The MA in interdisciplinary studies is for students who seek a master’s degree that integrates knowledge from several disciplines. It addresses the rapidly evolving demand for unique graduate study by promoting advanced scholarship that transcends traditional disciplinary boundaries. Students can pursue one of the following structured interdisciplinary concentrations and also have the opportunity to design an individualized concentration to meet the special needs of their careers.

The MAIS in Interdisciplinary Studies with a concentration in Energy and Sustainability is a Green Leaf program.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the MA in Interdisciplinary Studies, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/LA-MAIS-ISIN/application).

Applicants must show a capacity for original thought in cross-disciplinary research. There may be additional skills required of students applying to specific concentrations. Students will be admitted to the Individualized Studies concentration only if the applicant identifies a Mason Faculty member appropriate for the intended course of study who is willing to serve as the student’s advisor.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Credit Restrictions

Courses applied to the degree are subject to the following restrictions:

- a maximum of 6 credits may be earned through independent study or directed readings and research courses
- a maximum of 6 credits may be taken through the Consortium of Universities of the Washington Metropolitan Area
- a maximum of 15 credits may be transfer credits
- a maximum of 6 of the transfer credits may be from other accredited institutions

Transfer credits include credits taken before first enrolling as an admitted degree-seeking student (at another institution, in another Mason graduate program, or in Mason nondegree status) or credits taken at another institution after admission to the degree program through study abroad or study elsewhere (which requires prior written approval of the director and the dean). Additional information may be found in Academic Policies.

Requirements

Degree Requirements

Total credits: 36

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students pursuing this degree must successfully complete 36 credits of graduate coursework in one of the concentrations which follow. Students must submit a curriculum worksheet that has been approved by their concentration head and the director. All students complete their work in the program with a project or thesis.

Concentration in Computational Social Science (CSS)

Computational social science (CSS) is a relatively new interdisciplinary science in which social science questions are investigated with modern computational tools. Computational social scientists investigate complex social phenomena such as economic markets, traffic control, and political systems by simulating the interactions of the many actors in such systems on computers. They hope to gain insights which will lead to better management of the behavior of the larger social systems, i.e., prevention of market crashes, smoothed traffic flow, or maintenance of political stability. The intractability of many social problems calls for the new approaches provided by computational social science.

CSS is a highly interdisciplinary field that requires teams to plan and complete projects, be they undertaken by government, industry, or non-profit entities. Project managers of such teams, overseeing all elements of project design and execution, tend to hold PhDs. The MAIS concentration will train students to be members of these project teams, able to meaningfully contribute to background research and to project design, execution, and communication.

Prior background should include a bachelor’s degree in one of the social sciences, in computer science, in engineering, or in a relevant discipline, as well as undergraduate courses in these and related areas. Bachelor’s degrees in other areas are also eligible, but the student may be required to take additional courses in social science, mathematics, or computer science as prerequisites to admission.

Required Course of Proseminar

MAIS 796 MAIS ProSeminar 1

Total Credits 1

Core Courses

Required Courses 1

CSS 600 Introduction to Computational Social Science 3
CSS 605 Object-Oriented Modeling in Social Science 3
CSS 610 Agent-based Modeling and Simulation 3

Electives 2

Select three electives from the following: 9
## Interdisciplinary Studies, MAIS

### Required Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSS 620</td>
<td>Origins of Social Complexity</td>
</tr>
<tr>
<td>CSS 625</td>
<td>Complexity Theory in the Social Sciences</td>
</tr>
<tr>
<td>CSS 645</td>
<td>Spatial Agent-Based Models of Human-Environment Interactions</td>
</tr>
<tr>
<td>CSS 692</td>
<td>Social Network Analysis</td>
</tr>
<tr>
<td>CSS 739</td>
<td>Topics in Computational Social Science</td>
</tr>
</tbody>
</table>

Total Credits 18

1. The required CSS courses provide an understanding of the conceptual, technical, and practical foundations of computational social science.

2. The electives provide an understanding of the technical foundations and current work in at least two subfields of computational social science.

