten, Russell

**Adjunct professors:** Baldo, Batarseh, Curts, Dubey, Ellis, Farley, Foxwell, Geldon, Greenwald, He, Kodali, Kowalski, M. Maddox, Nidiffer, Nolan, Olimpiew, Pettit, Smith, Stough, Wheeler

**Emeritus faculty:** Baum, Hamburger, Rine, Sibley
Introduction

Computer science is a discipline concerned with the analysis, design, implementation, maintenance, and evolution of computer-based systems used in almost all walks of life. Computer science is at the center of the information revolution in the 21st century. Advanced computation tools and techniques are revolutionizing and transforming the way we work, play, communicate, collaborate, and conduct business. In addition, computational approaches are integral to several scientific and engineering fields such as computational sciences, bioinformatics, and health informatics, to name a few.

Computer scientists must be well-grounded not only in the theory of computing, but also in its application to diverse areas. Computer scientists must be capable of working closely with members of other professions associated with computing. Students who pursue this discipline will learn about programming languages, data structures, algorithms, operating systems, artificial intelligence, robotics, data mining, computer networking, cyber-security, databases and software engineering.

Courses

The Department of Computer Science (CS) offers courses designated CS, INFS, ISA and SWE in the Courses section of this catalog.

Bachelor of Science

Applied Computer Science, BS

Banner Code: VS-BS-ACS

School: Volgenau School of Engineering
Department: Computer Science

This program presents an innovative approach to the integration of computer science with other disciplines that require expertise in computing techniques. These disciplines do not merely use computing but create new and interesting problems for computer scientists.

Students in the program have the option of applying to an accelerated master's degree program in computer science, data analytics engineering, information security and assurance, information systems, or software engineering.

Degree Requirements

For the BS ACS degree, students must complete 120 credits, including the Mason Core requirements. The program requires foundation, core, and concentration courses as described below. These course requirements provide expertise in programming, computer systems, software requirements and modeling, formal methods, and analysis of algorithms.

ACS foundation courses (24 credits)

- CS 101 - Preview of Computer Science Credits: 2
- CS 105 - Computer Ethics and Society Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3

Note:

MATH 104, MATH 105, and MATH 108 cannot be counted toward this degree.

ACS core (23 credits)

- ECE 301 - Digital Electronics Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 2
- CS 310 - Data Structures Credits: 3
- CS 321 - Software Engineering Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3

ACS elective (3 credits)

- One CS course numbered above 400 except CS 498.

Communication (3 credits)

- COMM 100 - Public Speaking Credits: 3

Concentration (67 credits)

▲ Concentration in Bioinformatics (BNF)

Foundation (17 credits)

- PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• CHEM 201 - Introductory Chemistry I Credits: 3
• BIOL 213 - Cell Structure and Function Credits: 4
• CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Core (19 credits)

• BINF 450 - Bioinformatics for Life Sciences Credits: 4
• BIOL 482 - Introduction to Molecular Genetics Credits: 3
• BIOL 580 - Computer Applications for the Life Sciences Credits: 3
• CS 450 - Database Concepts Credits: 3
• BINF 401 - Bioinformatics and Computational Biology I Credits: 3  OR  CS 444 - Introduction to Computational Biology Credits: 3
• BINF 402 - Bioinformatics and Computational Biology II Credits: 3  OR  CS 445 - Computational Methods for Genomics Credits: 3

Two approved electives related to bioinformatics (6 credits)

These two courses must be selected with the student's advisor and approved by the CS department.

Additional Mason Core (21 credits)

• Written Communication: 6 credits
• Literature: 3 credits
• Arts: 3 credits
• Western Civilization/World History: 3 credits
• Social and Behavioral Science: 3 credits
• Global Understanding: 3 credits

Electives (4 credits)

▲ Concentration in Computer Game Design (CGDS)

Foundation (19 credits)

• CS 225 - Culture and Theory of Games Credits: 3
• CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
• CS 325 - Introduction to Game Design Credits: 3
• CS 351 - Visual Computing Credits: 3
• AVT 104 - Two-Dimensional Design and Color Credits: 4
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Core (15 credits)

• CS 425 - Game Programming I Credits: 3
• CS 426 - Game Programming II Credits: 3
• CS 451 - Computer Graphics Credits: 3
• AVT 382 - 2D Experimental Animation Credits: 3
• AVT 383 - 3D Experimental Animation Credits: 3

One approved elective related to game design (3 credits)

Choose one course from the following:

• CS 332 - Object-Oriented Software Design and Implementation Credits: 3
• CS 455 - Computer Communications and Networking Credits: 3
• CS 475 - Concurrent and Distributed Systems Credits: 3
• CS 480 - Introduction to Artificial Intelligence Credits: 3
• CS 485 - Autonomous Robotics Credits: 3
• SWE 432 - Design and Implementation of Software for the Web Credits: 3
• GAME 332 - RS: Story Design for Computer Games Credits: 3
• AVT 370 - Entrepreneurship in the Arts Credits: 3
• AVT 374 - Sound Art I Credits: 3
• AVT 487 - Advanced Topics: New Media Art Credits: 3

Natural Science (8 credits)

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• One additional lab science Credits: 4

Additional Mason Core (18 credits)

• Written communication: 6 credits
• Literature: 3 credits
• Western Civilization/World History: 3 credits
• Social and Behavioral Science: 3 credits
• Global Understanding: 3 credits

Electives (4 credits)
Concentration in Geography (GEOG)

Foundation (21 credits)

- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- GGS 101 - Major World Regions Credits: 3
- GGS 102 - Physical Geography Credits: 3
- GGS 103 - Human Geography Credits: 3
- GGS 110 - Introduction to Geoinformation Technologies Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Core (22 credits)

- GGS 310 - Introduction to Digital Cartography Credits: 4
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 411 - Advanced Digital Cartography Credits: 3
- GGS 412 - Air Photography Interpretation Credits: 3
- GGS 416 - Satellite Image Analysis Credits: 3
- GGS 463 - Applied Geographic Information Systems Credits: 3
- One GGS course numbered above 300 Credits: 3

Additional Mason Core (19 credits)

- Written Communication: 6 credits
- Literature: 3 credits
- Arts: 3 credits
- Western Civilization/World History: 3 credits
- Lab Science: 4 credits

Electives (5 credits)

Concentration in Software Engineering (SWE)

Foundation (6 credits)
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
• CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3

Core (10 credits)

• SWE 205 - Software Usability Analysis and Design Credits: 3
• SWE 301 - Internship Preparation Credits: 0
• SWE 401 - Internship Reflection Credits: 1
• CS 332 - Object-Oriented Software Design and Implementation Credits: 3
• SWE 437 - Software Testing and Maintenance Credits: 3

SWE related (15 credits) chosen from:

• CS 450 - Database Concepts Credits: 3
• CS 455 - Computer Communications and Networking Credits: 3
• CS 463 - Comparative Programming Languages Credits: 3
• CS 468 - Secure Programming and Systems Credits: 3
• CS 471 - Operating Systems Credits: 3
• CS 475 - Concurrent and Distributed Systems Credits: 3
• SWE 432 - Design and Implementation of Software for the Web Credits: 3
• SWE 443 - Software Architectures Credits: 3

Cross-disciplinary (6 credits)

• ENGH 388 - Professional and Technical Writing Credits: 3
• PSYC 333 - Industrial and Organizational Psychology Credits: 3 OR COMM 320 - Business and Professional Communication Credits: 3 OR COMM 335 - Organizational Communication Credits: 3

Additional Mason Core (28 credits)

• Written Communication: 6 credits
• Literature: 3 credits
• Arts: 3 credits
• Western Civilization/World History: 3 credits
• Social and Behavioral Science: 3 credits
• Global Understanding: 3 credits
• Natural Science: 7 credits
Electives (2 credits)

Total: 120 credits

Note:

Students must take CS 101 within their first year at the university. Students should take CS 105 during their second semester. A grade of C or better must be earned in CS 306 for this course to satisfy the Mason Core synthesis requirement.

Applied Computer Science majors must take the Natural Sciences section of ENGH 302.

CS Honors Program

The Department of Computer Science offers a CS Honors Program for students with strong computational foundations and the drive to delve deeper into computing. The program is based on the bachelor of science in computer science and applied computer science curriculum and is distinct from the University Honors College curriculum.

Students must be seeking a Bachelor of Science in Computer Science or a Bachelor of Science in Applied Computer Science and must apply for entry into the CS Honors Program after completing 12 credits of CS courses. Applicants must meet the GPA requirements outlined below to enter into the CS Honors Program.

CS Honors Program students must fulfill all standard courses required by the Bachelor of Science in Computer Science or Applied Computer Science degree as well as the following additional requirements.

- **GPA Requirement**: Students must maintain an overall GPA of at least 3.50 and a GPA of at least 3.50 for courses which count towards the BS/CS or BS/ACS major including math, natural sciences, and all CS/SWE courses.
- **Research Project Requirement**: Students must complete a significant research project prior to graduation. Students should seek out a CS faculty member willing to serve as their research advisor for the project. The project should comprise original work by the student and be demonstrated via two channels: (1) a written project report that is approved by the student’s research advisor and submitted to the department; (2) a presentation of the project to an audience of students and/or faculty.
- **Advanced Course Requirement**: At least two Advanced Courses must be completed. A complete list of acceptable advanced courses is maintained by the CS department and is available on the department web site.

Writing-Intensive Requirement

Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 and CS 321. Faculty members provide feedback on students' expository writing.

Grades

Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Computer science majors may not use more than one course with grade of C- or lower toward department requirements.

Repeating Courses
Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250, which follows the normal university policy for repeating undergraduate courses.

The CS Department may not allow students to retake certain high-demand CS courses in which they have already earned a grade of C or better simply to improve their GPA.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the “Termination from the Major” section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Change of Major

Students requesting a change of major to applied computer science must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. Students requesting a change of major to applied computer science must have a GPA of at least 2.75 in computer science and math courses and successfully completed CS 112 or CS 211 and MATH 113, MATH 114, or MATH 125 with a grade of B or better.

Advanced Placement, Credit by Exam

A score of 3 on the Advanced Placement (AP) computer science exam qualifies students for credit in CS 112. An AP score of 5, together with demonstrated competence in the programming language used in CS 211, qualifies students for credit in CS 211. A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credits in CS 112, and a score of 5 or more qualifies students for credit in CS 211.

Computer Science, BS

Banner Code: VS-BS-CS

School: Volgenau School of Engineering
Department: Computer Science

The objectives of the BS in Computer Science Program relate to the abilities of the graduates several years after graduation. The objectives include:
• Foundation for successful careers in industry: Graduates of the program will have a broad understanding of the fundamental concepts, methodologies, tools, and applications of computer science. They will have the educational foundation that leads to successful careers in the computing industry.

• Foundation for graduate study: Graduates of the program will have the academic preparation for successful completion of rigorous graduate programs.

• Professional preparation: Graduates will have effective written and oral communication skills, and be able to work collaboratively in a professional and ethical manner.

This bachelor's degree program is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

Students in this program have the option of applying to an accelerated master's degree program in computer science, data analytics engineering, information security and assurance, information systems, or software engineering. See each listing for specific requirements.

Degree Requirements

For the BS CS degree, students must complete 120 credits, including the Mason Core requirements and all of the following:

Computer science core (36 credits)

- CS 101 - Preview of Computer Science Credits: 2
- CS 105 - Computer Ethics and Society Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 2
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- CS 310 - Data Structures Credits: 3
- CS 321 - Software Engineering Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- ECE 301 - Digital Electronics Credits: 3

Note:

Students must take CS 101 within their first year at the university. Students should take CS 105 during their second semester. A grade of C or better must be earned in CS 306 for this course to satisfy the Mason Core synthesis requirement.

Senior computer science (15 credits)

One of the following:

- CS 463 - Comparative Programming Languages Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 475 - Concurrent and Distributed Systems Credits: 3
And four additional courses chosen from:

- CS 425 - Game Programming I Credits: 3
- CS 440 - Language Processors and Programming Environments Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 463 - Comparative Programming Languages Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 469 - Security Engineering Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 475 - Concurrent and Distributed Systems Credits: 3
- CS 477 - Mobile Application Development Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 482 - Computer Vision Credits: 3
- CS 484 - Data Mining Credits: 3
- CS 485 - Autonomous Robotics Credits: 3
- CS 490 - Design Exhibition Credits: 3
- CS 499 - Special Topics in Computer Science Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3 OR OR 481 - Numerical Methods in Engineering Credits: 3

Note:

Only three credits of CS 499 can be used toward the senior computer science requirement.

Mathematics (17 credits)

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Note:

MATH 104, MATH 105 and MATH 108 cannot be counted toward this degree.

Statistics (3 credits)
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Computer science-related courses (6 credits)

Two courses chosen from:

• STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
• OR 335 - Discrete Systems Modeling and Simulation Credits: 3
• OR 441 - Deterministic Operations Research Credits: 3
• OR 442 - Stochastic Operations Research Credits: 3
• ECE 280 - Electric Circuit Analysis Credits: 5
• ECE 431 - Digital Circuit Design Credits: 3
• ECE 447 - Single-Chip Microcomputers Credits: 4
• ECE 450 - Introduction to Robotics Credits: 3
• ECE 511 - Microprocessors Credits: 3
• SWE 432 - Design and Implementation of Software for the Web Credits: 3
• SWE 437 - Software Testing and Maintenance Credits: 3
• SWE 443 - Software Architectures Credits: 3
• SYST 371 - Systems Engineering Management Credits: 3
• SYST 470 - Human Factors Engineering Credits: 3
• PHIL 371 - Philosophy of Natural Sciences Credits: 3
• ENGH 388 - Professional and Technical Writing Credits: 3
• Any MATH or CS course numbered above 300 (except MATH 351) Credits: 3
• PHIL 376 - Symbolic Logic Credits: 3

Note:

Students may need to choose electives to satisfy prerequisites for these courses. Those planning to take MATH 352 may replace STAT 344 with MATH 351.

Natural Science (12 credits)

The BS in Computer Science requires 12 credits of natural science. The courses should be intended for science and engineering students and must include a two course sequence with laboratories. Some approved combinations have a total of more than 12 hours. Approved two course sequences with laboratories are:

**Astronomy:**

• ASTR 111 - Introductory Astronomy: The Solar System Credits: 3  AND  ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
• ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3  AND  ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1

**Biology:**

• BIOL 103 - Introductory Biology I Credits: 4  AND  BIOL 104 - Introductory Biology II Credits: 4

**Chemistry:**
• CHEM 211 - General Chemistry I Credits: 3  
  AND CHEM 213 - General Chemistry Laboratory I Credits 1  
• CHEM 212 - General Chemistry II Credits: 3  
  AND CHEM 214 - General Chemistry Laboratory II Credits: 1  

**Environmental Science:**  
• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4  
  AND EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4  

**Geology:**  
• GEOL 101 - Introductory Geology I Credits: 4  
  AND GEOL 102 - Introductory Geology II Credits: 4  

**Physics:**  
• PHYS 160 - University Physics I Credits: 3  
  AND PHYS 161 - University Physics I Laboratory Credits: 1  
• PHYS 260 - University Physics II Credits: 3  
  AND PHYS 261 - University Physics II Laboratory Credits: 1  

Communication (3 credits)  
• COMM 100 - Public Speaking Credits: 3  
  Computer Science students must make a technical presentation. This course fulfills the Mason Core requirement in oral communication.  

Additional Humanities (3 credits)  
Students must complete three additional credits of Humanities courses. This can be fulfilled by any Mason Core course except those listed under Information Technology, Synthesis, Quantitative Reasoning, or Natural Science. Students wishing to substitute alternate courses for this requirement must obtain departmental approval.  

Additional Mason Core (21 credits)  
Students must complete all Mason Core requirements not fulfilled by major requirements.  
• Written Communication: 6 credits  
• Literature: 3 credits  
• Arts: 3 credits  
• Western Civilization/World History: 3 credits  
• Social and Behavioral Science: 3 credits  
• Global Understanding: 3 credits  

**Note:**  
Note: CS majors must take the Natural Sciences section of ENGH 302.  

Electives (4 credits)
Students must complete 4 elective credits.

Total: 120 credits

CS Honors Program

The Department of Computer Science offers a CS Honors Program for students with strong computational foundations and the drive to delve deeper into computing. The program is based on the bachelor of science in computer science and applied computer science curriculum and is distinct from the University Honors College curriculum.

Students must be seeking a Bachelor of Science in Computer Science or a Bachelor of Science in Applied Computer Science and must apply for entry into the CS Honors Program after completing 12 credits of CS courses. Applicants must meet the GPA requirements outlined below to enter into the CS Honors Program.

CS Honors Program students must fulfill all standard courses required by the Bachelor of Science in CS or ACS degree as well as the following additional requirements:

- **GPA Requirement:** Students must maintain an overall GPA of at least 3.50 and a GPA of at least 3.50 for courses which count towards the BS/CS or BS/ACS major including math, natural sciences, and all CS/SWE courses.
- **Research Project Requirement:** Students must complete a significant research project prior to graduation. Students should seek out a CS faculty member willing to serve as their research advisor for the project. The project should comprise original work by the student and be demonstrated via two channels: (1) written project report that is approved by the student's research advisor and submitted to the department; (2) a presentation of the project to an audience of students and/or faculty.
- **Advanced Course Requirement:** At least two Advanced Courses must be completed. A complete list of acceptable advanced courses is maintained by the CS department and is available on the department web site.

Change of Major

Students who are considering computer science as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. Students considering a change of major to computer science must have a GPA of at least 2.75 in all computer science and math courses, and successfully completed CS 112 or CS 211 and MATH 113, MATH 114 or MATH 125 with a grade of B or better.

Grades

Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Computer science majors may not use more than one course with grade of C- or lower toward department requirements.

Repeating Courses

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250, which follows the normal university policy for repeating undergraduate courses.
The CS Department may not allow students to retake certain high-demand CS courses in which they have already earned a grade of C or better simply to improve their GPA.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the “Termination from the Major” section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Advanced Placement, Credit by Exam

A score of 3 on the Advanced Placement (AP) computer science exam qualifies the student for credit in CS 112. An AP score of 5, together with demonstrated competence in the programming language used in CS 211, qualifies students for credit in CS 211. A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credit in CS 112, and a score of 5 or more qualifies students for credit in CS 211.

Writing-Intensive Requirement

Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 and CS 321. Faculty members provide feedback on students' expository writing.

Cooperative Education

Students may participate in the Mason cooperative education program or a work-study program in the Washington, D.C. area.

Computer Science, Computer Engineering Double Major

Computer science majors can earn a double major in computer science and computer engineering if they complete additional credits beyond the 120 credits required for the computer science degree. The additional credits must be part of an approved plan of study. For more information, visit the department web site.

Bachelor/Accelerated Master's
Applied Computer Science, BS/Computer Science, Accelerated MS

School: Volgenau School of Engineering
Department: Computer Science

Highly-qualified students in the Applied Computer Science, BS have the option of obtaining an accelerated Computer Science, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Applied Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310, CS 330 and CS 367.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for CS 583 and one of the following courses in place of the corresponding 400-level course:

- CS 540 - Language Processors Credits: 3
- CS 550 - Database Systems Credits: 3
- CS 551 - Computer Graphics Credits: 3
- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 584 - Theory and Applications of Data Mining Credits: 3

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Applied Computer Science, BS/Information Security and Assurance, Accelerated MS
Highly-qualified students in the Applied Computer Science, BS program have the option of obtaining an accelerated Information Security and Assurance, MS program. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Admission Requirements**

Students in the Applied Computer Science, BS program can apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310, CS 330 and CS 367.

**Accelerated Option Requirements**

Students must complete all requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two 500-level computer science core courses (6 credits) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements. Specifically, students must take:

- CS 583 - Analysis of Algorithms Credits: 3
- and one of the following courses:
- CS 540 - Language Processors Credits: 3
- CS 550 - Database Systems Credits: 3
- CS 551 - Computer Graphics Credits: 3
- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 584 - Theory and Applications of Data Mining Credits: 3

**Note:**

Students complete all MS in Information Security and Assurance core courses and apply the two courses from the above list toward the MS in Information Security and Assurance requirements.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**Applied Computer Science, BS/Information Systems, Accelerated MS**

School: Volgenau School of Engineering
Department: Computer Science
Highly-qualified students in the Applied Computer Science, BS program have the option of obtaining an accelerated Information Systems, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Applied Computer Science, BS program can apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310, CS 330 and CS 367.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for two 500-level computer science core courses (6 credits) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements. Specifically, students must take

- CS 583 - Analysis of Algorithms Credits: 3
- and one of the following courses:
  - CS 540 - Language Processors Credits: 3
  - CS 550 - Database Systems Credits: 3
  - CS 551 - Computer Graphics Credits: 3
  - CS 555 - Computer Communications and Networking Credits: 3
  - CS 571 - Operating Systems Credits: 3
  - CS 580 - Introduction to Artificial Intelligence Credits: 3
  - CS 584 - Theory and Applications of Data Mining Credits: 3

Note:

Students complete all MS in Information Systems core courses and apply the two courses from above toward the MS in Information Systems elective requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Applied Computer Science, BS/Software Engineering, Accelerated MS

School: Volgenau School of Engineering
Department: Computer Science

Highly-qualified students in the Applied Computer Science, BS have the option of obtaining an accelerated Software
Engineering, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Applied Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310, CS 330 and CS 367.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for two 500-level computer science core courses (6 credits) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements. Specifically, students must take:

- CS 583 - Analysis of Algorithms Credits: 3
- and one of the following courses:
  - CS 540 - Language Processors Credits: 3
  - CS 550 - Database Systems Credits: 3
  - CS 551 - Computer Graphics Credits: 3
  - CS 555 - Computer Communications and Networking Credits: 3
  - CS 571 - Operating Systems Credits: 3
  - CS 580 - Introduction to Artificial Intelligence Credits: 3
  - CS 584 - Theory and Applications of Data Mining Credits: 3

Note:

Students complete all MS in Software Engineering core courses and apply the two courses from the above list toward the MS in Software Engineering elective requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Computer Science, Accelerated MS

School: Volgenau School of Engineering
Department: Computer Science

Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Computer Science, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.
Admission Requirements

Students in the Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310, CS 330 and CS 367.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3
- CS 584 - Theory and Applications of Data Mining Credits: 3

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Information Security and Assurance, Accelerated MS

School: Volgenau School of Engineering
Department: Computer Science

Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Information Security and Assurance, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements
Students in the Computer Science, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310, CS 330 and CS 367.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

- CS 540 - Language Processors Credits: 3
- CS 550 - Database Systems Credits: 3
- CS 551 - Computer Graphics Credits: 3
- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3
- CS 584 - Theory and Applications of Data Mining Credits: 3

Note:

Students complete all MS in Information Security and Assurance core courses and apply the two courses from the above list toward the MS in Information Security and Assurance requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Information Systems, Accelerated MS

School: Volgenau School of Engineering
Department: Computer Science

Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Information Systems, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310, CS 330 and CS 367.

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

- CS 540 - Language Processors Credits: 3
- CS 550 - Database Systems Credits: 3
- CS 551 - Computer Graphics Credits: 3
- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3
- CS 584 - Theory and Applications of Data Mining Credits: 3

Note:

Students complete all MS in Information Systems core courses and apply the two courses from above toward the MS in Information Systems elective requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Software Engineering, Accelerated MS

School: Volgenau School of Engineering
Department: Computer Science

Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Software Engineering, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310, CS 330 and CS 367.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:
CS 540 - Language Processors Credits: 3
CS 550 - Database Systems Credits: 3
CS 551 - Computer Graphics Credits: 3
CS 555 - Computer Communications and Networking Credits: 3
CS 571 - Operating Systems Credits: 3
CS 580 - Introduction to Artificial Intelligence Credits: 3
CS 583 - Analysis of Algorithms Credits: 3
CS 584 - Theory and Applications of Data Mining Credits: 3

Note:
Students complete all MS in Software Engineering core courses and apply the two courses from the above list toward the MS in Software Engineering elective requirements.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/Information Security and Assurance, Accelerated MS

School: Volgenau School of Engineering
Department: Computer Science

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Information Security and Assurance, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements
Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Information Security and Assurance, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the two following courses:

- INFS 612 - Principles and Practices of Communication Networks Credits: 3 (satisfies IT 441 requirement in the BS program)
- ISA 562 - Information Security Theory and Practice Credits: 3 (satisfies IT 462 requirement in the BS program)
Note: Students must complete MATH 125 as their discrete math requirement and IT 306 as part of their concentration requirements in the BS program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Information Systems, Accelerated MS

School: Volgenau School of Engineering
Department: Computer Science

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Information Systems, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the Information Systems, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

- INFS 614 - Database Management Credits: 3 (satisfies IT 414 requirement in the BS program)
- INFS 622 - Information Systems Analysis and Design Credits: 3 (satisfies as one DTP concentration course in the BS program)

Note: Students must complete MATH 125 as their discrete math requirement and IT 306 as part of their concentration requirements in the BS program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Information Technology, BS/Software Engineering, Accelerated MS

School: Volgenau School of Engineering
Department: Computer Science

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Software Engineering, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Software Engineering, MS Program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

- CS 550 - Database Systems Credits: 3 (satisfies IT 414 requirement in the BS program)
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3 (satisfies as one DTP concentration course in the BS program)

Note: Students must complete MATH 125 as their discrete math requirement and IT 306 as part of their concentration requirements in the BS program

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Doctor of Philosophy

Computer Science, PhD

Banner Code: VS-PHD-CS
School: Volgenau School of Engineering  
Department: Computer Science

The PhD program requires course work, qualifying and comprehensive examinations, and a doctoral dissertation that is first proposed and eventually defended. Mason's general doctoral requirements apply to this program.

Admission Requirements

All applicants must have an undergraduate degree, and their prior academic work must show a strong academic background in computer science. In addition, the GRE General Test is required from every applicant. Finally, each applicant must provide a brief statement of career goals and personal aspirations, as well as three letters of reference. Each application receives careful consideration from the PhD Admission Committee.

Reduction of Credit

Students with a previous MS in CS or a related field may receive a reduction of credit of at most 30 credit hours. In addition, the courses taken as part of the previous MS degree can be used to satisfy the course requirements of the PhD degree. Reduction of credit and waiver of course requirements requires the approval of the program director and the dean of the school.

Degree Requirements

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Doctoral Course Work (18 Credits)

The course requirement for the degree is 72 credit hours.

The following courses, totaling 30 credit hours, are required from all students:

- CS 600 - Theory of Computation Credits: 3 -- must be completed with a B+ or better
- CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
- CS 800 - Computer Science Colloquium Credits: 0 -- must enroll in course for two semesters
- CS 990 - Dissertation Topic Presentation Credits: 0
- CS 998 - Doctoral Dissertation Proposal Credits: 1-12 and CS 999 - Doctoral Dissertation Credits: 1-12 (24 credit hours with a minimum of 12 credits of CS 999).

In addition, 12 credit hours must be obtained in advanced graduate courses selected in consultation with the student's advisor from a list maintained by the CS department. The 12 credit hours may include at most 3 credits of CS 896 - Directed Reading and Research. Students may register in CS 896 only after passing the PhD qualifying exams.

The remaining 30 credits must be obtained in graduate level courses in Computer Science or a field related to the student's doctoral research area, and selected in consultation with the student's advisor.

With careful selection of courses, students may earn an MS degree as part of their PhD studies. CS 600, CS 700 and 12 credits of advanced graduate courses taken as part of the coursework for the PhD degree can be applied towards the MS degree, if the selected courses also satisfy the requirements of the MS degree.

Qualifying Exam
Students must demonstrate breadth of knowledge in computer science by passing written qualifying exams. The exams are offered once every semester (usually in the week before the semester begins). To qualify, each student must pass exams in four areas, one of which is foundations of computer science. The other three areas are chosen from these eight areas: operating systems, networks, compilers and languages, object-oriented software specification and construction, software modeling and architectural design, artificial intelligence, database systems, and information systems security. The four exams must be attempted in the same semester, and a failed exam may be retaken once only in the next semester. A student who fails to pass the four exams in two consecutive semesters is subject to termination from the program. Students entering the program who receive a reduction of credit of 15 or more credit hours for a previous Master's degree must take the exams no later than the first opportunity following the completion of 18 credits at Mason. Other students must take the exams no later than the first opportunity following the completion of 24 credits at Mason.

Dissertation Research (24 credits)

A minimum of 24 credits of CS 998 and CS 999 must be completed, of which at least 12 must be in CS 999. Only 24 credits of CS 998 and CS 999 may be applied toward the degree. Students may enroll in CS 998 only after passing the qualifying exams, and they may enroll in CS 999 only after advancing to candidacy.

Select 24 credits from the following:

- CS 998 - Doctoral Dissertation Proposal Credits: 1-12
- CS 999 - Doctoral Dissertation Credits: 1-12

Dissertation Committee Selection

Each student must form a dissertation committee, comprising four or five individuals. Three members of the committee must be tenured or tenure-track faculty in the Computer Science Department. The fourth member should be a member of the George Mason University graduate faculty who is outside the department. The fifth member may be from outside the university. The chair of the dissertation committee, who must also be the dissertation director, must be tenured or tenure-track faculty in the Volgenau School. The committee must be approved by the chair of the Computer Science Department.

Comprehensive Exam

Students must pass an oral comprehensive exam in which they demonstrate depth of knowledge in their intended area of research and ability to perform original research in that area. The scope of the oral exam is defined by a reading list prepared by the student and the dissertation director. The list should include research papers and textbooks that adequately cover the basic tools used in the research area, the fundamentals of the research area, and state-of-the-art knowledge in the specific focus of research. The reading list must be accompanied by a one-page description of the intended research. This document must be approved by the dissertation committee at least one month prior to the exam and becomes part of the student's record. The duration of the oral exam is typically two hours. Students who fail the exam are allowed to retake it once. Failure in the second attempt results in dismissal from the program.

Dissertation Proposal

Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in CS 998 - Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Students may present their dissertation proposal only after passing the comprehensive exam, and the presentation may not be on the same day as the comprehensive exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in
dismissal from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

Dissertation Preparation and Defense

While preparing the dissertation, the candidate enrolls in CS 999 - Doctoral Dissertation. When the work is deemed complete, the dissertation is defended. The public defense is preceded by a predefense meeting in which only the candidate, the dissertation committee members, and the director of the PhD in Computer Science Program (or his or her representative) are present. If the committee approves, the candidate may then schedule the final public defense. There should be at least one month between the predefense meeting and the defense, and the defense must be announced at least two weeks in advance. The dissertation must be made available to the committee at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Computer Science Program in advance of the defense. The dissertation must make significant contributions to its area and be publishable in refereed journals or conferences. If the candidate defends the dissertation successfully, the dissertation committee recommends that the final form of the dissertation be completed under the supervision of the dissertation director and the graduate faculty of Mason accept the candidate for the PhD degree. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree and an additional predefense is not required. A candidate who fails a second attempt to defend the dissertation is dismissed from the program.

Total: 72 credits

Graduate Certificate

Foundations of Information Systems Graduate Certificate

Banner Code: VS-CERG-FIS

School: Volgenau School of Engineering
Department: Computer Science

This certificate program is designed primarily for students who earned an undergraduate degree in an area other than information systems and are interested in acquiring solid foundations to pursue further education and a career in information systems, software engineering, information security and assurance, or a related discipline.

The graduate certificate may be pursued on a part-time or full-time basis.

Admission Requirements

The admission requirement for the certificate in foundations of information systems is a four-year bachelor's degree with a GPA of 3.00 or higher. Also, the admission to the Information Systems, MS program allows automatic admission to the certificate program.

Certificate Requirements

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.
Required courses (12 credits)

Take each one of the following foundation courses (no substitutions are allowed):

- INFS 501 - Discrete and Logical Structures for Information Systems Credits: 3
- INFS 515 - Computer Organization Course and Operating Systems Credits: 3
- INFS 519 - Program Design and Data Structures Credits: 3
- SWE 510 - Object-Oriented Programming in Java Credits: 3

Total: 12 credits

Information Security and Assurance Graduate Certificate

Banner Code: VS-CERG-ISA

School: Volgenau School of Engineering
Department: Computer Science

This graduate certificate program is for students interested in science and methods for ensuring secrecy, integrity, availability, and legitimate use of information systems. The certificate may be pursued concurrently with any of the graduate programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 - Discrete and Logical Structures for Information Systems, SWE 510 - Object-Oriented Programming in Java, INFS 515 - Computer Organization Course and Operating Systems, and INFS 519 - Program Design and Data Structures.

Students must also possess the equivalent knowledge of CS 555 and CS 571, or the prerequisite courses required for the selected electives. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or better for a total of 12 credits of graduate study.

Two required courses (6 credits):
• ISA 562 - Information Security Theory and Practice Credits: 3
• ISA 656 - Network Security Credits: 3

Two additional courses (6 credits):

Two electives to be taken from the following, excluding ISA 697, ISA 796, ISA 797, and ISA 798.

• Courses at the ISA 600 and 700 level
• ISA 564 - Security Laboratory Credits: 3

Total: 12 credits

Software Engineering Graduate Certificate

Banner Code: VS-CERG-SWE

School: Volgenau School of Engineering
Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master's degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may be pursued on a part-time or full-time basis.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason: INFS 501 - Discrete and Logical Structures for Information Systems, SWE 510 - Object-Oriented Programming in Java, INFS 515 - Computer Organization Course and Operating Systems, and INFS 519 - Program Design and Data Structures. In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements
Students must complete four courses with an average grade of B or better for a total of 12 credits of graduate study.

Three courses (9 credits) from the following:

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 637 - Software Testing Credits: 3

One additional course (3 credits) from the following:

(subject to satisfying the prerequisites)

- CS 675 - Distributed Systems Credits: 3
- CS 706 - Concurrent Software Systems Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 626 - Software Project Laboratory Credits: 3
- SWE 631 - Software Design Patterns Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 681 - Secure Software Design and Programming Credits: 3
- SWE 699 - Special Topics in Software Engineering Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 760 - Software Analysis and Design of Real-Time Systems Credits: 3
- SWE 763 - Software Engineering Experimentation Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3
- SWE 798 - Research Project Credits: 3

Notes:

Students enrolled in the MS in Information Systems Program must substitute SWE 620 for INFS 622 to obtain this certificate. Credit is not given for taking both INFS 622 and SWE 620; only 3 credits will be awarded.

Students enrolled in the MS in Computer Science Program may obtain a certificate in software engineering by taking any four SWE courses. If CS/SWE 706 is included, it is possible to complete the MS in Computer Science and the certificate in software engineering in 30 hours.

Total: 12 credits
Web-Based Software Engineering Graduate Certificate

Banner Code: VS-CERG-WBSE

School: Volgenau School of Engineering
Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master's degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may be pursued on a part-time or full-time basis.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from the department or the department web site. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 - Discrete and Logical Structures for Information Systems, SWE 510 - Object-Oriented Programming in Java, INFS 515 - Computer Organization Course and Operating Systems, and INFS 519 - Program Design and Data Structures.

Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission to the certificate program does not guarantee admission to any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Three required courses (9 credits):

- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3

One of the following courses (3 credits):

- CS 675 - Distributed Systems Credits: 3
- INFS 614 - Database Management Credits: 3
- ISA 656 - Network Security Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
• SWE 681 - Secure Software Design and Programming Credits: 3

Total: 12 credits

Master of Science

Computer Science, MS

Banner Code: VS-MS-CS

School: Volgenau School of Engineering
Department: Computer Science

The graduate program leading to an MS in Computer Science prepares students for research and professional practice in computer science and related technologies. The program includes both fundamentals and advanced work in the areas of artificial intelligence and databases, programming languages and software engineering, systems and networks, theoretical computer science, and visual computing. Graduate classes are divided into basic classes, which have no graduate course prerequisite, and advanced classes, which have a graduate class as a prerequisite. Graduate classes are generally offered in the late afternoon and evening. Financial aid in the form of graduate assistantships may be available for full-time degree-seeking students.

An accelerated master's option is available to students in the bachelor's program. See Computer Science, BS/Computer Science, Accelerated MS for specific requirements.

Admission Requirements

In addition to fulfilling Mason's admission requirements for graduate study, applicants must meet the following requirements:

• Hold a baccalaureate degree that includes Data Structures and Algorithms (CS 310) Automata Theory and Formal Languages (CS 330), and Computer Architecture including Assembly Language (CS 367 and CS 465). Students also must have completed Calculus I and II and a substantial course in discrete mathematics (such as MATH 125). Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.
• Earned a cumulative GPA of 3.00 for the last two years of undergraduate work, preferably with a major in a technical field such as computer science, mathematics, physical sciences, engineering, or information systems.
• Submit transcripts of all post secondary education, complete the self-evaluation section of the online application, (This information is used by the admissions committee to assess an applicant's academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program), a goals statement, resume, three letters of recommendation, and an official GRE score (only required for those who have not earned a Bachelor's degree from a US institution).

Degree Requirements (30 credits)

In addition to general university requirements, completion of the MS in CS requires 30 credits of graduate courses.
Courses are grouped in the following five broad areas: Artificial Intelligence and Databases, Programming Languages and Software Engineering, Systems and Networks, Theoretical Computer Science, and Visual Computing. The list of preapproved courses with their areas is provided below.

All the following requirements should be satisfied for the MS in CS degree:

- CS 583 - Analysis of Algorithms Credits: 3 (from the Theoretical Computer Science area) and two additional core courses from two other areas must be successfully completed with a grade of B- or better.
- At least four courses (12 credits) must be chosen from the advanced courses in the list of preapproved courses from at least three different areas.
- At least six courses, including two advanced courses, must be designated CS.
- At least eight courses must be taken from the list of preapproved courses. Up to two computer science-related courses that are not on the list of preapproved courses may be taken with the approval of the Computer Science Department.

Plan of Study

Before the end of the second semester, students must have a plan of study approved by their academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final signed version of the plan must be included when the student submits a graduation application.

