**Recommended Prerequisite:** Undergraduate coursework in genetics and molecular biology.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 743: Genomics, Proteomics, and Bioinformatics.** 3 credits.
Fundamental methods for analyzing genomic and proteomic data, including nucleic acid and protein sequences, pair-wise and multiple alignment, database search methods, clustering and presentation of data, prediction modeling, and survey of available software and freeware tools. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD program in biosciences or to MS program in biology.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 744: Molecular Genetics.** 3 credits.
Develops understanding of principles of modern molecular genetics and methods of investigation of genomes of pro- and eukaryotes, including types of genetic manipulations conducted in research laboratories today.
Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate coursework including BIOL 311, CHEM 313, 314, 315, and 318; equivalents; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 760:** *Seminar in Molecular Systematics*. 1-3 credits.
Presentations and discussion by students and faculty of research papers and projects. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 761:** *Dispersal Patterns of Biological Agents*. 3 credits.
Introduces military and terrorist methods of dispersal patterns. Covers physics of aerosols, engineering and mechanics of building ventilation systems, and mechanical dissemination including handheld, automatic, vehicle, and truck-mounted systems. Also covers viability of specific agents involved. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD Biosciences program or MS/Biology program, and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 762:** *Phylogenetic Analysis*. 4 credits.
A consideration of molecular systematics techniques in biology, especially cladistics and phenetics methods. Species concepts, biological nomenclature, and classifications will also be discussed. Laboratory will emphasize phylogenetic methods using online sources of comparative data. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD Biosciences program or MS/Biology program, and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 765:** *Molecular Systematics*. 4 credits.
Comparative evolutionary techniques applied to molecular data. Use of molecular techniques, molecular databases, and analytical techniques will be covered. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD Biosciences program or MS/Biology program, and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**BIOS 782:** *Interdisciplinary Issues in Bioethics: Law and Policy*. 3 credits.
Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOS 780 and 781.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

800 Level Courses

**BIOS 898:** *Directed Studies in Biosciences*. 1-12 credits.
Studies of specialized topics in biosciences. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, or tutorials. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 24 credits.

**Recommended Prerequisite:** Permission of Research Advisor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**BIOS 899:** *Directed Research in Biosciences*. 1-12 credits.
Research on a pertinent topic in biosciences. Scope and subject of research to be determined by instructor. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 24 credits.

**Recommended Prerequisite:** Permission of Research Advisor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

900 Level Courses

**BIOS 998:** *Doctoral Dissertation Proposal*. 1-6 credits.
Research and writing of research proposal for doctoral dissertation. Offered by School of Systems Biology (p. 748). May be repeated within the degree.
Recommended Prerequisite: Permission of research advisor.

Registration Restrictions: Enroll limited to Graduate level students.

Schedule Type: Dissertation

**BUS 200: Global Environment of Business. 3 credits.**
As world becomes increasingly connected, business serves as core institution that mediates relations between individuals across national boundaries. Provides overview of global environment of business through study of political economy, international institutions and international trade theories, and global conflicts and cooperation around issues (natural resources, labor, human rights, distribution of income, and the environment). Addresses implications of topics for business. Designated a Green Leaf Course. Offered by School of Business (p. 846). May not be repeated for credit.

Mason Core: Global Understanding, Encore:Sustainability (p. 135)

Specialized Designation: Green Leaf Course

Registration Restrictions: Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

**BUS 210: Business Analytics I. 3 credits.**
Course introduces business analytics and why businesses use analytics to create and sustain competitive advantage. Topics include data types, summarization and graphical display of data, application of basic probability rules, and probability distributions. Introduces fundamentals of spreadsheets and their use in business applications. Learn how to apply appropriate analytical tools to gain useful insights from real-life datasets. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions: Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

**BUS 303: Develop Professional Skills II: Advanced Elements. 3 credits.**
In this course, students will continue to develop their professional skill set. Topics covered include understanding the modern work environment, business ethics and professional responsibilities, and professional judgment. Students will also continue to hone their professional writing and presentation skills, prepare for the job search process, and develop personal job search and professional development plans. Notes: School of Business students will not be permitted to make more than three attempts to achieve a C or higher in BUS 303. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies. Offered by School of Business (p. 846). Limited to three attempts.

Registration Restrictions: Required Prerequisites: (BUS 103C or U103). C Requires minimum grade of C.

Students with a class of Freshman may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

**BUS 310: Business Analytics II. 3 credits.**
Introduces modeling relationships contained in data and linear models to make (predictions in business. Topics include estimation, hypotheses testing, statistical inference, analysis of variance and linear regression techniques. Fundamentals of linear programming to solve optimization problems in business. Apply analytical tools to gain insights from real-life datasets. Hands-on experience and application of the methods to data
sets using spreadsheet software. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** BUS 210\(^C\), U210 or 210T.

\(^C\) Requires minimum grade of C.

Non-Degree level students may **not** enroll.

Students with the terminated from BU major attribute may **not** enroll.

**Schedule Type:** Lecture

**400 Level Courses**

**BUS 492: Undergraduate Internship.** 3 credits.

Opportunity to gain practical, professional experience in conjunction with academic development. Internship is an important part of academic and career preparation. May be used as elective credit, but may not be repeated. Notes: No more than 6 credits of School of Business internship coursework (BUS 492 or ACCT 492) can be applied towards a student’s 120 (BU) degree applicable credits. Students must receive departmental approval in order to register for this course; please contact the School of Business for internal eligibility requirements. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 6 credits. Equivalent to ACCT 492, SOM 492.

**Recommended Prerequisite:** Grade of C or higher in the 301 or 303 in the major. ISOM majors must complete MIS 301 or MIS 303 and OM 301 or OM 303.

**Registration Restrictions:**

Non-Degree level students may **not** enroll.

Students with the terminated from BU major attribute may **not** enroll.

**Schedule Type:** Internship

**BUS 498: Capstone Course: Advanced Business Models.** 3 credits.

Advanced integrated exploration of business models and industry dynamics that uses case analyses to assess competition, organizational strategy, and firm performance. Students examine strategic change in organizations from multiple perspectives, integrating knowledge from core course work into several papers and major presentation. Students receive coaching from area business leaders as they complete their presentations. The minimum grade of D or higher only reflects the pre-requisite requirement for BUS 498. Students must earn a C or higher in order to meet the Business Core and Foundations degree requirements. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to SOM 498.

**Mason Core:** Capstone (p. 135)

**Registration Restrictions:**

**Required Prerequisites:** (ACCT 301\(^D\), 303\(^D\), 330\(^D\), L301, L303 or L330) and (BULE 302\(^D\), 303\(^D\), L302 or L303) and (BUS 303\(^D\), L303, SOM 301\(^D\) or L301) and (FNAN 301\(^D\), 303\(^D\), L301 or L303) and (MGMT 301\(^D\), 303\(^D\), L301 or L303) and (MIS 301\(^D\), 303\(^D\), L301 or L303) and (MKTG 301\(^D\), 303\(^D\), L301 or L303) and (OM 301\(^D\), 303\(^D\), L301, DESC 301\(^C\), L301 or OM L303) and (BUS 310\(^D\), L310, OM 210\(^D\), DESC 210\(^D\), U210 or OM U210).

\(^D\) Requires minimum grade of D.

\(^C\) Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Non-Degree level students may **not** enroll.

Students with the terminated from BU major attribute may **not** enroll.

**Schedule Type:** Lecture

**Business Management (BMGT) 600 Level Courses**

**BMGT 603: Economics for Successful Firm Management.** 3 credits.

Provides fundamental understanding of applying microeconomics concepts to managerial decision making. Explores principles of microeconomic theory, including market supply and demand, production and cost functions, industry structure, and product and resource pricing. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BMGT 612: Performance Evaluation Through Cost Management.** 3 credits.

Examines impact of cost and cost allocation on performance and evaluation. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BMGT 613: Financial Reporting and Firm Analysis.** 3 credits.

Foundation course focusing on economics and analysis of business transactions and financial reporting issues. Topics include introduction to accounting framework in financial reporting; analysis of financial statements, economic events and impact on financial reports, and impact of accounting methods on financial reports. Due to presentation and application of course material, course only open to students enrolled in the Master of Science in Management program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**

Enrollment limited to students with a class of Senior Plus or Senior.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**BMGT 623: Marketing and Firm Performance.** 3 credits.
Develops market-based knowledge and skills for effective marketing decision making, strategy design, implementation, and evaluation in variety of institutional and competitive situations. Addresses importance of companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects. Due to the presentation and application of course material, this course is only open to students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**BMGT 633: Statistical Analysis for Management.** 3 credits.
Use statistical methods as analytical tools for understanding and solving business problems and supporting business decision making. Includes descriptive statistics, sampling, inferencing and regression. Extensive use of applied business scenarios to illustrate concepts and computer software for data analysis. Due to presentation and application of course material, this course can only be taken by students in the Master of Science in Management Program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**BMGT 638: Managing Business Operations in a Global Environment.** 3 credits.
Focuses on design, planning, and control activities to produce and deliver goods/services in organizations. Introduces operations management decisions; operations strategy, process analysis and design, capacity planning, supply chain management, total quality management, and project management. Uses quantitative modeling, case studies, and computer software to analyze/solve problems. Due to the presentation and application of course material, course only open to Master of Science in Management students. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**BMGT 643: Financial Management in a Global Environment.** 3 credits.
Introduces theory and practice of finance within corporations. Topics include intertemporal choice, valuation, capital budgeting and structure, working capital management, and risk and return analysis. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**BMGT 653: Fundamentals of Behavior in Organizations.** 3 credits.
Emphasizes development of conceptual tools for understanding and analyzing individual and group behavior in organizations and organizational processes. Considerable focus on developing relevant skills for working in groups and teams. Lectures, discussions, case analyses, and class exercises. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**BMGT 662: Management of Information Technology.** 3 credits.
Strategic, economic and managerial aspects of managing organization’s IT assets are covered. Business value of IT is understood and assessed in context of its impact on organization’s structure and strategy. Includes discussion on major issues pertaining management of IT infrastructure. Due to presentation and application of course material, course is only...
open to students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BMGT 673: Business Legal Environment.** 1.5 credit.
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BMGT 674: Ethics in the Global Business Environment.** 1.5 credit.
Strengthens student's ability to identify, critically analyze, appropriately respond to, and provide leadership regarding issues of ethical and socially responsible behavior which they may confront as employees and managers of people, objects and organizations. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BMGT 678: Business Strategy and Firm Leadership.** 3 credits.
Capstone focusing on strategy development at business unit and corporate level. Cases, readings, and project format familiarize students with strategic management function and help develop analytical, organizational, and managerial skills to analyze complex business situations. Opportunities to integrate knowledge gained in prior course work. Due to presentation and application of course material, course only open to students enrolled in the Master of Science in Management program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BMGT 692: Professional Development Experience.** 3 credits.
Professional experience in conjunction with academic development. Hands-on experience is an important part of academic and career preparation and may be completed by an internship, consulting project, independent study or additional global experience. Must involve an average of 15 hours per week and be approved by program director. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** completion of 18 credit hours in BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Management.

Enrollment limited to students in a Master of Science degree.

**Schedule Type:** Internship

**BMGT 695: Global Business Perspectives.** 3 credits.
Includes a weeklong international student study tour lead by a full-time School of Business professor. Students interact with business and government leaders, participate in seminars, and visit sites of local or multinational companies. Focus on developing an increased understanding of global markets, competition, business strategy, and business opportunities in addition to the social and cultural dimensions of global business. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Management.

Enrollment limited to students enrolled in the Master of Science in Management program. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture
Business Management of Secure Information Systems (MSIS)

600 Level Courses

MSIS 611: Leadership and Change Management. 2 credits.
Distinguishes between leadership and management, and focuses on the critical roles and functions of leadership, including communication ability, use of power and influence, providing direction, aligning an organization's systems, motivating a workforce, and creating a culture for effectiveness. It also focuses on strategies for developing oneself as an effective leader. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to TECM 611.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

MSIS 614: Financial and Cost Accounting. 2 credits.
Provides managers with an overview of the purpose and importance of accounting within the organization and the financial valuation of information technology companies, projects, and product line. Students focus on the economics and analysis of business transactions and their related financial reporting issues from internal and external stakeholder perspectives. Students improve their skills in analyzing financial issues and presenting results in a case analysis framework. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to TECM 614.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

MSIS 620: Economics of Technology Management. 2 credits.
Enables students to build and evaluate economic and business models that can be used to analyze real managerial questions that affect all types of institutions, especially firms in the information technology industry. Students develop a better understanding of the operation of markets in general and the use of various quantitative and qualitative methods when making decisions within the firm. The use of economic analysis allows students to identify and evaluate decision alternatives, the competitive environments of firms, and the factors that influence firm performance, especially in the information technology industry. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to TECM 620.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

MSIS 635: Decision Models and Methods. 2 credits.
Explores current metrics and metric development for quality, intangible assets, and project management as required within information technology companies. Applies statistical tools of best use with these metrics. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to TECM 635.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

MSIS 641: Innovation, Commercialization and Entrepreneurship. 2 credits.
Cybersecurity is a field with both tremendous opportunity and need for innovations and commercialization of new technologies. In addition, there is tremendous opportunity and success by cybersecurity startup firms in US and internationally. Course investigates technology and cybersecurity innovation and commercialization and keys to success for cybersecurity entrepreneurship. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

MSIS 643: Managerial Finance. 2 credits.
Surveys the theory and practice of corporate financial management with specific application to the technology sector. Students develop an understanding of key elements required in the valuation of project alternatives; including their strategic importance. Students evaluate and use financial management models and gain an understanding of how finance can be employed as a source of potential competitive advantage. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to TECM 643.
Registration Restrictions:  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 4 credits.

Registration Restrictions:  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

MSIS 697: Special Topics in Management of Secure Information Systems. 1-3 credits.
Sections established as necessary to focus on various topical issues that emerge in practice of management of secure information systems. Offered by School of Business (p. 846). May be repeated within the term for a maximum 6 credits.

Registration Restrictions:  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

700 Level Courses

MSIS 711: Deriving Strategic Value from IT Investments. 2 credits.
Prepares students to be educated consumers of information technology to maximize strategic advantage of IT to an organization. Information technologies, architectures, and products are categorized and analyzed with a view to develop and maintain the most favorable IT asset portfolio to successfully carry out business goals and strategies. Techniques for making group technology assessments, outsourcing decisions, project bidding, and contract negotiations. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to TECM 711.

Registration Restrictions:  
Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

MSIS 735: Capstone Project. 1-3 credits.
Teams undertake a strategic evaluation and plan for IT-driven business initiatives. Presentation includes analysis of competitive forces and the value chain; recommendations, including changes in goals and organizational design; plan of action integrating marketing, human resource development, organizational design, finance, and information technology; and implementation plan using theories of communication and change management, to include business case and business plan. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to TECM 735.

Registration Restrictions:  
Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

MSIS 747: Enterprise Information Security Audit. 2 credits.
Focuses on defining a control framework, control objectives and the logging, monitoring and reporting and subsequent change management for an enterprise relying on secure information systems to its business objectives. Students will learn the process of creating a control structure with goals and objectives, audit a given IT infrastructure against it, and if found inadequate, establish a systematic remediation procedure. Offered by School of Business (p. 846). May not be repeated for credit.

Recommended Prerequisite: C or higher in MSEC 510 or equivalent.

Registration Restrictions:  
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Students spend a week in an international residency. Emphasizes dealing with technological changes across international markets and amid global developments, virtual organizations, and project management across cultures. Corporate site visits combined with presentations by professors from universities outside the United States and relevant practitioners. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:  
Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Business and Legal Studies (BULE)**

**300 Level Courses**

**BULE 302: Legal Environment of Business.** 3 credits.
Survey of the legal environment of business, emphasizing legal concepts and legal reasoning to prepare students to recognize legal problems and formulate appropriate responses. Topics include the federal and state court systems, constitutional and administrative law, business torts and crimes, contracts and business ethics. Lecture, discussion, cases. Notes: Students cannot receive credit for both BULE 302 and BULE 303. Offered by School of Business (p. 846). Limited to three attempts. Equivalent to BULE 303.

**Recommended Prerequisite:** Sophomore standing.

**Registration Restrictions:**
Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

**Schedule Type:** Lecture

**BULE 303: Legal Environment of Business.** 3 credits.
Survey of the legal environment of business, emphasizing legal concepts and legal reasoning to prepare students to recognize legal problems and formulate appropriate responses. Topics include the federal and state court systems, constitutional and administrative law, business torts and crimes, contracts and business ethics. Lecture, discussion, cases. Notes: School of Business students will not be permitted to make more than three attempts to achieve a C or higher in BULE 303. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies. Students cannot receive credit for both BULE 302 and BULE 303. Offered by School of Business (p. 846). Limited to three attempts. Equivalent to BULE 302.

**Recommended Prerequisite:** Degree status; sophomore standing

**Registration Restrictions:**
Students with a class of Freshman may not enroll.

Non-Degree or Washington Consortium level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

**Schedule Type:** Lecture

**400 Level Courses**

**BULE 402: Commercial Law.** 3 credits.
Survey of commercial law emphasizing the Uniform Commercial Code. Lecture, discussion, cases. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

**Schedule Type:** Lecture

**Chemistry (CHEM)**

**100 Level Courses**

**CHEM 101: Introduction to Modern Chemistry.** 3 credits.
Physical and chemical discoveries and properties of matter presented along with their application and impact on way of life. Topics include atomic and molecular structure, nuclear chemistry, and chemistry in Earth and atmosphere. Note: does not fulfill the requirement for a laboratory course in chemistry. Not for chemistry majors. No credit given for both CHEM 101 and CHEM 103 or for both CHEM 101 and CHEM 211-212. No previous knowledge of chemistry required. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CHEM 203, CHEM 204.

**Mason Core:** Natural Science Overview (p. 135)

**Schedule Type:** Lecture

**CHEM 102: Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry.** 3 credits.
Modern and historical accounts of organic chemistry, biochemical, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future. Notes: Does not fulfill the requirement for a laboratory course in Chemistry. Not for Chemistry majors. No credit for both CHEM 102 and CHEM 104, or CHEM 212. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CHEM 203, CHEM 204.

**Mason Core:** Natural Science Overview (p. 135)

**Schedule Type:** Lecture

**CHEM 103: Chemical Science in a Modern Society.** 4 credits.
Terminal course in chemistry for nonscience and nursing majors. Principles and application of chemistry. Notes: CHEM 103 and CHEM 101 are taught simultaneously in the same room. CHEM 101 is for those students who are not required to complete the lab component of CHEM 103. Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Topics are those described for CHEM 101 and 102 but with lab to enhance scientific experience. Offered by Chemistry (p. 636). May not be repeated for credit.

**Mason Core:** Natural Science with Lab (p. 135)

**Schedule Type:** Laboratory, Lecture

**CHEM 104: Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry.** 4 credits.
Modern and historical accounts of organic chemistry, biochemical, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green
chemistry and the future. (CHEM 104 requires concomitant registration in a 104 laboratory section). Notes: Not open to students majoring in chemistry. Credit will not be given for both CHEM 104 and CHEM 212 Offered by Chemistry (p. 636). May not be repeated for credit.

Mason Core: Natural Science with Lab (p. 135)

Schedule Type: Laboratory, Lecture

CHEM 105: Introductory Chemistry Laboratory I. 1 credit.
Introductory laboratory course to demonstrate principles and application of chemistry. Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Students will enroll in CHEM 105 by Individualized Section and attend one of the CHEM 103 lab sections. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CHEM 211, CHEM 212.

Recommended Prerequisite: CHEM 101.

Schedule Type: Laboratory

CHEM 106: Introductory Chemistry Laboratory II. 1 credit.
1-credit laboratory course for non-science majors. Laboratory experience to demonstrate principles and application of chemistry. Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Students will enroll in CHEM 106 by Individualized Section and attend one of the CHEM 104 lab sections. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CHEM 211, CHEM 212.

Recommended Prerequisite: CHEM 102.

Schedule Type: Laboratory

CHEM 155: Introduction to Environmental Chemistry I. 4 credits.
Basic chemical principles of Earth's water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Notes: Credit will not be given for this course and CHEM 103, 104. Offered by Chemistry (p. 636). May not be repeated for credit.

Mason Core: Natural Science with Lab, Encore:Sustainability (p. 135)

Specialized Designation: Green Leaf Course

Schedule Type: Laboratory, Lecture

CHEM 156: Introduction to Environmental Chemistry II. 4 credits.
Basic chemical principles of Earth's water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Notes: Credit will not be given for this course and CHEM 103, 104. Offered by Chemistry (p. 636). May not be repeated for credit.

Mason Core: Natural Science with Lab, Encore:Sustainability (p. 135)

Specialized Designation: Green Leaf Course

Recommended Prerequisite: CHEM 155 or permission of instructor.

Schedule Type: Laboratory, Lecture

200 Level Courses

CHEM 201: Introductory Chemistry I. 3 credits.
Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; and properties of gases, liquids, and solids. Notes: Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 211 or 103. General chemistry course for students interested in science, engineering, mathematics, or computer science who do not require a lab. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CHEM 211.

Mason Core: Natural Science Overview (p. 135)

Schedule Type: Lecture

CHEM 202: Introductory Chemistry II. 3 credits.
Fundamentals of reaction rates and equilibrium. Topics include kinetics, properties of solutions, ionic equilibrium, chemical thermodynamics, electrochemistry, and nuclear chemistry. Notes: Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 212 or 104. Second-semester general chemistry course for those interested in science, engineering, mathematics, or computer science who do not require a lab. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CHEM 212.

Mason Core: Natural Science Overview (p. 135)

Recommended Prerequisite: CHEM 201 or 211.

Schedule Type: Lecture

CHEM 203: General Chemistry Laboratory I. 1 credit.
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience to demonstrate general chemistry principles and applications. Students will enroll in CHEM 203 by Individualized Section and attend one of the CHEM 211 lab sections. Notes: Credit will not be given for this course and CHEM 101 or 102 to students majoring in science, engineering, or mathematics. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CHEM 101, CHEM 102, CHEM 213.

Recommended Prerequisite: CHEM 201.

Schedule Type: Laboratory

CHEM 204: General Chemistry Laboratory II. 1 credit.
Second semester general chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience to demonstrate general chemistry principles and applications. Students will enroll in CHEM 204, by Individualized Section, and attend one of the CHEM 212 lab sections. Notes: Credit will not be given for this course and CHEM 101 or 102 to students majoring in science, engineering, or mathematics. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CHEM 101, CHEM 102, CHEM 214.

Recommended Prerequisite: CHEM 202.

Schedule Type: Laboratory

CHEM 211: General Chemistry I. 3 credits.
Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; properties of gases, liquids, and solids. Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence.
CHEM 211 is a prerequisite to CHEM 212. Offered by Chemistry (p. 636). Limited to two attempts. Equivalent to CHEM 105, CHEM 106, CHEM 201.

Mason Core: Natural Science with Lab (p. 135)

Registration Restrictions:
Required Prerequisites: CHEM 213*; U213* or 213T*.
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 212: General Chemistry II. 3 credits.
Fundamentals of colligative properties, reaction rates and equilibrium. Topics include kinetics, properties of solutions, ionic equilibrium, chemical thermodynamics, electrochemistry, and nuclear chemistry. Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence. Offered by Chemistry (p. 636). Limited to two attempts. Equivalent to CHEM 202.

Mason Core: Natural Science with Lab (p. 135)

Registration Restrictions:
Required Prerequisites: (CHEM 211*C, 211T or U211) and (CHEM 214*C, 214T* or U214*).
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 213: General Chemistry Laboratory I. 1 credit.
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience will demonstrate general chemistry principles and applications. Notes: Students majoring in science, engineering, or mathematics should choose this course sequence. Credit will not be given for this course and CHEM 103. Offered by Chemistry (p. 636). Limited to two attempts. Equivalent to CHEM 203.

Mason Core: Natural Science with Lab (p. 135)

Registration Restrictions:
Required Prerequisites: CHEM 211*C, U211* or 211T*.
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Laboratory

CHEM 214: General Chemistry Laboratory II. 1 credit.
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience will demonstrate general chemistry principles and applications. Notes: Credit will not be given for this course and CHEM 103, CHEM 104. Students majoring in science, engineering, or mathematics should choose this course sequence. Offered by Chemistry (p. 636). Limited to two attempts. Equivalent to CHEM 204.

Mason Core: Natural Science with Lab (p. 135)

Registration Restrictions:
Required Prerequisites: (CHEM 212*C, U212* or 212T*) and (CHEM 211*C, 211T or U211).
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Laboratory

CHEM 251: General Chemistry for Engineers. 4 credits.
Fundamental principles of chemical structure and reactivity including atomic and molecular structure; chemical bonding; structures of ionic, covalent, and metallic lattices; oxidation reduction; electrochemistry and chemistry of metals; and introduction to organic chemistry and polymers. Notes: Enrollment restricted to students intending to major in engineering. Students who need two semesters of chemistry should enroll in CHEM 211. Credit will not be given for this course and CHEM 211. Offered by Chemistry (p. 636). May not be repeated for credit.

Mason Core: Natural Science with Lab (p. 135)

Schedule Type: Laboratory, Lecture

300 Level Courses

CHEM 300: Chemistry of Semiconductor Processing. 3 credits.
Chemical aspects of the manufacture of semiconductor devices. Topics include oxidation of silicon, photoresists, plasma etching, removal of metal contaminants by acid etching, and analysis of semiconductor thin films. Notes: Does not satisfy chemistry course requirements for BS in biology. Cannot be used as a chemistry elective toward BA, BS, or minor in chemistry, and does not fulfill premedical requirements. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Prerequisite: 30 credit hours or permission of instructor.

Schedule Type: Lecture

CHEM 313: Organic Chemistry I. 3 credits.
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Corequisite: CHEM 315.

Registration Restrictions:
Required Prerequisites: (CHEM 212*C or U212) and (CHEM 211*C or U211).
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 314: Organic Chemistry II. 3 credits.
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Corequisite: CHEM 318.

Registration Restrictions:
Required Prerequisites: (CHEM 313*C or L313) and CHEM 212*C and 211*C.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 315: Organic Chemistry Lab I. 2 credits.
Lab techniques and reactions arranged to accompany CHEM 313. Notes: One-hour recitation. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CHEM 313*C or L313*) and CHEM 212*C and 211*C.
* May be taken concurrently.
C Requires minimum grade of C.
Schedule Type: Laboratory

CHEM 318: Organic Chemistry Lab II. 2 credits.
Continuation of CHEM 315, arranged to accompany CHEM 314. Notes: One-hour recitation. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CHEM 315 C or L315) and (CHEM 314 C or L314) and (CHEM 313 C or L313).
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Laboratory

CHEM 321: Quantitative Chemical Analysis. 4 credits.
Principles of chemical analysis emphasizing ionic equilibria. Lab consists of gravimetric, volumetric, and instrumental methods illustrating principal types of quantitative determinations. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 212 C, MATH 113 C, CHEM 211 C and MATH 114 C.
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

CHEM 331: Physical Chemistry I. 3 credits.
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CHEM 212 C and MATH 114 C) and (PHYS 243 C or 160 C).
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 332: Physical Chemistry II. 3 credits.
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (MATH 114 C and CHEM 331 C) and (PHYS 243 C or 160 C) and (PHYS 244 C or 260 C).
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 333: Physical Chemistry for the Life Sciences I. 3 credits.
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction. Notes: Credit will not be given for both this course sequence and CHEM 331, 332. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Prerequisite: CHEM 333, MATH 113, 114.

Schedule Type: Lecture

CHEM 334: Physical Chemistry for the Life Sciences II. 3 credits.
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction. Notes: Credit will not be given for both this course sequence and CHEM 331, 332. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Prerequisite: CHEM 333.

Schedule Type: Laboratory

CHEM 336: Physical Chemistry Lab I. 2 credits.
Quantitative experimental study of physicochemical principles. CHEM 336 and 337 constitute an introduction to the practice and theory of experimental physical chemistry. Notes: One-hour recitation. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Prerequisite: CHEM 333, MATH 113, 114.

Schedule Type: Lecture

CHEM 337: Physical Chemistry Lab II. 2 credits.
Continuation of CHEM 336. Notes: One-hour recitation. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CHEM 331 C or L331) and (CHEM 332 C or L332) and (CHEM 336 C or L336).
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Laboratory

CHEM 341: Fundamental Inorganic Chemistry. 3 credits.
Descriptive chemistry including chemical properties, reactions, and reaction mechanisms of inorganic elements and compounds. Topics include main group and transition elements, organometallic compounds, and bioinorganic chemistry. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 212 C, 313 C and 315 C.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 355: Undergraduate Research. 1-3 credits.
Original research project. May involve lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor’s guidance. Culminates in a written and oral final report. May be repeated for a total of 6 credits. Offered by
Chemistry (p. 636). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Required Prerequisites: CHEM 313C, 315C, MATH 113C, PHYS 243C and 244C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Junior, Sophomore, Senior Plus or Senior.

Enrollment is limited to students with a major, minor, or concentration in Chemistry.

Schedule Type: Research

400 Level Courses

CHEM 413: Synthetic and Mechanistic Organic Chemistry. 3 credits.
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CHEM 314C or 314L) and (CHEM 318C or 318L) and CHEM 331C.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 422: Instrumental Methods of Chemical Analysis. 3 credits.
Introduces theories of analysis by instrumental methods. Basic electronics applied to chemical measurements. Topics include introduction to theory of spectroscopy including ultraviolet, visible, and infrared, and electrochemical methods of analysis; theory of Fourier transform techniques such as FT-IR and FT-NMR; and theory of advanced pulse techniques. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 321C, 332C and 337C.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 423: Instrumental Methods of Chemical Analysis Laboratory. 2 credits.
Laboratory-based introduction to quantitative analysis of organic and inorganic substances by using modern analytical instrumentation. Laboratory highlights practice of atomic and molecular spectroscopy, spectrophotometry, chromatography, voltammetry, and potentiometry in relation to chemical experimentation. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CHEM 422C.
C Requires minimum grade of C.

Schedule Type: Laboratory

CHEM 427: Aquatic Environmental Chemistry. 3 credits.
Thermodynamic and kinetic processes regulating the chemistry of surface and ground water in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CHEM 321C.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 438: Atmospheric Chemistry. 3 credits.
The fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CLIM 438.

Registration Restrictions:
Required Prerequisite: CHEM 332C.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 439: RS: Atmospheric Chemistry II: Air Analysis Techniques. 3 credits.
The theory, design and implementation of air sampling and analysis techniques for investigating GMU and regional air quality. Offered by Chemistry (p. 636). May not be repeated for credit.

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: CHEM 438 or permission of instructor.

Schedule Type: Lecture

CHEM 441: Properties and Bonding of Inorganic Compounds. 3 credits.
Interpretation of physical and chemical properties of inorganic compounds in terms of currently used bonding concepts. Topics include molecular symmetry and applications of symmetry, structure and bonding in ionic solids; reactions and characterizations of solids; electronic and magnetic properties and applications of solids. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 332C and 337C.
C Requires minimum grade of C.

Schedule Type: Lecture

CHEM 445: Inorganic Preparations and Techniques. 2 credits.
Application of techniques of inorganic chemistry to preparation, purification, and spectroscopic characterization of selected substances. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CHEM 441C.
C Requires minimum grade of C.

Schedule Type: Laboratory

CHEM 446: Bioinorganic Chemistry. 3 credits.
Application of inorganic coordination chemistry and physical methods in study of structure and function of metal ion sites in biomolecules. Properties of transition metal ions, ligand field theory. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur
proteins, oxygen transport, iron storage, electron transfer, inorganic model compounds, metals in medicine, and toxicity of inorganic species. Notes: Students may take this course concurrently with CHEM 463 or after taking CHEM 463. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CHEM 463 or BIOL 483) and CHEM 331 and 336.
C Requires minimum grade of C.

Schedule Type: Lecture
CHEM 451: Special Projects in Chemistry. 1-3 credits.
Introduction to chemical research or development. Includes literature search, conferences, and lab. Notes: Written and oral technical reports required. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 314, 318, 321, 331 and 336.
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.
Enrollment is limited to students with a major, minor, or concentration in Chemistry.

Schedule Type: Research
CHEM 452: Special Projects in Chemistry. 1-3 credits.
Introduction to chemical research or development. Includes literature search, conferences, and lab. Notes: Written and oral technical reports required. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CHEM 451 C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.
Enrollment is limited to students with a major, minor, or concentration in Chemistry.

Schedule Type: Research
CHEM 455: Honors Research in Chemistry. 3 credits.
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations. Notes: Credit will not be given for both these courses and CHEM 451, 452. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Prerequisite: B+ or higher in CHEM 455.

Registration Restrictions:
Required Prerequisite: CHEM 456 B+.
B+ Requires minimum grade of B+.

Enrollment limited to students with a class of Senior Plus or Senior.
Enrollment is limited to students with a major in Chemistry.
Enrollment limited to students with the Honors Coll Schlrshp Confirmd, Honors College, or Honors in the Major. attributes.

Schedule Type: Research
CHEM 456: Honors Research in Chemistry. 3 credits.
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations. Notes: Credit will not be given for both these courses and CHEM 451, 452. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CHEM 456 C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Schedule Type: Lecture
CHEM 463: General Biochemistry I. 4 credits.
Brief introduction to biochemistry, followed by in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function, and primary metabolism. Emphasizes enzymes and their chemical mechanisms, and metabolism. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to BIOL 483.

Registration Restrictions:
Required Prerequisites: (CHEM 313 or L313) and BIOL 213 C.
C Requires minimum grade of C.

Schedule Type: Lecture
CHEM 464: General Biochemistry II. 3 credits.
Continuation of general biochemistry, focusing on secondary metabolism, cell signaling, and processes of replication, transcription, and translation. Emphasizes important biochemistry research topics; much material drawn from current biochemical literature. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 463 C and (CHEM 314 or 314L).
CHEM 465: Biochemistry Lab. 2 credits.
Introduction to modern biochemical experimental methods of studying chemical and physical properties of biological molecules. Includes separation, identification, and characterization of biomolecules. Offered by Chemistry (p. 636). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: Grade of C or better in CHEM 315 and CHEM 463.

Recommended Corequisite: CHEM 463.

Registration Restrictions:
Required Prerequisites: CHEM 463 and (CHEM 315 or 315L).

Schedule Type: Laboratory

CHEM 467: The Chemistry of Enzyme-Catalyzed Reactions. 3 credits.
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 463 and 314 and 331.

Schedule Type: Lecture

CHEM 468: Bioorganic Chemistry. 3 credits.
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 463 and 464 and 314 and 331.

Schedule Type: Lecture

CHEM 469: Undergraduate Seminar. 1 credit.
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a one-page summary of each talk attended. This course will also be used to teach students how to give effective presentations. May be repeated for a total of 2 credits. Offered by Chemistry (p. 636). May be repeated within the degree for a maximum 2 credits.

Registration Restrictions:
Required Prerequisites: (CHEM 331 or 336).

Schedule Type: Seminar

500 Level Courses

CHEM 500: Selected Topics in Modern Chemistry. 3 credits.
Topics of interest in analytical, biological, environmental, geological, geochemical, inorganic, organic, and physical chemistry. Notes: Credit not allowed toward major in chemistry. Credit not allowed toward minor in chemistry. Offered by Chemistry (p. 636). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major, minor, or concentration in Chemistry.

Schedule Type: Lecture

CHEM 513: Synthetic and Mechanistic Organic Chemistry. 3 credits.
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Organic core course. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Prerequisite: Grade of C or better in CHEM 314, CHEM 318 and CHEM 331.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CHEM 530: Instrumental Techniques of Analysis. 2 credits.
Principles and operation of modern instrumentation, emphasizing applications to analysis of chemical, biological, and environmental samples. Methods include combined capillary column gas chromatography and mass spectrometry, high-performance liquid chromatography, optical methods, surface analysis methods, magnetic resonance spectroscopy, atomic emission and absorption spectrometry, and electroanalytical methods. With approval of research committee,
students choose methods studied. Offered by Chemistry (p. 636). May be repeated within the term.

**Recommended Prerequisite:** CHEM 321 and 422 or 521 or permission of department.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Independent Study

**CHEM 563: General Biochemistry I.** 4 credits.
Brief introduction to biochemistry, followed by an in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function and primary metabolism. Emphasizes enzymes and their chemical mechanisms and metabolism. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 313, BIOL 213.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CHEM 564: General Biochemistry II.** 3 credits.
Previous course in biology recommended but not required. Important biological compounds, including proteins, carbohydrates, lipids, and nucleic acids, and their interrelations. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 563 or equivalent.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CHEM 567: The Chemistry of Enzyme-Catalyzed Reactions.** 3 credits.
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 313 and 314, or equivalent, or permission of instructor.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CHEM 568: Bioorganic Chemistry.** 3 credits.
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 314 and 463, or equivalent, or permission of instructor.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CHEM 579: Special Topics.** 1-6 credits.
Current topics in chemistry, depending on instructor’s specialty. Notes: May be repeated with different topics, with department approval. Offered by Chemistry (p. 636). May be repeated within the term.

**Recommended Prerequisite:** CHEM 313 and 314, or permission of instructor.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**600 Level Courses**

**CHEM 613: Modern Polymer Chemistry.** 3 credits.
Synthetic and analytical chemistry of synthetic macromolecules. Topics include polymer solutions, molecular weight determination, spectroscopy, thermal analysis, x-ray crystallinity, polymerization types, and commercial and electroactive polymers. Organic core course. Offered by Chemistry (p. 636). May not be repeated for credit.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 614: Physical Organic Chemistry.** 3 credits.
Principles underlying molecular structure, reactivity, and reaction mechanisms. Topics include valence-bond and molecular-orbital theory, electronic interpretation of organic reactions, stereochemistry, conformational analysis, kinetics and thermodynamics of organic reactions, and photochemistry. Organic core course. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 314 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 620: Modern Instrumentation.** 3 credits.
Methods of sensing and measurement of radiation, particles, pressure, concentrations of specific elements and compounds. Topics include basic operational amplifier circuits for analog signals, digitizing devices and computerized data collection, noise and noise-reduction methods, and specialized instrumentation systems for various areas of chemistry and physics. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 422 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 624: Principles of Chemical Separation.** 3 credits.
Theories and models of separation with applications to analyses of a wide range of chemical, biological, and environmental samples. Topics include high-resolution gas and high-performance liquid chromatography. Emphasizes theory of reverse phase, normal phase, ion exchange, size exclusion, and affinity based separations. Also presents instrumentation such as detectors, pumps, and columns, and data acquisition. Analytical core course. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 422 or 521 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 625: Electroanalytical Chemistry.** 3 credits.
Review of basic electrochemistry. Emphasizes analysis and research for applications of modern electrochemical techniques such as chronooamperometry; cyclic, stripping, and AC voltammetry; pulse polarography; coulometry; electrochemical sensors; and instrumentation. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 321 and CHEM 331.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 627: Aquatic Environmental Chemistry.** 3 credits.
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 321 or GEOL 302 or equivalent courses or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 633: Chemical Thermodynamics and Kinetics.** 3 credits.
Advanced study covering application of kinetics to the elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates. Physical core course. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CSI 711.

**Recommended Prerequisite:** CHEM 331 and 332.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 641:** Solid State Chemistry. 3 credits.
Focuses on the design and synthesis, structure and bonding of solid state compounds; physical properties and characterization of solids. Topics of current interest will also be included. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 441 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 646:** Bioinorganic Chemistry. 3 credits.
Applies inorganic coordination chemistry and physical methods to understand structure and function of metal ion sites in biomolecules. Biochemical roles of metal centers in oxygen transport, metalloenzymes, and electron transfer. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, inorganic model compounds, and metals in medicine. Inorganic core course. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 441, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 651:** Environmental Chemistry of Organic Substances. 3 credits.
Study of principles governing multimedia distribution and fate of organic chemicals in environment. Overview of origin and occurrence of major classes of natural and anthropogenic organic chemicals in environment. Environmental core course. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** One semester of Physical Chemistry, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 660:** Protein Biochemistry. 3 credits.
Proteins play critical roles in most biological processes. Therefore, to understand these processes, it is necessary to understand proteins. This course will introduce students to proteins, their biosynthesis/biodegradation and their biophysical and biochemical properties. Biochemistry core course. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 463 or equivalent or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 661:** Antibiotic Chemistry and Resistance. 3 credits.
Introduces the various classes of antibiotics. Focus on the chemistry of antibiotics and how they inhibit bacterial growth and/or cause death and the response of bacteria to these compounds. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 463 or equivalent or permission of instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CHEM 662:** Modern Methods of Drug Discovery. 3 credits.
Introduction to the process of drug discovery. Covers modern methods and strategies of target identification, lead identification, and lead optimization. Biochemistry core course. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 463 (or equivalent) or permission of instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
CHEM 665: Protein-Protein Interactions: Methods and Applications. 3 credits.
Introduction to the fundamental principles of protein-protein interactions, including experimental design considerations and methods for quantification of these interactions. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Prerequisite: CHEM 463 (or equivalent), or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CHEM 670: Teaching Practicum. 2 credits.
Pre-laboratory lecture and laboratory teaching in chemistry. Students work closely with faculty and are responsible for all aspects of teaching undergraduate laboratory techniques. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Prerequisite: Enrollment in the graduate program and permission of Chair.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

700 Level Courses

CHEM 728: Introduction to Solid Surfaces. 3 credits.
Introduces properties of solid surfaces. Topics include gas absorption isotherms, surface area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas adsorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and surface sensitivities, instrumentation; and principles of vacuum technology. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CSI 712.

Recommended Prerequisite: CHEM 422 or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CHEM 736: Computational Quantum Mechanics. 3 credits.
Study of fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, electron-atom solutions to Schrodinger’s equation, electron spin in many electron systems, atomic structure calculations, algebra of many electron calculations, Hartree-Fock, self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations. Offered by Chemistry (p. 636). May not be repeated for credit. Equivalent to CSI 783, PHYS 736.

Recommended Prerequisite: PHYS 502, 510, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CHEM 735: Astrophysical Chemistry of Planetary Bodies. 3 credits.
In depth review of the chemistry of planets, comets and other bodies in the Solar System. Emphasis will be placed on the laboratory techniques and measurements made in order to understand and predict astronomical observations. Offered by Chemistry (p. 636). May not be repeated for credit.

Recommended Prerequisite: CHEM 331, or ASTR 403, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CHEM 770: Graduate Seminar. 1 credit.
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a 1 page summary of each talk attended. Course also used to teach students effective presentation methods. Notes: Requires, in last semester, seminar presentation on student’s research or another topic acceptable to department. Three credits of CHEM 790 required for MS degree; an additional 3 credits required after admission to PhD program. Offered by Chemistry (p. 636). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Admission to a graduate program in Chemistry and Biochemistry, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CHEM 796: Directed Reading and Research.** 1-6 credits. Reading and research on a specific topic in chemistry or biochemistry under direction of a faculty member. Offered by Chemistry (p. 636). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Admission to a graduate program in Chemistry and Biochemistry or affiliated programs.

**Registration Restrictions:** Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**CHEM 798: Research Project.** 3-6 credits. Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Notes: Requires comprehensive report acceptable to advisory committee, and final oral exam on report. Offered by Chemistry (p. 636). May be repeated within the degree for a maximum 6 credits.

**Recommended Corequisite:** Permission of department; 6 credits of CHEM 798 or 799 (credit will not be given for both).

**Registration Restrictions:** Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**CHEM 799: Master's Thesis.** 1-6 credits. Laboratory thesis research and writing under direction of supervisor. Notes: Minimum of 3 credits for first two enrollment periods. Offered by Chemistry (p. 636). May be repeated within the degree.

**Recommended Corequisite:** Permission of the department.

**Registration Restrictions:** Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**CHEM 814: Advanced Bioorganic Chemistry.** 3 credits. Introduces the chemical nature of biomolecules, with a focus on their organic properties. Focuses on the chemical principals that underlie the diverse structures, properties and reactions of biomolecules. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 313, 314, and 463 or equivalent; or permission of instructor.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**CHEM 817: Organic Structural Spectroscopy.** 3 credits. Spectroscopic determination of organic molecular structure using 1H, 13H, 19F, and 31P nuclear magnetic resonance, infrared, ultraviolet, visible, and Raman spectroscopy, and mass spectrometry. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 314 or equivalent.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**CHEM 821: Theory of Analytical Processes.** 3 credits. Theory and application of contemporary analytical processes and methods used in chemistry research. Emphasis on analytical signals and accompanying noise, sample preparation techniques, and quality assurance in measurements. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Chemistry and Biochemistry doctoral program.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**CHEM 833: Physical Chemistry and Biochemistry.** 3 credits. The theory and practical use of thermodynamics, kinetics, spectroscopy and quantum chemistry in chemical and biochemical research. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 331 or permission of instructor.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**CHEM 891: Doctoral Scientific Critique, Writing and Presentation.** 3 credits. Development of skills associated with scientific communication and research such as oral presentation of scientific material, analysis of scientific research and preparation of scientific proposals. In preparing scientific proposals, students will learn how to identify scientific questions of interest and how to plan a course of experiments to address these questions. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry (p. 636). May not be repeated for credit.

**Recommended Prerequisite:** Permission of academic advisor, research advisor and/or research committee

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**CHEM 896: Doctoral Directed Reading and Research.** 1-6 credits. Reading and research on a specific topic in Chemistry or Biochemistry under direction of a faculty member. Offered by Chemistry (p. 636). May be repeated within the degree for a maximum 15 credits.

**Recommended Prerequisite:** Admission to the PhD in Chemistry and Biochemistry or affiliated programs.
Recommended Prerequisite: CHIN 109, CHIN 110.

Languages (p. 414). May not be repeated for credit. Equivalent to CHIN 102 and CHIN 109 or 110. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to CHIN 110.

CHIN 101: *Elementary Chinese*. 3 credits.

Introduction to Mandarin, including basic grammar, oral expression, listening comprehension, reading, and writing. Notes: Students may not receive credit for CHIN 101 and CHIN 109 or 110. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to CHIN 101, CHIN 102, CHIN 109.

Recommended Prerequisite: CHIN 101.

Schedule Type: Lecture

CHIN 102: *Elementary Chinese*. 3 credits.

Continuation of CHIN 101. Notes: Students may not receive credit for CHIN 102 and CHIN 109 or 110. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to CHIN 109, CHIN 110.

Recommended Prerequisite: CHIN 101.

Schedule Type: Lecture

Further development of skills acquired in CHIN 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing. Notes: CHIN 201 and 202 must be taken in sequence. Students may not receive credit for CHIN 201 and CHIN 209 or 210. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to CHIN 210.

Recommended Prerequisite: CHIN 101 and 102.

Schedule Type: Lecture

Continuation of CHIN 201. CHIN 201 and 202 must be taken in sequence. Notes: Students may not receive credit for CHIN 202 and CHIN 209 or 210. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to CHIN 210.

Recommended Prerequisite: CHIN 201.

Schedule Type: Lecture

Recommended for students who desire training in Chinese language to an intermediate level of competence in a relatively short period of time. Notes: Equivalent to CHIN 201 and 202 taught in single semester. Students may not receive credit for CHIN 209 and CHIN 201, 202, or 210. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to CHIN 210.

Recommended Prerequisite: CHIN 102, 109, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Chinese-speaking regions. Notes: Students may not receive credit for CHIN 210 and CHIN 201, 202, or 209. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to CHIN 201, CHIN 202, CHIN 209.
Recommended Prerequisite: CHIN 110 or appropriate placement score.

Schedule Type: Lecture

CHIN 250: Gateway to Advanced Chinese. 3 credits.
Integration of advanced intermediate-level Chinese reading, writing, listening, and speaking skills; and the development of critical thinking about authentic texts from around the globe. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in Chinese

Recommended Prerequisite: CHIN 210.

Schedule Type: Lecture

300 Level Courses

CHIN 300: Reading Skills Development. 3 credits.
Develops reading proficiency, emphasizing vocabulary and grammar of standard written Chinese. Introduces discourse structure, sociolinguistic and cultural knowledge, and strategies for reading Chinese at an advanced level. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in Chinese

Recommended Prerequisite: CHIN 250, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

CHIN 301: Advanced Grammar and Syntax. 3 credits.
In-depth review of Chinese grammar and syntax. Provides extensive practice in controlled and free writing, emphasizing fundamental difficulties and points of interference between English and Chinese. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in Chinese

Recommended Prerequisite: CHIN 250 or equivalent; appropriate placement score; or permission of instructor.

Schedule Type: Lecture

CHIN 305: Chinese for the Business World. 3 credits.
Introduces terminology and structure of business Chinese. Emphasizes acquiring vocabulary and developing facility in Chinese business articles and correspondence. Notes: May be repeated for credit with permission of department when content is different. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in Chinese

Recommended Prerequisite: CHIN 250 or equivalent; appropriate placement score; or permission of instructor.

Schedule Type: Lecture

CHIN 310: Survey of Chinese Literature. 3 credits.
Introduces outlines of Chinese literature to the 19th century, presented through literary sources arranged in roughly chronological order. Readings include poetry, fiction; personal essays; documents of philosophy, history, and religion; and transcribed oral records. Notes: Knowledge of Chinese helpful but not required. May be repeated when topic is different with approval of department. Offered by Modern &

Recommended Prerequisite: CHIN 250, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

CHIN 311: Modern Chinese Literature in Translation. 3 credits.
Introduction of outlines of modern Chinese literature from early 20th century to post-Mao era, presented through literary sources arranged in roughly chronological order. Readings include poetry, fiction, personal essays. Notes: Knowledge of Chinese helpful but not required. May be repeated when topic is different with approval of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the term for a maximum 6 credits.

Mason Core: Literature (p. 135)

Specialized Designation: Taught in English

Recommended Prerequisite: ENGL 101/ENGH 101, or permission of instructor.

Schedule Type: Lecture

CHIN 318: Introduction to Classical Chinese. 3 credits.
Introduces basic structures and vocabulary of Classical Chinese, which still has a significant influence on the formal written prose of modern newspapers and documents. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Mason Core: Capstone (p. 135)

Specialized Designation: Taught in Chinese, Non-Western Culture

Recommended Prerequisite: CHIN 250, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

CHIN 320: Contemporary Chinese Film. 3 credits.
Explores China from 1949 to present through cinematic and literary representations. Discussions focus on representations of cultural, social, and political changes in the movies. Also introduces critical readings that address issues of gender and youth, family, ethnicity, modernity and the nation, as well as visuality and memory. Notes: Knowledge of Chinese language helpful but not required. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in English, Non-Western Culture

Recommended Prerequisite: CHIN 250, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

CHIN 325: Major Chinese Writers. 3 credits.
Studies works of major Chinese writers. Writers studied may vary. Notes: Knowledge of Chinese helpful but not required. May be repeated when topic is different with approval of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Mason Core: Literature (p. 135)
Specialized Designation: Taught in English, Non-Western Culture

Recommended Prerequisite: ENGL 101/ENGH 101, or permission of instructor.

Schedule Type: Lecture

CHIN 328: Asian American Women Writers. 3 credits.
Introduction to selected works by female writers of Chinese, Filipino, Indian, Japanese, and Korean descent. Analyzes themes, form, style, language, and structure of a variety of works, mainly novels and short stories. Assesses role and significance of writings as part of ethnic American and women's literature by exploring questions of identity formation and disintegration, and how they are rooted in gender, social status, ethnicity, community, geography, and generational conflict. Notes: Knowledge of Asian languages not required. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Mason Core: Literature (p. 135)

Specialized Designation: Taught in English

Schedule Type: Lecture

CHIN 355: Readings in Chinese Poetry and Poetics. 3 credits.
Close readings and discussions of primary texts covering major periods in Chinese poetry to 1949. Analyzes variety of themes, forms, and styles. Notes: May be repeated when readings are different with permission of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Mason Core: Capstone (p. 135)

Specialized Designation: Taught in Chinese

Recommended Prerequisite: CHIN 300 or permission of instructor.

Schedule Type: Lecture

CHIN 365: Readings in Chinese Fiction after Mao. 3 credits.
Close readings and discussions of primary texts after the Cultural Revolution. Analyzes themes, subjects, language, and styles. Notes: May be repeated when readings are different with permission of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Taught in Chinese

Recommended Prerequisite: CHIN 300 or permission of instructor.

Schedule Type: Lecture

400 Level Courses

CHIN 470: Special Topics in Chinese Studies. 3 credits.
Covers topics on Chinese language, literature, or culture organized by theme, genre approach, or era. Notes: May be repeated when topic is different with permission of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Taught in Chinese

Schedule Type: Lecture

CHIN 475: Chinese Popular Culture. 3 credits.
Combines language learning with an introduction to the complex and vibrant popular culture of contemporary China: music, food, games, gender and family issues, commercial culture, and digital media. Authentic texts will include popular music and poems, films, TV shows, and social media posts. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Mason Core: Capstone (p. 135)

Specialized Designation: Taught in Chinese

Recommended Prerequisite: Three years of college Chinese or equivalent.

Schedule Type: Lecture

CHIN 480: Fourth-Year Chinese I. 3 credits.
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in Chinese, Writing Intensive in the Major

Recommended Prerequisite: CHIN 300 and 301; appropriate placement score, or permission of instructor.

Schedule Type: Lecture

CHIN 481: Fourth-Year Chinese II. 3 credits.
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in Chinese

Schedule Type: Internship

Civil and Infrastructure Engineering (CEIE)

100 Level Courses

CEIE 100: Environmental Engineering around the World. 3 credits.
Introduces environmental engineering as practiced in different societies around the world. Environmental engineering is broadly defined as organizational and physical infrastructure to manage natural resources. Focuses on how different contemporary and past societies have responded to environmental challenges related to engineering opportunities. Issues include construction of large dams to manage river systems; use of forecast climate and weather data to improve agriculture, emergency response, or water supply; collection and treatment of wastewater; public health and pollution control; disposal of waste nuclear...
materials; and management of significantly polluted sites. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

**Mason Core:** Global Understanding, Encore:Sustainability (p. 135)

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

### 200 Level Courses

**CEIE 203: Geomatics and Engineering Graphics.** 3 credits.
Introduces topographic surveying and engineering drawing for civil engineering applications. Topics include surveying, GPS, GIS, digital terrain modeling, design of horizontal and vertical curve geometry for road applications, engineering drawing concepts, and drawing with CAD-based software. Fieldwork required on selected topics. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CEIE 117C or CDS 130C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**CEIE 210: Statics.** 3 credits.
Covers force vectors and operations in 2D and 3D; equilibrium of a particle; moment of a force vector; equilibrium of a rigid body; truss analysis; center of gravity, centroid and moment of inertia; shear force and bending moment diagrams; dry friction; virtual work. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts. Equivalent to ENGR 210.

**Registration Restrictions:**
**Required Prerequisites:** (PHYS 160C) and (MATH 114C or 116C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**CEIE 240: Hydraulics.** 3 credits.
Principles of fluids in equilibrium and motion. Topics include hydrostatic pressure; continuity, Bernoulli, and momentum equations; viscosity flow problems; pressure pipe flow and turbomachinery; measuring instruments; and applications to closed conduits and open channels. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts. Equivalent to CEIE 230.

**Registration Restrictions:**
**Required Prerequisite:** (PHYS 160C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

### 300 Level Courses

**CEIE 301: Engineering and Economic Models in Civil Engineering.** 3 credits.
Applies planning, analysis, control, and engineering economic models to life cycle of physical infrastructure. Introduces infrastructure design process and application of quantitative and probabilistic models. Presents applications of model building for engineering economics; decision making; forecasting; resource scheduling and allocation; estimating; work measurement and materials; and quality and process control in water, transportation, environmental, energy, and telecommunications infrastructure systems and the built environment. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

**Specialized Designation:** Writing Intensive in the Major

**Registration Restrictions:**
**Required Prerequisites:** (STAT 344C or L344) and (ENGL 114C, ENGL L302, ENGL L302 or HNRS 353C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**CEIE 304: Jr Engineering Competency Exam.** 0 credits.
Assess student preparation for the Fundamentals of Engineering exam after completing engineering science requirements for a BS degree in engineering. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the term for a maximum 0 credits.

**Registration Restrictions:**
**Required Prerequisites:** (MATH 114C or 116C) and (PHYS 160C).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Independent Study

**CEIE 310: Mechanics of Materials.** 3 credits.

**Registration Restrictions:**
**Required Prerequisites:** (ENGR 210C or CEIE 210C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**CEIE 311: Structural Analysis.** 3 credits.
Basic concepts and assumptions of structural analysis, including statical and geometric redundancy. Analysis, by integration of deformation of simple structural members. Virtual work method for the analysis of deformations of simple structural systems such as articulate beams, trusses, frames, and arches. Method of forces to analyze statically indeterminate systems, method of displacements to analyze geometrically indeterminate systems, and symmetry and antisymmetry in structural analysis. Uses computer programs for structural analysis. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (ENGR 310\textsuperscript{C}, L310, CEIE 310\textsuperscript{C} or L310).
\textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

CEIE 331: Soil Mechanics. 3 credits.
Covers soil classification, soil properties and engineering characteristics of soils. Includes seepage effects, effective stresses, soil strength and deformation characteristics. Also, the determination of immediate and consolidation settlement, lateral earth pressures and bearing capacities. Introduces foundation design fundamentals. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts. Equivalent to CEIE 305.

Registration Restrictions:
Required Prerequisites: (ENGR 210\textsuperscript{C} or CEIE 210\textsuperscript{C}) and (CEIE 230\textsuperscript{C} or 240\textsuperscript{C}).
\textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

CEIE 340: Water Resource Engineering. 3 credits.
Introduces principles and practice of water resources engineering. Topics include hydrology, governing principles, design and evaluation methods, common models, and typical applications in water resource engineering. Laboratory and field work required on selected topics. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 230\textsuperscript{C}, U230, 240\textsuperscript{C} or U240).
\textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 355: Environmental Engineering and Science. 3 credits.
Introduces students to the concepts of water pollution, air pollution, noise, and solid waste generation and management. Relationships between human population growth and pollution are introduced. Contemporary environmental engineering topics such as sustainability and global climate change are presented. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Specialized Designation: Green Leaf Course

Registration Restrictions:
Required Prerequisites: (CHEM 211\textsuperscript{C}, U211, 251\textsuperscript{C} or U251) and (CEIE 230\textsuperscript{C}, U230, 240\textsuperscript{C} or U240).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 360: Introduction to Transportation Engineering. 3 credits.
Introduces transportation systems and the factors that influence their planning, design, and operation. Topics include fundamentals of urban travel, travel demand forecasting, and traffic flow; principles of highway design; highway capacity and level of services; introduction to traffic control; traffic signal control systems; intersection design; speed zoning and control; and introduction to Intelligent Transportation Systems and travel demand management. Requires laboratory, field work on selected topics. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 290\textsuperscript{C}, U290, 203\textsuperscript{C} or U203) and (CEIE 304) and (ENGR 210\textsuperscript{C}, U210, CEIE 210\textsuperscript{C} or U210).
\textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 370: Construction Systems. 3 credits.
Overview of the modern construction industry and principles and practices of construction management. Topics include project planning, construction administration, the contract environment, equipment operations, cost estimation and scheduling, and legal theories. Current industry trends are emphasized as are the uses of modern scheduling and cost-estimating software and online databases. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 301\textsuperscript{C}) and (CEIE 290\textsuperscript{C}, 203\textsuperscript{C} or U290).
\textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 395: Mentored Research in Civil and Environmental Engineering. 1-3 credits.
Introduces the scientific research process through hands-on experience: students are matched with faculty mentors who are actively involved in civil engineering-related research. Requires no less than 60 hours per semester working with mentors. Notes: Three credits of CEIE 395 may substitute for a maximum of 3 credits of CEIE 4xx technical elective credits with department permission. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: At least 60 credit hours applicable to the Civil and Infrastructure Engineering program.

Registration Restrictions:
Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study
400 Level Courses

CEIE 400: Civil Engineering Planning and Management. 3 credits.
Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduces policies, programs, and regulations that influence land development, history-enabling legislation, governing and regulating bodies, control of site plan development, and approval process. Examines structure, function, and purpose of urban design systems and how they can be achieved. Discusses physical relationships among development, land use, transportation, energy, communications, and water systems. Studies public- and private-sector urban development industry. Other topics include innovation, competition, new technology, and environmental issues. Requires design projects. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 340C or L340) and (CEIE 360C or L360).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 401: Sustainable Land Development. 3 credits.
Introduces students to sustainable land development topics including low impact development, site resource conservation, ultra-low water design, deconstruction and materials reuse, healthy building design, green house gas reduction, zero and low energy design, and other topics related to sustainable practices in facilities and infrastructure design and construction. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Specialized Designation: Green Leaf Course

Recommended Corequisite: CEIE 400.

Registration Restrictions:
Required Prerequisites: (CEIE 355C) and (CEIE 360C or L360) and (CEIE 340C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 402: Highway Design and Construction. 1.5 credit.
Provides a survey of the tools, techniques, and methods used by the various civil engineering disciplines to design and construct highways. Combines lectures, individual readings, and hands-on exposure to the tools and processes used in design and construction of highways. All facets of a project are covered including planning, project management, survey and mapping, preliminary design, geotechnical, pavements, environmental, hydraulics, bridge design, PS&E design, materials, and construction. Notes: Course meets off-campus at the Federal Highway Administration Eastern Federal Lands Highway Division in Sterling, VA. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CEIE 310C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 403: Experimental Methods in Civil Engineering. 1.5 credit.
Surveys common testing and laboratory experimental methods that civil engineers encounter in their professional practice and in research settings. Students fabricate specimens of civil engineering materials and conduct experiments in the following laboratories at the Federal Highway Administration's Turner-Fairbank Highway Research Center: Concrete and Steel Materials, Structures, Hydraulics, Geotechnical, and Asphalt. Notes: Course meets off-campus at the Federal Highway Administration's Turner-Fairbank Highway Research Center in McLean, VA. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CEIE 310C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Students cannot enroll who have a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 404: Sr Engineering Competency Exam. 0 credits.
Assess student preparation for the Fundamentals of Engineering exam after completing engineering design electives required for a BS degree in engineering. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the term for a maximum 0 credits.

Registration Restrictions:
Required Prerequisite: (CEIE 304).

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study

CEIE 409: Professional Practice and Management in Engineering. 1 credit.
Introduces professional ethics and management principles, and prepares students for leadership roles in practice. Topics include introduction to professional and technical societies; code of ethics related to the public, clients, contractors, suppliers, employers, agreements, contracts, competitive bidding, the engineering profession, conflict of interest, legal responsibilities and case law. Case studies of professional ethics; professional licensure; engineering versus engineering management; personal development; time management, career versus grad school, continuing education; public policy considerations in engineering practice; practical considerations in project management; effectively communicating with employees, contractors and clients; marketing, competitive bidding and project selection; conflict resolution; and managing a small business. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts. Equivalent to ENGR 401.

Mason Core: Information Technology: Ethics Only (p. 135)

Registration Restrictions:
Enrollment limited to students with a class of Senior Plus or Senior.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 410: Geographic Information Systems in Engineering. 3 credits.
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other situations. Explores methods, technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CDS 130C, CS 112C, U112, ENGR 117C, U117 or CEIE 117C) and (CEIE 360C) and (CEIE 355C). C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 411: Introduction to Design and Inventive Engineering. 3 credits.
Outlines major stages of design process. Covers conceptual versus detailed design; design evaluation. Covers applications of Artificial Intelligence (AI) in design, including evolutionary computation. Covers inventive problem-solving methods, including brainstorming, Synectics, TRIZ, and morphological analysis. Includes computer tools to support design creativity. Features collaborative design: fundamentals and group projects dealing with civil engineering problems provided by industry. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 412: Structural Steel Design. 3 credits.
Covers analysis and design of structural steel members including tension members, compression members, bolted and welded connections, columns, beams, and beam-columns. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 311C or L311). C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 413: Reinforced Concrete Design. 3 credits.
Covers analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure and shear; determining serviceability limits; detailing reinforcing steel bars. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 311C or L311). C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 414: Structural Modeling for Engineers. 3 credits.
This course provides an introduction to the computer modeling tools that underpin modern structural engineering practice: finite element analysis. Emphasis a combination of theory and practical experience with modeling software. Modeling concepts and the assumptions that engineers must make while building finite element models will be discussed. Topics include applications from structural analysis, structural design, and dynamic vibration analysis. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Recommended Prerequisite: CEIE 311.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 432: Foundation Design. 3 credits.
Introduction to various principles and practices of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations and capacity analysis of deep foundations. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts. Equivalent to CEIE 431.

Registration Restrictions:
Required Prerequisites: CEIE 305C or 331C. C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 435: Engineering Geology. 3 credits.
Introduction to formation and occurrence of earth materials: rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 305C or 331C). C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 440: Water Supply and Distribution. 3 credits.
Analysis and design of public water supplies. Topics include: water supply evaluation; water quality; demand projections; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; surge analysis; water modeling; concepts in management, business, and public policy of public water supplies; and federal, state, and local government laws and regulations related to
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

**CEIE 442:** *Open Channel Flow.* 3 credits.
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; and modeling and computer applications in open channel analysis and design. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 340\(^c\) or U340).
\(^c\) Requires minimum grade of C.

The course will be taught with an emphasis on remote sensing techniques as a tool for engineering practices, such as regional planning, site investigation, terrain mapping, urban infrastructure development, water resources engineering, and flood monitoring. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registered Prerequisites:
* CEIE 355\(^c\).
\(^c\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

**CEIE 450:** *Environmental Engineering Systems.* 3 credits.
Introduces the concepts and applications of systems analysis in environmental engineering. Tools and methodologies of systems analysis are applied to improve the understanding and resolution of complex environmental engineering problems related to air, soil, water quality and pollution. Scientific, engineering, political, social, legal, regulatory, medical, economic, and financial impacts of environmental engineering decisions are considered. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 355\(^c\) or L355).
\(^c\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

**CEIE 453:** *Water and Wastewater Treatment Processes.* 3 credits.
Reviews unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts. Equivalent to CEIE 452.

Registration Restrictions:
Required Prerequisite: (CEIE 355\(^c\)).
\(^c\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

**CEIE 454:** *Sustainable Water Resources Infrastructure in Developing Countries.* 3 credits.
This course addresses the principles of infrastructure engineering and planning in developing countries, with a focus on sustainable technologies for rural and small-scale water supply and wastewater treatment. Students will design simple, reliable water supply and sanitation systems for developing countries with limited human and material resources and with regard to local customs and socio-cultural public health and economic factors. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CEIE 355\(^c\).
\(^c\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

**CEIE 457:** *Remote Sensing in Civil Engineering.* 3 credits.
This course provides an introduction to the fundamentals of remote sensing. It will focus on how remote sensing data are acquired, displayed, restored, enhanced, and analyzed. The course will be taught with an emphasis on remote sensing techniques as a tool for engineering practices, such as regional planning, site investigation, terrain mapping, urban infrastructure development, water resources engineering, and flood monitoring. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Recommended Prerequisite: C or better in CEIE 355.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

**CEIE 461:** *Traffic Engineering.* 3 credits.
Elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 360\(^c\) or L360).
\(^c\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

**CEIE 462:** *Urban Transportation Planning.* 3 credits.
Technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation, trip distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 360\(^c\) or L360).
\(^c\) Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 471: Construction Administration. 3 credits.
Examines the principals of project planning and administration using modern specification and project delivery methods. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 370 or L370).
Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 472: Building Information Modeling. 3 credits.
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects. Offered by Civil, Environ & Infrastr Engr (p. 1090). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 370 or L370).
Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CEIE 498: Independent Study in Civil Engineering. 1-3 credits.
Directed self-study of special topics of current interest. Notes: May be repeated if topics substantially differ. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the term.

Recommended Prerequisite: Permission of the Department Chair.

Registration Restrictions:
Enrollment limited to students with a class of Junior or Senior.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study

CEIE 499: Special Topics in Civil Engineering. 1-3 credits.
Varies with nature of topic. Topics of special interest to undergraduates. Notes: May be repeated if topics substantially differ. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the term.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

500 Level Courses

CEIE 501: Sustainable Development. 3 credits.
Introduction to sustainability concepts and terminology including the development and use of sustainability indices. Exploration of sustainability tools and frameworks such as the Leadership in Energy and Environmental Design (LEED) Green Building Rating System, American Institute of Architects Sustainable Design Resources Guide, and the Natural Step (TNS) Framework. Methods for evaluation of sustainable sites, water/energy efficiency, sustainable materials and resources, and indoor air quality are presented. Designated a Green Leaf Course. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 510: Geographic Information Systems in Engineering. 3 credits.
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other engineering-related decision situations. Introduces methods and technologies for
spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Knowledge of computer programming and databases or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 512: Structural Steel Design. 3 credits.
Covers analysis and design of structural steel members including tension members, compression members, bolted and welded connections, columns, beams, and beam-columns. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: CEIE 311

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 513: Reinforced Concrete Design. 3 credits.
Covers analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure and shear; determining serviceability limits; detailing reinforcing steel bars. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: CEIE 311.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 524: Introduction to Bridge Engineering. 3 credits.
A balanced theoretical and practical insight into the art and science of bridge engineering. Various methodologies of bridge design and evaluation are investigated, including constructability reviews. Bridges of steel, reinforced concrete, and pre-stressed concrete materials are included. Short-span composites; major innovation and low cost solutions targeted at aging infrastructure. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE; CEIE 512 or CEIE 513 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 525: Structural Evaluation and Rehabilitation. 3 credits.
Structural condition survey and evaluation for strength and serviceability of existing structures including foundation elements; older building practices and materials; criteria for rehabilitation; retrofit techniques for change in function, loading, and seismic forces. Historic preservation issues. Repair, remediation, and structural strengthening methods and current trends. Carbon fiber external P.T. Material selection criteria, including mechanical and environmental factors. Cost/value feasibility analysis; estimating remedial construction costs; engineering oversight of rehabilitation work. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 526: Advanced Steel Design. 3 credits.
Behavior, strength, and design of vertical steel structures using the LRFD approach; plate girders, composite beams, welded built-up columns, bolted and welded connections, beam-columns, and torsion; introduction to plastic analysis and its application to members and vertical structures; erection procedure and methods field inspection issues; unique properties of high strength steels. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.
Recommended Prerequisite: Graduate Standing in CEIE; CEIE 512 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 527: Pre-stressed Concrete. 3 credits.
Strength, behavior, analysis, and design of pre-stressed concrete members, vertical building structures, and bridges, with emphasis on pre-tensioned, precast construction, and post-tensioned construction; basics of segmental concrete bridges, cable-stayed bridges, and spliced-girder concrete bridges; continuous span theory; protection of pre- & post-tensioned systems; secondary effects. Composite Portland cement with cast-in-place topping; precast as a stay-in-place system; connection detailing; durability issues; advantages in a marine environment. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE; CEIE 513 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 527: Pre-stressed Concrete. 3 credits.
Strength, behavior, analysis, and design of pre-stressed concrete members, vertical building structures, and bridges, with emphasis on pre-tensioned, precast construction, and post-tensioned construction; basics of segmental concrete bridges, cable-stayed bridges, and spliced-girder concrete bridges; continuous span theory; protection of pre- & post-tensioned systems; secondary effects. Composite Portland cement with cast-in-place topping; precast as a stay-in-place system; connection detailing; durability issues; advantages in a marine environment. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE; CEIE 513 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 532: Foundation Design. 3 credits.
Introduction to various principles and practice of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes the study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations for deep foundations. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 535: Engineering Geology. 3 credits.
Introduction to formation and occurrence of earth materials-rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 540: Water Supply and Distribution. 3 credits.
Analysis and design of public water supplies. Topics include supply evaluation; water quality and quantity requirements; treatment requirements and methods; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; sustainability; security; concepts in management, business, and public policy of public water systems; and federal, state, and local government laws and regulations related to public water systems. Requires laboratory, field work on selected topics. Designated a Green
Leaf Course. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** Course in hydraulics or fluid mechanics

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 542:** Open Channel Flow. 3 credits.
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; modeling and computer applications in open channel analysis and design. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** A course in hydraulics or fluid mechanics.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 553:** Water and Wastewater Treatment Processes. 3 credits.
Studies unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** CEIE 355.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 556:** Environmental Law. 3 credits.
Introductory course in the study of environmental laws as they pertain to urban systems infrastructure management. Reviews the National Environmental Policy Act, Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, and other environmentally related legislation. Also reviews laws for allocation of surface and groundwater supplies, and reviews environmental law databases. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** CEIE 355.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduation Deadline Extended, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 560:** Public Transportation Systems. 3 credits.
Analyzes public transportation systems in terms of their role in urban transportation. Topics include history of public transportation in the United States, quantitative performance attributes of different modes, analytical techniques for planning and operation, and management and administrative concepts. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** CEIE 360.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 561: Traffic Engineering. 3 credits.
Covers elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: CEIE 365.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 562: Urban Transportation Planning. 3 credits.
Covers technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation and distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: CEIE 360.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 563: Building Information Modeling. 3 credits.
Examines the legal principles associated with project planning and administration using modern specification and project delivery techniques. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction. Offered by Civil, Environ & Infracr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 575: Design for Constructability.** 3 credits.

Systems design of structures to consider foundations, structures and constructability; foundation alternatives; structural design to simplify erection; prefabrication, modulation of structures; material handling on a construction site; crane selection and placement; temporary works. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 576: Construction Cost Estimating.** 3 credits.

Overview of cost estimating and financial management in the modern construction industry. Techniques and software applications for construction take-offs, bidding, bonding, insurance, equipment ownership, material and labor costing. Additional topics include: cost recovery planning; budgeting, forecasting, acquisition, cast flow management, managerial accounting concepts, and taxes. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 601: Infrastructure Modeling.** 3 credits.

Concepts of modeling for infrastructure engineering. Covers modeling, simulation, optimization, deterministic and stochastic models, and limitations of modeling approaches. Also includes multiple objective, multiple decision-maker problems, and case studies in areas such as transportation, water resources, the environment, energy, telecommunications, and construction. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** CEIE 605.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 603: Research Methods in Civil Engineering.** 3 credits.

Familiarizes students with the process of rigorous research in civil engineering by providing a strong background in research methods, such as critical thinking, experimental design (idea, concept, design, development), writing a scientific article, and interpretation of results (uncertainty quantification, assumptions, etc.). Introduces common quantitative methods in civil engineering research such as descriptive and inferential statistics, data assimilation, and hypothesis testing. Encourages critical thinking and collaboration among students from different civil engineering disciplines. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Graduate standing in CEIE.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 605: Risk and Uncertainty in Civil Engineering.** 3 credits.

Probability and statistics topics for analysis of infrastructure systems. Includes Bayesian decision theory, decision trees, Monte Carlo analysis, stochastic models, and economic analysis of infrastructure projects and systems. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** STAT 344.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 607: Public Infrastructure Management and Finance. 3 credits.
Current and projected outlook for managing and financing public works infrastructure including, transportation, public utilities, water and waste water facilities, energy, and public buildings; Infrastructure management including the impact of built infrastructure on the environment, tracking and improving infrastructure performance, government regulations, emerging technologies, social concerns, and the impacts of disasters; Infrastructure finance including public and private sources of capital, special financing districts, bond markets, federal and state grants, public-private partnerships, and design-build project delivery. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 611: Advanced Structural Analysis. 3 credits.
Application of the stiffness method in planar trusses, beams, planar frames, curved beams, and three-dimensional structures; Introduction to non-linear structural analysis with emphasis on geometric non-linearity. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 612: Structural Mechanics. 3 credits.
Covers the foundations of structural modeling and theories of elasticity. Topics include: multidimensional theories of stress and strain, governing equations of elasticity, numerical solution techniques, material failure criteria, basics of nonlinear analysis. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 613: Structural Dynamics. 3 credits.
This course covers the fundamental principles necessary to analyze the responses of structures subjected to dynamic loads such as blast, earthquake, rotating machinery, etc. Idealized linear structural models subjected to free vibrations, harmonic vibrations, and impulsive loadings are presented. Practical applications of structural dynamics for solving simplified problems in blast and earthquake engineering are included. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Differential Equations.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 619: Special Topics in Structural Engineering. 3 credits.
Advanced topics in recently developed areas of structural engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the degree for a maximum of 6 credits.

Recommended Prerequisite: Graduate standing in CEIE or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 620: Intelligent Structural Systems. 3 credits.
Covers modern “smart” structures, structural health monitoring, and intelligent inspection technologies. Laboratory exercises with sensing and data acquisition systems. Applied data filtering and pattern recognition (machine learning). Modern image analysis and inspection techniques. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 623: Advanced Reinforced Concrete Design.** 3 credits.

Covers the behavior, analysis and design of two-way reinforced concrete slabs; design of long columns including slenderness effects; structural design of isolated footings, combined footings and pile caps; design of deep beams using the strut-and-tie models; introduction bearing, retaining and shear wall designs. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Reinforced Concrete Design.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 634: Groundwater and Geoenvironmental Design.** 3 credits.

Equations of groundwater flow and seepage, groundwater site investigations, parameter determination, flownets, well design and aquifer testing, design of dewatering systems, seepage control. Conservative and non-conservative pollutant transport in groundwater, transport processes, modeling techniques for flow and transport. Groundwater remediation technologies, Brownfields and land revitalization. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 635: Advanced Soil Mechanics.** 3 credits.

Consolidation of soil: primary and secondary; and rate. Soil strength in the framework of Critical State Soil Mechanics: normally consolidated, lightly and heavily overconsolidated, drained and undrained, elastic and plastic deformation. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 636: Sources of Geotechnical Data.** 3 credits.

Resources for conducting desk top studies; tools for field investigations; subsurface investigations (options and selection of techniques); laboratory testing of soil and rock; accepted testing procedures; typical values; empirical relationships between properties and testing techniques; risk and uncertainty; use of lab testing, insitu strength testing, and empirical methods in design; identifying slickensides. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 638: Advanced Foundation Design.** 3 credits.

Design of shallow and deep foundations for civil engineering structures, including time rate of consolidation settlement, stress distribution, elastic settlement, and bearing capacity. Driven piles and drilled shafts subjected to axial and lateral loading, both single and group action. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 639: Special Topics in Geotechnical Engineering.** 1-3 credits.

Advanced topics in recently developed areas of geotechnical engineering. May be repeated for credit when topics vary. Offered by Civil, Environ &
**CEIE 641: Water Resources Engineering I: Principles and Practice.** 3 credits. Introduction to the principles of hydrology and hydraulics and their application to the planning, design and management of modern water resources. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Graduate standing in CEIE or CEIE 340 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 642: Flood Hazards Engineering.** 3 credits. Introduction to the principles of flood hazards engineering. Theory and practice of the application of hydrology and hydraulics to flood hazards delineation. Theory and practice of the application of geospatial analyses to support flood hazards modeling. Application of computational methods to support planning, design and management of flood hazards. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Graduate standing in CEIE and CEIE 340 and CEIE 340 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 643: Coastal Flood Hazards.** 3 credits. Introduction to the theory and practice of coastal flooding and hazards engineering. Topics include the theory of hurricane storm surges, tides, coastal hydrodynamics, waves and coastal processes. Use of the Surface Water Modeling System (SMS) and the Advanced Circulation Model (ADCIRC) for coastal flooding analysis. Introduction to High Performance Computing (HPC) modeling of hurricane storm surge. Introduction to Geographic Information Systems (GIS) applications to support coastal flood modeling and hazard analysis. Applications of coastal engineering to support coastal flood mapping and hazard prevention. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 644: Groundwater Systems Modeling.** 3 credits. Introduces groundwater hydrology and modeling, including quantity and quality aspects. Topics include characterization of subsurface regime; well hydraulics; consideration of two-dimensional steady and unsteady-state flows; exploration of modeling approaches; simulation and optimization modeling; contaminant transport; parameter estimation; and design of systems to control groundwater quantity and quality. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit. Equivalent to CEIE 632.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CEIE 649: Special Topics in Water Resources Engineering.** 3 credits. Advanced topics in recently developed areas of water resources engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Graduate standing in CEIE or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree of Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 657: Environmental Engineering Microbiology. 3 credits.
Addresses the fundamental aspects of microbial physiology and ecology and their application to environmental engineering processes. Specific topics include cell structure and function, energetics, metabolism, enzyme and growth kinetics, microbial/environmental interactions (e.g., interactions with organic pollutants), biogeochemical cycles, and an introduction to engineering applications including bioremediation, wastewater treatment, biosensors and microbial fuel cells. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 658: Water Quality. 3 credits.
This course addresses the physical, chemical and biological principles that define water quality. Mathematical and chemical models are formulated and employed to predict fate and transport of contaminants in both surface and groundwater. Laboratory and field-work are required. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 659: Hazardous Waste. 3 credits.
Physical, chemical and biological properties of hazardous waste; abiotic and biotic transformation of hazardous wastes and their fate in the environment; design of remediation schemes including incineration, landfill, bioremediation and other physical and chemical stabilization processes; principles of risk assessment to select and optimize hazardous waste treatment; methods and strategies for hazardous waste reduction. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
Graduate, Non Degree or Senior Plus.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 664: Transportation Engineering and the Environment. 3 credits.
Introduction to transportation and air quality; Clean Air Act; greenhouse gases, climate change, and modeling for greenhouse gases; travel activity; The NEPA process for transportation projects; road transportation and noise; noise abatement. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 665: Travel Survey Methods and Data Analysis. 3 credits.
Covers the concept and practice of travel survey methods; national household travel survey; Census transportation survey and products; travel diary based, roadside, mail-in and web-based and GPS-based travel surveys; longitudinal vs. cross-sectional surveys; stated-preference survey; interactive and adaptive survey method; transit survey methods; special generator surveys; sampling approach and representativeness analysis; econometric data analysis; panel data; self-selection issues; other data mining methods; data security, privacy, IRB process, and ethics. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 667: Multi-modal Transportation Systems. 3 credits.
Topical coverage of freight and logistics; non-motorized transportation considerations; and public transit planning. Freight topics include demand and supply modeling concepts; freight flow data sources; and truck size and weight policies. Bicycle and pedestrian planning considering traveler response to facility and policy improvements and identifying common resources for addressing non-motorized project concerns. Public transportation planning coverage including mass transit technology typologies, corridor planning and operations concepts, and finance and public policy issues, including environmental justice. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 668: Transportation Economics. 3 credits.
Advanced topics in recently developed areas of transportation engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 669: Special Topics in Transportation Engineering. 3 credits.
Advanced topics in recently developed areas of transportation engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Graduate standing in CEIE or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CEIE 679: Special Topics in Construction Management. 3 credits.
Advanced topics in recently developed areas of construction management. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Graduate standing in CEIE or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a class of Advanced to Candidacy.

Registration Restrictions: Instructor.

Recommended Prerequisite: repeated for credit.

Students in a Non-Degree Undergraduate degree may not enroll.

CEIE 686: Transportation System Security and Safety. 3 credits. Focuses on critical transportation systems infrastructure and operations, and technologies for predicting and managing damage and disruptions caused by potential threats, including natural and technological disasters and terrorist threats. Includes asset management, methodologies for assessing vulnerabilities, potential impact of damage and disruption, applying state-of-the-art technologies and R&D processes for harnessing best analysis methods, and technologies for hardening transportation infrastructure systems. Includes sensing and surveillance using satellite and aerial remote sensing imagery, application of GIS and spatial information technologies, information and communication, intelligent transportation systems, hardening systems, and making intelligent choices for implementing technology advances to transportation security and safety. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: BS in Engineering, or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 683: Water and Wastewater Systems Security. 3 credits. Examines overall security of water and wastewater systems. Covers theory and methods to define water and wastewater infrastructure as physical and organizational systems. Explores concepts of infrastructure systems security, identifies actors, interactions in organizational infrastructure, and threats to water and wastewater infrastructure; describes behavior of physical and organizational infrastructures under stress; examines history of threats or attacks against water and wastewater systems; and explores evolution of design, operations, and maintenance paradigms in response to changes in threats. Covers proactive responses to security threats through vulnerability assessments, and models of organizational and physical infrastructure system. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: BS in Civil Engineering or CEIE 440 and CEIE 455.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 690: Topics in Civil Engineering. 3 credits. Topics not covered in the regular civil engineering offerings. Notes: Course content may vary each semester. Course may be repeated with change in topic. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the term.

Specialized Designation: Green Leaf Course

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

700 Level Courses

CEIE 742: Water Resources Engineering II: Water Resource Systems. 3 credits. Introduces concepts, applications, and tools of systems analysis for water resources planning, management, and design. Problems including river basin planning, real-time hydrosystem operations, water quality management, capacity expansion, urban drainage network design, and sanitary sewer design used to illustrate applications of systems analysis. Tools include optimization and simulation modeling and knowledge-based systems. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE; CEIE641 or equivalent.

Registration Restrictions: Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 762: Network Models for Transportation Planning. 3 credits. Covers network models for transportation systems analysis - theory, mathematical structure, and applications of equilibrium, iterative, incremental, dynamic and stochastic equilibrium models. Also covers data structures and heuristic methods for computer implementation of various algorithms such as shortest path and direction search algorithms; specialty network topics such as tracking and prohibition of turn movements, k-shortest path algorithms and select-link analysis.
Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: CEIE 562 or 660; CEIE 601.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 763: Discrete Choice Analysis in Transportation. 3 credits.
Utility theory and individual choice behavior; Binary choice model; Multinomial choice model; Characteristics of Probit and Logit models; Aggregate forecasting techniques; Travel survey and sampling; Test and choice of model structure; Correlation and nested Logit Model, Advanced models and estimation techniques; Travel, route choice and car ownership models. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 767: Traffic Engineering Modeling and Analysis. 3 credits.
Covers fundamentals of traffic flow theory; shock-wave analysis; queueing theory; macroscopic traffic flow models on freeway and arterials; fundamentals of traffic simulation; car following models; network analysis based on traffic simulation models; and developing skills to select most appropriate model for given scenarios. Offered by Civil, Environ & Infrastr Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: CEIE 561.

Recommended Corequisite: CEIE 601.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 795: Civil and Infrastructure Engineering Seminar. 0 credits.
Invited speakers, faculty, and CEIE graduate students lecture on current topics and research. Fulfills seminar requirement for MS in civil and infrastructure engineering. Notes: Students must enroll in CEIE 795 each semester (fall and spring) for the duration of their MS studies. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the degree.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

800 Level Courses

CEIE 800: Civil, Environmental, and Infrastructure Engineering Colloquium. 1 credit.
Seminar series required of Civil and Infrastructure PhD students.
Features variety of speakers from universities, government, and private sectors. Topics include civil engineering technologies, research advancements, and policies. Doctoral students take 2 credits of CEIE 800 and make a presentation of their dissertation research at the seminar.
No more than 1 credit per semester may be taken. Students eligible to register upon successful completion of qualifying exams. Offered by Civil, Environ & Infrast Engr (p. 1090). May be repeated within the degree for a maximum 2 credits.

Registration Restrictions:
Enrollment limited to students in the PHD Civil Infrastructure Engr program.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

CEIE 890: Special Topics in Urban Transportation. 3 credits.
Includes traffic safety analysis, simulation in transportation, intelligent transportation systems, advanced public transportation systems, congestion and travel demand management, geographic information systems and information technology, and innovative refinancing and public-private partnerships. Offered by Civil, Environ & Infrast Engr (p. 1090). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: CEIE 560 and 660 or equivalent; or permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate level students.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 892: Special Topics in Environmental and Water Resource Systems Engineering. 3 credits.
Possible topics include studies in waste minimization; pollution prevention; hazardous waste management; wastewater management; air pollution control; solid waste management; environmental decision making; sustainability; water resource and environmental economics; wetlands management, design and construction; groundwater contamination modeling; stochastic hydrology; river basin planning and management; and water quality modeling. Offered by Civil, Environ & Infrast Engr (p. 1090). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: CEIE 601

Registration Restrictions:
Enrollment limited to Graduate level students.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CEIE 894: Design and Inventive Engineering. 3 credits.
Topics include Fundamentals: successful intelligence and creative intelligence, creative class, the Medici Effect, the Renaissance Man and Da Vinci’s Seven Principles, engineering creativity; Design Engineering: system designing and architecting, designing as search, evolutionary designing, constraint search, constructive induction, Axiomatic and Inferential Design Theories; Inventive Engineering: Brainstorming, Synectics, Morphological Analysis, TRIZ, Visual Thinking, Inventive Design in Practice; Project Presentations. Notes: This is transdisciplinary course focused on creativity in engineering and science. Open to all graduate students in the Volgenau School of IT and Engineering. Graduate students from other schools are encouraged to register with the instructor’s permission. Offered by Civil, Environ & Infrast Engr (p. 1090). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to Graduate level students.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

CEIE 896: Civil Engineering Research Topics. 3 credits.
Reading on specific topic under direction of faculty member. May be repeated with change in topic. Offered by Civil, Environ & Infrast Engr (p. 1090). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission into CEIE PhD program, or permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate level students.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Independent Study

900 Level Courses

CEIE 990: Civil and Infrastructure Dissertation Topic Presentation. 1 credit.
Opportunity for PhD students to present research proposal for critique. Covers presentation of research topic for PhD in Civil and Infrastructure Engineering. Students complete dissertation research proposal. May be repeated with change in topic, but degree credit is given only once. Offered by Civil, Environ & Infrast Engr (p. 1090). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing; completion of all course work required for PhD in Civil and Infrastructure Engineering or permission of instructor.

Registration Restrictions:
Enrollment limited to students in the PHD Civil Infrastructure Engr program.
Enrollment is limited to Graduate level students.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Research

CEIE 998: Doctoral Dissertation Proposal. 1-12 credits.
Work on research proposal that forms basis for doctoral dissertation. May be repeated for credit. Notes: No more than 24 credits of CEIE 998
and 999 may be applied to doctoral degree requirements. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the degree for a maximum 12 credits.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Dissertation

CEIE 999: Doctoral Dissertation. 1-12 credits.
Formal record of commitment to doctoral dissertation research under direction of faculty member in civil engineering and infrastructure engineering. Offered by Civil, Environ & Infrastr Engr (p. 1090). May be repeated within the degree for a maximum 12 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Dissertation

Classics (CLAS)

200 Level Courses

CLAS 240: Greek and Latin Elements in English. 3 credits.
Studies formation of English vocabulary derived from Greek and Latin prefixes, stems, and suffixes to increase word power in English (vocabulary, style). Special emphasis on bioscientific, medical, and legal terminology. Intended for native and non-native speakers of English. Literary texts illustrate word analyses, vocabulary uses. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in English

Recommended Prerequisite: ENGL 101/ENGH 101, or equivalent or permission of instructor.

Schedule Type: Lecture

CLAS 250: Classical Mythology. 3 credits.
Illustrates role of classical myths in classical and modern literature and art. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Mason Core: Literature (p. 135)

Specialized Designation: Taught in English

Recommended Prerequisite: ENGL 101/ENGH 101, or equivalent or permission of instructor.

Schedule Type: Lecture

CLAS 260: The Legacy of Greece and Rome. 3 credits.
Introduces history, culture, and literature of Greece and Rome through close readings of central passages from classical literature dealing with some of the most important aspects of human existence. Illustrates importance of classical antiquity for the Western tradition. Notes:

Coursework in English. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Mason Core: Literature (p. 135)

Specialized Designation: Taught in English

Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.

Schedule Type: Lecture

300 Level Courses

CLAS 330: Roman Law and Society. 3 credits.
Introduces the Roman legal system, from the Law of the Twelve Tables to Justinian's Digest. Explores the fundamental concepts of Roman Law and its importance for Roman society and the legal history of the West. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Mason Core: Literature (p. 135)

Specialized Designation: Taught in English

Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.

Schedule Type: Lecture

CLAS 340: Greek and Roman Epic. 3 credits.
Examines development of classical epic as genre, from beginnings with Homer to transformations in the works of later Greek and Roman authors. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Mason Core: Literature (p. 135)

Specialized Designation: Taught in English

Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.

Schedule Type: Lecture

CLAS 350: Greek and Roman Tragedy. 3 credits.
Follows development of tragedy from its origins to the works of Aeschylus, Sophocles, and Euripides, and its reappearance in the Roman world in the tragedies of Seneca. Considers influence of Greek tragedy on later cultures. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Mason Core: Literature (p. 135)

Specialized Designation: Taught in English

Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.

Schedule Type: Lecture

CLAS 360: Greek and Roman Comedy. 3 credits.
Studies forms, contexts, and developments of comedy as a dramatic form in Greco-Roman world. Traces development of New Comedy in Hellenistic age and translation and adaptation of New Comedy by Roman dramatists Plautus and Terence. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Mason Core: Literature (p. 135)

Specialized Designation: Taught in English
Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.

Schedule Type: Lecture

CLAS 370: Greek and Roman Historians. 3 credits.
Examines writings of major Greek and Roman historians, including Herodotus, Thucydides, Sallust, Livy, and Tacitus; their interpretations of the past; and their influence. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in English

Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.

Schedule Type: Lecture

CLAS 380: Greek and Roman Novels. 3 credits.
Examines novels written in antiquity, and influences on postclassical and modern literature. Emphasizes works of Longus, Heliodorus, Petronius, and Apuleius. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in English

Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.

Schedule Type: Lecture

CLAS 390: Topics in Classical Literature and Culture. 3 credits.
Studies forms, contexts, and developments of distinctive literary genre or cultural phenomenon in the Greco-Roman world. Notes: May be repeated for credit when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree.

Specialized Designation: Taught in English

Recommended Prerequisite: ENGL 101/ENGH 101 or permission of instructor.

Schedule Type: Lecture

400 Level Courses

CLAS 499: Senior Seminar in Classical Studies. 3 credits.
Individual research on specialized topic culminating in seminar paper. Fulfills writing-intensive requirement. Subject of seminar determined by instructor in consultation with student. Notes: Permission must be obtained in advance. Students may present no more than 3 credits for graduation. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in English

Recommended Prerequisite: Classical studies minors, 90 credits including 15 credits in classics, and permission of instructor.

Schedule Type: Seminar

Climate Dynamics (CLIM)

100 Level Courses

CLIM 101: Global Warming: Weather, Climate, and Society. 3 credits.
Survey of the scientific and societal issues associated with weather and climate variability and change. Examines physical phenomena observed in the Earth’s weather and climate, providing sufficient scientific and technical background to enable students to critically examine arguments being discussed by policymakers and the public at large. Also reviews the current debate on climate change from a scientific point of view with a focus on those aspects that have the largest potential impact on global society. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Mason Core: Natural Science Overview, Encore:Sustainability (p. 135)

Specialized Designation: Green Leaf Course

Schedule Type: Lecture

CLIM 102: Introduction to Global Climate Change Science. 4 credits.
The scientific basis of computer models that simulate past and present climate and predict future climate change; how complex models are built, tested, and interpreted to better understand physical, chemical, and biological processes; how uncertainty is managed. Students conduct laboratory experiments through an online interface and apply results to policy and planning. Designated a Green Leaf Course. Notes: Computer models are used in the lab. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Mason Core: Natural Science with Lab, Encore:Sustainability (p. 135)

Specialized Designation: Sustainability (p. 135)

Recommended Prerequisite: Basic math skills (Geometry, Algebra).

Schedule Type: Laboratory, Lecture

CLIM 111: Introduction to the Fundamentals of Atmospheric Science. 3 credits.
Overview of the Earth's atmosphere, its history, and the physical and chemical process that determine its characteristics. Focuses on key concepts from thermodynamics, radiation, chemistry, and dynamics that are essential for understanding the state, variability, and long term evolution of the atmosphere; especially in the context of comparisons with other planetary atmospheres. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to PHYS 111.

Mason Core: Natural Science with Lab, Encore:Sustainability (p. 135)

Specialized Designation: Green Leaf Course

Schedule Type: Lecture

CLIM 112: Introduction to the Fundamentals of Atmospheric Science Lab. 1 credit.
Laboratory course associated with CLIM 111. Study of the Earth's atmosphere based on concepts taken from thermodynamics, radiation transport, chemistry, and dynamics. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to PHYS 112.

Mason Core: Natural Science with Lab, Encore:Sustainability (p. 135)
Specialized Designation: Green Leaf Course

Schedule Type: Laboratory

300 Level Courses

CLIM 301: Weather Analysis and Prediction. 4 credits. Large-scale behavior of mid-latitude weather systems. Includes coupling of synoptic motion to mesoscale processes that lead to significant weather events. Introduces the observational network, numerical weather models, and prediction. Laboratory portion gives practical experience in weather analysis, prediction, and technology currently used for visualization and analysis. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: MATH 113 or equivalent; one of CLIM/PHYS 111/112 or EOS 121 or GGS 121.

Schedule Type: Laboratory, Lecture

CLIM 312: Physical Climatology. 3 credits. Quantitative description of nature and theory of the climate system, dynamics of atmosphere-ocean-land surface, internal interactions and response to external forcing, description of the climate record and simple climate models. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to GGS 312.

Recommended Prerequisite: CLIM/PHYS 111/112 OR GGS 121; and PHYS 243,244, or permission of instructor.

Schedule Type: Lecture

CLIM 314: Severe and Extreme Weather. 3 credits. Behavior of weather events ranging from small scale (e.g., thunderstorms and tornadoes) to mesoscale (e.g., fronts and hurricanes). Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to GGS 314.

Recommended Prerequisite: MATH 113 or equivalent; CLIM/PHYS 111/112 OR GGS 121; and PHYS 243,244, or permission of instructor.

Schedule Type: Lecture

CLIM 319: Air Pollution. 3 credits. Description of major types of air pollution and introduction to how their characteristics are influenced by interaction with the atmosphere. Topics include sources and distribution of pollution from local to global scales, effects of radiation and wind on pollution, modeling of plume dispersion, and pollution effects on climate. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: CLIM 111 or GGS 121.

Schedule Type: Lecture

CLIM 390: Topics in Climate Research. 1-4 credits. Selected topics not covered in fixed content courses. May be included for credit by AOES majors in the 45 credits of courses required for BS degree. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 15 credits of AOES courses within concentration.

Schedule Type: Independent Study

400 Level Courses

CLIM 408: Senior Research. 3 credits. Independent research under guidance of faculty member on a research project in numerical, experimental, observational, or theoretical atmospheric or climate-related research. A written report on the project is required. Notes: May be repeated with department permission. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Writing Intensive in the Major

Recommended Prerequisite: 15 credits of AOES courses within major.

Schedule Type: Research

CLIM 409: Research Internship. 3 credits. On-the-job experience for AOES majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical research, and prepare a written report at the end of the internship. Notes: May be repeated with department permission. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 75 credits. 15 credits of courses in major and permission of department.

Schedule Type: Independent Study

CLIM 411: Atmospheric Dynamics. 3 credits. Observational bases and fundamentals of fluid dynamic principle for understanding atmospheric motions across multiple spatial and temporal scales; covers basic conservation laws of mass, momentum, and energy; concepts of circulation and vorticity; balanced atmospheric flows, e.g. geostrophic wind and shear, thermal wind; quasi-geostrophic and isentropic potential vorticity analysis for mid-latitude cyclones and fronts. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to CLIM 311.

Recommended Prerequisite: CLIM 111 and MATH 213, or permission of instructor.

Schedule Type: Lecture

CLIM 412: Physical Oceanography. 3 credits. Reviews global patterns of temperature, salinity, currents and waves in the world's oceans and how these patterns influence marine biota, climate, and human activity. Introduces key concepts which explain physical features of the ocean ranging from microscopic turbulence to global circulation. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to GEOL 412.

Recommended Prerequisite: MATH 113 or 115 and PHYS 160 or 253; or permission of instructor.
Schedule Type: Lecture

CLIM 429: Atmospheric Thermodynamics. 3 credits. Thermodynamics of the atmosphere, properties of dry and moist air, air parcel as a thermodynamic system, atmospheric stability and convection, cloud formation and stability indices. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: CLIM 111, MATH 114 and PHYS 260; or permission of instructor.

Schedule Type: Lecture

CLIM 438: Atmospheric Chemistry. 3 credits. Reviews fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change. Includes some review of extraterrestrial atmospheric chemistry. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to CHEM 438.

Recommended Prerequisite: CHEM 331 and 332 or permission of instructor.

Schedule Type: Lecture

CLIM 440: Climate Dynamics. 3 credits. Structure, dynamics and thermodynamics of atmospheric and oceanic circulations that maintain the climate. Role of the large scale transport of energy, moisture and angular momentum. Relationships of large scale circulation to weather and weather extremes, and implications for past and future climates. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: MATH 213, MATH 214, and CLIM 411.

Schedule Type: Lecture

CLIM 456: Introduction to Atmospheric Radiation. 3 credits. Provides fundamentals, physical understanding and quantitative analysis of radiative transfer in the atmosphere, discusses radiation processes-reflection, refraction, absorption, transmission, emission, and scattering and introduces tools for atmospheric radiative transfer. Provide students the basics for more advanced topics such as remote sensing or satellite meteorology. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to GGS 456.

Recommended Prerequisite: CLIM 111, MATH 214, and CLIM 411.

Schedule Type: Lecture

CLIM 470: Numerical Weather Prediction. 3 credits. Concepts and techniques of numerical prediction of weather, including the numerical models used and the rationale for large suites of meteorological forecasts. Sources of errors in the forecast: errors in the initial conditions and in the numerical weather prediction models. Interpretation of model output. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: MATH 213, MATH 214, and CLIM 411.

Schedule Type: Lecture

500 Level Courses

CLIM 512: Physical Oceanography. 3 credits. Course describes the global patterns of temperature, salinity, currents and waves in the world's oceans, and how these patterns influence marine biota, climate, and human activity. Course introduces key concepts which explain physical feature of the ocean ranging from microscopic turbulence to global circulation. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: MATH 113 or MATH 115; PHYS 160 or PHYS 243; or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses

Recommended Prerequisite: BS or MS in a natural science or engineering, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

700 Level Courses

CLIM 700: Climate Comprehensive Exam. 1 credit. Preparation for and completion of written comprehensive exam, on a climate-related subject, within AOES department. The exam is part of the degree requirements in lieu of writing a master's thesis. Instructor should be the chair of the examination committee. The exam committee will specify exam content. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 2 credits.

Recommended Prerequisite: At least 15 graduate credits, approved project proposal, and permission of major advisor or chair of the examination committee.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
CLIM 710: Introduction to Physical Climate System. 3 credits.
Provides modern understanding of ocean, atmosphere, and land based on fundamental physical laws. Describes current climate and physical processes by which climate is maintained. Covers theoretical models of general circulation of atmosphere, including time mean and transient behavior. Describes basics of ocean circulation and interactions between ocean and atmosphere. Reviews past climate change, stratosphere and its interactions with troposphere, and role of land processes in modulating climate. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: BS or MS in mathematics or a physical science, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CLIM 711: Introduction to Atmospheric Dynamics. 3 credits.
Covers basic conservation laws of mass, momentum, and energy and scaling analysis of equation of motion and thermodynamic equation. Discusses balanced flows in atmosphere, such as geostrophic wind and its vertical shear, and thermal wind relationship. Also explores circulation and vorticity; role of atmospheric boundary layer in mass, momentum, and energy transfer; synoptic scale motions; and role of gravity and Rossby waves in controlling general circulation of atmosphere. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to PHYS 676.

Recommended Prerequisite: BS or MS in mathematics or a physical science, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CLIM 712: Physical and Dynamical Oceanography. 3 credits.
Introduces climatology and dynamics of oceans. Covers nature of seawater, heat, and salt budgets; general circulation of the ocean, including the Gulf Stream and thermohaline circulations; dynamics of wind-driven ocean circulation; and processes influencing biological and chemical behavior. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: CSI 751 or CLIM 710, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CLIM 713: Atmosphere-Ocean Interactions. 3 credits.
Provides comprehensive observational and mechanistic understanding of El Nino and Southern Oscillation (ENSO) phenomena. Topics include observations and theories of seasonal and interannual changes in ocean circulation and temperature and interactions with atmosphere; equations of motion and theories of wind-driven circulation; mixed layer observations and theories; midlatitude and equatorial ocean waves; interannual variability and atmosphere-ocean coupling; and tropical oceanography and meteorology. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: CLIM 712 or 711 or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CLIM 714: Land-Climate Interactions. 3 credits.
Interdisciplinary course providing detailed description of surface energy and water balance over land and radiative and turbulent transfer. Introduces numerical techniques for modeling land surface and applications in weather, climate, and hydrologic forecasting and simulation. Includes hands-on experience with land surface models in computer laboratory, including sensitivity experiments to reinforce theoretical concepts. Exposure to contemporary research through reading and reviewing seminal journal papers. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: BS or MS in mathematics or physical science, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CLIM 715: Numerical Methods for Climate Modeling. 3 credits.
Foundation and theory of computational methods for atmosphere and ocean modeling, with special emphasis on finite-difference and spectral methods. Topics include accuracy, consistency, convergence and stability; time stepping schemes; nonlinear computational stability; energy and enstrophy conserving schemes for momentum equations; staggered and curvilinear grids; alternate vertical coordinate systems; implicit and split-explicit barotropic mode solution; pressure gradient errors and vorticity constraints; spectral methods for atmospheric models; and treatment of model physics. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: CLIM 712 or 711 or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CLIM 750: Geophysical Fluid Dynamics. 3 credits.
Introduces geophysical fluid dynamics, the study of rotating stratified flows. Covers hydrostatics; equations of motion, gravity wave dynamics, and stratified flow; effects of rotation, midlatitude dynamics, Rossby number and quasigeostrophic expansion; beta plane approximation; and
equatorial Kelvin and Rossby waves. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** CLIM 711, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CLIM 751:** *Predictability and Prediction of Weather and Climate.* 3 credits.
Covers predictability and seamless prediction of weather and climate for timescales ranging from days to decades. Studies limitations to predictability due to chaos, and possible sources of predictability due to slowly varying surface boundary conditions produced by interactions among atmospheres, ocean and land system. Discusses predictability of droughts and floods, monsoons, ENSO, decadal variations and climate change. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CLIM 711
B-Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CLIM 752:** *Ocean General Circulation.* 3 credits.
Description and theory of large-scale ocean circulation and how it affects climate. Focus is on ubiquitous flow structures such as gyres, equatorial currents, and meridional overturning cells. Examines how the circulation follows from wind and thermohaline forcing, as well as physical principles. The influence of the circulation on heat transport and climate variability is also discussed. Conceptual guideposts include barotropic gyres, Ekman cells, potential vorticity, western intensification, the interplay of gravity and the Earth's rotation, advective-diffusive balance, multiple flow states, and Rossby waves. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** CLIM 712 or 711 or equivalent, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CLIM 753:** *General Circulation of the Atmosphere.* 3 credits.
Overview and several theoretical perspectives of atmospheric transport of energy, moisture, and angular momentum, and how these processes fundamentally affect the climate on various time scales. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** CLIM 710 and CLIM 711.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CLIM 754:** *Elements of the Tropical Climate System.* 3 credits.
Observations and dynamics of key processes of tropical weather and climate. Topics include: structure of the tropical atmosphere and ocean, convection, dynamics of tropical waves in the atmosphere and ocean, tropical intraseasonal variability, tropical the global monsoons, cyclones, and stratospheric quasi-biennial oscillation. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** CLIM 711.

**Recommended Corequisite:** CLIM 710.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CLIM 759:** *Topics in Climate Dynamics.* 3 credits.
Covers selected topics in climate dynamics not covered in fixed-content courses. Notes: May be repeated for credit when offered with different content. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CLIM 762:** *Statistical Methods in Climate Research.* 3 credits.
Introduction to a core set of statistical methods that have proven useful to modern climate and predictability research. Topics include detecting and attributing climate change, describing climate variability with empirical orthogonal functions, statistical forecasting with regression and time series models, and identifying coupled patterns of variability with canonical correlation analysis. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate level linear algebra and STAT 344 (or equivalent), or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**CLIM 763:** *Advanced Statistical Methods in Climate Research.* 3 credits.
Introduction to multivariate statistical techniques commonly used in climate science, with special emphasis on estimation in large dimensional spaces. Topics include: multivariate regression, canonical correlation analysis, predictable component analysis, field significance tests, data assimilation (especially the ensemble Kalman Filter), discriminant analysis, and multivariate detection and attribution of climate change. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** CLIM 762 or permission of instructor.
Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CLIM 796: Directed Reading and Research. 1-6 credits.
Reading and research on a specific topic in climate dynamics under the direction of a faculty member. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission into the climate dynamics doctoral program and permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

CLIM 798: Master's Climate Research Project. 1-6 credits.
Research or literature-review project in climate science or related topic chosen and completed under the guidance of a faculty member. Proposition required before enrollment. Technical report acceptable to student's project committee required for completion. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: At least 15 graduate credits, approved project proposal, and permission of major advisor or chair of the examination committee.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

CLIM 799: Master's Thesis in Climate. 1-6 credits.
Research project in climate science or related topic chosen and completed under the supervision of a faculty member. Resulting thesis acceptable to student's committee and potentially publishable is required for completion. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 18 credits.

Recommended Prerequisite: Degree candidacy, thesis proposal approved by thesis committee, and permission of major advisor or instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

900 Level Courses

CLIM 991: Climate Dynamics Seminar. 1 credit.
Presentations in climate dynamics field by Mason faculty and invited speakers. Notes: A maximum of 3 credits may be applied toward the climate dynamics PhD. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Seminar

CLIM 996: Doctoral Reading and Research. 1-6 credits.
Reading and research on a specific topic in climate dynamics under the direction of a faculty member. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission into the climate dynamics doctoral program and permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Research

CLIM 998: Doctoral Dissertation Proposal. 1-12 credits.
Covers development of research proposal under guidance of dissertation director and doctoral committee. Proposal forms basis for climate dynamics doctoral dissertation. Notes: Course may be repeated, but no more than 12 credits of CLIM 998 may be applied to doctoral degree requirements. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree.

Recommended Prerequisite: Doctoral standing and permission of advisor.

Registration Restrictions: Enrollment is limited to students with a class of Advanced to Candidacy.

Students receive Writing Center training in theory and techniques of writing and work a minimum of 3 hours per week in Writing Center. Focus is on practical application of writing theory and pedagogy from course readings, development of tutoring skills, and self-reflection through journals and final paper. Notes: Students must submit two faculty recommendations and a sample of recent academic writing, and complete an interview with the director of the Writing Center. Offered by

CHSS 390: Peer Tutoring in Writing across the Disciplines. 1 credit.
Experiential learning course in teaching of writing across disciplines. Students receive Writing Center training in theory and techniques of tutoring writing and work a minimum of 3 hours per week in Writing Center. Focus is on practical application of writing theory and pedagogy from course readings, development of tutoring skills, and self-reflection through journals and final paper. Notes: Students must submit two faculty recommendations and a sample of recent academic writing, and complete an interview with the director of the Writing Center. Offered by
Humans & Social Sciences (p. 295). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Grade of A in ENGL 302/ENGH 302, 60 credits, and overall minimum GPA of 3.00 with a minimum GPA in major of 3.50.

**Schedule Type:** Internship

### College of Science (COS)

#### 100 Level Courses

**COS 120: Introduction to Research.** 1-3 credits.
Introduction to research, involving work on a research project. May involve lab study, computer modeling and analysis, mathematics, or other original research as appropriate. Research formulated and completed under instructor’s guidance. Culminates in a written or oral final report. Offered by College of Science (p. 593). May be repeated within the degree for a maximum 6 credits.

**Schedule Type:** Independent Study

#### 400 Level Courses

**COS 401: RS: Discipline Based Education Research.** 2-3 credits.
Students will conduct an original Discipline-Based Education Research (DBER) project with their faculty mentor and STEM Accelerator faculty mentor. Offered by College of Science (p. 593). May not be repeated for credit.

**Specialized Designation:** Research/Scholarship Intensive

**Schedule Type:** Independent Study

### College of Visual and Performing Arts (CVPA)

#### 100 Level Courses

**CVPA 101: Arts Pass.** 2 credits.
Introduction to appreciation of the arts through lectures and demonstrations in visual art, music, dance, and theater. Emphasizes aesthetic principles in modern society. Students attend performances and exhibitions and develop analytical skills through written journal and discussion. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 4 credits.

**Schedule Type:** Lecture

**CVPA 102: Experiencing the Arts.** 3 credits.
Reserved for high school students enrolled in CVPA. Introduces collaborative and interdisciplinary arts experiences in visual art, music, dance, theater, film, and media through daily intensive immersion in the arts for two and a half weeks. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Schedule Type:** Lecture

**CVPA 105: Special Topics in the Arts.** 1-3 credits.
Exploration of topical studies on the arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 12 credits.

**Schedule Type:** Lecture

### 300 Level Courses

**CVPA 308: Cross-Cultural Arts Appreciation.** 3 credits.
Provides cumulative arts experience by tying subject matter to major cultural production of Center for the Arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 12 credits.

**Schedule Type:** Lecture

**CVPA 399: Special Topics in the Arts.** 1-6 credits.
In-depth presentation and exploration of topical studies on the arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 24 credits.

**Schedule Type:** Lecture

### 400 Level Courses

**CVPA 430: Topics in Arts and Wellness.** 1-3 credits.
In-depth presentation and exploration of topical studies in arts and wellness or related areas such as injury prevention, performance enhancement, and health and wellness training. Notes: Topic depends on instructor. May be repeated if taken under different topics. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 9 credits.

**Recommended Prerequisite:** 90 hours or permission of instructor, concurrent enrollment is permitted.

**Schedule Type:** Lecture

**CVPA 489: Field Experience in the Arts.** 3-6 credits.
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with division director before enrollment. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Junior standing and completion of six credits in CVPA courses in the area of residency, CVPA 305, or permission of instructor.

**Schedule Type:** Internship

**CVPA 499: Research/Performance/Topics in the Arts.** 3-6 credits.
Advanced research, performance, or exploration of topical studies in arts. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of department chair.

**Schedule Type:** Independent Study

### 500 Level Courses

**CVPA 530: Topics in Arts and Wellness.** 1-3 credits.
In-depth presentation and exploration of topical studies in arts and wellness and/or related areas (e.g., injury prevention, performance enhancement, health and wellness training to educators and arts professionals). Topic depends on instructor. Notes: May be repeated if taken under different topics. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 9 credits.
Recommended Prerequisite: 90 hours or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CVPA 592: Special Topics in Interdisciplinary Arts Studies. 1-3 credits. Topics in interdisciplinary arts. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 12 credits.

Recommended Prerequisite: Undergraduate degree or equivalent, or Permission of Instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

CVPA 599: Independent Study. 1-6 credits. Independent reading, performance, or research on specific project under direction of selected faculty member. May include attendance in parallel undergraduate course. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: Undergraduate degree or equivalent, or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

700 Level Courses

CVPA 700: Academic Writing in the Arts. 1 credit. Prepares graduate students for the rigors of academic writing in the arts at the advanced level and supports students’ acculturation in the academic writing skills and practices of their discourse communities. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Completion of 21 graduate credits in a CVPA graduate degree.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CVPA 701: Thesis and Project Writing. 1 credit. Students will develop an expertise within the specific rhetorical context of the thesis/project genre, understand the specialized features of the final project or thesis, and apply the strategies they have learned in their disciplines to their capstone event. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Completion of 21 graduate credits in a CVPA graduate degree.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Communication (COMM)

100 Level Courses

COMM 100: Public Speaking. 3 credits. Presents principles to develop effective presentations for public and professional settings while integrating appropriate technologies. Emphasizes analyzing audience; composing meaningful, coherent messages; conducting responsible research; developing effective arguments; and improving delivery skills to strengthen confidence and credibility. Offered by Communication (p. 303). May not be repeated for credit.

Mason Core: Oral Communication (p. 135)

Schedule Type: Lecture

COMM 101: Interpersonal and Group Interaction. 3 credits. Presents principles to develop appropriate and effective communication strategies in one-to-one and small group communication settings. Emphasizes analyzing and assessing communication skills to create and sustain effective communication in personal and professional relationships. Offered by Communication (p. 303). May not be repeated for credit.

Mason Core: Oral Communication (p. 135)

Schedule Type: Lecture

COMM 140: Forensics Seminar in Creative Arts. 1 credit. Intensive work in creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner,
and impromptu speaking. Offered by Communication (p. 303). May be repeated within the term for a maximum 4 credits.

**Recommended Prerequisite:** Audition required.

**Schedule Type:** Seminar

**COMM 141:** Forensics Seminar in Recreational Arts. 1 credit.
Intensive work in recreational forensic events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation. Offered by Communication (p. 303). May be repeated within the term for a maximum 4 credits.

**Recommended Prerequisite:** Audition required.

**Schedule Type:** Seminar

**COMM 142:** Forensics Seminar in Debate: Affirmative Strategies. 1 credit.
Work in affirmative research, case construction, and oral presentation; directed toward affirmative analysis of intercollegiate debate proposition. Offered by Communication (p. 303). May be repeated within the term for a maximum 4 credits.

**Recommended Prerequisite:** Audition required.

**Schedule Type:** Seminar

**COMM 143:** Forensics Seminar in Debate: Negative Strategies. 1 credit.
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition. Offered by Communication (p. 303). May be repeated within the term for a maximum 4 credits.