### Research Course

The research course provides students with exposure to the most current ongoing research in the field and allows them to further develop their computational research expertise.

Select one from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSS 796</td>
<td>Directed Reading and Research</td>
</tr>
<tr>
<td>CSS 898</td>
<td>Research Colloquium in Computational Social Science</td>
</tr>
<tr>
<td>CSS 899</td>
<td>Colloquium in Computational Social Science</td>
</tr>
</tbody>
</table>

Total Credits 3

### Electives

The electives allow students to acquire a substantive specialization as well as additional training in social and computational science. Because of the broad spectrum of social science phenomena, methodologies, and student backgrounds, there is a large pool of potential courses. Electives may include any Mason master’s-level course in computational social science, social science, computer science, statistics, or other quantitative methods such as data visualization, information technology, and geographic information science. Electives should be selected in conjunction with and approval of the student’s advisor and the Director of CSS Graduate Studies. If the student does not have prior coursework in multivariate statistical analysis, the electives should include at least one such course relevant for the student’s chosen specialization.

Students who elect to complete a 4-credit project or thesis take 9 elective credits. Students who complete a 1-credit project take 12 elective credits.

### Proposal

Select two courses from the following:

</tr>
</tbody>
</table>

Total Credits 13

### Concentration in Energy and Sustainability (EAS)

This concentration is designed for students interested in careers in energy and sustainability-related positions in the public, private, or non-profit sectors, including law, national and international policy, media, government, and business. As one of the University's Green Leaf academic programs, the concentration in energy and sustainability focuses on finding ways to meet present needs for energy and material goods without compromising the ability of future generations to meet their needs. A sustainability education lies at the intersection of environmental science, engineering, economics, business, public policy, social justice, and many other areas. Energy required to fuel all of these endeavors is a crucial component of sustainability.

REL 636  Religion and the Natural Environment

Total Credits  0-3

Research Methods Course
Students choose one of the following courses or other relevant courses in consultation with an advisor.

Select one course from the following:  3
BINF 690  Numerical Methods for Bioinformatics
EVPP 632  Qualitative Research Methods for Environmental Scientists
EVPP 650  Ecosystem Analysis and Modeling
EVPP 651  Multivariate Data Analysis for Ecology and Environmental Science
OR 682  Computational Methods in Engineering and Statistics
PUBP 710  Topics in Public Policy
SOCI 620  Methods and Logic of Social Inquiry

Total Credits  3

Proposal
MAIS 797  Interdisciplinary Studies Proposal  1

Total Credits  1

Project or Thesis
Students who wish to do a project in lieu of a thesis will take 1 credit of MAIS 798 Interdisciplinary Studies Project and an additional 3 credit elective course from the courses listed under the electives requirement. Students who choose to write a thesis will take 4 credits of MAIS 799 Interdisciplinary Studies Thesis and no additional electives.

Zero to three credits of electives  0-3
Select one from the following:  1-4
MAIS 798  Interdisciplinary Studies Project (minimum of 1 credit)
MAIS 799  Interdisciplinary Studies Thesis (take 4 credits)

Total Credits  4

Concentration in Folklore Studies (FLKS)
This concentration explores the processes of tradition that move through multiple expressive forms, such as folktales, folk beliefs, folk medicine,
folk art, folksong, and literature. A discipline based on ethnographic fieldwork, folklore offers students a chance to work in communities and collect living traditional materials that are critical to human identity and values. Interdisciplinary by nature, folklore thrives on local particularities and compelling global connections. Internships in the many Washington, D.C., metropolitan area folklore organizations are central to students’ experiences. This course of study prepares students for careers in cultural agencies, governmental organizations, teaching institutions, and advanced study in the humanities.

Students pursuing this concentration must complete at least 6 credits of courses from outside the English Department.

