Accelerated Master's

Music, BM (Performance)/Music, Accelerated MM (Performance)

Overview

Students in the Music, BM (p. 819) (Performance concentration) have the option of obtaining an accelerated Music, MM (p. 828) (Performance concentration).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admissions Requirements

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit the following:

- An Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies
- 1-2 page Goals Statement
- Two letters of recommendation
- In addition, all applicants must complete a live performance audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music website.

Interested students should contact the Senior Academic Advisor, School of Music, for more details about the application process.

Degree Requirements & Reserve Graduate Credit

After admission and having earned 90 undergraduate credits, accelerated master’s students complete 6 credits of graduate coursework in their field of study (with a 3.00 GPA or better in each course), specified by their undergraduate and graduate advisors. These credits will apply to the undergraduate degree and provide the student advanced standing in the MM Performance program. All graduate course prerequisites must be completed prior to enrollment. While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Students in the BM (Performance)/MM (Performance) accelerated degree program must fulfill all university requirements for the master’s degree, including a minimum of 18 applicable graduate credits taken after the bachelor’s degree has been completed and posted to the student’s academic record. Successful completion of the accelerated MM will require one summer of coursework between years 4 and 5.
As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete requirements.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 87). For policies governing all graduate degrees, see Academic Policies (p. 74).

Music, BM/Arts Management, Accelerated MA

Overview
Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Music and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admissions
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Option Requirements.

As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credits
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Music. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Music, MM

Banner Code: AR-MM-MUSI

Melinda Wildman, Academic Advisor

A417 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/advising/

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, and pedagogy. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Admissions & Policies

Admissions

Requirements
In addition to fulfilling admission requirements for graduate study, applicants are expected to hold a baccalaureate degree in music or another discipline, with courses equaling the music requirements (minus the 7- to 8-credit teaching sequence) for the BA in music offered at Mason.

The following admission requirements must also be met:

• Performance: pre-screening submitted through SlideRoom and audition
• Conducting: pre-screening submitted through SlideRoom and audition
• Composition: submission of a portfolio of compositions
• Music Education: interview with music faculty, a video of sample classroom teaching and submission of a two- to three-page paper on the applicant’s philosophy of music education.
• Pedagogy: audition in the primary applied teaching area is required. Applicants are expected to have large and small ensemble experience on the major instrument and should have presented a full solo recital or equivalent. All music teaching experience should be summarized.
Degree Requirements

Total credits: 30

- Jazz Studies: A portfolio of at least five jazz tunes in contrasting styles, as well as a complete repertoire list of all jazz tunes studied/ performed. Submit all jazz materials via SlideRoom and schedule audition.

Applicants should refer to the graduate admissions page of the School of Music website for specific details on what is required and how to submit their materials.

Diagnostic Entrance Exam

All students are required to complete diagnostic entrance examinations in music theory, music history, aural skills, and basic keyboard skills. These examinations must be taken prior to the beginning of the first semester of graduate study. A sufficient placement score can reduce or eliminate prerequisites for some of the 600-level and above courses in music theory and history. The exam is offered during a three-hour period prior to the beginning of classes of the fall and spring semesters.

Foreign Language Exams (Vocal Performance Emphasis)

Students in the MM degree program (emphasis in vocal performance) must take proficiency exams in French, German, Italian, and English to demonstrate diction competency. Students may be required to take MUSI 525 Performance Seminar and Vocal Literature for Singers and Accompanists I, MUSI 526 Performance Seminar and Vocal Literature for Singers and Accompanists II.

Comprehensive Exit Exam

All students are required to pass a comprehensive exit exam administered during the graduation semester or, in the case of students selecting the thesis option in the music education concentration, on completion of 24 credits of course work and immediately before beginning work on the thesis. August graduates must take this exam during the preceding spring term. This exam is usually a three-hour written test, with questions based primarily on course work the student has taken toward the degree at Mason.

Policies

For policies governing all graduate degrees, see AP .6 Graduate Policies (p. 87). See College of Visual and Performing Arts (p. 763) for policies specific to the college.

Program Requirements

A student must successfully complete the appropriate 30 credits in graduate music courses. With approval of the graduate advisor, 3 non-music graduate credits may be taken.

The student is admitted as concentrating in one of six areas: performance, music education, composition, conducting, jazz studies, or pedagogy. All students are required to complete the 11 credits described as General Requirements plus 19 credits in one of the six areas identified as Additional Requirements. There are some limited possibilities for double concentrations. For details, see the director of graduate studies.

Requirements

General Requirements for All Concentrations

Music Education students will have 9 credits of General Requirements and 21 credits of Concentration Requirements; all other concentrations will have 11 credits of General Requirements and 19 credits of Concentration Requirements.

### Accelerated Master's

#### Music, BM (Performance)/Music, Accelerated MM (Performance)

**Overview**

Students in the Music, BM (p. 819) (Performance concentration) have the option of obtaining an accelerated Music, MM (p. 828) (Performance concentration).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admissions Requirements**

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit the following:

- An Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies
• 1-2 page Goals Statement
• Two letters of recommendation
• In addition, all applicants must complete a live performance audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music website.

Interested students should contact the Senior Academic Advisor, School of Music, for more details about the application process.

**Degree Requirements & Reserve Graduate Credit**

After admission and having earned 90 undergraduate credits, accelerated master’s students complete 6 credits of graduate coursework in their field of study (with a 3.00 GPA or better in each course), specified by their undergraduate and graduate advisors. These credits will apply to the undergraduate degree and provide the student advanced standing in the MM Performance program. All graduate course prerequisites must be completed prior to enrollment. While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Students in the BM (Performance)/MM (Performance) accelerated degree program must fulfill all university requirements for the master’s degree, including a minimum of 18 applicable graduate credits taken after the bachelor’s degree has been completed and posted to the student’s academic record. Successful completion of the accelerated MM will require one summer of coursework between years 4 and 5.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete requirements.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 87). For policies governing all graduate degrees, see Academic Policies (p. 74).

**Musical Arts, DMA**

**Banner Code:** AR-DMA-MUAR

**Melinda Wildman, Academic Advisor**

A417 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/advising/

The doctor of musical arts requires 90 credits, 60 credits beyond the Master’s degree in music. The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline.

**Admissions & Policies**

**Admissions**

**Requirements**

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

• Master’s degree in music from an accredited university;
• GPA of 3.00 in master’s-level music course work, 3.50 in courses related to the prospective area of doctoral study (performance, composition, or conducting);
• Three recommendations;
• Satisfactory scores on GRE;
• A sample of academic writing such as a graduate-level paper from a (musicology or music history) course taken during MM studies;
• Audition (performance and conducting students only). Specific details of those requirements are available from the advisors.
• A portfolio of recent compositions and recordings of performances (composition students only).

Applicants should refer to the graduate admissions page of the School of Music website for specific details on what is required and how to submit their materials. There is no “provisional” admission. Students must meet appropriate standards prior to commencing doctoral studies.

**Policies**

For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87). See College of Visual and Performing Arts (p. 763) for policies specific to the college.

**Reduction of Credit**

Students must have a master’s degree before being admitted to the Doctor of Musical Arts Program. Most students receive a reduction of study of 30 credits based on their previous master’s degree.

**Requirements**

**Degree Requirements**

Total credits: 90

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

**Placement Examinations**

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory. Recitals can be scheduled only after completion of any necessary prerequisites in music theory, music history, and musicianship.
Doctoral Coursework
The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or non degree credits not formally approved for the degree.

Students must complete the following required courses as well as those in their chosen concentration:

Select 3 credits of Music Theory elective from the following: 3
- MUSI 610  Topics in Music Theory
- MUSI 613  Graduate Orchestration
- MUSI 614  Music Theory Pedagogy
- MUSI 640  Topics in World Musics
- MUSI 710  Advanced Topics in Music Theory
- MUSI 780  Doctoral Research Methods in Music
- MUSI 810  Doctoral Seminar in Analysis
- MUSI 830  Doctoral Seminar in Music History

Two credits of
- MUSI 890  Doctoral Recital
- CVPA 600  CVPA Graduate ProSeminar 1

Total Credits 8

1  Must be taken within the student's first 2 semesters.

Concentration in Composition (CPO)
Select 1 credit of approved graduate electives 1  1
- MUSI 610  Topics in Music Theory
- MUSI 614  Music Theory Pedagogy
- MUSI 710  Advanced Topics in Music Theory

Six credits of
- MUSI 685  Graduate Chamber Ensemble
- MUSI 810  Doctoral Seminar in Analysis

Fifteen credits of
- MUSI 828  Doctoral Applied Music in Composition
- MUSI 880  Doctoral Major Ensemble

Select 6 credits from the following: 6
- MUSI 630  Topics in Music History and Literature
- MUSI 640  Topics in World Musics
- MUSI 730  Advanced Topics in Music History

Total Credits 39

1  Approved electives could be from music history, music literature, world music, music theory, conducting, secondary Applied Music, ensemble (including chamber music), or relevant nonmusic courses.

Concentration in Conducting (CDC)
Select 5 credits of approved graduate electives 1  5

Select 6 credits from the following: 6
- MUSI 630  Topics in Music History and Literature
- MUSI 730  Advanced Topics in Music History
- MUSI 770  Advanced Topics in Pedagogy

Total Credits 39

1  Approved electives could be from music history, music literature, world music, music theory, conducting, secondary Applied Music, ensemble (including chamber music), or relevant nonmusic courses.

Concentration in Performance (PFM)
Select 15 credits of Graduate Applied Music from the following: 15
- MUSI 822  Doctoral Applied Music in Keyboard
- MUSI 823  Doctoral Applied Music in Voice
- MUSI 824  Doctoral Applied Music in Woodwind
- MUSI 825  Doctoral Applied Music in Brass
- MUSI 826  Doctoral Applied Music in String
- MUSI 827  Doctoral Applied Music in Percussion

Select 3 credits of approved graduate electives 1  3

Select 6 credits from the following: 6
- MUSI 630  Topics in Music History and Literature
- MUSI 730  Advanced Topics in Music History

Select 2 credits from the following: 2
- MUSI 685  Graduate Chamber Ensemble
- MUSI 720  Advanced Topics in Applied Music
- MUSI 770  Advanced Topics in Pedagogy
- MUSI 810  Doctoral Seminar in Analysis

Select 4 credits from the following: 4
- MUSI 880  Doctoral Major Ensemble
- & MUSI 720  Advanced Topics in Applied Music
- MUSI 880  Doctoral Major Ensemble
- or MUSI 720  Advanced Topics in Applied Music

Select 3 credits from the following: 3
- MUSI 610  Topics in Music Theory
- MUSI 710  Advanced Topics in Music Theory
- MUSI 712  Composition for Conductors and Performers

Total Credits 39

1  Approved electives could be from music history, music literature, world music, music theory, conducting, secondary Applied Music, ensemble (including chamber music), or relevant nonmusic courses.

Residency
More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program. One year (fall and
spring) of consecutive full-time study (9 credits per semester; 18 credits per year) is recommended. Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements
Reading proficiency is required in a language appropriate to the student's major area of study. Normally, this will be German, French, or Italian. The director of graduate studies and the Graduate Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages to the student's area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Graduate Committee
The Graduate Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group.

Comprehensive Exams
After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams will be followed by a one-hour oral exam to clarify issues included in the written exams.

Doctoral Research
Select 13 credits from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSI 998</td>
<td>13 (Dissertation Proposal (a minimum of 3 credits))</td>
</tr>
<tr>
<td>MUSI 999</td>
<td>13 (Dissertation (a minimum of 7 credits))</td>
</tr>
</tbody>
</table>

Total Credits: 13

Advancement to Candidacy
Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all course work required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Graduate Committee, the director of graduate studies, and the director of the School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

Dissertation Committee
The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee consisting of at least three members of the music faculty. The student's major professor will chair the committee. The director of graduate studies of the School of Music may be part of the committee; if not, he or she will serve ex officio. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost. Performance and composition recitals are also subject to the approval of the Dissertation Committee.

Final Defense and Graduation
When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

Musical Theater Undergraduate Certificate: Music
Banner Code: AR-CERB-MTHR

Melinda Wildman, Academic Advisor

Students fulfilling Musical Theater Undergraduate Certificate: Music must satisfy all requirements for a BA (p. 817) or BM (p. 819) in the School of Music. Students pursuing a certificate in Musical Theater Undergraduate Certificate: Theater (p. 838) must satisfy all requirements for a BA (p. 840) or BFA (p. 843) in the School of Theater with a concentration in performance.

The certificate may be completed under part or full time basis.

Admissions & Policies

Admissions
Auditions
Auditions are required for admission into the Musical Theater Undergraduate Certificate.

Policies
Program Requirements
Some credits required for this certificate may simultaneously fulfill learning requirements of the certificate in Musical Theater and Mason Core (p. 135) requirements. Some courses require placement. Depending on electives and other learning experiences, this certificate requires up to 30 credits beyond the requirements to complete a major in the School of Theater or the School of Music (dependent upon the chosen concentration). A minimum of 15 credits must be unique to the certificate and may not count toward the major, concentration, minor, another certificate or Mason Core (p. 135) requirements. At least 15 credits of the certificate must be earned at Mason. Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree.
from Mason at the time they receive the certificate. Students with a previous bachelor’s degree, who are admitted to this certificate alone, have four years to complete the certificate requirements.

Only courses with a grade of C or better are counted toward the certificate.

Students should consult AP.5.3.5 Undergraduate Certificates (p. 86) for more information.

**Requirements**

**Certificate Requirements**

Total credits: 30

**Dance Courses**

Courses in DANC are selected from the following courses open to all non-dance majors. Courses may not be repeated in the certificate. At least 6 credits must be 200 level or above.

<table>

School of Theater

Ken Elston, Director
The School of Theater offers BA and BFA degrees and prepares students for graduate study or entry into the profession through rigorous, concentrated, and individualized training; however, students are encouraged to maintain wide-ranging interests within the school and throughout the university’s extensive offerings. Theater majors organize their advanced work within the major to include classes in areas of emphasis including performance, design and technical theater, and other theater studies.

**Theater BA Concentrations**
Theater majors must choose to complete their Bachelor of Arts degree with a concentration in one of the following areas: Design and Technical Theater, Performance (Acting and Directing), Playwriting and Dramaturgy, Theater Education for Theater Arts PK-12, or Theater Studies. Students must earn a minimum 2.5 cumulative GPA to complete a BA with a concentration.

**Certification for Theater Education for Theater Arts PK-12**
The Theater Education for Theater Arts PK-12 certification is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Upon degree conferral and completion of all requirements, students may be eligible to apply for Virginia State Licensure Minimum scores on the Praxis Core and VCLA tests must be achieved before state licensure is granted.

Students must be formally accepted into the Theater Education for Theater Arts PK-12 concentration.

**Theater BFA Concentrations**
In addition to the Mason Core requirements for the Bachelor of Arts degree, students in the Theater BFA must complete a minimum of 76 credits in the major: 46 credits of required core courses and 30 credits in a concentration. Concentrations are: Design for Stage and Screen, Musical Theater Performance, Performance for Stage and Screen (Acting and Directing), Writing and Dramaturgy for Stage and Screen. All students pursuing a BFA in Theater must earn a minimum 2.5 cumulative GPA for graduation.

**Musical Theater Undergraduate Certificate**
Students pursuing a certification in Musical Theater must satisfy all requirements for a BA or BFA in the School of Theater, with a concentration in performance, or a BA or BM in the School of Music, as reflected in the university catalog. Some credits required for the certificate may simultaneously fulfill the learning requirements of the certificate in Musical Theater and fulfill Mason Core requirements. Some courses require placement. Thus, depending on electives and other learning experiences, this certification requires up to 30 credits beyond the requirements to complete a major in the School of Theater. See the College of Visual and Performing Arts website (http://cvpa.gmu.edu/admissions-u.html) for audition information.

Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. This program of study is coordinated between units within the College of Visual and Performing Arts.

**Theater Honors Program**
Highly-qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three honors-specific courses from their chosen concentration. They must also maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.

**Graduate Programs**

**Accelerated Master’s Program**
The School of Theater offers a Theater, BA/Arts Management, Accelerated MA option which allows undergraduate students to take graduate classes that can be used towards a designated Master’s degree. Undergraduates who wish to pursue the accelerated Master’s route should talk to their academic advisor first to see if they qualify. Students must be within 75-90 credits of their Bachelor’s program to be eligible to apply; those who have earned more than 90 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the Master’s program through an Accelerated Master’s application. For more information about admissions requirements and the application process, students should visit the college website (http://cvpa.gmu.edu).

**Visual and Performing Arts, MFA**
The School of Theater offers one concentration under the Master of Fine Arts, Visual and Performing Arts degree: Theater. Applicants to the program must designate which concentration they intend to apply for on the application. Each concentration has its own unique set of admissions requirements and program requirements.

**Faculty**

**School Faculty**

**Professors**
D’Andrea (Robinson Professor), Davis, Kurtz, McDonald

**Associate Professors**
Elston (Director), Gero, Johnsen-Neshati

**Assistant Professor**
Casey

**Administrative Faculty (Instructional)**
Lechter, Murray
Adjunct Faculty

Requirements & Policies

Requirements

Admission Requirements
Admission to George Mason University requires application through Mason’s Admissions Office. Entrance into all Theater programs is by interview and audition or portfolio review. Information about the audition, portfolio review and interview process, including dates, can be found at the College of Visual and Performing Arts (http://cvpa.gmu.edu/admissions-u.html). Please note that these are two separate processes.

Interviews will be conducted by appointment and candidates must prepare an appropriate resume.

Contact the School of Theater to schedule your interview. Students who audition or present a portfolio at theater conferences (i.e. Virginia Theatre Association, Southeastern Theater Conference, etc.) before or after applying to Mason are required to attend a separate interview on campus.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated writing-intensive in their major at the 300 level or above. Students seeking a BA or BFA in theater fulfill this requirement by successfully completing THR 350 Script Analysis or THR 482 Advanced Screenplay Workshop.

Production Requirements
Participation in Theater at Mason productions is expected of all declared majors. Students must have a minimum 2.5 cumulative GPA to participate in Theater at Mason productions.

Students must also earn four (4) practicum credits, one (1) credit for satisfactory completion (a minimum of 30 hours) of each of four (4) performance and production assignments in the major, including faculty or guest-directed Mason Players Mainstage, and student-directed Studio productions.

All freshmen, first year transfer, and new Theater majors must register for THR 198 Theatrical Construction Practicum and THR 199 Production Run Crew Practicum during their first academic year.

Assignments for THR 196 Performance or Design Practicum and THR 197 Stage or Literary Practicum will include a presentation of portfolio documents demonstrating a practical analysis of the role, design, or support position to subject area mentors.

• THR 196 Performance or Design Practicum assignments include actor, designer, assistant designer, stage manager, and assistant stage manager.

• THR 197 Stage or Literary Practicum assignments include director, assistant director, dramaturg, master electrician, technical director, playwright, house management, and publicity.

• THR 198 Theatrical Construction Practicum assignments include scenery construction and painting, costume construction, electrician, and props.

• THR 199 Production Run Crew Practicum assignments include stage crew, light board operator, sound board operator, wardrobe, and fly crew.

Unless registered for a Theater course approved as directly connected to production (i.e. THR 196 Performance or Design Practicum, THR 197 Stage or Literary Practicum, THR 198 Theatrical Construction Practicum, THR 199 Production Run Crew Practicum, THR 492 Studio Project or THR 495 Senior Capstone Project) all students (including non-Theater majors) electing to participate in a Theater at Mason production must register for THR 200 Play Production Practicum concurrent with participation.

Policies

BA/BFA Policies
Students seeking to earn a BA or BFA as a second bachelor’s degree, either concurrently or sequentially, must complete all theater degree requirements. Students must earn a minimum 2.00 cumulative GPA in their major. A student must earn a minimum cumulative GPA of 2.5 to complete a BA with a concentration or a BFA.

Those students interested in exploring audio production in a purely music-based experience should consider the minor in Music Technology (p. 815).

Admissions & Policies

Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of 2.00 earned in all courses applied to the minor. For policies governing all minors, see AP. 5.3.4 Minors (p. 86).

This minor is offered by the College of Visual and Performing Arts (p. 763) (School of Theater (p. 835)) and the College of Education and Human Development (p. 154) (School of Recreation, Health, and Tourism (p. 211)). This minor, available to all Mason undergraduate students, offers the opportunity to study special event management and event technologies, design and production for installations and special events. Students will gain insights into industry standards and practices regarding planning, managing, and executing live events and presentations. The required courses in this minor provide students with a foundational overview of management and production. Students can complement that knowledge with specific electives that meet their individual interests in events and areas of design and technology.

Admissions & Policies

Admissions

Auditions
Auditions are required for admission into the Musical Theater Undergraduate Certificate.

Policies

Program Requirements

Some credits required for this certificate may simultaneously fulfill learning requirements of the certificate in Musical Theater and Mason Core (p. 135) requirements. Some courses require placement. Depending on electives and other learning experiences, this certificate requires up to 30 credits beyond the requirements to complete a major in the School of Theater or the School of Music (dependent upon the chosen concentration). A minimum of 15 credits must be unique to the certificate and may not count toward the major, concentration, minor, another
Certificate or Mason Core (p. 135) requirements. At least 15 credits of the certificate must be earned at Mason. Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. Students with a previous bachelor's degree, who are admitted to this certificate alone, have four years to complete the certificate requirements.

Only courses with a grade of C or better are counted toward the certificate.

Students should consult AP.5.3.5 Undergraduate Certificates (p. 86) for more information.

## Requirements

### Certificate Requirements

Total credits: 30

#### Dance Courses

Courses in DANC are selected from the following courses open to all non-dance majors. Courses may not be repeated in the certificate. At least 6 credits must be 200 level or above.

Website: theater.gmu.edu/academics/degrees.html

This certificate can be earned on a full-time or part-time basis.

#### Admissions & Policies

**Admissions**

To apply to the program, candidates must have first completed a major in theater or 33 semester hours distributed among the following areas:

- Directing 6
- Technical theater 9
- Cultural context and theater history 3
- Performance 6
- Dramatic literature 9

Total credits: 33

Students who have completed ALL endorsements, including Praxis Core, are eligible for enrollment into the Graduate Certificate Program for Teaching Theatre PK-12. All Virginia requirements must be met to achieve licensure.

**Policies**

Students must earn a B- or higher in all coursework.

Admissions & Policies

Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of 2.00 earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 86).

Requirements

Minor Requirements

Total credits: 18

Coursework

THR 230 Fundamentals of Production (Mason Core) (p. 135) 3
THR 310 Acting II 3
or THR 339 Principles of Design
THR 350 Script Analysis 3
Select one from the following: 3
THR 150 Greeks to Restoration (Mason Core) (p. 135)
THR 151 Romanticism to Present (Mason Core) (p. 135)
THR 380 Playwriting I
or other courses with permission of Director
Select 6 credits of 100-400 level THR coursework (p. 2007) 6
Total Credits 18

The BA degree stresses the breadth of a liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in theater and screen.

Students complete the theater core. To organize their advanced work within the major, students select 24 credits of 300-400-level courses, chosen from any area of emphasis in Theater or students elect a course of study from four concentrations:

- Performance (Acting and Directing)
- Design and Technical Theater
- Playwriting and Dramaturgy
- Theater Education for Theater Arts PK-12
- Theater Studies

Requirements

Degree Requirements

Total credits: 120

Mason Core

Foundation Requirements

Oral Communication (p. 136) 3
Information Technology (p. 136) 3
Quantitative Reasoning (p. 136) 3
ENGH 101 Composition (Mason Core) (p. 135) 3

ENGH 302 Advanced Composition (Mason Core) (p. 135) 3

Core Requirements

Literature (p. 140) 3
Arts (p. 137) 2
Natural Science (p. 141) 3 7
Western Civilization/World History (p. 143) 3
Global Understanding (p. 139) 3
Social and Behavioral Sciences (p. 142) 3

Total Credits 37

1 Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 Composition for Multilingual Writers (Mason Core) (p. 135) for ENGH 101 Composition (Mason Core) (p. 135). Students must attain a minimum grade of C in ENGH 100 Composition for Multilingual Writers (Mason Core) (p. 135) or ENGH 101 Composition (Mason Core) (p. 135), as well as in ENGH 302 Advanced Composition (Mason Core) (p. 135), to fulfill degree requirements.

2 Course must fall outside the major. Students earning a concentration in Design and Technical Theater must take ARTH 101 Introduction to the Visual Arts (Mason Core) (p. 135), ARTH 102 Symbols and Stories in Art (Mason Core) (p. 135), ARTH 200 History of Western Art I (Mason Core) (p. 135), or ARTH 201 History of Western Art II (Mason Core) (p. 135).
Must include at least one laboratory science course.

Major

Theater Core Requirements

Note: All THR majors may not double count THR courses within the major. All THR courses count either towards the degree core or the concentration, but not both.

THR 150  Greeks to Restoration (Mason Core) (p. 135)  3
THR 151  Romanticism to Present (Mason Core) (p. 135)  3
THR 191  Practical Theater Seminar  1  0
THR 196  Performance or Design Practicum  1
THR 197  Stage or Literary Practicum  1
THR 198  Theatrical Construction Practicum  1
THR 199  Production Run Crew Practicum  1
THR 201  Stage Management  3
THR 210  Acting I (Mason Core) (p. 135)  3
THR 230  Fundamentals of Production (Mason Core) (p. 135)  3
THR 300  Voice and Speech  3
Select one course from the following:  3
   THR 303  Movement for Actors
   THR 304  Advanced Movement for Actors
   THR 305  Unarmed Stage Combat
   THR 329  Directing
   THR 350  Script Analysis
   THR 411  Great Film Directors (Mason Core) (p. 135)  3
   or THR 412  Great Film Performances (Mason Core) (p. 135)
Synthesis  3
   THR 440  Advanced Studies in Directing/ Dramaturgy (Mason Core) (p. 135)
   or THR 496  Text in Production (Mason Core) (p. 135)

Design in the Discipline  3
Select one course from the following:
   THR 333  Scenic Design
   THR 334  Lighting Design
   THR 335  Costume Design
   THR 339  Principles of Design
   THR 345  Puppetry
   or permission of Director

Writing in the Discipline  3
Select one course from the following:
   THR 380  Playwriting I
   THR 381  Playwriting II
   THR 382  Screenplay Workshop
   THR 482  Advanced Screenplay Workshop
   THR 484  Translation Adaptation for Stage Screen
   or permission of Director

Dramatic Literature  3
   THR 351  Dramatic Theory and Criticism  2
   THR 352  Dramatic Literature Seminar  2

THR 355  Moral Vision in American Theater
THR 359  World Stages (Mason Core) (p. 135)  3
THR 395  Theater as the Life of the Mind (Mason Core) (p. 135)
THR 424  Contemporary Women Playwrights

or permission of Director

Total Credits  46

1  Must be taken four times during course of study.
2  May fulfill either dramatic literature requirement or PWD concentration requirement but not both.
3  May fulfill either Mason Core (p. 135) Global Understanding requirement or dramatic literature requirement but not both.

Theater Concentrations

Theater majors earning a BA in Theater must select one of the following concentrations:

Concentration in Design and Technical Theater (DTT)
Provides a foundation of knowledge, technique, and experience in one or more areas of theater design and technology in preparation for advanced study and professional work in the field.

THR 339  Principles of Design  3
Select two courses from the following:  6
   THR 235  Costume Crafts
   THR 313  Event Technology
   THR 314  Lighting Stagecraft
   THR 315  Sound Engineering
   THR 332  History of Fashion and Dress
   THR 343  Costume Pattern Drafting
   or permission of Director
Select one course from the following:  3
   THR 316  Scene Painting
   THR 330  Seminar in Technical Theater
   THR 331  Drafting and Model Making
   THR 333  Scenic Design
   THR 334  Lighting Design
   THR 335  Costume Design
   THR 337  Sound Design
   THR 342  Makeup Design
   THR 434  Advanced Lighting Design
   or permission of Director

Upper-Level Theater Electives  12
12 credits of 300-400 level THR coursework

Total Credits  24

Concentration in Performance (PFM)
Designed for the serious student of acting and directing with professional aspirations. Solid grounding in the fundamentals of performance analysis and basic training of the actor’s instrument are complemented by a rigorous, sequential instruction in the various facets of the actor’s craft.

At its core, the Performance Concentration is a blend of Modern and Classical actor training using a Stanislavski-grounded approach balanced with techniques for understanding texts written two hundred years before "motivation" and "characterization" entered the critical vocabulary.
Rounding out the curriculum is specialized study in vocal production and movement technique. Matriculation in this program expresses a profound commitment to a rigorous intellectual, physical and emotional investigation of the discipline of performance over a two-year period. Professional development is enhanced with ongoing student progress reviews, support and advising from Performance Concentration faculty.

Upper-Level Theater Electives 12
12 credits of 300-400 level THR coursework

Total Credits 24

1 May fulfill concentration requirement or dramatic literature requirement but not both.

**Concentration in Playwriting and Dramaturgy (PWD)**

Acknowledges a creative and practical connection between the work of the playwright and dramaturg. Students choosing this area of specialization will focus on the literary aspects of theater, such as playwriting, dramaturgy, screenwriting, translation, adaptation, season planning, and theater criticism. Students seeking specialized experience as a playwright or dramaturg will choose from a selection of required and recommended courses designed to expose students to a broad range of contemporary and classical texts, deepen their understanding of dramatic structure, encourage collaboration, and foster opportunities for new play development. Students are encouraged to consult their advisors on complementary courses of interest outside the major, such as in the visual and performing arts, Film and Video Studies, English and Foreign Language. This concentration gives students access to a variety of hands-on opportunities within the School of Theater and the professional world.

12 credits of required coursework chosen from the following in consultation with a faculty adviser based on the student’s area of interest.

**Concentration in Theater Education for Theater Arts PK-12 (THEA)**

Designed for students interested in pursuing theater education. In addition to transcript review and the submission of an essay detailing goals for the concentration, students must:

- Have earned 45 to 60 credits.
- Submit scores for the Praxis Core (Reading, Writing, and Mathematics) tests to the committee. (It is strongly recommended that students take the Praxis Core tests as soon as ENGH 302 Advanced Composition (Mason Core) (p. 135), a course in literature, and a course in mathematics have been completed.)
- Maintain an overall GPA of 2.80 in all course work completed at Mason and in course work at all institutions of higher learning combined.
- Earn no grade lower than a C in theater and professional education courses needed for graduation.

Upon fulfilling THR 448 Foundations of Theater Education, THR 449 Elementary Theater Education, THR 450 Secondary Theater Education, EDRD 300 Literacy and Curriculum Integration, EDCU 301 Educationally Diverse Populations: Handicapped, Gifted, Multicultural, and EDCU 302 Human Growth and Development students must complete 15 weeks of a full-time student teaching internship (THR 455 Theater Education Internship). Applications for placement, subject to approval of the unit, are submitted to the Field Placement Specialist in the College of Education and Human Development at the beginning of the previous semester. In addition, students must pass the VCLA before student teaching.

Total Credits 24

Concentration in Theater Studies (THST)
Designed for the Theater generalist. Students pursuing a concentration
in Theater Studies will have an individualized program of study focused
on the discipline. Students engage with both creative and conceptual
inquiry in the development of artistic practice. In consultation with a
faculty adviser, the student drafts a curriculum contract outlining an
individualized program of courses for a total of 24 credits of upper-
division THR courses (300-400 level).

General Electives
BA students must use general electives for one of the
following. After fulfilling one of these options, the remaining
general electives may be taken inside or outside of the
department. All students are required to take a minimum of
45 credits of upper-division courses (300-400 level).

- Demonstrate intermediate-level proficiency in one foreign
  language (0-9 credits)
- Complete a minor (15-21 credits)
- Complete a double major outside their primary field of
  study (15-21 credits)

Honors

Honors in the Major
Highly-qualified students who have completed 75 credits may pursue
advanced work leading to graduation with honors in the major. Students apply
for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for
pursuing advanced coursework and specific professional goals, along
with the names of two Mason theater faculty members who have agreed
to serve as references.

Students satisfy the honors course sequence by taking three honors-
specific courses from their chosen concentration. They must also
maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.

Accelerated Master's

Theater, BA/Arts Management,
Accelerated MA
Overview
Undergraduates in Theater may apply to the accelerated master's degree
in Arts Management. If accepted, students will be able to earn a BA
in Theater (p. 840) and an MA in Arts Management (p. 774) after
satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university
requirements for the master’s degree. The regular designed timeframe
would be a start in the Fall and the completion in the Summer five years
later, but longer time frames may also be available.

See AP.6.7 Bachelor's/Accelerated Master's Degree (p. 89) for policies
related to this program. For policies governing all graduate degrees,
see AP.6 Graduate Policies (p. 87).

Admission Requirements
Applicants to accelerated master's programs must have completed at
least 75 credits that apply to their undergraduate degree (with at least
24 credits at Mason) and no more than 90 credits. Applicants should
submit an Accelerated Master's Program Application, available from
the College of Visual and Performing Arts (CVPA) Graduate Studies. It
includes the proposed conferral date for the undergraduate degree and
the two graduate courses that are to be applied to the undergraduate
degree.

Interested students should contact the Arts Management Program Office
for more details about the application process.

Accelerated Option Requirements
As an undergraduate, the accelerated master's student is to complete the
two graduate courses indicated on their Accelerated Master's Program
application with a minimum grade of 3.00 in each course. Students must
maintain a minimum GPA of 3.00 in all coursework and in coursework
applied to their major. On completion and conferral of the undergraduate
degree in the semester indicated in the application, they submit the
Bachelor's/Accelerated Master's Transition Form (which shall incorporate
all of the Graduate Admission requirements of the university) and are
admitted to graduate status.

As graduate students, accelerated master's students have an advanced
standing. They must meet all master's degree requirements except for the
two courses (6 credits) they completed as undergraduates. The
Internal Internship (AMGT 740 Internal Internship) will be within Theater
at Mason (generally with the School of Theater). Students will begin their
master's program in the semester immediately following conferral of the
undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve
graduate credit. These credits do not apply to the undergraduate degree.
The ability to take courses for reserve graduate credit is available to all
high achieving undergraduates with permission of the School of Theater.
Permission to take a graduate course for reserve graduate credit is
normally granted only to Mason seniors within 15 hours of graduation
and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request
that the credits be moved from the undergraduate degree to the graduate
degree using the Bachelor's/Accelerated Master's Transition Form.

Total Credits 37

1 Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 Composition for Multilingual Writers (Mason Core) (p. 135) for ENGH 101 Composition (Mason Core) (p. 135). Students must attain a minimum grade of C in ENGH 100 Composition for Multilingual Writers (Mason Core) (p. 135) or ENGH 101 Composition (Mason Core) (p. 135), as well as in ENGH 302 Advanced Composition (Mason Core) (p. 135), to fulfill degree requirements.

2 Outside the major. Students earning a concentration in Musical Theater Performance must take DANC 125 Modern/Contemporary Dance I (Mason Core) (p. 135), DANC 131 Beginning Jazz Technique (Mason Core) (p. 135), DANC 145 Ballet I (Mason Core) (p. 135), DANC 161 Beginning Tap Dance (Mason Core) (p. 135), DANC 225 Modern/Contemporary Dance II (Mason Core) (p. 135), DANC 231 Intermediate Jazz Technique (Mason Core) (p. 135), DANC 245 Ballet II (Mason Core) (p. 135), or DANC 331 Advanced Jazz Dance (Mason Core) (p. 135).

3 Including one laboratory science

4 Writing and Dramaturgy for Stage and Screen Concentration requires THR 440 Advanced Studies in Directing/Dramaturgy (Mason Core) (p. 135)

Major

Theater Core Requirements

Note: All THR majors may not double count THR courses within the major. All THR courses count either towards the degree core or the concentration, but not both.

- THR 150 Greeks to Restoration (Mason Core) (p. 135) 3
- THR 151 Romanticism to Present (Mason Core) (p. 135) 3
- THR 191 Practical Theater Seminar 1 0
- THR 196 Performance or Design Practicum 1
- THR 197 Stage or Literary Practicum 1
- THR 198 Theatrical Construction Practicum 1
- THR 199 Production Run Crew Practicum 1
- THR 201 Stage Management 3
- THR 210 Acting I (Mason Core) (p. 135) 3
- THR 230 Fundamentals of Production (Mason Core) (p. 135) 3
- THR 300 Voice and Speech 3

Select one from the following:

- THR 303 Movement for Actors
- THR 304 Advanced Movement for Actors
- THR 305 Unarmed Stage Combat
- THR 329 Directing 3
- THR 350 Script Analysis 3
- THR 411 Great Film Directors (Mason Core) (p. 135) 3
- THR 412 Great Film Performances (Mason Core) (p. 135)

Synthesis 3

Select one course from the following:

- THR 440 Advanced Studies in Directing/Dramaturgy (Mason Core) (p. 135)
- THR 496 Text in Production (Mason Core) (p. 135)

Design in the Discipline 3

Select one course from the following:

- THR 333 Scenic Design
- THR 334 Lighting Design
- THR 335 Costume Design
- THR 339 Principles of Design
- THR 345 Puppetry

or permission of Director

Writing in the Discipline 3

Select one course from the following:

- THR 380 Playwriting I
- THR 381 Playwriting II
- THR 382 Screenplay Workshop
- THR 482 Advanced Screenplay Workshop
- THR 484 Translation Adaptation for Stage Screen

Dramatic Literature 3

Select one course from the following:

- THR 380 Scenic Design
- THR 334 Lighting Design
- THR 335 Costume Design
- THR 339 Principles of Design
- THR 345 Puppetry

<td>Musical Theater Ensemble</td>
</tr>
<tr>
<td>or THR 495</td>
<td>Senior Capstone Project</td>
</tr>
</tbody>
</table>

After fulfilling degree requirements, BFA students may use remaining general electives credits inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300-400 level).

Total Credits 7

Honors

Honors in the Major
Highly-qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three honors-specific courses from their chosen concentration. They must also maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.
Undergraduate
The programs in business education culminate in a BS degree with a major from one of five areas: accounting, finance, information systems and operations management, management, or marketing.

Graduate
The School of Business offers an MBA, Executive MBA, and MS degrees in Accounting, Management, Real Estate Development, Technology Management, and Management of Secure Information Systems.

Highly-qualified Mason Accounting majors may apply to the accelerated master's degree program and obtain both Accounting, BS (p. 850) and Accounting, MS (p. 855) degrees after satisfactory completion of a total of 144 credits.

Students that earn a BS within the School of Business may be eligible for the following Accelerated Master's Program within the Volgenau School of Engineering: BS (selected)/Data Analytics Engineering, Accelerated MS (p. 963).

For policies governing all accelerated degree programs, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89).

Centers
The School of Business houses four centers. The Center for Innovation and Entrepreneurship provides experiential learning through academic programs as well as hands-on programs for Mason students interested in innovation, invention, early stage startups, and entrepreneurship. The Center for Real Estate Entrepreneurship focuses on real estate research and education in real estate development and finance. The Investor Protection & Corporate Fraud Research Center strives to provide thought leadership on investor protection and fraud risk by sponsoring, conducting, and disseminating research in these areas. The Center for Infrastructure Protection & Homeland Security conducts research, develops projects, and provides expert analysis and insight into policy across a variety of infrastructure sectors and related fields, including energy, transportation, cyber-security, defense and finance. In addition, the School's Government Contracting Initiative is building a competency in the business of government and government contracting.

Requirements & Policies
Policies
Academic Policies
Students should become familiar with the university's general academic policies (p. 74) in addition to those specific to each academic unit.

E-mail
George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy
A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Any course attempted elsewhere must take place more than 50 miles from the George Mason University Fairfax campus.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere (p. 76).

Undergraduate Internship Policy
The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered with the School of Business as either BUS 492 Undergraduate Internship or ACCT 492 Internship in Accounting. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.
Termination from the Major
A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135), MKTG 303 Principles of Marketing and OM 303 Operations Management. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.S.2.4 Termination from the Major (p. 85).