Core Courses by Area

The following basic courses are designated as “core” courses in their respective areas:

Artificial Intelligence and Databases

- CS 550 - Database Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 584 - Theory and Applications of Data Mining Credits: 3

Programming Languages and Software Engineering

- CS 540 - Language Processors Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3

Systems and Networks

- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
Theoretical Computer Science

- CS 583 - Analysis of Algorithms Credits: 3

Visual Computing

- CS 551 - Computer Graphics Credits: 3

Preapproved Basic and Advanced MS CS Courses by Area

The preapproved courses are explicitly classified as “basic” or “advanced” below.

Artificial Intelligence and Databases

Basic Courses:
- CS 550 - Database Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 584 - Theory and Applications of Data Mining Credits: 3
- INFS 623 - Web Search Engines and Recommender Systems Credits: 3

Advanced Courses:
- CS 650 - Advanced Database Management Credits: 3
- CS 657 - Mining Massive Datasets with MapReduce Credits: 3
- CS 667 - Biometrics and Identity Management Credits: 3
- CS 674 - Data Mining on Multimedia Data Credits: 3
- CS 681 - Knowledge Engineering Credits: 3
- CS 685 - Autonomous Robotics Credits: 3
- CS 687 - Advanced Artificial Intelligence Credits: 3
- CS 688 - Pattern Recognition Credits: 3
- CS 689 - Planning Motions of Robots and Molecules Credits: 3
- CS 775 - Advanced Pattern Recognition Credits: 3
- CS 782 - Machine Learning Credits: 3
- CS 787 - Decision Guidance Systems Credits: 3
- CS 811 - Research Topics in Machine Learning and Inference Credits: 3
- CS 880 - Research Topics in Artificial Intelligence Credits: 3
- CS 884 - Advanced Topics in Computer Vision and Robotics Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
Programming Languages and Software Engineering

Basic Courses:
- CS 540 - Language Processors Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3

Advanced Courses:
- CS 640 - Advanced Compilers Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- SWE 631 - Software Design Patterns Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 737 - Advanced Software Testing Credits: 3
- SWE 760 - Software Analysis and Design of Real-Time Systems Credits: 3

Systems and Networks

Basic Courses:
- CS 531 - Fundamentals of Systems Programming Credits: 3
- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 564 - Security Laboratory Credits: 3

Advanced Courses:
- CS 635 - Foundations of Parallel Computation Credits: 3
- CS 658 - Networked Virtual Environments Credits: 3
- CS 672 - Computer System Performance Evaluation Credits: 3
- CS 673 - Multimedia Computing and Systems Credits: 3
- CS 675 - Distributed Systems Credits: 3
- CS 706 - Concurrent Software Systems Credits: 3
- CS 719 - Scalable Internet Services Credits: 3
- CS 755 - Advanced Computer Networks Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3
- CS 773 - Real-Time Systems Design and Development Credits: 3
- CS 779 - Topics in Resilient and Secure Computer Systems Credits: 3
- CS 788 - Autonomic Computing Credits: 3
- CS 818 - Topics in Computer Systems Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
• ISA 697 - Topics in Information Security Credits: 1-6
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 785 - Research in Digital Forensics Credits: 3

Theoretical Computer Science

Basic Courses:
• CS 530 - Mathematical Foundations of Computer Science Credits: 3
• CS 583 - Analysis of Algorithms Credits: 3

Advanced Courses:
• CS 600 - Theory of Computation Credits: 3
• CS 611 - Computational Methods for Genomics Credits: 3
• CS 630 - Advanced Algorithms Credits: 3
• CS 633 - Computational Geometry Credits: 3
• CS 683 - Parallel Algorithms Credits: 3
• CS 684 - Graph Algorithms Credits: 3

Visual Computing

Basic Courses:
• CS 551 - Computer Graphics Credits: 3

Advanced Courses:
• CS 662 - Computer Graphics Game Technologies Credits: 3
• CS 667 - Biometrics and Identity Management Credits: 3
• CS 682 - Computer Vision Credits: 3
• CS 686 - Image Processing and Applications Credits: 3
• CS 752 - Interactive Graphics Software Credits: 3
• CS 774 - Computational Vision Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 884 - Advanced Topics in Computer Vision and Robotics Credits: 3

Project/Thesis (optional):

Three to six credit hours of the advanced classes may be replaced by a project or thesis. The project or thesis must be guided and approved by a committee of three appropriate faculty members and presented at an appropriate forum. The thesis must meet relevant university requirements.

• 3 credits of CS 798 - Project Seminar Credits: 3
  or
• 6 credits of CS 799 - Thesis Credits: 1-6

Note:
These courses are not classified by area. Note that CS 695/CS 795 can be used to satisfy the breadth requirement if the area is listed in the syllabus for the course.

- CS 695 - Topics in Computer Science Credits: 3
- CS 697 - Independent Reading and Research Credits: 1-3
- CS 795 - Advanced Topics in CS Credits: 3
- CS 798 - Project Seminar Credits: 3
- CS 799 - Thesis Credits: 1-6
- CS 895 - Research Topics in CS Credits: 3

Total: 30 credits

Information Security and Assurance, MS

Banner Code: VS-MS-ISA

School: Volgenau School of Engineering
Department: Computer Science

The Department of Computer Science's MS degree in Information Security and Assurance prepares graduates to fill the current and future need for information security and assurance professionals. Graduates work in a wide variety of capacities, protecting the information systems of different types of organizations and supporting the nation's information infrastructure. The master of science in information security and assurance provides students with the general and technical knowledge and skills to understand the relationship between information security and advancing information systems technology. The program gives graduates a theoretical understanding of the science and methodologies for ensuring the secrecy and integrity of data, as well as the availability and legitimate use of data and information systems.

Students focus on the technical and management aspects of information security and examine ways to provide secure information processing systems by investigating operating systems security, distributed secure system architectures, database security, software applications security, security policies, secure e-commerce, network and distributed systems security, cryptography, and security protocols. Graduates of the program are actively recruited by federal, state, and local governments, as well as the private sector. Typical employers include Internet-based companies, software companies, banks and insurance companies, and in general any organization that depends heavily on the use of IT. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

An accelerated master's option is available to students in the information technology, applied computer science or computer science bachelor's programs. See each listing for specific requirements.

Admission Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Other requirements are as follows:

- Submit the appropriate application with three letters of recommendation from people directly knowledgeable of the applicant's professional and academic competence, a one-page goals statement, and a work résumé.
- Complete the self-evaluation section of the online application. This information is used by the admissions committee to assess an applicant's academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program.
The GRE is only required for those who have not earned a Bachelor's degree from a US Institution.
International students must submit their English Proficiency scores.

Foundation Requirements

To ensure that students have an adequate background in mathematical methods and computer science, the program requires the following four foundation courses, or their equivalents: INFS 501 - Discrete and Logical Structures for Information Systems, INFS 515 - Computer Organization Course and Operating Systems, INFS 519 - Program Design and Data Structures, and SWE 510 - Object-Oriented Programming in Java.

Prospective students are asked to complete a department self evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate that they have the requisite knowledge for those foundations courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified with some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Advising

The department holds orientation meetings each January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This serves as a planning guide for the student.

Degree Requirements

Completion of the degree program requires a minimum of 30 approved graduate credits (10 courses). Students must choose one of the two concentrations – Network and Systems Security (NSS) or Applied Cyber Security (ACBS) described below. To continue in the program, students are required to obtain a B- or better grade in the core courses.

Required Core Courses (9 credits):

To provide the necessary background and fundamentals of information systems security and assurance, the program has three courses that are required of all students:

- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 656 - Network Security Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3 or CS 555 - Computer Communications and Networking Credits: 3

Note: Students selecting the Network and System Security concentration must take CS 555.
Concentration Areas (15 credits):

Students fulfill the requirements of a concentration by completing five courses from one of the two options below.

▲ Concentration in Applied Cyber Security (ACBS)

Students must take any five courses from the list below. At least three of the five courses must be designated ISA or CS.

- CS 667 - Biometrics and Identity Management Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- CFRS 663 - Operations of Intrusion Detection for Forensics Credits: 3
- CFRS 761 - Malware Reverse Engineering Credits: 3
- CFRS 780 - Advanced Topics in Computer Forensics Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3

▲ Concentration in Network and System Security (NSS)

- ISA 564 - Security Laboratory Credits: 3
  And four courses from the list below.
- CS 530 - Mathematical Foundations of Computer Science Credits: 3
- CS 531 - Fundamentals of Systems Programming Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 779 - Topics in Resilient and Secure Computer Systems Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3
  Note: Students who want to take CS 571 but have not taken CS 367 or its equivalent are advised to take CS 531 before CS 571.

Two Additional Courses (6 credits):

All students must select the remaining two courses from any combination of the following:

- ISA courses at the 500, 600, and 700 level
- CS courses at the 500, 600, and 700 level
- Courses from the list of pre-approved electives provided below
A thesis option is available whereby a student may elect to complete a 6-credit thesis ISA 799. Students may choose other graduate electives with the consent of their faculty advisor and the graduate coordinator.

Pre-Approved Electives

A full list of pre-approved electives is given below by program:

Information Systems (INFS)

- INFS 614 - Database Management Credits: 3
- INFS 623 - Web Search Engines and Recommender Systems Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3

Software Engineering (SWE)

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3

Computer Forensics (CFRS)

- CFRS 761 - Malware Reverse Engineering Credits: 3
- CFRS 780 - Advanced Topics in Computer Forensics Credits: 3

Electrical and Computer Engineering (ECE)

- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3

Total: 30 credits
Information Systems, MS

Banner Code: VS-MS-ISYS

School: Volgenau School of Engineering
Department: Computer Science

The mission of the MS-ISYS program is to allow students, with diverse baccalaureate and professional backgrounds, to obtain a high-quality MS degree, which is designed to:

- Provide students with the theoretical knowledge and hands-on project experience needed to analyze, design, build, deploy, maintain, and manage modern information systems; and
- Prepare students for technical or managerial careers in information systems in large and small organizations in both industry and government.

Data, information, and knowledge are crucial to the modern enterprise. MS in Information Systems (MS-ISYS) addresses both the theoretical and engineering aspects of assessing user requirements; designing and building databases; specifying enterprise architectures; implementing large-scale information systems; and working with users to promote their effective organizational use.

The career paths open to graduates include technical and management positions. Technical positions include systems analyst, data administrator, database administrator, information architect, systems architect, decision analyst, data warehouse administrator, database programmer, web-based information systems designer and programmer, information engineer, and knowledge engineer. Management positions include chief information officer, chief knowledge officer, chief privacy officer, project manager, and webmaster.

An accelerated master's option is available to students in the information technology, applied computer science, or computer science bachelor's program. See each listing for specific requirements.

Admission Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. They also must meet the following requirements:

- Submit the appropriate application with three letters of recommendation from people directly knowledgeable of the applicant's professional and academic competence, a one-page goals statement, and a work résumé.
- Complete the self-evaluation section of the online application. This information is used by the admissions committee to assess an applicant's academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program.
- The GRE is only required for those who have not earned a Bachelor's degree from a US Institution.
- International students must submit their English proficiency scores.

Foundation Requirements

To ensure students have an adequate background in mathematical methods, computer technology, and programming knowledge, the program requires the following foundation courses or their equivalents: INFS 501 - Discrete and Logical Structures for Information Systems, INFS 515 - Computer Organization Course and Operating Systems, INFS 519 - Program Design and Data Structures, and SWE 510 - Object-Oriented Programming in Java.

Prospective students are asked to complete a department self-evaluation form indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.
Students may test out to indicate they have the requisite knowledge for the foundations courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified, and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any of the exams must take the equivalent course before enrolling in the core curriculum courses.

**Advising**

The department holds orientation meetings in January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This plan serves as a guide for the student.

**Degree Requirements**

Completion of the MS program requires a minimum of 30 approved graduate credits (10 courses).

**Core Courses (12 credits)**

To provide a common background in the fundamentals of information systems, the following core courses, which constitute the technical body of knowledge for the program, are required of all students:

- CS 550 - Database Systems Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 622 - Information Systems Analysis and Design Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3

**Elective Courses (18 credits)**

The elective courses are organized into the following emphasis areas: database management, data mining, electronic commerce, software engineering, knowledge management, and information security and assurance.

In addition to the core courses taken as part of the MS-ISYS curriculum, students may choose an emphasis within the program by taking six courses from one of the emphasis areas listed below. Students may also choose electives spanning several emphasis areas; they may also plan their electives so as to obtain certificates offered by the department. A list of approved electives is given within emphasis areas and by graduate program. A full list is provided at the end of this section. Special courses may be used as electives with prior approval of the student's academic advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis (INFS 799), which is primarily intended for students planning to pursue a PhD in information technology with a concentration in information systems.

Listed below are the emphasis areas and the approved elective courses in each area.

**Database Management**
• CS 530 - Mathematical Foundations of Computer Science Credits: 3
• CS 787 - Decision Guidance Systems Credits: 3
• INFS 623 - Web Search Engines and Recommender Systems Credits: 3
• INFS 740 - Database Programming for the World Wide Web Credits: 3

- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- ISA 796 - Directed Readings in Information Security Credits: 3

Certificates

Certificates may also be obtained in the following areas: Information Security and Assurance Graduate Certificate, Software Engineering Graduate Certificate, Foundations of Information Systems Graduate Certificate, and Web-Based Software Engineering Graduate Certificate. These certificates are described in the computer science certificates section of this catalog.

Approved Electives

A full list of approved electives is given below by program:

Information Systems (INFS)

- INFS 623 - Web Search Engines and Recommender Systems Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 697 - Topics in Information Systems Credits: 1-6
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 796 - Directed Readings in Information Systems Credits: 3
• INFS 797 - Advanced Topics in Information Systems Credits: 1-6

Information Security and Assurance (ISA)

• ISA 564 - Security Laboratory Credits: 3
• ISA 650 - Security Policy Credits: 3
• ISA 652 - Security Audit and Compliance Testing Credits: 3
• ISA 656 - Network Security Credits: 3
• ISA 673 - Operating Systems Security Credits: 3
• ISA 674 - Intrusion Detection Credits: 3
• ISA 681 - Secure Software Design Credits: 3
• ISA 697 - Topics in Information Security Credits: 1-6
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 785 - Research in Digital Forensics Credits: 3
• ISA 797 - Advanced Topics in Information Security Credits: 3

Software Engineering (SWE)

• SWE 620 - Software Requirements Analysis and Specification Credits: 3
• SWE 625 - Software Project Management Credits: 3
• SWE 626 - Software Project Laboratory Credits: 3
• SWE 631 - Software Design Patterns Credits: 3
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 699 - Special Topics in Software Engineering Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 727 - Quality of Service for Software Architectures Credits: 3
• SWE 763 - Software Engineering Experimentation Credits: 3
• SWE 795 - Advanced Topics in Software Engineering Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 798 - Research Project Credits: 3

Computer Science (CS)

• CS 504 - Principles of Data Management and Mining Credits: 3
• CS 530 - Mathematical Foundations of Computer Science Credits: 3
• CS 531 - Fundamentals of Systems Programming Credits: 3
• CS 540 - Language Processors Credits: 3
• CS 580 - Introduction to Artificial Intelligence Credits: 3
• CS 583 - Analysis of Algorithms Credits: 3
• CS 584 - Theory and Applications of Data Mining Credits: 3
• CS 635 - Foundations of Parallel Computation Credits: 3
• CS 640 - Advanced Compilers Credits: 3
• CS 650 - Advanced Database Management Credits: 3
• CS 657 - Mining Massive Datasets with MapReduce Credits: 3
• CS 662 - Computer Graphics Game Technologies Credits: 3
• CS 672 - Computer System Performance Evaluation Credits: 3
• CS 673 - Multimedia Computing and Systems Credits: 3
• CS 674 - Data Mining on Multimedia Data Credits: 3
• CS 681 - Knowledge Engineering Credits: 3
• CS 682 - Computer Vision Credits: 3
• CS 683 - Parallel Algorithms Credits: 3
• CS 684 - Graph Algorithms Credits: 3
• CS 685 - Autonomous Robotics Credits: 3
• CS 686 - Image Processing and Applications Credits: 3
• CS 687 - Advanced Artificial Intelligence Credits: 3
• CS 688 - Pattern Recognition Credits: 3
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• CS 706 - Concurrent Software Systems Credits: 3
• CS 752 - Interactive Graphics Software Credits: 3
• CS 755 - Advanced Computer Networks Credits: 3
• CS 756 - Performance Analysis of Computer Networks Credits: 3
• CS 773 - Real-Time Systems Design and Development Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 779 - Topics in Resilient and Secure Computer Systems Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 795 - Advanced Topics in CS Credits: 3

Electrical and Computer Engineering (ECE)

• ECE 511 - Microprocessors Credits: 3
• ECE 521 - Modern Systems Theory Credits: 3
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 535 - Digital Signal Processing Credits: 3
• ECE 545 - Digital System Design with VHDL Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 586 - Digital Integrated Circuits Credits: 3
• ECE 611 - Advanced Microprocessors Credits: 3
• ECE 612 - Real-Time Embedded Systems Credits: 3
• ECE 620 - Optimal Control Theory Credits: 3
• ECE 621 - Systems Identification Credits: 3
• ECE 624 - Control Systems Credits: 3
• ECE 630 - Statistical Communication Theory Credits: 3
• ECE 633 - Coding Theory Credits: 3
• ECE 635 - Adaptive Signal Processing Credits: 3
• ECE 641 - Computer System Architecture Credits: 3
• ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
• ECE 643 - Network Switching and Routing Credits: 3
- ECE 645 - Computer Arithmetic Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ECE 650 - Robotics Credits: 3
- ECE 680 - Physical VLSI Design Credits: 3
- ECE 681 - VLSI Design for ASICs Credits: 3
- ECE 732 - Mobile Communication Systems Credits: 3
- ECE 734 - Detection and Estimation Theory Credits: 3
- ECE 741 - Wireless Networks Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3

Operations Research (OR)

- OR 540 - Management Science Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 681 - Decision and Risk Analysis Credits: 3
- OR 690 - Optimization of Supply Chains Credits: 3

Psychology (PSYC)

- PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3

Statistics (STAT)

- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics I Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 656 - Regression Analysis Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 674 - Survey Sampling II Credits: 3

Systems Engineering (SYST)

- SYST 520 - System Engineering Design Credits: 3
Software Engineering, MS

Banner Code: VS-MS-SWE

School: Volgenau School of Engineering
Department: Computer Science

This program provides specialized knowledge and experience in developing and modifying large, complex software systems. It emphasizes technical and management aspects of software engineering development. Software engineering is an established discipline based on requirements analysis, design, construction, testing, maintenance, economics, and management issues. A pragmatic approach to problem solving is the hallmark of a software engineer. Software engineers are concerned with the theoretical and practical aspects of technology, cost, and social impact of software systems that are effective and efficient.

Software engineers are in demand in every segment of society affected by computing technology. Potential employers include all software vendors and Internet-based companies, electronic business organizations, businesses that build and sell computers, research and development laboratories, aerospace companies, government contractors, banks, insurance companies, and manufacturing organizations. The master's program is concerned with technical and managerial issues, but primary emphasis is placed on the technical aspects of building and modifying high-quality software systems.

Successful applicants have a broad variety of undergraduate backgrounds, including computer science, science and mathematics, engineering, liberal arts, and business. Many students are working or have worked in the software industry.

The program is revised on a regular basis to stay abreast of the latest developments in information technology (IT). The program introduced a major revision for fall 2005; recent additions include software construction with the object-oriented Java programming language, requirements analysis with use cases and the Unified Modeling Language (UML), object-oriented software design with the UML, graphical user interface design, software engineering for the web, software project management using the spiral life cycle model and the Capability Maturity Model, software architecture, design patterns, system testing and testing of object-oriented components, and formal methods using the Object Constraint Language. All classes are scheduled in the late afternoon and early evening to accommodate employed students.
An accelerated master's option is available to students in the information technology, applied computer science or computer science bachelor's program. See each listing for specific requirements.

**Foundation Requirements**

Students entering the MS program must have course work or equivalent knowledge in the following areas: introductory programming in any language; knowledge of an object-oriented programming language such as Java, C++, or C#; data structures and algorithms; machine organization (such as those given in computer system architecture or assembly language courses); and topics in discrete mathematics, including sets, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be achieved by taking the following foundation courses from Mason: INFS 501 - Discrete and Logical Structures for Information Systems, INFS 515 - Computer Organization Course and Operating Systems, INFS 519 - Program Design and Data Structures, and SWE 510 - Object-Oriented Programming in Java.

In addition, it is desirable, though not required, that entering students have at least one year of work experience in building or modifying software systems.

Prospective students are asked to complete a department self-evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for those foundation courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

**Admission Requirements**

In addition to general admission requirements of the university, each applicant to the MS program must hold a four-year (120-credit) baccalaureate degree in an appropriate discipline from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits of undergraduate study. Other requirements are as follows:

- Provide a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering.
- Complete the self-evaluation section of the online application. This information is used by the admissions committee to assess an applicant's academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program.
- Submit the appropriate application with three letters of recommendation from people directly knowledgeable of the applicant's professional and academic competence.
- The GRE is only required for those who have not earned a Bachelor's degree from a US Institution.

Acceptance into the MS program is based on an overall assessment of the applicant's ability to complete the program of study satisfactorily. Well-qualified students with minor deficiencies may be admitted to the program in provisional status, with specified course work to be completed within a specified time.

**Advising**

The department holds orientation meetings each January and August to advise incoming and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.
The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission; this plan serves as a guide for the student.

Degree Requirements

In addition to the general requirements of the university, the MS in Software Engineering requires a minimum of 30 graduate credits. The coursework is divided into three categories: a breadth requirement of 12 credits of core courses, a depth requirement of 9 credits of emphasis courses, and 9 credits of elective courses.

Four Core Courses (12 credits)

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 637 - Software Testing Credits: 3

Emphasis Courses (9 credits)

Students may choose an emphasis by taking three courses from one of the emphasis areas of software design, secure software engineering, software management, and web applications design and development. With permission from the advisor, a student may choose to not take an emphasis. The emphasis area courses are:

Software Design

- SWE 626 - Software Project Laboratory Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 681 - Secure Software Design and Programming Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 722 - Service Oriented Architecture Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 760 - Software Analysis and Design of Real-Time Systems Credits: 3

Secure Software Engineering

- ISA 562 - Information Security Theory and Practice Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 681 - Secure Software Design and Programming Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- SWE 737 - Advanced Software Testing Credits: 3

Software Management
• OR 540 - Management Science Credits: 3
• SWE 620 - Software Requirements Analysis and Specification Credits: 3
• SWE 625 - Software Project Management Credits: 3
• SWE 626 - Software Project Laboratory Credits: 3
• ISA 650 - Security Policy Credits: 3

Web Applications Design and Development

• INFS 614 - Database Management Credits: 3 or CS 550 - Database Systems Credits: 3
  (Note: Credit will not be given for both INFS 614 and CS 550)
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 722 - Service Oriented Architecture Credits: 3
• SWE 737 - Advanced Software Testing Credits: 3

Elective Courses (9 credits)

Students may select the remaining courses from the list of approved elective courses, including other emphasis areas and courses from other MS programs in the department and the Volgenau School. Students may choose other graduate electives with the consent of their faculty advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis, which is primarily intended for students planning to pursue a PhD in Information Technology with a concentration in Software Engineering. The course designations are:

• SWE 699 - Special Topics in Software Engineering Credits: 3
• SWE 795 - Advanced Topics in Software Engineering Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 798 - Research Project Credits: 3
• SWE 799 - Thesis Credits: 1-6

Approved Electives

Below is the list of approved electives organized by academic program. Students should note that a maximum of two 500-level courses are allowed as electives. Courses not on this list may only be taken with explicit signed permission from the MS-SWE advisor.

Information Systems (INFS)

• INFS 612 - Principles and Practices of Communication Networks Credits: 3
• INFS 614 - Database Management Credits: 3
• INFS 623 - Web Search Engines and Recommender Systems Credits: 3
• INFS 640 - Introduction to Electronic Commerce Credits: 3
• INFS 697 - Topics in Information Systems Credits: 1-6
• INFS 740 - Database Programming for the World Wide Web Credits: 3
• INFS 760 - Advanced Database Management Credits: 3
• INFS 770 - Knowledge Management for E-Business Credits: 3
• INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
• INFS 774 - Enterprise Architecture Credits: 3
• INFS 797 - Advanced Topics in Information Systems Credits: 1-6

Information Security and Assurance (ISA)

• ISA 562 - Information Security Theory and Practice Credits: 3
• ISA 564 - Security Laboratory Credits: 3
• ISA 650 - Security Policy Credits: 3
• ISA 652 - Security Audit and Compliance Testing Credits: 3
• ISA 656 - Network Security Credits: 3
• ISA 673 - Operating Systems Security Credits: 3
• ISA 681 - Secure Software Design Credits: 3
• ISA 697 - Topics in Information Security Credits: 1-6
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 785 - Research in Digital Forensics Credits: 3
• ISA 797 - Advanced Topics in Information Security Credits: 3

Software Engineering (SWE)

• SWE 620 - Software Requirements Analysis and Specification Credits: 3
• SWE 625 - Software Project Management Credits: 3
• SWE 626 - Software Project Laboratory Credits: 3
• SWE 631 - Software Design Patterns Credits: 3
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 681 - Secure Software Design and Programming Credits: 3
• SWE 699 - Special Topics in Software Engineering Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 727 - Quality of Service for Software Architectures Credits: 3
• SWE 737 - Advanced Software Testing Credits: 3
• SWE 760 - Software Analysis and Design of Real-Time Systems Credits: 3
• SWE 763 - Software Engineering Experimentation Credits: 3
• SWE 795 - Advanced Topics in Software Engineering Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 798 - Research Project Credits: 3
• SWE 799 - Thesis Credits: 1-6

• STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
• STAT 674 - Survey Sampling II Credits: 3

Systems Engineering (SYST)

• SYST 520 - System Engineering Design Credits: 3
• SYST 530 - Systems Engineering Management I Credits: 3
• SYST 542 - Decision Support Systems Engineering Credits: 3
• SYST 560 - Introduction to Air Traffic Control Credits: 3
• SYST 573 - Decision and Risk Analysis Credits: 3
• SYST 611 - System Methodology and Modeling Credits: 3
• SYST 620 - Discrete Event Systems Credits: 3
• SYST 659 - Topics in Systems Engineering Credits: 3
• SYST 660 - Air Transportation Systems Modeling Credits: 3
• SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
• SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
• SYST 683 - Modeling, Simulation, and Gaming Credits: 3
• SYST 684 - Sensor Data Fusion Credits: 3
• SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3

Total: 30 credits

Non-Degree

Computer Science Minor

Banner Code: CS

School: Volgenau School of Engineering
Department: Computer Science

The minor in computer science requires completion of at least 19 credits. Students should pay careful attention to prerequisites when selecting courses.

For policies governing all minors, see the Academic Policies section of this catalog.
Declaring a CS Minor

Students requesting a Computer Science Minor must have completed CS 112 or CS 211 with a grade of B or better.

Minor Requirements

Required Courses (11 credits)

- CS 105 - Computer Ethics and Society Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 310 - Data Structures Credits: 3

Three additional computer science courses chosen from:

- CS 222 - Computer Programming for Engineers Credits: 3 OR CS 262 - Introduction to Low-Level Programming Credits: 2
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- CS 321 - Software Engineering Credits: 3
- CS 325 - Introduction to Game Design Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 463 - Comparative Programming Languages Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- CS 484 - Data Mining Credits: 3

Total: 19-20 credits

Grades

No more than 3 credits of D grades may be used to satisfy requirements for the Computer Science Minor.

Software Engineering Minor
Banner Code: SWE

School: Volgenau School of Engineering
Department: Computer Science

For policies governing all minors, see the Academic Policies section of this catalog.

Minor Requirements

Candidates for the minor in software engineering must complete 19 credits in software engineering with a minimum GPA of 2.00, 8 credits of which must be unique to the minor and not used for the major.

Required Courses (10 credits):

- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 310 - Data Structures Credits: 3

And three from:

- SWE 205 - Software Usability Analysis and Design Credits: 3
- CS 321 - Software Engineering Credits: 3
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- SWE 432 - Design and Implementation of Software for the Web Credits: 3
- SWE 437 - Software Testing and Maintenance Credits: 3
- SWE 443 - Software Architectures Credits: 3

Total: 19 credits

Grades

No more than 3 credits of D grades may be used to satisfy minor requirements.

Declaring a Software Engineering Minor

Students requesting a software engineering minor must have completed CS 112 or CS 211 with a B or better.

Undergraduate Certificate

Computer Science Undergraduate Certificate
Banner Code: VS-CERB-CS

School: Volgenau School of Engineering
Department: Computer Science

This certificate targets students who are working on or possess an undergraduate degree in a technical (science or engineering) field but lack a formal credential in the computer science field. The certificate also targets students who have shown an aptitude for graduate study but do not have the academic prerequisites required for admittance into a graduate MS computer science program.

The undergraduate certificate in computer science may be pursued on a full-time basis except when limited by prerequisite constraints.

Admissions Requirements

Students must have programming experience at the level of CS 112, 211, and 262 and either a BS in a technical field with a 3.00 GPA or higher, or current enrollment in a technical undergraduate major.

Certificate Requirements

Basic Computer Science (15 credits)

- CS 310 - Data Structures Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- ECE 301 - Digital Electronics Credits: 3

Mathematics (3 credits)

- MATH 125 - Discrete Mathematics I Credits: 3

Completion of one of the following options (9 credits):

Option 1:

- CS 483 - Analysis of Algorithms Credits: 3
AND two of the following:

- CS 321 - Software Engineering Credits: 3
- CS 440 - Language Processors and Programming Environments Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 484 - Data Mining Credits: 3

Option 2:

- CS 583 - Analysis of Algorithms Credits: 3

AND two of the following:

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3

Total: 27 Credits

Electrical and Computer Engineering

Phone: 703-993-1569
Web: ece.gmu.edu

School: Volgenau School of Engineering

Faculty

Professors: Cook, Ephraim, Griffiths, Hayes (Chair), Ioannou, Jabbari, Levis, Manitius, Mark, Mulpuri, Tian

Associate professors: Berry, Gaj, Hintz, Jones, Kaps, Kurtay (Associate Chair), Li, Nelson, Osgood, Pachowicz, Paris, Peixoto, Sasan, Wage

Assistant professors: Homayoun, Lofaro, Lorie, Pandula, Zeng
Research professors: Elder, Katona

Adjunct professors: Abgariah, Abouelnaga, Allen, Beatty, Boci, Bonilla, Choi, Deavers, Diaz, Espinosa, Fowler, Ganjoo, Garfinkel, Greenhill, Hall, Hassan, Hrnjez, Hussey, Irvine, Khan, Lazarevich, Leaf, Lin, Maiden, Mangra, Pena, Robinson, Rothwell, Sabzevari, Sachdev, Schaefer, Sheppard, Steele, Shyy, Storey, Torres, Tran, Williams, Wu

Emeritus faculty: Allnutt, Baraniecki, Beale, Black, Ceperley, Chang, Gertler, Schaefer, Sutton, Tabak, Van Trees

Undergraduate Programs

The undergraduate education mission of the ECE Department is to provide a quality education for electrical engineering and computer engineering students to support the needs of Virginia and the nation.

Program Educational Objectives for the BS ELEN and BS CPE

Graduates of the Electrical Engineering and the Computer Engineering programs are expected within three to five years of graduation to have:

- Established themselves as successful and productive engineering professionals or engaged in advanced study such as a graduate degree program.
- Worked effectively in team environments and individually.
- Fulfilled their responsibilities in the areas of ethics, continuing professional development and effective communications.

Graduate Programs

Graduate programs leading to MS and PhD degrees prepare students for careers in industry, government, and academia. Graduate certificate programs provide well-defined targets for students who want to advance or update their knowledge in selected areas. The ECE Department offers the PhD in Electrical and Computer Engineering and master’s degrees in computer engineering, electrical engineering, telecommunications, and computer forensics, and certificates in communications, networking, and signal processing.

The ECE Department is committed to high standards of teaching and research excellence in communications, digital systems design, computer networks, microprocessor and embedded systems, distributed computing, signal and image processing, control systems, robotics, intelligent systems, systems integration and microelectronics. Graduate students are offered a progressive environment with ample opportunities for the type of advanced research needed to confront the complex realities of the 21st century.

Courses in the department's graduate programs are offered during the evening or late afternoon hours to accommodate students who are employed full time. For those who enter the programs on a full-time basis, some financial aid may be available in various forms, such as teaching assistantships, research assistantships, and work-study and co-op agreements with local industry.

Courses

The Electrical and Computer Engineering (ECE) Department offers all courses designated ECE, CFRS and TCOM in the Courses section of this catalog. The department also offers some ENGR courses.
The field of computer engineering can be described as a blend of electrical engineering and computer science. It is an amalgam of the computer hardware orientation of an electrical engineering program and the operating systems and languages of a computer science program. Computer engineers are involved in research, development, design, production, and operation of a wide variety of digital systems, from integrated circuits to computer systems and large-scale computer networks. Reflecting the industry trend to integrate hardware and software development, the computer engineering program is built around software running on advanced hardware that can simulate and assist in the design of new digital systems. Advanced software, such as VHDL, and software tools, such as logic and system design tools by Mentor Graphics and Cadence Design Systems, can be used to model hardware and hardware functionality from the system and architecture level down to the gate level and include relations to integrated circuit fabrication technology. Design and testing methodology involving these tools is taught in the program.

Career opportunities exist in engineering research and development, product design, digital system design and integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

The bachelor’s program in computer engineering at Mason is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The computer engineering program is staffed by 30 full-time professors, including fellows of IEEE or other professional societies, and several part-time professors.

The curriculum provides a strong background in the fundamentals of computer engineering. A number of technical elective specializations are offered, ranging from strongly hardware-oriented to strongly software-oriented ones. These include robotics and embedded systems, computer networks, signal processing, and integrated circuits. The curriculum includes 9 credits of senior technical electives, and 3 credits of senior advanced design project, which may be used for specialization in one of these technical areas.

The requirements for the degree may be satisfied on a full-time or part-time basis. Cooperative education provides students the opportunity to integrate paid career-related work experience with classroom learning. Academic credit towards the completion of major requirements cannot be given for co-op experience. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, computer engineering majors are eligible to apply through the ECE Department for scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association and the Institute of Electrical and Electronics Engineers.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Computer Engineering, BS/Computer Engineering, Accelerated MS for specific requirements.

Degree Requirements

All computer engineering students are strongly encouraged to see their major faculty advisor each semester before course registration.

Students must complete each ECE, ENGR, BENG, CS, MATH, PHYS and STAT course presented as part of the required 126 credits for the degree with a grade of C or better.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.
The 126 credits required for the BS in computer engineering are the Mason Core requirements and all of the following:

**Electrical and Computer Engineering Credits: 41**

- ECE 101 - Introduction to Electrical and Computer Engineering Credits: 3
- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- ECE 285 - Electric Circuit Analysis I Credits: 3 *
- ECE 286 - Electric Circuit Analysis II Credits: 3
- ECE 331 - Digital System Design Credits: 3
- ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
- ECE 333 - Linear Electronics I Credits: 3
- ECE 334 - Linear Electronics Lab I Credits: 1
- ECE 445 - Computer Organization Credits: 3
- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
- ECE 465 - Computer Networking Protocols Credits: 3
- ECE 491 - Engineering Seminar Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1 **
- ECE 493 - RS: Senior Advanced Design Project II Credits: 2

**Notes:**

*Note that ECE 285/ECE 286 courses taken at Mason prior to fall 2013 or transferred to Mason prior to fall 2014 do NOT meet the circuits analysis requirement. Students who fit in either category need to contact the department as soon as possible to discuss their options.

**Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 to gain a semester head start in the design process.

**Computer Science Credits: 16**

- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 222 - Computer Programming for Engineers Credits: 3
- CS 310 - Data Structures Credits: 3
- CS 471 - Operating Systems Credits: 3

**Mathematics and Statistics Credits: 23**

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 125 - Discrete Mathematics I Credits: 3
• MATH 203 - Linear Algebra Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3
• STAT 346 - Probability for Engineers Credits: 3

Physics Credits: 11

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• PHYS 262 - University Physics III Credits: 3

Engineering Credits: 2

• ENGR 107 - Introduction to Engineering Credits: 2

Technical Electives Credits: 9

Students must choose one of the four technical specialization areas listed below. All three of the technical electives totaling 9 credit hours must be selected from within the chosen specialization area. With the prior approval of the ECE department, students may also create a custom specialization area and select a set of technical electives, including non-ECE courses, to apply to the custom specialization area. Graduate courses listed within the specialization areas can only be taken with prior approval of the department. The decision to approve taking graduate courses listed within the specialization areas is based on a review of the student's academic record.

Specialization Areas:

Robotics and Embedded Systems

Select three of the following courses:

• ECE 421 - Classical Systems and Control Theory Credits: 3
• ECE 446 - Device Driver Development Credits: 3
• ECE 450 - Introduction to Robotics Credits: 3
• ECE 470 - Introduction to Humanoid Robotics Credits: 3
• ECE 510 - Real-Time Concepts Credits: 3

Computer Networks
Select three of the following courses:

- ECE 460 - Communication and Information Theory Credits: 3
- ECE 462 - Data and Computer Communications Credits: 3
- ECE 463 - Digital Communications Systems Credits: 3
- IT 466 - Network Security II Credits: 3

Signal Processing

Select three of the following courses:

- ECE 320 - Signals and Systems II Credits: 3
- ECE 410 - Applications of Discrete-Time Signal Processing Credits: 3
- ECE 460 - Communication and Information Theory Credits: 3
- ECE 535 - Digital Signal Processing Credits: 3

Integrated Circuits

Select three of the following courses:

- ECE 430 - Principles of Semiconductor Devices Credits: 3
- ECE 431 - Digital Circuit Design Credits: 3
- ECE 433 - Linear Electronics II Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3

English, Communication, and Economics Credits: 9

- ENGH 302 - Advanced Composition Credits: 3 (Natural Sciences and Technology section)
- COMM 100 - Public Speaking Credits: 3  OR  COMM 101 - Interpersonal and Group Interaction Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Additional Mason Core Credits: 15

Students must complete all Mason Core requirements not fulfilled by major requirements. Mason Core courses should be selected from the department's list of approved courses. The Synthesis Mason Core requirement is satisfied by ECE 492 plus ECE 493.