**Recommended Prerequisite:** Audition required.

**Schedule Type:** Seminar

**COMM 145:** Newspaper Workshop I. 1 credit.
Practical experience in writing, editing, or business aspects of newspaper production at Broadside or other papers. Coordinated by newspaper faculty advisor. Offered by Communication (p. 303). May be repeated within the term for a maximum 3 credits.

**Recommended Prerequisite:** Audition required.

**Schedule Type:** Seminar

**COMM 148:** Radio Workshop I. 1 credit.
Students receive individual guidance while learning to be on-air show hosts at student internet radio station WGMU. New technologies such as computer automation systems and advanced production software are integrated throughout the curriculum to prepare students to engage in the most current applications for commercial and internet radio and podcasting. Offered by Communication (p. 303). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** One 100 level COMM course, or permission of instructor.

**Schedule Type:** Studio

**COMM 150:** Communication Skills for International Students. 3 credits.
Introduction to speaking, listening, and nonverbal skills required to communicate appropriately in university study. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** International students in first year of study in the United States, non-native speakers of English with some difficulty speaking clearly and accurately, or permission of instructor.

**Schedule Type:** Lecture

**COMM 157:** Digital Media Workshop. 1 credit.
Offers students a hands-on introduction to digital tools of creative expression, involving the use of specific software and hardware, including operating systems, media editing programs, authoring applications, and software utilities. Notes: Students who have already completed or are in COMM 208 are not eligible to take this course. Offered by Communication (p. 303). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** COMM 100 or 101 and declared major or minor in communication, undeclared major, or permission of undergraduate program director.

**Schedule Type:** Seminar

**200 Level Courses**

**COMM 200:** Communication Theory. 3 credits.
Introduces the field of communication, including perspectives on theory and research, topical areas within the discipline, basic research methodologies, and a survey of theories in those areas. Covers basic procedures for theory-building, research, and writing about communication. Offered by Communication (p. 303). May not be repeated for credit.

**Specialized Designation:** Discovery of Scholarship

**Recommended Prerequisite:** COMM 100 or COMM 101 or permission of undergraduate program director.

**Schedule Type:** Lecture

**COMM 201:** Small Group Communication. 3 credits.
Principles of communicating effectively in small group situations. Emphasizes problem-solving group communication. Practice in working cooperatively with others to complete projects using systematic approach to problem solving. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** COMM 101, or equivalent course.

**Schedule Type:** Lecture

**COMM 202:** Media and Society. 3 credits.
Examines the relationship between media and society through the study of the development of various media systems in the United States, including print media, radio, television, film, the recording industry, and new communication technologies. Introduces media effects and basic theories. Offered by Communication (p. 303). May not be repeated for credit.

**Schedule Type:** Lecture

**COMM 203:** Introduction to Journalism. 3 credits.
American journalism including history and First Amendment components; role of professional journalist; print, broadcast, and computer assisted news operations; economics of publishing; and effect of new technologies. Serves as starting point for those interested in journalism careers and as orientation for those interested in learning
more about news business operations. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

COMM 204: *Introduction to Public Relations*. 3 credits.
Introduces the evolving field of public relations and the role it plays in global business, politics and social interactions. Focuses on creation of integrated digital communication and social media engagement. This is a required course for the Communication Department Public Relations concentration and a prerequisite for several upper-level public relations courses. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

COMM 208: *Introduction to Media Production*. 3 credits.
Provides a general introduction to media production with emphasis on the basics of multimedia tools for camera, audio, lighting, and editing, focusing on non-fiction, journalism, or public relations/advocacy presentations. Offered by Communication (p. 303). May not be repeated for credit. Equivalent to COMM 355.

Schedule Type: Lecture

COMM 210: *Voice and Articulation*. 3 credits.
Principles of voice production, with practice in effective vocal use of American English. Emphasizes student participation. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

Examines common persuasive message strategies and approaches. Covers basic principles of persuasive process. Case studies include advertisements, speeches, and persuasive activities from all segments of society. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

COMM 249: *Communication Field Experience*. 1-2 credits.
Field training and experience related to one of the five communication department concentrations through faculty-approved activity support. Offered by Communication (p. 303). May be repeated within the term for a maximum 4 credits.

Recommended Prerequisite: 45 credits total.

Schedule Type: Activity-Based

COMM 255: *Introduction to Media Literacy*. 3 credits.
Principles and practices of media literacy. Emphasizes critical viewing, listening, and reading media skills; and media effects on consumer. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

COMM 260: *Basic Debate Theory and Practice*. 3 credits.
Theory and practice of formal debate, including approaches to analytical reasoning, research, delivery, and conceptual basis for debate. Does not require tournament participation. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture, Recitation

COMM 261: *Theories of Argumentation*. 3 credits.
Analyzes argument within communicative settings. Emphasizes deductive and inductive forms of reasoning, fallacies in reasoning, tests of evidence, and models for such analyses. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

300 Level Courses

Theories and principles of public communication, emphasizing methods of persuasion, critical analysis, speaker-listener alignments in public setting, and measurements of effective public communication. Offered by Communication (p. 303). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:

Required Prerequisite: (COMM 200).«
«Requires minimum grade of C.

Schedule Type: Lecture

COMM 301: *Foundations of Interpersonal Communication*. 3 credits.
Theories and principles of interpersonal communication emphasizing models of communication, verbal and nonverbal message systems, and analysis of communicative relationships. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

COMM 302: *Foundations of Media Theory*. 3 credits.
Provides a comprehensive review of mass communication and media theory, focusing on media effects and the complex relationships between media producers, messages, technologies, and users/audiences. Examines role of media in news, politics, and popular culture. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

COMM 303: *Writing across the Media*. 3 credits.
Foundation course focusing on writing for the mass media: Internet, public relations, newspapers, broadcast (television and radio) and advertising with a strong emphasis on adherence to Associated Press Style. Notes: Prerequisite for all communication media writing courses. Lab work required. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: 30 credits.

Schedule Type: Lecture

Explores health communication research practice: the role of communication in health care delivery, health promotion and disease prevention, risk communication, and personal as well as psychological well-being. Examines interpersonal, organizational, team, family, and intercultural relationships. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

COMM 305: *Foundations of Intercultural Communication*. 3 credits.
Analyzes communication variables as they relate to intercultural encounters. Emphasizes culture's influence on communication process,
particularly influence of verbal and nonverbal communication on how message is interpreted. Notes: Communication majors are encouraged to complete COMM 200 prior to enrolling in this course. Offered by Communication (p. 303). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Recommended Prerequisite:** 3 credits of 100 or 200-level COMM courses or 60 credits.

**Schedule Type:** Lecture

COMM 306: Issues in Intercultural Communication. 3 credits. Applies basic principles of intercultural communication to analyze specific situations involving communication and cultural differences. Notes: Continuation of COMM 305. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** COMM 305, or permission of instructor.

**Schedule Type:** Lecture

COMM 307: Field Study in Communication. 3 credits. Structured communication learning experience: one to three weeks of travel in a foreign environment involving another country or relevant U.S. co-cultures. Students must complete appropriate readings, laboratory assignments, and personal learning paper to process communication concepts and experiences. Notes: May be repeated for credit when field study is substantially different with permission of the undergraduate director. Offered by Communication (p. 303). May be repeated within the degree.

**Recommended Prerequisite:** Permission of instructor.

**Schedule Type:** Lecture

COMM 310: Performance for Communication Arts. 3 credits. Principles and theories of performance for communication arts. Practice in spoken performance of prose, poetry, and drama. Offered by Communication (p. 303). May not be repeated for credit.

**Schedule Type:** Lecture

COMM 320: Business and Professional Communication. 3 credits. Study of basic theories and skills of communication in professional contexts, including interviewing, relationship maintenance, small group teams, and public presentations. Emphasizes developing practical and critical thinking skills. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** COMM 100, 101, or 104 or permission of instructor.

**Schedule Type:** Lecture

COMM 326: Rhetoric of Social Movements and Political Controversy. 3 credits. Social and political forces of contemporary era from communication perspective, emphasizing political leadership, pressures for social and political change, and transformations in communicative environment. Offered by Communication (p. 303). May not be repeated for credit.

**Mason Core:** Synthesis (p. 135)

**Recommended Prerequisite:** COMM 300.

**Schedule Type:** Lecture

COMM 327: Political Communication. 3 credits. Studies how political communication shapes development of "political reality." Examines interactions between media and politics with respect to the ways communication functions in political settings. Offered by Communication (p. 303). May not be repeated for credit. Equivalent to COMM 432.

**Schedule Type:** Lecture

COMM 330: Principles of Public Relations. 3 credits. Surveys nature, history, scope, and practice of public relations in business, trade associations, nonprofit organizations, and educational and government institutions. Covers principles, practice of public relations, including media relations, issues management, and public service announcements; marketing and research; planning and publicity for special events; house publications; and institutional advertising. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** 3 hours of COMM credit and 60 hours, or permission of instructor.

**Schedule Type:** Lecture

COMM 331: Advanced Principles in Public Relations. 3 credits. Develops the conceptual knowledge and practical skills students need to thrive in challenging public relations situations, such as crisis management, research for clients, communication with clients, and development of client work. Students complete the course with a portfolio of research, writing, and visual materials they have created. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:** Required Prerequisites: COMM 204 or 330. Requires minimum grade of C.

**Schedule Type:** Lecture

COMM 332: Nonverbal Communication. 3 credits. Theory, principles, and methods to analyze nonverbal communication. Emphasizes physical behavior, facial expression, personal space and territoriality, physical appearance, vocal cues, and environment. Offered by Communication (p. 303). May not be repeated for credit.

**Schedule Type:** Lecture

COMM 334: Family and Health Communication. 3 credits. Examines how family communication contributes to physical, psychological, and social wellness. Explores how family communication affects our experience with health transitions (e.g., coping with cancer; becoming a caregiver; losing a loved one), contributes to health outcomes (e.g., stress and anxiety; disordered eating behavior; schizophrenia; drug abuse), and is central to health promotion behavior (e.g., understanding health history and genetics). Offered by Communication (p. 303). May not be repeated for credit.

**Schedule Type:** Lecture

COMM 335: Organizational Communication. 3 credits. Theory, practice, and methods to analyze communication in organizations. Emphasizes process and structure, interaction formats, mechanisms for modification, and career paths in organizational communication. Offered by Communication (p. 303). May not be repeated for credit.
Recommended Prerequisite: COMM 100, 101, or 301, or permission of instructor.

Schedule Type: Lecture

COMM 340: Forensics Seminar in Creative Arts. 1 credit.
Intensive work in various types of creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking. Offered by Communication (p. 303). May be repeated within the term for a maximum of 4 credits.

Recommended Prerequisite: Completion of 60 hours, or 4 hours of COMM 140. Audition required.

Schedule Type: Seminar

COMM 341: Forensics Seminar in Recreative Arts. 1 credit.
Intensive work in various types of recreative forensics events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation. Offered by Communication (p. 303). May be repeated within the term for a maximum of 4 credits.

Recommended Prerequisite: Completion of 60 hours, or 4 hours of COMM 141. Audition required.

Schedule Type: Seminar

COMM 342: Forensics Seminar in Debate: Affirmative Strategies. 1 credit.
Work in affirmative research, case construction, and oral presentation directed toward affirmative analysis of intercollegiate debate proposition. Offered by Communication (p. 303). May be repeated within the term for a maximum of 4 credits.

Recommended Prerequisite: Completion of 60 hours, or 4 hours of COMM 142. Audition required.

Schedule Type: Seminar

COMM 343: Forensics Seminar in Debate: Negative Strategies. 1 credit.
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition. Offered by Communication (p. 303). May be repeated within the term for a maximum of 4 credits.

Recommended Prerequisite: Completion of 60 hours, or 4 hours of COMM 143. Audition required.

Schedule Type: Seminar

COMM 345: Newspaper Workshop II. 1 credit.
Practical experience in writing and editing for student newspaper or other papers. Offered by Communication (p. 303). May be repeated within the term for a maximum of 3 credits.

Recommended Prerequisite: 3 credits of COMM 145, 351, or permission of instructor.

Schedule Type: Seminar

COMM 346: Yearbook Workshop. 1 credit.
Practical experience in promotion, marketing, and sales of video yearbook, or practical experience working on Senior Expressions, a print supplement to the video yearbook. Offered by Communication (p. 303). May be repeated within the term for a maximum of 3 credits.

Schedule Type: Seminar

COMM 347: Cable TV Programming and Marketing. 1 credit.
Practical experience in television programming, promotion, and marketing of a campus television cable network operation. Offered by Communication (p. 303). May be repeated within the degree for a maximum of 3 credits.

Schedule Type: Lecture

COMM 348: Radio Workshop II. 1 credit.
Intensive practical application of previously acquired on-air show hosting skills at student internet radio station WGMU. Skill development in commercial production and writing included. New technologies such as social media, computer automation systems and advanced production software are integrated throughout the curriculum to prepare students to engage in the most current applications for commercial and internet radio and podcasting. Offered by Communication (p. 303). May be repeated within the term for a maximum of 3 credits.

Recommended Prerequisite: COMM 148, or permission of instructor.

Schedule Type: Seminar

COMM 350: Mass Communication and Public Policy. 3 credits.
Investigates how matters of public importance are communicated via various mass communication channels. Emphasizes regulations to minimize influence of mass media on public decision-making, and media manipulation by pressure groups, politicians, and media gatekeepers. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: COMM 202, 255, or 302, or permission of instructor.

Schedule Type: Lecture

COMM 351: News Writing and Reporting. 3 credits.
Experience in actual news gathering. Students write and report for print and online outlets. Numerous in-class and out-of-class writing assignments train students in unique styles of print and online journalism. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions: Required Prerequisite: (COMM 303^c).

^c Requires minimum grade of C.

Schedule Type: Lecture

COMM 352: News Editing: Print and Beyond. 3 credits.
Copy preparation, headline writing, news judging, and layout for various forms of print and electronic formats. Introduces working on news copy desks. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions: Required Prerequisite: (COMM 303^c).

^c Requires minimum grade of C.

Schedule Type: Lecture

COMM 353: Broadcast Journalism. 3 credits.

Registration Restrictions:
Required Prerequisite: (COMM 303\(^C\)).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**COMM 354:** Radio Production. 3 credits.
Offers theory and practice of operational digital media and radio broadcasting. The curriculum emphasizes core skills and knowledge in writing and digital radio production. Topics include content creation, production techniques (including digital audio software) and promotion, management and other aspects of commercial and noncommercial radio, internet radio, satellite radio, podcasting, and other audio/radio art forms. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** COMM 302 or permission of instructor.

**Schedule Type:** Lecture

**COMM 356:** Video: Performance and Writing. 3 credits.
Writing for video, performance skills for on-air work, interviewing. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** 45 credits.

**Schedule Type:** Lecture

**COMM 358:** Multi-Camera Studio Production. 3 credits.
Provides an in-depth exploration of the creative, technical, logistical, and aesthetic requirements of production in a multiple camera environment. The fundamental skills learned in this class will serve as a foundation for narrative, event, live sports, talk show, broadcast journalism, and magazine-styled television and webcast programming. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** COMM 355\(^C\), FAVS 255\(^C\) or COMM 208\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**COMM 359:** Media Management. 3 credits.
Principles, practices of media management from general techniques to operation of individual departments within a media organization. Offered by Communication (p. 303). May not be repeated for credit.

**Schedule Type:** Lecture

**COMM 360:** Digital Postproduction. 3 credits.
Offers instruction on delivering high-quality image and video products for digital media. Students will be introduced to an array of video-audio editing and digital image software for integrating video, audio, photo and graphic postproduction. Student projects focus on journalism, public relations, and advocacy contexts. Offered by Communication (p. 303). May not be repeated for credit. Equivalent to FAVS 260.

**Registration Restrictions:**
**Required Prerequisites:** COMM 355\(^C\), FAVS 255\(^C\) or COMM 208\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**COMM 361:** Online Journalism. 3 credits.
Focuses on online journalism, research, reporting, web page and weblog creation, and writing for Internet. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** COMM 208\(^C\) or FAVS 255\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

COMM 388: Special Topics in Public Relations. 3 credits. Topics vary. Counts toward Public Relations concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 303). May be repeated within the degree.

Schedule Type: Lecture

COMM 389: Public Relations for Associations and Nonprofits. 3 credits. Principles of editing and journalism applied to publications, public relations, and advertising needs within corporate environment. Job requirements of editorial positions in public relations, publications, and information as defined by trade associations, nonprofit organizations, and large corporations. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: 60 credits, or 3 credits of lower-division COMM courses.

Schedule Type: Lecture

COMM 390: Issues in Public Relations. 3 credits. Focuses on current issues in corporate, government, and nonprofit public relations. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 204\textsuperscript{C} or 330\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Lecture

COMM 391: Writing for Public Relations. 3 credits. Focuses on public relations writing including news releases, client memos, broadcasting, speeches, brochures, journals, and advertisements. Includes writing styles, formats, organization, and writing research. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: COMM 303\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Lecture

COMM 392: Public Relations Study Abroad. 3 credits. Concentrated survey course in public relations for business, trade associations, nonprofit organizations, and governmental institutions from the perspective of a location abroad. Emphasis placed on the global and intercultural aspects of public relations. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

COMM 395: Special Topics in Health Communication. 3 credits. Topics vary. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 303). May be repeated within the degree.

Schedule Type: Lecture

COMM 396: Special Topics in Mass Communication. 3 credits. Topics vary. Counts toward Media Production and Criticism Concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 303). May be repeated within the degree.

Schedule Type: Lecture

COMM 397: Special Topics in Production. 1-3 credits. Provides hands-on media production experience. Topics vary. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 303). May be repeated within the term.

Schedule Type: Studio

COMM 398: Research Practicum in Communication. 1-3 credits. Work individually with a faculty member on a faculty research project. Requires readings in research methods and topic area and a final project. Notes: Students must submit an application for COMM 398 at least one week prior to the beginning of the semester. Offered by Communication (p. 303). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 60 credits including at least 9 hours of COMM credit toward the major; minimum GPA of 2.5 overall and 3.0 in the major; approval of department.

Specialized Designation: Green Leaf Course

Schedule Type: Lecture

400 Level Courses

COMM 400: Research Methods in Communication. 3 credits. Explores applications for primary research methodologies used in communication. Research project with focus on survey, critical ethnographic, or experimental methodologies. Notes: Students may not receive credit for both COMM 400 and COMM 490. Offered by Communication (p. 303). May not be repeated for credit. Equivalent to COMM 490.

Specialized Designation: Scholarly Inquiry

Recommended Prerequisite: Two of COMM 300, 301, 302, 305 each one with a minimum grade of 2.00 (C).

Registration Restrictions:
Required Prerequisites: COMM 200\textsuperscript{C} or U200.
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Lecture

COMM 401: Interpersonal Communication in the Workplace. 3 credits. Comprehensive study of theories and research associated with dynamics of interpersonal relationships in the workplace. Emphasizes individual motivation, interpersonal needs, communication styles, leadership, problem solving, decision making, diversity, interpersonal conflict, individual adaptation to organizational change, and influence of technology on workplace relationships. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: COMM 301, or permission of instructor.
COMM 411: Public Relations Practicum. 3 credits.
Helps communication majors apply their public relations education. Covers three general areas: public relations theory and applications, writing and editing, and networking/story placement. Includes public relations strategy and tactics, interviewing and analysis, writing and message delivery. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 204\(^C\) or 330\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

COMM 412: Politics and the Mass Media. 3 credits.
Covers responsibilities; freedoms of mass media in a democracy; and media influence on citizens’ opinions, elections, and decisions of public officials. Offered by Communication (p. 303). May not be repeated for credit. Equivalent to GOVT 412.

Recommended Prerequisite: GOVT 103 or permission of instructor.

Schedule Type: Lecture

COMM 430: Persuasion. 3 credits.
Theories of persuasive communication including traditional and contemporary attitudinal change; relationship among speaker, message, and audience; and relationship between attitudinal and behavioral change. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

COMM 431: New Media and Democracy. 3 credits.
Examines how an evolving media environment, including new information sources and new opportunities to produce content, changes how people understand their place in American society. Engages with questions of where and how people learn about, discuss, and engage with issues of public importance, such as political policy concerning science, health, technology, and society. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: 60 credits or permission of instructor.

Schedule Type: Lecture

COMM 433: Environmental Communication. 3 credits.
Rhetoric and persuasion about environmental issues in contemporary society. Investigation of case studies in corporate, institutional, and movement attempts to mobilize and cope with ecological concerns. Critical assessment of public communication is emphasized. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Lecture

COMM 434: Interviewing. 3 credits.
Theory, principles, and practical skills essential to interview process. Emphasizes information gathering, journalistic, persuasive, employment, and performance-appraisal interviews. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: 60 hours or permission of instructor.

Schedule Type: Lecture

COMM 435: Digital Communication. 3 credits.
Offers practical application, skill development, and theoretical and critical assessment of mediated communication, including digital networking and social media. Discusses and engages with digital communication in terms of culture and language, functional and dysfunctional communication, social interaction, critical perspectives and ideology, copyright, freedom, ethics and responsibility, and images of the future. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: 60 credits.

Schedule Type: Lecture

COMM 440: Ceremonial Speech Writing and Performance. 3 credits.
Provides students with the opportunities to develop speaking skills for a variety of contexts from eulogies to commencement speeches. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: 75+ hours or permission of instructor.

Schedule Type: Lecture

COMM 450: Internship in Communication. 3 credits.
On-the-job training in communication through approved field work study programs. Internships arranged and supervised by Department of Communication through internship coordinator. Related class work in resume preparation and job interviewing. Notes: See department for the application process. Offered by Communication (p. 303). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 60 credits, major or minor in communication, journalism, or sport communication; 15 credits in COMM for majors, 12 credits for non-COMM majors, and permission of department.

Schedule Type: Internship

COMM 451: Facilitating Communication Education. 3 credits.
Theory and practice in facilitating learning of communication principles and skills. Students work as instructional aides in lower-division classes under direct supervision of faculty member. Activities may include online learning support, social media updates, media production, facilitating small-group activities and individually critiquing oral performances. Offered by Communication (p. 303). May not be repeated for credit.

Schedule Type: Independent Study

COMM 452: Media Production Practicum. 1-3 credits.
Theory and practice in creation, distribution, and response to media productions. Students complete minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of media production facilities on campus, under supervision of a sponsoring faculty member. Notes: Only 3 credits may be applied to the communication major. Offered by Communication (p. 303). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: COMM 208, 303, or 348.

Schedule Type: Internship

COMM 453: Multimedia Journalism. 3 credits.
Applies concepts of advanced visual storytelling within today's fluid media landscape. Students report and tell compelling stories across multiple platforms using simple, portable equipment and software
essential to reporters working in the contemporary converged newsroom. Highlights a multimedia approach to journalism to include broadcast, mobile reporting skills and backpack journalism techniques. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** COMM 353.

**Registration Restrictions:**

**Required Prerequisite:** COMM 303C.

**Schedule Type:** Lecture

COMM 454: *Free Speech and Ethics.* 3 credits. Major issues surrounding roles of speech, press, and electronic media in society. Includes history of free speech and press issues in society, government role in regulating marketplace of ideas, and responsibility of individual in free society. Offered by Communication (p. 303). May not be repeated for credit.

**Mason Core:** Synthesis (p. 135)

**Recommended Prerequisite:** 60 credit hours or permission of instructor.

**Schedule Type:** Lecture

COMM 455: *History of Journalism.* 3 credits. Development of print journalism, emphasizing interaction of technology, audience, and government intervention. Topics include birth of press, development of modern newspaper, and American development including Revolutionary and Civil wars, rise of independent press, and yellow journalism. Offered by Communication (p. 303). May not be repeated for credit. Equivalent to HIST 455.

**Recommended Prerequisite:** 3 hours of COMM or HIST.

**Schedule Type:** Lecture

COMM 456: *Comparative Mass Media.* 3 credits. Survey of major foreign mass media systems as they compare with American system. Focuses on broad dimensions of international mass media and describes issues facing global journalism and media systems. Provides substantive framework to critically evaluate various national media systems. Offered by Communication (p. 303). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Schedule Type:** Lecture

COMM 456: *Topics in Communication and Gender.* 3 credits. Topics may include gender and culture, women as rhetors, male and female communication, and communication and gender roles. Examines specific interests, ideally in seminar setting. Notes: May be repeated for credit when topic is different with permission of department. Offered by Communication (p. 303). May be repeated within the term.

**Recommended Prerequisite:**

**Schedule Type:** Lecture

COMM 456: *Structure of the Telecommunications Industry.* 3 credits. Explores complex interrelationships that affect modern telecommunications and how major mergers, acquisitions, regulatory decisions, congressional initiatives, or engineering breakthroughs can profoundly affect telecommunications industry at any given time. Notes: Serves as capstone seminar in telecommunications minor. Offered by Communication (p. 303). May not be repeated for credit.

**Schedule Type:** Lecture

COMM 475: *Journalism Law.* 3 credits. Examines law as it relates to working journalist. Topics include libel, invasion of privacy, free press and fair trial, First Amendment, broadcast regulation, access to media, advertising, and effect of new technologies on these issues. Uses case approach to study leading court decisions in mass media law. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** 60 credits or permission of instructor.

**Schedule Type:** Lecture

COMM 480: *College to Career: Strategies for Transition.* 1 credit. Designed to assist soon-to-be graduates in the employment transition process. Fundamental to the course are effective communication skills, creative research, and the desire to actively and aggressively seek meaningful employment. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** 60+ credits or permission of instructor.

**Schedule Type:** Lecture

COMM 487: *Washington Media Institute.* 3 credits. Special topics offered through the Washington Media Institute. Students must be enrolled in the communication department's professional experience in communication minor. Notes: May not be applied to the communication major or minor. Offered by Communication (p. 303). May be repeated within the degree for a maximum 15 credits.

**Schedule Type:** Lecture

COMM 490: *Honors Research Methods in Communication.* 3 credits. Honors version of COMM 400. Notes: Students may not receive credit for both COMM 400 and 490. Offered by Communication (p. 303). May not be repeated for credit. Equivalent to COMM 400.

**Specialized Designation:** Scholarly Inquiry

**Recommended Prerequisite:** Acceptance to pursue honors in the major.

**Schedule Type:** Lecture

COMM 491: *RS: Honors Research Project in Communication.* 3 credits. Completion of independent honors research project under the guidance of the student's faculty sponsor. Offered by Communication (p. 303). May be repeated within the term.

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** Completion of COMM 490 with minimum grade of 3.0 and approval of honors project prospectus.

**Schedule Type:** Lecture

COMM 498: *RS: Research Projects in Communication.* 3 credits. Students plan, execute, and present an empirical research project exploring communication issues of their own choosing. Offered by Communication (p. 303). May not be repeated for credit.

**Specialized Designation:** Research/Scholarship Intensive
Recommended Prerequisite: COMM 200, COMM 400.

Registration Restrictions:
Enrollment is limited to students with a major in Communication.

Enrollment limited to students in a Bachelor of Arts degree.

Schedule Type: Independent Study

COMM 499: Independent Study in Communication. 1-3 credits.
Study of a selected area in communication. Independent study application must be processed before start of semester in which work is to take place. Notes: May be repeated for credit with permission of director of undergraduate program. Communication courses at the 500 level open to post-baccalaureate students or advanced undergraduates with permission of department. Offered by Communication (p. 303). May be repeated within the term.

Recommended Prerequisite: 75 credits and permission of department.

Schedule Type: Independent Study

500 Level Courses

COMM 504: Communication and Interpersonal Conflict. 3 credits.
Focuses on interpersonal interactions, including dyadic and small-group levels in various settings such as friendships, marriage, family, and workplace. Examines factors that generate conflicts and communication strategies and skills that help shape conflict interaction toward productive ends. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 506: Communication in International Organizations. 3 credits.
Analyzes communication variables as they relate to organizational and managerial functions in international organizations. Topics include developing understanding of how cultural differences influence managerial activities and learning to deal effectively with differences. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 530: Theories of Small Group Communication. 3 credits.
Advanced-level theory and practice of small group interaction. Examines current research with a focus on learning applications of theories to relevant settings. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses

COMM 600: Introduction to Graduate Studies. 3 credits.
Offers a broad introduction to the field of communication in terms of communication-based theories and research. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: Admission to graduate program in communication or permission of graduate program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Communication.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 601: Communication in Professional Relationships. 3 credits.
Explores theoretical perspectives and relevant research to communication strategies and skills for various professional roles and situations. Relates theoretical foundations to practice, assessing theories and applications in individual professional fields. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
COMM 602: Theories and Research of Mass Communication. 3 credits. Explores theories that have guided development of mass media. Emphasizes major scientific and humanistic approaches to mass media effects. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 604: Communication Research Practicum. 3 credits. Helps communication master's students determine focus for program of study, thesis, and projects. Includes readings in applied communication research and exercises in topic selection, analysis. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: COMM 634 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

COMM 605: Intercultural Communication. 3 credits. Analyzes communication variables related to communication across cultures. Topics include nonverbal communication, time conceptualizations, perceptions and attitudes, values, social organization patterns, cultural norms, language, ethics, conflict across cultures, and research in intercultural communication. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 615: Political Communication. 3 credits. Analyzes how political communication messages and strategies shape the development of perceptions and behavior in US presidential elections. Examines the interactions between media content and political action in election campaigns. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 620: Health Communication. 3 credits. Examines interpersonal communicative processes associated with health in consumer-provider, family, and health communication campaign contexts. Focus on understanding cultural differences in perceptions of/communication about health and disease. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

COMM 630: Theories of Public Relations. 3 credits. Provides a survey of public relations theories and major ethical issues. Examines ways theories relate to organizations, mass and international communication research, rhetoric, persuasion, and social movements. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 631: Approaches to Group Facilitation. 3 credits. Introduces various theoretical and practical approaches to group facilitation with in-depth focus and practice in one approach. Students participate in group sessions, analyze videotapes of decision-making groups, and practice methodologies for facilitating group interaction. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 632: Persuasion Theory. 3 credits. Introduces students to the processes and effects of persuasive communication. Covers key theories of persuasion, behavior change, information processing, message effects, as well as important frameworks that guide the practice of persuasion in applied settings. Particular attention is paid to message features that generate predictable effects and how such effects may vary across different communicative
Communication (COMM)

situations. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**COMM 634: Theories of Interpersonal Communication.** 3 credits.
Analyzes contemporary theories, concepts, and approaches to improving interpersonal communication. Examines interpersonal communication research. Offered by Communication (p. 303). May not be repeated for credit.

**Recommended Prerequisite:** COMM 301 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**COMM 635: Organizational Communication.** 3 credits.
Analyzes communication systems, processes in public and private organizations. Topics include conflict management, group decision making, interviewing, technical presentations, and using various channels for improving internal and external communication. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**COMM 636: Communication Consulting.** 3 credits.
Investigates theories providing foundation for communication consulting. Provides theoretical information and mechanisms for application necessary to modify communicative behavior within organizations. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**COMM 637: Risk Communication.** 3 credits.
Research on sharing information about physical hazards such as toxic waste, radiation, disease, injury, biohazards. Topics include communication concerning workplace safety, environmental problems, risk assessments, and scientific uncertainties. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**COMM 639: Science Communication.** 3 credits.
Reviews research on best practices in science communication for scientists and communication professionals. Explores theory on conceptualizing science communication as disseminating knowledge, promoting informed decision making, involving citizens in scientific research (i.e., citizen science), promoting legislative and individual actions, or creating entertainment. Students practice communicating complex science and designing contexts for public engagement with scientific research. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**COMM 640: Controversies in Science Communication.** 3 credits.
Examines the communication implications related to selected current topics of scientific controversy. Offered by Communication (p. 303). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**COMM 641: Advanced Communication Skills for STEM.** 3 credits.
Examines the specific oral, written, and mediated communication competencies needed by STEM professionals in modern society. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**COMM 642: Science and the Public.** 3 credits.
Examines the relationship between science and society, with a particular emphasis on the role of communication in shaping public opinion on issues related to science and technology. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**COMM 644: Analysis and Criticism of Science Journalism.** 3 credits.
Examines media coverage of technically complex topics in science, social science, environment, health and medicine, and technology. Explores the influence of institutional media practices on news about science and technology. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**COMM 650: Research Methodologies in Communication.** 3 credits.
Introduces various research methods used by communication professionals. Focus on achieving understanding and knowledge of social scientific research, qualitative and quantitative, and critical analysis through use and application. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Communication.

Enrollment limited to students in the MA Communication, MAIS Interdisciplinary Studies or PHD Communication programs.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**COMM 653: Graduate Seminar in Instructional Communication.** 3 credits.
Investigates theoretical and practical implications of instructional communication. Exposes graduate students to communication principles and practices of teaching college courses at upper and lower divisions. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**COMM 655: Theory and Practice of Digital Communication.** 3 credits.
Applies visual communication theory to the production of digital media. Emphasizes theories in nonfiction digital filmmaking, sound theory for audio production, and ethical and aesthetic topics in digital storytelling. Provides a community engaged learning component allowing students to partner with community organizations to produce digital media tools that address issues of social importance. Offered by Communication (p. 303). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**COMM 660: Climate Change and Sustainability Communication Campaigns.** 3 credits.
Offers practical application, skill development, and theoretical basis of communication campaigns developed in response to global warming and other threats to sustainability. Focuses on purposive campaigns to promote changes in individual behavior and public policy. Offered by Communication (p. 303). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**COMM 670: Social Marketing.** 3 credits.
Offers conceptual overview of social marketing: marketing methods designed to influence people to behave in ways that benefit society. Develops skills necessary to conduct a social marketing initiative and provides an opportunity for practical application of those skills. Offered by Communication (p. 303). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 690: Special Topics in Communication. 3 credits.
Explores contemporary issues in communication theory, research, and practice. Notes: Topics vary. May be repeated when topic is different. Offered by Communication (p. 303). May be repeated within the term for a maximum 15 credits.

Specialized Designation: Green Leaf Course

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

COMM 694: Communication Internship. 3 credits.
Students work in approved, professional-level communication position, meeting regularly with internship supervisor from department. Requires paper, journal, minimum 60 hours work for each credit of enrollment. Students usually enroll in internships at end of program of study. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: 18 graduate credits and permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

COMM 696: Directed Readings and Research. 1-3 credits.
Reading and research on specific topic under direction of faculty member. Written report required; oral or written exam may be required. Offered by Communication (p. 303). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

COMM 697: Independent Production. 1-3 credits.
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: Permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 700: Building Social Science Theory. 3 credits.
Explores the process of developing and testing social science theories. Emphasizes the components and mechanisms of theory - such as variables and causality - in a manner intended to inform rigorous social science inquiry using quantitative or qualitative methods. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: COMM 630 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 705: Intercultural Health and Risk Communication. 3 credits.
Examines intercultural health and risk communication interventions; including health communication campaigns, public relations and advertising for health organizations, and how the media and Internet present health information. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: COMM 630 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 706: Strategic Communication. 3 credits.
Examines commonalities of strategic communication campaigns across fields (e.g., military, diplomacy, health, politics, marketing, public relations) in order to understand strategic communication, compare fields, and emphasize strategic and evaluative research across fields. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: COMM 630 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
COMM 716: International Public Relations. 3 credits.
Provides a survey of international public relations with an emphasis in three areas: applied knowledge for actual international practice, relevant theory, and ethical issues. Offered by Communication (p. 303). May not be repeated for credit. Equivalent to COMM 806.

Recommended Prerequisite: COMM 706 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 720: Consumer-Provider Health Communication. 3 credits.
Explores relational health communication research and practice. Examines the role of interpersonal communication in health care delivery, health promotion, disease prevention, risk communication, and promoting personal and psychosocial well-being. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 721: E-Health Communication. 3 credits.
Explores the use of computer-mediated communication technologies in health care and health promotion, including examination of technology in health information dissemination, health education, health communication interventions, and the management of health care delivery. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 725: Qualitative Methods. 3 credits.
Examines qualitative research in communication. Emphasis is placed on techniques of naturalistic inquiry such as observation, interviewing, focus group methods, and ethnography, as well as tools for analyzing and reporting qualitative data. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 735: Crisis Communication. 3 credits.
Examines crisis communication contexts with a particular emphasis on the role of communication in a variety of crises and how the media and Internet present crisis information to the public. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:

Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 750: Research Methods II. 3 credits.
Extends basic research knowledge and skills learned in COMM 650 Research Methods I. Students will be taught to analyze and synthesize literature, develop theoretical linkages, and construct measurement scales. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: COMM 650.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 775: Media Content Analysis. 3 credits.
Introduces content analysis, a research technique for making replicable and valid inferences about text in sources such as news articles, advertisements, and television programs. Students design and conduct research using content analysis techniques. Offered by Communication (p. 303). May not be repeated for credit. Equivalent to COMM 675.

Recommended Prerequisite:

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 798: Communication Studies Project. 3 credits.
Final research seminar for all MA in communication students. Students discuss practical and theoretical issues related to project or thesis. Includes readings related to underlying theoretical, methodological, and ethical issues facing contemporary communication researchers and practitioners. Offered by Communication (p. 303). May not be repeated for credit.

Recommended Prerequisite: COMM 600 and COMM 650.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

COMM 799: Master's Thesis. 1-6 credits.
Original research endeavor related to student's concentration in communication under supervision of faculty committee. Offered by Communication (p. 303). May be repeated within the degree.

Recommended Prerequisite: 24 graduate credits and approval of thesis proposal by faculty committee.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis
800 Level Courses

COMM 800: Studies for the Doctor of Philosophy in Education. 3-6 credits. Program of studies designed by student’s discipline director and approved by doctoral committee. Students participate in research activity of discipline director and write paper reporting original contributions. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Independent Study

COMM 820: Health Communication Campaigns. 3 credits. Explores use of communication campaigns to promote health and reduce health risks; examines how health communication campaigns are designed, implemented, and evaluated; and describes the role of communication research throughout the campaign process. Offered by Communication (p. 303). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

COMM 890: Special Topics in Communication. 3 credits. Selected topics reflecting specialized areas in communication. Notes: Topics vary. May be repeated for credit when topic is different. Offered by Communication (p. 303). May be repeated within the degree.

Recommended Prerequisite: PhD rank or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Recommended Prerequisite: Approval of program director.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

900 Level Courses

COMM 998: Doctoral Dissertation Research. 1-15 credits. Research on an approved dissertation topic under the direction of dissertation committee. Notes: No more than 18 credits of COMM 998 and 999 may be applied to doctoral degree requirements. Offered by Communication (p. 303). May be repeated within the degree.

Recommended Prerequisite: COMM 998.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Computational Science and Informatics (CSI)

500 Level Courses

CSI 500: Computational Science Tools. 3 credits. Introduces computer skills and packages commonly used in quantitative scientific research. Notes: CSI 601 and CSI 602, including additional material, have merged to create CSI 500. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: 1 year of college calculus, knowledge of matrix algebra, and computer programming.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 501: Introduction to Scientific Programming. 3 credits. Introduces and reviews programming in C and FORTRAN with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of both lecture and interactive computer laboratory. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 597: Topics in Science and Engineering Simulation. 3 credits. Covers selected topics in Science and Engineering simulation, not covered in fixed content computational sciences and informatics courses. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Recommendations for credit. Equivalent to CSI 729.

Offered by Computational & Data Sciences (p. 650). May not be repeated at atmospheric problems, and flow considerations in molten materials. energy particle jets in astrophysical applications, application to Earth dynamics, algorithms for concurrent machines, formation of high continuum computations, spectral methods in computational fluid hydrodynamics, algorithms for continuum systems, adaptive grids for Possible topics are smooth-particle hydrodynamics, radiation systems not covered in fixed-content courses in dynamical systems. Covers selected topics in the computational aspects of continuum systems not covered in fixed-content courses in dynamical systems.

CSI 629: Topics in Continuum Systems. 3 credits. Covers selected topics in the computational aspects of continuum systems not covered in fixed-content courses in dynamical systems. Possible topics are smooth-particle hydrodynamics, radiation hydrodynamics, algorithms for continuum systems, adaptive grids for continuum computations, spectral methods in computational fluid dynamics, algorithms for concurrent machines, formation of high energy particle jets in astrophysical applications, application to Earth atmospheric problems, and flow considerations in molten materials. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to CSI 729.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses

CSI 600: Quantitative Foundations for Computational Sciences. 3 credits. Accelerated review of mathematical tools for scientific applications and analysis. Topics include vectors and matrices; differential and difference equations; linear systems; Fourier, Laplace, and Z-transforms; and probability theory. Notes: Not applicable to 48-credit course total for CSI PhD. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to SYST 500.

Recommended Prerequisite: MATH 213 and 214.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 606: Scientific Graphics and Visualization Tools. 1 credit. An introduction into the use of scientific visualization tools for data analysis. Use of specific packages will be taught. Packages will include PV-WAVE, S-Plus, XV, XMGR, and the ppm tools on a rotating basis. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: Competency in Linux of permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 612: Introduction to Space Weather. 3 credits. Introduction to space weather involving systems such as the sun, the heliosphere, and the Earth's magnetosphere and ionosphere. Covers the solar magnetic field, solar flares, coronal mass ejections, particle acceleration mechanisms, the solar wind, and the Earth's magnetic field, radiation belt, geomagnetic storms, and ionospheric disturbances. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: PHYS 303, PHYS 305, PHYS 307, MATH 213, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CSI 670:** Economic Systems Design. 3 credits.
Introduces analytical and engineering principles used to develop exchange systems. Covers behavioral aspects of auction systems; matching, assignment, and transportation problems; and information markets. Introduces methods for testbedding systems using experimental economics. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** Course in linear and nonlinear optimization, and course in linear algebra, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CSI 672:** Statistical Inference. 3 credits.
Covers critical aspects of probability, random variables and distributions, characteristic functions, stochastic convergence, optimal estimation, maximum likelihood estimation, asymptotic theory, Bayesian methods, likelihood ratio tests, statistical decision theory, sequential methods. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 652.

**Registration Restrictions:**
**Required Prerequisites:** STAT 544 and 554.

*May be taken concurrently.

**Schedule Type:** Lecture

**CSI 674:** Bayesian Inference and Decision Theory. 3 credits.
Introduction to quantitative measurements by remote-sensing methods covering quantitative spectroscopy, spectral and thermal signatures, atmospheric physics, and the electromagnetic spectrum. Emphasis on the scientific principles involved and the transition of the technology to real-world applications. The requisite materials to begin to understand hyperspectral imaging (HSI) technology and its many civil and military applications are presented. Covers necessary mathematics used in the analysis of n-dimensional data. Topics include hyperspectral concepts, data collection systems, data processing techniques, case studies, and U.S. national policy issues. Data processing techniques include N-dimensional space, scatterplots, spectral angle mapping, spectral mixture analysis, spectral matching, and other techniques. Applications and case studies include environmental, medical, agricultural, and military. Includes ground, airborne, and spaceborne hyperspectral systems. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 664, SYST 664.

**Recommended Prerequisite:** STAT 544 or CSI 672, or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CSI 676:** Regression Analysis. 3 credits.
Simple and multiple linear regression, polynomial regression, general linear models, subset selection, step-wise regression, and model selection. Also covered are multicollinearity, diagnostics, and model building. Both the theory and practice of regression analysis are covered. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 656.

**Registration Restrictions:**
**Required Prerequisites:** STAT 544 and 554.

*May be taken concurrently.

**Schedule Type:** Lecture

**CSI 678:** Time Series Analysis and Forecasting. 3 credits.
Modeling stationary and nonstationary processes; autoregressive, moving average and mixed model processes; hidden periodicity models; properties of models; autocovariance and autocorrelation functions, and partial autocorrelation function; spectral density functions; identification of models; estimation of model parameters, and forecasting techniques. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 658.

**Registration Restrictions:**
**Required Prerequisites:** STAT 544 and 554.

*May be taken concurrently.

**Schedule Type:** Lecture
CSI 685: Fundamentals of Materials Science. 3 credits.
Covers fundamentals of materials science with emphasis on physical topics including crystal structure and symmetry, dislocation theory, theory of interfaces, multicomponent phase diagrams, theory of phase transformations, nano-materials, metallic glasses. Includes a term project, assignments from current literature, and application of computation in materials science. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to PHYS 615.

Recommended Prerequisite: Undergraduate degree in electrical or mechanical engineering, materials science, physics, chemistry or related disciplines; or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 687: Solid State Physics and Applications. 3 credits.
Covers crystal structures, binding, lattice vibrations, free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to PHYS 512.

Recommended Prerequisite: PHYS 502 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 690: Numerical Methods. 3 credits.
Covers computational techniques for solving science, engineering problems. Develops algorithms to treat typical problems in applications, emphasizing types of data encountered in practice. Covers theoretical development as well as implementation, efficiency, and accuracy issues in using algorithms and interpreting results. When applicable, uses computer graphical techniques to enhance interpretation. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to CSI 700, MATH 685, OR 682.

Recommended Prerequisite: MATH 203 and 214 or equivalent, and some programming experience.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 695: Scientific Databases. 3 credits.
Study of database support for scientific data management. Covers requirements and properties of scientific databases, data models for statistical and scientific databases, semantic and object-oriented modeling of application domains, statistical database query languages and query optimization, advanced logic query languages, and case studies such as the human genome project and Earth-orbiting satellites. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to CSI 710.

Recommended Prerequisite: INFS 614 or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

700 Level Courses

CSI 701: Foundations of Computational Science. 3 credits.
Covers mapping of mathematical models to computer software, including all aspects of developing scientific software such as architecture, data structures, advanced numerical algorithms, languages, documentation, optimization, validation, verification, and software reuse. Examples in bioinformatics, computational biology, computational physics, and global change demonstrate scientific advances enabled by computation. Class projects involve working in teams to develop software that implements mathematical models, using software to address important scientific questions, and conducting computational experiments with it. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: Competency in UNIX and programming at CSI 501 level, and CSI 690; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 702: High-Performance Computing. 3 credits.
Hardware and software associated with high-performance scientific computing. Computer architectures, processor design, programming paradigms, parallel and vector algorithms. Emphasizes importance of software scalability in science problems. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: Competency in Linux and programming at CSI 501 level or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
CSI 703: Scientific and Statistical Visualization. 3 credits.
Covers visualization methods used to provide new insights and intuition concerning measurements of natural phenomena and scientific and mathematical models. Presents case studies from myriad disciplines. Topics include human perception and cognition, introduction to graphics laboratory, elements of graphing data, representation of space-time and vector variables, representation of 3-D and higher dimensional data, dynamic graphical methods, and virtual reality. Work on a visualization project required. Emphasizes software tools on Silicon Graphics workstation, but other workstations and software may be used. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: STAT 554 or CS 551, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 709: Topics in Computational Sciences and Informatics. 3 credits.
Covers selected topics in computational sciences and informatics not covered in fixed-content computational sciences and informatics courses. Offered by Computational & Data Sciences (p. 650). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: Admission to the PhD program and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 711: Chemical Thermodynamics and Kinetics. 3 credits.
Advanced study of thermodynamics and kinetics. Covers application of kinetics to elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to CHEM 633.

Recommended Prerequisite: CHEM 331 and 332.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 712: Introduction to Solid Surfaces. 3 credits.
Includes gas absorption isotherms, surface-area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas absorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and their surface sensitivities, instrumentation needed, and principles of vacuum technology. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to CHEM 728.

Recommended Prerequisite: CHEM 422 or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 713: Quantum Chemistry. 3 credits.
Illustrates fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CHEM 332.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 714: Spectroscopy and Structure. 3 credits.
Covers quantum mechanics of the interaction of atoms and molecules with electromagnetic radiation. Also covers modern spectroscopic methods as applied to the elucidation of molecular structure and dynamics. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CHEM 332.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 719: Topics in Computational Chemistry. 3 credits.
Covers selected topics in computational chemistry not covered in fixed-content computational chemistry courses. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 720: Fluid Mechanics. 3 credits.
Covers basic and advanced fluid mechanics and continuous hypothesis to define fluids. Introduces tensor analysis; Euclidean and Lagrangian representations of fluid flow; Laplace’s equation; continuity equation; Navier-Stokes equations; Bernoulli’s theorem and Crocco’s form of the equations; steady and unsteady flows; potential, incompressible, and compressible flows; gravity and sound waves; gas dynamics; and viscous flows. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CSI 690 and CSI 780, or permission of instructor.
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 721: Computational Fluid Dynamics I. 3 credits.
Covers fundamentals including spatial and temporal approximation techniques for partial differential equations, solution of large systems of equations, data structures, solvers of the Laplace/ full potential equation, and simple Euler solvers. Includes two major projects: Laplace solver and 2-D Euler solver on unstructured grids. Students expected to write their own codes. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: Course in partial differential equations such as MATH 678 or equivalent; knowledge of linear algebra at level of MATH 603 or CSI 740/MATH 625; coding experience in FORTRAN or C; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 722: Computational Fluid Dynamics II. 3 credits.
Covers more advanced topics in computational fluid dynamics, including high-resolution schemes for hyperbolic PDEs, advanced Euler solvers, Navier-Stokes solvers, grid generation, adaptive mesh refinement, efficient use of supercomputing hardware, and future trends. Projects include topics in grid generation and adaptive refinement. Students expected to write their own codes. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CSI 721 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 723: Fluid Mechanics II. 3 credits.
Covers gas dynamics, shock waves, method of characteristics, boundary layer flows, instabilities, and turbulence modeling. Special topics include biological, non-Newtonian, and free surface flows; aeroelasticity; and magneto-hydrodynamics. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CSI 720 or Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 724: Linear and Nonlinear Modeling in the Natural Sciences. 3 credits.
Develops tools of mathematical modeling while carrying out numerical simulations. Considers examples from across the sciences. Topics include basic issues such as models, simplification, linearity, and nonlinearity; dimensionless parameters; dimensional analysis; models involving differential equations; examples from population growth and chemical kinetics; models involving partial differential equations; diffusion, transport, nonlinearity and shocks; probabilistic modeling; perturbation methods; extrapolation; and introduction to stability. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 720 or Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 721: Computational Fluid Dynamics I. 3 credits.
Covers fundamentals including spatial and temporal approximation techniques for partial differential equations, solution of large systems of equations, data structures, solvers of the Laplace/ full potential equation, and simple Euler solvers. Includes two major projects: Laplace solver and 2-D Euler solver on unstructured grids. Students expected to write their own codes. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: Course in partial differential equations such as MATH 678 or equivalent; knowledge of linear algebra at level of MATH 603 or CSI 740/MATH 625; coding experience in FORTRAN or C; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Students in a Non-Degree Undergraduate degree may not enroll.

**Recommended Prerequisite:** MATH 213 and 216, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

**Schedule Type:** Lecture

**CSI 747: Nonlinear Optimization and Applications.** 3 credits.
Introduction to practical aspects of nonlinear optimization. Covers applications of optimization algorithms to solving problems in science and engineering. Applications include data analysis, materials science, nanotechnology, mechanics, optical design, shape design, and trajectory optimization. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** ASTR 530 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

**Schedule Type:** Lecture

**CSI 763: Statistical Methods in Space Sciences.** 3 credits.
Covers statistical and data analysis methods applicable to problems in space science, remote sensing, and astrophysics. Includes parametric and nonparametric hypothesis testing, parameter estimation, correlation analysis, time series analysis, spatial analysis, and image reconstruction. Emphasizes imperfect nature of actual data sets and hypothesis. Examples drawn from current space science research. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** ASTR 530.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

**Schedule Type:** Lecture

**CSI 672: Computational Astrophysics.** 3 credits.
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-Planck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to ASTR 764.

**Recommended Prerequisite:** ASTR 530.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

**Schedule Type:** Lecture

**CSI 771: Computational Statistics.** 3 credits.
Covers basic computationally intensive statistical methods and related methods, which would not be feasible without modern computational resources. Covers nonparametric density estimation including kernel methods, orthogonal series methods and multivariate methods, recursive methods, cross-validation, nonparametric regression, penalized smoothing splines, the jackknife and bootstraping, computational aspects of exploratory methods including the grand tour, projection pursuit, alternating conditional expectations, and inverse regression methods. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 751.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

**Schedule Type:** Lecture

**CSI 772b: B- Requires minimum grade of B-.**

Enrollment is limited to Graduate or Non-Degree level students.

**Recommended Prerequisite:** CSI 672b.
Schedule Type: Lecture

CSI 772: Statistical Learning. 3 credits.
Focuses on statistical learning theory by introducing the statistical and optimization background essential for developing new efficient statistical learning algorithms. Also discusses applications of statistical learning algorithms to the solution of important problems in many areas of science. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 772.

Registration Restrictions:
Required Prerequisites: STAT 652B or CS 672B.
B: Requires minimum grade of B.
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 773: Statistical Graphics and Data Exploration. 3 credits.
Exploratory data analysis provides a reliable alternative to classical statistical techniques, which are designed to be the best possible when stringent assumptions apply. Topics include graphical techniques such as scatter plots, box plots, parallel coordinate plots, and other graphical devices; re-expression and transformation of data; influence and leverage; and dimensionality reduction methods such as projection pursuit. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 663.

Recommended Prerequisite: A 300-level statistics course and a programming course, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 775: Graphical Models for Inference and Decision Making. 3 credits.
Theory and methods for inference and decision making in environments characterized by uncertain information. Covers graphical probability and decision models. Studies approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Practical model-building experience provided. Students apply what they learn to a project of their own choosing. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to OR 719, STAT 719.

Recommended Prerequisite: STAT 652 or STAT 664 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 777: Principles of Knowledge Mining. 3 credits.
Principles and methods for synthesizing task-oriented knowledge from computer data and prior knowledge and presenting it in human-oriented forms such as symbolic descriptions, natural language-like representations, and graphical forms. Topics include fundamental concepts of knowledge mining; methods for target data generation and optimization; statistical and symbolic approaches; knowledge representation and visualization; and new developments such as inductive databases, knowledge generation languages, and knowledge scouts. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: INFS 614 or equivalent, or Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 779: Topics in Computational Statistics. 3 credits.
Selected topics in computational statistics not covered in fixed-content computational statistics courses. Offered by Computational & Data Sciences (p. 650). May be repeated within the term.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 780: Principles of Modeling and Simulation in Science. 3 credits.
Applies numerical methods to study of variety of physical systems, with emphasis on modeling and simulation. Develops numerical algorithms and simulation codes to gain understanding of mechanisms, processes in physical systems. Includes several projects drawn from such areas as atomic and molecular interactions, molecular dynamics, lattice dynamics, quantum systems, chaos, percolation, random walks, aggregation mechanisms of soft solids, nanomaterials, and nonlinear dynamics. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: Competency in programming at CSI 501 level and college physics, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSI 782: Statistical Mechanics for Modeling and Simulation. 3 credits.
Studies microcanonical, canonical, and grand canonical ensembles and fluctuations, as well as Fermi-Dirac and Bose-Einstein statistics. Modeling of ideal, dilute, and diatomic gases, liquids, and crystals. Also covers Liouville equation and simulation in classical statistical mechanics. Introduces Brownian motion, kinetic theory, and transport processes. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CSI 690, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CSI 783:** Computational Quantum Mechanics. 3 credits.
Studies fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, many electron atom solutions to Schrodinger’s equation, electron spin in many-electron systems, atomic structure calculations, algebra of many-electron calculations, Hartree-Fock self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to CHEM 736, PHYS 736.

**Recommended Prerequisite:** PHYS 502 and PHYS 613/ CSI 780, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CSI 785:** Molecular Dynamics Modeling. 3 credits.
Introduces simulation methods in physical chemistry sciences. Covers computational approaches to modeling molecular and condensed matter systems, including interatomic and molecular potentials, molecular dynamics, time averages, ensemble distributions, numerical sampling, thermodynamic functions, response theory, transport coefficients, and dynamic structure. Includes stochastic simulations such as Brownian motion, Langevin dynamics, Monte Carlo methods and random walks, and introduction to cellular automata. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CSI 690 or equivalent, CSI 780 or CHEM 633/CSI 711, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CSI 787:** Computational Materials Science. 3 credits.
Covers selected topics in computational aspects of condensed matter, such as methods of electronic structure calculations, surface science, molecular clusters, lattice dynamics, nanomaterials, semiconductors, superconductivity, magnetism, Hubbard model, mesoscopic systems, and liquids. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** PHYS 512/CSI 687 and PHYS 736/CSI 783, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CSI 788:** Simulation of Large Scale Systems. 3 credits.
Study of diverse, large-scale physical systems with emphasis on modeling and simulation. Students will undertake several projects which will draw from such areas as many-body dynamics, atmospheric structure and dynamics, high-temperature plasmas, stellar structure, hydro dynamical systems, galactic structure and interactions, and cosmology. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CSI 690 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CSI 793:** Research Project. 1-3 credits.
Research project chosen and completed under guidance of a graduate faculty member, resulting in acceptable technical report. The course is accepted for credit toward the Master in Computational Science (COMP) and is not accepted for the PhD in Computational Sciences and Informatics (CSI). Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** 12 graduate credits in the Master in Computational Science and permission of the graduate coordinator.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis
CSI 799: Master's Thesis. 1-6 credits.
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report (master's thesis) and oral defense. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree.

**Recommended Prerequisite:** Completion of twelve graduate credits and Permission of Instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Thesis

### 800 Level Courses

**CSI 854: Hyperspectral Imaging Applications.** 3 credits.
Includes advanced hyperspectral concepts, multisystems tradeoffs, data collection and processing systems, imaging radar systems, laser systems, data fusion, calibration and data compression techniques, remote sensing and U.S. national policy. Applications include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation topics. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to GGS 840.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**CSI 873: Computational Learning and Discovery.** 3 credits.
Presents modern ideas, theories, and methods for computational learning and discovery, along with relevant applications including medical diagnosis, Earth science data analysis, and neuronal modeling. Includes background elucidation of fundamental concepts in computational learning, addressing discovery of equations, theory of causality, and comparison with biological and cognitive models. Students make presentations on topics of their research interest and work on projects involving state-of-the-art systems. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to GGS 763.

**Recommended Prerequisite:** CS 580 or equivalent or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

**Schedule Type:** Lecture

**CSI 876: Measure and Linear Spaces.** 3 credits.
Covers measure theory and integration, convergence theorems, and the theory of linear spaces and functional analysis, including normed linear spaces, inner product spaces, Banach and Hilbert spaces, Sobolev spaces, and reproducing kernels. Topics include wavelets, applications to stochastic processes, and nonparametric functional inference. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 876.

**Recommended Prerequisite:** IT 776 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**CSI 877: Geometric Methods in Statistics.** 3 credits.
Develops foundations of geometric methods for statistics. Topics include n-dimension Euclidian geometry; projective geometry; differential geometry, including curves, surfaces, and n-dimensional differentiable manifolds; and computational geometry, including computation of convex hulls, tessellations of two-, three-, and n-dimensional spaces, and finite element grid generation. Examples include applications to scientific visualization. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 877.

**Recommended Prerequisite:** STAT 690 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**CSI 885: Atomic Modeling of Materials.** 3 credits.
Advanced course focusing on utilization of atomistic modeling and computer simulation techniques to analyze structure of crystalline materials. Introduces modern methodology of largescale atomistic simulations and provides hands-on experience through numerous examples and homework assignments based on simulation packages. Provides background knowledge on theory of lattice defects (point defects, interfaces, dislocations) and thermal and mechanical properties of solid materials (plastic deformation, fracture). Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CSI 685, 700, and 786, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**CSI 898: Research Colloquium in Computational Sciences and Informatics.** 1 credit.
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors. Notes: A maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD. Offered by Computational & Data Sciences (p. 650). May be repeated within the term.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**CSI 899: Colloquium in Computational Sciences and Informatics.** 1 credit.
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors. Notes: A maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD. Offered by Computational & Data Sciences (p. 650). May be repeated within the term.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture
900 Level Courses

**CSI 971: Probability Theory.** 3 credits.
A rigorous measure-theoretic treatment of probability. Includes expectation, distributions, laws of large numbers and central limit theorems for independent random variables, characteristic function convergence, and Markov chains. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 971.

Registration Restrictions:
Required Prerequisites: STAT 544B and MATH 315C.
B- Requires minimum grade of B-.
C Requires minimum grade of C.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

**CSI 972: Mathematical Statistics I.** 3 credits.
Focuses on theory of estimation, exploring method of moments, least squares, maximum likelihood, and maximum entropy methods. Details methods of minimum variance unbiased estimation. Other topics include sufficiency and completeness of statistics, Fisher information, Cramer-Rao bounds, Bhattacharyya bounds, asymptotic consistency and distributions, statistical decision theory, minimax and Bayesian decision rules, and applications to engineering and scientific problems. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 972.

Registration Restrictions:
Required Prerequisites: (CSI 672B or STAT 652B) and (CSI 876B, IT 876B, STAT 876B, IT 971B or STAT 971B).
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

**CSI 973: Mathematical Statistics II.** 3 credits.
Concentrates on theory of hypothesis testing. Topics include characterizing the decision process; simple versus simple hypothesis tests; Neyman Pearson Lemma; and uniformly most powerful, unbiasedness, invariance, randomized, and sequential tests. Applies testing principles to situations in normal distribution family and other families of distributions. Notes: Continuation of CSI 972. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit. Equivalent to STAT 973.

Registration Restrictions:
Required Prerequisite: CSI 972B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

**CSI 978: Statistical Analysis of Signals.** 3 credits.
Advanced course in analysis of discrete- and continuous-time signals using methods of stochastic differential equation and time series. Presumes familiarity with methods of harmonic analysis and times series modeling. Topics include state-space modeling and eigenvalue processing, nonlinear modeling of signals, non-Gaussian stochastic process structure, detection and estimation of vector-valued signals, robust signal detection, and array processing and target tracking. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: STAT 544 and 658, or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

**CSI 979: Advanced Topics in Computational Statistics.** 3 credits.
Covers selected topics in computational statistics not covered in fixed-content computational statistics courses. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

**CSI 986: Advanced Topics in Large-Scale Physical Simulation.** 3 credits.
Covers simulation of physical systems not covered in fixed-content physical simulation courses. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

**CSI 991: Seminar in Scientific Computing.** 1 credit.
Considers selected topics in specific area of computational sciences and informatics not covered in fixed-content courses or as extension of fixed-content courses. Format for presentation is seminar with student participation. Notes: Maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD. Offered by Computational & Data Sciences (p. 650). May be repeated within the term.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

**CSI 996: Doctoral Reading and Research.** 1-6 credits.
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to doctoral program, permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Research

**CSI 998: Doctoral Dissertation Proposal.** 1-12 credits.
Covers development of research proposal under guidance of dissertation director and doctoral committee. Proposal forms basis for doctoral dissertation. Notes: No more than 12 credits of CSI 998 may be applied to
doctrinal degree. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree.

**Recommended Prerequisite:** Permission of advisor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**CSI 999: Doctoral Dissertation.** 1-12 credits.
Involves doctoral dissertation research under direction of dissertation director. Notes: No more than 24 credits in CSI 998 and 999 may be applied to doctoral degree. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Recommended Prerequisite:**
Offered by Computational & Data Sciences. May not be repeated for credit.

**CSS 600: Introduction to Computational Social Science.** 3 credits.
Graduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes system dynamics, cellular automata, and agent-based models. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Recommended Prerequisite:**
CSS 600 or permission of instructor.

**Recommended Prerequisite:**
Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Schedule Type:** Seminar

**CSS 605: Object-Oriented Modeling in Social Science.** 3 credits.
Presents and applies concepts and principles from object-based modeling paradigm. Emphasizes Unified Modeling Language (UML) to render structure and operation of complex social systems and processes. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:**
CSS 600 or approval from instructor or program director. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Recommended Prerequisite:**
Offered by Computational & Data Sciences. May not be repeated for credit.

**CSS 610: Agent-based Modeling and Simulation.** 3 credits.
Provides hands-on examination of agent-based models in social sciences by examining and experimenting with variety of social-simulation projects conducted in modeling environments such as Swarm, Repast, Ascape, and MASON (Multi-Agent Simulator of Networks and Neighborhoods). Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:**
CSS 600 or permission of instructor.

**Registration Restrictions:**
Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Schedule Type:** Seminar

**CSS 620: Origins of Social Complexity.** 3 credits.
Examines when, where, and how social complexity emerged in human societies, emphasizing long-term analysis and comparative information processing in four civilizations of the ancient world: West Asia, East Asia, Andean Peru, and Mesoamerica. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:**
CSS 600 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Schedule Type:** Lecture

**CSS 625: Complexity Theory in the Social Sciences.** 3 credits.
Examines social phenomena including language, terrorism, the Internet, warfare, and wealth based on power laws and far-from equilibrium nonlinear dynamics. Emphasizes data analysis, and modeling and interpreting complexity-theoretic dynamics. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:**
CSS 600. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Schedule Type:** Seminar

**CSS 630: Comparative Computational Social Science.** 3 credits.
Applies comparative method for analyzing different types of computational models in the social sciences. Strong crossdomain and interdisciplinary emphasis akin to comparative economic systems,
government, or linguistics. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 or permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CSS 635:** *Cognitive Foundations of Computational Social Science*. 3 credits. Examines cognitive foundations and information processing in computational social agents and compares to human cognitive phenomena, including emotions, trust, and reciprocity. Emphasizes modeling project. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 and CSS 610 or permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CSS 640:** *Human and Social Evolutionary Complexity*. 3 credits. Examines long-term evolution of human and societal complexity from global and cross-cultural perspective with emphasis on computational aspects leading to today's globalization. Global history from the computational social science perspective. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600, 620, and permission of instructor.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CSS 643:** *Land-Use Modeling Techniques and Applications*. 3 credits. Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 (may be taken concurrently) or permission of instructor.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CSS 645:** *Spatial Agent-Based Models of Human-Environment Interactions*. 3 credits. Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hand-on development of simple ABM models. Investigates linkages between GIS and ABM. Notes: CSS 600 may be taken concurrently. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** GGS 631 or CSS 600 (may be taken concurrently) or permission of instructor.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CSS 650:** *Physics Methods for Analyzing Social Complexity*. 3 credits. Surveys complexity theoretic tools including strange attractors, Ising models, correlation functions, ergodic theory, power spectra, meanfield theory, and renormalization group. Emphasizes application to social, economic, or political systems. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 and permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CSS 655:** *Social Systems Dynamics*. 3 credits. Introduces systems dynamics modeling of social systems governed by levels/rates or stocks/flows processes, with applications to global modeling, terrorism, urban dynamics, organizations, and social and international conflict. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.
CSS 695: Agent-based Computational Economics. 3 credits. Present lectures on neoclassical economic theory as we investigate how to use agent technology to move beyond neoclassical specifications. Survey the most well-known results in agent-based economics. Read and present papers that are at the research frontier. A semester long research project. Will be the focal point of weekly model development (coding), data analysis, and writing. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CSS 610. Undergraduate microeconomics.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CSS 665: Complex Adaptive Systems in Public Policy. 3 credits. Students learn (i) basic concepts of complex adaptive systems (CAS) and how they can be applied to policy analysis, and (ii) how to use agent-based modeling as a tool for policy analysis. Address modeling issues on representing a system, agent decision making, validation, experiment design and analysis, as well as incorporating empirical data and methods to inform agent-based modeling. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSS 692: Social Network Analysis. 3 credits. Methods and applications that examine complex social systems based on relations, structures, connectivity, matrix representations, location, roles, interactions, and other network properties. Applications to terrorism, cognition, organizations, and other social phenomena. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CSS 600. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CSS 695: Agent-based Computational Economics. 3 credits. Present lectures on neoclassical economic theory as we investigate how to use agent technology to move beyond neoclassical specifications. Survey the most well-known results in agent-based economics. Read and present papers that are at the research frontier. A semester long research project. Will be the focal point of weekly model development (coding), data analysis, and writing. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CSS 610. Undergraduate microeconomics.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSS 710: Advanced Agent-based Modeling and Simulation. 3 credits. Cover topics related to large-scale agent models including how to 1) make use of available compute resources (CPU and memory) through threading and related code parallelization ideas and technologies; 2) sample data from large-scale models and calibrate/estimate such models, and 3) design experiments for models that are expensive to evaluate. Digress into other topics at the frontier of agent modeling. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CSS 610.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSS 739: Topics in Computational Social Science. 3 credits. Selected topics in computational social science not covered in fixed-content computational social science courses. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CSS 796: Directed Reading and Research. 3 credits. Reading and research on specific topic in computational social science under direction of a faculty member. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

CSS 798: Research Project. 3 credits. Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 6 credits.
Recommended Prerequisite: 12 graduate core requirement credits and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

800 Level Courses

CSS 898: Research Colloquium in Computational Social Science. 1 credit. Presentations in specific research areas in computational social science by Center for Social Complexity-associated faculty and professional visitors. Notes: Maximum 3 credits of CSS 898 and 899 may be applied toward PhD. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

CSS 899: Colloquium in Computational Social Science. 1 credit. Presentations in variety of areas of computational social science by Center for Social Complexity-associated faculty and professional visitors. Notes: Maximum 3 credits of CSS 898 and 899 may be applied toward PhD. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 2 credits.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

900 Level Courses

CSS 909: Advanced Topics in Computational Social Science. 3 credits. Covers selected topics in computational social science and socioinformatics not covered in fixed-content courses. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

CSS 996: Doctoral Reading and Research. 1-12 credits. Reading and research on specific topic in computational social science under direction of faculty member. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Admission to the doctoral program and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Research

CSS 998: Doctoral Dissertation Proposal. 1-12 credits. Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee. Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree.

Recommended Prerequisite: Permission of advisor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

CSS 999: Doctoral Dissertation. 1-12 credits. Doctoral dissertation research under direction of dissertation director. Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree.

Recommended Prerequisite: Approval of dissertation proposal.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

100 Level Courses

CDS 101: Introduction to Computational and Data Sciences. 3 credits. Introduction to the use of computers in scientific discovery through simulations and data analysis. Covers historical development and current trends in the field. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Mason Core: Natural Science with Lab (p. 135)

Recommended Prerequisite: Appropriate score on the math placement test.

Schedule Type: Lecture

CDS 102: Introduction to Computational and Data Sciences Lab. 1 credit. Experiments in computational and data sciences explore the connections between on-going advances in the natural sciences and the rapid advances in computing and data handling. Lab exercises demonstrate the use of computers in analyzing data, in modeling science problems, and in creating numerical simulations across the science disciplines. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

Mason Core: Natural Science with Lab (p. 135)

Recommended Prerequisite: CDS 101. Concurrent enrollment is permitted.

Schedule Type: Laboratory
**CDS 130: Computing for Scientists.** 3 credits. Covers use of computers to solve practical scientific problems. Topics include creating effective scientific presentations, analysis of experimental data, online literature, data/information ethics, scientific modeling, and communication/collaboration tools. Designed to equip students with the knowledge and confidence they need to use future hardware and software systems both as students and throughout their scientific careers. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Mason Core:** Information Technology: With Ethics (p. 135)

**Recommended Prerequisite:** Passing score on the math placement test for MATH 110 or MATH 113.

**Schedule Type:** Lecture

**CDS 151: Data Ethics in an Information Society.** 1 credit. Examination of ethical issues related to access and use of information and data in the Internet age, for the general student, with special emphasis on ethical issues that apply to the proper use and interpretation of scientific and technical information. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Mason Core:** Information Technology: Ethics Only (p. 135)

**Schedule Type:** Lecture

**200 Level Courses**

**CDS 201: Introduction to Computational Social Science.** 3 credits. Undergraduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Schedule Type:** Lecture

**CDS 205: Introduction to Agent-based Modeling and Simulation.** 3 credits. Undergraduate-level introduction to Agent-based Modeling. Provides a background onto why agent-based models and hands-on examination of agent-based models in the social sciences by examining and experimenting with a variety of social simulation projects. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Schedule Type:** Lecture

**CDS 230: Modeling and Simulation I.** 3 credits. This course expands upon the foundation provided by CDS 130. Fundamental computational modeling techniques are used in a variety of disciplines with special emphasis on biological systems. Continued development of algorithmic thinking skills will be done using different computational environments. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CDS 130 or permission of instructor.

**Schedule Type:** Lecture

**CDS 251: Introduction to Scientific Programming.** 3 credits. Focuses on elements of programming using the Fortran language and selected elements of the C language with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of lecture and interactive computer laboratory. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CDS 130 or permission of instructor.

**Schedule Type:** Lecture

**CDS 290: Topics in Computational and Data Sciences.** 1-4 credits. Selected topics in Computational and Data Sciences. May be accepted for credit by CDS majors and CDS minors. Offered by Computational & Data Sciences (p. 650). May be repeated within the degree for a maximum 6 credits.

**Schedule Type:** Independent Study

**CDS 292: Introduction to Social Network Analysis.** 3 credits. An introduction to methods and applications that examine social systems based on relations, structures, connectivity, location, roles, interactions, and other network properties. Example applications of Social Network Analysis covered will include politics, diseases, organizations, along with a variety of other social phenomena. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Schedule Type:** Lecture

**300 Level Courses**

**CDS 301: Scientific Information and Data Visualization.** 3 credits. The techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CDS 101 or CDS 130 or equivalent, or permission of instructor.

**Schedule Type:** Lecture

**CDS 302: Scientific Data and Databases.** 3 credits. Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of simple database systems. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** CDS 101 or CDS 130 or equivalent, or permission of instructor.

**Schedule Type:** Lecture

**CDS 303: Scientific Data Mining.** 3 credits. Data mining techniques from statistics, machine learning, and visualization to scientific knowledge discovery. Students will be given a set of case studies and projects to test their understanding of this field and provide a foundation for future applications in their careers. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CDS 101 or CDS 130 or equivalent, or permission of instructor.

**Schedule Type:** Lecture
400 Level Courses

CDS 410: Numerical Analysis II. 3 credits.
Numerical differentiation and integration, initial-value and boundary-value
problems for ordinary differential equations, methods of solution of
partial differential equations, iterative methods of solution of nonlinear
systems, and approximation theory. Offered by Computational &
Data Sciences (p. 650). May not be repeated for credit. Equivalent to
MATH 447.

Recommended Prerequisite: MATH 214 and MATH 446, proficiency in
at least one computer programming language and computer operating
system; or permission of instructor.

Schedule Type: Lecture

CDS 411: Modeling and Simulation II. 3 credits.
Covers the application of modeling and simulation methods to various
scientific applications, including fluid dynamics, solid mechanics,
materials science, molecular mechanics, and astrophysics. Provides
an introduction to modeling and simulation software, as well as high-
performance computing. Offered by Computational & Data Sciences (p. 650).
May not be repeated for credit.

Recommended Prerequisite: MATH 446, PHYS 262 or PHYS 245, and
a 200- or higher-level computational methods course, or permission of
instructor.

Schedule Type: Lecture

CDS 421: Introduction to Computational Fluid Dynamics. 3 credits.
Covers the governing equations of fluid dynamics; numerical
discretization of the governing equations and popular techniques
for solving flow problems; applications of CFD to some classic fluid
dynamics problems; and setting up the CFD simulation using a CFD
software package. Students will understand the process of developing a
geometrical model of the flow, applying appropriate boundary conditions,
specifying solution parameters, and visualizing the results. Students are
expected to complete several computer projects, including writing their
own CFD computer program to analyze simple fluid flow problems, as
well as setting up the CFD simulation using a CFD software package.
Offered by Computational & Data Sciences (p. 650). May not be repeated
for credit.

Recommended Prerequisite: MATH 446, proficiency in at least one
computer programming language and computer operating system, or
permission of instructor.

Schedule Type: Lecture

CDS 461: Molecular Dynamics and Monte Carlo Simulations. 3 credits.
Covers particle methods to solve variety of physical systems.
Emphasizes study and development of numerical results and
visualization of these results in complex physical systems. Applications
and projects include stellar and galaxy dynamics, smoothed particle
hydrodynamics, plasma simulations, and semiconductor device theory
algorithms on parallel and vectorized systems. Offered by Computational
& Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: Competency in programming at CDS 251
level, college physics, and MATH 214 or MA TH 216, or permission of
instructor.

Schedule Type: Lecture

CDS 486: Topics in Computational and Data Sciences. 3 credits.
Covers selected topics in computational and data sciences not covered
in fixed content courses. Offered by Computational & Data Sciences
(p. 650). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Lecture

CDS 487: Electronic Structure Computations. 3 credits.
Covers computational aspects of materials science, such as first-
principles methods of electronic structure calculations of periodic solids,
clusters, and molecules, as well as the use of empirical potentials.
Examples will be drawn from metals, insulators, and semiconductors.
Students will construct simple codes and be guided in the use of the
more sophisticated available computational packages. Offered by
Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: PHYS 308 or PHYS 402.

Schedule Type: Lecture

CDS 490: Directed Study and Research. 1-3 credits.
Students work under the guidance of a faculty member on an
independent study or directed research project in the computational and
data sciences. May be repeated in combination with CDS 491 for a total
of 6 credits between the two classes. Offered by Computational & Data
Sciences (p. 650). May be repeated within the degree for a maximum 6
credits.

Recommended Prerequisite: Students must be CDS majors or minors in
their junior or senior year and have permission of the instructor.

Schedule Type: Independent Study

CDS 491: Internship. 1-3 credits.
On-the-job experience for CDS majors and minors working in industry
and government laboratories, including summer programs. Supervision
and approval of this course must be arranged with department before
registering. May be repeated in combination with CDS 490 for a total
of 6 credits between the two classes. Offered by Computational & Data
Sciences (p. 650). May be repeated within the degree for a maximum 6
credits.

Recommended Prerequisite: Students must be CDS majors or minors in
their junior or senior year and have permission of the instructor.

Schedule Type: Internship

500 Level Courses

CDS 501: Scientific Information and Data Visualization. 3 credits.
Techniques and software used to visualize scientific simulations,
complex information, and data visualization for knowledge discovery.
Includes examples and exercises to help students develop their
understanding of the role visualization plays in computational science
and provides a foundation for applications in their careers. Offered by
Computational & Data Sciences (p. 650). May not be repeated for credit.

Recommended Prerequisite: CDS 130 or CDS 101; or permission of
instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CDS 502: Introduction to Scientific Data and Databases.** 3 credits.
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of database systems. Examples from different disciplines will be given. Offered by Computational & Data Sciences (p. 650). May not be repeated for credit.

**Recommended Prerequisite:** CDS 130 or CDS 101; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students in a Non-Degree Undergraduate degree may not enroll.

---

**Computer Forensics (CFRS)**

**500 Level Courses**

**CFRS 500: Introduction to Forensic Technology and Analysis.** 3 credits.
Presents an overview of technologies of interest to forensic examiners. It will provide an introduction to, software, hardware, analysis, and other aspects required for forensic examinations. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CFRS 510: Digital Forensics Analysis.** 3 credits.
Explains computer forensics crime scene procedures, beginning with initial walk-through and evaluation; identification and collection of potential evidence; preparation of intrusion investigation; aspects of working with investigators and attorneys; reverse engineering with file identification and profiling; application of critical thinking in determination of significance of artifacts; and analysis and reporting of evidence. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** TCOM 535 and a working knowledge of computer programming.

**Registration Restrictions:**
Enrollment limited to students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**600 Level Courses**

**CFRS 660: Network Forensics.** 3 credits.
Deals with the collection, preservation, and analysis of network-generated digital evidence such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws will be examined as well as private sector applications. The capture/intercept of digital evidence, the analysis of audit trails, the recording of running processes, and the reporting of such information will be examined. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** TCOM 535 and a working knowledge of computer programming.

**Registration Restrictions:**
Enrollment limited to students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture
School of Business
• Volgenau School of Engineering

Schedule Type: Lecture

CFRS 661: Digital Media Forensics. 3 credits.
Covers the collection, preservation, and analysis of digital media such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws and private sector applications will be examined, as well as the seizure, preservation, and analysis of digital media. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit. Equivalent to TCOM 661.

Recommended Prerequisite: CFRS 500 and a working knowledge of computer operating systems (e.g. CS 471, IT 342, or equivalent).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the following colleges:
• College of Science
• Schar School of Policy and Gov
• School of Business
• Volgenau School of Engineering

Schedule Type: Lecture

CFRS 663: Operations of Intrusion Detection for Forensics. 3 credits.
Introduces students to network and computer intrusion detection and its relation to forensics. Addresses intrusion detection architecture, system types, packet analysis, and products. Presents advanced intrusion detection topics such as intrusion prevention and active response, decoy systems, alert correlation, data mining, and proactive forensics. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit. Equivalent to TCOM 663.

Recommended Prerequisite: TCOM 509 and TCOM 529, and a working knowledge of computer programming.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the following colleges:
• College of Science
• Schar School of Policy and Gov
• School of Business
• Volgenau School of Engineering

Schedule Type: Research

CFRS 798: Independent Reading and Research. 1-3 credits.
Studies selected area in computer forensics under the supervision of a faculty member. A written report is required. Notes: No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: At least two core courses in the CFRS program; and permission of instructor

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CFRS 730: Forensic Deep Packet Inspection. 3 credits.
Presents tools, techniques, and methodologies used to conduct deep packet forensic analysis. Application of industry best practices to both the collection and subsequent analysis of network packets with an emphasis on hands-on exercises using various digital analytical tools. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: CFRS 660.

Registration Restrictions:
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CFRS 664: Incident Response Forensics. 3 credits.
Addresses incident detection, response, and those aspects of computer forensics pertinent to the investigation of trade secret theft, economic espionage, copyright infringement, piracy, and fraud. Procedures for gathering, preserving, and analyzing forensic evidence are discussed in detail and are applied to both computer and network incident response forensics. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit. Equivalent to TCOM 664.

Recommended Prerequisite: TCOM 535.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
**Schedule Type:** Laboratory, Lecture

**CFRS 760: Legal and Ethical Issues in IT.** 3 credits. Presents legal and ethics topics in the context of computer forensics. Includes legal principles, types of crimes, witness testimony, and forensics report writing. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: CFRS 500.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

**CFRS 761: Malware Reverse Engineering.** 3 credits. Reviews disassembled code for potentially malicious binary, or piece of malware, in order to gain a better understanding of how a binary functions when executed. Analyzes behavioral aspects as they are executed in a controlled environment. Environment changes (file, system, network, process, etc.), network communications, communications with remote devices, and so on, are closely observed for actionable information. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: CFRS 500 and CFRS 660.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Laboratory, Lecture

**CFRS 762: Mobile Device Forensics.** 3 credits. Reviews forensic evidence contained within mobile devices, including address books, call logs, text messages, video files, audio files, and Internet history. Discusses procedures and technologies associated with mobile devices and how such procedures differ from traditional computer forensics. Analyzes collected data and correlates information with data from carriers. Hands-on exercises included. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: CFRS 500, CFRS 661.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

**CFRS 763: Registry Forensics - Windows.** 3 credits. Presents the concepts, tools, and techniques used for forensic collection, identification, and analysis of the Windows registry; review the structure and layout of the Windows registry and be introduced to the types of artifacts that can be found within; evaluate and interpret data from the Windows registry with emphasis on hand-on exercises. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: CFRS 500, CFRS 661.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Laboratory, Lecture

**CFRS 764: Mac Forensics.** 3 credits. Presents the basic tools and techniques used to conduct a Mac and iOS forensic analysis. Application of industry best practices to both the collection and subsequent analysis of Mac iOS systems with an emphasis on hands-on exercises using currently available open-source and commercial tools. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: CFRS 500, CFRS 661.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**CFRS 767: Penetration Testing in Computer Forensics.** 3 credits. Presents the concepts, tools, and techniques used for penetration testing, vulnerability exploitation, assessment, reporting, and forensics; teaches multiple attack vectors as well as the defensive measures protecting against such attacks; focuses heavily on post attack forensics allowing for a complete picture of the attack process. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: CFRS 660, CFRS 663.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Laboratory, Lecture
CFRS 768: Digital Warfare. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 500, CFRS 660. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 769: Anti-Forensics. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 500, CFRS 660. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 770: Fraud and Forensics in Accounting. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 500.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 771: Digital Forensic Profiling. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 500, CFRS 660.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 772: Forensic Artifact Extraction. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 500, CFRS 661.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 773: Mobile Application Forensics and Analysis. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 660.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 775: Kernel Forensics and Analysis. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 500, CFRS 661.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 776: Digital Warfare. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 500, CFRS 660.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 777: Digital Forensic Profiling. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 500, CFRS 660.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 778: Forensic Artifact Extraction. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 500, CFRS 661.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 779: Mobile Application Forensics and Analysis. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 660.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

CFRS 780: Kernel Forensics and Analysis. 3 credits.
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to identify patterns and anomalies in financial data that may be indicative of fraud. Emphasis on the technical aspects of forensic accounting, including the extraction and analysis of digital evidence from various media. Recommended Prerequisite: CFRS 500, CFRS 661.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Recommended Prerequisite: CFRS 761.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CFRS 780: Advanced Topics in Computer Forensics. 3 credits.
Teaches advanced topics from recent developments and applications in various areas of computer forensics. Enhances the professional engineering community's understanding of breakthrough developments in specific areas of computer forensics. Active participation of the students is encouraged in the form of writing and presenting papers in various research areas of the advanced topic. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CFRS 790: Advanced Computer Forensics. 3 credits.
Capstone course for the MS in computer forensics program. Students will be exposed to case studies and be required to conduct computer forensic investigations of digital media, intercepted packet switched data, and multisource log information to successfully complete each case study. Notes: To be taken in the last year prior to the completion of degree requirement. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: CFRS 660, 661, and (663 or 664), and a minimum of 18 credits in the MS Computer Forensics Program prior to registration.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CFRS 798: Research Project. 1-3 credits.
Conduct a research project to be chosen and completed under guidance of a graduate faculty member that results in an acceptable technical report. Notes: No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: At least two core courses and a minimum of 12 credits in the CFRS program; permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Thesis

Computer Game Design (GAME)

100 Level Courses

GAME 101: Introduction to Game Design. 3 credits.
Introductory overview of the game development process with an emphasis on game design. Through detailed study of historical and current games, students will learn the language and structure needed to develop their own game ideas. Students will learn the many aspects of a game development team and how each of these roles contributes to a game's overall design. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Lecture

200 Level Courses

GAME 210: Basic Game Design. 3 credits.
Introduction to computer game design and development including a brief history of the field and current industry practice and production. Current major game design software, hardware, and associated tools are explored through simple game design projects. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Schedule Type: Lecture

GAME 230: History of Computer Game Design. 3 credits.
History of computer game design including games as a new medium for education, entertainment, and communications. Aspects of the business of computer game publishing, game criticism, storytelling, interactive fiction, violence, and virtual communities will be explored. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Schedule Type: Lecture

GAME 231: Computer Animation for Games. 3 credits.
2D and 3D modeling, character design, and animation projects are constructed using commercial and proprietary software and game design tool kits and engines. Simple texturing and models rigging for game animation will be discussed. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Schedule Type: Studio

GAME 232: Online and Mobile Gaming. 3 credits.
Class covers the history, practice, and design of online and mobile games. Class will discuss the current state of the smartphone applications and study the best practices to be successful in the
applications market. Students will learn the development process for smartphone applications and develop original and innovative applications in a team-based environment. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** GAME 210\(^C\) and 230\(^C\).

\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**GAME 250: Music for Film and Video.** 3 credits.

Selection, editing, processing, and integration of sounds and music (post-production) for film, video, and animation. Time, frequency, and amplitude domain digital post-production techniques will be studied. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Schedule Type:** Lecture

**300 Level Courses**

**GAME 300: Portfolio Preparation.** 1 credit.

Student creates and refines a web portfolio to utilize throughout the course of study in presenting projects to aid in internship application and professional development. Notes: Must have passed GAME 231 and GAME 232 with a C or better. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Schedule Type:** Lecture

**GAME 310: Game Design Studio.** 3 credits.

Studio course that focuses on team-based game design. In collaboration with undergraduate students from VSITE’s CS game design concentration, student teams design and develop complete computer-based and online serious and/or entertainment games. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** GAME 231\(^C\) and 232\(^C\).

\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**GAME 320: Digital Painting for Games.** 3 credits.

Students develop observational, sketching, and rendering skills in the digital medium. Students practice digital painting from reference and imagination as they create convincing game surfaces and simple concept drawings. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** GAME 231 AVT 323 or AVT 333.

**Schedule Type:** Lecture

**GAME 330: Computer Game Platform Analysis.** 3 credits.

Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** GAME 310 and CS 112.

**Recommended Corequisite:** GAME 331.

**Schedule Type:** Studio

**GAME 331: Consumer Gaming Platform Analysis Lab.** 1 credit.

Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** GAME 310 and CS 112.

**Recommend Corequisite:** GAME 330.

**Schedule Type:** Laboratory

**GAME 332: RS: Story Design for Computer Games.** 3 credits.

Use of narrative structure and new media for designing computer game scenarios and stories. Traditional narrative techniques (text stories, novels, films) will be examined, as well as translations of the traditional to interactive, non-linear modes of communications. Analysis of current computer game story design theories, philosophies, and techniques will be covered. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Specialized Designation:** Research/Scholarship Intensive, Writing Intensive in the Major

**Recommended Prerequisite:** Completion of 30 credits within major or permission of the instructor.

**Schedule Type:** Lecture

**GAME 367: Writing and Editing Music and Sound.** 3 credits.

Composition, editing, processing, and integration of voice, environmental sounds and music into non-linear computer game environments. Special emphasis will be placed on HD sound and music post-production and mixing (3 & 5 transducer point listening spaces), sequential composition and sample-splicing techniques, and the study of competing compression algorithms for sound and music. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** GAME 250\(^C\).

\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**GAME 398: Advanced Game Design Animation.** 3 credits.

Advanced 2D and 3D animation projects for interactive game scenes and scenarios are built using commercial and proprietary software and game design tool kits. Advanced texturing, rigging, lighting, and perspective manipulation will be covered. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** GAME 231\(^C\).

\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**GAME 399: Special Topics.** 1-4 credits.

In-depth presentation and exploration of topical studies in computer game design. Subject matter varies. Notes: May be repeated when topic is different. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 12 credits.

**Schedule Type:** Lecture
400 Level Courses

GAME 400: Game Design Practicum. 3 credits.
Study/lecture course focuses on the design strengths and weaknesses inherent in current entertainment and serious games. UI design, level design and map structure, scoring stratum, on-line support, game ecologies, gaming communities, and designing/writing documentation and specifications will be studied. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: GAME 330, 367 or 398. Must be a Computer Game Design minor.

Schedule Type: Lecture

GAME 410: Advanced Game Design Studio. 3 credits.
In collaboration with undergraduate students from VSITE’s CS game design concentration, student teams design and develop complete computer-based and online serious and entertainment games. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: GAME 310, GAME 330 and GAME 331.
Schedule Type: Studio

GAME 431: Advanced Game Animation I. 3 credits.
Builds advanced 3D character animation skills. Students animate from reference using the principles of weight, follow through, and anticipation. Projects focus on creating interactive motions for characters using commercial software and game engines. Intermediate rigging will also be covered. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: GAME 398.
Schedule Type: Lecture

GAME 489: Pre-Internship Seminar. 1 credit.
Student prepares for interview and application processes associated with securing an internship, finishing the course with a professional resume and portfolio ready for submission to potential employers. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Schedule Type: Seminar

GAME 490: Senior Game Design Capstone. 3 credits.
Student develops a case study of a publicly or commercially published computer game exploring the technical, economic, ethical, social and political ramifications on its intended target market. A public lecture of the case study is required. Notes: Students are required to complete 6 credits for the degree program. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 9 credits.

Mason Core: Capstone, Synthesis (p. 135)

Recommended Prerequisite: Completion of 60 credits in major. Students must be granted permission by the program director to take the course.

Registration Restrictions:
Enrollment is limited to students with a major in Computer Game Design.

Schedule Type: Lecture

GAME 491: Internship. 3-4 credits.
Placement in an appropriate internship within a program approved by a federal, state or commercial game design/publishing agency or firm. Notes: 135 hours of internship on-site work must be completed for 3 credits.180 hours of internship on-site work must be complete for 4 credits. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: GAME 489 and completion of 60 credits in major.

Schedule Type: Internship

GAME 492: Independent Study. 1-6 credits.
Advanced research, computer game design, or exploration of topical studies in computer game design. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 12 credits.

Schedule Type: Independent Study

GAME 499: Advanced Studies in Game Design. 1-4 credits.
Exploration of various issues in computer game design, including theoretical aspects of games studies and production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 12 credits.

Recommended Prerequisite: Admittance to BFA Game Design Program or instructor permission.

Schedule Type: Lecture

500 Level Courses

GAME 599: Advanced Studies in Game Design. 1-4 credits.
Exploration of various issues in computer game design, including theoretical aspects of games studies and production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: Admittance to MA Game Design Program or instructor permission.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses

GAME 600: Research Methodologies in Game Design. 3 credits.
Graduate seminar focusing on development of independent research project in student’s area of emphasis. Explores principal methods of researching and documenting game design and game practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research clouds and systems. Students will research and write a publishable paper following standard scientific research practice. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: Admittance to MA Game Design Program or instructor permission.
**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GAME 605: Game Design Graduate Seminar.** 1 credit.
Students present their own research and projects, or the work of contemporary game designers for discussion and peer and faculty critiques. Special focus on developing professional public communication and presentation skills about contemporary issues in the game design and production fields. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 4 credits.

**Recommended Prerequisite:** Admittance to MA Game Design Program or instructor permission.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GAME 610: Game Production.** 3 credits.
Studio and lecture course in the history, practice and design and production of computer games with an emphasis on serious games development. Students will research, design and develop a fully functioning game, for desktop, console, and/or mobile platforms in this two-semester course. This course will also support the thesis research and project development. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admittance to the MA Game Design Program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GAME 617: Teaching Practicum.** 3 credits.
Supervised classroom teaching in Mason’s Computer Game Design undergraduate program, or summer Game-focused Potomac Academy Program. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** GAME 605 and 3 credits of GAME 610.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GAME 626: Game Business, Entrepreneurship and Practice.** 3 credits.
Combined lecture and studio course in discovering and developing entrepreneurial skill sets in the game design, production and publishing industry. Special focus will be given to developing communication skills, planning strategies, and nurturing the aptitude and attitudes that enable students to creatively solve problems, identify opportunities, and execute those opportunities in the game design and production industry. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** GAME 605 and GAME 610.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GAME 628: Advanced Game Art.** 3 credits.
Studio and Lecture course in advanced computer game modeling processes and techniques. Advanced topics in modeling interactive characters and environments will be covered, including texture painting, photosourcing, and both low and high-polygon modeling. A broad variety of art styles and game production pipelines will be explored. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admittance to MA Game Design Program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GAME 630: Advanced Game Animation.** 3 credits.
Combined Studio and Lecture course in creating advanced animations for interactive games, with an emphasis on realtime characters. Non-bipedal motions, rotoscoping, rigging, and other advanced topics in animation will also be explored. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admittance to the MA Game Design Program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GAME 635: Issues in Interactive Entertainment. 3 credits.
Studio and lecture course in advanced design concepts for interactive game and entertainment platforms and systems. Microsoft’s Kinect, Nintendo’s Wii U, and Apple’s AirPlay Mirroring will be studied. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: GAME 600, GAME 605 and 3 credits of GAME 610.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GAME 638: Game Studio Management. 3 credits.
Lecture Courses in managerial responsibilities and issues concerning successfully managing a small to mid-size game design studio in today’s game industry marketplace. Human resources and personnel management, investor relations and board management, contract negotiations and development analysis, game design and production team oversight, research and development, budget management and realistic financial projections will be covered. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: GAME 610 and GAME 626.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GAME 650: Advanced Music and Sound for Games. 3 credits.
Combined studio and lecture course that will focus on the composition, editing, processing, mixing, and integration of sound assets, such as sfx, narration, and music into computer games. Time, frequency, and amplitude domain digital production and post-production techniques will be reviewed. Standard 2-channel, and 5.1 channel post-production/mixing, as well as contemporary middleware sound management applications will be studied. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: Admittance to the MA Game Design Program or permission of instructor.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GAME 658: Interactive Game Systems Design. 3 credits.
Studio and lecture course in advanced interactive games and simulations. A variety of entertainment platforms, systems, and their unique input devices will be explored, including augmented reality, social networks, and motion controllers. Games developed will use the latest online, mobile, and console platforms, as well as non-commercial prototype platforms. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: GAME 635.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GAME 600 and GAME 605.

700 Level Courses

GAME 710: Graduate Internship. 3 credits.
This course prepares interns to succeed in the game design industry by assisting their placement in an appropriate internship within a program approved public or commercial game design/publishing agency or firm. A total of 180 hours of internship on-site work must be earned within the semester of registration. Each student is assigned a program internship coordinator, and an on-site internship supervisor. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: GAME 610 and GAME 617 and permission of Program Director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

GAME 796: Directed Reading. 1 credit.
Directed Reading must be taken in the fall of year two. Prior to the end of the first year, each student must identify a faculty member, based on interest and chosen topic that will serve as the student’s faculty mentor for the thesis research and writing, or project development process. Students should also plan to devote the summer between the two academic years of study to focused preliminary reading and research for the thesis paper or project. Notes: Directed Reading is overseen by the chosen faculty mentor, and will be tailored to each student's original thesis research paper or project. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: GAME 600 and GAME 605.
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
GAME 797: Proposal Writing. 1 credit.
Proposal Writing is overseen by the chosen faculty mentor, and will be tailored to each student’s original thesis research paper or project. Prior to the end of the first year, each student must identify a faculty member, based on interest and chosen topic that will serve as the student’s faculty mentor for the Proposal Writing course to prepare for the thesis writing, or project development process. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: GAME 796.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
GAME 798: Project and Applied Research. 3 credits.
The research project and supporting written document must reflect original research, development, and production of a complete serious game for graduate level work. The graduate project will involve a study of historical practice, and suitable for a public viewing experience and presentation. The written component will support the evolution of the creative process, the historical context of the work, the intended purpose and intent, all supported with scholarly citations and references. Faculty mentors will guide the project development process. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Permission of Graduate Faculty Mentor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis
GAME 799: Thesis. 4 credits.
The thesis project and or written document must reflect original research, analysis, and writing appropriate for graduate level work. The thesis written document should be between 85 to 100 pages in length, following university library standards of format for graduate thesis. If a thesis project is chosen, the project should compose a complete game design document, a completed and QA tested functional game using a commercially available engine, and a public presentation. Faculty mentors will guide the thesis development process for each student. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: Permission of Graduate Faculty Mentor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Computer Science (CS)

100 Level Courses

CS 100: Principles of Computing. 3 credits.
This course is intended to help students learn to think in the manner necessary to fully grasp the nature and power of the digital world around us. The early era of the Internet and the personal computer led to the need for "computer literacy." Now, the changing nature of our global society requires that students learn new ways to think about problems and how to solve them, regardless of students’ specific fields of endeavor. Through this course, students will explore major issues related to the "big ideas" of computational thinking (namely, (i) Creativity, (ii) Abstraction, (iii) Data, (iv) Algorithms, (v) Programming, (vi) Internet, and (vii) Societal Impact), as well as how these issues will impact their future lives. Offered by Computer Science (p. 983). Limited to two attempts.

Mason Core: Information Technology: With Ethics (p. 135)

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
CS 101: Preview of Computer Science. 2 credits.
Offers a broad overview of computer science designed to provide students with an introduction to the field of computer science and an orientation to the Computer Science department and the computing environment at the university. Includes a project to introduce problem solving using computers. All computer science majors are required to take this course within their first year. Notes: All computer science majors are required to take this course within their first year. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CS 112 C.
C May be taken concurrently.

Enrollment is limited to students with a major in Applied Computer Science or Computer Science.

Enrollment limited to students in a Bachelor of Science degree.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
CS 105: Computer Ethics and Society. 1 credit.
Intensive introduction to legal, social, and ethical issues surrounding software development and computer use. Stresses professional conduct, social responsibility, and rigorous standards for software testing and reliability. Examines issues such as liability, ownership of information, and computer crime. Note: Students who have received credit for CS 305 or 306 should not register for CS 105. No credit will be given for CS 105 if a student has already received credit for CS 305 or 306. Offered by Computer Science (p. 983). Limited to two attempts.

Mason Core: Information Technology: Ethics Only (p. 135)

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
**CS 110: Essentials of Computer Science.** 3 credits.
Offers a broad overview of computer science designed to provide computer science majors with an introduction to their discipline. Fundamental computing concepts such as number representation, programming environments, communication tools, and basic network security measures are covered. Privacy and ethical use of computing are also discussed along with guest lectures to sample current computer science research. Note: All computer science majors are required to take this course within their first year as a computer science major. Offered by Computer Science (p. 983). Limited to two attempts.

**Registration Restrictions:**
Enrollment limited to students in the BS Applied Computer Science or BS Computer Science programs.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

---

**CS 112: Introduction to Computer Programming.** 4 credits.
Rigorous introduction to problem solving through development of computer programs. Focuses on identifying algorithmic patterns in problems, describing problem solutions in high-level pseudocode, then implementing in a procedural programming language. Basic programming concepts are covered in detail including expressions, control structures, simple data types, and input/output. Program testing and debugging are discussed to verify that problems are solved correctly. Note: The department will drop students who fail to meet the prerequisites. Lectures and Labs are offered in groups. Students MUST register for a lecture and a lab from the same group. Offered by Computer Science (p. 983). Limited to two attempts.

**Mason Core:** Information Technology: Without Ethics (p. 135)

**Registration Restrictions:**
Required Prerequisites: (minimum score of 65 in 'Math Placement Transcendentals', minimum score of 07 in 'Math Placement Transcendentals', MATH 105C, 105T, 104C, 104T or 113C).

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

---

**200 Level Courses**

**CS 211: Object-Oriented Programming.** 3 credits.
Thorough treatment of programming according to object-oriented principles. Introduces classes, interfaces, inheritance, polymorphism, and single dispatch as means to decompose problems. Covers intermediate programming techniques including error handling through exceptions, arrangement of source code into packages, and simple data structures. Intermediate debugging techniques and unit testing are covered. Note: Lectures and labs are offered in groups. Students MUST register for a lecture and a lab from the same group. Offered by Computer Science (p. 983). Limited to two attempts.

**Registration Restrictions:**
Required Prerequisite: (CS 112C).

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

---

**CS 222: Computer Programming for Engineers.** 3 credits.
Introduction to C as a second programming language with emphasis on problems and language features relevant to engineers. Topics include basic data types, pointers, elementary data structures, file/output, bitwise operations, and UNIX commands for compilation and debugging. Intended as terminal course in computer programming. Notes: Intended as terminal course in computer programming. Offered by Computer Science (p. 983). Limited to two attempts.

**Registration Restrictions:**
Required Prerequisite: (CS 112C).

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

---

**CS 261: Introduction to a Second Language.** 1 credit.
Advanced programming using Java programming language. Other languages may be offered at times. Notes: Not available for credit for CS majors. Offered by Computer Science (p. 983). Limited to two attempts.

**Recommended Prerequisite:** Grade of C or better in CS 211.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

---

**CS 262: Introduction to Low-Level Programming.** 3 credits.
Introduction to the language C, as well as operating system concepts, in UNIX, to prepare students for topics in systems programming. Offered by Computer Science (p. 983). Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CS 110C or 101) and (CS 211C or 222C).

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

---

**300 Level Courses**

**CS 306: Synthesis of Ethics and Law for the Computing Professional.** 3 credits.
Practical course to become effective computer professional. Examines legal and ethical issues surrounding computer technology and its use, as well as the foundation building that is necessary to deal with those challenges. Applies philosophical bases for ethical decision making to modern concerns raised by computers and technology. Addresses topics covered by CS 105 in a more intensive manner and focuses on the emerging legal and ethical issues involved in e-commerce and widespread use of the Internet. Notes: Computer science majors may use this course to satisfy the Mason Core synthesis requirement, so long as they have not previously taken CS 305 for credit. Offered by Computer Science (p. 983). Limited to two attempts. Equivalent to IT 304.

**Mason Core:** Synthesis (p. 135)

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** Junior standing (at least 60 credit hours).

**Recommended Corequisite:** All required Mason Core courses.
Registration Restrictions: 
Required Prerequisites: ((COMM 100\(^C\) and ENGH 302\(^C\)) or (HNRS 110\(^C\) and 122\(^C\)) or (HNRS 110\(^C\) and 130\(^C\)) or (HNRS 110\(^C\) and 131\(^C\)) or (HNRS 110\(^C\) and 230\(^F\)) or (HNRS 110\(^C\) and 240\(^F\))) and (CS 105\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 310: Data Structures. 3 credits.
Focuses on object-oriented programming with an emphasis on tools and techniques for developing moderate to large programs. Topics include use and implementation of linear and nonlinear data structures and the design and analysis of elementary algorithms. Offered by Computer Science (p. 983). Limited to two attempts.

Required Prerequisites: CS 211\(^C\) and MATH 113\(^C\).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 321: Software Engineering. 3 credits.
An introduction to concepts, methods, and tools for the creation of large-scale software systems. Methods, tools, notations, and validation techniques to analyze, specify, prototype, and maintain software requirements. Introduction to object-oriented requirements modeling, including use of case modeling, static modeling, and dynamic modeling using the Unified Modeling Language (UML) notation. Concepts and methods for the design of large-scale software systems. Fundamental design concepts and design notations are introduced. A study of object-oriented analysis and design modeling using the UML notation. Students participate in a group project on software requirements, specification, and object-oriented software design. Offered by Computer Science (p. 983). Limited to two attempts. Equivalent to SWE 321.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions: 
Required Prerequisites: CS 310\(^C\) and (ENGH 302\(^C\) or (HNRS 110\(^C\) and (HNRS 122\(^C\), 130\(^C\), 230\(^C\) or 240\(^F\)))
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 325: Introduction to Game Design. 3 credits.
Game design, in various electronic entertainment technologies, involves a diverse set of skills and backgrounds from narrative and art to computer programming. Surveys the technical aspects of the field, with an emphasis on programming. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions: 
Required Prerequisite: (CS 211\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 330: Formal Methods and Models. 3 credits.
Abstract concepts that underlie much advanced work in computer science, with major emphasis on formal languages, models of computation, logic, and proof strategies. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions: 
Required Prerequisites: (CS 211\(^C\) and MATH 125\(^C\)).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Applied Computer Science, Computer Science or Software Engineering.

Enrollment limited to students in a Bachelor of Science or Post-Baccalaureate Certificate degrees.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 332: Object-Oriented Software Design and Implementation. 3 credits.
In-depth study of software design and implementation using a modern, object-oriented language with support for graphical user interfaces and complex data structures. Topics covered will be specifications; design patterns; and abstraction techniques; including typing, access control, inheritance, and polymorphism. Students will learn the proper engineering use of techniques such as information hiding, classes, objects, inheritance, exception handling, event-based systems, and concurrency. Offered by Computer Science (p. 983). Limited to two attempts. Equivalent to SWE 332.

Registration Restrictions: 
Required Prerequisite: (CS 310\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 335: Visual Computing. 3 credits.
Focuses on programming essential mathematical and geometric concepts underlying computer graphics. Covers fundamental topics in computational geometry, 3D modeling, graphics algorithms, and graphical user interfaces using both 2D and 3D implementations. Reinforces object-oriented programming practices. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions: 
Required Prerequisites: (CS 262\(^C\) and 310\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 367: Computer Systems and Programming. 4 credits.
Introduces students to computer systems from a programmer’s perspective. Topics include data representation, assembly and machine-level representation of high-level language programs, the memory hierarchy, linking, exceptions, interrupts, processes and signals, virtual
memory, and system-level I/O. Foundation for courses on compilers;
networks; operating systems; and computer architecture, where a deeper
understanding of systems-level issues is required. Offered by Computer
Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 262C or 222C) and MATH 125C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

CS 390: Research and Project Design Principles in Computing. 3 credits.
This course introduces students to the research and project design
process within the computing field. Students will learn about the tools of
the trade, work through design principles beginning with the articulation
of a question, reviewing methods of exploration, gathering evidence,
communicating results, and assessing and evaluating research or project outcomes. Offered by Computer Science (p. 983). Limited to two attempts.

Specialized Designation: Scholarly Inquiry

Recommended Prerequisite: CS 310 and CS 321.

Registration Restrictions:
Required Prerequisite: CS 262C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 391: Advanced Programming Lab. 1 credit.
Programming-intensive lab course. Students refine problem-solving and
programming skills while gaining experience in teamwork. Focuses on
data structures, recursion, backtracking, dynamic programming, and
debugging. Central focus is applying familiar and new algorithms and
data structures to novel circumstances. Offered by Computer Science (p. 983). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Required Prerequisite: CS 310C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

400 Level Courses

CS 425: Game Programming I. 3 credits.
Introduction to technologies and techniques used in modern computer
games. Teams will explore the various facets of a complete design using
sophisticated tools. Includes a project in which a game is prototyped;
this prototype and initial design will serve as the starting point for the
project in CS 426. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C and 351C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 426: Game Programming II. 3 credits.
Project-orientated continuation of CS 425 with an emphasis on the
implementation of a complete game. Offered by Computer Science
(p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CS 325C and 425C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 440: Language Processors and Programming Environments. 3 credits.
Survey of basic programming language processors and software
development tools such as assemblers, interpreters, and compilers.
Topics include design and construction of language processors, formal
syntactic definition methods, parsing techniques, and code-generation
techniques. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 330C) and (CS 367C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 444: Introduction to Computational Biology. 3 credits.
Introduces computational methods in molecular biology. Covers a broad
array of topics in bioinformatics and computational biology. Organized
as 3 four-week modules intended to capture the current classification of
bioinformatics and computational biology methods, thereby providing
students with a broad view of the field. Offered by Computer Science
(p. 983). Limited to two attempts.

Recommended Prerequisite: C or better in CS 310.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 445: Computational Methods for Genomics. 3 credits.
Fundamental principles and techniques for implementing computational
algorithms to solve problems in biology arising from the need to process
large volumes of genomic information. Topics include sequence analysis,
alignment, and assembly, gene prediction, and knowledge-based protein
structure prediction. Projects involve designing and programming basic
alignment and prediction methods. Offered by Computer Science (p. 983). Limited to two attempts.

Recommended Prerequisite: C or better in CS 310 and STAT 344.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 450: Database Concepts. 3 credits.
Covers basics to intermediate knowledge for the design, implementation,
and use of relational database systems. Topics include the Entity-
Relationship (ER) and Entity-Enhanced Relationship (EER) models for
database design, Relational Algebra (RA), Structured Query Language (SQL), SQL programming techniques, functional dependencies and normalization, object and object-relational databases, and security. Students will practice to design, develop, and implement a relational ORACLE database and use the database for queries, transaction processing, and report generation. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 330C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 451: Computer Graphics. 3 credits.
Basic graphics principles and programming. Topics include scan conversion, transformation, viewing, lighting, blending, texture mapping, and some advanced graphics techniques. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (MATH 203C) and (CS 310C) and (CS 367C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 455: Computer Communications and Networking. 3 credits.
Data communications and networking protocols, with study organized to follow layers of Internet Protocol Suite (TCP/IP family of protocols). Topics include role of various media and software components, local and wide area network protocols, network performance, and emerging advanced commercial technologies. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 367C) and (STAT 344C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 463: Comparative Programming Languages. 3 credits.
Key programming mechanisms described independently of particular machines or languages, including control, binding, procedural abstraction, types, and concurrency. Includes basic programming competence in several different types of programming languages, including a language that provides concurrency. Notes: Students who have taken CS 363 may not receive credit for CS 463. Offered by Computer Science (p. 983). Limited to two attempts. Equivalent to CS 363.

Registration Restrictions:
Required Prerequisites: (CS 330C and 367C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 465: Computer Systems Architecture. 3 credits.

Registration Restrictions:
Required Prerequisite: (CS 367C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 468: Secure Programming and Systems. 3 credits.
Fundamental principles and techniques for implementing secure computer systems. Topics include security and cryptography basics, vulnerability analysis, secure software development, and distributed system security. Projects involve designing and programming basic security tools, secure programs, and distributed systems. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 367C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 471: Operating Systems. 3 credits.
Issues in multiprogramming. Covers concurrent processes and synchronization mechanisms; processor scheduling; memory, file, I/O, and deadlock management; performance of operating systems; and projects dealing with synchronization in multiprogrammed OS and virtual memory management. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 367C) or ECE 445C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 475: Concurrent and Distributed Systems. 3 credits.
Practical issues in designing and implementing concurrent and distributed software. Topics include concurrent programming, synchronization, multithreading, local and wide-area network protocols,
distributed computation, systems integration, and techniques for expressing coarsegrained parallelism at the application level. Projects involve network programming at application level. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 367C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 477: Mobile Application Development. 3 credits.
This project based course will teach fundamental principles of software development for the mobile device environment, emphasizing the application of numerous academic concepts and the new design and programming paradigms that stem from the use of mobile devices. Topics include user interfaces, event-based programming, interprocess communications, networking, mobile-specific capabilities and performance in a resource restricted environment. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CS 310C and 367C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 480: Introduction to Artificial Intelligence. 3 credits.
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. Uses LISP, PROLOG, or expert system programming language. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 330C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 482: Computer Vision. 3 credits.
Basic principles of visual perception and their implementation on computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Students complete projects involving real images. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (MATH 203C) and (STAT 344C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 483: Analysis of Algorithms. 3 credits.
Analyzes computational resources for important problem types by alternative algorithms and their associated data structures, using mathematically rigorous techniques. Specific algorithms analyzed and improved. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 330C) and (MATH 125C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 484: Data Mining. 3 credits.
Basic principles and methods for data analysis and knowledge discovery. Emphasizes developing basic skills for modeling and prediction and performance evaluation. Topics include system design; data quality, preprocessing, and association; event classification; clustering; biometrics; business intelligence; and mining complex types of data. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (STAT 344C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 485: Autonomous Robotics. 3 credits.
Covers various basic topics in autonomous robotics, such as autonomous architectures and their interaction with physical hardware, elementary kinematics and robot control, motion and trajectory planning, localization, task planning, learning and adaptation, modeling, and sensor fusion. Includes projects involving physical robots. Offered by Computer Science (p. 983). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CS 262C, 310C and MATH 203C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 490: Design Exhibition. 3 credits.
Capstone course focusing on design and successful implementation of major software project, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-industry panel. Offered by Computer Science (p. 983). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Two other CS 400-level courses; and senior standing.

Registration Restrictions:
Required Prerequisites: (CS 321C or 421C) and (CS 483C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 491: Industry-Sponsored Senior Design Project. 3 credits.
Senior design project course focusing on design and successful implementation of major software project specified by an industry sponsor, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-
industry panel. Offered by Computer Science (p. 983). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Required Prerequisites: CS 367\textsuperscript{c}, 321\textsuperscript{c} and 483\textsuperscript{c}.
\textsuperscript{a} May be taken concurrently.
\textsuperscript{c} Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Applied Computer Science or Computer Science.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

CS 498: Independent Study in Computer Science. 1-3 credits.
Research and analysis of selected problems or topics in computer science. Topic must be arranged with instructor and approved by department chair before registering. Notes: May be repeated if topics substantially different. Offered by Computer Science (p. 983). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: 60 credits, CS major, and Permission of Instructor.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study

CS 499: Special Topics in Computer Science. 3 credits.
Topics of special interest to undergraduates. Notes: May be repeated if topics substantially different. Offered by Computer Science (p. 983). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: 60 credits and permission of instructor; specific prereqs vary with nature of topic.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

500 Level Courses

CS 504: Principles of Data Management and Mining. 3 credits.
Techniques to store, manage, and use data including databases, relational model, schemas, queries and transactions. On Line Transaction Processing, Data Warehousing, star schema, On Line Analytical Processing. MOLAP, HOLAP, and hybrid systems. Overview of Data Mining principles, models, supervised and unsupervised learning, pattern finding. Massively parallel architectures and Hadoop. Notes: This course cannot be taken for credit by students of the MS CS, MS ISA, MS SWE, CS PhD or IT PhD programs. Offered by Computer Science (p. 983). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 530: Mathematical Foundations of Computer Science. 3 credits.
This course focuses on the topics of basic mathematical structures, mathematical logic and probability theory; and application of these concepts to problem solving and formal reasoning through hand-on practice with the use of computational tools. Notes: This course is restricted to provisional students. It must be taken in the first semester at GMU. Offered by Computer Science (p. 983). May not be repeated for credit.

Recommended Prerequisite: MATH 125 and STAT 344.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 531: Fundamentals of Systems Programming. 3 credits.
Introduces systems and network programming for UNIX and Windows using lectures and hands-on labs. Covers ANSI C programming, system libraries and APIs, forking and threads, interprocess communications, synchronization, Windows API, and code debugging Offered by Computer Science (p. 983). May not be repeated for credit. Equivalent to ISA 563.

Recommended Prerequisite: CS 310 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 540: Language Processors. 3 credits.
Basic programming language processors such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code generation techniques. Lab includes construction of language processors and experience with programming environments. Offered by Computer Science (p. 983). May not be repeated for credit.