- ENGH 591  Topics in Folklore Studies
- ENGH 681  Advanced Topics in Folklore Studies
- ENGH 798  Directed Reading and Research (take 3 credits)

**Pathways in Folklore Scholarship**

- ENGH 681  Advanced Topics in Folklore Studies (when topic is Pathways to Folklore Scholarship)

**Internship in Folklore**

Three credits of

- ENGH 604  Internship in Folklore

**Research Methodology Course**

Select 3 credits from the following:

- ENGH 701  Research in English Studies
- HIST 610  The Study and Writing of History
- SOCI 634  Qualitative Research Methods

**Total Credits**

18

1 Courses may be repeated.

**Specialization**

Students choose an area of specialization which must be approved by a faculty advisor. Specialization topics include public folklore (museums, archives, arts and humanities councils, and nonprofit organizations); folklore (ethnicity and immigration); folklore and literature; folklore and the teaching of writing and literature; folklore and history; and folklore and conflict resolution. Students can also opt for open specialization, with courses chosen in consultation with advisor. Possibilities include folklore and editing, applied storytelling, folklore and mythology, folklore and art history, folklore and gender studies, and folklore and communication.

**Electives**

Electives require the prior written approval of a faculty advisor. Student who elect to do a 1 credit project take 6 elective credits. Students who do a 4 credit thesis take 3 elective credits.

Concentration in Neuroethics (NETH)
The MAIS concentration in neuroethics is a joint program of the interdisciplinary Neuroscience Program and the Department of Philosophy. It offers students a unique opportunity to study key ethical issues arising from advances in neuroscience research and technologies. The degree is suitable for students interested in doctoral work in neuroscience, cognitive science, clinical bioethics, or the study of law. It also can serve as an entry point for employment into government or private sector industries of ethics and policy related brain science issues.

The degree is intended for students interested in doctoral work in neuroscience, cognitive science, or bioethics. It also can help students who will work on medical and scientific research projects in government or the private sector.

Admission to the Neuroethics Program is open to students with an undergraduate degree in many fields. Applicants should demonstrate proficiency in at least two of the following academic areas as evidenced by 18 or more credits of undergraduate or graduate coursework.

- Biology
- Bioengineering
- Chemistry
- Ethics/Philosophy
- Medical Education
- Neuroscience
- Psychology

Students in the MAIS program in neuroethics must complete 32 course credits consisting of a proseminar, five core courses and six electives that match the educational objectives of the student. In addition, students are required to write a thesis or complete a two-semester project, for a total of 36 credits.

Total Credits 1

Project or Thesis
Students cap their study by writing a master’s thesis or completing a two-semester project in an area of neuroethics. The project may involve student observation and involvement in scientific research, clinical work, or policy setting.

Select one from the following: 3

MAIS 798 Interdisciplinary Studies Project (take 3 credits)
MAIS 799  Interdisciplinary Studies Thesis (take 3 credits)

Total Credits  3

**Concentration in Religion, Culture, and Values (RCV)**

The concentration in religion, culture, and values is particularly relevant for students who are interested in careers in law, national and international government, print and media journalism, library sciences, archives and museums, public and social service, teaching, advanced graduate studies, and religious communities and institutions. The Washington, DC metropolitan area is rich in the presence of many major religious traditions and their places of worship.

The core courses introduce students to the study of religion as a unique and rigorous intellectual discipline. Students learn to evaluate a variety of perspectives on religion and gain a clear understanding of the dimension of the sacred in all aspects of human life including those commonly designated "secular." Students discover how religious perceptions of the sacred respond to an evolving world and relate to and influence cultures, institutions, and values.

Students also examine the effects of historical crises and the forces of change on religions including contemporary religious pluralism and inter-religious dialogue. Students gain a deeper knowledge of specific traditions and a more profound understanding of values and worldviews from the viewpoint of cultural diversity and religious pluralism.

Total Credits 1-4

Concentration in Social Entrepreneurship (SOCE)
The concentration in social entrepreneurship will equip students with the subject matter expertise, strategic knowledge, technical support, and social networks needed to create, operate, develop, and accelerate startups; bring ideas to scale; and improve an existing program’s effectiveness. These future leaders will learn about sustainability, ethical leadership, strategic management, and working effectively within complex networks made up of divergent groups of stakeholders. All students will complete a capstone research project and an experiential learning requirement that deliver practical knowledge and real-world experience. This degree is suitable for students seeking careers in government, business, or the non-profit sector.