- Written Communication (lower): 3 credits
- Literature: 3 credits
- Arts: 3 credits
- Western Civilization/World History: 3 credits
- Global Understanding: 3 credits

Note:
All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed above.

Total: 126 credits

Change of Major

Students who are considering changing their major to computer engineering must meet with the Volgenau School of Engineering Coordinator of Undergraduate advising, 2500 Nguyen Engineering Building. Students considering computer engineering must have at least a 2.75 GPA in all math, physics, engineering, and computer science courses, and should have successfully completed MATH 114.

Writing-Intensive Requirement

Mason's writing-intensive requirement is satisfied by the following group of three courses: ECE 333, ECE 445, and ECE 491 in which faculty provide feedback on student writing assignments. Drafts and revisions are required.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the "Termination from the Major" section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Double Major and Minor Programs for Computer Engineering and Electrical Engineering

Computer engineering majors and electrical engineering majors can earn degrees with double majors in a number of disciplines. Computer engineering and computer science are frequently combined. Electrical engineering has been combined with computer engineering, computer science, physics or math. Details are available in the department brochures or at the Volgenau School web site volgenau.gmu.edu. There are several minors available for students in the ECE Department including the Mechanical Engineering minor.
Electrical Engineering, BS

Banner Code: VS-BS-ELEN

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

Electrical engineering is a major field of modern technology. Electrical engineers are involved in research, development, design, production, and operation of a wide variety of devices and systems, including integrated circuits and microwave and laser devices, communication systems, control systems, radar, robots, large telecommunication networks, and power networks.

The bachelor's program in electrical engineering at Mason is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The electrical engineering program is staffed by ECE faculty composed of 30 full-time professors, including fellows of IEEE or other professional societies, and several part-time professors.

The curriculum provides a strong background in the fundamentals of electrical engineering and senior-level courses in the important areas of electronics, networks, communications and signal processing, computer engineering, and controls and robotics. Further, the curriculum includes 9 credits of senior technical electives, 2 credits of advanced engineering labs, and 3 credits of senior advanced design project, which may be used for further specialization in one of these areas.

Career opportunities exist in engineering research and development, system design, system integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

Degree requirements may be satisfied on a full-time or part-time basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning. Academic credit towards the completion of major requirements is not given for co-op experience. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, electrical engineering majors are eligible to apply at the ECE Department for scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association and the Institute of Electrical and Electronics Engineers.

This undergraduate program offers students the option of applying for the accelerated master's degree program in electrical engineering or telecommunications. See each listing for specific requirements.

Degree Requirements

All electrical engineering students are strongly encouraged to see their major faculty advisor before course registration each semester.

Students must complete each ECE, ENGR, BENG, CS, MATH, PHYS, and STAT course presented as part of the required 121 credits for the degree with a grade of C or better.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

For the BS Electrical Engineering degree, students must complete 121 credits, including all of the following:

Electrical and Computer Engineering Credits: 45

- ECE 101 - Introduction to Electrical and Computer Engineering Credits: 3
- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
• ECE 285 - Electric Circuit Analysis I Credits: 3 *
• ECE 286 - Electric Circuit Analysis II Credits: 3
• ECE 305 - Electromagnetic Theory Credits: 3
• ECE 320 - Signals and Systems II Credits: 3
• ECE 331 - Digital System Design Credits: 3
• ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
• ECE 333 - Linear Electronics I Credits: 3
• ECE 334 - Linear Electronics Lab I Credits: 1
• ECE 421 - Classical Systems and Control Theory Credits: 3
• ECE 433 - Linear Electronics II Credits: 3
• ECE 445 - Computer Organization Credits: 3
• ECE 460 - Communication and Information Theory Credits: 3
• ECE 491 - Engineering Seminar Credits: 1
• ECE 492 - Senior Advanced Design Project I Credits: 1 **
• ECE 493 - RS: Senior Advanced Design Project II Credits: 2

Notes:

*Note that ECE 285/ECE 286 courses taken at Mason prior to fall 2013 or transferred to Mason prior to fall 2014 do NOT meet the circuit analysis requirement. Students who fit in either category need to contact the department as soon as possible to discuss their options.

**Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 to gain a semester head start in the design process.

Technical Electives Credits: 9

Three technical elective courses totaling 9 credit hours must be selected from the list below. Only a single 3-credit ECE-499 course may be taken as a technical elective. ECE-447 and ECE-448, which are 4-credit courses with built-in labs, can be used to fulfill one technical elective and one advanced lab requirement. Some graduate courses and courses outside the ECE department may be taken to fulfill the technical elective requirement with the permission of the department. The decision to approve non-ECE courses as well as graduate courses as technical electives is at the discretion of the department based on a review of the course content and the student's academic record.

• ECE 410 - Applications of Discrete-Time Signal Processing Credits: 3
• ECE 422 - Digital Control Systems Credits: 3
• ECE 430 - Principles of Semiconductor Devices Credits: 3
• ECE 431 - Digital Circuit Design Credits: 3
• ECE 446 - Device Driver Development Credits: 3
• ECE 447 - Single-Chip Microprocessors Credits: 4
• ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
• ECE 450 - Introduction to Robotics Credits: 3
• ECE 462 - Data and Computer Communications Credits: 3
• ECE 463 - Digital Communications Systems Credits: 3
• ECE 465 - Computer Networking Protocols Credits: 3
• ECE 470 - Introduction to Humanoid Robotics Credits: 3
• ECE 499 - Special Topics in Electrical Engineering Credits: 0-4
Advanced Engineering Labs Credits: 2

Two advanced labs must be selected from the following list:

- ECE 429 - Control Systems Lab Credits: 1
- ECE 434 - Linear Electronics II Laboratory Credits: 1
- ECE 447 - Single-Chip Microcomputers Credits: 4 (fulfills 3 credits of technical electives and 1 credit of advanced lab)
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4 (fulfills 3 credits of technical electives and 1 credit of advanced lab)
- ECE 461 - Communication Engineering Laboratory Credits: 1
- ECE 467 - Network Implementation Laboratory Credits: 1

Computer Science Credits: 7

- CS 112 - Introduction to Computer Programming Credits: 4
- CS 222 - Computer Programming for Engineers Credits: 3

Mathematics and Statistics Credits: 20

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 346 - Probability for Engineers Credits: 3

Physics Credits: 12

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Engineering Credits: 2
• ENGR 107 - Introduction to Engineering Credits: 2

English, Communication, and Economics Credits: 9

• ENGH 302 - Advanced Composition Credits: 3 (Natural Sciences and Technology section)
• COMM 100 - Public Speaking Credits: 3 OR COMM 101 - Interpersonal and Group Interaction Credits: 3
• ECON 103 - Contemporary Microeconomic Principles Credits: 3

Additional Mason Core Credits: 15

Students must complete all Mason Core requirements not fulfilled by major requirements. Mason Core courses should be selected from the department's list of approved courses. The Synthesis Mason Core requirement is satisfied by ECE 492 and ECE 493.

• Written Communication (lower): 3 credits
• Literature: 3 credits
• Arts: 3 credits
• Western Civilization/World History: 3 credits
• Global Understanding: 3 credits

Note:

All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed above.

Concentrations

Concentrations are available within the electrical engineering baccalaureate program. Completion of specific science courses and senior-level courses leads to one of these designations on the student's transcript on graduation. Concentration requirements may also meet some or all of the Advanced Engineering Lab and Technical Elective requirements.

▲ Concentration in Bioengineering (BIOE)

Students must complete:

• BENG 301 - Bioengineering Measurements Credits: 3
• BENG 302 - Bioengineering Measurements Lab Credits: 1
• ECE 434 - Linear Electronics II Laboratory Credits: 1 OR ECE 429 - Control Systems Lab Credits: 1
• ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - RS: Senior Advanced Design Project II Credits: 2 (bioengineering topic only)

And two courses from:

- BENG 304 - Modeling and Control of Physiological Systems Credits: 3
- BENG 313 - Physiology for Engineers Credits: 3
- BENG 406 - Introduction to Biomechanics Credits: 3
- BENG 420 - Bioinformatics for Engineers Credits: 3
- BENG 525 - Neural Engineering Credits: 3
- BENG 499 - Special Topics in Bioengineering Credits: 0-4 (minimum 3 credits)
- BENG 538 - Medical Imaging Credits: 3
- BENG 590 - Selected Topics in Bioengineering Credits: 3
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (bioengineering topic only; minimum 3 credits)
- ECE 590 - Selected Topics in Engineering Credits: 3 (bioengineering topic only)

▲ Concentration in Communications and Signal Processing (CSP)

Students must complete:

- ECE 461 - Communication Engineering Laboratory Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - RS: Senior Advanced Design Project II Credits: 2 (communications and signal processing topic)

And three courses from:

- ECE 410 - Applications of Discrete-Time Signal Processing Credits: 3
- ECE 462 - Data and Computer Communications Credits: 3
- ECE 463 - Digital Communications Systems Credits: 3
- ECE 465 - Computer Networking Protocols Credits: 3
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (communications and signal processing topic only - must be pre-approved by advisor; minimum 3 credits)
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 535 - Digital Signal Processing Credits: 3
- ECE 567 - Optical Fiber Communications Credits: 3
- ECE 590 - Selected Topics in Engineering Credits: 3 (communication and signal processing topic only - must be pre-approved by advisor)
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3

▲ Concentration in Computer Engineering (CPE)
Students must complete:

- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - RS: Senior Advanced Design Project II Credits: 2 (computer engineering or digital design topic)

And two courses from:

- ECE 431 - Digital Circuit Design Credits: 3
- ECE 437 - Principles of Microelectronic Device Fabrication Credits: 3
- ECE 446 - Device Driver Development Credits: 3
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
- ECE 450 - Introduction to Robotics Credits: 3
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (computer engineering topic only - must be pre-approved by advisor; minimum 3 credits)
- ECE 548 - Sequential Machine Theory Credits: 3
- ECE 590 - Selected Topics in Engineering Credits: 3 (computer engineering topic only - must be pre-approved by advisor)
- CS 471 - Operating Systems Credits: 3

▲ Concentration in Control Systems (CON)

Students must complete:

- ECE 429 - Control Systems Lab Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - RS: Senior Advanced Design Project II Credits: 2 (control systems or robotics topic)

And three courses from:

- ECE 422 - Digital Control Systems Credits: 3
- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 450 - Introduction to Robotics Credits: 3
- ECE 470 - Introduction to Humanoid Robotics Credits: 3
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (control systems topic only - must be pre-approved by advisor; minimum 3 credits)
- ECE 511 - Microprocessors Credits: 3
- ECE 521 - Modern Systems Theory Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 590 - Selected Topics in Engineering Credits: 3 (control systems topic only - must be pre-approved by advisor)

▲ Concentration in Electronics (ELE)

Students must complete:

- ECE 434 - Linear Electronics II Laboratory Credits: 1  OR  ECE 435 - Digital Circuit Design Laboratory Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - RS: Senior Advanced Design Project II Credits: 2 (analog or digital design or electromagnetism topic only)

And three courses from:

- ECE 430 - Principles of Semiconductor Devices Credits: 3
- ECE 431 - Digital Circuit Design Credits: 3
- ECE 437 - Principles of Microelectronic Device Fabrication Credits: 3
- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (electronics topic only - must be pre-approved by advisor; minimum 3 credits)
- ECE 513 - Applied Electromagnetic Theory Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 567 - Optical Fiber Communications Credits: 3
- ECE 584 - Semiconductor Device Fundamentals Credits: 3
- ECE 586 - Digital Integrated Circuits Credits: 3
- ECE 587 - Design of Analog Integrated Circuits Credits: 3
- ECE 590 - Selected Topics in Engineering Credits: 3 (electronics topic only)
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3

Total: minimum 121 credits

Change of Major

Students who are considering changing their major to electrical engineering must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. Students considering electrical engineering must have at least a 2.75 GPA in all math, physics, engineering, and computer science courses, and should have successfully completed MATH 114.

Writing-Intensive Requirement
Mason's writing-intensive requirement is satisfied by the following group of three courses: ECE 333, ECE 445, and ECE 491 in which faculty provide feedback on student writing assignments. Drafts and revisions are required.

**Termination from the Major**

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the “Termination from the Major” section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

**Double Major and Minor Programs for Electrical Engineering and Computer Engineering**

Electrical engineering majors and computer engineering majors can earn degrees with double majors in a number of disciplines. Computer engineering and computer science are frequently combined. Electrical engineering has been combined with computer engineering, computer science, physics or math. Details are available in the department brochures or at the Volgenau School web site volgenau.gmu.edu. There are several minors available for students in the ECE Department including the Mechanical Engineering minor.

**Bachelor/Accelerated Master's**

**Computer Engineering, BS/Computer Engineering, Accelerated MS**

School: *Volgenau School of Engineering*
Department: *Electrical and Computer Engineering*

The university offers highly-qualified students in the Computer Engineering, BS the option of obtaining an accelerated Computer Engineering, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.
Admission Requirements

Students in the Computer Engineering, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.25. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 120-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students admitted to the accelerated program must maintain an overall GPA of at least 3.25 during the entire BS/MS program and present a GPA of at least 3.25 for the 24 credits of graduate work submitted for the MS degree.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Electrical Engineering, BS/Electrical Engineering, Accelerated MS

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Electrical Engineering, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Electrical Engineering, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.25. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 120-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.
Students admitted to the accelerated program must maintain an overall GPA of at least 3.25 during the entire BS/MS program and present a GPA of at least 3.25 for the 24 credits of graduate work submitted for the MS degree.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Electrical Engineering, BS/Telecommunications, Accelerated MS

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Telecommunications, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.10 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Telecommunications Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.10 undergraduate GPA.

Accelerated Option Requirements

Students must complete 144 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 120-credit undergraduate program. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.00 during the MS program and present a GPA of at least 3.00 for the 24 credits of graduate work submitted for the MS degree.

Students should take 6 credits from the following:

- TCOM 535 - The TCP/IP Suite of Internet Protocols Credits: 3
- TCOM 551 - Digital Communication Systems Credits: 3
- or approved substitutions

Degree Conferral
Students must apply to have the BS in Electrical Engineering conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

**Individualized Study, BIS/Telecommunications, Accelerated MS**

School: *Volgenau School of Engineering*
Department: *Electrical and Computer Engineering*

Highly-qualified students in the Individualized Study, BIS have the option of obtaining an accelerated Telecommunications, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Admission Requirements**

Students in the Individualized Study, BIS program may apply for this option if they have earned 90 undergraduate credits (including 15 Mason resident credits) with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

**Accelerated Option Requirements**

Students must complete all requirements for the BIS and MS programs, with 6 credits overlap.

Students select TCOM courses from the list below to meet the requirements of the accelerated program. Six credits of TCOM courses will be applied to meet the requirements of both the BIS and MS TCOM programs. An additional three credits of TCOM courses is required for the BIS Individualized Concentration (IND) with emphasis on telecommunication. Note that accelerated students can only take the courses in the list below if they passed the listed prerequisite course with a B or higher.

**BIS Concentration: 34-46 credits**

Students who are pursuing the Individualized Study, BIS, Individualized concentration (IND) with an emphasis on telecommunications must take:

- Additional 500-level TCOM course(s) from the list below. Credits: 3
- BIS 300 - Understanding Interdisciplinary Studies Credits: 3
- BIS 390 - The Research Process Credits: 3
- BIS 490 - RS: Senior Project Credits: 3
- BIS 491 - Senior Project Presentation Credits: 1
- ECE 301 - Digital Electronics Credits: 3
- IT 341 - Data Communications and Network Principles Credits: 3
- TCOM 500 - Modern Telecommunications Credits: 3
- Additional courses related to telecommunication*: Credits: 9-21
  
*Required to reach the necessary number of credits for the BIS Individualized concentration.

**Telecommunications courses:**
• TCOM 500 - Modern Telecommunications Credits: 3
• TCOM 505 - Networked Multicomputer Systems Credits: 1.5
• TCOM 510 - Client-Server Architectures and Applications Credits: 1.5
• TCOM 530 - Data Communications Fundamentals Credits: 3
• TCOM 535 - The TCP/IP Suite of Internet Protocols Credits: 3
• TCOM 551 - Digital Communication Systems Credits: 3
• TCOM 607 - Satellite Communications Credits: 3
• TCOM 608 - Optical Communications Systems Credits: 3
• TCOM 631 - Voice Over IP Credits: 3

Note:

Accelerated students who have passed IT 341 with a grade of B or higher will not be required to take TCOM 530 in the Telecommunications, MS core. Other TCOM courses may be approved on a case-by-case basis.

See each course for individual prerequisite requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BIS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/Computer Forensics, Accelerated MS

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Computer Forensics, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Information Technology, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Computer Forensics, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with two of the following three courses:

• CFRS 500 - Introduction to Forensic Technology and Analysis Credits: 3
- **CFRS 510** - Digital Forensics Analysis Credits: 3 (satisfies the IT 357 requirement for the INFS concentration in the BS program)
- **CFRS 660** - Network Forensics Credits: 3 (satisfies as one NTEL concentration course in the BS program)

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Information Technology, BS/Telecommunications, Accelerated MS**

School: *Volgenau School of Engineering*
Department: *Electrical and Computer Engineering*

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Telecommunications, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Admission Requirements**

Students in the Information Technology, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs.

Choose six credits from the following courses (the TCOM courses listed for 1.5 credits must be taken in pairs):

- **TCOM 500** - Modern Telecommunications Credits: 3 (To satisfy the IT 300 BS, AIT requirement)
- **TCOM 530** - Data Communications Fundamentals Credits: 3 (To satisfy the IT 341 BS, AIT requirement)
- **TCOM 535** - The TCP/IP Suite of Internet Protocols Credits: 3 (To satisfy the IT 441 BS, AIT requirement)
- **TCOM 631** - Voice Over IP Credits: 3 (To satisfy the IT 484 BS, AIT requirement)

**Note:**

Students in the accelerated option who have passed IT 341 with a grade of B or higher will not be required to take TCOM 530, which is listed in the MS TCOM core. Alternative sections of TCOM courses to satisfy requirements in the AIT undergraduate program may be made with the approval of the undergraduate academic advisor.

**Degree Conferral**
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Systems Engineering, BS/Telecommunications, Accelerated MS**

School: *Volgenau School of Engineering*
Department: *Electrical and Computer Engineering*

Highly-qualified students in the Systems Engineering, BS have the option of obtaining an accelerated Telecommunications, MS. Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Admission Requirements**

Students in the Systems Engineering, BS program who preferably have chosen to take the systems engineering of telecommunications elective sequence may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Other students will be considered on their individual merit. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap selected from the following courses:

- TCOM 500 - Modern Telecommunications Credits: 3
- TCOM 530 - Data Communications Fundamentals Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- SYST 530 - Systems Engineering Management I Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3 (if taken, replaces TCOM 521 in the telecommunications core requirements)

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**Doctor of Philosophy**

**Electrical and Computer Engineering, PhD**

Banner Code: VS-PHD-ECE
School: Volgenau School of Engineering  
Department: Electrical and Computer Engineering

The PhD program in Electrical and Computer Engineering educates students to do original research on ECE topics and to become technical leaders in their fields. It has a strong and growing reputation, as graduates from the department have become professors at other universities and researchers in various industrial and government research centers. Students may choose a research emphasis in areas such as communications, networking, computer engineering, control and robotics, signal processing, micro/nano-electronics, and bioengineering. The ECE PhD program requires course work, a qualifying exam, a teaching assignment, a dissertation proposal and research competency exam, a research seminar, dissertation research, and a dissertation defense. Mason's general doctoral requirements apply to this program.

Admission Requirements

All general Mason and specific Volgenau School admission requirements apply. Applicants must submit official transcripts, a resume, a goals statement, three letters of recommendation and official GRE General Test results. The GRE requirement is waived for Mason ECE master's graduates with a 3.0 or greater GPA. Applicants whose native language is not English must demonstrate proficiency by taking the TOEFL or IELTS exam. The minimum score required for admission is 575 on the TOEFL paper-based exam, 230 on the TOEFL computer-based exam, 88 on the TOEFL internet-based exam (with a minimum of 20 in each section), or 6.5 on the IELTS exam. Application materials are reviewed by the ECE PhD committee, which makes a recommendation to the ECE department chair.

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master's degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Degree Requirements

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. More than half of the 72 credits applied to the doctoral degree must be earned at Mason. The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Doctoral Course Work (18-30 credits)

Courses that constitute a student's plan of study will be chosen in consultation with the student's advisor and/or dissertation committee, to include:

- 3 credits at the 600-level outside the department in a subject considered foundational for the area of emphasis.  
  *Typical examples are advanced mathematics or statistics courses for those pursuing an emphasis in communications, signal processing or control, physics courses for those desiring an emphasis in micro/nano-electronics, computer science courses for those pursuing the computer engineering emphasis, and biology courses for those pursuing a bioengineering emphasis. Because such courses are usually not taken for master's degrees, this requirement can rarely be satisfied with a course taken previously.*

- 6 credits within the department but outside the area of emphasis.  
  *This requirement may be satisfied with courses taken during previous studies, subject to approval.*

- A maximum of 6 credits may be at the 500-level*
A maximum of 6 credits of individualized reading courses at any level.

Note that ECE 798 - Research Project is primarily a master's level course and is not intended to be part of the PhD course work.

*For courses taken elsewhere, the equivalent levels are to be determined by the PhD advisor, subject to approval by the ECE Department chair.

Qualifying Exam

The ECE PhD Qualifying Exam tests students’ knowledge of fundamental concepts and assesses their basic research skills. The exam consists of two parts: a written technical qualifying exam and a research qualifying exam requiring a written report and a presentation.

Technical Qualifying Exam

The Technical Qualifying Exam (TQE) is an in-class written exam that tests knowledge of fundamental concepts in a particular technical area. Students select one of three topics for their TQE:

1. Topic 1: Signals and Systems
2. Topic 2: Digital Design and Computer Organization
3. Topic 3: Circuits, Electronics, and Devices

Students must take the Technical Qualifying Exam within the first year after they have entered the program. The TQE is typically offered in late August, prior to the start of the fall semester. Students who enter the PhD program in the spring semester may request to take the TQE in January; such a request must be filed by the end of the spring semester.

Research Qualifying Exam

The purpose of the Research Qualifying Exam (RQE) is to assess whether students can define a research problem, critically review the literature related to the problem, apply appropriate research methods to study the problem, and interpret and communicate their results. The RQE requires students to complete a short research project and to document their results in a written report and an oral presentation. The RQE topic is defined by a faculty advisor in consultation with the student. A committee of three faculty members (the advisor plus two additional members) evaluates the written report and the oral presentation. During the presentation the student is expected to answer questions about their project and about fundamental concepts related to the research.

Students who enter the program with an MS degree must take the RQE prior to completing 12 credits in the PhD program. Students who enter the program with a BS degree must take the exam prior to completing 30 credits in the program.

Evaluation

After a student has taken both the TQE and the RQE, the ECE PhD Committee reviews the exam results, the student’s transcript, and a letter of recommendation from the student’s advisor. Based on this information, the PhD Committee determines whether the student is qualified for the PhD program. If the student does not qualify on their first try, they may repeat one or both of the exams in the following year. The TQE and RQE may be repeated once. A student who fails to qualify on their second try is removed from the program.

Dissertation Research (12-24 credits)

A maximum of 24 credits of ECE 998 and ECE 999 may be applied to the degree. Students who choose to take fewer than 24 credits of ECE 998 and ECE 999 may earn the remaining credits from approved course work. Students cannot enroll in ECE 999 before they have advanced to candidacy. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for ECE 999. Students cannot advance to candidacy and defend their dissertation during the
same semester. Once enrolled in ECE 999, students must maintain continuous registration in ECE 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of ECE 999 during that summer term.

- ECE 998 - Doctoral Dissertation Proposal Credits: 1-12 (must complete a minimum of 9 credits)
- ECE 999 - Doctoral Dissertation Credits: 1-12 (must complete a minimum of 3 credits)

Advisor, Dissertation Director, and Dissertation Committee

The process of finding a dissertation topic and dissertation director is governed by the university’s policies, as described in the Requirements for Doctoral Degrees in the Academic Policies section of the catalog. Upon admission to the program, each student is assigned an ECE faculty member as an academic advisor. After the student passes the qualifying exam, the student proposes and the ECE department chair appoints a dissertation director who must be a Mason graduate faculty member with a full-time appointment. The dissertation director becomes the student’s academic advisor. Normally, the dissertation director is a member of ECE department; however, a member of another department may be appointed if warranted by the dissertation research topic. A dissertation committee should be formed within a year after the student has passed the qualifying exam. The dissertation committee consists of the dissertation director who acts as chair plus three or four additional members. All dissertation committees must include at least three members of the Mason graduate faculty, at least two of whom must be from the ECE Department. At least one member of the dissertation committee must be from outside the discipline of electrical and computer engineering. The outside member may be faculty from another Mason department or, if justified by the research topic, a qualified scientist or engineer from outside the university. All committee members must have a doctoral level degree. The dissertation committee must be approved by the ECE department chair. The dissertation director, as academic advisor, and the ECE Department chair must approve all decisions concerning a student's course requirements and dissertation.

Dissertation Proposal, Research Competency Exam, Advancement to Candidacy

The student prepares a written dissertation proposal outlining the proposed research and submits it to the dissertation committee for approval. After completing coursework requirements and preparing a proposal, the student takes a research competency exam to demonstrate their preparation for dissertation research. The exam consists of a presentation of the dissertation proposal followed by an oral exam. The exam is administered by the student's dissertation committee. The purpose of the oral exam is to verify that the student is familiar with the relevant material related to their research. The student is advanced to candidacy when he or she passes the oral exam and the dissertation committee approves the proposal.

Dissertation Research and Defense

Students conduct dissertation research under the guidance of their dissertation director, with regular consultation with other members of the dissertation committee. During this period, students must present their research results at least once in the form of a department seminar. The dissertation must represent an achievement in research, must be a significant contribution to its field, and should be deemed publishable in refereed journals or at highly selective conferences. On completion of the dissertation the student may be asked, at the discretion of the dissertation committee, to present a predefense in the presence of the committee members. The dissertation committee and the department chair approve the student’s application for a public defense of the doctoral dissertation. A copy of the dissertation must be placed in the University Libraries four weeks prior to the public defense. After a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of doctor of philosophy.

Teaching Requirement

To acquire teaching experience, each PhD student is required to participate in the department’s teaching activity. The requirement is typically satisfied by working as a recitation instructor for one semester, presenting several lectures within a course, or performing other teaching work approved by the department.
Total: 72 credits

Graduate Certificate

Advanced Networking Protocols for Telecommunications Graduate Certificate

Banner Code: VS-CERG-ANPT

College: Volgenau School of Engineering
Department: Electrical and Computer Engineering

This certificate provides an in-depth understanding of advanced protocols used in a variety of telecommunications networks.

The graduate certificate may be pursued on a part-time or full-time basis.

Certificate Requirements

To obtain the certificate students must complete the following for a total of 15 credits:

Core Courses (9 credits)

- TCOM 609 - Interior Gateway Protocol (IGP) Routing Credits: 3
- TCOM 610 - Border Gateway Protocol (BGP) Routing Credits: 3
  and 3 credits chosen from the following:
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
  or
- TCOM 535 - The TCP/IP Suite of Internet Protocols Credits: 3

Elective Courses (6 credits)

Choose from the following:

- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 535 - The TCP/IP Suite of Internet Protocols Credits: 3
- TCOM 611 - Multi-Protocol Label Switching (MPLS) Credits: 3
- TCOM 631 - Voice Over IP Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3

Note:
TCOM 515 and TCOM 535 cannot be taken twice. If a student takes TCOM 515 and TCOM 535 in the core element, the course(s) may not be taken again in the elective element.

Total: 15 credits

Communications and Networking Graduate Certificate

Banner Code: VS-CERG-CONE

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

This certificate provides graduate students with the opportunity to reach a demonstrated level of competence in communications and networking. Course work toward the graduate certificate may be used for credit toward the MS in electrical engineering or computer engineering; however, the certificate's primary purpose is to provide a well-defined body of knowledge for students who want to advance their understanding of modern communications but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

The certificate program in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

Certificate Requirements

The certificate is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three elective courses.

Foundation courses (6 credits):

- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3

Elective courses (9 credits):

After completing the foundation courses, students choose electives by taking three courses from the following:

- ECE 535 - Digital Signal Processing Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 567 - Optical Fiber Communications Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 633 - Coding Theory Credits: 3
Network Technologies and Applications Graduate Certificate

Banner Code: VS-CERG-NETT

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

The certificate provides a broad understanding of the technologies used in telecommunications networks and the various applications of telecommunications networks.

The graduate certificate may be pursued on a part-time or full-time basis.

To obtain the certificate, students must complete the following, for a total of 15 credits:

Certificate Requirements

Choose 9 credits from the following:

- TCOM 505 - Networked Multicomputer Systems Credits: 1.5
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5
- TCOM 535 - The TCP/IP Suite of Internet Protocols Credits: 3
- TCOM 555 - Network Management Foundations and Applications Credits: 3
- TCOM 631 - Voice Over IP Credits: 3
Elective Requirements (6 credits)

Six credits are required. Students may elect to take any additional 6 credits from the Telecommunications, MS emphasis areas 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

Total: 15 credits

Networks, System Integration and Testing Graduate Certificate

Banner Code: VS-CERG-NSIT

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

This certificate provides graduate students with the opportunity to reach a demonstrated level of competence in computer networks, system integration, and software testing. Course work toward the graduate certificate may be used for credit toward the MS in Electrical Engineering or Computer Engineering degrees; however, the certificate's primary purpose is to provide a well-defined program for students who want to advance their knowledge of modern networks, systems integration and testing, but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admissions Requirements

The networks, system integration, and testing certificate program is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities, with a GPA minimum established by The Volgenau School for all MS programs.

Certificate Requirements

The certificate is awarded on successful completion of five graduate courses (15 credits) from the list of courses given below. A cumulative GPA of 3.00 is required, at most one course with a grade of C may be applied toward the certificate, and no more than one, 3-credit graduate course in the appropriate discipline may be transferred into the certificate from an appropriately accredited program at another institute of higher learning.

The certificate in networks, systems integration, and testing consists of the following five, 3-credit courses:

- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 673 - Discrete Event Systems Credits: 3
- ECE 674 - System Architecture Design Credits: 3
- ECE 675 - System Integration and Arch. Evaluation Credits: 3
- SWE 637 - Software Testing Credits: 3

Total: 15 credits
Signal Processing Graduate Certificate

Banner Code: VS-CERG-SIGP

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

The Department of Electrical and Computer Engineering, in conjunction with the Department of Statistics, offers the certificate in signal processing, which provides graduate students with an opportunity to reach a demonstrated level of competence in signal processing. Course work for the graduate certificate can be used for credit toward the MS in Statistical Science as well as the MS in Electrical or Computer Engineering. However, the certificate's primary purpose is to provide a well-defined body of information for students who want to advance or update their knowledge in this fast-moving field, but who do not necessarily wish to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

The program is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities and hold graduate status (either degree or non-degree) in the Volgenau School.

Certificate Requirements

The certificate is awarded on completion of five graduate courses (15 credits) in signal processing. A cumulative GPA of 3.00 is required, and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two foundation courses taken by all students and three elective courses.

Foundation courses (6 credits):

- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3 or STAT 544 - Applied Probability Credits: 3
- ECE 535 - Digital Signal Processing Credits: 3

Elective courses (9 credits):

After completing the two foundation courses, students choose electives by taking three courses from the following list:

- ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
- ECE 621 - Systems Identification Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 635 - Adaptive Signal Processing Credits: 3
- ECE 722 - Kalman Filtering with Applications Credits: 3 or ECE 728 - Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 734 - Detection and Estimation Theory Credits: 3 or ECE 738 - Advanced Digital Signal Processing Credits: 3
- CSI 978 - Statistical Analysis of Signals Credits: 3
• CSI 672 or STAT 652 - Statistical Inference Credits: 3
• CSI 678 or STAT 658 - Time Series Analysis and Forecasting Credits: 3
  Any one of the following:
• ECE 751 - Information Theory Credits: 3
• ECE 754 - Optimum Array Processing I Credits: 3
• CS 775 - Advanced Pattern Recognition Credits: 3

Total: 15 credits

Tactical Computer Operations Graduate Certificate

Banner Code: VS-CERG-TCO

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

Tactical Computer Operations (TCO) is a discipline involving the offensive side of computer and forensics operations. Expertise in this field includes the ability to understand and work at the operating system kernel level, understand and work with shared libraries and application program interfaces, manipulation of network traffic at the frame level, network stack redirection, anti-forensic obfuscation, penetration engineering, and reverse engineering. Mobile devices have also opened up a plethora of offensive opportunities that needs to be understood and mastered in order to better protect and serve.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

Students applying to this certificate must hold a bachelor's degree in either computer science or computer engineering. Prospective students without these specific degrees will need to have a technical bachelor's degree and show academic competence in the areas of: C (C++, C#, Objective C), Assembler, discrete mathematics, and computer networking. An undergraduate grade point average (GPA) of 3.0 or better (4.0 scale) is required. The Graduate Record Exam (GRE) is not required.

Certificate Requirements

Students must meet prerequisites for courses by either taking the appropriate undergraduate courses or through instructor permission.

Certificate Courses (9 credits)

• CS 571 - Operating Systems Credits: 3
• ECE 511 - Microprocessors Credits: 3
• CFRS 761 - Malware Reverse Engineering Credits: 3

Elective Courses (6 credits)
Choose two courses from the following list:

- CFRS 767 - Penetration Testing in Computer Forensics Credits: 3
- CFRS 769 - Anti-Forensics Credits: 3
- CFRS 773 - Mobile Application Forensics and Analysis Credits: 3
- CFRS 775 - Kernel Forensics and Analysis Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ISA 564 - Security Laboratory Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3

Total: 15 credits

Telecommunications Forensics and Security Graduate Certificate

Banner Code: VS-CERG-TFAS

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

The objective of this certificate is to provide an in-depth understanding of security and forensics as they apply to networks and digital storage media.

The graduate certificate may be pursued on a part-time or full-time basis.

Certificate Requirements

Students must complete the following for a total of 15 credits:

Core Courses (9 credits):

Choose 9 credits from the following:

- TCOM 562 - Network Security Fundamentals Credits: 3
  or
- ISA 562 - Information Security Theory and Practice Credits: 3
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
  or
- TCOM 561 - Security, Privacy, and Applied Cryptography for Telecommunications Credits: 3
  One of the following:
- TCOM 660 - Network Forensics Credits: 3
- TCOM 661 - Digital Media Forensics Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3
Elective Courses (6 credits):

Choose 6 credits from the following:

- ISA 562 - Information Security Theory and Practice Credits: 3
- TCOM 660 - Network Forensics Credits: 3
- TCOM 661 - Digital Media Forensics Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3

Note:

TCOM 660, 661, 663, and 664 cannot be taken twice for credit. If any of these courses is taken in the core element, it cannot be taken again in the elective element.

Total: 15 credits

Wireless Communications Graduate Certificate

Banner Code: VS-CERG-WIRE

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

This certificate provides a broad understanding of the technologies, applications, and systems used in all forms of wireless communications.

The graduate certificate may be pursued on a part-time or full-time basis.

Certificate Requirements

Students must complete the following, for a total of 15 credits:

Core Courses (9 credits):

Choose 9 credits from the following:

- TCOM 551 - Digital Communication Systems Credits: 3
- TCOM 552 - Introduction to Mobile Communications Systems Credits: 3
- TCOM 606 - Advanced Mobile Communications Systems Credits: 3
- TCOM 607 - Satellite Communications Credits: 3
- TCOM 653 - Global Positioning System (GPS) Credits: 3
- TCOM 707 - Advanced Link Design Credits: 3
Elective Courses (6 credits):

- Six credits are required. Students may earn the credits from the Telecommunications, MS emphasis areas 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

Total: 15 credits

Master of Science

Computer Engineering, MS

Banner Code: VS-MS-CPE

School: Volgenau School of Engineering
Department: Electrical and Computer Engineering

Computer Engineering involves knowledge of hardware and software development. The students learn how to design new generations of computers, as well as embedded computing systems, such as those found in smartphones, cars, appliances, computer networks, smart factories, and the internet-of-things. The program covers the entire digital integrated circuit design process targeting Field Programmable Gate Arrays (FPGAs) and Application Specific Integrated Circuits (ASICs), using various optimization criteria, such as speed, cost, power, energy, reliability, and security. It also encompasses the complete software development process targeting microcontrollers, microprocessors, multi-cores, and Graphics Processing Units (GPUs). It teaches students how to efficiently partition the system into software and hardware components, and develop high-performance interfaces between these two parts. Project-oriented courses and labs expose students to modern computer-aided design tools for hardware and software design. The students master the art of writing comprehensive technical reports and giving successful oral presentations. The computer engineering program offers the following specialization areas: digital systems design, microprocessor and embedded systems, digital signal processing, computer networks, and network and system security.

Admission is very competitive. The department's policy is to admit only those students who have demonstrated a potential for outstanding performance in their graduate work.

An accelerated master's option is available to students in the bachelor's program. See Computer Engineering, BS/Computer Engineering, Accelerated MS for specific requirements.

Common Requirements for CPE or ELEN Master's Program

Admission

Categories of Admission

Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance
to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive a B or better in two core courses specific to the student’s selected program and specialization. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Requirements

To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Three letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
- Detailed statement of career goals and aspirations
- For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
- For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship.

Non-ECE Students

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.

Student Advising

Newly-admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select a specialization from those available in each MS degree program. Students then are assigned an academic advisor from that specialization.

GPA Requirements

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

Degree Requirements

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one specialized area of computer engineering; it cannot be a set of disjointed courses.