Recommended Prerequisite: MATH 125 and CS 310 and CS 330 and CS 465.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 550: Database Systems. 3 credits. An introduction to database management with focus on architecting databases and using them in applications. Topics to be covered include: data modeling with the Entity-Relationship model, the relational data model and its formal languages, SQL, the theory of database design, object databases, XML and Web data. Offered by Computer Science (p. 983). May not be repeated for credit.

Recommended Prerequisite: (CS 310 and CS 330) or (INFS 501 and INFS 515 and INFS 519 and SWE 510).

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 551: Computer Graphics. 3 credits. Graphics principles and programming. Topics include graphics hardware, antialiasing, transformations, viewing, illumination, blending, texture mapping, color models, curves, surfaces, and animation. Offered by Computer Science (p. 983). May not be repeated for credit. Equivalent to CS 652.

Recommended Prerequisite: CS 310 and CS 367.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 555: Computer Communications and Networking. 3 credits. Techniques and systems for communication of data between computational devices and layers of Internet Protocol Suite. Topics include role of various media and software components, local and wide area network protocols, network design, performance and cost considerations, and emerging advanced commercial technologies.

Emphasizes TCP/IP family of protocols. Offered by Computer Science (p. 983). May not be repeated for credit.

Recommended Prerequisite: CS 310 and CS 367 and STAT 344.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 571: Operating Systems. 3 credits. Models of operating systems. Major functions including processes, memory management, I/O, interprocess communication, files, directories, shells, distributed systems, performance, and user interface. Offered by Computer Science (p. 983). May not be repeated for credit.

Recommended Prerequisite: CS 310 and CS 367 and CS 465.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 580: Introduction to Artificial Intelligence. 3 credits. Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. LISP, PROLOG, or expert system programming language. Offered by Computer Science (p. 983). May not be repeated for credit.

Recommended Prerequisite: CS 310 and CS 330.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
**CS 583: Analysis of Algorithms.** 3 credits.
Topics include analyzing sequential and parallel algorithmic strategies such as greedy methods, divide and conquer strategies, dynamic programming, search and traversal techniques, and approximation algorithms; and analyzing specific algorithms falling into these classes, NP-Hard and NP-Complete problems. Offered by Computer Science (p. 983). May not be repeated for credit.

**Recommended Prerequisite:** CS 310 and CS 330 and MATH 125.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 584: Theory and Applications of Data Mining.** 3 credits.
Concepts and techniques in data mining and multidisciplinary applications. Topics include databases; data cleaning and transformation; concept description; association and correlation rules; data classification and predictive modeling; performance analysis and scalability; data mining in advanced database systems, including text, audio, and images; and emerging themes and future challenges. Offered by Computer Science (p. 983). May not be repeated for credit. Equivalent to CS 659, CS 750.

**Recommended Prerequisite:** CS 310 and STAT 344.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**600 Level Courses**

**CS 600: Theory of Computation.** 3 credits.
Introduction to logic and proof techniques, formal languages, automata theory, and computational complexity. Specific topics include regular and context-free languages, Turing machines, NP-completeness, and undecidability. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: CS 583^B_. ^B_ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 611: Computational Methods for Genomics.** 3 credits.
Covers fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignments, sequence assembly, gene prediction, and protein structure prediction. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: CS 583^B_. ^B_ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 630: Advanced Algorithms.** 3 credits.
Provides an overview of advanced algorithm design and analysis techniques. Topics include algorithms for hash tables, matrix operations, number theory, string matching, computational geometry, combinatorial optimization, and linear programming; also the areas of NP-completeness and approximation algorithms. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: CS 583^B_. ^B_ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 633: Computational Geometry.** 3 credits.
Basic principles and methods for computing in field of geometric modeling. Emphasizes data structures used to represent geometric objects and algorithms for manipulating those data structures. Topics include range searching, polygon triangulation, convex hulls, motion-
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment is limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 650: Advanced Database Management. 3 credits.
Study of the internal architecture of database systems. Topics include: physical data organization and indexing, query processing and optimization, transaction processing, database system architectures, Web services and Web data security. Offered by Computer Science (p. 983). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CS 550<sup>B</sup> or INFS 614<sup>B</sup>). B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 657: Mining Massive Datasets with MapReduce. 3 credits.
Covers the techniques to mine large datasets, including Distributed File Systems and Map-Reduce, similarity search, and data stream processing. Covers classic problems in data mining, such as clustering, association rule mining, and others from the point of view of scalability. Includes a final project to exercise concepts covered in class. Offered by Computer Science (p. 983). May not be repeated for credit. Equivalent to CS 757.

Registration Restrictions:
Required Prerequisite: CS 584<sup>B</sup>.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 658: Networked Virtual Environments. 3 credits.
Networked virtual environment overview, networking and multimedia concepts, virtual simulation concepts, efficiency/performance issues, and online conferencing/virtual classrooms. Course is based around a project with multiple segments, each covering one aspect of networked virtual environments, plus a final session where one- or two-person teams create a minimally functional networked virtual environment over the Internet using multicast network software. Lectures available online/recorded. Offered by Computer Science (p. 983). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 555\textsuperscript{B}.
\textsuperscript{B} Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 662: Computer Graphics Game Technologies. 3 credits.
Addresses some graphics game techniques including collision detection, levels of detail, physics-based simulations, textures, maps, and shadows. Offered by Computer Science (p. 983). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 551\textsuperscript{B}.
\textsuperscript{B} Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 667: Biometrics and Identity Management. 3 credits.
Basic principles and methods for automatic authentication of individuals. Technologies include face, fingerprint, and iris recognition; and speaker verification. Additional topics cover multimodal biometrics, system design, performance evaluation, and privacy concerns. Term project required. Offered by Computer Science (p. 983). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 580\textsuperscript{B}.
\textsuperscript{B} Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 672: Computer System Performance Evaluation. 3 credits.
Theory and practice of analytical models of computer systems. Topics include open and closed multiclass queueing networks, single and multiple class Mean Value Analysis, Markov Chains, performance and availability models of Internet data centers, software performance engineering, and e-commerce performance. Offered by Computer Science (p. 983). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 571\textsuperscript{B}.
\textsuperscript{B} Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 674: Data Mining on Multimedia Data. 3 credits.
Covers advanced techniques for managing, searching, and mining of various types of data such as text, web links, images, time series, video, and audio. Issues related to handling such data will be discussed, including feature selection, high dimensional indexing, interactive search and information retrieval, pattern discovery, and scalability. Offered by Computer Science (p. 983). May not be repeated for credit. Equivalent to CS 780.

Registration Restrictions:
Required Prerequisite: CS 584\textsuperscript{B}.
\textsuperscript{B} Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 675: Distributed Systems.** 3 credits.
Issues in design and implementation of distributed systems and applications. Topics include distributed communication paradigms, middleware, coordination and synchronization, distributed transactions, consistency and replication, fault-tolerance and reliability, and peer-to-peer systems. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 571\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 681: Knowledge Engineering.** 3 credits.
Design, construction, and evaluation of software systems that solve problems generally deemed to require human expertise. Topics include modeling expert's knowledge, reasoning based on knowledge and evidence, ontology design and development, rule learning, and knowledge-based maintenance. Programming projects include development of tools or small-scale systems. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 580\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 682: Computer Vision.** 3 credits.
Study of computational models of visual perception and their implementation in computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 580\(^B\) and 583\(^B\)).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 683: Parallel Algorithms.** 3 credits.
Examines design and analysis of parallel algorithms. Material focuses on algorithms for both theoretical and practical models of parallel computation. Considers algorithm design and analysis for PRAM and existing SIMD and MIMD type architectures. Topics include sorting, graph algorithms, numerical algorithms, and computational complexity. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 583\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 684: Graph Algorithms.** 3 credits.
Data structures and analytical techniques to study graph algorithms. Data structures include disjoint sets, heaps, and dynamic trees. Algorithms include minimum spanning trees, shortest path, maximum flow, and graph planarity. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 583\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 685: Autonomous Robotics.** 3 credits.
Reviews developments in intelligent autonomous systems. Studies applications of artificial intelligence, computer vision, and machine learning to robotics. Topics include analysis and design of algorithms and architectures for planning, navigation, sensory data understanding,
sensor fusion, spatial reasoning, motion control, knowledge acquisition, learning concepts and procedures, self-organization, and adaptation to environment. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** CS 580B.

**B-** Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

Concepts and techniques in image processing. Discusses methods for image capture, transformation, enhancement, restoration, and encoding. Students complete projects involving naturally occurring images. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** CS 583B.

**B-** Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

CS 687: *Advanced Artificial Intelligence*. 3 credits.

Explores foundational issues of artificial intelligence, such as roles of knowledge and search, formalization of knowledge and inference, and symbolic versus emergent approaches to intelligence. Studies advanced programming techniques for artificial intelligence, relationship to foundational issues, and important application areas for artificial intelligence. Notes: Major programming project required. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** CS 580B.

**B-** Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

CS 688: *Pattern Recognition*. 3 credits.

Explores statistical pattern recognition and neural networks. Pattern recognition topics include Bayesian classification and decision theory, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, dimensionality reduction, feature extraction and selection, mixture models and EM, and vector quantization and clustering. Neural networks topics include feed-forward networks and back-propagation, self-organization feature maps, and radial basis functions. Emphasizes experimental design, applications, and performance evaluation. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** CS 580B or 584B.

**B-** Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

CS 689: *Planning Motions of Robots and Molecules*. 3 credits.

Covers topics from artificial intelligence, algorithms and databases. Presents algorithms that model and simulate physical and biological systems and focuses on motion-planning algorithms for robotic systems in the presence of obstacles. Simple deterministic and sampling-based approaches to motion planning will be covered, as well as advanced planning methods including planning with kinematics and dynamic constraints. Selected topics include sensor-based motion planning, manipulation planning, assembly planning, planning under uncertainty and robotics-inspired methods to compute functionally-relevant motions of molecular chains. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** CS 583B.

**B-** Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture
**CS 695**: Topics in Computer Science. 3 credits.
Special topics in computer science not occurring in regular computer science sequence. Notes: May be repeated for credit when topics are distinctly different. Offered by Computer Science (p. 983). May be repeated within the term.

**Recommended Prerequisite**: Completion of at least two core courses and permission of the instructor.

**Registration Restrictions**: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type**: Lecture

**CS 697**: Independent Reading and Research. 1-3 credits.
Students may undertake a course of study under supervision of consenting faculty member. Students usually submit written statement of course content and tentative reading list as part of request for approval. Literature review, project report, or other written product usually required. Offered by Computer Science (p. 983). May not be repeated for credit.

**Recommended Prerequisite**: Completion of at least two core courses, and permission of the instructor.

**Registration Restrictions**: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type**: Research

**700 Level Courses**

**CS 700**: Quantitative Methods and Experimental Design in Computer Science. 3 credits.
Integrated treatment of models and practices in experimental computer science. Topics include scientific methods applied to computing, workload characterization, forecasting of performance and quality metrics of systems, uses of analytic and simulation models, design of experiments, interpretation and presentation of experimental results, hypothesis testing, and statistical analyses of data. Involves one or more large-scale projects. Offered by Computer Science (p. 983). May not be repeated for credit.

**Recommended Prerequisite**: Doctoral status and at least two 600-level courses offered by the Computer Science Department.

**Registration Restrictions**: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type**: Lecture

**CS 706**: Concurrent Software Systems. 3 credits.
Topics include concurrent programming languages and constructs, and specification, design, verification, and validation of concurrent programs. Students required to solve concurrent programming problems and check solutions by using verification, testing, and debugging tools. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions**: Required Prerequisite: CS 571[^B^].
[^B^]: Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type**: Lecture

**CS 710**: Scalable Internet Services. 3 credits.
Discusses, from quantitative point of view, characteristics of most important technologies used to support implementation of e-business sites. Includes topics such as hardware and software architectures of e-business sites, authentication, payment services, understanding customer behavior, workload characterization, scalability analysis, and performance prediction. Notes: Term paper and project required. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions**: Required Prerequisites: (CS 555[^B^] and 571[^B^]).
[^B^]: Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type**: Lecture

**CS 752**: Interactive Graphics Software. 3 credits.
Advanced graphics methods and tools. Topics include visualization, modeling, rendering, animation, simulation, virtual reality, graphics software tools, and current research topics. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions**: Required Prerequisites: (CS 551[^B^] and 583[^B^]).
[^B^]: Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
Schedule Type: Lecture

**CS 755: Advanced Computer Networks.** 3 credits.  
Current and emerging issues in advanced computer networks and applications. Topics include software systems associated with packet and cell-switched networking architectures and protocols, high-performance LANs, scheduling and congestion control, mobile networking, multimedia applications, and next generation of Internet. Offered by Computer Science (p. 983). May not be repeated for credit.

*Registration Restrictions:*
*Required Prerequisite:* CS 555\(^B\).

\(^B\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 756: Performance Analysis of Computer Networks.** 3 credits.  
Analytical, measurement, and simulation techniques for modeling and analyzing computer networks. Examines elementary queuing analysis; networks of queues; routing and flow controls; and applications to local and wide area networks, Internet, and emerging networking technologies. A large portion of the course is devoted to projects, normally performed in student teams, who apply the techniques presented. Offered by Computer Science (p. 983). May not be repeated for credit.

*Registration Restrictions:*
*Required Prerequisite:* CS 555\(^B\).

\(^B\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 773: Real-Time Systems Design and Development.** 3 credits.  
Real-time systems and principles supporting design and implementation. Emphasizes fundamental results from real-time scheduling theory and relevance to computer system design. Topics include system design issues for real-time applications involving operating systems, communication networks, databases, and multimedia. Offered by Computer Science (p. 983). May not be repeated for credit.

*Registration Restrictions:*
*Required Prerequisite:* CS 571\(^B\).

\(^B\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

---

**CS 774: Computational Vision.** 3 credits.  
Studies recent advances in development of machine vision algorithms and knowledge-based vision systems. Topics include scalespace, Gabor and wavelet processing; distributed and hierarchical processing using neural networks; motion analysis; active, functional, and selective perception; object and target recognition; expert systems; data fusion; and machine learning. Emphasizes system integration in terms of perception, control, action, and adaptation. Presents applications to robotics, intelligent highways, inspection, forensic, and data compression. Offered by Computer Science (p. 983). May not be repeated for credit.

*Registration Restrictions:*
*Required Prerequisites:* (CS 682\(^B\) and 686\(^B\)).

\(^B\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 775: Advanced Pattern Recognition.** 3 credits.  
Covers statistical pattern recognition, neural network, and statistical learning theory approaches. Topics include decision theory and Bayes’ theorem, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, SVM and kernel methods, SRM and model selection, performance evaluation, mixture of experts (AdaBoost), dimensionality reduction, feature selection and extraction, and clustering. Emphasizes experimental design, applications, and performance evaluation. Offered by Computer Science (p. 983). May not be repeated for credit.

*Registration Restrictions:*
*Required Prerequisite:* CS 688\(^B\).

\(^B\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**CS 777: Human-Computer Intelligent Interaction.** 3 credits.  
Current and emerging issues in human-computer intelligent interaction, and human-centered systems and their applications. Topics include video processing, visualization, virtual environments, adaptation and tutoring, image and scene modeling, analysis and synthesis, face and gesture recognition, and speech and natural language processing. Notes: Term project and topical review required. Offered by Computer Science (p. 983). May not be repeated for credit.

*Registration Restrictions:*
*Required Prerequisites:* (CS 580\(^B\) and 551\(^B\)) or (CS 682\(^B\)).

\(^B\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 779: Topics in Resilient and Secure Computer Systems. 3 credits.
Covers study of alternate computer security, including how these methods can be combined in a layered defense and factors that affect the selection of the architectures. Reviews recent papers and reports. Offered by Computer Science (p. 983). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CS 571B or ISA 562B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 782: Machine Learning. 3 credits.
Surveys machine learning concerning development of intelligent adaptive systems that are able to improve through learning from input data or from their own problem-solving experience. Topics provide broad coverage of developments in machine learning, including basic learning strategies and multistrategy learning. Offered by Computer Science (p. 983). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CS 681B, 687B or 688B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 787: Decision Guidance Systems. 3 credits.
Decision-guidance systems support an iterative process of giving actionable recommendations to and extracting feedbacks from human decision-makers, with the goal of arriving at the best possible course of action. Focuses on models, languages, algorithms and applications of Decision-Guidance Management Systems, used for fast development of decision-guidance applications. Offered by Computer Science (p. 983). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (INFS 614B or CS 550B).
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 788: Autonomic Computing. 3 credits.
Studies self-managing, self-optimizing, self-configuring, self-tuning, self-healing, and self-protecting computing systems. This course analyzes many examples of autonomic systems as well as various techniques to design and build such systems. This is a doctoral seminar based on reading and analysis of current papers. Offered by Computer Science (p. 983). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CS 555B, 571B or ISA 562B).
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 795: Advanced Topics in CS. 3 credits.
Advanced topics not occurring in regular sequence. Notes: May be repeated for credit when subject differs. Satisfies MS breadth requirement only if explicitly stated in syllabus in given section. Only one such course should be used for breadth requirements. Offered by Computer Science (p. 983). May be repeated within the term.

Recommended Prerequisite: Admission into computer science PhD program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

CS 798: Project Seminar. 3 credits.
Master's degree candidates undertake a project using knowledge gained in M.S program. Notes: Topics chosen in consultation with advisor. Meets project or thesis requirement for MS in computer science. Offered by Computer Science (p. 983). May not be repeated for credit.

Recommended Prerequisite: 18 hours of credit applicable toward the M.S. in computer science.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Thesis

CS 799: Thesis. 1-6 credits.
Original or expository work evaluated by committee of three faculty members. Offered by Computer Science (p. 983). May be repeated within the degree.
**Recommended Prerequisite:** 18 hours of credit applicable toward the M.S. in Computer Science.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Thesis

---

### 800 Level Courses

**CS 80:** *Computer Science Colloquium.* 0 credits.
Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty. Notes: This course introduces PhD students to research topics in computer science. This course can be taken twice for credit. Offered by Computer Science (p. 983). May be repeated within the degree for a maximum 2 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Computer Science.

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Seminar

---

**CS 811:** *Research Topics in Machine Learning and Inference.* 3 credits.
Provides an introduction to key concepts in machine learning and inference. Reviews most known learning and inference systems, discusses strengths and limitations, and suggests most appropriate areas of application. Hands-on experience by experimenting with state-of-the-art learning and inference systems and working on projects tailored to research interests. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 681\(^B\), 687\(^B\) or 688\(^B\)).
\(^B\) Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

---

**CS 818:** *Topics in Computer Systems.* 3 credits.
Topics vary according to faculty interest. Possible topics include computer architecture, computer organization, computer networks, distributed systems, computer security, high-performance computing, and virtualization. Offered by Computer Science (p. 983). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

---

**CS 880:** *Research Topics in Artificial Intelligence.* 3 credits.
Special topics in artificial intelligence not occurring in regular computer science sequence. Notes: Requires substantial student participation. Subject matter may include continuation of existing 600- or 700-level courses in artificial intelligence or other topics. May be repeated for credit when subject matter differs. Offered by Computer Science (p. 983). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

---

**CS 884:** *Advanced Topics in Computer Vision and Robotics.* 3 credits.
Covers recent developments. Topics motivated by applications to autonomous robotic systems, mobile robot navigation, multirobot systems, human-computer-environment interaction, image/video search and analysis, content discovery, and visual surveillance. Topics include 3D structure and motion recovery, motion understanding, map building and localization, object detection and recognition, and target tracking. Projects and experimental evaluation emphasized. Notes: Course may be repeated with change of topic. Offered by Computer Science (p. 983). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
**Required Prerequisites:** (CS 682\(^B\) or 685\(^B\)).
\(^B\) Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

---

**CS 895:** *Research Topics in Artificial Intelligence.* 3 credits.
Special topics in artificial intelligence not occurring in regular computer science sequence. Notes: Requires substantial student participation. Subject matter may include continuation of existing 600- or 700-level courses in artificial intelligence or other topics. May be repeated for credit when subject matter differs. Offered by Computer Science (p. 983). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
**Required Prerequisites:** Doctoral status.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

---

**CS 896:** *Directed Reading and Research.* 1-6 credits.
Reading and research on a specific topic under the direction of a faculty member. Notes: Students can sign up for this class only after passing the CS PhD qualifying exams. Offered by Computer Science (p. 983). May be repeated within the degree for a maximum 18 credits.

**Registration Restrictions:**
**Recommended Prerequisite:** Permission of Instructor.

Enrollment limited to students in the PHD Computer Science program.
Conflict Analysis and Resolution (CONF)

100 Level Courses

CONF 101: Conflict and Our World. 3 credits.
Brief history of field, survey of key conflict resolution themes and theories, and intervention methods. Overview includes general factors of conflict and its resolution; and nature of conflict in interpersonal, group, organizational, and international situations. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Lecture, Recitation

200 Level Courses

CONF 210: Theories of Conflict Analysis and Resolution. 3 credits.
Students will utilize critical thinking and analytical skills to begin an in-depth examination of the major theories of conflict analysis and resolution. Theories and case studies will include root causes and dynamics of conflict and methods of conflict analysis and resolution. Notes: Required course for all CONF majors (BA and BS) beginning Fall 2011. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Schedule Type: Lecture

300 Level Courses

CONF 300: Conflict Resolution Techniques and Practice. 3 credits.
Advanced consideration of CONF 101 topics, introduction of core notion of reflective practice, conflict resolution techniques, practice, third party roles, and ethics. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Schedule Type: Lecture

CONF 301: Research and Inquiry in Conflict Resolution. 3 credits.
Introduces social science research methods at undergraduate level. Covers basic epistemology of social research, including quantitative and qualitative methods, emphasizing participatory action research, and evaluation and assessment work. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Schedule Type: Lecture

CONF 302: Culture, Identity, and Conflict. 3 credits.
Covers deeply rooted, intractable, or protracted social conflicts around core issues of identity, including race, ethnicity, religion, and nationalism. Explores cultural, symbolic, and discursive approaches to identity conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Schedule Type: Lecture

CONF 310: Special Topics in Practice. 1-6 credits.
Examines selected topics related to practice in the field of conflict analysis and resolution. Topics vary, but will address practical skills and knowledge base necessary to conflict resolution practice. Notes: May be repeated if topics vary. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the term for a maximum 6 credits.
Conflicts are global, and understanding the complexities of international violence and conflict is crucial. This document explores various courses that aim to develop a practical understanding of conflict resolution in different contexts.

**CONF 340: Global Conflict Analysis and Resolution**
3 credits.

Covers conflict at the macro level, introducing theories of international and global violence and conflict, drawing from disciplines of international relations, political science, intercultural communication, and conflict resolution. Covers impact of globalization and structural causes of conflict. Uses class discussions, case studies, and final paper to develop analytical skills to help in analysis of conflict. Prepares for further course work for international conflict concentration. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Schedule Type: Lecture

**CONF 341: Simulation in Global Conflict Resolution**
1 credit.

Focuses primarily on global conflict resolution practice. Using the methodologies of dialogue, problem-solving, and intensive simulation, students will increase their theoretical and practical understanding of peace making, peace building, and transformation processes within a specific international case. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree for a maximum 2 credits.

Schedule Type: Laboratory

**CONF 345: Social Dynamics of Terrorism, Security, and Justice**
3 credits.

Presents students with analytical frameworks to account for terrorist acts and organizations and explore social dynamics underlying the development of, and response to, terrorism. Topics may include recruitment into violent groups, counterterrorism and human rights concerns, role of religious and political ideologies in terrorism and counterterrorism, media coverage of terrorism, and effects of terrorism on social structures and processes. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Schedule Type: Lecture

**CONF 346: Counterterrorism and International Security**
1 credit.

Covers complex international political, economic, and military dynamics affecting counterterrorism. Theories and practices related to counterterrorism, intelligence, international relations, and security. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Schedule Type: Lecture

**CONF 370: Internship Field Experience**
1-9 credits.

Internships will provide an opportunity for students to gain practical experience, reflect on those experiences, and apply academic theories outside of the normal classroom environment. Students will apply academic theories learned in the classroom to situations that arise in the work environment. Students must obtain approval and complete an internship proposal application in order to be registered for the course.

Schedule Type: Internship

**CONF 375: Special Programs Field Experience**
1-6 credits.

Learning experience in the application of conflict analysis and resolution (CAR) skills in special program settings. Provides supervised practice in CAR techniques, leadership, program implementation, and strategies to facilitate conflict resolution in educational institutions or community settings. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Fieldwork

**CONF 385: International Field Experience**
3 credits.

Investigates conflict theory through international field experience including participation in formally organized course offered by Center for Global Education or another form of international field experience approved by program director. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: CONF 101 and permission of advisor.
Conf 386: Context and Synthesis: Study Abroad. 1 credit.
Investigate conflict theory through cross cultural experience which includes participation in formally organized semester abroad programs offered by Center for Global Education or another form of international field experience approved by the program director. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree for a maximum 2 credits.

Schedule Type: Seminar

Conf 393: Philosophy, Conflict Theory, and Violence. 3 credits.
Examines causes, sources, and origins of group violence with particular attention to group violence of ethnicity conflict. Explores alternative proposals that explain why violence becomes primary, or at least viable, form of revolving conflict in some societies. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: Conf 101 or permission of instructor.

Schedule Type: Lecture

Conf 394: Human Rights and Inequality. 3 credits.
Examines inequality, social justice, and human rights in an age of globalization. Topics may include international law and order, welfare-and social policy, regionalism and multilateralism, environmental protection, gender equality, terrorist and transnational criminal networks, human trafficking, modern slavery, world poverty, corporate military firms, governance of global financial institutions, security, and transnational social movements. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Schedule Type: Lecture

Conf 397: Study Abroad Special Topics. 1-9 credits.
Transfer credit for relevant coursework taken during direct exchange study abroad trips. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the term for a maximum 12 credits.

Schedule Type: Lecture

Conf 398: Special Topics in Advanced Techniques and Practices. 3 credits.
Examines selected topics relating to conflict resolution techniques and practices. Topics vary but may include mediation, negotiation, reflective practice, and facilitation. Notes: May be repeated if topics vary. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the term for a maximum 9 credits.

Schedule Type: Lecture

Conf 399: Special Topics in Conflict Analysis and Resolution. 3 credits.
Examines selected topics relating to analysis or resolution of conflict. Topics vary but may include historical examination of conflict, social issues stemming from conflict, ethical issues in intervention, globalization, human rights, sources of conflict, or relationship of particular identity domains to conflict. Notes: May be repeated if topics vary. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the term for a maximum 9 credits.

Schedule Type: Lecture

400 Level Courses

Conf 425: Mediating Conflict. 3 credits.
A skill development course connecting conflict resolution theory and practice to the mediation process through lectures, discussion, self-reflection, experiential learning, and role-plays. This course has been approved to meet the 20-hour basic education requirements for mediation certification by the Judicial Council of Virginia and the Office of the Executive Secretary, Supreme Court of Virginia. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Schedule Type: Seminar

Conf 435: Building Peace in Divided Societies. 3 credits.
A major challenge to peacebuilding efforts domestically and globally are the boundaries that communities believe separates themselves from others. The boundaries have ethnic, racial, religious or cultural roots, often with long histories of division and violence. This class will examine case studies and strategies from around the globe of peacebuilding in complex communities. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Schedule Type: Seminar

Conf 485: Service Learning Intensive. 1-9 credits.
Provides students with real-world setting to link conflict theory to resolution practice. Students will engage with grassroots organizations in conflict assessment, resolution process designs, trainings, and project implementation in domestic and international settings. Notes: May require additional fees. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the term for a maximum 12 credits.

Schedule Type: Fieldwork

Conf 490: RS: Integration. 3 credits.
A capstone course in which students reflect on what they have learned, integrating knowledge from course work and synthesizing it to cogent body of knowledge. Includes class discussion and final project that demonstrates understanding of conflict theory and reflective practice. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Mason Core: Synthesis (p. 135)

Specialized Designation: Research/Scholarship Intensive

Registration Restrictions:
Required Prerequisite: Conf 301C.
C Requires minimum grade of C.

Schedule Type: Seminar

Readings and research conducted on individual basis in consultation with instructor. Notes: Student may not present more than 3 credits for graduation credit. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Independent Study

500 Level Courses

Conf 501: Introduction to Conflict Analysis and Resolution. 3 credits.
Prerequisite or corequisite for all MS CONF majors. Introduces field of conflict analysis and resolution. Examines definitions of conflict and diverse views of its "resolution." Explores thinking about human
behavior, and social systems as they relate to origins of conflict and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 502: Intensive Introduction to Conflict Analysis and Resolution. 3 credits.
Introduces field of conflict analysis and resolution. Examines the origins of social conflict, the practices and strategies for responding to conflict, and frameworks for constructive intervention. Considers interpersonal, community, and large-scale intergroup conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 595: Special Topics. 1-3 credits.
Topics vary each semester and are announced each academic year. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the term for a maximum 9 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

600 Level Courses

CONF 600: Foundations of Conflict Analysis and Resolution. 6 credits.
This course offers an integration of theory, research and practice to investigate the inner workings of our field. It includes conflict theories, models and modes of practice that function as the grounding to subsequent courses in the curriculum, and exploration of some of the key contemporary debates. The course includes opportunities for linking theory to practice with experimental learning activities. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 601: Theories of Conflict and Conflict Resolution. 3 credits.
Examines major theories of conflict causation and motivation. Emphasizes need for theories to inform processes of conflict resolution. Weaves together ideas from conventional disciplines with new approaches, especially with regard to causes and methods of resolving deep-rooted conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 610: Conflict Inquiry. 3 credits.
Introduces students to the philosophies behind social science research and the methods for conducting research in the field of conflict resolution. Focuses on the identification of research problems associated with particular conflict situations, selection of appropriate research methods, and the design of effective research projects. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 600.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 611: MS-Research II. 3 credits.
Guides students through design, execution, interpretation, analysis, presentation, and evaluation of field research in conflict and resolution. Builds on CONF 610. Notes: Builds on CONF 610. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 and 610.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 620: *Reflective Practice in Interpersonal-Multiparty Conflicts*. 3 credits.

Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit. Equivalent to CONF 713.

Recommended Corequisite: CONF 501.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Laboratory

CONF 621: *Reflective Practice in Organizational or Community Conflict*. 3 credits.

Moves from conflicts that are simply described to those with multilevel components, such as community and organizational conflicts. Expands skills acquired in CONF 620 by adding recording chronology, identifying roles played by various participants, observing turning points in process, and precisely stating agreed-on solution. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Corequisite: CONF 501 and CONF 620.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Laboratory

CONF 622: *Reflective Practice in International Conflict and Civil Strife*. 3 credits.

Continues study of resolution processes as applied to highly complex systems, especially where one party denies legitimacy of existing political authority. Considers third-party options for intervention in revolutionary and international conflicts, building communication and trust among parties, and implementing agreements. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Corequisite: CONF 501 and CONF 620.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Laboratory

CONF 625: *Engaging Conflict*. 3 credits.

This course will provide students an experiential opportunity to consider the relationship between social science theories and conflict analysis and resolution work; and engagement in a variety of forms with real world conflict. Each course will provide students the opportunity to engage in research and practice activities, choosing the appropriate modalities for the conflict they are engaging with. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: CONF 600.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Fieldwork

CONF 642: *Integration of Theory and Practice*. 3 credits.

Taken in last semester of master's student course work. Assists in developing students' own theories of conflict and conflict resolution by reviewing and integrating prior course work. Students expected to demonstrate holistic comprehension by writing major essay of publishable quality. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501, 601, 610, 713. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.
Enrollment is limited to Graduate or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 643: Practicum: Conflict Analysis and Resolution. 3 credits. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501, 613, 623, 633, and permission of instructor. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 650: Conflict Analysis and Resolution Advanced Skills. 3 credits. Introduces innovative practices and provides structure to reflect on and improve ability to work within conflict settings. Considers the intersection of theory and practice, with special attention to the challenges of translation, adaptation, and transfer of skills and models. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or CONF 502. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 651: Collaborative Community Action & Participatory Governance. 3 credits. Covers designing collaborative processes to work with diverse stakeholders to build meaningful and lasting shared agreements. Considers applications in land use, development, or other community planning contexts. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or CONF 502. Concurrent enrollment is also permitted.

Specialized Designation: Green Leaf Course

CONF 652: Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts. 3 credits. Considers conflict analysis and resolution approaches to designing, implementing, and evaluating holistic cross-sectoral, conflict-sensitive initiatives in areas of potential violence and postconflict reconstruction and stabilization contexts. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or CONF 502. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 653: World Religions, Diplomacy, and Conflict Resolution. 3 credits. Analyzes ways world religions play role in conflicts, war, diplomacy, peacemaking, and conflict resolution. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or CONF 502. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 656: Integrating Complementary Approaches in Conflict Analysis and Resolution. 3 credits. Considers designs and methods for conflict analysis and resolution that integrate multiple approaches, stakeholders, and methods. Applies to
social conflicts in local and international contexts. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or CONF 502. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 657:** Facilitation Skills. 3 credits.
Covers range of skills in group facilitation processes, with emphasis on conflict analysis and resolution approaches to improve group communication. Includes skill-building exercises. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 502. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 658:** Diversity and Difference in Conflict Analysis and Resolution. 3 credits.
Covers elements of cultural diversity, understanding, and awareness, as well as creative ways of approaching issues of diversity, identity, worldviews, and territory. Considers individuals, organizations, communities and nations. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or CONF 502. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution colleges.

**Schedule Type:** Seminar

**CONF 659:** Leadership in Conflict Analysis and Resolution. 3 credits.
Covers roles and styles of leadership in interpersonal, organizational, community, group, and international conflicts. Considers cultural roles of leaders as insider-partialis, negotiators, facilitators, and mediators. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or CONF 502. Concurrent enrollment is also permitted

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 660:** Conflict Assessment and Program Evaluation. 3 credits.
Covers assessment methods appropriate to conflict contexts and related evaluation approaches and techniques for use in areas of peace building, community processes, or interpersonal conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 502. Concurrent enrollment is also permitted

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution colleges.

**Schedule Type:** Seminar

**CONF 665:** Special Topics in Conflict Analysis and Resolution. 3 credits.
In-depth study of contemporary areas of conflict resolution practice. 
Notes: Fulfills elective requirement for certificate program. Topics vary. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** CONF 502, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.
Enrollment limited to students in the Conflict Analysis Resolution college.

**Schedule Type:** Seminar

**CONF 668:** Applied Integration for Graduate Certificates. 3 credits. Capstone course facilitating integration of learning in the graduate certificate programs and appropriate mentored application and experiential learning. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 502; CONF 660; and CONF 650, 651, 652, or 653.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Coll Nursing Health Science or Conflict Analysis Resolution colleges.

**Schedule Type:** Seminar

**CONF 682:** Principles of Environmental Conflict Resolution. 3 credits. Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit. Equivalent to EVPP 682.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** CONF 501 and CONF 502, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree, Undergraduate or Washington Consortium level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 683:** Environmental Conflict Resolution: Situation Assessment, Process Design and Best Practices. 3 credits. Explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit. Equivalent to EVPP 683.

**Recommended Prerequisite:** CONF 682 or EVPP 682, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 684:** Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone. 3 credits. Capstone course for the Graduate Certificate in Environmental Conflict Resolution and Collaboration. Under supervision of the instructor, students will undertake an assessment of an active environmental conflict and recommend a range of processes that promote identified goals for preferred conflict outcomes. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit. Equivalent to EVPP 684.

**Recommended Prerequisite:** CONF 682 or EVPP 682 and CONF 683 or EVPP 683.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 690:** Practicum in Conflict Analysis and Resolution. 3 credits. In-depth field study of ongoing conflict situations, and design and delivery of intervention processes to manage or resolve conflicts. Notes: Two semesters, 3 credits per semester. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** CONF 501 or 801, 713 (714 or 715 recommended but not required) or permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.
Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type: Fieldwork**

**CONF 694: Internship.** 1-6 credits.

Students are expected to mesh theory and practice through observation and experience. Includes comprehensive report analyzing experiences. For 3 credits of internship students must complete 160 hours of work on site. Students must receive permission of the Internship Coordinator prior to registering. Notes: Under direction of internship coordinator, students spend at least 160 hours on project involving study, resolution of conflict for each 3-credit internship. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** 21 credits, including CONF 620.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type: Internship**

**CONF 695: Selected Topics.** 3 credits.

Topics vary; announced each academic year. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:** CONF 501 or 801 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type: Seminar**

**CONF 697: Directed Readings and Research.** 1-3 credits.

Independent reading at master’s level on specific topic related to conflict analysis and resolution, as agreed to by student and faculty member. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type: Research**

**700 Level Courses**

**CONF 702: Peace Studies.** 3 credits.

Examines diverse meanings of peace, conflict, and violence, and then reviews different issues relevant to understanding peace and conflict, including the sources of war, poverty and economic disparities, and ecological degradation. Other topics to be covered are peace keeping, peace building, sustainable development, ecological preservation, nonviolence, and peace movements. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** CONF 501 or 801, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type: Seminar**

**CONF 704: Narrative Approaches to Conflict Analysis.** 3 credits.

This course provides participants with the analytic tools needed to conduct their own research on conflict and conflict resolution, using a narrative perspective. This course enables students to a) review the key narrative research in the field of conflict resolution; b) design a narrative analysis of conflict; c) conduct a narrative analysis of conflicts. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Corequisite:** CONF 501, 801, or permission by instructor.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

**Schedule Type: Seminar**

**CONF 705: Conflict and Discourse Analysis.** 3 credits.

The study of discourse, culture, narratives and public interpretations are becoming ever more important to the field of Conflict Analysis and Resolution. In this class we explore these concepts as they have been used in cutting edge approaches to the analysis and resolution of conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Corequisite:** CONF 501, 801, or permission by instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.
violence, terrorism, revolution, and warfare. Applies insights from study of
applies them to variety of cases: family abuse, religious and ethnic
Considers various theories, causes, and conditions of violence, and

Schedule Type: Seminar
CONF 706: Ethics and Conflict. 3 credits.
Students explore issues and controversies in our field about what is just
and unjust, morally right and wrong, and good and bad. Such issues are
relevant to analysis and practice before, during, after the occurrence of
conflict; the major topics include: validity of pacifism, the notions of a
just war, the challenges of genocide prevention, non-violent resistance,
humanitarian interventions, and human rights activism. Offered by
Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or
Health and Human Services colleges.

Schedule Type: Seminar
CONF 707: Gender and Violence. 3 credits.
This course will address gendered dimensions of violent conflict and
and its transformation. Key themes to be explored include gender and post-
conflict justice and reconciliation; the gendered politics of memory,
speech and representation; militarism and masculinity; sexual violence
and discourses of trauma, victimization and agency; and the ethics and
politics of analytic and practice approaches. Case studies will include the
partition of India/Pakistan; wartime sexual assault in Bosnia/the DRC;
and domestic violence in the U.S. and South Asia. Offered by Conflict
Analysis & Resolution (p. 882). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or
Health and Human Services colleges.

Schedule Type: Seminar
CONF 708: Identity and Conflict. 1-3 credits.
Explores complex interrelations of social identity and postmodern
conflicts in society. Emphasizes the role of identity in processes of
conflict resolution and transformation. Critical rethinking of ethnic,
national, and religious identities as both generators and outcomes of
conflict are an important part of the course. Extends knowledge on
structure and dynamics of identity-based conflicts and develops a
framework for their resolution. Course includes lectures, simulations, and
case studies. Offered by Conflict Analysis & Resolution (p. 882). May not
be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar
CONF 709: War, Violence, and Conflict Resolution. 3 credits.
Considers various theories, causes, and conditions of violence, and
applies them to variety of cases: family abuse, religious and ethnic
violence, terrorism, revolution, and warfare. Applies insights from study of
initiation, escalation, management, resolution, and prevention of violence
to theories about resolving deep rooted conflicts. Offered by Conflict
Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict
Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 720: Ethnic and Cultural Factors in Conflict Resolution. 1-3 credits.
Examines the role culture plays in genesis, structuring, and resolution
of processes of conflict within and between groups. Special attention
to ethnicity and other subcultural markers of identity in complex social
systems as generators and outcomes of conflict. Explores relevance of
variables to success or failure of conflict resolution. Offered by Conflict
Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict
Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 721: Conflict and Race. 3 credits.
Addresses historic analyses of racial and ethnic identity conflicts and
their resolution. Offered by Conflict Analysis & Resolution (p. 882). May
not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801; 720 recommended.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict
Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 722: Conflict and Religion. 3 credits.
Explores role of religious ideas, practices, and organizations in conflict,
war, peace making, and conflict resolution. Offered by Conflict Analysis &
Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict
Analysis Resolution or Health and Human Services colleges.
Students in a Non-Degree Undergraduate degree may enroll.

Enrollment is limited to Graduate or Non-Degree level students.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 723: Conflict and Gender. 3 credits.
Examines constructs of gender and conflict as they relate to critical analysis of theory and practice. Reviews feminist theories for contributions to social and conflict theories. Uses narratives to explore how gender, power dynamics interact in conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 724: Conflict and 'Isms'. 3 credits.
Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801; 720 recommended.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 725: Conflict and Spirituality. 3 credits.
Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 726: Moral and Philosophical Foundations of Conflict. 3 credits.
Explores major historical and contemporary positions on the intellectual, moral, and religious foundations for analyzing and resolving conflict. Enhances critical abilities in metacritique, dialectics, and intellectual self-appropriation. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 727: Ethnographic Methods for Conflict Analysis and Resolution. 3 credits.
Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 728: Human Rights Theory and Practice in Comparative Perspective. 3 credits.
Introduces major controversies and debates surrounding use of human rights theory and practice cross-culturally. After basic study of human rights philosophy, uses case studies from around the world to examine problems and potential of human rights in today's globalized world. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 729: Approaches to Violence. 3 credits.
Explores violence from variety of intellectual and political perspectives. Readings are wide-ranging and interdisciplinary, addressing levels of analysis from biological to nation-state and transnational processes. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar
CONF 730: Structural Sources of Conflict. 3 credits.
Examines how structures and institutions affect behavior and give rise to conflictual relationships at all social levels, from interpersonal to the international. Explores role of conflict resolution as political process.
providing opportunities for nonviolent system change. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 801 and 601 for MS or 803 for PhD.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 731: Conflict in Organizations.** 3 credits.
Explores intersection and dynamics of organizational behavior and dimensions of conflict. Involves theoretical perspectives and cases examining conflict analysis and resolution. Practices strategies for prevention and intervention. Field research in greater metropolitan area integrates course content. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 732: Conflict in Development.** 3 credits.
Examines the relationship between processes of political and economic change and conflict; the relationship between democratization and conflict; the relationship between structural adjustment policies and conflict; and the challenges of postconflict reconstruction. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 733: Law and Justice from a Conflict Perspective.** 1-3 credits.
Contrasts legal processes and institutions with alternative approaches to dispute resolution. Defines and distinguishes among law, "alternative dispute resolution," and problem-solving analysis as methods for resolving rather than controlling conflict. Examines to what extent legal procedures are truly applicable to resolving deep-rooted conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 734: Conflict and Crime.** 3 credits.

**Recommended Prerequisite:** CONF 501 or 801 or Permission of Instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 735: Global Context of Conflict.** 3 credits.
Advances skills and knowledge base in critical analysis and creative problem-solving. Examines root causes of conflict in global context in terms of gender inequality, cultural differences, unequal North and South relations, militarism, economic oppression, genocide, maldevelopment, religious and ethnic struggles, and environmental scarcity. Students develop their own conceptual tool boxes to analyze conflicts in different parts of the world. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 801; 730 recommended.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 736: Globalization and International Conflict.** 3 credits.
Explores economic, political, social, and cultural meanings of globalization; how they affect conflict processes at international level; and when and under what conditions globalization promotes cooperation or conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar
CONF 737: Societies, Globalization and Conflict. 3 credits.
Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 739: Collective Action, Social Movements, and Globalization. 3 credits.
Explores how people translate underlying grievances into collective action. Examines how groups organize, frame, and develop strategies and tactics to pursue agendas, and how processes of globalization have influenced social movement dynamics. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 740: Conflict Roles, Resources, and Ethics. 3 credits.
Analyzes and critiques nature and roles in conflicts. Uses theoretical perspectives, case histories to understand how settings affect roles. Includes ethical assessment of interventions in variety of conflict settings. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801, 713.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 741: Negotiations. 3 credits.
Uses negotiating experiences to construct framework for thinking about and analyzing negotiation processes. Framework then used to organize review of research literature on rhythms and patterns of negotiation and to analyze actual cases. Interweaves exercises, class projects with state-of-the-art concepts and findings. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 742: Environment and Policy. 3 credits.
Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801 or Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 743: Dynamics of Conflict Termination. 3 credits.
Investigates a number of themes relating to war termination with an emphasis on contemporary civil wars. Considers the nature of civil war, focuses attention on a number of contemporary cases, raises questions relating to settlement and series of themes relating to peace implementation and peace building. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 744: Peace Keeping. 3 credits.
Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 745: Leadership Roles in Conflict and Conflict Resolution. 3 credits.
Leadership responses to conflict are affected by several variables, including race, ethnicity, and gender. Explores roles of leadership decision-making styles as agents of conflict across range of conflict scenarios at interpersonal, community, organizational, and international
levels. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 801; 740 recommended.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

CONF 746: *Peace Building*. 3 credits.
Building on initiatives of United Nations and other multilateral organizations, explores dynamics of post-conflict peace building. Prepares students of conflict resolution to play innovative roles in reconstruction of civil societies. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

CONF 747: *Reconciliation*. 3 credits.
Explores processes of acknowledgment, reconciliation, forgiveness, and restitution. Reviews literature, case studies, and other research to assess applicability and impact of these efforts. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

CONF 748: *Comparative Peace Processes*. 3 credits.
Compares case studies drawn from actual peace processes, both successful and unsuccessful, to illuminate principles and complexities. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, 601, 801, 603, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

CONF 749: *World Religions, Violence, and Conflict Resolution*. 1-3 credits.
Examines how world religions play a role in conflict and conflict resolution. Investigates how values, world view, and hermeneutics influence strategies for successful conflict interventions. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

Examination of models and methodologies for evaluation of conflict resolution initiatives. Evaluation approaches taught will include action evaluation, program evaluation, formative evaluation, and summative evaluation. Students will be expected to complete an evaluation design for an actual conflict resolution-related initiative as the major course requirement and participate in the class evaluation project. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 801. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

CONF 751: *Political Economy of Civil War and Peacebuilding I*. 3-6 credits.
The course will cover the latest research, theories, and case analysis on civil wars and peacebuilding, including topics such as: The social, economic, and political institutional origins of conflict; The roles of resources, institutions, and social formations in shaping dynamics of civil war and other related forms of contentious politics; War termination and comparative peace processes; Components and dynamics of peacebuilding and the relationships among peacebuilding, democratization, and state-building; Roles of third parties in promoting negotiations, peace implementation and sustainable peacebuilding and reconciliation. Case studies of contemporary civil wars will be used to illustrate and test these conceptual frameworks. This course is the first in a year-long seminar. Students are required to take the second course in the seminar CONF 752. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 752: Political Economy of Civil War and Peacebuilding II. 3-6 credits.
The course will cover the latest research, theories, and case analysis on civil wars and peacebuilding, including topics such as: The social, economic, and political institutional origins of conflict; The roles of resources, institutions, and social formations in shaping dynamics of civil war and other related forms of contentious politics; War termination and comparative peace processes; Components and dynamics of peacebuilding and the relationships among peacebuilding, democratization, and state-building. Roles of third parties in promoting negotiations, peace implementation and sustainable peacebuilding and reconciliation. Case studies of contemporary civil wars will be used to illustrate and test these conceptual frameworks. This course is the second in a year-long seminar. Students are required to have taken CONF 751 in the previous semester. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 751.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 753: Post-Conflict Contexts: Between Global and Local. 3 credits.
Focuses on the aftermath of violent conflict, attending to issues of structural inequality, memory, narrative, gender, trauma, culture and identity. Critically evaluates theories and practices of transitional justice and post-conflict peacebuilding, including justice, reparation, truth-telling, reconciliation, memorialization and psychosocial repair. Considers forms of social change and governance that emerge through post-conflict interventions, and explores dynamic frictions between globalizing models and local concerns. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 754: Micro-theories of Conflict. 3 credits.
The goal of this course is to explore theoretical approaches to psychological processes, personality, in-group and intergroup dynamics, and social processes in the society as a whole with the emphasis on their role in the processes of conflict resolution and transformation. Critical understanding of psychological and socio-psychological phenomena as both generators and outcomes of conflict will be an important part of the course. This course has three main parts: psychological processes, approaches to person, and group processes and society. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Corequisite: CONF 501.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 755: Transforming Conflict through Insight. 3 credits.
The Insight approach is best understood as an applied human science. Like other applied sciences, it requires students to master an explanatory framework that enables them to frame their questions, formulate their hypotheses, verify their findings, and plan their actions. Thus, the course is designed follow an activity-based, problem-solving approach to learning and using the Insight approach. The objective is to enable students to master the Insight approach by putting it to work, with course meetings build around analytical exercises and activities designed to illuminate assigned readings. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Corequisite: CONF 501.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 756: Addressing Intractable Conflict. 3 credits.
This course is about the biggest problems facing our communities, our nation, and our world today. Our communities, our nations (the US and others), and the world have proven remarkably unable to "solve" any of these problems. Why? We assert it is because they are all underlain by a more fundamental problem the inability to constructively deal with difficult and intractable conflicts. These conflicts prevent us as individuals, organizations, and governments (at all levels) from making wise decisions or taking effective action that will address any of these pressing problems. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Corequisite: CONF 501.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 757: Conflict and Literature. 3 credits.
The purpose of this course is to teach students to read/interpret written and oral texts; explore what imaginative literature can teach us about the causes, motives, dynamics, and possibilities of resolving violent social conflicts; deepen our understanding of the human dimensions of conflicts involving mass movements for social transformation; and
practice creating imaginative works of our own. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Corequisite:** CONF 501.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

**Schedule Type:** Seminar

**CONF 758: Social Dynamics of Terrorism.** 3 credits.

Presents students with analytical frameworks to account for terrorist acts and organizations and explore social dynamics underlying the development of, and response to, terrorism. Topics may include recruitment into violent groups, counterterrorism and human rights concerns, role of religious and political ideologies in terrorism and counterterrorism, media coverage of terrorism, and effects of terrorism on social structures and processes. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Corequisite:** CONF 501 or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 795:** Professional Development Seminars. 1-2 credits.

These 1- and 2-credit courses are scheduled non-conventionally using weekends, concentrated presentations, and intersession periods to develop advanced professional skills. Possible topics include marketing conflict resolution services, academic course design, training design, mediation, facilitation, family practice, fundraising, writing for publication, advanced field research techniques, and grassroots applications of conflict resolution. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** CONF 501 or 801, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 797:** Proposal Development. 1 credit.

Covers development of research proposal for master’s thesis, including framing a question, literature review, and designing appropriate methodology. Students form master’s thesis committee and review Human Subjects Review Board’s guidelines and procedures. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Corequisite:** CONF 501 and 610

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Thesis

**CONF 799:** Thesis. 1-6 credits.

Two semesters, usually taken as 3 credits per semester. Original research or analysis under direction of thesis committee. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Thesis

**800 Level Courses**

**CONF 801:** Introduction to Conflict Analysis and Resolution. 3 credits.

Introduces field of conflict analysis and resolution for doctoral students. Examines definitions of conflict and diverse views of resolution. Explores thinking about human behavior and social systems as they relate to origins and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels. Notes: Prerequisite or corequisite for all PhD CONF students. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students in the PHD Conf Analysis Resolution program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 802:** Theories of the Person. 3 credits.

Understanding human conflict requires knowledge of human behavior, motivation, and perception. Reviews and critically analyzes several psychological theories for application to conflict analysis and resolution theory and practice. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 801. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students in the PHD Conf Analysis Resolution program.

Enrollment is limited to Graduate level students.
Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 803: Structural Theories.** 3 credits.
Understanding social conflict and potential for conflict resolution requires that both conflict and cooperation be perceived in relation to patterns of social change. Reviews and critiques significant theories of social change to establish a basis for creative conflict analysis and resolution. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 801. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students in the PHD Conf Analysis Resolution program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 804: Alternate Theoretical Foundations.** 3 credits.
Familiarizes students with the ideas generated by the Frankfurt School of social theorists and others who have extended or altered these ideas. Students will use these insights to deepen an understanding of serious social conflicts and to explore the implications of critical theories for conflict resolution processes. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Corequisite:** CONF 801.

**Registration Restrictions:**
Enrollment limited to students in the PHD Conf Analysis Resolution program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the Conflict Analysis Resolution college.

**Schedule Type:** Seminar

**CONF 811: Quantitative Foundations.** 3 credits.
Building on logic of inquiry, introduces steps in research process to prepare dissertation and implement published research. Covers wide array of quantitative research approaches in social sciences, with emphasis on conflict analysis. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 711, 801, and 810.

**Registration Restrictions:**
Enrollment limited to students in the PHD Conf Analysis Resolution program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 812: Qualitative Foundations: Social Sciences.** 3 credits.
Continuation of steps in research process to prepare dissertation and implement published research. Builds on CONF 811 by examining qualitative research approaches used in social sciences, with emphasis on conflict analysis. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 711, 801, and 810.

**Registration Restrictions:**
Enrollment limited to students in the PHD Conf Analysis Resolution program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 813: Qualitative Foundations: Humanities.** 3 credits.
Explores qualitative research design as it pertains to the humanities, including the methods and epistemology behind the various issues likely to emerge in the process of conducting research. In addition to material on research design and methodology, reading assignments include several monographs that employ different qualitative methodologies. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

**Recommended Prerequisite:** CONF 801. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students in the PHD Conf Analysis Resolution program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**CONF 820: Reflective Practice in Interpersonal-Multiparty Conflicts.** 3 credits.
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit. Equivalent to CONF 713.

**Recommended Corequisite:** CONF 801.

**Registration Restrictions:**
Enrollment limited to students in the PHD Conf Analysis Resolution program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.
Schedule Type: Laboratory

CONF 821: Reflective Practice in Organizational or Community Conflict. 3 credits.
Moves from conflicts that are simply described to those with multilevel components, such as community and organizational conflicts. Expands skills acquired in CONF 820 by adding recording chronology, identifying roles played by various participants, observing turning points in process, and precisely stating agreed-on solution. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Corequisite: CONF 801 and CONF 820.

Registration Restrictions:
Enrollment limited to students in the PHD Conf Analysis Resolution program.
Enrollment is limited to Graduate level students.
Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Laboratory

CONF 822: Reflective Practice in International Conflict and Civil Strife. 3 credits.
Continues study of resolution processes as applied to highly complex systems, especially where one party denies legitimacy of existing political authority. Considers third-party options for intervention in revolutionary and international conflicts, building communication and trust among parties, and implementing agreements. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Corequisite: CONF 801 and CONF 820.

Registration Restrictions:
Enrollment limited to students in the PHD Conf Analysis Resolution program.
Enrollment is limited to Graduate level students.
Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 900: Integrating Theory, Practice, and Method in Conflict Analysis. 3 credits.
Analyzes theoretical basis undergirding methods of research in conflict resolution. Explores how theory is built through reciprocal influence of research and practice. Assists students to fill in gaps in their knowledge and prepare for comprehensive examinations. Prepares students to write integrated research proposals. Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 801, 802 and at least 9 further credits in the doctoral core program.

Registration Restrictions:
Enrollment limited to students in the PHD Conf Analysis Resolution program.
Enrollment limited to students in a Doctor of Philosophy degree.
Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Research

CONF 901: Theory Development. 3 credits.
Offered by Conflict Analysis & Resolution (p. 882). May not be repeated for credit.

Recommended Prerequisite: CONF 801, 802, or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students in a Doctor of Philosophy degree.
Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

CONF 998: Doctoral Dissertation Proposal. 1-6 credits.
Work on research proposal that forms basis for doctoral dissertation. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree.

Recommended Prerequisite: Successful completion of comprehensive exam.

Registration Restrictions:
Enrollment limited to students in a Doctor of Philosophy degree.
Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Dissertation
CONF 999: Doctoral Dissertation Research. 1-12 credits.
Research on approved dissertation topic under direction of committee. Student's dissertation proposal must be approved before registering for 999. Notes: At least 12 credits of 998 and 999 must be accumulated toward degree. Offered by Conflict Analysis & Resolution (p. 882). May be repeated within the degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Dissertation

Conservation Studies (CONS)

100 Level Courses

CONS 100: Introduction to Field Conservation Ecology. 2 credits.
In this immersive 1-week experience, students will acquire firsthand exposure to fieldwork in conservation and how conservation professionals contribute to survival of species in natural habitats. Through a combination of lectures, discussions, fieldwork and outdoor adventure students will be introduced to major concepts of ecology (including diversity, succession, species interactions, communities, populations and ecosystems) in the context of species and habitat conservation. Offered by Provost's Office (p. 1102). May not be repeated for credit.

Recommended Prerequisite: Participation in the Washington Youth Summit on the Environment.

Schedule Type: Lecture

CONS 110: Special Topics in Conservation. 1-3 credits.
Students acquire first-hand exposure to a specific topic in conservation and how conservation professionals contribute to the long-term survival of species. Through a combination of lectures, discussions, and field/lab work, students explore current questions, methods and applications related to a particular topic in conservation. Course Format: Sections of this Smithsonian-Mason School of Conservation course will be taught as an intensive, mixed-format (lectures, lab exercises, field exercises) offerings, in residential, full-day, 1-3-week sessions held at the 3,200 acre Smithsonian Conservation Biology Institute in Front Royal, VA. Students may also be required to complete pre-course reading assignments, and carry out and submit final projects during (or within six weeks after) the onsite session. Offered by Provost's Office (p. 1102). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Lecture

300 Level Courses

CONS 320: Conservation in Practice. 3 credits.
Work with a conservation mentor in a practicum experience. Create a portfolio documenting professional development. Notes: Must be taken concurrently with CONS 401, CONS 402, CONS 410, and CONS 490 or CONS 403, CONS 404, CONS 411, and CONS 491. Only offered through the Smithsonian-Mason Semester. Offered by Provost's Office (p. 1102). May not be repeated for credit.

Recommended Prerequisite: Junior standing and a college level biological or

Recommended Corequisite: environmental science course. CONS 401, CONS 402, CONS 410, and CONS 490.

Schedule Type: Laboratory, Lecture

CONS 400: Conservation Seminar. 1-3 credits.
Introduces the field of conservation biology and science-based management of threatened wildlife, habitats, and human landscapes. Provides theoretical background for understanding the importance of biodiversity conservation and sustainability. Notes: Must be taken concurrently with CONS 320, CONS 320, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester. Students cannot get credit for this course and Biology 318 or NCLC 401. Offered by Provost's Office (p. 1102). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or equivalent course or INTS 401, and EVPP 301 and 302 or equivalent or permission of instructor.

Schedule Type: Seminar

CONS 401: Conservation Theory. 3 credits.
Introduction to Field Conservation Ecology. A practical scientific approach to the nature of biodiversity and species loss. Students participate in field conservation exercises in a variety of settings, as well as endocrine and reproductive technology labs. Students apply field and laboratory experiences to understanding science's connection to management decision-making for conservation. Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester. Offered by Provost's Office (p. 1102). May not be repeated for credit.

Recommended Prerequisite: Junior standing and a college level biological or

Recommended Corequisite: environmental science course. CONS 320, CONS 401, CONS 410, and CONS 490.

Schedule Type: Laboratory, Lecture

CONS 402: Applied Conservation. 4 credits.
A practical scientific approach to the nature of biodiversity and species loss. Students participate in field conservation exercises in a variety of settings, as well as endocrine and reproductive technology labs. Students apply field and laboratory experiences to understanding science's connection to management decision-making for conservation. Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester. Offered by Provost's Office (p. 1102). May not be repeated for credit.

Recommended Prerequisite: Junior standing and a college level biological or

Recommended Corequisite: environmental science course. CONS 320, CONS 401, CONS 410, and CONS 490.

Schedule Type: Laboratory, Lecture

CONS 403: Ecology and Conservation Theory. 3 credits.
Students learn ecological theories that underlie successful conservation practice. Content includes an in-depth examination of factors that influence the distribution and abundance of organisms within landscapes
Conservation Biology.

**Course Information:**
- **Course Code:** CONS 404
- **Schedule Type:** Lecture
- **Credits:** 3

**Prerequisites:**
- **Recommended Corequisite:** CONS 320, CONS 401, and CONS 490
- **Specialized Designation:** Green Leaf Course

**Course Description:** Focuses on the assessment, monitoring, and conservation of species and habitats as well as the tools for sampling species and habitats and the evaluation of those tools' effectiveness. Students use this practical, hands-on knowledge to prepare a series of reports and recommendations for future work. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Class Information:**
- **Schedule Type:** Laboratory, Lecture

**Specialized Designation:** Green Leaf Course

---

**Course Information:**
- **Course Code:** CONS 405
- **Schedule Type:** Lecture
- **Credits:** 3

**Prerequisites:**
- **Recommended Prerequisite:** BIOL 308 or equivalent course or INTS 401 and EVPP 301 and 302 or equivalent, or permission of instructor.

**Course Description:**
Identify and characterize patterns in landscapes, investigate how they form and change over time, and consider anthropogenic influences. Model populations and communities across landscapes, and consider ways of managing them to achieve goals in managing species and ecosystem processes at local, regional, and continental scales. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Class Information:**
- **Schedule Type:** Laboratory, Lecture

**Specialized Designation:** Green Leaf Course

---

**Course Information:**
- **Course Code:** CONS 406
- **Schedule Type:** Lecture
- **Credits:** 3

**Prerequisites:**
- **Recommended Prerequisite:** BIOL 308 or equivalent course or INTS 401, and EVPP 301 and 302 or equivalent, or permission of instructor.

**Course Description:**
Investigates species vulnerability to extinction and the methodologies of preserving genetic diversity in small populations, both in the wild and in captivity. Teaches modeling and laboratory techniques that promote successful captive breeding, such as hormone analysis and assisted reproductive techniques. Examines captive species in the Smithsonian Conservation Biology Institute to learn husbandry practices and skills from keepers and biologists. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Class Information:**
- **Schedule Type:** Lecture

---

**Course Information:**
- **Course Code:** CONS 410
- **Schedule Type:** Lecture

**Course Description:**
Provides sociological, local and global perspectives on conservation issues including adaptive management, conflict resolution, environmental economics, sustainability, public policy, environmental values and public opinion, and conservation ethics. Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 490. Only offered through the Smithsonian-Mason Semester. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Class Information:**
- **Schedule Type:** Lecture

**Specialized Designation:** Green Leaf Course, Research/Scholarship Intensive

---

**Course Information:**
- **Course Code:** CONS 420
- **Schedule Type:** Lecture
- **Credits:** 3

**Prerequisites:**
- **Recommended Prerequisite:** Admission into the Smithsonian-Mason Monitoring Semester.

**Course Description:**
Covers the impact of human-wildlife conflict on conservation efforts and human health and well-being. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Class Information:**
- **Schedule Type:** Lecture

**Specialized Designation:** Green Leaf Course

---

**Course Information:**
- **Course Code:** CONS 490
- **Schedule Type:** Lecture
- **Credits:** 3

**Prerequisites:**
- **Recommended Prerequisite:** Admission into the Smithsonian-Mason Monitoring Semester.

**Course Description:**
Integrates the course work of the Smithsonian-Mason Semester through study of current conservation issues. Students incorporate interdisciplinary aspects of conservation into a summative group case study on a chosen conservation issue and present formally before a faculty panel. Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 410. Only offered through the Smithsonian-Mason Semester. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Class Information:**
- **Schedule Type:** Lecture

**Specialized Designation:** Green Leaf Course

---

**Course Information:**
- **Course Code:** CONS 411
- **Schedule Type:** Lecture
- **Credits:** 3

**Prerequisites:**
- **Recommended Prerequisite:** Junior standing or permission of instructor.

**Course Description:**
Addresses the need for clear, direct and proactive communication of scientific processes. Students design communication strategies for diverse audiences and learn skills to engage stakeholders in dialogue related to specific conservation issues. Through individual and group activities that emphasize written, visual and oral communications techniques, students learn how the messages can affect people. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Class Information:**

**Specialized Designation:** Green Leaf Course
CONS 491: RS: Conservation Management Planning. 4 credits.
Explores strategies and decisions that help secure the long-term survival of threatened species and habitats. Focuses on the planning tools necessary to define and set conservation goals and quantitatively assess species and areas of conservation value and prioritization. Offered by Provost's Office (p. 1102). May not be repeated for credit.

Mason Core: Encore:Sustainability, Synthesis (p. 135)

Specialized Designation: Green Leaf Course, Research/Scholarship Intensive

Recommended Prerequisite: BIOL 308 or equivalent or INTS 401 and EVPP 301 and 302 or equivalent, or permission of instructor.

Schedule Type: Lecture

CONS 496: Research in Conservation. 5 credits.
One-on-one research experience with a conservation practitioner over 5 weeks (about 36 hours per week) on a conservation research project associated with that practitioner's program. Offered by Provost's Office (p. 1102). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 (or equivalent course) or INTS 401, and EVPP301 and 302 (or equivalent) or permission of instructor.

Schedule Type: Independent Study

CONS 497: Special Topics in Conservation. 1-3 credits.
Topics of current relevance to the field of conservation. Offered by Provost's Office (p. 1102). May be repeated within the degree for a maximum 9 credits.

Schedule Type: Lecture

CONS 498: Internship. 1-3 credits.
Directed readings and final reflective paper or project in conjunction with an internship subject to instructor approval. Permission to enroll must be obtained from the Mason Center for Conservation Studies at least two weeks prior to the start of the semester. Offered by Provost's Office (p. 1102). May be repeated within the degree for a maximum 9 credits.

Schedule Type: Internship

CONS 499: Independent Study/Research. 1-3 credits.
An independent project or directed exploration into an area of conservation not covered by other courses. Offered by Provost's Office (p. 1102). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Permission of instructor.

Schedule Type: Independent Study

600 Level Courses

Teaches students to use spatial ecology, geospatial analysis, and remote sensing tools to assess and model species distribution and habitat use in dynamic landscapes. Includes computer and field labs with examples using data from Smithsonian research. Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program. Offered by Provost's Office (p. 1102). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CONS 625: Statistics for Ecology and Conservation Biology. 3 credits.
Provides an overview of experimental design and analysis techniques used in cutting-edge ecological research and conservation. Focuses on increasing knowledge of statistical tests, interpretation of results, and ability to disseminate and clearly explain these results. Students gain an overview of applied monitoring and analysis techniques such as distance sampling, genetic analysis, niche and species distribution modeling, and spatial analysis. Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program. Offered by Provost's Office (p. 1102). May not be repeated for credit.

Recommended Prerequisite: Basic statistics course

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CONS 630: Species Monitoring & Conservation. 3 credits.
Explores monitoring and conservation research methods and approaches for specific taxa through lectures, case studies, lab exercises, and field work. Focuses on conservation science and conservation outreach techniques. Notes: May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate. Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program. Offered by Provost's Office (p. 1102). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: A general biology (or relevant species-related) course and a statistics course, or permission of instructor. Prior coursework in environmental science, zoology and ecology recommended.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
**Schedule Type:** Lecture

**CONS 635: Non-Invasive Genetic Techniques in Wildlife Conservation.** 2 credits.
Introduces the benefits, drawbacks and applications of non-invasive genetic techniques to wildlife conservation, focuses on answering questions in animal behavior, population biology, and population management, particularly for vertebrate populations; provides hands-on experience relating to all stages of a research project utilizing modern noninvasive methods from sample collection to data analysis and interpretation. Notes: This course is taught as an intensive, mixed-format (lectures, discussions, lab and computer exercises) offering, in a residential, full-day, 1-week session held at the Smithsonian Conservation Biology Institute in Front Royal, VA. Students also complete pre-course reading assignments, and prepare and submit final projects after the intensive onsite session has concluded. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Recommended Prerequisite:** College-level Genetics Course AND College-level Ecology/Evolution Course.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**CONS 640: Adaptive Management for Conservation Success.** 3 credits.
Sound training in adaptive management is essential for conservationists dealing with the challenges of a changing planet. In groups, students develop a management plan for a real-world conservation project using the adaptive management framework of the Open Standards for the Practice of Conservation. Students can extend the techniques to their own work after the course. Notes: This Smithsonian-Mason Conservation Studies Program course is an intensive 2-week fulltime residential session, incorporating lectures, discussions, and student exercises on group projects. This course will be held at the Smithsonian Conservation Biology Institute's 3,200 acre facility in Front Royal, VA, USA. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CONS 645: Estimating Animal Abundance and Occupancy.** 3 credits.
Provides a strong theoretical and analytical background to the current and accepted methods of estimating population parameters including abundance, survival, and population change. The course teaches study design, implementation and analysis of data from distance sampling, mark-recapture, and occupancy modeling techniques, with a strong focus on the practical use of field data in the programs DISTANCE MARK and PRESENCE. Notes: Course Format: This course is taught as an intensive, mixed format (lectures and computer work) offering, in a residential full-day (8:30am-6pm), 2-week session held at the Smithsonian Conservation Biology Institute in Front Royal, VA. Students complete pre-course reading assignments, and are graded in participation, computer exercises and a final exam. Some night sessions occur throughout the two weeks as well. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Recommended Prerequisite:** College-level introductory statistics course.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CONS 660: Effective Conservation Leadership.** 3 credits.
Teaches effective leadership and management through individual assignments and group exercises. Explores international environmental and conservation case studies, offers hands-on experience to help students develop their own leadership styles. Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Recommended Prerequisite:** Students should have a basic background in conservation, ecology, environmental sciences, or similar field.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**CONS 665: Conservation Conflict Resolution.** 3 credits.
Focuses on approaches to cultivating sustainable conservation solutions, including determining root causes of complex conflict dynamics, designing decision-making processes to address conflict, and building mutual respect and trust among stakeholders. Employing principles and strategies developed by the Human-Wildlife Conflict Collaboration (HWCC), students learn how to resolve current conservation conflicts, anticipate arising ones, and reconcile old conflicts that impede new progress. Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student's program. Offered by Provost's Office (p. 1102). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

CONS 697: Special Topics in Conservation. 1-3 credits.
Topics of current relevance to the field of conservation. Notes: May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate. Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program. Offered by Provost’s Office (p. 1102). May be repeated within the degree for a maximum 9 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Counseling and Development (EDCD)

500 Level Courses

EDCD 525: Advanced Human Growth and Development. 3 credits.
Covers human development throughout the life span, including emotional, physical, and cognitive development; and emphasizes personal adjustment and achievement. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCD 525: Advanced Human Growth and Development. 3 credits.
Covers human development throughout the life span, including emotional, physical, and cognitive development; and emphasizes personal adjustment and achievement. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommendations: required.
Recommended Prerequisite: EDCD 602 (may be taken concurrently).

EDCD 601: Introduction to Research in Counseling. 3 credits.
Enhances knowledge of and involvement in counseling research by introducing techniques and principles to design, implement, and evaluate research projects and program development in community and school settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Schedule Type: Lecture

600 Level Courses

EDCD 604: Assessment and Appraisal in Counseling. 3 credits.
Prepares students to become informed about psychological and educational tests and assessment procedures that are used and applied in a counseling context. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Recommended Prerequisite: EDCD 601
Required Prerequisite: EDCD 601

EDCD 601: Introduction to Research in Counseling. 3 credits.
Enhances knowledge of and involvement in counseling research by introducing techniques and principles to design, implement, and evaluate research projects and program development in community and school settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

EDCD 603: Counseling Theories and Practice. 3 credits.
Covers major theoretical approaches to counseling from a multicultural perspective and provides supervised introduction to basic skills. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDCD 602 (may be taken concurrently).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCD 604: Assessment and Appraisal in Counseling. 3 credits.
Prepares students to become informed about psychological and educational tests and assessment procedures that are used and applied in a counseling context. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Recommended Prerequisite: EDCD 601
Required Prerequisite: EDCD 601

EDCD 601: Introduction to Research in Counseling. 3 credits.
Enhances knowledge of and involvement in counseling research by introducing techniques and principles to design, implement, and evaluate research projects and program development in community and school settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

EDCD 603: Counseling Theories and Practice. 3 credits.
Covers major theoretical approaches to counseling from a multicultural perspective and provides supervised introduction to basic skills. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDCD 602 (may be taken concurrently).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

EDCD 604: Assessment and Appraisal in Counseling. 3 credits.
Prepares students to become informed about psychological and educational tests and assessment procedures that are used and applied in a counseling context. Offered by Graduate School of Education (p. 155). May not be repeated for credit.
Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDCD 606: Counseling Children and Adolescents.** 4 credits.

Presents theories, techniques, and counseling issues relevant to children and adolescents. Counseling lab provides practice with an emphasis on process and culturally competent counseling strategies. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 525 and EDCD 603.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**EDCD 608: Group Processes and Analyses.** 4 credits.

Presents theories appropriate to various types of groups and descriptions of group practices, methods, dynamics, and facilitative skills. Focuses on applying theory to practice. Includes lab. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603; and EDCD 606 or EDCD 609.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education, Post-Masters Counseling Lic or Psychology.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**EDCD 609: Advanced Counseling Skills and Strategies.** 4 credits.

Covers counseling skills, process and strategies associated with major counseling theories. Provides intensive practice in both technical and conceptual skills with emphasis on self-awareness, case conceptualization, racial-cultural considerations, and supervised practice in a community setting. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 525 and EDCD 603.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education, Post-Masters Counseling Lic or Psychology.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDCD 610: Career and Educational Counseling.** 3 credits.

Presents theories and counseling issues relevant to career counseling in schools and community agencies. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603, 606 or 609.

**Recommended Corequisite:** EDCD 604.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education, Post-Masters Counseling Lic or Psychology.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDCD 611: Introduction to Ethical and Legal Issues in School Counseling.** 2 credits.

Introduces principles, practices, and application of ethical and legal issues in school counseling. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 626.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDCD 626: Principles and Practices of School Counseling.** 3 credits.

Introduces school counseling program development at K-12 levels. Presents philosophy, principles, and practices of effective school counseling. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 602 (may be taken concurrently).

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCD 628: Counseling and Social Justice.** 3 credits.
Discusses the Counseling and Development program's mission statement of Social Justice, Multiculturalism, Internationalism, Advocacy and Leadership. Provides an overview of theories and models of social justice, advocacy, and leadership. Examines theories and models from a multicultural perspective and discusses within the context of counseling in school and community settings. Examines the role of counselors as change agents, leaders, and advocates. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603, and 626 or 654.

**Recommended Corequisite:** EDCD 660.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCD 654: Counseling, Ethics, and Consultation in Community Agencies.** 3 credits.
Provides a foundation for engaging in counseling, consultation, and ethical decision making within agency settings. Examines the role of the community agency counselor, with attention to multicultural and social justice perspectives. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603 or concurrent enrollment.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCD 652: Introduction to Substance Abuse Counseling.** 3 credits.
Introduces substance abuse counseling. Covers addiction issues, diagnosis and treatment planning, and individual and group counseling strategies with diverse populations. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603 or concurrent enrollment.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCD 656: Diagnosis and Treatment Planning for Mental Health Professionals.** 3 credits.
Introduces students to fundamental concepts in the classification of psychopathology as well as the clinical interviewing skills necessary to apply DSM-5 diagnoses to clients in a sound and ethical manner. Incorporates an explicit focus on the role of race and culture in diagnosis and treatment. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603 (may be taken concurrently).

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCD 658: Couples and Family Counseling.** 3 credits.
Introduces major approaches to counseling couples and families. Uses case studies and simulations to facilitate transition from theory to practice. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 609 (may be taken concurrently).

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCD 660: Multicultural Counseling.** 3 credits.
Examines multicultural issues in counseling and explores the complexities of culture and its influence on the client/counselor relationship. Promotes awareness and understanding of cultural differences and their effect on the counseling relationship. Investigates variables that interact with culture that may interfere with the counseling
relationship, such as historical, political, socioeconomic, psychosocial adjustment, racism, prejudice, discrimination, and oppression. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** EDCD 608<sup>B</sup>.  
<sup>B</sup> Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

### 700 Level Courses

**EDCD 755: Practicum in Counseling.** 3 credits.  
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Notes: Weekly graduate class emphasizes site processing. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Completion of CNDV program course work except for EDCD 610 or electives (total credits cannot exceed 3 credits); overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606/609 and 608; no more than two grades of C in any other graduate course work required by CNDV program; permission of advisor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**EDCD 791: Internship in Counseling.** 3 credits.  
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Builds on previous practicum experiences. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Completion of CNDV program course work except for electives; overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606/609, 608 and 755; no more than two grades of C in any other graduate course work required by CNDV program; permission of advisor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**EDCD 797: Advanced Topics in Education.** 1-6 credits.  
See EDUC 797. Offered by Graduate School of Education (p. 155). May be repeated within the term.

**Registration Restrictions:**
**Required Prerequisite:** EDCD 603<sup>B</sup>.  
<sup>B</sup> Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

### 800 Level Courses

**EDCD 894: Advanced Family and Systems Counseling.** 3 credits.  
Develops advanced level skills and competencies in the practice of family and systems counseling. Multiple theoretical models for practice in a multicultural society will be explored, as will the applications of those models in multiple professional settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD in Counseling and Development Program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDCD 895: Emerging Issues in Counseling and Development.** 3 credits.  
Examines issues in counseling profession, including counseling theory and methodology, development of client groups, new roles and settings for counselors, emerging assessment procedures, new understanding of diagnosis; and impact of societal changes on counseling profession. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the PhD program or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDCD 896: Advanced Multicultural Counseling.** 3 credits.  
Focuses on advanced issues in multicultural counseling, including multicultural counseling theories, skills, assessment, supervision, research, and ethics. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Masters degree in counseling or related counseling field from an accredited institution of higher education and EDCD 660, or equivalent; EDCD 895; admission to Counseling and Development Doctoral Program, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

**EDCD 897: Advanced Group Counseling.** 3 credits. For doctoral students who have had experience and training in group work. Provides greater understanding and advanced skill application in group dynamics, group process, and group leadership. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Masters degree in counseling or related counseling field from an accredited institution of higher education and EDCD 608 or equivalent; EDCD 895; permission to the Counseling and Development Doctoral Program, or Permission of Instructor.

**Registration Restrictions:** Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

**EDCD 898: Grant Writing and Publishing.** 3 credits. Focuses on grant writing and publishing in counseling and psychology. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Masters degree in counseling or related counseling field from an accredited institution of higher education; EDCD 895; admission to the Counseling and Development Doctoral Program, or Permission of Instructor.

**Registration Restrictions:** Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

**EDCD 899: The Theory and Practice of Counseling Supervision.** 4 credits. Explores counseling supervision theory from a multicultural and social justice perspective. Students will apply these theories by supervising Master’s level community agency and school counseling practicum students under the supervision of the instructor. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD in Counseling and Development Program; Master’s degree in Counseling or related field, or permission of the instructor.

**Registration Restrictions:** Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

**EDCD 900: Leadership and Advocacy in the Counseling Profession.** 4 credits. Introduces students to broad theoretical concepts, strategies, and skills related to leadership and advocacy within the counseling profession, and will help students integrate leadership and advocacy into their professional identity. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD in Counseling and Development Program.

**Registration Restrictions:** Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

**EDCD 990: Advanced Internship in Counseling Leadership.** 3 credits. Provides supervised practice in counseling leadership setting or position. Emphasizes counseling leadership in practice. Notes: Biweekly class emphasizes site processing, leadership skills, and topical seminars. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Ph.D. in Education program, Counseling and Development specialization; EDCD 628 or equivalent; EDCD 895.

**Registration Restrictions:** Enrollment is limited to students with a major in Education.

Enrollment is limited to students in a Doctor of Philosophy degree.

Schedule Type: Internship

**EDCD 991: Advanced Internship in Counseling.** 6 credits. Provides an intensive multicultural social justice oriented field based supervised experience. Emphasizes intensive use of multicultural competencies in practice, supervision, and program development and evaluation in order to address social justice issues for clients in school or community settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Ph.D. in Education program, Counseling and Development specialization, EDCD 628 or equivalent, EDCD 895 and EDCD 896.

**Registration Restrictions:**

Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Internship

**EDCD 992: Advanced Internship in Social Justice.** 3 credits. Provides opportunities to implement programs and strategies to affect social justice for clients in school or community settings. Notes: Biweekly class emphasizes topical seminars and supervision. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the PhD in Education program, Counseling and Development specialization; EDCD 628 or equivalent; EDCD 895.

**Registration Restrictions:** Enrollment is limited to students with a major in Education.

Enrollment is limited to students in a Doctor of Philosophy degree.
Criminology (CRIM)

100 Level Courses

CRIM 100: Introduction to Criminal Justice. 3 credits.
Overview of the American system of criminal justice, covering theories of justice, criminal law, policing, courts and associated pre and post-trial legal processes, punishment and corrections, and juvenile justice. Required for all criminology majors and minors. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Required for all criminology majors and minors. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Specialized Designation: Discovery of Scholarship

Schedule Type: Lecture

200 Level Courses

CRIM 210: Introduction to Criminology. 3 credits.
Explores and evaluates how crime is defined and measured, and examines crime patterns and trends. Provides an overview and critical assessment of the major theories of crime causation. Notes: CRIM majors who are concentrating in criminal justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

CRIM 220: Introduction to Law and Society. 3 credits.
Introduces the relationship between law and society. Discusses theoretical perspectives from a number of social science disciplines. Promotes a foundational understanding of the concept of law and the origins, development, and role of law in society, particularly outside of formal legal institutions. Topics covered may include legal mobilization, law and social change, social movements, law and inequality, and law's relationship to social control. Notes: CRIM majors who are concentrating in Law and Society are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

CRIM 230: Introduction to Homeland Security. 3 credits.
Introduces fundamental concepts of homeland security. Examines governmental actions designed to prevent, prepare for, respond to, and recover from man-made and natural disasters. Focuses on efforts to align preparedness, incident management, and emergency response plans from various agencies (federal, state, local, tribal, private sector, and non-governmental). Notes: CRIM majors who are concentrating in homeland security and justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

300 Level Courses

CRIM 301: Public Law and the Judicial Process. 3 credits.
Covers American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit. Equivalent to GOVT 301.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 302: Delinquency. 3 credits.
Examines the significance of juvenile delinquency and societal reactions to it, gender differences in rates and types, historical overview, development of juvenile justice system, and critical assessment of juvenile justice and its alternative. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 304: Computer Crime, Forensics, and Auditing. 3 credits.
Covers computer crime, relevant laws, agencies, standards, auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Hands-on experience with forensics tools. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit. Equivalent to IT 357.

Recommended Prerequisite: IT 103 and 223.

Schedule Type: Lecture

CRIM 305: Crime and Crime Policy. 3 credits.
Examines the development of crime policy, including the influence of crime trends, politics, public opinion, media, criminological theory, and empirical research. Considers the effectiveness of crime policy. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 306: Criminal Justice Ethics. 3 credits.
Analyzes ethical principles relevant for those working in criminal justice. Required for all criminology majors. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 307: Social Inequality, Crime, and Justice. 3 credits.
Explores the significance of social inequality (especially race and gender inequality) for several crime and criminal justice issues. Examines variations in criminal offending and victimization, and explores disparities in criminal justice processing. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture
CRIM 308: Human Rights and Justice. 3 credits.
Studies the norms, laws, and systems for the promotion and protection of human rights. Provides a foundation for understanding historical, legal, political, economic, and ethical aspects of human rights. Examines ideological and cultural perspectives, sources of violations, the United Nations, regional and national mechanisms, special issues (e.g., women, torture, children, minorities), and the role of nongovernmental organizations. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 310: Introduction to the Intelligence Community. 3 credits.
Introduces students to the structure, function, and process of the intelligence community including the basic skills in writing, research, and presentation used in intelligence analysis. Required for all intelligence analysis minors. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Schedule Type: Lecture

CRIM 312: Intelligence Analysis Techniques. 3 credits.
Introduces the key analytical techniques used by entry-level analysts in the Intelligence community. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CRIM 310D.
D Requires minimum grade of D.

Schedule Type: Lecture

CRIM 315: Research Methods and Analysis in Criminology. 3 credits.
Provides an introduction to research design, methods, and analysis in the field of criminology. Students learn to understand, interpret, and critique quantitative and qualitative research approaches, and become intelligent consumers of research. Notes: This course does not meet the College's IT requirements. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit. Equivalent to CRIM 300.

Specialized Designation: Scholarly Inquiry

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

CRIM 320: Crime and Place. 3 credits.
Focuses on the analysis of locations that attract and repel crime, displacement of crime, and identifying and measuring crime concentrations. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

CRIM 325: Hate Crime. 3 credits.
Provides an introductory understanding of the definitions of hate crime; extremist groups and individuals; reporting, investigation, and prosecution of hate crimes; and hate crime policy and legislation. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

CRIM 350: Counterintelligence. 3 credits.
Introduces the legal authority, objectives, and guidelines of the counterintelligence discipline. Covers the investigative, defensive, offensive, and collection activities of the counterintelligence function. Notes: Elective course for the Intelligence Analysis minor. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CRIM 310C.
C Requires minimum grade of C.

Schedule Type: Lecture

400 Level Courses

CRIM 400: Applied Criminal Psychology. 3 credits.
Uses overview of psychological and criminological theories to apply behavioral science theory to practical application in forensic settings. Focuses on analysis of various crime scenes and characteristics of offenders. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Schedule Type: Lecture

CRIM 401: Policing in America. 3 credits.
Fundamental issues relevant to contemporary public policing in America: role and history of police; impact on crime, disorder, and other social problems; discretion and its control; moral hazards; police legitimacy and public support; police culture and the police organization; and community policing. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 402: Punishment and Corrections. 3 credits.
Covers theories on forms of punishment systems; punishment and corrections as a product of historical, cultural, and political changes; differences by race and gender in punishment and corrections; problems of social control and violence in prisons; alternative rehabilitation; and community prevention strategies. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 403: Community Corrections. 3 credits.
Studies the purposes and goals of community-based corrections and its various components, including pretrial diversion, probation, parole, and emerging alternatives to traditional incarceration. Addresses issues related to offenders returning to the community and critical issues facing jails, community corrections, and the management of offenders in community settings. Examines the role of community corrections within the broader correctional system. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture
CRIM 404: Crime Victims and Victimization. 3 credits.
Explores experiences of crime victims, distribution of the risks of victimization, and causes and consequences of victimization. Also considers nature and influence of victim’s rights advocates. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 405: Law and Justice around the World. 3 credits.
Comparative inquiry into the models of legal and justice systems around the world. Considers how social and legal norms are created, and how different societies exercise powers of social control. Evaluates justice models in action, including law and courts, policing, corrections, and juvenile justice. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 406: Family Law and the Justice System. 3 credits.
Introduction to the elements of family law, and exploration of its influence on American social life and contemporary notions of justice. Topics include marriage and parenting, divorce, custody and support, nontraditional families, and domestic violence. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 407: Advanced Topics in Law and Society. 3 credits.
Provides an in-depth examination of the law’s role in social life to deepen students’ appreciation of the law in action. Focuses on scholarly research that describes and explains how legal actors, processes, and institutions operate in the world. Topics include: theories of legal change, law’s relationship to class, gender, and race, and law, culture, and identity. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100 or GOVT 301

Schedule Type: Lecture

CRIM 408: Criminal Courts. 3 credits.
Studies the workings, advantages, and frailties of criminal courts, and explores whether the system works effectively and efficiently. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100 or GOVT 301

Schedule Type: Lecture

CRIM 409: Community Policing. 3 credits.
Study of community policing, particularly in the United States. Covers history and development of community policing, community relations, problem solving, and issues of organizational change. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 410: Criminal Investigations. 3 credits.
Focuses on criminal investigations and the role of the criminal investigator in the criminal justice system. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 411: Innovations in Policing. 3 credits.
New developments in law enforcement’s response to technical, legal, and social change. Examines law enforcement policies and practices in the past and present, and directions for the future. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 422: Controversial Legal Issues. 3 credits.
Focuses on the study of law as an institution that continuously interacts with other social institutions at the individual, community, state, and federal levels. Examines how constitutional and statutory laws are interpreted by the courts to determine and define the law through contemporary, controversial, legal issues. Explores how the courts, using the law, resolve today’s most controversial issues. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 423: Constitutional Law: Civil Rights and Liberties. 3 credits.
Studies First Amendment freedoms of speech, press, assembly, association, and religion; the right to privacy; and Fourteenth Amendment right to equal protection. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit. Equivalent to GOVT 423.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 424: Constitutional Law: Criminal Process and Rights. 3 credits.
Studies constitutional law pertaining to the rights of the criminally accused from investigation and evidence through attorney, trial, and punishment stages at federal and state levels. Required for all criminology majors. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit. Equivalent to GOVT 424.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 425: Criminal Justice Management. 3 credits.
Explains the management function for current and future criminal justice managers. Emphasizes communication, leadership skills, and organizational development. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: D or higher in CRIM 100

Schedule Type: Lecture
CRIM 430: Criminal Law. 3 credits.
An overview of the definitions and elements of crimes, defense strategies, and the differences in criminal law across states. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

CRIM 460: Surveillance and Privacy in Contemporary Society. 3 credits.
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions conducting surveillance, how they calculate and manage risk, and legal constraints on surveillance activities. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Seminar

CRIM 462: Law Enforcement and Homeland Security. 3 credits.
Examines the effect of 9/11 on law enforcement organizations in the United States and explores the evolving relationship between the military, federal, state, and local law enforcement agencies in the post-9/11 era. Emphasis on understanding the entire framework of homeland security in the United States and the unique issues faced by local law enforcement. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 471: Prevention and Deterrence of Crime. 3 credits.
Theoretical and practical strategies for crime prevention and deterrence. Discusses social, environmental, and mechanical developments, police courts, and correctional elements of law enforcement in terms of current effectiveness and future potential for crime prevention. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit. Equivalent to SOCI 471.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 475: Theory and Politics of Terrorism. 3 credits.
Explores origins of terrorism, tracing development from early states to a modern mode of conflict. Presents national, regional, and global perspectives. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 479: Preparation for Internship. 3 credits.
Preparation for internship in a justice organization or justice-related work activity. Students develop a relationship with a prospective internship sponsor and develop a plan for the internship and the research to be reported. Notes: This course is only open to students majoring in Criminology, Law and Society, and should only be taken by students who intend to complete an internship. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 480: Internship. 6-12 credits.
Application of classroom learning to an applied justice setting. Students maintain daily journals, conduct research, and deliver written and oral reports. Notes: Before enrolling, students must have a plan approved by the instructor. Seminars are held three times during the semester for discussion and oral presentation. Minimum of 45 hours of on-the-job work time required for each credit. Offered by Criminology, Law and Society (p. 321). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: CRIM 100, 306, 315, 479, and approval of department.

Schedule Type: Internship

CRIM 485: Study Abroad. 1-12 credits.
Study Abroad. Course topics, content, and locations vary. Offered by Criminology, Law and Society (p. 321). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

CRIM 490: Special Topics. 1-3 credits.
Recent developments in the field. Notes: Topics vary. May be used to fulfill requirements for different concentrations in the BS in criminology, law, and society depending on the topic. May be repeated when topic is different. Offered by Criminology, Law and Society (p. 321). May be repeated within the term for a maximum 15 credits.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

CRIM 491: Honors Seminar I. 3 credits.
Course includes readings, individual or group projects, and discussion of seminar papers. Notes: First of a two-course sequence; subject varies. May be repeated when topic varies. Offered by Criminology, Law and Society (p. 321). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Research Associated

Recommended Prerequisite: Acceptance to pursue honors in the major.

Schedule Type: Seminar

CRIM 492: RS: Honors Seminar II. 3 credits.
Course includes readings and discussion of seminar papers, leading to a research project under the direction of a faculty member. Notes: Second of a two-course sequence. Subject varies. Oral exam on the research and report may be required. May be repeated when topic varies. Offered by Criminology, Law and Society (p. 321). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: CRIM 491.

Schedule Type: Seminar
CRIM 495: Capstone in Criminology, Law and Society. 3 credits.
Provides an in-depth examination of a historical and contemporary issues facing criminology and law and society scholars. Focuses on the philosophies, practices, and procedures used by individuals and organizations and uses a variety of materials, experiences and resources. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Mason Core: Synthesis (p. 135)

Specialized Designation: Scholarly Inquiry, Writing Intensive in the Major

Recommended Prerequisite: CRIM 100, ENGL 101/ENGH 101; ENGL 302/ENGH 302; COMM 100, or 104; 60 credits.

Schedule Type: Lecture, Recitation

CRIM 498: Research Practicum. 1-3 credits.
Supervised research experience with a professor in a non-classroom setting. Offers students an opportunity to gain valuable research experience and training in research. Students are required to work 45 hours (across the semester) per credit. Notes: Open to majors in CRIM with 60 credits and permission of instructor and department. Offered by Criminology, Law and Society (p. 321). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: CRIM 100 and CRIM 315.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Criminology, Law and Society.

Schedule Type: Independent Study

CRIM 499: Independent Study. 1-3 credits.
Reading and research on a specific topic under the direction of a faculty member. Notes: Open to majors in CRIM with 90 credits and permission of instructor and department. Written report is required; an oral exam or report may also be required. Degree requirements to be fulfilled by a particular independent study determined by student’s advisor. Offered by Criminology, Law and Society (p. 321). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: CRIM 100 and 90 credits.

Schedule Type: Independent Study

500 Level Courses

CRIM 509: Justice Organizations and Processes. 3 credits.
Examines structures, practices, and performance of organizations involved in administration of justice: law enforcement, courts and legal agencies, corrections, regulatory and related agencies, and private organizations. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit. Equivalent to PUAD 509.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 510: Policing in a Democratic Society. 3 credits.
Fundamental issues in policing a democratic society: police mission, subculture, performance measurement, moral hazards, discretion, impact on crime and disorder, legitimacy, community policing, and other reforms. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 511: Evidence-based Crime and Justice Policy. 3 credits.
Examines the role that science and research play in criminal justice agencies, policies and practices. Includes understanding the strengths and limitations of the evidence-based practices framework, reviewing evidence about the effectiveness, fairness, theoretical underpinnings, and efficiency of various policies and practices to deal with crime and justice issues, and understanding how research is translated into policy and practice. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 512: Implementing Crime and Justice Policy. 3 credits.
Introduces students to the art and science behind implementing policies in today's criminal justice organizations. While considering effective, best, and evidence-based practices, students will learn about both processes and outcomes related to adopting, adapting, implementing and sustaining reform in justice agencies. Key concepts include technology transfer, transportability, uptake, diffusion, fidelity, and change. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 513: Leadership in Justice Organizations. 3 credits.
Explores theory and evidence of various approaches to leadership and management as applied in justice organizations. Examples of leadership approaches include, trait, skills, style, contingency, path-goal, transformational, servant, team, and psychodynamic. Practical aspects of coping with the risks of leadership are included. Involves case studies
and student self analysis using diagnostic tools. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CRIM 514: Legal and Ethical Issues in Criminal Justice.** 3 credits.
Legal and ethical issues in the making and administration of criminal justice policy in the United States. Covers the legal framework governing each issue, competing values influencing policies and practice, and the history of legal reforms in the criminal justice system. Recurrent underlying themes are legalized discretion, gender and racial equality, due process, and procedural justice. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CRIM 515: Criminal Justice Research Methods and Data Analysis.** 3 credits.
Methods of scientific inquiry applied to criminal justice issues. Includes formulation of research questions, logic of inquiry, research design, observation, measurement, and introduction to social statistics and applications to criminal justice data analysis. Learn to critique research and present data in agency reports. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

The major principles and approaches of program evaluation applied to crime and justice policies. Presents a conceptual framework for problem evaluation. Explores issues and methods for developing evaluation questions and assessing various aspects of program theory, operation and outcomes. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 515.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CRIM 517: Research Practicum in Justice Policy and Practice.** 3 credits.
Student-initiated research project supervised by instructor. Student will identify a client criminal justice organization or stakeholder group and conduct useful research on an issue of interest to that organization or group, producing a policy-oriented white paper suitable for delivery to the organization or group. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 515, CRIM 516.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

Focuses on understanding legal doctrines that form basis of U.S. constitutional criminal procedural rights and how doctrines develop, why courts rule as they do, and evaluating strengths, weaknesses of rights. For MS Students. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CRIM 523: Law and Social Control.** 3 credits.
Competing conceptions of law, political systems, and social control. Intellectual traditions behind social control, its definitions, and mechanisms for regulating public and private behavior, by both individuals and organizations in society. For MS Students. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**CRIM 541: Conduct of Justice Organizations at the Street Level.** 3 credits.
How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police
officers, prison guards, parole officers, attorneys, and others who interact with the justice system). For MS students. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 544: Corrections. 3 credits.
Covers the social institutions and processes involved in punishment, control, and behavior change. Reviews the consequences of different policies and organizational approaches. For MS students. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 545: Crime Analysis. 3 credits.
History, theory, and techniques of crime analysis and crime mapping. Includes routine activities, pattern, and rational choice theories. Review of data types. Application of crime analysis to crime control tactics, strategies, and administration. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 561: Politics of Crime Policy. 3 credits.
Explores political context of crime policy. Examines influence of public opinion, interest groups, scientific community, and other political forces. In-depth, case-study comparison of several crime policies. For MS students. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 562: Crime and Place. 3 credits.
Examines the concentration of crime at places, including geographic, environmental, and sociological features that attract or repel crime. Discusses theoretical explanations, crime prevention strategies, and the measurement of crime concentrations. For MS students. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 595: Special Topics. 3 credits.
Recent developments in the field or topics not covered by regularly listed courses. The course content varies. For MS students. Offered by Criminology, Law and Society (p. 321). May be repeated within the term for a maximum 9 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

700 Level Courses

CRIM 700: Theories of Justice. 3 credits.
Overview of ancient and modern theories of justice with application to contemporary issues involving justice system, and other social and political institutions. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit. Equivalent to GOVT 726.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 720: Behavior of Law. 3 credits.
Examines development of law and law’s effect on human behavior. Reviews theories of law’s meaning and aims. Examines construction of law and investigates consequences of law and legal decisions. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit. Equivalent to GOVT 728.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Focuses on understanding legal doctrines that form basis of U.S.
constitutional procedural rights and how doctrines develop, why courts
rule as they do, and evaluating strengths, weaknesses of rights. Offered
by Criminology, Law and Society (p. 321). May not be repeated for credit.
Equivalent to GOVT 713.

**Recommended Prerequisite:** CRIM 720 or GOVT 728, or permission of
instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

CRIM 723: *Law and Social Control*. 3 credits.
Competing conceptions of law, political systems, and social control.
Intellectual traditions behind social control, its definitions, and
mechanisms for regulating public and private behavior, by both
individuals and organizations in society. Offered by Criminology, Law and
Society (p. 321). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 720 or GOVT 728, or permission of
instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

CRIM 730: *Courts and Constitutional Law*. 3 credits.
Role, influence, and effects of U.S. courts in creating constitutional
norms and interpreting them. Special attention to First and Fourteenth
Amendments, Commerce Clause. Analyzes leading court cases. Offered
by Criminology, Law and Society (p. 321). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

CRIM 740: *Justice Organization and Administration*. 3 credits.
Examines organization and administration of justice and security
organizations. Covers organization theory and behavior as applied to
justice and security organizations. Offered by Criminology, Law and
Society (p. 321). May not be repeated for credit. Equivalent to PUAD 790.

**Recommended Prerequisite:** CRIM 740 or PUAD790, or permission of
instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

Examines leadership theories, and explores fundamental questions
about leadership in justice and security organizations today. Offered by
Criminology, Law and Society (p. 321). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 740 or GOVT 790, or permission of
instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

Examines challenges of changing justice organizations, how changes
have been successfully and unsuccessfully implemented in the past,
and what change strategies appear to be the most effective. Offered by
Criminology, Law and Society (p. 321). May not be repeated for credit.
Equivalent to PUAD 797.

**Recommended Prerequisite:** CRIM 740 or PUAD790, or permission of
instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

CRIM 744: *Corrections*. 3 credits.
Covers the social institutions and processes involved in punishment,
control, and behavior change. Reviews the consequences of different
policies and organizational approaches. Offered by Criminology, Law and
Society (p. 321). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 740.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

Explores relationship between crime policy and empirical evidence
about etiology of crime. Includes crime measurement and trends in
crime over time, effectiveness of various policy interventions. Offered by
Criminology, Law and Society (p. 321). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.
Schedule Type: Seminar

CRIM 761: Politics of Crime Policy. 3 credits.
Explores political context of crime policy. Examines influence of public opinion, interest groups, scientific community, and other political forces. In-depth, case study comparison of several crime policies. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 760/GOVT 792 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 762: Crime and Place. 3 credits.
Examines the concentration of crime at places, including geographic, environmental, and sociological features that attract or repel crime. Discusses theoretical explanations, crime prevention strategies, and the measurement of crime concentrations. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 760.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 764: Sentencing. 3 credits.
Explores theories of punishment and sentencing practices. Examines political, sociological, criminological, and organizational influences on sentencing processes and decisions. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 760.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 780: Research Methods. 3 credits.
Introduces logic and methods of scientific inquiry in justice, law, and crime policy. Includes conceptualization of research questions, observation, measurement, research design, and principles of causality. Evaluation of extant research according to scientific principles. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: Undergraduate course in social science research methods or statistics, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 781: Justice Program Evaluation. 3 credits.
Practical exploration of assessment techniques used in evaluating need for and consequences of justice programs and policies. Design and measurement, interpreting and presenting results. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit. Equivalent to PUAD 791.

Recommended Prerequisite: PUAD 511/612, CRIM 780, or two graduate-level statistics courses; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 782: Statistics I. 3 credits.
Focuses on descriptive and inferential statistical methods and theory with application to problems within the justice field. Explores the logic of inferential statistical methods in general and null hypothesis significance testing in particular. Covers widely used statistical procedures within the applied social sciences. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: An undergraduate social science research methods course or an undergraduate statistics course.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 783: Statistics II. 3 credits.
Focuses on the theory and application of multivariate regression methods as applied within the justice field. Topics include tests for and consequences of violating assumptions of the generalized linear model, dummy coding of categorical variables, testing of interaction effects, logistic regression, ordered and multinominal logit, and missing data analysis. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 782 or a comparable course.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 784: Experimental Criminology. 3 credits.
Discusses the methodological, statistical, ethical, and practical concerns associated with experimental research designs in criminology. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 780.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
CRIM 790: Capstone in Policy and Practice. 3 credits.
Student-initiated research project supervised by instructor. Students must work with a justice organization to conduct useful research and produce a policy-oriented white paper. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Recommended Prerequisite: CRIM 780 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

CRIM 795: Special Topics. 3 credits.
Recent developments in field, or topics not covered by regularly listed courses. Notes: Topics vary. May be repeated when topic is different. Offered by Criminology, Law and Society (p. 321). May be repeated within the term for a maximum 15 credits.

Recommended Prerequisite: Successful completion of 12 graduate level CRIM credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 796: Directed Reading. 1-3 credits.
Independent reading at doctoral level on specific topic related to justice, law, or crime policy as agreed to by student and faculty member and approved by coordinator of CRIM program. Offered by Criminology, Law and Society (p. 321). May be repeated within the term for a maximum 15 credits.

Recommended Prerequisite: Successful completion of 12 graduate level CRIM credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

CRIM 797: Professionalization Seminar. 0 credits.
Introduces doctoral students to research, scholarship and teaching practices in the field to promote their professional development. Notes: Required for Ph.D. students. Offered by Criminology, Law and Society (p. 321). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

CRIM 799: Master's Thesis. 1-6 credits.
Research on approved master's thesis topic under direction of thesis committee with approval of chair. Notes: Minimum 3, maximum 6 credits for doctorate. Maximum of 6 credits of CRIM 799 applicable to masters degree requirements. Offered by Criminology, Law and Society (p. 321). May be repeated within the degree.

Recommended Prerequisite: Submission and approval of thesis proposal.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

900 Level Courses
CRIM 998: Doctoral Dissertation Proposal. 1-6 credits.
Work on a research proposal forming basis for doctoral dissertation. Notes: Minimum 3, maximum 6 credits for doctorate. Maximum of 27 credits of CRIM 998/CRIM 999 applicable to doctoral degree requirements. Offered by Criminology, Law and Society (p. 321). May be repeated within the degree.

Recommended Prerequisite: Students must complete all core analytical course degree requirements.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

CRIM 999: Doctoral Dissertation Research. 1-21 credits.
Doctoral dissertation research and writing under direction of student’s dissertation committee. Notes: Minimum 12, maximum 21 credits for doctorate. Maximum of 27 credits of CRIM 998/CRIM 999 applicable to doctoral degree requirements. Offered by Criminology, Law and Society (p. 321). May be repeated within the degree for a maximum 21 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Cultural Studies (CULT)
300 Level Courses
CULT 320: Globalization and Culture. 3 credits.
Examines cultures in globalization, with special attention to the role of technologies and new media. Provides historical and contemporary contexts for understanding the relationships among circuits of production and consumption; population flows; social inequalities and collective identities; globalizations from “above” and “below;” built and natural environments. Offered by Cultural Studies (p. 506). May not be repeated for credit.

Recommended Prerequisite: GLOA 101 or SOCI 120

Registration Restrictions:
Students with a class of Freshman may not enroll.

Schedule Type: Lecture

CULT 390: Topics in Cultural Studies. 1-3 credits.
Topics of current interest in interdisciplinary cultural studies, covering such fields as media, popular culture, political economy, social identities, or regions in globalization. Notes: May be repeated for credit when topic is different. Offered by Cultural Studies (p. 506). May be repeated within the term for a maximum 9 credits.

Schedule Type: Lecture
800 Level Courses

CULT 802: Histories of Cultural Studies. 3 credits.
Historical survey of principal works and theories in the development of cultural studies. Notes: This course is designed for PhD level students. Students in a related MA program may take this course as the capstone to their MA as they are about to matriculate into the PhD in cultural studies. Offered by Cultural Studies (p. 506). May not be repeated for credit.

Recommended Prerequisite: Admission to doctoral program, related master's degree, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

CULT 804: Histories of Cultural Studies II. 3 credits.
Continues the historical survey of cultural studies up to the present and assesses possibilities for future development. Offered by Cultural Studies (p. 506). May not be repeated for credit.

Recommended Prerequisite: Admission to a PhD program and CULT 802 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

CULT 806: Research Seminar in Cultural Studies. 3 credits.
Introduces research methods in cultural studies. Notes: Specific topics vary. Offered by Cultural Studies (p. 506). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral; completion of CULT 802, CULT 804.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

CULT 808: Student/Faculty Colloquium in Cultural Studies. 1 credit.
Forum for presentation of original and current research in cultural studies. Notes: Students register for 1 credit per semester over a three-semester period. Offered by Cultural Studies (p. 506). May be repeated within the degree for a maximum 4 credits.

Recommended Prerequisite: Admission to doctoral program.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

CULT 810: Culture and Political Economy. 3 credits.
Surveys social science and humanities classics that relate cultural production and consumption to underlying political economic conditions. Includes Marx, Lukacs, Frankfurt School, semiotic neo-Marxism, productivist theories of power indebted to Foucault, Baudrillard, Bourdieu, Harvey, Jameson, Mauss, Mil, Polanyi, Sahlins, A. Smith, and Weber.

Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 506). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

CULT 812: Visual Culture. 3 credits.
Examines theories, production, consumption, and reception of visual culture. Covers film, video, visual arts, music, display, ritual, performance, performativity, and theories of the aesthetic. Includes key readings from theorists such as Adorno, Artaud, Benjamin, Brecht, Bryson, Doane, Fiske, Heath, Marcuse, Merleau-Ponty, and Sartre. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 506). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

CULT 814: Gender and Sexuality. 3 credits.
Investigates notion of gender functions in maintaining and analyzing issues of social and cultural power. Examines conflicting notions of sexuality and their role in cultural signification. Seeks to explicate relationship of sexuality, gender. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 506). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

CULT 816: Science/Technology. 3 credits.
Considers theories and major debates on culture of science, social construction of nature, and effects of technology on modern cultural forms. Includes readings from theorists such as Nietzsche, Heidegger, Horkheimer, Feyerabend, Bahro, Haraway, and Latour. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 506). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**CULT 818: Social Institutions.** 3 credits.
Considers theories of institutional practice and social structures, from Max Weber to Michel Foucault. Covers prisons, bureaucracies, museums, schools, political parties, and social movements. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 506). May not be repeated for credit.

**Recommended Prerequisite:** Admission to a doctoral program, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Cultural Studies. Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**CULT 820: After Colonialism.** 3 credits.
Surveys racial, ethnic, caste, and national identities in colonial contexts; scientific racism in periphery and core sites; subsequent history of race, ethnic, national identities and conflicts; classical and contemporary texts by authors such as DuBois, Fanon, Gilroy, and Spivak; and particular place of issues of national, racial, and ethnic identities in contemporary cultural studies. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 506). May not be repeated for credit.

**Recommended Prerequisite:** Admission to a doctoral program, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Cultural Studies. Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**CULT 860: Special Topics in Cultural Studies.** 3 credits.
Specialized interdisciplinary topics in cultural theory and analysis. Notes: These courses are designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Topics vary. May be repeated for credit when topic is different. Offered by Cultural Studies (p. 506). May be repeated within the term.

**Recommended Prerequisite:** Admission to a doctoral program, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Cultural Studies. Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**CULT 880: Field Concentration.** 3 credits.
Intensive research course, resulting in a Field Statement and oral defense. Notes: Requires permission of field advisor. Offered by Cultural Studies (p. 506). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Admission to cultural studies doctoral program, successful completion of core courses, and an additional 18 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Cultural Studies. Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**CULT 998: Doctoral Dissertation Proposal.** 1-6 credits.
Develop research proposal that forms basis for doctoral dissertation. Notes: A maximum of 6 credits may be applied to the degree. Subject to continuous registration requirement. Offered by Cultural Studies (p. 506). May be repeated within the degree for a maximum 24 credits.

**Recommended Prerequisite:** Admission to a PhD program, successful completion of all core courses, or permission of director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy. Enrollment is limited to students with a major in Cultural Studies. Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**CULT 999: Doctoral Dissertation.** 1-12 credits.
Doctoral dissertation research and writing under direction of dissertation committee. Offered by Cultural Studies (p. 506). May be repeated within the degree.

**Recommended Prerequisite:** CULT 998.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy. Enrollment is limited to students with a major in Cultural Studies. Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Curriculum and Instruction (EDCI) 300 Level Courses**

**EDCI 370: Young Adult Literature in Multicultural Settings.** 3 credits.
Examines literary works written for and about young adults, introduces critical issues surrounding teaching of young adult literature in multiculturally diverse schools, and requires reading and review of young
adult literature. Notes: Significant online work is required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Schedule Type:** Lecture

**EDCI 372:** Teaching Mathematics in the Secondary School. 3 credits.
Covers curricula, current issues, and research literature in secondary school mathematics. Emphasis is on developing different styles of teaching. Field experience is required for those seeking initial teacher licensure. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Corequisite:** EDUC 422

**Registration Restrictions:**
Enrollment limited to students with the Undergrad Teacher Licensure attribute.

**400 Level Courses**

**EDCI 469:** Teaching English in Secondary School. 3 credits.
Provides study of advanced methods, materials, content, and organization of English programs in secondary school. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 422. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with the Undergrad Teacher Licensure attribute.

**EDCI 472:** Advanced Methods for Teaching Mathematics in the Secondary School. 3 credits.
Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 372, EDUC 422.

**Registration Restrictions:**
Enrollment limited to students with the Undergrad Teacher Licensure attribute.

**EDCI 473:** Teaching Science in the Secondary School. 3 credits.
Builds fundamental knowledge of science teaching and learning including standards-based curriculum design and research-based teaching strategies. Notes: School-based field experience required for those seeking initial teacher licensure. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Secondary Education Program.

**Recommended Corequisite:** EDCI 470.

**Registration Restrictions:**
Enrollment limited to students with the Undergrad Teacher Licensure attribute.

**EDCI 479:** Advanced Methods of Teaching English in the Secondary School. 3 credits.
Guides students in working effectively with national and local standards for teaching secondary English. Continuation course in methods from EDCI 469. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDCI 669.

**Recommended Prerequisite:** EDCI 469.

**Registration Restrictions:**
Enrollment limited to students with the Undergrad Teacher Licensure attribute.

**EDCI 483:** Advanced Methods of Teaching Science in Secondary School. 3 credits.
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, adapting instruction to needs of diverse learners, and promoting safety. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 473.

**Registration Restrictions:**
Enrollment limited to students with the Undergrad Teacher Licensure attribute.

**EDCI 490:** Student Teaching in Education. 6 credits.
Provides intensive, supervised clinical experience in approved school for fall or spring semester. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Mason Core:** Synthesis (p. 135)

**Recommended Prerequisite:** Completion of licensure and all endorsement course work.

**Registration Restrictions:**
Enrollment limited to students with the Undergrad Teacher Licensure attribute.

**EDCI 491:** Internship Seminar in Secondary Training. 2 credits.
Focuses on critical reflection regarding effects of teacher actions others; develops skills as reflective practitioner; presents research-based rationales for instructional decision-making. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the professional semester.

**Recommended Corequisite:** EDCI 490.

**Schedule Type:** Seminar

**500 Level Courses**

**EDCI 510:** Linguistics for PreK-12 ESOL Teachers. 3 credits.
Examines language as a system, with particular focus on teaching culturally and linguistically diverse students in grades PreK-12. Considers teaching implications of phonology, morphology, syntax, semantics, and...
pragmatics. Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 537 and EDRD 515.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in English as a Second Language or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EDCI 516: *Bilingualism and Language Acquisition Research*. 3 credits.
Examines research in first and second language acquisition, including interaction of bilingual person's two languages with application for the classroom. Requires 20 hours of PK-12 classroom fieldwork. Notes: School-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 537 and EDRD 515. May be taken concurrently with EDRD 515.

**Recommended Corequisite:** EDCI 560.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EDCI 519: *Methods of Teaching Culturally & Linguistically Diverse Learners*. 3 credits.
Examines approaches, methods, and techniques for teaching culturally &linguistically diverse learners in bilingual & ESL classrooms, as well as resources available in the field. Critically analyzes and demonstrates teaching approaches based on second language acquisition research, including teaching language through content. Requires 20 hours of PK-12 classroom fieldwork in public schools. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 516, EDCI 519.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EDCI 520: *Assessment of Language Learners*. 3 credits.
Examines innovative approaches to assessing language learners. Topics include identification, placement, monitoring of student progress, development of authentic performance-based measures, design of portfolios, application of measurement concepts, analysis of assessment instruments, and linking assessments to instruction. Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 519 or EDCI 560.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EDCI 521: *Curriculum Development for Language Learners*. 3 credits.
Examines current approaches to curriculum development for second language learners and language minority students. Participants review, evaluate, and develop curricular materials, with emphasis on learner-centered activities, cooperative learning, interdisciplinary and thematic approaches, authentic and problem-based learning, integration of language and content, and linking assessment and instruction. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 516, EDCI 519.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EDCI 544: *Curriculum and Methods of Teaching in Elementary Education*. 3 credits.
Introduction to general methods of teaching in elementary schools focusing on planning, teaching strategies, management, assessment, and differentiation. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Elementary Education graduate program; must be taken in programmatic sequence.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture
EDCI 545: Assessment and Differentiation. 3 credits.
Provides a research-based introduction to differentiated instruction for children in grades PK-6. Emphasis on the assessment of learners and differentiation of instruction to meet the needs of all learners. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission into the Elementary Education graduate program, must be taken in programmatic sequence.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 546: Integrating Technology in Elementary Classrooms: Literacy. 1 credit.
Studies the development and integration of technology in the elementary education literacy curriculum. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission into Elementary Education graduate

Recommended Corequisite: program. EDCI 556.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 547: Integrating Technology in Elementary Classrooms: Mathematics. 1 credit.
Studies the development and integration of technology in the elementary education mathematics curriculum. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission into Elementary Education graduate

Recommended Corequisite: program. EDCI 552.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 548: Integrating Technology in Elementary Classrooms: Social Studies and Fine Arts. 1 credit.
Studies the development and integration in the elementary education social studies and fine arts curriculum. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission into Elementary Education graduate

Recommended Corequisite: program. EDCI 554.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 552: Mathematics Methods for the Elementary Classroom. 1-3 credits.
Introduces methods for teaching all children topics in arithmetic, geometry, algebra, probability, and statistics in elementary grades. Focuses on using manipulatives and technologies to explore mathematics and solve problems. Notes: Requires field experience in public schools. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Admission to the Elementary Education licensure program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 553: Science Methods for the Elementary Classroom. 1-3 credits.
Develops skills and abilities in science teaching methods, applications of technology, safety practices, and creation of integrated science curriculum. Examines science teaching based on contemporary theory, practice, and standards. Notes: Requires field experience in public schools. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Admission to the Elementary Education licensure program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCI 554: Methods of Teaching Social Studies and Integrating Fine Arts in the Elementary Classroom.** 3 credits.
Foci on the design and delivery of standards-based integrated curriculum centered on the social sciences. Includes integration of fine arts and examines the central role of the arts in learning. Notes: School-based field experience required. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Admission into Elementary Education licensure program; must be taken in programmatic sequence.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**EDCI 555: Literacy Teaching and Learning in Diverse Elementary Classrooms I.** 3 credits.
Provides research-based introduction to literacy teaching and learning for younger children. Emphasizes language development; reading and writing processes; emergent literacy; culture, families, and literacy; and literacy integration in the curriculum. Notes: School-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Elementary Education licensure program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**EDCI 556: Literacy Teaching and Learning in Diverse Elementary Classrooms II.** 1-3 credits.
Provides research-based introduction to literacy teaching and learning for older children. Emphasizes literacy and language processes and development; connections among cultures, families, and literacy; and literacy integration in curriculum. Notes: School-based field experience required. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Admission to the Elementary Education Licensure program.