Required Course of Proseminar
- MAIS 796 MAIS ProSeminar 1

Total Credits 1

Core Courses
Social Entrepreneurship and Leadership
Three credits of
- INTS 595 Experiential Learning (when topic is Foundations of Social Innovation) 3

Three credits of
- INTS 595 Experiential Learning (when topic is Leading Social Change) 3

Business
Select one course from the following: 3
- GBUS 540 Analysis of Financial Decisions
- GBUS 697 Special Topics in Graduate School of Business (when topic is Introduction to Entrepreneurship)
- MBA 711 Entrepreneurship

Total Credits 9

Interdisciplinary Perspectives and Competencies in Social Entrepreneurship
Students take three courses from the list of competencies below to complement the skills they have already acquired through formal education and professional experience, or other courses to enhance their skills, including oral and written communication, that are chosen in consultation with an advisor.

Environmental and Public Policy
- EVPP 638 Corporate Environmental Management and Policy 3
- PUBP 761 Social Entrepreneurship and Public Policy 3
- PUBP 784 Entrepreneurship, Economics, and Public Policy 3

Total Credits 9

Finance and Accounting
- GBUS 540 Analysis of Financial Decisions 3

Banking and Accounting
- PUAD 655 Philanthropy and Fund Raising 3
- PUAD 664 Nonprofit Financial Management 3

Total Credits 9

Business and Project Management
Select 9 credits from the following: 9
- GBUS 697 Special Topics in Graduate School of Business (when topic is Introduction to Entrepreneurship) or MBA 711 Entrepreneurship
- MBA 712 Project Management
- MBA 714 Managing Growth of Small Businesses
- MBA 752 Turning Ideas into Successful Companies
- PUAD 505 Introduction to Management of Nonprofits
- PUAD 658 Social Entrepreneurship and Nonprofit Enterprise
- PUAD 659 Nonprofit Law, Governance, and Ethics

Total Credits 9

Leadership and Well-Being
Select 1-3 credits from the following: 1-3
- INTS 595 Experiential Learning (when topic is Mindfulness and Leadership)
- INTS 595 Experiential Learning (when the topic is Leadership and Positive Organizations)

Total Credits 2-6

Subject Matter Expertise
Students must develop expertise in the social problem they seek to address through entrepreneurship. Possible areas of focus include global and/or local poverty, homelessness, human trafficking, conflict resolution, women’s rights, racial inequality, educational and health-care access, climate change, environmental sustainability, and human rights, among other possible topics.

Students take:
- INTS 540 Contemporary Issues in Social Justice and Human Rights 3

6 credits of courses related to the student’s chosen subject matter area of expertise, chosen in consultation with an advisor.

Total Credits 6

Experiential Learning Requirement
Students will seek out and/or create an opportunity for experiential learning that aligns with a social mission. Experiential learning opportunities can include internships, service-learning, consulting projects, and field studies or research (including overseas). Because the intention is to develop and apply newly acquired skills, students may not use work done previously or their current employment to fulfill this requirement. All experiential learning projects must be approved by the social entrepreneurship concentration head the semester before registering for the course. Students may register for an individualized section of INTS 595 Experiential Learning or another graduate-level internship or practicum course to fulfill this requirement. Students must complete the experiential learning component before registering for MAIS 798 Interdisciplinary Studies Project or MAIS 799 Interdisciplinary Studies Thesis.

Concentration in Social Justice and Human Rights (SJHR)
The social justice and human rights concentration is designed to cultivate a deep theoretical understanding of the social, political, cultural, historical, and economic implications of a wide array of social injustices and human rights issues. Students are engaged in the applied process of imagining and actualizing holistic and complex strategies for creating and sustaining a more equitable, just, and humane world.