Plan of Study

Before the end of the second semester, each student must submit to the graduate coordinator's office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.
Two core courses (with B or better in each) from the following (6 credits):

- CS 571 - Operating Systems Credits: 3
- ECE 511 - Microprocessors Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 545 - Digital System Design with VHDL Credits: 3
- ECE 548 - Sequential Machine Theory Credits: 3

Minimum of 3 ECE or CS courses:

With a grade of B or better in each, at the 600 level and above (not including ECE 798 or 799), including doctoral courses (800 and 900 levels).

Electives

Elective courses should be chosen either from the list of pre-approved electives strongly suggested for a given specialization area or from the list of elective courses common for all specialization areas. Elective courses from the latter list must be approved by the student's advisor prior to the registration for a given course.

The plan of study usually has no fewer than 15 credits of courses designated ECE.

Lists of courses appropriate for specialization areas, such as digital systems design, microprocessor and embedded systems, digital signal processing, computer networks, and network and system security, are available on the ECE website. A self-defined specialization may be created when appropriate, with the approval of the computer engineering graduate program coordinator. This specialization must include components of hardware and software development and the corresponding plan of study should comprise courses from ECE and the Computer Science Departments.

Seminar Requirement

Graduate students are expected to participate actively in the exchange of knowledge and ideas in their discipline. Towards this objective, all degree candidates must attend a minimum of 6 graduate seminars approved for the degree program. Approved seminars are publicized on the departmental webpage.

To demonstrate completion of the seminar requirement, students must register for ECE 795 in their final semester. The department office will verify that the seminar requirement has been met and submit a grade of S (satisfactory) upon completion of the requirement. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 in subsequent semesters until the requirement is met.

Thesis/Scholarly Paper Option for CPE/ELEN Master's Program

To complete the program, students may select one of the following options:

Thesis Option

Students who select this option must complete ECE 799 - Master's Thesis (6 credits) and 24 credits of course work. The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor.
In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the electrical engineering program, this committee consists of at least three full-time faculty members, including two from the student’s major specialization, and one from outside the specialization. For the Computer Engineering Program, this committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering Program, one of whom must be from the ECE Department. Thesis students may not register for ECE 798 - Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

**Scholarly Paper Option**

Students who select to complete their degree program with a scholarly paper must:

- Complete 30 credits of course work
- Register for ECE 797 - Scholarly Paper
- Enroll in a 600-level or above course requiring a research project.
- Write a Scholarly Paper project report and present findings as part of the course requirements.

An acceptable scholarly paper must be technically sound, adhere to accepted formatting standards for technical reports, and contain a significant literature review evidenced by a comprehensive list of cited references.

A list of courses requiring projects that can be used to satisfy the scholarly paper requirement will be published on the department website. Scholarly papers must be individual written project reports – not group projects. To qualify as a scholarly paper an oral presentation of the project is required. A passing grade for the project, reflecting both the written report and the oral presentation, satisfies the scholarly paper requirement.

A successful scholarly paper will be recorded by awarding a satisfactory (S) grade for ECE 797 - Scholarly Paper. Students are eligible to attempt the scholarly paper and register for ECE 797 after completion of 18 hours of coursework. Students choosing the scholarly paper option are not eligible for graduation until they have received a final, passing grade for ECE 797.

**Total: 30 credits**

**Computer Forensics, MS**

**Banner Code:** VS-MS-CFRS

**School:** Volgenau School of Engineering

**Department:** Electrical and Computer Engineering

Computer forensics is a discipline addressing the collection, processing, and analysis of digital information so that this information can be admitted as evidence in a court of law. It is interdisciplinary in its nature with the inclusion of computer engineering, computer science, information technology, law, and ethics. Computer forensics is a key component in criminal, civil, intelligence, and counter-terrorism matters. In the last several years, with a proliferation of digital storage, transmission, and processing of sensitive information there has been an increase in the aberrant use of computers. This aberrant behavior includes but is not limited to: economic espionage, child exploitation, cybercrime, fraud, terrorism, and identity theft. In response to this, computer forensics has become an important profession serving both public and private sectors. The MS in Computer Forensics will prepare graduates for careers in law enforcement, various other branches of government, and in the corporate sector such as banking and finance by combining academic education with real world practical techniques and by offering advanced training in analyzing digital evidence, in intrusion forensics, and in legal and ethical issues.
An accelerated master's option is available to students in the information technology bachelor's program. See Information Technology, BS/Computer Forensics, Accelerated MS for specific requirements.

**Admission Requirements**

Students who hold a bachelor's degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines; or students who have equivalent work experience indicating analytical aptitude; may apply to the MS in Computer Forensics. Depending on their background, some applicants may be required to complete 3 to 12 credits of preliminary course work before they are allowed to enroll in any of the core courses or specialty courses in the program. A minimum undergraduate GPA of 3.00 is required for acceptance.

**Degree Requirements**

Students must complete a minimum of 30 graduate credits beyond the bachelor's degree with a GPA of 3.00 or higher, with no more than 6 credit hours of C grades. The plan of study includes an 18-credit required Core component which includes a mandatory capstone course, and the choice of either a concentration or a 12-credit elective component as shown below:

**Core Courses (18 credits):**

- CFRS 500 - Introduction to Forensic Technology and Analysis Credits: 3 * or ISA 562 - Information Security Theory and Practice Credits: 3
- CFRS 660 - Network Forensics Credits: 3
- CFRS 661 - Digital Media Forensics Credits: 3
- CFRS 663 - Operations of Intrusion Detection for Forensics Credits: 3 or CFRS 664 - Incident Response Forensics Credits: 3
- CFRS 760 - Legal and Ethical Issues in IT Credits: 3 ** or CFRS 770 - Fraud and Forensics in Accounting Credits: 3 **
- CFRS 790 - Advanced Computer Forensics Credits: 3

▲**Concentration in Penetration Testing/Reverse Engineering (PTRE)**

Focused on the practical aspects of penetration testing and reverse engineering. Students are expected to master tools, techniques, and methodologies of penetration testing and reverse engineering.

- CFRS 761 - Malware Reverse Engineering Credits: 3
- CFRS 767 - Penetration Testing in Computer Forensics Credits: 3
- CFRS 730 - Forensic Deep Packet Inspection Credits: 3
- CFRS 772 - Forensic Artifact Extraction Credits: 3 or CFRS 775 - Kernel Forensics and Analysis

**Elective courses (12 credits):**

Students who do not choose the above concentration should complete 12 credits chosen from the following:

- CFRS 510 - Digital Forensics Analysis Credits: 3
- CFRS 590 - Special Topics in Computer Forensics Credits: 3
- CFRS 663 - Operations of Intrusion Detection for Forensics Credits: 3
- CFRS 664 - Incident Response Forensics Credits: 3
- CFRS 698 - Independent Reading and Research Credits: 1-3
- CFRS 730 - Forensic Deep Packet Inspection Credits: 3
- CFRS 760 - Legal and Ethical Issues in IT Credits: 3 **
- CFRS 761 - Malware Reverse Engineering Credits: 3
- CFRS 762 - Mobile Device Forensics Credits: 3
- CFRS 763 - Registry Forensics - Windows Credits: 3
- CFRS 764 - Mac Forensics Credits: 3
- CFRS 767 - Penetration Testing in Computer Forensics Credits: 3
- CFRS 768 - Digital Warfare Credits: 3
- CFRS 769 - Anti-Forensics Credits: 3
- CFRS 770 - Fraud and Forensics in Accounting Credits: 3 **
- CFRS 771 - Digital Forensic Profiling Credits: 3
- CFRS 772 - Forensic Artifact Extraction Credits: 3
- CFRS 773 - Mobile Application Forensics and Analysis Credits: 3
- CFRS 775 - Kernel Forensics and Analysis Credits: 3
- CFRS 780 - Advanced Topics in Computer Forensics Credits: 3
- ECE 511 - Microprocessors Credits: 3
- ECE 611 - Advanced Microprocessors Credits: 3
- ECE 612 - Real-Time Embedded Systems Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3
- FRSC 510 - Basic Crime Analysis Credits: 3

Please note:

*It is recommended that CFRS 500 be taken for those with little to no experience in computer forensics.

**Both CFRS 760 and CFRS 770 may be taken but only one may be used in the core component.

Other courses may be appropriate as elective courses in the degree program, but they must be approved prior to registration.

Total: 30 credits

**Electrical Engineering, MS**
The electrical engineering program offers the following specialization areas: bioengineering, communications and networking, signal processing, control and robotics, microelectronics/nanoelectronics, and system architectures.

An accelerated master's option is available to students in the bachelor's program. See Electrical Engineering, BS/Electrical Engineering, Accelerated MS for specific requirements.

Common Requirements for CPE or ELEN Master's Program

Admission

Categories of Admission

Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive a B or better in two core courses specific to the student’s selected program and specialization. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Requirements

To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Three letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
- Detailed statement of career goals and aspirations
- For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
- For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship.

Non-ECE Students

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.

Student Advising
Newly-admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select a specialization from those available in each MS degree program. Students then are assigned an academic advisor from that specialization.

**GPA Requirements**

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

**Degree Requirements**

Students must complete a minimum of 30 graduate credits beyond the bachelor's degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one area; it cannot be a set of disjointed courses. The plan of study for the degree must include the following:

**Plan of Study**

Before the end of the second semester, each student must submit to the graduate coordinator’s office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

**Two core courses, with a B or better in each, from the following (6 credits):**

- ECE 521 - Modern Systems Theory Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 548 - Sequential Machine Theory Credits: 3 or ECE 511 - Microprocessors Credits: 3
- ECE 584 - Semiconductor Device Fundamentals Credits: 3 or ECE 565 - Introduction to Optical Electronics Credits: 3

**At least 3 upper level courses:**

Students must complete a coherent set of courses, including a minimum of three courses, with a B or better in each, at the 600 level or above (not including ECE 798 or ECE 799). For guidance for selecting a coherent set of courses, students are referred to the courses listed for each of the program's specialization areas listed on the ECE website.

**Note:**

A maximum of 6 credits of non-ECE courses may be used, subject to prior department approval.

**Seminar Requirement**

Graduate students are expected to participate actively in the exchange of knowledge and ideas in their discipline. Towards this objective, all degree candidates must attend a minimum of 6 graduate seminars approved for the degree program. Approved seminars are publicized on the departmental webpage.

To demonstrate completion of the seminar requirement, students must register for ECE 795 in their final semester. The department office will verify that the seminar requirement has been met and submit a grade of S (satisfactory) upon completion.
of the requirement. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 in subsequent semesters until the requirement is met.

Thesis/Scholarly Paper Option for CPE/ELEN Master's Program

To complete the program, students may select one of the following options:

Thesis Option

Students who select this option must complete ECE 799 - Master's Thesis (6 credits) and 24 credits of course work. The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the electrical engineering program, this committee consists of at least three full-time faculty members, including two from the student’s major specialization, and one from outside the specialization. For the Computer Engineering Program, this committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering Program, one of whom must be from the ECE Department. Thesis students may not register for ECE 798 - Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

Scholarly Paper Option

Students who select to complete their degree program with a scholarly paper must:

- Complete 30 credits of course work
- Register for ECE 797 - Scholarly Paper
- Enroll in a 600-level or above course requiring a research project.
- Write a Scholarly Paper project report and present findings as part of the course requirements.

An acceptable scholarly paper must be technically sound, adhere to accepted formatting standards for technical reports, and contain a significant literature review evidenced by a comprehensive list of cited references.

A list of courses requiring projects that can be used to satisfy the scholarly paper requirement will be published on the department website. Scholarly papers must be individual written project reports – not group projects. To qualify as a scholarly paper an oral presentation of the project is required. A passing grade for the project, reflecting both the written report and the oral presentation, satisfies the scholarly paper requirement.

A successful scholarly paper will be recorded by awarding a satisfactory (S) grade for ECE 797 - Scholarly Paper. Students are eligible to attempt the scholarly paper and register for ECE 797 after completion of 18 hours of coursework. Students choosing the scholarly paper option are not eligible for graduation until they have received a final, passing grade for ECE 797.

Total: 30 credits

Telecommunications, MS

Banner Code: VS-MS-TCOM
School: Volgenau School of Engineering  
Department: Electrical and Computer Engineering

The innovative, interdisciplinary MS in Telecommunications Program provides a blend of cutting-edge engineering-oriented courses in wireless and fiber communications systems, networks, computers, and Internet protocols, combined with courses on telecommunications policy, legal, business, and international aspects. The interdisciplinary program is designed for students who wish to enter the field of telecommunication or are working in the field and want to advance their knowledge of telecommunications. It concentrates on practical applications of telecommunications rather than on a theoretical approach. It focuses on the engineering and IT aspects of telecommunications, in combination with the interdisciplinary knowledge offered by selected courses in telecommunications business and policy. More than 30 new engineering and IT courses have been designed especially for this program, including four certificate programs that may be incorporated into, and taken concurrently with, the MS in telecommunications.

A novelty of the program is its structure, which consists of four emphasis areas. This structure allows students to identify more clearly the various specialties in telecommunications technology. Students enjoy considerable flexibility because they are able to design their master's programs to fit their technical preferences, including the option of taking courses in other programs at Mason. A majority of the course material comes from the Electrical and Computer Engineering (ECE) Department and the Systems Engineering and Operations Research (SEOR) Department. Courses offered by ECE focus on network technologies, such as fiber optics, and Internet protocols; network applications, such as networked multicomputer systems, client-server architectures, and network management; and wireless communications, such as digital communications, satellite communications, mobile communications, and GPS. Unique courses in the telecommunications program, such as Border Gateway Protocols, Interior Gateway Protocols, MPLS, GPS, and Advanced Link Design, complement courses given in ECE programs. In addition to the many new telecommunications courses developed for this program, ECE already offers a number of other graduate courses in communications as part of the graduate electrical engineering and computer engineering programs. Those courses may also be taken for credit under the MS in Telecommunications Program, provided students have the prerequisite background. Courses related to systems engineering, project management, and business of telecommunications (including the design and optimization of large, complex communication networks) are offered by SEOR. Both SEOR fields, systems engineering and operations research, play significant roles in all aspects of the design, operation, and business of telecommunications, and this knowledge is important for students of telecommunications. The blend of in-depth knowledge of specific elements of telecommunications technology, combined with knowledge of broader issues in telecommunications, is increasingly necessary for people who intend to work in a management or decision-making position within the telecommunications industry, telecommunications-related businesses, or government institutions dealing with telecommunications. The MS in telecommunications provides that blend.

An accelerated master's option is available to students in the information technology, electrical engineering, individualized study, or systems engineering bachelor's programs. See each listing for specific requirements.

Program Format

The program consists of 9 credits of mandatory engineering and technology core courses (TCOM 500, TCOM 530 and TCOM 521); 6 credits of electives drawn from an interdisciplinary group of core courses (PUBP 726, TCOM 547, or TCOM 750), and a basic switching lecture and laboratory course (TCOM 514) or an Internet protocol routing lecture and laboratory course (TCOM 515); and four areas of emphasis. Students who enter the program with an undergraduate degree that shows evidence of successfully completing LAN and WAN technologies may substitute TCOM 535 for TCOM 530 in their mandatory core program, respectively.

Students must complete 30 credits of course work through a combination of core and emphasis courses. The core consists of 15 credits, with the remaining 15 credits earned in areas of emphasis. The emphases are sub-areas of telecommunications that provide necessary depth.

Students are usually expected to take courses from at least two emphasis areas. Up to 6 credits from the core program may be carried forward into the emphases, thus permitting up to 6 credits of electives to be taken inside or outside the prime emphasis area chosen by the student. TCOM 530 may be carried forward into emphasis area 1, 2, or 3; TCOM 521 may be carried forward into emphasis area 4. Double counting is not permitted, but the courses carried forward into a given emphasis may permit that...
area's credit requirement to be satisfied, thus allowing elective courses to be taken outside that area. Usually, a minimum of 6 credits is needed to satisfy one emphasis area.

**Admission Requirements**

Courses are open to students who hold a BS or BA degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, and students who have equivalent work experience indicating analytical aptitude. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary course work before they are allowed to enroll in any of the core courses or emphasis courses in the program. Applicants who have not studied mathematics beyond the equivalent of algebra II/trigonometry at high school or introductory calculus classes (such as those offered in business or database management programs) will be required to take TCOM 575, the foundation course that prepares students for TCOM 500, prior to being allowed to take TCOM 500. A minimum undergraduate GPA of 3.00 is usually required.

Students may be admitted to the MS program as degree seeking students, or they may be admitted for nondegree study within the program, which allows them to take individual courses. Students in the nondegree program may apply to the degree program, provided their GPA within the MS in Telecommunications Program is 3.00 or above. Up to 12 credits earned in nondegree study may be transferred into the degree program, provided each of the courses to be transferred in was passed with a grade of B or above.

**Degree Requirements**

Students must complete a minimum of 30 graduate credits with a GPA of 3.00 or higher. Students must earn a B (3.00) or above in core courses TCOM 500, TCOM 521 and TCOM 530. Up to 6 credits of a combination of C grades may be carried within the program from the remaining core courses or from the emphasis courses, provided the overall GPA is 3.00 or higher.

The plan of study includes the following:

**15 credits of core courses, subject to the following constraints:**

**Required Courses (9 credits)**

- TCOM 500 - Modern Telecommunications Credits: 3
- TCOM 521 - Systems Engineering for Telecommunications Management Credits: 3
- TCOM 530 - Data Communications Fundamentals Credits: 3
  or
- TCOM 535 - The TCP/IP Suite of Internet Protocols Credits: 3 *

**Note:**

*Students must receive prior permission to substitute TCOM 535 for TCOM 530.

**Elective core courses (6 credits selected from the following):**
- PUBP 726 - Telecommunications Policy Credits: 3
- TCOM 514 - Basic Switching: Lecture and Laboratory Course Credits: 3 *
  or
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3 *
- TCOM 547 - Project Management in Telecommunications Credits: 3
- TCOM 750 - Coordinating Seminar Credits: 3

Note:

*Both TCOM 514 and TCOM 515 may be taken for credit, but only one may be used to satisfy a core elective requirement.

Students must take a minimum of 15 credits of courses listed under the following areas of emphasis:

Students usually take 15 credits from at least two of the four emphasis areas, or they may elect to take all 15 credits from the systems engineering of telecommunications area (emphasis 4). Students electing to carry forward a core course (TCOM 530 or TCOM 521) into an appropriate emphasis area have the option of taking an elective course in that area or an alternate area to bring the total number of credits in the emphasis area to 15.

An area of emphasis can be completed by courses listed under the emphasis or considered applicable to that area for a total of at least 6 credits. Some emphasis courses are in more than one area; for example, TCOM 535 is in emphasis 1, network technologies, and emphasis 2, network applications.

Basic courses in each emphasis have been specially designed for the telecommunications program. These courses do not require completion of prerequisites from other MS programs in the Volgenau School. Other courses, which are marked with asterisks, are from other MS programs in the Volgenau School and represent viable options for students who have appropriate prerequisites in some technical areas. Although these courses assume certain prerequisites from their specific MS programs, advanced students who already know the prerequisite material can seek instructor permission to enroll in those courses.

Alternatives to completing each emphasis area by using appropriate combinations of courses not listed under a given module may be admissible subject to prior approval by the program director. In addition, independent study, reading, and research courses may be taken in all five areas. These courses permit students to make use of their work experiences to undertake non-classroom courses for credit within the program.

Mason has negotiated an articulation agreement with the University of Virginia that allows up to 12 credits of the Informational Systems Management Certificate Program from the University of Virginia to be transferred into emphasis area 4 of the TCOM Program. In addition, graduate students from the National Defense University (NDU) may transfer up to 9 credits from NDU's Information Security Certificate Program.

A capstone project course, TCOM 699, is required under the systems engineering of telecommunications area (emphasis 4) should the student elect to take all 15 credits in this area.

Areas of Emphasis

Courses listed below from other graduate programs in the Volgenau School listed can be taken for credit in this program if the student has the appropriate prerequisites. Other courses from other programs may be taken for credit, with prior approval.

Emphasis 1, Network Technologies
Emphasis 2, Network Applications

- TCOM 505 - Networked Multicomputer Systems Credits: 1.5
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 535 - The TCP/IP Suite of Internet Protocols Credits: 3
- TCOM 551 - Digital Communication Systems Credits: 3
- TCOM 561 - Security, Privacy, and Applied Cryptography for Telecommunications Credits: 3
- TCOM 562 - Network Security Fundamentals Credits: 3
- TCOM 608 - Optical Communications Systems Credits: 3
- TCOM 609 - Interior Gateway Protocol (IGP) Routing Credits: 3
- TCOM 610 - Border Gateway Protocol (BGP) Routing Credits: 3
- TCOM 631 - Voice Over IP Credits: 3
- TCOM 660 - Network Forensics Credits: 3
- TCOM 661 - Digital Media Forensics Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
- ECE 643 - Network Switching and Routing Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3
Emphasis 3, Wireless Communications

- TCOM 551 - Digital Communication Systems Credits: 3
- TCOM 552 - Introduction to Mobile Communications Systems Credits: 3
- TCOM 562 - Network Security Fundamentals Credits: 3
- TCOM 606 - Advanced Mobile Communications Systems Credits: 3
- TCOM 607 - Satellite Communications Credits: 3
- TCOM 653 - Global Positioning System (GPS) Credits: 3
- TCOM 660 - Network Forensics Credits: 3
- TCOM 707 - Advanced Link Design Credits: 3
- ECE 732 - Mobile Communication Systems Credits: 3
- ECE 741 - Wireless Networks Credits: 3

Emphasis 4, Systems Engineering of Telecommunications

This area of emphasis can be taken as one of two emphases or as one 15-credit emphasis. No more than two SYST courses can be taken within this area.

- TCOM 547 - Project Management in Telecommunications Credits: 3
- TCOM 561 - Security, Privacy, and Applied Cryptography for Telecommunications Credits: 3
- TCOM 699 - Telecommunications Project Course Credits: 3
- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- ITRN 772 - International Telecommunications Credits: 3

Total: 30 credits

Applicable BS/Accelerated MS in Telecommunications Programs

These degree programs may be taken as part of an accelerated MS in Telecommunications Program with four undergraduate degree programs: BS in electrical engineering, systems engineering, information technology, and individualized studies. See respective undergraduate degree information for details.

Systems Engineering, BS/Telecommunications, Accelerated MS

Information Technology, BS/Telecommunications, Accelerated MS
Telecommunications Certificates

Four 15-credit certificates are offered by the MS in TCOM Program. Students may pursue these certificates as stand-alone programs or as part of their degree program. For the former, they are required to submit a graduate program application indicating their desire to enroll in the appropriate graduate certificate program. For the latter, because they are already enrolled in a degree program, they need only add the appropriate graduate certificate to their graduate program status at least one semester prior to the award of the certificate. The courses within the certificates are drawn directly from the MS in TCOM Program. If a student initially signs up for only a certificate program, it is possible to transfer into the degree program later, transferring up to 12 credits into the degree program. Students must therefore ensure they have transferred into the degree program prior to starting course work beyond 12 credits in the certificate program to ensure that all credits from the certificate program may transfer into the degree program. Students who transfer from a certificate program into the degree program may earn the certificate and the degree on satisfactory completion of the respective requirements. Applicable courses may count for the certificate and the degree programs.

Students may transfer in one 3-credit course from another program or institution toward their TCOM certificate, provided the course in question was passed with a B grade or higher. Students are permitted to carry one C grade within their certificate program, provided the overall GPA is 3.00 or above.

Network Technologies and Applications Graduate Certificate
Telecommunications Forensics and Security Graduate Certificate
Wireless Communications Graduate Certificate

Information Sciences and Technology

Phone: 703-993-3565
Web: ist.gmu.edu

School: Volgenau School of Engineering

Faculty

Professors: Gantz (retired), Jajodia

Associate professors: Boicu, Bruno, Caraballo, Islam (Associate Chair for Undergraduate Studies), Johri, Rytikova, Sanghera, Snow (Associate Chair for Graduate Studies), Wang D.

Assistant professors: Albanese, Bono, Morikawa, Motti, Purohit, Rafatirad, Winston

Instructors: Farrell, Garrison, Lyons, Quinn, Winston

Information Sciences and Technology offers undergraduate and graduate programs to develop expertise in applying information technology to support business applications. The programs emphasize problem-solving, communication, and technical and leadership skills.

The BS in Information Technology program aims to meet the existing and emerging needs of industry by educating students in current principles and practices in the application of information technology. The program focuses on equipping graduates with effective skills for interacting at the management level as well as the technical level. Graduates are hired in positions that focus on the application of IT in an increasing number of emerging sub-disciplines, including network administration and telecommunications, information security, web development and multimedia, database technology and programming, and health information technology.

The MS in AIT emphasizes elements of productive, effective and ethical leadership of major IT projects, in both the federal and private sectors. The MS also offers a unique research concentration for students interested in research careers or advanced graduate studies. At the doctoral level, the department offers a concentration in the Volgenau School’s PhD in IT program.

The purpose of the MS in Homeland Security Technology program (Pending SCHEV Approval) is to raise and broaden awareness of the core elements of 21st century engineering and technology so graduates are able to lead their homeland security organizations to create seamlessly interoperable, sensor-to-decision, mission systems.

The department also offers two certificate programs, IT entrepreneurship and information technology, for students seeking to add an IT certification to their existing credentials. Students currently pursuing undergraduate degrees in other disciplines may choose to add a minor in IT.

Courses

The IST Department offers undergraduate courses 100 - 499 with the IT prefix and graduate courses 500 - 899 with the AIT prefix in the Courses section of this catalog.

Bachelor of Science

Information Technology, BS

Banner Code: VS-BS-INFT

School: Volgenau School of Engineering
Department: Information Sciences and Technology

The Information Technology, BS prepares students to apply IT to support business processes. The degree produces graduates with strong problem-solving, writing, and communication skills who successfully compete for technical employment and are prepared for advanced study. The objectives of the Information Technology, BS program relate to the abilities of the graduates several years after graduation. Graduates of the program are expected within three to five years of graduation to have:

- Been employed in a position in which they have successfully used their information technology skills (including: problem solving, analytic, presentation and personal skills) as evidenced by achieving improved organizational objectives;
- Progressed through increasing levels of responsibility in the workplace;
- Demonstrated ethical, social and professional responsibility consistent with professional societies;
- Worked effectively in teams, whether as a participant or as a leader;
• Grown through self-study, continuing education and professional development relevant to their profession. This Information Technology, BS program is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

The program can be successfully completed in eight full-time semesters with an average of 15 credits each semester. It is also possible for students to complete the degree on a part-time basis. The 120-credit degree requirement consists of Mason Core requirements, IT foundation and core courses, and courses required for the chosen IT concentration. At least 30 credits toward the BS degree must be earned at Mason, and at least 45 credits must be at or above the 300 level. Upper division courses in the program are taught at the Science and Technology campus, where many Department of Information Sciences and Technology faculty offices are located.

This undergraduate program offers students the option of applying to an accelerated master's degree program in applied information technology, computer forensics, information security and assurance, information systems, software engineering, or telecommunications. See each listing for specific requirements.

Admission Requirements

Students who meet Mason's general eligibility requirements may apply for admission to the IT major. Admission is based on the appropriateness of the student's academic objectives and the likelihood of the student benefiting from the program. Preference in admission is given to students who have four years of high school mathematics, including precalculus.

Degree Requirements

Students must fulfill all requirements for undergraduate programs. Requirements of the Information Technology, BS degree include those of Mason Core; of the IT core, foundation, concentration, and capstone; and completion of a block of additional required courses.

Foundation Courses (21 credits)

• IT 102 - Discrete Structures Credits: 3 OR MATH 125 - Discrete Mathematics I Credits: 3
• IT 104 - Introduction to Computing Credits: 3
• IT 105 - IT Architecture Fundamentals Credits: 3
• IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3
• IT 206 - Object Oriented Techniques for IT Problem Solving Credits: 3
• IT 216 - Systems Analysis and Design Credits: 3
• STAT 250 - Introductory Statistics I Credits: 3

Core Courses (33 credits)

• IT 207 - Applied IT Programming Credits: 3
• IT 213 - Multimedia and Web Design Credits: 3
• IT 214 - Database Fundamentals Credits: 3
• IT 223 - Information Security Fundamentals Credits: 3
• IT 300 - Modern Telecommunications Credits: 3
• IT 304 - IT in the Global Economy Credits: 3
• IT 341 - Data Communications and Network Principles Credits: 3
• IT 342 - Operating Systems Fundamentals Credits: 3  
• IT 343 - IT Project Management Credits: 3  
• MBUS 300 - Accounting in a Global Economy Credits: 3  
• SYST 469 - Human Computer Interaction Credits: 3

Two-semester sequence of approved capstone design courses (7 credits)

• IT 492 - Senior Design Project I Credits: 3  
• IT 493 - Senior Design Project II Credits: 4

Information Technology Concentrations (15 credits)

Students choose one of six concentrations from the list below. To be eligible to choose a concentration, a student must have a B or better grade in the concentration's gateway course. Concentration gateway courses are as follows:

**Database Technology and Programming (DTP):** IT 206 - Object Oriented Techniques for IT Problem Solving or IT 214 - Database Fundamentals

**Health Information Technology (HIT):** IT 214 - Database Fundamentals

**Information Security (INFS):** IT 223 - Information Security Fundamentals

**Information Technology Entrepreneurship (ITE):** IT 106 - Introduction to IT Problem Solving Using Computer Programming

**Networking and Telecommunications (NTEL):** IT 341 - Data Communications and Network Principles

**Web Development and Multimedia (WDM):** IT 213 - Multimedia and Web Design

To fulfill the requirements for a concentration, students need 15 credits made up of four courses from their chosen concentration and a fifth course chosen from any of the six concentrations. All concentration courses require a grade of B or better in the prerequisite gateway course.

Students may choose to have two concentrations. To be eligible, the student must have a B or better in the gateway course for each concentration. If two concentrations are declared, the student must take four courses in each concentration, for a total of eight concentration courses.

▲ Database Technology and Programming (DTP)

• IT 306 - Program Design and Data Structures Credits: 3  
• IT 308 - Event-Driven Programming Credits: 3  
• IT 314 - Database Programming Credits: 3  
• IT 315 - Mobile Development Credits: 3  
• IT 322 - Health Data Challenges Credits: 3  
• IT 344 - Information Storage and Management Technologies Credits: 3  
• IT 369 - Data and Application Security Credits: 3  
• IT 390 - Rapid Development of Scalable Applications Credits: 3
- IT 410 - Web Programming Credits: 3
- IT 414 - Database Administration Credits: 3
- IT 490 - Application Maintenance and Spiral Development Credits: 3

▲ Health Information Technology (HIT)

- HAP 360 - Introduction to Health Information Systems Credits: 3
- IT 322 - Health Data Challenges Credits: 3
- IT 324 - Health Information Technology Fundamentals Credits: 3
- IT 390 - Rapid Development of Scalable Applications Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3

▲ Information Security (INFS)

- IT 353 - Information Defense Technologies Credits: 3
- IT 357 - Computer Crime, Forensics, and Auditing Credits: 3
- IT 366 - Network Security I Credits: 3
- IT 369 - Data and Application Security Credits: 3
- IT 429 - Security Accreditation of Information Systems Credits: 3
- IT 462 - Information Security Principles Credits: 3
- IT 466 - Network Security II Credits: 3
- IT 467 - Network Defense Credits: 3

▲ Information Technology Entrepreneurship (ITE)

- IT 315 - Mobile Development Credits: 3
- IT 390 - Rapid Development of Scalable Applications Credits: 3
- IT 490 - Application Maintenance and Spiral Development Credits: 3
- IT 495 - Turning Ideas into Successful Companies Credits: 3
- IT 496 - Decision Making in IT Ventures Credits: 3
- MBUS 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3

▲ Network and Telecommunications (NTEL)

- ECE 301 - Digital Electronics Credits: 3
- IT 366 - Network Security I Credits: 3
- IT 441 - Network Servers and Infrastructures Credits: 3
- IT 445 - Advanced Networking Principles Credits: 3
- IT 455 - Wireless Communications and Networking Credits: 3
- IT 465 - Peer-to-Peer Systems and Overlay Networks Credits: 3
- IT 484 - Voice Communications Technologies Credits: 3
- IT 488 - Fundamentals of Satellite Communications Credits: 3
## Web Development and Multimedia (WDM)

- IT 315 - Mobile Development Credits: 3
- IT 331 - Web I: Web Development Credits: 3
- IT 332 - Web Server Administration Credits: 3
- IT 335 - Web Development using Content Management Systems Credits: 3
- IT 390 - Rapid Development of Scalable Applications Credits: 3
- IT 415 - Information Visualization Credits: 3
- IT 431 - Web II: Advanced Web Development Credits: 3
- IT 436 - Agile Web Development with Open Source Frameworks Credits: 3

## Other Major Requirements (14-15 credits)

- Natural Science: 7 credits of natural science, including at least one 4-credit course with lab. Students should choose these from the list of courses approved for Mason Core (these credits can also apply toward Mason Core requirements).
- COMM 100 - Public Speaking Credits: 3 OR COMM 101 - Interpersonal and Group Interaction Credits: 3
- IT 293 - Applied IT: Junior Transition Credits: 1
- MATH 108 - Introductory Calculus with Business Applications Credits: 3 OR MATH 113 - Analytic Geometry and Calculus I Credits: 4

## Additional Mason Core (21 credits)

Students must complete all Mason Core requirements not fulfilled by major requirements.

- Written Communication: 6 credits
- Literature: 3 credits
- Arts: 3 credits
- Western Civilization/World History: 3 credits
- Social and Behavioral Science: 3 credits
- Global Understanding: 3 credits

## Writing-Intensive Requirement

The university writing-intensive requirement is satisfied by IT 343.

## Electives (8-9 credits)

Students must complete additional coursework to bring their total number of credits to 120.

## Note:

All students must complete at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed above, including COMM 100 or COMM 101.
Change of Major

Mason students considering a change of major to Information Technology must have a cumulative GPA of at least 3.00 in all completed Information Technology foundation and core courses required for the major, and a grade of C or better in IT 106.

Note: IT 300 and 400 level courses are restricted to students who have declared an Information Technology major, minor, or undergraduate certificate, and to students in the BAS or BIS program.

Advanced Study

Mason offers students the ability to complete both BS and MS degrees in a shorter time through an Accelerated Masters (MS) program. Choosing to pursue an accelerated MS may affect a student’s choice of courses in the BS program. Students should consult with an advisor for assistance.

Grades

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the BS in Information Technology, students must have a GPA of 2.75 or better across the IT foundation, core, capstone, and concentration courses. Additionally, students must have a C or better in their foundation, core, capstone, and concentration courses.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the “Termination from the Major” section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Bachelor/Accelerated Master’s

Individualized Study, BIS/Applied Information Technology, Accelerated MS
Highly-qualified students in the Individualized Study, BIS have the option of obtaining an accelerated Applied Information Technology, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. Mason undergraduate students in the BIS Program can apply in the semester in which they will have completed 90 or more credits (including 15 Mason resident credits) applicable toward the BIS. Students must have an overall GPA of at least 3.30 to apply to the program. Criteria for admission are identical to criteria for admission into the MS in AIT Program, except that students do not need to have completed an undergraduate degree prior to acceptance into the accelerated program.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Accelerated Option Requirements

Students in the accelerated master's option must maintain a minimum 3.30 GPA in the undergraduate segment until they have satisfied all requirements for the BIS degree. On completion and conferral of the undergraduate degree they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. Students must complete all credits that satisfy requirements of the BIS program and those of the MSAIT program, with two courses (6 credits) overlapping from the courses necessary to earn the BIS with a concentration IND (individualized), applied information technology emphasis as listed below.

Note: All of the prerequisite courses indicated below must be passed with a grade of C or higher.

Emerging Technologies

- AIT 597 - Developing IT Leaders of Integrity Credits: 3
- GBUS 540 - Analysis of Financial Decisions Credits: 3

Cyber Security
• AIT 673 - Cyber Incident Handling and Response Credits: 3
• ISA 650 - Security Policy Credits: 3

Intelligence Technologies

Any two from:
• AIT 675 - Overview of the National Intelligence Community Credits: 3
• AIT 676 - Intelligence Technologies, Research and Development in the Intelligence Community Credits: 3
• AIT 677 - Intelligence Analysis Methods Credits: 3
• AIT 678 - National Security Challenges Credits: 3

Information Technology, BS/Applied Information Technology, Accelerated MS

School: Volgenau School of Engineering
Department: Information Sciences and Technology

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Applied Information Technology, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Applied Information Technology, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

• AIT 622 - Determining Needs for Complex Big Data Systems Credits: 3 (satisfies the IT 343 requirement in the BS program)
• GBUS 540 - Analysis of Financial Decisions Credits: 3 (satisfies the MBUS 300 requirement in the BS program)

In addition, undergraduate students may complete up to 6 graduate credits to be held in reserve and applied toward the MS requirements. See Graduate Course Enrollment by Undergraduates in the AP.1 Registration and Attendance and AP.3 Grading sections of this catalog.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Graduate Certificate**

**Applied Cyber Security Graduate Certificate**

**Banner Code:** VS-CERG-ACBS

**School:** Volgenau School of Engineering  
**Department:** Information Sciences and Technology

This certificate offers courses in four key elements of cyber security. It is designed for professionals who work for, or in support of, U.S. federal agencies and provides post-bachelor's academic preparation for students who may not wish to complete a full master's degree program as well as for master's graduates who wish the topic-specific courses the certificate provides.

The graduate certificate may be pursued on a full or part-time basis.

**Admission Requirements**

A bachelor's degree is required for admission to the program.

**Certificate Requirements**

Students must choose any 12 credits from the following:

- AIT 671 - Information System Infrastructure Lifecycle Management Credits: 3  
- AIT 672 - Identity Management for Federal IT Credits: 3  
- AIT 673 - Cyber Incident Handling and Response Credits: 3  
- AIT 701 - Cyber Security: Emerging Threats and Countermeasures Credits: 3

Total: 12 credits

**Intelligence Technologies Graduate Certificate**

**Banner Code:** VS-CERG-NTLT

**School:** Volgenau School of Engineering  
**Department:** Information Sciences and Technology

This graduate certificate offers courses in four key elements of intelligence analysis. Designed for professionals who work for, or
in support of, intelligence community agencies, it provides additional academic preparation for post-bachelor's students who may not wish to complete a full master's program, as well as for master's graduates who wish to take the area-specific courses a certificate provides.