**EDCI 557: Integrating Technology in PreK-6.** 3 credits.
Studies the development and integration of technology in the elementary education curriculum including the use of technology to address the reading needs of diverse students. Notes: School-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Elementary Education licensure program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**EDCI 559: Research and Assessment in Elementary Education.** 3 credits.
Provides teacher candidates an understanding of research paradigms utilizing systematic evidence to improve practice and further skills in assessment of learning outcomes. Emphasizes linking research and practice, making instructional decisions based on systematically collected data. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission into Elementary Education graduate program; capstone course for degree must be taken last in programmatic sequence.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**EDCI 560: Methods of Teaching in Foreign/World Languages.** 3 credits.
Covers approaches, theories, and methods of teaching foreign and second languages, with practical application to classroom. Students demonstrate teaching strategies, develop lesson and unit planning skills, and evaluate curricula and materials. Notes: Requires field experience in
schools. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Corequisite:** EDCI 516.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

Provides teacher candidates an introduction to methods, frameworks, and practices of teaching social studies in secondary schools. Notes: Requires 15 hours of school-based field experience. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 522. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduation Deadline Extended, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Provides study of advanced methods, materials, content, and organization of English programs in secondary school. Notes: 15 hours school-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 522. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 570: *Teaching Young Adult Literacy in a Multicultural Setting.* 3 credits.
Examines literary works written for and about young adults. Introduces critical issues surrounding teaching young adult literature in multiculturally diverse public schools and requires reading and reviewing young adult literature from several genres. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Emphasizes developing different styles of teaching. Notes: 15 hours school-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 522. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Provides study of methods, materials, content, and organization of science programs. Emphasizes curriculum planning, current methodologies, safety, and trends in secondary schools. Notes: 15 hours school-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** EDUC 522. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 597: *Special Topics in Education.* 1-6 credits.
Provides advanced study on selected topic or emerging issue in American or international education. Notes: May be repeated for credit with GSE permission. Offered by Graduate School of Education (p. 155). May be repeated within the degree.

**Recommended Prerequisite:** Admission to program in GSE.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science or Curriculum and Instruction.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

### 600 Level Courses

**EDCI 600: Workshop in Education.** 1-6 credits.
Offers full-time workshops and weekend seminars on selected topics in education and education tour seminars. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**EDCI 603: Trends, Issues, and Research in Early Childhood Education.** 3 credits.
Examines trends, issues, research findings, and resulting program development. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDUC 895.

**Recommended Prerequisite:** Admission to GSED.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCI 614: Curriculum and Assessment in Early Childhood Education I.** 3 credits.
First of two-course sequence addressing current thinking about curriculum and assessment in programs for preschool through third grade. Gives overview of effective ways to plan and implement integrated curriculum; special focus on content, subject matter. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCI 617: Using Digital and Popular-Culture Media with Grades 4-12.** 3 credits.
Exposes students to recent knowledge on how middle and high school teachers can use digital media and popular culture texts to engage students in subject area learning or literacy development. Focus is on grades 4-12. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to a GSE licensure, Master's, or doctoral program and at least one year of PK-12 teaching experience, completion of EDCI 569, EDCI 567, EDCI 572, EDCI 573, or EDCI 544, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCI 618: Introduction to Gifted and Talented Learners.** 3 credits.
Examines nature and needs of gifted and talented learners. Participants become knowledgeable about characteristics of gifted and talented students, and examine role of culture in manifestation of gifts and talents as well as gifted behaviors in special populations. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to a GSE licensure, Master's, or doctoral program and at least one year of PK-12 teaching experience, completion of EDCI 569, EDCI 567, EDCI 572, EDCI 573, or EDCI 544, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDCI 622: Curriculum Differentiation for Diverse Learners.** 3 credits.
Develops personal and professional rationale for differentiating instruction in mixed-ability classrooms, as well as skills and knowledge of strategies to utilize pre-assessment data and plan for and implement
differentiated instruction. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Edu, Gifted Child Edu, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDCI 623: Models and Strategies for Teaching Gifted Learners.** 3 credits. Provides framework to examine and apply curriculum models and instructional strategies advocated for use with gifted students according to national and state standards that reflect best practices in gifted education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDCI 624: Assessment, Identification, and Evaluation of Gifted Learners.** 3 credits. Examines broad understandings of intelligence and assessment. Provides techniques to identify gifted students. Develops specific understandings of assessment techniques and awareness of the influences of language, culture, ethnicity, gender, and exceptionality on recognition and subsequent identification of giftedness. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDCI 625: Contemporary Issues and Trends in Gifted Education.** 3 credits. Focuses on research, trends, issues, legislation, and litigation concerning gifted and talented children. Provides professionals in gifted education and related fields with knowledge and skills to serve as advocates for gifted-child education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 621, 622, 623, and 624.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDCI 626: Action Research in Gifted Education.** 3 credits. Opportunity to identify and investigate school-based problem and apply inquiry, writing, and research skills to relevant issue or concern in gifted education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Edu, Gifted Child Edu, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDCI 627: Advanced Practicum in Gifted Education.** 3 credits. Intensive supervised clinical experiences for one semester in accredited elementary or secondary school. Students supervised in setting that includes scheduled observations and seminar experiences. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 621, 622, 623, and 624.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Edu, Gifted Child Edu, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science or Curriculum and Instruction.
EDCI 646: **Mathematics Learning and Assessment (K-8)**. 3 credits. Introduces students to learning theories and associated assessment practices specific to mathematics education. Intended for mathematics specialists and teachers interested in problems of learning and assessment across K-8 settings in mathematics education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MEd in Education Leadership, Mathematics Education Leadership concentration

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction or Education Leadership.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

EDCI 645: **Curriculum Development in Mathematics Education**. 3 credits. Analysis, design, and evaluation of school mathematics curricula. Notes: Yearlong seminar for master's-level students in mathematics education leadership cohort program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Mathematics Education Leadership Masters Degree Program or permission of the instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction or Education Leadership.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

EDCI 646: **Mathematics Education Leadership for School Change**. 1-3 credits. Surveys current literature and large-scale studies in mathematics education. Engages students in research, study, and discussion of factors that affect teaching and learning of mathematics in school settings. Notes: Yearlong seminar for master's-level students in mathematics education leadership cohort program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 567 and EDUC 522.
Recommended Corequisite: EDRD 619.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 669: Advanced Methods of Teaching English in the Secondary School. 3 credits.
Continuation course in methods (See EDCI 569). Guides students in working effectively with national and local standards for teaching secondary English. School-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDCI 479.

Recommended Prerequisite: EDCI 569 and EDUC 522.

Recommended Corequisite: EDRD 619.

EDCI 670: Advanced Methods in Science Teaching. 3 credits.
Application of major principles of education and psychology for the improvements of science teaching in secondary schools. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 671: Innovations in Science Teaching. 3 credits.
Focuses on the development and selection of teaching materials that reflect concepts of technology innovation with an emphasis on middle and secondary school science. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

EDCI 672: Advanced Methods of Teaching Mathematics in the Secondary School. 3 credits.
Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment. School-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDCI 572, EDUC 522.

Recommended Corequisite: EDRD 619.

EDCI 673: Advanced Methods of Teaching Science in the Secondary School. 3 credits.
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, and adapting instruction to the needs of diverse learners. School-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDCI 573 and EDUC 522.

EDCI 674: Advanced Methods of Teaching Foreign/Second Languages in PK-12 Schools. 3 credits.
Blends theoretical knowledge and practical application. Provides advanced study of second language pedagogy and teaching trends. Topics include multiple learning styles, alternative forms and assessment, and teaching diverse populations. Notes: Requires school-based field experience. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDCI 560 or permission of instructor.

EDCI 684: Advanced Methods of Teaching Foreign/Second Languages in PK-12 Schools. 3 credits.
Blends theoretical knowledge and practical application. Provides advanced study of second language pedagogy and teaching trends. Topics include multiple learning styles, alternative forms and assessment, and teaching diverse populations. Notes: Requires school-based field experience. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDCI 560 or permission of instructor.

Recommendation Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

700 Level Courses

EDCI 702: Internship in Mathematics Education. 3 credits.
Offers practical experiences and professional challenges for mathematics leaders in authentic educational settings. Activities emphasize school-based and classroom based research and leadership. Develops the skills and abilities of the mathematics leaders to analyze classroom practice, investigate teaching and disseminate information about mathematics education in professional development settings for teachers. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Curriculum and Instruction or Education Leadership.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

EDCI 725: National and International Leadership Issues in Mathematics Education. 3 credits.
Students study research on mathematics teaching and learning, including current issues and trends in mathematics education leadership at national and international levels. Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the Mathematics Education Leadership PhD program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 726: State and Local Leadership Issues in Mathematics Education. 3 credits.
Students study issues and policies that affect mathematics teaching and learning, including current trends in mathematics school reform at state, district, and individual school levels. Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the Mathematics Education Leadership PhD program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

EDCI 772: Consultation & Collaboration in Diverse K-12 Settings. 3 credits.
Focuses on ways in which practicing education professionals collaborate in serving diverse learners and their families. Explores methods for co-planning and co-teaching in the general education classroom and their families. Explores methods for co-planning and co-teaching in the general education classroom and ways for sharing responsibilities for instruction and assessment. Includes ways for dealing with difficult interactions are part of understanding how to implement collaborative and inclusive models of education for diverse learners. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Completion of 12 credits in concentration.

Recommendation Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

EDCI 777: Research to Practice. 3 credits.
Provides culminating experience that synthesizes and applies essential elements of teaching culturally & linguistically diverse and exceptional learners in international contexts. Emphasizes teacher as change agent through critical inquiry into practice. Promotes collaboration among teachers and school professionals to advance achievement of diverse learners. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Completion of all other program requirements.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 784: Capstone Seminar in Early Childhood Education. 3 credits.
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through graduate course work as it applies to early childhood education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the Mathematics Education Leadership PhD program.

Registration Restrictions:
Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science or Curriculum and Instruction.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDCI 790: Internship in Education. 1-6 credits.
Intensive, supervised clinical experience for full semester in accredited school. Students must register for appropriate section. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: EDUC 522, EDUC 672, two methods classes in content area; passing Praxis II and VCLA, completing all endorsements.

Recommended Corequisite: EDCI 791.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

EDCI 791: Internship Seminar in Secondary Teaching. 2 credits.
Focuses on critical reflection regarding effects of teacher actions on others; develops skills as a reflective practitioner; presents research-based rationales for instructional decision-making. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the professional semester.

Recommended Corequisite: EDCI 790.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

EDCI 797: Advanced Topics in Education. 1-6 credits.
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education. Notes: May be repeated for credit with CEHD approval. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

800 Level Courses

EDCI 810: Foundations of Science Education Research. 3 credits.
Explores and analyzes the range of research designs currently utilized by science education researchers. Develops an understanding of the assumptions and frameworks of different types of science education inquiry through an examination of ways of knowing. Examines historical trends that have taken place in science education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Recommended Corequisite: EDUC 800.

Registration Restrictions:
Enrollment is limited to students with a concentration in Science Education Research.

Enrollment limited to students in the PHD Education program.

Enrollment is limited to Graduate level students.

Schedule Type: Internship

EDCI 813: Focused Science Education Research. 3 credits.
Provides an opportunity for students to gain hands-on experience designing and conducting a research study in science education that leads to publication and/or conference presentations. The scholarship embodied in student development to this point in the doctoral program will lead students to work with a science education faculty member of their choice to development and seek to answer a research question of interest. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDCI 810.

Registration Restrictions:
Enrollment is limited to students with a concentration in Science Education Research.

Enrollment limited to students in the PHD Education program.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

EDCI 815: Mathematics Education Research on Teaching and Learning. 3 credits.
Students survey most current research literature in mathematics education and engage in research, study, and discussion of mathematics education research on teaching and learning in school settings. Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the Mathematics Education Leadership Ph.D. program.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Research

EDCI 855: Mathematics Education Curriculum Design and Evaluation. 3 credits.
Students engage in research, analysis, design, and evaluate school mathematics curricula. Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the Mathematics Education Leadership PhD program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

EDCI 857: Preparation and Professional Development of Mathematics Teachers. 3 credits.
Students study attributes of effective professional development in mathematics education, develop expertise in designing and teaching mathematics methods courses, and learn to create and teach professional development experiences for practicing teachers. Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Mathematics Education Leadership PhD program.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

EDCI 858: Mathematics Education Research Design and Evaluation. 3 credits.
Students review methods of research appropriate for mathematics education settings and develop theoretical framework and action plan for conducting research project. Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Mathematics Education Leadership PhD program.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

## Cyber Security Engineering (CYSE)

### 100 Level Courses

**CYSE 101: Introduction to Cyber Security Engineering.** 3 credits.
Provides comprehensive introduction to the principles, applications, and practice of cyber security engineering. Students learn the basic concepts and terminology of cyber security and how cyber security is commonly addressed after the design and implementation phases. Students are introduced to the systems engineering and design processes and learn to integrate and apply cyber security tools and techniques in these processes. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

**CYSE 205: Systems Engineering Principles.** 3 credits.
Introduction to systems engineering with a focus on cyber security engineering. Emphasize development of analytical, technical, management, and teamwork skills through exercises in planning, documentation, presentation, and the creative process of IT engineering design. Analyze case studies involving systems engineering role in cyber security. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**CYSE 211: Operating Systems and Lab.** 3 credits.
Addresses basic issues such as virtual memory, kernel and user mode, system calls, threads, context switches, interrupts, interprocess communication, coordination of concurrent activities. May also address: concurrency, processes and multi-threading, context switching, synchronization, scheduling, and deadlock. Memory management, dynamic memory allocation, address translation. Management of file systems, storage devices, directories, protection, scheduling and crash recovery. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

**CYSE 220: Systems Modeling.** 3 credits.
Introduces modeling of dynamical systems. Formulation of mathematical models from system descriptions, including computer, economic, transportation, electrical power and mechanical systems. Analytical and numerical methods for solving models and studying their behavior. Discrete-time and continuous time systems. Linear and nonlinear systems. Introduction to computer modeling using MATLAB. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** MATH 203C and PHYS 160C.
Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

**CYSE 230: Computer Networking.** 3 credits.
Introduces network concepts; OSI reference model and layering; data coding; analog/digital communications review; physical layer and data link control; Data Link Layer Control protocols; flow control; error control; link management; common link protocols. LAN and WAN; connection-oriented and connectionless packet switching; circuit-switched networks and control signaling; congestion control and traffic management; transport layer client-server model; domain name systems, routing methods. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Recommended Prerequisite:** CS 112.

**Registration Restrictions:**
CS 112.

**Schedule Type:** Laboratory, Lecture

### 200 Level Courses

**CYSE 301: Digital Systems.** 3 credits.
Introduces digital circuits, systems and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, and analog-to-digital converters, and elementary
computer architecture. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts. Equivalent to ECE 301.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

**CYSE 325: Discrete Events Systems Modeling.** 3 credits. Introduces basic modeling of the dynamics of discrete event systems. Both analytical and simulation techniques for the modeling and analysis of such systems are considered. Relevant concepts from discrete mathematics are included and appropriate software tools are used to examine different engineering applications. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
**Required Prerequisite:** STAT 344.  
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

**CYSE 330: Introduction to Network Security.** 3 credits. Introduces cryptography and its applications in networks. Reviews basic firewalls architectures and VPNs. Overview of current network security protocols, security of routing protocols, the DNS, and e-mail security. Discuss threat of attacks that use viruses, worms, rootkits, botnets and countermeasures; distributed denial of service attacks and spam countermeasures. Introduces basic concepts of security of wireless networks. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
**Required Prerequisites:** CYSE 101, CS 222 and CYSE 230.  
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

**400 Level Courses**

**CYSE 411: Secure Software Engineering.** 3 credits.
This course provides a foundation for building secure software by applying security principles to the software development lifecycle. Topics covered include: security in requirements engineering, secure designs, risk analysis, threat modeling, deploying cryptographic algorithms, defensive coding, penetration testing, fuzzing, static analysis, and security assessment. Students will learn the practical skills for developing and testing secure software. Notes: This course may be of interest to students specializing in software aspects of cyber security engineering. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
**Required Prerequisite:** CS 222.  
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Registration Restrictions:
**Required Prerequisites:** CYSE 220, 230 and 301.  
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

**CYSE 424: Embedded and Real Time Systems.** 3 credits. Presents design methodology, principles and practice for the development of real-time embedded systems and their application to robotics, mechatronics, sensing, signal processing, and control. They include automated sensors, switches and PLCs. Topics include system decomposition, multi-tasking, task communication and synchronization, system modeling, time analysis, principles of filter and controller implementation, ‘fuzzy’ engineering, and multimicrocontroller systems. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
**Required Prerequisite:** CYSE 301.  
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

**CYSE 425: Secure RF Communications.** 3 credits.

Registration Restrictions:
**Required Prerequisites:** CYSE 230 and CS 222.  
C Requires minimum grade of C.
Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**CYSE 430: Critical Infrastructure Protection.** 3 credits.
Consists of a four week lecture course followed by ten weekly seminars presented by students. The lecture part provides a description of US Designated Critical Infrastructure Sectors and a corresponding list of federal sector specific agencies (SSAs). Each student selects a sector, develops and presents a seminar talk on critical cyber security issues involved in a given sector. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**CYSE 445: System Security and Resilience.** 3 credits.
Focusses on modeling and evaluation of the engineering systems that are expected to operate in a contested cyber environment. Covers architectures and modeling, uses a variety of techniques, establishing measures of performance that are relevant to the domain of operation, evaluating the security or vulnerability of the system to cyber exploits, and then assessing its resilience. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Recommended Corequisite**: CYSE 450.

**Registration Restrictions:*
Required Prerequisites: CYSE 325^C or 330^C.

C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**CYSE 450: Cyber Vulnerability Lab.** 1 credit.
Lab for CYSE 445. Provides hands-on experience in security issues of network systems. Issues in ethical hacking, penetration testing, forensics and incident handling and response will be discussed. Notes: This is a hands-on lab course, with short lecture introductions. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Recommended Corequisite**: CYSE 445.

**Registration Restrictions:*
Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Laboratory

**CYSE 460: Power Systems and Smart Grid.** 3 credits.
Covers fundamentals of power systems; basics of electricity, electricity generation, economics of supply and demand, and electricity market operations in regulated and deregulated environment. The other part of the course will cover Smart Grid and its impact on the energy industry. Also includes Energy policy modeling and analysis. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**CYSE 461: Power Grid Security.** 3 credits.
Overview of integrating smart grid into the current system. Includes the seven domains (bulk generation, transmission, distribution, customer, operations, markets, and service providers) as well as the electrical and communication interfaces that connect the layers and domains. Focuses on monitoring equipment in the smart grid. Provides an overview of security principles and approaches for applying them to the smart grid. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Registration Restrictions:**
Required Prerequisite: CYSE 460^C.

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**CYSE 462: Mobile Devices and Network Security.** 3 credits.
Embedded security features of hand-held wireless devices. Data link layer encryption and authentication protocols applied in mobile devices. Security factors in the decisions on configuring wireless mobile devices and network infrastructure. Robust cryptography that is needed to attain the highest levels of integrity, authentication, and confidentiality. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**CYSE 465: Transportation Systems Design.** 3 credits.
Discusses common elements and differences among problems that occur securing road, rail, air and sea transportation systems. Covers threats to control systems. Introduces control measures. Discusses past, present and future of in-vehicle and on-road safety systems, and cyber threats to emerging autonomous cars. Analyzes cyber threats to aviation and sea transportation security and available countermeasures. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**CYSE 467: GPS Security.** 3 credits.
Provides background in long-range navigation developments; early global systems; space based systems; GPS and GLONASS systems;
system architecture; spacecraft and earth station characteristics; design concepts of the CA and P GPS signal modes; frequencies, modulation, and other design aspects; clock issues; range and accuracy calculations and limitations; advanced concepts. Explains advanced concepts in global navigation satellite systems. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CYSE 425C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
CYSE 470: Human Factors and Cyber Security Engineering. 3 credits.
This course explores the human factor in cyber security engineering. The focus is on understanding human performance characteristics and limitations, and the various research, design, and evaluation methods needed to address them when engineering secure systems. Topics include, for example, perception, cognition, memory, situation awareness, decision making, stress, automation, and human-computer display and interaction design principles. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CYSE 205C and STAT 344C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
CYSE 475: Cyber Physical Systems. 3 credits.
Introduces cyber physical systems as an integration of physical processes, computation, and networking. Discusses modeling and simulation of cyber physical systems, system design and implementation. Analyze such systems based on abstractions for modeling physical systems and abstractions for modeling data transformations. Covers security issues in cyber physical systems and applications selected from infrastructure, energy, transportation, robotics, manufacturing, and communications domains. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CYSE 330C, 421C and 450C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
CYSE 476: Cryptography and Computer Network Security. 3 credits.
Covers basic concepts of cryptography, types of cryptosystems, implementation of security services, key management, public key certificates, public key infrastructure, e-mail and web security. Discusses modern secret-key ciphers, modes of operation, hash functions, message authentication codes, public key cryptography, and digital signature schemes. Covers cryptographic standards and secure internet protocols. Introduces educational and public domain software implementing modern cryptographic algorithms. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CYSE 101C and 330C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
CYSE 477: Intrusion Detection. 3 credits.
The objective of this course is to provide an in depth introduction to the science and art of intrusion detection. The course covers methodologies, techniques, and tools for monitoring events in computer systems or networks, with the objective of preventing and detecting unwanted process activity and recovering from malicious behavior. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
CYSE 478: Cyber Security Audit and Compliance. 3 credits.
Fundamental concepts of the Cyber Security Compliance and Testing process. This will revolve around defining a control framework, the attendant control objectives and the reporting system for an organization. Covers the process of creating a control structure with goals and objectives, audit a given cyber infrastructure against it, and if found inadequate, establish a systematic remediation procedure. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CYSE 421C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
CYSE 479: Methods of User Authentication. 3 credits.
Discusses limitations of passwords and PINs and introduces alternatives. Covers user authentication based on security tokens and smart cards. Introduces basics of biometric systems, based on information such as fingerprints, facial features, iris, and voice. Discusses the use and security of electronic ID cards and passports. Covers methods of distinguishing human from internet bots over the network, such as CAPTCHA’s. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CYSE 211C, 301C and 330C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
CYSE 480: Malicious Software and Hardware. 3 credits.
Introduces various types of malicious software (malware). Discusses malware analysis using virtual machines, sandboxes, process monitors, packet sniffers, de-obfuscation, etc. Introduces hardware Trojans and other forms of malicious hardware. Discusses prevention techniques at the design, fabrication, and post-fabrication level. Introduces various countermeasures against malicious software and hardware. The course
has a lab with Windows and Android operating systems. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** CYSE 211\(^C\) and 301\(^C\).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

**CYSE 491:** Engineering Senior Seminar. 2 credits.
This course covers a variety of responsibilities of cyber security engineers including: engineering ethics, government policies, laws and regulations affecting cyber security engineering, industry practices, entrepreneurship. Effective technical communications. Incorporates global implications of cyber security engineering. Speakers include faculty, invited guests from industry and government, as well as students. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Corequisite:** CYSE 492.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**CYSE 492:** Senior Advanced Design Project I. 2 credits.
First semester of a two semester capstone course in the Cyber Security Engineering program. Development of a design project by a team of students. Conception of the project and determination of its feasibility. Work includes developing preliminary design and implementation plan. Projects will aim at the integration of the technical material learned in several courses and incorporation of industry input. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Recommended Corequisite:** CYSE 491.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**CYSE 493:** Senior Advanced Design Project II. 3 credits.
Second semester of a two semester capstone course in the Cyber Security Engineering program. Project includes designing a cyber-physical security system, writing required software, assembling hardware if needed, conducting experiments or studies, and testing the complete system. Requires oral and written reports during project and at completion. Offered by Volgenau School of Engineering (p. 953). Limited to two attempts.

**Mason Core:** Capstone (p. 135)

**Registration Restrictions:**
**Required Prerequisite:** CYSE 492\(^C\).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**CYSE 499:** Special Topics in Cyber Security Engineering. 3 credits.
Special Topics in the Cyber Security Engineering area, with different content in different terms. Offered by Volgenau School of Engineering (p. 953). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** 60 credits towards BS in Cyber Security Engineering.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Dance (DANC)**

**100 Level Courses**

**DANC 101:** Dance Appreciation. 3 credits.
Introduces dance as universal human activity, expression of cultural identity, and art form. Survey of global dance includes folk, ceremonial and ritual, trance, court, classical, and theatrical. Offered by School of Dance (p. 802). May not be repeated for credit.

**Mason Core:** Arts (p. 135)

**Schedule Type:** Lecture

**DANC 114:** Rhythmic Analysis and Music Resources for Dance. 3 credits.
Introduces rhythmic structure, notation, and basic forms of music. Offered by School of Dance (p. 802). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Dance.

**Schedule Type:** Lecture

**DANC 118:** World Dance. 3 credits.
Performance of a world dance form through presentation of fundamental techniques, music and culture. Area of concentration may vary to include an array of world dance forms. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 6 credits.

**Mason Core:** Global Understanding (p. 135)

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Studio

**DANC 119:** Dance in Popular Culture: Afro-Latino Dance. 3 credits.
Performance of a popular dance form through presentation of fundamental techniques, music, and culture. Area of concentration may vary to include an array of popular dance forms. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Arts (p. 135)

**Schedule Type:** Studio

**DANC 120:** Special Topics in Dance. 1-3 credits.
Rotating topic. Introduction and exploration of topical studies in dance or related study areas; topic depends on instructor. Notes: May be repeated
if course content differs. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 9 credits.

Schedule Type: Studio

DANC 125: Modern/Contemporary Dance I. 3 credits.
Introduces fundamentals of modern dance technique. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts, Encore:Well-Being (p. 135)

Schedule Type: Studio

DANC 131: Beginning Jazz Technique. 3 credits.
Introduces fundamental elements of jazz technique and vocabulary. Stresses learning vocabulary and movement characteristics of this highly stylized art form. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity. Also introduces jazz improvisation and choreography. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts (p. 135)

Schedule Type: Studio

DANC 145: Ballet I. 3 credits.
Introduces fundamental elements of ballet technique and vocabulary. Stresses learning vocabulary and movement characteristics of this highly stylized art form. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing musicality. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts (p. 135)

Schedule Type: Studio

DANC 150: Dance Improvisation. 3 credits.
Explores movement invention and discovery. Movement explored in relation to other art forms such as literature, painting, sculpture, and architecture; enhancing kinesthetic awareness; sensitivity to others; and the environment. Prerequisite for dance composition and choreography series. Offered by School of Dance (p. 802). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Lecture

DANC 170: Orientation to Dance Production. 1 credit.
Introduces sound, lighting, and stage management elements and terminology as related to dance performance. Intensive workshop setting emphasizes laboratory experience. Offered by School of Dance (p. 802). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Laboratory

DANC 190: First Year Seminar. 0 credits.
Introduction to School of Dance, CVPA, and university resources available to dance majors. Weekly meetings focus on learning about opportunities for involvement in dance, the community, and adjusting academically. Each class addresses a topic to assist dance majors to effectively transition to college life. Offered by School of Dance (p. 802). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Seminar

200 Level Courses

DANC 210: Anatomy and Kinesiology for Dance. 3 credits.
Covers aspects of anatomy and kinesiology that directly apply to correct development of dance technique. Emphasizes exercise corrective and imagery to correct insufficient muscle pattern and reduce stress on the body. Offered by School of Dance (p. 802). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Lecture

DANC 225: Modern/Contemporary Dance II. 3 credits.
Further develops knowledge, skills, and appreciation of modern dance through continued exploration of techniques, aesthetics, and creativity. Continuing the development of anatomical awareness and alignment, technical clarity, and rhythmic sensitivity. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 9 credits.

Mason Core: Arts (p. 135)

Recommended Prerequisite: DANC 125 or permission of instructor.

Schedule Type: Studio

DANC 231: Intermediate Jazz Technique. 3 credits.
Further study of the concepts of jazz dance technique, and in-depth study of 21st century jazz dance forms. Emphasizes furthering anatomical awareness and alignment, developing technical clarity, rhythm and syncopation. Continues exploration of jazz improvisation and choreography. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 12 credits.

Mason Core: Arts (p. 135)

Recommended Prerequisite: DANC 131 or permission of instructor.

Schedule Type: Studio
DANC 245: Ballet II. 3 credits.
Further develops fundamental elements of ballet technique and vocabulary. Stresses increasing vocabulary and movement characteristics of this highly stylized art form. Continuing emphasis on improving anatomical awareness and alignment, increasing strength and flexibility, and developing musically. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 9 credits.

**Mason Core:** Arts (p. 135)

**Recommended Prerequisite:** DANC 145 or permission of instructor.

**Schedule Type:** Studio

DANC 251: Dance Composition I. 3 credits.
Introduces basic principles for composing dance movement. Focuses on simple compositional forms as they apply to solo performer, discussion, analysis, and evaluation of artistic choices. Students maintain video and written journals to document their artistic process. Offered by School of Dance (p. 802). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** DANC 150C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Dance.

**Schedule Type:** Studio

DANC 252: Dance Composition II. 3 credits.
Explores compositional elements in dance as they apply to group forms. Offers continued experience in developing and manipulating movement phrases using a variety of compositional forms. Introduces conducting rehearsals and selecting music. Students discuss, analyze, and evaluate artistic choices in composition using appropriate dance arts vocabulary and terminology, and maintain video and written journals to document artistic process. Offered by School of Dance (p. 802). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (DANC 150C and 251C).
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Dance.

**Schedule Type:** Studio

DANC 270: Dance Production Lab. 1 credit.
Practical experience in stage crew, sound, or lighting of dance productions through rehearsal to public performance for university dance concerts or guest artist programs. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
**Required Prerequisite:** DANC 170C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Dance.

**Schedule Type:** Laboratory

---

### 300 Level Courses

#### DANC 301: What is Dance?. 3 credits.
Explores connections among literature, music, theater, and visual art within aesthetic framework of dance. Examines development and ideals of Western theatrical dance, and historical and social context in which they were created. Method of instruction includes lecture, discussion, and studio experiences. Offered by School of Dance (p. 802). May not be repeated for credit.

**Mason Core:** Arts (p. 135)

**Schedule Type:** Lecture

DANC 318: Global Perspectives: World Dance Forms. 3 credits.
Continued in-depth study of world dance form including technique, music, and culture. Texts, video, performances, music, participatory events, and guest artist presentations. Lecture, studio. Area of concentration varies to include as many cultures as possible. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Global Understanding (p. 135)

**Registration Restrictions:**
**Required Prerequisites:** (DANC 118C or 119C).
C Requires minimum grade of C.

**Schedule Type:** Studio

DANC 324: Introduction to Dance Conditioning. 1-3 credits.
Course involves intensive rehabilitation and conditioning exercises and realignment training geared for the individual dancer. In-depth understanding of injury prevention and neuromuscular re-education are applied to ballet and modern technique classes. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 12 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Dance.

**Schedule Type:** Studio

DANC 325: Modern/Contemporary Dance III. 1-3 credits.
Explores intermediate level of modern dance technique. Emphasizes improving anatomical awareness, increasing strength and flexibility, expanding modern dance vocabulary, and developing flow and dynamic range. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 24 credits.

**Mason Core:** Arts (p. 135)

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Dance.

**Schedule Type:** Studio

DANC 331: Advanced Jazz Dance. 3 credits.
In-depth studio study of 21st century jazz dance forms. Continues concepts and vocabulary introduced in DANC 231, and further emphasizes alignment, technical clarity and virtuosity. Emphasizes mastery of rhythm and syncopation. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Arts (p. 135)
Dance (DANC)

Recommended Prerequisite: DANC 231 or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Studio

DANC 345: Ballet III. 1-3 credits.
Provides continued ballet training for intermediate-level dancer. Emphasizes increasing technical proficiency, improving anatomical awareness, and developing deeper understanding of skills and principles of ballet technique and how they provide foundation to teach and perform. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 24 credits.

Mason Core: Arts (p. 135)

Recommended Prerequisite: Audition.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Studio

DANC 360: Choreography. 3 credits.
Continued choreographic exploration and research, culminating in bringing completed works to production. Offered by School of Dance (p. 802). May not be repeated for credit.

Specialized Designation: Research Associated

Registration Restrictions:
Required Prerequisites: (DANC 150^C, 251^C and 252^C).
^C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Studio

DANC 362: RS: Directed Choreography. 1 credit.
Faculty-guided, individual learning experience where students learn to choreograph a dance work by auditioning dancers, costuming, staging, lighting, selecting musical accompaniment, and composing original movement material. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 6 credits.

Specialized Designation: Research/Scholarship Intensive

Registration Restrictions:
Required Prerequisites: (DANC 150^C, 251^C, 252^C and 360^C).
^C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Studio

DANC 370: Dance Performance. 1 credit.
Practical experience in performance, repertory, and choreography through rehearsal and public performance of university dance concerts or guest artist programs. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Audition.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Studio

DANC 371: Residency Workshop. 1 credit.
Rehearsal and performance of new or restaged dance by guest choreographer in intensive rehearsal setting. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Audition.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Studio

DANC 372: Advanced Dance Production. 1 credit.
Methodology and practice of costume and lighting design, as dictated by specific needs of dance performance. Notes: Taught in series of workshop settings. Offered by School of Dance (p. 802). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (DANC 170^C and 270^C).
^C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Laboratory

DANC 390: Dance History I. 3 credits.
Examines dance as it developed as Western theatrical form from its beginnings in social and folk dance through evolution into ballet. Emphasizes romantic and classical ballet. Also studies American dance forms as they evolved in spectacles, burlesques, minstrelsy, and social dance. All forms of dance placed in social, political, cultural, aesthetic, and historical contexts. Offered by School of Dance (p. 802). May not be repeated for credit.

Mason Core: Arts (p. 135)

Specialized Designation: Writing Intensive in the Major

Schedule Type: Lecture

DANC 391: Dance History II. 3 credits.
Examines revolutions in transformation of 20th-century Western dance into forms and institutions that radically departed from predecessors. Development of contemporary dance carried with it reflections of the influence of technology and media as well as concept of global culture. Renewed interest in traditional dance forms acknowledges power of dance to serve as carrier of cultural and societal values. Dance forms placed in social, political, cultural, aesthetic, and historical contexts. Offered by School of Dance (p. 802). May not be repeated for credit.

Mason Core: Arts (p. 135)

Specialized Designation: Writing Intensive in the Major

Schedule Type: Lecture
DANC 399: Independent Study. 1-3 credits.
Individual research or creative project supervised by faculty member.
Offered by School of Dance (p. 802). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Permission of director of School of Dance.

Schedule Type: Independent Study

400 Level Courses

DANC 410: Introduction to Contemporary Movement Theories. 3 credits.
Introduction to movement theories combining somatic theory with practical application to dance training. Focus on ways somatic practices can deepen perceptual processes and influence movement aesthetics. Theories studied may include: Alexander Technique, Feldenkrais Method, Body-Mind Centering, and Ideokinesis. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 18 credits.

Mason Core: Arts (p. 135)

Registration Restrictions:
Required Prerequisite: DANC 210
C
Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Laboratory, Lecture

DANC 418: Global Dance Intensive. 3 credits.
Intensive investigation of selected dance idiom within cultural and artistic contexts. Course work supplemented by participation in and observation of ambient culture. Analyzes similarities, differences, and common antecedents between selected culture and North American dance idioms. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 6 credits.

Mason Core: Global Understanding (p. 135)

Schedule Type: Lecture

DANC 420: Special Topics in Dance. 1-3 credits.
In-depth presentation and exploration of topical studies in dance or related study areas. Notes: Topic depends on instructor. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: 9 hours of DANC or permission of instructor.

Schedule Type: Studio

DANC 425: Modern/Contemporary Dance IV. 1-3 credits.
Advanced-level exploration of modern dance technique. Emphasizes refining alignment, developing ability to self-correct, and replicating sophisticated movement sequences. Preparation to enter professional field of dance. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 18 credits.

Mason Core: Arts (p. 135)

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Studio

DANC 445: Ballet IV. 1-3 credits.
Provides preprofessional ballet training for advanced-level dancer. Emphasizes attainment of high-quality technical and performance skills, application of anatomical principles, and mastery of sophisticated classical movement sequences. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 18 credits.

Mason Core: Arts (p. 135)

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Studio

DANC 453: Teaching Creative Movement. 3 credits.
Provides theory, methodology, and practicum experience in preparation for teaching creative movement to children K-12, with some application to special populations. Offered by School of Dance (p. 802). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Lecture

DANC 454: Methods of Teaching Dance. 3 credits.
Examines dance pedagogy, focusing on principles needed for teaching sound technique. Students learn skills, methods, and instructional procedures for classroom. Emphasizes curriculum development, proper course sequencing, implementation of teaching strategies, and classroom management techniques. Students study teaching methods appropriate for K-12, gifted and talented, and special-needs students. Intensive practice in implementing these skills includes lab, field-teaching experiences. Offered by School of Dance (p. 802). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Senior.

Enrollment is limited to students with a major in Dance.

Schedule Type: Lecture

DANC 490: Senior Dance Seminar. 3 credits.
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work as it applies to dance, arts education, and professional development. Students develop senior project including written and oral presentation in public forum. Offered by School of Dance (p. 802). May not be repeated for credit.

Mason Core: Synthesis (p. 135)

Registration Restrictions:
Enrollment limited to students with a class of Senior.

Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Seminar

500 Level Courses

DANC 501: Graduate Dance Seminar. 1-3 credits.
Presentation and discussion of current issues in dance specific to education, research, and professional development in the field. Offered
by School of Dance (p. 802). May be repeated within the degree for a maximum credits.

**Recommended Prerequisite:** Admission to MFA in Dance program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**DANC 510: Contemporary Movement Theories.** 3 credits.  
In-depth study of movement theories combining somatic theory with practical application to dance training. Focus is on ways somatic practices can deepen perceptual processes and influence movement aesthetics. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**DANC 520: Special Topics in Dance.** 1-3 credits.  
In-depth presentation and exploration of topical studies in dance and/or related study areas. Notes: Topic depends on instructor. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**DANC 525: Advanced Modern Dance.** 1-3 credits.  
Advanced study of modern technique, emphasizing sophisticated technical ability and performance skills, includes comparison of pedagogical perspectives. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 18 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**DANC 545: Advanced Ballet.** 1-3 credits.  
Advanced study of ballet technique with an emphasis on high technical ability, performance skills and ballet vocabulary, includes comparison of pedagogical perspectives. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 18 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**DANC 560: Advanced Choreography.** 3 credits.  
Intensive study and exploration of choreographic forms. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**DANC 570: Advanced Dance Performance.** 1-3 credits.  
Public performance/presentations in university or professional productions. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**DANC 571: Residency Workshop.** 3 credits.  
Rehearsal direction of a new or restaged work by a guest choreographer in an intensive rehearsal process. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 9 credits.
Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

DANC 580: Laban Movement Analysis. 3 credits.
Introduction to the components of Laban Movement Analysis: body, shape, effort and space. Offered by School of Dance (p. 802). May not be repeated for credit.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

DANC 598: Philosophy and Aesthetics of Dance. 3 credits.
Study of philosophical theories and aesthetic principles of dance as a performing art. Offered by School of Dance (p. 802). May not be repeated for credit.

Recommended Prerequisite: DANC 390 and DANC 391, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

DANC 599: Independent Study. 3 credits.
Individual research or creative project. Offered by School of Dance (p. 802). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

600 Level Courses

DANC 615: Contemporary Trends. 3 credits.
Study of contemporary art and artists and their philosophical theories, aesthetics and practices as they relate to the creation of new work. Offered by School of Dance (p. 802). May not be repeated for credit.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

DANC 627: Advanced Teaching Seminar. 3 credits.
Discussion and readings from varied pedagogical theories examining diverse approaches to teaching technique and theory culminating in development of a teaching portfolio. Offered by School of Dance (p. 802). May not be repeated for credit.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

DANC 672: Dance Production. 3 credits.
Artistic Direction of university or professional performance including mentoring of choreographers, adjudication of work, coordination with lighting designer, costumer, sound technician and managing director. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

DANC 680: Dance Management. 3 credits.
Exploration of the technical, financial and economical aspects of dance management including areas of marketing, fundraising, publicity, incorporation, booking non-profit vs. profit making organizations and issues relating to current practices in the performing arts industry. Offered by School of Dance (p. 802). May not be repeated for credit.

Recommended Prerequisite: Admission to Dance MFA program.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

700 Level Courses
DANC 790: Internship. 1-3 credits.
In depth study in selected subject area of interest. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

DANC 798: Directed Choreography/Project. 1-3 credits.
This course provides intensive independent choreographic study, culminating in the creation of a significant dance work or body of works, presented in a professional level public performance. The choreography must demonstrate the student's mastery of choreographic craft, an original concept and compelling artistry. Offered by School of Dance (p. 802). May be repeated within the degree for a maximum 6 credits. Equivalent to DANC 562.

Recommended Prerequisite: Admission to MFA in Visual and Performing Arts: Dance Concentration and DANC 560.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

DANC 799: Thesis. 1-6 credits.
Creation and documentation of original research including planning, performance, recording and written reflecting under direction of thesis committee. Offered by School of Dance (p. 802). May be repeated within the degree.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Data Analytics Engineering (DAEN)

500 Level Courses
DAEN 500: Data Analytics Fundamentals. 3 credits.
Provides a foundation in data analytics from which the student will build. Focuses on a dataset where students will use analytics tools and apply statistical methodologies in order to extract information of value. Offered by Volgenau School of Engineering (p. 953). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses
DAEN 690: Data Analytics Project. 3 credits.
Capstone project course for MS in Data Analytics program. Key activity is completion of a major applied team project resulting in an acceptable technical report and oral briefing. Student should plan to take this course in the last semester of studies. Offered by Volgenau School of Engineering (p. 953). May not be repeated for credit.

Recommended Prerequisite: Completion of twelve credit hours of coursework in MS Data Analytics program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Registration Restrictions:
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

DAEN 698: Data Analytics Research Project. 1-3 credits.
Conduct a research project to be chosen and completed under guidance of a graduate faculty member that results in an acceptable technical report. Notes: No more than a total of three credits may be taken from within the DAEN program. Offered by Volgenau School of Engineering (p. 953). May be repeated within the term for a maximum 3 credits.

Recommended Prerequisite: Graduate Standing, completion of at least two core courses and a minimum of 12 credits in the DAEN program, and permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Registration Restrictions:
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
Schedule Type: Research

**Early Childhood Education (ECED)**

**400 Level Courses**

**ECED 401: Developmental Pathways of Diverse Learners, Birth-Adolescence.** 3 credits.
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

**ECED 402: Foundations of Language and Literacy for Diverse Prekindergarten and Kindergarten Learners.** 3 credits.
Examines complexity of language and literacy development of diverse young learners. Emphasizes language acquisition, reading, and writing in prekindergarten and kindergarten contexts. Focuses on evidence-based assessment and instructional practices that promote prekindergarten and kindergarten children’s language and literacy development. Explores social, cultural, affective, cognitive, and educational factors that play a role in language acquisition and literacy learning. Field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

**ECED 403: Inclusive Curriculum for Young Learners: Planning Instruction and Guidance.** 3 credits.
Explores principles of learning, curriculum development, and relationship between assessment and instruction. Examines role of play and active exploration in learning. Addresses guiding children’s behavior and the role of families and culture in children’s learning. Notes: Field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

**ECED 404: Engaging Families of Diverse Young Learners.** 3 credits.
Focuses on strategies for developing culturally appropriate family professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special needs. Explores theories and research supporting a family-centered approach, including family and professional rights and responsibilities, especially in the special education process. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

**ECED 405: Introduction to Early Childhood Special Education.** 3 credits.
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery. Notes: Field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

**ECED 406: Medical and Developmental Aspects of Disabilities of Diverse Young Learners.** 3 credits.
Focuses on medical and developmental aspects of children with disabilities, birth to age 5. Emphasizes the role of professionals in service delivery. Explores etiology, symptomatology, and management of neuromotor and developmental disabilities. Emphasizes positioning, adaptive strategies, and understanding assistive technology devices. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

**ECED 411: Assessment of Diverse Young Learners.** 3 credits.
Examines types of assessment, including family-centered child assessment, for planning and implementing effective programs for culturally, linguistically, and ability diverse children, birth through third grade. Addresses selection, administration, analysis, and interpretation of formal and informal assessments. Field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: ECED 401 and ECED 403 or approval of instructor.

Schedule Type: Lecture

**ECED 412: Language and Literacy Assessment and Instruction for Diverse Primary Grade Learners.** 3 credits.
Examines ways to assess and develop reading, writing, and the language arts in primary grade classrooms. Addresses instructional strategies and practices that promote language and literacy development in culturally, linguistically, socioeconomically, and ability diverse children. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to ECED 512.

Recommended Prerequisite: ECED 402.

Schedule Type: Lecture

**ECED 413: Integrating Social Studies Across the Content Areas for Diverse Young Learners.** 3 credits.
Explores social studies content, assessment, curriculum development, planning, and instructional practices. Examines strategies for guiding children’s behavior, integrating social studies instruction across content areas, and planning and implementing community of learners inclusive of children with diverse abilities and cultural, linguistic, and socio-economic backgrounds. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: ECED 403.

Schedule Type: Lecture

**ECED 415: Mathematics for Diverse Young Learners.** 3 credits.
Examines ways to foster development of mathematics in preschool to third-grade children. Covers construction of mathematics lessons and hands-on experiences that promote learning in children with diverse abilities and cultural and linguistic backgrounds. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: ECED 403.

Schedule Type: Lecture

**ECED 416: Science for Diverse Young Learners.** 3 credits.
Examines ways to foster development of science in preschool to third-grade children. Covers construction of science lessons and hands-on experiences that promote learning in children with diverse abilities and cultural and linguistic backgrounds. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: ECED 403.
experiences that promote learning in children with diverse abilities and cultural and linguistic backgrounds. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** ECED 403.

**Schedule Type:** Lecture

**ECED 422: Developing Language, Literacy, and Communication of Diverse Infants and Toddlers.** 3 credits.
Examines instructional strategies, resources, and technologies, including assistive technologies, to develop language, literacy, and communication of diverse infants and toddlers. Explores monolingual and multilingual language acquisition, cultural and linguistic diversity, and language delays and disorders. Focuses on the importance of adult-child interaction and the role of the family in children’s language, literacy, and communication development. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Schedule Type:** Lecture

**ECED 423: Early Intervention for Infants & Toddlers with Disabilities: Collaborative & Consultative Approaches.** 3 credits.
Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Schedule Type:** Lecture

**ECED 485: Applied and Teacher Research in Early Childhood Education.** 3 credits.
Develops fundamental concepts, principles, and methods of research in early childhood education, with emphasis on interpreting and applying research results. Critiques research and uses findings in educational settings. Serves as a capstone course in early childhood education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Schedule Type:** Lecture

**ECED 490: Internship in Early Childhood Education.** 1-6 credits.
Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 12 credits.

**Schedule Type:** Student Teaching

**ECED 497: Special Topics in Early Childhood Education.** 1-3 credits.
Provides study on selected topic or emerging issue in Early Childhood Education. Notes: May be repeated for credit with ECE program permission. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 9 credits.

**Schedule Type:** Seminar

**500 Level Courses**

**ECED 501: Developmental Pathways of Diverse Learners, Birth-Adolescence.** 3 credits.
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ECED 502: Foundations of Language and Literacy for Diverse Prekindergarten and Kindergarten Learners.** 3 credits.
Examines complexity of language and literacy development of diverse young learners. Emphasizes language acquisition, reading, and writing in prekindergarten and kindergarten contexts. Focuses on evidence-based assessment and instructional practices that promote prekindergarten and kindergarten children’s language and literacy development. Explores social, cultural, affective, cognitive, and educational factors that play a role in language acquisition and literacy learning. Notes: Field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ECED 503: Inclusive Curriculum for Young Learners: Planning Instruction and Guidance.** 3 credits.
Explores principles of learning, curriculum development, and relationship between assessment and instruction. Examines role of play and active exploration in learning. Addresses guiding children’s behavior and the role of families and culture in children’s learning. Notes: Field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ECED 504: Engaging Families of Diverse Young Learners.** 3 credits.
Focuses on strategies for developing culturally appropriate family professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special needs. Explores theories and research supporting a family-centered approach, including family and professional rights and responsibilities, especially in the special education process. Offered by Graduate School of Education (p. 155). May not be repeated for credit.
**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ECED 503:** Introduction to Early Childhood Special Education. 3 credits.
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery. Notes: Field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** ECED 401 or ECED 501 and ECED 403 or ECED 503 or approval of course instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ECED 505:** Introduction to Early Childhood Special Education. 3 credits.
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery. Notes: Field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Early Childhood Education program or approval of course instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ECED 506:** Medical and Developmental Aspects of Disabilities of Diverse Young Learners. 3 credits.
Focuses on medical and developmental aspects of children with disabilities, birth to age 5. Emphasizes the role of professionals in service delivery. Explores etiology, symptomatology, and management of neuromotor and developmental disabilities. Emphasizes positioning, adaptive strategies, and understanding assistive technology devices. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDSE 558.

**Recommended Prerequisite:** ECED 503

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ECED 511:** Assessment of Diverse Young Learners. 3 credits.
Examines types of assessment, including family-centered child assessment, for planning and implementing effective programs for culturally, linguistically, and ability diverse children, birth through third grade. Addresses selection, administration, analysis, and interpretation of formal and informal assessments. Notes: Field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** ECED 401 or ECED 501 and ECED 403 or ECED 503 or approval of course instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ECED 512:** Language and Literacy Assessment and Instruction for Diverse Primary Grade Learners. 3 credits.
Examines ways to assess and develop reading, writing, and the language arts in primary grade classrooms. Addresses instructional strategies and practices that promote language and literacy development in culturally, linguistically, socio-economically, and ability diverse children. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Early Childhood Education program or approval of course instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ECED 513:** Integrating Social Studies Across the Content Areas for Diverse Young Learners. 3 credits.
Explores social studies content, assessment, curriculum development, planning, and instructional practices. Examines strategies for guiding children’s behavior, integrating social studies instruction across content areas, and planning and implementing community of learners inclusive of children with diverse abilities and cultural, linguistic, and socio-economic backgrounds. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** ECED 503

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ECED 514:** Mathematics and Science for Diverse Young Learners. 3 credits.
Examines ways to foster development of mathematics and science in preschool to third-grade children. Covers construction of math and science lessons and hands-on experiences that address the needs of culturally, linguistically, and ability diverse children. Notes: Field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Early Childhood Education program or approval of course instructor.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ECED 515: Mathematics for Diverse Young Learners.** 3 credits.
Examines ways to foster development of mathematics in preschool to third-grade children. Covers construction of mathematics lessons and hands-on experiences that promote learning in children with diverse abilities and cultural and linguistic backgrounds. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** ECED 403 or ECED 503.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ECED 516: Science for Diverse Young Learners.** 3 credits.
Examines ways to foster development of science in preschool to third-grade children. Covers construction of science lessons and hands-on experiences that promote learning in children with diverse abilities and cultural and linguistic backgrounds. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** ECED 403 or ECED 503.

**Schedule Type:** Lecture

**ECED 522: Developing Language, Literacy, and Communication of Diverse Infants and Toddlers.** 3 credits.
Examines instructional strategies, resources, and technologies, including assistive technologies, to develop language, literacy, and communication of diverse infants and toddlers. Explores monolingual and multilingual language acquisition, cultural and linguistic diversity, and language delays and disorders. Focuses on the importance of adult-child interaction and the role of the family in children’s language, literacy, and communication development. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDSE 556.

**Recommended Prerequisite:** Admission to the Early Childhood Education program or approval of course instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ECED 601: Frameworks for Early Childhood Education.** 3 credits.
Analyzes foundational frameworks for developing perspectives for working with culturally, linguistically, and ability diverse young learners, birth to age 8, and their families. Examines foundational work from fields of early childhood education, early childhood special education, multicultural education, and second language acquisition. Notes: Must be taken as final course or with final courses of the program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ECED 685: Special Topics in Early Childhood Education.** 1-3 credits.
Provides study on selected topic or emerging issue in Early Childhood Education. Notes: May be repeated for credit with ECE program permission. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 9 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**600 Level Courses**

**ECED 601: Frameworks for Early Childhood Education.** 3 credits.
Analyzes foundational frameworks for developing perspectives for working with culturally, linguistically, and ability diverse young learners, birth to age 8, and their families. Examines foundational work from fields of early childhood education, early childhood special education, multicultural education, and second language acquisition. Notes: Must be taken as final course or with final courses of the program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ECED 685: Applied and Teacher Research in Early Childhood Education.** 3 credits.
Develops fundamental concepts, principles, and methods of research in early childhood education, with emphasis on interpreting and applying research results. Critiques research and uses findings in educational settings. Serves as a capstone course in early childhood education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.
Recommended Prerequisite: Taken with or after final course of program or with permission of the program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ECED 691: Policy Perspectives in Early Childhood Education. 3 credits.
Explores historical and current trends and issues involving legislation and policy in early childhood education, multilingual education, early childhood special education, and multicultural education. Focuses on historical role of social advocacy, development of advocacy skills, and collaboration and consultation with other professionals and staff in early childhood education of services and context of service delivery. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

700 Level Courses

ECED 702: Early Writing: Cognition, Language, and Literacy. 3 credits.
Examines early writing research and practice related to cognition, language, and literacy in the early education of diverse learners, including special education and multicultural/multilingual education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Approval of instructor and admission to the PHD program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

ECED 704: Family Research and Practice in Early Childhood Education. 3 credits.
Explores the relationship between families and professionals in providing appropriate early care and education, birth through grade 3, including children with special education needs and those from culturally, linguistically, and economically diverse backgrounds. Includes in-depth study, analysis, and discussions of original research as well as synthesis of findings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Approval of instructor and admission to the PHD program.

Schedule Type: Seminar

ECED 710: International Perspectives in Early Childhood Education. 3 credits.
Examines international perspectives in early childhood education in various contexts to increase students’ knowledge of approaches to planning and implementing effective programs for culturally, linguistically, and ability diverse children by professionals working with young children and families to inform, connect, and enrich U.S. based programs in early childhood education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the M.Ed. in Curriculum and Instruction, Concentration in Early Childhood Education for Diverse Learners, the Ph.D. in Education, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ECED 788: Internship in Early Childhood Education Prekindergarten-Third Grade. 6 credits.
Enables students to participate full time in an internship in early childhood education (prekindergarten through third grade). Links university course work to real world of working with diverse young learners and their families. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to ECED 798.

Recommended Prerequisite: ECED 401 or 501, ECED 403 or 503 and Admission to the Early Childhood Education Prekindergarten-Third Grade Licensure Graduate Certificate Program. Endorsement and standardized test requirements (Praxis Core Academics Skills for Educators or qualifying substitution, Praxis II, and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

ECED 789: Internship in Early Childhood Special Education Birth - Five. 6 credits.
Enables students to participate full time in an internship in early childhood special education (birth-5). Links university course work to real world of working with children with special needs and their families. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to ECED 799.

Recommended Prerequisite: ECED 401 or 501, ECED 403 or 503, and Admission to the Early Childhood Special Educational Licensure Graduate Certificate Program. All standardized test requirements (Praxis Core Academic Skills of Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met prior to applying to the internship.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship
ECED 790: Internship with Diverse Preschool Children. 3 credits. Enables students to participate full time in an internship with diverse preschool children. Links university course work to real world of working with diverse young learners and their families. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: ECED 401 or 501, ECED 403 or 503, and Admission to the Early Childhood Education Prekindergarten – Third Grade (Licensure) Graduate Certificate Program. All endorsement and standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution, Praxis II, and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Schedule Type: Internship

ECED 791: Internship with Diverse Infants and Toddlers. 3 credits. Enables students to participate full time in an internship with diverse infants/toddlers. Links university course work to real world of working with diverse young learners and their families. Notes: Students enroll in both infant/toddler (3 credits) and preschool (3 credits) internships. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: ECED 401 or 501, ECED 403 or 503, and Admission to the Early Childhood Special Education (Licensure) Graduate Certificate Program. All endorsement and standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Schedule Type: Internship

ECED 792: Internship in Early Childhood Education-TFA. 1-6 credits. Enables students to participate full time in an internship in early childhood education. Links university course work to real world of working with diverse young learners and their families. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to the Early Childhood Education program or approval of course instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Schedule Type: Internship

ECED 793: Internship in Preschool Early Childhood Special Education. 3 credits. Enables students to participate full time in an internship in preschool early childhood special education. Links university course work to real world of working with diverse young learners and their families. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: ECED 401 or 501, ECED 403 or 503, and Admission to the Early Childhood Special Education (Licensure) Graduate Certificate Program. All standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Schedule Type: Internship

ECED 795: Internship in Kindergarten - Third Grade. 3 credits. Enables students to participate full time in an internship in early childhood education in kindergarten through third grade. Links university course work to real world of working with diverse young learners and their families. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: ECED 401 or 501, ECED 403 or 503, and Admission to the Early Childhood Education Prekindergarten - Third Grade Licensure Graduate Certificate Program. Endorsement and standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution, Praxis II, and Virginia Communication and Literacy Assessment) must be met prior to applying for the internship.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Schedule Type: Internship

800 Level Courses

ECED 801: Current Research and Trends in Early Childhood Education. 3 credits. Examines research and trends in the early education of children. Explores issues that influence the education of young children with special education needs and children from culturally, linguistically, and economically diverse backgrounds. Examines practices appropriate for diverse young learners. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission to the PhD in Education program or post-master's status and approval of course instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Seminar

ECED 803: Teacher Preparation and Professional Development. 3 credits. Explores research and current recommended practices related to teacher preparation and professional development. Provides opportunity for practical application with preservice or inservice teachers. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDUC 803.
Recommended Prerequisite: Admission to the PhD in Education program or post-master’s status and approval of course instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

ECED 804: Family Research and Practice in Early Childhood Education. 3 credits.
Explores the relationship between families and professionals in providing appropriate early care and education, birth through grade 3, including children with special education needs and those from culturally, linguistically, and economically diverse backgrounds. Includes in-depth study, analysis, and discussions of original research as well as syntheses of findings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD in Education program or advanced-master’s status with approval of course instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

ECED 812: Early Writing: Cognition, Language, and Literacy. 3 credits.
Examines writing research and practice related to cognition, language, and literacy in the early education of diverse learners, including special education and multicultural/multilingual education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD in Education program or advanced-master’s status with approval of course instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Economics (ECON)

100 Level Courses

ECON 100: Economics for the Citizen. 3 credits.
Not available to economics majors. Broad introduction to economic concepts and how they can contribute to a better understanding of the world around us. Applies and develops concepts to current economic and social problems and issues. Less formal modeling than in the 103-104 sequence. Offered by Economics (p. 335). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Lecture

ECON 103: Contemporary Microeconomic Principles. 3 credits.
Introduces microeconomics in the context of current problems. Explores how market mechanism allocates scarce resources among competing uses; uses supply, demand, production, and distribution theory to analyze problems. Offered by Economics (p. 335). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Lecture

ECON 104: Contemporary Macroeconomic Principles. 3 credits.
Introduces macroeconomics in the context of current problems. National income analysis, money and banking, economic growth and stability, unemployment, inflation, and role of government. Offered by Economics (p. 335). May not be repeated for credit. Equivalent to MSU 106.

Mason Core: Social/Behavioral Sciences (p. 135)

Recommended Prerequisite: ECON 103.

Schedule Type: Lecture

ECON 105: Environmental Economics for the Citizen. 3 credits.
Introduction to economic concepts and how they can be applied to environmental policy issues such as air and water pollution, climate change, natural resource use, and sustainability. Focus is on concepts, policy, and case studies rather than formal modeling exercises. Offered by Economics (p. 335). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences, Encore:Sustainability (p. 135)

Specialized Designation: Green Leaf Course

Schedule Type: Lecture

200 Level Courses

ECON 296: Special Topics in Economics. 3 credits.
Provides coverage of a specialized topic in economics at the introductory level. Topics vary by section. Notes: May be repeated for credit when topic is different. Offered by Economics (p. 335). May be repeated within the term for a maximum 9 credits.

Schedule Type: Lecture

300 Level Courses

ECON 306: Intermediate Microeconomics. 3 credits.
Basic factors of price and distribution theory: analysis of demand, costs of production and supply relationships, and price and output determination under various market structures. Offered by Economics (p. 335). May not be repeated for credit. Equivalent to MSU 302.

Recommended Prerequisite: ECON 103 and 104 and MATH 108 or 113.

Schedule Type: Lecture

ECON 308: Managerial Economics and Strategy. 3 credits.
Analysis of major strategic business situations including pricing strategy, incentives and contracts, game theory, and vertical and horizontal integration. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 306.

Schedule Type: Lecture

ECON 309: Economic Problems and Public Policies. 3 credits.
Economic problems in light of current and proposed public policies. Topics include environmental issues, international trade policies, and
regulatory issues and their historical roots. Offered by Economics (p. 335). May not be repeated for credit.

**Mason Core:** Synthesis (p. 135)

**Recommended Prerequisite:** ECON 100 or 103 and 104 or permission of instructor.

**Schedule Type:** Lecture

**ECON 310:** Money and Banking. 3 credits.
Monetary, commercial, and central banking systems, with particular emphasis on their relationship with American government programs, fiscal policies, and controls. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 103, 104 or permission of instructor.

**Schedule Type:** Lecture

**ECON 311:** Intermediate Macroeconomics. 3 credits.
Aggregate economic accounts, including measuring national income; determinants of levels of income and output; and causes and solutions for problems of unemployment, inflation, and economic growth. Offered by Economics (p. 335). May not be repeated for credit. Equivalent to MSU 304.

**Recommended Prerequisite:** ECON 103 and 104 or permission of instructor.

**Schedule Type:** Lecture

**ECON 320:** Labor Problems. 3 credits.
Explores American labor unions and their effect on society, including causes of and proposed solutions to selected problems. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 103 and 104 or permission of instructor.

**Schedule Type:** Lecture

**ECON 321:** Economics of Labor. 3 credits.
Defines factors that determine levels of wages and employment, and economic consequences. Emphasizes recent developments in unionism, collective bargaining, and industrial technology. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 306.

**Schedule Type:** Lecture

**ECON 330:** Public Finance. 3 credits.
Covers intergovernmental financial relationships; types, incidences, and consequences of taxation; other sources of governmental income; governmental expenditures and their effect; public economic enterprises; public borrowing; and debt management and its economic effect. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 306 or permission of instructor.

**Schedule Type:** Lecture

**ECON 335:** Environmental Economics. 3 credits.
Microeconomic analysis of environmental problems. Topics include externalities and market failure, alternative solutions and policies, problems in monitoring and enforcement, economic analysis of development of legislation and regulation, and applications to current policy issues. Offered by Economics (p. 335). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** ECON 103 and 104.

**Schedule Type:** Lecture

**ECON 340:** Introduction to Mathematical Economics. 3 credits.
Mathematical treatment of theory of firm and household behavior, stabilization policy, growth theory, input-output analysis, and linear programming. Offered by Economics (p. 335). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (ECON 306, 311 and MATH 113). Requires minimum grade of C.

**Schedule Type:** Lecture

**ECON 345:** Introduction to Econometrics. 3 credits.
Modern statistical techniques in estimating economic relations. Offered by Economics (p. 335). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Registration Restrictions:**
**Required Prerequisites:** (ECON 306, 311 and MATH 113). Requires minimum grade of C.

**Schedule Type:** Lecture

**ECON 360:** Economics of Developing Areas. 3 credits.
Economic growth characteristic of developing countries. Economic development, obstacles to development, policies, and planning. Offered by Economics (p. 335). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Recommended Prerequisite:** ECON 103 and 104 or permission of instructor.

**Schedule Type:** Lecture

**ECON 361:** Economic Development of Latin America. 3 credits.
Economic development, institutions, and problems of Latin America. Offered by Economics (p. 335). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)
Specialized Designation: Non-Western Culture

Recommended Prerequisite: ECON 103 and 104 or permission of instructor.

Schedule Type: Lecture

ECON 362: African Economic Development. 3 credits.
Issues of economic development as applied to Africa. Includes overview of early economic history in Africa and post-independence development, and contemporary development problems. Offered by Economics (p. 335). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Schedule Type: Lecture

ECON 365: Topics in Economic History. 3 credits.
Possible topics include ancient, medieval, modern European, and American economic history, using econometric analysis as necessary. Notes: May be repeated when topic is different. Offered by Economics (p. 335). May be repeated within the term for a maximum 6 credits.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ECON 103 and 104.

Schedule Type: Lecture

ECON 367: Money, Markets, and Economic Policy. 3 credits.
Applies basic economic concepts and principles to issues facing the U.S. and global economies. Topics include productivity and economic growth, taxes, healthcare, globalization, income distribution and financial crises, with an emphasis on market structure, social institutions and the not-always rational behavior of investors and consumers. Offered by Economics (p. 335). May not be repeated for credit. Equivalent to GOVT 367.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Seminar

ECON 370: Economics of Industrial Organization. 3 credits.
Factors influencing industrial structure, and industrial conduct and performance. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 306 or permission of instructor.

Schedule Type: Lecture

ECON 374: Health Economics. 3 credits.
Microeconomic analysis of health and medicine. Topics include the determinants of health, health externalities, health insurance, the health effects of medicine, the supply and demand of medicine, medical quality and regulation, and information asymmetries. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 103 and ECON 104 or permission of instructor.

Schedule Type: Lecture

ECON 380: Economies in Transition. 3 credits.
Examines problems and achievements of formerly communist and socialist countries including China, Eastern European countries, and Russia and other countries of the former Soviet Union as they transition to more market-oriented economies. Includes market economies and central planning. Offered by Economics (p. 335). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Recommended Prerequisite: ECON 103 and 104 or permission of instructor.

Schedule Type: Lecture

ECON 385: International Economic Policy. 3 credits.
Introduces economic way of thinking on trade and international finance. Presents historical and current information on consequences of trade and protectionism. Notes: May not be applied toward the elective course requirement needed for a major or minor in economics. Offered by Economics (p. 335). May not be repeated for credit.

Schedule Type: Lecture

ECON 390: International Economics. 3 credits.
Foreign exchange market, balance of payment, foreign trade policies, and theories of international trade. Offered by Economics (p. 335). May not be repeated for credit. Equivalent to MSU 402.

Mason Core: Global Understanding (p. 135)

Recommended Prerequisite: ECON 306 and ECON 311 or permission of instructor.

Schedule Type: Lecture

400 Level Courses

ECON 403: Austrian Economics. 3 credits.
Microeconomic and macroeconomic models and misallocation of resources. Alternative economic tools from noted Austrian economists. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 306 and 311.

Schedule Type: Lecture

ECON 410: Public Choice. 3 credits.
Applies economic theory, methodology to study nonmarket decision making. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 306.

Schedule Type: Lecture

ECON 412: Game Theory and Economics of Institutions. 3 credits.
Introduces game theory and its relevance for analyzing framework of rules and institutions within which economic processes occur. Applies game theoretical concepts to comparative analysis of causes and effects of alternative institutional arrangements. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 306 or permission of instructor.

Schedule Type: Lecture
**ECON 415: Law and Economics.** 3 credits.
Economic analysis of the law. Topics include introduction to legal institutions and legal analysis; application of economic concepts to the law of property, contracts and torts, criminal and constitutional law; economic efficiency of common law; and public choice perspective on the evolution of the law. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 306 or permission of instructor.

**Schedule Type:** Lecture

**ECON 420: International Money and Finance.** 3 credits.
Examines models of balance of payments, exchange rate behavior, and open economy macroeconomics. Includes international financial system and issues such as globalization and international financial instability. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 306 and 311, or permission of instructor.

**Schedule Type:** Lecture

**ECON 421: Financial Economics.** 3 credits.
Provides a survey of financial economics including a brief overview of the U.S. and international financial system and the role of different financial institutions. Covers the leading theoretical models in the field. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 103, ECON 104, ECON 306, ECON 311.

**Schedule Type:** Seminar

**ECON 435: Economics of Energy.** 3 credits.
Examines various issues in the energy industry using tools from microeconomic theory, law and economics and public choice. Topics include issues related to oil, historical and current energy regulation, and environmental issues associated with energy. Offered by Economics (p. 335). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** ECON 306.

**Schedule Type:** Lecture

Introduces design principles to develop systems to allocate resources. Students must participate in experiment demonstrations of different allocation mechanisms. They also are exposed to experimental methods in economics and market design. Offered by Economics (p. 335). May not be repeated for credit. Equivalent to SYST 480.

**Recommended Prerequisite:** MATH 213.

**Schedule Type:** Lecture

**ECON 441: Economic Systems Design: Case Studies and Analysis.** 3 credits.
Requires students to design and develop mechanisms to specific allocation problem. Students develop analytical and working engineering models of their mechanism. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 440.

**Schedule Type:** Lecture

**ECON 442: Economic Systems Design: Implementation.** 3 credits.
Involves students in developing experimental design to test proposed allocation solution. Design process includes construction of experimental parameters, treatments, and initial test in laboratory setting. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 441.

**Schedule Type:** Lecture

**ECON 445: Design and Analysis of Experiments.** 3 credits.
Topics include comparing two or more treatments, and computing and interpreting analysis of variance. Discusses randomized block, Latin square, and factorial designs; and applications to economics experiments. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** STAT 250 or 344, or MATH 351, or IT 250, or permission of instructor.

**Schedule Type:** Lecture

**ECON 460: Senior Seminar in Philosophy, Politics, and Economics.** 3 credits.
Covers issues in the philosophy, economics, and political science of institutions, information, and collective action. Through case studies of existing legal and political institutions, applies the insights to problems in politics, policy making, social-choice theory, and social, moral, and political philosophy. (Specific content varies). Notes: Serves as the capstone course for the PPE program. Offered by Economics (p. 335). May not be repeated for credit. Equivalent to GOVT 469, PHIL 460.

**Recommended Prerequisite:** PHIL 358 and ECON 412 or permission of instructor.

**Schedule Type:** Seminar

**ECON 470: Economics of Regulation.** 3 credits.
Examines various issues surrounding concepts of regulation using tools from microeconomic theory and public choice. Topics include antitrust, rate regulation, policy rationales for regulation, and issues of current interest. Offered by Economics (p. 335). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** ECON 306.

**Schedule Type:** Lecture

**ECON 481: The Development of Economic Thought.** 3 credits.
Developments in economic thought from 1500 to the present. Emphasizes historical origins, impact on contemporary economics, and theoretical validity. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 306 and 311 or permission of instructor.

**Schedule Type:** Lecture

**ECON 485: Smithian Political Economy I.** 3 credits.
Studies the thought of Adam Smith. As the first in a two-course sequence, course focuses on The Theory of Moral Sentiments. Offered by Economics (p. 335). May not be repeated for credit.
Schedule Type: Lecture

ECON 406: Smithian Political Economy II. 3 credits.
Studies the thought of Adam Smith. As the second in a two-course sequence, course focuses on The Wealth of Nations. Offered by Economics (p. 335). May not be repeated for credit.

Schedule Type: Lecture

ECON 492: Study Abroad. 1-6 credits.
Study abroad under supervision of George Mason faculty. Course topics, content, and locations vary. Notes: May be repeated with permission of department. Offered by Economics (p. 335). May be repeated within the degree for a maximum 12 credits.

Schedule Type: Lecture

ECON 494: Honors Thesis Writing Seminar. 3 credits.
Develops skills in finding and evaluating sources, oral presentation, and academic writing. Offered by Economics (p. 335). May not be repeated for credit.

Specialized Designation: Research Associated

Recommended Prerequisite: ECON 306 and 311, an overall GPA of 3.5, and permission from the instructor.

Schedule Type: Lecture

ECON 495: RS: Honors Thesis in Economics. 3-6 credits.
Honors-level research on a self-selected topic in economics culminating in a substantial research paper and an oral presentation. Notes: Requirements for departmental honors in the major are in addition to the coursework required for the major. ECON 495 credit may not be applied toward the elective course requirement needed for a major or minor in economics. Offered by Economics (p. 335). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: ECON 494 with minimum grade of B or permission from the instructor with an approved research proposal.

Schedule Type: Independent Study

ECON 496: Special Topics in Economics. 3 credits.
Subject matter varies. Notes: May be repeated when topic is different. Offered by Economics (p. 335). May be repeated within the term for a maximum 24 credits.

Schedule Type: Lecture

ECON 498: Internship. 3-6 credits.
Students find economics-related internship with assistance from Career Services. Pre-internship proposal and final reflections paper required. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: 6 upper-level hours in economics, Junior standing, and permission of instructor.

Schedule Type: Internship

ECON 499: Independent Study. 1-4 credits.
Individual study of selected area of economics. Notes: Directed research paper required. Offered by Economics (p. 335). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: Economics majors with 90 credits, and permission of both the department and instructor.

Schedule Type: Independent Study

500 Level Courses

ECON 535: Survey of Applied Econometrics. 3 credits.
Applied introduction to estimating economic relationships. Includes simple equation and simultaneous equation system estimation. Notes: Students who take ECON 535 may not take ECON 637 for credit. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: Admission to master's program in economics or OM 210 or STAT 250 and 350, and ECON 306 and 311, and MATH 113; or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses

ECON 500: Economics for Educators. 3 credits.
Introduces current and prospective K-12 teachers to the fundamentals of economics. Prepares teachers to instruct students in the economics and personal finance course now required by the Virginia Department of Education. Supports teachers in successfully teaching the economics content of the Virginia SOLs in history and social sciences. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: Undergraduate degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ECON 535: Microeconomic Theory. 3 credits.
Covers theory of behavior of consumers, firms, and resource suppliers; theories of choice under risk and uncertainty; partial equilibrium analysis of competitive and noncompetitive markets; general equilibrium analysis; and welfare economics. Introduces capital theory. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.
Recommended Prerequisite: Admission to master's program in economics or ECON 306 and 311, and MATH 113; or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ECON 612: Microeconomic Theory II. 3 credits.
Nature of the firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 611.

ECON 615: Macroeconomic Theory. 3 credits.
Survey course covering monetary theory, theories of consumption and saving, budget deficits, economic growth, international finance, and monetary and fiscal policies. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: Admission to master's program in economics, or ECON 306 and 311, and MATH 113; or permission of instructor.

ECON 630: Mathematical Economics I. 3 credits.
Includes set theory, function, differential calculus, integration, series, and matrix algebra, with special emphasis on economic applications. Notes: Non-Degree students are permitted to enroll on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: Admission to master's program in economics, or ECON 306 and 311, and MATH 113, or permission of instructor.

ECON 632: Economic Systems Design Principles and Experiments. 3 credits.
Introduces analytical and engineering principles to develop exchange systems. Students must become familiar with literature on applied mechanism design; and understand behavioral aspects of auction systems, matching, assignment and transportation problems, and information markets. Also introduces methods for testbedding systems using experimental economics and statistical design. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: A course in linear and nonlinear optimization along with a course in linear algebra.

ECON 633: Economic Systems Design Case Studies and Analysis. 3 credits.
Students begin process of doing research in design economic exchange system. Design process includes electronic instructions, and design of information structures. Students responsible for research into economic issues, and practical design issues. Offered by Economics (p. 335). May not be repeated for credit.
Recommended Prerequisite: ECON 632.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ECON 634: Economic Systems Design Implementation. 3 credits.
Students do original research in economic systems design by constructing engineering model of solution to allocation problem. Research includes experimental and statistical design, and complete description of hypothesis related to construction of experimental parameters and treatments to test mechanism. Requires initial test of mechanism in laboratory setting. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 633.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ECON 637: Econometrics I. 3 credits.
Techniques of estimating relationships between economic variables. Introduces multiple regression and problems associated with single equation model-autocorrelation, multicollinearity, and heteroscedasticity. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: Acceptance to PhD program in economics, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ECON 676: Comparative Economic Systems. 3 credits.
Capitalism, socialism, and corporatism historical perspective. Includes examination of economies of representative contemporary countries. Offered by Economics (p. 335). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

ECON 695: Special Topics in Economics. 3 credits.
Topics vary according to interests of instructor. Emphasizes new areas of discipline. Notes: May be repeated when topic is different. Offered by Economics (p. 335). May be repeated within the term.

Recommended Prerequisite: Admission to doctoral program in economics, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ECON 715: Macroeconomic Theory I. 3 credits.
Covers classical, neoclassical, Keynesian, and post-Keynesian theories of income and employment determination; theories of inflation and growth; and demand for money and implications for effectiveness of monetary vs. fiscal policy. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: Admission to doctoral program in economics, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a major in Economics.

Enrollment is limited to Graduate or Non-Degree level students.

Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Lecture

ECON 799: Master's Thesis. 1-6 credits.
Research on approved thesis topic under direction of thesis committee. Notes: Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree. Offered by Economics (p. 335). May be repeated within the degree.

Recommended Prerequisite: Admission to MA economics program and permission of thesis advisor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis
800 Level Courses

**ECON 811: Microeconomic Theory I.** 3 credits.
Theory and applications of behavior of consumers, firms, and resource suppliers. Partial equilibrium analysis of various market structures and introduction to intertemporal choice and capital theory. Review and analysis of classic works in microeconomic theory. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** Admission to doctoral program in economics, or permission of instructor.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 812: Microeconomic Theory II.** 3 credits.
Examines nature of firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 811.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 816: Macroeconomic Theory II.** 3 credits.
Aggregate economic activity and price levels with emphasis on dynamic models. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 715 and 811 or permission of instructor.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 817: Monetary Theory and Policy.** 3 credits.
Theory of mechanisms through which central banking affects economic activity and prices. Analyzes demand for money and its relationship to economic activity. Develops monetary theory with emphasis on current theories and controversies in the field. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 615 or 715 and 535 or 637, or permission of instructor.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 820: History of Economic Thought.** 3 credits.
Explores major figures in history of economic thought and tools of analysis they created. Emphasizes classical, neoclassical, and Keynesian theories. Offered by Economics (p. 335). May not be repeated for credit.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 821: History of Economic Thought II.** 3 credits.
Covers development of economic analysis from marginal revolution of 1877 to present. Emphasizes development of neoclassical economic theory. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 611 and 615, or ECON 715 and 811; or permission of instructor.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 823: Topics in Economic History.** 3 credits.
Offers economic analysis of various historical epochs including Industrial Revolution, evolution of political reform, rise of unions, and growth of government. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 611 and 811, or permission of instructor.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 825: Political Economy and Public Policy I.** 3 credits.
Covers economic process of public policy formulation and implementation; and economic behavior of principals in policy making and execution. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 611 and 811, or permission of instructor.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 826: Political Economy and Public Policy II.** 3 credits.
Specific issues related to political economy of public policy, including privatization, political economy of deficit spending, regulation and deregulation, and economics of rent seeking. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 611 or 811; or permission of instructor.

**Registration Restrictions:** Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 827: Economic Philosophy.** 3 credits.
Analyzes philosophical organization, including interrelations between economics and legal and political institutions; philosophical presuppositions of capitalist economy under constitutional democracy; alternative presuppositions for non-capitalist economies; and critical
evaluation of history of ideas in social and moral philosophy. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 611 or 811 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 828:** *Constitutional Economics*. 3 credits.
Analyzes existing and proposed elements of economic constitution. Emphasizes fiscal, monetary, transfer, and regulatory powers of government and constitutional limits on such powers, especially in the United States. Includes analysis of proposed changes in limits. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 611 or 811 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 829:** *Economics of Institutions*. 3 credits.
Analyzes framework of rules and institutions for economic activities and transactions. Includes emergence and working properties of different institutions, and classical and contemporary approaches to economic theory of institutions. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 611 or 811 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 830:** *Mathematical Economics I*. 3 credits.
Includes set theory, function, differential calculus, integration, series, and matrix algebra, with special emphasis on economic applications. Notes: Non-degree students are permitted to enroll on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** Admission to doctoral program in economics, or ECON 306 and 311, and MATH 113; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 831:** *Mathematical Economics II*. 3 credits.
Develops the foundations of choice, price, and general equilibrium theory. Topics include choice, preference and utility; consumer demand; competitive firms; general equilibrium; and social choice and welfare. Special attention is paid to uncertainty and dynamic choice. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** Admission to doctoral program in economics, or ECON 306 and 311, and MATH 113; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 838:** *Econometrics II*. 3 credits.
Explores econometric models and simultaneous equation systems. Includes identifying parameters and least squares bias, alternative estimation methods, and block recursive systems. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 637 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 839:** *Constitutional Economics II*. 3 credits.
Uses economic analysis and methods to explore more deeply than in Constitutional Economics I specific issues in Constitutional Economics. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 828.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 840:** *Law and Economics I*. 3 credits.
Uses economics to analyze U.S. Common-law system, evaluating efficiency and logic of evolution. Notes: No prior knowledge of law required. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 611 or 811; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 841:** *Law and Economics II*. 3 credits.
Explores empirical analyses of law of property, torts, crime, and family. Also looks at law’s effects on freedom and economic growth. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 611 or 811, and ECON 535 or 637; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 843:** *Smithian Political Economy I*. 3 credits.
Explores the moral philosophy of Adam Smith, with a focus on The Theory of Moral Sentiments, which is studied cover-to-cover in "Great Books" fashion. Offered by Economics (p. 335). May not be repeated for credit.

**Recommended Prerequisite:** ECON 611 or 811, and ECON 535 or 637; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ECON 844:** *Smithian Political Economy II*. 3 credits.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non Degree.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ECON 844: Industrial Organization and Public Policy I. 3 credits.
Structure of American industry and underlying determinants. Includes structure and conduct on industrial performance in light of theory and empirical evidence; and rational antitrust policy and analysis of impact on structure and performance. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 845: Smithian Political Economy II. 3 credits.
Explores the political economy of Adam Smith, with a focus on The Wealth of Nations, which is studied cover-to-cover in "Great Books" fashion. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 852 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 846: Industrial Organization and Public Policy II. 3 credits.
Covers relationship of law, economics, and theories of social control of property rights. Includes theories of market structure and industrial performance. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 844, and ECON 535 or 637; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 849: Public Finance. 3 credits.
Theoretical and institutional analysis of government expenditure, taxation, debt management, and intergovernmental fiscal relations. Includes allocative and distributional effects of alternative tax and subsidy techniques, principles of benefit cost, and cost-effectiveness analysis for government decisions. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 852: Public Choice I. 3 credits.
Applies economic theory and methodology to study of nonmarket decision making. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 854: Public Choice II. 3 credits.
Applies public choice approach to study such topics as causes and consequences of governmental growth, behavior of public bureaucracies, and economic reasoning behind constitutional limitations on size and growth of government. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 852 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 856: Non-Market Decision Making. 3 credits.
Explores the economics of non-market decision making. Considers the application of rational choice theory to decision making by a variety of persons who are neither traditional buyers nor sellers in a variety of contexts that are not traditional markets. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 852 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 866: Economic Development. 3 credits.
Explores forces contributing to or retarding economic progress in developing countries. Includes role of foreign trade, economic integration, foreign investment, multinational corporations, and technological transfers. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 611 and 615, or 715 and 811, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 869: International Trade and Policy. 3 credits.
Studies classical, neoclassical, and modern theories of international trade; theory and practice of world trade models such as project LINK; foreign investment and economic growth; tariffs and nontariff barriers, and economic integration; and recent developments, with emphasis on natural resources. Offered by Economics (p. 335). May not be repeated for credit.
ECON 871: International Monetary Economics. 3 credits. Examines international adjustment mechanism, price and income effects, controls, and monetarist approach; development of international monetary system; demand for international reserves; capital movements; and role of International Monetary Fund. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 880: Theory of the Market Process I. 3 credits. Examines theory developed by Menger, Mises, Hayek, and others of the Austrian School; and compares with other popular theories. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 615 or 715 or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 881: Theory of Market Process II. 3 credits. Continuation of ECON 880. Explores the market-process approach to analyzing capital accumulation and growth; money and credit institutions; inflation and unemployment; and industrial fluctuations. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 885: Experimental Economics. 3 credits. Designed for graduate students to learn how experimental methods can be used to inform economic research and practice. Students expected to have working understanding of basic economic concepts and multivariate calculus. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 886: Experimental Economics II. 3 credits. Research in experimental design. Topics represent basic tools to build, test, and implement exchange mechanisms in an applied setting. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 885 or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 895: Special Topics in Economics. 3 credits. Topics vary according to interests of instructor. Emphasizes new areas of discipline. Offered by Economics (p. 335). May be repeated within the term. Equivalent to GGS 525.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 896: Directed Reading and Research. 1-9 credits. Independent reading and research paper on a topic agreed on by student and faculty member. Offered by Economics (p. 335). May be repeated within the term.

Recommended Prerequisite: ECON 885 or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Independent Study

900 Level Courses

ECON 950: Seminar in Public Finance. 3 credits. Important public finance issues treated in seminar format. Offered by Economics (p. 335). May not be repeated for credit.

Recommended Prerequisite: ECON 849 or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Seminar

ECON 985: Workshop in Experimental Economics. 3 credits. Designed for graduate students who have taken Experimental Economics and Economic Systems Design and are applying experimental methods to their own or collaborative research projects. Offered by Economics (p. 335). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: ECON 886.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Seminar

ECON 998: Doctoral Dissertation Proposal Research. 1-9 credits. Research on prospective dissertation topic. Notes: For students who have completed course work but have not yet advanced to candidacy. Offered by Economics (p. 335). May be repeated within the degree.

Recommended Prerequisite: Admission to PhD economics program, and completed at least 48 credits of coursework, and passed required doctoral exams, and permission of dissertation advisor.

Registration Restrictions:
Education (EDUC)

200 Level Courses
EDUC 203: Disability in American Culture. 3 credits.
Examines disability, past and present, in American culture through changes in historical, political, legal and societal responses to people with disabilities. Analyzes the disability experience through social and behavioral science perspectives, including diversity, bioethical and human rights conceptualizations/constructs of disability. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Lecture

300 Level Courses
EDUC 300: Introduction to Teaching. 3 credits.
Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines roles of teacher, nature of American schools, and potential contributions of students. Notes: Requires school-based field experience during course. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

EDUC 301: Educationally Diverse Populations: Handicapped, Gifted, Multicultural. 3 credits.
Introduction to educational issues; not applicable in graduate-level teacher education programs. Introduces psychological, sociological, educational, and physical aspects of diverse populations in today’s schools for early and middle education. Emphasizes litigation and legislation pertaining to education of diverse populations. Notes: Requires school-based field experience during course. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDUC 521.

Schedule Type: Lecture

EDUC 302: Human Growth and Development. 3 credits.
Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines human development through life span with special emphasis on cognitive, language, physical, social, and emotional development of children. Emphasizes contemporary theories of human development and their relevance to educational practice. Notes: Requires school-based field experience during course. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

400 Level Courses
EDUC 303: Politics of American Education. 3 credits.
Focus on the study of the American political system. Designed for students studying the American political system and students interested in careers in education. Examines how interactions between various levels and branches of government affect education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

EDUC 372: Human Development, Learning, and Teaching. 3 credits.
Explores processes that influence intellectual, social, emotional, moral, ethical, and physical development of middle and high school students. Examines research and theories for understanding learning process. Notes: School-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Lecture

EDUC 400: In-Service Educational Development. 1-6 credits.
Offered at request of school division or other educational agency. Notes: Content varies. May be repeated with permission of department, but no more than 6 credits in EDUC 695, 695, or 699 may be applied toward master’s degree. Offered by Graduate School of Education (p. 155). May be repeated within the term.

Schedule Type: Internship

EDUC 415: Student Teaching in Physical Education. 12 credits.
See PHED 415. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Completion of all courses in the approved program, and admission to and good standing in the Teacher Education Program.

Recommended Corequisite: PHED 472.

Schedule Type: Internship

EDUC 422: Foundations of Secondary Education. 3 credits.
Analyzes philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasizes applications to all disciplines taught in secondary schools. Examines educational trends and issues. Notes: 15 hours school-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the secondary Education Program.

Registration Restrictions:
Enrollment limited to students with the Undergrad Teacher Licensure attribute.

Schedule Type: Lecture
500 Level Courses

EDUC 511: Child and Adolescent Development in Global Contexts. 3 credits.
Provides an introduction to teaching culturally & linguistically diverse and exceptional learners, includes analysis of human growth and development, an overview of psychology, and introduction to using technology across the curriculum. Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDCI 511.

Recommended Prerequisite: Admission to FAST TRAIN or Permission of Instructor.

Registration Restrictions:
Enrollment is limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 512: Teaching Elementary Social Studies in International Schools. 3 credits.
Focuses on translation of knowledge and data-gathering processes form social sciences into appropriate and meaningful international PK-6 social studies experiences. Develops understanding of aims, methodologies of history, geography, government and political sciences, sociology, anthropology and psychology. Requires 20 hours of PK-6 classroom fieldwork. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDUC 511.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 513: Teaching Elementary Math in International Schools. 3 credits.
Presents topics in school mathematics with particular emphasis on developing common PK-6 strands for application in international schools. Focuses on exploring, verifying, and explaining concepts using concrete materials. Requires 20 hours of PK-6 classroom fieldwork. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDUC 511 and EDRD 515.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 514: Teaching Elementary Science in International Schools. 3 credits.
Covers theory and practices of effective teaching of PK-6 science in international schools. Uses laboratory and discovery techniques to design essential science components and integrate them with other disciplines. Introduces design and implementation of activities for developing concepts solving problems, and strengthening thinking skills in PK-6 science. Requires 20 hours of PK-6 classroom fieldwork. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDUC 511 and EDRD 515.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 515: Language Across the Elementary International School Curriculum. 3 credits.
Introduces current methods of teaching integrated language arts in elementary school settings (PK-6). Includes language and literacy development, second language acquisition, reading and writing in content areas, and children's literature. International focus considers needs of second-language learners in regular classroom settings. Requires 20 hours of PK-6 classroom fieldwork. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDUC 511 and EDRD 515.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 520: Elementary Curriculum, Instruction, and Assessment in International Schools. 3 credits.
Addresses interrelationship of instruction, curriculum, and assessment in international schools. Includes review of research and effective practice. Requires 20 hours of PK-6 classroom fieldwork. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDUC 511 and EDRD 515.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
EDUC 522: Foundations of Secondary Education. 3 credits.
Analyzes philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasizes applications to all disciplines taught in secondary schools. Examines current educational trends and issues in relation to sociology of secondary school settings. Notes: 15 hours school-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 537: Introduction to Culturally & Linguistically Diverse Learners. 3 credits.
Examines culturally & linguistically diverse learners through historical, sociological, and philosophical foundations. Explores teacher's culturally identity and implications for teaching diverse learners. Discusses culturally & linguistically responsive instructional and assessment practices and working with families and other school professionals. Notes: Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 539: Human Development and Learning PK-12. 3 credits.
Provides practicing teachers with foundations of psychological theory, research, and professional practice relating to development and learning in inclusive PK-12 classroom settings. Notes: School-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 542: Foundations of Education. 3 credits.
Examines the historical, philosophical, and sociological foundations of education as they relate to elementary schools, with a particular emphasis on teaching a culturally diverse population. Students will develop an understanding of the relationship between society and education. School-based field experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the Elementary Education licensure program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

EDUC 547: Scientific Inquiry and the Nature of Science. 3 credits.
Incorporates understanding about scientific knowledge in K-12 classrooms. Builds fundamental knowledge of scientific inquiry and the nature of scientific knowledge and skills to weave this knowledge explicitly in curriculum. Focuses on developing inquiry-based lessons for students to investigate science and assessing student understanding of science and the nature of science. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

EDUC 543: Children, Family, Culture, and Schools, 4-12 Year Olds. 3 credits.
Examines child and family development and ways children, families, schools, and communities interrelate. Links children's developing physical, social, emotional, and cognitive abilities to planning curriculum and developing instructional strategies. Notes: Requires school-based field experience. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the Elementary Education licensure program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 592: Effective Collaboration for Teaching Diverse Learners in Secondary Social Studies. 3 credits.
Provides history-social studies candidates in secondary education with knowledge and skills necessary to meet the needs of diverse learners in the history-social studies classroom. Emphasizes teacher collaboration between general and special education teachers as an authentic model of practice. Notes: Taught concurrently and in close proximity with
special education faculty teaching EDSE 662 to emphasize collaboration between special education and general education teachers. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 595: Perspectives on Exceptl Tching. 3 credits.
Provides an opportunity for pre-service and in-service teachers to interact with young people and teachers in a range of school settings, exploring and documenting their points of view on teaching using a range of methods and visual and technology-oriented media and interview procedures. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

EDUC 597: Special Topics in Education. 1-6 credits.
Provides advanced study on selected topic or emerging issue in American or international education. Notes: May be repeated for credit with GSED permission. Offered by Graduate School of Education (p. 155). May be repeated within the term.

Recommended Prerequisite: Admission to program in Graduate School of Education.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 598: Directed Reading, Research, and Individual Projects. 1-6 credits.
Presents various subjects and projects, principally by directed study, discussion, research, and participation under supervision of graduate faculty member. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 12 credits.

Recommended Prerequisite: Admission to degree program, and permission of dean.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

600 Level Courses

EDUC 606: Education and Culture. 3 credits.
Uses cultural inquiry process (CIP) and web site to acquire cultural, social, and language-related perspectives on educational processes; and teaches skills to analyze educational settings and expand strategies to address puzzlements in students’ own practice. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Required Prerequisites: EDUC 612B and 613B.
B Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL · History, ASTL-Instructional Technology, ASTL · Literacy/Reading, ASTL · Mathematics, ASTL-NBPTS Preparation Core, ASTL · Science or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 612: Inquiry into Practice. 2 credits.
Provides experience using research skills to foster systematic and thoughtful inquiry into classroom practice. Explores relevant classroom practice issues through critical writing, action, and research. Emphasizes cultural diversity and gender issues in research. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, ASTL-Foreign Languages/French, ASTL-Foreign Languages/Spanish, Gifted Child Education, ASTL · History, ASTL-Instructional Technology, ASTL · Lit Reading Specialist, ASTL · Literacy/Reading, ASTL · Mathematics, ASTL-NBPTS Preparation Core, ASTL · LIT PK12 Clsrn Teachers, ASTL-Physical Education, ASTL · Science, ASTL-Teacher Leadership, Curriculum and Instruction or Dsgning Dgtl Lrning in Schools.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
EDUC 613: How Students Learn. 3 credits.
Advanced course in study of learning based on research and theory from different disciplines. Focuses on increasing students’ learning through study of different learning systems, and understanding each learner in context of learning process itself. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum of 6 credits.

Registration Restrictions:
Required Prerequisite: EDUC 612B.
B - Requires minimum grade of B -.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 614: Designing and Assessing Teaching and Learning. 2 credits.
Explores design and development of curricular, pedagogical, and assessment strategies responsive to needs and interests of students. Investigates factors that affect teaching and learning, and examines multiple ways of knowing that teachers bring to classrooms. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum of 6 credits.

Recommended Prerequisite: EDUC 613 (may be taken concurrently)

Registration Restrictions:
Required Prerequisite: EDUC 612B.
B - Requires minimum grade of B -.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 621: Teaching and Learning in the International Baccalaureate Program. 3 credits.
Focuses on principles and practices of the International Baccalaureate, organized around four areas of inquiry: curriculum processes, teaching & learning, assessment, and professional learning. Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to GSE, enrollment in FASTTRAIN initial licensure program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 622: Curriculum Development across IB Programs. 3 credits.
Explores the development of practical knowledge about the design and structure of the IB programs’ curricula. Provides a foundation for understanding how the programs are implemented and how student learning developed within them is assessed. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to GSE, enrollment in FASTTRAIN IB certificate program and completion of EDUC 621, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
EDUC 623: Models and Strategies for Teaching and Learning in IB Schools. 3 credits.
Focuses on the development of the capacity of teachers in IB schools to adopt appropriate teaching strategies and techniques instrumental in ensuring program learning outcomes are achieved. Furthermore, participants develop a deep understanding of the critical relationship between teaching and learning. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to GSE, enrollment in FAST TRAIN IB certificate program and completion of EDUC 621, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree, Undergraduate or Washington Consortium level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 624: Assessment and Learning in IB Schools. 3 credits.
Explores the essential role of assessment in teaching IB learners. Addresses formative and summative assessment practices as an integral part of the IB curriculum as well as the use of assessment for differentiation and planning. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to GSE, enrollment in FAST TRAIN IB certificate program and completion of EDUC 621, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 626: Inquiry into Action: IB Teachers, Learners, and Schools. 3 credits.
Uses the action research and qualitative process to help educational practitioners plan and complete an action research study related to IB learners, teachers, or schools. Furthermore, the course examines the social, cultural, and ethical issues of conducting research with students. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to GSE, enrollment in FAST TRAIN IB certificate program and completion of EDUC 621, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 627: Contemporary Issues and Trends in IB. 3 credits.
Focuses on current IB research, trends, and issues as well as international, national, and state/provincial legislation concerning schools and the potential impact on IB schools. Participants are prepared as leaders and advocates for IB programs and their students. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to GSE, enrollment in FAST TRAIN IB certificate program and completion of EDUC 621, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDUC 628: Critical Theories and Pedagogies. 3 credits.
Explores critical theories and pedagogies experientially, including alternative assessments that address educational equity and access, power, and approaches for deepening our practice as citizens in a
democracy. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 647.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Students in the GMU Korea campus may not enroll.

**Schedule Type:** Seminar

**EDUC 653: Technology and Learning.** 3 credits.
Develops technological knowledge and skills to support teaching and learning and to sustain and enhance learning communities. Teachers explore and critique the possibilities and concerns of using technology in learning environments. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 647.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Students in the GMU Korea campus may not enroll.

**Schedule Type:** Seminar

**EDUC 655: Teacher Research Methods.** 3 credits.
Introduces teacher research methods and situates them in relation to other research approaches. Emphasizes the understanding and use of various research methods as innovative approaches to teaching and learning. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 651 and EDUC 653.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Students in the GMU Korea campus may not enroll.

**Schedule Type:** Seminar

**EDUC 657: Teaching for Democracy and Social Justice.** 3 credits.
Focuses on the research that supports teachers to create democratic classroom practices and to support PK-12 students in exercising civic rights. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 651 and EDUC 653.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Students in the GMU Korea campus may not enroll.

**Schedule Type:** Seminar

**EDUC 659: Teacher Leadership.** 1.5 credit.
Engages learners in data gathering exercises toward articulating a leadership agenda in the context of PK-12 educational environments. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of EDUC 655 and EDUC 657.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Students in the GMU Korea campus may not enroll.

**Schedule Type:** Seminar

**EDUC 661: Teacher Empowerment and Policy.** 1.5 credit.
Provides advanced study on a selected topic or emerging issue in American or international education with particular attention to developing policy solutions. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 655 and EDUC 657.
EDUC 663: Culturally Relevant Pedagogy. 3 credits.
Offers opportunity to view how language and culture shape realities, including perceptions of children as learners. Explores cultural constraints and transformative possibilities embedded within cultures. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 659.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.
Enrollment is limited to students with a concentration in Transformative Teaching.
Enrollment is limited to Graduate level students.
Students in a Non-Degree Undergraduate degree may **not** enroll.
Students in the GMU Korea campus may **not** enroll.

**Schedule Type:** Seminar

EDUC 665: Teacher Inquiry in Practice I. 3 credits.
Builds further understanding of teacher research as teachers form and frame salient questions, examine the existing literature related to their questions, and take actions to improve teaching and learning. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 659.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.
Enrollment is limited to students with a concentration in Transformative Teaching.
Enrollment is limited to Graduate level students.
Students in a Non-Degree Undergraduate degree may **not** enroll.
Students in the GMU Korea campus may **not** enroll.

**Schedule Type:** Seminar

EDUC 667: Teacher Inquiry in Practice II. 3 credits.
Builds on the teacher research project begun in Teacher Inquiry in Practice I as teachers continue to address their pedagogical questions, take actions to improve teaching and learning, gather, analyze and interpret multiple forms of data, and share their experience in communities of practice. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 663 and EDUC 665.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.
Enrollment is limited to students with a concentration in Transformative Teaching.
Enrollment is limited to Graduate level students.
Students in a Non-Degree Undergraduate degree may **not** enroll.
Students in the GMU Korea campus may **not** enroll.

**Schedule Type:** Seminar

EDUC 669: Teaching and Learning in Practice. 3 credits.
Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program. Completion of the EDUC 663 and EDUC 665. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 663 and EDUC 665.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.
Enrollment is limited to students with a concentration in Transformative Teaching.
Enrollment is limited to Graduate level students.
Students in a Non-Degree Undergraduate degree may **not** enroll.
Students in the GMU Korea campus may **not** enroll.

**Schedule Type:** Seminar

EDUC 671: Schools and Culture in the Future. 3 credits.
Focuses on relationship between schools and communities from the past to the future. Research-based education reform, ideas from futurists, and ISTE technology standards influence teacher planning for students in the 21st century. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 522 and EDUC 670.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EDUC 672: Human Development and Learning: Secondary Education. 3 credits.
Explores developmental issues associated with middle and high school students, and theories that provide basis for understanding learning process. Addresses implications for designing instruction and curriculum. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EDUC 674: Assessing Learning and Teaching in the Secondary School Classroom. 3 credits.
Supports beginning teachers’ development and design of assessment practices for promoting student learning. Focuses on individual
differences and classroom, teacher, school, and cultural factors that impact assessment; different types and purposes of assessment; and relationship of assessment to national and state standards. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 522 and advanced methods course.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction or Secondary Education Licensure.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

---

**700 Level Courses**

**EDUC 751: Mentoring/Supervising Intern Teachers and Mentor Teacher Career Development.** 3 credits.
Examines multiple roles of teachers as they mentor and supervise intern teachers in schools. Covers career development, leadership, and instructional roles and strategies. Designed to assist intern teachers in their first year, and provide quality career and staff development to their mentors. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

---

**EDUC 797: Advanced Topics in Education.** 1-6 credits.
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education. Notes: May be repeated for credit with GSED approval. Offered by Graduate School of Education (p. 155). May be repeated within the term.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

---

**800 Level Courses**

**EDUC 800: Ways of Knowing.** 3 credits.
Provides understanding of characteristic ways of knowing in various liberal arts disciplines while examining subject matter, scope, key concepts, principles, methods, and theories. Analyzes philosophical traditions underlying educational practice and research. Notes: Required course during first spring semester of study in the program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the PhD program.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDUC 802: Leadership Seminar.** 3 credits.
Intensive study of leadership, emphasizing decision and change processes, and assessment and development of leadership skills. Notes: Required course during first semester of study in the program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**EDUC 803: Teacher Preparation and Professional Development.** 3 credits.
Explores research and current recommended practices related to teacher preparation and professional development. Provides opportunity for practical application with preservice or inservice teachers. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to ECED 803.

**Recommended Prerequisite:** Approval of instructor and acceptance to PhD program.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**EDUC 805: Research and Scholarship in Education.** 2 credits.
Provides an intellectual framework for research and scholarship in education, including consideration of specific scholarship of CEHD faculty as representative of the range of educational scholarship that
make up the educational research community. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Education.
Enrollment is limited to Graduate level students.

Schedule Type: Lecture
EDUC 815: Research Inquiries in International Education. 3 credits. Focuses on the intersection of international education and research methodologies in educational settings. Students will delve into the construction, implementation, and impact of research in international settings or with an internationally-minded perspective. Through critical inquiry into practice, the course offers students the opportunity to develop more sophisticated understandings of the research process in international education settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDUC 880 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar
EDUC 845: Multilingual Learners With Diverse Educational Needs. 3 credits. Examines examine issues surrounding identification, assessment, and instruction of multilingual learners with diverse educational needs. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD Program in Education or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar
EDUC 850: The Study of Teaching. 3 credits. Explores the history and development of the search for teaching effectiveness. The course will trace the various definitions of effectiveness and the methods created to assess effectiveness. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDRS 810.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture
EDUC 851: Research on Teacher Education. 3 credits. Explores the history and development of the search for effectiveness in the preparation of preservice teachers and the continuing professional development of practicing teachers. The students will examine the substance and gaps in the study of the education of educators. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDRS 810.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture
EDUC 852: Technology and Teacher Development. 3 credits. Investigates the latest research and issues related to technology integration in teacher education; includes research supporting the incorporation of technology in staff development for in-service K-12 educators, as well as preservice university coursework. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
EDUC 853: World Perspectives of Teacher Education. 3 credits. Focuses on the cross-cultural analysis of current U.S. and internationally based teacher preparation and continuing professional development pedagogical models, policy reforms, and their historical contexts. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to doctoral program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar
EDUC 854: Working in Schools: Spanning Boundaries/Expanding Roles. 3 credits. Prepares future teacher educators and professional developers for their work in K-12 settings. Examines the principles of clinical field experiences, the foundations of school-university partnerships, and the roles/relationships of all stakeholders engaged in field-based teacher preparation and teacher professional development. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students in the PHD Education or PHD Education and Human Dvlpmt programs.
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
EDUC 860: STEM Education Research and Policy. 3 credits. Examines research on science, technology, engineering, and mathematics (STEM) education issues and education policy issues including the rationale for STEM education, STEM education policy, models of STEM schools in K-12 education, STEM education leadership, informal STEM education, STEM curriculum and instruction, and research in STEM education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDRS 810 (may also be taken concurrently).

Schedule Type: Seminar
EDUC 870: Education Policy: Process, Context, and Politics. 3 credits. Examines public policy decision-making in education at local, state, and national levels, and its impact on education institutions, students, and public. Focuses on theories and methodological approaches, and
resolution of competing policy arguments in political arena. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDUC 871:** *Advanced Policy Issues in Education.* 3 credits.
In-depth analysis of selected education policy issues. Focuses on issue interactions and education-related policy actions by different levels of government. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 870 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDUC 872:** *Social Science Research and Education Policy.* 3 credits.
Focuses on research base used to support education policy actions. Focuses on analyzing strength of this research. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 810,811, and 812 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDUC 873:** *Education Policy: Comparative and International Perspectives.* 3 credits.
Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators in fostering social justice and global awareness. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDUC 874:** *The Achievement Gap.* 3 credits.
Focuses on achievement gap in schools. Students research and analyze gaps in student achievement related to race and ethnicity, limited English proficiency, family background, gender, poverty, and ableism, and practices designed to close the gap. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 880.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDUC 875:** *Contemporary and Emerging Issues in Education Policy.* 3 credits.
Focuses on identifying and analyzing factors that promote new initiatives in education policy agenda. Attention given to nontraditional sources of education policy initiatives. Notes: Must be admitted to PhD program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 870 (concurrent enrollment is also permitted) and admission to the PhD program.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDUC 876:** *Teacher Development and Education Policy.* 3 credits.
Focuses on the impact of policy actions at the local, state, and national levels on teacher preparation and continuing professional development. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 870 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDUC 877:** *Teacher Policy in Historic Perspective.* 3 credits.
Examines the history of policies pertaining to public school teachers in the United States. Evaluate and engage current policy debates by putting the past and present into conversation. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to The PhD in Education program, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**EDUC 878:** *Intercultural Competence: Theory and Research Application to International Education.* 3 credits.
Explores and examines intercultural competence theory and research as a teaching and learning framework in international education. Emphasizes the comparison of alternative models of intercultural competence development, research paradigms using intercultural competence theory in international education, and empirical studies that examine and explore the use of intercultural competence theory in education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 880.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**EDUC 879:** *Language and Second Language Acquisition Research in International Education.* 3 credits.
Examines the theoretical and historical role of language in international education, with special emphasis on the foundations and variables of second language acquisition. Focuses the role of language in cross-cultural and international contexts, the application of language acquisition theories and empirical studies globally. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 880.
EDUC 880: Introduction to International Education. 3 credits. Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators in fostering social justice and global awareness. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Seminar

EDUC 881: Seminar in Bilingual Education: Policy. 3 credits. Examines historical development of education for language minority students in United States, including federal and state legislation and court decisions. Explores policy issues regarding administrative program models, instructional approaches, curricular reform, and assessment policies for language minority students developed in response to legal mandates, legislative decisions, and school reform movement. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Lecture

EDUC 882: Second Language Acquisition: Theory, Research, and Practice. 3 credits. Examines the theoretical foundations of second language acquisition with focus on linguistic, anthropological, sociological, psychological, and educational research through theory and practice. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a major in Education.

Schedule Type: Seminar

EDUC 883: Seminar in Sociocultural Theory. 3 credits. Explores and analyzes the theoretical contributions of sociocultural theory. Focuses on the growing body of contemporary research on literacy, equity in education and emancipatory teaching for diverse students. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to the PhD in Education program or permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate level students.

Schedule Type: Seminar

EDUC 885: History of Education in the United States. 3 credits. Examines the history of education in the United States and explores the social, political, cultural, and economic forces that have shaped reform initiatives. Uses history to engage questions around citizenship, equality, and democracy. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD in Education program, or permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate level students.

Schedule Type: Seminar

EDUC 886: School Reform in the United States: Politics and Policies. 3 credits. Explores a broad range of reform initiatives shaping public education and examines the ways politics infuses education policy. Investigates the disciplinary and methodological frameworks scholars have used to study school reform. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD in Education program, or permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate level students.

Schedule Type: Seminar

EDUC 887: Neighborhood, Community, Education Policy. 3 credits. Explores the intersection of historical, social, political, and economic policies and conditions and communities in the US. Focuses on understanding trends in the formation of neighborhoods and the development of American cities, schools, and communities. Examine the politics and policies of selected neighborhoods and communities through developing community development profiles and proposals. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to PhD in Education program or with permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate level students.

Schedule Type: Lecture

EDUC 890: Doctoral Internship in Education. 1-6 credits. Interns work with appropriate staff member in cooperating school, school system, or other educational institution, agency, or setting. Notes: Requires 100 hours of on-site internship completed over at least a five-week period. Up to 6 credits of EDUC 890 may be applied toward PhD degree requirements. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD program and prior approval of the advisor and PhD director.

Registration Restrictions:
Enrollment limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Internship

EDUC 892: Social Justice and Equity in International Education. 3 credits. Examines ideological, cultural, and systemic structural inequities in various educational settings at national and international levels. Focuses on educational practices that promote equity and social change.
throughout the world. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 880.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDUC 893: Seminar in Educational Anthropology.** 3 credits.
Examines theories and research from educational anthropology and educational sociology to clarify and address contemporary educational issues and concerns. Focuses on U.S. public schools, with comparative materials from other educational settings and societies. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the PhD in Education program or permission of the instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**EDUC 894: Seminar in Multicultural Education.** 3 credits.
Examines knowledge base, policy issues, and curricular and instructional features of multicultural education in United States and other countries. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Ph.D. in Education program or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**EDUC 896: Special Topics in Education.** 3 credits.
Explores selected topics in education across all doctoral specializations. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment limited to students with a major in Education.

Enrollment limited to Graduate level students.

**Schedule Type:** Seminar

**EDUC 897: Independent Study for the Doctor of Philosophy in Education.** 1-6 credits.
Structured learning experience to extend and develop skills and knowledge relative to field of professional expertise. Offered by Graduate School of Education (p. 155). May be repeated within the term.

**Recommended Prerequisite:** Admission to the PhD program and prior approval of advisor and PhD director.

**Registration Restrictions:**
Enrollment limited to students with a major in Education.

Enrollment is limited to students with a major in Education.

Enrollment limited to Graduate level students.

**Schedule Type:** Independent Study

### 900 Level Courses

**EDUC 994: Advanced Internship in Education.** 3 credits.
Internship in setting related to student's major area of study. Requires minimum of 100 hours completed over at least a five-week period. Each intern works with appropriate staff member in cooperating school, school system, or other educational institution or agency. Notes: Internship must be in setting that differs from regular employment. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the PhD program and prior approval of advisor and PhD director.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Internship

**EDUC 998: Doctoral Dissertation Proposal.** 1-6 credits.
Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to candidacy in the PhD program, successful completion of the doctoral qualifying exam, and EDRS 810, 811, and 812 or their equivalents.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Dissertation

**EDUC 999: Doctoral Dissertation Research.** 1-9 credits.
Provides continued faculty assistance on individual basis to complete dissertation planned in EDUC 998 and initiate new projects. Notes: Requires successful completion of EDUC 998 and faculty approval of proposal. Offered by Graduate School of Education (p. 155). May be repeated within the degree.

**Recommended Prerequisite:** EDUC 998 and faculty approval of proposal.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to students with a major in Education.

Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Dissertation
Education Instructional Technology (EDIT)

200 Level Courses
EDIT 201: Strategies for Online Learning Success. 1 credit. Helps students assess their readiness for online learning using effective strategies for online interaction and activities designed to promote successful online experiences. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

400 Level Courses
EDIT 401: Introduction to Learning Technologies. 3 credits. Provides an overview of the field of learning technologies, including its history, theoretical foundations, design processes, and technologies. Illustrates how learning technologies can be applied in a variety of teaching and training contexts including e-learning, educational software, instructional design, corporate training, and curriculum development. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

EDIT 413: Technology, Society, and the Culture of Learning. 3 credits. Explores the relationship between technological change and education reform initiatives. Emphasis will be placed on the ways in which technological and social changes influence and shape the goals and outcomes of the K-12 educational process. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDUC 300.

Schedule Type: Lecture

EDIT 426: Web Accessibility and Design. 3 credits. Provides instruction for accessible web design using HTML and existing authoring tools. Section 508 web accessibility standards and assistive technologies to access the computer will be explored. Notes: Class may be delivered via distance education. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

500 Level Courses
EDIT 504: Introduction to Educational Technology. 3 credits. Examines uses of and issues in educational technology. Explores curriculum integration of technology, and focuses on learning and using commercially available applications software. Notes: Field experience in public schools will be required during course. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 526: Web Accessibility and Design. 1-3 credits. Develops understanding of principles of universal web design. Students apply this understanding by designing and developing accessible web site using web authoring tools. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDSE 526.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 530: Scripting and Programming. 2 credits. Enables development of computer-based educational materials using widely known educational scripting language. Students explore basic authoring capabilities, and learn to apply those capabilities by designing and producing materials using commands, procedures, and functions of scripting language. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 10 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 561: Teaching with Telecommunications. 1 credit. Develops expertise with various aspects of telecommunications tools, and models ways these tools can be used for personal learning and integration into teaching/learning process. Addresses e-mail, Internet, web, and online databases. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 562: Teaching with Databases. 1 credit. Develops expertise with various aspects of databases, and models ways databases can be integrated into teaching and learning process. Focuses on strategies for searching, sorting, creating, and communicating with information, much of which is structured by variety of online and offline databases. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EDIT 563: *Teaching with Graphics*. 1 credit.
Explores various graphic programs available for constructing visual images. Addresses draw and paint programs, scanning and editing images, and using visual communication to support K-12 learning. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Recommended Prerequisite:** EDIT 563.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EDIT 564: *Teaching with Web 2.0*. 2 credits.
Develops expertise with social, cognitive, and learning implications of film, video, and television. Engages students in process of planning, storyboarding, and filming with video. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDIT 561.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EDIT 565: *Teaching with Educational Software*. 1 credit.
Explores variety of educational software, including simulations, problem-solving software, computational tools (calculators, probeware, LOGO, and spreadsheets), and drill-and-practice/integrated learning systems. Emphasizes ways these programs support K-12 teaching and learning processes. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 2 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EDIT 566: *Teaching with Multimedia/Hypermedia*. 2 credits.
Examines the various aspects of web-based learning and the ways these tools can be integrated into the teaching/learning process. The course is taught online. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDIT 561.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EDIT 571: *Visual Design and Applications*. 1-3 credits.
Provides basic knowledge of the range of capabilities of available graphic and visual design applications. Students learn to cultivate effective visual design practices for creating instructional products. Offered by Graduate School of Education (p. 155). May be repeated within the term.