University Consortium
Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean's office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Undergraduate Course Overload Policy
The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:
- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Appeals Process
The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

## Accounting Undergraduate Certificate

**Banner Code:** BU-CERB-ACCT

**Academic Advising**

Phone: 703-993-1880  
Email: masonbus@gmu.edu

This program provides an opportunity for nondegree-seeking students to earn the academic credit necessary to sit for the Uniform CPA Examination in Virginia.

This undergraduate certificate may be pursued on a part-time basis. Maintaining full-time status is not guaranteed.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure page. ([https://irr2.gmu.edu/gedt/Accounting/Gedt.html](https://irr2.gmu.edu/gedt/Accounting/Gedt.html))

## Admissions & Policies

### Admissions

The requirement for enrollment is a bachelor's degree or higher from an accredited college or university.

### Policies

#### Certificate Completion

Students are required to complete a minimum of 30 credits of accounting courses. At least 16 required credits must be taken at Mason after acceptance to the certificate program. Students have four years to complete certificate requirements. Students who are given permission to re-enroll following an absence from Mason may not count the four-year time limit as beginning on the date of re-enrollment.

Successful completion of the certificate program requires a grade of C or better in accounting courses and a GPA of at least 2.00 in all courses. Students are only permitted three attempts to pass each course with a C or better, following a third unsuccessful attempt the student will no longer be able pursue the certificate program.

#### Virginia Uniform CPA Examination

All students who wish to sit for the Uniform CPA Examination in Virginia are required to have completed 150 college-level credits, including at least 30 credits of accounting with courses in financial accounting, auditing, taxation, and management accounting; and at least 24 credits of non-accounting business courses.

The Accounting degree (ACCT) prepares students for professional careers in the private and public sectors. The accounting major is designed to produce accounting professionals who can both generate and apply financial information to solve business problems. Our students learn principles of business and accounting as well as the specific skills and specialized technical knowledge necessary for success in the dynamic field of accounting. Our program emphasizes ethics, critical thinking, written and verbal communication, and effective use and understanding of technology. Our graduates are employed by the assurance, tax advisory, and consulting groups of the top accounting firms as well as Fortune 100 companies. Our proximity to the nation’s capitol provides unique opportunities for our graduates to work in government and in the federal practices of public accounting firms. The accounting degree program is separately accredited by AACSB International.

Students interested in CPA certification can apply to the MSA (p. 855) degree to meet the 150 hour requirement for CPA certification in most states. The MSA (p. 855) allows students to meet the 150 hour requirement for CPA certification in most states in only nine months.

Admissions & Policies

Policies

Academic Policies

Students should become familiar with the university’s general academic policies (p. 74) in addition to those specific to each academic unit.

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Any course attempted elsewhere must take place more than 50 miles from the George Mason University Fairfax campus.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere (p. 76).

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered.
with the School of Business as either BUS 492 Undergraduate Internship or ACCT 492 Internship in Accounting. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Termination from the Major
A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses:

- ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I
- BULE 303 Legal Environment of Business
- BUS 303 Develop Professional Skills II: Advanced Elements
- FNAN 303 Financial Management
- MGMT 303 Principles of Management
- MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135)
- MKTG 303 Principles of Marketing
- OM 303 Operations Management

Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major (p. 85).

University Consortium
Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Undergraduate Course Overload Policy
The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- Complete the Permission to Overload form and obtain an academic advisor’s signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Appeals Process
The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, please contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit business.gmu.edu (http://business.gmu.edu).

Requirements

Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.

- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 135) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements

Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Business Core

A grade of C or higher is required in each of the School of Business core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135), MKTG 303 Principles of Marketing and OM 303 Operations Management. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major (p. 85).

General Electives

General electives may be selected from any University or School of Business course, except courses designated for the Business minor (MBUS). Credits awarded as Associate Degree Elective Credit (ADEC) as part of a student’s transfer evaluation are also excluded from general electives.

Total Credits 27-28

1 A grade of C or higher is required in each of the upper-level accounting major courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following required Accounting courses: ACCT 311 Managerial and Cost Accounting, ACCT 331 Financial Accounting II, ACCT 332 Financial Accounting III, ACCT 351 Taxation and Managerial Decision Making, ACCT 361 Accounting Information Systems, and ACCT 461 Assurance and Audit Services. Those who do not successfully complete these required courses within three attempts will not be eligible to receive a degree in Accounting from the School of Business. Students terminated from the BS Accounting program are prohibited from enrolling in any Accounting course.

2 Students who anticipate taking the CPA, CMA, CIA, or other professional exam should consult the applicable regulations and meet with their advisor. State regulations regarding professional examinations may dictate course selections.

3 Students in the MSAccel program and select high performing undergraduates may take graduate courses for undergraduate credit. Enrollment in a graduate level course in not guaranteed. Please contact an academic advisor for additional information.
Capstone
Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 135).

Honors in the Major

The School of Business Accounting Honors Program provides highly motivated students majoring in accounting with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

Admission Requirements

1. Minimum 3.0 cumulative GPA and 3.5 GPA in ACCT major.
2. Two academic/professional references.
3. Once admitted to the program, students with a cumulative GPA below 3.0 will be dropped from the program.

Curricular Requirements

1. ACCT 330 Financial Accounting I with an A- or better.
3. Honors students must graduate with a 3.0 cumulative GPA and 3.5 GPA in the major.

Co-Curricular Requirements

The student must complete ONE of the following in addition to the curriculum requirements:

1. ACCT 462 Honors Seminar in Accounting or a 600-level ACCT course.
2. Study abroad (e.g., Aachen Dual Degree, Oxford Honors, China, South America).
3. Internship (ACCT 492 Internship in Accounting) Internships where no credit is earned also qualify.
4. Significant work experience (e.g., an experience that is comparable to an internship).
5. Research paper/Thesis as an independent study (ACCT 499 Independent Study) course. (e.g., faculty research, Mason undergraduate apprentice program, QEP).

Extra-Curricular Requirements

1. Attendance at Honors Events, as determined by the Honors Program Director.
2. The student must show a high degree of engagement in a School of Business student organization, preferably in a leadership role.

Requirements for Students to Obtain the Honors Designation

1. Honors students must meet all curricular, co-curricular, and extracurricular requirements mentioned above at graduation.

Accelerated Master's

Accounting, BS/Accounting, Accelerated MS

Overview

Highly-qualified Mason Accounting majors may apply to the accelerated master’s degree program and obtain both Accounting, BS (p. 850) and Accounting, MS (p. 855) degrees after satisfactory completion of a total of 144 credits. Graduates will be exceptionally well-prepared for professional school or a PhD program in accounting or a related discipline.

In the accelerated program, six credits of ACCT 600-level courses can be used to meet both bachelor’s and master’s degree requirements. These six credits will replace six credits of general electives in the student’s undergraduate program. Students in the Accelerated MSA program may take any 600-level courses while an undergraduate.

For policies governing all accelerated degree programs, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89).

Application Requirements

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits earned at Mason).

Students submit an application online through the Office of Graduate Admissions.

Admission requirements are as follows:

1. A minimum GPA of 3.00 in at least three accounting courses (e.g. ACCT 330 Financial Accounting I, ACCT 331 Financial Accounting II and ACCT 332 Financial Accounting III) with no grade less than a B- in those accounting courses.¹
2. Review and approval by the MSA program director.

GMAT is not required.
Interested students should contact the MSA program office for more details about the application process.

Accelerated Option Requirements

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

On completion and conferral of the undergraduate degree in the semester indicated in the application, the student submits the Bachelor's/Accelerated Master's Transition Form and is admitted to graduate standing. As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program director. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Accounting, MS

Graduate Program Office
Phone: 703-993-2136
Email: msa@gmu.edu

The MSA is designed to meet the needs of new professionals entering the accounting profession. The program allows students to earn a state-of-the-art graduate degree in accounting and also meet requirements to take the Uniform CPA Examination in Virginia and in most other states. The program integrates fundamental business skills and specialized knowledge and acumen required by the accounting profession. The MSA program is pursued as a face to face or an online option.

Admissions & Policies

Admissions

Admission and Eligibility Requirements

All students registering for School of Business graduate courses must have graduate standing. Nondegree student status is not available. To be eligible for our MS in Accounting (the full-time, part-time and accelerated accounting programs), you must have a bachelor's degree in accounting or equivalent from an accredited institution or have completed 27 college credits in accounting.

Applicants who have a business degree, but do not have an accounting degree or equivalent will be provisionally admitted until they have completed the following courses or equivalents with a grade of B- or better:

- ACCT 531 Foundations of Financial Reporting I
- ACCT 532 Foundations of Financial Reporting II
- ACCT 551 Foundations of Taxation of Business Entities
- ACCT 561 Foundations of Assurance Services

The prerequisites are currently only available in-person, not online. Online students with business degree backgrounds are eligible to take these prerequisite courses in-person if admitted provisionally to the MS in Accounting program.

Applicants who do not have an accounting degree or business degree will be provisionally admitted until they have completed the following courses or equivalents with a grade of B- or better:

- ACCT 330 Financial Accounting I
- ACCT 531 Foundations of Financial Reporting I
- ACCT 532 Foundations of Financial Reporting II
- ACCT 551 Foundations of Taxation of Business Entities
- ACCT 561 Foundations of Assurance Services

The prerequisites are currently only available in-person, not online. Online students with business degree backgrounds are eligible to take these prerequisite courses in-person if admitted provisionally to the MS in Accounting program.

International students with accounting degrees that lack a course in U.S. tax will be required to take ACCT 351 prior to matriculation.

Full admission requirements can be viewed at the school's website. (http://business.gmu.edu/masters-in-accounting/admissions/requirements)

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Accelerated Master's

Accounting, BS/Accounting, Accelerated MS

Overview
Highly-qualified Mason Accounting majors may apply to the accelerated master's degree program and obtain both Accounting, BS (p. 850) and Accounting, MS (p. 855) degrees after satisfactory completion of a total of 144 credits. Graduates will be exceptionally well-prepared for professional school or a PhD program in accounting or a related discipline.

In the accelerated program, six credits of ACCT 600-level courses can be used to meet both bachelor's and master's degree requirements. These six credits will replace six credits of general electives in the student's undergraduate program. Students in the Accelerated MSA program may take any 600-level courses while an undergraduate.

For policies governing all accelerated degree programs, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89).

Application Requirements
Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits earned at Mason).

Students submit an application online through the Office of Graduate Admissions.

Admission requirements are as follows:

1. A minimum GPA of 3.00 in at least three accounting courses (e.g. ACCT 330 Financial Accounting I, ACCT 331 Financial Accounting II and ACCT 332 Financial Accounting III) with no grade less than a B- in those accounting courses.¹
2. Review and approval by the MSA program director.

GMAT is not required.

Interested students should contact the MSA program office for more details about the application process.

¹ Excluding ACCT 203 Survey of Accounting

Accelerated Option Requirements
Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

On completion and conferral of the undergraduate degree in the semester indicated in the application, the student submits the Bachelor's/Accelerated Master's Transition Form and is admitted to graduate standing. As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program director. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Administration

• Victoria Grady, Academic Director, MBA and MS in Management Programs

The degree prepares the next generation of world leaders through a rigorous, stimulating business and management curriculum based on a global perspective, industry demand and leadership.

The MBA core curriculum effectively integrates functional areas with the use of IT, oral and written communication, and teamwork. The MBA program requires 48 credits: 30 credits of core courses, 3 credits of Global coursework and 15 credits of elective courses. Students complete the degree program in two years. Because of the cohort structure, students commit to attending classes a minimum of two times per week. The MBA program operates on a module structure, with four modules each year. Modules are 11 weeks long, 10 evening, weekday class sessions with a final exam on Saturday.

JD/MBA Dual Degree Students can apply 15 credits of Law Elective coursework toward the MBA Elective degree requirement. See the Antonin Scalia Law School (http://www.law.gmu.edu/academics/degrees) for more details.

Admissions & Policies

Admissions

Admissions and Eligibility Requirements

• All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.
• An earned baccalaureate degree from a regionally-accredited institution of higher education, or international equivalent, verified from official transcripts.
• A minimum of two years of full-time, post-baccalaureate professional employment.
• One college-level calculus course prior to enrolling (recommended but not required).
Full admission requirements can be viewed and are available on the program website (http://business.gmu.edu/mba-programs/admissions).

Policies
For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Requirements

Degree Requirements

1. Travel outside the United States is required. Most travel costs, excluding cost of airfare, are included in the MBA program tuition and fees.

Electives
Select 15 credits of market-driven electives (MBA 700-level) (p. 1698) 1, 2, 3, 4

Total Credits: 15

1. 6 credit hours of electives may be taken outside the MBA Program or through the Consortium of Universities of the Washington Metropolitan Area with the permission of the program director.
2. JD/MBA Dual Degree Students can apply 15 credits of Law Elective coursework toward the MBA Elective degree requirement. See the Antonin Scalia Law School (http://www.law.gmu.edu/academics/degrees) for more details.
3. Must be taken after completion of the core courses.

Business Analytics Graduate Certificate

Banner Code: BU-CERG-BUSA
Graduate Program Office
Phone: 703-993-2136
Email: mba@gmu.edu

Administration

- Victoria Grady, Academic Director, MBA and MS in Management Programs

Business analytics graduate certificate will help analysts and professionals from diverse domains to effectively analyze data through the hands-on use of decision modeling and other techniques using popular software tools. The program covers a wide array of methodologies and techniques — from data collection, organization, reporting and mining to extraction of useful and actionable information for decision makers.

This certificate may be completed on a part-time or full-time basis.

Admissions & Policies

Admissions
Eligibility Requirements
All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed at on the program website (http://business.gmu.edu/mba-programs/analytics).

Policies
Students may use the credits completed as part of their graduate degree requirements in accordance with program requirements and AP.6 Graduate Policies (p. 87). A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.00 to complete the certificate.

Requirements

Certificate Requirements
Total credits: 12

Required Course
MBA 738 Data Mining for Business Analytics 3

Total Credits: 3

Electives
Select three courses from the following:
The amount of data flowing from, to, and through enterprises of all sorts is enormous, and growing rapidly—more rapidly than the capabilities of organizations to use it. Successful enterprises are those that make effective use of the abundance of data to which they have access: to make better predictions, better decisions, and form better strategies. Business analytics—which encompasses a variety of techniques to extract useful information from different sources of data—is being embraced at an increasing rate by organizations that need to gain actionable and forward-looking insight from their data. This minor in business analytics will provide students with the cutting-edge knowledge and skills they need to use and gather data to identify, understand, and deliver insights that internal and external clients find vital to organizational success.

Admissions & Policies

Policies

At least eight credits of the minor courses must be unique to the Business Analytics Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 86).
MBUS 301  Managing People and Organizations in a Global Economy
MBUS 302  Managing Information in a Global Economy
MBUS 303  Marketing in a Global Economy
MBUS 308  Corporate Finance and Investments in a Global Economy

Total Credits 12-15

Electives
Select the fifth course from the following: 0-3

- MBUS 304  Entrepreneurship: Starting and Managing a New Enterprise
- MBUS 305  Introduction to International Business (Mason Core) (p. 135)
- MBUS 306  Managing Projects and Operations
- MBUS 491  Special Topics: Business Minor

Total Credits 0-3

Excluded Courses
These courses may not be taken for credit by School of Business majors.

Students who have already taken and received credit for relevant School of Business foundation or core course(s) shall substitute courses as follows and cannot receive credit for the equivalent MBUS course:

- ACCT 203 Survey of Accounting for MBUS 300 Accounting in a Global Economy
- FNAN 301 Financial Management or FNAN 303 Financial Management for MBUS 308 Corporate Finance and Investments in a Global Economy
- MGMT 303 Principles of Management for MBUS 301 Managing People and Organizations in a Global Economy
- MIS 301 Introduction to Business Information Systems or MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135) for MBUS 302 Managing Information in a Global Economy
- MKTG 301 Principles of Marketing or MKTG 303 Principles of Marketing for MBUS 303 Marketing in a Global Economy
- OM 301 Operations Management or OM 303 Operations Management for MBUS 306 Managing Projects and Operations

Students may transfer a maximum of six credits toward the business minor.

Administration
- Candace Deans, Academic Director, MS in Technology Management Program & Co-Academic Director, MS in Management of Secure Information Systems Programs

The program helps IT professionals gain core competencies necessary for advancement into executive level roles that manage IT resources and strategy within organizations. The program specifically focuses on Enterprise Architecture and IT Governance, Management of Information Security, IT Project Management, Managing IT Investments, Managing IT Operations, and Emerging Technologies.

This certificate may be pursued on a part or full time basis.

Admissions & Policies

Admissions
Applicants are expected to be current students in the MS Technology Management (p. 881) program. This is a 15 credit program and students may use the credits completed as part of their graduate degree requirements in accordance with AP.6.8.1 Students in Master's or Doctoral Programs also Pursuing Graduate Certificates (p. 90).

The 18-credit Chief Learning Officer certificate prepares Chief Learning Officers and other senior level executives for success as learning and
entrepreneurship minor

This minor will prepare students to exploit potential entrepreneurial opportunities while allowing them to explore different interests they have in the entrepreneurial realm.

Admissions & Policies

Admissions

Applicants must have a U.S. equivalent bachelor degree from an accredited college or university. Applicants must have a minimum of three years of experience in a position with responsibilities for talent development or talent management.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

Students are responsible for familiarization and compliance with the university's Graduate Policies (p. 87). A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is six years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.00 to complete the certificate.

Administration

• Claus Langfred, Academic Director, Executive MBA Program

The Executive MBA is designed for those with a minimum of 7 years of significant business and professional experience. The program’s focus is management decision making, strategic management of business resources, and leadership. Dedicated faculty, an innovative and relevant curriculum, a global focus, a student-centered program team, and great colleagues contribute to the learning experience of a lifetime. The program is carefully designed to help students master a broad range of executive-level competencies while cultivating expert business-related knowledge of the global economy. Students complete the program as a cohort with the exception of track-specific coursework. The program is completed in 20 months, starting in August and classes are held approximately three Saturdays per month. Students enrolling in both the in-class and online versions must have the support of their organizations to participate in global and domestic residencies.

Diversity in Learning

Students encounter multiple approaches to learning in the Program. Classroom discussions, team projects, individual reading, team presentations, team problem solving, business simulations, business case analyses, coaching, and domestic and international residencies all contribute to the creative learning environment delivered by the Mason Executive MBA Program.

Tracks

The program offers three tracks to complement core business courses. These tracks include: Global, National Security, and Critical Infrastructure Protection and Management. A brief overview of these tracks is below. Please visit the website (http://business.gmu.edu) for further information.

Global Track

Rapid changes in technology and geopolitics have transformed the world of commerce—every company today truly competes on a global stage. The “globalization” of business demands new kinds of leadership skills and richer multicultural perspectives. It also demands a different kind of executive MBA training. The Global track is designed to prepare today’s executives for the new competitive realities. The program develops real-world skills that translate into real-world business decisions.

National Security Track

With America’s role in the world continually evolving to meet new global challenges, the role of leadership in the security industry has never been more vital. The need for military leaders, government executives and corporate defense contractors who can provide mission critical products and services— and who understand the unique demands of the complex and dynamic national security sector—has never been more critical.

Dedicated faculty from the Mason School of Business and adjunct faculty working in specialty areas of the security sector; as well as accomplished government, military, and corporate guest speakers, technical experts, and Mason alumni employed in the security industry; are a part of the National Security track. The dynamic learning environment brings contemporary challenges of the national security industry right into the classroom.

Critical Infrastructure Protection and Management Track

In partnership with George Mason University’s Center for Infrastructure Protection and Homeland Security, our Critical Infrastructure Protection and Management track addresses the critical areas of risk analysis and management, systems analysis, and cyber security within critical infrastructure sectors such as energy, telecommunications, medical response, and critical manufacturing. The program emphasizes interagency action and intergovernmental coordination to achieve business efficiency and develop capacities to create industry/government cooperation.

Admissions & Policies

Admissions

Full eligibility and admission requirements can be viewed at the program’s website. (http://business.gmu.edu/emba/admissions)

Policies

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Requirements

Degree Requirements

Total credits: 48

Modules

Students complete seven 10-week modules. During each ten-week module, students complete two to three courses in an applications-oriented sequence that takes them from developing core management
skills through the understanding and application of the tools of business performance to the talents of leadership.

**Finance, BS**

**Banner Code:** BU-BS-FNAN

**Academic Advising**

Phone: 703-993-1880
Email: masonbus@gmu.edu

**Administration**

- Alexander Philipov, Chair, Finance Area

The Finance degree (FNAN) prepares students for professional careers by providing a solid foundation in the principles necessary to make operating decisions for an organization and in financial market analysis. We educate our finance majors to understand, evaluate, and manage risk. In addition, students learn to conduct and effectively present financial analysis and research valuing complex projects, assets, securities, and firms. Finance majors explore the relationships among investors, firms, financial institutions, markets, and regulators. Students majoring in Finance have a unique opportunity to compete globally, as well as regionally, for unique and diverse job opportunities, including government (U.S. Treasury and the Board of Governors), large financial corporations (Fannie Mae and Freddie Mac), international organizations (World Bank and IMF), and other careers related to Finance.

**Admissions & Policies**

**Policies**

**Academic Policies**

Students should become familiar with the university's general academic policies (p. 74) in addition to those specific to each academic unit.

**E-mail**

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

**Study Elsewhere Policy**

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Any course attempted elsewhere must take place more than 50 miles from the George Mason University Fairfax campus.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere (p. 76).
Undergraduate Internship Policy
The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered with the School of Business as either BUS 492 Undergraduate Internship or ACCT 492 Internship in Accounting. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Termination from the Major
A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses:

- ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I
- BULE 303 Legal Environment of Business
- BUS 303 Develop Professional Skills II: Advanced Elements
- FNAN 303 Financial Management
- MGMT 303 Principles of Management
- MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135)
- MKTG 303 Principles of Marketing
- OM 303 Operations Management

Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major (p. 85).

University Consortium
Students should review university policies regarding university Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Undergraduate Course Overload Policy
The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor’s signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Appeals Process
The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, please contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit business.gmu.edu (http://business.gmu.edu).

### Requirements

#### Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 135) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

#### Mason Core Requirements

Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

<table>

ECON 103 Contemporary Microeconomic Principles (Mason Core) (p. 135) 3
ECON 104 Contemporary Macroeconomic Principles (Mason Core) (p. 135) 3

Select one of the following: 1 3-4
MATH 108 Introductory Calculus with Business Applications (Mason Core) (p. 135)
MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 135)
MATH 114 Analytic Geometry and Calculus II
HNRT 225 Applied Calculus

Total Credits 27-28

1 MATH 108 Introductory Calculus with Business Applications (Mason Core) (p. 135) or MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 135) satisfies the Mason Core quantitative reasoning requirement.

Business Core
A grade of C or higher is required in each of the School of Business core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135), MKTG 303 Principles of Marketing and OM 303 Operations Management. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major (p. 85).

Total Credits 3

Students in the MS in Accounting (MSA) program are required to take ACCT 636 Fraud Examination and can take ACCT 701 Business Valuation, ACCT 737 Fraud and the Law and ACCT 738 Advanced Topics in Fraud as electives.

Information Systems and Operations Management, BS

Admissions

Eligibility Requirements

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available. Full eligibility and admission requirements can be viewed at the school's website (http://business.gmu.edu/masters-in-accounting/forensic-accounting).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

Students are responsible for familiarization and compliance with the university’s Graduate Policies (p. 87) contained in this catalog. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.0 to complete the certificate.

Requirements

Certificate Requirements

Total credits: 12
Policies

Academic Policies
Students should become familiar with the university’s general academic policies (p. 74) in addition to those specific to each academic unit.

E-mail
George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy
A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Any course attempted elsewhere must take place more than 50 miles from the George Mason University Fairfax campus.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere (p. 76).

Undergraduate Internship Policy
The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as either BUS 492 Undergraduate Internship or ACCT 492 Internship in Accounting. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Termination from the Major
A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses:

- ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I
- BULE 303 Legal Environment of Business
- BUS 303 Develop Professional Skills II: Advanced Elements
- FNAN 303 Financial Management
- MGMT 303 Principles of Management
- MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135)
- MKTG 303 Principles of Marketing
- OM 303 Operations Management

Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major (p. 85).

University Consortium
Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Undergraduate Course Overload Policy
The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor’s signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Appeals Process
The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, please contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit business.gmu.edu (http://business.gmu.edu).

Requirements

Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 135) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements

School of Business students must complete the Mason Core (p. 135) requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason Core (p. 135) requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 135) requirements.
Foundation Requirements

Written Communication (p. 135) 6
Oral Communication (p. 136) 3

Core Requirements

Arts (p. 137) 3
Literature (p. 140) 3
Natural Science (p. 141) 1 8
Western Civilization/World History (p. 143) 3

Total Credits 26

1 School of Business students required to complete 8 credits of natural science by completing two 4-credit laboratory sciences.

Note:

Remaining Mason Core (p. 135) requirements are fulfilled with major coursework.

**BUS 492** Undergraduate Internship

Total Credits 21

1 Excluding MIS 301 Introduction to Business Information Systems or MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135) or OM 301 Operations Management or OM 303 Operations Management

2 It is strongly recommended that students planning to major in ISOM take MIS 302 Introduction to Programming for Business Applications as part of their program.

**Optional Concentrations**

Students have considerable flexibility in their choice of electives and may choose from two concentrations of study: one in Operations and Supply Chain Management (OSCM) and the other in Management Information Systems (MIS). Students are strongly urged to discuss their choice of electives and programs of study with their academic advisor and an ISOM faculty member. Concentrations must be declared prior to a student filing an intent to graduate.

**Concentration in Operations and Supply Chain Management (OSCM)**
If a student has taken any four of the following seven electives, beyond the ISOM required courses, s/he can declare an OSCM concentration.

OM 320 Supply Chain Management in a Global Economy 3
OM 352 Management Science 3
OM 435 Business Process Analysis and Simulation 3
OM 452 Business Forecasting 3
OM 456 Quality Management 3
OM 462 Honors Seminar in Operations Management (Topic Varies) 3
OM 491 Seminar in Operations Management 3

Total Credits 21

**Concentration in Management Information Systems (MIS)**
If a student has taken any four of the following eight electives, beyond the ISOM required courses, he/she can declare an MIS concentration.

MIS 302 Introduction to Programming for Business Applications 3
MIS 320 Networks and Security 3
MIS 412 E-Business Systems Development 3
MIS 430 Data Warehousing 3
MIS 462 Honors Seminar in Management Information Systems (Topic Varies) 3
MIS 491 Seminar in Management Information Systems 3

Total Credits 18

**Capstone**

Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 135).

BUS 498 Capstone Course: Advanced Business Models (Mason Core) 3

Total Credits 3

**Second Majors in Information Systems and Operations Management**

Students declaring a second major in Information Systems and Operations Management must complete the three required courses and three elective courses for the major.

**Honors**

**Honors in the Major**

The School of Business Information Systems and Operations Management Honors Program provides highly motivated students majoring in ISOM with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

**Admission Requirements**

- Minimum 3.0 cumulative GPA and 3.5 GPA in the ISOM major.
- Two academic/professional references.
- Once admitted to the program, students with a cumulative GPA below 3.0 will be dropped from the program.

**Curricular Requirements**

- MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135) earning a grade of A- or better.
- OM 303 Operations Management earning a grade of A- or better.
- A grade of B or better in Business Core curriculum courses:
  - ACCT 303 Accounting for Decision Making 3
  - or ACCT 330 Financial Accounting I
  - BULE 303 Legal Environment of Business 3
  - BUS 303 Develop Professional Skills II: Advanced Elements 3
  - FNAN 303 Financial Management 3
  - MGMT 303 Principles of Management 3
  - MKTG 303 Principles of Marketing 3
- One of the two ISOM Honors seminars: MIS 462 Honors Seminar in Management Information Systems (Topic Varies) or OM 462 Honors Seminar in Operations Management (Topic Varies).
Extra-Curricular Requirements

- The student must show a high degree of engagement in MISOMA or another School of Business student organization, preferably in a leadership role.

Requirements for the Honors Designation:

- Honors students must graduate with a minimum 3.00 cumulative GPA and 3.50 GPA in the major.
- Honors students must meet all curricular and extra-curricular requirements mentioned previously at graduation.

International Business Minor

Banner Code: IB

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration

- David Gallay, Assistant Director, School of Business Minor Programs

The minor in International Business for School of Business majors provides an introduction for those students interested in learning more about elements of business unique to international organizations or in pursuing a career in international business. With a strong set of business skills developed through the core undergraduate curriculum and their majors, students in the International Business Minor can further develop their skills in managing and communicating across different cultures, improve their understanding of how specific business disciplines vary in an international setting, and cultivate an appreciation for international monetary issues.

Admissions & Policies

Policies

Students must complete five courses for a total of 15 credits. At least eight credits of the minor courses must be unique to the International Business Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied to the minor.

For policies governing all minors, see AP.5.3.4 Minors (p. 86). The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

Total Credits 12

1 A maximum of one ECON or GOVT course may count towards the minor. The other three electives must be School of Business coursework.

Co-Curricular Requirement

Students must complete one of the following in addition to the curriculum requirements:

Global Experience
- Global residency course;
- An international internship abroad;
- A domestic internship with significant international experience;
- An approved study abroad program; or
- Study at a Mason campus or a Mason joint program overseas

OR

Foreign Language
- One language study course; or
- A course taught in foreign literature when taught in a foreign language

Study Elsewhere Policy

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Any course attempted elsewhere must take place more than 50 miles from the George Mason University Fairfax campus.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere (p. 76).
Undergraduate Internship Policy
The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered with the School of Business as either BUS 492 Undergraduate Internship or ACCT 492 Internship in Accounting. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Termination from the Major
A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses:

- ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I
- BULE 303 Legal Environment of Business
- BUS 303 Develop Professional Skills II: Advanced Elements
- FNAN 303 Financial Management
- MGMT 303 Principles of Management
- MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135)
- MKTG 303 Principles of Marketing
- OM 303 Operations Management

Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major (p. 85).

University Consortium
Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Undergraduate Course Overload Policy
The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:
- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor’s signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Appeals Process
The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, please contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit business.gmu.edu (http://business.gmu.edu).

Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 135) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

### Mason Core Requirements

School of Business students must complete the Mason Core (p. 135) requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason Core (p. 135) requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 135) requirements.

</table>
Honors Seminar
Students with a GPA of at least 3.00 are offered the opportunity to further distinguish their record by participating in MGMT 462 Honors Seminar in Management (Topic Varies), which addresses a key contemporary management issue in an intensive small group format.

To be eligible for enrollment in MGMT 462 Honors Seminar in Management (Topic Varies), students must be a declared management major, have a cumulative GPA of at least 3.00 with a minimum of 75 semester hours of course work, have a minimum GPA of 3.00 in course work completed for the management major, and be recommended by faculty. The class size of the Honors Seminar will be kept small. If the number of interested and qualified students exceeds the number of available spots, management area faculty will select the most qualified students to participate.

Second Majors in Management
Students declaring a second major in Management must complete the two required courses and four elective courses for the major.

Honors

Honors in the Major
The Management Honors Program in the School of Business provides highly motivated students majoring in management with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

Admission Requirements
- Minimum 3.0 cumulative GPA and 3.5 GPA in the major
- Submission of a personal statement/essay (topic to be determined)
- Two academic/professional references
- Once admitted to the program, students with a cumulative GPA below a 3.0 will be dropped from the program.

Curricular Requirements
- MGMT 303 Principles of Management earning a grade of A- or better.
- A grade of B or better in Business Core curriculum courses:
  - ACCT 303 or ACCT 330: Accounting for Decision Making 3
  - BULE 303: Legal Environment of Business 3
  - BUS 303: Develop Professional Skills II: Advanced Elements 3
  - FNAN 303: Financial Management 3
  - MKTG 303: Principles of Marketing 3
  - MIS 303: Introduction to Business Information Systems (Mason Core) (p. 135) 3

Co-Curricular or Work Experience Requirements
The student must complete ONE of the following in addition to the curriculum requirements:
- MGMT 462 Honors Seminar in Management (Topic Varies) (Honors seminar traditionally offered each Spring.)
- Study abroad (e.g., Aachen Dual Degree, Oxford Honors, China, South America)
- Internship (Internships where no credit is earned also qualify, if approved by the Management Honors Program administrator.)
- Research paper/Thesis as an independent study (MGMT 499 Independent Study) course (e.g., faculty research, Mason undergraduate apprentice program, QEP.)

Extra-Curricular Requirements
The student must show a high degree of engagement in a School of Business student organization, or other on-campus student organization, preferably in a leadership role.

Requirements for students to obtain the honors designation:
- Honors students must graduate with a minimum 3.0 cumulative GPA and 3.5 GPA in the MGMT major.
- Honors students must meet all curricular, co-curricular, and extra-curricular requirements mentioned above at graduation.

Administration
- Victoria Grady, Academic Director, MBA and MS in Management Programs

The program prepares recent graduates of non-business majors for success in business fields. The program offers the fundamentals of business management in a global environment and is composed of the core discipline areas common to all business graduate programs that are accredited by the Association to Advance Collegiate Schools of Business (AACSB). It is a full time, daytime program. Students will enter as a cohort and complete all degree requirements within 11 months.

Admissions & Policies

Admissions
Admissions and Eligibility Requirements
All students registering for School of Business graduate courses must have graduate standing. Non degree student status is not available. Admission to the Master of Science in Management is contingent on applicants having completed an undergraduate degree program within 24 months prior to when they would enroll in the program.
Full eligibility and admission requirements can be viewed at our website. (http://business.gmu.edu/masters-in-management/admissions)

Policies
For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Policies
Academic Policies
Students should become familiar with the university's general academic policies (p. 74) in addition to those specific to each academic unit.

E-mail
George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy
A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Any course attempted elsewhere must take place more than 50 miles from the George Mason University Fairfax campus.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSBS).

For additional information, see AP.1.4.2 Permission to Study Elsewhere (p. 76).

Undergraduate Internship Policy
The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the
School requires that all student internships for credit be registered with the School of Business as either BUS 492 Undergraduate Internship or ACCT 492 Internship in Accounting. Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

**Termination from the Major**
A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses:

- ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I
- BULE 303 Legal Environment of Business
- BUS 303 Develop Professional Skills II: Advanced Elements
- FNAN 303 Financial Management
- MGMT 303 Principles of Management
- MIS 303 Introduction to Business Information Systems (Mason Core) (p. 135)
- MKTG 303 Principles of Marketing
- OM 303 Operations Management

Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major (p. 85).

**University Consortium**
Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance College Schools of Business (AACSB).

**Undergraduate Course Overload Policy**
The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor’s signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Appeals Process**
The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, please contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit business.gmu.edu (http://business.gmu.edu).

Requirements

Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.

- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 135) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements

School of Business students must complete the Mason Core (p. 135) requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason Core (p. 135) requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 135) requirements.

Real Estate Development, MS

Banner Code: BU-MS-REAL

Graduate Program Office

Phone: 703-993-2136
Email: mred@gmu.edu

Administration

- Carolyn Grimsley, Director, MS in Real Estate Development

The MS in Real Estate Development program is designed to provide real estate professionals with the knowledge essential to assume increasingly responsible leadership roles within the development industry. Areas of emphasis include real estate finance, investment analysis, project management, sustainability and economic development. The distinctiveness of the Master’s program in Real Estate Development
offered by Mason lies in its multi-disciplinary curriculum, which incorporates coursework from the domains of business, engineering and public policy. Created in consultation with leading real estate development companies, the curriculum has been designed to strengthen the employment potential and upward mobility of industry professionals working in the areas of development, architecture, engineering, public planning, construction management, real estate finance, mortgage lending, property management, real estate law and related fields.

Admissions & Policies

Admissions
Requirements
All students registering for School of Business graduate courses must have graduate standing. Non degree student status is not available.

Full eligibility and admission requirements can be viewed here (http://business.gmu.edu/masters-in-real-estate-development/admissions).

Policies
The 36-hour curriculum includes 18 hours of required courses and 18 hours of electives. Students are responsible for familiarization and compliance with AP.6 Graduate Policies (p. 87).

Requirements
Degree Requirements
Total credits: 36

Required Courses
REAL 500 Real Estate Development Fundamentals 3
REAL 502 Real Estate Client Leadership and Project Management 3
REAL 630 Innovative Land Use, Approvals and Real Estate Development 3
REAL 750 MSRED Capstone 3
GBUS 746 Real Estate Analysis and Valuation 3
GBUS 747 Real Estate Finance 3
Total Credits 18

Electives
Select 18 credits of electives 1 18
Total Credits 18

1 Electives may be selected from other REAL courses (see below) and available offerings in appropriate areas including the School of Policy, Government, and International Affairs; the School of Business; the Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering; the Department of Geography and Geoinformation Science; and the Department of Environmental Science and Policy.

Students wishing to choose a field for emphasis may select, with the approval of a faculty advisor, 3 elective courses within the field that together constitute an emphasis area. They must also then take 3 courses outside the selected emphasis to reach the required elective total of 18. With prior approval of an advisor, students may design their own emphasis. The following are examples of fields for emphasis and courses within each field which may be selected.

Real Estate Development Emphasis
Select 3 courses from the following: 9
REAL 620 Real Estate Entrepreneurship
GGS 550 Geospatial Science Fundamentals
GBUS 748 Real Estate Investment
PUBP 602 Regional Economic Development: Strategies and Applications
Total Credits 9

Real Estate Finance Emphasis
Select 3 courses from the following: 9
GGS 550 Geospatial Science Fundamentals
GBUS 748 Real Estate Investment
MBA 603 Managerial Economics and Decisions of the Firm
PUBP 721 Transportation Economics
PUBP 781 Entrepreneurship and Economic Development
Total Credits 9

Environment and Sustainability Emphasis
Select 3 courses from the following: 9
CEIE 501 Sustainable Development
CEIE 550 Environmental Engineering Systems
CEIE 556 Environmental Law
EVPP 638 Corporate Environmental Management and Policy
PUBP 745 Transportation and the Environment
Total Credits 9

Electives Continued
The following courses may be included as electives by all students:

REAL 610 Management of Real Estate Design and Development 3
REAL 615 Real Estate Market Analysis and Research 3
REAL 690 Topics in Real Estate Development 1-6
REAL 796 Directed Reading 1-6

Technology Management, MS

Graduate Program Office
Phone: 703-993-2136
Email: techman@gmu.edu

Administration

- Candace Deans, Academic Director, MS in Technology Management Program & Co-Academic Director, MS in Management of Secure Information Systems Programs
The MS in technology management is designed to provide students with a graduate management education that will help them further their leadership careers in technology and technology-oriented businesses and organizations. With technology innovation and commercialization occurring at an increasing pace and industries becoming more networked and global, business success depends on the successful management of technology. Companies are succeeding with rapid innovation, insightful technology integration, creation of focused technology organizations, and skillful management of complexity. The program addresses how to succeed in this marketplace and emphasizes leadership and management; special considerations of technology innovation, commercialization, introduction, and integration; and methods and approaches of systems thinking.

The program, designed for working professionals, starts in January and lasts for 16 months. Classes are held on the Arlington Campus on Saturdays from 8 a.m. to 5 p.m. The program is 36 credits and includes a capstone project and an international residency. The international residency is approximately 8 days abroad focusing on global topics in technology management.

Total Credits: 36
Recognized in 1997 as a Commonwealth Center of Excellence by the Virginia Legislature, S-CAR is committed to serving our students, faculty and staff; our local community, our global mission, and the field of Conflict Analysis and Resolution. S-CAR is a leader in George Mason University’s commitment to be a University for the world, leveraging our long history of engagement in research and intervention in real world problems and our strength in preparing our graduates to productively engage in our local and global challenges. S-CAR strives to break down the silos of domestic and international conflict research and practice with teaching, research and practice that cut across levels of conflict.