The graduate certificate may be pursued on a full or part-time basis.

Admission Requirements

A bachelor's degree is required for admission to the program.

Certificate Requirements

Students must complete the following 12 credits:

- AIT 674 - Research, Development and Technology in the Intelligence Community Credits: 3
- AIT 675 - Overview of the National Intelligence Community Credits: 3
- AIT 677 - Intelligence Analysis Methods Credits: 3
- AIT 678 - National Security Challenges Credits: 3

Total: 12 credits

Master of Science

Applied Information Technology, MS

Banner Code: VS-MS-AIT

School: Volgenau School of Engineering
Department: Information Sciences and Technology

The MS in Applied Information Technology is the very best graduate education in IT for high-potential leaders, especially those working on IT solutions that affect the federal government. Its objective is to graduate men and women of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. Faculty include professors from the Volgenau School, the School of Business, and the College of Humanities and Social Sciences, plus industry leaders with unique reputations in the subject area as adjunct professors and guest lecturers. The faculty expose students to the pragmatic issues of IT, not just the theory.

An accelerated master's option is available to students in either the information technology or individualized study bachelor's program. See each listing for specific requirements.

Admission Requirements

Applicants must have completed a baccalaureate degree from an accredited program with a reputation for high academic standards and an earned GPA of 3.00 or better in their 60 highest-level credits. They must be experienced in the fundamentals of IT and quantitative methods. In addition, applicants must:
• Provide three letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant's professional accomplishments.
• Provide a detailed statement of career goals and professional aspirations.
• If their native language is not English, students must earn a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam (a minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship).

Degree Requirements

Students may elect to obtain this degree without a specific concentration (but must complete the six foundation credits from the emerging technologies concentration) or they may select a concentration from one of the five areas listed below.

Core Courses (9 credits)

• AIT 622 - Determining Needs for Complex Big Data Systems Credits: 3
• AIT 697 - Leading Organizations Through Change Credits: 3
• GBUS 540 - Analysis of Financial Decisions Credits: 3

Concentration Areas (18 credits):

▲ Cyber Security (CYBR)

Students must choose four courses from the following:

• AIT 670 - Best Practices Managing Security and Privacy for Cloud Computing Credits: 3
• AIT 671 - Information System Infrastructure Lifecycle Management Credits: 3
• AIT 672 - Identity Management for Federal IT Credits: 3
• AIT 673 - Cyber Incident Handling and Response Credits: 3
• AIT 701 - Cyber Security: Emerging Threats and Countermeasures Credits: 3

Foundation (CYBR): 6 credits

• AIT 665 - Managing Information Technology Programs in the Federal Sector Credits: 3
• SYST 508 - Complex Systems Engineering Management Credits: 3

▲ Emerging Technologies (ETEC)

• AIT 580 - Analytics: Big Data to Information Credits: 3
• AIT 679 - Law and Ethics of Big Data Credits: 3
• AIT 701 - Cyber Security: Emerging Threats and Countermeasures Credits: 3
• ECE 507 - Seminar in Emerging Technologies Credits: 3
Foundation (ETEC): 6 Credits

- AIT 665 - Managing Information Technology Programs in the Federal Sector Credits: 3
- SYST 508 - Complex Systems Engineering Management Credits: 3

▲ Entrepreneurial (ENTL)

Students must choose four courses from the following:

- AIT 631 - Advanced Decision Making in IT Ventures Credits: 3
- AIT 711 - Rapid Development of Scalable Applications Credits: 3
- MBA 711 - Entrepreneurship Credits: 0-3
- MBA 752 - Turning Ideas into Successful Companies Credits: 0-3

Foundation (ENTL): 6 credits

- AIT 665 - Managing Information Technology Programs in the Federal Sector Credits: 3
- SYST 508 - Complex Systems Engineering Management Credits: 3

▲ Intelligence Technologies (NTLT)

- AIT 674 - Research, Development and Technology in the Intelligence Community Credits: 3
- AIT 675 - Overview of the National Intelligence Community Credits: 3
- AIT 677 - Intelligence Analysis Methods Credits: 3
- AIT 678 - National Security Challenges Credits: 3

Foundation (NTLT): 6 credits

- AIT 665 - Managing Information Technology Programs in the Federal Sector Credits: 3
- SYST 508 - Complex Systems Engineering Management Credits: 3

▲ Information Sciences and Technology (ISTC)

- AIT 510 - Learning Technology: Theory, Application and Design Credits: 3
- AIT 524 - Database Management Essentials Credits: 3
- AIT 624 - Semantic Web Tools for Multimedia Applications Credits: 3
- AIT 702 - Penetration Testing and Ethical Hacking Credits: 3

Foundation (ISTC): 6 credits
• AIT 602 - Introduction to Research in Applied Information Technology Credits: 3
• AIT 603 - Research Practice Credits: 3

Capstone Course (3 to 6 credits)

For students in any concentration except ISTC, to be taken in their final semester with all core and foundation courses already completed:
• AIT 685 - Capstone Seminar Credits: 3
  For students in the ISTC concentration only, one of:
• AIT 699 - Research Capstone Credits: 3
  or
• AIT 799 - Master's Thesis Credits: 1-6

Total: 30 to 36 credits

Non-Degree

Information Technology Minor

Banner Code: INFT

School: Volgenau School of Engineering
Department: Information Sciences and Technology

The minor is designed primarily for students who desire to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this minor provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The minor requires a minimum of 18 credits, including 12 credits of core courses. Beyond these requirements, students must select two additional technical focus courses (6 credits). Students pursuing the IT minor should consult with an advisor to select their additional courses.

Minor Requirements

Core Courses (12 credits)

• IT 102 - Discrete Structures Credits: 3  OR  MATH 125 - Discrete Mathematics I Credits: 3
• IT 104 - Introduction to Computing Credits: 3
• IT 105 - IT Architecture Fundamentals Credits: 3
• IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3

Technical Focus Courses (6 credits)
Undergraduate Certificate

Information Technology Entrepreneurship Undergraduate Certificate

Banner Code: VS-CERB-ITER

School: Volgenau School of Engineering
Department: Information Sciences and Technology

This certificate prepares IT and engineering students for a successful career as entrepreneurs in the area of information technology. Specifically, they will acquire a unique body of knowledge related to innovation, both on the information technology/engineering/inventive side and on the entrepreneurial side, which will give them a competitive advantage in the difficult market where only very few new companies are able to survive and grow.

This certificate is designed for students who are working on or possess an undergraduate degree in information technology, computer science, engineering or a related domain and want to focus on IT innovation and entrepreneurship.

Students enrolled in the certificate must be part of an entrepreneurship team (E-Team) with the goal of creating an IT Venture. The E-Teams will be mentored by faculty associated with the certificate. Students who will create, or be a core team member of, a start-up company that has cumulated revenues and funding of $10,000 during their enrollment in the certificate will graduate with a Certificate of Excellence in IT Entrepreneurship.

The undergraduate certificate in Information Technology Entrepreneurship may be pursued on a full-time basis except when limited by prerequisite constraints.

Admissions Requirements

Students must have information technology experience at the level of IT 106, IT 206, IT 213, IT 214, and IT 223 and either a BS in a technical field (with a 3.00 GPA or higher) or current enrollment in a technical undergraduate major.

Certificate Requirements
Core Courses Credits: 9

- MBUS 300 - Accounting in a Global Economy Credits: 3
- MBUS 301 - Managing People and Organizations in a Global Economy Credits: 3
- IT 343 - IT Project Management Credits: 3

Elective Courses Credits: 12

Choose 12 credits from this list:

- IT 315 - Mobile Development Credits: 3
- IT 390 - Rapid Development of Scalable Applications Credits: 3
- IT 436 - Agile Web Development with Open Source Frameworks Credits: 3
- IT 490 - Application Maintenance and Spiral Development Credits: 3
- IT 495 - Turning Ideas into Successful Companies Credits: 3
- IT 496 - Decision Making in IT Ventures Credits: 3
- MBUS 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3

Capstone Sequence Courses Credits: 7

- IT 492 - Senior Design Project I Credits: 3 (special section on IT Entrepreneurship)
- IT 493 - Senior Design Project II Credits: 4 (special section on IT Entrepreneurship)

Total: 28 Credits

Information Technology Undergraduate Certificate

Banner Code: VS-CERB-INFT

School: Volgenau School of Engineering
Department: Information Sciences and Technology

This certificate is designed primarily for those students who have earned a bachelor's degree or current undergraduate students who desire deeper knowledge than what can be accomplished through the IT minor. It allows students to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this undergraduate certificate provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The certificate requires a minimum of 24 credits, including 15 credits of core courses. Beyond these requirements, students must select three additional IT courses (9 credits, at least 3 upper division credits). Students pursuing the IT undergraduate certificate should consult with an advisor to select their additional courses.
Students pursuing only the undergraduate certificate in information technology will not maintain full-time status which requires a minimum of 12 credits per semester.

Certificate Requirements

Core Courses (12 credits)

- IT 102 - Discrete Structures Credits: 3 or MATH 125 - Discrete Mathematics I Credits: 3
- IT 104 - Introduction to Computing Credits: 3
- IT 105 - IT Architecture Fundamentals Credits: 3
- IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3

AND select one of the following:

- IT 206 - Object Oriented Techniques for IT Problem Solving Credits: 3
- IT 207 - Applied IT Programming Credits: 3
- IT 213 - Multimedia and Web Design Credits: 3
- IT 214 - Database Fundamentals Credits: 3
- IT 223 - Information Security Fundamentals Credits: 3

Technical Focus Courses (9 credits; at least 3 at the upper division level)

Students must choose 9 credits from the approved list of technical focus courses; at least 3 of those credits must be at the upper division level.

Total: 24 Credits

Multidisciplinary Programs (VS)

School: Volgenau School of Engineering

At the undergraduate level, the Volgenau School of Engineering offers a multidisciplinary degree in Cyber Security Engineering, BS. Cyber Security Engineering is concerned with the development of cyber resilient systems which include the protection of the physical as well as computer and network systems. It requires a proactive approach in engineering design of physical systems with cyber security incorporated from the beginning of system development. Cyber security engineering is an important quantitative methodology to be used in all industries to include, but not limited to, transportation, energy, healthcare, infrastructure, finance, government (federal, state, and local), and defense. The program is focused on the cyber security engineering of integrated cyber-physical systems. This degree provides a foundation in cyber security engineering, and is most appropriate for students with a strong mathematics and science background. The program is administered by the Dean's Office, Volgenau School of Engineering.

At the graduate level, the School offers two multidisciplinary degree programs: Information Technology, PhD and Data Analytics Engineering, MS. The Information Technology, PhD allows students to conduct their doctoral research under the
supervision of any eligible faculty member of any of the school's departments. A student may select to obtain this degree without
a specific concentration or select one in the following areas: information security, information systems, or software
engineering. The Data Analytics Engineering, MS is designed to provide students with an understanding of the technologies and
methodologies necessary for data-driven decision-making. The programs are managed by the Graduate Student Affairs Office
under the purview of the senior associate dean.

In addition to these programs, the Volgenau School also participates in a multidisciplinary Executive Master of Science in
Management of Secure Information Systems program, which is administered primarily through the School of Business and taught
jointly by faculty from the Volgenau School of Engineering, School of Business, and the Schar School of Policy and Government
(formerly SPGIA). This unique program prepares professionals to meet the challenges required of those responsible for the safe,
secure, and efficient operation of modern computerized information systems, which have become increasingly complex and ever
more vulnerable to cyber attack. Students will understand the technical aspects of these systems, become familiar with the
principles of management, and gain an understanding of the public policy impacts of regulatory and organizational decisions.

**Bachelor of Science**

**Cyber Security Engineering, BS**

**Banner Code:** VS-BS-CYSE

**School:** Volgenau School of Engineering  
**Department:** Interdisciplinary Programs (VS)

Cyber Security Engineering is concerned with the development of cyber resilient systems which include the protection of the
physical as well as computer and network systems. It requires a proactive approach in engineering design of physical systems
with cyber security incorporated from the beginning of system development. Cyber security engineering is an important
quantitative methodology to be used in all industries to include, but not limited to, transportation, energy, healthcare,
infrastucture, finance, government (federal, state, and local), and defense. The program is focused on the cyber security
engineering of integrated cyber-physical systems. This degree provides a foundation in cyber security engineering, and is most
appropriate for students with a strong mathematics and science background. The program is administered by the Dean's Office,
Volgenau School of Engineering.

**Advising and Plan of Study**

All cyber security engineering students are assigned a faculty advisor. With the advisor's help and approval, each student is
required to complete a plan of study. This plan of study constitutes a learning plan for the degree program. The plan of study
must be signed by the student's advisor and the Program Chair. The plan of study must be updated and signed by the advisor at
least once a year.

**Degree Requirements**

In addition to Mason Core requirements, students must meet specific requirements for the cyber security engineering degree. In
the first two years, students obtain a basic foundation in mathematics, the natural sciences, computing, writing, humanities, arts,
and social sciences. Degree requirements for the cyber security engineering major include 126 credits. Students must complete the following:

**Cyber Security Engineering Core Credits:** 65
• CYSE 101 - Introduction to Cyber Security Engineering Credits: 3
• CYSE 205 - Systems Engineering Principles Credits: 3
• CYSE 211 - Operating Systems and Lab Credits: 3
• CYSE 220 - Systems Modeling Credits: 3
• CYSE 230 - Computer Networking Credits: 3
• CYSE 301 - Digital Systems Credits: 3
• CYSE 325 - Discrete Events Systems Modeling Credits: 3
• CYSE 330 - Introduction to Network Security Credits: 3
• CYSE 411 - Secure Software Engineering Credits: 3
• CYSE 421 - Industrial Control Systems Security Credits: 3
• CYSE 425 - Secure RF Communications Credits: 3
• CYSE 430 - Critical Infrastructure Protection Credits: 3
• CYSE 445 - System Security and Resilience Credits: 3
• CYSE 450 - Cyber Vulnerability Lab Credits: 1
• CYSE 465 - Transportation Systems Design Credits: 3
• CYSE 470 - Human Factors and Cyber Security Engineering Credits: 3
• CYSE 475 - Cyber Physical Systems Credits: 3
• CYSE 491 - Engineering Senior Seminar Credits: 2
• CYSE 492 - Senior Advanced Design Project I Credits: 2
• CYSE 493 - Senior Advanced Design Project II Credits: 3
• 3 approved technical electives selected from the elective requirements below. Credits: 9

Technical Electives

Electives allow students to gain special expertise in selected areas of cyber security engineering. Students are required to take 9 hours selected from the following:

• CYSE 424 - Embedded and Real Time Systems Credits: 3
• CYSE 460 - Power Systems and Smart Grid Credits: 3
• CYSE 461 - Power Grid Security Credits: 3
• CYSE 462 - Mobile Devices and Network Security Credits: 3
• CYSE 467 - GPS Security Credits: 3
• CYSE 476 - Cryptography and Computer Network Security Credits: 3
• CYSE 477 - Intrusion Detection Credits: 3
• CYSE 478 - Cyber Security Audit and Compliance Credits: 3
• CYSE 479 - Methods of User Authentication Credits: 3
• CYSE 480 - Malicious Software and Hardware Credits: 3

Mathematics and Statistics Credits: 20

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 203 - Linear Algebra Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Natural Sciences Credits: 8

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Computer Science Credits: 7

- CS 112 - Introduction to Computer Programming Credits: 4
- CS 222 - Computer Programming for Engineers Credits: 3

Engineering Credits: 2

- ENGR 107 - Introduction to Engineering Credits: 2

Oral Communication and Economics Credits: 6

- COMM 100 - Public Speaking Credits: 3 OR COMM 101 - Interpersonal and Group Interaction Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Additional Mason Core Credits: 18

Students must complete all Mason Core requirements not fulfilled by major requirements.

- Written Communication Credits: 6
- Literature Credits: 3
- Arts Credits: 3
- Western Civilization/World History Credits: 3
- Global Understanding Credits: 3

Note

All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed above.
Synthesis Requirement

Mason's synthesis requirement for cyber security engineering majors is satisfied by successful completion of CYSE 493 Senior Advanced Design Project II (pending approval).

Writing Intensive Requirement

Mason's writing-intensive requirement for cyber security engineering majors is satisfied by successful completion of CYSE 491 Engineering Senior Seminar (pending approval).

Total: 126 credits

Grades

All BS CYSE students must complete the following courses with a grade of C or better: MATH 203, MATH 214, CS 222, PHYS 260, STAT 344, and all CYSE courses.

Change of Major

Students who are considering cyber security engineering as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the "Termination from the Major" section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Bachelor/Accelerated Master's
Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS

School: Volgenau School of Engineering
Department: Interdisciplinary Programs

Highly-qualified students in the Applied Computer Science, BS have the option of obtaining an accelerated Data Analytics Engineering, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Applied Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310, CS 330 and CS 367.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students must register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students in all concentrations of the Applied Computer Science, BS program must register for:

- CS 584 - Theory and Applications of Data Mining Credits: 3

Students in the Software Engineering and Bioinformatics concentrations of the Applied Computer Science, BS program must also register for:

- CS 550 - Database Systems Credits: 3

Students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS program must also register for one of the following courses:

- CS 550 - Database Systems Credits: 3 or
- CS 580 - Introduction to Artificial Intelligence Credits: 3

Note:

For students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS program, one of the 500 level courses will count as an elective towards their undergraduate degree.

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's...
Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Bioengineering, BS/Data Analytics Engineering, Accelerated MS

School: Volgenau School of Engineering
Department: Interdisciplinary Programs

Highly-qualified students in the Bioengineering, BS have the option of obtaining an accelerated Data Analytics Engineering, MS with a concentration in Bioengineering. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students in the Bioengineering, BS program may apply to this option if they have earned 95 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 222 and BENG 320. Criteria for admission are identical to criteria for admission to the Bioengineering concentration of the Data Analytics Engineering, MS program.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of 500-level basic courses in place of the corresponding BENG 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

- BENG 501 - Bioengineering Research Methods Credits: 3
- CS 504 - Principles of Data Management and Mining Credits: 3
  (in place of BENG 420 - Bioinformatics for Engineers Credits: 3)

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

BS (selected)/Data Analytics Engineering, Accelerated MS

School: Volgenau School of Engineering
Department: Interdisciplinary Programs
Qualified undergraduate students have the option of obtaining an accelerated Data Analytics Engineering, MS with a concentration in predictive analytics. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

While no specific undergraduate degree is required, Mason undergraduate students majoring in systems engineering or any other engineering, business, computer science, statistics, mathematics, or information technology may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

For the predictive analytics concentration, students must submit evidence of:

• Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.

• Familiarity with analytical modeling software, such as spreadsheets or math packages.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 473</td>
<td>SYST 573</td>
<td>Credit may not be received for both courses.</td>
</tr>
<tr>
<td>OR 441</td>
<td>OR 541</td>
<td>Credit may not be received for both courses.</td>
</tr>
</tbody>
</table>

For the predictive analytics concentration, any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

OR 541 - Operations Research: Deterministic Models Credits: 3 will substitute for the OR 531 - Analytics and Decision Analysis Credits: 3 core requirement in the MS DAE program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Data Analytics Engineering, Accelerated MS

School: Volgenau School of Engineering
Department: Interdisciplinary Programs

The term "information technology" as used in Mason's IT doctoral program, is intended to be interpreted in a broad sense as all aspects of information technology and the branches of engineering most closely associated with information and engineering. These aspects of technology are emphasized in Northern Virginia, and the relevance of the IT doctoral program has grown with the increasing dependence of the nation's commerce on the effective use of information. Our focus on the science, engineering, and technology of information processing complements and enhances traditional approaches to engineering that are more
strongly based on the physical and material sciences. Thus, the Information Technology PhD program is broad, and not surprisingly includes several specific concentrations.

The general doctoral requirements of Mason apply to this program.

**Admission Requirements**

Students are selected on the basis of scholarship and potential from among applicants with appropriate degrees from institutions of high standing.

Generally, a background in an information technology-related area, such as engineering, computer science, operations research, mathematics, and physical sciences is required for admission to the doctoral program. However, in some instances, well-qualified students without a clearly related prior degree (i.e., MS in Information Technology Management, MBA) may be offered admission. Most successful applicants already have a Master's degree, however exceptionally qualified individuals without an MS may be accepted, but will be required to take more courses.

An undergraduate GPA of 3.00 and a graduate GPA of 3.50 are basic requirements for applicants. Applicants are required to submit: application for admission, undergraduate and graduate transcripts from previous colleges and universities, GRE test results, three letters of reference (preferably from college instructors), a résumé, a personal goal statement, and a self-evaluation form to identify research areas of interest. Foreign transcripts must be translated and evaluated (course-by-course preferred) by a member of the NACES Membership. Evaluations can be also be done by George Mason University, at no extra cost to the applicant; however, this typically adds 6-8 weeks to the application processing time. Please review George Mason University's Policy on International Transcript Submission. An applicant's entire background is examined before an admission decision is made.

To ensure a common ground of fundamentals, students should have a background in such topics as calculus, differential equations, linear algebra, discrete structures, probability, and statistics. In addition, students entering the PhD in Information Technology Program must have a sound working knowledge in computing as demonstrated by examples of programs or applications developed and tested in at least one high level programming language environment. Because much of the coursework within this program requires computational proficiency, experience with a variety of languages and computer hardware is useful as is an understanding of computer architecture. Highly-qualified students who do not present evidence of appropriate coursework may be admitted and then required to take appropriate articulation courses.

Those who wish to be considered for Mason's Presidential Scholarship, which provides a stipend and tuition support for three years, must be full-time students, with a minimum GPA of 3.5 or higher in their most recently earned degree, and submit GRE scores with a combined math and verbal score of 1200 on exams taken prior to August 1, 2011; combined score of 310 on the new revised GRE scale for exams taken August 1, 2011 and beyond. Scores must have been earned within the last five years. Only one Presidential Scholarship is awarded per PhD program per year.

**Reduction of Credit**

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from an approved and completed master's degree. Reduction of credit requires the approval of the program director/dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

**Degree Requirements**

Information Technology doctoral candidates must earn a minimum of 72 graduate credits. The program is made up of a breadth requirement (assessed via qualifying exams) and specialized coursework (assessed via the comprehensive exam), followed by preparation of a dissertation proposal, an original research project, and final defense. To advance to candidacy, students must complete all coursework, pass the qualifying and comprehensive examinations, and defend a dissertation proposal.
The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisors.

Plan of Study

Students must include in the plan of study a well-defined set of advanced courses in a focused area. Successful completion of this requirement should enable the student to do basic or applied research in a significant contemporary area in IT.

The 18 credits of graduate-level coursework must fulfill the following requirements:

- Coursework must be independent of the courses students take to prepare for the qualifying exams.
- Courses that cannot be included in any plan of study are any INFS 500-level courses; certain AIT courses; OR 540; STAT 501, STAT 502, STAT 503, STAT 535; and SYST 500. Exceptions must be approved in advance by the senior associate dean.
- At least 12 of the 18 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, project, or thesis courses.
- A cumulative GPA of 3.50 is required in courses taken in the plan of study.

Concentrations (18 credits)

Students are strongly encouraged to select a concentration area in digital forensics, information, science and technology, information systems, information security and assurance, or software engineering. However, the Plan of Study option (above) exists for students who will conduct multidisciplinary research. Students who declare a concentration will have the concentration noted on their transcript. Students seeking a concentration must satisfy all requirements for the PhD in information technology, as well as specific requirements in the concentration.

Courses required for each concentration are in addition to courses taken to prepare for the Qualifying Exam.

▲Concentration in Digital Forensics (DFOR)

In addition to courses taken to prepare for the Qualifying Exams, the student's plan of study must include six courses (18 credit hours) from the following list, with no more than four courses (12 credit hours) taken at the 600 level:

- AIT 701 - Cyber Security: Emerging Threats and Countermeasures Credits: 3
- CFRS 661 - Digital Media Forensics Credits: 3
- CFRS 663 - Operations of Intrusion Detection for Forensics Credits: 3
- CFRS 664 - Incident Response Forensics Credits: 3
- CFRS 730 - Forensic Deep Packet Inspection Credits: 3
- CFRS 760 - Legal and Ethical Issues in IT Credits: 3
- CFRS 761 - Malware Reverse Engineering Credits: 3
- CFRS 762 - Mobile Device Forensics Credits: 3
- CFRS 763 - Registry Forensics - Windows Credits: 3
- CFRS 764 - Mac Forensics Credits: 3
- CFRS 767 - Penetration Testing in Computer Forensics Credits: 3
- CFRS 768 - Digital Warfare Credits: 3
- CFRS 769 - Anti-Forensics Credits: 3
- CFRS 770 - Fraud and Forensics in Accounting Credits: 3
- CFRS 771 - Digital Forensic Profiling Credits: 3
- CFRS 772 - Forensic Artifact Extraction Credits: 3
- CFRS 773 - Mobile Application Forensics and Analysis Credits: 3
- CFRS 775 - Kernel Forensics and Analysis Credits: 3
- CFRS 780 - Advanced Topics in Computer Forensics Credits: 3 *
- CFRS 790 - Advanced Computer Forensics Credits: 3 *
- ECE 611 - Advanced Microprocessors Credits: 3
- ECE 645 - Computer Arithmetic Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3 *
- IT 796 - Directed Reading and Research Credits: 1-6 *
  * Can only be taken once for PhD credit in the digital forensics concentration.

Note:
Where appropriate and with doctoral advisor approval, a maximum of two emphasis courses may be substituted with relevant courses from other Volgenau School departments. The student's overall coursework must satisfy the University requirement for the PhD in Information Technology.

▲Concentration in Information Science and Technology (ISCT)

Students must take at least 18 credit hours selected from the following list with no more than two courses (6 credit hours) taken at the 500 level:

- AIT 510 - Learning Technology: Theory, Application and Design Credits: 3
- AIT 701 - Cyber Security: Emerging Threats and Countermeasures Credits: 3
- AIT 702 - Penetration Testing and Ethical Hacking Credits: 3
- AIT 710 - Design of Learning and Educational Technologies Credits: 3
- AIT 711 - Rapid Development of Scalable Applications Credits: 3
- EDIT 746 - Educational Technology and Assessment Credits: 3
- EDIT 802 - Cognition and Technology: A Multidisciplinary Approach Credits: 3

▲Concentration in Information Security and Assurance (ISA)

Students must take at least 18 credit hours, with at least 12 credits as follows:

- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 697 - Topics in Information Security Credits: 1-6
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 796 - Directed Readings in Information Security Credits: 3
• ISA 862 - Models for Computer Security Credits: 3
• ISA 863 - Advanced Topics in Computer Security Credits: 3
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• Any CS, INFS or SWE course numbered 700 or higher, subject to the approval of the student's academic advisor.

▲ Concentration in Information Systems (ISYS)

Students must take at least 18 credit hours, with at least 12 credits in INFS or ISA courses numbered 700 or higher as follows:

• INFS 623 - Web Search Engines and Recommender Systems Credits: 3
• INFS 740 - Database Programming for the World Wide Web Credits: 3
• INFS 760 - Advanced Database Management Credits: 3
• INFS 770 - Knowledge Management for E-Business Credits: 3
• INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
• INFS 774 - Enterprise Architecture Credits: 3
• INFS 796 - Directed Readings in Information Systems Credits: 3
• ISA 562 - Information Security Theory and Practice Credits: 3
• ISA 656 - Network Security Credits: 3
• ISA 797 - Advanced Topics in Information Security Credits: 3

The remaining 6 credits from SWE and CS courses in Software Engineering and Computer Science:

• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 763 - Software Engineering Experimentation Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 821 - Software Engineering Seminar Credits: 3
• CS 583 - Analysis of Algorithms Credits: 3
• CS 657 - Mining Massive Datasets with MapReduce Credits: 3
• CS 688 - Pattern Recognition Credits: 3
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 787 - Decision Guidance Systems Credits: 3
• CS 880 - Research Topics in Artificial Intelligence Credits: 3
• CS 811 - Research Topics in Machine Learning and Inference Credits: 3

Note: Students without a credit reduction should select the remaining credits from any 600 level or higher INFS, ISA, CS or SWE courses or courses approved in advance by the student's academic advisor.

▲ Concentration in Software Engineering (SWE)

Students must take at least 18 credit hours with at least 12 credits at the 700 level as follows:

• SWE 763 - Software Engineering Experimentation Credits: 3
  or
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 722 - Service Oriented Architecture Credits: 3
• SWE 727 - Quality of Service for Software Architectures Credits: 3
• SWE 760 - Software Analysis and Design of Real-Time Systems Credits: 3
• SWE 795 - Advanced Topics in Software Engineering Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 798 - Research Project Credits: 3
• SWE 825 - Special Topics in Web-Based Software Credits: 3

6 credits from the following:
• SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
• SWE 620 - Software Requirements Analysis and Specification Credits: 3
• SWE 621 - Software Modeling and Architectural Design Credits: 3
• SWE 622 - Distributed Software Engineering Credits: 3
• SWE 631 - Software Design Patterns Credits: 3
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 637 - Software Testing Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 681 - Secure Software Design and Programming Credits: 3
• CS 706 - Concurrent Software Systems Credits: 3
• INFS 740 - Database Programming for the World Wide Web Credits: 3
• INFS 760 - Advanced Database Management Credits: 3
• INFS 770 - Knowledge Management for E-Business Credits: 3
• INFS 797 - Advanced Topics in Information Systems Credits: 1-6
• ISA 562 - Information Security Theory and Practice Credits: 3
• ISA 656 - Network Security Credits: 3
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 862 - Models for Computer Security Credits: 3

Qualifying Exams

To satisfy the breadth requirement of the PhD degree, students must pass a set of written qualifying exams designed to test fundamental knowledge. Students who have already obtained an IT-relevant Master's degree may already be prepared for the qualifying exams. These exams correspond to a set of disciplines related to the individual Master's programs in the Volgenau School. Each exam is based on a reading list posted on the school's web site. The qualifying exams are not associated with specific courses, although some courses may help students prepare for these exams. The qualifying exams are offered twice a year at specified locations on campus, typically near the beginning of the fall and the spring semesters. Each exam is allocated two hours. The exams are graded on a pass or fail basis.

Students must indicate which exams are being requested through a request form signed by the student and submitted to the Graduate Academic Affairs Office.

Each student must pass a set of four exams in two consecutive offerings. Four exams must be attempted in the first offering. The exams attempted on the second offering need not be the same as in the first. A student who fails to pass four qualifying exams in two consecutive semesters is subject to termination from the program.

Students must attempt a set of four exams no later than the first opportunity following the completion of 18 credits, or 30 credits if the student enters the program without a Master's degree.

Dissertation Research (24 credits)

Choose 24 credits from the following:
Doctoral Supervisory Committee

On admission to the program, students are assigned a temporary academic advisor. Students are responsible for working with the temporary advisor until they choose a dissertation director and establish a doctoral supervisory committee.

The doctoral supervisory committee includes the dissertation director, who must be a member of the Mason graduate faculty, and at least three other people from the Mason graduate faculty. The dissertation director and chair of a PhD in IT dissertation committee must have at least a 50% appointment in the Volgenau School. This rule does not apply to a co-director, provided that the chair and other co-director satisfies the “at least 50% rule.” At least three committee members must be from the Volgenau School, and at least two of the departments of the Volgenau School must be represented on this committee.

In addition, industrial representatives and faculty members from departments outside the school are highly desirable, but not required, on the committee. The doctoral supervisory committee administers the comprehensive exam, dissertation proposal presentation, and the dissertation predefense and defense. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School senior associate dean on the basis of a written request and plan that has been approved by the supervisory committee.

Comprehensive Exam

The comprehensive exam is an oral exam taken after students have satisfactorily completed all coursework requirements in their approved plan of study. To initiate the exam process, the student meets with the dissertation advisor to prepare a permission form, which has to be approved by the entire dissertation supervisory committee one month prior to the exam, to be forwarded to the senior associate dean for final approval. The permission form should contain the following items: a) a one page description of the intended area of research; and b) a reading list on which the student will be examined. The reading list should include articles and/or books that cover the fundamentals, state-of-the-art, and tools needed to perform research in the intended area.

The objective of the comprehensive exam is to allow the dissertation supervisory committee to assess the student’s readiness to complete doctoral research in an area of concentration. The duration of the oral exam is typically two hours. Students who fail the exam are allowed to retake it once. Failure in the second attempt results in termination from the program. Students must pass the comprehensive exam and dissertation proposal defense before being advanced to candidacy. The comprehensive exam must be attempted for the first time no later than one year after completing all coursework requirements (excluding 990, 998, and 999).

Dissertation Proposal Presentation

Near the end of the coursework, doctoral students prepare a written dissertation proposal to present to the doctoral supervisory committee. The proposal must be delivered by hard copy to the doctoral supervisory committee at least two weeks before the presentation. Students should enroll in IT 998 - Doctoral Dissertation Proposal to complete this effort (note: students must pass the qualifying exam before enrolling in IT 998). During the term the student expects to present the dissertation proposal to the committee, the student is required to enroll in IT 990 - Dissertation Topic Presentation. The dissertation proposal presentation must be at least one week after passing the comprehensive exam. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree. The application for candidacy is submitted to the senior associate dean on a standard form.

Dissertation and Final Defense

With the concurrence of the dissertation supervisory committee, students proceed with the doctoral research, during which time they must be continuously enrolled in IT 999 - Doctoral Dissertation. When the central portions of the research have been...
completed to the point that students are able to describe the original contributions of the dissertation effort, they submit the written dissertation to the committee and schedule an oral predefense to the committee. The predefense is to be held no sooner than one month after members of the committee have copies of the dissertation. Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense so that the announcement is posted for at least two weeks. The entire dissertation committee and the senior associate dean must be present at the defense, unless an exception is approved by the senior associate dean in advance of the defense.

Following satisfactory evaluation of the oral defense of the dissertation by the committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in IT. If the candidate successfully defends the dissertation, the dissertation committee recommends that the final form of the dissertation be completed and the Volgenau School faculty and the graduate faculty of Mason accept the candidate for the PhD degree.

If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. An additional predefense is not required, but students are strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be terminated from the program.

Total: 72 credits

Graduate Certificate

Data Analytics Graduate Certificate

Banner Code: VS-CERG-DNIC

School: Volgenau School of Engineering
Department: Interdisciplinary Programs (VS)

This certificate program provides a broad overview of the end-to-end value chain for Big Data Analytics, from the capture and management of the data, through the analytics that harness the data to create value. The program is designed to provide a framework for the methodologies for organizing and integrating disparate data, analyzing and visualizing the integrated data, and determining what decisions or actions should be taken to generate value from the data. The program is comprised of 12 credits of required coursework.

The certificate is intended for students who are interested in addressing the challenge of transforming the massive data arising in applications such as business analytics, cyber defense/forensics, energy, finance, genomics, healthcare, intelligence, law enforcement, or transportation, into meaningful information. The program is intended for graduate students in areas where applications of big data may arise.

The graduate certificate may only be pursued on a part-time basis.

Admissions Requirements

Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. While no specific undergraduate degree is required, a background in engineering, business, computer science, math, or information technology is desirable; alternatively, strong work experience with data or analytics may be used. Current graduate
students in the Volgenau School of Engineering and the School of Business can elect this certificate program with the Registrar's Office Graduate Secondary Certificate Program Application.

Certificate Requirements

The following four courses (12 credits) must be completed which may include no more than three credits of a grade of C with a total GPA of at least 3.0:

- AIT 580 - Analytics: Big Data to Information Credits: 3
- CS 504 - Principles of Data Management and Mining Credits: 3
- OR 531 - Analytics and Decision Analysis Credits: 3
- STAT 515 - Applied Statistics and Visualization for Analytics Credits: 3

Total: 12 credits

Master of Science

Data Analytics Engineering, MS

Banner Code: VS-MS-DAEN

School: Volgenau School of Engineering
Department: Interdisciplinary Programs

The MS in Data Analytics Engineering is designed to provide students with an understanding of the technologies and methodologies necessary for data-driven decision-making. Students study topics such as data mining, information technology, statistical modeling, predictive analytics, optimization, risk analysis, and data visualization. It is aimed at students who wish to become data scientists and analysts in finance, marketing, operations, business/government intelligence and other information intensive groups generating and consuming large amounts of data.

Admission Requirements

Applicants must have completed a baccalaureate degree from a regionally accredited program with a reputation for high academic standards and an earned GPA of 3.00 or better in their 60 highest-level credits. While no specific undergraduate degree is required, a background in engineering, business, computer science, statistics, mathematics, or information technology, is desirable, or alternatively strong work experience with data or analytics may be used.

For each of the concentrations there are additional admission requirements. These are listed below in the descriptions of the individual concentrations.

In addition to fulfilling Mason's admission requirements for graduate study, applicants must provide:

- Three letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant's professional or academic accomplishments.
- Resume.
- Detailed statement of career goals and professional aspirations.
- Completed self-evaluation form.
- If the applicant's native language is not English, proof of English competency with a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam.

Degree Requirements (30 credits)

Core Courses (15 credits)

The following core course work covers the basic elements of data analytics at the graduate level.

- AIT 580 - Analytics: Big Data to Information Credits: 3
- CS 504 - Principles of Data Management and Mining Credits: 3 (for all concentrations except Data Mining) or CS 584 - Theory and Applications of Data Mining Credits: 3 (for the Data Mining concentration only)
- DAEN 690 - Data Analytics Project Credits: 3
- OR 531 - Analytics and Decision Analysis Credits: 3
- STAT 515 - Applied Statistics and Visualization for Analytics Credits: 3 (for all concentrations except Statistics for Analytics) or STAT 554 - Applied Statistics I (for the Statistics for Analytics concentration only)

Concentrations (15 credits)

Students can elect a concentration that corresponds to a specialized technical area. Students not interested in a concentration can work with an advisor to select 15 credits of electives from among courses allowed in all the concentrations.