**Registration Restrictions:**
Learn to create instructional products using the latest e-learning design applications. Provides basic knowledge of the range of capabilities of available audio and video design applications. Students learn to cultivate effective audio and video design practices for creating instructional products. Offered by Graduate School of Education (p. 155). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 572: Digital Audio/Video Design and Applications.** 1-3 credits.
Provides basic knowledge of the range of capabilities of available audio and video design applications. Students learn to cultivate effective audio and video design practices for creating instructional products. Offered by Graduate School of Education (p. 155). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 573: Project Management.** 1-3 credits.
Explores project management principles and applications used to manage, plan, and track large-scale, complex instructional design projects. Offered by Graduate School of Education (p. 155). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 574: Social Media and Digital Collaboration Applications.** 1-3 credits.
Provides basic knowledge of the range of capabilities of available social networking, teleconferencing, and collaboration applications. Students learn to integrate the latest information and communication technologies into the creation of instructional products. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 575: e-Learning Design Applications.** 1-3 credits.
Provides basic knowledge of available applications for creating, delivering, managing and tracking e-learning experiences. Students learn to create instructional products using the latest e-learning design applications. Notes: Content customized to particular software tool presented. Offered by Graduate School of Education (p. 155). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 576: Mobile Learning and Applications.** 1-3 credits.
Explores current best practices and techniques required to deliver effective learning content through mobile devices. Students learn pedagogical approaches to mobile learning as well as investigate various mobile platforms and applications. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 3 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 590: Educational Research in Technology.** 3 credits.
Focuses on developing skills, insights, and understanding basics to performing research with emphasis on interpretation, application, critique, and use of findings in educational settings. Students develop expertise in action research methodology, design, and implementation. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 597: Special Topics in Education.** 1-6 credits.
Provides advanced study on selected topic or emerging issue in American or international education. Notes: May be repeated for credit with GSE permission. Offered by Graduate School of Education (p. 155). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**600 Level Courses**

**EDIT 601: Instructional Design and Technology (IDT) Portfolio.** 1 credit. Enables students to create and publish digital portfolio that demonstrates effective and meaningful integration and synthesis of instructional design and technology concepts, principles, and competencies learned across program courses at mid-degree program point. Notes: To be taken at mid-degree program point with minimum 12 and maximum 15 credits. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Minimum of 12 credits and a maximum of 15 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 611: Innovations in e-Learning.** 3 credits. Explores leading-edge learning technologies and their integration into the e-learning design process. Hands-on activities focus on technology planning, selection, implementation, and evaluation utilizing instructional design best practices. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 641: Understanding Virtual Schools.** 1 credit. Develops knowledge about online learning for K-12 students. Examines history and trends of online learning, and characteristics of K-12 virtual learners. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 642: The Online Academy.** 1 credit. Develops knowledge about Mason’s virtual high school. Focuses on design model with attention to representative problems, performances of understanding, communities of practice, and mentors. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDIT 641. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 643: Online Mentoring I: Building Virtual Relationships.** 1 credit. Assists in developing online mentoring skills related to integral role that building relationships plays in success of online learning. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 644: Online Mentoring II: Promoting Self-Regulation.** 1 credit. Assists in developing online mentoring skills related to integral role that self-regulation plays in success of online learning. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDIT 643.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 645: Online Mentoring III: Conceptual Learning.** 1 credit. Assists in developing online mentoring skills related to role of support of conceptual and content understanding in success of online learning. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDIT 644.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
700 Level Courses

EDIT 701: Advanced Instructional Design and Technology (IDT) Portfolio. 1 credit.
Enables students to create and publish a digital portfolio that demonstrates effective and meaningful integration and syntheses of instructional design and technology concepts, principles, and competencies learned across program courses at end-degree program point. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: (EDIT 601).  
B Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

EDIT 704: Instructional Technology Foundations and Theories of Learning. 3 credits.
Reviews practical and pedagogical issues related to design and development of technological instruction. Emphasizes investigating instructional design as a field and community of practice, and reviewing core learning theory constructs applicable to design of instructional technology. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

EDIT 705: Instructional Design. 3 credits.
Helps students analyze, apply, and evaluate principles of instructional design to develop education and training materials spanning a wide range of knowledge domains and instructional technologies. Focuses on variety of instructional design models, with emphasis on recent contributions from cognitive science and related fields. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDCI 705.

Recommended Prerequisite: Teaching or Training Experience or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

EDIT 706: Business of Learning Design and Technologies. 3 credits.
Explores the business issues underlying the selection, implementation and evaluation of technology-based learning interventions. Focuses on developing the skills necessary to improve performance and achieve measurable, positive change that supports an organization’s strategic goals. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDIT 705 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

EDIT 710: Online Teaching Essentials. 1 credit.
Explores the essential concepts and skills to effectively teach online courses. Introduces the topics of designing and managing online courses, assessing online students’ knowledge and skills, facilitating online student collaboration and communication, and establishing a supportive online learning community. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

EDIT 730: Advanced Instructional Design. 3 credits.
Provides students with the knowledge and skills for designing highly contextualized and engaging problem-solving learning environments using a grounded, theory-based design approach. Emphasizes the design of technology supported learning environments using a variety of pedagogical models. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDIT 705 or EDCI 705.  
B Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

EDIT 732: Analysis and Design of Technology-Based Learning Environments. 3 credits.
Provides students with the knowledge and skills for designing highly contextualized and engaging problem-solving learning environments using a grounded, theory-based design approach. Emphasizes the design of technology supported learning environments using a variety of pedagogical models. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDIT 730 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

EDIT 750: Learning Technologies and Strategies for Innovation. 3 credits.
Explores formal and non-formal learning technologies, models, theories, and strategies that support enterprise learning and performance. Assesses the potential of learning technologies to innovate the practice of the organization. Note: Should be taken in final year of degree work. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**EDIT 751: Overview of Learning Analytics and Big Data.** 3 credits.
Examines the tools, technologies and methods for capitalizing on data stored in enterprise-wide information systems to support executive-level learning and performance support decision-making. Focuses on demonstrating the bottom line business value of learning through evidence-based talent needs. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

**Schedule Type:** Lecture

**Recommended Prerequisite:** Admission to Executive Chief Learning Officer (ECLO) Certificate Program, or permission of advisor.

**EDIT 752: Design and Implementation of Technology-based Learning Environments.** 3 credits.
Students design and produce multimedia/hypermedia applications based on current theory and research in instructional design and cognitive science. Examines user needs, information models, structure, and media selection and uses to inform design and production of final project. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
**Required Prerequisite:** (EDIT 732^B^).

^B^ Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 760: Online Teachers and Learners.** 1 credit.
Examines the attributes of teachers and K-12 learners with emphasis on attitudes, behaviors, and adaptations required by online teachers and learners. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 761: Models of Online Learning.** 2 credits.
Provides opportunities for learners to identify, explore, and evaluate a range of educational models for K-12 online learning. These include blended learning (web-enhanced, web-supported), the flipped classroom, mentor-mentee dyad, group collaborative, synchronous, asynchronous, parent directed e-learning, mobile learning, and web-delivered programmed instruction. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
separation of teacher-learner and learner-learner. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDIT 767:** Designing K-12 Online Learning. 3 credits.
Develops frameworks for designing and structuring online learning opportunities and emphasizes course content and learning outcomes, selection of appropriate online models, and organization of online lessons and courses, online learning tools, and assessment and evaluation strategies. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MED in Curriculum and Instruction Concentration in Blended and Online Learning in Schools.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDIT 768:** K-12 Online Design I. 1 credit.
Develops frameworks for designing and structuring online learning opportunities and emphasizes course content and learning outcomes, selection of appropriate online models, and organization of online lessons and courses, online learning tools, and assessment and evaluation strategies. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MED in Curriculum and Instruction Concentration in Blended and Online Learning in Schools.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDIT 769:** K-12 Online Design II. 1 credit.
Focuses on the creation of online courses appropriate for K-12 learners and culminates in comprehensive design documents that detail goals, assessments, learning tools, and detailed scripts or documents ready for the production phase. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MED in Curriculum and Instruction Concentration in Blended and Online Learning in Schools.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDIT 770:** Principles of School-Based Design. 3 credits.
Develops and applies a comprehensive set of digital design strategies appropriate for creating engaging learning opportunities for students in PreK-12 environments. Emphasizes school-based design principles, design processes, and design patterns at the intersection of technology, teaching, and learning. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Corequisite:** EDIT 781.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EDIT 771:** Designing for Information Using. 3 credits.
Explores ways in which PreK-12 teachers can design digital environments that connect learners' ability to search, sort, create, communicate, and synthesize information and information resources with learning activities. Emphasizes teachers' ability to design for digital citizenship and information use. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Corequisite:** EDIT 780.
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 782: Designing for Literacy. 3 credits.
Explores 21st century definitions of literacy related to multiple symbolic environments (e.g. visual, numeric, alphabetic). Examines the practice of design that integrates technology to promote literacy competence across media and across PreK-12 abilities and interests. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDIT 780 and EDIT 781.

Recommended Corequisite: EDIT 783.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 783: Designing for Problem Solving. 3 credits.
Examines problem solving as an educational goal, as a cognitive process, and as a series of strategies and habits of mind. Emphasizes and provides practice in the design of digital problem solving environments where technology affords opportunities at the intersection of content learning and problems solving. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDIT 780 and EDIT 781.

Recommended Corequisite: EDIT 782.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 784: Designing for Community Participation. 3 credits.
Explores the impact of social media, globalization, collaboration, and diversity as they influence, enable, and challenge learners’ ability to participate in a variety of community settings. Emphasizes the practice of design strategies to prepare PreK-12 learners to use technology for learning and participating in varied and diverse communities. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDIT 782 and EDIT 783.

Recommended Corequisite: EDIT 785.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 785: Designing School-Based Digital Learning. 3 credits.
Develops frameworks for designing and structuring school-based digital learning. Emphasizes the interaction of design, technology, and content learning to influence teachers' practice in service of PreK-12 learners' abilities to problem solve, use information, participate productively in communities, become knowledgeable, and effectively communicate. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDIT 782 and EDIT 783.

Recommended Corequisite: EDIT 784.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 786: Design and Teacher Leadership. 3 credits.
Investigates how a design lens intersects with and informs PreK-12 teacher leadership and school-based learning initiatives. Examines a variety of PreK-12 teacher leadership roles and design-based leadership as an integral part of classroom, grade-level, school, and community practice. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: DDLS certificate or completion of MEd in Curriculum and Instruction Concentration: Integration of Technology in Schools or Equivalent.

Recommended Corequisite: EDIT 791.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 787: Coaching Advocacy Digital Learning. 3 credits.
Investigates how fluency as coaches and mentors enables PreK-12 teacher leaders to support colleagues in the design of classroom and school-based digital learning. Explores advocacy as a strategy to engage colleagues and communities in the design of school-based initiatives related to teaching, learning, technology. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDIT 786 and EDIT 791.

Recommended Corequisite: EDIT 792.

Schedule Type: Lecture

EDIT 790: Practicum in Instructional Technology. 1-6 credits.
Provides supervised practice in applying knowledge and skills of student's chosen track through placement in appropriate work setting. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

EDIT 791: Project Development Practicum I. 1-6 credits.
Engages students in the application of design and production process for the solution of learning challenges with particular emphasis on
the design and development phase of the design process. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** EDIT 768.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 792:** Project Development Practicum II. 1-6 credits.
Facilitates the application of design and production processes to the solution of learning challenges with particular emphasis on the implementation and evaluation phase of the design process. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** EDIT 769.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDIT 797:** Advanced Topics in Education. 1-6 credits.
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education. Notes: May be repeated for credit with CEHD approval. Offered by Graduate School of Education (p. 155). May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**800 Level Courses**

**EDIT 801:** Nature and Process of Design. 3 credits.
Examines multi- and cross-disciplinary perspectives on the nature and process of designing and developing learning technologies. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Seminar

**EDIT 802:** Cognition and Technology: A Multidisciplinary Approach. 3 credits.
Examines learning interactions between cognition and technology using multiple disciplinary perspectives including, cognitive science, psychology, neuroscience, education, design theory, instructional design, technology design, anthropology, sociology, information science, philosophy, semiotics, and linguistics. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Lecture

**EDIT 803:** Design-Based Research. 3 credits.
Provides an introduction to systematic cycles of design-based research in education. Applicable to all content domains to explore cycles of research within design, development and implementation of educational and training interventions. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDIT 801

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDIT 891:** Design Research Practicum. 1-9 credits.
Applies multiple design research cycles to an identified research problem to systematically test and improve technology-based product interventions or other curriculum/training strategies or materials in order to systematically develop knowledge related to teaching, learning and/or training in context. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 9 credits.

**Recommended Prerequisite:** EDRS 811, EDRS 812, and EDIT 803 or equivalent.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Internship

**EDIT 895:** Emerging Trends in Learning Technologies. 3 credits.
Covers selected emerging trends in learning technologies. Examines ways learning technologies provide infrastructure for creating, managing, and evaluating innovative types of teaching-learning environments. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Ph.D. program or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Seminar

**Education Leadership (EDLE)**

**400 Level Courses**

**EDLE 412:** Schools and the Law. 3 credits.
Provides an extensive overview of legal and ethical issues in schools. In the course, students will review and analyze key legal and ethical principles, read court decisions, and examine federal and state statutes. Offered by Graduate School of Education (p. 155). May not be repeated for credit.
Registration Restrictions:
Required Prerequisites: (EDUC 300\textsuperscript{C} or L300).
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Lecture

EDLE 420: Organization and Management of Schools. 3 credits.
Studies basic issues in leadership, organization, and governance of schools. Explores theories and models of leadership how leaders conceptualize school organization, with an emphasis on distributed leadership in professional environments, systems thinking, and organizational change. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (EDUC 300\textsuperscript{C} or L300).
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Lecture

500 Level Courses

EDLE 597: Special Topics in Education. 1-6 credits.
Provides advanced study on selected topic or emerging issue in American or international education. Notes: May be repeated for credit with GSE permission. Offered by Graduate School of Education (p. 155). May not be repeated within the degree.

Recommended Prerequisite: Admission to program in GSE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses

EDLE 612: Education Law. 3 credits.
Provides legal foundations of U.S. public schools. Examines general principles of statutory and case law, and applies judicial decisions to educational environments. Focuses on legal responsibilities, constraints, and opportunities of public school officials. Includes component of Special Education law. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDLE 620\textsuperscript{B}, 690\textsuperscript{B} and 791\textsuperscript{IP}.
\textsuperscript{B} Requires minimum grade of B-.
\textsuperscript{IP} Requires minimum grade of IP.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Education Leadership.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDLE 614: Managing Financial and Human Resources. 3 credits.
Explores basic functions in financial and human resource management. Examines legalities, ethics, and politics of resource procurement and allocation. Provides experiences to help students better understand tasks typically performed by school leaders. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDLE 620\textsuperscript{B}, 690\textsuperscript{B} and 791\textsuperscript{IP}.
\textsuperscript{B} Requires minimum grade of B-.
\textsuperscript{IP} Requires minimum grade of IP.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Education Leadership.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDLE 616: Curriculum Development and Evaluation. 3 credits.
Examines the relationship of the written, taught, and tested curriculum and identifies critical leadership decisions that can positively impact student achievement. Identifies components of effective curriculum guides. Mini-document for personal use is constructed. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (EDLE 620\textsuperscript{B}, 690\textsuperscript{B} and 791\textsuperscript{IP}).
\textsuperscript{B} Requires minimum grade of B-.
\textsuperscript{IP} Requires minimum grade of IP.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Education Leadership.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Enrollment is limited to students with a major in Education Leadership.
Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDLE 618: Superevision and Evaluation of Instruction. 3 credits.
Provides a theoretical and practical overview of the supervision and evaluation of instruction. Introduces the domains of supervision and inquiry into current issues and best practices in supervision. Uses a variety of interactive exercises to assist in the development of practical skills for using the clinical process and developmental approach to supervision. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDLE 620B, 690B and 791IP.
B Requires minimum grade of B-.
IP Requires minimum grade of IP.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Education Leadership.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDLE 620: Organizational Theory and Leadership. 3 credits.
Studies basic organizational theories and models of leadership and management. Emphasizes shared leadership in professional environments, communication skills, systems thinking, and personal and organizational change. Bridges theory to practical applications in educational settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Corequisite: Application to the Education Leadership program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDLE 624: Contemporary Issues in Education Leadership. 3 credits.
Examines current and emerging issues and trends impacting education. Includes demographic shifts; globalization; technology; data-based decision making; inclusion of diverse learners in American schools; and recent research on student achievement when influenced by race, gender, and poverty. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Education Leadership.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDLE 635: Governance and the Independent School Boardroom. 3 credits.
Provides an overview of the best practices and workings of the independent school board and develops skills, insights, and understanding of how school heads/directors can “manage up” to accomplish their goals and objectives. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDLE 620 and EDLE 690.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDLE 636: Adult Motivation and Conflict Management in Education Settings: A Case Study Approach. 3 credits.
Uses case studies and simulations to examine conflict mediation and resolution skills, and safety and security issues. Focuses on character and ethics education in schools, coaching and mentoring, and adult motivation to support positive behaviors in work settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Education Leadership.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDLE 690: Using Research to Lead School Improvement. 3 credits.
Develops skills, insights, and understanding of how leaders use research to improve schools, with emphasis on the use of assessment and research data to identify school improvement needs and to design school improvement projects. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDLE 620B.
B Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Education Leadership.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

700 Level Courses

EDLE 770: Introduction to Education Leadership. 3 credits.
Introduces the study of education leadership, theoretical traditions in leadership studies, and scholarship on leadership and organizational change. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to Ph.D. in Education Program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

EDLE 791: Internship in Educational Leadership. 3 credits.
Offers wide range of practical experiences and professional challenges in authentic educational settings. Activities emphasize strategic, instructional, organizational, political, and community leadership. Notes: Course must be taken in second term of program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDLE 620 or EDSE 743 (may be taken concurrently).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

EDLE 792: Internship in Independent School Leadership. 3 credits.
Offers a wide range of practical and professional experiences for aspiring and current school heads. Emphasizes strategic, instructional, organizational, political, and community leadership in the independent school context. Note: Course must be taken in the second term of program. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDLE 620.

Recommended Corequisite: EDLE 690.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

EDLE 801: Contemporary Organization Theory. 3 credits.
Engages students in the study of major organization theories that inform educational leadership research. Students use theory to help inform their own research interests. Students begin work on analytical literature review. Notes: May be taken as corequisite with EDLE 802. First in three-course sequence. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to Ph.D. in Education Program.

Recommended Corequisite: EDLE 802.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Emphasizes economic foundations of U.S. education, and evolution of school, district, and state leadership. Students complete work on analytical literature review. Notes: Third in a three-course sequence. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDLE 801, EDLE 802.

Recommended Prerequisite: EDLE 801, EDLE 802.

Registration Restrictions:
Enrollment is limited to Graduate level students.

EDLE 805: Conceptual Frameworks in Education Leadership. 3 credits.
Introduces three different disciplinary perspectives on education leadership, and helps identify and articulate different conceptual frameworks. Major focus is designing a conceptual framework that informs research questions. Offered by Graduate School of Education (p. 155). May not be repeated for credit.
Recommended Prerequisite: Admission to the Ph.D. in Education Program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

EDLE 816: Instructional Leadership-Curriculum Policy and Practice. 3 credits.
Focuses on curriculum and instruction theory, policy, and practice with research emphasis on instructional leadership. Students develop research proposals to investigate instructional leadership in schools and districts, and relate instructional leadership to their own specific research interests. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to Ph.D. in Education Program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

EDLE 818: Instructional Leadership-Supervision Policy and Practice. 3 credits.
Introduces current topics and research in supervision and instruction, including theory and empirical work focused on instruction, teacher learning, teacher evaluation, and instructional leadership. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to Ph.D. in Education Program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

EDLE 895: Emerging Issues in Administration and Supervision. 3 credits.
Covers selected emerging issues in educational leadership. Students engage in research, study, discussion, and writing about various topics selected for study. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to PhD program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Education Research (EDRS)

500 Level Courses

EDRS 531: Educational and Psychological Measurement. 3 credits.
Emphasizes techniques and principles used in the construction, administration, and quantification of measuring devices for evaluation purposes. Discusses interpretation of standardized tests of ability, aptitude, achievement, interest, and personality. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDRS 590 or equivalent experience.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDRS 590: Education Research. 3 credits.
Develops skills, insights, and understanding to perform research, with emphasis on interpreting and applying research results. Critiques research, and uses findings in educational settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDRS 590 or equivalent experience.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses

EDRS 620: Quantitative Inquiry in Education. 3 credits.
Examines fundamental concepts and methods of statistics as applied to educational problems, including descriptive and inferential statistics. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDRS 590 or equivalent experience.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDRS 621: Qualitative Inquiry in Education. 3 credits.
Focuses on basic application of naturalistic research methods. Examines major theoretical frameworks and qualitative research techniques, which include content analysis, coding, and interpretation of data. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDRS 590 or equivalent experience.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**EDRS 630: Educational Assessment.** 3 credits.
Examines research theory and practice relevant to assessments. Focuses on assessment strategies for students including developing skills to select, score, and interpret educational assessments. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions**: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**EDRS 631: Program Evaluation.** 3 credits.
Focuses on perspectives of existing and emerging issues, theories, and models of program evaluation. Involves implementation of program evaluation in related fields and school districts. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions**: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**700 Level Courses**

**EDRS 797: Advanced Topics in Education.** 1-6 credits.
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education. Notes: May be repeated for credit with CEHD approval. Offered by Graduate School of Education (p. 155). May be repeated within the degree.

**Registration Restrictions**: Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**800 Level Courses**

**EDRS 810: Problems and Methods in Education Research.** 3 credits.
Advanced course in interpreting and applying education research methods. Emphasizes comparison of alternative philosophies of research, ways of formulating questions and hypotheses, research plans, and analysis procedures. Students evaluate existing studies, and investigate a range of research approaches. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to CTCH 710, CTCH 801.

**Recommended Prerequisite:** Admission to the PhD program or permission of instructor.

Emphasizes advanced methods of conducting research using quantitative methods of data collection, and analysis appropriate for research in education. Includes design of experimental and quasiexperimental research studies, and methods of analysis appropriate to these studies, including analyzing variance and multiple linear regression. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions**: Required Prerequisite: (EDRS 810^B_).

^B_ Requires minimum grade of B-.

Enrollment limited to students in the PHD Education or PHD Music Education programs.

Enrollment is limited to Graduate level students.

**Schedule Type**: Lecture

**EDRS 812: Qualitative Methods in Educational Research.** 3 credits.
Teaches how to apply qualitative data collection and analysis procedures in educational research, including ethnographic and other field-based methods, and unobtrusive measures. Notes: Emphases vary depending on student interests and needs. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions**: Required Prerequisite: (EDRS 810^B_).

^B_ Requires minimum grade of B-.

Enrollment limited to students in the PHD Education or PHD Music Education programs.

Enrollment is limited to Graduate level students.

**Schedule Type**: Lecture

**EDRS 818: Critical Discourse Analysis in Education Research.** 3 credits.
Prepares students with a working knowledge of discourse analysis and its application to ethnographic and qualitative research in education. Focuses on critical discourse analysis as a resource to improve classroom interaction and transform educational practice and as an analytic tool for a social analysis of education in a wide variety of local, national and international education contexts and settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 810 EDRS 811 EDRS 812 or permission of instructor.

**Registration Restrictions**: Enrollment limited to Graduate level students.

**Schedule Type**: Seminar
EDRS 820: Evaluation Methods for Educational Programs and Curricula. 3 credits.
Explores development and types of current systems and models for evaluating educational programs and curricula. Emphasizes evaluation needs and problems of public and private elementary and secondary schools, and colleges and universities. Also considers needs of government agencies, industry, and health-related organizations. Notes: Prior completion of EDRS 811 and 812 helpful but not required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDRS 810 B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

EDRS 821: Advanced Applications of Quantitative Methods. 3 credits.
Advanced study of applications of quantitative methods in educational research, reinforcing and building on concepts and skills acquired in EDRS 811. Uses modular approach, and provides advanced study of techniques appropriate to survey research, group-experimental and quasi-experimental research, selected multivariate procedures and factor analysis, and quantitative synthesis (meta-analysis) of research. Combines text reading assignments, critiques, and discussion of relevant journal articles; and application activities. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDRS 810 B and 811 B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

EDRS 822: Advanced Applications of Qualitative Methods. 3 credits.
Advanced seminar devoted to study of current topics in qualitative research. Deals with cutting-edge information on selected advanced topics in qualitative research, and provides opportunities to apply new skills and knowledge to projects related to students’ interests. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDRS 810 B and 812 B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

EDRS 823: Advanced Research Methods in Single Subject/Case Design. 3 credits.
Prepares students to conduct research using single subject design and single case study design. Provides understanding of salient features as well as advantages, disadvantages of these research methodologies. Students critique and analyze published research using these methodologies. Provides opportunities to apply these methodologies to research questions related to student interests. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDRS 810 B, 811 B and 812 B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

EDRS 824: Mixed Methods Research: Integrating Qualitative and Quantitative Approaches. 3 credits.
Advanced research seminar that integrates qualitative and quantitative approaches, methods, and data in a single study. The course covers the paradigms and "mental models" that inform both approaches, and the ways in which qualitative and quantitative goals, questions, methods, and interpretive strategies can be productively combined. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDRS 810 B, 811 B and 812 B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

EDRS 825: Advanced Research Methods in Self-Study of Professional Practice. 3 credits.
Prepares students to conduct research using the self-study research methodology, a qualitative research approach for systematically examining one’s practitioner role for improvement-aimed purposes with contributions to the educational field and knowledge base. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: Admission to PhD in Education program.

Registration Restrictions:
Required Prerequisites: EDRS 810 B, 811 B and 812 B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

EDRS 826: Qualitative Case Study Methods. 3 credits.
Advanced research seminar on qualitative case study design and application in educational research. Topics include descriptive, theoretical, evaluation, and policy case study design and methods. Students will conduct and critique a case study appropriate to their discipline. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDRS 812 B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

EDRS 827: Introduction to Measurement and Survey Development. 3 credits.
Develops knowledge and skills related to measurement and survey development and use in research for education, psychology, and related fields. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDRS 811 B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Graduate.
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDRS 828: Item Response Theory.** 3 credits.
Develops knowledge and skills related to Item Response Theory with application in the context of education, psychology, and related fields. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDRS 821<sup>B</sup> or 827<sup>B</sup>.
<sup>B</sup> Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDRS 830: Hierarchical Linear Modeling.** 3 credits.
Analyzes nested data structures (e.g. students within classrooms) as well as student growth. Students will learn through reading assignments, lecture and applications using a computer program for data analysis. Students will be expected to critically read multilevel methods used in published research, analyze data, and provide written report of results in APA format. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** EDRS 821<sup>B</sup>.
<sup>B</sup> Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDRS 831: Structural Equation Modeling.** 3 credits.
Focusing on the development of knowledge and skills related to structural equation modeling and research applications in education, psychology, and related fields. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 811.

**Registration Restrictions:**
**Required Prerequisite:** EDRS 821<sup>B</sup>.
<sup>B</sup> Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDRS 832: Document Analysis and Archival Research.** 3 credits.
Examines the methodological foundations of and analytical approaches to document-based research. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDRS 810<sup>B</sup>, 811<sup>B</sup> and 812<sup>B</sup>.
<sup>B</sup> Requires minimum grade of B-.

Enrollment limited to students in the PHD Education or PHD Education and Human Dvlpmnt programs.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**EDRS 833: Participatory Action Research.** 3 credits.
Explores theoretical concepts associated with participatory action research and teaches how to apply participatory data collection and analysis procedures in educational research. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** EDRS 812<sup>B</sup>.
<sup>B</sup> Requires minimum grade of B-.

**Schedule Type:** Lecture

**EDRS 836: Narrative Inquiry.** 3 credits.
Teaches theory behind narrative inquiry and application of narrative data collection and analysis procedures in educational research. Builds students’ abilities to conduct narrative data collection and analysis. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 812.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDRS 850: Grounded Theory.** 3 credits.
Prepares students to apply and critique grounded theory and related methods. Includes various approaches to design with particular attention to analysis techniques and theoretical selection, sensitivity, and saturation. Recommends students obtain IRB approval prior to beginning this course. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 822.

**Schedule Type:** Lecture

**EDRS 895: Qualitative Methods Capstone Project.** 3 credits.
Provides the opportunity to formulate, engage and complete a qualitative research project, research internship, or pilot study of their choice under faculty supervision in an advanced and specialized seminar. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 812, EDRS 822.

**Registration Restrictions:**
Enrollment is limited to students with a major in Qualitative Research.

**Schedule Type:** Research

**EDRS 897: Special Topics in Research Methods.** 3 credits.
Develops knowledge and skills of selected advanced research methods topic(s). Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students in the PHD Education or PHD Education and Human Dvlpmnt programs.

Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Educational Psychology (EDEP)**

### 300 Level Courses

**EDEP 350: Perspectives on Achievement Motivation.** 3 credits. Focuses on theories and concepts of human achievement motivation; and examines strategies, techniques and interventions that promote and sustain motivation in formal and informal learning contexts. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Schedule Type:** Lecture

### 400 Level Courses

**EDEP 402: Brain, Behavior, and Neuroimaging in Children.** 3 credits. Focus on research regarding the development of cognitive processes in children, their neurobiological substrates, and the imaging technology used to explore the functioning brain. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** At least junior standing or sophomore honors/ university scholar candidate.

**Schedule Type:** Lecture

**EDEP 405: The Neuroscience of Learning and Cognition.** 3 credits. Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDEP 655.

**Recommended Prerequisite:** Junior standing or sophomore honors/ university scholar candidate.

**Schedule Type:** Lecture

### 500 Level Courses

**EDEP 550: Theories of Learning and Cognition.** 3 credits. Explores theoretical perspectives on learning and cognition, and relation of these theories to construction of learning environments, student motivation, classroom management, assessment, and technology to support teaching and learning. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDEP 551: Principles of Learner Motivation.** 3 credits. Focuses on theories and concepts of human motivation; and examines strategies, techniques, and interventions that promote and sustain learner motivation. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:**

**Schedule Type:** Lecture

**EDEP 552: Brain, Behavior, and Neuroimaging in Children.** 3 credits. Focus on research regarding the development of cognitive processes in children, their neurobiological substrates, and the imaging technology used to explore the functioning brain. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** At least junior standing or sophomore honors/ university scholar candidate.

**Schedule Type:** Lecture

**EDEP 553: Data-Driven Decision Making: Analysis and Interpretation of Assessment Data.** 3 credits. Focusing on the development of knowledge and skills related to analyzing and interpreting educational assessment data. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDEP 592.
Schedule Type: Lecture

EDEP 594: Data-Driven Decision-Making Application in Education Contexts. 3 credits.
Applies fundamental knowledge of assessment using team-based projects. Incorporates development of assessments and the analysis, interpretation, and reporting of assessment data to inform curriculum and instruction based on the context-specific needs of educators. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDEP 593.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDEP 597: Special Topics in Educational Psychology. 1-3 credits.
Covers critical current and emerging issues in educational psychology across the span of human development with an emphasis on research methodology and evidence-based practice. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

600 Level Courses

EDEP 601: Creativity and Cognition in the Arts and Media. 3 credits.
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to AVT 606.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDEP 632: Human Development. 3 credits.
Examines the course of human development from early childhood to adulthood within the context of educational psychology. Emphasizes principles of research in human development and the major areas of cognitive, linguistic, and social contexts of development as they pertain to learners in schools and beyond. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDEP 550.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDEP 650: High-Stakes Assessment and Accountability Systems. 3 credits.
Focuses on school effectiveness, assessment tools, and accountability models on state and national levels. Explores issues and methods relevant to educational policy, standardized testing, and classroom assessment. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDEP 652: Process of Learning and Development. 3 credits.
Explores different theoretical perspectives on learning and development. Focuses on historical and contemporary theories of learning and cognitive development, and examines current research and its application in educational settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDEP 550.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDEP 653: Culture and Intelligence. 3 credits.
Explores different theoretical perspectives on intelligence as they relate to individual and cultural differences. Examines issues related to heritability and measures of intelligence, and intelligence in the cultural context. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDEP 550.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDEP 654:** *Learning, Motivation, and Self-Regulation.* 3 credits. Focuses on theories and research on self-regulation of academic learning. Presents multidimensional conceptual framework for studying and applying self-regulation in educational contexts. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDEP 550, 551.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDEP 655:** *The Neuroscience of Learning and Cognition.* 3 credits. Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDEP 405.

**Recommended Prerequisite:** EDEP 550

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EDEP 798:** *Directed Inquiry in Educational Psychology.* 1-3 credits. Offers a capstone experience to students after completion of majority of program coursework with the exception of 6 credit hours. Enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology. Offered by Graduate School of Education (p. 155). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Thesis chair approval and completion of coursework in the MS in Educational Psychology exclusive of 6 credit hours.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**800 Level Courses**

**EDEP 820:** *Teaching, Learning, and Cognition.* 3 credits. Focuses on foundational educational psychology theories including cognitive, social, and constructivist themes and their implications for improving instructional practices and learning at all developmental levels and content areas. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 800, EDUC 805, EDE 802, and EDRS 810.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDEP 821:** *Sociocultural Processes in Learning, Instruction, and Motivation.* 3 credits. Examines processes by which social, cultural, and linguistic variables influence human behavior. Focuses on differences within and between cultural groups related to student’s learning and achievement in educational settings. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 800, EDUC 805, EDLE 802, and EDRS 810.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDEP 822:** *Advanced Learning, Motivation, and Self-Regulation.* 3 credits. Examines development of self-regulatory and motivational processes as they relate to educational practice. Emphasizes how processes influence students’ self-motivation and achievement in various domains. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 800, EDUC 805, EDLE 802, and EDRS 810.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**EDEP 823:** *Research Project in Educational Psychology: Sequence I.* 3 credits. Focuses on development and implementation of research studies in educational psychology. Students acquire skills regarding developing research questions and a sound methodological approach for their study.
Electrical and Computer Engineering (ECE)

100 Level Courses

ECE 101: Introduction to Electrical and Computer Engineering. 3 credits.
Introduces fundamental concepts in Electrical and Computer engineering and provides insight to the various careers in each field. Both theory and practical applications of electronic components are covered through examples of real world applications. Topics are reinforced through hands-on laboratory experiments. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Recommended Prerequisite: C or better in MATH 105 or specified score on math placement test, or MATH 113 with a C or better.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

ECE 201: Introduction to Signals and Systems. 3 credits.
Provides an introduction to key concepts for the description and analysis of signals and systems with an emphasis on discrete-time signals and systems. Specific topics include sinusoidal and complex exponential signals, sampling, spectrum representation of signals via DTFT and OFT, system properties, convolution, impulse response and frequency response. The associated computer lab provides opportunities to apply concepts to physical reality. Note: Students must register for both lecture and lab. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Specialized Designation: Discovery of Scholarship

Recommended Prerequisite: Grade of C or better in MATH 113.

Registration Restrictions:
Required Prerequisites: MATH 114\(^C\) and ECE 101\(^C\).

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

ECE 220: Continuous-Time Signals and Systems. 3 credits.
Introduction to the processing and analysis of continuous-time signals and systems in the time-domain via differential equations and in the transform-domain using Laplace and Fourier transforms. Specific topics include the frequency response of LTI systems, Bode plots, system functions, block diagrams, filter design, and a rigorous treatment of sampling and aliasing. Includes applications to communications, circuits, control, and signal processing. Students must register for lecture, lab, and recitation. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts. Equivalent to BENG 220.

Specialized Designation: Discovery of Scholarship

Registration Restrictions:
Required Prerequisites: ECE 201\(^C\), MATH 203\(^C\) and 214\(^C\).

* May be taken concurrently.

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture, Recitation

ECE 285: Electric Circuit Analysis I. 3 credits.
Covers the first half of electric circuit theory and practice. Topics include DC analysis of circuits including Ohm's and Kirchhoff's laws, Thevenin and Norton equivalents, and analysis of circuits with resistors, capacitors, inductors, and operational amplifiers. Includes lab experiments to reinforce topics covered in the course. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Specialized Designation: Scholarly Inquiry

Registration Restrictions:
Required Prerequisites: (PHYS 260\(^C\) and 261\(^C\)) and (MATH 214\(^C\)).

* May be taken concurrently.

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture, Recitation

ECE 286: Electric Circuit Analysis II. 3 credits.
Covers the second half of electric circuit theory and practice. Topics include AC analysis of circuits including phasors, frequency response, power analysis, and transformers. Includes a project and lab experiments to reinforce topics covered in the course. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Specialized Designation: Scholarly Inquiry

Registration Restrictions:
Required Prerequisites: (ECE 285\(^C\) and MATH 214\(^C\)).

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture, Recitation
300 Level Courses

ECE 301: Digital Electronics. 3 credits.
Introduces digital systems, circuits, and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, coding and multiplexing, multivibrators, shift registers, counters, A/D converters, and elementary computer architecture. Notes: Not intended for those majoring in electrical or computer engineering. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts. Equivalent to CYSE 301.

Registration Restrictions:
Required Prerequisites: MATH 125C, 114C or IT 102C.
C Requires minimum grade of C.

Students with a class of Freshman may not enroll.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

ECE 305: Electromagnetic Theory. 3 credits.
Static and time varying electric and magnetic fields, dielectrics, magnetization, Maxwell’s Equations, and introduction to transmission lines. Course uses vector calculus and algebra of complex numbers. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (MATH 214C) and (PHYS 260C) or 265C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

ECE 320: Signals and Systems II. 3 credits.
Second of two-semester sequence providing mathematical background for many ECE courses taken in junior, senior years. Provides methods of representing and analyzing discrete-time signals and systems. Studies effects of converting from continuous-time to discrete time, and presents Z-transform as convenient analysis tool. Emphasizes powerful concept of frequency response of systems developed in first semester. Presents application examples from communications, circuits, control, and signal processing. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts. Equivalent to BEN 320.

Specialized Designation: Scholarly Inquiry

Registration Restrictions:
Required Prerequisites: (ECE 220C) and (MATH 203C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

ECE 331: Digital System Design. 3 credits.
Covers principles of digital logic and digital system design and implementation in VHDL. Topics include number systems, Boolean algebra; analysis, design, and minimization of combinational logic circuits; analysis and design of synchronous and asynchronous finite state machines; and introduction to VHDL and behavioral modeling of combinational and sequential circuits. Notes: ECE 332 should be taken concurrently with ECE 331. Credit may not be received for ECE 301 and 331. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (PHYS 260C and 261C) and (ECE 332C) or 334C.
May be taken concurrently.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

ECE 332: Digital Electronics and Logic Design Lab. 1 credit.
Lab associated with ECE 331. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Recommended Corequisite: ECE 331.

Registration Restrictions:
Required Prerequisites: (PHYS 261C or 265C).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

ECE 333: Linear Electronics I. 3 credits.
Principles of operation and application of electron devices and linear circuits. Topics include semiconductor properties, diodes, bipolar and field effect transistors, biasing, amplifiers, frequency response, operational amplifiers, and analog design. Notes: ECE 334 is usually taken concurrently with ECE 333. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Specialized Designation: Writing Intensive in the Major

Recommended Corequisite: ECE 286 (required only if ECE 285 is taken).

Registration Restrictions:
Required Prerequisites: (ECE 280C) or (ECE 285C).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

ECE 334: Linear Electronics Lab I. 1 credit.
Lab associated with ECE 333. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (PHYS 261C or 265C) and (ECE 333C) or 344C.
May be taken concurrently.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory

**ECE 350: Embedded Systems and Hardware Interfaces.** 3 credits.
This course introduces embedded systems design through project-based activities. The platform runs on Linux and students design their own IoT (Internet of Things) system as well as demonstrate dashboards with cloud-based data. Hardware interfaces and several types of sensors and actuators are incorporated as part of the projects. Students also learn how to simulate and test signal-conditioning circuits, eventually integrating those as part of their projects. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** CS 222C and (ECE 280C, 285C or BENG 380C) and (ECE 301C or (ECE 331C and 332C)).

\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**ECE 370: Robot Design.** 3 credits.
Introduces the concept of robot design and implementation. The focus will be on electrical design philosophies, mechanical design philosophies, and controller design. Assignments are heavily based on the design, simulation and implementation of real-world robotic applications. Assessments are primarily in project form and make use of 3D printing and other manufacturing techniques. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** ECE 220C and CS 222C and (ECE 280C, 285C or BENG 380C) and (ECE 301C or (ECE 331C and 332C)).

\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**ECE 390: Engineering Design and Fabrication.** 3 credits.
Project based course where students will design projects containing analog and digital components as well as mechanical parts. Students will simulate, build, and test their projects. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts. Equivalent to BENG 390.

**Registration Restrictions:**
**Required Prerequisites:** (BENG 380C, ECE 280C or 285C).

\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**ECE 392: Engineering Design Studio.** 1 credit.
Identification and feasibility study of advanced engineering problems. Application of math, physics and engineering methods to challenging projects. Preliminary design, modeling, simulation and prototyping of projects. This course should be taken the semester preceding ECE/BENG 492. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree for a maximum 2 credits. Equivalent to BENG 392.

**Recommended Prerequisite:** 75 hours of completed coursework applicable to the EE, CpE, or BIOE degree and permission of instructor.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**400 Level Courses**

**ECE 410: Applications of Discrete-Time Signal Processing.** 3 credits.
Introduces fundamental concepts of digital signal processing. Emphasis on the theoretical and numerical tools used for frequency domain analysis of sampled signals. Topics covered include sampling, the discrete Fourier transform, fast transform algorithms, spectral analysis, and digital filtering. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** ECE 320C.

\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**ECE 421: Classical Systems and Control Theory.** 3 credits.
Introduces analysis and synthesis of feedback systems, including functional description of linear and nonlinear systems, block diagrams and signal flow graphs; state-space representation of dynamical systems, frequency response methods, Root Locus, Nyquist, and other stability criteria; performance indices and error criteria; and applications to mechanical and electromechanical control systems. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts. Equivalent to SYST 421.

**Registration Restrictions:**
**Required Prerequisite:** (ECE 220C).

\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**ECE 422: Digital Control Systems.** 3 credits.
Introduces analysis, design of digital control systems, Z-transform, discrete linear systems, frequency domain, and state variable techniques. Discusses use of microcomputers in control systems. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** ECE 320C and 421C.

\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture
ECE 429: Control Systems Lab. 1 credit.
Laboratory experiments for topics in control systems analysis, design, and implementation with emphasis on using microcomputers. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: ECE 421C.
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

ECE 430: Principles of Semiconductor Devices. 3 credits.
Introduces solid-state physics and its application to semiconductors and semiconductor devices. Topics include band theory, doping, p-n junctions, diffusion theory, low-frequency circuits, devices including bipolar transistor, MOSFET, CMOS, and photo transistors. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ECE 333C, 305C and MATH 214C.
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

ECE 431: Digital Circuit Design. 3 credits.
Analysis and design of discrete and integrated switching circuits. Topics include transient characteristics of diodes, bipolar, and field-effect transistors; MOS and bipolar inverters; nonregenerative and regenerative circuits; TTL, ECL, IIL, NMOS, and CMOS technologies; semiconductor memories; VLSI design principles; and SPICE circuit analysis. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ECE 331C and 333C.
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

ECE 432: Control Systems Design. 1 credit.
Digital control systems laboratory using microcomputer systems. Topics include microprocessors, digital logic circuits, and microcomputer systems. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ECE 429C and 421C.
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

ECE 433: Linear Electronics II. 3 credits.
Second course in linear electronics. Covers differential amplifiers, feedback circuits, power amplifiers, feedback amplifier frequency response, analog integrated circuits, operational amplifier systems, oscillators, wide band and microwave amplifiers, and computer-aided design. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ECE 286C and 333C.
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

ECE 434: Linear Electronics II Laboratory. 1 credit.
Second lab course in linear electronics involving analysis and design of topics listed in ECE 433. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ECE 334C and 433C.
\(^C\) May be taken concurrently.
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

ECE 435: Digital Circuit Design Laboratory. 1 credit.
Lab experiments for topics covered in ECE 431. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Recommended Corequisite: ECE 431.

Registration Restrictions:
Required Prerequisite: ECE 334C.
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

ECE 445: Computer Organization. 3 credits.
General overview of operating a digital computer. Topics include computer arithmetic, arithmetic unit, hardwired and microprogrammed control, memory, register-to-register, input-output operations, and behavioral modeling of computer organization using VHDL. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts. Equivalent to INFS 515.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: (ECE 331C and 332C) or (CS 262C or 222C).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

ECE 446: Device Driver Development. 3 credits.
Addresses device driver and kernel level software programming and development. The C programming language and problem solving techniques are covered. Basics of device driver software, Character driver operations and data structures, concurrency and race conditions, kernel
timers, memory allocation, communications with hardware, interrupt handling, kernel data types, memory mapping and Direct Memory Access concepts are explored. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** (ECE 445<sup>C</sup>).
<sup>C</sup> Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**ECE 447: Single-Chip Microcomputers.** 4 credits.
Explores designing with single-chip microprocessors and microcomputer interfacing. Topics include role of microcomputers compared with microprocessors and other computers, microcomputer architecture and organization, real-time control issues, assembly language programming for control, design of control software, input/output methods, design tools, and available single-chip microprocessors. Students select project and design, and construct system including single-chip microcomputer and ancillary hardware to implement control system. Notes: This course is highly recommended for ECE 492/493 students interested in using microcontroller technology in their senior design projects. It should be taken before ECE 493. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** ECE 445<sup>C</sup> and (CS 222<sup>C</sup> or 367<sup>C</sup>).
<sup>C</sup> Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

**ECE 448: FPGA and ASIC Design with VHDL.** 4 credits.
Practical introduction to modeling of digital systems with VHDL for logic synthesis. Overview and comparative analysis of design flow and tools for FPGAs and standard-cell ASICs. Discusses verification of digital systems using testbenches, prototyping boards and modern testing equipment, and illustrates VHDL-based design methodology with multiple examples from communications, control, DSP, and cryptography. Laboratory experiments create link between simulation and actual hardware implementation based on FPGA boards. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** (ECE 445<sup>C</sup>).
<sup>C</sup> Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

**ECE 450: Introduction to Robotics.** 3 credits.
Introduces mobile robotic systems. Topics include overview of power systems, motors, behavior-based programming, sensors, and sensor integration. Design projects conceived, developed, implemented, and presented. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Recommended Prerequisite:** CS 112, ECE 280, ECE 331 and either ECE 332 or ECE 301, all with grade of C or better.

**Registration Restrictions:**
Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**ECE 460: Communication and Information Theory.** 3 credits.
Introduction to analog and digital communications. Topics include review of important concepts from signals and systems theory and probability theory, Gaussian processes and power spectral density, digital transmission through additive white Gaussian channels; sampling and pulse code modulation; analog signal transmission and reception using amplitude, frequency and phase modulation; and affects of noise on analog communication systems. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (ECE 220<sup>C</sup> and STAT 346<sup>C</sup>).
<sup>C</sup> Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**ECE 461: Communication Engineering Laboratory.** 1 credit.
Lab experiments in analog and digital communication areas covered in ECE 460. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** ECE 334<sup>C</sup> and 460<sup>C</sup>.
<sup>C</sup> Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory

**ECE 462: Data and Computer Communications.** 3 credits.
Introduces modern data communications and computer networks. Topics include point-to-point communication links and transmission of digital information, modems, and codecs; packet switching, multiplexing, and concentrator design; multiaccess and broadcasting; local area and wide area networks; architectures and protocols for computer networks; OSI reference model and seven layers; physical interfaces and protocols; and data link control layer and network layer. Provides examples of data networks. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (STAT 344<sup>C</sup> or 346<sup>C</sup>) and (ECE 220<sup>C</sup>) and (ECE 331<sup>C</sup> or 303<sup>C</sup>).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

ECE 463: Digital Communications Systems. 3 credits.
Introduces digital transmission systems. Topics include quantization, digital coding of analog waveforms, PCM, DPCM, DM, baseband transmission, digital modulation schemes, ASK, FSK, PSK, MSK, QAM, pulse shaping, intersymbol interference, partial response, voice-band and wideband modems, digital cable systems, regenerative repeaters, clock recovery and jitter, multipath fading, digital radio design, optimal receiver design, MAP receiver, and probability of error. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: ECE 460^C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

ECE 465: Computer Networking Protocols. 3 credits.
Introduces computer networking protocols and concepts, emphasizing Internet and Internet Protocol Suite. Covers computer networking protocols at application, transport, and network layers, including multimedia networking protocols, and network security and management. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (STAT 346^C or 344^C) and (CS 222^C or 211^C).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering, Electrical Engineering or Systems Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

ECE 467: Network Implementation Laboratory. 1 credit.
Hands-on experience in implementing, configuring, and operating local and wide area networks in live laboratory environment equipped with modern local and wide area network devices and technologies. Students exposed to real-world computer networking scenarios including local area network implementation, asynchronous communication setup, and wide area network implementation using various protocols and technologies covering all layers of computer network protocol stack. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Recommended Corequisite: ECE 465.

Registration Restrictions:
Required Prerequisite: (ECE 462^C).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

ECE 470: Introduction to Humanoid Robotics. 3 credits.
Covers basic robot architecture with a focus on humanoid robotics. Topics include mechanical design philosophies, electrical design philosophies, and controller design of high DOF systems. Simulation of various parts and functionalities of humanoids culminates in a term project, which includes hardware demonstrations. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 112^C) and (ECE 280^C, 285^C or BENG 380^C) and (ECE 301^C or (ECE 331^C and 331^C)).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

ECE 491: Engineering Seminar. 1 credit.
Engineering ethics, professionalism, role of engineer in society, current topics, and employment opportunities. Notes: Students cannot receive credit for both ECE 491 and BENG 491. Registration is allowed only after completion of at least 90 credits applicable to the electrical engineering or computer engineering program. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts. Equivalent to BENG 491.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: COMM 100^C or 101^C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Seminar

ECE 492: Senior Advanced Design Project I. 1 credit.
Conception of senior design project and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan. Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493. Note: Registration is allowed only after completion of at least 90 credits applicable to the electrical engineering or computer engineering program. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Mason Core: Capstone, Synthesis (p. 135)

Specialized Designation: Research Associated

Registration Restrictions:
Required Prerequisites: (COMM 100^C or 101^C) and (ENGH 302^C or ENGL 302^C) and ECE 220^C and 286^C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**ECE 493: RS: Senior Advanced Design Project II.** 2 credits. Implementation of project for which preliminary work was done in ECE 492. Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion. Notes: Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493. If meeting time conflicts with other courses, come directly to the ECE department for registration. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

**Mason Core:** Capstone, Synthesis (p. 135)

**Specialized Designation:** Research/Scholarship Intensive

**Registration Restrictions:**

**Required Prerequisite:** ECE 492C.

Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**ECE 498: Independent Study in Electrical and Computer Engineering.** 1-3 credits. Directed self-study of special topics of current interest in ECE. Topic must be arranged with an instructor and approved by department chair before registering. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the term for a maximum 3 credits.

**Registration Restrictions:**

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Independent Study

**ECE 499: Special Topics in Electrical Engineering.** 4 credits. Topics of special interest to undergraduates. Notes: May be repeated if topics substantially different. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the term for a maximum 11 credits.

**Registration Restrictions:**

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**500 Level Courses**

**ECE 507: Seminar in Emerging Technologies.** 3 credits. Study of emerging technologies, how they are identified, how they evolve, actions which may encourage or stifle their growth, government influences, societal influences, examples of success and failure, and some lessons to be learned which are unique to government information technology. Topics covered will include a general introduction to emerging technologies, with emphasis on IT, discussion of difficulty in letting go of legacy systems, the DOD Global Information Grid, Cyberwarfare, Complex Adaptive Systems, and Federal Government support of Research and Development. Cannot be used in the PhD IT program. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 510: Real-Time Concepts.** 3 credits. Presents design methodology, principles and practice for the development of real-time embedded systems and their application to robotics, mechatronics, sensing, signal processing, and control. Topics include system decomposition, multi-tasking, task communication and synchronization, system modeling, time analysis, principles of filter and controller implementation, ‘fuzzy’ engineering, and multi-microcontroller systems. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 450 or ECE 447 or permission of instructor.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 511: Microprocessors.** 3 credits. Introduces microprocessor software and hardware architecture. Includes fundamentals of microprocessor system integration, instruction set design, programming memory interfacing, input/output, direct memory access, interrupt interfacing, and microprocessor architecture evolution. Studies Intel family of microprocessors, and reviews other microprocessor families and design trends. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 445 or equivalent.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture
ECE 513: Applied Electromagnetic Theory. 3 credits.
Maxwell’s Equations, electromagnetic wave propagation, wave guides, transmission lines, radiation, and antennas. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 305 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

ECE 521: Modern Systems Theory. 3 credits.
Introduces linear systems theory and design of linear feedback control systems. Reviews linear algebra, state variables, state-space description of dynamic systems, analysis of continuous-time and discrete-time linear systems, controllability and observability of linear systems, and stability theory. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 421.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

ECE 528: Introduction to Random Processes in Electrical and Computer Engineering. 3 credits.
Probability and random processes are fundamental to communications, control, signal processing, and computer networks. Provides basic theory and important applications. Topics include probability concepts and axioms; stationarity and ergodicity; random variables and their functions; vectors; expectation and variance; conditional expectation; moment-generating and characteristic functions; random processes such as white noise and Gaussian; autocorrelation and power spectral density; linear filtering of random processes, and basic ideas of estimation and detection. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 220 and STAT 346, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

ECE 529: Digital Signal Processing. 3 credits.
Representation analysis and design of digital signals and systems. Covers sampling and quantization, z-transform and discrete Fourier transform, digital filter realizations, design techniques for recursive and non-recursive filters, fast Fourier transform algorithms, and spectral analysis. Additional topics may include adaptive filtering, homomorphic digital signal processing, digital interpolation and decimation. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 320 and STAT 346.
**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 537: Introduction to Digital Image Processing (DIP).** 3 credits.
First course in digital-image processing, introduces scanning systems, focal plane array detectors, data acquisition methods, display hardware, image preprocessing algorithms, feature extraction, and basic image processing methods. Semester-long image processing project includes utilizing modern image processing system prototyping software. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 538: Medical Imaging.** 3 credits.
Provides an introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. In addition, this course introduces engineering students to clinical applications of medical imaging. The emphasis is on diagnostic ultrasound and magnetic resonance imaging methods, although several other modalities are covered. The course also provides an overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learned in class to real-world problems. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit. Equivalent to BENG 538.

**Recommended Prerequisite:** ECE 320 or equivalent; PHYS 262 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 542: Computer Network Architectures and Protocols.** 3 credits.
Introduction to architectures and protocols of computer networks and concept of packet switching. Topics include ISO standard layer model, physical interfaces and protocols, data link control, multiaccess techniques, packet switching, routing and flow control, network topology, data communication subsystems, error control coding, local area network, satellite packet broadcasting, packet radio, interconnection of packet-switching networks, network security and privacy, and various examples of computer networks. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** STAT 344 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 545: Digital System Design with VHDL.** 3 credits.
Introduction to the design of complex digital systems using hardware description languages. Emphasizes the design methodology based on the partitioning of a digital system into a datapath and control unit. Introduces a clear sequence of steps leading from specification to synthesizable, register transfer level (RTL), and fully verified HDL code. Covers VHDL for digital circuit design, including dataflow, structural, and behavioral coding styles. Introduces and illustrates the concepts of VHDL simulation, verification, synthesis, mapping, placing, routing, timing analysis and performance optimization. Requires semester long project devoted to the design of a complex digital system using VHDL as a hardware description language and FPGA as an implementation platform. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 548: Sequential Machine Theory.** 3 credits.
Theoretical study of sequential machines. Topics include sets, relations and lattices, switching algebra, functional decomposition, iterative networks, representation, minimization and transformation of sequential machines, state identification, state recognizers, and linear and stochastic sequential machines. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.
ECE 567: Optical Fiber Communications. 3 credits.
Studies components and integration of fiber-optic transmission systems. Topics include optical fibers, signal degradation, optical sources, power launching and coupling, photodetectors, receiver circuits, link analysis, and optical measurements. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 331 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 550: System Engineering Design. 3 credits.
System engineering design methods are studied and practiced, including object-oriented and structured analysis based techniques. Design Description languages such as UML, SysML, IDEFO and IDEF1x are introduced and used in carrying out complete system designs. Teams make presentations of their designs. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit. Equivalent to SYST 520.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 331: Digital Integrated Circuits. 3 credits.
Studies design and analysis of digital integrated circuits, emphasizing CMOS technology. Reviews MOSFET operation and SPICE modeling. Covers analysis and design of basic inverter circuits, structure and operation of combinational and sequential logic gates, dynamic logic circuits, chip I/O circuits, and brief introduction to VLSI methodologies. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 331 and ECE 430 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 430: Digital Integrated Circuits. 3 credits.
Covers analysis and design of basic inverter circuits, structure and operation of combinational and sequential logic gates, dynamic logic circuits, chip I/O circuits, and brief introduction to VLSI methodologies. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 331 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 565: Introduction to Optical Electronics. 3 credits.
Introduces optoelectronic devices for generation, detection, and modulation of light. Topics include electro-optic modulators, gas, solid state and semiconductor lasers, photodetectors, and detector arrays. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 305 and 333.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 568: Semiconductor Device Fundamentals. 3 credits.
Studies principals of operation of semiconductor devices based on solid state physics. Topics include band theory of solids, intrinsic and extrinsic semiconductor properties, pn junction diode, bipolar junction transistor, Schottky diode, metal insulator semiconductor junctions, field-effect transistors, and hetero-structures. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 430 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 566: Digital Integrated Circuits. 3 credits.
Covers analysis and design of basic inverter circuits, structure and operation of combinational and sequential logic gates, dynamic logic circuits, chip I/O circuits, and brief introduction to VLSI methodologies. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 331 and ECE 430 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 612: Real-Time Embedded Systems. 3 credits.**
Study of real-time operating systems and device drivers for embedded computers. Emphasizes microprocessor systems and associated input device sampling strategies, including interrupt driven and polled I/O. Covers basic input/output operations, analog to digital conversion methods, I/O programming techniques and process, and communication control methodologies. Involves design project. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 511 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 620: Optimal Control Theory. 3 credits.**
Detailed treatment of optimal control theory and its applications. Topics include system dynamics and performance criteria, calculus of variations and Pontryagin's minimum principle, computational methods in optimal control, and applications of optimal control. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 521 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 621: Systems Identification. 3 credits.**

**Recommended Prerequisite:** ECE 521 and 528 or permission of instructor.

**Registration Restrictions:**

---

**600 Level Courses**

**ECE 611: Advanced Microprocessors. 3 credits.**
Covers principles of advanced 32-bit and 64-bit microprocessors. Includes microprocessor structure and architecture, pipeline hazards, instruction-level parallelism, superscalar and superpipelined execution, thread-level parallelism; and RISC principles and advantages. Offers examples of RISC-type microprocessors. Studies in detail Intel IA-32, Intel and HP IA-64, and Motorola M68000 families. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 511 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 624: Control Systems.** 3 credits.
Analysis, design, and implementation of digital feedback control systems. Topics include discrete-time models, pole-placement, controller design methods, MIMO system decoupling, and observer design. Notes: Course may include simulation and design project. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 421 and 521 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 630: Statistical Communication Theory.** 3 credits.
Introduces optimum receiver design in the additive white Gaussian noise environment. Topics include efficient signal set design, modulation techniques, matched filter, correlation detector, coherent and noncoherent detections, fading and diversity channels, random amplitude and phase, diversity techniques, performance bounds of communications, and waveform communications. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 633: Coding Theory.** 3 credits.
Mathematics of coding groups, rings, and fields, and polynomial algebra. Topics include linear block codes, generator and parity check matrices; error syndromes, binary cyclic and convolutional codes; and implementation of encoders and decoders. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 635: Adaptive Signal Processing.** 3 credits.
Introduces adaptive systems and adaptive signal processing. Topics include correlation functions and matrices; performance functions; search of minimum; steepest descent and Newton algorithms; least mean squares algorithm; noise perturbed search and misadjustment; sequential regression algorithm and convergence issues; recursive least squares algorithm and forgetting factor; frequency domain algorithms; adaptive equalization; pseudorandom binary sequences and system identification; adaptive interference cancellation; and adaptive beam forming and arrays. Simulates adaptive algorithms. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 641: Computer System Architecture.** 3 credits.
Advanced course in computer architecture. Covers definitions, multiple processors, VLSI architecture, data flow, computation, semantic gap, high-level language architecture, object-oriented design, RISC architecture, and current trends in computer architecture. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 511 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 642: Design and Analysis of Computer Communication Networks.** 3 credits.

Introduces queuing theory. Other topics include concentrator design, multiplexing, capacity assignments, random access schemes, polling and probing techniques, topology design, flow control and routing, packet radio, protocol specification, and validation. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 542 and 528 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 643: Network Switching and Routing.** 3 credits.

Fundamentals of switching and routing with application to communications networks, both wireline and wireless. Topics include concepts of space and time for switching and forwarding of data, scalability and performance, label swapping, algorithms for routing and path computation, constrained route optimization, traffic theory, control and signaling, and traffic engineering. The course also covers the concepts and issues underlying the design and implementation of the contemporary switched networks. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528 and ECE 542.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 645: Computer Arithmetic.** 3 credits.

Covers computer arithmetic as applied to the design of general-purpose microprocessors and application-specific integrated circuits for cryptography, coding, and digital signal processing. Focuses on efficient implementations of all basic arithmetic operations in three major domains: integers, real numbers, and elements of Galois Fields GF(2^n). Illustrates tradeoffs among various hardware algorithms and architectures depending on primary optimization criteria, such as speed, area, and power consumption. Demonstrates the use of software implementations as a source of test vectors for verification of hardware implementations and for evaluating hardware versus software speed-up. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 545 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 646: Cryptography and Computer Network Security.** 3 credits.

Topics include need for security services in computer networks, basic concepts of cryptology, historical ciphers, modern symmetric ciphers, public key cryptography (RSA, elliptic curve cryptosystems), efficient hardware and software implementations of cryptographic primitives, requirements for implementation of cryptographic modules, data integrity and authentication, digital signature schemes, key exchange and key management, standard protocols for secure mail, the web and electronic payments, security aspects of mobile communications, key escrow schemes, zero-knowledge identification schemes, smart cards, quantum cryptography, and quantum computing. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 542 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 650: Robotics.** 3 credits.

Introduces robotics and advanced automation from electrical engineering standpoint. Topics include hardware overview; coordinate systems and manipulator kinematics; differential motion and inverse Jacobian; manipulator path control and motion planning; design and control of articulated hands; sensory feedback; machine vision; and applications to industrial automation. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 521 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 652: Mobile Robots.** 3 credits.
Treats kinematic modeling of mobile robots with wheels, steering control, navigation and remote sensing. GPS as well as inertial navigation discussed. Kalman filtering applied to state estimation of robot position and attitude and also applied to estimation of the location of detected objects. Target tracking is developed for repeated observations of a detected object as well as simultaneous tracking of multiple objects. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 521 and ECE 528 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 670: Principles of C4I.** 3 credits.
Provides broad introduction to fundamental principles of command, control, communication, computing, and intelligence (C4I). Applies principles, techniques to wide range of civilian and military situations. Discusses modeling, simulation of combat operations; studies sensing, fusion, and situation assessment processes. Derives optimal decision-making rules. Discusses concepts of C4I architectures and tools to evaluate and design systems such as queuing theory. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit. Equivalent to SYST 680.

**Recommended Prerequisite:** ECE 528 or SYST 611 or OR 542, or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 673: Discrete Event Systems.** 3 credits.
Introduces modeling and analysis of discrete event dynamical systems. Course covers elements of discrete mathematics and then focuses on Petri Net models and their basic properties. Relation to other discrete event models of dynamical systems. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit. Equivalent to SYST 620.

**Recommended Prerequisite:** ECE 521, or SYST 611 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 674: System Architecture Design.** 3 credits.
Architecture design and representation and the methodologies used to obtain them. Approaches based on system engineering constructs such as object orientation and service oriented architectures are used to design architectures and then represent them in conformance with an architecture framework such as DoDAF. Executable models of the architecture are derived to be used for architecture evaluation. Examples from current practice are used. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit. Equivalent to SYST 621.

**Recommended Prerequisite:** ECE 550.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 675: System Integration and Arch. Evaluation.** 3 credits.

**Recommended Prerequisite:** ECE 674 or SYST 621.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

**ECE 680: Physical VLSI Design.** 3 credits.
Introduces NMOS, CMOS, and BiCMOS integrated circuit technology and fabrication. Reviews MOS and BiCMOS inverter structures and operation, MOS and BiCMOS circuit design processes, MOS layers, stick diagrams, design rules, and layout. Covers subsystem design and layout illustration of design process through design of 4-bit arithmetic processor and its parts, adder, multiplier, register, and memory cells; and aspects of system timing, test and testability. Reviews currently available VLSI CAS tools. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 586 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

**ECE 681: VLSI Design for ASICs.** 3 credits.
Introduces VLSI design of application-specific integrated circuits (ASICs) from front-end to back-end using HDL and modern design automation software. Covers simulation, synthesis of digital circuits using standard cells, static timing analysis, formal verification, power analysis, test generation/fault simulation, and physical design including floor planning, placement, routing, and design rule checking. Addresses deep submicron CMOS scaling issues and other advanced topics. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 545.

**Recommended Corequisite:** ECE 586, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

**ECE 682: VLSI Test Concepts.** 3 credits.
Broad introduction to basic concepts, techniques, and tools of modern VLSI testing. Fundamentals of defect modeling, fault simulation, design for testability, built-in self-test techniques, and failure analysis. Test economics, physical defects and fault modeling, automated test pattern generation, fault simulation, design for test, built-in self test, memory test, PLD test, mixed-signal test, Iddq test, boundary scan and related standards, test synthesis, diagnosis and failure analysis, automated test equipment, embedded core test. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 586

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Laboratory, Lecture

**ECE 684: MOS Device Electronics.** 3 credits.
Study of Metal Oxide Semiconductor (MOS)-based device theory, characteristics, models, and limitations. Topics include MOS capacitor, MOSFET’s, CMOS, charge coupled devices, scaling, hot carrier effects, latchup, radiation effects, and isolation techniques. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 584 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

**ECE 685: Nanoelectronics.** 3 credits.
Emphasizes the fundamental concepts and principles that govern the operation of nano-electronic devices (100 nm down to 1 nm). Addresses basic device building blocks such as quantum dot (QD), single electron tunneling transistor (SETT), carbon nanotube (CNT), nanowire, etc. Considers the design and analysis of a variety of nanodevices ("quantum" or "mesoscopic" devices) and examine some notable applications. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 584

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 698:** Independent Reading and Research. 1-3 credits.
Independent study under the supervision of a faculty member, resulting in an acceptable technical report. No more than a combined total of 3 credits may be taken towards satisfying the master’s degree, although students may register for more credits. No more than a combined total of 3 credits may be taken of ECE 698 and ECE 798 towards satisfying the master’s degree, although students may register for more credits. Students may not count both ECE 799 and ECE 698 for master’s credit. Notes: Requires written report. May be taken no more than twice for graduate credit. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** At least two core courses and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Research

**ECE 699:** Advanced Topics in Electrical and Computer Engineering. 1-6 credits.
Advanced topics of current interest in electrical and computer engineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 700 Level Courses**

**ECE 721:** Nonlinear Systems. 3 credits.
Includes motivating examples; analysis techniques include basic fixed-point theory, implicit function theorem, and dependence of trajectories on initial data and parameters. Also covers computational simulation techniques; stability theory including Lyapunov’s direct method; nonlinear control systems of input-output and absolute stability; strong positive real transfer functions; feedback linearization of nonlinear systems; nonlinear canonical forms; nonlinear decoupling; sliding control; and applications to adaptive control, neural networks, and robotics. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 620 or ECE 621.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 722:** Kalman Filtering with Applications. 3 credits.
Detailed treatment of Kalman Filtering Theory and its applications, including some aspects of stochastic control theory. Topics include state-space models with random inputs, optimum state estimation, filtering, prediction and smoothing of random signals with noisy measurements, all within the framework of Kalman filtering. Additional topics are nonlinear filtering problems, computational methods, and various applications such as global positioning system, tracking, system control, and others. Stochastic control problems include linear-quadratic-Gaussian problem and minimum-variance control. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 521 and 528 or equivalent, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 728:** Random Processes in Electrical and Computer Engineering. 3 credits.
Recommended for advanced master’s and doctoral students. Provides background in random processes needed for pursuing graduate studies and research in statistical signal processing, communications, control, and computer networks. Covers probability spaces, random variables, Lebesque integration, conditional mean on a sigma field, convergence of random variables, limit and ergotic theorems, Markov processes, and Martingales. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**ECE 731:** Digital Communications. 3 credits.
Digital transmission of voice, video, and data signals. Covers signal digitization, pulse code modulation, delta modulation, low bit-rate
coding, multiplexing, synchronization, intersymbol interference, adaptive
equalization, frequency spreading, encryption, transmission codes, digital
transmission using band-width compression techniques, and satellite
communications. Offered by Electrical & Computer Engineer (p. 1018).
May not be repeated for credit.

Recommended Prerequisite: ECE 630 or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of
Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 732: Mobile Communication Systems. 3 credits.
Topics include modeling of mobile communication channel, signal
set and receiver design for mobile communication channel, access
and mobility control, mobile network architectures, connection to
fixed network, and signaling protocols for mobile communication
systems. Examples of mobile communication systems are presented,
including pan-European GSM, North American D-AMPS, and personal
communication systems. Offered by Electrical & Computer Engineer
(p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 542 and 630.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of
Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 734: Detection and Estimation Theory. 3 credits.
Introduces detection and estimation theory with communication and
radar and sonar applications. Topics include classical detection and
estimation theory, detection of known signals in Gaussian noise, signal
parameter and linear waveform estimation, and Wiener and Kalman
filters. Offered by Electrical & Computer Engineer (p. 1018). May not be
repeated for credit.

Recommended Prerequisite: ECE 528.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of
Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 738: Advanced Digital Signal Processing. 3 credits.
Theory and practice of advanced digital signal processing techniques.
Topics may include efficient high-speed algorithms for convolution,
correlation, orthogonal transforms, multirate processing of digital signals,
multiresolution time-frequency and time-scale analysis of one- and two-
dimensional signals, and multitaper spectral estimation. Offered by
Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 528 and ECE 535.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of
Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 740: Digital Signal Processing Hardware Architectures. 3 credits.
Addresses topics that include high-level DSP optimizations, such as
pipelining, unfolding, and parallel processing; common DSP structures
such as FFTs, filters, direct digital frequency synthesizers, and
correlators; modeling of DSP algorithms in MATLAB and conversion of
MATLAB models into fixed-point VHDL blocks; platform implementation
issues: hardware vs. software, FPGA vs. ASIC, power, area, throughput,
and applications of DSP hardware. Offered by Electrical & Computer
Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 535 and ECE 545 or equivalents or
permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of
Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 741: Wireless Networks. 3 credits.
Theoretical foundation and practice in design of wireless networks.
Emphasizes mobility and teletraffic modeling aspects, and networking
issues and state-of-the-art performance evaluation methods of radio and
system infrastructure applicable to wireless cellular and local networks.
Topics include analysis of mobility, handoff, control traffic loading,
resource allocation techniques, multiaccess protocols, admission policy
and call control, network infrastructure and multilayer configuration,
wireless LANs, and packet data systems. Offered by Electrical & Computer
Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 642 or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of
Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 742: High-Speed Networks. 3 credits.
Theories for design, analysis and evaluation of high-speed networks
including scalability, performance, and issues related to local area,
metropolitan, and wide area networks. Includes architecture, protocols,
and applications of high-speed networks; performance modeling of
high-speed networks; flow control and routing; design issues for high-
speed switches, interfaces, and controllers; all optical networks and their architectures; examples of high-speed computer networks and Internet working; video, imaging, and multimedia applications; software issues, robustness, and applications; and selected topics in current research areas in high-speed computer networks. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 528 and 642, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 745: ULSI Microelectronics. 3 credits.
Studies UltraLargeScaleintegration (more than a million devices in a single chip) by considering limits of packing density, modeling of devices, and circuit topology. Semiconductor material and device physics imposed "second order effects" and limitations on deep submicron CMOS performance. Reliability studied through analytical (compact) modeling and numerical simulations. Presents and evaluates new ULSI technologies such as SOI CMOS. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 684.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 746: Advanced Applied Cryptography. 3 credits.
Discusses complex cryptographic algorithms and their implementations in software and hardware. Provides mathematical background necessary to understand, implement, and break modern cryptalgorithms. Covers implementations of cryptosystems using smart cards, network processors, and other platforms. Discusses side channel attacks against implementations of cryptography, including timing attacks, power analysis, fault analysis, cache attacks, etc. Introduces advanced topics, such as random and pseudorandom number generators, secret sharing, zero-knowledge, and quantum cryptography. Requires a semester-long project devoted to implementation of selected algorithms or protocols in software or hardware, and/or comparative analysis of various algorithms, protocols, or implementations. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 646 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 747: Cryptographic Engineering. 3 credits.
Discusses efficient implementations of cryptographic algorithms and protocols in hardware and software, ranging from high-performance to low-power, as well as resistance to side-channel and fault attacks. Covers code breaking algorithms and practical implementations of side-channel attacks. Introduces research techniques. Requires semester-long project devoted to study of a cryptographic engineering problem, including a comprehensive literature review, problem definition, and research plan.
Notes: Course will be partially lecture style, partially seminar. Students will give hour long, in depth presentations on their research topics. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 528 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 751: Information Theory. 3 credits.
Introduces information theory, which is mathematical theory of communication systems. Topics include measures of information such as entropy, relative entropy, and mutual information; Shannon-McMillan-Breiman theorem and applications to data compression; entropy rate and source coding theorem; Huffman, arithmetic and Lempel-Ziv codes; method of types, channel capacity, and channel-coding theorem; joint source-channel coding theorem; differential entropy; Gaussian channel; rate distortion theory; and vector quantization. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ECE 528 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

ECE 754: Optimum Array Processing I. 3 credits.

Recommended Prerequisite: ECE 528 or ECE 535.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type**: Lecture

**ECE 780**: Radio Frequency Electronics. 3 credits. This course addresses the design of electronic building blocks for radio frequency (RF) microelectronic circuits. Topics include trade-offs in RF design, transceiver architectures, low-noise amplifiers, mixers, oscillators, frequency-synthesizers, phase-locked loops, and power amplifiers. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

**Recommended Prerequisite**: ECE 587, 684, or permission of instructor.

**Registration Restrictions**: Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type**: Lecture

**ECE 795**: Engineering Seminar. 0 credits. Fulfills seminar requirement for MS in electrical and computer engineering programs. Invited speakers, faculty, and ECE graduate students lecture on current topics and research. Notes: Students must enroll in ECE 795 the final semester they file to graduate. Once the department verifies that the seminar requirement has been met, a grade of S (satisfactory) will be submitted. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 in subsequent semesters until the requirement is met. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree for a maximum credits.

**Registration Restrictions**: Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type**: Seminar

**ECE 797**: Scholarly Paper. 0 credits. Student must develop a rigorous, technical report (called Scholarly Paper) on a topic of current interest in Electrical and Computer Engineering and make an oral presentation of this report. Students fulfill this requirement through and individual project in a 600-level or above ECE graduate course. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree for a maximum credits.

**Recommended Prerequisite**: Completed 18 credit hours of graduate work.

**Registration Restrictions**: Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type**: Thesis

**ECE 799**: Master's Thesis. 1-6 credits. Research project chosen and completed under guidance of graduate faculty member that results in technical report and oral defense acceptable to thesis committee of three faculty members. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree.

**Recommended Prerequisite**: 9 graduate credits, and permission of instructor.

**Registration Restrictions**: Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type**: Thesis

**800 Level Courses**

**ECE 899**: Research Topics in ECE. 3 credits. Studies advanced research areas in Electrical and Computer Engineering within a course format. Students will develop specialized research skills, which will also involve the presentation of their own work, developed individually and within groups. This course may be repeated for credit if the research areas differ. Notes: This will be an irregularly scheduled course intended for advanced master's students who want to pursue a specific topic to more depth than a typical course offers at the master's level. It will prepare students to undertake their individual research topics when they move on to pursue a Ph.D. program, or enter a research environment in their chosen professional careers. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree for a maximum 9 credits.
Recommended Prerequisite: Completion of at least one 600 or 700 level course in the Research Topic area; and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Research

900 Level Courses

ECE 998: Doctoral Dissertation Proposal. 1-12 credits.
Work on research proposal that forms basis for doctoral dissertation.
Notes: No more than 24 credits of ECE 998 and 999 may be applied to doctoral degree requirements. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Dissertation

ECE 999: Doctoral Dissertation. 1-12 credits.
Formal record of commitment to doctoral dissertation research under direction of ECE faculty member. Notes: Students must complete minimum 12 credits of doctoral proposal (ECE 998) and doctoral dissertation research (ECE 999) Maximum of 24 credits of ECE 998 and 999 may be applied to degree. Students who choose to take less than 24 credits of ECE 998 and 999 may earn remaining credits from approved course work. Students cannot enroll in ECE 999 before research proposal accepted and approved by dissertation committee. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Dissertation

Engineering (ENGR)

100 Level Courses

ENGR 107: Introduction to Engineering. 2 credits.
Introduces engineering profession fundamentals and problem-solving. Topics include description of engineering disciplines, functions of the engineer, professionalism, ethics and registration, problem solving and representation of technical information, estimation and approximations, and analysis and design. Offered by Electrical & Computer Engineer (p. 1018). Limited to two attempts.

Mason Core: Information Technology: Ethics Only (p. 135)

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

200 Level Courses

ENGR 202: Thermodynamics. 3 credits.
Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Schedule Type: Lecture

300 Level Courses

ENGR 395: Engineering Internship. 3 credits.
Students will participate in experiential learning in an industrial setting. Students must identify work opportunity and seek advisor approval prior to registering. Course credit will not satisfy degree requirements. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Completion of at least 30 credit hours.

Schedule Type: Internship

ENGR 396: Engineering Co-Op I. 3 credits.
1st Semester of a multi-semester co-operative education experience. Students will apply concepts and theories from the classroom to an industrial setting. Students must identify work opportunity and seek advisor approval prior to registering. Course credit will not satisfy degree requirements. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: Completion of at least 30 credit hours.

Schedule Type: Lecture

ENGR 397: Engineering Co-Op II. 3 credits.
Second Semester of a multi-semester co-operative education experience. Students will apply concepts and theories from the classroom to an industrial setting. Students must continue employment from ME 396 and seek advisor approval prior to registering. Course credit will not satisfy degree requirements. Offered by Electrical & Computer Engineer (p. 1018). May not be repeated for credit.

Recommended Prerequisite: ME 396.

Schedule Type: Internship

400 Level Courses

ENGR 498: Independent Study in Engineering. 1-3 credits.
Directed self-study of special topics of current interest in ENGR. Notes: May be repeated if topics substantially different. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study

ENGR 499: Special Topics in Engineering. 4 credits.
Topics of special interest to undergraduates. Notes: May be repeated if topics substantially different. Offered by Electrical & Computer Engineer (p. 1018). May be repeated within the term for a maximum 11 credits.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
700 Level Courses

ENGR 794: Graduate Internship. 3 credits.
Students with an Internship/Externship/Co-op opportunity will gain practical experience while engaging in an experiential learning opportunity. Offered by Volgenau School of Engineering (p. 953). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Completion of at least 18 credit hours.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Internship

English (ENGH)

100 Level Courses

ENGH 100: Composition for Multilingual Writers. 4 credits.
Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose, with attention to particularly difficult aspects of the language for multilingual writers. Methods and conventions of preparing research papers. Notes: Students must attain minimum grade of C to fulfill degree requirements. Offered by English (p. 350). May not be repeated for credit. Equivalent to ENGH 101, ENGH 122.

Mason Core: Written Communication (lower) (p. 135)

Schedule Type: Lecture, Recitation

ENGH 101: Composition. 3 credits.
Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose. Methods and conventions of preparing research papers. Notes: Students must attain minimum grade of C to fulfill degree requirements. Offered by English (p. 350). May not be repeated for credit. Equivalent to ENGH 100, ENGH 122.

Mason Core: Written Communication (lower) (p. 135)

Schedule Type: Lecture

ENGH 121: Enhanced Composition For Multilingual Writers of English I. 3 credits.
Provides intensive practice in drafting, revising and editing essays in common academic genres such as argumentation and research based writing, with additional language support for building English fluency. Addresses logical, rhetorical, and linguistic structures of expository prose, and builds critical reading strategies. This course is the first of a two-part course for students in the Undergraduate International Pathway Program. Notes: Students must attain minimum grade of C to fulfill Mason Core degree requirement for written communication (lower level). Offered by English (p. 350). May not be repeated for credit. Equivalent to ENGH 100, ENGH 101.

Specialized Designation: Discovery of Scholarship

Recommended Prerequisite: Satisfactory progress in ENGL 121/ENGH 121.

Schedule Type: Lecture

200 Level Courses

ENGH 201: Reading and Writing about Texts. 3 credits.
Close analysis of literary texts, including but not limited to poetry, fiction, and drama. Emphasizes reading and writing exercises to develop basic interpretive skills. Examines figurative language, central ideas, relationship between structure and meaning, narrative point of view. Offered by English (p. 350). May not be repeated for credit.

Mason Core: Literature (p. 135)

Recommended Prerequisite: 3 credits of 100-level English.

Schedule Type: Lecture

ENGH 202: Texts and Contexts. 3 credits.
Studies literary texts within the framework of culture. Examines texts within such categories as history, gender, sexuality, religion, race, class, and nation. Notes: Builds on reading and writing skills taught in ENGH 201. Offered by English (p. 350). May be repeated within the term.

Mason Core: Literature (p. 135)

Recommended Prerequisite: 3 credits of 100-level English.

Schedule Type: Lecture

ENGH 203: Western Literary Tradition. 3 credits.
Major works of Western literature in historical progression. Focuses on writers such as Homer, Sophocles, Euripides, Dante, Cervantes, Machiavelli, and Montaigne. Notes: All readings are in modern English. Courses build on reading and writing skills taught in ENGH 201. Offered by English (p. 350). May not be repeated for credit.

Mason Core: Literature (p. 135)

Recommended Prerequisite: 3 credits of 100-level English.

Schedule Type: Lecture

ENGH 204: Western Literary Traditions. 3 credits.
Major works of Western literature in historical progression. Covers writers such as Moliere, Mme. de Lafayette, Goethe, Ibsen, Flaubert, Dostoyevski, Tolstoy, Mann, Kafka, Borges, and Soyinka. All readings are in modern English. Notes: Courses build on reading and writing skills taught in ENGH 201. Offered by English (p. 350). May not be repeated for credit.
Mason Core: Literature (p. 135)

Recommended Prerequisite: 3 credits of 100-level English.

Schedule Type: Lecture

300 Level Courses

ENGH 300: Cover to Cover. 3 credits.
Introduction to various topics in English; many have an interdisciplinary emphasis. Appropriate for non-majors. Topic changes each time course is offered. Notes: May be repeated when topic is different. Offered by English (p. 350). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: ENGL 101/ENGH 101

Schedule Type: Lecture

ENGH 301: The Fields of English. 3 credits.
Introduces the fields of English studies, focusing on discipline-specific forms of practice within the concentrations in the major. Explores central concepts including reading, language, medium, text, author/producer. Maps histories and contexts of English as a discipline. Offered by English (p. 350). May not be repeated for credit.

Specialized Designation: Discovery of Scholarship

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 302: Advanced Composition. 3 credits.
Intensive practice in writing and analyzing expository forms such as essay, article, proposal, and technical or scientific reports with emphasis on research related to student's major field. Notes: Students must attain minimum grade of C to fulfill degree requirements. Schedule of Classes designates particular sections of ENGH 302 in business, humanities, natural sciences and technology, and social sciences. Offered by English (p. 350). May not be repeated for credit.

Mason Core: Written Communication (upper) (p. 135)

Recommended Prerequisite: Completion of 45 credits including the Mason Core literature requirements, requires a grade of C or better.

Registration Restrictions:
Required Prerequisites: ENGH 100C, 101C, U101C, 122C, ENGL 100C, 101C, U101C, 122C, HNRS 110C, NCLC 203C or INTS 203C.
C Requires minimum grade of C.

Students with a class of Freshman may not enroll.

Schedule Type: Lecture

ENGH 303: Humanities College to Career. 1 credit.
Focuses on career choices and effective self-presentation for soon-to-be graduating students with majors in the humanities. Explores how skills typically learned in humanities majors can be leveraged for a successful transition to post-graduation employment. Offered by English (p. 350). May not be repeated for credit. Equivalent to FRLN 309, HIST 385, PHIL 393.

Schedule Type: Lecture

ENGH 304: Topics: Literary Surveys. 3 credits.
Advanced introduction to major movements and representative figures of two or more centuries or periods of American, British, European, or world literature. Notes: May be repeated when topic is different. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 305: Dimensions of Writing and Literature. 3 credits.
Teaches students the conventions of writing in literary studies while emphasizing writing process. Develops interpretive skills for further study in the major though the teaching of in-depth close reading, intertextual analysis, and critical reading in scholarship. Offered by English (p. 350). May not be repeated for credit.

Specialized Designation: Scholarly Inquiry, Writing Intensive in the Major

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 307: English Grammar. 3 credits.
Overview of grammatical structure of English including word classes, phrases, and complex sentences. English grammar analyzed using modern syntactic theory. Students engage in language description through problem solving. Offered by English (p. 350). May not be repeated for credit. Equivalent to LING 307.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture, Recitation

ENGH 308: Theory and Inquiry. 3 credits.
Investigates a problem or debate central to the discipline of English. Teaches students how to read, understand, and engage with theoretical texts. Notes: May be repeated for credit when topic is different. Offered by English (p. 350). May be repeated within the term.

Schedule Type: Lecture

ENGH 309: Topics in Literature. 1-3 credits.
Studies literature by topics, such as women in literature, science fiction, and literature of the avant garde. Notes: Topic varies. May be repeated for credit when topic is different. Offered by English (p. 350). May be repeated within the term.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 310: Topics: Women and Literature. 3 credits.
Explores experiences of women as both authors and subjects of imaginative literature. Notes: May be repeated when topic is different. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits. Equivalent to WMST 305.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: Lecture

ENGH 315: Folklore and Folklife. 3 credits.
Topics include folktales, personal narratives, legends, proverbs, jokes, folk songs, folk art and craft, and folk architecture. Considers ethnicity, community, family, festival, folklore in literature, and oral history. Discusses traditions in students' own lives. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 316: Topics in Myth and Literature. 3 credits.
Studies how traditional mythologies are reflected in English and American literature and other texts as themes, motifs, and patterns. Notes: May be repeated when topic is different. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 318: Introduction to Cultural Studies. 3 credits.
Introduces interpretive practices associated with cultural studies. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 319: Popular Culture. 3 credits.
Emphasizes popular fiction and adaptation of popular prose genres to media that have strong verbal and visual elements. Relationship between verbal and nonverbal elements of media such as film, comics, and radio. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 320: Literature of the Middle Ages. 3 credits.
Selected English narrative, dramatic, and homiletic literature written between 1300 and 1500, exclusive of Chaucer. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 321: English Poetry and Prose of the 16th Century. 3 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 322: Shakespeare. 3 credits.
Introduction to Shakespeare's art. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 323: Shakespeare: Special Topics. 3 credits.
Study of one aspect of Shakespeare's art or critical issues surrounding it. Offered by English (p. 350). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 324: English Renaissance Drama. 3 credits.
Major dramas and dramatists of English Renaissance, such as Lyly, Marlowe, Jonson, Middleton, Webster, and Ford. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 325: English Poetry and Prose of the 17th Century. 3 credits.
English poetry and prose from 1603 to 1688, excluding Milton. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 330: Augustan Age: 1660-1745. 3 credits.
English literature from late 17th century to mid-18th century. Includes Dryden, Rochester, Behn, Defoe, Swift, Pope, and Montagu. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 331: Age of Sensibility: 1745-1800. 3 credits.
English literature of later 18th century, time of American and French Revolutions, including new developments in novel, drama, biography, and poetry. Includes Johnson, Boswell, Blake, Goldsmith, Sterne, Gray, Cowper, Burney, Godwin, and Wollstonecraft. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 332: Restoration and 18th Century Drama. 3 credits.
Restoration comedy of manners, sentimental comedy, and neoclassical and bourgeois tragedy. Theories of drama and conventions of staging. Includes writers such as Wycherley, Behn, Congreve, and Cowley. Offered by English (p. 350). May not be repeated for credit.
Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 333: British Novel of the 18th Century. 3 credits. English novel from its beginnings through turn of 19th century. Covers works by Behn, Defoe, Haywood, Richardson, Fielding, Sterne, Burney, Smollett, and Austen. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 335: Prose and Poetry of the Victorian Period. 3 credits. Poetry and nonfiction prose by such authors as Carlyle, Arnold, Tennyson, Elizabeth Barrett Browning, Robert Browning, Ruskin, Mill, and Wilde. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 336: British Novel of the 19th Century. 3 credits. Works by Dickens, Thackeray, the Brontes, Eliot, Trollope, and Hardy. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 337: British Poetry after 1900. 3 credits. Emphasizes Hardy, Yeats, Lawrence, Graves, Auden, Thomas, and Hughes. Fiction works employing poetic techniques, such as Joyce's Ulysses, may also be studied. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 338: British Novel after 1900. 3 credits. Works by Conrad, Forster, Lawrence, Joyce, Woolf, Greene, Lessing, Spark, and Fowles. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 339: British and Irish Drama after 1900. 3 credits. English or Irish drama from Yeats to the present. Plays by authors such as Yeats, Synge, O'Casey, Osborne, Wesker, Pinter, Friel, Churchill, and Gems. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 340: Early American Literature. 3 credits. Works of first 200 years of American literature, including Edwards, Franklin, Irving, Cooper, and Bryant. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 341: Literature of the American Renaissance. 3 credits. Major writers of American Renaissance (1830-1865), with emphasis on Emerson, Thoreau, Hawthorne, Melville, Whitman, Poe, Stowe, Douglass, and Dickinson. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 342: Development of the American Novel to 1914. 3 credits. Major American novels of the pre-World War I period with emphasis on Brown, Cooper, Hawthorne, Melville, Twain, Howells, James, Crane, Dreiser, Norris, and others. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 343: Development of the American Novel since 1914. 3 credits. Works by Fitzgerald, Hemingway, Faulkner, Dos Passos, Wolfe, Bellow, and Nabokov. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 344: American Drama of the 20th Century. 3 credits. American drama of 20th century, with special attention to playwrights such as Glaspell, O'Neil, Miller, Williams, Fones, and Albee. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 345: American Poetry of the 20th Century. 3 credits. Emphasizes work of Robinson, Frost, Stevens, Williams, Pound, Crane, Eliot, and Lowell. May include work of fiction employing poetic techniques, such as Faulkner's The Sound and the Fury. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.
Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 348: Beginnings of African American Literature Through 1865. 3 credits.
Concentrating on such poets as Phillis Wheatley, Jupiter Hammon, Lucy Terry, and George Moses Horton, examines significant African American literary, social, and political texts produced through 1865. Special attention to narrative accounts of enslavement and freedom by Frederick Douglass, Harriet Jacobs, and Olaudah Equiano; political writings and orations of David Walker and Sojourner Truth; fiction of Harriet Wilson and William Wells Brown; and nonwritten cultural artifacts such as slave songs and spirituals. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 350: African American Literature Through 1946. 3 credits. Focusing on fiction, poetry, drama, and autobiography, explores evolution of African American literature and aesthetics and major social, cultural, and historical movements such as the Harlem Renaissance of the 1920s and emergence of black naturalism, realism, and modernism in the 1930s-40s. Major authors include Zora Neale Hurston, Langston Hughes, Jessie Fauset, James Weldon Johnson, Jean Toomer, Nella Larsen, Margaret Walker, Chester Himes, Richard Wright, and Ann Petry. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 351: Contemporary African American Literature. 3 credits. Encompassing array of genres and forms, examines black writing from mid-20th century to present. Engages textual, critical, political, and theoretical issues related to cardinal literary movements, such as Black Arts Movement of 1960s and Third Renaissance of 1980s-90s. Examines how musical forms such as blues, jazz, and rap shaped literary production. Major authors include Ralph Ellison, Gwendolyn Brooks, James Baldwin, Lorraine Hansberry, Amiri Baraka, Alice Walker, Ernest Gaines, Gloria Naylor, August Wilson, and Toni Morrison. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 352: Topics in Ethnic American Literature. 3 credits. Studies particular ethnic American literatures. Focuses on literatures such as Asian American, Native American, Latino/a, Arab American, or Jewish American. Notes: May be repeated when topic (expressed by course subtitle and content) is different. Offered by English (p. 350). May not be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 355: Recent American Fiction. 3 credits. American short story writers and novelists from World War II to present, including Mailer, Barth, Cheever, Oates, Gass, Beattie, Updike, and Morrison. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 357: Continental Fiction, 1770-1880. 3 credits. Selected European novels in translation. Focuses on continental novel from 18th century to end of 19th century. Includes works of Balzac, Goethe, Gogol, Stendhal, Turgenev, Flaubert, Dostoieievski, Tolstoy, and Chekhov. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 360: Continental Fiction, 1880-1950. 3 credits. Offered in cooperation with the Department of Modern and Classical Languages. Focuses on continental novel from beginning of 20th century to present. Includes Proust, Mann, Gide, Kafka, Yourcenar, Beauvoir, Calvino, and Garcia Marquez. Attention to influence of this literature on novel in English. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 361: Continental Fiction, 1880-1950. 3 credits. Studies two cultures other than contemporary British or American culture through exploration of several textual forms such as written literature, oral literature, film, folklore, or popular culture. Specific cultures vary,
but at least one is non-Western. Notes: May be repeated for credit when topic is different. Offered by English (p. 350). May be repeated within the degree.

**Mason Core:** Global Understanding (p. 135)

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 366: The Idea of a World Literature.** 3 credits.
Examines history and current status of conceptions of world literature, considering such topics as non-European influences on Western literature, shifting horizons of comparative literature, rise of postcolonial literature, place of translation, and role of international institutions such as UNESCO and the Nobel Prize. Focuses on degree to which these initiatives have been successful in promoting global understanding of literary production. Offered by English (p. 350). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 367: World Literatures in English.** 3 credits.
Study of selected topics, periods, genres, or authors in literature written in English, originating in Canada, Australia, New Zealand, South Asia, or Africa, for example. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 368: Modern Drama.** 3 credits.
Representative plays of most influential European and American dramatists, with emphasis on dramatic styles such as realism, expressionism, epic, and existentialism. Studies Chekhov, Ibsen, Strindberg, Brecht, and Beckett. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 370: Introduction to Documentary.** 3 credits.
Considers fundamental concepts of documentary form, style, and subject matter, ethical considerations, and theories of documentary. Includes close analysis of a series of representative film and television texts. Offered by English (p. 350). May not be repeated for credit.

**Mason Core:** Arts (p. 135)

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 371: Television Studies.** 3 credits.
Learn to identify and analyze formal elements of television. Learn how to situate and evaluate television in their cultural and historical contexts, interpret specific texts, and understand the relationships among broadcasting and networks, citizenship, audiences, and the public sphere. Offered by English (p. 350). May not be repeated for credit.

**Mason Core:** Arts (p. 135)

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 372: Introduction to Film.** 3 credits.
Introduces film medium as an art form. Offered by English (p. 350). May not be repeated for credit. Equivalent to ENGH 555.

**Mason Core:** Arts (p. 135)

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 373: Film and Video Forms.** 3 credits.
Teaches students the formal elements of fiction films/videos and documentaries. Develops analytical writing skills in film and video studies with an emphasis on collaboration. Focuses on reading and practicing artistic processes of filmic storytelling, understanding films and videos in multiple contexts, including production and distribution industries and political and commercial systems. Offered by English (p. 350). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Schedule Type:** Lecture

**ENGH 375: Web Authoring and Design.** 3 credits.
Provides a rhetorical foundation for web authoring and design in professional settings. Students will learn basic principles of writing for the web, information architecture, coding for accessibility, and usability testing. The production-oriented component of the course provides instruction in writing valid code and practice with web- and graphic-editing software tools. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 376: Rhetoric and New Media.** 3 credits.
Critical reading of new media texts and creation of technology-enriched texts in variety of rhetorical genres. Instructs students in rhetoric of new media, whether produced as hypertext, multimedia, or interactive digital productions. Technology-enriched activities present complex textuality of words, images, word-as-image, and kinetic text. Offered by English (p. 350). May not be repeated for credit. Equivalent to NCLC 343.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture
ENGH 377: Digital Creative Writing. 3 credits.
Combined workshop and studio course in technological and aesthetic issues of reading and writing hypermedia texts with emphasis on poetry, fiction, creative nonfiction, mixed genre, drama, or performance. Explores how genre meets hypertext and hypermedia in original creative work. Includes techniques in authoring interactive hypermedia projects using digital media tools. Notes: May include reading assignments in hypertext and hypermedia theory. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: ENGL 396/ENGH 396 or permission of instructor.

Schedule Type: Lecture

ENGH 380: Introduction to Writing and Rhetoric. 3 credits.
Introduces students to the field of writing studies, with a focus on definitions of writing and rhetoric and research methods applied to the study of writing from the perspective of multiple disciplines. Provides an overview of both historical and contemporary approaches to studying writing as object, process, practice, and occupation. Offered by English (p. 350). May not be repeated for credit.

Specialized Designation: Discovery of Scholarship

Recommended Prerequisite: ENGL 302/ENGH 302 is recommended.

Schedule Type: Lecture

ENGH 382: Writing Nonfiction Genres. 3 credits.
Advanced practice in analyzing and writing nonfiction forms such as essay, profile, article, and technical or scientific report, depending on student’s interests. Notes: Not to be taken concurrently with ENGH 399 or 486, and not to be taken by students who have taken ENGH 486. Not a remedial course. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 386: Editing for Audience, Style, and Voice. 3 credits.
Introduces editing as a textual and rhetorical practice. Addresses copyediting, style, design; revisions based on audience, purpose, and genre; multimedia editing; interactions between editors and authors. (Not a remedial course in fixing sentence errors.) Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 388: Professional and Technical Writing. 3 credits.
Intensive study and practice in various forms of professional and technical writing, including proposals, reports, instructions, news releases, white papers, and correspondence. Emphasizes writing for variety of audiences, both lay and informed, and writing within various professional and organizational contexts. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: ENGL 302/ENGH 302.

Schedule Type: Lecture

ENGH 391: Forms of Poetry. 3 credits.
Intensive study of and practice in formal elements of poetry through analyzing models and weekly writing assignments. Depending upon specific instructor, can cover rhyme, meter, rhythm, lineation, stanza pattern, traditional and experimental forms, free verse and open-form composition, lyric, narrative, and dramatic modes. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: ENGH 396.

Schedule Type: Lecture

ENGH 392: Forms of Fiction. 3 credits.
Intensive practice in the elements and forms of fiction, through analyzing models and completing weekly writing assignments. Covers short stories, short-shorts, longer narratives, and such elements as plot, narrative technique, dialogue, point of view, voice and style, along with tools such as evocation, description, and epiphany. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: ENGH 396.

Schedule Type: Lecture

ENGH 393: Forms of Nonfiction. 3 credits.
Intensive study of and practice in various forms of nonfiction writing, through analyzing models and completing weekly writing assignments. Includes in-depth discussion and practice in such forms as biographies, documentaries, editorials, interviews, reports, reviews, and essays. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: ENGH 396.

Schedule Type: Lecture

ENGH 396: Introduction to Creative Writing. 3 credits.
Assignments include writing exercises and original works of poetry and fiction. May also include drama or creative nonfiction. Includes reading assignments in covered genres, and may include oral presentations or in-class performance. Original student work read and discussed in class and conference with instructor. Offered by English (p. 350). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 397: Poetry Writing. 3 credits.
Workshop in reading, writing poetry. Original student work read and discussed in class and conferences with instructor. Technical exercises in craft of poetry; may include writing assignments. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: ENGL 396/ENGH 396 or permission of instructor.

Schedule Type: Lecture

ENGH 398: Fiction Writing. 3 credits.
Workshop course in reading and writing fiction. Original student work read and discussed in class and conferences with instructor. Includes
technical exercises in craft of fiction; may include reading assignments. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** ENGL 396/ENGH 396 or permission of instructor.

**Schedule Type:** Lecture

**ENGH 399:** *Creative Nonfiction Writing.* 3 credits.
Workshop in reading and writing of nonfiction that makes use of literary techniques normally thought of in context of fiction, such as evoking senses and use of dialog. Original student work read and discussed in class and conferences with instructor. Includes technical exercises in artful creating of nonfiction; may include reading assignments. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** ENGL 309/ENGH 382 or ENGL 396/ENGH 396, or permission of instructor.

**Schedule Type:** Lecture

**400 Level Courses**

**ENGH 400:** *Honors Seminar.* 3 credits.
Emphasizes growth in awareness of literary scholarship as a discipline, providing opportunity for advanced study in literary and cultural criticism. Covers variety of topics, including consideration of a literary period, genre, author, work, theme, discourse, or critical theory. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Open only to English department honors students.

**Schedule Type:** Lecture

**ENGH 401:** *RS: Honors Thesis Writing Seminar.* 3 credits.
Provides guidance in research methods to students writing an honor thesis as well as workshop for critiquing works in progress. May be taken concurrently with another approved course offered by English Department, in which case thesis work may substitute for some assigned work in second course by arrangement of both instructors. Offered by English (p. 350). May not be repeated for credit.

**Mason Core:** Capstone (p. 135)

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** Acceptance into English honors; permission of department and ENGH 400/ENGL 414 or ENGH 402/ENGL 416.

**Schedule Type:** Lecture

**ENGH 402:** *Honors Independent Study.* 1-3 credits.
Intensive writing course. Honors students concentrating in nonfiction writing and editing may use English 416 to replace English 414 as first course in honors program. Notes: Honors students concentrating in creative writing may use ENGH 402 to replace ENGH 401. Honors students concentrating in nonfiction writing who take ENGH 401 and complete a nonfiction thesis may use ENGH 402 in conjunction with an advanced course in nonfiction writing to replace ENGH 400. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** Admission to honors program in English, and permission of instructor.

**Schedule Type:** Independent Study

**ENGH 408:** *Topics in Criticism.* 3 credits.
Studies selected approach to literary criticism, as announced, with exercises in critical analysis. Includes new criticism, structuralism, psychoanalysis, and Marxism. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 409:** *Literary Modes.* 3 credits.
Theory and practice of such modes as tragedy, comedy, tragicomedy, romance, and satire, considered in separate semesters and drawn from variety of periods ranging from biblical times to present, with examples from drama, poetry, and fiction. Notes: May be repeated with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 412:** *Topics in Folklore Studies.* 3 credits.
Exploration of various aspects of folklore and folklife such as folklore and literature, folk arts, folk song, and material culture. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 414:** *Folklore of the Spirit World.* 3 credits.
Examines traditional narratives and beliefs about otherworldly experiences and beings. Introduces traditional narrative theory and discusses how people construct and tell their stories about encounters with the supernatural. Considers the conflicts, worldviews, and competing values these stories bring into material form. Focuses on traditions from around the world as well as on personal experiences of students. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 415:** *Folk Arts and Folk Artists.* 3 credits.
Examines the traditional arts of everyday life, such as festive foods, mementos and other objects of memory, textile arts, pottery, carving in wood and stone, roadside shrines, and more. Explores the folk aesthetics of group-based creativity through the lenses of biography, history, literature, and folklore studies. Considers traditional objects as narratives in material form. Examples drawn from multiple cultures as well as traditions in students’ own lives. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.
Schedule Type: Lecture

ENGH 416: Ethnicity and Migration in Folklore. 3 credits.
Explores U.S. immigration trends and the historical basis for the concepts of ethnicity, identity, and immigration in folklore scholarship, literature, film, and popular media. The course explores at least three of the following ethnic groups: Latino, Asian, Jewish, European, Arab, or African. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Independent Study

ENGH 417: RS: Topics in Folklore Research. 3 credits.
Topic-based course in research methods. Students conduct advanced research in folklore studies using traditional and digital research tools and approaches. Notes: May be repeated when topic is different. Offered by English (p. 350). May be repeated within the degree for a maximum 6 credits.

Mason Core: Capstone (p. 135)

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: ENGH 305 (3 credit) and 85 credit hours earned.

Schedule Type: Lecture

ENGH 418: Cultural Constructions of Sexualities. 3 credits.
Introductory survey of cultural, literary, and theoretical constructions of sexuality that seek to complicate traditionally fixed categories of identity. Examines various representations of human sexuality, with particular attention to intersections with gender, race, ethnicity, nationality, and class. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 419: Topics in Popular Literature. 3 credits.
Studies specific topic or theme in popular literature. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 421: Topics in Medieval and Renaissance Literature. 3 credits.
Studies selected topics, genres, themes or authors in medieval or Renaissance literature and culture. Notes: May be taken for credit by English or history majors. Specific topic may vary. Primary emphasis is literary or historical, depending on discipline of instructor. May consider relevant material from philosophy, theology, and art. May be repeated when topic is different. Offered by English (p. 350). May be repeated within the degree for a maximum 6 credits. Equivalent to FRLN 431, HIST 431.

Specialized Designation: Scholarly Inquiry

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 422: Chaucer. 3 credits.
Major works of Chaucer, with emphasis on The Canterbury Tales . Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 424: Spenser. 3 credits.
Poetry of Edmund Spenser, with central emphasis on The Faerie Queene . Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 428: Milton. 3 credits.
Milton’s major poetic works, with emphasis on Paradise Lost . Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 431: Topics: British Literary Periods. 3 credits.
In-depth study of selected period of British literature. In addition to literary examples, materials may be chosen from art, philosophy, or popular culture of the time. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 432: Topics: British Authors. 3 credits.
Study of one or two major figures in British literature. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 441: Topics: American Authors. 3 credits.
Study of one or two major figures in American literature. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.
ENGH 442: Topics in American Literary Periods. 3 credits.
In-depth study of selected period of American literature. In addition to literary examples, materials may be chosen from art, philosophy, or popular culture of time. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 451: Science Fiction. 3 credits.
Major works of science fiction in terms of mode, themes, and narrative techniques, especially role of hypothesis in science fiction. Focuses on novels, short stories from early 19th century to present. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 452: Critical Study of Children's Literature. 3 credits.
Examines the history and criticism of children's literature and the strategies used by authors of children's literature to address their audience. Selected readings range from Puritan to contemporary writing for children, as well as influential works in educational philosophy, such as those by Locke and Rousseau. Offered by English (p. 350). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 453: Topics in Fiction. 3 credits.
Study of selected topics, periods, or authors. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 454: Topics in Poetry. 3 credits.
Study of selected topics, periods, or poets. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 455: Topics in Drama. 3 credits.
Studies selected topics, periods, or playwrights. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 456: Topics in Literary Nonfiction. 3 credits.
Special studies in literary nonfiction by topic, such as the personal essay, New Journalism, the "nonfiction novel," the memoir, or historical traditions of literary nonfiction. Notes: May be repeated when topic is different. Offered by English (p. 350). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

ENGH 458: RS: Topics in Literary Research. 3 credits.
Topic-based course in research methods. Students conduct advanced research in literary studies using traditional and digital research tools and approaches. Notes: May be repeated when the topic is different. Offered by English (p. 350). May be repeated within the degree.

Mason Core: Capstone (p. 135)

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: ENGH 305 (3 credit) and 85 credit hours earned.

Schedule Type: Lecture

ENGH 459: Internship. 1-3 credits.
Under supervision of a faculty director, students report and reflect on their work as interns at organizations of their choosing, usually in writing and/or editing positions. For 3 credits, students work on site at least 135 hours as specified in the agreement developed with the internship supervisor and approved by the faculty director. Notes: Contact the English Department one semester prior to enrollment. No more than 3 credits can be counted in concentration or English minor. May be repeated with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Permission of internship director. 60 credits. English majors need 18 credits of English (3 credits of 100-level English course; 3-6 credits of 200-level English courses; 3 credits of ENGL302/ENGH 302 and 6-9 credits of upper-level English courses). Non-English majors must meet the same requirements, except that they replace one upper-level English course with an upper-level course in their major.

Schedule Type: Internship

ENGH 470: RS: Topics in Film/Media History. 3 credits.
Advanced studies of development of film language, both as cultural practice and medium for formal innovation. Topics might include studies of national cinemas, historical periods, genres, or individual directors. Notes: May be repeated when topic is different. Offered by English (p. 350). May be repeated within the term for a maximum 6 credits.

Mason Core: Capstone (p. 135)

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: ENGL 332/ENGH 372 or permission of instructor.

Schedule Type: Lecture

ENGH 472: Topics in Film/Media Theory. 3 credits.
Advanced studies of theories about various aspects of production, distribution, and reception of film-mediated experiences. Topics may
include theories of spectator, semiotics, feminist film theory, theories of narrativity, structuralist film theory, or deconstruction. Notes: May be repeated when topic is different. Offered by English (p. 350). May be repeated within the term for a maximum of 6 credits.

**Recommended Prerequisite:** ENGL 332/ENGH 372 or permission of instructor.

**Schedule Type:** Lecture

**ENGH 474:** Topics in Film/Media Studies. 3 credits. American and foreign films selected by type, period, or director with emphasis varying from year to year. Required viewings, student discussion, and written critiques. Notes: May be repeated for a maximum of 6 credits with permission of department. Offered by English (p. 350). May be repeated within the term for a maximum of 6 credits.

**Recommended Prerequisite:** ENGL 332/ENGH 372 or permission of instructor.

**Schedule Type:** Lecture

**ENGH 483:** Technical Editing. 3 credits. Instruction in revising, editing, and preparing specialized writing for print production. Emphasizes methods of achieving clarity, accuracy, and completeness. Lecture and discussion on editing and printing techniques; practical exercise in revision, layout, and production. Offered by English (p. 350). May not be repeated for credit.

**Schedule Type:** Seminar

**ENGH 484:** RS: Writing Ethnography. 3 credits. Study and practice of ethnographic writing. Students conduct ethnographic investigations and practice journal keeping, field note recording, interviewing, transcription, and interpretation. Includes introduction to current issues in ethnographic writing. Offered by English (p. 350). May not be repeated for credit. Equivalent to ENGH 384.

**Mason Core:** Capstone (p. 135)

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** ENGH 302.

**Schedule Type:** Lecture

**ENGH 485:** Document Design. 3 credits. Theory and practice of using computer programs to design and produce publications including brochures, fliers, newsletters, and small magazines. Includes readings, writing papers, and producing and editing copies and original publications. Offered by English (p. 350). May not be repeated for credit.

**Schedule Type:** Seminar

**ENGH 486:** RS: Writing Nonfiction for Publication. 3 credits. Workshop course. Intensive practice in advanced nonfiction writing; emphasizes writing for publication. Occasional special topics sections in such forms as autobiography and scientific writing. Offered by English (p. 350). May not be repeated for credit.

**Mason Core:** Capstone (p. 135)

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** ENGL 309/ENGH 382 or ENGL 399/ENGH 399 or permission of instructor.

**Schedule Type:** Lecture

**ENGH 488:** Topics in Writing and Rhetoric. 3 credits. Advanced studies in rhetoric and writing. Introduces key rhetorical terminology and examines how texts construct meaning and how those meanings are determined within social contexts. Topics may include the relationship between rhetorics and poetics, rhetoric and new media, histories of rhetoric, global rhetorics, argument theory, discourse analysis, theories of technical communication, or advanced theories of composition and pedagogy. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the degree for a maximum of 6 credits.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**ENGH 489:** Proposal Writing and Development. 3 credits. Provides foundation in the skills and knowledge required to effectively create proposals for various types of organizations. Emphasizes best practices in management, presentation, and research skills necessary to find funding, manage proposal efforts, and build relationships with funders. Reviews editing, concision, and technical writing skills required for proposal writers. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** ENGH 302.

**Schedule Type:** Seminar

**ENGH 492:** Advanced Fiction Writing Workshop. 3 credits. Workshop; intensive practice in creative writing and study of creative process. Intended for students already writing original creative work. Notes: Enrollment is controlled. Submit 8-10 pages of fiction to instructor for review. May be repeated with permission of instructor. Offered by English (p. 350). May be repeated within the degree for a maximum of 6 credits.

**Recommended Prerequisite:** ENGH 396, ENGH 399.

**Schedule Type:** Lecture

**ENGH 493:** Advanced Workshop in Nonfiction. 3 credits. Workshop in varieties of nonfiction, along with creative process and techniques such as research and interview methods. Includes reading and writing of essays, biographies, autobiographies, travel, journalism, etc. Notes: Registration is controlled. Submit 8-10 pages of nonfiction to instructor for review. Offered by English (p. 350). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ENGH 396, ENGH 399.

**Schedule Type:** Lecture

**ENGH 494:** Advanced Poetry Writing Workshop. 3 credits. Intensive practice in the craft of poetry and study of the imagination in creative process. Intended for students already writing original poetry. Notes: Enrollment is controlled. Submit 8-10 pages of poetry to instructor for review. May be repeated with permission of instructor. Offered by
**500 Level Courses**

**ENGL 501: Introduction to Professional Writing and Rhetoric.** 3 credits. 
Provides historical and theoretical background in professional writing and editing in a seminar format. Explores professional writing's emergence as a field of scholarship and practice, emphasizes the relationships between rhetorical theories and practice, and introduces students to bibliographic research in the field. Offered by English (p. 350). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

**Schedule Type:** Lecture

**ENGL 502: Research Methods in Rhetoric and Professional Writing.** 3 credits. 
Introduces theory, methods, and ethics of conducting research in rhetoric and professional writing. Students learn to conduct and evaluate research that may include rhetorical analysis, discourse analysis, historical methods, ethnography, user-centered design, document and usability testing, and others. Offered by English (p. 350). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

**Schedule Type:** Lecture

**ENGL 503: Theory and Practice of Editing.** 3 credits. 
Instruction in revising, editing, and preparing specialized writing for printing. Emphasizes methods of achieving clarity, accuracy, and completeness. Lecture and discussion on editing and printing techniques; practical exercise in revision, layout, and production. Notes: May be repeated when topic is different. Offered by English (p. 350). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

**Schedule Type:** Seminar

**ENGL 504: Internship.** 1-6 credits.
Under supervision of a faculty director, students report and reflect on their work as interns at organizations of their choosing, usually in writing and/or editing positions. For 3 credits, students work on site at least 135 hours as specified in the agreement developed with the internship supervisor and approved by the faculty director. Notes: Contact the English Department one semester prior to enrollment. Offered by English (p. 350). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

**Schedule Type:** Internship

---

English (p. 350). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ENGL 397/ENGH 397 and manuscript review.

**Schedule Type:** Lecture

**ENGL 495:** Capstone and Thesis. 3 credits. 
Presentations of original work for critique by peers and faculty. Students synthesize what they have learned during prior work in the program through workshops for final revisions of manuscripts for the BFA portfolio. Students submit the revised manuscripts as their final submission for evaluation by faculty. Students receive guidance in research methods as they investigate the lives of writers and learn the procedures for such tasks as submitting original work for publication and applying for jobs. Offered by English (p. 350). May not be repeated for credit.