Our world class faculty has published foundational texts on such topics as culture, social identity, narrative, religion, history and education, gender, and peacebuilding and consciousness. As scholar-practitioners, their projects and teaching engage them around the globe, including in the Middle East, Africa, the Caucasus, and here in the United States.

We offer a full complement of degree programs: Bachelors, Master's, Graduate Certificate, and Doctoral degrees that develop students’ ability to engage with theory and build their own practice.

**Undergraduate Programs**

**Bachelor's Degrees and Minors**

Conflict Analysis and Resolution offers students a BA, a BS, or a minor in an interdisciplinary social science field with practical applications. The field of conflict analysis and resolution analyzes the sources and dynamics of conflict and the means for resolution toward lasting peace. Conflict resolution students take a series of core courses that provide a background in conflict theory, analysis, and conflict resolution skills. All conflict analysis and resolution majors also choose an area of concentration. There are six concentrations: Building Peace in Divided Societies, Global Engagement, Political and Social Action, Justice and Reconciliation, Interpersonal Dynamics, and Collaborative Leadership. After selecting a concentration, students choose courses from units throughout the university that relate to the concentration and their areas of interest. The major also requires three credits of field experience in the form of an internship, independent research, or study abroad.

**Bachelor's/Accelerated Master's**

**Bachelor's/Accelerated Master's**

The School offers qualified undergraduates the opportunity to apply to the accelerated master's degree program. If accepted, students will earn both an undergraduate and a graduate degree after satisfactory completion of 155 credits, sometimes within 5 years. More information about the degree options and application process may be found here (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters).

**Graduate Programs**

**PhD Program**

The PhD program in Conflict Analysis and Resolution, the first of its kind in the United States, provides advanced study for students in the fields of conflict and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and the private sectors. The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

**MS Program**

The MS in Conflict Analysis and Resolution is a professional program that prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

**Graduate Certificates**

Four graduate certificate programs are administered by S-CAR. Each of these one-year, 15-credit programs is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for mid-career professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields.

**Faculty**

**School Faculty**

**Professors**

Avruch, Cobb, Gopin, Hirsch, Jeong, Korostelina, Rothbart, Rubenstein, Sandole

**Associate professors**

Allen, Dwyer, Flores, Lyons, Maulden, Paczynska, Schoeny, Simmons

**Assistant professors**

Firchow, Irvin-Erickson, Lopez Bunyasi, Romano, Shedd

**Research professors**

Price, Stanton

**Affiliate faculty**

**Emeritus faculty**

Cheldelin, Mitchell, Sluzki
Requirements & Policies

Policies
Students should become familiar with the university’s general academic policies in addition to those specific to each academic unit. Please see the Academic Policies (p. 74) section of this catalog.

Transfer Students
Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all George Mason University’s Mason Core (p. 135) requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 Advanced Composition (Mason Core) (p. 135) and a synthesis course.

Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a BA are considered to have met all school requirements except for proficiency in a foreign language.

Students with a bachelor’s degree from an accredited institution who are pursuing a BA in this school are considered to have met all school requirements except for proficiency in a foreign language.

Appeal of Decisions
The policies of the School for Conflict Analysis and Resolution are designed to be consistent, equitable, and transparent. Our office strives to be thorough, timely, and open to answer any questions students may have regarding our decisions and/or the process through which they were reached. Students seeking clarification and explanation of the decision should request an appointment with the S-CAR Program Director to discuss their concerns.

Students have the right to appeal decisions regarding requests for academic actions. This step can only be taken after a request to meet with the Program Director. Students who wish to pursue an appeal after this meeting should do so only if they can provide sufficient and compelling reasons for their initial claim to be reconsidered. Such reasons include newly available documentation, proof of an irregularity in procedures, proof of inequity or inconsistency, or consequences so serious that further review is warranted. A student’s dissatisfaction or disagreement with the decision does not constitute sufficient reason for a decision to be changed. Appeals are first reviewed by the Program Director. If denied, the appeal is forwarded to the S-CAR Dean. The decision of the S-CAR Dean is the final decision of the School.

If the appeal is a case involving a school-level policy, the Dean serves as the final point of appeal. If the appeal involves university level policies, students must first complete the school-level appeal process before appealing to the Provost’s Office.

Advanced Skills Graduate Certificate
Banner Code: CA-CERG-CARA
This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical techniques. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The Advanced Skills Certificate covers conflict resolution skills in challenging conflicts and considers innovative and emerging practices.

The Advanced Skills Graduate Certificate may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

Admissions & Policies

Admissions
Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). In addition to meeting all admission requirements for graduate study, applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students (p. 68). Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Policies
Class Schedule
Note that some classes for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for...
each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

## Certificate Requirements

**Total credits: 15**

</tr>
</tbody>
</table>

Total Credits: 12

### Elective

Select 3 credits from the following:

- CONF 657 Facilitation Skills (spring)
- CONF 658 Diversity and Difference in Conflict Analysis and Resolution (spring)
- CONF 659 Leadership in Conflict Analysis and Resolution (spring)
- CONF 665 Special Topics in Conflict Analysis and Resolution

Total Credits: 3

1 Application of any other course toward fulfillment of the elective requirement must be approved by the Certificate Program Director.

2 CONF 501 may also be used to fulfill this requirement

## Conflict Analysis and Resolution Minor

**Banner Code: CONF**

This minor provides students with the theory and skills to examine how and why conflicts occur and what can be done to mitigate their destructive aspects while reinforcing their constructive potential. Courses in the minor highlight relational, social, structural, and cultural factors that influence conflict and its resolution. This minor engages students in understanding the complexity of contemporary issues and problems and can be applied to many fields of study or professional careers.

### Advising

Advisors help students create a course of study that meets their interests and career goals. All majors and minors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

## Admissions & Policies

### Admissions

This minor is open to all undergraduate students.

### Policies

Students pursuing this minor must complete 15 credits of coursework in conflict analysis and resolution with a minimum GPA of 2.00. Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 86).

## Conflict Analysis and Resolution, BA

**Banner Code: CA-BA-CONF**

The world is becoming increasingly connected and the ability to create and maintain cross-cultural connections is more important than ever. As the effects of violence and conflict are felt throughout the global community, we are seeing more and more opportunities for collaboration, problem solving, and peacebuilding in local communities and across international barriers. To prepare our students to make cross-cultural connections, Bachelor’s of Arts in Conflict Analysis and Resolution students must demonstrate intermediate level proficiency in a foreign language.

### Concentrations

All conflict analysis and resolution majors choose an area of concentration from the following:

- Building Peace in Divided Societies
- Global Engagement
• Political and Social Action
• Justice and Reconciliation
• Interpersonal Dynamics
• Collaborative Leadership

Advising
School for Conflict Analysis and Resolution advisors help students create an interdisciplinary course of study that meets their interests and career goals. All majors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 84).

Major Coursework Grade Requirement
Students cannot use more than 12 credits of coursework within the major with a C- or D grade to count towards the Conflict Analysis and Resolution, BA. If a student receives C- or D grades in excess of the allowed number, they may retake courses to meet the major coursework grade requirement for graduation. Students taking a graduate course for undergraduate credit must achieve a grade of B- or higher for graduate course credits to count towards their undergraduate degree.

Transfer Students
For policies governing admission and requirements for students transferring from another college or university, see Undergraduate Admission Policies - Transfer. (p. 65)

Requirements

Degree Requirements
Total credits: 120

Students must fulfill all requirements for bachelor’s degrees as stated in Academic Policies including all Mason Core requirements. Students majoring in Conflict Analysis and Resolution must also complete the college-level requirements for foreign language proficiency as well as 51 major requirement credits for the BA degree.

Students pursuing a double major/degree with a program outside of the S-CAR undergraduate program will be expected to fulfill all of the Mason Core and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

Required Core Courses

</tr>
</tbody>
</table>

Field Experience
Students can choose to fulfill this requirement through an internship, service learning, study abroad, or independent study.

Students may not be approved for field experience until they have earned at least 30 credits. It is recommended that students complete at least nine credits of conflict coursework before applying for field experience credit. Prior approval by the Director of Field Experience is required for students to receive credit through any field experience options. Students interested in trips with S-CAR can find information at scar.gmu.edu/field-experience (http://scar.gmu.edu/field-experience). Students interested in study abroad through the Center for Global Education can find information at globaled.gmu.edu (http://globaled.gmu.edu). Please contact an S-CAR advisor with questions or for information on the opportunities, policies, and procedures for field experience credit.

Select a minimum of three credits from the following: 3

</tbody>
</table>

Total Credits 3
Courses may NOT double count for the concentration requirement and the skills and practice requirement.

Concentrations
There are six concentrations.

To fulfill the concentration requirement students select six concentration courses. Four of those six courses must be taken from within their chosen concentration. The remaining two concentration courses may be taken from any of the concentration course lists. Special topics courses relevant to the concentration and/or courses that provide regional expertise can be substituted with departmental approval. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. At least two of the six concentration courses must be CONF courses. Courses may not double count for the concentration requirement and the skills and practice requirement.

Concentration in Building Peace in Divided Societies (BPDS)
Focuses on how divided societies with a history of conflict seek to transform relationships and situations of violence and injustice. Examines communities and societies that have experienced conflict and how individuals and groups build peace locally and globally.

Select at least four of the six concentration courses from the following:

<table>
<thead>
<tr>
<th>Course Code</th>

</tr>
</tbody>
</table>

Total Credits 12

Concentration in Global Engagement (GLBE)
Focuses on studying the dynamics and impact of global conflict resolution. Examines domestic and international dimensions of security, state-to-state conflict, internal wars, terrorism, migration, negotiation, and diplomacy. Explores what can be done to reduce violent conflict and increase peace and security.

Select at least four of the six concentration courses from the following:

<table>
<thead>
<tr>

Total Credits 12
**Concentration in Interpersonal Dynamics (INTD)**

Focuses on the dynamics of social interaction that lead to interpersonal conflict and the processes and skills that support the transformation of these conflicts. Issues examined include intercultural communication, psychology of groups, family relationships, and other dimensions of human relations.

Select four of the six concentration courses from the following:

- CONF 325 Dialogue and Difference
- CONF 425 Mediating Conflict
- COMM 301 Foundations of Interpersonal Communication
- COMM 305 Foundations of Intercultural Communication (Mason Core) (p. 135)
- COMM 401 Interpersonal Communication in the Workplace
- INTS 317 Issues in Family Relationships
- PSYC 231 Social Psychology (Mason Core) (p. 135)
- PSYC 379 Applied Cross-Cultural Psychology (Mason Core) (p. 135)
- PSYC 417 Science of Well Being
- PSYC 467 The Psychology of Working in Groups and Teams
- SOCI 309 Marriage, Families, and Intimate Life
- SOCI 315 Contemporary Gender Relations

Total Credits 12

**Concentration in Collaborative Leadership (CLDR)**

Focuses on improving the capacity of leaders to work with conflict and manage change. Includes topics in conflict transformation, mediation, dialogue, and organizational leadership.

Select four of the six concentration courses from the following:

- CONF 325 Dialogue and Difference
- COMM 201 Small Group Communication
- COMM 335 Organizational Communication
- GOVT 351 Administration in the Political System
- INTS 331 The Nonprofit Sector
- INTS 404 Ethics and Leadership
- INTS 435 Leadership in a Changing Environment
- MBUS 301 Managing People and Organizations in a Global Economy
- PRLS 316 Leadership and Outdoor Education
- PSYC 333 Industrial and Organizational Psychology
- PSYC 335 Psychology of Creativity and Innovation

Total Credits 12

**Individualized Concentration (IND)**

Students interested in creating their own concentration can work with an advisor to decide upon a set of at least six courses that form a cohesive theme and will fulfill the requirements of the BA in Conflict Analysis and Resolution. Individualized concentrations must be approved by the Director of the Undergraduate Program.

**Foreign Language Proficiency**

Students must demonstrate intermediate-level proficiency in one foreign language. This requirement may be fulfilled by successfully completing a course in a foreign language course numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on a university approved foreign language proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement.

**Writing-Intensive Requirement**

All Mason students are required to complete at least one course designated as "writing intensive" in their major at the 300-level or above. CONF 302 Culture, Identity, and Conflict has been designated "writing intensive."

**Mason Core**

Note: Some Mason Core (p. 135) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 135) requirements.

¹ minimum 3 credits

**Electives**

Remaining credits needed to bring the degree total to 120 may be fulfilled with general elective courses. Up to 3 credits of Recreation (RECR) activity courses may be taken as general elective credits.

**Accelerated Master’s**

**Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS**

**Overview**

The Accelerated Master’s is designed for highly qualified and motivated undergraduate students majoring in Conflict Analysis and Resolution. If accepted, students may take up to 12 credits of graduate coursework
before undergraduate degree conferral and will be able to earn the Conflict Analysis and Resolution, BA (p. 885) or BS (p. 891) and the Conflict Analysis and Resolution, MS (p. 897) after satisfactory completion of 155 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). For additional application requirements and information specific to the accelerated Conflict Analysis and Resolution, MS (p. 897), see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters) on the departmental web site.

Accelerated Option Requirements
• During the first semester of senior year, after completing 90 hours of undergraduate coursework, admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the second semester of senior year, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
• At the beginning of the last semester of undergraduate study, the Bachelor's/Accelerated Master's Transition Form must be submitted to the Office of the University Registrar. Upon completion and conferral of the undergraduate degree they are admitted to graduate status.
• Students must begin their master's program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
• Additional policies can be found on the program website (http://scar.gmu.edu).

GPA Requirements
• Students must have a minimum cumulative GPA of a 3.25 or higher at the time of application.
• No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master’s program until completion of the undergraduate program.
• If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master’s program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master’s program after conferral of the undergraduate degree however; re-application does not guarantee admission.
• At the time of the undergraduate degree conferral, students’ GPAs must meet the standard required for admission to the master’s degree.

Course Criteria
• Students may only take courses indicated on their Accelerated Master's Program Application and approved by an academic advisor.
• Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religion, Culture, and Values Concentration)

Overview
Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master's degree in interdisciplinary studies with a concentration in religion, culture, and values. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religion, culture, and values after satisfactory completion of 150 credits, sometimes within five years. See AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Selected Majors
• Art history (p. 384)
• Philosophy (p. 432)
• Conflict analysis and resolution (p. 882)
• Global affairs (p. 509)
• History (p. 394)
• Religious studies (p. 477)
• History (p. 394)
• Sociology (p. 494)
• Anthropology (p. 484)

If the student has not majored in religious studies (p. 477), it is preferred, though not required, that the student have a minor in religious studie (p. 477).s.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 66). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application).

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master's Transition Form and are admitted to graduate status.

Total Credits 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 76).

**Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)**

**Overview**

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in social justice and human rights (p. 534). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Selected Majors**

Anthropology (p. 484), Environmental and Sustainability Studies (p. 566), Sociology (p. 494), English (p. 359), History (p. 384), Philosophy (p. 432), Conflict Analysis and Resolution (p. 885), Psychology (p. 448), Government and International Politics (p. 917), Integrative Studies (p. 574), and Communication (p. 305).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 76).

**Conflict Analysis and Resolution, BS**

**Banner Code:** CA-BS-CONF

Analytical skills and techniques are critical to solving the world’s toughest problems. In order to solve conflict we must first understand it. Critical thinking and research skills are the focus of our Bachelor of Science program and are in demand by employers of all sectors. Students pursuing a Bachelor’s of Science in Conflict Analysis and Resolution develop research skills and have the opportunity to gain experience designing surveys, conducting interviews, analyzing statistics, and organizing data.

All conflict analysis and resolution majors choose an area of concentration:

- Building Peace in Divided Societies
- Global Engagement
- Political and Social Action
- Justice and Reconciliation
- Interpersonal Dynamics
- Collaborative Leadership

**Advising**

Advisors help students create an interdisciplinary course of study that meets their interests and career goals. All majors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

**Admissions & Policies**

**Policies**

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 84).

**Major Coursework Grade Requirement**

Students cannot use more than 12 credits of coursework within the major with a C- or D grade to count towards the Conflict Analysis and Resolution, BS. If a student receives C- or D grades in excess of the allowed number, they may retake courses to meet the major coursework grade requirement for graduation. Students taking a graduate course for undergraduate credit must achieve a grade of B- or higher for graduate course credits to count towards their undergraduate degree.

**Transfer Students**

For policies governing admission and requirements for students transferring from another college or university, see Undergraduate Admission Policies - Transfer. (p. 65)

**Degree Requirements**

**Total credits: 120**
Students must fulfill all requirements for bachelor's degrees as stated in Academic Policies including all Mason Core requirements. S-CAR majors must complete the 6 credit college-level requirement in research methods as well as 51 major requirement credits for the BS degree.

Students pursuing a double major/degree with a program outside of the S-CAR undergraduate program will be expected to fulfill all of the Mason Core and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

27

**Field Experience**

Students can choose to fulfill this requirement through an internship, service learning, study abroad, or independent study.

Students may not be approved for field experience until they have earned at least 30 credits. It is recommended that students complete at least 9 credits of conflict coursework before applying for field experience credit. Prior approval by the Director of Field Experience is required for students to receive credit through any field experience options. Students interested in trips with S-CAR can find information at scar.gmu.edu/field-experience. Students interested in study abroad through the Center for Global Education can find information at globaled.gmu.edu. Please contact an S-CAR advisor with questions or for information on the opportunities, policies, and procedures for field experience credit.

Select a minimum of three credits from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

**Total Credits**

6

**Concentrations**

There are six concentrations:

To fulfill the concentration requirement students select six concentration courses. Four of those six courses must be taken from within their
chosen concentration. The remaining two concentration courses may be taken from any of the concentration course lists. Special topics courses relevant to the concentration and/or courses that provide regional expertise can be substituted with departmental approval. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. At least two of the six concentration courses must be CONF courses. Courses may not double count for the concentration requirement and the skills and practice requirement.

**Concentration in Building Peace in Divided Societies (BPDS)**

Focuses on how divided societies with a history of conflict seek to transform relationships and situations of violence and injustice. Examines communities and societies that have experienced conflict and how individuals and groups build peace locally and globally.

Select at least four of the six concentration courses from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CONF 325</td>
<td>Dialogue and Difference</td>

</tr>
</tbody>
</table>

Total Credits: 12

**Concentration in Global Engagement (GLBE)**

Focuses on studying the dynamics and impact of global conflict resolution. Examines domestic and international dimensions of security, state-to-state conflict, internal wars, terrorism, migration, negotiation, and diplomacy. Explores what can be done to reduce violent conflict and increase peace and security.

Select at least four of the six concentration courses from the following:

<table>
<thead>
<tr>

**Individualized Concentration (IND)**

Students interested in creating their own concentration can work with an advisor to decide upon a set of at least six courses that will fulfill the requirements of the BS in Conflict Analysis and Resolution.

**Writing-Intensive Requirement**

All Mason students are required to complete at least one course designated as "writing intensive" in their major at the 300-level or above. CONF 302 Culture, Identity, and Conflict has been designated "writing intensive."

**Mason Core**

Note: Some Mason Core (p. 135) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 135) requirements.

**Code**

**Synthesis/Capstone Requirement**

- Synthesis/Capstone (p. 143) — 3

**Total Credits**

- **40**

1 minimum 3 credits

**Electives**

Remaining credits needed to bring the degree total to 120 may be fulfilled with general elective courses. Up to 3 credits of Recreation (RECR) activity courses may be taken as general elective credits.

**Accelerated Master’s**

**Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS**

**Overview**

The Accelerated Master’s is designed for highly qualified and motivated undergraduate students majoring in Conflict Analysis and Resolution. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn the Conflict Analysis and Resolution, BA (p. 885) or BS (p. 891) and the Conflict Analysis and Resolution, MS (p. 897) after satisfactory completion of 155 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). For additional application requirements and information specific to the accelerated Conflict Analysis and Resolution, MS (p. 897), see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate.degrees/accelerated-masters) on the departmental web site.
Accelerated Option Requirements

- During the first semester of senior year, after completing 90 hours of undergraduate coursework, admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the second semester of senior year, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
- At the beginning of the last semester of undergraduate study, the Bachelor’s/Accelerated Master’s Transition Form must be submitted to the Office of the University Registrar. Upon completion and conferral of the undergraduate degree they are admitted to graduate status.
- Students must begin their master’s program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
- Additional policies can be found on the program website (http://scar.gmu.edu).

GPA Requirements

- Students must have a minimum cumulative GPA of a 3.25 or higher at the time of application.
- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master’s program until completion of the undergraduate program.
- If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master’s program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master’s program after conferral of the undergraduate degree however; re-application does not guarantee admission.
- At the time of the undergraduate degree conferral, students’ GPAs must meet the standard required for admission to the master’s degree.

Course Criteria

- Students may only take courses indicated on their Accelerated Master’s Program Application and approved by an academic advisor.
- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religion, Culture, and Values Concentration)

Overview

Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religion, culture, and values. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religion, culture, and values after satisfactory completion of 150 credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP. 6 Graduate Policies (p. 87).

Selected Majors

- Art history (p. 384)
- Philosophy (p. 432)
- Conflict analysis and resolution (p. 882)
- Global affairs (p. 509)
- History (p. 394)
- Religious studies (p. 477)
- Russian and Eurasian studies (p. 558)
- Sociology (p. 494)
- Anthropology (p. 484)

If the student has not majored in religious studies (p. 477), it is preferred, though not required, that the student have a minor in religious studie (p. 477)s.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 66). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application).

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Total Credits: 6

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree.
To apply these credits to the master's degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Total Credits 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 76).

**Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)**

**Overview**

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in social justice and human rights (p. 534). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Selected Majors**

Anthropology (p. 484), Environmental and Sustainability Studies (p. 566), Sociology (p. 494), English (p. 359), History (p. 384), Philosophy (p. 432), Conflict Analysis and Resolution (p. 885), Psychology (p. 448), Government and International Politics (p. 917), Integrative Studies (p. 574), and Communication (p. 305).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 76).

**Conflict Analysis and Resolution, MS**

*Banner Code: CA-MS-CONF*

This professional program prepares students for practice and further
academic work by integrating conflict analysis and resolution theory,
research, and practical techniques. Participants study the theory,
methods, and ethical perspectives of the field, and apply this knowledge
in laboratory simulations and workshops, internships, and field practice.
Graduates work in a variety of settings where conflict resolution is useful
and interest groups are in conflict with current and emergent public
policy. Examples are businesses, unions, government agencies, religious
groups, court systems, educational institutions, community centers,
international relief and development organizations, and consulting firms.

**Admissions & Policies**

**Admissions**

**Admission Requirements**

Applicants to all graduate programs at George Mason University must
meet the admission standards and application requirements for graduate
study as specified in Graduate Admissions (p. 66). In addition, applicants
must submit all undergraduate and graduate transcripts; two letters of
recommendation, one of which should be from a faculty member in the
applicant’s undergraduate or graduate major field; a resume or curriculum
vita; and a 750- to 1,000-word essay on goals and reasons for seeking
admission to the program. GRE or other standardized test scores are not
required but may be submitted. The TOEFL is required of international
students. For more information, see Admission of International Students
(p. 68). Students can be admitted to the MS program for either the Fall or
Spring semesters.

Background courses in social sciences, as well as prior work experience,
are desirable. Prior graduate academic work is evaluated on an individual
basis for possible transfer credit and fulfillment of program requirements;
however, Mason usually does not reduce the total credits required for the
degree. Students may enroll on a full- or part-time basis. The MS Program
is available on-campus, online (https://masononline.gmu.edu/programs/
conflict-analysis-and-resolution-ms) or in a hybrid format (on-campus and
distance learning).

**Policies**

Mason requires all students to complete the master’s degree within six
years of their official admission date.

Consult the S-CAR student handbook for information on registration
procedures.

**Transfer of Non-Degree Credit**

A maximum of 12 credits of S-CAR graduate courses taken at George
Mason as a non-degree graduate student, or as part of S-CAR’s graduate
certificate program may be transferred into the MS program. How credit
will be counted will be determined in consultation with the admitted
student’s advisor. A maximum of six credits of non-S-CAR courses taken
as non-degree credit can be counted toward the MS program. Courses
counted toward another degree cannot be transferred.

**Adding an S-CAR Certificate Program**

Students may elect to complete an S-CAR Graduate Certificate (p. 884)
in addition to the MS program. Graduate certificates are opportunities
for students to further tailor their academic program and specialize in a
specific area of conflict resolution practice. Certain graduate certificate
courses can be used to fulfill MS program requirements. Students should
consult with the Certificate Program Director and the Master’s Program
Director for policies on counting certificate courses toward the MS
degree.

<td>CONF 625</td>
<td>Engaging Conflict</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 15

1. Students must take the introductory course in the first semester.
2. Students must take CONF 657 Facilitation Skills and at least 3 credits of CONF 625 Engaging Conflict. Additional credits of CONF 625 Engaging Conflict will count as electives.

Electives

Select 27 credits of elective courses from any 500, 600, or 700 level CONF courses, except required courses.

Total Credits: 27

Because the choice of electives can vary significantly according to individual goals or needs, each student should develop a plan of study that should be discussed once each semester with the advisor and updated as appropriate.

With the advisor’s approval, each student is eligible to include a maximum of six credits of electives from outside the S-CAR program, including courses in other Mason departments, consortium courses, and transfer courses from other universities.

Students wishing to complete a Master’s Thesis or Internship would count these credits towards their elective requirement.

Internship

The CONF 694 Internship internship course provides students with opportunities to use and develop conflict resolution skills, integrate theory and practice of conflict analysis and resolution, and network with professionals in the field to enhance employment opportunities. The internship requires 160 hours of supervised work per every 3 credits. The goals and objectives of the internship are defined in an application and memorandum of agreement to be signed by the student, the internship site supervisor, and the director of field experience before the internship begins.

Students may either take 3 or 6 credits of CONF 694 Internship.

CONF 694 Internship (take 3 or 6 credits) 1-6

Thesis

Students wishing to complete a Master’s Thesis are strongly encouraged to take CONF 797 Proposal Development (Proposal Development) the semester before beginning the thesis project. Before registering, students must have identified a Master’s thesis committee chair to supervise the project. Students should contact S-CAR student services to receive the CRN to register for thesis.

CONF 797 Proposal Development 1
CONF 799 Thesis 1-6

Directed Readings

Only two directed readings may be applied toward requirements for the master’s degree (maximum 6 credits).

CONF 697 Directed Readings and Research 1-3

Dual Degree Options

Dual Degree Program with the University of Malta

Students have the opportunity to pursue a MS in Conflict Analysis and Resolution from George Mason University and a MA in Conflict Resolution and Mediterranean Security from the University of Malta through an innovative Dual Degree Program. Teaching faculty includes professors from both George Mason University and the University of Malta. All teaching is in English and all classes are held at the Valetta Campus of the University of Malta. The 400-year-old University of Malta Valetta campus incorporates state-of-the-art instructional technology. The entire program is delivered over three intensive semesters on a full time basis starting in late September. Classes are held on a two week intensive block basis for the first two semesters while the third semester is devoted to the completion of a thesis.

Orientation in Malta begins at the end of September. Classes run from the beginning of October through June. Students work on their theses from June until October. University of Malta graduation is in November and Mason graduation is in December. The total duration of the program is 15 months. More information is available at the program website (http://scar.gmu.edu/academics/maltaprogram). US and Canadian students apply through the Mason graduate admissions process and indicate they want to participate in the Malta program. All other students should apply through the University of Malta. (http://www.um.edu.mt/imp)

Conflict Analysis and Resolution, MS and Social Work, MSW Dual Degree

The Department of Social Work (p. 271) and the School for Conflict Analysis and Resolution (p. 882) have joined forces to offer a three year dual-degree program. Students can earn both an MSW (p. 275) and an MS in Conflict Analysis and Resolution (p. 897) while taking advantage of the diversity of the Washington, D.C., metropolitan area and the university’s proximity to the nation’s capital. This is the only dual-degree program of its kind.

Admission Requirements

Applicants must meet the admission standards and application requirements specified in Graduate Admissions (p. 66) and apply using the online Application for Graduate Admission (http://admissions.gmu.edu). The application process is competitive, and applications are considered for the fall semester only.
Students interested in the 3-year dual degree program submit one online Application for Graduate Admission (http://admissions.gmu.edu), select the MSW in Social Work (p. 275) as a primary program, and submit all application support materials to the Office of Graduate Admission in the College of Health and Human Services. Applicants should communicate their interest in completing the dual degree program in their essays, and recommendations should address the dual program interest. Students must be admitted to both programs in the same semester (fall only) to be admitted to the dual degree program.

For application deadlines and detailed application requirements please refer to the CHHS Admissions website (http://chhs.gmu.edu/admissions/graduate/deadlines.cfm). Interested students should consult the MSW program website (http://chhs.gmu.edu/msw), the MSW program (p. 275), and the MSW program director for additional information prior to applying.

Transfer of Credit
Transfer credit is governed AP.6.5.3 Transfer of Credit (p. 88) and AP.6 Graduate Policies (p. 87). Transfer credits must be approved by the program director and the dean. Students who enroll initially through non-degree studies should seek course advising through the department prior to taking a course and plan to submit their application to the dual degree program as soon as possible.

Please refer to the Transfer of Credit policy for the MSW in Social Work (p. 276) for departmental policy governing courses taken at another institution and the maximum number of credits allowed.

Accelerated Master’s

Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS

Overview

The Accelerated Master's is designed for highly qualified and motivated undergraduate students majoring in Conflict Analysis and Resolution. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn the Conflict Analysis and Resolution, BA (p. 885) or BS (p. 891) and the Conflict Analysis and Resolution, MS (p. 897) after satisfactory completion of 155 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). For additional application requirements and information specific to the accelerated Conflict Analysis and Resolution, MS (p. 897), see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters) on the departmental web site.

Accelerated Option Requirements

- During the first semester of senior year, after completing 90 hours of undergraduate coursework, admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the second semester of senior year, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.

- At the beginning of the last semester of undergraduate study, the Bachelor’s/Accelerated Master’s Transition Form must be submitted to the Office of the University Registrar. Upon completion and conferral of the undergraduate degree they are admitted to graduate status.

- Students must begin their master’s program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.

- Additional policies can be found on the program website (http://scar.gmu.edu).

GPA Requirements

- Students must have a minimum cumulative GPA of a 3.25 or higher at the time of application.

- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master’s program until completion of the undergraduate program.

- If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master's program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master's program after conferral of the undergraduate degree however; re-application does not guarantee admission.

- At the time of the undergraduate degree conferral, students’ GPAs must meet the standard required for admission to the master’s degree.

Course Criteria

- Students may only take courses indicated on their Accelerated Master’s Program Application and approved by an academic advisor.

- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Conflict Analysis and Resolution, PhD

Banner Code: CA-PHD-CONF

The doctoral program, the first of its kind in the United States, provides advanced study for students in the field of conflict analysis and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and private sectors.

The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

Admissions & Policies

Admissions

A master’s or equivalent degree is required for admission to the PhD program.
Application Requirements
In addition to meeting all admission requirements for graduate study, applicants must submit:

- all undergraduate and graduate transcripts
- three letters of recommendation, one of which should be from a faculty member in the applicant’s undergraduate or graduate major field
- a 750 to 1,000 word essay on goals and reasons for seeking admission to the program
- a written sample of work that shows the applicant’s potential for completing dissertation research in a doctoral program
- a resume or curriculum vitae.

The Graduate Record Exam (GRE) or other standardized test scores are not required but may be submitted. The Test of English as a Foreign Language (TOEFL) is required of international students.

For more information, see the Admission of International Students (p. 68). Although students may enroll on a full- or part-time basis, entry into the program is in the fall semester only.

Policies
For policies governing all graduate degrees, see AP.6.10 Requirements for Doctoral Degrees (p. 92).

Reduction of Credit
Since a master’s degree or equivalent is required for admission, students will automatically receive a 15 credit reduction of the number of credits required.

Students may have the required number of credits reduced by up to 15 additional credits based on relevant previous coursework. The actual number of applied credits is determined in consultation with the student’s advisor and the program director after a review of courses taken, subsequent to a student’s admission to the program.

Completion Timelines
Students must satisfactorily complete their coursework, comprehensive paper, advance to candidacy, and complete the dissertation within 9 years of admission to the program. Students are expected to have advanced to candidacy within 6 years of admission to the program.

Plan of Study Guidelines
All doctoral students should meet with their faculty advisor before starting classes to develop a plan of study. This plan should show the sequence of courses anticipated. It should be based on a discussion between the student and the advisor about the student’s interest and goals. The plan should ensure that the student completes coursework efficiently and is able to build toward candidacy. The student and the advisor should then meet at least once each semester thereafter to review and amend the plan. The Program Director should receive a copy of each new or revised plan of study.

Transfer of Non-Degree Credit
A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR’s graduate certificate program may be transferred into the PhD program. How credit will be counted will be determined in consultation with the student’s advisor and the Doctoral Program Director. A maximum of 6 credits of non-S-CAR courses taken as non-degree credit can be counted toward the PhD program. Courses counted toward another degree cannot be transferred.

Adding a S-CAR Certificate Program
Students may elect to complete a S-CAR graduate certificate in addition to the PhD program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of Conflict Resolution practice. Certain graduate certificate courses can be used to fulfill PhD program requirements. Students should consult with the Certificate Program Director and Doctoral Program Director for policies on counting certificate courses toward the PhD degree.

Total Credits: 6

Foundation Courses
Students complete 15 credits of foundation courses distributed as follows:

Theoretical Foundations
Select two courses (6 credits) from the following:
- CONF 802 Theories of the Person
- CONF 803 Structural Theories
- CONF 804 Alternate Theoretical Foundations

Research Foundations
Select two courses (6 credits) from the following:
- CONF 811 Quantitative Foundations
- CONF 812 Qualitative Foundations: Social Sciences
- CONF 813 Qualitative Foundations: Humanities

Practice Foundations
- CONF 820 Reflective Practice in Interpersonal-Multiparty Conflicts
- CONF 890 Practicum in Conflict Analysis and Resolution

Total Credits: 15

Specialization Courses
Students will take three courses (9 credits) of specialization courses evenly distributed across the areas of theory, research, and practice

Total Credits: 9

1 The Doctoral Program Director must approve courses.
### Electives

Select 15 credits from electives that are any 500-, 600-, and 700-level CONF courses that are not required

| Total Credits | 15 |

With the advisor’s approval, each student may include a maximum of 6 credits of electives from outside the S-CAR Program, including courses in other Mason departments, consortium courses, and transfer courses from other universities. The intent is to allow students to have maximum flexibility in selecting courses to build skills and knowledge needed in dissertation work. CONF 897 Directed Reading may be taken to meet the requirement. Only two directed readings classes (6 credits) can be applied toward doctoral elective requirements.

### Foreign Language Requirement

At the point of application to fulfill the comprehensive paper, students will indicate to the Director of the Doctoral Program the membership of their dissertation committee. This committee will determine, based on the scope and nature of the student’s research, the specific language requirement a student must meet. This will be conveyed to the Director of the Doctoral Program. This language requirement must be completed prior to graduation.

### Comprehensive Paper

Students are eligible to complete the comprehensive paper when they have completed all the requirements of coursework in the doctoral program with the exception of CONF 998 Doctoral Dissertation Proposal and CONF 999 Doctoral Dissertation Research and the language requirement. A student is advanced to candidacy upon successful completion of the comprehensive paper. Papers can be submitted for evaluation twice each year, once in the winter and once in the summer. Students who do not pass initially should form a plan of study with the chair of their dissertation committee and the Director of the Doctoral Program that will prepare them to resubmit. The comprehensive paper may be resubmitted two times for a total of three attempts. After three unsuccessful attempts, the student should consult with the Doctoral and Master’s Directors about the possibility of transferring to the MS program.

### Advancement to Candidacy

Upon successfully completing coursework (except dissertation) listed on the Plan of Study and passing the comprehensive paper, students will be advanced to candidacy and will be personally notified of this by the Dean of S-CAR. Students are expected to advance to candidacy within 6 years of admission to the program. Students have a total of 9 years from admission to complete all course requirements, including the dissertation.

### Dissertation Research

Students are required to complete 12 combined credits of CONF 998 Doctoral Dissertation Proposal and CONF 999 Doctoral Dissertation Research, including at least 3 credits of CONF 999 Doctoral Dissertation Research. Students must have a signed dissertation proposal in order to register for CONF 999 Doctoral Dissertation Research.

| Total Credits | 12 |

12

With the advisor’s approval, each student may include a maximum of 6 credits of electives from outside the S-CAR Program, including courses in other Mason departments, consortium courses, and transfer courses from other universities. The intent is to allow students to have maximum flexibility in selecting courses to build skills and knowledge needed in dissertation work. CONF 897 Directed Reading may be taken to meet the requirement. Only two directed readings classes (6 credits) can be applied toward doctoral elective requirements.

### Dissertation Committee

Students should propose a Dissertation Committee to the Director of the Doctoral Program and the Dean who then formally appoint the committee. This must be done prior to taking the comprehensive exam. The Dissertation Committee must include a chairperson from among S-CAR graduate faculty and at least two other members of the graduate faculty, one of whom must be a non-S-CAR Mason faculty member. The Dean will inform the student, committee members, and Director of the Doctoral Program when the committee has been appointed.

### Dissertation Proposal

After the student passes the comprehensive exam and advances to candidacy, the next job of the committee is to approve the candidate’s dissertation proposal. The proposal is the candidate’s description (in some detail) of his/her dissertation project, reflecting the successful work of the comprehensive examination paper. It will include an argument about the hypothesis/theory question being tackled and the specific methods of research to be used. It should be prepared in consultation with the chair of the committee, and must be approved by all committee members. After receiving permission from the full committee, the candidate makes an oral presentation of the dissertation proposal before the committee and the Director of the Doctoral Program that is also open to other S-CAR faculty, fellow students, and other scholars. In scheduling the defense, it is the student’s responsibility to ensure that all members of the committee are available and will be present for the defense.

A signed cover page from that proposal must be filed with the Doctoral Director. Failure to complete the formation of a committee and an approved proposal by the end of the 12-month period will result in the candidate’s dismissal from the doctoral program. (Candidates may appeal to the Dean a further extension of this dissertation preparation period, but such appeals will be allowed only on grounds of documented illness, family emergency, or military deployment). Candidates should consult thesis.gmu.edu/ (http://thesis.gmu.edu) to ensure the proposal is in the correct format and has been submitted to all the appropriate offices.

### Writing the Dissertation and its Defense

The chair of the dissertation committee usually takes most of the responsibility for guiding the overall project and the writing of the dissertation, although all members (and other useful persons) should be consulted as appropriate. It is the committee’s responsibility to ensure a quality piece of work. When advanced to candidacy, the Guide for Preparing Graduate Thesis, Dissertation and Projects tells exactly how to prepare an acceptable dissertation. Please visit thesis.gmu.edu/ (http://thesis.gmu.edu) to ensure formatting guidelines are met and submission procedures followed.

It is essential that doctoral committee members have sufficient time to read and evaluate dissertation drafts with care prior to the dissertation defense date. The committee may require no more than one month to read the final draft and provide feedback. It is also essential that students have sufficient time after the defense to do final revisions, editing and formatting. If the University determines the deadlines for final library submission are May 1, for example, the defense must take place
prior to April 1 and the full draft dissertation must be delivered to the full committee before March 1.

The dissertation is to be orally defended in public, minimally with the entire committee present. The S-CAR faculty and students must receive public notice of the defense at least two weeks prior. Students are welcome to invite family and friends. The University may also send a representative. The public defense helps ensure that the University’s standards are met, and offers an opportunity to learn from the students’ research. After a successful defense, the cover page is signed by the members of the Dissertation Committee, PhD Program Director and Dean; and the dissertation is filed with the University. An additional signed copy should be delivered to the S-CAR Burton Library.