- Applied Analytics
- Bioengineering
- Business Analytics
- Data Mining
- Digital Forensics
- Financial Engineering
- Predictive Analytics
- Statistics for Analytics

▲ Concentration in Applied Analytics (APAN)

Focuses on the practical elements of adapting big data approaches to common analytic problems and government operations.

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

- IT 106 - Introduction to IT Problem Solving Using Computer Programming Credits: 3
- MATH 108 - Introductory Calculus with Business Applications Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3

Required Concentration Courses (15 credits)
All students in this concentration must take the following five courses:

- AIT 581 - Problem Formation and Solving in Big Data Credits: 3
- AIT 582 - Applications of Metadata in Complex Big Data Problems Credits: 3
- AIT 665 - Managing Information Technology Programs in the Federal Sector Credits: 3
- AIT 679 - Law and Ethics of Big Data Credits: 3
- AIT 697 - Leading Organizations Through Change Credits: 3

▲Concentration in Bioengineering (BIOE)

Bioengineering, whether it is mapping the human genome or computer aided diagnosis, is an exercise in data analytics.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

- BENG 320 - Bioengineering Signals and Systems Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 346 - Probability for Engineers Credits: 3

Note: Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.

Required Concentration Courses (12 credits)

- BENG 501 - Bioengineering Research Methods Credits: 3
- BENG 551 - Translational Bioengineering Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 535 - Digital Signal Processing Credits: 3

and one course selected from the following:

- BENG 525 - Neural Engineering Credits: 3
- BENG 538 - Medical Imaging Credits: 3
- ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
- BENG 550 - Advanced Biomechanics Credits: 3
- BENG 636 - Advanced Biomedical Signal Processing Credits: 3

▲Concentration in Business Analytics (BUSA)
Additional Admission Requirements

Students entering the program must have successfully completed STAT 515 or STAT 554 with a grade of B or better.

Required Concentration Courses (15 credits)

- GBUS 720 - Marketing Analytics Credits: 3
- GBUS 721 - Marketing Research Credits: 3
- GBUS 738 - Data Mining for Business Analytics Credits: 3
- GBUS 739 - Advanced Data Mining for Business Analytics Credits: 3
- GBUS 744 - Fraud Examination Credits: 3

▲ Concentration in Data Mining (DTM)

Aimed at students who are interested in understanding data mining, advanced database systems, MapReduce programming, pattern recognition, decision guidance systems, and Bayesian inference as they relate to data analytics.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

- CS 310 - Data Structures Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- MATH 125 - Discrete Mathematics I Credits: 3

Note: Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.

Required Concentration Courses

- CS 657 - Mining Massive Datasets with MapReduce Credits: 3

and four courses selected from the following:

Note: all prerequisites must be met.

- CS 550 - Database Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 650 - Advanced Database Management Credits: 3
- CS 674 - Data Mining on Multimedia Data Credits: 3
- CS 688 - Pattern Recognition Credits: 3
• CS 775 - Advanced Pattern Recognition Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 787 - Decision Guidance Systems Credits: 3
• INFS 623 - Web Search Engines and Recommender Systems Credits: 3
• INFS 740 - Database Programming for the World Wide Web Credits: 3
• SYST 664 - Bayesian Inference and Decision Theory Credits: 3

▲ Concentration in Digital Forensics (DFOR)

Deals with the process of acquiring, extracting, integrating, transforming, and modeling data with the goal of deriving useful information that is suitable for presentation in a court of law. Digital forensics is a key component in criminal, civil, intelligence, and counter-terrorism matters. Students will be able to apply data analytics to such areas as digital media, intercepted (network) data, mobile media, unknown code, and leverage that analysis in order to determine, intent, attribution, cause, effect, and context.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

In computer operating systems:
• IT 342 - Operating Systems Fundamentals Credits: 3

In computer networking:
• IT 441 - Network Servers and Infrastructures Credits: 3
• IT 341 - Data Communications and Network Principles Credits: 3
• IT 445 - Advanced Networking Principles Credits: 3 or TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3

Note: Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.

Required Concentration Courses

• CFRS 500 - Introduction to Forensic Technology and Analysis Credits: 3
• CFRS 660 - Network Forensics Credits: 3

and three courses selected from the following:

• CFRS 510 - Digital Forensics Analysis Credits: 3
• CFRS 661 - Digital Media Forensics Credits: 3
• CFRS 663 - Operations of Intrusion Detection for Forensics Credits: 3
• CFRS 664 - Incident Response Forensics Credits: 3
• CFRS 698 - Independent Reading and Research Credits: 1-3
• CFRS 761 - Malware Reverse Engineering Credits: 3
• CFRS 762 - Mobile Device Forensics Credits: 3
• CFRS 763 - Registry Forensics - Windows Credits: 3
• CFRS 764 - Mac Forensics Credits: 3
• CFRS 767 - Penetration Testing in Computer Forensics Credits: 3
• CFRS 768 - Digital Warfare Credits: 3
• CFRS 780 - Advanced Topics in Computer Forensics Credits: 3

▲Concentration in Financial Engineering (FNNE)

The concentration emphasizes both analytical and practical aspects of financial and econometric data analytics. Students are expected to demonstrate proficiency in several quantitative modeling disciplines. Students are also expected to understand issues relevant to practical aspects of investment and hedging decision making, derivative valuation, and risk analysis. The students will learn the techniques to analyze large financial and economic data to derive meaningful knowledge, which will be useful for developing effective business and risk mitigation strategies and making sound financial, marketing, and investment decisions. The concentration prepares students for careers in business analytics with a focus on practical applications in financial operations, investment, and risk mitigation strategy development.

Additional Admission Requirements

Students entering the program must submit evidence of:

• Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.

• Familiarity with analytical modeling software, such as spreadsheets or math packages.

Required Concentration Courses (9 credits)

• SYST 538 or OR 538 - Analytics for Financial Engineering and Econometrics Credits: 3
• SYST 588 or OR 588 - Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives Credits: 3
• SYST 688 or OR 688 - Financial Systems Engineering II: Derivative Products and Risk Management Credits: 3

and two courses selected from the following (6 credits):

• SYST 568 or OR 568 - Applied Predictive Analytics Credits: 3
• SYST 573 - Decision and Risk Analysis Credits: 3
• SYST 664 - Bayesian Inference and Decision Theory Credits: 3
• SYST 671 or OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
• OR 604 - Practical Optimization Credits: 3
• OR 645 - Stochastic Processes Credits: 3

▲Concentration in Predictive Analytics (PRAN)

The ultimate goal of analytics of Big Data is to derive value by suggesting effective actions for the future. Predictive analytics focuses on the methods for deciding on the best course of action, taken into account possible constraints and risks. The concentration will provide students with skills that drive effective decision making and optimization. Students will learn the techniques to analyze both structured and unstructured data to derive meaningful knowledge, which will be useful for developing effective strategies and making optimal decisions.
The concentration emphasizes both analytical and practical aspects of predictive analytics. Students are expected to master the practical aspects of modeling and methods for optimization. Students are also expected to demonstrate proficiency in decision making, design of decision support systems, and risk analysis. The program prepares students for careers in big data analytics with a focus on strategic decision making in practical applications including financial engineering, health care, transportation, and intelligence.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

- CS 222 - Computer Programming for Engineers Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Required Concentration Courses (12 credits)

- OR 604 - Practical Optimization Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 568 or OR 568 - Applied Predictive Analytics Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3

and one course selected from the following: (3 credits)

- OR 603 - Sports Analytics Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- SYST 508 - Complex Systems Engineering Management Credits: 3
- SYST 584 - Heterogeneous Data Fusion Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- SYST 670 or OR 670 - Metaheuristics for Optimization Credits: 3

▲Concentration in Statistics for Analytics (STAN)

Provides students with skills necessary for gaining insight from data. Enables students to evaluate large data-sets from a rigorous statistical perspective, including theoretical, computational, and analytical techniques. Emphasis will be placed on developing deep analytical talent in the two areas of statistical modeling and data visualization. "Big Data" are well-known to encompass high levels of uncertainty and complex interactions and relationships. To gain knowledge from these data and hence inform decisions, elucidation of the core interactions and relationships must be done in a manner that acknowledges uncertainties in order to both minimize false signals and maximize true discoveries. Statistical modeling does exactly this – it accounts for uncertainty while identifying relationships. Visualization is often a critical component of modeling, but visualization also stands alone as an important tool for presentation of information, decision analysis, and process improvement.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• MATH 351 - Probability Credits: 3

Required Concentration Courses

• STAT 544 - Applied Probability Credits: 3
• STAT 654 - Applied Statistics II Credits: 3
• STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
• STAT 672 - Statistical Learning and Data Analytics Credits: 3

and one course selected from STAT courses numbered 540-775

Elective

• DAEN 698 - Data Analytics Research Project Credits: 1-3

Total: 30 credits

Management of Secure Information Systems, MS (VSE)

Banner Code: BU-MS-MSIS
Phone: 703-993-1880
Email: cyber@gmu.edu

Schools: Volgenau School of Engineering, School of Business, and Schar School of Policy and Government (formerly SPGIA)
Department: Multidisciplinary Programs (VS)

The Executive Management of Secure Information Systems MS, an multidisciplinary program offered by the Volgenau School of Engineering, the School of Business , and the Schar School of Policy and Government (formerly SPGIA) ; prepares professionals for the challenges of modern computerized information systems that have become increasingly complex and vulnerable to cyber-attacks, resulting in a significant number of government regulations. Consequently, those responsible for the safe, secure, and efficient operation of such systems need to grasp their technical aspects and be familiar with both the principles of management and the public policy impact of regulatory and organizational decisions.

The program is run as a cohort with no electives. The entire program has a duration of 16 months including about seven days of study abroad, which is included in the tuition. Applicants to the program are expected to have at least three years of full-time relevant work experience.

MS-MSIS Admission Requirements
Applicant requirements include:

- Application form and application fee.
- A bachelor's degree from a recognized university or an approved institution, recognized qualifications equivalent to a degree.
- Official copy of transcripts from all colleges and universities attended in the United States and abroad.
- Two professional letters of recommendation.
- Goals statement (statement of how and why applicants would benefit from the program).
- A current resume.
- English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelors, masters, or doctoral degree from a regionally accredited university in the United States, Canada (excluding province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard.

All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The minimum scores are: TOEFL: IBT (88 total with 20 points minimum in each section); CBT (230); and PBT (570); IELTS – Academic: 6.5 total band score.

- GMAT (recommended score: the mean GMAT scores of an entering class should meet or exceed 550 with an individual minimum of 500) or GRE (recommended score: 308). The GMAT or GRE may be waived if the applicant's record demonstrates the ability to succeed in a competitive and quantitative program.
- A minimum of three years of significant full-time work experience is required.

MS-MSIS Degree Requirements

Students are responsible for familiarization and compliance with the Academic Policies in this catalog.

Required Courses (36 credits)

- MSEC 510 - Foundations of Cyber Security Credits: 2
- MSEC 511 - Security Practices in the Enterprise Credits: 2
- MSEC 520 - Networking Principles Credits: 2
- MSEC 620 - Networking Security Credits: 2
- MSEC 630 - Secure Information System Governance, Regulation, and Compliance Credits: 2
- MSEC 641 - Enterprise Security Threats Credits: 1
- MSEC 642 - Enterprise Security Technologies Credits: 2
- MSEC 650 - Seminar: Enterprise Security Case Studies Credits: 1
- PUBP 610 - Organizations, Management, and Work: Theory and Practice Credits: 2
- PUBP 611 - Critical Infrastructure Protection in Theory, Policy and Practice Credits: 2
- MSIS 611 - Leadership and Change Management Credits: 2
- MSIS 614 - Financial and Cost Accounting Credits: 2
- MSIS 620 - Economics of Technology Management Credits: 2
- MSIS 641 - Innovation, Commercialization and Entrepreneurship Credits: 2
- MSIS 643 - Managerial Finance Credits: 2
- MSIS 711 - Deriving Strategic Value from IT Investments Credits: 2
- 3 credits of MSIS 735 - Capstone Project Credits: 1-3 or MSEC 720 - Capstone Project in Management of Secure Information Systems Credits: 1-3
- 3 credits of MSIS 750 - Global Practices in Security of Information Systems Credits: 1-3 or MSEC 710 - Global Residency Credits: 1-4
Mechanical Engineering

Phone: 703-993-5383

School: Volgenau School of Engineering

Faculty

Professors: Barton (chair), Cebral (joint appointment with Bioengineering)

Assistant Professor: Reagle

Adjunct Instructor: Eshete

Mechanical engineering is the broadest of the engineering disciplines, and traces its origins to antiquity. The discipline of mechanical engineering involves anything that moves or uses energy. There are two major stems in mechanical engineering: mechanical systems and thermal fluid systems. Mechanical engineers design, build, and analyze complex devices, systems, and processes that involve the conversion of energy from one form to another, the production of work, and the transport of energy and mass from one location to another.

Today, the scope of the mechanical engineering discipline is ever-expanding. Mechanical engineers work in industries that include, but are not limited to, the aerospace, bio-pharmaceutical, civil, computer and cyber, biomedical, industrial, materials and manufacturing industries. They provide innovative solutions for contemporary problems and address problems yet identified. For example, 3-D printed components are readily being used in manufactured components, as part of medical implants and devices and even in structural applications. The mechanical performance of the components will likely vary dramatically from the ideal laboratory environment in which they were produced. Mechanical engineers are needed to characterize these aggressive environments in which they may be used, design test matrices to study their performance, and determine environmentally-based mechanical properties needed for design.

The Mechanical Engineering, BS is designed to support the goal of educating leaders for the future -- men and women capable of meeting the needs of society. The curriculum is designed to provide its graduates with the technical skills and competencies to analyze and design both mechanical and thermal systems, and to give them an in-depth experience in one of these two areas. With a solid foundation in these discipline-specific areas, graduates of the program will be well-prepared to enter any of the industries identified above. All students will take core courses in both content areas through their junior year. During their senior year, they will have the opportunity to focus their program of study with a design elective and three technical electives. These electives can be arranged to focus on areas such as advanced manufacturing, aerospace, bioengineering, robotics, or sustainable energy.

Courses

The department offers all courses designated as ME in the Courses section of the catalog.

Bachelor of Science

Mechanical Engineering, BS

Banner Code: VS-BS-ME
Today, the role of mechanical engineer is ever expanding in order to find innovative solutions for contemporary problems, and to address problems yet to be identified. To meet the growing demands of worldwide energy needs spurred by population growth and dwindling supplies of fossil fuels, for instance, mechanical engineers seek innovations in nuclear energy, bio-fuels, wind, and tidal energies to build an energy portfolio that exploits these seemingly limitless resources. From product design, which spans from biomedical devices to turbo-machinery, to manufacturing, which develops machines and systems needed to process raw materials into these products, an awareness of the benefits of advanced materials for sensing and monitoring the health of these systems and an awareness of the stealth threats to manufacturing brought on by an ever present cyber threat are in the minds of the mechanical engineers. Now more mechanical engineers oversee the operations and management of large systems along with the fiscal and human resources needed to run them.

James Michener once said, "Scientists dream about doing great things. Engineers do them." Mechanical engineers use science to advance technologies and to develop products for the benefit of society, in a discipline which dates back to the earliest of times in civilization. The major in mechanical engineering has three program education objectives, namely:

- Graduates have demonstrated success as a mechanical engineer or their chosen career field;
- Graduates have advanced their educational pursuits through graduate education, professional registration, or similar means;
- Graduates have advanced their careers by engaging in professional society participation and community service outreach.

### Degree Requirements

Degree requirements include 121 credits distributed in three main areas: mechanical engineering, mathematics and basic science, and humanities and social sciences. Students must complete all math, science and Volgenau School of Engineering courses presented as part of the required 121 credits for the degree with a grade of C or better.

Students are required to see their faculty advisor at least once each year to plan their curriculum. For the BS ME degree, students must complete 121 credits, including all of the following:

#### Engineering Credits: 61

- ECE 285 - Electric Circuit Analysis I Credits: 3
- ECE 286 - Electric Circuit Analysis II Credits: 3
- ME 151 - Practicum in Engineering Credits: 2
- ME 211 - Statics Credits: 3
- ME 212 - Solid Mechanics Credits: 3
- ME 221 - Thermodynamics Credits: 3
- ME 231 - Dynamics Credits: 3
- ME 311 - Mechanical Experimentation I Credits: 1
- ME 313 - Material Science Credits: 3
- ME 321 - Mechanical Experimentation II Credits: 1
- ME 322 - Fluid Mechanics Credits: 3
- ME 323 - Heat Transfer Credits: 3
- ME 341 - Design of Mechanical Elements Credits: 3 OR ME 342 - Design of Thermal Systems Credits: 3
- ME 352 - Entrepreneurship in Engineering Credits: 3
• ME 432 - Control Engineering Credits: 4
• ME 443 - Mechanical Design I Credits: 3
• ME 444 - Mechanical Design II Credits: 3
• ME 453 - Developing the Societal Engineer Credits: 2

**Technical Electives:**
Students must complete 12 credits of the following.
• ME 431 - Systems Dynamics Credits: 3 (not repeatable)
• ME 498 - Independent Study in Mechanical Engineering Credits: 1-3 (repeatable)
• ME 499 - Special Topics in Mechanical Engineering Credits: 0-4 (repeatable)

**Mathematics and Science Credits: 32**

• CHEM 251 - General Chemistry for Engineers Credits: 4  **OR**  CHEM 211 - General Chemistry I Credits: 3  **and**  CHEM 213 - General Chemistry Laboratory I Credits: 1
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3
• ME 351 - Analytical Methods in Engineering Credits: 3
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• Students will select 3 credits from the list of pre-approved mathematics/science electives.

**Computer Science Credits: 4**

• CS 112 - Introduction to Computer Programming Credits: 4

**Communication and Economics Credits: 6**

• COMM 100 - Public Speaking Credits: 3  **OR**  COMM 101 - Interpersonal and Group Interaction Credits: 3
• ECON 103 - Contemporary Microeconomic Principles Credits: 3

**Additional Mason Core Credits: 18**

• Arts Credits: 3
• Global Understanding Credits: 3
• Literature Credits: 3
• Western Civilization/World History Credits: 3
• Written Communication (lower level) Credits: 3
• Written Communication (upper level) Credits: 3

Total: 121 credits

Writing Intensive Requirement

Mason's writing-intensive requirement is satisfied by ME 444 - Mechanical Design II (pending approval).

Capstone Experience Requirement

Mason's synthesis requirement for mechanical engineering majors is satisfied by ME 444 - Mechanical Design II Credits: 3.

Change of Major

Students who are considering mechanical engineering as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building.

Termination from the Major

No math, science or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the "Termination from the Major" section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.

Non-Degree

Mechanical Engineering Minor

Banner Code: ME
School: Volgenau School of Engineering
Department: Mechanical Engineering

Mechanical Engineering is the broadest of the engineering disciplines, concerned with anything that moves or uses energy. There are two major stems in mechanical engineering: mechanical systems and thermal fluid systems. Mechanical Engineers design, build, and analyze complex devices, systems and processes that involve the conversion of energy from one form to another, the production of work, and the transport of energy and mass from one location to another. This minor provides a foundation in mechanical engineering and is most appropriate for students with a strong mathematics and science background, such as a major in another engineering or science field. The minor is administered by the Volgenau School Dean's office.

Admissions and Minor Requirements

To be admitted to the minor, students must have completed MATH 114 and PHYS 160/PHYS 161 with a grade of C or better. The minor in mechanical engineering consists of a minimum of 20-21 credit hours of course work. All students must complete 14 credit hours of core courses. They must also choose one of three 6-7 credit hour elective options. All courses must be completed with a grade of C or better.

Program Core Requirements Credits: 14

- ENGR 107 - Introduction to Engineering Credits: 2 or ME 151 - Practicum in Engineering Credits: 2
- ME 211 - Statics Credits: 3
- ME 212 - Solid Mechanics Credits: 3
- ME 221 - Thermodynamics Credits: 3
- ME 231 - Dynamics Credits: 3

Elective Requirements Credits: 6-7

Option 1: Thermal Fluid Systems

- ME 322 - Fluid Mechanics Credits: 3
- ME 342 - Design of Thermal Systems Credits: 3

Option 2: Mechanical Systems

- ME 313 - Material Science Credits: 3
- ME 341 - Design of Mechanical Elements Credits: 3

Option 3: Systems Dynamics and Control
Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Phone: 703-993-1675
Web: civil.gmu.edu

School: Volgenau School of Engineering

Faculty

Professors: Arciszewski (emeritus), Goodings, Houck

Associate professors: Durant (acting chair), Urgessa, Venigalla

Assistant professors: Battistini, Ferreira, Kosoglu, Lattanzi, Maggioni, Tanyu, Zhu

Adjunct Faculty: Benton, Binning, Cristei, deBoinville, Doyle, Evans, Faghri, Fry, Haber, Hartmann, Hedges, Hieber, Judge, Kennedy, Kewaisy, Lade, Laib, Loulakis, Makdooom, Manous, McDonald, Pathak, Pennetti, Reseigh, Rodriguez, Schroedel, Subramanian, Teitelman, Thoesen, Woods, Yang, Younis, Yuan

The Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering (CEIE) offers BS, MS, MEng, and PhD degrees. These degree programs focus on the physical and organizational infrastructure essential to the functioning of an urban society. The bachelor's program in civil and infrastructure engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Civil and infrastructure engineering is the study of land, transportation, water resources, environment, structures, geotechnology, and construction from a civil engineering perspective and within a complex technological, social, political, economic, and environmental context. The focus is on how these systems are successfully conceived, developed, designed, built, operated, maintained, and renewed in the built environment. This applies to major metropolitan areas in developed countries, such as Washington, D.C. and its integrated suburbs, and extends to infrastructure issues in developing nations which often involve very different issues.

An urban society thrives and prospers when adequate, appropriate, reliable, robust, secure, and cost-effective infrastructure systems are provided. The investment in existing infrastructure and other urban systems in the United States and abroad is enormous. The investment required to maintain, operate, renew, and manage the evolution of these infrastructure systems in the future is even greater. The need for highly educated and creative professionals to confront and solve these continuing vital problems is pressing. Examples of infrastructure systems include water supply and distribution; streets, roads, and highways; wastewater management; transit; storm water management; public utilities; energy supply and distribution; telecommunications; buildings, facilities and structures; and solid waste management.

Courses
The department offers all courses designated CEIE in the Courses section of this catalog.

**Bachelor of Science**

**Civil and Infrastructure Engineering, BS**

*Banner Code: VS-BS-CEIE*

**School:** Volgenau School of Engineering  
**Department:** Sid and Reva Dewberry Department of Civil, Environmental and Infrastructure Engineering

The bachelor's degree program provides essential underpinnings in the theory and design methods of civil and infrastructure engineering for engineering practice. Students benefit from exposure to practical civil, environmental, and infrastructure engineering problems and their solutions in the classroom, lab, and field. The educational objectives of the Civil and Infrastructure Engineering program describe expectations for graduates approximately three to five years after obtaining their BS CIE degree. Graduates of the program will be professionals who:

- Engage in the engineering practice of planning, designing, constructing, operating and maintaining sustainable infrastructure;
- Participate in public discussions concerning infrastructure in the urban, suburban, and exurban setting by providing professional guidance;
- Stay current through continuing education opportunities, professional conferences, graduate school, and other self-learning experiences; have the ability to obtain and maintain professional licensing.

Civil engineering students can look forward to a career in local, state, and federal government organizations, and in architectural and engineering firms that specialize in land development, transportation, water resources, environment, structures, geotechnical, construction, and other related fields. The program also prepares students for continuing graduate studies for sophisticated practice, research and teaching.

This has been designated a Green Leaf program. For further information, please go to Green Leaf Programs and Courses.

This undergraduate program offers students the option of applying to the accelerated master's degree program. See Civil and Infrastructure Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS for specific requirements.

**Degree Requirements**

Degree requirements include 120 credits distributed in three main areas: mathematics and basic science, humanities and social sciences, and civil engineering analysis and design. Students must complete all math, science and Volgenau School of Engineering courses presented as part of the required 120 credits for the degree with a grade of C or better.

The prerequisite structure for these courses is extensive. Sample schedules, available from the department, provide a comprehensive listing of major and Mason Core requirements and serve as a guide to the progression of the courses to satisfy all prerequisites.

Students are required to see their faculty advisor at least once each year to plan their curriculum, and to develop an approved plan of study, which constitutes a learning plan for the degree program.

For the BS CIE degree, students must complete 120 credits, including all of the following:

**Civil Engineering Credits: 37**
• CEIE 203 - Geomatics and Engineering Graphics Credits: 3
• CEIE 210 - Statics Credits: 3
• CEIE 240 - Hydraulics Credits: 3
• CEIE 301 - Engineering and Economic Models in Civil Engineering Credits: 3
• CEIE 304 - Jr Engineering Competency Exam Credits: 0
• CEIE 310 - Mechanics of Materials Credits: 3
• CEIE 311 - Structural Analysis Credits: 3
• CEIE 331 - Soil Mechanics Credits: 3
• CEIE 340 - Water Resource Engineering Credits: 3
• CEIE 355 - Environmental Engineering and Science Credits: 3
• CEIE 360 - Introduction to Transportation Engineering Credits: 3
• CEIE 370 - Construction Systems Credits: 3
• CEIE 404 - Sr Engineering Competency Exam Credits: 0
• CEIE 409 - Professional Practice and Management in Engineering Credits: 1
• CEIE 490 - Senior Design Project Credits: 3

Computing Credits: 3

• CDS 130 - Computing for Scientists Credits: 3

Engineering Credits: 2

• ENGR 107 - Introduction to Engineering Credits: 2

Technical Electives Credits: 24

A total of 24 credit hours of CEIE Technical Elective courses must be selected. The first four CEIE technical core elective courses (12 credit hours) must be selected from four different specialty areas from among the six Civil Engineering specialty areas:

• construction engineering (either CEIE 471 - Construction Administration or CEIE 571 - Construction Administration) or (either CEIE 472 - Building Information Modeling or CEIE 572 - Building Information Modeling)
• environmental engineering (either CEIE 450 - Environmental Engineering Systems or CEIE 550 - Environmental Engineering Systems) or (either CEIE 453 - Water and Wastewater Treatment Processes or CEIE 553 - Water and Wastewater Treatment Processes)
• geotechnical engineering (either CEIE 432 - Foundation Design or CEIE 532 - Foundation Design) or (either CEIE 435 - Engineering Geology or CEIE 535 - Engineering Geology)
• structural engineering (either CEIE 412 - Structural Steel Design or CEIE 512 - Structural Steel Design) or (either CEIE 413 - Reinforced Concrete Design or CEIE 513 - Reinforced Concrete Design)
• transportation engineering (either CEIE 461 - Traffic Engineering or CEIE 561 - Traffic Engineering) or (either CEIE 462 - Urban Transportation Planning or CEIE 562 - Urban Transportation Planning)
water resources engineering (either CEIE 440 - Water Supply and Distribution or CEIE 540 - Water Supply and Distribution) or (either CEIE 442 - Open Channel Flow or CEIE 542 - Open Channel Flow).

Note: Students who choose to take a 500 graduate-level section must obtain prior approval by the department's undergraduate program director.

The remaining 12 credit hours of the CEIE Technical Elective courses may be selected from any CEIE 4XX course. One 3 credit hour course of those remaining credit hours may be from related advanced science or engineering course offerings. Approval from the student's academic advisor is required before a non-CEIE course is taken to meet senior technical elective requirements for the degree.

Mathematics Credits: 14

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3

Physics Credits: 9

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 266 - Introduction to Thermodynamics Credits: 1

Chemistry Credits: 4

- CHEM 251 - General Chemistry for Engineers Credits: 4 OR CHEM 211 - General Chemistry I Credits: 3 and CHEM 213 - General Chemistry Laboratory I Credits: 1

Biology Credits: 3

- BIOL 377 - Applied Ecology Credits: 3

Statistics Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Communication and Economics Credits: 6

• COMM 100 - Public Speaking Credits: 3  OR  COMM 101 - Interpersonal and Group Interaction Credits: 3
• ECON 103 - Contemporary Microeconomic Principles Credits: 3

Additional Mason Core Credits: 15

Students must complete all Mason Core requirements not fulfilled by major requirements with one modification. CIE students are required to take 6 credits of written communication, 3 credits of literature, and courses in two of the following three areas: arts, global understanding, and western civilization/world history. This exemption means that CIE students meet the Volgenau School of Engineering's requirement for humanities and social science courses by taking 21 credits rather than 24. The two additional Mason Core areas to be satisfied must be approved by the CEIE faculty advisor with the goal of best meeting the Mason Core needs of the student. All other Mason Core requirements must be met as stated in the Mason Core section of this catalog.

- Written Communication: 6 credits
- Literature: 3 credits
And courses selected from two of the following areas:

- Arts: 3 credits
- Western Civilization/world history: 3 credits
- Global Understanding: 3 credits

Total: 120 credits

CEIE Honors Program

The Sid and Reva Dewberry Department of Civil, Environmental and Infrastructure Engineering offers an Honors Program in Civil and Infrastructure Engineering that creates a community of outstanding scholars in civil engineering who share a commitment to learning, service, and leadership. The Program is crafted around the civil and infrastructure curriculum, and is distinct from the University Honors Curriculum. Entry to the Honors Program is by invitation, extended to students with a minimum high school GPA of 3.80.

The Honors program is challenging, designed for the highly motivated student, and consists of 120 credits. Honors students must satisfy requirements in addition to those of the normal BS CIE degree, including:

- An advanced communication course, COMM 320 or COMM 637, which may serve as a substitute for one CEIE (4xx) level senior technical elective.
- A minimum of 6 credits of CEIE graduate (5xx/6xx) level courses (these courses may substitute for CEIE (4xx) level senior technical electives by approval of the Department Chair). Students must submit a Graduate Course for Undergraduate Credit Form for approval to the course instructor and Department Chair.
Once admitted to the Honors Program, students must remain in good standing and maintain a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each semester for all courses counting toward the BS CIE degree, maintain continuous enrollment working toward the BS CIE degree, and abide by the Mason Honor Code.

**Writing-Intensive Requirement**

The university's writing-intensive requirement for civil and infrastructure engineering majors is satisfied by the successful completion of CEIE 301 - Engineering and Economic Models in Civil Engineering.

**Change of Major**

Students who are considering civil and infrastructure engineering as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building.

**Termination from the Major**

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the "Termination from the Major" section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

**Bachelor/Accelerated Master's**

**Civil and Infrastructure Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS**

School: Volgenau School of Engineering  
Department: Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Highly-qualified students in the Civil and Infrastructure Engineering, BS have the option of obtaining an accelerated Civil and Infrastructure Engineering, MS. Students in an accelerated degree program must fulfill all university requirements for the
Admission Requirements

Students in the Civil and Infrastructure Engineering, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. All other criteria for admission are identical to criteria for admission into the Civil and Infrastructure Engineering, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs. Students register for 6 credits of overlapping graduate level courses in place of undergraduate technical elective courses. The courses selected for this purpose must be approved by the academic advisor.

Degree Requirements

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Doctor of Philosophy

Civil and Infrastructure Engineering, PhD

Banner Code: VS-PHD-CEIE

School: Volgenau School of Engineering
Department: Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

The Doctor of Philosophy in Civil and Infrastructure Engineering (CIE) was created to prepare students for advanced leadership positions in research and development in the public or private sector, academics, or government. Students may elect to study in the areas of: environmental and water resources engineering, geotechnical engineering, structural engineering, or transportation engineering. Admitted students will complete both required and applicable course work in their technical interest area based on a plan of study prepared with a doctoral advisor. They will take qualifying exams that assess student's breadth of knowledge at the graduate level and competency to conduct research. They will form a doctoral committee and prepare and defend a dissertation proposal leading to PhD candidacy. Finally, they will conduct original scholarly research and prepare, then defend a doctoral dissertation. Both part-time and full-time study is available.

Admission Requirements

All general George Mason University and specific Volgenau School admission requirements (including deadlines) apply. In addition, all applicants, including Mason undergraduates, must submit the following:

- Official transcript of undergraduate and graduate course work,
- For applicants whose official language is not English, official TOEFL scores which meet the minimum requirements set by the Volgenau School,
- Three letters of recommendation from individuals knowledgeable about the applicant's professional or academic work (at least two of the letters should be from individuals with doctorates),
- Recent professional résumé,
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, contacts the student has made with potential faculty advisors, and an explanation of career and research goals,

Admission decisions will be based on the student's qualifications and the availability of a faculty advisor in their proposed area of research. The application materials will be reviewed by the department doctoral committee and decisions made with input from appropriate faculty members.

Financial support for outstanding applicants is available in the form of fellowships as well as research and teaching assistantships. For best consideration, applicants are encouraged to apply early and to contact potential faculty advisors to express interest in support.

**Reduction of Credit**

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 24 credits from a completed master's degree in civil engineering or other related fields. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

**Degree Requirements**

The PhD in Civil and Infrastructure Engineering requires 72 graduate credits, including 48 credits of graduate coursework and 24 credits of research. Admitted students are expected to hold a Bachelor of Science in Civil Engineering or degree in a closely-related science field.

Exceptionally-qualified students without a related bachelor’s or master’s degree may be admitted provisionally and required to take additional undergraduate- and graduate-level articulation courses prescribed by the doctoral committee, which will not count towards the PhD degree.

The following degree plan is based on a student who receives a full 24 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

**Doctoral Coursework (24 credits)**

A minimum GPA of 3.50 is required and no C grades are allowed for the 24 credits earned beyond the MS. A detailed plan of study will be prepared for each student upon acceptance into the program and in consultation with the faculty advisor, which outlines all course requirements to include:

**Required Courses (6 credits)**

The following must be completed while in residence in the program.

- CEIE 800 - Civil, Environmental, and Infrastructure Engineering Colloquium Credits: 1 (must be taken at least twice)
- CEIE 990 - Civil and Infrastructure Dissertation Topic Presentation Credits: 1

And one of the following three courses:
- CS 504 - Principles of Data Management and Mining Credits: 3
- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- CSI 690 - Numerical Methods Credits: 3
Courses chosen with Advisor (18 credits)

Remaining courses, especially in the student's technical interest area, will be chosen in consultation with his or her advisor.

- No more than three courses used for credit toward the PhD may be cross-listed as undergraduate courses. None may repeat material completed as part of the student's previous studies.

Qualifying Exam

The PhD qualifying exam is offered twice a year prior to the start of the fall and spring semesters. The qualifying exam is intended to test students' breadth of knowledge at the MS level in their research area and to evaluate readiness for research. Students entering with a MS degree are required to attempt the qualifying exam within 18 months of admission to the program. Students entering without a MS degree must attempt the qualifying exam within two years of admission to the program.

The qualifying exam consists of one written exam and one oral exam in the student's primary research area. The available examination areas include:

Area A: Environmental Engineering  
Area B: Geotechnical Engineering  
Area C: Structural Engineering  
Area D: Transportation Engineering  
Area E: Water Resources Engineering

The requirements of the written exam (deadlines for exam request, list of topics, allowed aid sheets, calculator policy etc.) are posted on the department's website. The oral exam is conducted by an examining committee of three CEIE graduate faculty, of whom two must be in the student's research area. Students give a five minute research presentation, and answer questions from the examination committee about the written exam, the research presentation and other related topics.

Students who receive an overall passing grade form a dissertation committee and register for CEIE 998 - Doctoral Dissertation Proposal. Students who receive an overall failing grade may petition to repeat the exam. If granted, the second attempt, which includes both the written and the oral exam, must be completed within one calendar year. The petition to repeat the exam must be received within one month of the first exam attempt. No more than two exam attempts are permitted. Students who do not receive an overall passing grade are terminated from the program.

Dissertation Research (24 credits)

Students become eligible for CEIE 998 upon passing the qualifying exam (preceding section). Upon admission to candidacy, which requires satisfactory preparation and defense of a dissertation proposal, students may register for CEIE 999.

- CEIE 998 - Doctoral Dissertation Proposal Credits: 1-12
- CEIE 999 - Doctoral Dissertation Credits: 1-12 (must complete a minimum of 12 credits)

Dissertation Committee

A dissertation committee (separate from the examination committee) is formed upon successful completion of the qualifying exams. The student, in consultation with their advisor, shall select at least three full-time CEIE Department faculty members, and at least one committee member from outside of the CEIE department. At least three members of the committee are to be members of the Mason graduate faculty. All committee members must hold earned doctorates and possess applicable knowledge and experience in the student's chosen topic. The CEIE Department Chair must approve the composition of the dissertation committee. Additional committee members from outside Mason (e.g., from industry, other institutions, etc.,) may be appointed if
approved by the majority of the CEIE faculty. The committee must be formed and approved before admission to candidacy (described in the next section) and before registering for CEIE 999 Dissertation Preparation. Substitutions to the dissertation committee are allowed with the approval of the CEIE Department chair.

**Dissertation Proposal Preparation and Advancement to Candidacy**

After successfully passing the qualifying exams and forming of a dissertation committee, the student may register for CEIE 998 research credits and begin preparation of the dissertation research proposal. At least 12 credits of CEIE 998 are required during which the student will consult with his or her advisor on the selection of an original scholarly topic and preparation of a formal research proposal. Students are also encouraged to register for the required CEIE 990 Civil and Infrastructure Dissertation Topic Presentation course during this time. Students must schedule a formal proposal defense (also known as the research competency exam) with all members of their chosen committee present. This cannot be done before successful completion of the qualifying exams. Committee members should receive printed copies for the final proposal not less than two weeks prior to the scheduled defense date.

The research competency exam (proposal defense) includes the written proposal and a presentation of the planned dissertation research. The dissertation proposal defense shall not include already completed research. The dissertation proposal defense is the main opportunity for the committee to provide input and for the dissertation committee members to examine the student’s knowledge in higher-level coursework and familiarity with existing and emerging research related to the student’s research area. After the student’s presentation, and after private deliberation, the committee makes a pass/fail determination that is given to the student by his or her advisor.