**Mason Core:** Capstone (p. 135)

**Recommended Prerequisite:** ENGL 396; ENGL 391, 392, or 393; ENGL 397, 398, and 399.

**Schedule Type:** Lecture

**ENGL 497:** Topics in Creative Writing. 3 credits. 
Intensive practice in creative writing and study of creative process. Workshop course. Concentrates on specialized literary type other than short story or poetry such as playwriting, screenwriting, children's literature, travel literature, autobiography, gothic novel, or translation. Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

ENGH 695: Northern Virginia Writing Project Inservice Program. 1-3 credits.
Offered at request of school division or other education agency to assist teachers in improving student writing and use of writing to learn. Notes: Content varies. May be repeated for credit with permission of
department. Offered by English (p. 350). May be repeated within the term. Equivalent to EDUC 695.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ENGH 696:** Northern Virginia Writing Project Teacher/Research Seminar. 3 credits.
Acquaints classroom teachers with current research on composing as well as methods of studying writing in school settings. Participants collect data and write up results of their research. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** ENGL 615/ENGH 615, ENGL 695/ENGH 695 the Northern Virginia Writing Project Summer Institute, or other course in the teaching of writing.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**ENGH 697:** Composition Theory. 3 credits.
Acquaints classroom teachers with theory relating to writing and teaching composition. Focuses on explaining theories of participants, reading works of leading theorists, and developing statement describing implications of theoretical consistency in teaching writing. Offered by English (p. 350). May not be repeated for credit. Equivalent to EDUC 697.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ENGH 699:** Workshop in English. 1-3 credits.
Concentrated workshops, educational tours, independent studies, and special seminars dealing with selected topics in writing, linguistics, film, electronic media, and literature written in English. Notes: All tours are optional, and may be replaced by specified work conducted on campus. May be repeated for a maximum of 12 credits with permission of department, but no more than 6 credits of ENGH 699 may be applied to master’s degree in English. No more than 3 credits of 699 may be applied to literature requirement for MFA degree. Offered by English (p. 350). May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:** Admission to MFA program or permission of department. Other interested graduate students should contact the English Department at (703) 993-1180.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Creative Writing.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ENGH 700 Level Courses**

**ENGH 701:** Research in English Studies. 3 credits.
Introduces research in English studies, including practice in library methods, writing critical bibliography, evaluating issues and problems, and surveying scholarly activities in department. Offered by English (p. 350). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ENGH 702:** Research Methods in Rhetoric and Writing. 3 credits.
Explores a variety of text-based and empirical approaches and methods for addressing questions and problems related to public rhetoric and writing programs. Seminar participants work through a complete research design and pilot study. Offered by English (p. 350). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ENGH 705:** Literary Theory and Criticism. 3 credits.
Major theories of literature and methods of analyzing and evaluating literary works. Notes: Topics vary. May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ENGH 720:** Histories of Institutional Rhetorics. 3 credits.
Examines the development of rhetorics within their historical and institutional contexts. Investigates rhetoric and rhetoricians across the development of oral rhetorics and the shift to written genres, the rise of scientific discourses, and the establishment of educational and bureaucratic organizations. Offered by English (p. 350). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ENGH 722: Composition Pedagogies and Programs in Context.** 3 credits.
Examines scholarship on pedagogy, curriculum design and assessment, faculty development, and program management related to the practice of teaching or training writers in an institutional setting: two- and four-year colleges, K-12 schools, and workplace training seminars. Students will complete independent projects analyzing a current or potential writing program. Offered by English (p. 350). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**ENGH 724:** 

**Schedule Type:** Lecture

**ENGH 724: Professional Writing Theory and Research.** 3 credits.
Examines current research in the field and the theories that inform it. Special emphasis is placed on workplace contexts and users in technological contexts. Course may include theories and methods such as activity theory, actor-network theory, complexity theory, cross-cultural rhetoric, digital rhetoric, discourse analysis, ethnography, genre theory, usability, and systems theory. Offered by English (p. 350). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**ENGH 726:** 

**Schedule Type:** Lecture

**ENGH 726: Rhetorical Theory and Public Spaces.** 3 credits.
Covers the major theories of public rhetoric and the public sphere; explores how rhetoric influences public perceptions; examines publics as a site of interpretive mediation. Offered by English (p. 350). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**ENGH 740:** 

**Schedule Type:** Lecture

**ENGH 740: Seminar in English/Cultural Studies.** 3 credits.
Analyzes historical shifts in literary and cultural discourse or of relationships between literary and nonliterary elements of culture within specific historical moment. Notes: Major research paper required. Topics vary. May be repeated when topic is different with permission of department. Offered by English (p. 350). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 9 credits of graduate English credits, ENGL 701/ENGH 701, or permission of department.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**ENGH 750:** 

**Schedule Type:** Lecture

**ENGH 750: Advanced Workshop in Poetry Writing.** 3 credits.
Intensive practice in craft of poetry for experienced writers. Notes: May be repeated for credit with permission of department. Offered by English (p. 350). May be repeated within the degree.

**Recommended Prerequisite:** Admission to MFA concentration in poetry, ENGL 564/ENGH 564, and ENGL 617/ENGH 617.

**Registration Restrictions:**
Enrollment is limited to students with a major in Creative Writing.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**ENGH 751:** 

**Schedule Type:** Lecture

**ENGH 751: Advanced Workshop in Fiction Writing.** 1-6 credits.
Intensive practice in craft of fiction for experienced writers. Notes: May be repeated for credit with permission of department. Offered by English (p. 350). May be repeated within the degree.

**Recommended Prerequisite:** ENGL 566/ENGH 566, and ENGL 618/ENGH 618.

**Registration Restrictions:**
Enrollment is limited to students with a major in Creative Writing.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**ENGH 752:** 

**Schedule Type:** Lecture

**ENGH 752: Advanced Workshop in Nonfiction Writing.** 1-6 credits.
Intensive practice in craft of nonfiction for experienced writers. Notes: May be repeated for credit with permission of department. Offered by English (p. 350). May be repeated within the degree.

**Recommended Prerequisite:** ENGL 565/ENGH 565 and ENGL 616/ENGH 616.

**Registration Restrictions:**
Enrollment is limited to students with a major in Creative Writing.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**ENGH 790:** 

**Schedule Type:** Seminar

**ENGH 790: Projects in Literary Studies.** 3 credits.
Students complete a capstone project guided by instructor and a faculty consultant based on work produced in a previous graduate course. Class meetings focus on building skills in research, revision, and editing, discussing topics related to professionalization both in and out of academia, and revising work in a workshop environment. Students will produce a professional-quality article or similar final project. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** 21 credits in MA coursework including ENGH 701, permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**ENGH 797:** Projects in Professional Writing and Rhetoric. 3 credits. Students complete a capstone project guided by instructor and a faculty consultant. Reflecting on theories and methods learned in previous course work and applying them to a concrete rhetorical situation, students produce a professional-quality project for a primary audience located in the professional workplace or the discipline of rhetoric and professional writing. Offered by English (p. 350). May not be repeated for credit.

**Recommended Prerequisite:** 21 credits in MA coursework, including the core, theory, PWR and Writing requirements, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**ENGH 798:** Directed Reading and Research. 1-6 credits. Reading, research, and writing on specific project under direction of department member. Notes: Oral or written report required. For MA students: May be repeated for a maximum of 6 credits with permission of department. For MFA students: 12 credits may be applied to the MFA requirements but no more than 3 credits may count toward completing the literature requirement. Offered by English (p. 350). May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

ENGH 797: Thesis. 1-6 credits. Students who take ENGH 798 to develop thesis topic and then elect thesis option receive 3 credits for ENGH 799 on completion of thesis. Students who do not take ENGH 798, or who take it to work on project unrelated to thesis, receive up to 6 credits for ENGH 799 on completion of thesis. Offered by English (p. 350). May be repeated within the degree.

**Recommended Prerequisite:**
Enrollment is limited to Graduate or Non-Degree level students.

**Schedule Type:** Thesis

**ENGH 824:** Studies in Composition. 3 credits. Offers advanced study of theoretical, practical, or pedagogical topics related to composition. Notes: May be repeated for credit when topic is different. Offered by English (p. 350). May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ENGH 826:** Studies in Public Rhetorics. 3 credits. Offers advanced study of theoretical, practical, or pedagogical topics related to public rhetorics. Notes: May be repeated for credit when topic is different. Offered by English (p. 350). May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ENGH 822:** Studies in Professional Writing. 3 credits. Offers advanced study of theoretical, practical, or pedagogical topics related to professional writing and technical communication. Notes: May be repeated for credit when topic is different. Offered by English (p. 350). May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**ENGH 821:** Writing Program Design and Administration. 3 credits. Examines the theory and practice of writing program leadership. Investigates the principles that inform faculty support, curriculum development, program assessment, institutional alignment, and leadership approaches with regard to administering writing instruction. Offered by English (p. 350). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**ENGH 897:** Directed Research. 1-3 credits. Reading, research, and writing on a specific project under direction of faculty member. Offered by English (p. 350). May be repeated within the degree for a maximum 9 credits.

**Recommended Prerequisite:** Completion of 36 credits in coursework in the writing and rhetoric PhD Program.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Independent Study

**ENGH 898:** Qualifying Exams Seminar. 1-3 credits. Work on PhD qualifying exams. Offered by English (p. 350). May be repeated within the degree for a maximum 9 credits.

**Recommended Prerequisite:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Independent Study

**ENGH 899:** Doctoral Dissertation Proposal. 1-6 credits. Work on research proposal that forms the basis for the doctoral dissertation. Offered by English (p. 350). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Advancement to candidacy.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.
Schedule Type: Dissertation

ENGH 999: Doctoral Dissertation. 1-12 credits.
Doctoral dissertation research and writing under direction of student’s dissertation committee. Offered by English (p. 350). May be repeated within the degree for a maximum 21 credits.

Recommended Prerequisite: ENGH 898.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

English for Academic Purposes (EAP)

000 Level Courses

EAP 097: Verbal Preparation for the Graduate Record Examination. 0 credits.
Prepares students in the International Graduate Pathways requiring the general Graduate Record Examination test for progression to take the computer adaptive version of the exam where the emphasis is placed primarily on the verbal section. This course primarily emphasizes the verbal portion of the exam along with text language and testing strategies; identifying common test-taking errors; and managing in test anxiety. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 0 credits. Equivalent to PROV 095, PROV 097.

Schedule Type: Seminar

EAP 098: Individualized Language Instruction. 0 credits.
Individualized language instruction for Pathway students. Focus on reading, writing, listening, and speaking skills. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 4 credits. Equivalent to PROV 098.

Schedule Type: Independent Study

EAP 099: Individualized Language Instruction. 0 credits.
Individualized language instruction for Pathway students. Focus on reading, writing, listening, and speaking skills. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 4 credits. Equivalent to PROV 099.

Schedule Type: Independent Study

100 Level Courses

EAP 100: Special Topics. 1 credit.
EAP 100 is to be used as an incubator for special topics courses under development in the Undergraduate Pathway program at INTO Mason. EAP 100 will be used for the various content-based English Language Support courses that are paired with major or content courses required by Undergraduate Pathways students. Language support courses such as EAP 100 run concurrently with credit-bearing undergraduate content course. Offered by INTO Mason (p. 123). May not be repeated for credit.

Schedule Type: Lecture

EAP 102: Language Support for American Cultures. 1 credit.
Academic language support course for Undergraduate Pathways students taking American Cultures. Designed to increase students’ ability to comprehend and respond to readings, discussions, and lectures related to American Cultures. Emphasizes the development of successful strategies for intrapersonal and small/large group communication activities, student familiarity with anthropological and sociological terminology and effective application of reading/annotating strategies. Also listed as PROV 102. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: PROV 102.

Schedule Type: Lecture

EAP 103: Language Support for Public Speaking. 1 credit.
Academic language support course for Public Speaking. Focus on increasing students’ comprehension and use of key grammatical structures, vocabulary, word forms, and reading/annotating strategies in oral speech. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 3 credits. Equivalent to PROV 103.

Recommended Corequisite: COMM 100.

Schedule Type: Seminar

EAP 104: Language Support World History. 1 credit.
Academic language support course for Introduction to World History. Focus on increasing students’ comprehension and use of key grammatical structures, vocabulary, word forms, and reading/annotating strategies in literacy/reading. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 3 credits. Equivalent to PROV 104.

Recommended Corequisite: HIST 125.

Schedule Type: Seminar

EAP 107: The Grammar of Academic Writing. 3 credits.
This course is designed to improve students’ understanding of written language and to provide mechanisms that allow students to take advantage of this flexible but structured form of communication. Providing this knowledge and these tools will improve students’ abilities to identify and correct grammatical mistakes, write cohesive and coherent paragraphs, and condense essential information-necessary skills for effective academic writing. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum credits. Equivalent to PROV 107.

Schedule Type: Lecture

EAP 108: Language Support for Business in American Society. 1 credit.
Academic language support course for Undergraduate Pathways students taking Business in American Society. This course is designed to increase students’ ability to read and analyze qualitative and quantitative information, understand and use business terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of group discussions, debates, and oral/written critiques of business-related current events. Also listed as PROV 108. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: SOM 100.

Schedule Type: Seminar
EAP 109: College Reading Skills. 1 credit. 
Academic reading support for Undergraduate Pathways students in specific pathways. Designed to increase students’ ability to read, summarize, and analyze texts, including information graphics and visuals. Focuses on student comprehension and utilization of discipline-specific genres/terminology and effective literacy practices/strategies in anticipation of group discussions, reading research, and responding to writing assignments. Also listed as PROV 109. Notes: Students must attain minimum grade of C to fulfill requirements. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 3 credits.

Schedule Type: Seminar

EAP 111: Language Support for Introduction to Information Technology. 1 credit.
Academic language support for Undergraduate Pathways students taking Information Technology. Designed to increase students’ IT literacy, including familiarity and accurate usage of terms related to digital devices, computer hardware, software, telecommunications, networking and multimedia. Supports students’ oral and written academic English skills in anticipation of class lectures, textbook readings, individual assignments, and online discussion boards. Also listed as PROV 111. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: IT 101.

Schedule Type: Seminar

EAP 112: Language Support for Introduction to Computer Programming. 1 credit.
Academic language support for Undergraduate Pathways students taking Computer Programming. This course is designed to increase students’ ability to respond accurately to computer programming problems in English, understand and use programming terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of class lectures, lab work, individual assignments, and online discussion boards. Also listed as PROV 112. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: CS 112.

Schedule Type: Seminar

EAP 113: Language Support for University Physics. 1 credit.
Academic language support course for Undergraduate Pathways students taking program University Physics I. This course is designed to increase students’ ability to respond accurately to physical problems in English, understand and use mathematical and physics terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of class lectures, lab/recitation work, and online discussion boards. Also listed as PROV 113. Notes: Students must attain minimum grade of C to fulfill requirements. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: PHYS 160 and PHYS 161.

Schedule Type: Seminar

EAP 114: Language Support for General Chemistry I. 1 credit.
Academic language support for Undergraduate Pathways students taking General Chemistry I. This course is designed to increase students’ ability to read and comprehend qualitative and quantitative information, understand and use general science and chemistry-related terminology, set-up and solve numerical problems in English, and take notes from oral lectures and textbook chapters. Also listed as PROV 114. Notes: Students must attain minimum grade of C to fulfill requirements. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: CHEM 211.

Schedule Type: Seminar

EAP 115: Language Support for Introductory Geology I. 1 credit.
Academic language support for Undergraduate Pathways students taking Introductory Geology I. This course is designed to increase students’ ability to read and comprehend qualitative and quantitative information in English, understand and use general science and geology-related terminology, take notes from oral lectures and textbook chapters, and participate in group discussions. Also listed as PROV 115. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: GEOL 101.

Schedule Type: Seminar

EAP 120: Linguistics Capstone. 0 credits.
Required to complete all standard undergraduate pathways. Provides students with opportunity to demonstrate mastery of English language skills in reading, writing, speaking, listening, grammar and/or vocabulary. Builds on work in language support classes. Includes language assessment, feedback on skills, and review of post-program support. Required during second semester of the Undergraduate Pathways program. Also listed as PROV 120. Notes: A passing grade of “S” confirms the student’s English language proficiency is sufficient for degree-seeking study. Offered by INTO Mason (p. 123). May be repeated within the degree for a maximum 0 credits.

Schedule Type: Seminar

500 Level Courses

EAP 503: Interpersonal Communication for International Students: Practicum and Theory. 2 credits.
The course requires that students use intensive practice in oral communication contexts typical at universities to build knowledge and skills for informal interpersonal communication settings with faculty, peers, and students, and skills needed for formal presentations, class discussion, and tutoring. Readings & assignments cover research on first impression management; informative and explanatory communication; conveying emotional support; listening, and narrative skill. Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to PROV 503.

Recommended Prerequisite: Completion of undergraduate degree at a university outside of the US.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EAP 504: Advanced English for Academic Purposes Reading and Writing.** 2 credits.
This 8-week course is designed for graduate international students who are studying abroad, emphasizing advanced skill development in graduate-level English for Academic Purposes for reading and writing within their disciplines. Utilizing a multimodal and interactive format, students will complete guided and independent research papers as well as read, discuss and write about excerpts from college texts and academic journals. Notes: In as much as possible, materials for the course will be discipline specific and individualized course goals will be determined by the needs of the students and their cultural experiences. Offered by INTO Mason (p. 123). May not be repeated for credit.

**Recommended Prerequisite:** EAP 506.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to English Language, Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EAP 505: Special Topics in Advanced English for Academic Purposes.** 2 credits.
This special topics course is tailored to international students who received their undergraduate degrees outside the United States. The course provides intensive practice and individualized feedback in advanced communication methods appropriate at the graduate level. Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to PROV 505.

**Recommended Prerequisite:** Completion of undergraduate degree at a university outside of the US.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**EAP 506: Graduate Communication in the Disciplines I.** 3-4 credits.
Students develop strategies for completing research-based writing and presentations in their field. Students will review rhetorical structures and organizational strategies common to US scholarly communications generally and in their particular field. Students will also practice strategies at sentence and discourse levels to increase the clarity, precision, and appropriateness of their communication skills. Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to PROV 506.

**Recommended Prerequisite:** Completion of undergraduate degree at a university outside of the US.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to English Language, Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EAP 507: Graduate Communication in the Disciplines II.** 3-4 credits.
The second course in a series that helps students develop strategies for completing research-based writing and presentations in their field. Students will review rhetorical structures and organizational strategies common to US scholarly communications generally and in their particular field. Students will also practice strategies at sentence and discourse levels to increase the clarity, precision, and appropriateness of their communication skills. Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to PROV 507.

**Recommended Prerequisite:** EAP 506.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EAP 508: Graduate Communication in the Disciplines III.** 4 credits.
Students develop strategies for completing research-based writing and presentations in their field. Students will review rhetorical structures and organizational strategies common to US academic scholarly communications generally and in their particular field. Students will also review and practice strategies at the sentence and discourse levels to increase the clarity, precision and appropriateness of their oral and written communication skills. Group instruction will be supplemented by one-on-one conferencing as students complete a major graduate-level project. Notes: This course may not count towards academic degree requirements at the graduate level without permission from the academic dean/director. Offered by INTO Mason (p. 123). May not be repeated for credit.

**Recommended Prerequisite:** Completion of undergraduate degree at a university outside the United States.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture
EAP 510: Linguistic Capstone. 0 credits. Course builds on work in language support classes throughout the program and enables students to demonstrate acceptable mastery of their academic English language skills in reading, writing, speaking, listening, grammar, and vocabulary. Students take proficiency assessment receive feedback on skills, and review post-program language support resources. Offered by INTO Mason (p. 123). May not be repeated for credit.

**Recommended Prerequisite:** Standard pathway students must have completed first semester of program, or at least 9 credits.

**Registration Restrictions:** Enrollment is limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

### Environmental Science and Policy (EVPP)

**100 Level Courses**

**EVPP 110:** The Ecosphere: An Introduction to Environmental Science I. 4 credits.

Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and earth sciences in integrated format with lecture, laboratory, and field exercises. Notes: One of two semesters of environmental lab science that fulfills Mason Core science requirements for non science majors. Along with EVPP 111, can be taken in any order. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to MSU 107.

**Mason Core:** Natural Science with Lab, Encore:Sustainability (p. 135)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Laboratory, Lecture

**EVPP 111:** The Ecosphere: An Introduction to Environmental Science II. 4 credits.

Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and earth sciences in integrated format with lecture, laboratory, and field exercises. Notes: One of two semesters of environmental lab science that fulfills Mason Core science requirements for non science majors. Along with EVPP 110, can be taken in any order. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Mason Core:** Natural Science with Lab, Encore:Sustainability (p. 135)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Laboratory, Lecture

### 200 Level Courses

**EVPP 201:** Environment and You: Issues for the Twenty-First Century. 3 credits.

Introduces broad aspects of human-environmental interactions in the contemporary world. Topics range broadly from global populations and wastewater treatment to environmental law, and genetic engineering. Includes both science and science policy of the environment. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Mason Core:** Natural Science Overview, Encore:Sustainability (p. 135)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Lecture

**EVPP 210:** Environmental Biology: Molecules and Cells. 4 credits.

This course provides environmental science majors with the cellular foundation required for subsequent courses in the BS curriculum with a focus on how biological systems respond to environmental threats. The course emphasizes the connection between cellular processes and a healthy environment, and how this relationship is jeopardized by a variety of chemical and physical environmental perturbations. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Corequisite:** CHEM 211.

**Schedule Type:** Laboratory, Lecture

### 300 Level Courses

**EVPP 301:** Environmental Science: Biological Diversity and Ecosystems. 4 credits.

This course provides environmental science majors with the necessary background in biological diversity and ecological science required for subsequent courses in the BS curriculum. The course reviews the diversity of life on earth and the structure and functioning of ecosystems and populations. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**

**Required Prerequisite:** EVPP 210\(^C\).

\(^C\) Requires minimum grade of C.

**Schedule Type:** Laboratory, Lecture

**EVPP 302:** Environmental Science: Biomes and Human Dimensions. 4 credits.

This course provides environmental science majors with the necessary background in biomes and human dimensions required for subsequent courses in the BS curriculum. The course reviews the functioning of aquatic and terrestrial biomes and human interactions with and impacts on the environment. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**

**Required Prerequisite:** EVPP 301\(^C\).

\(^C\) Requires minimum grade of C.

**Schedule Type:** Laboratory, Lecture
EVPP 305: *Environmental Microbiology Essentials*. 3 credits.
Provides understanding of microbes and their function as a vital part of an environmental education. The role of microbes is central to many environmental issues such as climate change, biodegradation of toxics, wastewater treatment and drinking water contamination. Course provides an introduction to the breadth of microbiology including essential information for students studying environmental problems and their solution. Notes: Laboratory section (EVPP 305) is a corequisite unless previously completed. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 460.

**Recommended Prerequisite:** EVPP 210 and 30 credit hours, or permission of instructor;

**Recommended Corequisite:** EVPP 306.

**Schedule Type:** Lecture

EVPP 306: *Environmental Microbiology Essentials Laboratory*. 1 credit.
Laboratory study of environmental microbiology. Course provides an introduction to the microbiological techniques for students studying environmental problems and their solution. Examples include microbiology of natural ecosystems (e.g., Potomac River), bacteria in fresh and estuarine waters and sediments, Indicator organisms (e.g., coliform bacteria), molecular identification of unknown bacteria from nature, and visualization of bacteria in their natural habitat. Notes: Lecture section (EVPP 305) is a corequisite. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 210 and 30 credit hours, or permission of instructor.

**Recommended Corequisite:** EVPP 305.

**Schedule Type:** Laboratory

EVPP 309: *Introduction to Oceanography*. 3 credits.
Introduces physical, chemical, biological, and geological aspects of oceanic environment. Notes: May include field trip. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 309, GEOL 309.

**Recommended Prerequisite:** Two of the following lab sciences courses are required for a total of 8 credits: [GEOL 101 or 102], [EVPP 110 or 111 or 210], CHEM 211, [BIOL 103 or 213], [PHYS 160 and 161 or 243 and 244].

**Schedule Type:** Lecture

EVPP 318: *Conservation Biology*. 3 credits.
Introduces science used to identify species in need of conservation, and techniques to manage and protect organisms. Notes: Cannot be taken with Smithsonian Seminar (off campus classes). CONS 401, CONS 411. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 318.

**Recommended Prerequisite:** BIOL 308 or BIOL 310, or permission of instructor.

**Schedule Type:** Lecture

EVPP 322: *Business and Sustainability*. 3 credits.
Examines the types of approaches businesses can take to take to respond to sustainability concerns. Designed to prepare students for assisting organizations to incorporate sustainability considerations into their strategic decision-making. Notes: Students from multiple disciplines (business, social sciences, natural sciences, humanities, education, etc.) can participate in the class without having had previous courses in management. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 30 credit hours, recommend EVPP 361/GOVT 361 Introduction to Environmental Policy

**Schedule Type:** Lecture

Overview of current knowledge regarding human and environment interactions and human ecology. Topics include basic theoretical and conceptual issues, relationship between social and biological sciences, human causes and consequences of environmental change, and contemporary perspectives on environmental issues. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** One of either EVPP 110 or EVPP 111 or GEOL 101 or SOCI 101 or ANTH 114 or 60 credits.

**Schedule Type:** Lecture

EVPP 337: *Environmental Policy Making in Developing Countries*. 3 credits.
Overview of environmental policy process in developing countries around the world. Major focus on understanding distinctive problems and dynamics of environmental policy making in poor countries to generate better policy decisions and management. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course, Writing Intensive in the Major

**Recommended Prerequisite:** 60 credits.

**Schedule Type:** Lecture

EVPP 338: *Economics of Environmental Policy*. 3 credits.
Introduction to environmental, resource, and ecological economics for non-economist undergraduates. Covers basic theories of scarce resource allocation and examines conditions under which market allocations are efficient and sustainable. Includes graphical and verbal presentation of theory. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** ECON 100 or ECON 103 or ECON 105 or ECON 110, or permission from instructor.

**Schedule Type:** Lecture

EVPP 350: *Freshwater Ecosystems*. 4 credits.
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Teaches physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms. Lectures, field trips, lab exercises. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 350.

**Recommended Prerequisite:** Either CHEM 211 and CHEM 212 or CHEM 155 and CHEM 156, and either EVPP 110 or BIOL 308, or permission of instructor.
EVPP 355: Ecological Engineering and Ecosystem Restoration. 4 credits.
Provides definition, classification, and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration (e.g., wetland and river systems), and the use of natural processes to provide ecosystem services to society. Provides students with a systems-oriented perspective on designing and managing ecosystems. Students will study principles in designing field ecological studies, ecological models, ecological engineering, and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with the field wetland mesocosm on the Mason campus. One field trip is required part of the course. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to GEOL 363.

Recommended Prerequisite: BIOL/EVPP/GEOL 309 or GEOL 317; or 9 credits in geography, including GGS 309.

Schedule Type: Laboratory, Lecture

EVPP 361: Introduction to Environmental Policy. 3 credits.
Environmental politics and policymaking since the 1970s. Primary focus on United States, with some discussion of global issues. Examines policy strategies and outcomes, ethical and economic debates, political controversies, lawmaking and enforcement, and role of key players. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to GOVT 361.

Recommended Prerequisite: 30 credits.

Schedule Type: Lecture

EVPP 362: Intermediate Environmental Policy. 3 credits.
Examines environmental issues building on learning objectives from EVPP 361. Focuses on environmental and policy issues in the US and internationally, exploring the politics of nature and the interaction of environmental science and politics and resulting controversy. Risk and uncertainty loom large in most environmental issues. "Natural" disasters as well as direct "man-made" problems will be covered. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Recommended Prerequisite: EVPP 361 or GOVT 361 or permission of instructor.

Schedule Type: Lecture

EVPP 363: Coastal Morphology and Processes. 4 credits.
Studies global coastal geomorphology and processes with emphasis on U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, and storms; and human activities. Lectures and extended weekend field trips to mid-Atlantic coast. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to GEOL 363.

Recommended Prerequisite: BIOL/EVPP/GEOL 309 or GEOL 317; or 9 credits in geography, including GGS 309.

Schedule Type: Laboratory, Lecture

EVPP 377: Applied Ecology. 3 credits.
Introduces ecosystem concepts and applications to natural and managed ecosystems. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 377.

Recommended Prerequisite: 60 credits including 8 credits of biology, geology, or chemistry, or permission of instructor.

Schedule Type: Lecture

EVPP 378: RS: Ecological Sustainability. 4 credits.
Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 379.

Mason Core: Capstone (p. 135)

Recommended Prerequisite: EVPP 301 or BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture

EVPP 380: Wetlands of the World. 4 credits.
A study of the ecosystems of the world. Emphasizes different types of wetland ecosystems and their services, including water quality, coastal protection, flood mitigation, and wildlife protection. The course includes trips to local wetlands and to the Everglades National Park. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Recommended Prerequisite: EVPP 301 or BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture

EVPP 395: Undergraduate Research in Environmental Science and Policy. 1-3 credits.
Original research project. May involve field and lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor's guidance. Notes: Culminates in final report. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree for a maximum 10 credits.

Recommended Prerequisite: 45 credits and at least two upper level science lab courses.

Schedule Type: Research

EVPP 396: Directed Topic in Environmental Science and Policy. 1-4 credits.
Study of topics not available in fixed-topics courses. May involve readings, lectures, lab assignments, and tutorials as jointly agreed on by student and instructor. Notes: Culminates in term paper, final exam, or both. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: 45 credits.

Schedule Type: Independent Study
400 Level Courses

**EVPP 401: Integrated Environmental Assessment.** 3 credits. Presents strategic planning at the regional level, and focuses on the methods, format, and content of a Strategic Environmental Assessment (SEA), also referred to as a programmatic environmental impact statement (PEIS). Students will conduct research and develop their own SEA for Shenandoah National Park (NP). Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL/EVPP/GEOL 309 or BIOL/EVPP 449; and 60 credit hours.

**Recommended Prerequisite:** 60 credit hours completed.

**Schedule Type:** Lecture

**EVPP 408: Mushrooms, Molds and Society.** 3 credits. Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 408.

**Recommended Prerequisite:** EVPP 110 and 111 or EVPP 210 or BIOL 213.

**Schedule Type:** Lecture

**EVPP 409: Medical Mycology.** 3 credits. Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 409.

**Recommended Prerequisite:** EVPP 110 and 111 or EVPP 210 or BIOL 213.

**Schedule Type:** Lecture

**EVPP 413: Histotechniques.** 3 credits. Introduces theory and methods for the preparation of tissue samples from animal or plant specimens for examination with light or electron microscopy. Offered by Environmental Sci & Pub Policy. May not be repeated for credit.

**Recommended Prerequisite:** EVPP 210 or permission of instructor.

**Schedule Type:** Lecture

**EVPP 419: Marine Mammal Biology and Conservation.** 3 credits. Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 454, EVPP 519.

**Recommended Prerequisite:** BIOL/EVPP/GEOL 309 or BIOL/EVPP 449; and 60 credit hours.

**Schedule Type:** Lecture

**EVPP 420: Marine Mammal Biology and Conservation Field Course.** 1 credit. This course provides laboratory, seminar sessions and field work to accompany EVPP 419-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 455.

**Recommended Prerequisite:** EVPP 419 or BIOL 454, concurrent enrollment is permitted.

**Schedule Type:** Seminar

**EVPP 421: Marine Conservation.** 3 credits. Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. Provides an overview of marine environmental law and policy issues related to marine conservation policy. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 450, EVPP 521.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** BIOL/EVPP/GEOL 309.

**Schedule Type:** Lecture

**EVPP 427: Disease Ecology and Conservation.** 3 credits. Presents the trans-disciplinary discipline of conservation medicine, the study of relationships between organism and ecosystem health and environmental conditions. Topics include infectious and noninfectious diseases, pathogens, processes, and impacts on human, biotic, and ecosystem health, and how to address the consequences of diseases to populations and ecological communities. Notes: This course will co-meet with EVPP 527. Undergraduate students in this course will have separate (shorter) reading and writing assignments and will be graded according to a different rubric than the graduate students. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** 60 credits and BIOL 213 or BIOL/ EVPP 305/306 and BIOL 308.

**Schedule Type:** Lecture

**EVPP 429: Environmental Science Communication.** 3 credits. Communicating environmental science is inherently challenging whether in academia, the public policy realm, or to the general public. The aim of this course is to expose students to the multiple ways environmental science can be communicated. Such exposure will be made both through a theoretical approach by examining science communication literature, as well as through practical, hands-on activities and assignments. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** Completion of 60 credit hours.

**Schedule Type:** Lecture
EVPP 430: Fundamentals of Environmental Geographic Information Systems. 3 credits.
Provides the basic knowledge to explore complex environmental data sets and relationships among biological, ecological, physical and anthropogenic variables using geographic information systems. Using spatial mapping and exploration tools students will be capable of independent analysis of complex environment. Notes: Previous knowledge of fundamentals of geography, coordinate systems and map projections is an asset. Knowledge of operating systems, text editor and spreadsheet is required. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Recommended Prerequisite: EVPP 110 and 111 or EVPP 210, and IT 103 or CDS 130, and 60 credits hours; or permission of instructor.

Schedule Type: Lecture

EVPP 432: Energy Policy. 3 credits.
Overview of economic, political, and technological aspects of energy policy development. Students will examine various energy sources in the context of national and global considerations regarding electricity generation, efficiency and conservation, energy economics, and climate change. Updated yearly. The course may include one field trip. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: 60 credits and EVPP 361/GOVT 361, or permission of instructor.

Schedule Type: Lecture

EVPP 436: The Human Dimensions of Global Climate Change. 3 credits.
Social science investigation of humans' role(s) in global climate change, including diversity of ecological, cultural and policy issues. Focuses on current science, causes and responses, human rights and social justice, vulnerability of marginalized populations, relevant issues associated with communication and behavior change, place of policy, and the multiple existing and potential roles of academic action. Discussion format. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Recommended Prerequisite: EVPP 336, CLIM 101 and 60 credits, or permission of instructor.

Schedule Type: Lecture

EVPP 440: Field Environmental Science. 4 credits.
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site. Notes: Students bear cost of required field trips. May be repeated with permission of Environmental Science and Policy. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree for a maximum 9 credits. Equivalent to BIOL 440.

Recommended Prerequisite: BIOL 308 or 310 or permission of instructor.

Schedule Type: Independent Study

EVPP 442: Urban Ecosystems and Processes. 4 credits.
Provides an overview of the challenges and opportunities that urban environments present to the plants and animals inhabiting cities and the ways that those organisms and entire ecosystems respond. Includes ecosystem ecology for engineered ecosystems, along with reviews of urban metabolism, energy budgets, water cycles, and soil ecology. Students design and conduct a small-scale green infrastructure experiment/project on campus. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 442.

Recommended Corequisite: Prereqs: CHEM 211 and CHEM 213; MATH 113 or equivalent; BIOL 308 or EVPP 301; PHYS 243 or permission of instructor.

Schedule Type: Laboratory, Lecture

EVPP 445: Principles of Environmental Toxicology. 3 credits.
Explores basic principles of toxicology with an emphasis on the environment. Includes the history and scope of the field; absorption, distribution, metabolism and excretion of toxicants; mechanisms of toxic action; genetic toxicology; ecotoxicology as well as specific examples important toxicants. Introduces regulatory toxicology and human and ecological risk assessment. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Recommended Prerequisite: EVPP 210 or both EVPP 110 and 111; and CHEM 211 and CHEM 212; and 60 credit hours; or permission of instructor.

Schedule Type: Lecture

EVPP 449: Marine Ecology. 3 credits.
Plants and animals of marine environments and physical and chemical conditions that affect their existence. Notes: Will be cross-listed with BIOL 449. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 449.

Recommended Prerequisite: BIOL 308 and BIOL/EVPP/GEOL 309; or permission of instructor.

Schedule Type: Lecture

EVPP 451: Fungi and Ecosystems. 3 credits.
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Recommended Prerequisite: BIOL 301 or BIOL 308 or course in microbiology; or permission of instructor.

Schedule Type: Lecture

EVPP 468: Vertebrate Natural History. 4 credits.
Introduces vertebrates with emphasis on systematics, evolution, life history, behavior, and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 468.

Recommended Prerequisite: EVPP 301 and 302 or BIOL 308 and BIOL 310; or permission of instructor.

Schedule Type: Laboratory, Lecture

EVPP 475: Global Biodiversity Governance. 3 credits.
Study global biodiversity governance from a political/policy science perspective. Regime and governance literature, and empirical examples including intergovernmental policy, such as biodiversity-related climate change policy (REDD+), and certification standards, such as the Forest
Specialized Designation: Green Leaf Course

Recommended Prerequisite: One (environmental) social science course.

Schedule Type: Lecture

EVPP 480: Sustainability in Action. 4 credits.
Provide students with valuable and tangible experience in practical aspects of realizing sustainability goals and to transfer theory into practice. Allows students to engage in real-world, sustainability-related projects that provide benefits for a target community. Identify and attempt to solve a sustainability-related problem or address a sustainability-related need in a specific target community. Notes: Capstone course for the Sustainability Minor see Environmental Science and Policy department listing for details. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Mason Core: Encore:Sustainability, Synthesis (p. 135)

Specialized Designation: Green Leaf Course, Scholarly Inquiry

Recommended Prerequisite: Completed or concurrent enrollment in all other required Mason Core courses; completion of 60 credits

Schedule Type: Seminar

EVPP 490: Special Topics in Environmental Science and Policy. 4 credits.
Studies selected topics in environmental science and policy using lectures, guest lectures, student presentations, or laboratory exercises. Notes: Topics vary, but each offering has coherent syllabus. May be repeated for credit if topics are significantly different. Offered by Environmental Science & Policy (p. 660). May be repeated within the term for a maximum 8 credits.

Recommended Prerequisite: 60 credits and permission of instructor.

Schedule Type: Lecture

EVPP 494: Internship. 1-3 credits.
Involves off-campus, professional student work with approved agencies, institutions, non-profits, or businesses. Work must produce one or more academic products such as: comprehensive report, departmental presentation, poster, or article. At least one substantive piece of work will be assessed for each internship credit being undertaken. Scope of work, credits, and academic product(s) are determined in consultation with the internship instructor. Notes: Credit will be assigned based on the number of hours participating in the internship each week: 1 Credit = 4-6 hours/week, 2 Credits= 8-12 hours/week, 3 Credits= 12-18 hours/week. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 60 credits and permission of instructor.

Schedule Type: Internship

500 Level Courses

EVPP 503: Field Mapping Techniques. 3 credits.
Basic techniques for collecting, recording, and plotting spatial field data, including topographic maps, compass, transit, alidade, and global positioning systems. Field work and field-based research project. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to GEOL 506, GEOL 553.

Recommended Prerequisite: MATH 105 or equivalent, EVSC 110, GGS 102, or GEOL 101 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

EVPP 505: Selected Topics in Environmental Science. 4 credits.
Topic depends on instructor’s specialty. Offered by Environmental Science & Policy (p. 660). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: A course in Geology or Ecology, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EVPP 506: Science of the Environment I. 3 credits.
Environmental science is explored in this 2-semester sequence providing the foundation in chemistry (I) and biology (II) required for graduate students with social sciences backgrounds seeking a degree and career in environmental science and policy. Notes: For graduate students entering the Environmental Science and Policy or other programs. Not available to students with undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EVPP 507: Science of the Environment II. 3 credits.
Environmental science is explored in this 2-semester sequence providing the foundation in chemistry (I) and biology (II) required for graduate students with social sciences backgrounds seeking a degree and career
in environmental science and policy. Notes: For graduate students entering the Environmental Science and Policy or other programs. Not available to students with undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 506 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EVPP 515: *Molecular Environmental Biology I.* 3 credits.
Introduces molecular environmental biology covering basic concepts of molecular biology, molecular evolution, and bioinformatics, and application to problems in molecular and environmental biology. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** Introductory biology and genetics or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EVPP 518: *Conservation Biology.* 3 credits.
Introduction to the science used to identify species in need of conservation, and techniques to manage and protect organisms. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** Course in Ecology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EVPP 519: *Marine Mammal Biology and Conservation.* 3 credits.
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to EVPP 419.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EVPP 520: *Marine Mammal Biology and Conservation Field Course.* 1 credit.
This course provides laboratory, seminar sessions and field work to accompany EVPP 519-001 marine mammal biology and conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad, including in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Corequisite:** EVPP 519.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

EVPP 521: *Marine Conservation.* 3 credits.
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. Provides an overview of marine environmental law and policy issues related to marine conservation policy. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to EVPP 421.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

EVPP 519-001: *Marine Mammal Biology and Conservation Field Course.* 1 credit.
This course is in addition to all other degree requirements. Offered by Environmental Science and Policy. Notes: For graduate students entering the Environmental Science and Policy or other programs. Not available to students with undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to EVPP 419.
EVPP 524: *Introduction to Environmental and Resource Economics.* 3 credits.

**Recommended Prerequisite:** Basic algebra skills.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EVPP 525: *Economics of Human/Environment Interactions.* 3 credits.
Advanced topics in environmental, natural resource, and ecological economics for noneconomist. Emphasizes sustainability, intergenerational equity, and economic-ecological feedbacks. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to GGS 525.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** EVPP 524/GGS 524 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EVPP 527: *Disease Ecology and Conservation.* 3 credits.
Presents the trans-disciplinary discipline of conservation medicine, the study of relationships between organism and ecosystem health and environmental conditions. Topics include infectious and noninfectious diseases, pathogens, processes, and impacts on human, biotic, and ecosystem health, and how to address the consequences of diseases to populations and ecological communities. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** Courses in microbiology, ecology, or conservation, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EVPP 529: *Environmental Science Communication.* 3 credits.
Communicating environmental science is inherently challenging whether in academia, the public policy realm, or to the general public. The aim of this course is to expose students to the multiple ways environmental science can be communicated. Such exposure will be made both through a theoretical approach by examining science communication literature, as well as through practical, hands-on activities and assignments. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** GGS 550 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EVPP 531: *Land-use Modeling Techniques and Applications.* 3 credits.
Surveys literature on spatially explicit empirical models of land-use change. Offers hands-on experience developing and running simple models. Includes statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to GGS 531.

**Recommended Prerequisite:** GGS 550 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EVPP 532: *Animal Behavior.* 3 credits.
Ecological aspects of animal behavior. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EVPP 533: *Energy Policy.* 3 credits.
Discusses resource options in the context of 3E’s: energy security, environment, and economics. Examines how these considerations apply to 3 Ps developed by Jennifer Sklarow: priorities, politics, and process. Examines sustainability and environmental angles of resources, reasons for specific nations’ policy choices, and possibilities for future energy policies. Considers how energy policies can create cooperation and
conflict domestically and internationally. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Lecture

**EVPP 536:** *The Diversity of Fishes.* 3 credits.
This course delves into the biology and ecology of fishes. Subjects of this class include fish anatomy, taxonomy, evolution, habitat adaptations, community dynamics, and ecosystem interactions. The course will also touch on human impacts on fishes, and conservation. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 536.

**Recommended Prerequisite:** Course in ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 537:** *Ornithology.* 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** Course in ecology or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 538:** *Mammalogy.* 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing fieldwork. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 538.

**Recommended Prerequisite:** BIOL 303 and BIOL 307 or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**EVPP 539:** *Herpetology.* 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** Course in ecology or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**EVPP 542:** *Urban Ecosystems & Processes.* 4 credits.
Provides an overview of the challenges and opportunities that urban environments present to the plants and animals inhabiting cities and the ways that those organisms and entire ecosystems respond. Includes ecosystem ecology for engineered ecosystems, along with reviews of urban metabolism, energy budgets, water cycles, and soil ecology. Students design and conduct a small-scale green infrastructure experiment/project on campus. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 211 and 213; MATH 113 or equivalent; BIOL 308 or EVPP 302; PHYS 243 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**EVPP 543:** *Tropical Ecosystems.* 4 credits.
Terrestrial, aquatic, and marine ecosystems in the tropics, emphasizing plant communities, plant-animal interactions, and role of humans in tropics. Notes: Requires field trip to tropics as part of lab. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 543.

**Recommended Prerequisite:** A course in ecology and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**EVPP 549:** *Marine Ecology.* 3 credits.
Presents the Ecology of Marine Ecosystems including from the intertidal zone to the deep sea, and from coral reefs to seagrass beds and polar seas. Overviews the evolutionary characteristics and ecological
processes and community structure of species and their habitats; and special problems that confront marine organisms due to anthropogenic change. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** EVPP or BIOL 308 and BIOL/EVPP/GEOL 309 (or the equivalent), or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 550:** Waterscape Ecology and Management. 3 credits.
Studies physical, chemical, and biological components of freshwater ecosystems with emphasis on streams, rivers, and lakes; links between watersheds and freshwater ecosystems; and impact of human management. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 550.

**Recommended Prerequisite:** A course in chemistry and a course in ecology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 551:** Fungi and Ecosystems. 3 credits.
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 559.

**Recommended Prerequisite:** BIOL 304 and/or a course in microbiology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 555:** Lab in Waterscape Ecology. 1 credit.
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 555.

**Recommended Prerequisite:** EVPP 550 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**EVPP 560:** Infectious Diseases of Wildlife. 3 credits.
Examines infectious diseases of wildlife with emphasis on causes and mechanisms, pathobiology, ecology and epidemiology and population significance. Explores methods of diagnosis, control, prevention and outbreak investigation as they apply to management and conservation of wildlife populations. Also, diseases crossing species barriers will be examined. Note: Course will co-meet with BIOL 460/EVPP 460.Offered by Environmental Science & Policy. May not be repeated for credit. Equivalent to BIOL 560.

**Recommended Prerequisite:** Courses on evolution, ecology, zoology, and conservation biology or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 563:** Coastal Morphology and Processes. 4 credits.
Studies global coastal geomorphology and processes, emphasizing U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, storms; and human activities. Lecture, extended weekend field trips to mid-Atlantic coast. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to GEOL 563.

**Recommended Prerequisite:** Course in Geology, Oceanography, Marine Science, or Physical Geography; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 575:** Global Biodiversity Governance. 3 credits.
Study global biodiversity governance from a political/policy science perspective. Regime and governance literature, and empirical examples including intergovernmental policy, such as biodiversity-related climate change policy (REDD+), and certification standards, such as the Forest
Stewardship Council (FSC), will be examined, with guest lecturers and a simulation of an inter governmental negotiation. Designated a Green Leaf Course. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** One (environmental) social science course.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 577:** Biogeochemistry: A Global Perspective. 3 credits.
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to the global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** A course in ecology and a course in chemistry, or Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 581:** Estuarine and Coastal Ecology. 3 credits.
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 581.

**Recommended Prerequisite:** Course in ecology and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 582:** Estuarine and Coastal Ecology Laboratory. 1 credit.
Provides training in field measurement of physical and chemical parameters, and collection and identification of local organisms.

Emphasizes the practice of ecological field research. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 582.

**Recommended Corequisite:** EVPP/BIOL 581.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**600 Level Courses**

**EVPP 607:** Fundamentals of Ecology. 3 credits.
Overview of concepts in physiological, population, community, ecosystem, biogeographical and human ecology. Notes: Restricted to graduate students with little or no background in ecology. Students who have taken BIOL 307 or the equivalent elsewhere are ineligible for this course. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 607.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 608:** Introduction to Environmental Social Science. 3 credits.
The course Environmental Social Science - ESS - aims to provide insight into the some of the most relevant social sciences and social scientific perspectives for studying environmental issues. The course introduces students to different social scientific disciplines. They will also learn about different social scientific theoretical perspectives and concepts, which they will apply in a research project. Designated a Green Leaf Course. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 610:** Bioremediation: Theory and Applications. 3 credits.
Provides basis for understanding proper application of bioremedial technologies to treatment of hazardous wastes. Includes evaluation of data to determine successful treatment. Offered by Environmental
Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 610.

**Recommended Prerequisite:** Course in microbiology and either organic chemistry or biochemistry or Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 613: Environmental Geochemistry and Mineralogy.** 3 credits.
Explores hot topics and aids students in developing intellectual skills to identify key research problems. Students will also improve their writing and presentation skills. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 615: Molecular Environmental Biology II.** 4 credits.
Applied course covering theory and methodology of molecular environmental biology, including analysis of selected case studies in conservation biology of macro-organisms, molecular systematics, and microbial ecology. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 515 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 619: The Challenge of Biodiversity.** 3 credits.
The Challenge of Biodiversity examines the science and policy of biodiversity conservation, through case studies, current events, guest speakers, class discussion, reading and assignments. Emphasis is placed on problem solving, communication skills and critical thinking. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** 6 credit hours of graduate course work or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 620: Development of U.S. Environmental Policies.** 3 credits.
Examines nature and historical development of environmental policy in the United States, including consideration of social, political, economic and environmental factors, and ways it is expressed and implemented. Also considers sustainability and emerging issues. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 8 graduate credits including graduate course in policy process and course in ecology; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 621: Overview of Biodiversity Conservation.** 3 credits.
Lectures, reading assignments, class discussions, and orally presented and written case studies to explore what biodiversity is, why it is important, how conservation has evolved, and status today. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** 8 credits of graduate environmental policy and/or science, including ecology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 622: Management of Wild Living Resources.** 3 credits.
Examines management of different types of wild living resources: animal and plant, aquatic and terrestrial. Reviews status of resources, analyzes factors that have led to present situation, and considers what may be required to achieve effective and sustainable management. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 8 graduate credits of ecology or permission of instructor.
EVPP 627: Environmental Policy in Latin America. 3 credits.
Examine environmental policy in Latin America. Reviews evolution of environmental policy and relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: A course in policy process, a course in international development and a course in ecology, or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EVPP 626: Environment and Development in Asia. 3 credits.
Examine environment and development in selected countries of South, Southeast, and East Asia. Reviews relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: A course in policy process, a course in international development and a course in ecology, or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EVPP 631: Spatial Agent-based Models of Human-Environment Interactions. 3 credits.
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hands-on development of simple ABM models, and investigation of links between

Recommended Prerequisite: 8 graduate credits in policy process, international development, and ecology, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EVPP 630: Methods and Logic of Social Inquiry. 3 credits.
Emphasizes gathering, interpretation, and evaluation of scientific evidence. Develops critical thinking skills and covers logic of scientific inquiry, including various data collection methods such as experiments, observational research, and Q methodology. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Recommended Prerequisite: An undergraduate course in statistics and research methods or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
GIS and ABM. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to GGS 631.

**Recommended Prerequisite:** EVPP 531 or CSS 600 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 632:** *Qualitative Research Methods for Environmental Scientists.* 3 credits.
Course engages questions of qualitative research methods for scientists conducting human-environment research. Focuses on tools to investigate the human-environment nexus, including community-based conservation and management research and decolonizing methodologies. Students discuss and practice 'triangulation'– the integration of qualitative and quantitative methods– a necessary skill for environmental/human-environment research. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 635:** *Environment and Society.* 3 credits.
Human-environment interactions in human ecology perspective, historical basis of human environmental impact, indigenous and nonindigenous worldviews in context of modernization, environmental degradation and globalization, and contemporary policy and research initiatives geared toward resilience and sustainability. Discussion format. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 637:** *Human Dimensions of Climate Change.* 3 credits.
Examines human dimensions of climate change, biodiversity loss, ozone depletion, and related anthropogenic alterations of biosphere. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 638:** *Corporate Environmental Management and Policy.* 3 credits.
Provides understanding of how environmental issues interact with business strategy decisions. Emphasizes learning about proactive win-win environmental management strategies being implemented by world's leading firms, and shows how government policies and regulations can be designed to simultaneously promote higher environmental protection and competitiveness. Combines mini lectures, participatory discussions. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EVPP 641:** *Environmental Science and Public Policy.* 3 credits.
Effects of human activities on environment. Considers airborne, waterborne, and solid waste contaminants with respect to sources, control, and effect on ecosystems and humans. Focus is on scientific and technical aspects of environmental contamination. Includes discussion of science policy related to these topics. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 641.

**Recommended Prerequisite:** A course in Ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EVPP 642: Environmental Policy. 3 credits.
In-depth examination of U.S. efforts since 1970 to mitigate pollution of air, land, and water. Addresses issues of global concern, including biodiversity loss, ozone depletion, and climate change. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to PUAD 642.

Specialized Designation: Green Leaf Course

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EVPP 643: Microbial Ecology. 4 credits.
Studies relationships between microorganisms and their natural environment, and methodology for observing the microbes in nature and the biochemistry of environmental systems. Includes discussion of the role of microbes both in creating and removing toxic threats in the environment. Laboratory component includes field sampling/analyses and laboratory isolation and identification of microbes as well as measurement of their physiological activities. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 643.

Recommended Prerequisite: A course in microbiology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

EVPP 645: Freshwater Ecology. 3 credits.
Studies biotic and abiotic interactions that affect structure and composition of freshwater ecosystems. Emphasizes research literature. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Recommended Prerequisite: EVPP 550 or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EVPP 646: Wetland Ecology and Management. 3 credits.
Emphasizes structure, functions, and ecological processes of created and natural wetlands from an ecosystem perspective. Students will be expected to develop an understanding of hydrologic, physicochemical, and ecological aspects of wetlands and the management of these systems through in-class and field/lab works. Each student is required to carry out an individual research project that involves field and lab works, and write a research paper. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Recommended Prerequisite: BIOL 307 or EVPP 377, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

EVPP 647: Wetland Ecology Lab and Field. 1 credit.
Use laboratory and field work to study the structure and function of wetland ecosystems. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

Recommended Prerequisite: EVPP 646 (formerly EVPP 644).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EVPP 648: Population Ecology. 3 credits.
Surveys ecological models and theory. Topics include population growth and regulation, competition, predator-prey, herbivore-plant, and parasite-host interactions, mutualism, and metapopulation ecology. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 648.

Recommended Prerequisite: A Course in ecology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
EVPP 650: *Ecosystem Analysis and Modeling.* 4 credits.
Introduces principles, history, and methodologies of systems ecology, emphasizing development and simulation of ecological models for natural resource/ecosystem management, conceptual and symbolic models, and simulation techniques on microcomputers. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 650.

**Recommended Prerequisite:** A course in ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

EVPP 651: *Multivariate Data Analysis for Ecology and Environmental Science.* 3 credits.
Provides graduate students in ecology and environmental science with tools needed to analyze multivariate data sets. Topics include classification and ordination. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 607 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EVPP 652: *The Hydrosphere.* 3 credits.
Components and transfer processes within hydrosphere, which consists of aqueous envelope of Earth including oceans, lakes, rivers; snow, ice, glaciers, soil, moisture, ground water, and atmospheric water vapor. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to GGS 656.

**Recommended Prerequisite:** 2 semesters of calculus and partial differential equations.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

Uses ecological principles to manage natural resources. Emphasizes hierarchical levels of organization within ecological systems, and management of ecosystems to conserve biodiversity, natural resources, and environment. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 607 or EVPP 607 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EVPP 670: *Environmental Law.* 3 credits.
Studies environmental laws such as the National Environmental Policy Act, and regulatory issues such as the Clean Water and Clean Air Acts. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** Course in Ecology, Environmental Biology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EVPP 675: *Environmental Planning and Administration.* 3 credits.
Examines interaction of man and ecological systems; causes of damage or deterioration in environment; content, overviews, and externalities in management decision processes that affect environment and effectiveness of plan implementation; means of assessing environmental impact; and administrative approaches for minimizing environmental impact. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

EVPP 681: *Introduction to Bioinformatics.* 3 credits.
Overview of methods and tools in bioinformatics including Internet interfaces to sequence databases, methods for performing searches of biological databases, sequence alignment, phylogenetic analysis, other types of DNA sequence analysis, web-based tools, and databases in structural biology. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.
Environmental Conflict Resolution and Collaboration.

This course is the capstone course for the Graduate Certificate in Practicum/Capstone.

**EVPP 684:**

**Schedule Type:** Lecture

**Recommended Prerequisite:** A course in molecular biology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Recommendations:**
- **EVPP 682:** Principles of Environmental Conflict. 3 credits.
  - Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to CONF 682.
  - **Recommended Prerequisite:** EVPP 607, CONF 501, and CONF 502, or permission of instructor.
  - **Registration Restrictions:**
    - Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
    - Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
    - Students in a Non-Degree Undergraduate degree may **not** enroll.

  - **Schedule Type:** Lecture
  - **EVPP 683:** Environmental Conflict Resolution: Situation Assessment, Process Design and Best Practices. 3 credits.
    - This course explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to CONF 683.
    - **Recommended Prerequisite:** EVPP 682 or CONF 682, or permission of instructor.
    - **Registration Restrictions:**
      - Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
      - Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
      - Students in a Non-Degree Undergraduate degree may **not** enroll.

  - **Schedule Type:** Lecture
  - **EVPP 730:** Environmental Policy Research in Practice. 3 credits.
    - Course is designed for students interested in social science-oriented environmental research. Student learn how to ground their research ideas in social science theory, develop a central research question and construct original research hypotheses that are grounded in social science literature. They also hone their peer reviewing skills by assessing other students’ research and offering constructive commentary. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to CONF 684.
    - **Recommended Prerequisite:** EVPP 682 or CONF 682, and EVPP 683 or CONF 683.
    - **Registration Restrictions:**
      - Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

      - Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
      - Students in a Non-Degree Undergraduate degree may **not** enroll.

  - **Schedule Type:** Research

**700 Level Courses**

**EVPP 730:** Environmental Policy Research in Practice. 3 credits.

Course is designed for students interested in social science-oriented environmental research. Student learn how to ground their research ideas in social science theory, develop a central research question and construct original research hypotheses that are grounded in social science literature. They also hone their peer reviewing skills by assessing other students’ research and offering constructive commentary. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to CONF 684.
by Environmental Science & Policy (p. 660). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 12 credit hours of graduate course work at Mason or approval of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**EVPP 738: Sustainable Enterprise Theory.** 3 credits.
This course is designed to critically evaluate the scholarly research related to sustainable enterprise. The class provides an overview of the major theories, research designs, and methodologies associated with this emerging research domain. Students apply these theories to develop social science research proposals for empirical investigation. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit.

**Recommended Prerequisite:** Environmental Science & Policy (p. 660). May be repeated for credit if topics significantly differ. Offered by Environmental Science & Policy (p. 660). May be repeated for credit if topics significantly differ.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**EVPP 741: Advanced Topics in Environmental Science and Public Policy.** 4 credits.
Studies selected advanced topics in environmental science and public policy. Lectures, guest lectures, student presentations, laboratory exercises. Notes: Topics vary; each offering has coherent theme. May be repeated for credit if topics significantly differ. Offered by Environmental Science & Policy (p. 660). May be repeated within the term for a maximum 10 credits.

**Recommended Prerequisite:** Eight hours of graduate coursework in Environmental Science and Public Policy, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 745: Environmental Toxicology.** 3 credits.
Studies nature, distribution, and interaction of toxic chemicals released into environment. Topics include acute, subchronic, and chronic toxicity testing; uptake, distribution and metabolism of toxins as well as their distribution in the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and includes discussion of implications for government regulation. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to BIOL 745.

**Recommended Prerequisite:** EVPP 445 or EVPP 545 or equivalent; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EVPP 792: Seminar in Earth Systems Science.** 2 credits.
Seminar for Earth systems science graduate students with background in major systems. Capstone experience. Seminars presented by faculty and students. Notes: Topics vary from semester to semester. Offered by Environmental Science & Policy (p. 660). May not be repeated for credit. Equivalent to GGS 792.

**Recommended Prerequisite:** Environmental Science & Policy (p. 660). May be repeated for credit if topics significantly differ. Offered by Environmental Science & Policy (p. 660). May be repeated for credit if topics significantly differ.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**EVPP 793: Research in Environmental Science and Public Policy.** 1-3 credits.
Library, laboratory, or field investigation under supervision of instructor. Notes: Short proposal required. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 8 graduate credits in EVPP and Permission of Instructor and Chair.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**EVPP 797: Master's Thesis Proposal.** 1-3 credits.
Work on research proposal that forms basis for a master's thesis. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** 12 credits and permission of major professor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**EVPP 798: Master's Research Project in Environmental Science and Public Policy.** 1-3 credits.
Experimental, observational, literature-based, or theoretical research project chosen and completed under guidance of faculty member. Proposal required before enrollment. Comprehensive report acceptable to student's committee required for completion. Notes: Students taking EVPP 798 may receive no more than 6 credits for both EVPP 793 and EVPP 798. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Approved project proposal and permission of instructor and Chair.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**EVPP 799: Master’s Thesis in Environmental Science and Public Policy.** 1-6 credits.
Experimental, observational, or theoretical research under instructor’s supervision that culminates in production of thesis. Thesis work should be potentially publishable. Notes: No more than 6 credits of EVPP 793 and EVPP 799 may be applied to master’s degree. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree.

**Recommended Prerequisite:** Approved thesis proposal and permission of instructor and Chair.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**800 Level Courses**

**EVPP 894: Supervised Internship.** 3-12 credits.
Training in application of ecological skills to environmental management and policy under supervision of a qualified environmental scientist at governmental agency, consulting firm, industry, or other acceptable organization. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Permission of student’s doctoral committee, graduate program director and department chair.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Internship

**900 Level Courses**

**EVPP 991: Advanced Seminar in Environmental Science.** 2 credits.
Topics generally address interface between environmental science and public policy. Offered by Environmental Science & Policy (p. 660). May be repeated within the term.

**Recommended Prerequisite:** 8 hours of Ecology or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**EVPP 998: Doctoral Dissertation Proposal.** 1-6 credits.
Work on research proposal that forms basis for a doctoral dissertation. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree.

**Recommended Prerequisite:** Admission to doctoral candidacy.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**EVPP 999: Doctoral Dissertation Research.** 1-12 credits.
Research on basic or applied problem in environmental science and public policy. Offered by Environmental Science & Policy (p. 660). May be repeated within the degree.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Executive MBA (EMBA)**

**500 Level Courses**

**EMBA 500: Workshop.** 0 credits.
Workshop. Offered by School of Business (p. 846). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

**Schedule Type:** Laboratory

**600 Level Courses**

**EMBA 603: Managerial Economics.** 3 credits.
Develops and applies economic analysis tools in managerial decision situations. Focuses on economic analysis to understand firm’s competitive environment. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EMBA 612: Cost Accounting.** 1-3 credits.
Focuses on developing accounting information for use by managers in planning and control activities. Examines traditional and emerging cost-management systems. Special emphasis on information for decision-making, operational control, and performance evaluation. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**EMBA 613: Financial Accounting.** 3 credits.
Develops framework of concepts and procedures essential for interpreting general-purpose financial statements and internal managerial accounting reports. Emphasizes understanding basic concepts and applying selected procedures to problem-solving situations. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**EMBA 623: Marketing.** 3 credits.
Develops market-based knowledge and skills for effective marketing strategy design, implementation, and evaluation. Develops ability to make marketing decisions in wide variety of institutional and competitive situations. Addresses the importance of companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**EMBA 633: Statistics for Business Decision Making.** 3 credits.
Applies statistical methods in analyzing problems in business decision-making. Topics include descriptive statistics, probability distributions, estimation and hypothesis testing, and linear regression. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**EMBA 638: Services and Operations Management.** 3 credits.
Integrates theory and practice of operations management with mathematical modeling and quantitative techniques of management science. Addresses range of operations management issues, including technology and strategy decisions, systems design issues, project operations, quality control, and inventory planning. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**EMBA 641: Building the High-Performing Team.** 3 credits.
Develops the knowledge and skills needed for creating powerful, high-performance teams within and among organizational units. Strategies are offered for alignment of goals, building conditions for coordinated action, generating innovation, and resolving breakdowns. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**EMBA 643: Managerial Finance.** 3 credits.
Introduces theories of finance and their application to the formulation of business policy. Topics include internal financial analysis, financial forecasting, valuation, risk and return analysis, capital allocation, and capital structure. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**EMBA 653: Organizational Behavior and Teams.** 3 credits.
Examines development, theories, and practice of management within organizations. Emphasizes human behavior and how it influences
organizational effectiveness. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EMBA 660: Management of Information Technology.** 3 credits.
Examines computer-based information technologies and their interrelation with management processes, especially problem-solving and decision-making at individual, work group, and organization levels. Topics include management information system life cycle, with emphasis on manager's perspective, and modeling and analysis to support decision-making. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EMBA 673: Legal Environment for Executives.** 1.5 credit.
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EMBA 674: Business Ethics.** 1-3 credits.
Designed to strengthen the ability to identify, critically analyze, appropriately respond to, and provide leadership regarding the issues of ethical and socially responsible behavior you may confront as an executive in charge of people, projects, and organizations. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**EMBA 697: Special Topics in Executive MBA.** 1-3 credits.
Sections established as necessary to focus on various topical issues that emerge in practice of executive business administration. Offered by School of Business (p. 846). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
700 Level Courses

**EMBA 703: Financial Markets.** 3 credits.
Explores the relationships between financial markets and their impact on corporate financial decision making. Considers cross-market interrelationships, including how financial markets respond by creating financial instruments to meet the varying financial requirements of business firms. The course includes a domestic financial residency in New York that focuses on contemporary developments in these markets. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Executive MBA.
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EMBA 710: Global Macro Economics.** 1.5 credit.
Focuses on the modern system of international trade and the opportunities that the global trading environment creates for firms. Attention will be directed toward the roles of national policies, international agreements, and business activities in the development of the system. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Executive MBA.
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EMBA 712: International Macroeconomics.** 1.5 credit.
Focuses on the basic concepts of international macroeconomics? national income accounts, monetary and fiscal policies, balance of payments, and exchange rates. These concepts are introduced and discussed in situations where national economic strategies affect the decisions and performance of business operations. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Executive MBA.
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EMBA 716: Managing Change.** 1.5 credit.
Focuses on how organizations can successfully adapt and change. Topics include understanding forces that make change necessary, developing vision of appropriate course, aligning organization behind that vision, and motivating people to achieve it. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Executive MBA.
EMBA 730: Introduction to National Security. 1-3 credits.
The seminar topics would incorporate student and industry partner feedback and consultation by the Program Director and Academic Director with the GPC and Area Chairs. Possible topics include: National Defense Commercial Strategy, Competing Internationally in National Defense Commercial Strategy, European Union, Global Social Entrepreneurship, Emerging Markets and Product Development. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Enrollment is limited to students with a major in EMBA - Distance Learning or Executive MBA.

EMBA 740: Preparation for National Security. 1-3 credits.
This course takes the concepts from previous Critical Infrastructure Protection track courses and provides an opportunity to see these concepts in a "field environment." The course will engage with decision makers to learn how they operate profit generating firms in the critical infrastructure sectors while addressing considerations of security and resilience. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in EMBA - Distance Learning or Executive MBA.

EMBA 734: Critical Infrastructure Protection Residency. 3 credits.

Schedule Type: Lecture

EMBA 741: Introduction to Global Business. 1-3 credits.

Schedule Type: Lecture

EMBA 735: Systems Thinking and Dynamics. 1-3 credits.

Schedule Type: Lecture

EMBA 732: Critical Infrastructure Security and Resilience and Cybersecurity. 1-3 credits.

Schedule Type: Lecture

Students in a Non-Degree Undergraduate degree may not enroll.

Registration Restrictions:
Enrollment is limited to students with a major in Executive MBA.

EMBA 733: Advanced Topics in Critical Infrastructure Protection. 1-3 credits.

Schedule Type: Lecture

EMBA 740: Preparation for National Security. 1-3 credits.

Schedule Type: Seminar

EMBA 741: Introduction to National Security. 1-3 credits.

Schedule Type: Seminar

EMBA 731: Partnering and Information Sharing for Critical Infrastructure Security and Resilience. 1-3 credits.

Schedule Type: Lecture

EMBA 734: Critical Infrastructure Protection Residency. 3 credits.

Schedule Type: Lecture

EMBA 735: Systems Thinking and Dynamics. 1-3 credits.

Schedule Type: Lecture

EMBA 732: Critical Infrastructure Security and Resilience and Cybersecurity. 1-3 credits.

Schedule Type: Lecture

EMBA 733: Advanced Topics in Critical Infrastructure Protection. 1-3 credits.

Schedule Type: Lecture

EMBA 731: Partnering and Information Sharing for Critical Infrastructure Security and Resilience. 1-3 credits.

Schedule Type: Lecture

EMBA 732: Critical Infrastructure Security and Resilience and Cybersecurity. 1-3 credits.

Schedule Type: Lecture

EMBA 733: Advanced Topics in Critical Infrastructure Protection. 1-3 credits.

Schedule Type: Lecture

EMBA 731: Partnering and Information Sharing for Critical Infrastructure Security and Resilience. 1-3 credits.

Schedule Type: Lecture

EMBA 732: Critical Infrastructure Security and Resilience and Cybersecurity. 1-3 credits.

Schedule Type: Lecture

EMBA 733: Advanced Topics in Critical Infrastructure Protection. 1-3 credits.
Registration Restrictions:
Enrollment is limited to students with a major in EMBA - Distance Learning or Executive MBA.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

EMBA 742: Advanced Topics in Global Business. 1.5 credit.
The course discusses current issues in globalization and the ramifications of globalization on business strategy; comparatively reviews emerging markets and development in Asia, Africa, and Latin America and in financial services, healthcare, and eGovernment; considers the role of ICT and mobiles in international development; and reviews the role and development of institutions and significance for business in emerging markets. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in EMBA - Distance Learning or Executive MBA.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EMBA 743: Advanced Topics in National Security. 1.5 credit.
Students will be provided an in-depth look at the strategy side of the National Security industry and will learn how security business position and re-position themselves in this changing market place. The process that firms go through to determine their overall strategy will be explored. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in EMBA - Distance Learning or Executive MBA.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EMBA 745: Special Topics in Finance. 1-6 credits.
In-depth examination of advanced topics in finance. Offered by School of Business (p. 846). May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment is limited to students with a major in EMBA - Distance Learning or Executive MBA.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EMBA 750: Capstone Project: Part 1. 1.5 credit.
Lab-based course provides action learning experience that integrates course content from throughout the EMBA program. Students work in teams to develop solutions to organizational challenges and opportunities. They select a project, evaluate the strategic issues for their assigned clients, design a solution, and present results to an executive panel. Depending on the nature of the issue and faculty requests, team presentations of results include one or more of the following sections: an analysis of the situation; recommendations including changes in goals and organizational design; a plan of action integrating marketing, human resource development, organizational design, finance, and operations; an implementation plan using theories of communication and change management, to include the business case and a business plan. Students are expected to draw upon coursework from multiple disciplines in completing this project. Offered twice in spring semester for a total of 3 credit hours. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EMBA 751: Corporate Global Strategy. 1.5-3 credits.
Examines issues in strategy for firms operating in multiple markets or businesses, including diversification, portfolio approaches to corporate strategy, mergers and acquisitions, corporate alliances and joint ventures, restructuring, and coordinating multibusiness corporations. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EMBA 752: A Strategic View of the Firm. 3 credits.
Examines the interplay between the industry environment and a firm's resources and capabilities to drive superior performance. The course seeks to integrate multiple functional perspectives to arrive at a complete understanding of the firm within its environment. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EMBA 754: Capstone Project: Part 2. 1.5 credit.
Students will work in teams to develop solutions to complex organizational challenges and opportunities. The Capstone project is divided into two parts with regard to course work. In Part II, students will evaluate the strategic issues for their client based upon interviews, outside primary and secondary research, and industry analysis. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in EMBA - Distance Learning or Executive MBA.

Schedule Type: Lecture
**EMBA 755: Special Topics in Management.** 1-6 credits.
In-depth examination of advanced topics in management. Offered by School of Business (p. 846). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EMBA 790: National Security Residency.** 3 credits.
Develops National Security perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EMBA 791: The Regulatory and Business Environment of the European Union.** 1.5 credit.
Considers contemporary interactions of businesses, government, and regulation. Seminars and presentations with business, government, and regulatory officials. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EMBA 795: Global Residency.** 3 credits.
Develops global perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations; and site visits to production and distribution facilities, research centers, IT units, and other corporate offices. Offered by School of Business (p. 846). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Executive MBA.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

---

**Exercise, Fitness, and Health Promotion (EFHP)**

**500 Level Courses**

**EFHP 500: Workshop in Exercise, Fitness, and Health Promotion.** 1-3 credits.
Provides concentrated full-time workshops, weekend seminars, and workshops on selected topics in exercise, fitness, and health promotion.

**Notes:** No more than 6 credits may be applied for degree credit. Offered by Recreation, Health & Tourism (p. 211). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EFHP 520: Medical Terminology of Health Professionals.** 3 credits.
Analyzes foundation of scientific and medical vocabulary including prefixes, suffices and stems used to form compound words for health professionals. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EFHP 522: Functional Anatomy for Health and Wellness Practitioners.** 3 credits.
Promotes familiarity and proficiency with anatomy of neuromuscular and musculoskeletal systems, which relate directly to sports related injuries. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 124, 125 (or equivalent)

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EFHP 526: Prevention, Recognition, and Management of Fitness Related Injuries.** 3 credits.
Promotes familiarity and proficiency with assessment and physical examination of sports-related injuries. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.
**Recommended Prerequisite:** BIOL 124, 125 (or equivalent).

**Recommended Corequisite:** EFHP 522.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**EFHP 598:** Special Topics. 1-6 credits.
Focuses on projects related to exercise, fitness, or health promotion. Offered by Recreation, Health & Tourism (p. 211). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EFHP 599:** Independent Study EFHP. 1-3 credits.
Studies problem areas in exercise, fitness, and health promotion research, theory, or practice under direction of faculty member. May be repeated. No more than 3 credits may be earned. Offered by Recreation, Health & Tourism (p. 211). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Independent Study

**600 Level Courses**

**EFHP 605:** History of American Sport, Exercise, and Physical Culture. 3 credits.
Role of sport and physical education in Europe and its impact on developments in America. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EFHP 610:** Advanced Exercise Physiology. 3 credits.
Lecture, demonstration, and seminar experiences in applying research findings to understanding physiological function and effects of exercise on people. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EFHP 611:** Movement and Fitness Assessment. 3 credits.
Covers common movement and fitness assessments that can be used to develop an individualized exercise program for various populations. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EFHP 612:** Scientific Foundation of Applied Kinesiology. 3 credits.
An integrated study of human anatomy, physiology, chemistry, and microbiology, presenting a complete picture of how the body functions and the diseases and disorders that cause the body to malfunction. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**EFHP 613:** Advanced Applied Biomechanics. 3 credits.
Examines kinetic and kinematic concepts and how they apply to the qualitative and quantitative assessment of human movement. Discusses advanced applied motion analysis techniques. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.
Schedule Type: Lecture

EFHP 614: Advanced Exercise Nutrition. 3 credits.
Advanced study of nutrition’s relation to physical activity, exercise, and sports. Reviews biochemical, physiological, and behavioral aspects of nutrition in promoting health, fitness, and sports performance. Focuses on nutrient needs during life cycle stages. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 615: Epidemiology and Environmental Health. 3 credits.
Principles, methods, and application of epidemiology. Reviews behavioral, psychological, social, and environmental risks to disease distribution. Focuses on lifestyle, exercise patterns, and environmental factors to health and disease conditions. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 616: Motor Behavior and Development. 3 credits.
Human motor behavior development and theory with application to evaluation of skill acquisition. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 618: Exercise and Sport Psychology. 3 credits.
Covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 620: Research Methods for Applied Kinesiology. 3 credits.
Introduction to the techniques of research generally employed in the fields of exercise science and health. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 621: Statistical Methods for Applied Kinesiology. 3 credits.
Introduction to practical and applied aspects of both descriptive and inferential statistics in exercise science and health. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: MATH 102, STAT 250.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 630: Exercise, Health, and Fitness Program Development. 3 credits.
Covers exercise and health program development related to fitness and health of adult populations. Notes: Provides 3 to 6 hours of field experience. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 640: Principles of Strength and Conditioning. 3 credits.
Analyzes exercise techniques, training program designs, organization and administration, and testing and evaluation using scientific principles of strength and conditioning. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EFHP 650: Scientific Principles of Motor Learning.** 3 credits.
Biomechanical analysis and application of scientific principles of movement to instructing sport skills in physical education and sport programs. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EFHP 660: Management of Exercise, Fitness, and Health Promotion Organizations.** 3 credits.
Advanced study in management and administration of organizations dedicated to human development and improvement of quality of life. Covers application of theories and practices of management and behavioral sciences, fiscal management, marketing, and evaluation research. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EFHP 680: Ethical Issues in Exercise, Fitness, and Health Promotion.** 3 credits.
Covers formulation of coherent framework for ascertaining good, right, and just; and for assessing evidence and reason underlying positions and arguments. Examines ethical issues in exercise, fitness, and health promotion. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EFHP 690: Scientific Communications.** 3 credits.
Studies and applies written and verbal communication skills in reading, analyzing, writing, and distributing scientific information in Applied Kinesiology. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**700 Level Courses**

**EFHP 730: Motor Learning.** 3 credits.
Appraisal of motor learning theories and an analysis of motor skill development including the roles of information processing, practice, feedback, and motivation. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**EFHP 798: Project.** 1-3 credits.
Addresses an applied exercise, fitness, and health promotion issue under supervision of graduate faculty member. Offered by Recreation, Health & Tourism (p. 211). May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**EFHP 799: Thesis.** 1-6 credits.
Explores exercise, fitness, and health promotion problem using appropriate research methodology and under supervision of graduate faculty member. Offered by Recreation, Health & Tourism (p. 211). May be repeated within the degree.

**Recommended Prerequisite:** Completion of all coursework.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**800 Level Courses**

**EFHP 802: Readings for the Doctor of Arts in Community College Education.** 3-9 credits.
Intensive reading in recent scholarship in physical education and related fields. Students must propose reading list that must be approved by faculty advisor and use list to prepare potentially publishable literature
review. Offered by Recreation, Health & Tourism (p. 211). May be repeated within the degree for a maximum 9 credits.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Independent Study

EFHP 810: Neurornuscular Responses to Exercise. 3 credits.
Provides an in-depth study of the muscular systems of the human body and how these systems are altered in response to acute and chronic physical activity. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 811: Motor Learning and Control. 3 credits.
Examines motor learning theories and analyzes motor skill development including the roles of information processing, practice, feedback, and motivation. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 813: Musculoskeletal Biomechanics in Human Movement. 3 credits.
Advanced study of the biomechanical analysis of the musculoskeletal system, including collecting, interpreting, and modeling biomechanical data. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing or Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 815: Measurement Techniques and Instrumentation. 3 credits.
Explores the application and implementation of conventional measurement techniques and instrumentation to collect data in Exercise, Fitness, and Health Promotion. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EFHP 820: Careers in the Academy Seminar. 3 credits.
Examines careers in the academy in a seminar format including faculty role, institutional fit, and the higher education academic job search (including developing cover letters and job portfolio outlines); introduces teaching, research, and service expectations at higher education institutions to help prepare for future academic careers. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

EFHP 825: Data Analytics in Exercise, Fitness, and Health Promotion. 3 credits.
Examines data processing, analysis and interpretation using software applications common in Exercise, Fitness and Health Promotion. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

EFHP 840: Doctoral Seminar in Exercise, Fitness, and Health Promotion. 3 credits.
Examines problem areas in Exercise, Fitness, and Health Promotion research, theory, or practice using a combination of self-directed, guided learning, and critical peer reviews in a seminar format. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

EFHP 880: Grant Writing. 3 credits.
Provides an overview of grants and contracts; examines federal and non-federal proposal development guidelines; emphasizes National Institutes of Health (NIH) research grant mechanisms as a ‘gold standard’. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Film and Video Studies (FAVS)

100 Level Courses

FAVS 100: Film and Video Studies Colloquium. 1 credit.
Students are exposed to the film and video industry through film professionals. Students are required to attend all sessions, review the speaker’s materials prior to the class, prepare questions, and complete written critiques. Notes: Only 2 credits of C or better may be applied to
the end of the semester, each student will have produced a variety of
analyses and/or blueprints for creative moving image projects including
short fiction, commercial advertisement, scripted television, collaborative
fiction, short non-fiction reality programming, and other forms. Offered
by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.
Registration Restrictions:
Enrollment is limited to students with a major in Film and Video Studies.
Schedule Type: Lecture

200 Level Courses

FAVS 225: The History of World Cinema. 3 credits.
This course is a survey of the history of cinema. It explores the
development of world cinema from its beginnings in the late nineteenth
century to the 1990s. The course will enable students to comprehend the
evolution of the history and language of cinema in order to connect the
art of filmmaking with the "outside forces" (i.e., the economic institutions,
key figures, historical events and social issues) that profoundly shape
and influence it. Offered by Coll Visual & Performing Arts (p. 763). May
not be repeated for credit. Equivalent to FAVS 355.
Mason Core: Global Understanding (p. 135)
Schedule Type: Lecture

FAVS 250: Business of Film and Video. 3 credits.
This course provides an overview of the film industry from a business
perspective. Students learn basic business practices, film financing,
business plans, film distribution, and management and marketing
techniques appropriate for the film industry. Offered by Coll Visual &
Performing Arts (p. 763). May not be repeated for credit. Equivalent to
FAVS 355.
Schedule Type: Lecture

FAVS 255: Video Production for Film. 3 credits.
This course is a hands-on methods course in video production for film.
Through practice, reading, film viewing and discussions, you will be
introduced to the art and activity of digital filmmaking across film genres.
Students must complete reading, writing, and production assignments
that justify and plan for their creative choices. Handouts describing
projects, expectations and evaluative criteria will be provided. Offered
by Coll Visual & Performing Arts (p. 763). May not be repeated for credit. Equivalent to
FAVS 355.
Registration Restrictions:
Enrollment is limited to students with a major in Film and Video Studies.
Schedule Type: Lecture

FAVS 260: Video Editing for Film. 3 credits.
This course will instruct on the theories and technical expertise
pertaining to video editing by utilizing various video editing software.
The course will combine lectures, discussions, and demonstrations with
hands on projects. Offered by Coll Visual & Performing Arts (p. 763). May
not be repeated for credit. Equivalent to COMM 360.
Registration Restrictions:
Required Prerequisites: AVT 204 C and (FAVS 255 C, COMM 355 C or 208 C).
C Requires minimum grade of C.
Schedule Type: Lecture

FAVS 280: Writing for the Moving Image. 3 credits.
This course is an introduction to writing for the moving image through
lecture, discussion, and critiques of exercises and written works. By
the end of the semester, each student will have produced a variety of
Registration Restrictions: 
Required Prerequisites: AVT 204\(^C\) and (FAVS 255\(^C\), COMM 355\(^C\) or 208\(^C\)). 
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Film and Video Studies.

Schedule Type: Lecture

FAVS 335: Sound and Lighting for Film and Video. 3 credits.
This course will instruct students on the theories, techniques, and technologies pertaining to recording audio and lighting scenes in both field and studio video productions. The course will be lecture based with practical lab styled exercises reinforcing topics presented during lecture. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: COMM 355 or permission of instructor.

Schedule Type: Lecture

FAVS 352: Ethics of Film and Video. 3 credits.
An examination of ethical issues associated with image production and consumption. Topics include the technological development of the film apparatus, privacy, the pursuit of objectivity, excess, consent, and representing others. All issues highlight the increasingly sophisticated and powerful role of film and media authorship. Students will develop a more complex view of the ethics of screen representation (both fiction and nonfiction) and be encouraged to take stock of the ethics of their own media literacy. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Mason Core: Synthesis (p. 135)

Recommended Prerequisite: Completion or concurrent enrollment in all other required Mason Core courses and completion of 21 credits within the FAVS program.

Registration Restrictions: 
Enrollment is limited to students with a major in Film and Video Studies.

Schedule Type: Lecture

FAVS 356: Film Marketing. 3 credits.
Provides students with a variety of film and television marketing business strategies and creative skills, including publicity, press kits, advertising, trailers, poster design, film credits, box art, branding, licensing & merchandising, and distribution. As aspiring media entrepreneurs, students learn to professionally manage their careers whether in low-budget independent film or Hollywood blockbuster tracks via self-promotion & publicity. 201770 Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Registration Restrictions: 
Required Prerequisites: FAVS 250\(^C\) or 355\(^C\). 
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

FAVS 357: New Media and Film Distribution. 3 credits.
This course explores how emerging media technologies function and how the film and video firms are changing with the advent of new media technologies. Through research and guided projects, students learn how new media technologies are altering the financing, distribution, exhibition, and marketing of films and videos. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: FAVS 250 or other business course as approved by instructor.

Schedule Type: Lecture

FAVS 365: Documentary Filmmaking. 3 credits.
An introduction to documentary filmmaking in which each student makes a short digital documentary, from concept development to finished piece. The class covers essential technical skills, emerging styles of nonfiction film, and documentary storytelling techniques. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Registration Restrictions: 
Required Prerequisites: AVT 204\(^C\), FAVS 250\(^C\) and 280\(^C\) and (FAVS 255\(^C\), COMM 355\(^C\) or 208\(^C\)). 
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Film and Video Studies.

Schedule Type: Lecture

FAVS 375: Fiction Film Directing. 3 credits.
This course examines techniques for directing fiction films. Students study the directorial approaches of a variety of directors by viewing and critiquing classic films. Students learn about the director’s role in each stage of film production. Students shoot, direct and edit fictional scenes and sequences intended to develop and convey the beginnings of the authorial signatures. Notes: Intended for Film and Video Studies majors only. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Registration Restrictions: 
Required Prerequisites: AVT 204\(^C\), FAVS 250\(^C\) and 280\(^C\) and (FAVS 255\(^C\), COMM 355\(^C\) or 208\(^C\)). 
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

FAVS 378: Web Series. 3 credits.
A production course that explores the creative and logistical process of creating a fiction series for the web. Production techniques for web series will be explored, including permissions, contracts, and budgets for web development. The course will consider and study successful web series and explore contemporary discussions and professional organizations centered on web series. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Registration Restrictions: 
Required Prerequisites: AVT 204\(^C\), FAVS 250\(^C\) and 280\(^C\) and (FAVS 255\(^C\), COMM 355\(^C\) or 208\(^C\)). 
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Film and Video Studies.

Schedule Type: Lecture

FAVS 399: Special Topics in Film and Video Studies. 1-3 credits.
In-depth presentation and exploration of topical studies. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 12 credits.

Schedule Type: Lecture
400 Level Courses

FAVS 400: Film and Video Career Seminar. 1 credit.
This course is designed to guide students through the portfolio process. At the end of the semester, students will have a completed, professionally reviewed resume and demo reel, and have experienced a professional interview. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Completion of required courses within chosen concentration or permission of instructor.

Schedule Type: Seminar

FAVS 450: Internship in Film and Video Studies. 3 credits.
On-the-job training in film and video studies through approved fieldwork study programs. Internships are arranged and supervised by the FAVS director. Notes: Required for all FAVS majors. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 75 credits, 15 credits in core/elective FAVS courses, and permission of the Internship Coordinator.

Schedule Type: Internship

FAVS 453: Film and Video Studies Pedagogy and Principles. 3 credits.
Theory and practice in facilitating the learning of principles and skills in film and video. Students work as instructor aids under the supervision of a faculty member. Activities include facilitating small group activities and individually critiquing classroom performances. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Declared FAVS major. Student must have successfully completed the course they will facilitate with a grade of B or better, have comparable experience, or receive permission from the instructor.

Schedule Type: Internship

FAVS 455: Studio and Field Productions Practicum. 3 credits.
Practical knowledge in studio and field productions. Students complete a minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of video production facilities on campus. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: COMM 355 and permission of instructor.

Schedule Type: Internship

FAVS 460: Advanced Video Editing. 3 credits.
This course will instruct students on the theories, techniques and technologies pertaining to video editing for fiction and documentary films, as well as commercials. The course will combine lectures, discussions, and demonstrations with hands on projects. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: FAVS 260C or COMM 360C.
C Requires minimum grade of C.

Schedule Type: Lecture

FAVS 470: Film and Video Screenwriting. 3 credits.
The purpose of this course is to build a strong foundation in fundamental, narrative, screenwriting techniques for film. Students will learn how to express their unique story ideas through character development, plot and dialogue. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisite: FAVS 280C.
C Requires minimum grade of C.

Schedule Type: Lecture

FAVS 483: Feature-Length Scriptwriting. 3 credits.
This course is an introduction to the development and analysis of feature length screenplays. The approach combines lecture, discussion, screening and presentation of student work. By the end of the semester, each student should have a complete first draft of an original screenplay. Students will also complete story reports/coverage reports of screenplays by other writers. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: FAVS 470 or THR 482 or permission of instructor.

Schedule Type: Independent Study

FAVS 490: Independent Study. 1-6 credits.
Independent research on specific project under direction of selected faculty member. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment is limited to students with a major in Film and Video Studies.

Schedule Type: Independent Study

FAVS 496: Advanced Visual Storytelling. 3 credits.
A culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work in the screenwriting concentration, resulting in substantial individualized writing projects. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Mason Core: Capstone (p. 135)

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: AVT 204, FAVS 250, FAVS 255 or COMM 355, FAVS 280, FAVS 483, and THR 482 or FAVS 470. Must be a senior.

Registration Restrictions:
Enrollment is limited to students with a major in Film and Video Studies.

Schedule Type: Lecture

FAVS 497: Senior Film Practicum. 3 credits.
A senior capstone course for students in the Production/Post- Production and Producing concentration. Students put their area of focus (cinematography, editing, sound design, producing, etc.) into practice. Students play a key role in film projects directed by other students throughout the semester. This course includes a written/research
component. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Capstone (p. 135)

**Recommended Prerequisite:** AVT 204, FAVS 260 or COMM 360, FAVS 250, FAVS 255 or COMM 355, and FAVS 280. Must be a senior.

**Registration Restrictions:** Enrollment is limited to students with a major in Film and Video Studies.

**Schedule Type:** Lecture

FAVS 498: Creative Producing and Development. 3 credits.
An introduction to the creative process of researching and developing material for film and video for senior projects. The course examines evaluating and developing existing literary material, documentary work, and/or fictional material. Notes: Must have permission of instructor. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** Must have all lower-level FAVS Core Courses and Concentration Requirements completed. Must be a senior and have permission of instructor.

**Registration Restrictions:** Enrollment is limited to students with a major in Film and Video Studies.

**Schedule Type:** Lecture

FAVS 499: Senior Project. 3 credits.
Culminating capstone course in producing and directing that results in the completion of a senior project and related written and visual promotional materials. A senior project in Directing and Producing is constituted by a short fiction or documentary film, webseries episode(s) or parallel film project with a running time of 15 minutes or less. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Mason Core:** Capstone (p. 135)

**Registration Restrictions:**

**Required Prerequisite:** FAVS 498 C.

C Requires minimum grade of C.

Enrollment is limited to students with a major in Film and Video Studies.

**Schedule Type:** Lecture

500 Level Courses

FAVS 535: Sound and Lighting. 3 credits.
This course will instruct students on the theories, techniques, and technologies pertaining to recording audio and lighting scenes in both field and studio video productions. The course will be lecture based with practical lab styled exercises reinforcing topics presented during lecture. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MAIS in Film and Video Studies or permission of instructor.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

**Schedule Type:** Lecture

FAVS 550: Internship. 3 credits.
On-the-job training in film and video studies through approved fieldwork study programs. Internships are arranged and supervised by the FAVS director. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

FAVS 556: Documentary Filmmaking. 3 credits.
A documentary filmmaking workshop in which each student makes a short digital documentary, from concept development to finished piece. The class covers essential technical skills, emerging styles of nonfiction film, and documentary storytelling techniques. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MAIS in Film and Video Studies or permission of instructor.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

FAVS 570: Screenwriting. 3 credits.
Screenwriting course emphasizing student development in screenplay form, structure, and storytelling with emphasis on craft, character, and story culminating in a screenplay. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate degree or equivalent, or permission of instructor.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
FAVS 575: Fiction Film Directing. 3 credits.
This course examines techniques for directing fiction films. Students study the directorial approaches of a variety of directors by viewing and critiquing classic films. Students learn about the director's role in each stage of film production. Students shoot, direct, and edit fictional scenes and sequences intended to develop and convey the beginnings of the authorial signatures. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: Admission to the MAIS in Film and Video Studies or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FAVS 590: Independent Study. 1-6 credits.
Independent research on specific project under direction of selected faculty member. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Undergraduate degree or equivalent or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

FAVS 597: Independent Production. 1-3 credits.
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

FAVS 598: Seminar in Film and Video Studies. 3 credits.
Develop tools and techniques for successful pursuit of a career in film and video production, distribution, and marketing through readings, original projects, case studies, analysis of industry practices, and study of film and media tools and projects. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Visual Performing Arts or Humanities Social Sciences colleges.

Schedule Type: Seminar

FAVS 599: Special Topics. 1-6 credits.
In-depth presentation and exploration of topical studies. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: Undergraduate degree or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Finance (FNAN)

300 Level Courses

FNAN 300: Personal Financial Management. 3 credits.
Emphasis is on understanding the importance of developing financial goals and how financial decisions affect those goals throughout their lifetime. In addition, students will develop their own financial goals along with a financial plan that would enable them to meet those goals. This course may be taken for regular grading or S/NC. Students must notify instructor which option they want. FNAN 300 may be taken for general elective credit by School of Business students. Offered by School of Business (p. 846). May not be repeated for credit.

Schedule Type: Lecture

FNAN 301: Financial Management. 3 credits.
Introduction to managing a firm's financial resources given wealth maximization decision criterion. Includes working capital management, fixed-asset investment, cost of capital, capital structure, and dividend decision analysis. School of Business students will not be permitted to make more than three attempts to achieve a C or higher in FNAN 301. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Notes: Lecture, problems, and discussion. Requires attendance in weekly lectures and recitations. The final exam for FNAN 301 may be scheduled to take place for all sections at the same time during the final exam period. Accommodations will be made for exam and religious conflicts and for certain official university-sponsored activities. Students cannot receive credit for both FNAN 301 and FNAN 303. Offered by School of Business (p. 846). Limited to three attempts. Equivalent to FNAN 303.

Schedule Type: Lecture
FNAN 301: Financial Management. 3 credits.
Introduces analysis of the valuation of equity and debt securities given modern capital market theory. Includes discussion of portfolio analysis as related to valuation of securities. Notes: Lecture, discussion, and computer-assisted research. Offered by School of Business (p. 846). May not be repeated for credit.

Required Prerequisites: (FNAN 301\textsuperscript{B} or 303\textsuperscript{B}).
\textsuperscript{B} Requires minimum grade of B-.

Students with a class of Freshman may not enroll.

Non-Degree level students may not enroll.

Schedule Type: Lecture

FNAN 302: Introduction to Firm Valuation. 3 credits.
Examines techniques for analyzing, understanding, and applying financial information in decision situations. Topics include financial statement analysis, development of financial models, and financial planning and forecasting. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to FNAN 302.

Registration Restrictions:
Required Prerequisites: (FNAN 301\textsuperscript{C} or 303\textsuperscript{C}).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from BU major attribute may not enroll.

Non-Degree level students may not enroll.

Schedule Type: Lecture

FNAN 303: Principles of Investment. 3 credits.
Studies dimensions and specialties involved in public control and private development, sale, finance, and management of real estate. Includes land planning, land-use control, appraisal, finance, brokerage, property management, and investment. Notes: Lecture, discussion, and computer-assisted research. Offered by School of Business (p. 846). May not be repeated for credit.

Required Prerequisites: (FNAN 301\textsuperscript{C} or L301) or FNAN 303\textsuperscript{C} or L303.
\textsuperscript{C} Requires minimum grade of C.

Students with a class of Freshman may not enroll.

Non-Degree level students may not enroll.

Schedule Type: Lecture

FNAN 321: Financial Institutions. 3 credits.
Discusses basic objectives of financial institutions in light of industry structure and regulatory environment, and decision variables that management should concentrate on to achieve objectives. Includes role of financial institutions in allocation of funds in financial markets. Notes: Lecture, discussion, and computer-assisted research. Offered by School of Business (p. 846). May not be repeated for credit.

Required Prerequisites: (DESC 210\textsuperscript{C}, OM 210\textsuperscript{C} or U210) and (ECON 103\textsuperscript{C} or U103) and (ACCT 203\textsuperscript{C}, U203, 204\textsuperscript{C} or U204).
\textsuperscript{C} Requires minimum grade of C.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture, Recitation

FNAN 331: Advanced Financial Management. 3 credits.
Analyzes decision-making in firm, emphasizing conceptual structure of problems and using advanced analytic techniques. Topics include current asset management, capital budgeting and structure, dividend policy, long-term financing, mergers, and corporate planning models. Notes: Lecture, discussion, and case analysis. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (FNAN 301\textsuperscript{B} or 303\textsuperscript{B}).
\textsuperscript{B} Requires minimum grade of B-.

Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

FNAN 411: Investment Analysis and Portfolio Management. 3 credits.
Analyzes modern techniques of portfolio management including evaluating standards for selecting individual securities to include or delete from portfolios. Presents risk-return analysis for portfolios and portfolio performance measures. Lecture, discussion, computer-assisted research. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (FNAN 311<sup>C</sup> or L311).
<sup>C</sup> Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

FNAN 412: Futures and Options Markets. 3 credits.
Introduces options, commodity, and financial futures markets as they function to provide pricing mechanisms and alternative investment vehicles. Lecture, discussion, and computer-assisted research. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (FNAN 311<sup>C</sup> or L311).
<sup>C</sup> Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

FNAN 421: Money and Capital Markets. 3 credits.
Discussion of how financial markets are organized, their role in the allocation of funds to various market segments, and interaction between markets. Topics include aggregate flow of funds analysis; and money, government, corporate, and mortgage markets. Lecture, discussion, and computer assisted research. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (FNAN 321<sup>C</sup> or L321).
<sup>C</sup> Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

FNAN 430: Empirical Methods in Finance. 3 credits.
Examines statistical and econometric techniques used in analyzing financial data and developing financial models. Combines development of understanding of fundamental concepts with applications. Includes extensive use of standard software. Offered by School of Business (p. 846). May not be repeated for credit.

Recommended Prerequisite: BS degree status.

Registration Restrictions:
Required Prerequisites: (FNAN 311<sup>C</sup> or 321<sup>C</sup>).
<sup>C</sup> Requires minimum grade of C.

Schedule Type: Lecture

FNAN 431: Venture Capital and Private Financing of Startups. 3 credits.
This course focuses on how venture capitalists arrange the financing for a company; what they look for in a business plan; how they value a business; and how they structure the terms of an agreement. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: FNAN 301<sup>B</sup>, 303<sup>B</sup> or L303.
<sup>B</sup> Requires minimum grade of B-.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

FNAN 432: Fixed-Income Securities. 3 credits.
Focuses on analysis of fixed-income securities, including corporate and government bonds, mortgage-backed securities, and derivatives. Major topics include institutional features of fixed-income securities markets, valuation, analysis of risks, and portfolio management decisions. Offered by School of Business (p. 846). May not be repeated for credit.

Recommended Prerequisite: BS degree status.

Registration Restrictions:
Required Prerequisite: (FNAN 311<sup>C</sup>).
<sup>C</sup> Requires minimum grade of C.

Non-Degree level students may not enroll.

Schedule Type: Lecture

FNAN 436: Probability Methods for Finance. 3 credits.
This course focuses on the development and use of probability models for analyzing risks and financial decisions. Emphasis is on Monte Carlo simulation modeling, linear programming, and decision analysis of complex problems in corporate finance and in investment analysis. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (FNAN 301<sup>C</sup>, L301<sup>C</sup>, 303<sup>C</sup> or L303<sup>C</sup>) and (OM 210<sup>C</sup> or BUS 210<sup>C</sup>.
<sup>C</sup> Requires minimum grade of C.

Schedule Type: Lecture

FNAN 440: International Financial Management. 3 credits.
Introduces management of contemporary firm’s international financial operations. Topics include foreign exchange risk, political risk, returns and risks of international projects, international money and capital markets, financial accounting, capital structure, and cost of capital. Lecture, discussion, readings, and problems. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: FNAN 301\textsuperscript{B} or 303\textsuperscript{B}.
\textsuperscript{B} Requires minimum grade of B.

Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

**FNAN 441: Advanced Topics in Firm Valuation.** 3 credits.
Course will focus on complex valuation techniques and build on the knowledge and skills developed in FNAN 341. Course will cover: research and valuation companies of different sizes, value private equity, mezzanine financing, develop advance discounted cash flow models, and other relevant topics. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: FNAN 341\textsuperscript{C} or 302\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

**FNAN 454: Real Estate Development.** 3 credits.
Examines commercial real estate development process and principles plus actual residential, office, retail, and industrial projects. Includes financial analytical techniques to investigate project feasibility, density, financing viability, cash flows, and valuation. Emphasis placed on real-world, entrepreneurial, decision-making skills for developing commercial real estate. Lecture, discussion, project analysis. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (FNAN 351\textsuperscript{C} or L351).
\textsuperscript{C} Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

**FNAN 462: Honors Seminar in Finance.** 3 credits.
Provides an in-depth study and analysis of contemporary developments and topics of interest in finance. Topics and format will vary. Enrollment is limited and competitive. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major in Finance.

Non-Degree or Washington Consortium level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

**FNAN 498: Contemporary Topics in Finance.** 3 credits.
Course focuses on contemporary topics in finance and will be writing Intensive. Possible topics include: financial institutions, asset pricing, valuation and capital markets, 2008 crisis and the Federal Reserve/Treasury's intervention, emerging economies and exchange rate conversion, stability of the European Union and its currency. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (FNAN 301\textsuperscript{C} or L301) or FNAN 303\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

**FNAN 499: Independent Study.** 1-3 credits.
May be repeated to a maximum of 6 credits if topics vary. Degree status. Research and analysis of selected problems or topics in finance. Notes: Must be arranged with instructor and approved in writing by associate dean for undergraduate programs before registration. Written report required. May be repeated if topics vary. Offered by School of Business (p. 846). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Finance majors with at least 9 upper-level credit hours.

Registration Restrictions:
Students with a class of Freshman or Sophomore may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Independent Study
Foreign Language (FRLN)

300 Level Courses

FRLN 309: Humanities College to Career. 1 credit.
Focuses on career choices and effective self-presentation for soon-to-be graduating students with majors in the humanities. Explores how skills typically learned in humanities majors can be leveraged for a successful transition to post-graduation employment. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to ENGH 303, HIST 385, PHIL 393.

Schedule Type: Lecture

FRLN 330: Topics in World Literature. 3 credits.
Major works of world literature with varying perspectives and topics, such as specific cultures, histories, myths, or music and the arts, as represented in literature. Notes: May be repeated when topic differs with permission of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the term for a maximum 9 credits.

Mason Core: Literature (p. 135)

Recommended Prerequisite: ENGL 101/ENGH 101 and 45 credits or permission of instructor.

Schedule Type: Lecture

FRLN 331: Topics in World Cinema. 3 credits.
Major works of world cinema with varying perspectives and topics, such as specific genres, periods, schools. Notes: Coursework in English. May be repeated when topic is different with permission of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 9 credits.

Mason Core: Global Understanding (p. 135)

Recommended Prerequisite: ENGL 101 or permission of instructor.

Schedule Type: Seminar

FRLN 380: Topics in the Sociopolitics of Language. 3 credits.
Addresses relationship between language and other social and cultural systems (macro sociolinguistics), and critical study of people's ideas about language (language ideology). Utilizes comparative approach to explore ways people use language to perform and communicate various social identities and categories; how and why people attach social meanings and values to particular ways of using language; development of official and unofficial language policies; and impact of language policies. Notes: May be repeated when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: ENGL 101/ENGH 101 and 45 credits, or permission of instructor.

Schedule Type: Lecture

FRLN 385: Multilingualism, Identity, and Power. 3 credits.
Study of individual and societal aspects of multilingualism including language choice, linguistic maintenance and shift, code-switching, language planning, educational policy, and representations of multilingualism. Interdisciplinary approach emphasizes the social and political aspects of multilingualism, as well as the relationship of language to cultural, ethnoracial, and national identities and categories.

Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Mason Core: Synthesis (p. 135)

Recommended Prerequisite: Completion or concurrent enrollment in all other required Mason Core courses.

Schedule Type: Lecture

400 Level Courses

FRLN 430: Topics in Comparative World Literatures. 3 credits.
Explores comparative studies of a topic through literary works written in at least two different languages. All material provided in translation. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Lecture

FRLN 431: Medieval Intellectual Topics. 3 credits.
Focuses on topic in intellectual history of Middle Ages. Emphasizes literary or historical, depending on discipline of instructor. Relevant material may be drawn from philosophy, theology, and art. Notes: May be taken for credit by English or history majors. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to ENGH 421, HIST 431.

Schedule Type: Lecture

FRLN 490: Internship in Foreign Language Studies. 1-6 credits.
Qualified students work with schools, social service programs, government agencies, interest groups, museums, or corporations locally or abroad. Specific arrangements must be made with, and approved by, a faculty member of the specific language program during semester prior to enrollment. For each credit, student works on site at least 45 hours. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Internship

500 Level Courses

FRLN 510: Bibliography and Research in Foreign Languages and Literature. 3 credits.
Use of basic bibliographical tools and methodologies for scholarly research in French, German, and Spanish. Taught in cooperation with university library staff. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in English

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FRLN 525: Literary Translation. 3 credits.
Critical approach and analysis of diverse texts such as poetry, drama, essay, and novel excerpts. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.
**Recommended Prerequisite:** Graduate standing or permission of department and advanced coursework in literary translation.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**FRLN 550:** *Special Topics.* 3 credits.
Themes, periods, or genres vary from semester to semester. Focuses on topics that incorporate one or more languages taught in department, but instruction is in English. Notes: May be repeated with permission of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**FRLN 551:** *Special Topics.* 3 credits.
Themes, periods, or genres vary from semester to semester. Focuses on topics that incorporate one or more languages taught in department, but instruction is in English. Notes: May be repeated with permission of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**FRLN 555:** *Special Topics.* 3 credits.
Lectures on nature, function of translating process. Evaluates theories of translation with respect to text typology. Critiques selected translations from target languages to English and vice versa. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**FRLN 556:** *Theory of Translation.* 3 credits.
Lectures on nature, function of translating process. Evaluates theories of translation with respect to text typology. Critiques selected translations from target languages to English and vice versa. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**FRLN 557:** *Heritage Language Education.* 3 credits.
Overview of the field of heritage language education, including consideration of the linguistic and sociocultural characteristics of heritage language students, empirical research on heritage language education, and a range of instructional approaches, including critical pedagogy. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in English

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
FRLN 590: Internship and Seminar in Translation. 3 credits.
Internships are nonpaying, work-study positions that focus on the practice of translation. Qualified students placed with area institutions, interest groups, agencies, or corporations. Notes: Placement depends on availability of positions. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Recommended Corequisite: Internships are nonpaying, work-study positions that focus on the practice of translation. Qualified students are placed with area institutions, interest groups, agencies or corporations. Requires admission to the translation certification program. Please contact Dr. Cordero in the department. Individualized Section Form required.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

600 Level Courses
FRLN 600: Workshop in Foreign Languages. 1-6 credits.
In-service workshops, tours, and seminars on selected topics in literature, language, bilingualism, culture, methodology. Notes: May not be applied toward MA in foreign languages without permission of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FRLN 620: Literary Theory and Criticism. 3 credits.
Studies nature of literary work, and analyzes contemporary critical approaches to literature. Notes: May not be taken for credit by students who previously received credit for FRLN 615. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FRLN 650: The Teaching of Culture in Foreign Language Programs. 3 credits.
Purpose and methods of study of culture, with emphasis on strategies and techniques for teaching culture in foreign language programs.

Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FRLN 660: Approaches to the Study of Language. 3 credits.
Linguistics and its relationship to other disciplines, including study of generative grammar with syntactic problems drawn from commonly taught foreign languages. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FRLN 670: Foreign Language Learning and Teaching. 3 credits.
Theories, methods, and strategies of second and foreign language learning and teaching. May not be taken by students who have completed FRLN 570. Notes: May not be taken by students who have completed FRLN 570. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Forensic Science (FRSC)

200 Level Courses
FRSC 200: Survey of Forensic Science. 3 credits.
This course will familiarize students with the basic principles, professional practice, quality assurance, and quality control measures employed in the practice of forensic science in the American system of justice. An introduction to topics including the nature of evidence and the law, crime scene investigations, serology, DNA analysis, bloodstain pattern, trace evidence, microscopy, forensic pathology, anthropology, odontology and entomology/ Offered by College of Science (p. 593). May not be repeated for credit.

Schedule Type: Lecture
FRSC 201: Introduction to Criminalistics. 3 credits.
This course will provide an overview of the field of criminalistics, with a focus on the recognition, collection, preservation, and analysis of physical evidence. During the course, the student will be introduced to topics such as fingerprints, question documents, firearms, drugs of abuse, explosives and arson to prepare them for additional, more in-depth classes in criminalistics/forensic science. Offered by College of Science (p. 593). May not be repeated for credit.

Schedule Type: Lecture

300 Level Courses

FRSC 302: Forensic Trace Analysis. 3 credits.
This course will provide an overview of the field of forensic science with specific emphasis on areas of trace and biological evidence, including topics such as the analysis of hair, soil, glass, paint, and other trace material. A laboratory component provides an introduction to microscopy which assists students master the foundation tools used in analyzing forensic trace evidence. Offered by College of Science (p. 593). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: FRSC 200\(^C\) and 201\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

FRSC 303: Forensic Evidence and Ethics. 3 credits.
This course will acquaint the student with the application of scientific methods and the interaction it may have with legal principles. It will prepare the student for future applications of forensic science with its role in the administration of justice, courtroom testimony, and the ethical rules and duties under codes of professional conduct and practice. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: FRSC 200\(^C\) and CRIM 100\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

FRSC 304: Forensic Chemistry. 3 credits.
Introduction to the chemical principles and methods used in the application of forensics toward the elucidation of criminal activity and to support litigation. Students will be learning the fundamentals of statistics (QA/QC), chromatography (GC and LC), and instrumentation (microscopy, FTIR, and MS) that will enable forensics analysis of trace evidence relating to: drugs, explosives, toxicology, arson, firearms, volatiles, and hair/fibers. Offered by College of Science (p. 593). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: FRSC 200\(^C\), 201\(^C\), CHEM 211\(^C\), 213\(^C\), 212\(^C\) and 214\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

400 Level Courses

FRSC 401: Crime Scene Investigations. 3 credits.
This course provides the scientific principles of crime scene investigations by applying the basic knowledge of proper documentation, collection and preservation of physical evidence. Proper crime scene protocols and evidence processing techniques will be performed in areas such as, forensic photography, sketching, blood stain pattern analysis, trajectory, skeletal remains, and fingerprinting. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: FRSC 200\(^C\), 201\(^C\) and 303\(^C\).
\(^C\) Requires minimum grade of C.

Enrollment limited to students in the BS Forensic Science program.

Schedule Type: Research

FRSC 405: Independent Research Methods. 3 credits.
This course is designed to allow students to complete an approved independent forensic science research project under the guidance of a faculty mentor. A formal research proposal will be prepared and submitted. In addition to conferring with the instructor regularly regarding the process of their research, students will also be introduced to research and writing methods throughout the course. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Completion of 90 credits or permission of instructor.

Registration Restrictions:
Enrollment limited to students in the BS Forensic Science program.

Schedule Type: Research

FRSC 406: Forensic Internship. 3 credits.
This course is designed to allow students the opportunity to enhance their academic coursework with field work either at an approved agency or under the guidance of an approved faculty mentor that will substantially correlate with a discipline of forensic science. For successful completion, the student must complete a minimum of 135 hours of work. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Completion of 60 credits or permission of instructor.

Registration Restrictions:
Enrollment limited to students in the BS Forensic Science program.

Schedule Type: Internship

FRSC 415: Selected Topics in Forensic Science. 3 credits.
Topics vary according to instructor’s specialty. Notes: May be repeated only with permission of program chair. Offered by College of Science (p. 593). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Permission of instructor

Schedule Type: Lecture

FRSC 420: Forensic Toxicology. 3 credits.
Examines toxic substances and their effects on human cellular and organ systems. The course focuses on human physiological concepts, the human enzymatic detoxification processes, methodologies for identifying...
toxins, and specific toxic analytes. Offered by College of Science (p. 593). May not be repeated for credit.

**Recommended Prerequisite:** Completion of Forensic Science Foundation courses

**Schedule Type:** Lecture

**FRSC 440:** Advanced Forensic Chemistry. 3 credits.
The principles of forensic chemistry will be addressed in this course, including analytical chemistry, instrumentation, sample handling, drug chemistry and pharmacology, and analysis of physical evidence such as papers, inks, paints, and coatings. Offered by College of Science (p. 593). May not be repeated for credit.

**Recommended Prerequisite:** Completion of Forensic Science Foundation courses

**Schedule Type:** Lecture

**FRSC 460:** Forensic DNA Sciences. 3 credits.
This course will provide an understanding of body fluid identification and molecular biology testing methodologies as applied to the analysis of forensic samples. The process of forensic DNA analysis will be covered in depth. Current topics in forensic DNA analysis will be reviewed including population genetics, validation, quality assurance, the CODIS database, Y-STRs, mitochondrial DNA testing, SNPs and contemporary research. Offered by College of Science (p. 593). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** FRSC 200C, 201C, BIOL 213C and 311C.

**Schedule Type:** Lecture

**FRSC 499:** Comprehensive Examination. 0 credits.
The comprehensive examination ensures that the student is prepared to engage in an entry level forensic profession, in advanced forensic training or a graduate program. Students are required to pass this examination prior to graduation. Offered by College of Science (p. 593). May be repeated within the degree for a maximum of credits.

**Recommended Corequisite:** FRSC 304, 401 and 460.

**Registration Restrictions:**
**Required Prerequisites:** FRSC 200C, 201C, 302C and 303C.

**Schedule Type:** Independent Study

**500 Level Courses**

**FRSC 500:** Introduction to Forensic Science. 3 credits.
Overview of forensic science and related investigative techniques. Includes coverage of crime scene investigation, crime scene procedures, the role of the forensic pathologist, the modern forensic laboratory, DNA analysis techniques, microanalysis, examination of trace evidence, hair and fibers, examination of questioned documents, forensic anthropology, forensic odontology, homicide investigation, and analysis of a mock crime scene. Offered by College of Science (p. 593). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**FRSC 510:** Basic Crime Analysis. 3 credits.
Examines the role of the first officer at the scene, search, seizure and related legal issues, traditional crime scene measurements, photogrammetry, processing latents, crime scene reconstruction methods, 2-D and 3-D impressions, blood spatter analysis, collection of trace evidence, packaging and preserving evidence, outdoor crime scenes, and explosion and fire scenes. Offered by College of Science (p. 593). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**FRSC 511:** Advanced Crime Scene Analysis. 3 credits.
Advanced Crime Scene Analysis is designed to build on concepts introduced in FRSC 510 (Basic Crime Scene Analysis), and to provide an enhanced foundation in the field of criminalistics for those students who are interested in learning the application of science to solving crimes. Offered by College of Science (p. 593). May not be repeated for credit.

**Recommended Prerequisite:** FRSC 510 or permission of instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**FRSC 512:** Physical Evidence Analysis. 3 credits.
This is a series of practical laboratory exercises that introduces the student to sophisticated crime scene documentation techniques including collection of evidence, examination of hairs, fibers, toolmarks and other trace evidence. Advanced topics in blood spatter, trajectory, pattern casting, and alternate light sources will be explored. Offered by College of Science (p. 593). May not be repeated for credit.

**Recommended Prerequisite:** FRSC 510 or permission of instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**FRSC 513: Forensic Photography.** 3 credits.
This series of lecture and practical exercises introduces the student to sophisticated crime scene documentation techniques including photography, digital imaging, use of lighting, and legal issues relating to images. Offered by College of Science (p. 593). May not be repeated for credit.

**Recommended Prerequisite:** Admitted to the Forensic Science Master's Program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**FRSC 515: Selected Topics in Forensic Science.** 3 credits.
Topics vary with instructor's specialty. May be repeated only with permission of program chair. Offered by College of Science (p. 593). May be repeated within the degree for a maximum 12 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**FRSC 517: Questioned Document Examination.** 3 credits.
Theory and principles of handwriting, duplicating and printing processes, paper manufacture and fiber analysis, fracture match comparison, ink analysis, and indented writing examinations; methods of examining questioned documents. Offered by College of Science (p. 593). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**FRSC 520: Toxicology.** 3 credits.
Examines toxic substances and their effects on human cellular and organ systems. The course focuses on human physiological concepts, the chemistry of toxins, the human enzymatic detoxification processes, and the analytical techniques required for detecting the presence of toxins and their metabolites in human tissue or serum. Offered by College of Science (p. 593). May not be repeated for credit.

**Recommended Prerequisite:** Advanced level undergraduate course in molecular or cellular biology, biochemistry or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**FRSC 530: Law and Forensic Science.** 3 credits.
A detailed examination and analysis of the law affecting forensic science across the discipline range. Special emphasis is given to the laws affecting evidence, courtroom procedure, and the forensic expert. Offered by College of Science (p. 593). May not be repeated for credit.

**Recommended Prerequisite:** Minimum of 10 credit hours of graduate Forensic Science coursework.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**FRSC 540: Forensic Chemistry.** 3 credits.
The principles of forensic chemistry will be addressed in this course, including analytical chemistry, instrumentation, sample handling, drug chemistry and pharmacology, and analysis of physical evidence such as papers, inks, paints, and coatings. Offered by College of Science (p. 593). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate degree in chemistry or biology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**FRSC 541: Forensic Chemistry Laboratory.** 1 credit.
This course will familiarize students with chemical knowledge gained from experimental observations and studies in the laboratory. Students will examine, test and establish for themselves the forensic chemistry discussed in the lecture courses. Note: The successful passing of a Virginia Department of Forensic Science background check is required prior to gaining access to this laboratory course. Offered by College of Science (p. 593). May not be repeated for credit.

**Recommended Corequisite:** FRSC 540.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

FRSC 550: Issues in Forensic Anthropology. 3 credits. Examine issues related to skeletal analyses and interpretation of forensic case reports in determining personal identification and cause of death. Discussions include skeletal variation, age criteria, sexing criteria, pathology, trauma, and postmortem damage. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

FRSC 560: Forensic DNA Sciences. 3 credits. Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software. Offered by College of Science (p. 593). May not be repeated for credit. Equivalent to BINF 637.

Recommended Prerequisite: Undergraduate coursework in molecular and/or cell biology, as well as genetics, prior to taking this course or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

FRSC 561: Forensic DNA Laboratory. 1 credit. This laboratory course will provide comprehensive coverage of the various types of DNA testing currently used in forensic biology laboratories. Students will have hands-on experience with the analytical equipment employed and the techniques used for human identification in forensic casework, such as, DNA extraction, quantitation, PCR amplification, genotyping, and interpretation. Note: The successful passing of a Virginia Department of Forensic Science background check is required prior to gaining access to this laboratory course. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Corequisite: FRSC 560.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
600 Level Courses

FRSC 600: Forensics Seminar. 1 credit.
Selected topics in forensic science research, generally consisting of research presentations by forensic professionals and faculty members. Students must write an article of their choosing, not to exceed four pages, from a set of peer-reviewed journals to be established by the instructor. Recent articles are preferred, generally those having been published during the previous two years. Notes: Students enrolled in the forensic science MS program must attend at least 80% of the seminars. Offered by College of Science (p. 593). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Admission to the Forensic Science MS program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

FRSC 610: Forensics Research Project. 1-4 credits.
Research project in a current area of forensic science performed under the direction of a faculty member or affiliated forensic science professional. Offered by College of Science (p. 593). May be repeated within the degree for a maximum 4 credits.