Dissertations must be presented to the library in the proper format or they will not be accepted. Please visit the University Dissertation & Thesis Services web site at thesis.gmu.edu/ (http://thesis.gmu.edu) for dissertation formatting requirements and submission deadlines. Mason’s Dissertation and Thesis Coordinator may be reached at udts@gmu.edu or 703-993-2222.

Conflict Resolution in Communities Graduate Certificate

Banner Code: CA-CERG-CNRC

All communities have conflicts, some much more severe than others, often driven by deep racial and ethnic divisions, economic inequity, complex intractable problems, and environmental degradation. Many community conflicts are triggered by changes, whether a new law or new development. These are among the many issues that effective, inclusive, collaborative community processes can help address. This certificate incorporates theory and skills needed to identify concerns and design collaborative processes that employ a wide range of design options ranging from small group dialogue to facilitated consensus building and online engagement to thousand person town meetings.

This 15-credit certificate is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for mid-career professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. This certificate uses intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields.

This certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students (p. 68).

Policies

Class Schedule

Please note that some classes for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

Prevention, Reconstruction, and Stabilization Contexts Graduate Certificate

Banner Code: CA-CERG-CARP

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The Prevention, Reconstruction, and Stabilization Contexts Graduate Certificate augments development, defense, security, or humanitarian aid work experience with the theories and skills of conflict analysis and resolution for designing, implementing, and evaluating conflict-sensitive initiatives internationally in areas of potential violence and post-conflict reconstruction and stabilization. Considers cross-sectoral approaches to long-term violence prevention and constructive conflict resolution.

The graduate certificate in prevention, reconstruction and stabilization contexts may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

Admissions & Policies

Sport and Conflict Resolution Minor (SCAR)

Banner Code: SCNR

There has been a real growth in the establishment of non-profit organizations that use ‘sport for development’, sport to bring diverse communities together and also ‘sport for peace’ organizations in high conflict areas of the world. This minor will help prepare students to work for organizations dedicated to using sports for development, community building and peace. It provides students with a cross section of courses in sports management and conflict resolution. Courses in sports management frame the sports industry in a philosophical, ethical, cultural and business context. Conflict resolution courses will introduce students to foundational concepts in the study of human conflict, the analysis of conflict and problem solving techniques for helping to resolve conflict.

This is an interdisciplinary minor offered by the School for Conflict Analysis and Resolution (p. 882) and the School of Recreation, Health, and Tourism. (p. 211)
Admissions & Policies

Admissions
This minor is available to all Mason undergraduate students.

Policies
Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 84).

World Religions, Diplomacy, and Conflict Resolution Graduate Certificate

Banner Code: CA-CERG-CARW

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The World Religions, Diplomacy and Conflict Resolution Certificate considers strategies to reduce global violence and terrorism by incorporating the best moral practices of religious communities into policy planning, diplomacy, civil society building and democratization. Covers strategies to elicit moderate moral religious expression in conflict regions to strengthen civil society and democracy.

The graduate certificate in world religions, diplomacy, and conflict resolution may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program.

Admissions & Policies

Admissions
Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). Applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students (p. 68). Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Policies

Class Schedule
Please note that some classes for this graduate certificate program are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

• Ming Wan, Associate Dean
• Elizabeth C. Eck, Assistant Dean for Graduate Program Management
• Jill V. Emerson, Assistant Dean of Admissions and Student Services
• Ann M. Ludwig, Assistant Dean for Undergraduate Academic Affairs

College Code: PP

The Schar School of Policy and Government prepares undergraduate and graduate students to be leaders who advance the public good in the private, public, and nonprofit sectors. Through research and education in policy, government, and international affairs, Schar allows Mason to more effectively serve the region, Commonwealth, nation, and world.

The Schar faculty combines original research with real-world experience to connect theory and practice for the benefit of students and wider constituencies. The School employs approximately 80 full-time faculty members across a wide range of disciplines, including political science, public administration, international relations, economics, management, geography, engineering, sociology, anthropology, and law. Schar is a major research unit of the University, with approximately $2 million per year in sponsored funding. Schar faculty members frequently advise governments, companies, and non-profit organizations, appear in the national and international media, and participate in public debates on critical issues of the day.

Schar offers two undergraduate majors, nine master’s degree programs, three doctoral programs, and a range of undergraduate minors and graduate certificates. Collectively, these programs enroll approximately 2000 students. Schar offers classes on Mason’s Fairfax and Arlington campuses, and its faculty members have offices on both campuses.

Undergraduate Programs

Schar offers two degrees for students interested in political science, government, and international relations: a BA in Government and International Politics and a BS in Public Administration. Majors in Government and International Politics take core courses in American political institutions, the political systems of other countries, and international relations. Students can focus their electives to earn a concentration in American institutions and processes, comparative politics, international political economy, international relations, law, philosophy and governance, political analysis, political behavior and identity politics, public policy, or a higher credit concentration in Philosophy, Politics, and Economics. Majors in public administration and policy take courses in government, management, policy, and administration. Concentrations are offered in administration and management, economic policy analysis, international political economy, nonprofit management, public policy, and US government institutions.

Students have an opportunity to do internships as part of their degree programs, gaining valuable work experience while earning academic credit.

Honors in the Major

Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) (p. 135) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Minors

Schar offers minors in American government, international/comparative studies, international security, legal studies, and public policy and management. In addition, faculty from the School coordinate or participate in the Asia-Pacific and Northeast Asian Studies Minor, Global Systems Minor, Latin American Studies Minor, Middle East Studies Minor, Islamic Studies Minor, and Urban and Suburban Studies Minor. It participates with the Philosophy Department in the Political Philosophy Minor and with the Communications Department in the Political Communication Minor (CHSS). See Minors and Interdisciplinary Minors below.

Bachelor’s/Accelerated Master’s Programs

The School offers qualified undergraduates in any major the opportunity to apply to several accelerated master’s degree programs. If accepted, students will earn both an undergraduate and a graduate degree after satisfactory completion of 150 credits, sometimes within five years. More information about the degree options and application process may be found here (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

Graduate Programs

Schar offers three doctoral degree programs and a number of master’s degree programs, as well as numerous graduate certificate programs. Specific information on each program may be found by clicking the "Programs" tab at the top of this page.

Total Credits 3

1 Application of any other course toward fulfillment of the elective requirement must be approved by the Certificate Program Director.
The Schar School of Policy and Government and the Antonin Scalia Law School offer a joint JD/MPP degree program in law and public policy studies. For more information, go to the website (http://www.law.gmu.edu/academics/degrees/jd_mpp).

Research Centers
The Schar School of Policy and Government's research centers focus on a wide range of issues and areas.

Center for Energy Science and Policy
Co-Directors: Richard Kauzlarich, PhD and Paul R. Houser, PhD

This center, a joint initiative of the College of Science and Schar School, provides objective analysis of key issues in the energy field that is grounded in original research. It serves as a center of gravity for the many researchers at George Mason whose work engages them with these issues and connects them with decision-makers in the economy, society, and government.

Center for Entrepreneurship and Public Policy
Director: Zoltan Acs, PhD

Economic development policy has shifted dramatically from a business and industry attraction strategy to a more entrepreneurial approach. The Center for Entrepreneurship and Public Policy focuses on entrepreneurship policy research and program delivery, offering programs in research, collaboration, and analysis.

Center for Global Policy
Director: Jack Goldstone, PhD

This center conducts research on a wide range of global policy issues, including foreign trade, democratization and state-building, and transnational networks. It also analyzes specific policy issues for a variety of government agencies, and develops and serves as the home to several major cross-national databases for global policy.

Center for Microeconomic Policy Research
Director: John Earle, PhD

This center is a forum for policy-relevant research using micro-economic and micro-econometric methods.

Center for Regional Analysis
Director: Terry Clower, PhD

Focusing on economic development in technologically intensive regions, the Center for Regional Analysis (CRA) maintains a corporate technology database for the national capital region. The CRA provides economic forecasting services to government agencies at all levels around the world.

Center for Science and Technology Policy
Director: David M. Hart, PhD

This center helps facilitate the exchange of information and ideas among the worldwide science, foreign affairs, trade, and technology communities. Areas of emphasis include international trade and science and technology.

Center for Security Policy Studies
Acting Director: Michael Hunzeker, PhD

Today's security challenges—from proliferation and terrorism to climate change and cyber security— are beyond the scope of any one nation-state to address. Finding solutions requires international and multi-lateral cooperation among regional and global leaders, both state-based and outside the state, including corporate and non-governmental actors. The purpose of the Center for Security Policy Studies is to strengthen global strategic thinking by current and future policy-makers, so as to improve US and global security in the 21st century.

Center for the Study of International Medical Policies and Practices
Director: Arnauld Nicogossian, MD

This center provides leadership and focus on global medical and public health policies and processes, working collaboratively with health, science, and medical organizations in the public and private sectors, and academic organizations to address pressing global policy concerns.

Center for Transportation Public-Private Partnership Policy
Director: Jonathan L. Gifford, PhD

The Center is devoted to advancing the objective consideration of public-private partnerships for transportation system renewal and expansion through research, education and public service. The Center supports development of U.S. and international case studies of P3 projects and programs, analyses of the impact of P3s, sponsors workshops and conferences, and supports graduate students and faculty.

Centers on the Public Service
Directors: Paul L. Posner, PhD; Alan J. Abramson, PhD; Frank H. Shafroth, JD

The Centers on the Public Service have been established to help the public sector address emerging challenges that are unprecedented in both scope and complexity. All levels of government, as well as nonprofits and contractors, are under greater pressure to deliver more with fewer resources. The three centers can play important roles through providing training, conducting research, and promoting much needed collaboration across the many officials involved in governance today.

International Center for Applied Studies in Information Technology
Director: Stephen Ruth, PhD

The International Center for Applied Studies in Information Technology (ICASIT) is a consulting group dedicated to delivering the power of the Internet to businesses, underserved markets, and developing countries. ICASIT has contracts in more than 20 countries.

Terrorism, Transnational Crime and Corruption Center
Director: Louise I. Shelley, PhD

The Terrorism, Transnational Crime and Corruption Center (TraCCC) is the first center in the United States devoted to understanding the links among terrorism, transnational crime and corruption. The center teaches, researches and formulates policy on these critical issues. TraCCC accomplishes its mission through international research partnerships engaging in fundamental and applied research projects. Research addresses such diverse concerns as national security, economic development and human rights.

Requirements & Policies

Policies for Undergraduate Students

Students should become familiar with the university's Academic Policies (p. 74) in addition to those specific to each academic unit.

The undergraduate degree consists of coursework in four areas: (a) Mason Core requirements, (b) School requirements for the Schar school, (c) requirements specified for the chosen major, and (d) electives. All students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated "writing intensive." In Schar, GOVT 490 Synthesis Seminar (Mason Core) (p. 135) or GOVT 491 Honors Seminar (Mason Core) (p. 135) will satisfy this requirement.

The School requirements, (b) above, are the same as the additional requirements for the College of Humanities and Social Sciences. For the BA in Government and International Politics, there is one class in Philosophy or Religion, one additional class in social and behavioral science, one class in non-Western culture, and demonstrated foreign language proficiency at the intermediate level. Students should consult the Mason Core (p. 135) and CHSS requirements page (http://chss.gmu.edu/general-education/all-requirements) for more detailed information.

All students are responsible for meeting with their academic advisor, and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all their requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

Students with questions about exceptions to academic policies and about School requirements should contact Schar Undergraduate Student Services (Robinson Hall, Room A201; 703-993-1400; gvip@gmu.edu or puad@gmu.edu).

Additional policy information and forms are available on the Schar website (http://schar.gmu.edu).

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. All students should verify the accuracy of their enrollment before the end of the official add period.

Academic Load

Students should review AP.1.2 Academic Load (p. 74).

In order to be considered for a credit overload, students must fulfill all of the following criteria:

- Be in good academic standing
- Have completed the prior semester with a GPA of 2.33 or higher
- Have a cumulative GPA of 2.33 or higher
- Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding course load while maintaining high performance
- Have no remaining incompletes (INs) from a previous semester

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Excluded Courses and Credits

Physical Education (PHED); Parks, Recreation, and Leisure Studies (PRLS); and Recreation (RECR) activity courses cannot be used for credit for a degree in the Schar school.

Only Military Science (MLSC) courses at the 400-level can be used for credit for a degree in the School; credit for other MLSC courses may not be applied toward a degree in the School.

Once matriculated at Mason, students may not take CLEP exams and apply credits from those exams to degrees in the School. Students may apply credits from CLEP exams to degrees in the School only if those credits were awarded and reported prior to admission.

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the Schar Undergraduate Student Services office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Permission to Study at Another Regionally-Accredited U.S. Institution

Once enrolled in degree status at Mason, students with fewer than 60 hours of transfer coursework (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through Mason Study Abroad) may take up to 8 hours of coursework in Schar disciplines at another institution. Students with 60 or more hours of transfer coursework are not permitted to take additional coursework in Schar disciplines at another institution. A student may seek permission for additional hours beyond these limits for summer registration if his/her permanent residence is more than 50 miles away from Mason.
from the George Mason University Fairfax campus. See the university
Permission to Study Elsewhere policy for additional information.

**Study Abroad**
In order to be considered for study through Mason Study Abroad,
students must plan well in advance and receive prior, written permission
from the Assistant Dean. Students must also meet all of the following
criteria:

- Meet all eligibility requirements for their program as specified by
  Mason Study Abroad including course prerequisites and minimum GPA.
- Have completed the immediately preceding semester at Mason with
  a minimum GPA of 2.00.
- Have completed the necessary forms and have obtained all required
  signatures and course equivalencies.

Students in danger of probation, suspension, or dismissal should plan
very carefully before requesting to study abroad. Students who are not in
good academic standing will not be permitted to study abroad.

**Leave of Absence**
All undergraduate students who are planning an absence from George
Mason must submit a formal request for Leave of Absence to the Office
of the University Registrar. Students do not need to complete the Leave
of Absence form if they are participating in a George Mason University
sponsored study abroad program or have received permission to study
elsewhere.

The maximum time allowed for a Leave of Absence is two years. A new
admission application will be required if a Leave of Absence extends
beyond two years. If a Leave of Absence form was not submitted, a new
admission application will be required if a student misses two graded
semesters, excluding the summer term. Re-admission is not guaranteed.
See Academic Policies for full university policy.

**Withdrawals**
Students should review the Withdrawal section in the Academic Policies
(p. 74) section of this catalog. Courses for which a withdrawal is
approved receive a grade of "W."

Students should be aware of the potential consequences of withdrawing
on their academic standing. Although credits graded "W" do not affect a
student’s GPA, they do count towards the total attempted hours. The total
attempted hours and cumulative GPA together determine a student’s
academic standing. These are explained in the Academic Standing
section of Academic Policies.

**Academic Clemency**
Students should review the university policies regarding academic
clemency in the Academic Standing section of Academic Policies (p. 74).

To be considered for clemency, students must meet all of the following
criteria:

- Be absent from George Mason for a minimum of three consecutive
calendar years.
- Provide a detailed explanation for why they were unsuccessful in
  those courses and how they have made changes to ensure their
  academic progress upon their return.
- Submit their request within 12 months of the first day of the re-
enrollment term.
- Complete at least 6 credits during their first 12 months back at
  George Mason.
- Earn a minimum GPA of 2.50 each semester back prior to making the
  clemency request with no individual grade below 2.00.

If the last three minimum academic requirements are not met, clemency
will not be allowed under any circumstances.

**Appeals Process**
Undergraduate students may appeal decisions concerning academic
actions to the Schar Office of Undergraduate Student Services. They may
appeal decisions of the Office of Undergraduate Student Services to the
Associate Dean. Students may appeal decisions of the Associate Dean to
the Associate Provost, Undergraduate Academic Affairs and Programs.
Students who feel that the School’s appeal process was conducted
unfairly may appeal to the Provost’s Office as specified in the Academic
Policies (p. 74) section of this catalog.

The grade appeal process occurs at the Dean’s Council level as discussed
above.

Students should file all appeals in a timely manner, usually within the
semester in which the original decision is rendered, but no later than the
final day of classes of the following semester.

**Second Bachelor’s Degree**
Students should review the university policies regarding second
bachelor’s degrees in the Undergraduate Admission Policies (p. 63) and
in Academic Policies/Requirements for Undergraduate Programs (p. 84)
sections of the catalog. Students pursuing a second bachelor’s degree
concurrently with their first bachelor’s degree at Mason must meet all
the additional requirements for the School (see second paragraph of
the Policies for Undergraduate Students section) if they differ from the
requirements in the School or College of their first major.

Students pursuing a second bachelor’s degree in the School after already
having received one or more bachelor’s degrees are considered to have
met all of the Mason Core requirements. Students pursuing a Bachelor
of Science degree do not have additional School-level requirements.
Students pursuing a Bachelor of Arts degree in the School must complete
these additional School-level requirements: one additional 3-credit course
each in philosophy or religious studies, in social and behavioral science,
and in non-western culture (for a total of 9 credits). They must also
demonstrate proficiency in a foreign language through the intermediate
level.

**Minors**
Students may elect to take up to two minors in addition to their major
field of study. For policies governing all minors, see the AP. 5.3.4 Minors
(p. 84) section of this catalog. Students interested in earning a minor
should complete the appropriate section of the Change/Declaration of
Academic Program form and submit it to the Office of the University
Registrar. See All about Minors for more information.

**Concentration Courses and Minors**
Students may elect to declare a concentration, which requires four of
their major field electives to be from the same designated field. Students
should be aware that minors usually require between 15 and 21 credits of
study, at least 8 of which must be applied only to that minor and may not
be used to fulfill requirements of the student’s major, concentration, an
undergraduate certificate, or another minor.
Policies for Graduate Students

Students should become familiar with the university’s Academic Policies (p. 74) in addition to those specific to each academic unit.

Graduate Student Appeal and Grievance Procedures

Graduate student appeal and grievance procedures are based on George Mason University’s honor system. Students are responsible for understanding the provisions of the code described in detail in the Academic Policies (p. 74) section of this catalog and in Schar’s graduate student guides.

Students with grievances should direct them in writing to the Assistant Dean of Admissions and Student Services, who will provide guidance on how to resolve their concerns in accordance with established procedures.

Students may appeal decisions concerning academic actions, including termination. Written appeals must be submitted to the Assistant Dean of Admissions and Student Services. The merit of these appeals will be reviewed by the Dean or Dean’s designate.

Grade appeals are made to the Dean. Students should contact the Associate Dean for Academic Affairs in writing to initiate the process. The Dean’s decision is final.

A student who is facing termination from the program for non-academic reasons may appeal the decision to the Dean. This appeal must be in writing and must be received within 30 calendar days of the date on the notice of dismissal or termination. The Dean or Dean’s designate will make a final determination. This determination may not be appealed.

American Government Minor

Banner Code: AMGV

Academic Advising

A201 Robinson Hall
Fairfax Campus

The minor in American government provides students the opportunity to focus on the most relevant features of American government, its institutions, the political behavior of its citizens and leaders, and the defining political questions of our time.

Faculty

Travis (minor advisor)

Admissions & Policies

Policies

Students pursuing this minor must complete 18 credits in government with a minimum grade of 2.00 in each course. Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 86).

Biodefense Graduate Certificate

Banner Code: PP-CERG-BIOD

Academic Advising

560 Founders Hall
Arlington Campus

A201 Robinson Hall
Fairfax Campus

The certificate provides an interdisciplinary introduction to man-made and natural biological threats, including a background in the science and technology of biodefense and the specialized areas of threat assessment, non-proliferation, and medical and public health preparedness. Students already pursuing a master’s degree in the school may, after admission to a certificate program, in most cases, earn an additional six credits (two courses) in the Schar School to receive a certificate in addition to the master’s degree.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 66). Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

Termination from Program

Students admitted to a Schar program will be terminated from the Schar school upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See AP.6.6.2 Academic Termination (p. 89).

Academic Advising

560 Founders Hall
Arlington Campus

A201 Robinson Hall
Fairfax Campus

The master’s prepares students to become the next generation of biodefense and biosecurity professionals and scholars. This program provides students with a foundation in microbiology and biotechnology combined with a broader security and organizational context.

Admissions & Policies

Admissions

Admission Requirements

Please see the Graduate Admissions (p. 66) for information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Biodefense master’s program may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance AP.6.4.1 Change from Nondegree Status (p. 88).

Policies

Academic Policies

Students admitted to a Schar program will be terminated from the Schar school upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated...
from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

---

## Requirements

### Degree Requirements

**Total credits: 36**

The schedule of courses that students plan on taking should be approved in an education plan designed by the students and their advisor during the student’s first semester. Students must receive the permission of their advisor to take courses outside of the Biodefense Program.

### Core Courses

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program.

### Accelerated Master's

#### Bachelor's Degree (any)/Biodefense, Accelerated MS

**Overview**

Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor's degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission**

Please see the Graduate Admissions (p. 66) for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).
Biodefense, PhD

This program is designed to prepare students to serve as scholars and professionals in the fields of biodefense and biosecurity. The program integrates knowledge of natural and man-made biological threats with the skills to develop and analyze policies and strategies for enhancing biosecurity. Other areas of biodefense, including nonproliferation, intelligence and threat assessment, and medical and public health preparedness are integral parts of the program.

Admissions & Policies

Admissions

See Graduate Admissions (p. 66) for general information on graduate admission to George Mason University. See the Schar School of Policy and Government Admissions website (http://schar.gmu.edu/admissions/doctorate-admissions) for application requirements and deadlines. Students are considered for admission for the Fall term only.

Policies

For policies governing all graduate degrees, see AP.6.10 Requirements for Doctoral Degrees (p. 92).

Reduction of Credit

Students who enter the doctoral program with a master's degree or other graduate credit may have their credit reduced by up to 30 credits, subject to the approval of the program director.

Requirements

Degree Requirements

Total credits: 72

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program. The courses which students plan to take should be approved in a program of study designed by the student and their advisor during the student's first semester. Students may take up to 12 credits of courses outside of the Biodefense Program with prior written approval of their advisor. Consult with the graduate program director or coordinator for a list of BIOD electives and approved non-BIOD electives that may be used to fulfill some of the requirements below.

Core Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOD 604</td>
<td>Emerging Infectious Diseases I: Bacteria and Toxins</td>
<td>3</td>
</tr>
<tr>
<td>BIOD 605</td>
<td>Emerging Infectious Diseases II: Viral Agents</td>
<td>3</td>
</tr>
</tbody>
</table>

Field of Specialization

Select one field of specialization and complete the requirements therein.

International Security

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</tr>
<tr>
<td>Select six credits of electives (courses may be chosen from the electives list below)</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 12

Additional Specialization Courses

Of the courses listed for the preceding fields of specialization, students must select two courses from those that are not in their chosen field.

Electives

Select 9 to 21 credits of additional electives in consultation with advisor.

Courses may be offered by Schar or by other units. Schar courses include the following:

<table>
<thead>
<tr>
<th>Course</th>

</table>

**Qualifying Exam**

The purpose of the qualifying exam is to determine if the student is ready to engage in dissertation research. Doctoral students are eligible to take the exam at the conclusion of coursework, provided an approved Degree Plan is on file with Schar. The exam must be completed before the student takes dissertation proposal (BIOD 998 Doctoral Dissertation Proposal).

**Advancement to Candidacy**

Advancement to candidacy for the doctoral degree occurs when a student has met the coursework requirements, passed the comprehensive qualifying examination, presented and successfully defended a dissertation proposal, and has an approved dissertation committee.

**Dissertation Research**

Once enrolled in BIOD 998, students in this degree program must maintain continuous registration in BIOD 998 or BIOD 999 each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in BIOD 999, students must follow the university’s continuous registration policy as specified in AP.6.10.6 Dissertation Registration (p. 93). Students who defend in the summer must be registered for at least 1 credit of BIOD 999.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of BIOD 998 and a minimum of 6 and a maximum of 18 credits of BIOD 999. They may apply a maximum of 24 dissertation credits (BIOD 998 and BIOD 999 combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Before registering in BIOD 999, students must offer a successful public defense of the dissertation proposal. Students must present the results of the dissertation research to their dissertation committee in a seminar and defend their dissertation to the university community. Successful completion of a dissertation is contingent on approval of the dissertation committee and the dean.

**Emergency Management and Homeland Security Graduate Certificate**

Banner Code: PP-CERG-EMHS

Academic Advising

560 Founders Hall
Arlington Campus
A201 Robinson Hall
Fairfax Campus
The Schar School of Policy and Government offers certificates in conjunction with its master’s programs. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree.

The graduate certificate in emergency management and homeland security may only be pursued on a part-time basis.

### Admissions & Policies

#### Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 87) section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions web site (http://spgia.gmu.edu/admissions).

#### Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

#### Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies (p. 74) section of the catalog for additional policies pertaining to graduate students.

**Global Health and Security Graduate Certificate**

**Banner Code:** PP-CERG-GHS

**Academic Advising**

560 Founders Hall  
Arlington Campus  
A201 Robinson Hall  
Fairfax Campus

The Schar School of Policy and Government offers certificate programs in conjunction with its master’s programs. The certificate in global health and security provides an introduction to the intersection of global public health and security, covering topics such as emerging infectious diseases, biosurveillance, the development of vaccines, and emergency response to public health disasters. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in SPGIA to receive a certificate in addition to the master’s degree.

The graduate certificate in global health and security may be pursued on a part-time or full-time basis.

### Admissions & Policies

#### Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 87) section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions web site (http://spgia.gmu.edu/admissions).

#### Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

#### Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies (p. 74) section of the catalog for additional policies pertaining to graduate students.

Global Systems Minor

Banner Code: GLOS

Academic Advising
A201 Robinson Hall
Fairfax Campus

Global systems have become increasingly important to the way we live and work, and a global perspective makes us more aware of how we are connected to others around the world and to the whole of nature.

The interdisciplinary minor in global systems is designed to complement virtually any undergraduate major. It works well for majors in business disciplines, economics, languages, geography, government and international politics, history, and other disciplines that take a global view. Students in professional programs learn to connect their professional concerns to global issues of health care, trade and finance, or technology. Students in the liberal arts gain insights into their disciplines as they learn how the arts, humanities, sciences, and social sciences are affected by global issues such as demographic change, telecommunications, and environmental protection.

Other globally oriented courses may also fulfill or substitute for the requirements of this program with written permission of the coordinator prior to registration.

This is an interdisciplinary minor offered by the Schar School of Policy and Government (p. 906) and the College of Humanities and Social Sciences (p. 295).

Faculty
Lopez-Santana (minor advisor)

Admissions & Policies

Policies
Students must complete all coursework with a minimum GPA of 2.00. At least 9 credits must be at the 300 level or above. Eight credits of coursework must be unique to the minor.

For policies governing all minors, see AP.5.3.4 Minors (p. 86).

Requirements

Minor Requirements
Total credits: 18

Required Course
Select one course from the following: 3

- GLOA 101 Introduction to Global Affairs (Mason Core) (p. 135)
- GOVT 132 Introduction to International Politics (Mason Core) (p. 135)
- HIST 125 Introduction to World History (Mason Core) (p. 135)

Electives
Select five electives from at least two of the following fields: 1 15

Field A: Government, geography, and administration of justice
- GOVT 132 Introduction to International Politics (Mason Core) (p. 135)
- GOVT 444 Issues in International Studies
- CRIM 405 Law and Justice around the World (Mason Core) (p. 135)
- GGS 101 Major World Regions (Mason Core) (p. 135)
- GGS 301 Political Geography
- GGS 303 Geography of Resource Conservation (Mason Core) (p. 135)
- GGS 304 Population Geography (Mason Core) (p. 135)
- GGS 305 Economic Geography

Field B: Economics, anthropology, marketing, history, and sociology
- ANTH 300 Civilizations
- ANTH 312 Political Anthropology (Mason Core) (p. 135)
- ANTH 331 Refugees (Mason Core) (p. 135)
- ANTH 375 Culture, Power, History
- ECON 360 Economics of Developing Areas (Mason Core) (p. 135)
- ECON 361 Economic Development of Latin America (Mason Core) (p. 135)
- ECON 380 Economies in Transition (Mason Core) (p. 135)
Students pursuing this degree must complete 43 credits in GOVT and earn a minimum grade of 2.00 in each course applied to the major.

**Requirements**

**Degree Requirements**

Total credits: minimum 120 credits

Students pursuing a BA in Government and International Politics and wishing to narrow their focus may choose to concentrate in one of eight government fields or complete a higher credit concentration in Philosophy, Politics, and Economics.

**BA with or without Government Concentration**

**Core Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GOVT 101</td>
<td>Democratic Theory and Practice (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>GOVT 103</td>
<td>Introduction to American Government (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>GOVT 132</td>
<td>Introduction to International Politics (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>GOVT 133</td>
<td>Introduction to Comparative Politics (Mason Core)</td>

</tr>
</tbody>
</table>

**Senior Seminar**

Select one seminar from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GOVT 490</td>
<td>Synthesis Seminar (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>GOVT 491</td>
<td>Honors Seminar (Mason Core)</td>
<td>1</td>
</tr>
</tbody>
</table>

**Total Credits**

19

1 Other globally-oriented courses may also be applied to this requirement with written approval of the director.

**Government Field Study**

Select any eight advanced government field courses, with or without a government concentration

**Total Credits**

24

Students may complete a government concentration (four courses) in one field, then complete any four more advanced government field courses to satisfy this requirement. Students who do not pursue a government concentration may choose 24 credits from the advanced government field courses listed below (with restriction) for a broader learning experience.

Up to three credits of GOVT 399 Research Practicum and GOVT 480 Internship may be used to fulfill the field course requirement with prior advisor approval. Up to six credits of GOVT 496 Directed Readings and Research may be used to fulfill this requirement with prior advisor approval. GOVT 490 Synthesis Seminar (Mason Core) (p. 135) or GOVT 491 Honors Seminar (Mason Core) (p. 135) may not be used to fulfill this requirement.

Advanced government field courses include courses numbered GOVT 301 - GOVT 499.
Select 0-12 credits in any one concentration 0-12

Total Credits 0-12

Students may partially satisfy the field study requirement by completing four courses (minimum 12 credits) in any one approved concentration.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors. Students majoring in government and international politics may fulfill this requirement by successfully completing GOVT 490 Synthesis Seminar (Mason Core) (p. 135) or GOVT 491 Honors Seminar (Mason Core) (p. 135) in their major programs.

Mason Core

Note: Some Mason Core (p. 135) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 135) requirements.

Honors

Honors in the Major

Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) (p. 135) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Accelerated Master's

Bachelor's Degree (any)/Biodefense, Accelerated MS

Overview

Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor's degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission

Please see the Graduate Admissions (p. 66) for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).
Bachelor’s Degree (any)/International Security, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Security. If accepted, students will be able to earn a bachelor's degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees. (p. 91)

Admission
Please see Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) that may be counted toward both the bachelor's and master's degrees. Students must maintain a minimum GPA of 3.50 in all coursework applied to the degree.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/Political Science, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in Political Science. If accepted, students will be able to earn a bachelor's degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees. (p. 91)

Admission
Please see Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Bachelor's Degree (any)/International Commerce and Policy, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted, students will be able to earn a bachelor's degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees. (p. 91)

Admission
Please see Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master's program may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Bachelor's Degree (any)/Public Administration, Accelerated MPA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated master’s degree in public administration. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) from the following list to be held as reserve graduate credit and count only toward the master's degree. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

International Commerce and Policy, MA

Banner Code: PP-MA-ICP

Academic Advising
The International Commerce and Policy, MA program (ICP) is an interdisciplinary course of study to help students from around the world prepare for jobs in the new economy. Unlike traditional international affairs programs, the degree is focused on such international economic issues as global trade and investment. The MA in international commerce and policy differs from an MBA program by providing training in the political, social, and technological aspects of the global economy. In today's world, it is critical for all participants in global markets to understand the multifaceted environment in which they work.

Faculty
The core faculty is augmented by adjunct faculty members who bring a wealth of practical knowledge and experience, as well as strong academic qualifications to the program. Adjuncts are drawn from the U.S. Commerce and State Departments, the Office of the U.S. Trade Representative, and the International Trade Commission, among other government agencies, as well as from the private sector, the think tank community, and trade associations.

Courses
Courses are offered primarily in the late afternoon and evening to fit the schedules of busy professionals. In addition to classroom study, the program emphasizes experiential learning by supporting student internships, cooperative education, and research activities with private- and public-sector employers, and sponsoring a variety of study-abroad experiences.

Admissions & Policies

Admissions
Applications
Please see Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Students from all academic backgrounds are welcome to apply; however, some knowledge of economics, preferably through at least two undergraduate economics courses, is encouraged. While many students may have prior educational and work-related training in business and economics, others see the ICP Program as a bridge from government, education, and other non-business occupations to careers in the global economy.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

</tr>
</tbody>
</table>

Policies
For policies governing all graduate degrees, see AP .6 Graduate Policies (p. 87).

Termination from Program
Students admitted to an Schar graduate program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Program Requirements
The ICP Program requires 36 credits of coursework. All degree candidates must take 21 credits of work in required courses. The remaining 15 credits consist of electives that may include internships, independent studies, and study abroad. Upon entering the program students complete core courses first to prepare for higher-level elective coursework.

Accelerated Master's

Bachelor's Degree (any)/International Commerce and Policy, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted students will be able to earn a bachelor's degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees. (p. 91)

Admission
Please see Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are ITRN 500 Global Political Economy, ITRN 504 Microeconomics and Trade Policy, ITRN 503 Macroeconomic Policy in the Global Economy and PUBP 503 Culture, Organization, and Technology. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

International Security Minor

Banner Code: INLS

Academic Advising
A201 Robinson Hall
Fairfax Campus

The world faces a complex range of threats to its security and stability. Some, including war, terrorism and weapons of mass destruction, have been around for a long time. Others, including climate change and cyber conflict, are relatively new. And in today's increasingly connected world, old threats like pandemic disease and state fragility now take on a new urgency. Using a mix of history, theory and policy analysis, the international security minor prepares students to think critically about these pressing issues.

Faculty
Hunzeker (minor advisor)

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 86).

Requirements

Minor Requirements
Total credits: 18

Students must complete all coursework with a minimum grade of 2.00 in each course.

</tbody>
</table>
The program trains early to mid-career professionals who seek the analytical and substantive capabilities to address the security challenges of the 21st century. In addition to understanding the traditional military and diplomatic approaches that characterized the state-centric security framework of the last century, the program’s core courses will provide a firm grounding with regard to public-private and international collaborative responses to emerging and unconventional threats, ranging from transnational crime, terrorism, illicit trade, proliferation of emerging technologies and WMD, and corruption to state fragility and ethnic and sectarian conflict. Students will supplement their core courses by taking electives from each of three focus areas:

- Managing Global Risks
- National Security Policies and Processes
- Regional and Transnational Security Challenges

Admissions & Policies

Admissions

See Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MA in International Security program may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For additional information, see Graduate policies (p. 87).

A201 Robinson Hall
Fairfax Campus

The Schar School offers certificate programs in conjunction with its master’s programs. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions
Requirements
Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 66). Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found with Schar Admissions (http://schar.gmu.edu/admissions).

Policies
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

Termination from Program
Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 87).

Admissions & Policies

Admissions
Students are considered for admission for the fall term only.

Please see Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Policies
Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

See AP.6 Graduate Policies (p. 87) for more information.

Requirements

Core Courses
- ODKM 700: Organizations, Management and Work: Theory and Practice (3 credits)
- ODKM 705: Group Dynamics and Team Learning (3 credits)
- ODKM 710: Social and Organizational Inquiry (4 credits)
- ODKM 715: Creating Learning Organizations (3 credits)
- PUBP 503: Culture, Organization, and Technology (3 credits)
- ODKM 720: Socio-technical Systems and Collaborative Work (3 credits)
- ODKM 725: Knowledge Management and Strategy (3 credits)
- ODKM 732: Leadership and Social Justice (4 credits)
- ODKM 735: Organizational Development Practices (3 credits)
- ODKM 740: Learning Community (3 credits)

Total Credits: 32

Electives
Select 3 credits of electives

Total Credits: 3

¹ Must be approved by the program director or advisor

Experiential Requirement
A 3-credit internship is required. For students with appropriate work experience, this requirement can be waived with the approval of the program director or dean.

Internship

3

The program is an integrated program taught in executive format and designed for professionals who have several years of work experience. Providing conceptual tools and practical guidance to foster organizational change, the program focuses on three related areas: creating and leveraging knowledge through networks of people who communicate and collaborate; understanding and managing change by integrating the diverse roles of people, processes, and technology; and enhancing and facilitating collaboration by building effective relationships in technology-rich environments. A feature of this program is the group-oriented approach to learning supported by the use of web-based collaborative computer technologies. Students develop the competencies to apply these technologies to make organizations more effective.

The cohort usually completes the program on a part-time basis. Full-time study is also possible by arrangement with the program director.

Students work in teams and complete most of the courses in sequence. The second academic year includes an action learning component, in which participants undertake projects in organizations and apply research methods. Overall, the process and methods of evaluation stress the cumulative development of competencies and the capacity to apply the insights gained. Students are expected to have easy access to a computer and the Internet. Minimum computer specifications can be obtained from the program office.
Peace Operations, MS

Arlington Campus
A201 Robinson Hall
Fairfax Campus

This program is designed for students and practicing professionals engaged in the planning, regulation, management, and conduct of peace operations. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently participate in or conduct a peace operation. Students also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admissions & Policies

Admissions
Please see Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis.

Policies
Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

See AP.6 Graduate Policies (p. 87) for more information.

Political Communication Minor (Schar)
Banner Code: PCOM

Academic Advising
A201 Robinson Hall
Fairfax Campus

The interdisciplinary minor in political communication is offered jointly by the Schar School of Policy and Government and the CHSS Department of Communication.

Political communication explores the interaction among members of the public, the media, advocacy groups, and politicians in democratic society. This minor uses a diverse approach to questions of how mass and interpersonal communication influence democratic functioning, including

1. how political actors use strategic messaging to persuade and mobilize the public
2. how citizens make sense of these messages and their impact on engagement, deliberation, efficacy, knowledge, and participation
3. the role of the mass media in facilitating or hindering this relationship
Political communication includes explicitly political activities like voting and political campaigns. It also encompasses any issue of public debate or deliberation, including culture and social movements.

**Faculty**
Daigle (minor advisor for Schar)

**Admissions & Policies**

**Admissions**
This minor is available to all Mason undergraduate students with the exception of communication majors pursuing a concentration in political communication.

**Policies**
For policies governing all minors, see AP.5.3.4 Minors (p. 86).

**Requirements**

**Minor Requirements**
Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 318) tab.

**Political Science, MA**

**Banner Code:** PP-MA-POS

**Academic Advising**
560 Founders Hall
560 Founders Hall
Arlington Campus
A201 Robinson Hall
Fairfax Campus

The MA in political science program prepares students for advanced work in political science, teaching, and research about government; a career in government and politics; and work in domestic and international nongovernmental organizations.
The program is made up of four core courses in political science and completion of either a concentration in international security or a broader field of specialization in American government and politics, international relations, or comparative politics. Students choosing a specialization have interdisciplinary opportunities to take up to 9 credits in related fields such as history or public policy.

The master's degree is the first step in an engaging and stimulating career. Students develop a deeper understanding of political ideas and institutions, more sophisticated research skills, a better grasp of the intricacies of governments abroad, and a deeper knowledge of the complexities of international politics. This degree can lead to a career teaching about government; working with legislative bodies, government agencies, and international organizations; or doing research and writing about politics and government.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

Termination from Program

Students admitted to an Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 87).

Requirements

Degree Requirements

Total credits: 36

Students should develop an education plan with their advisors that lists the courses they plan to take. The plan is approved by the student's advisor. Students may include courses from other units to complement their field of specialization; they should reflect the ideas, institutions, or processes of contemporary governance.

