This master's degree provides advanced training for recent college graduates, professionals in teaching, and technical workers in research organizations who have an interest in chemistry or biochemistry.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

To be considered for admission to degree status, students must have a bachelor's degree in chemistry, biochemistry, or a related field from a regionally accredited institution and must meet general admission requirements for graduate study as specified in Graduate Admission Policies. Admission is based on a departmental evaluation of the applicant's background as evidenced by transcripts, résumés, and letters of recommendation.

Policies

CHEM 500 Selected Topics in Modern Chemistry may not be applied toward the MS degree.

CHEM courses numbered 502 through 510 may be applied toward the degree only with prior written approval of the department.

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Select three of the following core courses. Courses must be selected from three different core areas shown below:  

<table>
<thead>
<tr>
<th>Analytical:</th>
<th>Biochemistry:</th>
<th>Environmental:</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 624 Principles of Chemical Separation</td>
<td>CHEM 660 Protein Biochemistry</td>
<td>CHEM 662 Modern Methods of Drug Discovery</td>
</tr>
</tbody>
</table>

Total Credits 9

CHEM 651 Environmental Chemistry of Organic Substances

Inorganic:

CHEM 641 Solid State Chemistry
CHEM 646 Bioinorganic Chemistry

Organic:

CHEM 613 Modern Polymer Chemistry
CHEM 614 Physical Organic Chemistry

Total Credits 9

MS without Concentration

General chemistry students who do not wish to pursue a concentration complete the following requirements and choose either the Thesis Option or the Non Thesis Option:

One Additional Core Course 3
CHEM 633 Chemical Thermodynamics and Kinetics

Chemistry Electives 9
Select 3 credits of CHEM designated courses
Select 6 credits of courses in chemistry or related fields, approved by the graduate committee prior to registration

Seminar 3
CHEM 790 Graduate Seminar

Thesis or Non Thesis 6
Select the Thesis Option or the Non Thesis Option

Total Credits 21

Thesis Option

The Thesis Option is designed for students planning to pursue a doctoral degree or a career involving research in the chemical, biochemical, environmental, or pharmaceutical industries.

Students must choose a research laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is appointed prior to the first semester of registration in CHEM 799 Master's Thesis. Students must complete CHEM 799 Master's Thesis and present a seminar, followed by an oral defense.

Thesis Option 6
CHEM 799 Master's Thesis

Total Credits 6

Non Thesis Option

The Non Thesis Option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous.

Students selecting this option are not required to complete a laboratory-based thesis. Instead, they must complete a research project or gain
teaching experience in undergraduate chemistry labs, as described below.

Any combination of CHEM 670 Teaching Practicum and CHEM 796 Directed Reading and Research may be used to fulfill this requirement. However, CHEM 796 Directed Reading and Research may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory or library-based research project, or must otherwise enhance the student's teaching skills.

**Non Thesis Option**

<table>
<thead>
<tr>

</table>

Total Credits 6

**MS with Concentration in Biochemistry (BC)**

Students who wish to pursue an optional concentration in biochemistry complete the following requirements and choose either Thesis Option or the Non Thesis Option:

**One Additional Core Course**

<table>
<thead>
<tr>
<th>选3 credits of the following:</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 633 Chemical Thermodynamics and Kinetics</td>
<td></td>
</tr>
</tbody>

<tr>
<th>CHEM 790 Graduate Seminar</th>
<th>3</th>
</tr>
</thead>
</table>

**Thesis or Non Thesis**

<table>
<thead>
<tr>
<th>Select the Thesis Option or the Non Thesis Option</th>
<th>12</th>
</tr>
</thead>
</table>

Total Credits 21

**Thesis Option**

The Thesis Option is designed for students planning to pursue a doctoral degree or a career involving research in the chemical, biochemical, environmental, or pharmaceutical industries.

Students must choose a research laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester. The thesis is based on research that must be approved by the thesis or advisory committee, which is appointed prior to the first semester of registration in CHEM 799 Master's Thesis. Students must complete CHEM 799 Master's Thesis and present a seminar, followed by an oral defense.

**Biochemistry Electives**

<table>
<thead>
<tr>
<th>Select 6 credits of electives in biochemistry or related fields with approval from department</th>
<th>6</th>
</tr>
</thead>
</table>

**Thesis**

<table>
<thead>
<tr>
<th>CHEM 799 Master's Thesis</th>
<th>6</th>
</tr>
</thead>
</table>

Total Credits 12

**Non Thesis Option**

The Non Thesis Option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous.

Students selecting this option are not required to complete a laboratory-based thesis. Instead, they must complete a research project or gain teaching experience in undergraduate chemistry labs, as described below.

Any combination of CHEM 670 Teaching Practicum and CHEM 796 Directed Reading and Research may be used to fulfill this requirement. However, CHEM 796 Directed Reading and Research may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory or library-based research project, or must otherwise enhance the student's teaching skills.

**Non Thesis Option**

<table>
<thead>
<tr>

<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 670 Teaching Practicum</td>
<td></td>
</tr>
<tr>
<td>CHEM 796 Directed Reading and Research</td>
<td>1</td>
</tr>
</tbody>
</table>

**Biochemistry Electives**

<table>
<thead>
<tr>
<th>Select 6 credits of electives in biochemistry or related fields with approval from department</th>
<th>9</th>
</tr>
</thead>
</table>

Total Credits 12
master’s program in the semester immediately following conferral of the bachelor’s degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the chemistry and biochemistry concentrations.

**Reserve Graduate Credit**
While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.