Recommended Prerequisite: Admission to the Forensic Science MS program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

FRSC 620: Face and Biometric Pattern Analysis. 3 credits.
This course will familiarize students with the basic principles and uses of biometrics for automated searches and comparisons by forensic examiners. This course will review the basics of face, fingerprints, iris, and speaker recognition. Students should gain an understanding of how automated systems and forensic examiners perform recognition. Students will also learn the capabilities and limitations of biometric recognition. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FRSC 630: Fingerprint Identification. 3 credits.
This course will cover the exploration of the techniques and methods of identification, capture and analysis of fingerprint evidence, including consideration of the fundamentals of fingerprint patterns, classification formulas and extensions, techniques for taking good fingerprints, problems in fingerprinting, preparation of fingerprint charts for court testimony, and practical exercises for capturing fingerprints. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FRSC 640: Legal, Privacy and Ethical Issues in Identity Analysis. 3 credits.
This course will review basic policies and doctrinal guidance related to the applications of biological, physical, chemical, and medical sciences to questions of evidence and law. In doing so, students should gain a basic understanding of the high level policies, protocols, standards, privacy, civil liberties, and doctrine related to the forensic sciences as they are practiced relating to identity analysis. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FRSC 650: Identity Analysis Applications. 1 credit.
This course will review the basics of biometrics and how the various biometric modalities can be used to aid in identification and identity verification. The course will also focus on how biometrics and forensics are used, or can be used, in various applications from military uses, intelligence/counter-terrorism, border and immigrations control and in support of state development. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
FRSC 690: *Forensics Capstone Course*. 3 credits.
Integrates all the various techniques used in the study of forensic science and medicine, and applies them to the interpretation of facts and the reconstruction of the sequence of events at a variety of typical death scenes. Integrates medical, scientific, sociological, and legal methodology as they apply to medicolegal death investigations, using a variety of forensic literature and text resources. Presents an integrative approach to crime scene analysis based on actual case studies, in which students apply theoretical concepts discussed in class to real-world situations. Includes weekly group projects, with students organized in rotating groups and assigned a research topic in forensic medicine. Students discuss, examine, and analyze forensic, medical, and physical elements present at the death scenes, and develop their own hypotheses, which are then evaluated and discussed as the case is reconstructed. Offered by College of Science (p. 593). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

### 700 Level Courses

**FRSC 790: Internship in Forensic Science.** 1-3 credits.
On the job experience for Forensic Science majors in industry or government laboratories or investigative units, or approved study programs with specific employers. Students work in observational, experimental, or theoretical research, and prepare weekly journals, as well as a written report at the end of the internship. Offered by College of Science (p. 593). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admitted to Forensic Science Program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**FRSC 799: Master’s Thesis.** 1-6 credits.
Project chosen and completed under guidance of graduate faculty member. Comprehensive report (thesis) acceptable to student’s advisory committee is required. Offered by College of Science (p. 593). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

### French (FREN)

#### 100 Level Courses

**FREN 101: Elementary French I.** 3 credits.
For students with no knowledge of French. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for FREN 101 and FREN 110. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to FREN 110.

**Schedule Type:** Lecture

**FREN 102: Elementary French II.** 3 credits.
Continuation of FREN 101. Notes: Students may not receive credit for FREN 102 and FREN 110. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to FREN 110, FREN 115.

**Recommended Prerequisite:** FREN 101, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**FREN 110: Elementary French.** 6 credits.
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes: Students may not receive credit for FREN 110 and FREN 101, 102. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to FREN 101, FREN 102, FREN 110, FREN 115.

**Schedule Type:** Lecture

**FREN 115: Review of Elementary French.** 3 credits.
Reviews elements of French for students who have studied French previously. Notes: Students may not receive credit for FREN 115 and FREN 102, or 110. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to FREN 102, FREN 109, FREN 110.

**Recommended Prerequisite:** Appropriate placement score, or permission of department.

**Schedule Type:** Lecture

#### 200 Level Courses

**FREN 201: Intermediate French I.** 3 credits.
Further development of skills in listening, speaking, reading, and writing.

Notes: FREN 201 and 202 must be taken in sequence. Students may not receive credit for FREN 201 and FREN 210. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to FREN 210.

**Recommended Prerequisite:** FREN 102, appropriate placement score, or permission of department.

**Schedule Type:** Lecture

**FREN 202: Intermediate French II.** 3 credits.
Applies language skills to reading, composition, and class discussion.

Notes: Students may not receive credit for FREN 202 and FREN 210. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to FREN 210.

Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: Negritude, political strife, religious conflicts throughout the francophone world. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 15 credits of French at the 300 level or permission of instructor.

Schedule Type: Lecture

FREN 450: Special Topics Related to French Literature and Culture. 3 credits.
Analyzes selected texts, authors, movements, and issues within a comparative historical and cultural context over two or more centuries or with an interdisciplinary approach. Notes: May be repeated for credit when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 15 credits of French at the 300 level or permission of instructor.

Schedule Type: Lecture

FREN 451: Topics in Sub-Saharan Francophone Literature and Culture. 3 credits.
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: Negritude, (post)colonialism, new African voices within and beyond the continent. Notes: May be repeated when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Non-Western Culture

Recommended Prerequisite: 15 credits of French at the 300 level or permission of instructor.

Schedule Type: Lecture

FREN 453: Topics in North African Francophone Literature and Culture. 3 credits.
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts with a focus on the construction of identity: Maghreb in pre and (post)colonial era, recent ideological trends in writing. Notes: May be repeated for credit with permission of instructor. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 15 credits of French at the 300 level or permission of instructor.

Schedule Type: Lecture

FREN 454: Topics in Caribbean Francophone Literature and Culture. 3 credits.
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: the construction of identity through and beyond Negritude, Antillanité, Creolité, and migration. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Non-Western Culture

Recommended Prerequisite: 15 credits of French at the 300 level or permission of instructor.

Schedule Type: Lecture

FREN 455: Special Topics related to Francophone Literature and Culture. 3 credits.
Analyzes a selection of important literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts: gender studies, migration and identity-building, ethno-social tensions, political strife, religious conflicts throughout the francophone world. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 15 credits of French at the 300 level or permission of instructor.

Schedule Type: Lecture

FREN 456: Topics in North African Francophone Literature and Culture. 3 credits.
Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts with a focus on the construction of identity: Maghreb in pre and (post)colonial era, recent ideological trends in writing. Notes: May be repeated for credit with permission of instructor. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 15 credits of French at the 300 level or permission of instructor.

Schedule Type: Lecture

FREN 457: Topics in Quebec and French-Canadian Literature and Culture. 3 credits.
Analyzes representative literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts. Emphasizes contemporary works. Notes: May be repeated for credit when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 15 credits of French at the 300 level or permission of instructor.

Schedule Type: Lecture

FREN 460: Advanced Oral and Written Expression. 3 credits.
Intensive course designed to help students obtain fluency in oral and written French. Develops conversational skills and mastery of vocabulary through class discussions, oral and written reports, debates and presentations on current topics and events linked to the French and Francophone world. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Recommended Prerequisite: 15 credits of French, or permission of instructor.

Schedule Type: Lecture

Describes and analyzes the variability of forms and styles and the more complex aspects of the French language. Develops writing skills through readings, discussions, and compositions. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Recommended Prerequisite:** 15 credits of French at the 300 level or permission of instructor.

**Schedule Type:** Lecture

FREN 463: **History of the French Language.** 3 credits.
Diachronic study of the French language from the 9th to the 20th century, with a focus on morphology, syntax and lexicon changes. Close study of various texts (prose, poetry, political writing, theater and short stories) in the light of their socio-historical contexts. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Recommended Prerequisite:** 15 credits of French at the 300 level or permission of instructor.

**Schedule Type:** Lecture

FREN 464: **Advanced Translation.** 3 credits.
Analyzes theories and methods of translation, with a focus on translation practice (French to English and English to French) of a varied selection of texts (periodicals, short stories, novel excerpts, newspaper articles, etc.). Notes: May be repeated for credit when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 15 credits of French at the 300 level or permission of the instructor.

**Schedule Type:** Lecture

FREN 465: **Special Topics related to the French language.** 3 credits.
Content varies: diachronic or synchronic study of the French language or one of its aspects; sociolinguistics; language teaching methodology; etc. Notes: May be repeated for credit when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 15 credits of French at the 300 level or permission of instructor.

**Schedule Type:** Lecture

FREN 467: **Special Topics related to French and Francophone Literature and Culture.** 3 credits.
Analyzes selected texts, authors, movements, and issues within comparative historical and cultural contexts as related to France and to various francophone regions of the world or with an interdisciplinary approach. Notes: May be repeated for credit when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 15 credits of French at the 300 level or permission of instructor.

**Schedule Type:** Lecture

FREN 470: **French and Francophone Cinema.** 3 credits.
Analyzes topics such as the early days of French cinema, la nouvelle vague, women film directors, Quebecois, African and Caribbean films, selected by type, period or director. Notes: May be repeated with permission of department or film studies advisor. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 15 credits of French at the 300 level or permission of instructor.

**Schedule Type:** Lecture

FREN 475: **Grammatical Analysis.** 3 credits.
Study of characteristic features of contemporary French. Examines spoken and written French, including syntactic analysis, distributional analysis, and generative-transformational grammar. Emphasis on problem areas for American learner. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Recommended Prerequisite:** 15 credits of French at the 300 level or permission of instructor.

**Schedule Type:** Lecture

FREN 490: **Independent Study.** 1-3 credits.
Research and analysis of selected problem in literature or linguistics in consultation with department member. Notes: Only 6 credits of independent study may be applied to fulfilling requirements in concentration. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Schedule Type:** Independent Study

FREN 491: **Independent Study.** 1-3 credits.
Research and analysis of selected problem in literature or linguistics in consultation with department member. Notes: Only 6 credits of independent study may be applied to fulfilling requirements in concentration. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Schedule Type:** Independent Study

FREN 497: **Senior Honors Tutorial.** 3 credits.
Students who meet these requirements admitted to candidacy after submitting letter of application to departmental Honors Committee in second half of junior year. Also requires faculty recommendation and interview by Honors Committee. First semester involves weekly meetings with faculty member to discuss readings from comprehensive list prepared by French faculty. Second semester requires independent research and completion of honors essay under supervision of French faculty member. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Schedule Type:** Independent Study

FREN 498: **Senior Honors Tutorial.** 3 credits.
Students who meet these requirements admitted to candidacy after submitting letter of application to departmental Honors Committee in second half of junior year. Also requires faculty recommendation and interview by Honors Committee. First semester involves weekly meetings with faculty member to discuss readings from comprehensive list prepared by French faculty. Second semester requires independent research and completion of honors essay under supervision of French faculty member. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Schedule Type:** Independent Study

Schedule Type: Lecture

FREN 563: History of the French Language. 3 credits. Analyzes a selection of literary texts (novel, short story, poetry, and/or theater) and authors in their historical and cultural contexts with a focus on the construction of identity: Maghreb in pre and (post)colonial era, recent ideological trends in writing. Advanced critical research and writing required. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FREN 564: Advanced Translation. 3 credits. Analyzes theories and methods of translation, with a focus on translation practice (French to English and English to French) of a varied selection of texts (periodicals, short stories, novel excerpts, newspaper articles, etc.) Advanced critical research and writing required. Notes: Translations from French to English and English to French. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FREN 565: Special Topics Related to the French Language. 3 credits. Content varies: diachronic or synchronic study of the French language or one of its aspects; sociolinguistics; language teaching methodology, etc. Advanced critical research and writing required. Notes: May be repeated for credit when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the term for a maximum 6 credits.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FREN 567: Special Topics related to French and Francophone Literature and Culture. 3 credits. Explores issues related to the francophone world. Emphasis on comparative issues, not geographical areas. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 15 credits of French at the 300 level or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

FREN 570: French and Francophone Cinema. 3 credits. Topics such as early days of French cinema, a nouvelle vague, women film directors, Quebecois, African and Caribbean films, selected by type, period or director. Advanced critical research and writing required. Viewing of films outside of class time. Notes: May be repeated for
credit when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**FREN 575: Grammatical Analysis.** 3 credits.
Analyzes selected texts, authors, movements, and issues within comparative historical and cultural contexts as related to France and to various francophone regions of the world or with an interdisciplinary approach. Advanced critical research and writing required. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**700 Level Courses**

**FREN 798: Directed Reading and Thesis Research.** 3 credits.
Reading and research for thesis under direction of a faculty member. Notes: Open to degree students who desire to work on independent study with a faculty mentor or who have completed at least 24 credits and have been approved by the French Graduate Faculty to conduct research for a M.A. thesis. See Modern Classical Languages Graduate Student Handbook for complete explanation of the thesis option. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Recommended Prerequisite:** Degree students who desire to work on independent study with a faculty mentor or who have completed at least 24 credits and have been approved by the French Graduate Faculty to conduct research for a M.A. thesis.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Geography and Geoinformation Science (GGS)**

**100 Level Courses**

**GGS 101: Major World Regions.** 3 credits.
Patterns, problems, and prospects of the world's principal human-geographic regions. Emphasizes areal differentiation and role of geographic differences in interpreting current world scene. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

**GGS 102: Physical Geography.** 3 credits.
Interrelated processes affecting global distribution and character of climate, soils, vegetation, hydrology, and landforms. Includes elements of mapping. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Mason Core:** Natural Science Overview, Encore:Sustainability (p. 135)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Lecture

**GGS 103: Human Geography.** 3 credits.
Overview of major ideas and approaches to studying spatial aspects of human social and behavioral systems. Surveys distribution and movement of human populations, characteristics and distribution of cultural mosaics, patterns of economic interdependence, and study of forces of cooperation and conflict among people from global perspective. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Mason Core:** Social/Behavioral Sciences, Encore:Sustainability (p. 135)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Lecture

**GGS 110: Introduction to Geoinformation Technologies.** 3 credits.
This course introduces students to basic geoinformation technology concepts and applications. Students learn about and apply spatial data collection analytic tools and methods, including geographic information systems, and web-based map developments. Lectures examine social trends, ethical issues including privacy state of the art technological research and developments of geoinformation technologies in industry, government, education, and everyday life. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Specialized Designation:** Discovery of Scholarship

**Schedule Type:** Lecture

**GGS 121: Dynamic Atmosphere and Hydrosphere.** 4 credits.
Systematic study of weather, climate, energy, and hydrologic systems viewed from a geospatial and global perspective. Studies the spatial distribution and relationships of the Earth’s climate and hydrologic
systems to other Earth systems, as well as the processes driving and changing them, including energy, climate, weather, and water resources. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Mason Core:** Natural Science with Lab, Encore:Sustainability (p. 135)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Laboratory, Lecture

**GGS 122: Dynamic Geosphere and Ecosphere.** 4 credits. Systematic study of biogeography and soils, viewed from a geographic, or spatial, perspective. We will study the spatial distribution and relationships of Earth’s biomes and soils systems to other Earth systems, and the processes driving them, including energy, climate, nutrients, chemistry, and moisture. Cannot be combined for credit with EVPP 110 or EVPP 111. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Laboratory, Lecture

### 300 Level Courses

**GGS 300: Quantitative Methods for Geographical Analysis.** 3 credits. Comprehensive introduction to quantitative methods in spatial analysis, with emphasis on solving geographical research problems. Topics include nature of spatial data; collection of spatial data; preparation of spatial data for mapping, geographic information systems, and statistical analysis; descriptive spatial statistics; areal sampling theory and methods; probability theory and distributions; hypothesis testing; correlation and regression; and areal and point pattern spatial statistics. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Specialized Designation:** Scholarly Inquiry

**Recommended Prerequisite:** 30 credits, including GGS 102 and 103 or permission of instructor.

**Schedule Type:** Lecture

**GGS 301: Political Geography.** 3 credits. Distribution and effects of power on landscape, particularly on national and global scales. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** 30 credits

**Schedule Type:** Lecture

**GGS 302: Global Environmental Hazards.** 3 credits. Introduces applications of observational and modeling techniques to natural hazards and the threat they pose to the world, as well as a general introduction to global climate change and its effect on regional and local scales. Examples include topics of interest to different countries and regions of the world, such as earthquakes, sand and dust storms, slope failures, volcanoes, land slides, droughts and desertification, floods, hurricanes and typhoons, severe weather, wild fires (U.S., Indonesia, Africa, S. America), sea-level rise, and tsunamis. Covers Earth system science topics related to the above hazards and their coupling with anthropogenic hazards as well as how societies respond to natural disasters and mitigation. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 30 hours and undergraduate status

**Schedule Type:** Lecture

**GGS 303: Geography of Resource Conservation.** 3 credits. Provides analysis of world resources distribution, conservation, and preservation; and problems resulting from their natural occurrence and utilization. Uses knowledge from physical and social sciences to develop complex and sophisticated understanding of issues surrounding natural resource exploitation and management, conservation, and preservation. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Mason Core:** Encore:Sustainability, Synthesis (p. 135)

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 30 credits, and completion or concurrent enrollment in all other required Mason Core courses.

**Schedule Type:** Lecture

**GGS 304: Population Geography.** 3 credits. Spatial distribution of population, its causes and effects, and changing patterns resulting from population mobility. Emphasizes spatial characteristics of variables such as age, sex, race, education, and income. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Mason Core:** Encore:Sustainability, Synthesis (p. 135)

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 30 credits and completion of or concurrent enrollment in all Mason Core requirements.

**Schedule Type:** Lecture

**GGS 305: Economic Geography.** 3 credits. Analyzes pattern of distribution of world economic activity, spatial economics behind this pattern, and influence of distribution on other spatial systems. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** 30 credits

**Schedule Type:** Lecture

**Schedule Type:** Lecture

**GGS 307: Sustainable Development.** 3 credits. Explores the concepts, applications, and tools for analysis and decision making in support of environmentally sustainable development. Case studies and problem-solving exercises will be used to stimulate learning and provide practical experience in addressing sustainable development
issues. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 60 hours; GGS 122 and GGS 302, or permission of instructor.

**Schedule Type:** Lecture

**GGS 308: Field Mapping Techniques.** 3 credits.

Basic techniques for collecting and recording spatial field data, including topographic maps, compass, transit, alidade, and geographic positioning systems. Includes field work. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** MATH 105, GGS 102 or GEOL 101, and 30 credits.

**Schedule Type:** Laboratory

**GGS 309: Meteorology and Climate.** 3 credits.

Elements of meteorology; analysis of world distribution of meteorological controls as bases of regional climatic variations. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** GGS 102, 121, or equivalent, or permission of instructor.

**Schedule Type:** Lecture

**GGS 310: Introduction to Digital Cartography.** 4 credits.

Origins, principles, and methods of thematic map design and production. Principles of graphic design, data compilation, analysis, and display. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Schedule Type:** Laboratory, Lecture

**GGS 311: Introduction to Geographic Information Systems.** 3 credits.

Fundamental concepts and theories for appropriate use of geographic information systems (GIS). Discusses basic GIS functionality and applications in various fields. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Schedule Type:** Lecture

**GGS 312: Physical Climatology.** 3 credits.

Quantitative description of nature and theory of the climate system, dynamics of atmosphere-ocean-land surface, internal interactions and response to external forcing, description of the climate record and simple climate models. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to CLIM 312.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 30 hours; and GGS 121, MATH 113, PHYS 243-244, or permission of instructor.

**Schedule Type:** Lecture

**GGS 314: Severe and Extreme Weather.** 3 credits.

Behavior of weather events ranging from small scale (e.g., thunderstorms and tornadoes) to mesoscale (e.g., fronts and hurricanes). Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to CLIM 314.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** MATH 113 or equivalent; CLIM/PHYS 111/112 or EOS 121 or GGS 121.

**Schedule Type:** Lecture

**GGS 315: Geography of the United States.** 3 credits.

Diversity of US physical and cultural landscapes. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** 6 credits of geography or American Studies, or permission of instructor.

**Schedule Type:** Lecture

**GGS 316: Geography of Latin America.** 3 credits.

Regional survey of physical resources, populations, cultural characteristics, and economic activities in Latin America. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** 6 credits of Geography or Latin American Studies, or permission of instructor.

**Schedule Type:** Lecture

**GGS 319: Air Pollution.** 3 credits.

Description of major types of air pollution and introduction to how their characteristics are influenced by interaction with the atmosphere. Topics include sources and distribution of pollution from local to global scales, effects of radiation and wind on pollution, and dispersion and pollution effects on climate. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** CLIM 111 or GGS 121.

**Schedule Type:** Lecture

**GGS 320: Geography of Europe.** 3 credits.

Environmental, economic, social, and political factors influencing regional structure of Europe. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** 6 credits of Geography or European Studies, or permission of instructor.

**Schedule Type:** Lecture

**GGS 321: Biogeography.** 3 credits.

A survey of the relationship between distribution of plants and animals on the earth surface and the physical geography and environmental characteristics. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to BIOL 374.

**Recommended Prerequisite:** GGS 122 or permission of instructor.

**Schedule Type:** Lecture
**GGS 322: Issues in Global Change.** 3 credits.
Provides the basis for evaluating existing and emerging issues in the environmental sciences at the regional and global scale, using interdisciplinary scientific principles. Combines activities designed to provide an understanding of the following: first principles underlying regional/global issues in the environmental sciences, with attention to links among the disciplines of atmospheric sciences, biology, ecology, hydrology, oceanography, geology, human health, toxicology, and mathematical modeling; concepts of systems control, feedbacks, modeling, and hierarchical scales (spatial and temporal); role of retrospective analyses in developing a scientifically sound basis for evaluation and analysis; and studies of specific issues of interest on a regional to global scale. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** GGS 121, GGS 122, or permission of instructor.

**Schedule Type:** Lecture

**GGS 325: Geography of North Africa and the Middle East.** 3 credits.
Environmental, economic, and social factors of differentiation of regional structure and distribution of resources in North African and Middle Eastern countries. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** 6 credits of Geography or courses related to Middle East, or permission of instructor.

**Schedule Type:** Lecture

**GGS 330: Geography of the Soviet Succession States.** 3 credits.
Analyzes geographic factors involved in history, economic development, and geopolitical situation of the former Soviet Union. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** 6 credits of geography or Russian studies, or permission of instructor.

**Schedule Type:** Lecture

**GGS 333: Issues in Regional Geography.** 3 credits.
Geographical study of particular region or relevant regional issue. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** 30 credits.

**Schedule Type:** Lecture

**GGS 340: Health Geography.** 3 credits.
Spatial approaches to the study of health and disease. Topics include disease ecology and diffusion, and geographic perspectives on improving health care delivery. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** Course in statistics.

**Schedule Type:** Lecture

**GGS 354: Data Analysis and Global Change Detection Techniques.** 3 credits.
Introduces basic time series methods, especially those used in detecting trends and randomness in time series data. Various data related to global changes on different temporal and spatial scales will be identified, and the relevant analysis methods will be used to those data so that students can detect or confirm changing trends or lack of them in data. Other topics such as data formats, data visualization, and data mining may also be included based on the background of the student body. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** IT 103, STAT 250, or permission of instructor

**Schedule Type:** Lecture

**GGS 357: Structures in Urban Governance and Planning.** 3 credits.
Reviews spatial, policy, and administration principles that guide planning activity in United States. Outlines differences between theory and practice; and provides tools, methods, and perspectives commonly incorporated into practice of urban and regional policy analysis. Provides orientation to public-sector economy in general; and urban administration, planning, and policy in particular. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** 30 credits

**Schedule Type:** Lecture

**GGS 380: Geography of Virginia.** 3 credits.
Natural and cultural forces of Virginia. Studies regional makeup and analysis of human and environmental characteristics. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** 30 credits

**Schedule Type:** Lecture

**GGS 384: Special Topics in Geospatial Intelligence.** 3 credits.
Selected topics concerning human activity on earth derived from the exploitation and analysis of imagery and geospatial information that describes, assesses, and visually depicts physical features and geographically referenced activities on the Earth. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the term.

**Schedule Type:** Lecture

**GGS 398: Selected Topics in Global Change.** 3 credits.
Covers selected topics in global change not covered in fixed-content global change courses. Notes: Content varies and is determined by instructor. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the term.

**Recommended Prerequisite:** 30 credits or permission of instructor.

**Schedule Type:** Lecture

**GGS 399: Select Topics in GGS.** 3 credits.
Content varies; determined by instructor. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the term for a maximum 12 credits.

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** 30 credits.

**Schedule Type:** Lecture
400 Level Courses

GGS 410: Introduction to Hyperspectral Imaging. 3 credits.
Introduction to quantitative measurements by remote-sensing methods covering quantitative spectroscopy, spectral and thermal signatures, atmospheric physics, and the electromagnetic spectrum. Emphasis on the scientific principles involved and the transition of the technology to real-world applications. The requisite materials to begin to understand hyperspectral imaging (HSI) technology and its many civil and military applications are presented. Covers necessary mathematics used in the analysis of n-dimensional data. Topics include hyperspectral concepts, data collection systems, data processing techniques, case studies, and U.S. national policy issues. Data processing techniques include N-dimensional space, scatterplots, spectral angle mapping, spectral mixture analysis, spectral matching, and other techniques. Applications and case studies include environmental, medical, agricultural, and military. Includes ground, airborne, and spaceborne hyperspectral systems. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: PHYS 243-244, 245-246, MATH 113 and 114, GGS 353, GGS 416 or permission of instructor.

Schedule Type: Lecture

GGS 411: Advanced Digital Cartography. 3 credits.
This advanced course in cartography focuses on thematic map design. The objective is to produce a cartographic portfolio of well-designed, professional grade maps. Theoretical concepts and principles will be introduced using practical examples and written assignments. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: GGS 311.

Registration Restrictions:
Required Prerequisite: GGS 310C.
C Requires minimum grade of C.

Schedule Type: Lecture

GGS 412: Air Photography Interpretation. 3 credits.
Methods and techniques of interpreting and using information contained in aerial photography, including applications to various aspects of physical and cultural landscape. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: 60 credits and GGS 102 or 103, or permission of instructor.

Schedule Type: Lecture

GGS 415: Seminar in Geography. 3 credits.
Students produce, present original research papers. Notes: Capstone seminar for geography majors integrating previous course work into disciplinary framework. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: GGS 300 and 310

Schedule Type: Lecture

GGS 416: Satellite Image Analysis. 3 credits.
Examines methods and techniques of interpreting and using information obtained by non-photographic remote sensing systems, with particular emphasis on space-borne platforms. Includes analysis of imagery for both physical and cultural environments. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: 60 credits and GGS 412, or permission of instructor.

Schedule Type: Lecture

GGS 455: Environmental Impact Assessment. 3 credits.
Evaluates current methods and practices for conducting and planning environmental assessments to include techniques and requirements for assessing impacts on air, water, natural resources, transportation, water facilities, and industrial and community development. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: GGS 122, GGG 302, or EVPP 377 or 6 hours of courses in ecology and environmental sciences, or permission of instructor.

Schedule Type: Lecture

GGS 456: Introduction to Atmospheric Radiation. 3 credits.
Helps students learn about the fundamental aspects of atmospheric radiation. The goal is to understand their essential roles in advanced remote sensing, atmospheric sciences and global and environmental change. It will provide a foundation for and will be beneficial to students in taking advanced courses in those areas. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to CLIM 456.

Recommended Prerequisite: GGS 353/GGS 309 and a course in physics, or permission of instructor.

Schedule Type: Lecture

GGS 462: Web Mapping. 3 credits.
Managing geospatial data is at the core of an emerging Billion-Dollar industry. This course will provide the students with the knowledge to manage and query geospatial data using relational database management systems and how to build Javascript-based Web mapping applications on top of a database to communicate and interact with the data. Students who take GGS 462 cannot receive credit for GGS 692. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: GGS 311.

Schedule Type: Lecture

GGS 463: Applied Geographic Information Systems. 3 credits.
Selected applications in geographic information systems (GIS). Topics include automated data capturing and processing, spatial data models and structure including object-oriented approach, advanced spatial analytical techniques including raster modeling and network analysis, programming, and algorithm development in GIS. Major purpose of course is to extend fundamental theories and concepts in GIS so students are able to conduct research with and on GIS. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (GGS 300C, L300 or 300T) and (GGS 311C, 311T or L311).
Registration Restrictions:

May not be repeated for credit.

Schedule Type: Lecture

GGS 470: Special Topics in Geographic Techniques. 3 credits.
Content varies in the subject of Geographic Techniques. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the term for a maximum 12 credits.

Recommended Prerequisite: GGS 110.

Schedule Type: Lecture

GGS 480: GGS Internship. 1-3 credits.
Approved study programs with specific employers. Notes: Credit determined by department. Contact department one semester before enrollment. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Open only to authorized GGS majors with 90 credits and GPA of 2.50 or higher in GGS courses.

Schedule Type: Independent Study

GGS 490: Practicum in Geographical Applications. 1-3 credits.
Application of geographical research tools and techniques in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Authorized GGS majors with 90 credits.

Schedule Type: Independent Study

GGS 495: GGS Senior Research Project. 3 credits.
Applications of research tools and techniques on specific GGS topics, in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: 90 credit hours, authorized major.

Schedule Type: Research

GGS 499: GGS Independent Study. 1-3 credits.
Individual study of selected area of geography. Notes: Requires directed research paper. May be repeated with permission of the department. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Open only to authorized GGS majors with 90 credits and GPA of 2.50 or higher.

Schedule Type: Independent Study

500 Level Courses

GGS 501: Geography and Geoinformation Science Distance Education Orientation. 1 credit.
Describes study structure and basic expectations (in terms of time commitment, expectations, technical issues and communication) for distance education courses in the Geography and Geoinformation Science department. Notes: The course is self-paced, enabling students to proceed at their own speed. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 505: Transportation Geography. 3 credits.
Structure, principles, location, and development of world transportation. Critical role of transportation in moving people, goods, and ideas at international, national, regional, and urban levels. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: 6 credits of geography

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 507: Sustainable Development. 3 credits.
Sustainability lies at the intersection of the environment, society and economics. This course explores the concepts, applications, and tools for analysis and decision making in support of environmentally sustainable, socially responsible and economically prosperous development. Case studies and problem-solving exercises will stimulate learning and provide practical experience in addressing sustainable development issues. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: GGS 470.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 520: Geography for Teachers. 3 credits.
Emphasizes problems and techniques in teaching geography; and current developments in research, methodology, and philosophy in the discipline. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: GGS 470 and GGS 495.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
GGS 524: Introduction to Environmental and Resource Economics. 3 credits.

Recommended Prerequisite: Basic algebra skills.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 525: Economics of Human/Environment Interactions. 3 credits.
Advanced topics in environmental, natural resource, and ecological economics for noneconomist. Emphasizes sustainability, intergenerational equity, and economic-ecological feedbacks. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to ECON 895, EVPP 525.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: EVPP 524/GGS 524 or equivalent

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 531: Land-Use Modeling Techniques and Applications. 3 credits.
Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques covered include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to EVPP 531.

Recommended Prerequisite: GGS 550, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 533: Issues in Regional Geography. 1-6 credits.
Geographical study of particular region or relevant regional issue. Notes: Content varies. May be repeated with permission of the department.

Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the term for a maximum 12 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 540: Health Geography. 3 credits.
Spatial approaches to study of health and disease. Topics include disease ecology and diffusion, and geographic perspectives on improving health care delivery. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: Course in statistics.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 550: Geospatial Science Fundamentals. 3 credits.
Introduces geospatial sciences, emphasizing concepts and theories of cartography, remote sensing, air photo interpretation, Global Positioning Systems, spatial data structures, and geographic information systems. Lectures accompanied by hands-on exercises. Notes: Only available for students without previous course work in cartography. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: Course in statistics.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 551: Thematic Cartography. 3 credits.
Analyzes nature of perceptual organization and visual systems in thematic map communication portrayal, graphic handling, and data analysis. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: GGS 310 or 550

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 553: Geographic Information Systems.** 3 credits.
Sources of digital geospatial data; and methods of input, storage, display, and processing of spatial data for geographic analysis using GIS. Lectures, hands-on exercises familiarize students with current technology. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** GGS 550 or equivalent, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 554: History of Cartography.** 3 credits.
History of cartographic portrayal of Earth from ancient times through 19th century, emphasizing interrelation of human culture, technological development, and geographical knowledge as reflected in maps. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 560: Quantitative Methods.** 3 credits.
Survey of quantitative methods commonly used in geographic research. Emphasizes spatial analysis techniques. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** Previous course work in statistics, or GGS 310 or 550.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 562: Photogrammetry.** 3 credits.
Treatment of photogrammetric problems, including least squares adjustments, image coordination refinements, collinearity equation, resection, relative orientation, and analytic aerotriangulation. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** GGS 412, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 563: Advanced Geographic Information Systems.** 3 credits.
Discusses advanced GIS concepts including spatial data structure, spatial analysis, programming data fusion, Internet components, and spatial database management. Hands-on activities demonstrate concepts and specific applications in both cultural and physical geography. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** GGS 553 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 579: Remote Sensing.** 3 credits.
Examines use of various types and combinations of electromagnetic energy to obtain spatial information. Concentrates on nonphotographic and spaceborne remote sensing platforms and sensors. Examines essential operational parameters for existing and future systems and strategies for visual extraction of features. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** GGS 412, or GGS 550, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 581: World Food and Population.** 3 credits.
Topics include maldistribution of population, regional disparities in growth rates and income distribution, food production, and world hunger. Discusses population policies, with emphasis on Third World countries. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 590: Selected Topics in Geography. 1-3 credits.
Analyzes topics of immediate interest. Notes: Content varies. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the term for a maximum 12 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses

GGS 605: Systematic Applications of GIS. 3 credits.
Provides those working with spatially referenced data the technical skills to use GIS to conduct spatial analyses on socioeconomic phenomena related to labor, retail, and real estate markets. Introduces and emphasizes the development of technical and methodological skills to understand the potential and the pitfalls of using GIS for spatial analyses of socioeconomic phenomena. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the term.

Recommended Prerequisite: GGS 553

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 631: Spatial Agent-Based Models of Human-Environment Interactions. 3 credits.
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hands-on development of simple ABM models and investigation of linkages between GIS and ABM. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to EVPP 631.

Recommended Prerequisite: GGS 531 or CSS 600, or permission or instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 644: Fundamentals and Interpretation of Imaging Radar. 3 credits.
Provides understanding of components, functionality, and use of radar remote sensing for acquiring spatial information. Concentrates on operational systems. Includes hands-on assignments. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: GGS 579, or other basic course in remote sensing.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 650: Introduction to GIS Algorithms and Programming. 3 credits.
Introduction to programming methods and their application to Geographic Information Systems, including the fundamentals of object-oriented programming and GIS-specific data structures and algorithms. Employs an object-oriented language such as Visual Basic.Net, and existing freeware and commercial GIS libraries. Topics covered include variables, arrays, control structures, objects and classes, raster and vector data structures, spatial algorithms, and spatial indexing methods. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: GGS 553 or equivalent introductory GIS course, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 653: Geographic Information Analysis. 3 credits.
Explores existing and potential capabilities of geographic information systems in conducting spatial analysis and modeling. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: GGS 553 and 560

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 655: Map Design.** 3 credits.
Advanced examination of principles of map design, including discussions of map design research. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** GGS 310 or 550.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 656: The Hydrosphere.** 3 credits.
Covers components and transfer processes in hydrosphere, which consists of aqueous envelope of Earth including oceans, lakes, rivers, snow, ice, glaciers, soil moisture, ground water, and atmospheric water vapor. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to EVPP 652.

**Recommended Prerequisite:** Two semesters of calculus, partial differential equation recommended; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 657: The Lithosphere.** 3 credits.
Global-scale overview of lithosphere; the solid nonliving Earth, its materials, cycles, plate tectonic and geomorphic processes; and history, including interactions with and history of hydrosphere, atmosphere and biosphere, and methods of analysis. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to GEOL 601.

**Recommended Prerequisite:**

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 658: Terrain Mapping.** 3 credits.
Covers fundamental methods of digitally representing terrain data, major technologies, and programs for generating terrain data; methods for quantifying terrain error and assessing terrain data quality; and a variety of applications. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:**

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 660: Automated Cartography.** 3 credits.
Survey of algorithms and techniques to generalize information on maps and in geographic information systems. Covers simplified representation of geographic objects, surfaces, and thematic information. Includes GIS programming component. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** GGS 650 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 661: Map Projections and Coordinate Systems.** 3 credits.
Covers development of various map projections and coordinate systems, property analysis, distortions, and applications. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:**

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 664: Spatial Data Structures.** 3 credits.
Studies spatial data structures and their application in digital cartography, geographic information systems, and image-processing systems. Examines raster and vector data structures, and attribution schemes and topological models. Includes data transformation, information loss, data quality, and the role of metadata. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** B or better in GGS 560.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 670: Introduction to Atmosphere and Weather. 3 credits.
Applies climatic concepts to natural and human-modified environments, and analyzes climatic change. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 671: Algorithms and Modeling in GIS. 3 credits.
Examines several fundamental GIS algorithms based upon computational geometry and computer graphics. Also discusses issues in modeling features of different dimensions and surfaces in GIS. Significant programming expected. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: B or better of GGS 560.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 674: Environmental Impact Analysis. 3 credits.
Scientific and administrative processes involved in environmental impact analysis and environmental impact statements. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 675: Location Science. 3 credits.
This course presents the theory and practice of Location Science - the study of the optimal or near optimal spatial location or allocation of facilities, routes, personnel, or other assets. A variety of algorithms and heuristics for location problems is presented. Lectures and both in-class and take-home exercises reinforce students' mastery of the techniques and understanding of advanced theoretical issues. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 680: Social Media Analysis. 3 credits.
The course covers theory, principles, and analytical techniques in geospatial analysis of social media, including data collection, location-based and cyberspace social network analysis, content analysis, and geovisualization of such data. Examples of applications in various domains are used to demonstrate and explore the use of social media analysis. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: GGS 550 or GGS 553 or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 684: Selected Topics in Geospatial Intelligence. 3 credits.
Covers topics relevant to geospatial intelligence, especially addressing emerging trends, focused intelligence applications, and relevant technological advances, not covered by existing courses. Sample topics addressed in this course include geosensor networks, landmine detection using remote sensing techniques, the use of unmanned aerial vehicles in geospatial intelligence, and the use of virtual reality techniques
for geospatial information modeling and analyst training. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** Students must be admitted to the Geospatial Intelligence Certificate program or have permission from the program’s academic director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 685:** Capstone Course in Geoinformatics. 3 credits.
This course is intended to provide a capstone experience for graduate students by synthesizing knowledge and experience that they acquired in earlier coursework to address a complex geospatial intelligence problem. The course requires analytical, collaborative, and communication skills. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** 12 credits in the geospatial intelligence certificate program or permission of program coordinator.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 689:** Seminar in Geographic Thought and Methodology. 3 credits.
Includes historical development of geographic thought and current philosophy of geography; rationale for various subfields; and geographic research techniques and methods of analysis. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** GGS 560

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GGS 692:** Web-based Geographic Information Systems. 3 credits.
Management of geospatial data by means of a database system. Communication of geospatial data over the Internet using browser-based interfaces. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** GGS 550 or equivalent, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GGS 695:** Geography and Geoinformation Science Graduate Internship. 1-6 credits.
Approved study programs with specific employers. Students and employer supervisors must demonstrate relevancy of study program to degree requirements. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**GGS 698:** Directed Readings and Research. 1-3 credits.
Reading and research on specific topic under direction of faculty member. Notes: Written report required; oral exam and report may be required. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the term for a maximum 12 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**700 Level Courses**

**GGS 700:** Comprehensive Exam. 1 credit.
Preparation and completion for the comprehensive exam within the GGS department. Instructor should be the chair of the examination committee. The exam committee will specify exam content. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 12 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**GGS 704:** Spatial Demography. 3 credits.
Intermediate-level, population geography course discussing demographic concepts and spatial dimensions of population. Features various indices,
measures, and models commonly used in human geography. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** Prior courses in quantitative methods and GIS recommended.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**GGS 721: Biogeography.** 3 credits.
Provides broad understanding of how physical geography and environment influence spatial and temporal distribution of plants and animals on Earth’s surface. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** Courses in ecology, chemistry, and geology.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**GGS 740: Hyperspectral Imaging Systems.** 3 credits.
Provides requisite materials to understand hyperspectral imaging technology and its many civilian and military applications. Emphasizes scientific principles involved and technology application to real-world imaging systems. Topics include hyperspectral concepts and system tradeoffs; data collection systems; calibration techniques; data processing techniques and software; classification methods; and case studies. Data processing techniques include N-dimensional space, scatterplots, spectral angle mapping, spectral mixture analysis, spectral matching, and mixture tuned matched filtering. Discusses ground, airborne, and spaceborne hyperspectral remote sensing systems. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** CSI 660 or equivalent, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**GGS 754: Earth Science Data and Advanced Data Analysis.** 3 credits.
Covers accessing and applying Earth observations and remote-sensing data for Earth system science research and applications. Major topics are data formats, analysis and visualization tools, advanced data analysis methods, and data applications. Also covers combining innovative information technology techniques and Earth science data to set up online data centers for accessing data through the web. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to CSI 754.

**Recommended Prerequisite:** GGS 579 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**GGS 756: Physical Principles of Remote Sensing.** 3 credits.
Emphasizes fundamental physical and mathematical principles of remote sensing. Also provides overview of the current Earth Observation System as well as the National Polar-Orbiting Operational Environmental Satellite Systems (NPOESS), and NPOESS Preparatory Project missions. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** GGS 753 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**GGS 759: Topics in Earth Systems Science.** 1-6 credits.
Covers selected topics in Earth systems and global changes not covered in fixed-content Earth systems and global changes courses. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**GGS 760: Advanced Topics in Remote Sensing.** 3 credits.
Content varies in the area of remote sensing. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:** GGS 579 or GGS 680.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**GGS 772: Cloud Geographic Information Systems.** 3 credits.
Examines different aspects of science and technology in the context of distributed GIS. Includes general concepts, architecture, component design and development, and system integration as well as other advanced topics, including interoperability and agent-based GIS. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

**Recommended Prerequisite:** Introductory course in GIS and some programming experience, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
GGS 787: Scientific Data Mining for Geoinformatics. 3 credits.
Covers specialized data mining algorithms, geoscience data models, and data information systems. Emphasis on domain-specific data mining algorithms suitable for spatial data and spatio-temporal data with geoscience and geoinformatics applications. Introduces real geoscience data mining applications in detailed applications. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: Competency in programming at the level of CSI 601-607 or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GGS 792: Seminar in Earth Systems Science. 2 credits.
Capstone experience. Seminars presented by faculty and students. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to EVPP 792.

Recommended Prerequisite: 15 Graduate Credits including CSI 655, GGS 656, and GGS 657, or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GGS 795: Seminar in Regional Analysis. 3 credits.
Analyzes and synthesizes physical and cultural elements of geography in selected region. Should be taken near end of master's degree program. Provides opportunity to apply selective knowledge gained in previous systematic courses to specific region. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit.

Recommended Prerequisite: Admission to Earth Systems Science MS program, 12 graduate credits, and permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GGS 798: Research Project in Earth Systems Science. 1-6 credits.
Reading project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report. Notes: For students enrolled in Earth Systems Science master's program. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to Earth Systems Science MS program, 12 graduate credits, and permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GGS 799: Thesis. 1-6 credits.
Degree candidacy and departmental approval of thesis proposal. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Degree candidacy and departmental approval of thesis proposal.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

800 Level Courses

GGS 840: Hyperspectral Imaging Applications. 3 credits.
Introduces advanced hyperspectral imaging and multisensor concepts with emphasis on real-world civilian and military applications. Topics include advanced hyperspectral concepts, multisystem tradeoffs, data collection and processing systems, imaging radar systems, laser
systems, calibration techniques, data fusion, quantitative remote sensing techniques, data compression techniques, case studies, and U.S. national policy. Applications and case studies include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation. Offered by Geography/Geoinformation Sci (p. 687). May not be repeated for credit. Equivalent to CSI 854.

Recommended Prerequisite: CSI 660 or equivalent, or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Lecture

900 Level Courses

GGS 900: Geography and Geoinformation Science Colloquium. 1 credit. Presentations in specific research areas of Geography and Geoinformation sciences by faculty and staff, Mason faculty in related programs, and professional visitors. Notes: Maximum 3 credits may be applied to Earth systems and geoinformation sciences PhD. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Doctoral student or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Seminar

GGS 998: Dissertation Proposal. 1-12 credits. Covers development of research proposal that forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee. Notes: May be repeated, but no more than 12 credits of GGS 998 may satisfy doctoral degree requirements. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Doctoral student or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

GGS 999: Dissertation. 1-12 credits. Doctoral dissertation research under direction of dissertation advisor. Notes: May be repeated, but no more than total 24 credits in GGS 998 and 999 may be applied to doctoral degree. Offered by Geography/Geoinformation Sci (p. 687). May be repeated within the degree for a maximum 24 credits.

Recommended Prerequisite: Doctoral student or permission of instructor.

Registration Restrictions: Enrollment is limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Geology (GEOL)

100 Level Courses

GEOL 101: Introductory Geology I. 4 credits. Covers Earth, processes that operate within Earth and on surface, and human interaction with Earth. Topics include minerals, earthquakes and seismology, isostasy, igneous processes and rocks, paleomagnetism and plate tectonics, weathering, mass movements, rivers and streams, groundwater, glaciers, and marine processes. Notes: May include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Mason Core: Natural Science with Lab, Encore:Sustainability (p. 135)

Specialized Designation: Green Leaf Course

Schedule Type: Lecture

GEOL 102: Introductory Geology II. 4 credits. Earth processes in historical context. Topics include sedimentary rocks and principles, deformation and metamorphism, mountain building and plate tectonics, geologic time, fossils, and historical development of continents. Notes: May include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Mason Core: Natural Science with Lab, Encore:Sustainability (p. 135)

Specialized Designation: Green Leaf Course

Recommended Prerequisite: GEOL 101.

Schedule Type: Laboratory, Lecture

GEOL 134: Evolution and Extinction. 3 credits. Evolution and Extinction is a science class for non-science majors that explores how diversity of animals and plants has changed through geologic time, when mass extinctions occurred, when major diversifications of life occurred, and how the position of continents on the surface of the earth influenced the evolution, extinction, and distribution of life, landforms and the atmosphere. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Mason Core: Natural Science Overview, Encore:Sustainability (p. 135)

Specialized Designation: Green Leaf Course

Schedule Type: Lecture

200 Level Courses

GEOL 206: Topics in Geology I. 1-3 credits. Discusses particular topic in geology. Notes: May include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the term for a maximum 6 credits.

Schedule Type: Lecture

300 Level Courses

GEOL 302: Mineralogy. 4 credits. Crystallographic, optical, chemical, and physical properties of minerals. Notes: May include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Specialized Designation: Discovery of Scholarship

Recommended Prerequisite: GEOL 101 and 102 with a grade of 2.0 or better and CHEM 211.

Schedule Type: Laboratory, Lecture

GEOL 303: Field Mapping Techniques. 3 credits. Basic techniques for collecting, recording, and plotting spatial field data including use of topographic maps, compasses, transit, alidade, and
global positioning systems (GPS). Designated a Green Leaf Course. Notes: Includes field work. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Specialized Designation: Green Leaf Course, Scholarly Inquiry

Recommended Prerequisite: Two of the following lab sciences courses are required for a total of 8 credits: [GEOL 101 or 102], [EVPP 110 or 111 or 210], CHEM 211, [BIOL 103 or 213], [PHYS 160 and 161 or 243 and 244].

Schedule Type: Lecture

GEOL 312: Invertebrate Paleontology. 4 credits. Classification, evolutionary trends, and distribution of common invertebrate fossils. Notes: May include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to BIOL 336.

Recommended Prerequisite: GEOL 101 and GEOL 102, or BIOL 103, 104, or BIOL 213, 303, 304.

Schedule Type: Laboratory, Lecture

Specialized Designation: Green Leaf Course

Recommended Prerequisite: GEOL 101 or GGS 102, MATH 113 and CHEM 211.

Schedule Type: Lecture

GEOL 315: Topics in Geology II. 1-3 credits. Discusses particular topic in geology. Notes: May include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the term for a maximum 12 credits.

Recommended Prerequisite: GEOL 101 or GEOL 102 or permission of instructor.

Schedule Type: Lecture

GEOL 316: Computers in Geology. 3 credits. Uses of mainframe and microcomputers, with emphasis on geologic applications. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: GEOL 101, 102, 302, one semester of mathematics, or permission of instructor.

Schedule Type: Lecture

GEOL 317: Geomorphology. 4 credits. Analyzes processes that occur at Earth's surface and resulting landforms. Labs stress recognition and evaluation of landforms using maps and aerial photographs, and methods of data collection used in study of surficial geology. Notes: May include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: GEOL 101, 102, or 6 credits of GGS, including GGS 102; GGS 412 is strongly recommended.
GEOL 320: Geology of Earth Resources. 3 credits.
A survey of earth resources, including metallic and non-metallic ore deposits, mineral resources, precious gems, sand and gravel, water, and air. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** GEOL 101, GEOL 102, GEOL 302. GEOL 305 strongly suggested.

**Schedule Type:** Lecture

GEOL 321: Geology of Energy Resources. 3 credits.
A survey of energy resources, including fossil fuels, renewable, nuclear and unconventional sources. Emphasis on origin, use and implications of development. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** GEOL 101 or GEOL 102, and completion of all Mason Core science requirements.

**Schedule Type:** Lecture

GEOL 332: Paleoclimate. 3 credits.
Explores the natural evolution of Earth's climate with the goal of providing a baseline for understanding present climate variability and future trends through increased knowledge of the physical, chemical, and biological processes that influence climate over the long-term. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** GEOL 101 or GEOL 102, and GEOL 302. GEOL 305 strongly suggested.

**Schedule Type:** Seminar

GEOL 334: Vertebrate Paleontology. 4 credits.
Vertebrate Paleontology explores the evolution of vertebrates from the early Paleozoic to Recent. The course will cover the systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions will include fishes, early tetrapods & amniotes, dinosaurs, birds and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts. A weekend field trip is included. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to BIOL 334.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** GEOL 102 or BIOL 103 or EVPP 110.

**Schedule Type:** Lecture

GEOL 363: Coastal Morphology and Processes. 4 credits.
Studies global coastal geomorphology and processes with emphasis on U.S. Atlantic and Gulf coasts. Topics include plate tectonics, sea level changes, sediment supply, waves, tides, storm impacts, and human activities. Lecture and extended weekend field trips to mid-Atlantic coast. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to EVPP 363.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** GEOL 309 or BIOL 309 or GEOL 317 or 9 credit hours in Geography including GGS 309.

**Schedule Type:** Laboratory, Lecture

GEOL 364: Marine Geology. 3 credits.
This course will present a global overview of the geologic origin and composition of the ocean seafloor, and an introduction to the basic principles of the geologic processes occurring in the marine environment. Primary topics include geologic, tectonic and sedimentary characteristics of the deep ocean basins and continental margins; transport and deposition of marine sediments; micropaleontology and paleoceanography; geochemistry and hydrothermal systems; and marine mineral resources. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** GEOL 101, GEOL 102, GEOL 302, and CHEM 211.

**Schedule Type:** Laboratory, Lecture

GEOL 392: Geology and Earth Science Seminar. 1 credit.
Undergraduate experience that includes discussion of scientific articles and attending seminars presented by outside experts, faculty, or students. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 4 credits.

**Recommended Prerequisite:** 30 credit hours.

**Schedule Type:** Seminar

### 400 Level Courses

GEOL 401: Structural Geology. 4 credits.
Igneous, sedimentary, and metamorphic rocks in folded, faulted, and metamorphosed terrains. Notes: May include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** GEOL 302, GEOL 317 (grade of C or better in both), and GEOL 304, or GEOL 308 (grade of C or better); MATH 110, MATH 111, or MATH 113. PHYS 160 or PHYS 243 is highly recommended.

**Schedule Type:** Laboratory, Lecture

GEOL 402: Geological Development of North America. 3 credits.

**Recommended Prerequisite:** GEOL 101, 102, 302, 304, 308 and 401.

**Schedule Type:** Lecture

GEOL 403: Geochemistry. 3 credits.
Includes stable isotope, crystal, water, and organic geochemistry; geochronology; and geochemistry of rocks. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** GEOL 101 and 102, and CHEM 211.

**Schedule Type:** Lecture
GEOL 404: Geological Field Techniques. 1-6 credits.
Mapping techniques involved in collecting geological field data. Notes: Includes field work. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: GEOL 101, 102, 302, 304, 308, and 401.

Schedule Type: Laboratory

GEOL 405: Advanced Seminar in Earth Resources. 3 credits.
Analyzes current issues involving renewable and non-renewable earth resources with consideration of the economic, political, social and aesthetic significance of these resources and their utilization. Taught seminar style examining case-studies, with emphasis on discussion, reading, writing and student oral presentations. Notes: May include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: GEOL 101 and 102 and GEOL 302, 304 and 308 OR GEOL 305, 320 and 321 and completion of Mason Core requirements.

Schedule Type: Lecture

GEOL 406: Seminar in Earth and Environmental Science. 3 credits.
Students read, discuss research literature; produce, present original papers. Notes: Capstone seminar for Earth and environmental science majors. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: 90 credits.

Schedule Type: Seminar

GEOL 408: Practicum for Geology Laboratories. 1 credit.
Studies techniques to make geology lab effective component in geological education. Discusses developing testing materials, supplemented by experience operating geology course lab section. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Corequisite: Open only to GEOL/ESS majors with 80 credit hours and permission of Chair.

Schedule Type: Internship

GEOL 409: Practicum for Geology Laboratories. 1 credit.
Studies techniques to make geology lab effective component in geological education. Discusses developing testing materials, supplemented by experience operating geology course lab section. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: Open only to GEOL/ESS majors with 80 credit hours and permission of Chair.

Schedule Type: Internship

GEOL 410: Research Proposal Preparation. 1 credit.
Subcontract with research in GEOL 411. Includes literature research, initial data collection, and preparing research proposal. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: Geology or Earth Science major with 90 credits, cumulative GPA of 2.80 or higher, and permission of the Geology undergraduate coordinator.

Schedule Type: Research

GEOL 411: Geological Research. 3 credits.

Recommended Prerequisite: GEOL 410.

Schedule Type: Research

GEOL 412: Physical Oceanography. 3 credits.
Course describes the global patterns of temperature, salinity, currents and waves in the world's oceans, and how these patterns influence marine biota, climate, and human activity. Course introduces key concepts which explain physical features of the ocean ranging from microscopic turbulence to global circulation. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to CLIM 412.

Recommended Prerequisite: MATH 113 or MATH 115, and PHYS 160 or PHYS 243, or permission of instructor.

Schedule Type: Lecture

GEOL 417: Geophysics. 3 credits.
Basic principles of geophysics including gravity, magnetism, and seismic reflection and refraction. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to PHYS 417.

Recommended Prerequisite: GEOL 101, MATH 113, one year of PHYS or permission of instructor.

Schedule Type: Lecture

GEOL 420: Earth Science and Policy. 3 credits.
Discusses Earth science issues that have policy implications. Course uses a broad definition of Earth science, from atmosphere to geosphere. Taught seminar-style, with emphasis on discussion, reading, writing, critical analysis, and student oral presentations. Notes: Course may include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Mason Core: Encore:Sustainability, Synthesis (p. 135)

Specialized Designation: Green Leaf Course

Recommended Prerequisite: 18 credit hours in major or minor (geology, Earth science, ocean and estuarine science, or global and environmental change), and one of the following social science based courses: EVPP 361; ECON 103; ANTH 114; GGS 103; GLOA 101; GOVT 132 or 133; HIST 125 or 130; or SOCI 101, 102, or 120.

Recommended Corequisite: All other required Mason Core courses.

Schedule Type: Seminar

GEOL 458: Chemical Oceanography. 3 credits.
The world's oceans, including a variety of closed basins and estuaries, comprise a complex and dynamic system of chemical processes that interact with biological, geological, physical, and atmospheric processes to play a significant role in defining the earth's fragile environment. This
course will present an overview of the origin, occurrence, and distribution of the chemical components in sea water and an introduction to the basic principals of the chemical processes taking place in the marine environment. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to CHEM 458.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** CHEM 211 and CHEM 212, and CHEM 321 or GEOL 302.

**Schedule Type:** Lecture

**GEOL 480:** Internship. 1-3 credits.
Approved study programs with specific employers. Notes: Contact department one semester before enrollment. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Corequisite:** Open only to authorized majors with 90 credit.

**Schedule Type:** Internship

**500 Level Courses**

**GEOL 500:** Selected Topics in Modern Geology. 1-3 credits.
Topic designated in class schedule. Notes: Lecture, lab, field trip. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree.

**Recommended Prerequisite:** Baccalaureate degree in geology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GEOL 501:** Selected Topics in Modern Geology. 1-3 credits.
Topic designated in class schedule. Lecture, lab, field trip. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree.

**Recommended Prerequisite:** Baccalaureate degree in geology or Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GEOL 503:** Special Topics in Earth Science. 1-6 credits.
In-service course to strengthen and update knowledge of Earth science. Notes: May include field trips. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree.

**Recommended Prerequisite:** Employment or anticipated employment as an Earth Science teacher.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GEOL 506:** Soil Science. 3 credits.
Explores the composition, classification, physical properties, and origin of soils. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to EVPP 503.

**Recommended Prerequisite:** Previous lab-science courses in each of the following: geology and chemistry (8 credit hours); or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

**Schedule Type:** Lecture

**GEOL 513:** Hydrogeology. 3 credits.

**Recommended Prerequisite:** Previous lab-science courses in each of the following: geology, calculus, and chemistry (12 credit hours); or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GEOL 521:** Geology of Energy Resources. 3 credits.
Survey of global non-renewable and renewable energy resources. Topics include petroleum, natural gas, coal, nuclear, geothermal, solar, wind, and hydro power, and biofuels. Course discusses global production, usage, impacts and future prospects of these resources, and data capture, analysis and modeling of finite resources. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.
**Recommended Prerequisite:** GEOL 101 or GEOL 102, and completion of all Mason Core Natural Science requirements or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GEOL 525: Modeling Earth Signals and Systems.** 3 credits.
Provides instruction on time series analysis customized for Earth signals and systems such as climate, Earth-space orientation, earthquakes, geomagnetism, river flow, tides and many other timedependent phenomena. Concepts including linear systems, filtering, spectrum estimation, harmonic analysis and hypothesis testing are applied to time series data sampled from natural processes to address a variety of scientific problems. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** MATH 114 and STAT 250 or equivalent or permission of instructor.

**Schedule Type:** Lecture

**GEOL 532: Paleoclimatology.** 3 credits.
Explores the natural evolution of Earth’s climate with the goal of providing a baseline for understanding present climate variability and future trends through increase knowledge of the physical, chemical, and biological processes that influence climate over the long-term. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** Previous lab-science courses in geology and/or atmospheric science and/or oceanography (12 credit hours); or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GEOL 534: Vertebrate Paleontology.** 4 credits.
Explores the evolution of vertebrates from the early Paleozoic to Recent. Covers systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions include fishes, early tetrapods and amniotes, dinosaurs, birds, and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts. Notes: A weekend field trip is included. Students who have taken GEOL 334 as an undergraduate may not take 534 as a graduate student. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate degree in biology or geology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**GEOL 535: Quantitative Stratigraphy.** 3 credits.
Quantitative stratigraphy is a branch of geology that applies statistics to reconstruct the time sequence of geological events recorded in sedimentary strata. Methods of interpolation and error analysis used for defining stratigraphic boundaries and events, time scale estimation using integrated chronostratigraphy, and intercalibration are examined. Students receive advanced training in graphic correlation, constrained optimization, ranking and scaling, and dynamic programming. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

**Recommended Prerequisite:** MATH 114 and STAT 250 or equivalent or permission of instructor.

**Schedule Type:** Lecture

**GEOL 536: Paleontology Seminar.** 1-2 credits.
Paleontology Seminar presents topical research in paleontology and paleobiology in a structured discussion among graduate students and paleontology faculty. A theme for the seminar is chosen each semester the course is offered, tailored to the interests of the students. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 12 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GEOL 553: Field Mapping Techniques.** 3 credits.
Explores basic techniques for collecting, recording, and plotting spatial field data, including topographic maps, compass, transit, alidade, and global positioning systems. Field work and field based research project. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to EVPP 503.

**Recommended Prerequisite:** Previous courses in geometry or trigonometry or equivalent; and environmental science, geography, or geology or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory
GEOL 563: Coastal Morphology and Processes. 4 credits.
Investigates global coastal geomorphology and processes, with emphasis on U.S. Atlantic and Gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impacts of waves, tides, storms; and human activities. Lecture and extended weekend field trips to U.S. mid-Atlantic coast. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to EVPP 563.

Recommended Prerequisite: Previous courses in geology, oceanography marine science, earth science, or physical geography; or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GEOL 565: Paleoceanography. 3 credits.
Investigates ocean evolution through geologic time. Earth’s sediment archive provides proxy data on paleo-ocean chemistry, biology, geology, and physical properties. Class examines proxy reconstructions of oceanic conditions such as circulation, salinity, stratification, anoxia, and biogeochemistry. Discusses the history of ocean basins, with case studies from Precambrian to Holocene. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit.

Recommended Prerequisite: Previous course in oceanography or marine science and 16 credits of geology or earth science courses, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses

GEOL 601: The Lithosphere. 3 credits.
Global-scale overview of lithosphere, solid non-living Earth, materials, cycles, plate tectonic and geomorphic processes; and history, including interactions with and history of hydrosphere, atmosphere and biosphere, and methods of analysis. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May not be repeated for credit. Equivalent to GGS 657.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

700 Level Courses

GEOL 700: Comprehensive Exam. 1 credit.
Preparation for and completion of written comprehensive exam within AOES department. The comprehensive exam is given as part of the degree requirements in lieu of writing a master's thesis. Instructor should be the chair of the examination committee. The exam committee will specify exam content. Notes: No more than 1 credit of GEOL 700 may be applied toward the master's degree. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 2 credits.

Recommended Prerequisite: At least 15 graduate credits, approved project proposal, and permission of major advisor or chair of the examination committee.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

GEOL 792: Seminar in Earth Systems Science, Geology, & Earth Science. 1 credit.
Capstone experience that includes discussion of scientific articles and attending seminars. Seminars presented by outside experts, faculty, and students. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: 15 Graduate Credits including GEOL 601 or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GEOL 798: Master's Research Project in Earth Systems Science. 1-6 credits.
Experimental, observational, literature-based, or theoretical research project chosen and completed under guidance of faculty member. Proposal required before enrollment. Comprehensive technical report acceptable to student’s committee required for completion. Notes: No more than 6 credits of GEOL 798 may be applied to master’s degree. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: 15 graduate credits, approved project or thesis proposal, and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Experimental, observational, or theoretical research under major advisor's supervision that culminates in production of thesis. Thesis work should be potentially publishable. Offered by Atmospheric/Oceanic/Earth Sci (p. 599). May be repeated within the degree for a maximum 18 credits.

Schedule Type: Thesis
German (GERM)

100 Level Courses

GERM 101: Elementary German I. 3 credits.
Designed for students with no knowledge of German. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Notes: Students may not receive credit for GERM 101 and GERM 105 or 110. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to GERM 110.

Recommended Prerequisite: GERM 101.

Schedule Type: Lecture

GERM 102: Elementary German II. 3 credits.
Continuation of GERM 101. Notes: Students may not receive credit for GERM 102 and GERM 105 or 110. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to GERM 110.

Recommended Prerequisite: GERM 101.

Schedule Type: Lecture

GERM 110: Elementary German. 6 credits.
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Notes: Lab work required. Students may not receive credit for GERM 110 and GERM 101, 102, or 105. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to GERM 101, GERM 102.

Schedule Type: Lecture

200 Level Courses

GERM 201: Intermediate German I. 3 credits.
Further development of skills in listening, speaking, reading, and writing. Notes: GERM 201 and 202 must be taken in sequence. Students may not receive credit for GERM 201 and GERM 210. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to GERM 210.

Recommended Prerequisite: GERM 102, 105, 109, appropriate placement score or permission of department.

Schedule Type: Lecture

GERM 202: Intermediate German II. 3 credits.
Applies skills to reading, composition, and discussion. Notes: Students may not receive credit for GERM 202 and GERM 210. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to GERM 210.

Recommended Prerequisite: GERM 201.

Schedule Type: Lecture

GERM 210: Intermediate German. 3 credits.
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of German speaking regions. Notes: Students may not receive credit for GERM 210 and GERM 201 or 202. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to GERM 201, GERM 202.

Recommended Prerequisite: GERM 110 or appropriate placement score.

Schedule Type: Lecture

300 Level Courses

GERM 301: Culture and Civilization. 3 credits.
Covers development of German civilization from 18th century to present. Includes German cultural contributions to world civilization. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in German

Recommended Prerequisite: GERM 210.

Schedule Type: Lecture

GERM 310: Conversation and Composition. 3 credits.
Develops fluency in speaking and proficiency in writing German through discussion, reports, and compositions based on texts dealing with contemporary events and issues. Notes: Not for native speakers of German. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in German

Recommended Prerequisite: GERM 250, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

GERM 316: German for the Business World. 3 credits.
Introduces terminology and structural features of business German. Emphasizes acquiring vocabulary and developing facility in reading German business articles and correspondence. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in German

Recommended Prerequisite: GERM 250, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

GERM 318: Translation of Texts. 3 credits.
Introduces principles and techniques of translation. Translation of texts from the natural and social sciences, current events, and contemporary
culture. Notes: Translations mainly from German into English. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** GERM 250 or equivalent; appropriate placement score; or permission of instructor

**Schedule Type:** Lecture

**GERM 325: Major Writers.** 3 credits.
Works of major German, Austrian, and Swiss writers in translation. Notes: Writers studied vary. May be repeated when topic is different with permission of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Literature (p. 135)

**Specialized Designation:** Taught in English

**Recommended Prerequisite:** ENGL 101/ENGH 101 or equivalent or permission of instructor.

**Schedule Type:** Lecture

**GERM 329: Representations of the Holocaust.** 3 credits.
Examines the Holocaust through film, literature, autobiography and museum culture. Students critically discuss causes of the Holocaust in Nazi Germany and explore its impact on German, Austrian and American culture. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in English

**Schedule Type:** Lecture

**GERM 340: Survey of German Literature.** 3 credits.
Overview of history of German literature to 1880. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** GERM 250, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**GERM 355: Readings in Poetry (Topic Varies).** 3 credits.
Intensive reading of German poetry in its historical context. Study of genre characteristics and development, including performance aspects. Genre varies; may be historical drama, radio play, or epic theater. Notes: May be repeated for credit when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Taught in German

**Schedule Type:** Lecture

**GERM 365: Readings in Narrative Prose.** 3 credits.
Intensive reading of German narrative prose, such as autobiographical fiction, fairy tales, and film. Studies genre characteristics and development. Topics to be studied vary. Notes: May be repeated for credit when subject is different, with permission of department. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** GERM 250 or equivalent; appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**GERM 370: German Through the Arts.** 3 credits.
Focuses on advanced-level language development through the investigation of German arts (film, music, theater, paintings, etc.) in their historical and cultural contexts. Oral and written competence achieved by means of integrated vocabulary and grammar study in content-based instruction. Notes: May be repeated for credit when topic is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** GERM 250, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**GERM 375: Readings in Drama.** 3 credits.
Intensive reading of German dramas in their historical context. Study of genre characteristics and development, including performance aspects. Genre varies; may be historical drama, radio play, or epic theater. Notes: May be repeated for credit with permission of department when subtitle differs. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Schedule Type:** Lecture

**Recommended Prerequisite:** GERM 250, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**400 Level Courses**

**GERM 415: Advanced Grammar and Style.** 3 credits.
Studies syntax, idiomatic features, and levels of style. Extensive practice in different types of written expression. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** 15 hours of GERM or permission of instructor.

**Schedule Type:** Lecture

**GERM 418: Advanced Composition.** 3 credits.
Develops proficiency in writing German through intensive practice in preparing guided and original compositions. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** Completion of 15 hours of GERM or permission of instructor.

**Schedule Type:** Lecture

**GERM 442: The Age of Goethe.** 3 credits.
Major works of Enlightenment, Sturm und Drang, Classicism, and early Romanticism. Emphasizes drama and poetry by Goethe and Schiller, with
additional works by Lessing, Kleist, and other important writers of the era. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** 15 hours of GERM or Permission of Instructor. Must have satisfactorily completed GERM 440 or 441.

**Schedule Type:** Lecture

**GERM 444:** *The Literature of Romanticism.* 3 credits. German Romantic poetry and prose. Background and some theory included. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** 15 hours of GERM or Permission of Instructor.

**Schedule Type:** Lecture

**GERM 450:** *Modern Literature: 1880-1925.* 3 credits. Literature of Naturalism, Impressionism, and Expressionism in Germany, Austria, and Switzerland. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Schedule Type:** Lecture

**GERM 451:** *Modern Literature: 1925 to the Present.* 3 credits. Literary trends since 1925 in Germany, Austria, and Switzerland. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** Taught in German

**Schedule Type:** Lecture

**GERM 450:** *Modern Literature: 1880-1925.* 3 credits. Literature of Naturalism, Impressionism, and Expressionism in Germany, Austria, and Switzerland. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** Taught in German

**Schedule Type:** Lecture

**GERM 480:** *Special Topics.* 3 credits. Special topics on language, literature, or culture by theme, approach, or era. Notes: May be repeated for credit with permission of department. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** 15 hours of GERM or permission of instructor

**Schedule Type:** Lecture

**Global Affairs (GLOA)**

**100 Level Courses**

**GLOA 101:** *Introduction to Global Affairs.* 3 credits. Surveys wide range of global topics: previous periods of globalization, international organizations and law, transnational corporations and global economy, immigration and refugees, world environmental concerns, world culture, war and peace, paradoxical presence of nationalism and fundamentalism in global world, and antiglobalization movement. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Specialized Designation:** Taught in German

**Recommended Prerequisite:** 15 hours of GERM or Permission of Instructor. Must have satisfactorily completed GERM 440 or 441.

**Schedule Type:** Lecture

**GLOA 305:** *Global Affairs College-to-Career.* 1 credit. Focuses on career choices and effective self-presentation for soon-to-be graduating students with majors in Global Affairs. Explores how skills typically learned in humanities majors can be leveraged for a successful transition to post-graduation employment. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

**Schedule Type:** Lecture

**400 Level Courses**

**GLOA 400:** *Global Affairs Capstone.* 3 credits. Students draw from interdisciplinary core and concentration coursework in order to synthesize, compare and consolidate the various approaches and theories explored throughout the major through a focus on a pressing global issue. Additionally, course is designed to further develop research, writing, presentation, and organizational skills. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

**Mason Core:** Capstone (p. 135)

**Recommended Prerequisite:** Completion of GLOA 101 or SOCI 120 and 18 credits in major.

**Schedule Type:** Lecture

**GLOA 450:** *Topics in Global Affairs.* 1-3 credits. Selected topics in global affairs. Content varies. Notes: May be repeated for credit when topic is different. Offered by Humanities & Social Sciences (p. 295). May be repeated within the degree for a maximum 9 credits.

**Recommended Prerequisite:** GLOA 101 or SOCI 120.

**Schedule Type:** Lecture

**GLOA 480:** *Study Abroad.* 1-6 credits. Study abroad under supervision of Mason faculty. Course topics, content, and locations vary. Notes: May be repeated with permission of department. Offered by Humanities & Social Sciences (p. 295). May be repeated within the term for a maximum 12 credits.

**Schedule Type:** Lecture

**GLOA 490:** *Independent Study in Global Affairs.* 1-6 credits. Reading or research on specific topic related to globalization, under direction of faculty member. Notes: At least one written paper required. Course may involve combination of reading assignments, tutorials, presentations, or off-campus activities. Offered by Humanities & Social Sciences (p. 295). May be repeated within the term for a maximum 6 credits.

**Schedule Type:** Lecture

**GLOA 491:** *Honors Seminar in Global Affairs.* 3 credits. Emphasizes an interdisciplinary approach to the study of global affairs. Covers a variety of topics, including consideration of economic, political, and cultural forces at work in the complex interactions among global
processes. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Global Affairs honors in the major.

**Schedule Type:** Seminar

**GLOA 492: Honors Research Project in Global Affairs.** 3 credits. Honors-level research on specialized topic in Global Affairs culminating in substantial paper and oral presentation. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

**Recommended Prerequisite:** Completion of GLOA 491 with minimum grade of B.

**Schedule Type:** Seminar

**GLOA 495: Global Experiential Learning.** 1-18 credits. On-the-job training in transnational or international fields through approved internship programs. Notes: Enrollment and credits controlled by Global Affairs Program. Contact Global Affairs Program one semester before planned enrollment. Offered by Humanities & Social Sciences (p. 295). May be repeated within the term.

**Recommended Prerequisite:** Acceptance into Global Policy Fellows Program.

**Registration Restrictions:**
- Enrollment is limited to students with a major in Global Affairs.

**Schedule Type:** Lecture

**500 Level Courses**

**GLOA 599: Issues in Global Affairs.** 3 credits. Studies current issues and debates in global affairs. Notes: May be repeated for credit when topic is different. Offered by Humanities & Social Sciences (p. 295). May be repeated within the term for a maximum 12 credits.

**Registration Restrictions:**
- Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

**Schedule Type:** Seminar

**GLOA 600: Global Competencies.** 3 credits. Explores the nature of globalization. Students will understand the characteristics of the current global system; be familiar with key global issues and debates; have an advanced understanding of and appreciation for organizations, languages, cultures in many global contexts; and be better habituated to thinking across disciplinary lines. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Global Affairs honors in the major.

**Schedule Type:** Seminar

**GLOA 605: Interdisciplinary Research Methods.** 3 credits. Designed to provide students with an overview of basic techniques in quantitative and qualitative methods with special attention to epistemological and ethical concerns in global studies research. Course includes a discussion of the theoretical assumptions that shape research questions and design, practical exercises in research techniques, and analysis of methodology in practice. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

**Registration Restrictions:**
- Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

**Schedule Type:** Lecture

**GLOA 610: Economic Globalization and Development.** 3 credits. Focuses on the intersection of countries and firms in the arenas of international trade, investment and finance, as the lenses into understanding better today's "global" economy: countries of differing levels of economic development and economic system structure, factors of monetary union and currency disequilibria, trade liberalization or protectionism, market entry, cross-border variables, risk and relations. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

**Recommended Prerequisite:** Acceptance into Global Policy Fellows Program.

**Registration Restrictions:**
- Enrollment is limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

**Schedule Type:** Seminar

**GLOA 620: Human Systems.** 3 credits. Examines the human dimensions relative to international educational systems and their relationship to basic education and higher education policy, research policy, science and technology, culture, language, social justice, equity, conflict and peace, human resources and national development. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

**Recommended Prerequisite:** Acceptance into Global Policy Fellows Program.

**Registration Restrictions:**
- Enrollment is limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

**Schedule Type:** Seminar
Global and Community Health (GCH)

200 Level Courses

GCH 205: Global Health. 3 credits.
This course examines the biological and social aspects of major international health issues, especially in the areas of infectious disease, nutrition, and environmental health. Other topics include population groups with special risks, policies and programs designed to reduce health inequalities, and basic methods used to study global health. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Schedule Type: Lecture

300 Level Courses

GCH 300: Introduction to Public Health. 3 credits.
Explores the principles and foundations of public health and its practice in the United States. Emphasizes the public health system’s contributions to improving individual, community, and population health. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Schedule Type: Lecture

GCH 310: Health Behavior Theories. 3 credits.
Examines theory for understanding health and health behaviors and their role in the development, implementation, and evaluation of public health programs. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Schedule Type: Lecture

GCH 320: Community Health and Literature. 3 credits.
This on-line course explores key historical worldwide public health events and humankind’s responses to them, through in-depth study of selected literary works. The course includes investigation of scientific, social, cultural, geographical, and political factors that affect health and policy development on local, community and global levels. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Schedule Type: Lecture

GCH 325: Stress and Well-Being. 3 credits.
Explores the influences of stress on population-based health issues. The causes and pathways of the stress experience are explored from an ecological public health perspective. Theoretical aspects of stress and coping are considered, along with methods for relieving and preventing the stress response in both individuals and communities. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Lecture

GCH 332: Health and Disease. 3 credits.
Introduces the etiology, control, and prevention of human disorders from a public health perspective. Focuses on health problems and potential prevention throughout the life span. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to NURS 332.

Schedule Type: Lecture
GCH 335: Applied Health Statistics. 3 credits.
Emphasizes the statistical concepts and procedures used in applied public health practice and research. Students will learn to use SPSS to analyze, interpret, and present statistical findings. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to GCH 435.

Recommended Prerequisite: Any Mason Core quantitative reasoning course.

Schedule Type: Lecture

GCH 350: Health Promotion and Education. 3 credits.
Introduces the principles of health promotion and education, including history; philosophical and theoretical foundations; professional preparation, ethics, and responsibilities; and work settings. Assessment of health information/sources and the development of effective health promotion and education strategies for diverse populations are emphasized. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Schedule Type: Lecture

GCH 360: Health and Environment. 3 credits.
Examines principles and methods, risk factors, prevention and control, and policies related to the aspects of human health determined by biological, physical, and chemical factors in the environment at the local, regional, and global levels. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Schedule Type: Lecture

GCH 370: Sexuality and Human Behavior. 3 credits.
Introduction to human sexual behavior with an emphasis on the interaction between psychological, social, and biological factors. Topics include sexual differentiation and development, sexually transmitted infections and HIV, sexual orientation, patterns of sexual behavior, and the sexual health of individuals, communities, and global populations. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Schedule Type: Lecture

GCH 376: Health Ethics, Leadership, and Advocacy. 3 credits.
Examines legal and ethical issues in public health practice and the skills necessary for effective leadership. Includes personal and organizational ethics, management and leadership styles, and public health advocacy. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Recommended Prerequisite: GCH 350.

Schedule Type: Lecture

GCH 380: Public Health Research Methods. 3 credits.
Emphasizes the formation of public health research questions and selection of appropriate study designs to address them. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to GCH 460.

Specialized Designation: Scholarly Inquiry

Schedule Type: Lecture

GCH 390: Introduction to Epidemiology. 3 credits.
Examines statistical and research methods used in the study of public health and communicable diseases. Emphasizes the statistical concepts and procedures used in applied public health practice and research. Students will learn to use SPSS to analyze, interpret, and present statistical findings. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to GCH 435.

Recommended Prerequisite: Any Mason Core quantitative reasoning course.

Schedule Type: Lecture

GCH 405: Global Health Interventions: History and Systems. 3 credits.
Examines the history, development, and implementation of international health policies and programs, with an emphasis on maternal and child health, undernutrition, and infectious diseases. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Recommended Prerequisite: GCH 205

Schedule Type: Lecture

GCH 406: Global Health Interventions: Emerging Issues. 3 credits.
Examines strategies for addressing emerging global health issues, with an emphasis on noncommunicable diseases, aging, mental health, and injuries. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Recommended Prerequisite: GCH 205.

Schedule Type: Lecture

GCH 411: Health Program Planning and Evaluation. 3 credits.
Addresses planning, implementation and evaluation of highly effective health programs. Emphasis is placed on using evidence-based approaches to program design and evaluation and working productively with communities. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: GCH 310\textsuperscript{C} and 380\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Lecture

GCH 412: Fundamentals of Epidemiology. 3 credits.
Explores health research methods for measuring population health, designing and implementing observational and experimental studies, reading health science publications, and applying research findings to global and community health. Notes: Open only to students in the Community Health major (HH-BS-COMH) or Public Health minor (PUBH). Offered by Global and Community Health (p. 237). May not be repeated for credit.

Recommended Prerequisite: One of the following: GCH 335, STAT 250, BIOL 214, OM 210, PSYC 300, or SOCI 313.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Community Health or Public Health.

Schedule Type: Lecture

GCH 430: Community Health Systems and Agencies. 3 credits.
Introduces students to local, state, and national community health systems and agencies. Topics include the historical impact of community health systems and agencies; the influence of health advocacy groups; the relationship between human rights and health; and the need for collaboration between groups advocating for optimum human health. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Schedule Type: Lecture
Recommended Corequisite: GCH 411.

Schedule Type: Lecture

GCH 445: Social Determinants of Health. 3 credits.
Examine the social determinants of health and the application of this framework to social work and public health policy and practice interventions. Explore the many social justice factors that affect health and consider which community systems and social change approaches may decrease or eliminate health inequities. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to SOCW 445.

Recommended Prerequisite: 45 credits or permission of the instructor.

Schedule Type: Lecture

GCH 450: Culture, Sexuality and the Global AIDS Epidemic. 3 credits.
Examines how the cultural values and mores regarding sexuality shape HIV/AIDS social policy and how these values and mores facilitate and hinder prevention and care efforts. Also examines several sexuality-related topics that interface with culture (e.g., gender, the sex industry, homosexuality) and the effectiveness of prevention and care initiatives around such issues as condom use, blood donation restrictions, immigration laws, sex education, and HIV testing. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Schedule Type: Lecture

GCH 462: Health Promotion across the Lifespan. 3 credits.
Addresses health maintenance issues in humans from birth to death, emphasizing prevention. Compares and contrasts prevention of acute and chronic illnesses. Analyzes health communication approaches for effective translation of evidence-based. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Recommended Prerequisite: GCH 332 GCH 350

Schedule Type: Lecture

GCH 465: Community Health Capstone. 3 credits.
Assists students in synthesizing their roles as community health professionals in a global society. Provides students with opportunities to examine issues in community health. Course content builds on knowledge and skills acquired through coursework and field experience. Student writings and presentations receive written self-evaluation as well as formal review by peers and multiple faculty members. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Mason Core: Capstone (p. 135)

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisite: GCH 380C.
C Requires minimum grade of C.

Schedule Type: Lecture

GCH 480: Health Maintenance and Health Aspects of Aging. 3 credits.
Studies physiological and psychological factors that influence health and have implications for preventive measures in disease and health disorders. Examines nutrition, nature of health problems, and methods of assessing physical and psychological needs. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Schedule Type: Lecture

GCH 491: Study Abroad in Public Health. 3 credits.
Study abroad under supervision of George Mason University faculty. Course topics, content and locations vary. Offered by Global and Community Health (p. 237). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Lecture

GCH 494: Special Topics in Global and Community Health. 3 credits.
Selected topics analyzing specialized areas in global and community health. Notes: Content varies. Lecture, seminar, laboratory, workshops. Offered by Global and Community Health (p. 237). May be repeated within the term for a maximum 12 credits.

Schedule Type: Lecture

GCH 496: Violence in Today’s Society. 3 credits.
Examines magnitude of problem of violence globally and more specifically within the United States. Discussion and reflective activities engage students in the learning process. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to NURS 496.

Schedule Type: Lecture

GCH 497: Pre-Internship Seminar. 1 credit.
Prepares students for future professional roles including the GCH 498 internship. The coursework will include resume and cover letter writing, interviewing skills, networking, communications, professionalism, job search strategies, and relationship dynamics in the workplace. Students will select and prepare for a possible GCH internship. Notes: This course must be completed with a grade of B or better in order to be considered for enrollment in GCH 498 Community Health Internship. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Recommended Prerequisite: GCH 300 and completion of 60 credit hours, or instructor’s permission.

Schedule Type: Lecture

GCH 498: Global and Community Health Internship. 3,6 credits.
Provides advanced students with the opportunity to apply community health knowledge while working under the supervision of a community preceptor in a local health organization. Students submit an application to the GCH internship coordinator the semester prior to enrollment for review. Students who have demonstrated academic excellence will receive priority internship placement. Notes: A criminal background check and proof of vaccination status may be required of students prior to beginning an internship. This course provides experiential learning in a community health organization under the direction of a faculty advisor and a preceptor in the community health organization. Students are expected to understand the roles and functions of the community health organization and complete a project approved by the faculty advisor and the preceptor. Offered by Global and Community Health (p. 237). May be repeated within the degree for a maximum 6 credits.

Recommended Corequisite: GCH 497 with B or better.

Schedule Type: Internship

GCH 499: Independent Study in Global and Community Health. 1-6 credits.
Provides individual study of a particular problem area in global and community health research, theory development, or education under the
direction of faculty. Offered by Global and Community Health (p. 237). May be repeated within the term for a maximum 6 credits.

**Schedule Type:** Independent Study

### 500 Level Courses

**GCH 515: Lesbian, Gay, Bisexual, Transgender, and Queer Health.** 3 credits.
Examines health status and health disparities among lesbian, gay, bisexual, transgender, and queer (LGBTQ) communities across the lifespan. Measurement and methodological considerations in LGBTQ health research, as well as health-related interventions targeting LGBTQ populations will be emphasized. Notes: Offered every other year. Upper level undergraduates interested in taking this course are encouraged to contact the instructor. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GCH 543: Global Health.** 3 credits.
Examines the major infectious, nutritional, noncommunicable, neuropsychiatric, and other causes of morbidity, mortality, and disability in each world region. Explores sociocultural, economic, political, biological, and environmental factors that contribute to global and community health. Notes: Lecture, discussion. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GCH 565: Public Health Toxicology.** 3 credits.
Focuses on the general mechanisms of toxicity and direct and indirect effects of major environmental and occupational agents. Considers the genetic, physiologic, and psychosocial factors that affect susceptibility to adverse health outcomes associated with environmental or occupational hazard exposure. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

Overview of HIV disease, including retrospective and current concepts and analyses, global and societal effect, and cutting-edge research. Examines development of therapeutic tools and skills to educate, reduce risks, control infection, and affect care and healing of client, family, and community, and issues of increasing dilemma for health care professionals. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to NURS 571.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GCH 591: Study Abroad in Public Health.** 3 credits.
Study abroad under supervision of George Mason University faculty. Course topics, content and locations vary. Offered by Global and Community Health (p. 237). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GCH 594: Special Topics in Global and Community Health.** 3 credits.
Selected topics analyzing specialized areas in health care. Notes: Content varies. Lecture, seminar, laboratory, and workshops. Offered by Global and Community Health (p. 237). May be repeated within the degree for a maximum 6 credits. Equivalent to HAP 594, NURS 594.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

### 600 Level Courses

**GCH 600: Health Promotion Methods.** 3 credits.
Fundamental principles and practices of public health promotion and education, including historical origins; professional responsibilities; ethics; health behavior and learning theories; models for planning, implementing and evaluating programs; health literacy; public health advocacy; and the development, selection and implementation of effective instructional materials, methods, and interventions. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GCH 601: Introduction to Biostatistics.** 3 credits.
Applies selected biostatistics techniques to public health and health system management issues. Includes univariate and bivariate statistics, and regression analysis. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GCH 602: Global Health Issues Related to Violence.** 3 credits.
Explores worldwide view of violence and its impact on health. Examines biological, psychological, and social determinants of violence. The epidemiology of violence is examined with special attention to collective violence, youth violence, abuse and neglect of children and the elderly, intimate partners, sexual violence, self-directed violence, and transgenerational violence. Preventive approaches attempted to help reduce the prevalence of violence will be addressed. Notes: GCH 602 will be offered in the spring of odd years. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Recommended Prerequisite:** Admission to a graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

**Schedule Type:** Lecture

**GCH 607: Evidence-Based Public Health Practice.** 3 credits.
Examines strategies for implementing evidence-based approaches in public health practice by applying principles of scientific reasoning and the systematic use of data. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GCH 609: Community Assessment and Partnerships.** 3 credits.
Examines strategies for conducting community assessments using community-based participatory approaches to identify factors affecting the health and well-being of population and community health. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GCH 610: Health Behavior Theory.** 3 credits.
Introduces students to the fundamentals of social and behavioral sciences, emphasizing current health behavior theories and models. Students develop an understanding of the theoretical and scientific basis of health promotion/health education interventions and develop community need and asset assessment skills. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GCH 611: Health Program Planning and Evaluation.** 3 credits.
Addresses the process of program planning, development, and fundamental evaluation principles, emphasizing health promotion programs. The focus is on development of clear and concise objectives leading to the design of effective primary, secondary, and tertiary prevention strategies. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** GCH 600B.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GCH 612: Interventions in Public Health. 3 credits.
Application of intervention mapping to the design of theory-based interventions for target populations; collaboration with communities to design and implement interventions; selection of evidence-based interventions (EBIs); adaptation of EBIs for new populations; dissemination of EBIs; and cultural and ethical issues related to intervention development, implementation, evaluation, and sustainability. Notes: There are no prerequisites for the course. Students may find completion of GCH 600 or GCH 610 to be beneficial preparation for the course. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GCH 618: Environmental and Occupational Risk Assessment. 3 credits.
Focuses on how environmental and occupational health risks are identified and quantitatively characterized. Introduces risk communication strategies for technical and non-technical audiences. Introduces students to the development of testable models of chemical exposure. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Recommended Corequisite: GCH 560.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GCH 622: Mental Health: A Global Perspective. 3 credits.
An introduction to mental health and mental disorders; a critical view of national and international classification of disorders; an introduction to public health perspectives on mental health and mental disorders; and a review of cultural factors related to public health dilemmas and services, locally, regionally and in the global community, from a bio-psycho-social perspective. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Registration Restrictions:
Compares international health systems and policies. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

GCH 650: Global Non-Communicable Diseases. 3 credits.
Examines principles and methods for the prevention and control of NCDs of global importance, including cardiovascular diseases, cancer, COPD, diabetes, dementias, and others. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

GCH 651: Behavioral Research Methods. 3 credits.
Explores quantitative and qualitative research methods, principles and techniques necessary for implementation of health science research. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to RHBS 651.

**Recommended Corequisite:** GCH 601 or graduate course in applied statistics.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

GCH 712: Introduction to Epidemiology. 3 credits.
Explores epidemiological methods for measuring population health, designing and implementing observational and experimental studies, critically reading the public health literature, and applying research findings to global and community health. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

GCH 722: Infectious Disease Epidemiology. 3 credits.
Focuses on the epidemiology of infectious and parasitic diseases. Emphasizes study design and data analysis to support the prevention and control of communicable diseases. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to GCH 640.

**Registration Restrictions:**
**Required Prerequisite:** GCH 712 **B-**.
**B-** Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

GCH 726: Advanced Methods in Epidemiology. 3 credits.
Develops epidemiological skills through the study and exploration of special topics in epidemiology. Focuses on epidemiological methods and analysis, critical review of the literature, and scientific writing. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (GCH 712 **B-** and 601 **B-**).
**B-** Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar
GCH 732: *Chronic Disease Epidemiology.* 3 credits.
Focuses on the epidemiology of chronic diseases, including cancers, cardiovascular and lung diseases, and mental health disorders. Emphasizes study design, critical reading, and public health approaches to disease control, such as surveillance and screening. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: GCH 712\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GCH 742: *Behavioral Epidemiology.* 3 credits.
Focuses on applying epidemiological principles to the study of behavior and human health, emphasizing the role of behavior in public health, determinants of behavior, and research methods for studying health and disease in relation to behavior. Notes: Offered every other year. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: GCH 712\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GCH 752: *Nutritional Epidemiology.* 3 credits.
Focuses on the examination of the methodologies of dietary assessment and their application to design, conduct, analysis, and interpretation of epidemiologic studies related to nutrition. Introduces the practical application of nutritional epidemiology to health programs and policy. Notes: Offered every other year. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: GCH 712\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GCH 762: *Environmental Epidemiology.* 3 credits.
Focuses on applying epidemiological principles to the study of the environment exposures and human health, emphasizing research methods and data analysis, critical review of research, communication of research results, and applications to public health. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: GCH 712\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GCH 772: *Social Epidemiology.* 3 credits.
Focuses on applying epidemiological principles to the study of social factors and human health. Prepares students to measure population-level social determinants of health and quantitatively evaluate their relationship with health and disease. Requires students to translate information and analyses into summaries suitable for technical and non-technical audiences. Notes: Offered every other year. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to GCH 605.

Registration Restrictions:
Required Prerequisite: GCH 712\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GCH 770: *Practicum Seminar.* 0 credits.
Provides students with guidance and preparation for engaging in the public health practicum. Notes: This course should be taken one semester prior to enrollment in the practicum course. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GCH 782: *International Research Ethics and Methods.* 3 credits.
Prepares students to conduct global and community health research. Discusses ethical issues in international health research. Develops plans for identifying a research project, collecting and analyzing data, and reporting results of international health research. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to GCH 680.

Registration Restrictions:
Required Prerequisites: (GCH 712\(^B\) and 601\(^B\)).
\(^B\) Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GCH 790: *Practicum in Public Health.* 3 credits.
The practicum provides students with an in-depth supervised experience in an approved public health organization. The practicum will require students to complete a project related to an actual public health issue that is a focus within the organization. Offered by Global and Community Health (p. 237). May not be repeated for credit.

Recommended Prerequisite: Students must be enrolled in the MPH program in good standing. Must have completed GCH 780 and 21 credit hours in the MPH program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**GCH 792:** Culminating Experience. 0 credits.
Provides an integrative learning experience to demonstrate synthesis of the Master of Public Health foundational and concentration competencies. Students produce a written product appropriate to educational and professional objectives. Notes: This course should be taken during the final semester of the program. It is highly recommended that students complete all other MPH Core Courses and at least two Concentration Courses prior to enrollment in this course. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Recommended Prerequisite:** Must be enrolled in the MPH program in good standing and have completed at least 21 credit hours in the MPH program.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GCH 794:** Global Health Research Capstone. 3 credits.
Provides a supervised, collaborative research experience on a global health topic that allows students to synthesize, integrate, and apply the knowledge and skills acquired in coursework. Offered by Global and Community Health (p. 237). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: GCH 651 B-
B- Requires minimum grade of B-

Enrollment limited to students in the MS Global Health program.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GCH 795:** Advanced Special Topics in Global and Community Health. 1-3 credits.
Advanced special topics course to address in-depth study of contemporary areas of global and community health insufficiently covered in other courses. Notes: Fulfills elective requirement for MS in global health degree and global health certificate program. Topics vary. May take up to 6 credits within their degree program. Offered by Global and Community Health (p. 237). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Must be enrolled in a graduate program and have permission of the instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

---

### 800 Level Courses

**GCH 804:** Advanced Quantitative Data Analysis for Health Care Research I. 3 credits.
Examines regression modeling including ANOVA techniques, linear regression and logistic regression. Using public health and health care research data, students will apply statistical methods and interpret output from a statistical computing package. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to NURS 804.

**Recommended Prerequisite:** A graduate-level statistics course.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**GCH 805:** Advanced Quantitative Data Analysis for Health Care Research II. 3 credits.
Examines data analysis techniques for data management, data cleaning, exploratory data analysis, and statistical modeling, and applies these approaches to public health data using a statistical computing package. Introduces advanced statistical analysis techniques including Poisson regression, longitudinal data analysis, survival analysis, and analysis of survey data. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to NURS 805.

**Recommended Prerequisite:** GCH 804 or NURS 804, or an equivalent multivariate statistics course.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**GCH 806:** Advanced Quantitative Data Analysis for Health Care Research III. 3 credits.
Examines regression modeling including ANOVA techniques, linear regression and logistic regression. Using public health and health care research data, students will apply statistical methods and interpret output from a statistical computing package. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to NURS 806.

**Recommended Prerequisite:** GCH 805 or NURS 805, or equivalent multivariate statistics course.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**GCH 807:** Measurement Theories and Applications in Health Care Research. 3 credits.
Theories, principles, and techniques presented as foundation for the development and evaluation of instruments for use in health care research. Includes review of statistical techniques required for understanding measurement theory, reliability, validity, item analysis, and instrument construction. Students required to design, construct, administer, analyze, and evaluate an original instrument or evaluate an existing instrument in health care research. Notes: Completion of GCH 805/NURS 805 or GCH 806/NURS 806 is highly recommended. Offered by Global and Community Health (p. 237). May not be repeated for credit. Equivalent to NURS 807.
**Government (GOVT)**

**100 Level Courses**

**GOVT 101: Democratic Theory and Practice.** 3 credits.
Comparative exploration; topics include contemporary analysis of the meanings of liberty, equality, representation, property rights, voting rights, and civil responsibilities. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Mason Core:** Social/Behavioral Sciences (p. 135)

**Schedule Type:** Lecture

**GOVT 103: Introduction to American Government.** 3 credits.
An overview of key organizing principles of American government, including its institutions, history, and various aspects of political participation. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Schedule Type:** Lecture

**GOVT 132: Introduction to International Politics.** 3 credits.
Nature of international politics, approaches to study of international politics, state and nonstate actors in international system, patterns of action and interaction between nation-states, international institutions, and major global issues. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Schedule Type:** Lecture

**GOVT 133: Introduction to Comparative Politics.** 3 credits.
Discusses methods and subject matter of comparative political analysis. Includes political systems, politics, participation in politics, government structures, policy-making process, and evaluation of political performance. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Schedule Type:** Lecture

**300 Level Courses**

**GOVT 300: Research Methods and Analysis.** 4 credits.
Emphasizes asking clear, researchable questions and using appropriate evidence to answer them. Introduces broad range of evidence including quantitative and qualitative information. Studies design and analysis of surveys, government archives, case studies, and interpretations of events in journals. Examines ethical implications of information technologies. Notes: Required for all majors in government and international politics, and public administration. Strongly recommended before or during first semester of enrolling in 300-level courses. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Mason Core:** Information Technology: With Ethics (p. 135)

**Recommended Prerequisite:** GOVT 103.

**Schedule Type:** Lecture

**GOVT 301: Public Law and the Judicial Process.** 3 credits.
American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to CRIM 301.

**Recommended Prerequisite:** GOVT 103.

**Schedule Type:** Lecture

**GOVT 302: American Political Development.** 3 credits.
Examines American political development, both in itself and compared to other nations. Addresses the extent to which the United States has or has not been exceptional in its development as a nation state. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 103.

**Schedule Type:** Seminar

**GOVT 304: American State and Local Government.** 3 credits.
Nature, organization, functions, and problems of American state and local governments. Notes: Students may not receive credit for GOVT 204 and 304. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 103.

**Schedule Type:** Lecture

**GOVT 305: Contemporary American Federalism.** 3 credits.
Legal, administrative, fiscal, and political dimensions of evolving American federalism. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 103.

**Schedule Type:** Lecture

**GOVT 307: Legislative Behavior.** 3 credits.
Organization, processes, functions, and roles of legislature and U.S. Congress members. Topics include state legislatures and cross-national comparisons as time and resources permit. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 103.

**Schedule Type:** Lecture

**GOVT 308: The American Presidency.** 3 credits.
Survey of modern presidency, including constitutional origins of office, growth and influence of White House staff, Cabinet, presidential appointees and control of executive branch, relations with Congress, and domestic and national security policy making. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 103.

**Schedule Type:** Lecture
GOVT 309: Government and Politics of Metropolitan Areas. 3 credits. Government, politics, and problems of metropolitan centers and surrounding areas. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103.

Schedule Type: Lecture

GOVT 311: Public Opinion and Electoral Behavior. 3 credits. Studies actions of voters, candidates, and political parties in relation to the expression of relevant public opinion in a democratic system. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103 and 300.

Schedule Type: Lecture

GOVT 312: Political Parties and Campaigns. 3 credits. Characteristics and functions of political parties, influence of parties and other political forces on electoral decisions, and emphasis on parties' inability or ability to hold government accountable to citizens. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103.

Schedule Type: Lecture

GOVT 313: Political Psychology. 3 credits. Examines political topics through a psychological lens. Review of theoretical approaches, methods and themes. Political psychology has been used to explore the motivation of presidents, why some groups will seek to kill off other groups through acts of genocide, how the authoritarian state can emerge, and what goes through your mind as you go to cast your ballot on Election Day. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Schedule Type: Seminar

GOVT 318: Interest Groups, Lobbying, and the Political Process. 3 credits. Role, internal operations, strategies, and activities of interest groups. Evaluates ability of these groups to enable citizens to influence or control government and enhance democratic process. Considers conditions under which social movements become, or fail to become, effective interest groups. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103.

Schedule Type: Lecture

GOVT 319: Issues in Government and Politics. 1-3 credits. Studies special issues relevant to government and politics. Topics announced in advance. Examples include politics and the arts, ethnic conflict and the political system, gender politics, and changing dynamics in political institutions. Notes: May be repeated when topic is different with permission of department. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: GOVT 103.

Schedule Type: Lecture

GOVT 322: International Relations Theory. 3 credits. Advanced inquiry into international relations. Studies theories, concepts of international relations, and major forces and issues in international politics. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 132 or 133.

Schedule Type: Lecture

GOVT 323: Classical Western Political Theory. 3 credits. Lectures, discussions of developments in Western tradition of political thought from time of Greek city-state to late medieval Christendom. Topics include nature and purpose of politics, relationship between individual and state, political significance of religion and tradition, and concept of natural law. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to PHIL 323.

Recommended Prerequisite: GOVT 101, or three credits of Philosophy.

Schedule Type: Lecture

GOVT 324: Modern Western Political Theory. 3 credits. Lectures, discussions of developments in Western tradition of political thought from Renaissance to mid-19th century. Topics include rise of individualism in political theory, early developments in social contact theory, theories of radical popular sovereignty, and early criticisms of liberal theory. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to PHIL 324.

Recommended Prerequisite: GOVT 101, or three credits of Philosophy.

Schedule Type: Lecture

GOVT 327: Contemporary Western Political Theory. 3 credits. Lectures, discussions of developments in Western tradition of political thought from mid-19th century to today. Different sections focus on various political theories that have been influential during this period, such as liberal, libertarian, conservative, communitarian, Marxist, feminist, and postmodern thought. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 12 credits. Equivalent to PHIL 327.

Recommended Prerequisite: GOVT 101 or three credits of Philosophy.

Schedule Type: Lecture

GOVT 328: Non-Western Political Theory. 3 credits. Theory and history of political community, governance, and development as understood by various non-Western societies, including China, Japan, India, Africa, and Islamic World; relations to Western tradition; methodology of studying other cultures; postcolonial theories; and cultural politics on contemporary globalization. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Recommended Prerequisite: GOVT 101 or 133.

Schedule Type: Lecture

GOVT 329: Issues in Political Theories and Values. 1-3 credits. Studies special issues relevant to theoretical and value aspects of government and politics. Topics announced in advance. Examples include ethics and politics, ethics and environmental policy, changing perspectives on civil rights and liberties, religion and politics, and changing views of public space. Notes: May be repeated when topic is different with permission of department. Offered by Schar School of
Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** GOVT 103.

**Schedule Type:** Lecture

**GOVT 331:** Government and Politics of Latin America. 3 credits. Contemporary political systems of Latin America, with emphasis on institutions, political processes, and political behavior. Presents case studies of several key Latin American politics; discusses problems of political development. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 132, 133.

**Schedule Type:** Lecture

**GOVT 332:** Government and Politics of the Middle East and North Africa. 3 credits. Societies of Middle East and North Africa and their response to impact of internal sociocultural-political determinants and external forces. Focuses on contemporary politics, ideologies, popular manifestations, institutions, and operations. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** GOVT 132, 133.

**Schedule Type:** Lecture

**GOVT 333:** Government and Politics of Asia. 3 credits. Government structures and political processes of Asian countries. Examines patterns of conflict and cooperation, and issues of economic development and political reform in rapidly changing world. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** GOVT 132, 133.

**Schedule Type:** Lecture

**GOVT 334:** Government and Politics of Europe. 3 credits. Examines governance and political systems in Europe at the national and supranational levels, with emphasis on actors, institutions, processes, and behavior. Explores key policies in a variety of fields, such as social policy, migration, and economic and monetary union. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 132, 133.

**Schedule Type:** Lecture

**GOVT 336:** Political Development and Change. 3 credits. Process of political development and change in context of modernization and industrialization. Examines patterns of political development, with emphasis on developing world. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 132, 133.

**Schedule Type:** Lecture

**GOVT 337:** Ethnic Politics in Western Europe and North America. 3 credits. Studies resurgence of ethnic nationalism in industrial democracies of Western Europe and North America, and the comparative analysis of policy issues related to ethnonationalism. Case studies drawn from the industrial democracies. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 132, 133.

**Schedule Type:** Lecture

**GOVT 338:** Government and Politics of Russia. 3 credits. Examines continuity and change in Russia's Soviet era and post-Soviet era politics and international relations. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 132, 133.

**Schedule Type:** Lecture

**GOVT 339:** Issues in the Politics of Advanced Industrial Societies. 1-3 credits. Studies selected current political issues in industrial democracies of Western Europe and North America. Specific topics chosen each semester to reflect contemporary political concerns in these countries, but political process in advanced industrial countries is organizing principle throughout the course. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** GOVT 103 or 133 or permission of instructor.

**Schedule Type:** Lecture

**GOVT 340:** Central Asian Politics. 3 credits. Comparative examination of political change in Central Asia with attention to national identity formation, political economy, political conflict, political Islam, and democratization. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** GOVT 132, 133.

**Schedule Type:** Lecture

**GOVT 341:** Chinese Foreign Policy. 3 credits. Discusses theories and practices of Chinese foreign policy decision making, which are then used to understand China's relations with United States, Japan, Russia, Europe, and its Asian neighbors, and China's policy in issues such as human rights, environmental protection, and nuclear nonproliferation. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** GOVT 132, 133.

**Schedule Type:** Lecture

**GOVT 342:** Diplomacy. 3 credits. Origins of organized diplomacy: tasks, procedures, instruments, and problems of diplomacy. Emphasizes current, future roles of diplomacy. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 132, 133.
GOVT 344: American Foreign Policy. 3 credits.
Central issues surrounding the conduct of America’s foreign relations, with special emphasis on structural and constitutional questions, national policy objectives abroad, and conduct of foreign policy in a democracy. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 132, 133.

Schedule Type: Lecture

GOVT 345: Islam and Politics. 3 credits.
Covers politics of religion in Muslim societies; history, ideology, and practices of key individuals, movements, and institutions; case studies of political Islam in the Middle East, Asia, Africa, and the West; plurality and diversity of political expression in Muslim world; nature of democracy in Islam; and Islamic state. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

GOVT 346: American Security Policy. 3 credits.
Approaches U.S. National security policy from perspective of organization and implementation of specific policies. Applies theoretical concerns to historic cases to illuminate problems that continue to challenge country. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 132, 133.

Schedule Type: Lecture

GOVT 347: International Security. 3 credits.
Explores enduring security problems and new developments. Examines effects of international system on defense policies of states, particularly tensions of world caught between emerging interdependence and national demands. Encourages development of critical-thinking and group and oral presentation skills. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 132.

Schedule Type: Lecture

GOVT 351: Administration in the Political System. 3 credits.
Administrative structures and processes in political setting of public management. Presents organization and administrative theory, critiques, and current practices; and examines impact of changes in social, political, and economic environment on concepts, models. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 132.

Schedule Type: Lecture

GOVT 353: Social Entrepreneurship. 3 credits.
Introduces students to the different steps that social entrepreneurs work through to drive social change: identifying problem to address, developing a strategy to address the social need, fundraising, growing the organization, tracking results, and maximizing impact. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Schedule Type: Seminar

GOVT 354: Third-Party Government and the Nonprofit Sector. 3 credits.
Introduces students to the concept of third-party government and the new realities of governments employing networks of public and private actors to orchestrate the production of public goods and services. Also explores the role of nonprofit organizations as the most prominent "third parties" that governments heavily depend on in social welfare provision. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Schedule Type: Seminar

GOVT 355: Public Personnel Administration. 3 credits.
Analyzes techniques and tools in human resource management including merit system, classification, compensation, evaluation, recruitment, and labor relations. Emphasizes current legal and policy issues in personnel administration, such as diversity and privatization. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 351.

Schedule Type: Lecture

GOVT 356: Public Budgeting and Finance. 3 credits.
Covers tools and techniques in budgeting and financial management in U.S. governments, including management of public financial institutions, budgetary process and reform, and relationship of public budgeting to national economic policy. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 351.

Schedule Type: Lecture

GOVT 357: Urban Governance and Planning. 3 credits.
Framework, subject matter, uses, methods, administration, and future of public planning. Emphasizes setting goals, defining objectives, and choosing between program alternatives. Discusses political and bureaucratic constraints, and problems of implementation. Planning illustrations may be drawn from various levels of government. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 351.

Schedule Type: Lecture

GOVT 358: Nonprofit Financial Planning. 4 credits.
Provides understanding of social mission and entrepreneurial cross pressures underlying financial planning and accounting in nonprofit sector. Topics include revenue sources and projections, entrepreneurial techniques, and cost analysis for nonprofit and nongovernmental entities. Lectures, student case studies. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.
Recommended Prerequisite: 60 credits or permission of instructor.

Schedule Type: Lecture

GOVT 359: Computers in Public Management. 3 credits.
Applies computer-based techniques to management information in public sector. Focuses on the logic and implementation of computer applications, internet technology, web development, security, and mobile apps. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 300.

Schedule Type: Lecture

GOVT 361: Introduction to Environmental Policy. 3 credits.
Environmental politics and policy making since the 1970s. Primarily U.S. focus, with some discussion of global issues. Examines policy strategies and outcomes, ethical and economic debates, political controversies, lawmaking and enforcement, and role of key players. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to EVPP 361.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: 30 credits.

Schedule Type: Lecture

GOVT 362: Intermediate Environmental Policy. 3 credits.
Examines environmental issues building on learning objectives from GOVT 361. Focuses on environmental and policy issues in the US and internationally, exploring the politics of nature and the interaction of environmental science and politics and resulting controversy. Risk and uncertainty loom large in most environmental issues. Covers “natural” disasters as well as direct “man-made” problems. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: EVPP 361 or GOVT 361 or permission of instructor.

Schedule Type: Lecture

GOVT 364: Public Policy Making. 3 credits.
Processes, agencies, and policies involved in the proposal making, implementation, evaluation, and revision of U.S. public policy. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103.

Schedule Type: Lecture

GOVT 365: State and Regional Public Policy. 3 credits.
Examines public policy decisions that affect local and state jurisdictions in context of federal system of government. Examines context, substance, and impact of such policies as housing, transportation, land use, crime prevention, service delivery, and health care. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103.

Schedule Type: Lecture

GOVT 366: Public Policy Analysis. 3 credits.
Methods of public policy analysis, evaluation, and research. Studies design and development of alternative courses of government action and evaluation of results, and problems in applying systematic analysis to political issues. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 300.

Schedule Type: Lecture

GOVT 367: Money, Markets and Economic Policy. 3 credits.
Applies basic economic concepts and principles to issues facing the U.S. and global economies. Topics include productivity and economic growth, taxes, health care, globalization, income distribution and financial crises, with an emphasis on market structure, social institutions and the not-always rational behavior of investors and consumers. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to ECON 367.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Seminar

GOVT 368: Tools for Economic Policy Analysis. 3 credits.
This course outlines the economic framework for studying public policy, taking a more quantitative approach than GOVT 367. Topics include consumer and producer behavior under different market structures, how and why markets can fail to produce socially desirable outcomes, income distribution, and macroeconomic growth. Emphasizes using economic models to evaluate both market outcomes and policy interventions. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 367.

Schedule Type: Seminar

GOVT 398: Study Abroad. 3 credits.
Study abroad. Course topics, content, and locations vary. Notes: GOVT 398 may only be applied to a major or minor with prior written approval from the department. A maximum of 6 credits may be applied to the BA in government and international politics, the BS in public administration, or any minor offered by the School of Policy, Government, and International Affairs. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 12 credits.

Schedule Type: Lecture

GOVT 399: Research Practicum. 1-3 credits.
Applies research methods in context of assisting with faculty research. Individualized sections taught by arrangement with full-time faculty. Methods adopted vary, but generally include library research, data collection, data analysis, and report construction. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: GOVT 300 and Permission of Instructor.

Schedule Type: Independent Study

400 Level Courses

GOVT 407: Law and Society. 3 credits.
Explores relationship between law and society, including concept of law; origin, development, and role of law in society; and relationship between law and social change. Assesses different approaches and methodologies. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.
Recommended Prerequisite: CRIM 100 or GOVT 301.

Schedule Type: Lecture

GOVT 409: *Virginia Government and Politics*. 3 credits.
Examines history of politics in Virginia and current political issues. Particular attention to changing dynamics of political parties, key legislative issues, and policies of recent administrations. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103.

GOVT 412: *Politics and the Mass Media*. 3 credits.
Responsibilities and freedoms of mass media in democracy. Explores influence of media on citizens' opinions, elections, and decisions of public officials. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to COMM 412.

Recommended Prerequisite: GOVT 103.

GOVT 414: *Politics of Race and Gender*. 3 credits.
Examines political, economic, and social impact of public policies and implications for race, gender, and age. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103.

GOVT 420: *American Political Thought*. 3 credits.
Major political values and theories in America from formation of American republic to present. Covers changes in American political values in crisis periods and contemporary American political theory including pluralism, elite theories of democracy, and empirical political theory. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103.

GOVT 421: *Contemporary Political Ideologies*. 3 credits.
Studies political ideologies that shape values, beliefs, and actions of contemporary regimes and political movements. Topics include liberalism, conservatism, socialism, communism, and fascism in theory and contemporary practice; and totalitarianism and nationalism in postindustrial and developing societies. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103.

GOVT 422: *Constitutional Interpretation*. 3 credits.
Examines Supreme Court's interpretation of constitutional powers of Congress, presidency, and judiciary. Includes examination of major decisions concerning state regulation, taxation, and interstate relations. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 103.

Studies First Amendment freedoms of speech, press, assembly, association, and religion; right to privacy; and Fourteenth Amendment equal protection. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to CRIM 423.

Recommended Prerequisite: GOVT 103.

GOVT 427: *Feminist Political Thought*. 3 credits.
Explores feminist political thought in historical context. Topics include feminist political movements, feminist critiques of political philosophy, and feminist contributions to political theory. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to PHIL 427, WMST 427.

Recommended Prerequisite: GOVT 101, WMST 200, 3 credits of PHIL, or permission of instructor.

GOVT 428: *Advanced Democratic Theory*. 3 credits.
Explores various theoretical approaches to nature and justification of democracy. Topics may include liberal, communitarian, pluralist, and deliberative theories and their critics; constitutionalism; role of markets; and transnational democracy. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to PHIL 428.

Recommended Prerequisite: GOVT 101; or one course in PHIL.

GOVT 430: *Comparative Political Leadership*. 3 credits.
Comparative political leadership, relationships between political cultures and types of leadership, patterns of leadership recruitment, and linkages between political elites and citizenry. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 132, 133.

GOVT 432: *Political Change and Social Development in Sub-Saharan Africa*. 3 credits.
Examines relationship of culture, history, ethnicity, and religion, and contemporary political and socioeconomic developments in Africa. Special attention to implications of ethnic conflict for nation-building in the post-Cold War period, and strategies for resolving conflicts. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Recommended Prerequisite: GOVT 132, 133.

GOVT 433: *Political Economy of East Asia*. 3 credits.
Discusses different theoretical perspectives of East Asian political economy; transformation of East Asia; and issues such as money, finance, trade, investment, environment, and energy. Focuses on issues of contemporary significance, but attention also given to history. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Specialized Designation: Non-Western Culture
Recommended Prerequisite: GOVT 133 and 60 credits, or permission of instructor.

Schedule Type: Lecture

GOVT 434: Democracy in Global Perspective. 3 credits.
Comparative study of structures and performance of democracies around the world since 1975. Examines growing influence of global forces such as economy, media, and culture in process of democratization. Examines select current elections. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 133.

Schedule Type: Lecture

GOVT 443: Law and Ethics of War. 3 credits.
Explores sources of morality in armed conflict, and implications of such ideas for international relations. Examines content and philosophy of modern law of war. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 132.

Schedule Type: Lecture

GOVT 444: Issues in International Studies. 1-3 credits.
Major issues in international systems, including international political economy and security. Notes: May be repeated when topic is different with permission of department. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: GOVT 132, 133.

Schedule Type: Lecture

GOVT 445: Human Rights. 3 credits.
Explores philosophical, legal, and political issues at heart of modern international human rights movement. Examines historical background legal architecture of modern human rights movement. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 132.

Schedule Type: Lecture

GOVT 446: International Law and Organization. 3 credits.
Nature, sources, and subject of law of nations; law and individual; territorial questions; nature, sources, and functions of international organizations; international transactions and organizations; war and present; and future status of international law. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 132, 133.