Students who wish to begin a career in government and politics or to alter their current career path in government and politics are encouraged to take a 3-credit internship in their area of interest. Internships can be arranged through the Schar school.

#### Electives

Select one to three electives.  
Total Credits: 9-15

### Electives

Select up to two electives.  
Total Credits: 0-6

1 The number of electives students have will depend on how many credits they took in the concentration or field of specialization and whether they choose a 3-credit project or a 6-credit thesis. Students choose the remaining credits required for the degree, if any, from other courses in SPGIA, including an internship, additional courses in the field of specialization, or from course work offered by other units.

### 3 Credits of Project or 6 Credits of Thesis

A project or thesis is required for the MA in political science. Students who choose to do a project take 3 credits of GOVT 798 Political Science Research Project linked to an advanced specialty course and produce a final research project. Students who choose to do a thesis should be aware of the policies governing theses. Students must follow the enrollment policy of the university and, once enrolled in GOVT 799 Political Science Thesis, must maintain continuous enrollment as specified in AP.6.9.3 Master’s Thesis (p. 91). A thesis director and a committee of two additional faculty members appointed by the school read and approve the thesis. Students should make arrangements for doing a project or thesis with their advisor.

Select one from the following:

### Accelerated Master’s

#### Bachelor’s Degree (any)/Political Science, Accelerated MA

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated MA degree in political science. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (p. 91)

#### Admission

See Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master’s program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

#### Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are chosen from GOVT 500 The Scientific Method and Research Design, GOVT 510 American Government and Politics, GOVT 520 Political Theory, GOVT 530 Comparative Politics, GOVT 540 International Relations. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

### Political Science, PhD

**Banner Code:** PP-PHD-POS

**Academic Advising**

560 Founders Hall  
Arlington Campus

A201 Robinson Hall  
Fairfax Campus
The doctoral program is designed to prepare students for teaching and conducting research about government, careers in government and politics, and work in domestic and international nongovernmental organizations. The program allows students to combine their academic education with experience in the kinds of complex domestic and international political organizations they are studying. This model for political science education, patterned after the American Political Science Association’s Congressional Fellows Program, is designed to foster scholarship and a firsthand understanding of domestic and international institutions such as think tanks, international bodies, nongovernmental organizations, journals of political opinion, and congressional and executive branch offices.

**Admissions & Policies**

**Admissions**

**Application Requirements**

Please see Graduate Admissions (p. 66) for general information on graduate admission to George Mason University. Please see the Schar School of Policy and Government Admissions website (http://schar.gmu.edu/admissions/doctorate-admissions) for application requirements and deadlines. Students are considered for admission for the Fall term only.

For students who have been admitted with a bachelor’s degree, the Faculty Review Committee will review each student’s progress after 30 credits of course work to determine whether the student will be allowed to continue their work toward the PhD. For students entering the program with a master’s degree, this review will occur after 12 credits in this program. Students who are not allowed to continue to work toward the PhD will be allowed to complete the MA degree.

**Policies**

**Academic Advising**

A total of 12 credits of supporting courses may be taken in other departments to fulfill a minority of the credits for any of the requirements below, including the methodology requirement, with prior written approval of the program director. All courses should be planned with an advisor and appear on a program of study, which requires the approval of the program director.

**Reduction of Credit**

For students entering the program with a master’s or MPA degree, the number of credits required for the doctorate may be reduced by up to 30 credits subject to approval of the graduate coordinator and the dean.

**Requirements**

**Degree Requirements**

Total Credits 0-12

Advancement to Candidacy
To advance to candidacy, students must complete all course work required by their approved program of study. Students must also successfully complete and pass two qualifying exams in major fields. In addition, students must have an approved dissertation committee as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean's Office before a student can advance to candidacy.

Dissertation Research
Once enrolled in GOVT 998 Doctoral Dissertation Proposal, students in this degree program must maintain continuous registration in GOVT 998 Doctoral Dissertation Proposal or GOVT 999 Doctoral Dissertation Research each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in GOVT 999 Doctoral Dissertation Research, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Research (p. 93). Students who defend in the summer must be registered for at least 1 credit of GOVT 999 Doctoral Dissertation Research.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of GOVT 998 Doctoral Dissertation Proposal and a minimum of 6 credits of GOVT 999 Doctoral Dissertation Research. They apply a minimum of 12 and a maximum of 24 dissertation credits (GOVT 998 Doctoral Dissertation Proposal and GOVT 999 Doctoral Dissertation Research combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Students who do fewer than 24 credits of dissertation will complete their degree with additional electives.

Select 12-24 credits from the following: 12-24

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 84).

Requirements

Degree Requirements
Total credits: minimum 120

Students must fulfill all Requirements for Bachelor’s Degrees (p. 84) including the Mason Core (p. 135). Students pursuing a BS in Public Administration and Policy must complete additional requirements for the BS degree in the Schar School of Policy and Government (p. 906).

Students must earn a minimum grade of 2.00 in each course applied to the major, including GOVT courses as well as the supporting courses in other disciplines used to fulfill the requirements below. See an advisor before registering.

Core Courses
The math or statistics core course cannot be used to fulfill the Mason Core requirement in quantitative reasoning.

</table>
Students may complete a concentration of at least 12 credits in one field to fulfill a concentration. Students who do not wish to pursue a concentration may choose at least 24 credits from any of the advanced public administration courses listed below (with restrictions noted below) for a broader learning experience. Up to three credits of GOVT 399 Research Practicum and GOVT 480 Internship may be used to fulfill the field course requirement with prior advisor approval. Up to six credits of GOVT 496 Directed Readings and Research may be used to fulfill this requirement with prior advisor approval. GOVT 490 Synthesis Seminar (Mason Core) (p. 135) or GOVT 491 Honors Seminar (Mason Core) (p. 135) may not be used to fulfill this requirement.

Individualized Concentration (IND)
Create your own concentration consisting of four upper level courses with Director approval 1

1 A minimum of two courses in this concentration must be advanced public administration field courses.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated "writing intensive" in their majors. Students majoring in public administration may fulfill this requirement by successfully completing GOVT 490 Synthesis Seminar (Mason Core) (p. 135) or GOVT 491 Honors Seminar (Mason Core) (p. 135) in their major programs.

Mason Core
Note: Some Mason Core (p. 135) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 135) requirements.

Code  Title  Credits
Written Communication (p. 135)  6
Oral Communication (p. 136)  3
Quantitative Reasoning (p. 136)  3
Information Technology (p. 136)  3-7

Core Requirements

Global Understanding (p. 139)  3
Literature (p. 140)  3
Natural Science (p. 141)  7
Social and Behavioral Sciences (p. 142)  3
Western Civilization/World History (p. 143)  3
Synthesis/Capstone Requirement 1
Synthesis/Capstone (p. 143)  3

Total Credits  40

1 minimum 3 credits

Honors

Honors in the Major
Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) (p. 135) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Accelerated Master’s

Bachelor’s Degree (any)/Biodefense, Accelerated MS

Overview
Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission
Please see the Graduate Admissions (p. 66) for general information on graduate admission to George Mason University. Information specific to
the accelerated MS program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/International Security, Accelerated MA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Security. If accepted students will be able to earn a bachelor’s degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (p. 91)

**Admission**

Please see Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are:

<table>

</tbody>
</table>

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/International Commerce and Policy, Accelerated MA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted students will be able to earn a bachelor’s degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (p. 91)

**Admission**

Please see Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are:

</tr>
</tbody>
</table>

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the
semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor's Degree (any)/Political Science, Accelerated MA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated MA degree in political science. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (p. 91)

**Admission**

See Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master’s program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are chosen from GOVT 500 The Scientific Method and Research Design, GOVT 510 American Government and Politics, GOVT 520 Political Theory, GOVT 530 Comparative Politics, GOVT 540 International Relations. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/Public Policy, Accelerated MPP**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor's degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are PUAD 502 Administration in Public and Nonprofit Organizations, PUAD 511 Problem Solving and Data Analysis I, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/Public Administration, Accelerated MPA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated master’s degree in public administration. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89).
Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) from the following list to be held as reserve graduate credit and count only toward the master’s degree. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

**Public Administration, MPA**

*Banner Code: PP-MPA-PUAD*

**Academic Advising**

560 Founders Hall  
Arlington Campus  
A201 Robinson Hall  
Fairfax Campus

Mission Statement: The Master of Public Administration (MPA) is designed for people who hold or aspire to hold leadership positions in organizations that participate in the development and implementation of public policy. The mission of the MPA program is to give graduate students the opportunity to build their knowledge of politics, public policy and management and to enhance their analytic, problem solving, and communication skills.

MPA students at Mason have the research and cultural resources of the Washington, D.C. area at their disposal. Government agencies representing all levels in the U.S. federal system are located close to the campus, as are the National Archives, the Library of Congress, and the Smithsonian Institution. Another benefit is the wide range of internship opportunities available in governmental and nonprofit organizations. The MPA Program regularly has internship invitations from national, state, and local government organizations, as well as from nonprofit organizations whose principal work is at the local, state, national, or international levels. Many of these internships are paid positions.

MPA courses are held at the Fairfax and the Arlington campuses during the week and on the weekend in an accelerated format.

**Admissions & Policies**

**Admissions**

**Requirements**

See Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university and school policy.

**Policies**

**Termination from Program**

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 87).

**Program Requirements**

The MPA curriculum is arranged in a sequential manner. PUAD 500-level courses are foundation courses, 600-level courses are intermediate courses, and the 700-level courses are advanced courses. Students must take PUAD 500-level, or foundation courses, during the first two semesters, followed by 600-level classes. The PUAD 700-level courses should be taken during the last semester or two of enrollment in the MPA program.

For example, a full-time student should enroll in PUAD 502 Administration in Public and Nonprofit Organizations and two other 500-level courses, such as PUAD 511 Problem Solving and Data Analysis I and PUAD 520 Organization Theory and Management Behavior, during the first semester. In the second semester the student should enroll in PUAD 540 Public Policy Process and two intermediate courses such as PUAD 662 National Budgeting and a 600-level elective course.

Part-time students taking two courses a semester should take PUAD 502 Administration in Public and Nonprofit Organizations and either PUAD 511 Problem Solving and Data Analysis I or PUAD 520 Organization Theory and Management Behavior during the first semester, followed by either PUAD 511 Problem Solving and Data Analysis I or PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process in the second semester.

Requests for taking a course out of sequence must be made in writing to the student’s advisor and must be approved by the advisor before enrollment.

**Requirements**

**Degree Requirements**

Total credits: 36-39
The required courses emphasize the development of knowledge about public policy and management, as well as analytical problem-solving and communication skills, and third-party governance. Through these courses, students develop a shared knowledge base and skill set. The elective courses can be used by students to focus their knowledge and skill development within one concentration. Alternatively, the electives can be used to extend the breadth of study with courses drawn from a variety of concentrations or from other departments and schools across the university.

Electives

Select four electives

Total Credits 12

Students may take their electives within one of the concentrations which follow. As an alternative, with the approval of their advisor, students may select their electives from several concentrations or fields. Students not pursuing a concentration may select electives from Schar course offerings.

Concentrations

Students may declare only one concentration. PUAD 794 Internship and PUAD 796 Directed Readings and Research may be applied to a concentration where content is appropriate and with prior written approval of the student’s advisor. Other courses may also be applied to a concentration with prior written approval of the advisor.

Accelerated Master's

Bachelor's Degree (any)/Public Administration, Accelerated MPA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated master's degree in public administration. If accepted, students will be able to earn a bachelor's degree in their chosen major and a master's degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are PUAD 502
Administration in Public and Nonprofit Organizations, PUAD 511
Problem Solving and Data Analysis I, PUAD 520 Organization Theory
and Management Behavior and PUAD 540 Public Policy Process.
Students must maintain a minimum GPA of 3.00 in these courses and in
coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the
semester indicated in the application, students must submit the
Bachelor’s/Accelerated Master’s Transition Form to apply credits to
the master’s degree. Students must begin their master’s program the
semester immediately following conferral of the undergraduate degree
(excluding summer).

Public Management Graduate
Certificate
Banner Code: PP-CERG-PMG

Academic Advising
560 Founders Hall
Arlington Campus
A201 Robinson Hall
Fairfax Campus

The Schar School offers certificate programs in conjunction with its
master’s programs. Students already pursuing a master’s degree in the
school may, in most cases, after admission to a certificate program, earn
an additional six credits (two courses) in Schar to receive a certificate in
addition to the master’s degree.

The graduate certificate in public management may only be pursued on a
part-time basis.

Admissions & Policies

Admissions
Applicants to all graduate programs must meet the admission standards
and application requirements for graduate study as specified in Graduate
Admission Policies (p. 66). Participants must be admitted to a certificate
program. Admission requirements are the same as those for the master’s
programs and may be found on the Schar admissions website (http://
schar.gmu.edu/admissions).

Policies
For policies governing all graduate certificates, see AP.6.8 Requirements
for Graduate Certificates (p. 90).

Termination from Program
Students admitted to a Schar program will be terminated from that
program upon receiving one grade of F and are no longer eligible to take
courses in the school. Per university regulation, students are terminated
from the university after accumulating grades of F in two courses or
9 credits of unsatisfactory grades in graduate courses. For policies
governing all graduate degrees, see Graduate Policies (p. 87).

Public Policy and Management Minor
Banner Code: PPMG

Academic Advising
A201 Robinson Hall
Fairfax Campus

This minor equips students with the background and tools to understand
the complexities of policy formation and implementation as leaders and
managers in the political arena.

Faculty
Conant (minor advisor)

Admissions & Policies

Policies
Students pursuing this minor must complete 18 credits in government
with a minimum grade of 2.0 in each course. Eight credits of coursework
must be unique to the minor. For policies governing all minors,
see AP.5.3.4 Minors (p. 86).

Public Policy, MPP
Banner Code: PP-MPP-PUBP

Academic Advising
560 Founders Hall
Arlington Campus

A201 Robinson Hall
Fairfax Campus

The master’s program in public policy leads to a degree for aspiring or experienced professionals who seek career advancement through cutting-edge education and training in policy analysis and development in increasingly technical and global environments. The program prepares students to be reflective practitioners who develop, implement, manage, analyze, evaluate, and effect innovative change in the public and private sectors through a course of study that emphasizes the fundamentals of policy development; the role of technology, analytic assessment, and modeling for policy evaluation; and the implications of international and global perspectives on policy formation. Courses are offered primarily in late afternoon and evening to fit the schedules of busy professionals.

Admissions & Policies

Admissions
Requirements
See Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions). Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Policies
Termination from Program
Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 87).

Program Requirements
Students must complete 36 to 39 credits of coursework through a combination of core courses, electives, and a professional experience requirement. Appropriate professional experience can be demonstrated through previous employment or a supervised internship. Students will also be exposed to the global nature of public policy activity through the core requirement of international comparative policy assessment.

Electives
Electives are chosen from one of the following policy emphasis areas. One of the courses in the emphasis sequence should have an international focus.

- Global Medical and Health Policy
- International Governance and Institutions
- National Security and Public Policy
- Public Finance and Budgeting
- Regional Economic Development
- Science and Technology Policy
- Social Policy
- Terrorism, Transnational Crime and Corruption
- Transportation Policy
- Urban Policy and Development
- US Government Institutions and Policy Management

**Accelerated Master’s**

**Bachelor’s Degree (any)/Public Policy, Accelerated MPP**

**Overview**
Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor’s degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (p. 91)

**Admission**
Please see the Graduate Admission Policies section in this catalog for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program
may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) from the following list to be held as reserve graduate credit and count only toward the master's degree. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and coursework applied to their major.

</tbody>
</table>

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Public Policy, PhD**

**Banner Code: PP-PHD-PUBP**

**Academic Advising**

560 Founders Hall
Arlington Campus

A201 Robinson Hall
Fairfax Campus

This program is distinctive in its heavy emphasis on the combined influence of technology, culture, and institutions on public policy. Students investigate the increasing tensions created by technologically driven organizational change. This doctoral program prepares its graduates to assume positions of significant responsibility in academia, government, and the private and public sectors. With a focus on analytical and research-based approaches to public policy, our students seek to understand the underlying determinants of public policy choices, analyze and improve the implementation of policy, and identify and assess new opportunities to address emerging issues.

To investigate the policy issues associated with substantive policy areas, students develop in-depth understanding of American institutions, values, and culture; competence in research methods and advanced analytical methodologies; and a comparative, international perspective. At the time of admission, each student is assigned a faculty advisor who assists in the design and development of the student's program.

**Admissions & Policies**

**Admissions**

**Requirements**

The program seeks students with exceptional potential for accumulating, sorting, analyzing, and communicating information and findings effectively. Public policy is inherently complex and value-laden. In the end, high-quality policy analysis requires thoughtful and judicious management of complex and incommensurate information, both quantitative and qualitative. Potential students must be able to manage and integrate both kinds of information and produce persuasive, well-organized, written syntheses and analytical insight.

The ideal applicant has demonstrated capabilities in research and writing, basic mathematical skills roughly equal to one semester of calculus, competence in statistics, some background in economics, and a theoretical and working knowledge of public policy processes. Applicants with strong records who are lacking in one or more of these areas may be admitted to the program and will receive assistance in making up deficiencies.

Applicants must hold a master's degree from a regionally-accredited institution and have a GPA of 3.00 or higher. Prospective students are encouraged to attend an information session.

See Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. See Schar Admissions (http://schar.gmu.edu/admissions) for application requirements and deadlines for the PhD in Public Policy. Students are considered for admission for the Fall term only.

**Policies**

For policies governing all graduate degrees, see Graduate Policies (p. 87).

**Program Requirements**

Students are required to complete a minimum of 82 credits of graduate coursework, of which no more than 12 may be dissertation credits. Specific coursework requirements include four foundational core courses, one semester of participation in the research colloquium (public policy seminar), two advanced methodology courses, three courses in an area of program specialization, and three advanced courses tailored to the student's research needs and interests. Courses are determined in collaboration with the student's advisor and are drawn widely not only from Schar, but also from other programs at Mason.

At the completion of core skills coursework (Stage One), students must pass a qualifying exam that evaluates mastery of the first year’s material, as well as the ability to integrate that material when addressing important and complex public policy problems and issues. Students must then develop their research areas through specialized coursework, and pass a field exam structured around their specific field of proposed doctoral research (Stages Two and Three). Other requirements include the successful preparation and defense of a doctoral research proposal and the ensuing dissertation (Stage Four).

A complete description of the program policies, procedures, and requirements is in the PhD in Public Policy student and faculty handbook (http://schar.gmu.edu/current-students/student-services), which is published annually.
Reduction of Credit

Students must have a master's degree before being admitted to the PhD in public policy. Up to 30 credits from a prior master's degree may be applied toward the doctoral requirements at the program director's discretion. The program director determines whether the credits are eligible for reduction of credit and the number of credits to be reduced. Students who receive less than a 30 credit reduction may take additional specialized elective credit in Stage Two.

Prerequisites: Methodological and Substantive Foundations

PhD students are required to have competence in the following three areas, either by taking these courses or by proving competence through a placement exam and/or evidence of previous relevant coursework.

Prerequisite courses will not count as part of the 82 credit requirement.

Pass the comprehensive Qualifying Exam

Total Credits: 16

Stage Two - Policy Fields and Skills

After passing the qualifying exam, students assemble a Field Research Committee. By the end of their third semester, full-time students (fourth semester for part-time) must choose a chair for their Field Committee.

By the start of their fourth semester, full-time students (fifth semester for part-time) must submit to the chair of their Field Committee a plan for their Field of Study. The Field of Study Plan will describe a proposed research area, including citations relevant to current research in that field. The Plan must be approved by both the student's Field Committee chair and the program director.

Coursework taken in Stage Two includes:

Three courses in an area of program specialization, chosen in collaboration with advisor

One advanced methods course chosen from the following:

Stage Three - Research Foundations

In Stage Three, students take coursework approved in the Field of Study Plan. Courses in the Field of Study Plan are intended to be taken concurrently with work on the Field Statement and Field Exam. Students may not present a dissertation proposal for approval until they have passed the Field Exam.

Students may choose one of the established fields of study or work with a faculty committee to create their own field of study. The established fields in the doctoral program are: regional development and transportation; technology, science and innovation; entrepreneurship, growth and public policy; U.S. governance; culture and society; organizational and information technology; and global and international systems.

Students must complete all of the following:

Three substantive Field of Study courses that will serve as a foundation for their Field

Field Statement

Field Exam

Total Credits 13-16

1 Courses must include at least one 800 level Schar from this list and no more than one substantive graduate course from outside Schar.

2 Other courses must be approved in writing by the Field Committee Chair and program director.

Note: Where appropriate courses are not available from Schar, students may petition the program director for substitute courses to count for their Field of Study Plan.

Dissertation Research

Qualifying Exams

Students must pass both a qualifying exam which is taken after the core courses are completed and a field examination.

When students have completed all coursework, have passed both the qualifying and field exams, have an approved dissertation committee and presented and successfully defended a dissertation proposal, they advance to candidacy.

Stage Four - Dissertation

Twelve credits of PUBP 998 and PUBP 999 must be applied to the degree. A minimum of six credits must be PUBP 999.

Up to six credits of 6

PUBP 998 Research/Proposal for Dissertation Proposal Oral Defense

At least six credits of 6

PUBP 999 Dissertation Dissertation Oral Defense

Total Credits 12

Science, Technology, and Security Graduate Certificate

Banner Code: PP-CERG-STS

Academic Advising

560 Founders Hall
Arlington Campus

A201 Robinson Hall
Fairfax Campus

The Schar School offers certificate programs in conjunction with its master’s programs. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree. The certificate in science, technology, and security provides an introduction to the intersection of science and security, covering topics such as the technology of CBRN weapons, proliferation, technical countermeasures, and the role of science and technology in the policy-making process.

The graduate certificate in science, technology, and security may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 66). Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

Termination from Program

Students admitted to a Schar program will be terminated from that program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 87).

Transportation Policy, Operations, and Logistics, MA

Banner Code: PP-MA-TPOL

Academic Advising

560 Founders Hall
Arlington Campus

A201 Robinson Hall
Fairfax Campus

The MA in Transportation Policy, Operations, and Logistics (TPOL) program is designed for students and practicing professionals engaged in planning, regulating, managing, and operating transportation facilities and services. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently supply and operate transportation facilities and services. They also learn to think
critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies (p. 66) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

Termination from Program

Students admitted to an Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 87).

Volgenau School of Engineering

2303 Nguyen Engineering Building
Fairfax Campus
MSN: 3D5
Phone: 703-993-1505 (Graduate)
703-993-1511 (Undergraduate)
Website: volgenau.gmu.edu

Administration

• Kenneth S. Ball, P.E. (Texas), Dean
The Volgenau School offers the following Bachelor of Science programs:

- Composition and Communication
- Applicable to the major. Each program strongly emphasizes English courses in mathematics, humanities, Mason Core, and specialty courses.

The requirements for the bachelor's degrees include required and elective into professional employment or continue studies at the graduate level. Our undergraduate degree programs prepare students to enter directly technology in the classroom.

Undergraduate Programs
Undergraduate Mission and Goals
The undergraduate mission is to provide a quality education to support the needs of Virginia and the nation. The goal is to graduate students who are technically competent, prepared for ethical professional practice and a lifetime of learning, able to communicate effectively and work as members or leaders of technical teams, and able to understand the global nature and effect of information technology and engineering.

Bachelor of Science Programs
Our undergraduate degree programs prepare students to enter directly into professional employment or continue studies at the graduate level. The requirements for the bachelor's degrees include required and elective courses in mathematics, humanities, Mason Core, and specialty courses applicable to the major. Each program strongly emphasizes English composition and communication.

The Volgenau School offers the following Bachelor of Science programs:

- Applied Computer Science
- Bioengineering
- Civil and Infrastructure Engineering
- Computer Engineering
- Computer Science
- Cyber Security Engineering
- Electrical Engineering
- Information Technology
- Mechanical Engineering
- Statistics (pending SCHEV approval)

Minors
Minors are available in aviation flight training and management, computer science, data analysis, environmental engineering, information technology, mechanical engineering, software engineering, statistics, and systems engineering and operations research.

BS/Accelerated MS Programs
Many of the BS degree programs offered within the Volgenau School may be packaged with some of the MS degree programs in ways that reduce the total number of credits required. Details can be found in the individual bachelor's and master's listings.

Graduate Programs
Master of Science Programs
The ever-increasing complexity and technical challenges in engineering, computer science, and information technology demand studies beyond the bachelor's degree.

The Volgenau School offers a number of master's programs:

- Applied Information Technology
- Bioengineering (pending SCHEV Approval)
- Biostatistics
- Civil and Infrastructure Engineering
- Computer Engineering
- Computer Science
- Data Analytics Engineering (title change Pending SCHEV Approval)
- Digital Forensics and Cyber Analysis
- Electrical Engineering
- Geotechnical, Construction, and Structural Engineering
- Information Security and Assurance
- Information Systems
- Management of Secure Information Systems
- Operations Research
- Software Engineering
- Statistical Science
- Systems Engineering
- Telecommunications

Doctor of Philosophy Programs
PhD students will gain comprehensive knowledge in their area of study and will be prepared for careers in higher education and scientific research. They are required to demonstrate a comprehensive understanding and complete research that adds significantly to the body of knowledge in engineering, computer science, information technology or statistics.

The Volgenau School offers seven doctoral programs:

- Bioengineering
- Civil and Infrastructure Engineering
- Computer Science
- Electrical and Computer Engineering
- Information Technology
Commonwealth Graduate Engineering Program (CGEP)

Commonwealth Graduate Engineering Program (CGEP) CGEP is the premier provider of high-quality post-baccalaureate online engineering education in the Commonwealth of Virginia. Oriented for practicing engineers and scientists interested in maintaining and enhancing their skills, the universities participating are: George Mason University (Mason); Old Dominion University (ODU); University of Virginia (UVA); Virginia Commonwealth University (VCU); and Virginia Tech (VT).

Offerings include master's degrees and certificate programs.

While each program is offered by one of the five participating universities, the collaboration between universities allows students more flexibility and variety in course offerings. A substantial number of course requirements can be taken at any of the five participating universities to satisfy the degree or certificate program. Prospective students should apply directly to the university offering the degree of interest. Mason has a number of degree and certificate programs available through CGEP. These programs follow all policies stated in this catalog for the program, with the exception of allowing up to 50% of the required credits to be completed at other CGEP participating universities. Faculty advisor approval is needed.

Policies for other universities’ programs are determined by those institutions. Please consult with the university offering the program of interest for details.

For more information including the Mason programs available through CGEP, visit http://cgep.virginia.gov/.

Requirements & Policies

Undergraduate Requirements

Degree Requirements

The following general requirements must be completed by all undergraduate students:

- At least 120 credits of academic work including at least 45 credits of upper-level courses (numbered 300 or above);
- At least 6 credits of English composition, 3 credits of literature, and 3 credits of oral communication (Mason Core courses);
- At least 3 credits of arts, 3 credits of Western civilization or world history, 3 credits of social and behavioral science, and 3 credits of global understanding issues (Mason Core courses);
- At least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of Mason Core courses described above;

All requirements are listed in the sections for specific Volgenau School majors. These include university requirements for mathematics, natural science, information technology including ethics, and synthesis. Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments.

Undergraduate Policies

Academic Policies

Students should become familiar with the Academic Policies (p. 74) in the University Catalog in addition to policies specific to each academic unit. The Academic Policies (p. 74) also lists additional university requirements for minor programs and double majors.

Academic Appeal of Policies and Actions

A student’s instructor, academic advisor and/or department can resolve most academic issues. If, however, an undergraduate student disagrees with a decision at the department level and feels that there may be reasonable grounds for appeal, the student should contact the Volgenau School Undergraduate Student Services Office at 703-993-1511 for guidance in preparing a request to the Associate Dean for Undergraduate Programs or other offices as appropriate.

Academic Progression

Students majoring in Volgenau School programs are expected to have an acceptable plan of study on file, formulated with assistance from their departmental advisor. They are expected to make reasonable progress toward their degree during each semester in which they are enrolled.

Sample Schedules

Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments.

Change of Major

1. Criteria for freshman students in their first semester at Mason

   Freshman students who have been admitted to any VSE Engineering or Computer Science program may change their major to any other Engineering or Computer Science program before the final drop deadline of their first semester at Mason.

   Freshman students who have been admitted to Information Technology, Statistics, VSE Undeclared, or any non-VSE major must have departmental approval to change their major to a VSE program before the final drop deadline of their first semester at Mason.

   Any change of major requests made after this deadline are bound to the change of major criteria outlined in section 3 and require the completion of at least one semester at Mason.

2. Criteria for transfer students in their first semester at Mason

   Transfer students who have been admitted to any VSE Engineering program may change their major to any other Engineering program before the final drop deadline of their first semester at Mason.

   Transfer students who have been admitted to Computer Science, Information Technology, Statistics, VSE Undeclared, or any non-VSE major must have departmental approval to change their major to a VSE program before the final drop deadline of their first semester at Mason.

   Any change of major requests made after this deadline are bound to the change of major criteria outlined in section 3 and require the completion of at least one semester at Mason.

3. Criteria for students who have completed at least one semester at Mason

   Students who have completed at least one semester at Mason and who are considering changing their major to any VSE engineering program should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students must have successfully completed MATH 114, PHYS 160 and PHYS 161 (with a grade of at least C) and should have a minimum Mason GPA of 2.75* in all technical coursework. Technical coursework refers to any math, physics, engineering, statistics and computer sciences courses completed thus far at Mason and that are applicable to the intended
engineering major. At least 6 credits of these technical courses should have been completed successfully at Mason.

*Students considering changing their major to Bioengineering with a Pre-Health concentration need to meet the above VSE engineering program requirements furthermore with a minimum Mason GPA of 3.00.

Students considering changing their major to Applied Computer Science, Computer Science, Information Technology, or Statistics should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students need to meet the criteria for that program as defined in the change of major section for that program in the catalog. Minimum GPA requirements stated for those programs are based on courses taken at Mason.

Exceptions to the policy may only be granted at the discretion of the chair or associate chair of the department.

Undeclared Students in the Volgenau School of Engineering

Students who are undecided about their specific major may select Volgenau School Undeclared as their major. This should be done as soon as possible after a student enrolls at Mason. Students will be advised to follow an initial semester or two of courses that could be applicable to majors that are of interest to them. This may involve taking courses that help the student better understand different engineering and computing areas, but which may not contribute to the total credits needed for the major they eventually choose.

Students who apply to a VSE major but do not meet major admissions criteria may also be accepted into VSE Undeclared, and become eligible to declare a VSE major after meeting specific requirements as determined by that particular major.

VSE Undeclared students are advised by the Coordinator of Undergraduate Academic Advising in the Student Services Office. Students should seek advising at least once each semester.

Writing-Intensive Requirement

The university requires all undergraduate students to successfully complete a course, or a combination of courses, designated “writing intensive” in their majors at the 300 level or above. To determine the writing-intensive course requirements for specific degrees, refer to the major program descriptions in the following department sections.

Restricted Courses

Students are encouraged to take advantage of the many excellent courses available to broaden their educational experience or strengthen their background; however, some credits earned may not satisfy any degree requirements. Degree requirements for Volgenau School undergraduate programs may not include credits earned in military science. At most 3 credits of 100-level RECR coursework may be taken to satisfy the degree requirements of those VSE programs that allow general electives. Whenever there is uncertainty, students must consult with an academic advisor in their department.

Online Education Programs

In order to increase access to Volgenau School education while meeting the needs of the School’s student population, select degree programs and courses may be completed via online education. All academic policies and procedures apply to online education programs and courses as referenced in the appropriate sections of this catalog. Some instructors may require exams and/or other meetings to take place in a proctored or on-campus environment. Students should contact the instructor concerning these requirements if not explicitly stated on Patriot Web. Space permitting and if desired, students enrolled in the online sections are also permitted to attend the instructor’s campus-based classroom section if offered during the same semester.

For more information about the Volgenau School programs available online, visit Mason Online (http://masononline.gmu.edu).

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Graduate Policies

Admission

Admission decisions are made by the faculty committee or graduate coordinator of the respective graduate program. Denial of admission is not subject to appeal. Applicants denied admission to a program are not permitted to enroll in courses in that graduate program, though they may apply for either non-degree enrollment or admission to another program.

If an applicant is offered graduate admission, the college reserves the right to withdraw that offer of admission if:

• During his or her academic studies, the admitted applicant has a significant drop in academic performance or fails to graduate with a degree prior to the first day of classes for the term admitted.
• There has been a misrepresentation in the application process.
• Prior to the first day of classes for the term admitted, the school learns that the admitted applicant has engaged in behavior that indicates a serious lack of judgment or integrity, irrespective of the outcome of any disciplinary process related to such behavior.
• Students admitted to an accelerated master’s program do not maintain satisfactory progress in his or her undergraduate program, do not receive a minimum grade of 3.00 in the graduate classes taken
as an undergraduate, or otherwise does not meet the conditions specified on the application and admission letter.

The university further reserves the right to require the applicant to provide additional information (and/or authorization for the release of information) about any such matter.

Non-degree
Non-degree graduate students taking courses in the Volgenau School may not register for classes numbered 700 or higher. All MS degree programs require at least 18 credits to be completed in degree status at Mason to be considered for graduation; as a result, a maximum of 12 credits of non-degree coursework can be transferred to a degree program.

Readmission after Termination
Graduate students who have been terminated, dismissed, or have resigned from a program in the Volgenau School and want to reapply to the same program must wait three calendar years before submitting a new application for admission. A full application for admission as well as all application materials required of that program must be submitted (or resubmitted). GRE scores, if required, cannot be older than five years. Previous admission to a program does not guarantee readmission to the same program. The circumstances of the prior termination will be a factor in the decision-making process. Graduate credit earned prior to termination can be applied to the degree program as long as the requirements for Transfer of Credit (section AP.6.5.3) are met.

Online Education Programs
In order to increase access to Volgenau School education while meeting the needs of the School’s student population, select degree programs and courses may be completed via online education. All academic policies and procedures apply to online education programs and courses as referred to in the appropriate sections of this catalog. Some instructors may require exams and/or other meetings to take place in a proctored or on-campus environment. Students should contact the instructor concerning these requirements if not explicitly stated on Patriot Web. Space permitting and if desired, students enrolled in the online sections are also permitted to attend the instructor's campus-based classroom section if offered during the same semester.

For more information about the Volgenau School programs available online, visit Mason Online (http://masononline.gmu.edu).

Cyber Security Engineering, BS
Banner Code: VS-BS-CYSE
2215 Nguyen Engineering Building
Fairfax Campus
Phone: 703-993-1502
Email: pbrouse@gmu.edu

Cyber Security Engineering is concerned with the development of cyber-resilient systems which include the protection of physical as well as computer and network systems. It requires a proactive approach in engineering design of physical systems with cyber security incorporated from the beginning of system development. Cyber security engineering is an important quantitative methodology to be used in all industries including transportation, energy, healthcare, infrastructure, finance, government (federal, state, and local), and defense. The program is focused on the cyber security engineering of integrated cyber-physical systems. This degree provides a foundation in cyber security engineering, and is most appropriate for students with a strong mathematics and science background.

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 84).

Advising and Plan of Study
All cyber security engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study, which constitutes a learning plan for the degree program. The plan of study must be signed by the student’s advisor and the Program Chair and be updated and signed by the advisor at least once a year.

Change of Major
See Change of Major (p. 955) for more information.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor.
their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

<td></td>
</tr>
<tr>
<td>ECON 103</td>
<td>Contemporary Microeconomic Principles (Mason Core) (p. 135)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits**: 6

**Remaining Mason Core**

Students must complete all Mason Core (p. 135) requirements not fulfilled by major requirements.

| Written Communication (p. 135) | 6 |
| Literature (p. 140)            | 3 |
| Arts (p. 137)                  | 3 |
| Western Civilization/World History (p. 143) | 3 |
| Global Understanding (p. 139)  | 3 |

**Total Credits**: 18

**Note:**

All students must submit at least 24 credits of social science and humanities coursework, which is normally satisfied by the 24 credits of Mason Core (p. 135) social science and humanities courses listed above and with the oral communication and economics requirement.

---

**Accelerated Options**

**Cyber Security Engineering, BS/Digital Forensics and Cyber Analysis, Accelerated MS**

**Overview**

Highly-qualified students in the Cyber Security Engineering, BS (p. 957) have the option of obtaining an accelerated Digital Forensics and Cyber Analysis, MS (p. 1025).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission Requirements**

Students in the Cyber Security Engineering, BS (p. 957) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics and Cyber Analysis, MS (p. 1025) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two Digital Forensics and Cyber Analysis core courses (6 credits) in place of two of the three required technical electives, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>and one of the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis (satisfies the IT 357 requirement for the INFS concentration in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics (satisfies one NTEL concentration course in the BS program)</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits**: 6

Note: Students complete all Digital Forensics and Cyber Analysis, MS (p. 1025) core courses and apply the two courses from the above list toward the Digital Forensics and Cyber Analysis, MS (p. 1025) requirements.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**Data Analytics Engineering, MS**

**Banner Code**: VS-MS-DAEN

**Email**: datamine@gmu.edu

The MS in Data Analytics Engineering is designed to provide students with an understanding of the technologies and methodologies necessary for data-driven decision-making. Students study topics such as data mining, information technology, statistical modeling, predictive analytics, optimization, risk analysis, and data visualization. It is aimed at students who wish to become data scientists and analysts in finance, marketing, operations, business/government intelligence and other information intensive groups generating and consuming large amounts of data.

**Admissions & Policies**

**Admissions**

Applicants must have completed a baccalaureate degree from a regionally accredited program with a reputation for high academic standards and an earned GPA of 3.00 or better in their 60 highest-level credits. While no specific undergraduate degree is required, a background in engineering, business, computer science, statistics, mathematics, or information technology, is desirable, or alternatively strong work experience with data or analytics may be used. DAEN 500 Data Analytics Fundamentals may be required for students without a basic foundation in Data Analytics.

For each of the concentrations there are additional admission requirements. These are listed in the descriptions of the individual concentrations.

In addition to fulfilling Mason’s admission requirements for graduate study, applicants must provide:
• Two letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s professional or academic accomplishments.
• Resume.
• Detailed statement of career goals and professional aspirations.
• Completed self-evaluation form.
• If the applicant’s native language is not English, proof of English competency with a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam.

</tbody>
</table>

Concentrations

Students can elect a concentration that corresponds to a specialized technical area. Students not interested in a concentration can work with an advisor to select 15 credits of electives from among courses allowed in all the concentrations.

Concentration in Applied Analytics (APAN)
Focuses on the practical elements of adapting big data approaches to common analytic problems and government operations.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>IT 106</td>
<td>Introduction to IT Problem Solving Using Computer Programming</td>
<td>3</td>
</tr>
<tr>
<td>MATH 108</td>
<td>Introductory Calculus with Business Applications (Mason Core) (p. 135)</td>
<td>3</td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core) (p. 135)</td>
<td>3</td>
</tr>
</tbody>
</table>

Required Concentration Courses
All students are required to take one fundamental course:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 524</td>
<td>Database Management Systems</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, students in this concentration may choose four courses from the following list:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 582</td>
<td>Applications of Metadata in Complex Big Data Mining</td>
<td>3</td>
</tr>
<tr>
<td>AIT 614</td>
<td>Big Data Essentials</td>
<td>3</td>
</tr>
<tr>
<td>AIT 622</td>
<td>Determining Needs for Complex Big Data Systems</td>
<td>3</td>
</tr>
<tr>
<td>AIT 624</td>
<td>Knowledge Mining from Big-Data</td>
<td>3</td>
</tr>
<tr>
<td>AIT 664</td>
<td>Information: Representation, Processing and Visualization</td>
<td>3</td>
</tr>
<tr>
<td>DAEN 698</td>
<td>Data Analytics Research Project</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 15

Concentration in Bioengineering (BIOE)
Bioengineering, whether it is mapping the human genome or computer aided diagnosis, is an exercise in data analytics.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 320</td>
<td>Bioengineering Signals and Systems</td>
<td>3</td>
</tr>
<tr>
<td>MATH 113</td>
<td>Analytic Geometry and Calculus I (Mason Core)</td>
<td>4</td>
</tr>
<tr>
<td>MATH 114</td>
<td>Analytic Geometry and Calculus II</td>

</table>

Total Credits: 15
Concentration in Business Analytics (BUSA)

Additional Admission Requirements
Students entering the program must have successfully completed STAT 515 Applied Statistics and Visualization for Analytics or STAT 554 Applied Statistics I with a grade of B or better.