Students who pass the research competency exam are admitted to candidacy and become PhD Candidates. Students who do not pass the exam may, in consultation with their advisor, schedule a second exam within 120 days of receiving notice of the first exam result. Students who do not re-schedule and successfully pass the research competency within this period are dismissed from the program.

**Dissertation Research and Defense**

On successful completion of the dissertation proposal, students are to conduct original research under the guidance of their dissertation director and dissertation committee members. Students are not to schedule their dissertation defense sooner than two semesters after a successful proposal defense. The dissertation must represent achievement in research, must be a significant contribution to the field of civil engineering, and should be deemed publishable in refereed journals. When the majority of the research has been completed, the candidate is to submit a written draft of the dissertation to the doctoral dissertation committee and schedule an oral pre-defense with the doctoral dissertation committee. The pre-defense is to be attended by the doctoral dissertation committee and the department chair.

A final, public, oral defense may be scheduled no sooner than one month after the conclusion of the pre-defense, which will allow for a minimum of two weeks to advertise it broadly. The final defense is to be attended by the doctoral dissertation committee and the department chair. On successful completion of the oral defense, students must submit a final dissertation that meets the guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to defend the dissertation successfully, the student may request a second defense following the same procedures as the initial defense. This request has no time limit, other than the general time limits for the doctoral degree as per Mason policy. An additional pre-defense is not required; however, the student is strongly advised to consult with the committee before scheduling the second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program. Following a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of Doctor of Philosophy.

**Teaching Opportunities**

All PhD students are encouraged to participate in teaching activities in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory
assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student's advisor.

Total: 72 credits

Master of Science

Civil and Infrastructure Engineering, MS

Banner Code: VS-MS-CEIE

School: Volgenau School of Engineering  
Department: Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

The Master of Science (MS) degree is designed for students who have completed a bachelor's degree in civil engineering, although students with related undergraduate degrees may be considered for provisional admission. The MS educates students in the theory and practice of civil engineering science and design, with a technical concentration. The master's degree is increasingly expected for high level practice in civil engineering, and prepares graduates to practice in civil engineering for: federal, state, or local government; engineering design firms; construction firms; public utilities; non-governmental organizations; and local and regional planning firms, among others. The MS degree serves as a foundation for subsequent study in a doctoral program in civil engineering, as well as for graduate studies in architecture, law, business, economics, finance, and public policy and administration.

Full-time students typically complete the degree in one and a half, to two years.

An accelerated master's option is available to students in the bachelor's program. See Civil and Infrastructure Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS for specific requirements.

Admission Requirements

To be considered for admission to the program, a candidate must:

- Satisfy general University and Volgenau School requirements for admission to a graduate program,
- Have earned a baccalaureate degree in engineering or a related science,
- Provide three letters of reference, submitted by former professors or supervisors,
- Provide a professional résumé.

Acceptance to the degree program is based on an assessment of the applicant's capacity to pursue graduate studies successfully. Consideration is given to the undergraduate record, any previous graduate work, professional work experience, and reference letters. Students with minor admission deficiencies may be provisionally admitted subject to completing an articulation program. Prescribed courses taken in the articulation program are not creditable toward the MS degree.

Degree Requirements

All MS students must develop a faculty-approved plan of study with a minimum of 30 graduate credits. These credits include two core courses (CEIE 601 - Infrastructure Modeling and CEIE 605 - Risk and Uncertainty in Civil Engineering), specific
requirements of a concentration declared by the student, and seminar requirement (CEIE 795 - Civil and Infrastructure Engineering Seminar).

Plan of Study

Students are responsible for developing and receiving advisor approval on a plan of study no later than the end of their second semester of study. Courses taken without prior approval by the faculty advisor may not be accepted for credit toward the degree. No more than three courses used for credit toward the MS may be cross-listed as undergraduate courses. None may repeat material completed as part of the student’s previous studies. Most MS courses are offered on a three-semester rotation.

Core Courses (6 credits)

All MS students must complete the following two core courses within the first 12 credit hours of their MS studies. These courses provide a common background for understanding the breadth and complexity of civil and infrastructure engineering and for analyzing and solving engineering problems.

- CEIE 601 - Infrastructure Modeling Credits: 3
- CEIE 605 - Risk and Uncertainty in Civil Engineering Credits: 3

Concentration Requirements (24 credits)

Students must declare one of the five available concentration areas. These concentration areas are:

- Construction Project Management
- Environmental and Water Resources Engineering
- Geotechnical Engineering
- Structural Engineering
- Transportation Engineering

▲ Concentration in Construction Project Management (CPM)

Choose at least three of the following five construction project management core courses:

- CEIE 571 - Construction Administration Credits: 3 *
- CEIE 572 - Building Information Modeling Credits: 3 *
- CEIE 573 - Legal Aspects of the Construction Process Credits: 3
- CEIE 575 - Design for Constructability Credits: 3
- CEIE 576 - Construction Cost Estimating Credits: 3
  *Cross-listed as undergraduate course

Electives

The remaining elective credits depend on whether the student is pursuing research credits or not. Students choose one of the following options (also outlined in the Notes section below).

- Thesis: 6 credits of CEIE 799 and at least 9 credits of electives
- Project: 3 credits of CEIE 798 and at least 12 credits of electives
All coursework: at least 15 credits of electives

A list of approved electives for the construction project management concentration is provided below. Note that the remaining construction project management core courses can also be selected as electives.

- CEIE 524 - Introduction to Bridge Engineering Credits: 3
- CEIE 525 - Structural Evaluation and Rehabilitation Credits: 3
- CEIE 531 - Earth Retaining Structures and Slope Stability Credits: 3
- CEIE 532 - Foundation Design Credits: 3 *
- CEIE 607 - Public Infrastructure Management and Finance Credits: 3
- GBUS 510 - Engineering Marketing and Financial Analysis Credits: 3
- CEIE 636 - Sources of Geotechnical Data Credits: 3
- CEIE 679 - Special Topics in Construction Management Credits: 0-3
- GGS 553 - Geographic Information System Credits: 3
- ENGR 794 - Graduate Internship Credits: 0-3
  *Cross-listed as undergraduate course

▲ Concentration in Environmental and Water Resources Engineering (EWRE)

Choose at least three of the following five environmental and water resources engineering core courses:

- CEIE 641 - Water Resources Engineering I: Principles and Practice Credits: 3
- CEIE 657 - Environmental Engineering Microbiology Credits: 3
- CEIE 658 - Water Quality Credits: 3
- CEIE 742 - Water Resources Engineering II: Water Resource Systems Credits: 3
- COMM 637 - Risk Communication Credits: 3

Electives

The remaining elective credits depend on whether the student is pursuing research credits or not. Students choose one of the following options (also outlined in the Notes section below).

- Thesis: 6 credits of CEIE 799 and at least 9 credits of electives
- Project: 3 credits of CEIE 798 and at least 12 credits of electives
- All coursework: at least 15 credits of electives

A list of approved electives for the environmental and water resources engineering concentration is provided below. Note that the remaining environmental and water resources engineering core courses can also be selected as electives.

- CEIE 540 - Water Supply and Distribution Credits: 3 *
- CEIE 542 - Open Channel Flow Credits: 3 *
- CEIE 550 - Environmental Engineering Systems Credits: 3 *
- CEIE 553 - Water and Wastewater Treatment Processes Credits: 3 *
- CEIE 607 - Public Infrastructure Management and Finance Credits: 3
  or GBUS 510 - Engineering Marketing and Financial Analysis Credits: 3
- CEIE 634 - Groundwater and Geoenvironmental Design Credits: 3
- CEIE 642 - Flood Hazards Engineering Credits: 3
- CEIE 643 - Coastal Flood Hazards Credits: 3
- CEIE 649 - Special Topics in Water Resources Engineering Credits: 0-3
- CEIE 659 - Hazardous Waste Credits: 3
- CEIE 664 - Transportation Engineering and the Environment Credits: 3
- CEIE 683 - Water and Wastewater Systems Security Credits: 3
- CHEM 627 - Aquatic Environmental Chemistry Credits: 3
- CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3
- CLIM 714 - Land-Climate Interactions Credits: 3
- CSI 501 - Introduction to Scientific Programming Credits: 3
- CSI 690 - Numerical Methods Credits: 3
- CSI 720 - Fluid Mechanics Credits: 3
- CSI 721 - Computational Fluid Dynamics I Credits: 3
- EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
- EVPP 670 - Environmental Law Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- GGS 656 - The Hydrosphere Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3
- GGS 787 - Scientific Data Mining for Geoinformatics Credits: 3
- STAT 554 - Applied Statistics I Credits: 3

*Cross-listed as undergraduate courses

⚠️ Concentration in Geotechnical Engineering (GEOE)

Choose at least three of the following five geotechnical engineering core courses:

- CEIE 531 - Earth Retaining Structures and Slope Stability Credits: 3
- CEIE 634 - Groundwater and Geoenvironmental Design Credits: 3
- CEIE 635 - Advanced Soil Mechanics Credits: 3
- CEIE 636 - Sources of Geotechnical Data Credits: 3
- CEIE 638 - Advanced Foundation Design Credits: 3

Electives

The remaining elective credits depend on whether the student is pursuing research credits or not. Students choose one of the following options (also outlined in the Notes section below).

- Thesis: 6 credits of CEIE 799 and at least 9 credits of electives
- Project: 3 credits of CEIE 798 and at least 12 credits of electives
- All coursework: at least 15 credits of electives

A list of approved electives for the geotechnical engineering concentration is provided below. Note that the remaining geotechnical engineering core courses can also be selected as electives.

- CEIE 524 - Introduction to Bridge Engineering Credits: 3
- CEIE 532 - Foundation Design Credits: 3 *
- CEIE 535 - Engineering Geology Credits: 3 *
- CEIE 573 - Legal Aspects of the Construction Process Credits: 3
- CEIE 575 - Design for Constructability Credits: 3
- CEIE 607 - Public Infrastructure Management and Finance Credits: 3
  or GBUS 510 - Engineering Marketing and Financial Analysis Credits: 3
- CEIE 639 - Special Topics in Geotechnical Engineering Credits: 1-3
Concentration in Structural Engineering (STRE)

Choose at least three of the following five structural engineering core courses:

- CEIE 526 - Advanced Steel Design Credits: 3
- CEIE 527 - Pre-stressed Concrete Credits: 3
- CEIE 611 - Advanced Structural Analysis Credits: 3
- CEIE 612 - Structural Mechanics Credits: 3
- CEIE 613 - Structural Dynamics Credits: 3

Electives

The remaining elective credits depend on whether the student is pursuing research credits or not. Students choose one of the following options (also outlined in the Notes section below).

- Thesis: 6 credits of CEIE 799 and at least 9 credits of electives
- Project: 3 credits of CEIE 798 and at least 12 credits of electives
- All coursework: at least 15 credits of electives

A list of approved electives for the structural engineering concentration is provided below. Note that the remaining structural engineering core courses can also be selected as electives.

- CEIE 512 - Structural Steel Design Credits: 3 *
- CEIE 513 - Reinforced Concrete Design Credits: 3 *
- CEIE 524 - Introduction to Bridge Engineering Credits: 3
- CEIE 525 - Structural Evaluation and Rehabilitation Credits: 3
- CEIE 532 - Foundation Design Credits: 3 *
- CEIE 575 - Design for Constructability Credits: 3
- CEIE 607 - Public Infrastructure Management and Finance Credits: 3
  or GBUS 510 - Engineering Marketing and Financial Analysis Credits: 3
- CEIE 619 - Special Topics in Structural Engineering Credits: 0-3
- CEIE 620 - Intelligent Structural Systems Credits: 3
- CEIE 623 - Advanced Reinforced Concrete Design Credits: 3
- CSI 690 - Numerical Methods Credits: 3
- CSI 742 - The Mathematics of the Finite Element Method Credits: 3
  *Cross-listed as undergraduate course

Concentration in Transportation Engineering (TRNE)

Choose at least three of the following five transportation engineering core courses:

- CEIE 662 - Travel Demand Modeling Credits: 3
- CEIE 663 - Intelligent Transportation Systems Credits: 3
- CEIE 664 - Transportation Engineering and the Environment Credits: 3
• CEIE 767 - Traffic Engineering Modeling and Analysis Credits: 3
• STAT 554 - Applied Statistics I Credits: 3

Electives

The remaining elective credits depend on whether the student is pursuing research credits or not. Students choose one of the following options (also outlined in the Notes section below).

• Thesis: 6 credits of CEIE 799 and at least 9 credits of electives
• Project: 3 credits of CEIE 798 and at least 12 credits of electives
• All coursework: at least 15 credits of electives

A list of approved electives for the transportation engineering concentration is provided below. Note that the remaining transportation engineering core courses can also be selected as electives.

• CEIE 560 - Public Transportation Systems Credits: 3
• CEIE 561 - Traffic Engineering Credits: 3 *
• CEIE 562 - Urban Transportation Planning Credits: 3 *
• CEIE 607 - Public Infrastructure Management and Finance Credits: 3
  or GBUS 510 - Engineering Marketing and Financial Analysis Credits: 3
• CEIE 665 - Travel Survey Methods and Data Analysis Credits: 3
• CEIE 667 - Multi-modal Transportation Systems Credits: 3
• CEIE 668 - Transportation Economics Credits: 3
• CEIE 669 - Special Topics in Transportation Engineering Credits: 0-3
• CEIE 762 - Network Models for Transportation Planning Credits: 3
• CEIE 763 - Discrete Choice Analysis in Transportation Credits: 3
• CS 504 - Principles of Data Management and Mining Credits: 3
• GGS 553 - Geographic Information System Credits: 3
  *Cross-listed as undergraduate course

Note:

Electives outside of the chosen concentration can only be taken or substituted with the approval of the faculty advisor.

Additional Notes on MS Project and MS Thesis

As part of the plan of study, students may elect to pursue research credits.

MS Project

Students complete CEIE 798, during which they prepare and present a scholarly paper. The scholarly paper is a technical report on an independent study, laboratory or computer experimentation, or literature search on a current civil and infrastructure engineering topic selected under the guidance of a faculty advisor. CEIE 798 credits count toward the 30 credit hours required for the MS degree.

• CEIE 798 - Research Project in Civil Engineering Credits: 3
MS Thesis

Students complete CEIE 799, which counts toward the 30 credit hours required for the MS degree. The MS thesis should reflect a significant, independent research effort that advances engineering science, and is worthy of publication. The work is conducted under the guidance of a faculty thesis advisor, and the final written thesis and oral defense are defended before a three-member faculty committee. In addition, students must make a satisfactory presentation of the thesis in the CEIE graduate seminar. The thesis is recommended for those students who wish to develop and document their research skills, or contemplate subsequent enrollment in a PhD program. Students are advised of the university’s continuous registration requirement for thesis and dissertation research credits. Upon first enrolling in CEIE 799, the student must continue registration for each fall and spring semester until the thesis is successfully completed. CEIE 799 credits count toward the 30 credit hours required for the MS degree.

- CEIE 799 - Master’s Thesis Credits: 1-6 (must complete 6 credits)

Seminar Requirement

All degree candidates must attend a minimum of five graduate seminars approved by the CEIE Department for the degree program. Students must enroll in CEIE 795 each semester (fall and spring) for the duration of their MS studies until they receive a satisfactory (S) grade. This course is used to verify the seminar attendance requirement and is repeatable.

- CEIE 795 - Civil and Infrastructure Engineering Seminar Credits: 0

Total: 30 credits

Non-Degree

Environmental Engineering Minor

Banner Code: EENG

School: Volgenau School of Engineering
Department: Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

The Sid and Reva Dewberry Department of Civil, Environmental and Infrastructure Engineering offers a minor in Environmental Engineering. Students with engineering majors in CEIE, BIOE, and SEOR, and non-engineering majors in Biology, Chemistry, Environmental Science and Policy, Geography and Geoinformation Science, and Geology are especially encouraged to consider this offering. The minor prepares students through additional coursework for subsequent graduate studies in water and environmental engineering at Mason or elsewhere, and for employment in environmental engineering, although the minor by itself does not constitute an engineering qualification.

Minor Requirements

The curriculum includes nine credits of CEIE engineering core courses and ten credits outside CEIE as follows:
- CEIE 240 - Hydraulics Credits: 3
- CEIE 355 - Environmental Engineering and Science Credits: 3
- CEIE 450 - Environmental Engineering Systems Credits: 3 or CEIE 453 - Water and Wastewater Treatment Processes Credits: 3
- PHYS 331 - Fundamentals of Renewable Energy Credits: 3
- EVPP 355 - Ecological Engineering and Ecosystem Restoration Credits: 4 or EVPP 378 - RS: Ecological Sustainability Credits: 4
- GGS 302 - Global Environmental Hazards Credits: 3 or GGS 319 - Air Pollution Credits: 3

Total: 19 credits

Master of Engineering

Geotechnical, Construction, and Structural Engineering, MEng

Banner Code: VS-MENG-GCS

School: Volgenau School of Engineering
Department: Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

The Master of Engineering (MEng) program in combined Geotechnical, Construction, and Structural Engineering (GeoConStruct) was designed in collaboration with leading engineers in practice to develop a course of study that recognizes that geotechnical engineering, construction engineering, and structural engineering are practiced together and should be taught together in an integrated manner. Its purpose is to educate engineers for practice, for excellence in design and execution now, laying the groundwork for practice demands 25 years from now. It is a program that balances theory and practice, building on the foundation of an undergraduate degree in civil engineering.

The MEng is practice-focused and entirely course-based. Students who wish to undertake a degree requiring a project or a research thesis should consider the Master of Science (MS) in Civil and Infrastructure Engineering with concentration in geotechnical or construction or structural engineering. All courses offered for the MEng program are open to MS students.

Admission Requirements

To be considered for admission to the MEng program, a candidate must:

- Satisfy general University and Volgenau School requirements for admission to a graduate program,
- Have earned a baccalaureate degree in engineering or a related science,
- Provide three letters of recommendation from individuals knowledgeable about the applicant's academic or professional work,
- Provide a professional résumé.

Acceptance to the degree program is based on an assessment of the applicant's capacity to pursue graduate study successfully. Students are assumed to have completed an undergraduate degree in civil engineering. Consideration is given to the undergraduate record, any previous graduate work, professional work experience, and reference letters. Students with minor admission deficiencies or with undergraduate degrees in related fields, such as geology or another branch of engineering, may be
provisionally admitted subject to completing an articulation program of civil engineering undergraduate courses. Courses required for articulation are not creditable toward the MEng degree.

Research Assistantships and Fellowships are typically not awarded to students pursuing the MEng Program because it is entirely a course-based degree, rather than a research degree. Students interested in Teaching Assistantships (usually reserved for full-time graduate study) should indicate their interest on their application and also contact the Department after an admissions decision is made.

Degree Requirements

All MEng students must develop a faculty-approved plan of study with a minimum of 30 credits of graduate coursework. The coursework presented for the degree must include at least three MEng core courses (9 credits) and approved electives (21 credits). Note that the fourth or fifth core course that is not counted for the core requirement may also be selected as an elective. There is no project or thesis requirement for the MEng degree. Most MEng courses are offered once every three semesters and are scheduled to meet in the late weekday afternoons or evenings.

Core Courses:

9 Credits from the Following:

- CEIE 524 - Introduction to Bridge Engineering Credits: 3
- CEIE 525 - Structural Evaluation and Rehabilitation Credits: 3
- CEIE 531 - Earth Retaining Structures and Slope Stability Credits: 3
- CEIE 575 - Design for Constructability Credits: 3
- CEIE 605 - Risk and Uncertainty in Civil Engineering Credits: 3

Elective Courses:

21 Credits from the Following:

- CEIE 512 - Structural Steel Design Credits: 3 *
- CEIE 513 - Reinforced Concrete Design Credits: 3 *
- CEIE 526 - Advanced Steel Design Credits: 3
- CEIE 527 - Pre-stressed Concrete Credits: 3
- CEIE 532 - Foundation Design Credits: 3 *
- CEIE 535 - Engineering Geology Credits: 3 *
- CEIE 571 - Construction Administration Credits: 3 *
- CEIE 572 - Building Information Modeling Credits: 3 *
- CEIE 573 - Legal Aspects of the Construction Process Credits: 3
- CEIE 576 - Construction Cost Estimating Credits: 3
- CEIE 607 - Public Infrastructure Management and Finance Credits: 3
- CEIE 611 - Advanced Structural Analysis Credits: 3
- CEIE 612 - Structural Mechanics Credits: 3
- CEIE 613 - Structural Dynamics Credits: 3
- CEIE 619 - Special Topics in Structural Engineering Credits: 0-3
- CEIE 620 - Intelligent Structural Systems Credits: 3
- CEIE 623 - Advanced Reinforced Concrete Design Credits: 3
- CEIE 634 - Groundwater and Geoenvironmental Design Credits: 3
• CEIE 635 - Advanced Soil Mechanics Credits: 3
• CEIE 636 - Sources of Geotechnical Data Credits: 3
• CEIE 638 - Advanced Foundation Design Credits: 3
• CEIE 639 - Special Topics in Geotechnical Engineering Credits: 1-3
• CEIE 679 - Special Topics in Construction Management Credits: 0-3
• GBUS 510 - Engineering Marketing and Financial Analysis Credits: 3
  *Cross-listed as undergraduate courses

Total: 30 Credits

Statistics

Phone: 703-993-3645
Web: statistics.gmu.edu

School: Volgenau School of Engineering

Faculty

Professors: Carr, Davis (associate chair), Rosenberger (chair)

Associate professors: Diao, Miller, Sutton, Tang, Vidyashankar

Assistant professors: Izmirli, Johnson, Strazzeri, Zhao

Emeritus faculty: Bolstein

Statistical methods and methods for data analysis are crucial for researching and exploring the life sciences, natural sciences, social sciences, business, nursing, education, and engineering. The Statistics Department offers a variety of introductory courses and more advanced course work in specialized statistical methodology and applications. The focus of the department's offerings is applied, computational, and theoretical, with special emphasis on biostatistics, graphics and visualization, federal and survey statistics, and data analytics.

Courses

The Statistics Department offers all courses designated STAT in the Courses section of this catalog.

Introductory courses are targeted for undergraduates in the College of Humanities and Social Sciences and the College of Health and Human Services, as well as in the Volgenau School. The STAT 250–350 sequence is targeted for general audiences, while the STAT 344–354 sequence is targeted for technical and scientific audiences. STAT 362 deals with computer statistical packages and is appropriate as a second or third course for students from a wide variety of backgrounds. It is strongly recommended for students who elect to minor in data analysis.

Although the department does not offer an undergraduate degree in statistics, it does offer a minor in data analysis and a minor in statistics. Also, a variety of advanced undergraduate courses are available for inclusion in other degree programs.
Bachelor/Accelerated Master's

BS (selected)/Statistical Science, Accelerated MS

School: Volgenau School of Engineering
Department: Statistics

Highly-qualified students in selected BS programs (see below) have the option of obtaining an accelerated Statistical Science, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements

Students enrolled in a BS degree in any one of the Volgenau School major areas, in the Mathematics, BS program from the College of Science, or in the Economics, BS program from the College of Humanities and Social Sciences may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.00. Criteria for admission are identical to criteria for admission to the Statistical Science, MS program, which include successful completion of the following Mason courses each with a grade of C or better: MATH 113, MATH 114, MATH 213; MATH 203 or MATH 321; STAT 250 or STAT 344; and STAT 346 or MATH 351.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with grades of B or better in two 500-level STAT courses selected from STAT 544, STAT 554, and STAT 574.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Doctor of Philosophy

Statistical Science, PhD

Banner Code: VS-PHD-STAT

School: Volgenau School of Engineering
Department: Statistics

The PhD in Statistical Science represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and practice. The degree program is a hybrid of mathematical theory, computation, and
data analysis; and students are expected to be proficient in all three. Current research areas of key department faculty in the program include biostatistics, statistical genetics, statistical graphics, data confidentiality, networking analysis, and data analytics.

Admission Requirements

Students should have a master's degree in a mathematically-intensive discipline with a minimum 3.50 GPA. Students entering with a master's degree are expected to have completed coursework equivalent to STAT 544, STAT 554, STAT 652, and STAT 654 with exceptional performance. The program also requires a course in advanced calculus, MATH 315 or equivalent, with a B or better. In exceptional circumstances, talented students with a mathematically-intensive undergraduate degree may be admitted. The GRE Exam is required for admission.

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 24 credits with a master's degree in statistics, mathematics, or similar discipline, or by 30 credits with a Master's degree from the George Mason University Department of Statistics. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Degree Requirements

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. The following degree plan is based on a student who receives a 24 credit reduction. Students who receive more or less than a 24 credit reduction should consult with their advisor.

Doctoral Course Work (24 credits)

Students are required to complete 24 credits of advanced emphasis course work, including four core courses:

- STAT 778 - Algorithms and Simulation for Statistics in C Credits: 3
- STAT 971 - Probability Theory Credits: 3
- STAT 972 - Mathematical Statistics I Credits: 3
- STAT 973 - Mathematical Statistics II Credits: 3

The remaining four courses are selected and approved by the doctoral supervisory committee and the PhD Program Director and should be numbered 600 or above. STAT 652 and STAT 654 do not count toward advanced emphasis coursework, if a student has received a 24 credit reduction.

Qualifying Exam

Written qualifying exams will be taken in the following areas:

- Applied Probability
- Applied Statistics
- Statistical Inference

Qualifying exams are offered in August and January. Students are required to take the qualifying exams within one year of admission. Supported students entering with a Master's degree are required to take the qualifying exams within one semester of admission. Students who do not pass all three exams in two consecutive exam periods are terminated from the program.
Dissertation Research (24 credits)

In order to advance to candidacy, students must complete all coursework, pass the qualifying and comprehensive examinations, and defend a dissertation proposal.

Select 24 credits from the following:
- STAT 990 - Dissertation Topic Presentation Credits: 1 (required)
- STAT 998 - Doctoral Dissertation Proposal Credits: 1-12
- STAT 999 - Doctoral Dissertation Credits: 1-12 (must complete a minimum of 12 credits)

Doctoral Committee Selection

Following successfully passing the qualifying exams, students should select a dissertation director and a doctoral studies committee. The chair of the doctoral studies committee must be a member of the graduate faculty with a regular appointment in the Department of Statistics, and will typically be the dissertation director. The doctoral studies committee consists of a chair, two members of the graduate faculty who hold regular appointments in the Department of Statistics, and an external member. The doctoral studies committee must be approved by the director of the doctoral program in statistical science.

Advancement to Candidacy

Admission to candidacy is acquired on completion of an oral comprehensive exam administered by the doctoral supervisory committee, covering the four core courses and four advanced emphasis courses, and a dissertation proposal. A student who fails the oral comprehensive exam may take it a second time, within six months. If the student fails a second time, the student is terminated from the program. A student must wait at least six weeks after passing the oral comprehensive exam before the dissertation proposal. A student who fails the dissertation proposal may take it a second time, within six months. If the student fails a second time, the student is terminated from the program.

Doctoral Defense

The dissertation defense serves as the student’s final examination and is conducted by the doctoral supervisory committee. Both the comprehensive exam and final exam are scheduled on approval of a written request to the department chair.

For more information, e-mail specific questions to statistics@gmu.edu.

Total: 72 credits

Graduate Certificate

Applied Statistics Graduate Certificate

Banner Code: VS-CERG-ASTA

School: Volgenau School of Engineering
Department: Statistics
This certificate trains students in data analysis and statistical methodology. It is intended to complement PhD and MS programs outside the Department of Statistics. It is also intended to be responsive to the needs of those who teach or work in government/industry and want to increase their knowledge of statistics.

The certificate emphasizes the application of statistical tools, not theory. As such, there are no required prerequisite math courses, although one semester of calculus is strongly recommended.

This certificate provides a clear record of additional instruction in statistics for future graduate programs or employers.

The graduate certificate may only be pursued on a part-time basis.

**Admission Requirements**

Applicants should have an undergraduate degree from an accredited institution, with a minimum overall GPA of at least 3.00 (on a 4.00 scale). No specific undergraduate degree is required. Applicants are expected to have basic computer literacy. Successful completion of an undergraduate course in statistics is required for admission. One semester of calculus is strongly recommended.

**Certificate Requirements**

The certificate program consists of 12 credits: one required course (3 credits) plus 9 credits of elective courses.

**Required course (3 credits)**

- STAT 535 - Analysis of Experimental Data Credits: 3

**Elective courses (9 credits)**

Choose from the following list:

- STAT 515 - Applied Statistics and Visualization for Analytics Credits: 3
- STAT 517 - Experimental Design Credits: 3
- STAT 525 - Nonparametric Statistics and Categorical Data Analysis Credits: 3
- STAT 526 - Applied Regression Analysis Credits: 3
- STAT 530 - Foundations of Statistical Thinking Credits: 3

**Notes:**

- With prior written approval of the graduate certificate coordinator, a student with sufficient background in statistics may replace STAT 535 with 3 credits chosen from the list of elective courses.
- STAT 535 is a prerequisite for STAT 517, STAT 525, STAT 526, and STAT 530.

**Total: 12 credits**

**Federal Statistics Graduate Certificate**
Banner Code: VS-CERG-FSS

School: Volgenau School of Engineering
Department: Statistics

This professional program is targeted at upgrading the skills of practitioners. The federal statistical system is a complex data collection and analysis system that requires a wide variety of multidisciplinary skills for its maintenance. The federal statistics certificate is intended to respond to the need for broad training in statistics, survey methods, and data analysis, including graphics and data visualization. The program is extremely flexible and can be tailored to the needs of students within the federal statistical sector. It is also intended to be responsive to the needs of those in state and local governments, and those in the private sector involved in the collection, interpretation, or statistical analysis of federal data.

The graduate certificate may only be pursued on a part-time basis.

Admission Requirements

Potential candidates must hold a bachelor's degree and have taken at least two courses in calculus and one course in calculus-based probability and statistics. These minimal course requirements are normally satisfied by students who have successfully completed courses equivalent to the following Mason courses: MATH 113, MATH 114, and STAT 344. Candidates must also be computer literate. Applicants typically have degrees in such fields as sociology, economics, engineering, mathematics, statistics, and business. Candidates should inquire with the department's graduate coordinator for information on program planning. Courses are offered in late afternoon and evening and are particularly suitable for part-time students.

Certificate Requirements

The certificate program consists of 12 credits: 9 credits of certificate courses plus 3 credits of electives. Some courses may have prerequisites beyond minimal admission requirements for which students must qualify or seek a waiver from the appropriate instructor.

Certificate Courses (9 credits)

Choose from the following list. The certificate courses build the foundations of statistical analysis and survey methods. All of these certificate courses, except for STAT 535, may be used for credit toward the Statistical Science, MS. Credit is granted for only one of STAT 535 and STAT 554.

- STAT 535 - Analysis of Experimental Data Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics I Credits: 3
- STAT 560 - Biostatistical Methods Credits: 3
- STAT 574 - Survey Sampling I Credits: 3
- STAT 654 - Applied Statistics II Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 656 - Regression Analysis Credits: 3
- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 674 - Survey Sampling II Credits: 3
Elective Courses (3 credits)

Elective courses may be chosen from STAT courses numbered 500-775.

Total: 12 credits

Master of Science

Biostatistics, MS

Banner Code: VS-MS-BSTA

School: Volgenau School of Engineering
Department: Statistics

The MS in Biostatistics will allow students to specialize in the design and analysis of health-related and biological studies, while maintaining the rigor and technical training of the Statistical Science master's program.

In this degree, students will take a statistics core and a "bio" core, involving courses in public health, biology, and clinical medicine (including ethics). It also involves a research core which allows students to solve real data problems in the biological or health area and collaborate with other scientists in an interdisciplinary team. Finally, students will choose from electives in bioinformatics, global and community health, or targeted statistics courses.

This graduate degree prepares students for analyzing difficult data specific to biology and health. The program, with its research core, will also be sufficiently rigorous for students who wish to pursue a PhD in Biostatistics.

Admission Requirements

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy. They also must hold a bachelor's degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, and calculus-based probability. Applicants with degrees in such fields as mathematics, statistics, and some engineering programs usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the following Mason courses: MATH 113, MATH 114, MATH 213; MATH 203 or MATH 321; STAT 250 or STAT 344; and STAT 346 or MATH 351. Coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

Degree Requirements

In addition to meeting general requirements that apply to master's degrees at Mason, all students must complete the 24-credit core requirements for the degree. A grade of “B-” or better is required in all 500-level statistics core courses. Students build on these core requirements by choosing 12 credits of electives.
Eight core courses (24 credits)

Statistics Core (9 credits):

The Statistics core provides the basic probability, statistical analysis techniques, and statistical modeling tools that all biostatisticians must know, and provides a basis for higher level elective coursework.

- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics I Credits: 3
- STAT 654 - Applied Statistics II Credits: 3

Bio Core (9 credits):

The Bio core is designed to provide the biological background necessary for biostatisticians. These courses offer preparation in the areas of public health and epidemiology (GCH 712 - Introduction to Epidemiology), as well as bioinformatics (BINF 630 - Bioinformatics Methods). In addition, this portion of the core curriculum ensures that students are trained in the statistical techniques required for clinical medicine, and includes material on ethics in research (STAT 560 - Biostatistical Methods).

- GCH 712 - Introduction to Epidemiology Credits: 3
- BINF 630 - Bioinformatics Methods Credits: 3
- STAT 560 - Biostatistical Methods Credits: 3

Research Core (6 credits):

The Research core has been designed to assist students in the development of the requisite skills for careers in consulting or research. These courses will allow students to consult directly with biologists and medical and public health scientists on real data problems and provide opportunities to write reports and give oral presentations (STAT 634 - Case Studies in Data Analysis). This section also includes STAT 798 - Master's Research Project which requires that a master's project be completed under the guidance of a faculty in the Department of Statistics. It involves applications of biostatistical methodology to either the design or analysis of biostatistical data. Students will work directly with the advisor for a semester and write a master's level report.

- STAT 634 - Case Studies in Data Analysis Credits: 3
- STAT 798 - Master's Research Project Credits: 3

Four elective courses (12 credits)

The electives labeled STAT are specifically chosen from the Department's master's-level electives to include techniques that are particularly important for biostatisticians.

- GCH 782 - International Research Ethics and Methods Credits: 3
- GCH 806 - Advanced Multivariate Statistics and Data Analysis for Health Care Research Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
Total: 36 credits

Mathematics and Statistical Science Dual-Degree MS (VS)

Banner Codes: SC-MS-MATH, VS-MS-STAT

Schools: Volgenau School of Engineering and College of Science
Department: Statistics and Mathematical Sciences

This program allows students to earn an MS degree in Mathematics and an MS degree in Statistical Science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for both the Mathematics, MS and the Statistical Science, MS programs. A joint faculty committee from the Mathematical Sciences and Statistics Departments make final admission decisions into the dual-degree program.

MS-MATH/STAT Dual-Degree Requirements

The dual-degree program requires a total of 48 credits as specified below:

- MATH 621 - Algebra I Credits: 3
- MATH 675 - Linear Analysis Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3 or MATH 678 - Partial Differential Equations Credits: 3
- MATH 685 - Numerical Methods Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics I Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 654 - Applied Statistics II Credits: 3

Elective Credits

- 12 elective credits in MATH courses numbered 615 or higher, excluding MATH 653, MATH 654, MATH 655, and MATH 799.
- 12 elective credits from any STAT courses numbered 540-775.
Total: 48 credits

Notes:

- Students in either the BS/Accelerated MS in Mathematics program or the BS(selected)/Accelerated MS in Statistical Science program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the Mathematics, MS or the Statistical Science, MS.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

**Operations Research and Statistical Science Dual-Degree MS (STAT)**

**Banner Codes:** VS-MS-OPRS, VS-MS-STAT

School: Volgenau School of Engineering
Department: Statistics

This program allows students to earn an MS in Operations Research and an MS in Statistical Science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

**Admission Requirements**

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

**MS-OPRS/STAT Dual Degree Requirements**

The dual degree program requires a total of 48 credits as specified below.

**Required Courses (24 credits)**

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 699 - Masters Project Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics I Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 654 - Applied Statistics II Credits: 3
Elective Credits in OR Courses (12 credits)

12 elective credits in OR courses at the 600 level, including at least one deterministic methods course and at least one stochastic methods course.

**Deterministic Methods Courses:**
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

**Stochastic Methods Courses:**
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 674 - Dynamic Programming Credits: 3
- OR 675 - Reliability Analysis Credits: 3
- OR 677 - Statistical Process Control Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3

Elective Credits in STAT Courses (12 credits)

12 elective credits from any STAT courses numbered 540-775.

Notes:

- Students currently enrolled in one of the MS programs must declare pursuit of the dual MS within one year of matriculation into the first MS program.
- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS (selected)/Operations Research, Accelerated MS program or the BS (selected)/Statistical Science, Accelerated MS program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

**Total: 48 credits**

Statistical Science, MS

**Banner Code:** VS-MS-STAT

School: Volgenau School of Engineering
Department: Statistics
Statistical science is regarded as one of the oldest and most successful information technology (IT) subjects. It focuses on the conversion of raw data into information. In this graduate program, students are trained in the theory and practice of statistical methodology, particularly as it relates to high-technology applications.

An accelerated master's option is available to students in selected bachelor's of science programs. See BS (selected)/Statistical Science, Accelerated MS for specific requirements.

**Admission Requirements**

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy. They also must hold a bachelor's degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, and calculus-based probability. Applicants with degrees in such fields as mathematics, statistics, and some engineering programs usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the following Mason courses: MATH 113, MATH 114, MATH 213; MATH 203 or MATH 321; STAT 250 or STAT 344; and STAT 346 or MATH 351. Course work taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

**Degree Requirements**

In addition to meeting general requirements that apply to master's degrees at Mason, all students must complete the 12-credit core requirements for the degree. Grades of B- or better are required in two of the core courses: STAT 544 and STAT 554. Students build on these core requirements by choosing 12 credits of methodology courses and 6 credits of electives.