Schedule Type: Lecture

GOVT 447: Revolution and International Politics. 3 credits.
Historical overview of modern revolutions as well as different theories about causes and consequences of revolutions. Special attention to Marxist-Leninist, Arab nationalist, and Islamic revolutions. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 133.

Schedule Type: Lecture

GOVT 448: Ethics and International Politics. 3 credits.
Ethics and international politics ask students to wrestle with dilemmas raised by a desire to behave morally in an international system in which consensus about ethical matters is absent. Distributive justice and use of force are two overarching themes. Students also develop, apply, and justify their own perspectives on ethical problem using philosophical theory, history, and social science research. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: 60 hours and GOVT 132 or PHIL 151.

Schedule Type: Lecture

GOVT 452: Administrative Law and Procedures. 3 credits.
Law of public office. Studies procedures followed by and the legal limits on administrative agencies and their officers and employees. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 351.

Schedule Type: Lecture

GOVT 460: Surveillance and Privacy in Contemporary Society. 3 credits.
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions doing surveillance, how they calculate and manage risk, and legal constraints on surveillance activities. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

GOVT 464: Issues in Public Policy and Administration. 1-3 credits.
Analyzes selected policy issues in administering public policies. Topics announced in advance. Examples include environmental policy, government regulation, federal mandates, state policy, and regional policy. Notes: May be repeated when topic is different with permission of department. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: GOVT 103 plus 60 credits.

Schedule Type: Lecture

GOVT 467: Current Issues in Economic Policy. 3 credits.
Applies basic concepts of economics, political science and ethics to some of the most pressing issues facing the U.S. and global economies. Topics include productivity and economic growth, taxes, soaring costs for health care and higher education, globalization, income inequality, financial crises, the size of government and the proper role of regulation. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: Open to PPE concentrators or permission of instructor.

Schedule Type: Seminar

GOVT 469: Philosophy, Politics, and Economics. 3 credits.
Covers issues in the philosophy, economics, and political science of institutions, information, and collective action. Through case studies of existing legal and political institutions, applies the insights to problems in politics, policy making, social theory, and social, moral, and political philosophy. (Specific content varies). Offered by Schar School of Policy

**Mason Core:**

GoVT (p. 906). May not be repeated for credit. Equivalent to Econ 460, Phil 460.

**Recommended Prerequisite:** Phil 358, Econ 412, and GoVT 467, or permission of instructor.

**Schedule Type:** Seminar

**GoVT 470: Faith and Reason in the Making of the Modern Mind.** 3 credits.
Investigates the interlocking claims of religious faith and human reason in Western culture, from Biblical times to the present. First covers tightly focused reading assignments in theology and philosophy, and second covers particular case studies, from Galileo to the Intelligent Design debate. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Schedule Type:** Seminar

**GoVT 471: Millennialism and Philosophies of History in Western Culture.** 3 credits.
Is there purpose in human history? Are we really going anywhere as humanity moves through time? This seminar studies major patterns by which thinkers in the West have discerned meaning in humanity's temporal existence. Extends from the Jewish roots of historical understanding, through Christian millennialism, to contemporary naturalism. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Schedule Type:** Seminar

**GoVT 472: Christianity, Secularism, and Democracy.** 3 credits.
Examines the evolving relationship between religion and the American political order, from the Reformation to George W. Bush. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Schedule Type:** Seminar

**GoVT 480: Internship.** 3 credits.
Approved internships with specific employer. Programs relate in some capacity to government, politics, public policy, or the law. Students develop individual contracts defining learning and competencies they plan to gain from the experience. For 3 credits, a minimum of 135 hours is required. Notes: Contact the department one semester before enrolling. A maximum of 6 credits of GoVT 480 may be applied to a degree in government and international politics or in public administration. 3 of those credits may be applied to requirements for the major (to the advanced government field requirement for the BA in government and international politics) with prior approval of the internship coordinator. A maximum of 3 additional credits may be used for general elective credit toward the 120 credits required for the bachelor's degree. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 15 credits.

**Recommended Prerequisite:** GoVT 101, GoVT 103, GoVT 132, and GoVT 133.

**Schedule Type:** Internship

**GoVT 490: Synthesis Seminar.** 3 credits.
Readings, individual or group projects, and discussion of papers reflecting on connections between liberal arts and sciences and political world. Notes: Course topic varies by semester. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Mason Core:** Synthesis (p. 135)

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** GoVT 300 and 18 credits in major.

**Schedule Type:** Seminar

**GoVT 491: Honors Seminar.** 3 credits.
Readings, individual or group projects, and discussions of seminar papers. Notes: Subject varies. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Mason Core:** Synthesis (p. 135)

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** GoVT 300 and 18 credits in major.

**Schedule Type:** Seminar

**GoVT 496: Directed Readings and Research.** 1-3 credits.
Reading and research on specific topic under direction of faculty member. Notes: Written report required; oral report of research may be required. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Major in government and international politics with 90 credits and permission of instructor and department.

**Schedule Type:** Independent Study

**500 Level Courses**

**GoVT 500: The Scientific Method and Research Design.** 3 credits.
Grounds students in the principles of the scientific method as the framework for investigating all research questions in political science, whether qualitative or quantitative in character (or both). Focus is on sound and rigorous research design. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment is limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

**GoVT 510: American Government and Politics.** 3 credits.
Examines institutions and processes of American government, including separate institutions of power in national government, theory and practice of federal system, role of interest groups and political parties, and effects of media and public opinion on electoral behavior and policy making. Seminar examining normative and empirical research. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Graduate, Non Degree or Senior Plus.

Enrollment limited to students with a class of Advanced to Candidacy, Registration Restrictions:

Schar School of Policy & Govt (p. 906). May not be repeated for credit.

prepare students for qualifying exams in comparative politics. Offered by

important theories and debates that characterize the subfield. Helps

this context, students will look at concepts and approaches, as well as

its scientific objectives, and its epistemological assumptions. Within

think theoretically and critically about the study of comparative politics,

covers the central themes under study. Designed to help students

analyzes selected major works of ancient, modern, or contemporary

political theory that illuminate basic problems and questions for people

engaged in political or civic life. Examines justice, liberty, equality,

autonomy, rights, obligation, participation, and nature of politics. Offered

by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: Admission to the MA in political science or permission of department.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GOVT 520: Political Theory. 3 credits.

Examines selected major works of ancient, modern, or contemporary political theory that illuminate basic problems and questions for people engaged in political or civic life. Examines justice, liberty, equality, autonomy, rights, obligation, participation, and nature of politics. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: Admission to the MA in political science or permission of department.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GOVT 530: Comparative Politics. 3 credits.

Examines fundamental issues in comparative politics and provides broad coverage of the central themes under study. Designed to help students think theoretically and critically about the study of comparative politics, its scientific objectives, and its epistemological assumptions. Within this context, students will look at concepts and approaches, as well as important theories and debates that characterize the subfield. Helps prepare students for qualifying exams in comparative politics. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GOVT 540: International Relations. 3 credits.

Focuses on changing structure of international politics, post-Cold War security issues, effect of globalized economy and information technology revolution, enhanced role of global corporations and nongovernmental organizations, and rise of nonsecurity issues in emerging international agenda. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GOVT 541: Introduction to Critical Analysis and Strategic Response to Terrorism. 3 credits.

Introduces terrorism as a complex threat to human security. Focuses on tools for analyzing terrorism and the underlying sources and conditions that contribute to it. Considers similarities and differences between terrorism and other threats to human security. Explores the lessons learned in the history of responding to terrorism. Focuses not only on different tactics of response, but also includes how different types of societies (dictatorship, democracies, etc.) have responded to terrorism and what the results of those responses have been. Includes case studies of responses to terrorism. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 510.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

GOVT 550: Seminar in Theories of Public Administration. 3 credits.

Reviews the theoretical traditions in American public administration, from the earliest days of the founding to the present. Concludes with consideration of contemporary theoretical debates over the proper role of public administrators and controversies about conflicting demands made on the public service and the public sector. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 510.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 560: Topics in Government and International Affairs.** 3 credits. Examines topics of contemporary and emerging concern in government and international affairs. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**600 Level Courses**

**GOVT 603: Seminar in the Courts and Constitutional Law.** 3 credits. Explores topics of contemporary and emerging concern in government and international affairs. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 510.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 604: Seminar on Congress and Legislative Behavior.** 3 credits. Examines theories and empirical research on the U.S. Congress and legislative behavior, including elections, representation, structures, and processes. Also examines Congress’ impact on the design and implementation of public policy, interactions with other branches of government, and comparisons with parliamentary systems. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 510.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 605: Seminar on the Presidency.** 3 credits. Examines the American presidency from a number of substantive and methodological perspectives. Readings and discussions in the course appraise the presidency within the system and focus on the role the presidency plays in formulating and implementing public policy. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 510.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GOVT 631: Seminar in Comparative Politics and Institutions.** 3 credits. Examines theories and practices of governance and development in comparative national settings. Course explores key subsets of the comparative politics literature in depth, including institutional change, regime types and transitions, democracy and authoritarianism, states and state-society relations, revolution, social movements, political cultures, and methods. Course is explicitly conceptual and cross-regional. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GOVT 632: Politics and Societies of the Middle East.** 3 credits. Examines theories and empirical research on the U.S. Congress and legislative behavior, including elections, representation, structures, and processes. Also examines Congress’ impact on the design and implementation of public policy, interactions with other branches of government, and comparisons with parliamentary systems. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 510.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GOVT 640: Strategic Responses to Terrorism: Coordinated Decision Making.** 3 credits. Revisits, expands, and examines the critical themes developed in the terrorism certificate program. Provides students with the opportunity to apply the theoretical concepts developed in practice. Integrates the ideas, theories, and practices considered in this track within the larger field of terrorism analysis and strategic responses to this threat. Notes: This is
the capstone course for the terrorism certificate program and must be completed in the final semester of the certificate program. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Corequisite:** GOVT 541.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GOVT 641:** Global Governance. 3 credits.
Applies systems approach to understanding global politics. Emphasizes properties and functions of global systems such as population, food, disease, energy, and trade, and how world’s political systems interact with them. Discusses how governance at municipal, national, and international levels affected by global systems. Examines role of nongovernmental organizations in global affairs. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 540.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

### 700 Level Courses

**GOVT 706:** Federalism and Intergovernmental Relations. 3 credits.
Examines broad trends in governance, including theory and practice of federal, state, and local governments. May include privatization, devolution, mandating, regulatory reform, and comprehensive federalism reform. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 510.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 712:** Problem Solving and Data Analysis II. 3 credits.
Advanced techniques and skills for solving policy-related problems or analyzing political data. Focuses on data gathering and analysis, use of statistical software, and multivariate analysis. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to PUAD 612.

**Recommended Prerequisite:** GOVT 511.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GOVT 713:** The Constitution, Criminal Procedure, and Security. 3 credits.
Explains legal doctrines that form basis of U.S. constitutional procedural rights, how these doctrines develop, and why courts rule as they do. Evaluates strengths, weaknesses of these rights. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to CRIM 721.

**Recommended Prerequisite:** CRIM 720, GOVT 728, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 717:** Qualitative Methods. 3 credits.
Focuses on scientific design of qualitative research questions and use of specific qualitative methods in scientific analysis. Covers when and how to use qualitative research methods to answer empirical questions in political science; primary data collection methods (interviews, observations, document review); the appropriateness of different research approaches; procedural and ethical concerns that may arise in use of qualitative methods. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 511 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 719:** Issues in American Politics. 3 credits.
Examines significant issue in American politics and political behavior. Analyzes topic of contemporary and emerging concern. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** GOVT 510.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 725:** Democratic Theory. 3 credits.
Examines democracy in terms of versions of liberalism, theories of social capital and civic participation, and discourses about civil, political, and human rights. How is democracy conceptualized normatively and empirically? What underlying economic, social, and cultural conditions promote democracy? What role do institutions play in creating and sustaining a stable democratic society? Takes a broadly comparative perspective, focusing on variety of established and emerging democracies around the world. Elective for students specializing in American government or international politics and
comparative governments. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 726:** *Theories of Justice*. 3 credits.
Overview of ancient and modern theories of justice with application to contemporary issues involving justice system and other social and political institutions. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to CRIM 700.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Recommended Prerequisite:** CRIM 700, GOVT 726, or permission of instructor.

**GOVT 727:** *Restorative Justice*. 3 credits.
Origins of restorative justice, its principles, implications for different justice organizations and processes, and application to problems such as family violence, human rights, and reconciliation following mass victimizations. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to CRIM 703.

**Recommended Prerequisite:** CRIM 700, GOVT 726, or permission of instructor.

**GOVT 728:** *Behavior of Law*. 3 credits.
Examines development of law, and law’s effect on human behavior. Reviews theories of law’s meaning and aims. Examines construction of law, and investigates consequences of law and legal decisions. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to CRIM 720.

**GOVT 731:** *Advanced Seminar in Comparative Politics*. 3 credits.
 Assumes basic proficiency in comparative analysis. Regionally based examination of key debates in the comparative politics field. Key theoretical and methodological debates are addressed through in depth examination of regional political processes. Regions include Latin America, Asia, Middle East, European Union, Africa, and Russia. Notes: May be repeated when topic is different with permission of department. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** GOVT 530.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**GOVT 732:** *Comparative Justice*. 3 credits.
Survey of justice systems and their environments in different lands and cultures. Identifies commonalities and differences among justice systems, evaluates them, and considers policy implications. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit. Equivalent to CRIM 702.

**Recommended Prerequisite:** CRIM 700, GOVT 726, or permission of instructor.

**GOVT 733:** *Islam and Politics*. 3 credits.
Provides an overview and understanding of the multifaceted nature of political Islam in the contemporary world. Covers brief history of Islam, formation of modern states in the post-colonial Muslim world, nature of contemporary Islamic radicalism and militancy and the future of Islamism. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**GOVT 734:** *Democratization*. 3 credits.
Examines concepts and concrete cases of democratization and cases where democratization is absent or incomplete. Investigates methods for measuring democracy and authoritarianism; the role state and society play in political change; the effects religion, the military, ethnic division, and technology have on government reform; and the extent to which international actors can encourage democratization. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**GOVT 735:** *Comparative Public Management*. 3 credits.
Examines the comparative decision environments for public managers and policy elites in the OECD countries generally, focusing on four models: 1) Franco-Japanese model, 2) German concentration model, 3) "Anglo-Saxon" (United States) model, 4) Chinese model. Notes: May apply to elective credit in the fields of comparative politics and public administration. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 739: Issues in Comparative and International Politics.** 3 credits.
Explores issues of contemporary and emerging concern in comparative and international politics. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** GOVT 540.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GOVT 741: Advanced Seminar in International Politics.** 3 credits.
Examines theoretical and methodological issues central to study of international relations by focusing on specific topic: American foreign policy, diplomacy, international law and organization, international relations theory, international ethics, human rights and humanitarian intervention, the environment, and others. Notes: May be repeated when topic is different with permission of department. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** GOVT 540.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GOVT 742: International Negotiation.** 3 credits.
Examines frameworks and perspectives that have guided scholarly work on negotiation. Students will analyze complex cases of negotiations in the areas of security, trade, and the environment, and practice negotiating key security and environmental issues on the agendas of nations and international organizations. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 743: International Political Economy.** 3 credits.
Examines interplay of international politics and economics. Discusses theoretical perspectives and analytical tools in academic field of international political economy, and applies theories and tools to trade, investment, exchange rates, development, regionalization, and globalization. Explores how international economic and political forces increasingly shape domestic interests, and how domestic politics affect international political economy. Lecture, discussion. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 343 or equivalent.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GOVT 744: Foundations of Security Studies.** 3 credits.
Introduces students to a selection of the original sources of the most important ideas that form the basis of security studies as a subfield of political science. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 745: International Security.** 3 credits.
Examines interplay of international politics and international security. Discusses theoretical perspectives and analytical tools in academic field of international security, and applies theories and tools to nuclear, biological, and chemical weapons, strategy and defense, and arms control. How domestic issues affect defense policies, terrorism, changing nature of international conflict, and human security will be examined. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 540.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GOVT 746: Media and International Affairs.** 3 credits.
Examines government/media interaction and media coverage of war and foreign policy since Vietnam and considers a range of critical policy questions. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**GOVT 753: Third-Party Governance.** 3 credits.
Examines design and management of government programs that rely on other levels of government and the private sector for delivery, with focus on such governmental tools as contracts, grants, loans, regulation, and tax credits. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
GOVT 755: Seminar in Politics and Bureaucracy. 3 credits.
Explores research and theory on political causes and effects of actions
government bureaucratic agencies. Readings examine origins of
agencies, influences on decisions and programs, sources of internal
and external accountability, pathologies of bureaucracies, and contributions
bureaucracies make on effective and just governance. Offered by Schar
School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 510.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GOVT 758: Homeland/Transportation Security Administration. 3 credits.
Examines the terrorist attacks of 9/11, vulnerabilities of the aviation
security at that time, failure of elected officials and administrators to
act more decisively to improve security before 9/11, and the policy
and administrative responses to the 9/11 attacks, including the creation
of the Transportation Security Administration and the Department of
Homeland Security. Includes the development of radical Islam and the
rise of Osama bin Laden and Al Qaeda. Offered by Schar School of Policy
& Govt (p. 906). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GOVT 759: Issues in Public Administration and Management. 1-3 credits.
Current issues in administration and management of public organizations
in contemporary American government. Includes practical applications of
theories and analysis to managerial problems. Emphasizes competence
in improving management in selected government settings. Notes: May
be repeated when topic is different. Offered by Schar School of Policy
& Govt (p. 906). May be repeated within the degree for a maximum 6
credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

GOVT 796: Directed Readings and Research. 1-6 credits.
Reading and research on specific topic under direction of faculty
member. Notes: Written paper required. Offered by Schar School of
Policy & Govt (p. 906). May be repeated within the term for a maximum 6
credits.

Recommended Prerequisite: 15 credits of GOVT courses at 500 level and
above, and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

GOVT 798: Political Science Research Project. 3 credits.
Research project related to student’s concentration under supervision of
a faculty advisor. Student produces substantial and original contribution
to political science knowledge on model of article in scholarly journal.
Offered by Schar School of Policy & Govt (p. 906). May not be repeated
for credit.

Recommended Prerequisite: 24 credits and approval of thesis proposal.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

GOVT 799: Political Science Thesis. 1-6 credits.
Substantial and original research paper with guidance of faculty advisor.
Thesis proposal must be approved in advance by advisor and two faculty
members who comprise thesis committee. Completed research must
be approved by committee and defended publicly in oral presentation.
Offered by Schar School of Policy & Govt (p. 906). May be repeated within
the degree.

Recommended Prerequisite: 24 credits and approval of thesis proposal.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

800 Level Courses

GOVT 800: PhD Research Seminar. 3 credits.
Provides an opportunity for PhD students in political science to present
and refine independent research, and to further improve understanding
of social scientific method as they prepare for conference presentations,
qualifying exams, and subsequent dissertations. Offered by Schar School
of Policy & Govt (p. 906). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students in the PHD Political Science program.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar
GOVT 810: American Political Development. 3 credits.
Advanced graduate-level seminar on historical roots of American politics. Examines political culture and historical development of U.S. institutions, and how laws and programs have been affected by historical and cultural development. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 510.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

GOVT 811: Advanced Seminar in American Institutions. 3 credits.
Advanced graduate-level seminar on specific topics of contemporary research and theory in American governmental institutions. Topics vary to include presidential politics, Congress, and politics of the judiciary. Readings include classic and contemporary literature. Seminar format with discussion, student presentations. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: GOVT 510.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

GOVT 815: Advanced Seminar in Political Behavior. 3 credits.
Advanced graduate-level seminar on specific topics of contemporary research and theory in American political behavior. Topic varies to include political parties, electoral politics, public opinion and voting behavior, interest groups, and lobbying. Readings include classic and contemporary literature. Seminar format with discussion, student presentations. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: GOVT 510.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

GOVT 820: Advanced Topics in Political Thought. 3 credits.
Advanced graduate-level seminar on topics of contemporary research and theory in political thought. Topics vary to include political ideologies, feminist theory, and political theory. Seminar format with discussion, student presentations. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: GOVT 520.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

GOVT 821: Ethics and Human Rights in International Affairs. 3 credits.
Advanced graduate seminar on theory and practice of diplomacy; alliance construction and destruction; coercive and cooperative diplomacy; diplomacy of certain great powers such as America, Russia, China, France, and Japan, and small and revolutionary powers. Also examines diplomacy and the media, and day-to-day diplomacy. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 540.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

GOVT 823: Advanced Seminar in Public Administration Research and Theory. 3 credits.
Focuses on a topic of central concern in contemporary public administration research and theory. Content of the seminar varies but includes such topics as organizing for homeland security, managerial and political effects of e-government, or the application of principal-agency models in public management. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: GOVT 510, GOVT 650.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

GOVT 831: Research Seminar in Regional Political Culture and Development. 3 credits.
Advanced graduate-level seminar on theories of political culture and economic development applied to Middle East, Latin America, Asia, and Africa. Debates economic growth and development from broad and rigorous analytical base. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: GOVT 540.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

GOVT 832: Doctoral Seminar in Theories of Organization and Bureaucracy. 3 credits.
Examines key issues in organization theory and behavior. Issues include organization design; interorganizational coordination, intelligence and decision making systems; leadership and motivation theories; and theories or organizations as agents of political and social change. Uses
case studies. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**GOVT 852: Seminar in Political Leadership.** 3 credits.
Graduate seminar on theories and practices of political and governmental leadership in American and comparative settings. Domestic and comparative cases of leadership in state-building, presidency, and public administration. Primary or secondary research on leaders encouraged. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** GOVT 510.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**GOVT 853: Advanced Seminar in Global Innovations in Public Finance.** 3 credits.
Explores how financial decisions by government jurisdictions are affected by global competition and global markets. The impact of cross-national movements of capital and information on tax, tariff, and interest rate policies will be examined, as will the numerous organizations, such as the World Bank, that have been created to reduce the impact on developing nations. Government and supernational efforts to deal with the unintended consequences and global capital flows will also be examined. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**900 Level Courses**

**GOVT 998: Doctoral Dissertation Proposal.** 3,6 credits.
Work on research proposal that forms basis for doctoral dissertation. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree.

**Recommended Prerequisite:** Advancement to candidacy.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**GOVT 999: Doctoral Dissertation Research.** 1-12 credits.
Research on approved dissertation topic under direction of dissertation committee. Notes: May be repeated for up to 9 credits in a semester. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

---

**Graduate School of Business (GBUS)**

**500 Level Courses**

Provides overview of key ideas & methods used in financial accounting and marketing in the context of applications in engineering. Designed to enable engineering professionals to appreciate business perspectives by developing familiarity with concepts and analytical approaches from accounting (financial statements, difference between cash and accrual approaches, and cost accounting) and marketing (market research, pricing, and branding). Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to any George Mason graduate engineering program or senior plus standing in a George Mason undergraduate engineering program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GBUS 540: Analysis of Financial Decisions.** 3 credits.
Provides a survey of financial decision-making. Assists students with developing a framework within which they can understand the linkages between financial decisions and organizational performance. Examines methods for using information based on financial statements in making decisions and assessing performance, evaluating investment opportunities, and choosing among alternative sources of funds. Focuses on public firms in the corporate sector as well as applications for privately-held companies and organizations in the government and non-for-profit sectors. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to GSOM 540.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GBUS 550: Strategic Thinking.** 3 credits.
Focuses on strategic thinking and implementation. Introduces the critical business skills of planning and managing strategic activities and focuses on role of strategic managers in generating competitive advantages. This course aspires to impart the participants with the skills necessary and appropriate for strategy analysis, formulation, implementation and control. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GBUS 551:** Leadership. 3 credits.
Distinguishes between leadership and management, and focuses on the critical roles and functions of leadership, including communication ability, use of power and influence, providing direction, aligning an organization’s systems, motivating a workforce, and creating a culture for effectiveness. Focuses on strategies for developing oneself as an effective leader. Integrates theory, research, and applications. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GBUS 696:** Directed Studies in Graduate School of Business. 1-3 credits.
Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 6 credits. Equivalent to GSOM 696.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**GBUS 697:** Special Topics in Graduate School of Business. 1-3 credits.
Sections established as necessary to focus on various topical issues that emerge in practice of business. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 6 credits. Equivalent to GSOM 697.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**700 Level Courses**

**GBUS 720:** Marketing Analytics. 3 credits.
Marketing analytics is a systemic approach to harnessing data/information to drive effective marketing decision making. The objective of this course is to equip you with the tools required to address fundamental marketing decision problems using a data-driven approach. It will train students to view the marketing processes and relationships systemically and analytically. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 720.

**Recommended Prerequisite:** Grade of B or higher in (STAT 515 or STAT 554); AND GBUS 738 or equivalent.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Business Data Analytics.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GBUS 721:** Marketing Research. 3 credits.
Develops skills to plan and implement effective marketing research studies. Topics include research design, data collection, statistical analysis, and use of database systems. Offers perspective on how managers can use market data to develop successful product or service strategies. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 721.

**Recommended Prerequisite:** Grade of B or higher in (STAT 515 or STAT 554).

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Business Data Analytics.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GBUS 738:** Data Mining for Business Analytics. 3 credits.
Examines how data warehouses and data mining are used to help businesses successfully gather, structure, analyze, understand and act on relevant data, both operational and contextual. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 738.

**Recommended Prerequisite:** B or higher in (STAT 515 or STAT 554).

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Business Data Analytics.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GBUS 739:** Advanced Data Mining for Business Analytics. 3 credits.
This course covers business analytics using advanced data mining methods for the purposes of developing predictive models and forecasting. The course will develop the concept of feature selection to
identify what dimensions to best use for constructing decision making models. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 739.

**Recommended Prerequisite:** Grade of B or higher in (STAT 515 or STAT 554); AND a B or higher in GBUS 738 or equivalent.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Business Data Analytics.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GBUS 744: Fraud Examination.** 3 credits.
Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 744.

**Recommended Prerequisite:** B or higher in (STAT 515 or STAT 554).

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Business Analytics.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GBUS 746: Real Estate Analysis and Valuation.** 3 credits.
Overview of real estate assets, markets, and decisions. Emphasizes development of analytical techniques and information required for implementation. Includes legal, economic, and public policy perspectives. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to GSOM 746, MBA 746.

**Recommended Prerequisite:** Graduate admission or permission of director.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**GBUS 748: Real Estate Investment.** 3 credits.
Develops frameworks for analyzing decisions about investing in real estate assets. Focuses on acquisition and analysis of information required to evaluate potential performance of assets. Applications of theories and techniques through case studies. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to GSOM 748, MBA 748.

**Recommended Prerequisite:** Graduate admission or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Greek (GREE) 100 Level Courses**

**GREE 150: Classical Greek I.** 3 credits.
Addresses linguistic, semantic, and cultural aspects. Covers basic structure and vocabulary, its place among other world languages and its unique role in development of modern thought. Notes: Lectures, discussions supplemented by web-posted material. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Recommended Prerequisite:** GREE 150 or permission of instructor.

**Schedule Type:** Lecture

**GREE 160: Classical Greek II.** 3 credits.
Expands proficiency, refines grasp of morphology and syntax, and fosters greater command of vocabulary. Introduces selected original passages from Greek classical authors. Notes: Lectures, discussions supplemented by web-posted material. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Schedule Type:** Lecture

**Health (HEAL) 100 Level Courses**

**HEAL 110: Personal Health.** 3 credits.
Focuses on individual health improvement by studying mental/emotional well-being, fitness, nutrition, drug abuse prevention, consumerism, safety and other topics. Notes: One section of HEAL 110 will be dedicated as Distance Education while remaining sections will be traditional classroom, 100% face-to-face. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Schedule Type:** Lecture

**HEAL 200: School and Community Safety.** 1 credit.
Focuses on safety in home, school, road, work, and community settings. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.
Schedule Type: Lecture

HEAL 220: Dimensions of Mental Health. 3 credits.
Focuses on integrating behavioral and sociocultural factors in studying mental health. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

HEAL 230: Introduction to Health Behavior. 3 credits.
Introduces health behavior in context of health psychology. Explores various theoretical models to understand health, illness and sick-role behaviors. Studies health and disease from a biopsychosocial perspective. Examines means of preventing and treating health problems. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences, Encore:Well-Being (p. 135)

Schedule Type: Lecture

300 Level Courses

HEAL 310: Drugs and Health. 3 credits.
Analyzes drug use, with emphasis on positive aspects, and presents alternatives to drug misuse and abuse. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

HEAL 312: Health and Wellness Choices. 3 credits.
Actively involves students in becoming managers of their personal health and well-being throughout life span. Consistent with Healthy People 2000 goals for nation. Emphasizes lifestyle activity and fitness, behavioral change, and maintenance. Notes: May be taken by nonmajors. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

HEAL 325: Health Aspects of Human Sexuality. 3 credits.
Covers biological, behavioral, and sociocultural factors in human sexual behavior. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

HEAL 327: Women's Health. 3 credits.
Examines health issues unique to women, including health care, food and exercise, reproductive and gynecological issues, chronic diseases, and issues of violence. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

HEAL 331: Men's Health. 3 credits.
Examines socio-cultural influences on men's development and expression of health beliefs and practices. Explores health issues specific to men. Analyzes research literature on interventions to improve men's health. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

HEAL 350: Interventions for Populations and Communities at Risk. 3 credits.
Identifies culturally, physically, emotionally, mentally, and demographically diverse populations and communities at risk. Covers implications for developing innovative programs and role of HFRR interventions. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

HEAL 351: Relationship Health. 3 credits.

Schedule Type: Lecture

HEAL 372: Health Communication. 3 credits.
Applies research-based models and theories of health assessment and promotion at individual, organizational, agency, and community levels. Uses communication approaches and skills in context of behavior change strategies, including policy and program development. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

400 Level Courses

HEAL 402: Introduction to Driver Education Instruction. 3 credits.
Introduces vehicle operator's tasks in highway transportation system. Provides essential knowledge and skills to instruct driver education. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

HEAL 403: Driver Education Practice and Administration. 3 credits.
Applies driver education to simulated and actual driving environments. Provides essential knowledge and skills to administrate driver education. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

HEAL 405: Teaching Methods in Health Education (K-12). 3 credits.
Covers content, methodology, and resource materials in teaching health education for physical education teaching majors. Notes: Field experience required. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: BSED/PHED status.

Registration Restrictions:
Enrollment is limited to students with a major in Physical Education.

Schedule Type: Lecture

HEAL 480: Special Topics. 1-3 credits.
Presents selected health issues or problems. Focuses on applying information to education programs. Offered by Recreation, Health & Tourism (p. 211). May be repeated within the degree for a maximum 3 credits.

Schedule Type: Lecture

HEAL 499: Independent Study in Health Education. 1-3 credits.
Studies problem area in health education research, theory, or practice under faculty direction. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.
Recommended Prerequisite: Completion of 90 credits.

Registration Restrictions:
Enrollment is limited to students with a major in Health Education, Health, Fitness Rec Resrcs, Individualized Study, Nursing, Physical Education (Special), Physical Education or Parks, Rec, Leisure Studies.

Schedule Type: Independent Study

500 Level Courses

HEAL 516: Program Development and Resources in Health Education. 3 credits.
Open to licensed and provisionally licensed health and physical education teachers in the commonwealth of Virginia and students in ASTL physical education program. Focuses on program development, health content, methodology, and resources for teaching preK-12 health education.
Notes: Distance learning course. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: Licensed and provisionally licensed health and physical education teachers in the Commonwealth of Virginia, and students in the Physical Education masters program.

Schedule Type: Lecture

Health Administration and Policy (HAP)

200 Level Courses

HAP 201: Health Professions Careers. 3 credits.
Acquaints students early in their college education with a variety of health professions careers. Provides overview of the health care system, and identifies the current supply and demand for health care professionals. Presents information about educational and licensing requirements as well as expected salaries. Defines professionalism and outlines the principal rights and responsibilities of being a health care professional. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Schedule Type: Lecture

HAP 202: Medical Terminology. 3 credits.
Prepares students with a basic understanding of medical terminology needed to work in a wide variety of healthcare environments. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Schedule Type: Lecture

HAP 290: Lifestyle Management. 3 credits.
In this introductory course on practical application of Bayesian causal modeling techniques and Statistical Process Control tools, students make resolutions and analyze their progress toward goal achievement. Each student maintains a diary and analyses it using Bayesian causal modeling techniques to understand the constraints and causes leading to their success and failures. Students analyze their pattern of success using Statistical Process Control tools and engage cyclical assessment of their self improvements. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Schedule Type: Lecture

300 Level Courses

HAP 301: Health Care Delivery in the United States. 3 credits.
Introduces history and current structure and function of U.S. health care delivery. Explores components and subsystems of health care, and sociopolitical (public and private) context that shapes system and affects access to health care and delivery of health services. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Schedule Type: Lecture

HAP 308: Public Health Informatics. 3 credits.
Provides students with a basic understanding of public health Informatics and its applications. Students will understand the basic technological tools and building blocks needed to utilize these tools in to improve their personal and professional productivity. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Schedule Type: Lecture

HAP 309: Healthcare Accounting. 3 credits.
Introduces basic concepts, standards, practices and terminology underlying financial and managerial accounting as applied in health-care organizations. Key concepts include accounting principles and conventions; financial reporting; valuations of assets; analysis, interpretation, and communication of financial information; the management of costs and profitability; and the use of spreadsheets and other tools. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 301.

Schedule Type: Lecture

HAP 310: Healthcare Ethics. 3 credits.
Introduces current ethical ideas and issues in healthcare and the healthcare system. Case studies require students to apply critical thinking in ethical decision making situations encountered by healthcare professionals. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 301.

Schedule Type: Lecture

HAP 312: Healthcare Law. 3 credits.
Introduces students to the legal environment in healthcare with emphasis on laws and regulations of routine importance to healthcare managers in the areas of labor, contracts, real estate, medical malpractice, general business, and intellectual property. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 301.

Schedule Type: Lecture

HAP 318: Introduction to IT Methods for Healthcare. 3 credits.
Reviews computer hardware and software with applications in healthcare. Covers basic features of operating systems (Windows and Linux), reviews use of basic office applications and introduces their...
advanced features. Introduces advanced tools to access and analyze healthcare data. Introduces basic programming concepts. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: IT 103 or IT 104 or equivalent.

Schedule Type: Lecture, Laboratory

HAP 360: Introduction to Health Information Systems. 3 credits.
An introduction to basic information management in health care service organizations. Provides an overview of health information systems for selected administrative functions and clinical care services, including electronic data interchange for billing and claims management, institutional approaches to ensuring data security and privacy, and information management and decision support for managers and clinicians. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Schedule Type: Lecture

HAP 361: Health Databases. 3 credits.
Introduces students to the design and use of various health and healthcare databases, and provides hands-on experience with database design and use. Reviews database management systems. Examines the application of databases for both clinical and managerial purposes. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 360

Schedule Type: Lecture

HAP 392: Human Resources Management in Healthcare. 3 credits.
Exposes students to the major issues, laws, administrative processes, procedures, and psychological factors to be considered when developing a human resources management system in healthcare organizations. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 301.

Schedule Type: Lecture

HAP 395: Health Care Finance. 3 credits.
Introduces finance in health care organizations. Reviews issues in reimbursement structures, regulatory mechanisms, cost control, and related factors affecting financial management of health service organizations including financial decision support skills. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 301.

Schedule Type: Lecture

HAP 396: Strategic Health Management and Planning. 3 credits.
Introduces past and present interventions that affect supply and demand for health care at community, state, regional, and national levels. Presents health planning and regulatory entities, and discusses strategic and program planning in context of current economic and market conditions. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 301

Schedule Type: Lecture

400 Level Courses

HAP 403: Assisted Living/Senior Housing Management and Philosophy. 3 credits.
Overview of growth of assisted living industry, its role in health care continuum, current or proposed regulatory environments, and differences between assisted living and other forms of senior health care and senior living services. Specific instruction provided in philosophy and day-to-day management of assisted-living communities, including resident care, operations, finance and budgeting, human resources and staffing, and successful marketing and community relations. Also examines industry future, including cutting-edge programs and technologies, and approaches to creating next generation of assisted-living services. Offered by Health Administration & Policy (p. 247). May not be repeated for credit. Equivalent to HAP 307.

Schedule Type: Lecture

HAP 404: Senior Housing Sales and Marketing. 3 credits.
Introduction and analysis of sales and marketing practices within senior housing environments, including but not limited to Active Adult (55+), assisted living, Alzheimer’s assisted living, and Continuing Care Retirement Communities (CCRC’s). Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 301.

Schedule Type: Lecture

HAP 410: Introduction to Health/Medical Practice Management. 3 credits.
An introductory course in the leadership and management of ambulatory health service practices and small provider organizations. Content covers a variety of health/medical practice management functions, including administrative systems, operations and strategies for effective management of quality, efficiency and business performance (contracts and marketing), and human resources. Trends in practice integration and affiliations with multiprovider groups and larger enterprises will be covered. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 301.

Schedule Type: Lecture

HAP 416: Leadership and Management of Health Systems I. 3 credits.
Introduces theoretical concepts and their application to the leadership and management of effective health care organizations. Explores the structure and function of health-related organizations and selected administrative and operational issues in program development and service design, emphasizing strategies for effective performance management, decision making, and communication. Offered by Health Administration & Policy (p. 247). May not be repeated for credit. Equivalent to NURS 436.

Recommended Prerequisite: HAP 301. Completion of HAP 300-level course requirements.

Schedule Type: Lecture

HAP 417: Leadership and Management of Health Systems II. 3 credits.
Explores challenges to providing effective leadership and management of health care organizations and systems of care related to operational issues such as personnel management and labor relations, information management, conflict and goal alignment, financial management, accountability, and quality and safety improvement. Focuses on
identification of management skills, technology, and strategy that influence optimal performance and communication between clinicians, administrative staff, and managers. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** Completion of HAP 416.

**Schedule Type:** Lecture

**HAP 420: Management of Project Resources.** 3 credits.
An introductory course in the management of project resources, including, but not limited to, assessing return on investment for projects and cost- ing out resources needed in project subtasks. Includes hands-on application of project management tools as they are applied in the health-related organization and the health service industry. Also includes a variety of variables that may affect cost control and cost variation, including the impact of finishing projects in shorter time frames than originally planned and activity-based costing. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 360 and HAP 378.

**Schedule Type:** Lecture

**HAP 425: Health Economics and Policy.** 3 credits.
An introduction to the role of economics in health care policy. Concepts used by economists to analyze health outcomes, health behaviors, health care markets, health insurance markets, and the role of government. Concepts are linked to current health policy debates, Relevance and limits of the health economics approach to analyzing health issues are discussed. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** ECON 103

**Schedule Type:** Lecture

**HAP 430: Process Improvement in Healthcare Organizations.** 3 credits.
Introduction to the process of quality management in health care organizations. Principles of quality management and guidelines for implementing total quality in health care are discussed, and differentiation between quality assurance and quality management presented. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 301.

**Schedule Type:** Lecture

**HAP 436: Electronic Health Data in Process Improvement.** 3 credits.
Focuses on using electronic health records (EHRs) to improve health care processes. Compares means and rates of clinical & managerial processes. Uses EHRs in risk-adjusted statistical process control. Uses Excel to analyze data on patient satisfaction, wait time, mortality/morbidity, and cost of care. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Schedule Type:** Laboratory, Lecture

**HAP 440: Mobile Health.** 3 credits.
Introduces emerging technologies used in Mobile Health (mHealth). Students will examine the impact and potential of mobile devices on health. Students will conceptualize and design health apps that incorporate evidence-based guidelines and capitalize on the mobility, portability, and input and output capabilities of smartphones and tablets.

Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Schedule Type:** Lecture

**HAP 442: Introduction to Health Care Politics and Policy.** 3 credits.
Reviews health care system issues and trends, and economic concepts, ways to understand the critical role of public health policy and the policy-making process in the United States. Identifies the major political institutions and policy processes that shape health policy. Examines the past and present health policy and its impact on changes in the ability of patients to access health services, the practice of health sciences professionals and the quality and process of care. Explores the role of politics at both the federal and state government in health policy-making and critical aspects of the U.S. health system are compared to those of other countries. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 301

**Schedule Type:** Lecture

**HAP 445: Introduction to Health Services Research.** 3 credits.
An introductory course for undergraduate students in understanding the basic methods of interdisciplinary health services research and program evaluation in health systems and policy. Emphasis is placed on understanding, assessing and using relevant findings from health services research. The course covers a variety of topics related to policy, management, and program evaluation in health delivery systems. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Schedule Type:** Lecture

**HAP 459: Health Data Standards and Interoperability.** 3 credits.
Introduction to prevailing and emerging data standards applicable in health information technology. Students will learn about standard-making organizations, such as HL7 and Healthcare Information Technology Standards Panel (HITSP), and their standardization processes. The structure of and relationship between standard terminologies applicable in healthcare, such as International Classification of Diseases (ICD-10-CM), Logical Observation Identifiers Names and Codes (LOINC) and Systematized Nomenclature of Medicine–Clinical Terms (SNOMED-CT), will be explained. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 301 or permission of instructor.

**HAP 361.

**Schedule Type:** Lecture

**HAP 460: Information Technology Project Management.** 3 credits.
Identifies methods and skills for managing health care information technology (IT) projects. Students learn tools such as critical path analysis, resource management, crashing projects, vendor selection, quality assessment, and risk analysis. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 360.

**Schedule Type:** Lecture

**HAP 461: Internet and Web Technology Applications for Healthcare.** 3 credits.
Introduces students to the major applications of Internet and Web technology in healthcare. Two major applications are studied: online
promotion/marketing for consumer-oriented health web sites, and online Personal Health Records (PHR). Students will learn about Search Engine marketing and the practical skill of creating an online health marketing/promotion campaign. They also will learn to create and manage PHR. The technological challenges such as reliability, privacy, security and organizational barriers to adoption are discussed. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 360.

**Schedule Type:** Lecture

**HAP 462:** Privacy and Security in Health Informatics. 3 credits. Health information security and privacy issues in the current healthcare system. Evaluates methods to achieve privacy and security. Discusses the important role of sound security policies and procedures; looks into technical solutions and non-technical solutions for achieving privacy and security. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 360.

**Schedule Type:** Lecture

**HAP 463:** Aging and Health Care Policy. 3 credits. Introduces issues and controversies surrounding need to sustain viability of Medicare, Medicaid and Social Security. Provides insights on the interaction of health policy, health economics, and aging of the population to help students understand and participate in ongoing debates about key U.S. entitlement programs. Provides skills in policy process and analysis as applied to aging and health policy. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 360.

**Schedule Type:** Lecture

**HAP 464:** Electronic Health Record Configuration and Data Analysis. 3 credits. Covers basic features and functionalities of an electronic health record (EHR). Introduces methods to access and analyze patient data from an EHR. Provides students with hands-on experience on EHR systems. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Schedule Type:** Laboratory, Lecture

**HAP 465:** Integration of Professional Skills and Issues. 3 credits. Assists students in synthesizing the varied dimensions of their roles as health professionals in a global society. Provides opportunities to examine issues in health care through reflection on the natural and behavioral sciences, humanities and other prerequisite coursework. Selected topics examined through writing, presentation, reading and discussion. (Writing intensive course). Offered by Health Administration & Policy (p. 247). May not be repeated for credit. Equivalent to NURS 465.

**Mason Core:** Synthesis (p. 135)

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** Senior standing.

**Schedule Type:** Lecture

**HAP 467:** Advanced Information Technology Project Management. 3 credits. Teaches project management methods and techniques with focus on health IT projects. Covers knowledge, skills, and abilities associated with certification (Certified Associate in Project Management).

Notes: Certification is not provided in this course. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 460 or HAP 417 or equivalent.

**Schedule Type:** Lecture

**HAP 468:** Health System Reform Policy Debates. 3 credits. Introduction to competing views about U.S. health system reform. Financing, insurance, delivery system and federalism issues will be covered, using theme of personal vs. collective responsibility. Topics include: determinants of health; private insurance markets, regulation, and public insurance; sources of and alternative solutions to inequitable access, poor quality and excess cost growth. Emphasizes evidence, beliefs, and self-interest behind competing visions. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Schedule Type:** Lecture

**HAP 480:** Research Internship in Health and Human Services. 3 credits. The student works as a member of a team engaged in health and human services research and attends a bi-weekly research seminar. Under direction of the course seminar leader and the faculty research mentor, the student will acquire selected research skills and develop introductory research writing and presentation skills. Offered by Health Administration & Policy (p. 247). May not be repeated for credit. Equivalent to HHS 480, SOCW 480.

**Recommended Prerequisite:** Open only to CHSS majors or students who have completed CHHS minor or certificate courses.

**Schedule Type:** Internship

**HAP 489:** Pre-Internship Seminar. 3 credits. Provides students with guidance and preparation for engaging in the internship. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Mason Core:** Capstone (p. 135)

**Schedule Type:** Lecture

**HAP 494:** Special Topics in Health Administration and Policy. 3 credits. Selected topics analyzing specialized areas in health administration and policy. Notes: Content varies. Lecture, seminar, laboratory, and workshops. Offered by Health Administration & Policy (p. 247). May be repeated within the term for a maximum 12 credits.

**Schedule Type:** Lecture

**HAP 498:** Health Administration Internship. 4 credits. Provides variety of applied management experiences in a health systems or related organization (field agency), under the direction of a HAP faculty member and a preceptor in the field. Students integrate and apply critical-thinking, project-planning, and management and communication skills in the internship experience and toward completion of an approved internship project. Notes: Taken in last semester of studies. Capstone course involves a two-hour weekly seminar and a 12-hour internship in a health-related organization. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Mason Core:** Capstone (p. 135)

**Recommended Prerequisite:** Open to HAP majors only.
Schedule Type: Internship

HAP 499: Independent Study in Health Administration and Policy. 1-6 credits.
Provides individual study of a particular problem area in health administration and policy research, theory development, or education under the direction of faculty. Offered by Health Administration & Policy (p. 247). May be repeated within the term for a maximum 6 credits.

Schedule Type: Independent Study

500 Level Courses

HAP 511: Ethics in Public Health. 3 credits.
Explores selected ethical issues in public health practice, research, and policy; specific ethical theories identified as the proper basis of public health; relevant ethical concepts and principles and how they inform existing public health policies, practices, and research; and how ethical reasoning can operate in public health practice, research, and policies. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 594: Independent Study in Health Administration and Policy. 3 credits.
Provides individual study of a particular problem area in health administration and policy research, theory development, or education under the direction of faculty. Offered by Health Administration & Policy (p. 247). May be repeated within the term for a maximum 6 credits. Equivalent to GCH 594, NURS 594.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

600 Level Courses

HAP 601: E-Commerce and On-line Marketing for Health Services. 3 credits.
Explores development of online health services; organization of online businesses; online marketing, financial, and clinical transactions; and venture capital and the IPO process. Explores creating and maintaining web pages and databases. Reviews literature on effect of computer services on patient care and health care organizations. Also reviews examples of both successful and bankrupt technology firms in health care. Student groups draft business plan and develop early version of service proposal. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 602: Statistics in Health Services Management. 3 credits.
An introductory course in basic statistics applied to applications in health systems management. Students use spreadsheet applications to perform a variety of statistical analyses (parametric and nonparametric statistics, including regression) to support program evaluation and managerial decision making in health systems. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 605: Introduction to Health Policy. 3 credits.
An introductory survey to the process and politics of health policy as it relates to the delivery and financing of health care in the United States. Examines the major public and private sector institutions responsible for health policy development, the interaction of these institutions and their competing interests to create and implement health policies, and public programs providing health coverage and services. Classroom and field experience involved. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 609: Comparative International Health Systems. 3 credits.
Uses Roemer’s Model of Health Systems to examine resource allocation, management, and health outcomes in the United States and around the globe. The structure and functioning of national health systems based on geographic location and governance in developing and developed countries (democracies, monarchies, and communist nations). Resource allocation across the continuum of nations and relationship to national health needs, health status, and longevity are examined. Notes: An online course in comparative international health care systems. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 610: Health/Medical Practice Management.** 3 credits. Regulatory pressures, technology, managed care contracting, revenue cycle management, and legal issues are making medical practice management more complex. Physicians groups struggling with these demands are finding a need for sophisticated management. Prepares the student to manage the modern practice by providing a foundation in the leadership and management of ambulatory health services and small provider organizations. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 612: Maintaining Business Continuity in Health Care.** 3 credits. Considers potential types of catastrophes, their likely impact, and how organizations could continue their mission in the aftermath. Explores interdependences among various components of the health care delivery system, regional health services, disaster planning, business record protection, patient information and information systems protection, manpower planning, professional credentialing, access to supplies and drugs, and financial implications and resources. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 615: Revenue Management for Clinical Practices.** 3 credits. Assists healthcare leaders and managers to become more effective decision makers, problem solvers, and communicators in revenue and financial management of clinical practices. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 610.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 618: Computational Tools in Health Informatics.** 3 credits. Introduces computational tools used in health informatics. Reviews hardware and software needs and uses. Topics covered include operating systems, virtualization and high performance computing, basic programming in a scripting language, basic data analysis and data integration skills, and use of specialized software. All topics are covered in context of specific solutions used in health information systems. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**HAP 621: Organization Behavior and Healthcare Leadership.** 3 credits. This is an introductory course in the application of organizational behavior and theories of leadership to the management of interdisciplinary teams and decision making in healthcare organizations. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 622: Healthcare Information Systems Analysis and Design.** 3 credits. Introduces system analysis, modeling, design, and management of large-scale healthcare information systems. Describes both traditional and data-driven analysis and design methods. Different aspects of systems analysis and design are illustrated using examples from healthcare industry case studies applied to a group project. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 632: Grants Funding and Development.** 3 credits. Provides knowledge of private and public funders, funding mechanisms, tools and resources. Includes content on private and government funding streams relevant to public health, hospitals and other non-profit health related entities, interpretation of funder motivations and engagement strategies; essential skills for developing externally funded projects; grant proposal writing and grant requirements; assessment skills/strategies
and award management/stewardship. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 640: Current Issues in Health Policy.** 3 credits.
Introduces students to current health policy issues, the public policy process, and their influence on the organization and financing of health care. Attention is given to the 1) roles of key players in health policy formulation and implementation, and 2) public policy responses to major issues such as disparities and uninsured coverage, cost-containment, and quality of care. Differing perspectives on reforming health care are debated. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 645: Introduction to Health Services Research.** 3 credits.
An introductory course in the basic methods of interdisciplinary health services research and program evaluation in health systems and policy. The course covers topics related to policy, management, and program effect and evaluation within health delivery systems, including research design, existing data systems, measurement of quality and basic cost benefit, and effectiveness analysis. Offered by Health Administration & Policy (p. 247). May be repeated within the degree for a maximum of 6 credits.

**Recommended Prerequisite:** HAP 678.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 647: Regulatory Requirements for Health Care Systems.** 3 credits.
Helps health care professionals understand link between infrastructures of organization and regulatory and accreditation processes for health care organizations. Covers major accrediting agencies and their roles, accreditation principles, and survey process. Focuses on hospitals with reference to ambulatory care, managed care organizations, rehabilitation centers, laboratories, and home health and long-term care facilities. Emphasizes requirements of Joint Commission on Accreditation of Health Care Organization and regulations mandated by Health Care Finance Administration. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 651: Senior Housing Sales and Marketing.** 3 credits.
Introduction and analysis of sales and marketing practices within senior housing environments, including but not limited to Active Adult (55+), assisted living, Alzheimer’s assisted living, and Continuing Care Retirement Communities (CCRC’s). Topics include a review of the role of marketing in health care, the senior housing consumer and product, the development of marketing plans, and administrative management of the promotion, lead management, and sales process. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 652: Essentials of Health Insurance and Managed Care.** 3 credits.
Survey course in US health insurance and managed care. Provides an overview of the different types of health insurers and managed care organizations, with content on sales and marketing, provider network management and reimbursement, medical and quality management, claims processing, member services, IT and operational finance. Policy, laws and regulations affecting the industry will also be addressed. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**HAP 661: Policy Development and Analysis for Community Health Programs.** 3 credits.
Prepares students to critically analyze issues and develop skills pertinent to effective policy development for community and family public health programs. Explores what constitutes a vulnerable population and examines current government programs and policies supporting these programs for such populations. Recent case examples ground students in current issues faced by community groups and other health interests.
Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 662: Health Policy for Elders and People with Disabilities. 3 credits.
An introduction to health policy, health economics, and the aging of the American population. Focuses on the effect of chronic illness and disability on health care costs and provides students with skills in policy process and analysis as applied to acute care, long-term care, and health promotion for elders and people with disabilities. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 678: Introduction to the U.S. Health System. 3 credits.
Explores the U.S. Health System focusing on historical development, current configuration and possible future direction. Includes study of health system development, key influencers, accessibility, financing, changing components and effects system has on patients, providers, financiers, employers, government, insurers and society. Role of population health management and public health is explored, including impact of social, cultural, economic, and environmental factors on health care systems and practices. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 680: Applied Public Health Leadership and Management. 3 credits.
Survey course in leadership, management, and planning applied to public health systems. Students apply theoretical knowledge from a variety of disciplines relevant to development and implementation of public health policy, regulatory directives, public health program planning and management (including human resources and financial management), and the design and evaluation of public health services/functions. Content includes strategies for ensuring access to essential public health services and use of evaluation and monitoring systems to ensure the safety, efficiency, and effectiveness of local public health programs/systems. Course emphasizes leadership, communication, systems thinking, data-driven decision making, and ethical practice in public health systems. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 686: Quality Improvement in Health Services. 3 credits.
Examines how quality in healthcare is measured and controlled in order to improve processes and outcomes. Demonstrates how interdisciplinary teams analyze quality by applying a variety of quantitative methods (such as statistical process control, histograms, and Pareto charts); and qualitative methods (such as root cause analysis, affinity diagrams, nominal group technique, and flow charts). Analyzes performance improvement techniques designed to improve processes. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 690: Independent Study. 1-3 credits.
In-depth studies of selected area of health science theory, research, or practice under direction of faculty. Offered by Health Administration & Policy (p. 247). May be repeated within the degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

700 Level Courses

HAP 700: Introduction to Health Informatics. 3 credits.
Introduces the study of data and information flow in healthcare delivery. Covers the history and evolution of methods in information management and the role and contributions of an inter-disciplinary health informatics workforce. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Corequisite: HAP 678 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

HAP 701: Health Data: Vocabulary and Standards. 3 credits.
Explores the challenges of representing health care data using standardized vocabulary in health information systems. Topics include data standards and semantics, policy, and theory and practice of standardization. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 678, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 702: Managerial Accounting in Health Care. 3 credits.
Practical examination of controllership function in health care organizations and systems (profit and nonprofit), with emphasis on policy formulation and evaluation of performance, including cost methods and systems; measurement criteria; and managerial planning, methods, and techniques. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: Graduate-level statistics course.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 703: Financial Management in Health Systems. 3 credits.
Examines tools and methods of financial management in health care organizations and systems, with emphasis on allocation and use of funds. Analyzes costs and constraints of alternative source of funds, and applies financial decision instruments and effect on operational management and market value of entity. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: Graduate-level statistics course.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 704: Contemporary Issues in Health Systems Management. 3 credits.
Analyzes management theory and practice from recently evolving works that identify, analyze, and resolve strategic organizational problems and issues in health care systems. Applies leadership strategy to effectively manage variety of critical issues, including organizational development, change management, human relations and diversity, quality management for organizational and clinical effectiveness, technology, competing priorities, conflicting constituencies, delivery system redesign, and health services research. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Schedule Type: Laboratory

HAP 705: Strategic Management and Marketing in Health Care. 3 credits.
Explores role of strategic management and marketing in healthcare organizations and process used to formulate, implement, and evaluate cross-functional decisions to achieve their objectives. Reviews formulation of strategic plans to address strengths, weaknesses, opportunities and threats facing organizations from both external and internal environments. Considers type of environmental forecasts and competitor intelligence healthcare organizations need to make timely and adaptive strategic and marketing decisions. Addresses conditions necessary for successful strategic execution. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 706: Integrated Health Systems Management. 3 credits.
Explores emerging structures for financing and delivery of comprehensive health services in integrated health systems. Covers successful development and management of alliances, provider hospital organizations, and managed care systems with emphasis on strategies for vertical integration, community partnering, contract negotiation, governance, and management of antitrust situations. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 707: Human Resource Management in Healthcare. 3 credits.
Addresses how people are managed within healthcare organizations to achieve performance consistent with the organization’s strategic objectives. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 709: Health Care Databases. 3 credits.
Introduces design and use of health and medical databases, providing hands-on experience. Explores uses of medical record systems. Includes review and analysis of databases and database management systems. Examines application of databases to clinical and managerial transaction. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
HAP 712: *Topics in Public Policy*. 3 credits.
Provides students with foundational principles, informatics tools, methodologies, data sources, terminologies, and policy issues related to the emerging field of population health informatics. Examines key concepts such as registries, electronic health records, epidemiological databases, and quality reporting. Employs specific health informatics tools throughout the course, with many opportunities for gaining practical experience. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

HAP 713: *Project Management in Health Information Technology*. 3 credits.
Applies body of knowledge in project management to the implementation of information technology and systems in healthcare organizations. Examines how tasks such as needs assessment, project planning, project cost analysis, risk management, and management of personnel are readily included in the use of health information systems. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

HAP 714: *Ethical Issues in Health Administration and Policy*. 3 credits.
Seeks to explore selected ethical issues in health administration and policy and decision options by understanding ethical theories, concepts, and principles and their role and selective application in the development, organization, and administration of health policy, as well as the organization and delivery of health services. Students will learn specific ethical concepts, theories, and principles, how these inform existing health policies and practices, and how ethical reasoning can operate in the policy process and administrative decisions in the health delivery systems. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

HAP 715: *Health Economics*. 3 credits.
Emphasizes understanding of economic efficiency in the U.S. health system. Microeconomic methods examine markets and resources in health care. Health care examined as commodity. Explores demand for health and medical care services, provider behavior, and function and behavior of insurance markets. Topics include government role, financing arrangements, insurance reform, rationing, price regulation, and provider competition. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

HAP 718: *Consumer Health Informatics*. 3 credits.
Explores the emerging subfield of health informatics, which is at the intersection of public and community health, health education, and more traditional informatics areas. Demonstrates the use of technology to increase awareness and improve population health. Reviews issues involved in consumer health informatics, and explores hands-on informatics tools and applications. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 709.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

HAP 719: *Advanced Statistics in Health Services Research I*. 3 credits.
Covers principles and methods of statistical data analysis and inference. Emphasizes the use and application of various data analysis techniques and their assumptions. Computer outputs will be used to demonstrate the application of statistical techniques in analyzing health related data sets. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 602 or GCH 601 or an equivalent statistics course.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

HAP 720: *Health Data Integration*. 3 credits.
Students learn to manipulate large databases, create link table queries, write SQL application programs, understand sources of data conflicts, and identify methods of integrating ODBC databases with legacy data. Covers data warehousing, methods of analyzing large databases, including Bayesian belief networks and machine learning in health care context. Features semester long data integration group project. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 709.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

HAP 721: Project in Data Analysis. 1-4 credits.
Focuses on analysis of data from electronic health records. Includes instruction on preparation of data including (a) removing inaccurate information, (b) organizing the timing of events/variables, (c) summarizing time-based variables. Students work on real data obtained by them from a practicum through an employer or real data supplied by instructor. Students must complete a literature review, describe methods used, present results, and discuss findings. Offered by Health Administration & Policy (p. 247). May be repeated within the degree for a maximum 4 credits.

Recommended Prerequisite: HAP 361 and HAP 602 or equivalent statistics and database courses.

Schedule Type: Independent Study

HAP 724: Analysis for Healthcare Executive Decision Making. 3 credits.
Challenges students to solve complex problems by integrating the knowledge, skills, and abilities attained in prerequisite courses. Applies quantitative and qualitative tools and methods and critical thinking skills to find solutions to comprehensive case studies. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 686, HAP 703, HAP 705.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 725: Statistical Process Control in Healthcare. 3 credits.
Provides students with hands-on experience with data from electronic health records. Introduces students to causal analysis of observational data, including propensity scoring and stratification. Provides students with access to simulated data from electronic health records. Exposes students to trends that influence the quality management system and drivers for change, including measures used by CMS to strengthen value based payment. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 686, HAP 703, HAP 705.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

HAP 727: Program Evaluations in Health Care. 3 credits.
Methods of evaluating health and social programs, including anthropological case studies, decision analytic and quasi-experimental approaches. Emphasis is placed on using methods of continuous quality improvement and benchmarking exchanges in evaluating multisite programs. Assess cost effectiveness of programs (including assessment of patient census, employee activities and program outcomes). Evaluation of health care interventions, rate setting, and managed care are discussed. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
organization, and financing. Offered by Health Administration & Policy (p. 247). May not be repeated for credit. Equivalent to HAP 642.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 745: Health Care Security Policy. 3 credits.
Focuses on health security and privacy policy and compliance issues. Students will develop policies for the type of threats faced by facilities. The legal and business policies for facility, personnel, travel, information, and patient security will be discussed. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 746: Health Policy Leadership. 3 credits.
Examines leadership strategies to influence health policy-making from a community stewardship and interest group advocacy perspective. Students will develop an understanding of how health and socio-economic issues affect the development, implementation and change of health policy, appreciate the complexity of engaging the public policy process and selectively employ strategies to influence politics and the policy-making process. Offered by Health Administration & Policy (p. 247). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 750: Legal Issues in Health Administration. 3 credits.
Prepares health professionals to understand legal principles, statutes, regulations, and case law related to managing health care organizations and health professionals’ practice. May compare legal health care issues from domestic and international perspectives. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 752: Advanced Health Information Systems. 3 credits.
Provides in-depth analyses of health information systems including Electronic Health Records, Personal Health Records, and Decision Support Systems. Analyzes architectural trends, workflow redesign, and implementation strategies. Describes new trends in computing technologies and infrastructure in health applications. Laboratory time provides learning experience and practical skills in various allied situations. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 700 and HAP 709, or permission by the instructor or Program Coordinator.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 760: Philosophy of Science in Health Services Research. 3 credits.
An introductory course on the theory and philosophy of science and humanism that relate to the design and conduct of health services research. The course examines selected theories on the nature of reality (ontology), the justification of knowledge claims (epistemology), and how knowledge is constructed (methodology) in design and analysis of health services research. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 762: Cost-Effectiveness for Health Care Management and Policy Decisions. 3 credits.
A survey course in health services research methods for the application of economic evaluation techniques used in health care policy analysis and clinical or administrative applications for health care service planning and evaluation. Introduces methods applied to health care technology assessment, medical decision making, health resource allocation, and policy-making. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 764: Health Policy and Government Payment Systems for Health Care Services. 3 credits.
Examines the rationale for government intervention in provider payment and explores the current policy issues and politics of major government provider payment systems, including Medicare and Medicaid, and examines options for managing these programs more effectively. The course will "follow the money" as it flows through government and provider payment systems, model potential changes in such systems, and identify policies for improving the operation of these programs and payment systems. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
HAP 765: Methods for Health Policy Analysis. 3 credits.
Explores conceptual, analytic, and technical methods/approaches used in health policy analysis and planning. Students will learn to select from among alternative methods for applied concept modeling, graphical data presentation, needs assessment, goal clarification, group decision methods, and a variety of quantitative applications and frameworks for evaluating policy impact. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 766: Policy Implementation and Health System Management Dilemmas. 3 credits.
Analyzes selected public policies and regulations and the impact of implementation and compliance/noncompliance on health care systems and organizations. Examines management responsibilities, challenges, and dilemmas (fiduciary and ethical) of implementing selected policies and regulations (promulgated or proposed). Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 703 or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 770: Medical Decision Making and Decision Support Systems. 3 credits.
Introduces the complex subject of medical decision making. Examines systematic approaches to decision making. Explores principles governing the design, application, and maintenance of clinical decision support systems. Laboratory time provides learning experience in various applied situations. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 701 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 775: Implementing Health Reform in Health Service Organizations. 3 credits.
Prepares health professionals to understand, lead, and manage health service organizations undergoing payment reform, evolving quality and outcomes reporting requirements, process redesign challenges, culture change, and a changing regulatory environment. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: HAP 678.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 777: Health Data Visualization. 3 credits.
Introduces the principles and techniques of data visualization with special focus on applications in healthcare. Students will learn practical skills to make visually appealing graphics on web browsers to present their data using a publicly available JavaScript library D3 (Data-driven documents). Notes: Assumes that students have basic knowledge of the web, browsers, HTML, CSS, and JavaScript programming. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Schedule Type: Lecture

HAP 780: Data Mining in Health Care. 3 credits.
An introductory course to data mining and knowledge discovery in health care. Methods for mining health care databases and synthesizing task-oriented knowledge from computer data and prior knowledge are emphasized. Topics include fundamental concepts of datamining, data preprocessing, classification and prediction (decision trees, attributional rules, Bayesian networks), constructive inductive, cluster and association analysis, knowledge representation and visualization, and an overview of practical tools for discovering knowledge from medical data. These topics are illustrated by examples of practical applications in health care. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: Graduate-level statistics course.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

HAP 789: Pre-Capstone Professional Development Seminar. 1-3 credits.
Provides students with guidance and preparation for engaging in the capstone practicum. Offered by Health Administration & Policy (p. 247). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HAP 790: Capstone Practicum in Health Systems Management. 3 credits.
Field practicum in health systems management where students function as an integral member of an organizational entity to complete a non-thesis project while continuing to build skills in leadership, critical thinking and systematic problem analysis. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

Recommended Prerequisite: All coursework in the major.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

HAP 791: Practicum in Public Health. 3 credits.
The practicum provides students with an in-depth supervised experience in an approved public health organization. The practicum will require
students to complete a project related to an actual public health issue that is a focus within the organization. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** Students must complete all of the core MPH coursework (epidemiology, biostatistics, health education, environmental health, and public health administration) and pass the MPH comprehensive exam with a 70% or better.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Internship

**HAP 793: Final Project in Applied Health Policy.** 3 credits.
Provides students experience in executing an approved written research project related to a public health policy issue. Students will demonstrate skills learned in the MSHMP program. Projects require students to understand different positions related to a particular policy issue, to assess existing evidence and research related to the policy issue, and to formulate additional research questions. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Research

**HAP 799: Master’s Thesis.** 1-6 credits.
Provides students with skills to develop their research proposal, conduct their research, and complete their thesis in a relevant field of study. Offered by Health Administration & Policy (p. 247). May be repeated within the degree.

**Recommended Prerequisite:** Admission to one of the master’s programs in the department and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Thesis

**800 Level Courses**

**HAP 819: Advanced Statistics in Health Services Research II.** 3 credits.
Covers principles and methods of advanced statistical data analysis and inference with applications in health services research. Emphasizes the use and application of various data analysis techniques, including multivariate statistics, regression and longitudinal data analysis. Use of statistical software STATA demonstrates the application of statistical techniques in analyzing health related data sets. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 719.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**HAP 822: Research Designs and Analysis in Pharmaceutical and Health-Related Clinical Trials.** 3 credits.
A survey course that introduces students to the design and management of clinical trials research and pharmaceutical research and development, including drug development and FDA drug approval. This course also covers a variety of biostatistical methods as they apply to biomedical and biotechnology industry research with human subjects. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 710 or equivalent graduate statistics course.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**HAP 823: Comparative Effectiveness Analysis using Observational Data.** 3 credits.
Applies linear and logistic regression to analysis of comparative cost and effectiveness using massive data in electronic health records. Emphasizes (1) ridge regression and (2) propensity scores. Covers the following topics: (1) counterfactual framework and assumptions, (2) data balancing, (3) matching or weighting, and (4) sensitivity analysis. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 719.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**HAP 835: Causal Inference in Health Services Research.** 3 credits.
Discusses the nature of causation and alternative means of inferring causal relationships. Included are experimentation, matching, instrumental variables, conditioning, and mechanism in network models. Covers a broad range of methodological considerations that emerge in identifying causal effects. The focus is less on analysis of data and more on considerations of causal inference in non-randomized study design. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**HAP 866: Politics of Influencing Health Care Policy.** 3 credits.
Focuses on process of formulating health care policy and analyzing implications for nursing, administration in nursing, and education and nursing service. Examines current and impending health issues, legislative process, and program implementation evaluation. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**HAP 868: Advanced Research Seminar in Health Policy Analysis.** 3 credits.
Seminar on advanced research methods that analyzes theoretical and analytic foundations to critique health services research and health policy analysis. Students synthesize, integrate, and apply theoretical knowledge and advanced skills relevant to health services research, policy analysis, and program evolution. Notes: Limited to doctoral
students having completed core courses in statistics and research design, or permission of instructor. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 703 or equivalent or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**HAP 880: Advanced Health Data Mining.** 3 credits.
Provides the knowledge and skills needed to analyze health data using modern tools. Describes analytics of administrative and clinical data. Covers concepts and tools for big data analytics and NoSQL data analytics. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 719, HAP 780, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**900 Level Courses**

**HAP 925: Advanced Methods in Qualitative Research for Health Care.** 3 credits.
Builds upon the foundation of qualitative research in health care. Designed to develop skills in data generation techniques; data analysis using NVivo and text analysis software, including narrative and intentions analysis; application of standards for qualitative research; and utilization of various styles for qualitative reports and research proposals. The course also reviews mixed methods designs for research studies. Offered by Health Administration & Policy (p. 247). May not be repeated for credit.

**Recommended Prerequisite:** HAP 719, HAP 780, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**HAP 998: Doctoral Dissertation Proposal.** 1-3 credits.
An independent study for HAP doctoral students resulting in the development of a doctoral dissertation proposal. Includes development of the research problem, study methods, data analysis and literature review. Notes: The course must be supervised by a HAP faculty member qualified to serve as a dissertation chair. Offered by Health Administration & Policy (p. 247). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Advancement to candidacy.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**HAP 999: Doctoral Dissertation.** 1-9 credits.
Under faculty direction, develop dissertation proposal and complete the dissertation. Offered by Health Administration & Policy (p. 247). May be repeated within the degree for a maximum 25 credits.

**Recommended Prerequisite:** Course is open to honors college students only.

**Schedule Type:** Independent Study

---

**HHS 491:** Foundations of Clinical Research. 1 credit.
Provides students with fundamental concepts and basic analytic methods pertaining to the design, analysis, and interpretation of clinical research. Outlines the research process by introducing the components of research - from beginning a literature search, to designing an experiment, to selecting appropriate outcome measures, and collecting data. Offered by Health and Human Services (p. 235). May not be repeated for credit. Equivalent to HAP 480, SOCW 480.

**Recommended Prerequisite:** Open only to CHHS majors or students who have completed CHSS minor or certificate courses.

**Schedule Type:** Lecture

**HHS 492:** Internship in Clinical Research. 3 credits.
Provides students with experiential learning in a research laboratory that focuses on clinical health research. Students are matched with a clinical research supervisor that provides both research and professional development mentorship. Through this opportunity, students enhance their research, critical thinking, problem-solving and presentation skills. An application must be submitted in the semester prior to enrollment in the course. During the semester prior to entry, students may be asked to acquire certain competencies/certifications in order to fully participate at their research site (e.g., human subjects research protections training, lab safety, certification, HIPAA training). Offered by Health and Human Services (p. 235). May not be repeated for credit.

**Recommended Prerequisite:** All courses in the PhD program.

**Schedule Type:** Seminar

**HHS 493:** Research Internship in Health and Human Services. 3 credits.
The student works as a member of a team engaged in health and human services research and attends a bi-weekly research seminar. Under direction of the course seminar leader and the faculty research mentor, the student will acquire selected research skills and develop introductory research writing and presentation skills. Offered by Health and Human Services (p. 235). May not be repeated for credit. Equivalent to HAP 480, SOCW 480.

**Schedule Type:** Seminar

**HHS 494:** Healthy Aging. 3 credits.
Offers a broad perspective of normal aging in the older adult, and the impact of chronic disease and psychosocial and cultural factors on the aging process. Offered by Health and Human Services (p. 235). May not be repeated for credit.

**Schedule Type:** Lecture

**HHS 495:** Research/Scholarship Intensive. 1 credit.
Students participating in the Research/Scholarship Intensive are required to complete an independent study research project. The student will acquire selected research skills and develop introductory research writing and presentation skills. Offered by Health and Human Services (p. 235). May not be repeated for credit.

**Schedule Type:** Independent Study
500 Level Courses
HHS 597: Approaches to Quantitative Data Analysis in Health Care Research. 3 credits.
Examines univariate and bivariate statistical procedures appropriate for analyzing quantitative health care research data. Includes selecting, applying, and interpreting data analysis procedures. Offered by Health and Human Services (p. 235). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

600 Level Courses
HHS 646: Social Gerontology. 3 credits.
Examines physical, psychological, sociological, cultural, spiritual, and economic aspects of aging and explores the challenges of service delivery to older persons. Considers the impact of aging populations on the social structure, economy, demography, and social policy of society and identifies social and cultural forces that influence older persons and their families, with special regard to caregiving, institutionalization, and social roles in retirement. Offered by Health and Human Services (p. 235). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HHS 648: Aging and Health. 3 credits.
Provides an overview of normal aging and explores factors that affect health and well being in older adults; demonstrates strategies for maintaining health and managing chronic illness in older adults; examines common misconceptions about aging and healthcare issues; and explores the process of normal aging and the presentation of common health conditions in older adults. Offered by Health and Human Services (p. 235). May not be repeated for credit. Equivalent to NURS 648.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

800 Level Courses
HHS 810: Systematic Reviews of Healthcare Research. 3 credits.
Applies systematic methods for evaluating current research in order to develop empirically-based decisions about the next major research questions that need to be addressed in the students’ selected area of inquiry. Offered by Health and Human Services (p. 235). May not be repeated for credit.

Recommended Prerequisite: Master’s degree in nursing, social work or health-related discipline.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

HHS 818: Advanced Ethics of Healthcare Research. 3 credits.
Analyzes ethical issues associated with designing and conducting healthcare research in diverse populations and settings. Offered by Health and Human Services (p. 235). May not be repeated for credit. Equivalent to NURS 957.

Recommended Prerequisite: Master’s degree in nursing, social work, or health-related discipline.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

HHS 825: Conducting and Publishing Healthcare Research. 3 credits.
Applies principles of writing for scientific publication. Offered by Health and Human Services (p. 235). May not be repeated for credit. Equivalent to NURS 875.

Recommended Prerequisite: Master’s degree in nursing, social work, or health-related discipline.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Internship

Hebrew (HEBR)

100 Level Courses
HEBR 101: Elementary Hebrew I. 3 credits.
Designed for students with no knowledge of Hebrew. Introduction including grammar, vocabulary, oral skills, listening comprehension, and reading. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Schedule Type: Lecture
HEBR 102: Elementary Hebrew II. 3 credits.
Continuation of HEBR 101. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Recommended Prerequisite: HEBR 101 or equivalent.

Schedule Type: Lecture

HEBR 150: Introduction to Biblical Hebrew. 3 credits.
Introduces basic vocabulary, grammar, and development of reading skills with introduction to religion and culture of ancient Israel that produced the Hebrew Bible/Old Testament. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Schedule Type: Lecture

HEBR 160: Readings in Biblical Hebrew. 3 credits.
Continuation of HEBR 150 to increase students’ proficiency in vocabulary and understanding of morphology and syntax. Selected passages from Hebrew Bible read; students introduced to text formation and analysis. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Recommended Prerequisite: HEBR 150 or equivalent.

Schedule Type: Lecture

200 Level Courses

HEBR 201: Intermediate Hebrew I. 3 credits.
Further development of skills acquired in HEBR 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing. Notes: Lab work required. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Recommended Prerequisite: HEBR 102 or equivalent.

Schedule Type: Lecture

HEBR 202: Intermediate Hebrew II. 3 credits.
Continuation of HEBR 201. Notes: Lab work required. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

Recommended Prerequisite: HEBR 201 or equivalent.

Schedule Type: Lecture

Higher Education (HE)

600 Level Courses

HE 601: The Community College. 3 credits.
Studies institutional character of the community college, including history, purpose, clientele, organization, finance, and social function. Studies issues currently faced by community colleges. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 601.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HE 602: College Teaching. 3 credits.
Describes issues that affect teaching and learning and provides basic tools to use in college classroom. Teaches how to plan course, develop syllabus, promote learning among diverse students, and implement classroom assessment techniques. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 602.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HE 603: Higher Education in the Digital Age. 3 credits.
Studies how digital tools and resources shape and are shaped by higher education both inside and outside of the classroom. Includes the complex ways in which colleges integrate changing teaching and learning, information, and communication technologies. Combining reading, writing, viewing and hands-on learning, students examine issues through the content and lens appropriate for their discipline and goals. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 603.

Recommended Prerequisite: Basic familiarity with computer operations

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HE 605: Learning Assessment. 3 credits.
Focuses on classroom and program-level learning assessment, and describes the political and historical context for assessment. Offers hands-on practice of assessment for instructors and student affairs professionals. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 605.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in College Teaching, Education (Community College), Education, Higher Ed Administration or Interdisciplinary Studies.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
HE 606: Diversity in Higher Education. 3 credits.
Explores instructional interactions and communication strategies for diverse learner populations. Includes discussion of sociological, behavioral, and cognitive theory on culture. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 606.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HE 610: Research Designs in Higher Education. 3 credits.
Provides an introduction to higher education research methodologies, analysis, and decision-making through introduction of basics of research design including problem identification, literature review, method selection, data collection and analysis, application, writing, and ethics. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 710.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HE 621: Higher Education in the United States. 3 credits.
History of higher education from colonial period to the present. Examines philosophic, political, social, and economic forces that have influenced development. Reviews today’s issues and challenges. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 621.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HE 624: Finance and Fiscal Management in Higher Education. 3 credits.
Overview of higher education finance and fiscal management. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 624.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HE 641: Introduction to Helping Skills. 3 credits.
Focuses on helping skills that assist others in reflecting on concerns, considers possible causes of problems, and contemplates options and strategies for problem solving. Introduces students to and practices basic helping skills. Explores ethical issues surrounding helping skills and determining when to refer students to professional counselors. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 641.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HE 643: Multicultural Helping Skills. 3 credits.
Sensitizes students to and promotes an understanding of multiple cultures and encourages students to examine their own attitudes toward various groups, explore their own identities, and to acquire expertise in the use of helping skills with various populations. Emphasizes the learning of approaches and the application of techniques that facilitate effective multicultural communication in higher education. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 643.

Recommended Prerequisite: CTCH 641 or HE 641.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HE 644: Student Services in Higher Education. 3 credits.
Focuses on development and organization of student personnel programs and services in institutions of higher learning. Covers philosophy, methods, and techniques. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 644.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HE 645: The Contemporary College Student. 3 credits.
Analyzes changing demographics, barriers, and developmental issues facing college students. Studies impact of college environment on
student development, and interaction between students of varying subcultures and the environment. Examines technology issues and their impact. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 645.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HE 646: Student Development Theory. 3 credits.
Addresses developmental issues facing students, including adult students; factors that affect development; and the need to work with individuals, groups, and organizations within the campus community to establish conducive learning environments. Application of psychosocial, cognitive development, identity, and person-environment interaction theories are considered in depth. Offered by Higher Education Program (p. 524). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HE 685: Practicum. 3 credits.
Supervised on-the-job experience in approved college or university setting or public agency involved in higher education. Develops skills applicable to college-based teaching or higher education administration or policy. Approval of practicum coordinator needed one semester before registration. Notes: Minimum 150 hours of work and participation in internship seminar. Offered by Higher Education Program (p. 524). May be repeated within the degree for a maximum 6 credits. Equivalent to CTCH 685.

Recommended Prerequisite: Admission to certificate, MAIS/CCT, or MAIS/Higher Education program; approval of advisor and practicum coordinator; 12 credits of core requirements; and 3 additional credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

700 Level Courses

HE 701: Higher Education Law. 3 credits.
Introduces students to laws and legal issues that impact higher education and establishes a general familiarity with higher education law. Uses a case study approach to teach students to recognize when a legal issue presents itself in situations involving students, faculty, or administration. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 701.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HE 702: Contemporary and Critical Theories in Higher Education. 3 credits.
Uses the philosophical and sociological grounding of higher education research to provide guidance on decision-making in ambiguous and complex higher education organizations. Offered by Higher Education Program (p. 524). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HE 703: Digital Technologies and Learning. 3 credits.
Researches changing digital landscape in higher education. Combines reading, writing, viewing, and assessing hands-on learning in the digital context with speculation about future digital capabilities. Offered by Higher Education Program (p. 524). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HE 704: The Scholarship of Teaching and Learning. 3 credits.
Overview of scholarship on teaching and learning in higher education. Focuses on ways students learn, how learning can be improved, and different methods of conducting research into teaching and learning. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 704.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HE 705: Access and Social Justice. 3 credits.
Examines the inequitable structural systems that produce unequal access to higher education. Explores the meaning of social justice in higher education, and emphasizes policy, administrative processes, and educational practices. Offered by Higher Education Program (p. 524). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
**HE 710: Leadership in Higher Education.** 3 credits.
Focusing on the leadership of higher education and the role leaders play in institutional transformation, this course explores the complex social and political environments and the current and future trends of higher education. This focus occurs through the foundational grounding of leadership theory and research. Students will be challenged to employ multiple perspectives of leadership in higher education. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 702, CTCH 810.

**Schedule Type:** Lecture

**HE 711: Policy Analysis in Higher Education.** 3 credits.
Intended as a toolkit for the understanding and creation of evidence-based analysis of public policy issues at all levels of governance, this course examines examples of policy research and analysis prompted from discussion around higher education policy issues. Offered by Higher Education Program (p. 524). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**HE 712: Advanced Institutional and Program Assessment in Higher Education.** 3 credits.
Examines educational assessment and evaluation practices and methods. Students critique and design an evaluation study and an evaluation report. Reviews ethical issues and impact of assessment and evaluation for students, employees, and programs. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 826.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**HE 713: The Internationalization of Higher Education.** 3 credits.
Explores the internationalization of higher education through various lenses including administration, student services, curriculum integration, study abroad, and branch campus development. Offered by Higher Education Program (p. 524). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**HE 722: Organization and Administration in Higher Education.** 3 credits.
Provides concepts of organization and administration in contemporary institutions from macro to micro perspectives. Studies theory and practices of the organization as it relates to governance, structure, and management of the institution. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 622.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

**HE 785: Research Apprentice.** 3 credits.
Participation in research or assessment study under the supervision of a faculty member. Written report required. Offered by Higher Education Program (p. 524). May not be repeated for credit.

**Recommended Prerequisite:** HE 610.

**Schedule Type:** Independent Study

**HE 792: Special Topics in Higher Education.** 1-3 credits.
Covers current topics in higher education. Notes: May be repeated when topic is different. Offered by Higher Education Program (p. 524). May be repeated within the degree. Equivalent to CTCH 792.

**Recommended Prerequisite:** Admission to doctoral program or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**HE 798: Higher Education Project.** 1-3 credits.
Participation in research or assessment study under the supervision of a faculty member. Written report required. Offered by Higher Education Program (p. 524). May be repeated within the degree. Equivalent to MAIS 798.

**Recommended Prerequisite:** HE 610.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Thesis

**HE 799: Higher Education Thesis.** 1-3 credits.
Original research related to student development or higher education. Offered by Higher Education Program (p. 524). May be repeated within the degree. Equivalent to MAIS 799.

**Recommended Prerequisite:** HE 610, HE 785.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Thesis

**800 Level Courses**

**HE 805: Research Methodologies in Higher Education.** 3 credits.
Provides a review of sophisticated research methodologies commonly used in higher education including collection and analysis procedures,
ethics, and decision-making. Alignment of research questions, method selection, data collection and analysis procedures, implications, and writing are examined. Offered by Higher Education Program (p. 524). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education (Community College).

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Arts or Doctor of Philosophy degrees.

**Schedule Type:** Lecture

HE 806: *Qualitative Methods in Higher Education Research.* 3 credits. Examines the philosophical and epistemological foundations that guide qualitative inquiry. Trustworthy data collection methods and means of analysis are stressed and practiced. Offered by Higher Education Program (p. 524). May not be repeated for credit.

**Recommended Prerequisite:** HE 805.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education (Community College).

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Arts or Doctor of Philosophy degrees.

**Schedule Type:** Lecture

HE 807: *Quantitative Methods in Higher Education Research.* 3 credits. Develops ability to conduct applications of quantitative methods in higher education research. Reinforces skills acquired in previous research courses. Learning occurs through reading assignments, hands-on experience in using a computer program for data analysis, and application activities. Students will identify and report on quantitative methods used in published research, analyze data, and provide written results. Offered by Higher Education Program (p. 524). May not be repeated for credit.

**Recommended Prerequisite:** HE 805.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education (Community College).

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Arts or Doctor of Philosophy degrees.

**Schedule Type:** Lecture

HE 821: *History of Higher Education in the United States.* 3 credits. Key issues and moments in the history of higher education are examined as a way to understand current structures, cultures, policies, and purposes. Historical perspective will also be used to consider the near future of higher education. Students will examine current trends and possible futures for a specific topic by doing historical research on the issue. Offered by Higher Education Program (p. 524). May not be repeated for credit. Equivalent to CTCH 821.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

HE 885: *Doctoral Internship in College Teaching and Administration.* 3 credits. Supervised internship at a community college, four-year college or university, or nonteaching higher-education setting such as a government agency or administrative office. Develops skills applicable to college teaching or higher education administration or policy. Students must complete a minimum of 180 hours of work and participate in internship seminar. Notes: Students must contact the program at least one semester before enrolling. Offered by Higher Education Program (p. 524). May be repeated within the term for a maximum 6 credits. Equivalent to CTCH 885.

**Recommended Prerequisite:** Admission to doctoral program; approval of advisor and internship coordinator, 18 credits of graduate course work.

**Registration Restrictions:**
Enrollment is limited to students with a major in College Teaching, Education (Community College) or Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Internship

HE 897: *Directed Reading in Higher Education.* 1-6 credits. Independent reading on topic agreed on by student and instructor. Offered by Higher Education Program (p. 524). May be repeated within the degree for a maximum 6 credits. Equivalent to CTCH 897.

**Recommended Prerequisite:** Admission to the doctoral program and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education (Community College).

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Arts degree.

**Schedule Type:** Independent Study

**900 Level Courses**

HE 998: *Doctoral Dissertation Proposal.* 1-3 credits. Contact program for permission to register. Work on research proposal that forms basis for doctoral dissertation. Offered by Higher Education Program (p. 524). May be repeated within the degree. Equivalent to CTCH 998.

**Recommended Prerequisite:** Completion of all course work and qualifying exams.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education (Community College).

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Arts degree.

**Schedule Type:** Dissertation
HE 999: Doctoral Dissertation. 1-12 credits.
Doctoral dissertation research and writing under direction of dissertation committee. Offered by Higher Education Program (p. 524). May be repeated within the degree. Equivalent to CTCH 999.

Recommended Prerequisite: HE 998 and appointed dissertation committee.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.
Enrollment is limited to students with a major in Education (Community College).
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

History (HIST)

100 Level Courses

HIST 100: History of Western Civilization. 3 credits.
History of Western civilization from ancient Mediterranean origins through medieval and modern development of Europe to contemporary world. Notes: Students who take HIST 100 may not receive credit for HIST 101 or HIST 102. Offered by History & Art History (p. 381). May not be repeated for credit. Equivalent to HIST 101, HIST 102.

Mason Core: Western Civilization (p. 135)

Schedule Type: Lecture, Recitation

HIST 101: Foundations of Western Civilization. 3 credits.
Evolution of Western culture from ancient Mediterranean world to formation of modern Europe in 17th century. Notes: Students may not receive credit for HIST 101 if they have taken HIST 100. Offered by History & Art History (p. 381). May not be repeated for credit. Equivalent to HIST 101, HIST 102.

Schedule Type: Lecture

HIST 102: Development of Western Civilization. 3 credits.
History of Western institutions and ideas from 17th century to the present. Notes: Students may not receive credit for HIST 102 if they have taken HIST 100. Offered by History & Art History (p. 381). May not be repeated for credit. Equivalent to HIST 100.

Schedule Type: Lecture

HIST 121: Formation of the American Republic. 3 credits.
Social, political, economic, and intellectual growth of American institutions from colonization through Reconstruction. Notes: Students may not receive credit for HIST 121 if they have taken HIST 120. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Lecture

HIST 122: Development of Modern America. 3 credits.
History of the United States since 1877. Notes: Students may not receive credit for HIST 122 if they have taken HIST 120. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Western Civilization (p. 135)

Schedule Type: Lecture, Recitation

200 Level Courses

HIST 202: Freshman/Sophomore Seminar in Global History. 3 credits.
Focuses on skills, methods of learning, and subject matter to introduce discipline of history. Notes: Topics vary. Offered by History & Art History (p. 381). May not be repeated for credit. Equivalent to SYST 202.

Recommended Prerequisite: Freshman or sophomore standing.

Schedule Type: Lecture

HIST 251: Survey of East Asian History. 3 credits.
Surveys history of China and Japan from prehistoric times to ca. 1600. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 252: Survey of East Asian History. 3 credits.
Surveys history of China and Japan from early modern times (ca. 1600) to present. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 261: Survey of African History. 3 credits.
Focuses on the sub-Saharan region and examines evolving systems of kinship power, spirituality, and slavery. Explores the interactions between Africans and global influences from the religions of the book and colonialism to the politics of development and continuities and changes in production. HIST 261 surveys African history from the earliest times to 1800. HIST 262 surveys African history from 1800 to the present. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 262: Survey of African History. 3 credits.
Focuses on the sub-Saharan region and examines evolving systems of kinship power, spirituality, and slavery. Explores the interactions between Africans and global influences from the religions of the book and colonialism to the politics of development and continuities and changes in production. HIST 261 surveys African history from the earliest times to 1800. HIST 262 surveys African history from 1800 to the present. Offered by History & Art History (p. 381). May not be repeated for credit. Equivalent to SYST 262.

Mason Core: Non-Western Culture

Schedule Type: Lecture, Recitation
times to 1800. HIST 262 surveys African history from 1800 to the present. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 271: Survey of Latin American History. 3 credits. Surveys colonial era to 1825. Emphasizes interactions of United States, Latin America. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 272: Survey of Latin American History. 3 credits. Surveys development of independent Latin America since 1825. Emphasizes interactions of United States, Latin America. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 281: Survey of Middle Eastern Civilization. 3 credits. Survey of Middle Eastern history from rise of Islam to present, emphasizing processes that led to emergence of economic, cultural, social, and political institutions that characterize region today. Surveys period from rise of Islam in 570 to medieval period (ca. 1258) Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 282: Survey of Middle Eastern Civilization. 3 credits. Survey of Middle Eastern history from rise of Islam to present, emphasizing processes that led to emergence of economic, cultural, social, and political institutions that characterize region today. Surveys medieval period to present. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

300 Level Courses

HIST 300: Introduction to Historical Method. 3 credits. Introduces research skills and methods, as well as historical interpretation, culminating in written and oral presentations. Notes: Topics vary according to instructor. History majors strongly urged to take HIST 300 as soon as possible after reaching 30 credits. Grade of C or better is required to graduate with BA in history. Students may repeat HIST 300 only with permission from the Department of History and Art History and repetitions are limited. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Synthesis (p. 135)

Specialized Designation: Scholarly Inquiry, Writing Intensive in the Major

Recommended Prerequisite: History majors with 30 credits or permission of instructor.

Registration Restrictions: Enrollment is limited to students with a major in History.

Schedule Type: Lecture

HIST 301: Classical Greece. 3 credits. Political, social, economic, and cultural history of classical Greece from development of the city-state through 5th century. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 302: Classical Rome. 3 credits. Political, social, economic, and cultural history of classical Rome from founding of the city through fall of Roman republic. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 304: Western Europe in the Middle Ages. 3 credits. Survey of development of European society from collapse of Roman rule in 5th century to advent of Black Death in 14th century. Emphasizes political, social, cultural, and intellectual growth of society that developed from Roman, Catholic, and Germanic roots. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: 6 hours of history or permission of instructor.

Schedule Type: Lecture

HIST 305: The Renaissance. 3 credits. Survey considering Renaissance as phenomenon rather than chronological period. Emphasizes growth of humanism in Italy in 14th and 15th centuries, development of new political concepts, and laicization of society. Includes transmission of these developments to transalpine Europe in late 15th and 16th centuries. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 306: The Reformation. 3 credits. Late medieval ecclesiastical conditions and reform movements, late scholasticism, Protestant Reformation, Catholic Reformation, dynastic rivalries, and religious wars. Concludes with Peace of Westphalia. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 307: Old Regime and Revolutionary Europe. 3 credits. Political, social, economic, and cultural history of Europe from 1648 to 1815. Crisis of authority, consolidation of the state, absolutism, colonial expansion, the Scientific Revolution and the Enlightenment, and the French Revolution and Napoleon. Offered by History & Art History (p. 381). May not be repeated for credit.
Central Asia, and the Caucasus, which continue to influence world politics and culture today. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 308: Nineteenth-Century Europe. 3 credits.
History of Europe from Congress of Vienna to outbreak of World War I. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 309: Europe in Crisis: 1914-1948. 3 credits.
Two world wars, the Great Depression, and political and cultural revolutions transformed Europe as never before. Explores causes and consequences of these tumultuous events, and concludes with consideration of reconstruction that caps period. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 312: Nationalism in Eastern Europe. 3 credits.
Examines history of modern Eastern Europe from mid-19th century through collapse of communist regimes in 1989, and includes focus on Yugoslav wars of 1990s. Nationalism provides organizing theme; topic approached through literature, political, social, cultural, and new media sources. Class sessions emphasize discussion of central issues and sources. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 314: History of Germany. 3 credits.
Political, diplomatic, economic, social, and cultural development of Germany from dissolution of Holy Roman Empire to present. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 322: Modern Britain. 3 credits.
History of Britain from mid-18th century to present. Focuses on social, political, and economic transformations of industrialization; culture of 19th-century industrial society; problems of late 19th-century economic competition and imperialism; creation of welfare state; and experience of post-World War II political, social, and economic realignments. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: 6 hours of history or permission of instructor.

Schedule Type: Lecture

HIST 326: Stalinism. 3 credits.
Examines Josef Stalin and Stalinism as a political, economic, social, and cultural system, with a focus on the period from Lenin’s death in 1924 through Stalin’s death in 1953. Explores the history of rapid industrialization, collectivization of agriculture, famine, terror, war, Cold War, and human suffering in the Soviet Union and Eastern Europe. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 327: The Soviet Union and Russia Since World War II. 3 credits.
Analyzes the Soviet Union, the Cold War “enemy” of the United States, from victory in World War II under Joseph Stalin through collapse in 1991. Studies the fifteen independent countries that emerged from the Soviet collapse, including Russia, the Baltic States, Ukraine, Belarus, Moldova, Central Asia, and the Caucasus, which continue to influence world politics and culture today. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 328: Rise of Russia. 3 credits.
Political, social, and cultural development of Russia from early times to the end of the 19th century. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 331: Postwar United States, 1945-1973. 3 credits.
Examines political, cultural, and economic history in the three decades after 1945. Themes include the emergence of the civil rights movement and feminism; the domestic and international events of the Cold War, especially the Vietnam War; and the rise and fall of the presidency’s prestige in the years of the Great Society and Watergate. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 332: United States since 1973. 3 credits.
Examines political, cultural, and economic history since the end of the Vietnam War. Themes include the shifting political economy of the country during the resurgence of conservatism, the political debates over culture and identity, and the waning of the Cold War and its replacement with other international concerns. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 333: The Automobile in the United States. 3 credits.
Examines the biography of one of the most important characters in twentieth-century U.S. history: the automobile. Embraces the histories of business, policy, labor, the environment, technology, and culture, and seeks a holistic understanding of the role of the car in American life. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 335: The African American Experience in the United States: African Background to 1885. 3 credits.
History of African American experience in United States including African origins; trans-Atlantic slave trade; development of slavery in colonial, revolutionary, and antebellum periods; abolitionist movements; and African American participation in Civil War and during Reconstruction. Offered by History & Art History (p. 381). May not be repeated for credit.
Schedule Type: Lecture

HIST 336: The African American Experience in the United States: Reconstruction to the Present. 3 credits.
History of African American life in post-slavery America, and rise and consequences of racial segregation in 19th and 20th centuries. Examines African American response to continued racial inequality and repression. Covers great migration, urbanization, black nationalism, and civil rights era, as well as contemporary debates about race. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 337: Race and Gender in American Sports. 3 credits.
Examines how ideas about race and gender have affected sports in America from late 19th century to the 1980s. Will also consider how athletes and sporting activities have shaped American racial and gender paradigms. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 338: History of College Athletics. 3 credits.
Examines America's unique blend of higher education and sports from 1870s to modern collaborations between college athletic programs and America's media outlets. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 339: History of Baseball. 3 credits.
Examines development of baseball in U.S. context of labor, intellectual, economic and political events including racial segregation. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 340: Basketball and the American Experience. 3 credits.
Explores history of basketball in the United States since the late 1800s. Examines how basketball reflects and informs attitudes toward race, ethnicity, gender, and national identity. Possible topics include YMCA movement, Jews in basketball, racial segregation, growth of college basketball, international politics, evolution of black aesthetic, ABA-NBA merger, women's basketball, Magic Johnson-Larry Bird rivalry, Michael Jordan, and basketball's professionalization, commercialization, and globalization. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 341: History of Sport in the United States. 3 credits.
Examines the roots of American sport in colonial play and recreation, the emergence of organized and national sports, issues of gender and race in the sporting world, and the intersection of U.S. sport with events such as the Civil Rights Movement and the Cold War. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 342: History of the Olympics and the United States. 3 credits.
Traces history of American participation in the Olympics from 1896 to the present. Topics may include American leadership in the Olympic Movement, the historical legacy of American Olympic host cities, American Imperialism, Nazism, issues of race, gender and ethnicity in the Olympics, the Cold War and Olympic boycotts, and commercialization of sport. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 350: U.S. Women's History. 3 credits.
History of women and their changing status and gender roles in American society from colonial period through "second wave" of feminism in 1970s. Explores images and lives of women of different class, ethnic, and regional origins. Also focuses on women's political, economic, and legal conditions, and changes in them. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 351: History of the Old South. 3 credits.
History of South to outbreak of Civil War, with particular emphasis on rise of sectionalism. Focuses on development of distinct Southern culture through emergence of economic, political, social, agricultural, and intellectual institutions. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 352: The South since 1865. 3 credits.
History of South during Reconstruction, Redeemer era, and New South, with particular emphasis on race relations. Covers political, economic, cultural, and intellectual development from aftermath of war. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 353: History of Traditional China. 3 credits.
China from earliest times to period of modern Western intrusion. Development of traditional Chinese culture, society, and government. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 354: Modern China. 3 credits.
China from 1644 to the People's Republic of China. Emphasizes coming of West and various stages of Chinese reaction. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 355: Modern Japan. 3 credits.
Japan from Meiji Restoration to World War II. Emphasizes Japan's modernization in face of challenge. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 357: Postwar Japan. 3 credits.
History of Japan from World War II to present. Examines Japanese experience of several key moments: Japan's defeat in Pacific War, reconstruction during U.S. occupation, rise to economic prominence during 1960s and 1970s, and cultural and international identity crisis
during 1980s and 1990s. Offered by History & Art History (p. 381). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Specialized Designation:** Non-Western Culture

---

**HIST 358:** Post-1949 China. 3 credits.

Puts People's Republic of CHINA (PRC) into historical context by assessing legacies of China's socialist revolution (1949-1976) and post-socialist reforms (1978-present). Explores revolutionary heritage of the Chinese Communist Party, goals and agendas of China's socialist state, ideologies and policies shaping urban and rural development, individual agency and responses to revolutionary mass mobilization and market reforms. Offered by History & Art History (p. 381). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

---

**HIST 366:** Comparative Slavery. 3 credits.

Examines systems of slavery from ancient world to modern world, with special emphasis on Atlantic slave trade and slave societies in Latin America and Anglo America. Considers impact of slaves and slavery on cultural, economic, and political systems in Africa and Americas from 16th to 19th centuries. Offered by History & Art History (p. 381). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

---

**HIST 367:** History, Fiction, and Film in Latin America. 3 credits.

Explores modern Latin American history through different types of texts: scholarly histories, historical novels, fictional films, documentary films, and oral history. Explores ways these texts produce knowledge about the past. What motivates different approaches? What counts as evidence? How do we know what really happened? How do we decide what mattered and what did not? Also introduces several important episodes in 20th century Latin American history. Offered by History & Art History (p. 381). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

---

**HIST 368:** The Civil War and Reconstruction. 3 credits.

Examines the politics of Iraq under the British mandate, as an independent state under the monarchy, and as a republic after the revolution of 1958, emphasizing the social composition of Iraq's people and its ruling elites. Offered by History & Art History (p. 381). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

---

**HIST 369:** Modern Iraq. 3 credits.

Covers the causes, major events, and legacies of America's Vietnam War, including an introduction to Vietnamese history and culture. American decisions for war, strategy and major military engagements, diplomacy and peace talks, and the aftermath of the conflict in Vietnam and United States. Offered by History & Art History (p. 381). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture
HIST 378: History of Aviation. 3 credits.
Examines history of aviation from origins to the present in the context of culture, economics, politics, society, technology and war. Addresses such topics as the emergence of aerospace engineering as a profession, the evolution of aerospace technology and growth of the industry, military aviation, the Space Race, and aviation art, literature, music and film. Offered by History & Art History (p. 381). May not be repeated for credit.

HIST 380: Uncovering the U.S. Past Through Film. 3 credits.
Examines Hollywood films as historical sources that reveal the social, political, cultural and economic landscapes of their historical moment. Explores the ways films participate in pressing national debates over gender, race and ethnicity, and national security. Offered by History & Art History (p. 381). May not be repeated for credit.

HIST 384: Global History of Christianity. 3 credits.
Explores the history of Christianity around the world in the context of political and social structures as well as religious beliefs and practices. Offered by History & Art History (p. 381). May not be repeated for credit.

HIST 385: Humanities College to Career. 1 credit.
Focuses on career choices and effective self-presentation for soon-to-be graduating students with majors in the humanities. Explores how skills typically learned in humanities majors can be leveraged for a successful transition to post-graduation employment. Offered by History & Art History (p. 381). May not be repeated for credit.

HIST 386: Topics in History. 1-6 credits.
Study of historical topics of special interest. Notes: Topics announced in advance. May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

HIST 387: Topics in Global History. 3-6 credits.
Study of historical topics or periods of special interest in global, Latin American, African, Asian, or Middle Eastern history. Notes: Topics announced in advance. May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

HIST 388: Topics in European History. 3 credits.
Study of historical topics or periods of special interest. Notes: Topics announced in advance. May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

HIST 389: Topics in U.S. History. 3 credits.
Study of historical topics or periods of special interest. Notes: Topics announced in advance. May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

HIST 390: The Digital Past. 3 credits.
Teaches the fundamentals of information technology within the context of a history course. Students learn fundamentals and skills as well as how our society became so enamored of and dependent on these knowledge and information tools. Understanding a new technology requires understanding how new technologies transform the societies that embrace them. Emphasizes the use of free and open-source software whenever possible. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Information Technology: With Ethics (p. 135)

HIST 391: History of Virginia to 1800. 3 credits.
Discovery and settlement of Virginia. Colonial period with emphasis on development of representative government and race relations, Golden Age of Virginia dynasty, and coming of Civil War. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: 6 hours of history or permission of instructor.

HIST 392: History of Virginia Since 1800. 3 credits.
Decision to secede, Civil War and Reconstruction, Readjustors and Populism, disfranchisement and Constitution of 1902, and rise of Senator Harry F. Byrd. Recent developments. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: 6 hours of history or Permission of Instructor.

HIST 393: Topics in Film and History. 3 credits.
Study of historical periods or topics from perspective of feature films and documentaries. Notes: Topics available in advance from the department. May be repeated when topic is different. A maximum of 6 credits may be applied to the BA in history. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 6 credits.

HIST 394: Globalization and History. 3 credits.
Explores major events in the making of the modern world from a global perspective, with emphasis on interconnections and the historical development of power, authority, and governance. Offered by History & Art History (p. 381). May not be repeated for credit.

HIST 395: Topics in Digital History. 3 credits.
Introduces students to issues and methods in digital history through study of a particular topic. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 15 credits.
Schedule Type: Lecture

HIST 396: Topics in Public History. 3 credits.
Introduces students to issues and methods in preserving history and presenting historical information to a variety of audiences through museum exhibits, websites, public commemorations, and other means. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 6 credits.

Schedule Type: Independent Study

HIST 398: Historical Study Abroad. 1-6 credits.
Intended for participation in formally organized course offered by Center for Global Education during intersession or spring break. Notes: May be repeated with permission of department. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Internship

HIST 399: Internship. 1-9 credits.
Approved work-study programs in cooperation with specific organizations including area museums; archives; historic sites; and local, state, and federal agencies. Notes: Credit determined by department. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 9 credits.

Registration Restrictions:
Enrollment is limited to students with a major in History.

Schedule Type: Internship

400 Level Courses

HIST 401: Colonial America. 3 credits.
Intensive study of colonial American history from European origins through Revolutionary War. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 403: Revolutionary Era in American History, 1763-1812. 3 credits.
Study of formative years of new republic from Treaty of Paris of 1783 to election of 1820. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: 6 hours of HIST or permission of instructor.

Schedule Type: Lecture

HIST 404: Jacksonian America, 1812-1854. 3 credits.
Study of age of Andrew Jackson. Emphasizes democratic institutions that emerged as dominant influences in American society. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: 6 hours of history or permission of instructor.

Schedule Type: Lecture

HIST 405: Women in Islamic Society. 3 credits.
Surveys history of women in Islamic society from rise of Islam to present day. Examines historical processes that affected role and status of women in society, and specific topics around which issues of gender status and identity coalesced, especially in modern period. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: 6 hours of history or permission of instructor.

Schedule Type: Lecture

HIST 406: The Russian Revolution. 3 credits.
Era of revolutionary activity from 19th century to end of 1920s, with emphasis on Russian Revolutions of 1917. Explores why revolutionary situation developed; political, social, and cultural issues at stake; why it took various forms; and revolution's contribution to nature of Soviet state and post-Soviet problems. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: 45 credits or permission of instructor.

Schedule Type: Lecture

HIST 436: European Society and Culture: 19th and 20th Centuries. 3 credits.
Examines major cultural trends in Europe since French Revolution. Major themes include romanticism; socialism; Marxism; and social effect of modernization, science, and societies. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 460: Modern Iran. 3 credits.
Modern Iran, from 1800 to present, in context of several broad themes: institutional structure of state; role of great powers in Iran and Iranian response to economic, military, technological, and ideological challenge posed by West; interaction of religion and other ideologies and politics; economic development and impact on politics and society; and ways historians have sought to understand and interpret modern Iranian history. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 461: Arab-Israeli Conflict. 3 credits.
Overview of history of Arab-Israeli conflict. Examines conflict from various perspectives: over land and between competing nationalisms and identities; in terms of national interests of various states, including Israelis and Palestinians as well as other Arab governments and great powers; and in terms of peace making and conflict resolution. Some knowledge of history of Middle East since World War I strongly advised. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

HIST 462: Women in Islamic Society. 3 credits.
Surveys history of women in Islamic society from rise of Islam to present day. Examines historical processes that affected role and status of women in society, and specific topics around which issues of gender status and identity coalesced, especially in modern period. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture
HIST 465: The Middle East in the 20th Century. 3 credits.
Political, social, and cultural history of Middle East since World War I. Emergence of Israel, Arab nationalism, and political and economic influence of Middle East in world affairs. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Recommended Prerequisite: 6 hours of HIST or permission of Instructor.

Schedule Type: Lecture

HIST 480: Alexander the Great. 3 credits.
Rise of Persia, Persian wars with Greece, subjugation of Greece by Philip II of Macedonia, and Alexander the Great and his conquest of Persian empire. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Lecture

HIST 490: Honors Directed Readings. 3 credits.
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. Notes: The 3 reading credits should be taken before 3 research credits, though they may be taken concurrently. Either may be taken concurrently with HIST 499. Linked, individualized courses, usually given by same instructor. Involves directed readings. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: Acceptance into the departmental honors program and permission of instructor.

Schedule Type: Independent Study

HIST 491: Honors Directed Research. 3 credits.
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. Notes: The 3 reading credits should be taken before 3 research credits, though they may be taken concurrently. Either may be taken concurrently with HIST 499. Linked, individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: Acceptance into the departmental honors program and permission of instructor.

Schedule Type: Independent Study

HIST 498: Directed Readings/Research in History. 1-3 credits.
Readings, research conducted on individual basis in consultation with instructor. Notes: Only 3 credits may be applied to credits for degree. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: History majors with 90 credits and Permission of Instructor.

Schedule Type: Independent Study

HIST 499: RS: Senior Seminar in History. 3 credits.
Research on specialized historical topic culminating in seminar paper and oral presentation. Synthesis course; students expected to integrate knowledge and skills acquired in Mason Core courses. Notes: Subject determined by instructor. Student may present no more than 3 credits for graduation credit. Must receive passing grade to graduate with BA in history. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Synthesis (p. 135)

Specialized Designation: Research/Scholarship Intensive, Writing Intensive in the Major

Recommended Prerequisite: History majors with 90 credits

Registration Restrictions:
Required Prequisites: (HIST 300C), (ENGH 302C, ENGL 302C, HNRS 110C or 210C).
C Requires minimum grade of C.

Enrollment is limited to students with a major in History.

Schedule Type: Seminar

500 Level Courses

HIST 510: Approaches to Modern World History. 3 credits.
Introduces historical study of world beyond Europe and United States. Students read major theoretical works and case studies of particular regions. Examines imperialism, national identity, and various forms of popular resistance; familiarizes students with range of scholarly approaches, including world systems theory and subaltern studies. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: Admission to graduate program in history.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 525: Problems in Latin American History. 3 credits.
Analysis of selected problems. Emphasizes reading and discussion of historical interpretations, and development of bibliography. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 535: Problems in Comparative World History. 3 credits.
Investigates selected problems in global and comparative history, covering multiple countries or world regions. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 555: Problems in Asian History. 3 credits.
Discussion of readings and historical interpretations and compilation of a comprehensive bibliography on given theme. Notes: Topics announced by instructor. May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 565: Problems in African History. 3 credits.
Analysis of selected problems in African history. Emphasis on reading and discussion of historical interpretations and development of bibliography. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

600 Level Courses

HIST 601: Themes in U.S. History I. 3 credits.
Survey of U.S. History prior to 1877. Designed for individuals entering the graduate program who need to strengthen preparation in area, or who seek to enhance knowledge of latest interpretations in field. Stresses factual knowledge and its interpretation. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 602: Themes in U.S. History II. 3 credits.
Continuation of HIST 601. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 605: Themes in European History I. 3 credits.
Survey of European history from 1500 to 1815. Designed for individuals entering graduate program who need to strengthen preparation in this
area, or who seek to enhance knowledge of latest interpretations in field. Stress factual knowledge and its interpretation. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 606: Themes in European History II. 3 credits.
Survey of European history from 1815 to present. Designed for individuals entering graduate program who need to strengthen preparation in this area, or who seek to enhance knowledge of latest interpretations in field. Stress factual knowledge and its interpretation. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 610: The Study and Writing of History. 3 credits.
Methodology of the historian including techniques of research, use of documentation and other sources, development of bibliography, and synthesis of material. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 613: The Colonial Origins of American Society. 3 credits.
Study of evolution of elements in colonial society that affect contemporary American institutions and patterns of behavior. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 615: Problems in American History. 1-6 credits.
Readings and discussion of bibliographies, interpretations, and research trends in topics selected by instructor. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

Specialized Designation: Green Leaf Course

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 616: U.S. Westward Movement. 3 credits.
Investigates continuity and change in American West. Topics include economic development, ethnicity, rural and urban life, and role of federal government. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 617: Topics in the American Civil War Era. 3 credits.
Joint project of instructor and students into various aspects of common topic in Civil War era, with emphasis on historiography and historical method. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 618: The Age of Jackson, 1815-1854. 3 credits.
Survey of social, cultural, intellectual, economic, and political changes in United States during period of rapid growth and expansion. Topics include second-party system; growth of sectionalism, nationalism, and expansionism; industrialization and spread of market economy; rise of romantic reform and evangelical religion; and growth of abolitionist and proslavery movements. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 620: Development of the Early Republic, 1783-1815. 3 credits.
Investigates breakdown of Confederation, Constitutional Convention, and role of revolutionary ideology of republicanism. Discusses leadership and policies of republic in hostile international context. Students read extensively in monographic literature and prepare research paper. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 622: U.S. South Since 1865. 3 credits.
Provides a graduate level survey of the major themes and trends in the historical literature on the U.S. South since 1865. Topics covered include Jim Crow, the New Deal, the long Civil Rights movement, the rise of the Sunbelt, and the changing role of the South in national politics. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HIST 623: Recent U.S. History, 1945 to Present. 3 credits.
Selected political, social, economic, diplomatic, and cultural forces that shaped the post-World War II American experience. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 626: Approaches to American Culture. 3 credits.
Focuses on various approaches historians have taken to history of American culture: questions they asked, assumptions they made, disciplinary tools they used, and types of materials they analyzed. Concentrates on patterns of culture, and what they say about American past and present. Offered by History & Art History (p. 381). May not be repeated for credit.
HIST 633: *Reconstruction*. 3 credits.
Examines panoply of political, social, economic, and constitutional concerns from 1863 to 1880, as North and South struggled over outcome of Civil War. Addresses political institutions and power in postwar North and South, and place of former slaves in society, politics, and economy. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Considers issues of United States between the two world wars. Explores various ways issues complemented and contradicted each other in rich and complex historical era. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HIST 635: *Problems in European History*. 3 credits.
Investigates selected problems. Readings, discussions, development of bibliographies. Primary sources used where possible. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

HIST 636: *Political Culture in Twentieth-Century Germany and Austria: Continuities and Discontinuities*. 3 credits.
Recent interpretations of key political events of 20th century. Asks if there were fundamental continuities in structure of German and Austrian society that can be observed throughout the period under review. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: Baccalaureate degree in history or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Examines rise of "new imperialism" in Great Britain from 1870 to end of empire, and gradual formation of Commonwealth of Nations. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 639: *Society and Politics in Western Europe, 1750-1914*. 3 credits.
Focuses on changes in social conditions and ramifications in political life. Attention to urbanization of workers, changes in peasantry, growth of middle classes, decline of nobility, and major political developments and expansion of liberal reforms. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 640: *Metropolitan Cities of Europe in the Nineteenth and Twentieth Centuries*. 3 credits.
Studies individual cities, and investigates particular cities in depth. Considers economic, social, cultural, and political features of urban life. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

HIST 642: *Humanism and the Renaissance*. 3 credits.
The Renaissance as a unique period in European cultural history from ca. 1350 to 1520. Concentrates on Italian situation as standard, with consideration given to manifestations of Renaissance in northern Europe, especially Germany, until Reformation. Focuses on recent studies of political, social, intellectual, and religious changes. Students write class reports and a larger bibliographic paper. Offered by History & Art History (p. 381). May not be repeated for credit.
Enrollment is limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**HIST 643: Religion and Society in the Reformation Era.** 3 credits.
Overview of most recent historical work on social and cultural history of premodern West, ca. 1400 to 1800. Uses theoretical approaches and empirical methodologies of other disciplines, especially social anthropology, sociology, and literary theory, to shed new light on popular culture, class, manners, taste, rituals, religion, language, gender, and the state. Formulates new topics of research and poses new questions, and suggests new approach to more traditional topics such as politics, religion, and ideas. Offered by History & Art History (p. 381). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**HIST 644: Society and Culture in Early Modern Europe.** 3 credits.
Overview of most recent historical work on social and cultural history of premodern West, ca. 1400 to 1800. Uses theoretical approaches and empirical methodologies of other disciplines, especially social anthropology, sociology, and literary theory, to shed new light on popular culture, class, manners, taste, rituals, religion, language, gender, and the state. Formulates new topics of research and poses new questions, and suggests new approach to more traditional topics such as politics, religion, and ideas. Offered by History & Art History (p. 381). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**HIST 645: The Russian Revolution and the Origins of the Soviet State.** 3 credits.
Period between 1890 and 1924 with concentration on sources of Bolshevism, problems of old regime as they led to revolutions of 1905 and 1917, and establishment of new regime and its survival in environment of foreign and civil war. Offered by History & Art History (p. 381). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**HIST 646: Religion in North America to 1870.** 3 credits.
Dimensions of religion and religious experience in early America, from the beginnings of European settlement into the mid-to-late nineteenth century. Offered by History & Art History (p. 381). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

**HIST 647: U.S. Religion since 1870.** 3 credits.
Dimensions of religion and religious experience in the United States, from the mid-to-late nineteenth century through recent decades. Offered by History & Art History (p. 381). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

**HIST 648: Topics in U.S. Religious History.** 3 credits.
Readings and discussion of bibliographies, interpretations, and research trends in U.S. religious history. Topics selected by the instructor. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