Required Concentration Courses
- GBUS 720 Marketing Analytics 3
- GBUS 721 Marketing Research 3
- GBUS 738 Data Mining for Business Analytics 3
- GBUS 739 Advanced Data Mining for Business Analytics 3
- GBUS 744 Fraud Examination 3

Total Credits 15

Concentration in Data Mining (DTM)

Aimed at students who are interested in understanding data mining, advanced database systems, MapReduce programming, pattern recognition, decision guidance systems, and Bayesian inference as they relate to data analytics.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:
- CS 310 Data Structures 3
- CS 330 Formal Methods and Models 3
- CS 367 Computer Systems and Programming 4
- CS 465 Computer Systems Architecture 3
- MATH 125 Discrete Mathematics I (Mason Core) 3

Note: all prerequisites must be met.

Total Credits 15

Concentration in Digital Forensics (DFOR)

Deals with the process of acquiring, extracting, integrating, transforming, and modeling data with the goal of deriving useful information that is suitable for presentation in a court of law. Digital forensics is a key component in criminal, civil, intelligence, and counter-terrorism matters. Students will be able to apply data analytics to such areas as digital media, intercepted (network) data, mobile media, unknown code, and leverage that analysis in order to determine, intent, attribution, cause, effect, and context.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:
- IT 342 Operating Systems Fundamentals 3
- IT 441 Network Servers and Infrastructures 3
- IT 341 Data Communications and Network Principles 3
- IT 445 Advanced Networking Principles 3

Note: Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.

Required Concentration Courses
- CFRS 500 Introduction to Forensic Technology and Analysis 3
- CFRS 660 Network Forensics 3
- Select three from the following: 9
  - CFRS 510 Digital Forensics Analysis
  - CFRS 661 Digital Media Forensics
  - CFRS 663 Operations of Intrusion Detection for Forensics
  - CFRS 664 Incident Response Forensics
  - CFRS 698 Independent Reading and Research
  - CFRS 761 Malware Reverse Engineering
  - CFRS 762 Mobile Device Forensics
  - CFRS 763 Registry Forensics - Windows
  - CFRS 764 Mac Forensics
  - CFRS 767 Penetration Testing in Computer Forensics
  - CFRS 768 Digital Warfare
  - CFRS 780 Advanced Topics in Computer Forensics
  - DAEN 698 Data Analytics Research Project

Total Credits 15

Concentration in Financial Engineering (FNNE)
The concentration emphasizes both analytical and practical aspects of financial and econometric data analytics. Students are expected to demonstrate proficiency in several quantitative modeling disciplines.

Students are also expected to understand issues relevant to practical aspects of investment and hedging decision making, derivative valuation, and risk analysis. The students will learn the techniques to analyze large financial and economic data to derive meaningful knowledge, which will be useful for developing effective business and risk mitigation strategies and making sound financial, marketing, and investment decisions. The concentration prepares students for careers in business analytics with a focus on practical applications in financial operations, investment, and risk mitigation strategy development.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

HAP 823 Comparative Effectiveness Analysis using Observational Data

Concentration in Predictive Analytics (PRAN)

The ultimate goal of analytics of Big Data is to derive value by suggesting effective actions for the future. Predictive analytics focuses on the methods for deciding on the best course of action, taken into account possible constraints and risks. The concentration will provide students with skills that drive effective decision making and optimization. Students will learn the techniques to analyze both structured and unstructured data to derive meaningful knowledge, which will be useful for developing effective strategies and making optimal decisions.

The concentration emphasizes both analytical and practical aspects of predictive analytics. Students are expected to master the practical aspects of modeling and methods for optimization. Students are also expected to demonstrate proficiency in decision making, design of decision support systems, and risk analysis. The program prepares students for careers in big data analytics with a focus on strategic decision making in practical applications including financial engineering, health care, transportation, and intelligence.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Total Credits: 15

Concentration in Statistical Analytics (STLA)

Provides students with skills necessary for gaining insight from data. Enables students to evaluate large data-sets from a rigorous statistical perspective, including theoretical, computational, and analytical techniques. Emphasis will be placed on developing deep analytical talent in the two areas of statistical modeling and data visualization. "Big Data" are well-known to encompass high levels of uncertainty and
complex interactions and relationships. To gain knowledge from these data and hence inform decisions, elucidation of the core interactions and relationships must be done in a manner that acknowledges uncertainties in order to both minimize false signals and maximize true discoveries. Statistical modeling does exactly this – it accounts for uncertainty while identifying relationships. Visualization is often a critical component of modeling, but visualization also stands alone as an important tool for presentation of information, decision analysis, and process improvement.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

- MATH 203: Linear Algebra 3
- MATH 213: Analytic Geometry and Calculus III 3
- STAT 346: Probability for Engineers or MATH 351: Probability 3

Required Concentration Courses
- STAT 544: Applied Probability 3
- STAT 554: Applied Statistics I 3

And three courses from the following:
- DAEN 698: Data Analytics Research Project
- STAT 654: Applied Statistics II
- STAT 662: Multivariate Statistical Methods
- STAT 663: Statistical Graphics and Data Exploration I
- STAT 672: Statistical Learning and Data Analytics

Total Credits: 15

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 473</td>
<td>SYST 573</td>
</tr>
<tr>
<td>OR 441</td>
<td>OR 541</td>
</tr>
</tbody>
</table>

For the predictive analytics concentration, any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

OR 541 Operations Research: Deterministic Models will substitute for the OR 531 Analytics and Decision Analysis core requirement in the MS DAE program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS (p. 983) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 959) with a concentration in predictive analytics.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
While no specific undergraduate degree is required, Mason undergraduate students majoring in systems engineering or any other engineering, business, computer science, statistics, mathematics, or information technology may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

For the predictive analytics concentration, students must submit evidence of:

- Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.
- Familiarity with analytical modeling software, such as spreadsheets or math packages.

For the predictive analytics concentration, any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

OR 541 Operations Research: Deterministic Models will substitute for the OR 531 Analytics and Decision Analysis core requirement in the MS DAE program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS (p. 983) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 959).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Applied Computer Science, BS (p. 983) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>10</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students must register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the
undergraduate degree requirements. Specifically, students in all concentrations of the Applied Computer Science, BS program must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 3

Students in the Software Engineering and Bioinformatics concentrations of the Applied Computer Science, BS (p. 983) program must also register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 3

Students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS (p. 983) program must also register for one of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

For students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS (p. 983) program, one of the 500 level courses will count as an elective towards their undergraduate degree.

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Bioengineering, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Bioengineering, BS (p. 970) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 959) with a concentration in Bioengineering.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements

Students in the Bioengineering, BS (p. 970) program may apply to this option if they have earned 95 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 222 Computer Programming for Engineers and BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Bioengineering concentration of the Data Analytics Engineering, M (p. 959) program.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of 500-level basic courses in place of the corresponding BENG 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 501</td>
<td>Bioengineering Research Methods</td>
<td>3</td>
</tr>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining (in place of BENG 420)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 6

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS (p. 991) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 959).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements

Students in the Computer Science, BS (p. 991) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>
Select one of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 6

Note:
Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Data Analytics Graduate Certificate

Banner Code: VS-CERG-DNIC

Email: datamine@gmu.edu

This graduate certificate provides a broad overview of the end-to-end value chain for Big Data Analytics, from the capture and management of the data, through the analytics that harness the data to create value. The certificate is designed to provide a framework for the methodologies for organizing and integrating disparate data, analyzing and visualizing the integrated data, and determining what decisions or actions should be taken to generate value from the data.

This certificate is intended for students who are interested in addressing the challenge of transforming the massive data arising in applications such as business analytics, cyber defense/forensics, energy, finance, genomics, healthcare, intelligence, law enforcement, or transportation, into meaningful information. The certificate is intended for graduate students in areas where applications of big data may arise.

The graduate certificate may only be pursued on a part-time basis.

Requirements

Certificate Requirements
Total credits: 12

Coursework
Students must achieve a total GPA of at least 3.00, with no more than three credits of a grade of C from the following courses.

Information Technology, PhD

Banner Code: VS-PHD-INFT

2400 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-1504
Email: vsephd@gmu.edu

Information Technology (IT) is a multidisciplinary PhD program that spans all of the research areas available within the School of Engineering, as well as collaboration with faculty across the campus. The Information Technology PhD program emphasizes the particular aspects of technology located in the Northern Virginia Technology Corridor and around the globe. The relevance of the IT doctoral program has grown significantly as the world has become more dependent on the effective use of information. Our focus on the science, engineering, and technology of information processing complements and enhances traditional approaches to engineering that are more strongly based on the physical and material sciences. The Information Technology PhD program is broad, and can be customized to support individual research interests. Students are encouraged to enter into an established concentration to provide focus to their program.

Admissions & Policies

Admissions

Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. While no specific undergraduate degree is required, a background in engineering, business, computer science, math, or information technology is desirable; alternatively, strong work experience with data or analytics may be used. Current graduate students in the Volgenau School of Engineering and the School of Business (p. 846) can elect this certificate with the Graduate Secondary Certificate Program Application from the Office of the University Registrar (http://registrar.gmu.edu).
without an MS may be accepted, but will be required to take more courses.

An undergraduate GPA of 3.00 and a graduate GPA of 3.50 are basic requirements for applicants. Applicants are required to submit: application for admission, undergraduate and graduate transcripts from previous colleges and universities, GRE test results, three letters of reference (preferably from college instructors), a résumé, a personal goal statement, and a self-evaluation form to identify research areas of interest. Foreign transcripts must be translated and evaluated (course-by-course preferred) by a member of the NACES Membership. Evaluations can be also be done by George Mason University, at no extra cost to the applicant; however, this typically adds 6-8 weeks to the application processing time. Please review George Mason University’s Policy on International Transcript Submission (p. 68). An applicant’s entire background is examined before an admission decision is made.

To ensure a common ground of fundamentals, students should have a background in such topics as calculus, differential equations, linear algebra, discrete structures, probability, and statistics. In addition, students entering the PhD in Information Technology Program must have a sound working knowledge in computing as demonstrated by examples of programs or applications developed and tested in at least one high level programming language environment. Because much of the coursework within this program requires computational proficiency, experience with a variety of languages and computer hardware is useful as is an understanding of computer architecture. Highly-qualified students who do not present evidence of appropriate coursework may be admitted and then required to take appropriate articulation courses.

Those who wish to be considered for Mason’s Presidential Scholarship, which provides a stipend and tuition support for three years, must be full-time students, with a minimum GPA of 3.5 or higher in their most recently earned degree, and submit GRE scores with a combined math and verbal score of 1200 on exams taken prior to August 1, 2011; combined score of 310 on the new revised GRE scale for exams taken August 1, 2011 and beyond. Scores must have been earned within the last five years. Only one Presidential Scholarship is awarded per PhD program per year.

**Policies**

The general doctoral requirements (p. 87) of Mason apply to this program.

**Reduction of Credit**

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from an approved and completed master’s degree. Reduction of credit requires the approval of the program director/dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

**Program Requirements**

Information Technology doctoral candidates must earn a minimum of 72 graduate credits. The program is made up of a breadth requirement (assessed via qualifying exams) and specialized coursework (assessed via the comprehensive exam), followed by preparation of a dissertation proposal, an original research project, and final defense. To advance to candidacy, students must complete all coursework, pass the qualifying and comprehensive examinations, and defend a dissertation proposal.

### Requirements

#### Degree Requirements

**Total credits: minimum 72**

The degree plan outlined here is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction will be required to choose additional credits in consultation with their advisors.

**Plan of Study**

Students are strongly encouraged to select a concentration area. However, the ability exists to progress with only a Plan of Study. Students who declare a concentration will have the concentration noted on their transcript. The plan of study is a well-defined set of advanced courses in a focused area. Successful completion of this requirement should enable the student to do basic or applied research in a significant contemporary area in IT.

The 18 credits of graduate-level coursework must fulfill the following requirements:

- Coursework must be independent of the courses students take to prepare for the qualifying exams.
- Courses that cannot be included in any plan of study are any INFS 500-level courses; certain AIT courses; OR 540 Management Science; STAT 501 SAS Language and Basic Procedures, STAT 502 Introduction to SAS Statistical Graphics, STAT 503 SAS Macro Language, STAT 535 Analysis of Experimental Data; and SYST 500 Quantitative Foundations for Systems Engineering. Exceptions must be approved in advance by the senior associate dean.
- At least 12 of the 18 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, project, or thesis courses.
- A cumulative GPA of 3.50 is required in courses taken in the plan of study.

#### Concentrations

**Digital Forensics (DFOR)**

In addition to courses taken to prepare for the Qualifying Exams, select six courses from the following, no more than two courses (6 credit hours) taken at the 600 level:

<table>
<thead>
<tr>
<th>Course Code</th>

**Total Credits:** 18

1 Can only be taken once for PhD credit in the digital forensics concentration.

**Note:** Where appropriate and with doctoral advisor approval, a maximum of two emphasis courses may be substituted with relevant courses from other Volgenau School departments. The student's overall coursework must satisfy the University requirement for the PhD in Information Technology.

### Information Sciences and Technology (ISTC)

Select at least 18 credit hours from the following with no more than two courses (6 credit hours) taken at the 500 or 600 levels:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 582</td>
<td>Applications of Metadata in Complex Big Data Problems</td>
</tr>
<tr>
<td>AIT 614</td>
<td>Big Data Essentials</td>
</tr>
<tr>
<td>AIT 624</td>
<td>Knowledge Mining from Big-Data</td>
</tr>
<tr>
<td>AIT 701</td>
<td>Cyber Security: Emerging Threats and Countermeasures</td>
</tr>
<tr>
<td>AIT 711</td>
<td>Rapid Development of Scalable Applications</td>
</tr>
<tr>
<td>AIT 716</td>
<td>Human Computer Interaction</td>
</tr>
<tr>
<td>AIT 724</td>

</tr>
<tr>
<td>AIT 734</td>
<td>Advanced Web Analytics Using Semantics</td>
</tr>
<tr>
<td>Other VSE courses with the approval of an advisor or program director.</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits:** 18

### Information Security and Assurance (ISA)

Select at least 18 credit hours, of which 12 credits must be numbered 700 and above, and with at least 12 credits from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISA 656</td>
<td>Network Security</td>
</tr>
<tr>
<td>ISA 673</td>
<td>Operating Systems Security</td>
</tr>
<tr>
<td>ISA 674</td>
<td>Intrusion Detection</td>
</tr>
<tr>
<td>ISA 681</td>
<td>Secure Software Design</td>
</tr>
<tr>
<td>ISA 697</td>
<td>Topics in Information Security</td>
</tr>
<tr>
<td>ISA 763</td>
<td>Security Protocol Analysis</td>

</tr>
<tr>
<td>ISA 862</td>
<td>Models for Computer Security</td>
</tr>
<tr>
<td>ISA 863</td>
<td>Advanced Topics in Computer Security</td>
</tr>
<tr>
<td>CS 700</td>
<td>Quantitative Methods and Experimental Design in Computer Science</td>
</tr>
<tr>
<td>Any CS, INFS or SWE course numbered 700 or higher, subject to the approval of the student's academic advisor.</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits:** 18

1 Students without a credit reduction should select the remaining credits from any 600 level or higher INFS, ISA, CS or SWE courses or courses approved in advance by the student's academic advisor.
Mechanical Engineering (ME)
Courses that constitute a student’s plan of study should be chosen in consultation with the student’s advisor and/or dissertation committee.

Students must take a minimum of 18 credit hours, with at least 12 credits numbered 700 or higher:

- **600/700-level courses outside the ME department (typically physics, mathematics, etc.)** 6
- **700-level courses within the ME department in subjects within the student’s area of specialization** 6
- **700-level courses within the ME department in subjects outside the student’s area of specialization** 6

Available courses include:
- ME 621 Foundations of Fluid Mechanics
- ME 722 Introduction to Turbulence
- ME 714 Fracture Mechanics
- ME 715 Impact Dynamics

| Total Credits | 18 |

Software Engineering (SWE)
Select at least 18 credit hours with at least 12 credits at the 700 level as follows:

- SWE 763 Software Engineering Experimentation
- or CS 700 Quantitative Methods and Experimental Design in Computer Science
- SWE 721 Reusable Software Architectures
- SWE 722 Service Oriented Architecture
- SWE 727 Quality of Service for Software Architectures
- SWE 760 Software Analysis and Design of Real-Time Systems
- SWE 795 Advanced Topics in Software Engineering
- SWE 796 Directed Readings in Software Engineering
- SWE 798 Research Project
- SWE 825 Special Topics in Web-Based Software

Select 6 credits from the following:

- SWE 619 Object-Oriented Software Specification and Construction
- SWE 620 Software Requirements Analysis and Specification
- SWE 621 Software Modeling and Architectural Design
- SWE 622 Distributed Software Engineering
- SWE 631 Software Design Patterns
- SWE 632 User Interface Design and Development
- SWE 637 Software Testing
- SWE 642 Software Engineering for the World Wide Web
- SWE 645 Component-Based Software Development
- SWE 681 Secure Software Design and Programming
- CS 706 Concurrent Software Systems
- INFS 740 Database Programming for the World Wide Web
- INFS 760 Advanced Database Management

| Total Credits | 24 |

Qualifying Exams
To satisfy the breadth requirement of the PhD degree, students must pass a set of written qualifying exams designed to test fundamental knowledge. Students who have already obtained an IT-relevant Master's degree may already be prepared for the qualifying exams. These exams correspond to a set of disciplines related to the individual Master's programs in the Volgenau School. Each exam is based on an established reading list. The qualifying exams are not associated with specific courses, although some courses may help students prepare for these exams. The qualifying exams are offered twice a year just before the fall and spring semesters. Each exam is allocated two hours and graded on a pass or fail basis. Students select their exams using a request form submitted to the Graduate Student Affairs Office.

Students must attempt a set of four exams no later than the first opportunity following the completion of 18 credits, or 30 credits if the student enters the program without a Master's degree. Each student must pass all four exams in two consecutive offerings. Four exams must be attempted in the first offering. The exams attempted on the second offering need not be the same as in the first. A student who fails to pass four qualifying exams in two consecutive semesters is subject to termination from the program.

Dissertation Research

| IT 990 | Dissertation Topic Presentation |
| Select 23 additional credits from the following: |
| IT 998 | Doctoral Dissertation Proposal |
| IT 999 | Doctoral Dissertation (minimum 12 credits required) |

| Total Credits | 24 |

Doctoral Supervisory Committee
On admission to the program, students are assigned a temporary academic advisor. Students are responsible for working with the temporary advisor until they choose a dissertation director and establish a doctoral supervisory committee.

The doctoral supervisory committee includes the dissertation director, who must be a member of the Mason graduate faculty, and at least three other people from the Mason graduate faculty. The dissertation director and chair of a PhD in IT dissertation committee must have at least a 50% appointment in the Volgenau School. This rule does not apply to a co-director, provided that the chair and other co-director satisfies the "at least 50% rule." At least three committee members must be from the Volgenau School, and at least two of the departments of the Volgenau School must be represented on this committee.

In addition, industrial representatives and faculty members from departments outside the school are highly desirable, but not required, on the committee. The doctoral supervisory committee administers the comprehensive exam, dissertation proposal presentation, and the
dissertation predefense and defense. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School senior associate dean on the basis of a written request and plan that has been approved by the supervisory committee.

Comprehensive Exam

The comprehensive exam is an oral exam taken after students have satisfactorily completed all coursework requirements in their approved plan of study. To initiate the exam process, the student meets with the dissertation advisor to prepare a permission form, which has to be approved by the entire dissertation supervisory committee one month prior to the exam, to be forwarded to the senior associate dean for final approval. The permission form must be submitted with:

1. a one page description of the intended area of research; and
2. a reading list on which the student will be examined.

The reading list should include articles and/or books that cover the fundamentals, state-of-the-art, and tools needed to perform research in the intended area.

The objective of the comprehensive exam is to allow the dissertation supervisory committee to assess the student's readiness to complete doctoral research in an area of concentration. The duration of the oral exam is typically two hours. Students who fail the exam are allowed to retake it once. Failure in the second attempt results in termination from the program. Students must pass the comprehensive exam and dissertation proposal defense before being advanced to candidacy. The comprehensive exam must be attempted for the first time no later than one year after completing all coursework requirements (excluding IT 990 Dissertation Topic Presentation, IT 998 Doctoral Dissertation Proposal, and IT 999 Doctoral Dissertation).

Dissertation Proposal Presentation

Near the end of the coursework, doctoral students prepare a written dissertation proposal to present to the doctoral supervisory committee. The proposal must be delivered by hard copy to the doctoral supervisory committee at least two weeks before the presentation. Students should enroll in IT 998 Doctoral Dissertation Proposal to complete this effort (note: students must pass the qualifying exams before enrolling in IT 998 Doctoral Dissertation Proposal). During the term the student expects to present the dissertation proposal to the committee (or perhaps the prior term), the student is should enroll in IT 990 Dissertation Topic Presentation. The dissertation proposal presentation must be at least one week after passing the comprehensive exam. After successfully completing the dissertation-proposal requirement, the student is formally admitted as a candidate for the PhD degree. The application for candidacy is submitted to the senior associate dean on a standard form.

Dissertation and Final Defense

With the concurrence of the dissertation supervisory committee, students proceed with the doctoral research, during which time they must be continuously enrolled in IT 999 Doctoral Dissertation. When the central portions of the research have been completed to the point that students are able to describe the original contributions of the dissertation effort, they submit the written dissertation to the committee and schedule an oral predefense to the committee. The predefense is to be held no sooner than one month after members of the committee have copies of the dissertation. Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense so that the announcement is posted for at least two weeks. The entire dissertation committee and the senior associate dean must be present at the defense, unless an exception is approved by the senior associate dean in advance of the defense.

Following satisfactory evaluation of the oral defense of the dissertation by the committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in IT. If the candidate successfully defends the dissertation, the dissertation committee recommends that the final form of the dissertation be completed and the Volgenau School faculty and the graduate faculty of Mason accept the candidate for the PhD degree.

If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. An additional predefense is not required, but students are strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be terminated from the program.

Management of Secure Information Systems, MS (VSE)

Banner Code: BU-MS-MSIS

Phone: 703-993-1880
Email: cyber@gmu.edu

The Executive Management of Secure Information Systems MS, a multidisciplinary program offered by the Volgenau School of Engineering, the School of Business, and the Schar School of Policy and Government prepares professionals for the challenges of modern computerized information systems that have become increasingly complex and vulnerable to cyber-attacks, resulting in a significant number of government regulations. Consequently, those responsible for the safe, secure, and efficient operation of such systems need to grasp their technical aspects and be familiar with both the principles of management and the public policy impact of regulatory and organizational decisions.

The program is run as a cohort with no electives. The entire program has a duration of 16 months including about seven days of study abroad, which is included in the tuition.

**Department of Bioengineering**

Phone: 703-993-5846  
Email: bioeng@gmu.edu  
Website: bioengineering.gmu.edu

Bioengineering involves the application of tools and concepts in engineering and computation to problems in biology or medicine. The impact of engineering and computer science on biomedicine is wide ranging, from advanced biomedical imaging technologies to novel computational models of protein dynamics. With an aging population, the growing costs of health care, and the impact of novel technology to fundamental understanding in biosciences, the demand for bioengineers is growing. This program provides students with a solid foundation in engineering while offering in-depth exposure to the life sciences. Bioengineering faculty members collaborate with colleagues at George Mason University and nearby institutions including Inova Health Center, and federal laboratories such as the Naval Research Laboratory, the National Institutes of Health Clinical Center, and the National Institute of Standards and Technology. Research areas include:

- biomechanics
- biomedical imaging
- neuroengineering
- computational neuroscience
- nanoscale technology

The BS in Bioengineering is a challenging multidisciplinary training program with the goal of enabling graduates to be competitive for an entry-level position in the biomedical industry or to continue their education in graduate school or medical school. The curriculum provides a strong background in the biological and engineering fundamentals of bioengineering as well as upper level courses in areas of biomedical measurements, biomedical systems modeling, and bioinformatics. The department offers three concentrations: Biomedical Signals and Systems, Bioengineering Healthcare Informatics, and Bioengineering Prehealth. In addition the Bioengineering, BS program offers an Honors Program to outstanding students. Entry is by invitation and based on academic performance achieved at Mason.

The Bioengineering, MS (pending SCHEV Approval) prepares students for research and professional practice in bioengineering and related fields. This program comprises four core areas: biomechanics, biomaterials, biomedical imaging, and neuroengineering while offering three different options. Students can choose to focus their graduate work toward a career in academia (thesis option), or in industry (practicum or coursework option).

The Bioengineering, PhD is a research-intensive, multifaceted program which is comprised of four different concentrations. Students can choose to focus their graduate work in nanoscale bioengineering, neuroengineering, biomedical imaging or data-driven biomechanical modeling.

Banner Code: VS-BS-BIOE  
Academic Advising  
Phone: 703-993-4190  
Email: cborke@gmu.edu  
Website: http://bioengineering.gmu.edu/bs-in-bioengineering/
Bioengineering, also referred to as biomedical engineering, is the application of engineering tools and approaches to solve problems in biology and medicine. It is a broad and growing field that draws upon rapid advances in technology and computation, as well as on unprecedented growth in basic biological understanding.

This program concentrates on making measurements and analyzing complex data. It is challenging since it will provide a solid foundation in engineering, and also give in-depth exposure to the life sciences. The impact of engineering and computer science on biomedicine is wide, ranging from improved medical diagnosis through advanced imaging technologies, to enhanced understanding in rehabilitation gained by computational models of limb movement. With the growing demand for better health care, the need for bioengineers is expected to be high.

The multidisciplinary training in this field will make graduates competitive for a position in government or the biomedical industry. It also enables students to continue their education in graduate school or medical school.

The bachelor's program in Bioengineering is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

**Concentrations**

The concentrations in the BS Bioengineering program are:

- Biomedical Signals and Systems (BMSS)
- Bioengineering Healthcare Informatics (BHI)
- Bioengineering Prehealth (BMPH)

The BMSS concentration emphasizes the systems and methods for acquisition and analysis of biomedical signals whereas the BHI concentration focuses on the management, analysis and visualization of data related to biomedical and healthcare applications. The BMPH concentration prepares students for continued studies as a health care professional in medicine, dentistry, or veterinary medicine.

**Educational Objectives**

The educational objectives of the Bioengineering undergraduate program are the following:

- Alumni electing to work after graduation (for example, in industry or government) will contribute to the development or application of new products or processes that are of benefit to society.
- Alumni electing to continue their formal education will have completed their studies, or will have made demonstrable progress toward an advanced degree in their chosen profession.
- Alumni will communicate and perform effectively as members or leaders of multi-disciplinary teams.
- Alumni will continue to enhance their skills and knowledge in a quest for further professional development.

**Advising**

All Bioengineering students are required to meet with their departmental academic advisor prior to course registration each semester. Students who are considering bioengineering as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising in 2500 Nguyen Engineering Building.

**Change of Major**

See Change of Major (p. 955) for more information.

**Termination from the Major**

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

**Writing-Intensive Requirement**

Mason’s writing-intensive requirement is satisfied by BENG 304 Modeling and Control of Physiological Systems and BENG 495 Bioengineering Senior Seminar II in which faculty provide feedback on student writing assignments.

**Requirements**

**Degree Requirements**

Total credits: 120-135

Students must complete each BENG, BIOL, ECE and ENGR course presented as part of the required credits for the degree with a grade of C or better.

Total Credits  86-88

1 Students may substitute CHEM 212 and CHEM 214 for PHYS 262 and PHYS 263.

Students may choose to substitute one of the technical electives with one of the following:

BIOL 305  Biology of Microorganisms  4
& BIOL 306  and Biology of Microorganisms Laboratory
CHEM 313  Organic Chemistry I  5
& CHEM 315  and Organic Chemistry Lab I
CS 310  Data Structures  3
CS 444  Introduction to Computational Biology  3
CS 445  Computational Methods for Genomics  3
NEUR 327  Cellular, Neurophysiological, and Pharmacological Neuroscience  3
PSYC 372  Physiological Psychology  3

Additional Mason Core
Students must complete all Mason Core (p. 135) requirements not fulfilled by major requirements. BENG 492 Senior Advanced Design Project I (Mason Core) (p. 135) and BENG 493 RS: Senior Advanced Design Project II (Mason Core) (p. 135) are approved to meet the Synthesis/Capstone requirement.

Written Communication (p. 135)  6
Literature (p. 140)  3
Arts (p. 137)  3
Western Civilization/World History (p. 143)  3
Global Understanding (p. 139)  3

Total Credits  18

Honors

Honors in the Major
The Department of Bioengineering offers an Honors Program that creates a community of outstanding scholars in bioengineering who share a commitment to learning, service, and leadership. The Program is based on the bioengineering curriculum, and is distinct from the University Honors Curriculum.

Eligibility
Entry to the Honors Program is by invitation, extended to students with a declared major in Bioengineering who have completed a minimum of 30 credit hours at Mason with a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each prior semester.

Honors Requirements
The Honors Program is challenging and designed for the highly motivated student with interests in any of the bioengineering concentrations. Honors students must satisfy requirements in addition to those of the normal BS degree in bioengineering, including:

- Successful completion of BENG 395 RS: Mentored Research in Bioengineering
- Six credits must be earned by taking a combination of BENG 5XX/6XX level courses. With permission of the Department of Bioengineering, 5XX/6XX level courses from other Volgenau School of Engineering programs may be considered.

Once admitted to the Honors Program, students must remain in good standing and maintain a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each semester for all courses counting toward the BS degree in bioengineering, maintain continuous enrollment working towards the degree, and abide by the Mason Honor Code.

Accelerated Master's

BS (selected)/Statistical Science, Accelerated MS
Overview
Highly-qualified students in selected BS programs (see below) have the option of obtaining an accelerated Statistical Science, MS (p. 1064). Students in an accelerated degree program must fulfill all university requirements for the master’s degree.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).
Admission Requirements

Students enrolled in a BS degree in any one of the Volgenau School (p. 953) major areas, in the Mathematics, BS (p. 716) program from the College of Science (p. 593), or in the Economics, BS (p. 342) program from the College of Humanities and Social Sciences (p. 295) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.00. Criteria for admission are identical to criteria for admission to the Statistical Science, MS (p. 1064) program, which include successful completion of the following Mason courses each with a grade of C or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 113</td>
<td>Analytic Geometry and Calculus I (Mason Core)</td>
<td>4</td>
</tr>
<tr>
<td>MATH 114</td>
<td>Analytic Geometry and Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 351</td>
<td>Probability</td>
<td></td>
</tr>
</tbody>
</table>

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with grades of B or better in two 500-level STAT courses selected from STAT 544 Applied Probability, STAT 554 Applied Statistics I, and STAT 574 Survey Sampling I.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

BS (selected)/Data Analytics Engineering, Accelerated MS

Overview

Qualified undergraduate students have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 959) with a concentration in predictive analytics.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements

While no specific undergraduate degree is required, Mason undergraduate students majoring in systems engineering or any other engineering, business, computer science, statistics, mathematics, or information technology may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

For the predictive analytics concentration, students must submit evidence of:

- Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.
- Familiarity with analytical modeling software, such as spreadsheets or math packages.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 473</td>
<td>SYST 573</td>
</tr>
<tr>
<td>OR 441</td>
<td>OR 541</td>
</tr>
</tbody>
</table>

For the predictive analytics concentration, any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

OR 541 Operations Research: Deterministic Models will substitute for the OR 531 Analytics and Decision Analysis core requirement in the MS DAE program.

Bioengineering, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Bioengineering, BS (p. 970) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 959) with a concentration in Bioengineering.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements

Students in the Bioengineering, BS (p. 970) program may apply to this option if they have earned 95 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 222 Computer Programming for Engineers and BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Bioengineering concentration of the Data Analytics Engineering, M (p. 959)S program.
Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of 500-level basic courses in place of the corresponding BENG 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 501</td>
<td>Bioengineering Research Methods</td>
<td>3</td>
</tr>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining (in place of BENG 420)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 6

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Bioengineering, MS (pending SCHEV approval)

Banner Code: VS-MS-BIOE

Academic Advising

Phone: 703-993-2218
Email: lbray2@gmu.edu
Website: bioengineering.gmu.edu/bioengineering-masters-program/

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted. Check the college/school website for current program status.

The Bioengineering graduate program prepares students for research and professional practice in bioengineering and related fields. The program includes both fundamentals and advanced work to apply engineering techniques to solve problems in biology and medicine. A major distinguishing feature of the curriculum is that it is designed to educate leaders who understand and appreciate how biomedical technology is translated from bench to bedside. Regardless whether they will eventually serve at universities, industry or government, they will understand that new types of devices and processes resulting from their graduate experience need to be improved and made cost-effective to reach the public. As demanded by their leadership positions, they will recognize that entrepreneurial considerations that are essential for determining whether a planned diagnostic or therapeutic approach is practical from an investment perspective and is likely to produce societal benefit.

Admissions & Policies

Admissions

Applicants must have completed a baccalaureate degree in engineering or the sciences from an accredited program and an earned GPA of 3.0 or better in their 60 highest-level credits.

In addition to fulfilling Mason’s admission requirements for graduate study, applicants seeking to be admitted must:

- Demonstrate interest in combining engineering or natural sciences with basic or applied biology as demonstrated by the BS degree, course selection, or project work.
- Provide two letters of recommendation, from references who are familiar with the applicant’s professional accomplishments.
- Provide a resume and detailed statement of career goals and professional aspirations.
- If their native language is not English, students must earn a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam.
- Official GRE scores.

Requirements

Degree Requirements

Total credits: 30-33

Students complete the Core Bioengineering requirements, the Additional Training Requirement, and Requirements within one selected option.

Total Credits 6

Students cannot begin thesis research until the completion of their second semester of coursework. Once enrolled students must maintain continuous registration in thesis research until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of thesis research during that summer term.

Committee Selection

Each student must form a master’s committee comprising three individuals. A minimum of two members of the committee must be tenured or tenure-track faculty in the Department of Bioengineering (p. 970). The other member must be from outside the department.

Thesis Research Proposal

Each student must prepare a written thesis proposal, and it must be presented before the completion of the first semester. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. If the student fails to defend the proposal, the student may present a proposal a second time, no later than 60 days from the first attempt. Failure in the second attempt results in dismissal from the program.

Thesis Preparation and Defense

While preparing the thesis, the candidate enrolls in thesis research. The candidate can proceed to a public defense of the thesis once it has been approved by the committee.

The defense must be announced at least two weeks in advance. The thesis draft must be submitted to the library and made publicly available at least two weeks in advance of the defense. The entire committee must be present at the defense. If the candidate fails to defend the thesis, the candidate may request a second defense, following the same procedures as for the initial defense. A candidate who fails a second attempt to defend the thesis is terminated from the program.

Total Credits 9

1 Students are expected to complete 6 credits of BENG 798 Independent Reading and Research in Bioengineering towards their degree. Students cannot enroll in BENG 798 Independent Reading and Research in Bioengineering until the completion of their second semester of coursework. These credits must be taken along with an internship/co-op opportunity. Therefore, a letter from the specific employer must be provided on behalf of the student.

Note: Students who elect to the coursework option will complete a minimum of 33 credit hours.

Additional Training Requirement
Bioengineering Seminar
All MS students are required to attend a minimum of two departmental seminars per semester. Students will sign an attendance sheet available at the end of each seminar.

Bioengineering, PhD
Banner Code: VS-PHD-BIOE

Academic Advising
Phone: 703-993-5846
Email: amoon4@gmu.edu
Website: http://bioengineering.gmu.edu/bioengineering-phd-program/

Rapid advances in understanding the fundamental processes of disease have opened up new opportunities to advance human health through research that integrates biology, engineering, physics, and computer science. The doctoral program will prepare leaders in bioengineering in this broader, integrative sense of the discipline. A major distinguishing feature of the curriculum is its emphasis on understanding how biomedical technology is translated from bench to bedside. Graduates from this program will eventually serve at universities, industry or government in a variety of roles, including scientific research, technology development, and regulatory affairs.

Available Concentrations
Four concentration areas are offered, aligned with current faculty research expertise:

- Biomedical Imaging
- Data-driven Biomechanical Modeling
- Nano-scale Bioengineering
- NeuroEngineering

Admissions & Policies

Admissions

Application Requirements
In addition to fulfilling Mason’s admission requirements for graduate study, applicants should:

- Have a baccalaureate degree in engineering or the sciences from an accredited program with a reputation for high academic standards and an earned GPA of 3.3 or better in their highest-level engineering-related credits.
- Provide official GRE Scores: Quantitative (>70% percentile), Verbal (>50% percentile), and Analytical (>50% percentile).
- Provide three letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s professional accomplishments.
- Provide a resume and detailed statement of career goals and professional aspirations.
- Demonstrate interest in combining engineering and the natural sciences with discovery and application in the life science; i.e., via a degree which reflects the desired combination (such as bioengineering, biophysics); a degree in engineering or the natural sciences which includes course work in life sciences; a degree
in biology which includes course work in mathematics, physics, or engineering; a project or research experience with combined complementary expertise.

- For international students only: Official TOEFL scores with a minimum requirement of 570 (paper-based), 230 (computer-based), or 88 points total AND no less than 20 points in each subsection (internet-based).

**Policies**

**Reduction of Credit**

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a related master's degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine how many credits are eligible for the reduction of credit.

For students to remain eligible for the PhD program, they must maintain a “B” average. Grades of “C” or lower in courses cannot be counted towards degree completion.

**Program Requirements**

The bioengineering PhD program requires successful completion of coursework detailed in a plan of study, qualifying examination, dissertation proposal, and final dissertation defense. Additional training requirements include seminar attendance, ethics training, and mentoring and teaching experience. All the general requirements for doctoral degrees at Mason apply to this program as well.

**Requirements**

**Degree Requirements**

Total credits: 72-73

**Core Science**

**Biology Core**

Select one from the following:

<table>

1 Students who elect to take BMED 601 Cell and Molecular Physiology in the Biology Core will complete a minimum of 73 credit hours.
ECE 754  Optimum Array Processing I
OR 842  Models of Probabilistic Reasoning
PHYS 612  Physics of Modern Imaging
PSYC 757  Advanced Topics in Statistical Analysis
PSYC 768  Advanced Topics in Cognitive Science
STAT 760  Advanced Biostatistical Methods
SYST 842  Models of Probabilistic Reasoning

Or equivalent courses approved by the student's advisor and director of the program

Total Credits 18

1 At least two of the three classes must be at the 700-800 level.

Concentration in Data-Driven Biomechanical Modeling (DDBM)

Required Courses
BENG 538  Medical Imaging 3
BENG 550  Advanced Biomechanics 3
BENG 750  Modeling and Simulation of Human Movement 3

Electives
Select three more upper-level courses under the guidance and approval of the student’s advisor. 1
BENG 636  Advanced Biomedical Signal Processing
BENG 725  Computational Motor Control
BENG 738  Advanced Medical Image Processing
BENG 850  Seminar in Biomechanics
CS 795  Advanced Topics in CS
CSI 742  The Mathematics of the Finite Element Method
RHBS 711  Applied Physiology II
RHBS 746  Movement Control and Learning
STAT 662  Multivariate Statistical Methods
SYST 664  Bayesian Inference and Decision Theory

Or equivalent courses approved by the student's advisor and director of the program

Total Credits 18

1 At least two of the three classes must be at the 700-800 level.

Concentration in Nano-Scale Bioengineering (NBNR)

Required Courses
BENG 541  Biomaterials 3
BENG 641  Advanced Nanotechnology in Health 3
BENG 745  Biomedical Systems and Microdevices 3

Electives
Select three more upper-level courses under the guidance and approval of the student’s advisor. 1
BENG 840  Seminar in Nano-scale Bioengineering
BINF 740  Introduction to Biophysics
BIOL 669  Pathogenic Microbiology
CHEM 641  Solid State Chemistry
CHEM 660  Protein Biochemistry
CHEM 728  Introduction to Solid Surfaces
CHEM 814  Advanced Bioorganic Chemistry
CHEM 833  Physical Chemistry and Biochemistry

Or equivalent courses approved by the student's advisor and director of the program

Total Credits 18

1 At least two of the three classes must be at the 700-800 level.

Qualifying Examination
All students entering the Bioengineering PhD program are expected to pass a qualifying exam any time within the first year. The goal of the qualifying exam is to test the student’s preparation to undertake doctoral level research.