Concentration in War and the Military in Society (WMS)
Recent events have demonstrated the degree to which military issues affect social groups, global politics, and the world economy. Understanding the ways in which armies are raised and funded, the reasons troops serve, the conditions military personnel and civilians endure during wartime, and the multifaceted and evolving ways in which nations conceive of the military apparatus has direct bearing on future policy decisions.

The concentration in war and the military in society emphasizes scholarship that examines issues of international security and conflict in the past, present, and future. It equips students with the skills to understand the interconnected nature of those elements and to examine critically the ways in which they have changed and continue to change over time.

Required Course of Proseminar
MAIS 796 MAIS ProSeminar 1
Total Credits 1

Core Courses
Select two courses from the following: 6

| ANTH 721 | Culture, Power, and Conflict |
| BIOD 610 | Advanced Topics in Global Health Security (take 3 credits; when topic is U.S. military intervention since Vietnam) |
| GOVT 745 | International Security |

Select two courses from the following: 6

| HIST 615 | Problems in American History (when topic is The American Civil War) |
| HIST 675 | Problems in Military History |
| HIST 677 | The Vietnam War |

Total Credits 12

Electives
Students choose electives in consultation with an advisor, bearing in mind their specialization and proposed topic for their project or thesis. Students interested in the intellectual consideration of the military, war, and society should choose courses in anthropology, history, religious studies, and sociology. Students interested in practical applications of the study of the military, war, and society to contemporary security issues should choose courses in biodefense, geography, and government. Students may take additional courses from the core requirements as electives with permission from their advisor, but their coursework overall must include at least six credits in two or more disciplines.

Students who choose to do a project complete seven electives (21 credits); those who choose a thesis complete six electives (18 credits).

Select seven or six electives from the following: 18-21

| BIOD 609 | Biodefense Strategy |
| BIOD 706 | Nuclear, Biological, and Chemical Weapons Policy and Security |
| GGS 590 | Selected Topics in Geography (when topic is Military Geography or insurgency) |
| HIST 635 | Problems in European History (when topic is the Fall of the Roman Empire) |
| HIST 679 | War and Remembrance |
| PUBP 504 | Grand Strategy |

Concentration in Women and Gender Studies (WGST)
The concentration in women and gender studies promotes advanced scholarship that transcends traditional boundaries. Students combine required coursework in women and gender studies with courses in a discipline of interest such as history, literature, sociology, anthropology, health, education, philosophy, social work, conflict analysis and resolution, or the arts. The program accommodates both full-time and part-time students.

Of the coursework required for this concentration as described below, at least 24 credits must be in courses related to the study of women and gender and 12 credits in courses in a field focus. All courses related to the study of women and gender must be approved by the head of the study of women and gender and 12 credits in courses in a field focus. All courses related to the study of women and gender must be approved by the head of the concentration in women and gender studies. Students must earn a grade of B or higher in the core courses.

Students interested in pursuing a dual master's program linking the MAIS degree and a master's degree in another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master's Degree Programs. Students approved to pursue dual master's study linking the MAIS degree with a concentration in women and gender studies. Students must earn a grade of B or higher in the core courses.

Individualized Concentration (IND)
This concentration is for students who wish to design a graduate program to meet the special needs of their careers and life plans. Students usually choose this option because traditional graduate programs do not meet their specific goals. Students, with help from their faculty advisor, design a unique program of study that includes courses from several academic departments.

Students have access to most graduate courses offered by Mason but must meet all course prerequisites. Each student must submit a curriculum worksheet approved by the student’s advisor and director during the first semester enrolled. Any subsequent amendments must have the approval of the student’s advisor and the director.

Accelerated Master’s
Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religion, Culture, and Values Concentration)
Overview
Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religion, culture, and values. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religion, culture, and values after satisfactory completion of 150 credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Selected Majors
• Art history
• Philosophy
• Conflict analysis and resolution
• Global affairs
• History
• Religious studies
• Russian and Eurasian studies
• Sociology
• Anthropology

If the student has not majored in religious studies, it is preferred, though not required, that the student have a minor in religious studies.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions. For information specific to the
Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.