Students select either the professional or research option, depending on career ambitions. This choice must be made no later than the end of the semester in which 15 credits have been completed. The professional option provides MS degree qualifications to those seeking an expanded knowledge base in modern statistical theory and practice but do not wish to pursue a research career. The research option is for students planning to continue with a PhD degree, or begin/continue careers in statistical methodology research.

**Professional Option:**

The professional option focuses on completing coursework in modern statistical theory and practice. 30 credits are required for the degree: 12 credits of core courses (taken by all MS students), 12 credits of methodology courses, and 6 credits of electives. Students electing this option are encouraged to pursue a broad background in statistical science, and they may seek to concentrate on applications of statistical methodology to other disciplines.

Students who select the professional option may elect to complete a master's research project resulting in a technical report. This report is not an original research report but a scholarly essay on a topic of current interest in the statistical science discipline. The technical report is usually about 20 to 25 pages long and demonstrates the student's ability to read and synthesize current technical literature into a scholarly essay. The report is evaluated by the student's adviser, taking into account the comprehensiveness of the coverage of the scientific literature, the accuracy of presentation and interpretation, and the literary style. Students are notified of their evaluations, and they may be required to revise their report to further develop their skills in preparing reports on technical subjects. The report is usually written in the context of 3 credits of STAT 798 - Master's Research Project, which count as elective credits. Students opting not to complete a research project must take 30 credits of coursework.

**Research Option:**

The research option requires 30 credits, including 6 credits that must be in independent research (thesis). Research is done under the guidance of a faculty member. Research may be carried out at Mason or, if appropriate, at nearby facilities. For example, students may pursue research at their place of employment on topics of interest to their employer, provided the research meets the standards of the university. The thesis is usually written in the context of 6 credits of STAT 799 - Master's Thesis, which count as elective credits. The remaining 24 credits include the 12 core credits and 12 methodology credits.
In addition to satisfying general university requirements for a master's degree, candidates who select the research option must submit a thesis based on the research to the student's thesis committee, which must give preliminary approval. The composition and appointment of this committee follows graduate program policies.

Candidates also must pass a final oral exam that concentrates on, but is not limited to, the area on which the thesis is written. The exam is administered by the student's thesis committee, and all interested members of the graduate faculty are invited to attend and participate in the questioning. The thesis committee makes the final decision on whether the candidate passes or fails.

Core Courses (12 credits)

The core coursework covers the basic elements of statistics at the graduate level. STAT 544 covers the major mathematical framework for statistical theory and practice. STAT 652 provides basic statistical theory. After completing this course, students have the theoretical basis from which statistical methods are derived.

STAT 554 is a survey of statistical methods that have become the backbone of statistical practice. Focus in this course is on techniques that quantify random behavior. The final core course is STAT 654, which provides an overview of principles of statistical modeling.

- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics I Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 654 - Applied Statistics II Credits: 3

Methodology Courses (12 credits)

Methodology courses may be chosen from any STAT courses numbered 540-775.

Elective Courses (6 credits)

Elective courses may be chosen from any STAT courses numbered 500-519, 540-799; or from the following list of courses from other departments:

- ECE 535 - Digital Signal Processing Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECON 637 - Econometrics I Credits: 3
- MATH 555 - Actuarial Modeling I Credits: 3
- MATH 556 - Actuarial Modeling II Credits: 3
- MATH 653 - Construction and Evaluation of Actuarial Models I Credits: 3
- MATH 654 - Construction and Evaluation of Actuarial Models II Credits: 3
- OR 531 - Analytics and Decision Analysis Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 675 - Reliability Analysis Credits: 3 or SYST 675 - Reliability Analysis Credits: 3
- OR 677 - Statistical Process Control Credits: 3 or SYST 677 - Statistical Process Control Credits: 3
- OR 719 - Graphical Models for Inference and Decision Making Credits: 3 or CSI 775 - Graphical Models for Inference and Decision Making Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
  or CSI 674 - Bayesian Inference and Decision Theory Credits: 3

Notes:

- Credit toward the MS in Statistical Science will not be given for both STAT 515 and STAT 663.
- Credit toward the MS in Statistical Science will not be given for both MATH 654 and STAT 668.
- A student concurrently enrolled in the Actuarial Sciences Graduate Certificate and the MS in Statistical Science may count MATH 555 and MATH 556 as elective courses and may count MATH 653 and MATH 654 as methodology courses. The Graduate Certificate in Actuarial Sciences must be completed prior to or concurrently with the MS in Statistical Science. Otherwise, at most two of MATH 555, 556, 653, and 654 can be counted toward the MS in Statistical Science as elective courses; none can be applied as methodology courses.

Total: 30 credits

Non-Degree

Data Analysis Minor

Banner Code: DATA

School: Volgenau School of Engineering
Department: Statistics

The minor provides students with a background in data analysis and statistical methodology. It is intended to complement undergraduate degree programs such as computer science, economics, environmental engineering, geography, mathematics, nursing, psychology, public administration, sociology, and systems engineering.

Minor Requirements

The minor requires 15 credits: a core sequence of 6 credits, plus 9 credits of electives. Grades of C or better are required in all courses. At least 9 of the 15 credits must be in STAT courses. At least 8 credits must be in courses not required by the student's major.

Core Sequence Credits: 6

To satisfy the core requirement, students must complete one of these sequences.

- STAT 250 - Introductory Statistics I Credits: 3
- STAT 350 - Introductory Statistics II Credits: 3 or STAT 435 - Analysis of Experimental Data Credits: 3

OR

- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
Provided the 9 elective credits are all STAT courses, mathematics majors may substitute:

- MATH 351 - Probability Credits: 3
- MATH 352 - Statistics Credits: 3

Elective Credits: 9

The 9 elective credits must be chosen from a list of courses approved by the department's undergraduate coordinator. Courses currently approved for the minor are the following:

- STAT 362 - Introduction to Computer Statistical Packages Credits: 3
- STAT 455 - Experimental Design Credits: 3
- STAT 456 - Applied Regression Analysis Credits: 3
- STAT 463 - Introduction to Exploratory Data Analysis Credits: 3
- STAT 465 - Nonparametric Statistics and Categorical Data Analysis Credits: 3
- STAT 474 - Introduction to Survey Sampling Credits: 3
- STAT 499 - Special Topics in Statistics Credits: 3
- BENG 322 - Health Data Challenges Credits: 3

Total: 15 credits
Statistics Minor

Banner Code: STIC

School: Volgenau School of Engineering
Department: Statistics

The minor in Statistics provides students with a background in the theory and application of statistical methodology. It is intended to complement undergraduate degree programs in the Volgenau School and the College of Science, especially those programs that require MATH 113, MATH 114, and STAT 344 as a part of the major requirements.

To be admitted to the minor, students must have completed MATH 113 and MATH 114 with a grade of C or better.

Minor Requirements

The minor in Statistics requires 15 credit hours of course work. Grades of C or better are required in all courses. At least 8 credits must be in courses not required by the student's major.

Core Requirements Credits: 12

- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3
- STAT 456 - Applied Regression Analysis Credits: 3

Elective Credits: 3

One course chosen from:

- STAT 455 - Experimental Design Credits: 3
- STAT 463 - Introduction to Exploratory Data Analysis Credits: 3
- STAT 465 - Nonparametric Statistics and Categorical Data Analysis Credits: 3
- STAT 474 - Introduction to Survey Sampling Credits: 3

Total: 15 credits

Notes:

- STAT 346 and a course in statistics, such as STAT 250, can be substituted for the STAT 344 core requirement.
- Students enrolled in the Mathematics, BS may substitute MATH 351 and MATH 352 for STAT 344 and STAT 354.
Systems Engineering and Operations Research

Phone: 703-993-1670
Web: seor.gmu.edu

School: Volgenau School of Engineering

Faculty

Professors: Adelman, Chang, Chen, Hoffman, Laskey, Nash, Sofer (chair), Zaidi

Associate professors: Brouse, Costa, Ganesan, Loerch, Sherry, Shortle

Assistant professors: Huang, Xu

Research and affiliate professors: Wagner, Wolman

Adjunct professors: Alexander, Bailey, Barry, Burke, Dam, Charboneau, Clemons, Comer, Ferreiro, Killam, Laveson, Morris, Maxwell, Mulhearn, Rothwell, Stephenson, Wieland, Woodaman

Emeritus faculty: Donohue, Palmer

The Systems Engineering and Operations Research (SEOR) Department offers a bachelor's degree in systems engineering, a minor in systems engineering and operations research, a minor in aviation flight training and management, a master's degree in systems engineering, a master's degree in operations research, and a doctoral degree in systems engineering and operations research. The department also offers a concentration in predictive analytics within a school-wide Data Analytics Engineering, MS. In addition, the department offers six certificate programs at the master's level: architecture-based systems integration; command, control, communications, computing, and intelligence (C4I); military operations research; computational modeling; financial systems engineering and systems engineering of software-intensive systems. The Department also offers a dual degree MS in Operations Research and Statistical Science jointly with the Statistics Department.

Systems engineers determine the most effective ways to use all of a system's components: people, machines, materials, information, and energy. The engineers plan, design, implement, and manage integrated systems, working to ensure performance, safety, reliability, and maintainability. They also work to ensure that systems are delivered on time at a reasonable cost. Examples of systems are computer networks, the national airspace system, automobiles, intelligent robots, the electric grid, the Metro, and Mason. Whereas other engineering disciplines concentrate on individual aspects of a system, such as electronics, ergonomics, or software, systems engineers focus on the system as a whole. Systems engineering, perhaps more than any other engineering discipline, is involved with the human and organizational aspects of developing the desired system. Systems engineering is the people-oriented engineering profession.

Operations research is the professional field that uses analytical methods in engineering to support management decision making, often focusing on how best to allocate limited resources. Operations researchers do for organizations what physicists do for the physical world: they try to find order in apparent chaos by identifying the structure in complex situations and understanding how the components of organizations interact. The goal is to explain and predict the effects of actions taken on these systems, and use the information to make informed decisions. Much of this work is developing and manipulating mathematical and computer models of organizational systems composed of people, machines, information, procedures, and frequently, big data. The overall purpose is to provide a rational basis for decision-making.

There is much overlap between systems engineering and operations research. The department encourages students of either discipline to elect courses in the other. For more information, go to seor.gmu.edu.

Courses
The department offers all courses designated SEOR, SYST and OR in the Courses section of this catalog.

**Bachelor of Science**

**Systems Engineering, BS**

**Banner Code:** VS-BS-SYST

School: Volgenau School of Engineering  
Department: Systems Engineering and Operations Research

The program leading to the BS in systems engineering prepares students for a professional career in systems engineering. The program reflects the systems engineer's unique perspective, which considers all aspects of a system throughout its lifetime. Mason's systems engineering program is interdisciplinary, drawing from engineering, computer science, operations research, psychology, and economics. The core systems engineering courses tie these diverse threads to provide a global understanding of how individual engineering disciplines fit into the development of complex, large-scale systems. Students gain depth in a technical area by selecting a sequence of technical electives that constitute an emphasis. Students choose their own emphasis with the help of their advisor. A year-long senior design project provides hands-on experience in applying various systems engineering methods and tools.

The mission of the undergraduate program is to equip students with the ability to participate productively in the many professional activities associated with engineering a trustworthy system that satisfies client needs. The term "system" is interpreted broadly to include information, telecommunication, defense, health delivery, transportation, energy or manufacturing systems, as well as corporate processes.

The objectives of the Bachelor of Science in Systems Engineering Program at George Mason University are to produce graduates who are able to:

- Apply critical thinking, quantitative methods, systems thinking, and principles of engineering to the engineering of contemporary and future systems.
- Apply systems engineering methods, processes, models and tools to the engineering of contemporary and future systems.
- Work successfully, professionally, and ethically as members and leaders of multi-disciplinary teams.

This program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The requirements for the degree may be satisfied through part-time enrollment.

The undergraduate program offers students the option of applying to the following accelerated master's degree programs: Operations Research, Systems Engineering, and Telecommunications.

**Degree Requirements**

In addition to the Mason Core requirements, students must meet specific requirements for this degree. In the first two years, students obtain a basic foundation in mathematics, natural sciences, computing, writing, humanities, arts, and social sciences. The systems engineering program builds on this foundation, teaching theoretical knowledge, practical skills, and the ability to apply systems thinking to problems. Teamwork, collaborative learning, analytical skills, practical problem solving, and oral and written communication are strongly stressed.

Degree requirements for the systems engineering major include 123 credits. All students in the Systems Engineering program must complete the following courses with a grade of C or better: MATH 203, MATH 214, CS 211, PHYS 260, STAT 344, and STAT 354. Students must complete the following:
Mathematics and Statistics Credits: 23

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3

Natural Sciences Credits: 12

The BS in Systems Engineering requires 12 credits of natural science. The courses should be intended for science and engineering students and some include a two course sequence with laboratories. Students must complete 8 credits of physics as follows:

- PHYS 160 - University Physics I Credits: 3 and PHYS 161 University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3 and PHYS 261 University Physics II Laboratory Credits: 1
  The remaining 4 credits must be chosen from the following list of courses. Students who select the Bioengineering technical emphasis area are strongly encouraged to take BIOL 213.
- PHYS 262 - University Physics III Credits: 3 and PHYS 263 University Physics III Laboratory Credits: 1
- CHEM 251 - General Chemistry for Engineers Credits: 4 OR CHEM 211 General Chemistry I Credits: 3 AND CHEM 213 - General Chemistry Laboratory I Credits: 1
- BIOL 213 - Cell Structure and Function Credits: 4

Computer Science Credits: 7

- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3

Communication and Economics Credits: 6

- COMM 100 - Public Speaking Credits: 3 OR COMM 101 - Interpersonal and Group Interaction Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Engineering Credits: 2
Systems Engineering Credits: 55

Students must complete each of these courses with a grade of C or better.

- SYST 101 - Understanding Systems Engineering Credits: 3
- SYST 210 - Systems Design Credits: 3
- SYST 220 - Dynamical Systems I Credits: 3
- SYST 221 - Systems Modeling Laboratory Credits: 1
- SYST 320 - Dynamical Systems II Credits: 3
- SYST 330 - Systems Methods Credits: 3
- SYST 335 - Discrete Systems Modeling and Simulation Credits: 3
- SYST 371 - Systems Engineering Management Credits: 3
- SYST 395 - Applied Systems Engineering Credits: 3
- SYST 470 - Human Factors Engineering Credits: 3
- SYST 473 - Decision and Risk Analysis Credits: 3
- SYST 489 - Senior Seminar Credits: 3
- SYST 490 - Senior Design Project I Credits: 3
- SYST 495 - Senior Design Project II Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3
- 3 approved technical electives selected from one of the Technical Emphasis Areas below. Credits: 9

Additional Mason Core Credits: 18

Students must complete all Mason Core requirements not fulfilled by major requirements.

- ENGH 101 - Composition Credits: 3
- ENGH 302 - Advanced Composition Credits: 3 (must complete natural sciences and technology section)
- Literature: 3 credits
- Arts: 3 credits
- Western Civilization/World History: 3 credits
- Global Understanding: 3 credits

Advising and Plan of Study

All systems engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study. This plan of study, contained in the detailed pamphlet available from the SEOR office, constitutes a learning plan for the degree program. The plan of study must be signed by the student’s advisor and the Department Chair. The plan of study must be updated and signed by the advisor at least once a year.

Technical Emphasis Areas

The systems engineering program requires 9 credits of technical electives. Students must select one of the following technical emphases, each containing three courses.
Aviation Systems

- SYST 420 - Network Analysis Credits: 3
- SYST 460 - Introduction to Air Traffic Control Credits: 3
- SYST 461 - Air Transportation System Engineering Credits: 3

Bioengineering

- BENG 313 - Physiology for Engineers Credits: 3
  And two courses from:
- BENG 304 - Modeling and Control of Physiological Systems Credits: 3
- BENG 406 - Introduction to Biomechanics Credits: 3
- BENG 420 - Bioinformatics for Engineers Credits: 3

Control Systems

- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- SYST 421 - Classical Systems and Control Theory Credits: 3

Computer Network Systems

- SYST 420 - Network Analysis Credits: 3
- ECE 465 - Computer Networking Protocols Credits: 3
- TCOM 500 - Modern Telecommunications Credits: 3

Data Analytics

- CS 310 - Data Structures Credits: 3
- CS 484 - Data Mining Credits: 3
- STAT 463 - Introduction to Exploratory Data Analysis Credits: 3 OR SYST 438 - Analytics for Financial Engineering and Econometrics Credits: 3

Engineering Systems

- CEIE 210 - Statics Credits: 3
- CEIE 240 - Hydraulics Credits: 3
- CEIE 310 - Mechanics of Materials Credits: 3
Financial Engineering

- SYST 438 - Analytics for Financial Engineering and Econometrics Credits: 3
- STAT 463 - Introduction to Exploratory Data Analysis Credits: 3 or STAT 455 - Experimental Design Credits: 3
- SYST 488 - Financial Systems Engineering Credits: 3

Mechanical Engineering

Mechanical Design

- ME 211 - Statics Credits: 3
- ME 212 - Solid Mechanics Credits: 3
- ME 341 - Design of Mechanical Elements Credits: 3

OR

Thermal Fluids

- ME 221 - Thermodynamics Credits: 3
- ME 322 - Fluid Mechanics Credits: 3
- ME 323 - Heat Transfer Credits: 3
  OR ME 342 - Design of Thermal Systems Credits: 3

Operations Research

- OR 481 - Numerical Methods in Engineering Credits: 3
- SYST 420 - Network Analysis Credits: 3
- SYST 465 - Pricing in Optimization and Game Theory Credits: 3

Software-Intensive Systems

- CS 310 - Data Structures Credits: 3
- CS 321 - Software Engineering Credits: 3
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3

Synthesis Requirement

Mason's synthesis requirement for systems engineering majors is satisfied by successful completion of SYST 495 - Senior Design Project II. Students who do not pass SYST 495 with a C or better must retake both SYST 490 and SYST 495.
Writing-Intensive Requirement

Mason’s writing-intensive requirement for systems engineering majors is satisfied by successful completion of SYST 489 - Senior Seminar.

Total: 123 credits

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see the “Termination from the Major” section under AP.5 Undergraduate Policies.

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 and STAT 250.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Change of Major

Students who want to change their major to systems engineering must have a GPA of at least 2.75 in all math, physics, engineering, and computer science courses required for the major and have completed MATH 114 with a grade of B or better.

Bachelor/Accelerated Master's

BS (selected)/Operations Research, Accelerated MS

School: Volgenau School of Engineering
Department: Systems Engineering and Operations Research

Highly-qualified students in selected BS programs (see below) have the option of obtaining an accelerated Operations Research, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admission Requirements
Mason undergraduate students majoring in civil and infrastructure engineering, computer engineering, computer science, electrical engineering, or systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

**Accelerated Option Requirements**

Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table.

For BS candidates, these graduate courses replace the corresponding undergraduate courses. The undergraduate version of these courses may not be applied to the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
<th>Credit may not be received for both courses.</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 420</td>
<td>SYST 521</td>
<td></td>
</tr>
<tr>
<td>SYST 473</td>
<td>SYST 573</td>

<tr>
<td>OR 442</td>
<td>OR 542</td>
<td></td>
</tr>
</tbody>
</table>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**BS (selected)/Systems Engineering, Accelerated MS**

School: Volgenau School of Engineering  
Department: Systems Engineering and Operations Research

Highly-qualified students in selected BS programs (see below) have the option of obtaining an accelerated Systems Engineering, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree. For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Admission Requirements**

Mason undergraduate students majoring in civil and infrastructure engineering, computer engineering, computer science, electrical engineering, or systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.
Accelerated Option Requirements

Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table.

For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Doctor of Philosophy

Systems Engineering and Operations Research, PhD

Banner Code: VS-PHD-SEOR

School: Volgenau School of Engineering
Department: Systems Engineering and Operations Research

The doctoral program in Systems Engineering and Operations Research offers a unique integration of systems engineering and operations research. This integration gives students a strong analytical and computational capability on the one hand and an overarching systems perspective that is well-grounded in application on the other. No other department in the nation offers a PhD degree program that covers systems engineering and operations research in this integrated manner. The program prepares students for leadership positions in research and development in government, industry, research organization, and academia.

The program includes: course requirements; a qualifying exam that tests fundamental concepts in systems engineering and operations research; a comprehensive exam that tests the research competency of the student; dissertation proposal defense; dissertation research; and dissertation predefense and defense. All general Mason and specific Volgenau School requirements apply to this program.
PhD dissertations are extremely time intensive, and successful completion requires full time focus. It is expected that students who have reached candidacy (that is, successfully presented their dissertation proposal) will spend full time on their research for at least one academic year and will attend the majority of the SEOR departmental seminars throughout that period.

**Admission**

All general Mason and specific Volgenau School admissions requirements apply. Candidates for the PhD program typically must hold an MS degree from an accredited institution of higher education in systems engineering, operations research or related areas in engineering, mathematics, and computer science with a minimum graduate GPA of 3.50 and a minimum undergraduate GPA of 3.00. In addition, well-qualified candidates holding a BS degree in these areas may apply directly to the PhD program.

All applicants should have a strong background in engineering mathematics, which includes three semesters of calculus, differential equations, linear algebra, and probability. In addition, students entering the doctoral program must have a sound working knowledge in computing.

The admission process involves submitting the application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results, three letters of reference, a résumé and a statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided, if they are not in English; in some cases, applicants will be required to have documents evaluated by an external agency. A satisfactory score on the TOEFL examination is required for non-native English speakers. All of an applicant's background is examined before an admission decision is made.

**Reduction of Credit**

The doctoral program is a 72 credit hour program; however, students entering with a Master's degree in a related discipline will be given a reduction of credit up to 24 hours. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

**Degree Requirements**

The 72 hours of required doctoral-level credits typically consist of 48 credits of coursework and 24 credits of dissertation research. Students who receive a reduction of credit will complete a minimum of 48 credits as follows; students entering without an MS will need at least 24 additional credits of coursework.

All decisions concerning the student's course requirements and plan of study must be approved by the dissertation committee chair, as well as by the department's doctoral coordinator.

**Doctoral Coursework (24 credits)**

A GPA of 3.50 is required, and no grade of C is allowed in these 24 credits.

Students lacking prerequisites for their courses or lacking the coursework to complete the qualifying exams or their dissertation may be required to take additional courses.

- **OR 568 - Applied Predictive Analytics** Credits: 3
- **SYST 763 - Research Methods in Systems Engineering and Information Technology** Credits: 3
- 12 credits of 700-level SEOR approved courses: a list of approved courses is available from the department
- 6 credits in SYST or OR courses numbered 600 or higher, excluding SYST 699 - Masters Project and OR 699 - Masters Project
  - No more than 3 credits are allowed for a directed reading course.
All courses and course substitutions must be approved by the student's dissertation committee chair and the SEOR doctoral coordinator.

Additional Course Work Requirements (24 credits)

Students entering without a Master's degree are required to complete an additional 24 credits of Master's level courses, including the following:

- SYST 505 - Systems Engineering Principles Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- 12 additional credits from one of two alternatives (systems engineering or operations research). Consult the SEOR Department for the list of allowable courses.

With appropriate selection of courses, students may obtain the MS degree in systems engineering or operations research by completing 6 additional credits, including 3 approved credits from the advanced emphasis courses (which may also apply towards the PhD degree advanced emphasis requirements) and 3 credits of either SYST 699 or OR 699. Consult the SEOR Department for further detail. Credits taken in the courses SYST 699 or OR 699 may not be applied towards the PhD degree program requirements.

Qualifying Exams

The exams are primarily for testing the students' familiarity with fundamental concepts. Each student must take the following four exams within two years of enrolling in the program:

- Systems Engineering Principles
- Systems Engineering Design
- Deterministic Models
- Stochastic Models

A student who passes three of the four exams in the first attempt must retake and pass the failed exam within one year. A student who passes fewer than three exams in the first attempt must retake and pass an entire set of four exams within one year. After two unsuccessful attempts, a student is dismissed from the PhD program.

Dissertation Research (24 credits)

Choose 24 credits from the following:

- SEOR 998 - Doctoral Dissertation Proposal Credits: 1-12
- SEOR 999 - Doctoral Dissertation Credits: 1-12 (must complete a minimum of 12 credits)

Doctoral Supervisory Committee

Students should select a dissertation director and a doctoral supervisory committee as soon as possible. It is recommended that the committee be formed by the end of the second or third semester of study. The dissertation director must be a member of the SEOR graduate faculty or a member of the Mason graduate faculty with approval from the SEOR department chair. The doctoral supervisory committee must include at least three members from the SEOR department-approved graduate faculty, and at least
one non-SEOR member from the Mason graduate faculty. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. At least four members of the committee must be members of the Mason graduate faculty.

Comprehensive Exam

The comprehensive exam is taken after the student has satisfactorily completed all the advanced emphasis course work requirements in the approved plan of study filed by the student. The examiners will include the supervisory committee plus any outside examiners considered appropriate. However, the supervisory committee determines whether the student passes or not. The comprehensive exam consists of a written examination of 8 hours in length and an oral examination. The committee will determine if the student has a mastery of the advanced emphasis coursework. If a student fails the comprehensive exam, the student may request a re-examination within 60 days of receiving notice of the exam result. The request should be made in writing to the doctoral coordinator. If the student fails the re-examination or does not request a re-examination within 60 days, the student will be dismissed from the PhD program. In such a case, with recommendation of the supervisory committee and approval of the SEOR Chair, the student may apply his/her coursework towards a Master's degree.

Dissertation Proposal

After passing the comprehensive exam, each doctoral student prepares a written dissertation proposal, which is presented to the doctoral supervisory committee. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree.

Dissertation Defense

When the central portions of the research have been completed to the point where the student is able to describe the original contributions of the dissertation effort, a candidate submits the written dissertation to the supervisory committee and schedules an oral predefense with the committee. The predefense is attended by the supervisory committee. The supervisory committee must approve the work or the student must schedule a second predefense.

Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, with an announcement posted for at least two weeks. The defense must be attended by the supervisory committee and the department’s doctoral coordinator, unless an exception has been approved in advance by the doctoral coordinator. Following a satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in systems engineering and operations research. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than the general time limits for the doctoral degree. An additional predefense is not required, but the student is strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program.

Total: 72 credits

Graduate Certificate

Architecture-Based Systems Integration Graduate Certificate
This certificate is available to students who hold bachelor's degrees in engineering and scientific disciplines or have graduate status in such programs. Admission requirements are identical to those for the master's degree in systems engineering.

The graduate certificate may only be pursued on a part-time basis.

Certificate Requirements

The following four courses (12 credits) must be completed with a grade of B or better:

- SYST 520 - System Engineering Design Credits: 3
- SYST 618 - Model-based Systems Engineering Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3

Total: 12 credits

Completing the ABSI Certificate within the Systems Engineering Master’s Program

In addition to the ABSI Certificate courses, students must take the following six courses (18 credits):

- SYST 505 - Systems Engineering Principles Credits: 3
- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 530 - Systems Engineering Management I Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 699 - Masters Project Credits: 3
- One approved elective from the ABSI concentration. Credits: 3

Students who have work experience in systems engineering should consult with their advisor on replacing SYST 505 with a higher-level SYST course.

Command, Control, Communications, Computing, and Intelligence Graduate Certificate

Banner Code: VS-CERG-C4I

School: Volgenau School of Engineering
Department: Systems Engineering and Operations Research

C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve
mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The C4I certificate program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

The program is available to students who hold bachelor's degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the Systems Engineering, MS.

The graduate certificate may only be pursued on a part-time basis.

Certificate Requirements

The certificate requires 12 credits (4 courses). Students must complete the following with an average grade of B or better:

- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3 or ECE 670 - Principles of C4I Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3 or ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
  and two courses chosen from the following:
- SYST 584 - Heterogeneous Data Fusion Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- SYST 684 - Sensor Data Fusion Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3

Total: 12 credits

Completing the C4I Certificate within the Systems Engineering Master's Program

In addition to the four certificate courses above, students must complete the following six courses:

- SYST 505 - Systems Engineering Principles Credits: 3
- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 530 - Systems Engineering Management I Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 699 - Masters Project Credits: 3
Computational Modeling Graduate Certificate

Banner Code: VS-CERG-CCM

School: Volgenau School of Engineering
Department: Systems Engineering and Operations Research

This certificate program provides knowledge, tools, and techniques to those who work or plan to work in the field of computational modeling. Courses taken for this certificate program can count toward a master's degree in operations research or statistics or a PhD in computational sciences and informatics. One must be concurrently enrolled in the program for courses to count toward the certificate and the other degree.

For admission into the certificate program, applicants must meet minimum entrance requirements for the MS in operations research, the MS in statistical science, or the PhD in computational sciences and informatics.

The graduate certificate may only be pursued on a part-time basis.

Certificate Requirements

Required Courses (9 credits)

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
  and 3 credits chosen from the following:
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
- MATH 685 - Numerical Methods Credits: 3

Electives (3 credits)

Choose one of the following:

- CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- ECE 521 - Modern Systems Theory Credits: 3
- MATH 673 - Dynamical Systems Credits: 3

Total: 12 credits
Financial Systems Engineering Graduate Certificate

Banner Code: VS-CERG-FNSE

School: Volgenau School of Engineering
Department: Systems Engineering and Operations Research

Financial systems engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions, as well as facilitating the risk management of those decisions. The Graduate Certificate in Financial Systems Engineering (FSE) is intended for students who want to advance their knowledge in global financial systems, financial engineering, and financial decision analysis. Students get an understanding of the theory and/or tools of the financial systems, derivatives, investment analysis, and risk management. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School of Engineering (VSE).

The FE certificate program will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a GPA minimum established by VSE for all MS programs. Students who are already enrolled in a master's program must submit an application form to enroll in this certificate program; all others must apply for graduate admission to this certificate program.

This graduate certificate may only be pursued on a part-time basis.

Certificate Requirements

To be eligible for a certificate in Financial Systems Engineering, students must complete three required courses (9 credits) plus one elective course (3 credits) with an average grade of B or better. The three required courses are as follows:

- SYST 538 or OR 538 - Analytics for Financial Engineering and Econometrics Credits: 3
- SYST 588 or OR 588 - Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives Credits: 3
- SYST 688 or OR 688 - Financial Systems Engineering II: Derivative Products and Risk Management Credits: 3

Elective Requirement

Choose one course from the following:

- OR 645 - Stochastic Processes Credits: 3
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
- SYST 584 - Heterogeneous Data Fusion Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- Courses designated as basic methods courses may also be used as the elective.

Total: 12 credits

Military Operations Research Graduate Certificate

Banner Code: VS-CERG-MOR
This program provides knowledge, tools, and techniques to those who work or plan to work in the field of military operations research. It is appropriate for students who cannot complete requirements for a master's degree in operations research, but who want a concentrated study of military modeling. Admissions requirements are identical to those for the Operations Research, MS.

Certificate candidates must complete five courses, with an average grade of B or better, for a total of 15 graduate credits.

The graduate certificate may only be pursued on a part-time basis.

**Certificate Requirements**

To obtain the certificate, a student needs to complete the following:

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3

Total: 15 credits

**Systems Engineering of Software-Intensive Systems Graduate Certificate**

**Banner Code:** VS-CERG-SIS

This certificate is available to any student who holds a bachelor's degree in an engineering or scientific discipline or has graduate status in such a program. Admission requirements are identical to those for the Systems Engineering, MS, except that the math requirements include only MATH 113, MATH 114, and a probability and statistics course.

Note: Some certificate electives may require stronger math requirements.

The graduate certificate may only be pursued on a part-time basis.

**Certificate Requirements**

To be eligible for a certificate in Systems Engineering for Software-Intensive Systems, students must complete two required courses (6 credits) plus two elective courses (6 credits) with an average grade of B or better.

**Required Courses (6 credits)**
• SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
• SYST 618 - Model-based Systems Engineering Credits: 3

Electives (6 credits)

The remaining two elective courses must be taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective.

• CS 571 - Operating Systems Credits: 3
• INFS 622 - Information Systems Analysis and Design Credits: 3
• SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
• SYST 540 - Analysis for Systems Management Credits: 3
• SYST 542 - Decision Support Systems Engineering Credits: 3
• SYST 584 - Heterogeneous Data Fusion Credits: 3
• SYST 630 - Systems Engineering Management II Credits: 3
  and/or one of the following:
• CS 555 - Computer Communications and Networking Credits: 3
• ECE 542 - Computer Network Architectures and Protocols Credits: 3
• INFS 612 - Principles and Practices of Communication Networks Credits: 3

Total: 12 credits

Master of Science

Operations Research and Statistical Science Dual-Degree MS (OPRS)

Banner Codes: VS-MS-OPRS, VS-MS-STAT

School: Volgenau School of Engineering
Department: Systems Engineering and Operations Research

This program allows students to earn an MS in Operations Research and an MS in Statistical Science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.
MS-OPRS/STAT Dual Degree Requirements

The dual degree program requires a total of 48 credits as specified below.

**Required Courses (24 credits)**

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 699 - Masters Project Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics I Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 654 - Applied Statistics II Credits: 3

**Elective Credits in OR Courses (12 credits)**

12 elective credits in OR courses at the 600 level, including at least one deterministic methods course and at least one stochastic methods course.

**Deterministic Methods Courses:**
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

**Stochastic Methods Courses:**
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 674 - Dynamic Programming Credits: 3
- OR 675 - Reliability Analysis Credits: 3
- OR 677 - Statistical Process Control Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3

**Elective Credits in STAT Courses (12 credits)**

12 elective credits from any STAT courses numbered 540-775.

**Notes:**

- Students currently enrolled in one of the MS programs must declare pursuit of the dual MS within one year of matriculation into the first MS program.
- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS (selected)/Operations Research, Accelerated MS program or the BS (selected)/Statistical Science, Accelerated MS program cannot get a reduction of 6 credits toward this dual degree. Students who want to
proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.

- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Total: 48 credits

Operations Research, MS

**Banner Code: VS-MS-OPRS**

**School: Volgenau School of Engineering**
**Department: Systems Engineering and Operations Research**

This program prepares students for research and professional practice associated with the formulation and analysis of mathematical models for decision making and their computer implementation. Major components include optimization, queuing and network modeling, computer simulation and modeling, applied and computational probability, and application of these components to realistic and relevant operational analysis problems. Students are expected to become proficient in these areas, as well as in supporting areas of information technology necessary to implement operations research methods.

The program includes core courses and electives selected by the student with the aid of a faculty advisor. To obtain the MS degree, students complete an approved plan of study that contains a minimum of 30 graduate credits. Students may take courses through the Commonwealth Graduate Engineering Program. Appropriate courses may be transferred, with advisor approval, into this Mason degree program.

An accelerated master's option is available to students in selected bachelor's of science programs. See BS (selected)/Operations Research, Accelerated MS for specific requirements.

**Admission Requirements**

To be admitted to the program, students must hold a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also must have completed courses in calculus (MATH 113, MATH 114, and MATH 213), matrix algebra (MATH 203), differential equations (MATH 214), applied probability and statistics (STAT 346), and a scientific programming language (CS 112).

Other requirements are as follows:

- Provide evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have a satisfactory score on the TOEFL.
- Provide three letters of recommendation submitted by former professors or supervisors.

The department offers SYST 500 - Quantitative Foundations for Systems Engineering as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics. On acceptance, students will be required to take a foundation qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500. A sample test is available from the department.

Students with minor deficiencies in preparation may be accepted conditionally pending removal of the deficiencies. Courses taken to remove admission deficiencies (including SYST 500) extend minimum requirements for the degree. Students whose
undergraduate training was in the quantitative social sciences or quantitatively oriented business administration may be allowed to complete a portion of the mathematics prerequisite by taking SYST 500.

Degree Requirements

The program consists of 30 credits. Students must complete four core courses and the project (15 credits). The remaining 15 credits are electives subject to the requirements below, and can be taken in one of five concentration areas or in an individual plan approved by the student's advisor.

Required Core Courses (12 credits):

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 568 - Applied Predictive Analytics Credits: 3
- OR 635 - Discrete System Simulation Credits: 3

Project (3 credits):

- OR 699 - Masters Project Credits: 3

Methods Courses (6 credits):

Students should take at least one deterministic methods and one stochastic methods course.

**Deterministic methods courses:**
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

**Stochastic methods courses:**
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 674 - Dynamic Programming Credits: 3
- OR 675 - Reliability Analysis Credits: 3
- OR 677 - Statistical Process Control Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3

Additional Electives (9 credits):

Up to three additional elective courses may be chosen with written concurrence of the advisor. At least two of these electives must be taken from SEOR course offerings, and one of these must be OR 600-level or higher. The remaining course should be taken in an area appropriate to the student's interests, such as operations research, systems engineering, computer science,
information systems, statistics, data analytics, electrical and computer engineering, economics, mathematics or supply chain management.

Concentrations

Students may construct concentration areas by choosing electives from among special groupings. The five concentrations available are decision analysis, financial engineering, military operations research, optimization, and stochastic modeling. In addition to the required core courses (12 credits) and project course (3 credits), the remaining 15 credit hours consist of methods and elective courses associated with the concentration areas as outlined below. Students can also devise their own grouping of electives subject to prior approval of their advisor.

▲ Concentration in Decision Analysis (DA)

Students concentrating in decision analysis must complete the following.

- OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
- OR 681 - Decision and Risk Analysis Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- one deterministic methods course
- one stochastic methods course

▲ Concentration in Financial Engineering (FNNE)

Students concentrating in financial engineering must complete the following:

- OR 588 - Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives Credits: 3
- OR 688 - Financial Systems Engineering II: Derivative Products and Risk Management Credits: 3
  and one course from the following list:
- OR 645 - Stochastic Processes Credits: 3
- OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
- OR 681 - Decision and Risk Analysis Credits: 3
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
  Students must also complete the following:
  - one deterministic methods course
  - one stochastics methods course (if the student has already taken OR 645 this can be substituted for an elective course with written concurrence of the student’s advisor)

▲ Concentration in Military Operations Research (MOR)

Students concentrating in military operations research must complete the following.

- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- one deterministic methods course
- one stochastics methods course
▲ Concentration in Optimization (OPT)

Students concentrating in optimization must complete three courses from the following.

- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3