A committee consisting of the student’s advisor and at least two other members of the bioengineering graduate faculty will administer the exam. At least one of the faculty in the Qualifying Exam Committee must be from the bioengineering core faculty. The exam will test the student’s research competency as well as knowledge of core bioengineering concepts and competency in mathematics and computational methods. The exam will consist of a written research report submitted by the student, a research presentation by the student based on the report, and an oral exam by the committee.

Upon starting the PhD program, the student in consultation with their advisor will define a plan of study and a research topic for the qualifying exam. The topic could be a short original research project, or a review of relevant research in the student’s area. The qualifying exam committee will provide the student a list of readings that the student is expected to
master. The student will be expected to submit a research report to the committee and give a research presentation. The report and presentation should demonstrate the student's ability to articulate a research question or a testable hypothesis, an understanding of the significance of the work informed by a critical review of the relevant literature, an understanding of the relevant research methods, and the ability to analyze and interpret relevant data. Following the research presentation, the committee will administer a closed-door oral exam that will probe in depth of the student's understanding of the relevant concepts.

The Bioengineering PhD Committee will review the plan of study, the recommendation of the qualifying exam committee and the students' academic record. Based on this information, the PhD Committee will determine whether or not the student is qualified for the PhD program. If the student does not qualify on their first try, they will be allowed to repeat the exam in the following semester, but the same committee will administer the exam. A student who fails to qualify on their second try will be removed from the program.

**Dissertation Proposal**

Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in BENG 998 Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Students may present their dissertation proposal only after passing the qualifying exam, and the presentation may not be on the same day as the qualifying exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in dismissal from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

**Advancement to Candidacy**

Each student must present and defend a written dissertation proposal to advance to candidacy. The student is eligible to advance to candidacy after passing the qualifying exam, and satisfactorily completing the required courses in an approved plan of study filed by the student, and completing a minimum of 6 credits of BENG 998 Doctoral Dissertation Proposal. All students must advance to candidacy within four years after initial enrollment in the program, unless special waiver is granted by the PhD committee for extenuating circumstances. If the student has not demonstrated satisfactory progress to the PhD committee by the end of the 4th year, they can be terminated from the program.

The proposal should at a minimum clearly articulate the research question and the specific aims of the research, provide a critical review of the literature and present the rationale and the significance of the research in addressing a gap in scientific knowledge, describe the research methods and study design in sufficient detail and present preliminary results demonstrating the feasibility of the research.

The proposal must be made available to the committee at least two weeks in advance of the presentation. The committee determines whether the proposal has merit and can lead to significant original contributions to the area.

Following the research presentation, the dissertation committee will ask the students a number of questions in a closed session to evaluate the students understanding of the relevant literature and methods that are broadly related to the chosen area of research, and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. If the dissertation committee feels that the student is not adequately prepared, they may recommend remedial measures, including additional coursework to address any gaps in knowledge, or modification of the aims of the proposal. The student can appear for advancement to candidacy a second time anytime within one year. Failure in the second attempt results in dismissal from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

**Dissertation Research**

Students are expected to complete 24 credits of BENG 998 Doctoral Dissertation Proposal and BENG 999 Doctoral Dissertation towards their degree. Students cannot enroll in BENG 998 Doctoral Dissertation Proposal before they have passed the qualifying exam. Students cannot enroll in BENG 999 Doctoral Dissertation before they have advanced to candidacy. Students who advanced to candidacy after the add period for a given semester must wait until the following semester to register for BENG 999 Doctoral Dissertation. Students cannot advance to candidacy and defend their dissertation during the same semester. In special cases, waivers may be granted by the PhD committee. Once enrolled in BENG 999 Doctoral Dissertation, students must maintain continuous registration in BENG 999 Doctoral Dissertation each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of BENG 999 Doctoral Dissertation during that summer term.

<table>
<thead>
<tr>
<th>Select 24 credits from the following:</th>
<th>24</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 998 Doctoral Dissertation Proposal (9 credit minimum, 12 credit maximum)</td>
<td></td>
</tr>
<tr>
<td>BENG 999 Doctoral Dissertation (12 credit minimum)</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits**

24

**Dissertation Committee Selection**

Each student must form a dissertation committee, comprising four or five individuals, including the members selected for the qualifying exam. A minimum of two members of the committee must be tenured or tenure-track faculty in the Department of Bioengineering. One member must be from outside the department. The chair of the dissertation committee must be tenured or tenure-track faculty in the Department of Bioengineering. The dissertation director can be a member of the Bioengineering graduate faculty with primary appointment outside of the Department of Bioengineering. The committee and the chair must be approved by the chair of the Department of Bioengineering.

**Dissertation Preparation and Defense**

While preparing the dissertation, the candidate enrolls in BENG 999 Doctoral Dissertation. The candidate can proceed to a public defense of the dissertation once their dissertation has been approved by the dissertation committee.

The dissertation must make significant contributions to its area as evidenced by refereed journal and/or conference publications. All students are expected to defend their dissertation within three years after defending their proposal, unless special waiver is granted by the PhD committee for extenuating circumstances.

The defense must be announced at least two weeks in advance. The dissertation draft must be submitted to the library and made publicly
available at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Bioengineering Program in advance of the defense. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. A candidate who fails a second attempt to defend the dissertation is terminated from the program.

**Additional Training Requirements**

**Bioengineering Seminar**
All PhD students are required to attend a minimum of 3 departmental seminars per semester. Students will sign an attendance sheet available at the end of each seminar.

**Ethics Training**
Prior to beginning research studies in a Bioengineering laboratory, all PhD students must complete the on-line Collaborative Institutional Training Initiative (CITI) Responsible Conduct of Research course. CITI training modules provide students with an understanding of conflicts of interest, research misconduct, peer review, and authorship.

**Bioengineering Mentorship**
All PhD students are required to participate in mentoring at least one undergraduate Bioengineering senior design team for a duration of 1 year. PhD students work with the faculty advisor for the senior design team and are expected to apply translational and entrepreneurial concepts towards the mentorship of the team.

**Teaching Requirement**
All PhD students are required to participate in teaching activities in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student’s advisor.

**Department of Computer Science**

PhD program: csphd@gmu.edu  
MS programs: csgrad@gmu.edu  
Undergraduate programs: csug@gmu.edu  
General information: csinfo@gmu.edu  

Phone: 703-993-1530  
Fax: 703-993-1710  
Website: cs.gmu.edu

Computer science is a discipline concerned with the analysis, design, implementation, maintenance, and evolution of computer-based systems used in almost all walks of life. Computer science is at the center of the information revolution in the 21st century. Advanced computation tools and techniques are revolutionizing and transforming the way we work, play, communicate, collaborate, and conduct business. In addition, computational approaches are integral to several scientific and engineering fields such as computational sciences, bioinformatics, and health informatics, to name a few.

Computer scientists must be well-grounded not only in the theory of computing, but also in its application to diverse areas. Computer scientists must be capable of working closely with members of other professions associated with computing. Students who pursue this discipline will learn about programming languages, data structures, algorithms, operating systems, artificial intelligence, robotics, data mining, computer networking, cyber-security, databases and software engineering.

**Faculty**

**Applied Computer Science, BS**

Banner Code: VS-BS-ACS

**Academic Advising**
This program presents an innovative approach to the integration of computer science with other disciplines that require expertise in computing techniques. These disciplines do not merely use computing but create new and interesting problems for computer scientists.

### Admissions & Policies

#### Policies

**Advanced Placement, Credit by Exam**
A score of 4 on the Advanced Placement (AP) computer science exam qualifies students for credit in CS 112 Introduction to Computer Programming (Mason Core) (p. 135). A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credits in CS 112 Introduction to Computer Programming (Mason Core) (p. 135), and a score of 5 or more qualifies students for credit in CS 211 Object-Oriented Programming.

#### Change of Major
Students requesting a change of major to Applied Computer Science must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. Students requesting a change of major to Applied Computer Science must have a GPA of at least 2.75 in computer science and math courses and successfully completed one of CS 112 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=302778) or CS 211 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=302780), and one of MATH 113 (http://catalog.gmu.edu/preview_program.php?catoid=29&poid=28176) or MATH 114 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305053), or MATH 125 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305056), with a grade of B or better at Mason. See Change of Major (p. 955) for more information.

#### Grades
Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Applied Computer Science majors may not use more than one course with a grade of C- or D toward department requirements.

#### Program Requirements
For the BS ACS degree, students must complete 120 credits, including the Mason Core (p. 135) requirements. The program requires foundation, core, and concentration courses. These course requirements provide expertise in programming, computer systems, software requirements and modeling, formal methods, and analysis of algorithms.

#### Repeating Courses
Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250 Introductory Statistics I (Mason Core) (p. 135), which follows the normal university policy for repeating undergraduate courses.

The CS Department may not allow students to retake certain high-demand CS courses in which they have already earned a grade of C or better simply to improve their GPA.

#### Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

#### Writing-Intensive Requirement
Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 Synthesis of Ethics and Law for the Computing Professional (Mason Core) (p. 135) and CS 321 Software Engineering. Faculty members provide feedback on students’ expository writing.

### Requirements

#### Degree Requirements
Total credits: 120

Students must complete all foundation, core, elective, and communication requirements, and the requirements from one selected concentration.

Written Communication (p. 135)  

- Literature (p. 140)  
- Arts (p. 137)  
- Western Civilization/World History (p. 143)  
- Social and Behavioral Sciences (p. 142)  
- Global Understanding (p. 139)  
- Natural Science (p. 141)

Total Credits 28

1 Applied Computer Science majors must take the Natural Sciences section of ENGH 302 Advanced Composition (Mason Core) (p. 135).

Honors Requirements

CS Honors Program students must fulfill all standard courses required by the Bachelor of Science in Computer Science or Applied Computer Science degree as well as the following additional requirements:

- GPA Requirement: Students must maintain an overall GPA of at least 3.50 and a GPA of at least 3.50 for courses which count towards the BS/CS or BS/ACS major including math, natural sciences, and all CS/SWE courses.
- Research Project Requirement: Students must complete a significant research project prior to graduation. Students should seek out a CS faculty member willing to serve as their research advisor for the project. The project should comprise original work by the student and be demonstrated via two channels:
  - a written project report that is approved by the student’s research advisor and submitted to the department;
  - a presentation of the project to an audience of students and/or faculty.
- Advanced Course Requirement: At least two Advanced Courses must be completed. A complete list of acceptable advanced courses is maintained by the CS department and is available on the department web site.

Accelerated Master’s

Applied Computer Science, BS/Computer Science, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS (p. 983) have the option of obtaining an accelerated Computer Science, MS (p. 996).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements

Students in the Applied Computer Science, BS (p. 983) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits 10

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for CS 583...
Analysis of Algorithms and one of the following courses in place of the corresponding 400-level course:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td>3</td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td>3</td>
</tr>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Applied Computer Science, BS (p. 983) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 959).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission Requirements**

Students in the Applied Computer Science, BS (p. 983) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
</tbody>
</table>

**Accelerated Option Requirements**

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students must register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students in all concentrations of the Applied Computer Science, BS program must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits**

3

Students in the Software Engineering and Bioinformatics concentrations of the Applied Computer Science, BS (p. 983) program must also register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits**

3

Students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS (p. 983) program must also register for one of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
</tbody>
</table>

**Note:**

For students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS (p. 983) program, one of the 500 level courses will count as an elective towards their undergraduate degree.

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Applied Computer Science, BS/Information Security and Assurance, Accelerated MS**

**Overview**

Highly-qualified students in the Applied Computer Science, BS (p. 983) program have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1002) program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission Requirements**

Students in the Applied Computer Science, BS (p. 983) program can apply for this option if they have earned 90 undergraduate credits
with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>

</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Total Credits</strong></td>
<td><strong>6</strong></td>
</tr>
</tbody>
</table>

Note:

Students complete all MS in Information Security and Assurance (p. 1002) core courses and apply the two courses from the above list toward the degree requirements.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Applied Computer Science, BS/Information Systems, Accelerated MS**

Highly-qualified students in the Applied Computer Science, BS (p. 983) program have the option of obtaining an accelerated Information Systems, MS (p. 1006). See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission Requirements**

Students in the Applied Computer Science, BS (p. 983) program can apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>

In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Computer Science Minor**

**Banner Code:** CS

**Academic Advising**

Phone: 703-993-1530

Email: csinfo@gmu.edu
Website: http://cs.gmu.edu/prospective-students/undergraduate-programs/minors-and-undergraduate-certificate/

**Admissions & Policies**

**Admissions**

**Declaring a CS Minor**

Students requesting a Computer Science Minor must have completed CS 112 Introduction to Computer Programming (Mason Core) (p. 135) or CS 211 Object-Oriented Programming with a grade of B or better.

**Policies**

**Grades**

No more than 3 credits of D grades may be used to satisfy requirements for the Computer Science Minor.

**Program Requirements**

The minor in computer science requires completion of at least 19 credits. Students should pay careful attention to prerequisites when selecting courses.

For policies governing all minors, see AP.5.3.4 Minors (p. 86).

**Requirements**

**Minor Requirements**

Total credits: 19-20

**Required Courses**

- CS 112 Introduction to Computer Programming (Mason Core) (p. 135) 4
- CS 211 Object-Oriented Programming 3
- CS 310 Data Structures 3

**Total Credits** 10

**Additional Computer Science Courses**

Select three from the following: 9-10

- CS 222 Computer Programming for Engineers
- CS 262 Introduction to Low-Level Programming
- CS 306 Synthesis of Ethics and Law for the Computing Professional (Mason Core) (p. 135)
- CS 321 Software Engineering
- CS 325 Introduction to Game Design
- CS 330 Formal Methods and Models
- CS 332 Object-Oriented Software Design and Implementation
- CS 367 Computer Systems and Programming
- CS 450 Database Concepts
- CS 451 Computer Graphics
- CS 455 Computer Communications and Networking
- CS 463 Comparative Programming Languages
Computer Science Undergraduate Certificate

Academic Advising

Phone: 703-993-1530
Email: csinfo@gmu.edu
Website: http://cs.gmu.edu/prospective-students/undergraduate-programs/undergraduate-certificate/

This certificate targets students who are working on or possess an undergraduate degree in a technical (science or engineering) field but lack a formal credential in the computer science field. The certificate also targets students who have shown an aptitude for graduate study but do not have the academic prerequisites required for admittance into a graduate MS computer science program.

The undergraduate certificate in computer science may be pursued on a full-time basis except when limited by prerequisite constraints.

Admissions & Policies

Admissions

Students must have programming experience at the level of CS 112 Introduction to Computer Programming (Mason Core) (p. 135) and CS 211 Object-Oriented Programming, and either a BS in a technical field with a 3.00 GPA or higher or current enrollment in a technical undergraduate major.

Email: csug@gmu.edu
Website: http://cs.gmu.edu/prospective-students/undergraduate-programs/bs-in-computer-science/

The objectives of the BS in Computer Science Program relate to the abilities of the graduates several years after graduation. The objectives include:

- Foundation for successful careers in industry: Graduates of the program will have a broad understanding of the fundamental concepts, methodologies, tools, and applications of computer science. They will have the educational foundation that leads to successful careers in the computing industry.
- Foundation for graduate study: Graduates of the program will have the academic preparation for successful completion of rigorous graduate programs.
- Professional preparation: Graduates will have effective written and oral communication skills, and be able to work collaboratively in a professional and ethical manner.

This bachelor's degree program is accredited by the Computing Accreditation Commission of ABET (http://www.abet.org).

Admissions & Policies

Policies

Advanced Placement, Credit by Exam

A score of 4 on the Advanced Placement (AP) computer science exam qualifies the student for credit in CS 112 Introduction to Computer Programming.
Programming (Mason Core) (p. 135). A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credit in CS 112 Introduction to Computer Programming (Mason Core) (p. 135), and a score of 5 or more qualifies students for credit in CS 211 Object-Oriented Programming.

**Change of Major**

Students who are considering computer science as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. Students considering a change of major to computer science must have a GPA of at least 2.75 in all computer science and math courses, and successfully completed one of CS 112 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=302778) or CS 211 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=302780), and one of MATH 113 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305052), MATH 114 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305053) or MATH 125 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305056), with a grade of B or better. See Change of Major (p. 955) for more information.

**Computer Science, Computer Engineering Double Major**

Computer Science majors can earn a double major in Computer Science and Computer Engineering if they complete additional credits beyond the 120 credits required for the Computer Science degree. The additional credits must be part of an approved plan of study. For more information, visit the department website.

**Cooperative Education**

Students may participate in the Mason cooperative education program or a work-study program in the Washington, D.C. area.

**Grades**

Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Computer science majors may not use more than one course with grade of C- or lower toward department requirements.

**Repeating Courses**

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250 Introductory Statistics I (Mason Core) (p. 135), which follows the normal university policy for repeating undergraduate courses.

The CS Department may not allow students to retake certain high-demand CS courses in which they have already earned a grade of C or better simply to improve their GPA.

**Termination from the Major**

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

**Writing-Intensive Requirement**

Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 Synthesis of Ethics and Law for the Computing Professional (Mason Core) (p. 135) and CS 321 Software Engineering. Faculty members provide feedback on students’ expository writing.

Total Credits: 3

1 Those planning to take MATH 352 Statistics may replace STAT 344 Probability and Statistics for Engineers and Scientists I with MATH 351 Probability.
GEOL 101 & GEOL 102
Introductory Geology I (Mason Core) (p. 135)
and Introductory Geology II (Mason Core) (p. 135)

Physics
PHYS 160 & PHYS 161
University Physics I (Mason Core) (p. 135)
and University Physics I Laboratory (Mason Core) (p. 135)
PHYS 260 & PHYS 261
University Physics II (Mason Core) (p. 135)
and University Physics II Laboratory (Mason Core) (p. 135)

Communication
COMM 100
Public Speaking (Mason Core) (p. 135) ¹

Total Credits 3

¹ Computer Science students must make a technical presentation.

Additional Mason Core
Students must complete all Mason Core (p. 135) requirements not fulfilled by major requirements.

Written Communication (p. 135) ¹
Literature (p. 140)
Arts (p. 137)
Western Civilization/World History (p. 143)
Social and Behavioral Sciences (p. 142)
Global Understanding (p. 139)

Total Credits 21

¹ CS majors must take the Natural Sciences section of ENGH 302 Advanced Composition (Mason Core) (p. 135).

Electives
Students must complete 8 elective credits

Total Credits 8

Honors

Honors in the Major
The Department of Computer Science offers a CS Honors Program for students with strong computational foundations and the drive to delve deeper into computing. The program is based on the bachelor of science in computer science and applied computer science curriculum and is distinct from the University Honors College curriculum.

Entry Requirements
Students must be seeking a Bachelor of Science in Computer Science or a Bachelor of Science in Applied Computer Science and must apply for entry into the CS Honors Program after completing 12 credits of CS courses. Applicants must meet the GPA requirements outlined below to enter into the CS Honors Program.

Honors Requirements
CS Honors Program students must fulfill all standard courses required by the Bachelor of Science in Computer Science or Applied Computer Science degree as well as the following additional requirements:

• GPA Requirement: Students must maintain an overall GPA of at least 3.50 and a GPA of at least 3.50 for courses which count towards the BS/CS or BS/ACS major including math, natural sciences, and all CS/SWE courses.
• Research Project Requirement: Students must complete a significant research project prior to graduation. Students should seek out a CS faculty member willing to serve as their research advisor for the project. The project should comprise original work by the student and be demonstrated via two channels:
  a. a written project report that is approved by the student's research advisor and submitted to the department;
  b. a presentation of the project to an audience of students and/or faculty.
• Advanced Course Requirement: At least two Advanced Courses must be completed. A complete list of acceptable advanced courses is maintained by the CS department and is available on the department web site.

Accelerated Master's

Computer Science, BS/Computer Science, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS (p. 991) have the option of obtaining an accelerated Computer Science, MS (p. 996). For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Computer Science, BS (p. 991) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td>3</td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td>3</td>
</tr>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
</tbody>
</table>
Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS (p. 991) have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1002).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Computer Science, BS (p. 991) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>

<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students complete all MS in Information Security and Assurance (p. 1002) core courses and apply the two courses from the above list toward the requirements.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.
Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**Computer Science, BS/Information Systems, Accelerated MS**

Overview

Highly-qualified students in the Computer Science, BS (p. 991) have the option of obtaining an accelerated Information Systems, MS (p. 1006).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements

Students in the Computer Science, BS (p. 991) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

Note:

Students complete all MS in Software Engineering (p. 1012) core courses and apply the two courses from the above list toward the elective requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Academic Advising

Phone: 703-993-1530
Email: csgrad@gmu.edu
The Computer Science graduate program prepares students for research and professional practice in computer science and related technologies. The program includes both fundamentals and advanced work in the areas of artificial intelligence and databases, programming languages and software engineering, systems and networks, theoretical computer science, and visual computing. Graduate classes are divided into basic classes, which have no graduate course prerequisite, and advanced classes, which have a graduate class as a prerequisite. Graduate classes are generally offered in the late afternoon and evening. Financial aid in the form of graduate assistantships may be available for full-time degree-seeking students.

**Admissions & Policies**

**Admissions**
In addition to fulfilling Mason’s admission requirements for graduate study, applicants must meet the following requirements:

- Hold a baccalaureate degree that includes Data Structures and Algorithms (CS 310 Data Structures) Automata Theory and Formal Languages (CS 330 Formal Methods and Models), and Computer Architecture including Assembly Language (CS 367 Computer Systems and Programming and CS 465 Computer Systems Architecture). Students also must have completed Calculus I and II and a substantial course in discrete mathematics (such as MATH 125 Discrete Mathematics I (Mason Core) (p. 135)). Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.
- Earned a cumulative GPA of 3.00 for the last two years of undergraduate work, preferably with a major in a technical field such as computer science, mathematics, physical sciences, engineering, or information systems.
- Submit transcripts of all post secondary education, complete the self-evaluation section of the online application, (This information is used by the admissions committee to assess an applicant’s academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program), a goals statement, resume, two letters of recommendation, and an official GRE score (only required for those who have not earned a Bachelor’s degree from a US institution).
- International students must submit their English Proficiency scores.

**Requirements**

**Degree Requirements**
Total credits: 30

**Required Courses and Plan of Study**
In addition to general university requirements, completion of the MS in CS requires 30 credits of graduate courses. Courses are grouped in the following five broad areas: Artificial Intelligence and Databases, Programming Languages and Software Engineering, Systems and Networks, Theoretical Computer Science, and Visual Computing. The list of preapproved courses with their areas follows.

All the following requirements should be satisfied for the MS in CS degree:

- CS 583 Analysis of Algorithms (from the Theoretical Computer Science area) and two additional core courses from two other areas must be successfully completed with a grade of B- or better.
- At least four courses (12 credits) must be chosen from the advanced courses in the list of preapproved courses from at least three different areas.
- At least six courses, including two advanced courses, must be designated CS.
- At least eight courses must be taken from the list of preapproved courses. Up to two computer science-related courses that are not on the list of preapproved courses may be taken with the approval of the Computer Science Department.

**Plan of Study**
Before the end of the second semester, students must have a plan of study approved by their academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final signed version of the plan must be included when the student submits a graduation application.

**Core Courses by Area**

**Artificial Intelligence and Databases**
- CS 550 Database Systems
- CS 580 Introduction to Artificial Intelligence
- CS 584 Theory and Applications of Data Mining

**Programming Languages and Software Engineering**
- CS 540 Language Processors
- SWE 619 Object-Oriented Software Specification and Construction
- SWE 621 Software Modeling and Architectural Design

**Systems and Networks**
- CS 555 Computer Communications and Networking
- CS 571 Operating Systems
- ISA 562 Information Security Theory and Practice

**Theoretical Computer Science**
- CS 583 Analysis of Algorithms

**Visual Computing**
- CS 551 Computer Graphics

**Preapproved Basic and Advanced MS CS Courses by Area**

Accelerated Master’s

Applied Computer Science, BS/Computer Science, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS (p. 983) have the option of obtaining an accelerated Computer Science, MS (p. 996).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Applied Computer Science, BS (p. 983) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits 10

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for CS 583 Analysis of Algorithms and one of the following courses in place of the corresponding 400-level course:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td>3</td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td>3</td>
</tr>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Science, BS/Computer Science, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS (p. 991) have the option of obtaining an accelerated Computer Science, MS (p. 996).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Computer Science, BS (p. 991) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>

<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td>3</td>
</tr>
</tbody>
</table>
Additional credits in consultation with their advisor. The reduction of credit and waiver of course requirements requires the approval of the program director and the dean of the school.

**Policies**

**Reduction of Credit**

Students with a previous MS in CS or a related field may receive a reduction of credit of at most 30 credit hours. In addition, the courses taken as part of the previous MS degree can be used to satisfy the course requirements of the PhD degree. Reduction of credit and waiver of course requirements requires the approval of the program director and the dean of the school. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

**Admissions & Policies**

**Admissions**

All applicants must have an undergraduate degree, and their prior academic work must show a strong academic background in computer science. In addition, the GRE General Test is required from every applicant. Finally, each applicant must provide a resume, brief statement of career goals and personal aspirations, as well as three letters of reference. Each application receives careful consideration from the PhD Admission Committee.

**Program Requirements**

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research.

**Degree Requirements**

**Total credits: 72**

**Doctoral Coursework**

<td>Doctoral Dissertation (minimum of 12 credits of CS 999 required)</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits** 72

1. Must be completed with a B+ or better.
2. Must be selected in consultation with the student’s advisor from a list maintained by the CS department. The 12 credit hours may include at most 3 credits of CS 896 Directed Reading and Research. Students may register in CS 896 Directed Reading and Research only after passing the PhD qualifying exams.
3. Must be selected in consultation with the student’s advisor.

**Note:**

With careful selection of courses, students may earn an MS degree as part of their PhD studies. CS 600 Theory of Computation, CS 700 Quantitative Methods and Experimental Design in Computer Science and 12 credits of advanced graduate courses taken as part of the coursework for the PhD degree can be applied towards the MS degree, if the selected courses also satisfy the requirements of the MS degree.

**Qualifying Exam**

Students must demonstrate breadth of knowledge in computer science by passing written qualifying exams. The exams are offered once every semester (usually in the week before the semester begins). To qualify, each student must pass exams in four areas, one of which is foundations of computer science. The other three areas are chosen from these eight areas: operating systems, networks, compilers and languages, object-oriented software specification and construction, software modeling and architectural design, artificial intelligence, database systems, and information systems security. The four exams must be attempted in the same semester, and a failed exam may be retaken once only in the next semester. A student who fails to pass the four exams in two consecutive semesters is subject to termination from the program. Students entering the program who receive a reduction of credit of 15 or more credit hours for a previous Master’s degree must take the exams no later than the first opportunity following the completion of 18 credits at Mason.
Dissertation Research

A minimum of 24 credits of CS 998 Doctoral Dissertation Proposal and CS 999 Doctoral Dissertation must be completed, of which at least 12 must be in CS 999 Doctoral Dissertation. Only 24 credits of CS 998 Doctoral Dissertation Proposal and CS 999 Doctoral Dissertation may be applied toward the degree. Students may enroll in CS 998 Doctoral Dissertation Proposal only after passing the qualifying exams, and they may enroll in CS 999 Doctoral Dissertation only after advancing to candidacy.

Select 24 credits from the following:

<table>
<thead>
<tr>
<th>Credits</th>
<th>Course</th>
</tr>
</thead>
<tbody>
<tr>
<td>24</td>
<td>CS 998</td>
</tr>
<tr>
<td></td>
<td>CS 999</td>
</tr>
</tbody>
</table>

Dissertation Committee Selection

Each student must form a dissertation committee, comprising four or five individuals. Three members of the committee must be tenured or tenure-track faculty in the Computer Science Department. The fourth member should be a member of the George Mason University graduate faculty who is outside the department. The fifth member may be from outside the university. The chair of the dissertation committee, who must also be the dissertation director, must be tenured or tenure-track faculty in the Volgenau School. The committee must be approved by the chair of the Computer Science Department.

Comprehensive Exam

Students must pass an oral comprehensive exam in which they demonstrate depth of knowledge in their intended area of research and ability to perform original research in that area. The scope of the oral exam is defined by a reading list prepared by the student and the dissertation director. The list should include research papers and textbooks that adequately cover the basic tools used in the research area, the fundamentals of the research area, and state-of-the-art knowledge in the specific focus of research. The reading list must be accompanied by a one-page description of the intended research. This document must be approved by the dissertation committee at least one month prior to the exam and becomes part of the student’s record. The duration of the oral exam is typically two hours. Students who fail the exam are allowed to retake it once. Failure in the second attempt results in dismissal from the program.

Dissertation Proposal

Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in CS 998 Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Students may present their dissertation proposal only after passing the comprehensive exam, and the presentation may not be on the same day as the comprehensive exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in dismissal from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

Dissertation Preparation and Defense

While preparing the dissertation, the candidate enrolls in CS 999 Doctoral Dissertation. When the work is deemed complete, the dissertation is defended. The public defense is preceded by a predefense meeting in which only the candidate, the dissertation committee members, and the director of the PhD in Computer Science Program (or his or her representative) are present. If the committee approves, the candidate may then schedule the final public defense. There should be at least one month between the predefense meeting and the defense, and the defense must be announced at least two weeks in advance. The dissertation must be made available to the committee at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Computer Science Program in advance of the defense. The dissertation must make significant contributions to its area and be publishable in refereed journals or conferences. If the candidate defends the dissertation successfully, the dissertation committee recommends that the final form of the dissertation be completed under the supervision of the dissertation director and the graduate faculty of Mason accept the candidate for the PhD degree. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree and an additional predefense is not required. A candidate who fails a second attempt to defend the dissertation is dismissed from the program.

Foundations of Information Systems Graduate Certificate

Banner Code: VS-CERG-FIS

Academic Advising

Phone: 703-993-1530
Email: csgrad@gmu.edu

This graduate certificate is designed primarily for students who earned an undergraduate degree in an area other than information systems and are interested in acquiring solid foundations to pursue further education and a career in information systems, software engineering, information security and assurance, or a related discipline.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

The admission requirement for the certificate in foundations of information systems is a four-year bachelor's degree with a GPA of 3.00 or higher. Also, the admission to the Information Systems, MS (p. 1006) allows automatic admission to the certificate program.

Requirements

Certificate Requirements

Total credits: 12
Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Required Courses
Take each one of the following foundation courses (no substitutions are allowed):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 501</td>
<td>Discrete and Logical Structures for Information Systems</td>

Information Security and Assurance Graduate Certificate
Banner Code: VS-CERG-ISA

Academic Advising
Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/graduate-certificates/

This graduate certificate program is for students interested in science and methods for ensuring secrecy, integrity, availability, and legitimate use of information systems. The certificate may be pursued concurrently with any of the graduate programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions
Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 501</td>
<td>Discrete and Logical Structures for Information Systems</td>

Information Security and Assurance, MS
Banner Code: VS-MS-ISA

Academic Advising
Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-information-security-and-assurance/

The Department of Computer Science’s MS degree in Information Security and Assurance prepares graduates to fill the current and future need for information security and assurance professionals. Graduates work in a wide variety of capacities, protecting the information systems of different types of organizations and supporting the nation’s information infrastructure. The master of science in information security and assurance provides students with the general and technical knowledge and skills to understand the relationship between information security and advancing information systems technology. The program gives graduates a theoretical understanding of the science and methodologies for ensuring the secrecy and integrity of data, as well as the availability and legitimate use of data and information systems.

Students focus on the technical and management aspects of information security and examine ways to provide secure information processing systems by investigating operating systems security, distributed secure system architectures, database security, software applications security, security policies, secure e-commerce, network and distributed systems security, cryptography, and security protocols. Graduates of the program
are actively recruited by federal, state, and local governments, as well as the private sector. Typical employers include Internet-based companies, software companies, banks and insurance companies, and in general any organization that depends heavily on the use of IT. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This serves as a planning guide for the student.

Admissions & Policies

Admissions

Eligibility and Application Requirements
Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Other requirements are as follows:

• Submit the appropriate application with two letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence, a one-page goals statement, and a work résumé.
• Complete the self-evaluation section of the online application. This information is used by the admissions committee to assess an applicant’s academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program.
• The GRE is only required for those who have not earned a Bachelor’s degree from a US Institution.
• International students must submit their English Proficiency scores.

Policies

Foundation Requirements
To ensure that students have an adequate background in mathematical methods and computer science, the program requires the following four foundation courses, or their equivalents: INFS 501 Discrete and Logical Structures for Information Systems, INFS 515 Computer Organization Course and Operating Systems, INFS 519 Program Design and Data Structures, and SWE 510 Object-Oriented Programming in Java.

Prospective students are asked to complete a department self evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate that they have the requisite knowledge for those foundations courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified with some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Advising
The department holds orientation meetings each January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

Requirements

Degree Requirements
Total credits: 30

Completion of the degree program requires a minimum of 30 approved graduate credits (10 courses). Students must choose a concentration.

Required Core Courses
These courses provide the necessary background and fundamentals of information systems security and assurance. To continue in the program, students are required to obtain a B- or better grade in the core courses.

ISA 562  Information Security Theory and Practice  3
ISA 555  Network Security  3
One of the following:  3
INFS 612  Principles and Practices of Communication Networks
CS 555  Computer Communications and Networking

Total Credits  9

Concentration in Applied Cyber Security (ACBS)
Students must take any five courses from the list below. At least three of the five courses must be designated ISA or CS.

Select five courses from the following:  15
CS 667  Biometrics and Identity Management
ISA 650  Security Policy
ISA 652  Security Audit and Compliance Testing
ISA 681  Secure Software Design
ISA 763  Security Protocol Analysis
ISA 785  Research in Digital Forensics
CFRS 663  Operations of Intrusion Detection for Forensics
CFRS 761  Malware Reverse Engineering
CFRS 780  Advanced Topics in Computer Forensics
ECE 646  Cryptography and Computer Network Security
ECE 746  Advanced Applied Cryptography

Total Credits  15

Concentration in Network and System Security (NSS)
ISA 564  Security Laboratory  3
Select four courses from the following:  12
CS 530  Mathematical Foundations of Computer Science
CS 531  Fundamentals of Systems Programming
CS 571  Operating Systems 1
CS 779  Topics in Resilient and Secure Computer Systems
ISA 673  Operating Systems Security
ISA 674  Intrusion Detection
ISA 681  Secure Software Design
ISA 763  Security Protocol Analysis
ISA 764  Security Experimentation
ECE 646  Cryptography and Computer Network Security
ECE 746  Advanced Applied Cryptography

Total Credits 15

1 Students who elect to take CS 571 Operating Systems but who have not taken CS 367 Computer Systems and Programming or its equivalent are advised to take CS 531 Fundamentals of Systems Programming first.

Additional Courses
All students select two remaining courses from any combination of the following: 1
ISA 500, 600, and 700 level courses (p. 1649)
CS 500, 600, and 700 level courses (p. 1328)
Courses from the pre-approved electives list (follows)
ISA 799  Thesis (must take 6 credits)

Total Credits 6

1 Students may choose other graduate electives with the consent of their faculty advisor and the graduate coordinator.

Information Systems (INFS)
INFS 614  Database Management 3
INFS 623  Web Search Engines and Recommender Systems 3
INFS 740  Database Programming for the World Wide Web 3
INFS 760  Advanced Database Management 3
INFS 772  Intelligent Agents and the Semantic Web 3
INFS 774  Enterprise Architecture 3

Software Engineering (SWE)
SWE 619  Object-Oriented Software Specification and Construction 3
SWE 620  Software Requirements Analysis and Specification 3
SWE 621  Software Modeling and Architectural Design 3
SWE 622  Distributed Software Engineering 3
SWE 632  User Interface Design and Development 3
SWE 637  Software Testing 3
SWE 642  Software Engineering for the World Wide Web 3
SWE 645  Component-Based Software Development 3
SWE 721  Reusable Software Architectures 3
SWE 727  Quality of Service for Software Architectures 3

Computer Forensics (CFRS)
CFRS 761  Malware Reverse Engineering 3
CFRS 780  Advanced Topics in Computer Forensics 3

Electrical and Computer Engineering (ECE)
ECE 646  Cryptography and Computer Network Security 3
ECE 746  Advanced Applied Cryptography 3

Accelerated Master's

Applied Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS (p. 983) program have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1002) program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Applied Computer Science, BS (p. 983) program can apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>10</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two 500-level computer science core courses (6 credits) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements. Specifically, students must take

<table>

</tbody>
</table>
CS 584  Theory and Applications of Data Mining  3

Total Credits  6

Note:

Students complete all MS in Information Security and Assurance (p. 1002) core courses and apply the two courses from the above list toward the degree requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Information Security and Assurance, Accelerated MS Overview

Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1002).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements

Students in the Information Technology, BS (p. 1051) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed MATH 125 Discrete Mathematics I (Mason Core) (p. 135) as their discrete math requirement and IT 306 Program Design and Data Structures as part of their concentration requirements in the BS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the two following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INF612</td>
<td>Principles and Practices of Communication Networks (satisfies IT 441 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>ISA562</td>
<td>Information Security Theory and Practice (satisfies IT 462 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students must complete all MS in Information Security and Assurance (p. 1002) core courses and apply the two courses from the above list toward the requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-information-systems/

Modern information systems manage data, information and knowledge to support enterprise functions and decision making as well as human social activity over the Internet. Increasingly, these systems are distributed, collaborative, involve big data and hosted in the cloud.

The mission of the MSIS program is to allow students of diverse baccalaureate and professional backgrounds obtain a high-quality MS degree that:

• provides students with the theoretical knowledge and hands-on project experience needed to analyze, design, build, deploy, maintain, manage and promote effective organizational use of modern information systems;
• allows students to further specialize in related areas of big data, data and knowledge engineering, decision support systems, web-based software engineering and information security assurance; and,
• prepares students for careers in information systems in large and small organizations in both industry and government.

Career paths open to graduates include systems analyst, data administrator, database administrator, information architect, systems architect, decision analyst, data warehouse administrator, database application developer, web-based information systems designer and developer, information engineer, knowledge engineer, chief information officer, chief knowledge officer, chief privacy officer and project manager.

Admissions & Policies

Admissions

Eligibility and Application Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. They also must meet the following requirements:

• Submit the appropriate application with two letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence, a one-page goals statement, and a work résumé.
• Complete the self-evaluation section of the online application. This information is used by the admissions committee to assess an applicant’s academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program.
• The GRE is only required for those who have not earned a Bachelor’s degree from a US Institution.
• International students must submit their English proficiency scores.

Policies

Foundation Requirements

To ensure students have an adequate background in mathematical methods, computer technology, and programming knowledge, the program requires the following foundation courses or their equivalents:

• INFS 501 Discrete and Logical Structures for Information Systems
• INFS 515 Computer Organization Course and Operating Systems
• INFS 519 Program Design and Data Structures
• SWE 510 Object-Oriented Programming in Java

Prospective students are asked to complete a department self-evaluation form indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for the foundations courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified, and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any of the exams must take the equivalent course before enrolling in the core curriculum courses.

Advising

The department holds orientation meetings in January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This plan serves as a guide for the student.

Requirements

Degree Requirements

Total credits: 30

Core Courses

To provide a common background in the fundamentals of information systems, the following core courses, which constitute the technical body of knowledge for the program, are required of all students:

<table>

</table>

Total Credits: 12
Electives

Six courses selected from the lists which follow.  

Total Credits 18

Electives are organized into the following emphasis areas: database management, data mining, electronic commerce, software engineering, knowledge management, and information security and assurance.

In addition to the core courses taken as part of the MS-ISYS curriculum, students may choose an emphasis within the program by taking six courses from one of the emphasis areas listed below. Students may also choose electives spanning several emphasis areas; they may also plan their electives so as to obtain certificates offered by the department. A list of approved electives is given within emphasis areas and by graduate program. A full list follows. Special courses may be used as electives with prior approval of the student's academic advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis (INFS 799 Thesis), which is primarily intended for students planning to pursue a PhD in information technology with a concentration in information systems.

Accelerated Master's

Applied Computer Science, BS/Information Systems, Accelerated MS Overview

Highly-qualified students in the Applied Computer Science, BS (p. 983) program have the option of obtaining an accelerated Information Systems, MS (p. 1006). See AP. 6.7 Bachelor's/Accelerated Master's Degrees (p. 89).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP. 6 Graduate Policies (p. 87).

Admission Requirements

Students in the Applied Computer Science, BS (p. 983) program can apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>10</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for two 500-level computer science core courses (6 credits) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following:

- CS 540 Language Processors
- CS 550 Database Systems
- CS 551 Computer Graphics
- CS 555 Computer Communications and Networking
- CS 571 Operating Systems
Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Information Systems, Accelerated MS
Overview
Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Information Systems, MS (p. 1006).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Information Technology, BS (p. 1051) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the Information Systems, MS (p. 1006) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 614</td>
<td>Database Management (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>INFS 622</td>
<td>Information Systems Analysis and Design (satisfies as one DTP concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students must complete MATH 125 Discrete Mathematics I (Mason Core) (p. 135) as their discrete math requirement and IT 306 Program Design and Data Structures as part of their concentration requirements in the BS program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Software Engineering Graduate Certificate
Banner Code: VS-CERG-SWE

Academic Advising
This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master's degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may be pursued on a part-time or full-time basis.

### Admissions & Policies

### Admissions

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason:

- **INFS 501** Discrete and Logical Structures for Information Systems
- **SWE 510** Object-Oriented Programming in Java
- **INFS 515** Computer Organization Course and Operating Systems
- **INFS 519** Program Design and Data Structures

In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

### Policies

Students must complete four courses with an average grade of B or better for a total of 12 credits of graduate study.

### Requirements

#### Certificate Requirements

Total credits: 12

#### Three Courses

Select three courses from the following:

- **SWE 619** Object-Oriented Software Specification and Construction
- **SWE 621** Software Modeling and Architectural Design
- **SWE 622** Distributed Software Engineering
- **SWE 637** Software Testing

Total Credits: 9

#### Additional Course

Select one course from the following:

- **CS 675** Distributed Systems
- **CS 706** Concurrent Software Systems
- **SWE 620** Software Requirements Analysis and Specification
- **SWE 622** Distributed Software Engineering
- **SWE 625** Software Project Management
- **SWE 626** Software Project Laboratory
- **SWE 631** Software Design Patterns
- **SWE 632** User Interface Design and Development
- **SWE 637** Software Testing
- **SYST 621** Systems Architecture Design
- **SWE 642** Software Engineering for the World Wide Web
- **SWE 645** Component-Based Software Development
- **SWE 681** Secure Software Design and Programming
- **SWE 699** Special Topics in Software Engineering
- **SWE 721** Reusable Software Architectures
- **SWE 727** Quality of Service for Software Architectures
- **SWE 760** Software Analysis and Design of Real-Time Systems
- **SWE 763** Software Engineering Experimentation
- **SWE 795** Advanced Topics in Software Engineering
- **SWE 798** Research Project

Total Credits: 3

1 subject to satisfying the prerequisites

### Notes

Students enrolled in the MS in Information Systems Program must substitute SWE 620 Software Requirements Analysis and Specification for INFS 622 Information Systems Analysis and Design to obtain this certificate. Credit is not given for taking both INFS 622 Information Systems Analysis and Design and SWE 620 Software Requirements Analysis and Specification; only 3 credits will be awarded.

Students enrolled in the MS in Computer Science Program may obtain a certificate in software engineering by taking any four SWE courses. If CS 706 Concurrent Software Systems is included, it is possible to complete the MS in Computer Science and the certificate in software engineering in 30 hours.
Software Engineering Minor

Academic Advising

Phone: 703-993-1530
Email: csinfo@gmu.edu
Website: http://cs.gmu.edu/prospective-students/undergraduate-programs/minors-and-undergraduate-certificate/

Admissions & Policies

Admissions
Declaring a Software Engineering Minor
Students requesting a software engineering minor must have completed CS 112 Introduction to Computer Programming (Mason Core) (p. 135) or CS 211 Object-Oriented Programming with a B or better.

Policies
General
Candidates for the minor in software engineering must complete 19 credits in software engineering with a minimum GPA of 2.00, 8 credits of which must be unique to the minor and not used for the major. For policies governing all minors, see AP.5.3.4 Minors (p. 86).

Grades
No more than 3 credits of D grades may be used to satisfy minor requirements.

Requirements

Minor Requirements
Total credits: 19

Required Courses
CS 112 Introduction to Computer Programming (Mason Core) (p. 135) 4
CS 211 Object-Oriented Programming 3
CS 310 Data Structures 3
Select three from the following: 9
SWE 205 Software Usability Analysis and Design
CS 321 Software Engineering
CS 332 Object-Oriented Software Design and Implementation
SWE 432 Design and Implementation of Software for the Web
SWE 437 Software Testing and Maintenance
SWE 443 Software Architectures

Total Credits 19

Software Engineering, MS

Banner Code: VS-MS-SWE

Academic Advising

Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-software-engineering/

The MS provides specialized knowledge and experience in developing and modifying large, complex software systems. It emphasizes technical and management aspects of software engineering development. Software engineering is an established discipline based on requirements analysis, design, construction, testing, maintenance, economics, and management issues. A pragmatic approach to problem solving is the hallmark of a software engineer. Software engineers are concerned with the theoretical and practical aspects of technology, cost, and social impact of software systems that are effective and efficient.

Software engineers are in demand in every segment of society affected by computing technology. Potential employers include all software vendors and Internet-based companies, electronic business organizations, businesses that build and sell computers, research and development laboratories, aerospace companies, government contractors, banks, insurance companies, and manufacturing organizations. The master’s program is concerned with technical and managerial issues, but primary emphasis is placed on the technical aspects of building and modifying high-quality software systems.

Successful applicants have a broad variety of undergraduate backgrounds, including computer science, science and mathematics, engineering, liberal arts, and business. Many students are working or have worked in the software industry.

The program is revised on a regular basis to stay abreast of the latest developments in information technology (IT). The program introduced a major revision for fall 2005; recent additions include software construction with the object-oriented Java programming language, requirements analysis with use cases and the Unified Modeling Language (UML), object-oriented software design with the UML, graphical user interface design, software engineering for the web, software project management using the spiral life cycle model and the Capability Maturity Model, software architecture, design patterns, system testing and testing of object-oriented components, and formal methods using the Object Constraint Language. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

Requirements

Admissions

Students entering the MS program must have coursework or equivalent knowledge in the following areas: introductory programming in any language; knowledge of an object-oriented programming language such as Java, C++, or C#; data structures and algorithms; machine organization (such as those given in computer system architecture or assembly language courses); and topics in discrete mathematics, including sets, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be achieved by taking the following foundation courses from Mason:
In addition, it is desirable, though not required, that entering students have at least one year of work experience in building or modifying software systems.

Prospective students are asked to complete a department self-evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for those foundation courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

**Application Requirements**

In addition to general admission requirements of the university, each applicant to the MS program must hold a four-year (120-credit) baccalaureate degree in an appropriate discipline from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits of undergraduate study. Other requirements are as follows:

- Provide a resume and a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering.
- Complete the self-evaluation section of the online application. This information is used by the admissions committee to assess an applicant's academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program.
- Submit the appropriate application with two letters of recommendation from people directly knowledgeable of the applicant's professional and academic competence.
- The GRE is only required for those who have not earned a Bachelor's degree from a US Institution.
- International students must submit their English Proficiency scores.

Acceptance into the MS program is based on an overall assessment of the applicant’s ability to complete the program of study satisfactorily. Well-qualified students with minor deficiencies may be admitted to the program in provisional status, with specified course work to be completed within a specified time.

**Electives**

Students may select the remaining courses from the list of approved elective courses, including other emphasis areas and courses from other MS programs in the department and the Volgenau School. Students may choose other graduate electives with the consent of their faculty advisor and the graduate coordinator. Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis, which is primarily intended for students planning to pursue a PhD in Information Technology with a concentration in Software Engineering.

Select 9 credits from the list of approved elective courses or from the following:

- SWE 699: Special Topics in Software Engineering
- SWE 795: Advanced Topics in Software Engineering
- SWE 796: Directed Readings in Software Engineering
- SWE 798: Research Project
- SWE 799: Thesis

**Approved Electives**

Below is the list of approved electives organized by academic program. Students should note that a maximum of two 500-level courses are allowed as electives. Courses not on this list may only be taken with explicit signed permission from the MS-SWE advisor.

### Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for two 500-level computer science core courses (6 credits) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>

</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td></td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 6

Note:
Students complete all Software Engineering, MS (p. 1012) core courses and apply the two courses from the above list toward the elective requirements.

### Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

### Computer Science, BS/Software Engineering, Accelerated MS

#### Overview

Highly-qualified students in the Computer Science, BS (p. 991) have the option of obtaining an accelerated Software Engineering, MS (p. 1012). See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Students in the Computer Science, BS (p. 991) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits 10

#### Admission Requirements

Students in the Computer Science, BS (p. 991) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

#### Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically,
students must register for two of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td>3</td>

<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students complete all MS in Software Engineering (p. 1012) core courses and apply the two courses from the above list toward the elective requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Web-Based Software Engineering Graduate Certificate

Banner Code: VS-CERG-WBSE

Academic Advising

Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: http://cs.gmu.edu/prospective-students/ms-programs/graduate-certificates/

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master's degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from the department or the department web site. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 501</td>
<td>Discrete and Logical Structures for Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>SWE 510</td>
<td>Object-Oriented Programming in Java</td>
<td>3</td>
</tr>
<tr>
<td>INFS 515</td>
<td>Computer Organization Course and Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>INFS 519</td>
<td>Program Design and Data Structures</td>
<td>3</td>
</tr>
</tbody>
</table>

Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate.
Program. Admission to the certificate program does not guarantee admission to any MS program.

**Policies**

**Program Requirements**

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

**Graduate Programs**

Graduate programs leading to MS and PhD degrees prepare students for careers in industry, government, and academia. Graduate certificate programs provide well-defined targets for students who want to advance or update their knowledge in selected areas. The ECE Department offers the PhD in Electrical and Computer Engineering and master’s degrees in computer engineering, electrical engineering, telecommunications, and computer forensics, and certificates in communications, forensics, networking, and signal processing.

The ECE Department is committed to high standards of teaching and research excellence in communications, digital systems design, computer networks, microprocessor and embedded systems, distributed computing, signal and image processing, control systems, robotics, intelligent systems, systems integration and microelectronics. Graduate students are offered a progressive environment with ample opportunities for the type of advanced research needed to confront the complex realities of the 21st century.

Courses in the department’s graduate programs are offered during the evening or late afternoon hours to accommodate students who are employed full time. For those who enter the programs on a full-time basis, some financial aid may be available in various forms, such as teaching assistantships, research assistantships, and work-study and co-op agreements with local industry.

**Faculty**

**Professors**

Ephraim, Griffiths, Hayes (Chair), Ioannou, Jabbari, Levis, Li, Manitius, Mark, Mulpuri, Tian

**Associate professors**

Berry, Gaj, Hintz, Jones, Kaps, Kurtay (Associate Chair), Lorie, Nelson, Osgood, Pachowicz, Paris, Peixoto, Sasan, Wage, Zeng

**Assistant professors**

Chen, Homayoun, Lofaro, Nowzari, Pandula, Zhang

**Research professors**

Elder, Katona

**Adjunct professors**

**Department of Electrical and Computer Engineering**

Phone: 703-993-1569
Email: ece@gmu.edu
Website: ece.gmu.edu

**Undergraduate Programs**

The undergraduate education mission of the ECE Department is to provide a quality education for electrical engineering and computer engineering students to support the needs of Virginia and the nation.

**Program Educational Objectives for the BS ELEN and BS CPE**

Graduates of the Electrical Engineering and the Computer Engineering programs are expected within three to five years of graduation to have:

- Established themselves as successful and productive engineering professionals or engaged in advanced study such as a graduate degree program.
- Worked effectively in team environments and individually.
- Fulfilled their responsibilities in the areas of ethics, continuing professional development and effective communications.
Emeritus faculty
Allnutt, Baraniecki, Beale, Black, Ceperley, Chang, Cook, Gertler, Schaefer, Sutton, Tabak, Van Trees

Programs

- Advanced Networking Protocols for Telecommunications Graduate Certificate
- Communications and Networking Graduate Certificate
- Computer Engineering, BS
- Computer Engineering, MS
- Digital Forensics and Cyber Analysis, MS (title pending SCHEV approval)
- Electrical Engineering, BS
- Electrical Engineering, MS
- Electrical and Computer Engineering, PhD
- Network Technologies and Applications Graduate Certificate
- Networks, System Integration and Testing Graduate Certificate
- Signal Processing Graduate Certificate
- Tactical Computer Operations Graduate Certificate
- Telecommunications Forensics and Security Graduate Certificate

Total Credits: 9

1 May not be taken twice for credit. If a student takes TCOM 515 Internet Protocol Routing: Lecture and Laboratory Course and TCOM 535 The TCP/IP Suite of Internet Protocols in the core element, the course(s) may not be taken again in the elective element.

Communications and Networking Graduate Certificate
Banner Code: VS-CERG-CONE

Academic Advising
MSN 1G5
4400 University Drive
Fairfax, VA 22030
Phone: 703-993-1569
Email: ece@gmu.edu
Website: ece.gmu.edu/graduate-certificates/certificate-program-communications-and-networking

This graduate certificate provides graduate students with the opportunity to reach a demonstrated level of competence in communications and networking. Coursework toward the graduate certificate may be used for credit toward the MS in electrical engineering or computer engineering; however, the certificate's primary purpose is to provide a well-defined body of knowledge for students who want to advance their understanding of modern communications but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions

The certificate program in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.
Policies
The certificate is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three electives.

Requirements
Certificate Requirements
Total credits: 15

Foundation Courses
ECE 528 Introduction to Random Processes in Electrical and Computer Engineering 3
ECE 542 Computer Network Architectures and Protocols 3
Total Credits 6

Electives
After completing the foundation courses, students choose electives by taking three courses from the following:

Select three courses from the following: 9
ECE 535 Digital Signal Processing
ECE 565 Introduction to Optical Electronics
ECE 567 Optical Fiber Communications
ECE 630 Statistical Communication Theory
ECE 633 Coding Theory
ECE 635 Adaptive Signal Processing
ECE 642 Design and Analysis of Computer Communication Networks
ECE 643 Network Switching and Routing
ECE 646 Cryptography and Computer Network Security
ECE 731 Digital Communications
ECE 732 Mobile Communication Systems
ECE 734 Detection and Estimation Theory
ECE 738 Advanced Digital Signal Processing
ECE 741 Wireless Networks
ECE 742 High-Speed Networks
OR 635 Discrete System Simulation
OR 643 Network Modeling
OR 647 Queueing Theory

Total Credits 9

Computer Engineering, BS
Banner Code: VS-BS-CPE

Academic Advising
MSN 1G5
4400 University Drive
Fairfax, VA 22030

Phone: 703-993-1569
Email: ece@gmu.edu
Website: https://ece.gmu.edu/undergraduate-studies/bachelors-programs/bs-computer-engineering

The field of computer engineering can be described as a blend of electrical engineering and computer science. It is an amalgam of the computer hardware orientation of an electrical engineering program and the operating systems and languages of a computer science program. Computer engineers are involved in research, development, design, production, and operation of a wide variety of digital systems, from integrated circuits to computer systems and large-scale computer networks. Reflecting the industry trend to integrate hardware and software development, the computer engineering program is built around software running on advanced hardware that can simulate and assist in the design of new digital systems. Advanced software, such as VHDL, and software tools, such as logic and system design tools by Mentor Graphics and Cadence Design Systems, can be used to model hardware and hardware functionality from the system and architecture level down to the gate level and include relations to integrated circuit fabrication technology. Design and testing methodology involving these tools is taught in the program.

The computer engineering program is staffed by 33 full-time professors, including fellows of IEEE or other professional societies, and several part-time professors.

The bachelor’s program in computer engineering is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

Career Opportunities
Career opportunities exist in engineering research and development, product design, digital system design and integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

Specializations
The curriculum provides a strong background in the fundamentals of computer engineering. A number of technical elective specializations are offered, ranging from strongly hardware-oriented to strongly software-oriented ones. These include robotics and embedded systems, computer networks, signal processing, and integrated circuits. The curriculum includes 9 credits of senior technical electives, and 3 credits of senior advanced design project, which may be used for specialization in one of these technical areas.

Additional Information
The requirements for the degree may be satisfied on a full-time or part-time basis. Cooperative education provides students the opportunity to integrate paid career-related work experience with classroom learning. Academic credit towards the completion of major requirements cannot be given for co-op experience. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, computer engineering majors are eligible to apply through the ECE Department for scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association and the Institute of Electrical and Electronics Engineers.
Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 84).

Writing-Intensive Requirement
Mason’s writing-intensive requirement is satisfied by the following group of three courses: ECE 333 Linear Electronics I, ECE 445 Computer Organization, and ECE 491 Engineering Seminar in which faculty provide feedback on student writing assignments. Drafts and revisions are required.

Change of Major
See Change of Major (p. 955) for more information.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Double Major and Minor Programs for Computer Engineering and Electrical Engineering
Computer Engineering majors and Electrical Engineering majors can earn degrees with double majors in a number of disciplines. Computer Engineering and Computer Science are frequently combined. Electrical Engineering has been combined with Computer Engineering, Computer Science, Physics, or Math. Details are available in the department brochures or at the Volgenau School website (http://volgenau.gmu.edu). There are several minors available for students in the ECE Department including the Mechanical Engineering minor (p. 1057).

Grade Requirements
All computer engineering students are strongly encouraged to see their major faculty advisor each semester before course registration.

Students must complete each ECE, ENGR, BENG, CS, MATH, PHYS and STAT course presented as part of the required 126 credits for the degree with a grade of C or better.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

Total Credits: 41

Note that ECE 285 Electric Circuit Analysis I/ECE 286 Electric Circuit Analysis II courses taken at Mason prior to fall 2013 or transferred to Mason prior to fall 2014 do NOT meet the circuits analysis requirement. Students who fit in either category need to contact the department as soon as possible to discuss their options.

Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 Engineering Design Studio to gain a semester head start in the design process.

### Technical Electives

Students must choose one of the four technical specialization areas listed below. All three of the technical electives totaling 9 credit hours must be selected from within the chosen specialization area. With the prior approval of the ECE department, students may also create a custom specialization area and select a set of technical electives, including non-ECE courses, to apply to the custom specialization area. Graduate courses listed within the specialization areas can only be taken with prior approval of the department. The decision to approve taking graduate courses listed within the specialization areas is based on a review of the student's academic record.

#### Specialization Areas

**Robotics and Embedded Systems**

Select three from the following:

- ECE 350 Embedded Systems and Hardware Interfaces
- ECE 370 Robot Design
- ECE 421 Classical Systems and Control Theory
- ECE 446 Device Driver Development
- ECE 450 Introduction to Robotics
- ECE 470 Introduction to Humanoid Robotics
- ECE 510 Real-Time Concepts

**Computer Networks**

Select three from the following:

- ECE 460 Communication and Information Theory
- ECE 462 Data and Computer Communications
- ECE 463 Digital Communications Systems
- IT 466 Network Security II

**Total Credits**

9

**Signal Processing**

Select three from the following:

- ECE 320 Signals and Systems II
- ECE 410 Applications of Discrete-Time Signal Processing
- ECE 460 Communication and Information Theory
- ECE 535 Digital Signal Processing

**Total Credits**

9

**Integrated Circuits**

Select three from the following:

- ECE 430 Principles of Semiconductor Devices
- ECE 431 Digital Circuit Design
- ECE 433 Linear Electronics II
- ECE 565 Introduction to Optical Electronics

**Total Credits**

9

**English, Communication, and Economics**

Select three from:

- ENGH 302 Advanced Composition (Mason Core) (p. 135) (Natural Sciences and Technology section)
- COMM 100 Public Speaking (Mason Core) (p. 135)
  or COMM 101 Interpersonal and Group Interaction (Mason Core) (p. 135)
- ECON 103 Contemporary Microeconomic Principles (Mason Core) (p. 135)

**Total Credits**

9

**Additional Mason Core**

Students must complete all Mason Core (p. 135) requirements not fulfilled by major requirements. Mason Core courses should be selected from the department’s list of approved courses. The Synthesis Mason Core requirement is satisfied by ECE 492 Senior Advanced Design Project I (Mason Core) (p. 135) plus ECE 493 RS: Senior Advanced Design Project II (Mason Core) (p. 135). All students must submit at least 24 credits of social science and humanities coursework, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed here and in previous sections.

- Written Communication (p. 135)
- Literature (p. 140)
- Arts (p. 137)
- Western Civilization/World History (p. 143)
- Global Understanding (p. 139)

**Total Credits**

15
Accelerated Master’s

Computer Engineering, BS/Computer Engineering, Accelerated MS

Overview
The university offers highly-qualified students in the Computer Engineering, BS (p. 1020) the option of obtaining an accelerated Computer Engineering, MS (p. 1023).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Computer Engineering, BS (p. 1020) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.25. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS (p. 1023) program.

Accelerated Option Requirements
Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 126-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students admitted to the accelerated program must maintain an overall GPA of at least 3.25 during the entire BS/MS program and present a GPA of at least 3.25 for the 24 credits of graduate work submitted for the MS degree.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Engineering involves knowledge of hardware and software development. The students learn how to design new generations of computers, as well as embedded computing systems, such as those found in smartphones, cars, appliances, computer networks, smart factories, and the internet-of-things. The program covers the entire digital integrated circuit design process targeting Field Programmable Gate Arrays (FPGAs) and Application Specific Integrated Circuits (ASICs), using various optimization criteria, such as speed, cost, power, energy, reliability, and security. It also encompasses the complete software development process targeting microcontrollers, microprocessors, multi-cores, and Graphics Processing Units (GPUs). It teaches students how to efficiently partition the system into software and hardware components, and develop high-performance interfaces between these two parts. Project-oriented courses and labs expose students to modern computer-aided design tools for hardware and software design. The students master the art of writing comprehensive technical reports and giving successful oral presentations. The computer engineering program offers the following specialization areas: digital systems design, microprocessor and embedded systems, digital signal processing, computer networks, and network and system security.

Admission is very competitive. The department’s policy is to admit only those students who have demonstrated a potential for outstanding performance in their graduate work.

Admissions & Policies

Admissions

Categories of Admission
Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive a B or better in two core courses specific to the student’s selected program and specialization. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Requirements
To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Two letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
- Resume and detailed statement of career goals and aspirations
- For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
- For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based
exam. A minimum score of 600 for the paper-based exam or 250 for
the computer-based exam is required for applicants who wish to be
considered for a graduate teaching assistantship.

Non-ECE Students
Students with BS or MS degrees in ECE-related disciplines (for example,
computer science, mathematics, mechanical engineering, physics, or
electrical engineering technology) are encouraged to apply for admission.
They may initially be admitted into the provisional category and advance
to degree status by satisfying requirements described in the Admissions
Categories section. Such students may also be advised to take some
courses from the undergraduate electrical or computer engineering
curriculum, according to their intended specialization and specific
backgrounds.

Policies
Student Advising
Newly-admitted graduate students must consult with the ECE graduate
coordinator before they register for classes. Students should make an
appointment by calling the ECE office. Students are expected to select a
specialization from those available in each MS degree program. Students
then are assigned an academic advisor from that specialization.

GPA Requirements
A maximum of 6 credits of courses with grades of C or B- may be applied
toward the degree. The student must present a GPA of at least 3.00 for all
courses submitted for the degree.

Program Requirements
Students must complete a minimum of 30 graduate credits beyond the
bachelor’s degree. This work must represent a cohesive set of courses
leading to comprehensive knowledge in one specialized area of computer
engineering; it cannot be a set of disjointed courses.

Plan of Study
Before the end of the second semester, each student must submit to
the graduate coordinator’s office a plan of study that has been approved
by the academic advisor. This plan should be kept up to date by regular
consultation with the academic advisor. A final, signed version of the plan
must be turned in when the student submits a graduation application.

Requirements

Degree Requirements
Total credits: 30

Core Courses
Select two courses from the following: ¹

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>

</thead>
<tbody>
<tr>
<td>ECE 799</td>
<td>Master’s Thesis</td>
<td>6</td>
</tr>
</tbody>
</table>

Total Credits 9

¹ Not including ECE 798 Research Project or ECE 799 Master’s Thesis
² Requires a grade of B or better in each.

Electives
Electives should be chosen either from the list of pre-approved electives
strongly suggested for a given specialization area or from the list of
elective courses common for all specialization areas. Elective courses
from the latter list must be approved by the student’s advisor prior to the
registration for a given course.

The plan of study usually has no fewer than 15 credits of courses
designated ECE.

Lists of courses appropriate for specialization areas, such as digital
systems design, microprocessor and embedded systems, digital signal
processing, computer networks, and network and system security,
are available on the ECE website. A self-defined specialization may
be created when appropriate, with the approval of the computer
engineering graduate program coordinator. This specialization must
include components of hardware and software development and the
Corresponding plan of study should comprise courses from ECE and the
Computer Science Departments.

Seminar Requirement
Graduate students are expected to participate actively in the exchange
of knowledge and ideas in their discipline. Towards this objective, all
degree candidates must attend a minimum of 6 graduate seminars
approved for the degree program. Approved seminars are publicized on
the departmental webpage.

To demonstrate completion of the seminar requirement, students must
register for ECE 795 Engineering Seminar in their final semester. The
department office will verify that the seminar requirement has been
met and submit a grade of S (satisfactory) upon completion of the
requirement. Students who have not met the seminar requirement in
their final semester must continue to register for ECE 795 Engineering
Seminar in subsequent semesters until the requirement is met.

Thesis/Scholarly Paper Option
To complete the program, students may select one of the following
options:

Thesis Option
Students who select this option must complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 799</td>
<td>Master’s Thesis</td>
<td>6</td>
</tr>
</tbody>
</table>

Coursework
Total Credits

The thesis is particularly recommended for those students who wish to
develop and document their research skills or contemplate subsequent
enrollment in a PhD program. The thesis involves a research effort, which
is conducted under the guidance of a faculty advisor. In some cases,
permission may be granted to complete a portion of the work at the
For the Electrical Engineering program (p. 1032), this committee consists of at least three full-time faculty members, including two from the student’s major specialization, and one from outside the specialization. For the Computer Engineering Program (p. 1023), this committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering (p. 1023) Program, one of whom must be from the ECE Department. Thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

Scholarly Paper Option
Students who select to complete their degree program with a scholarly paper must:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Complete 30 credits of coursework</td>
<td>30</td>
</tr>
<tr>
<td>ECE 797</td>
<td>Scholarly Paper</td>
<td>0</td>
</tr>
<tr>
<td></td>
<td>Enroll in a 600-level or above course requiring a research project</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Write a Scholarly Paper project report and present findings as part of the course requirements</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 30

An acceptable scholarly paper must be technically sound, adhere to accepted formatting standards for technical reports, and contain a significant literature review evidenced by a comprehensive list of cited references.

A list of courses requiring projects that can be used to satisfy the scholarly paper requirement will be published on the department website. Scholarly papers must be individual written project reports – not group projects. To qualify as a scholarly paper an oral presentation of the project is required. A passing grade for the project, reflecting both the written report and the oral presentation, satisfies the scholarly paper requirement.

A successful scholarly paper will be recorded by awarding a satisfactory (S) grade for ECE 797 Scholarly Paper. Students are eligible to attempt the scholarly paper and register for ECE 797 Scholarly Paper after completion of 18 hours of coursework. Students choosing the scholarly paper option are not eligible for graduation until they have received a final, passing grade for ECE 797 Scholarly Paper.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Computer Engineering, BS (p. 1020) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.25. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS (p. 1023) program.

Accelerated Option Requirements
Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 126-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students admitted to the accelerated program must maintain an overall GPA of at least 3.25 during the entire BS/MS program and present a GPA of at least 3.25 for the 24 credits of graduate work submitted for the MS degree.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Digital Forensics and Cyber Analysis, MS (title pending SCHEV approval)

Banner Code: VS-MS-DFCA

Academic Advising

MSN 2B5
4400 University Dr
Fairfax, VA 22030

Phone: 703-993-3810
Email: cfrs@gmu.edu
Website: cfrs.gmu.edu

Note: As of catalog publication in April, the title for this program (formerly known as Computer Forensics, MS) has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia.

Digital Forensics and Cyber Analysis is a key component in criminal, civil, intelligence, and counter-terrorism matters. In the last several years, with a proliferation of digital storage, transmission, and processing of sensitive information there has been an increase in the aberrant use of computers. This aberrant behavior includes but is not limited to:
economic espionage, child exploitation, cybercrime, fraud, terrorism, and identity theft. In response to this, Digital Forensics and Cyber Analysis has become an important profession serving both public and private sectors. The MS in Digital Forensics and Cyber Analysis will prepare graduates for careers in law enforcement, various other branches of government, and in the corporate sector such as banking and finance by combining academic education with real world practical techniques and by offering advanced training in analyzing digital evidence, in intrusion forensics, and in legal and ethical issues.

Admissions & Policies

Admissions

Students who hold a bachelor's degree with a minimum undergraduate GPA of 3.0 from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines; or students who have equivalent work experience indicating analytical aptitude; may apply to the Digital Forensics and Cyber Analysis MS. Depending on their background, some applicants may be required to complete 3 to 12 credits of preliminary course work before they are allowed to enroll in any of the core courses or specialty courses in the program.

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

Requirements

Degree Requirements

Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor's degree with a GPA of 3.00 or higher, with no more than 6 credit hours of C grades. The plan of study includes a 18-credit required Core component which includes a mandatory capstone course, and the choice of either a concentration or a 12-credit elective component as shown below:

Core Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>or ISA 562</td>
<td>Information Security Theory and Practice</td>
<td></td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 661</td>
<td>Digital Media Forensics</td>
<td>3</td>

Accomplished Master’s

Cyber Security Engineering, BS/Digital Forensics and Cyber Analysis, Accelerated MS

Overview
Highly-qualified students in the Cyber Security Engineering, BS (p. 957) have the option of obtaining an accelerated Digital Forensics and Cyber Analysis, MS (p. 1025).

Admission Requirements
Students in the Cyber Security Engineering, BS (p. 957) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics and Cyber Analysis, MS (p. 1025) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two Digital Forensics and Cyber Analysis core courses (6 credits) in place of two of the three required technical electives, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>and one of the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis (satisfies the IT 357 requirement for the INFS concentration in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics (satisfies one NTEL concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 6

Note: Students complete all Digital Forensics and Cyber Analysis, MS (p. 1025) core courses and apply the two courses from the above list toward the Digital Forensics and Cyber Analysis, MS (p. 1025) requirements.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Digital Forensics and Cyber Analysis (title change pending SCHEV approval), Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Digital Forensics and Cyber Analysis, MS (p. 1025).

Admission Requirements
Students in the Information Technology, BS (p. 1051) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics and Cyber Analysis, MS (p. 1025) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with two of the following three courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis (satisfies the IT 357 requirement for the INFS concentration in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics (satisfies as one NTEL concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Electrical Engineering, BS

Email: ece@gmu.edu
Website: https://ece.gmu.edu/undergraduate-studies/bachelors-programs/bs-electrical-engineering

Electrical engineering is a major field of modern technology. Electrical engineers are involved in research, development, design, production, and operation of a wide variety of devices and systems, including integrated circuits and microwave and laser devices, communication systems, control systems, radar, robots, large telecommunication networks, and power networks. The electrical engineering program is staffed by ECE faculty composed of 33 full-time professors, including fellows of IEEE or other professional societies, and several part-time professors.

The bachelor's program in electrical engineering is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

Career Opportunities

Career opportunities exist in engineering research and development, system design, system integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

Specializations

The curriculum provides a strong background in the fundamentals of electrical engineering and senior-level courses in the important areas of electronics, networks, communications and signal processing, computer engineering, and controls and robotics. Further, the curriculum includes 9 credits of senior technical electives, 2 credits of advanced engineering labs, and 3 credits of senior advanced design project, which may be used for further specialization in one of these areas.

Additional Information

Degree requirements may be satisfied on a full-time or part-time basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning. Academic credit towards the completion of major requirements is not given for co-op experience. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, electrical engineering majors are eligible to apply at the ECE Department for scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association and the Institute of Electrical and Electronics Engineers.

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 84).

Writing-Intensive Requirement

Mason’s writing-intensive requirement is satisfied by the following group of three courses: ECE 333 Linear Electronics I, ECE 445 Computer Organization, and ECE 491 Engineering Seminar in which faculty provide feedback on student writing assignments. Drafts and revisions are required.

Change of Major

See Change of Major (p. 955) for more information.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Double Major and Minor Programs for Electrical Engineering and Computer Engineering

Electrical Engineering majors and Computer Engineering majors can earn degrees with double majors in a number of disciplines. Computer Engineering and Computer Science are frequently combined. Electrical Engineering has been combined with Computer Engineering, Computer Science, Mechanical Engineering, Physics or Math. Details are available in the department brochures or at the Volgenau School web site volgenau.gmu.edu (http://volgenau.gmu.edu). There are several minors available for students in the ECE Department including the Mechanical Engineering minor.

Grade Requirements

All electrical engineering students are strongly encouraged to see their major faculty advisor before course registration each semester.

Students must complete each ECE, ENGR, BENG, CS, MATH, PHYS, and STAT course presented as part of the required 121 credits for the degree with a grade of C or better.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

Total Credits: 42

1. Note that ECE 285 Electric Circuit Analysis I/ECE 286 Electric Circuit Analysis II courses taken at Mason prior to fall 2013 or transferred to Mason prior to fall 2014 do NOT meet the circuits analysis requirement. Students who fit in either category need to contact the department as soon as possible to discuss their options.

2. Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 Engineering Design Studio to gain a semester head start in the design process.

### Technical Electives
Four technical elective courses totaling 12 credit hours must be selected from the list below. Up to 3 credits of ECE 499 Special Topics in Electrical Engineering courses may be taken as technical electives. ECE 447 Single-Chip Microcomputers and ECE 448 FPGA and ASIC Design with VHDL, which are 4-credit courses with built-in labs, can be used to fulfill one technical elective and one advanced lab requirement. Some graduate courses and courses outside the ECE department may be taken to fulfill the technical elective requirement with the permission of the department. The decision to approve non-ECE courses as well as graduate courses as technical electives is at the discretion of the department based on a review of the course content and the student's academic record.

Total Credits 12

Engineering
ENGR 107 Introduction to Engineering (Mason Core) (p. 135) 2

Total Credits 2

English, Communication, and Economics
ENGH 302 Advanced Composition (Mason Core) (p. 135) (Natural Sciences and Technology section) 3

COMM 100 or COMM 101 Public Speaking (Mason Core) (p. 135) (Interpersonal and Group Interaction (Mason Core) (p. 135)) 3

ECON 103 Contemporary Microeconomic Principles (Mason Core) (p. 135) 3

Total Credits 9

Additional Mason Core

Students must complete all Mason Core (p. 135) requirements not fulfilled by major requirements. Mason Core courses should be selected from the department's list of approved courses. The Synthesis Mason Core requirement is satisfied by ECE 492 Senior Advanced Design Project I (Mason Core) (p. 135) and ECE 493 RS: Senior Advanced Design Project II (Mason Core) (p. 135). All students must submit at least 24 credits of social science and humanities coursework, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed here and in previous sections.

Written Communication (p. 135) 1
Literature (p. 140) 3
Arts (p. 137) 3
Western Civilization/World History (p. 143) 3
Global Understanding (p. 139) 3

Total Credits 15

1 Lower-level requirement.

Concentrations

Concentrations are available in the electrical engineering baccalaureate program. Completion of specific science courses and senior-level courses leads to one of these designations on the student's transcript on graduation. Concentration requirements may also meet some or all of the Advanced Engineering Lab and Technical Elective requirements.

Concentration in Bioengineering (BIOE)
BENG 301 Bioengineering Measurements 3
BENG 302 Bioengineering Measurements Lab 1
ECE 434 or ECE 429 Linear Electronics II Laboratory 1
ECE 492 Senior Advanced Design Project I (Mason Core) (p. 135) 1
ECE 493 RS: Senior Advanced Design Project II (Mason Core) (p. 135) 1

Select two from the following: 6

BENG 304 Modeling and Control of Physiological Systems
BENG 313 Physiology for Engineers
BENG 406 Introduction to Biomechanics
BENG 420 Bioinformatics for Engineers
BENG 525 Neural Engineering
BENG 499 Special Topics in Bioengineering 2
BENG 538 Medical Imaging
BENG 590 Selected Topics in Bioengineering
ECE 499 Special Topics in Electrical Engineering 1,2,3

Total Credits 14

1 Bioengineering topic only.
2 Must be pre-approved by advisor.
3 For a minimum of 3 credits.

Concentration in Communications and Signal Processing (CSP)
ECE 461 Communication Engineering Laboratory 1
ECE 492 Senior Advanced Design Project I (Mason Core) (p. 135) 1
ECE 493 RS: Senior Advanced Design Project II (Mason Core) (p. 135) 1

Select three from the following: 9

ECE 410 Applications of Discrete-Time Signal Processing
ECE 462 Data and Computer Communications
ECE 463 Digital Communications Systems
ECE 465 Computer Networking Protocols
ECE 499 Special Topics in Electrical Engineering 1,2,3
ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
ECE 535 Digital Signal Processing
ECE 567 Optical Fiber Communications
ECE 590 Selected Topics in Engineering 1,2
PHYS 306 Wave Motion and Electromagnetic Radiation

Total Credits 13

1 Communications and signal processing topic only.
2 Must be pre-approved by advisor.
3 For a minimum of 3 credits.

Concentration in Computer Engineering (CPE)
ECE 447 Single-Chip Microcomputers 4
ECE 492 Senior Advanced Design Project I (Mason Core) (p. 135) 1
ECE 493 RS: Senior Advanced Design Project II (Mason Core) (p. 135) 1

Select two from the following: 6-7

ECE 350 Embedded Systems and Hardware Interfaces
ECE 431 Digital Circuit Design
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

Select three from the following: 9-10 credits

- ECE 370: Robot Design
- ECE 422: Digital Control Systems
- ECE 447: Single-Chip Microcomputers
- ECE 450: Introduction to Robotics
- ECE 470: Introduction to Humanoid Robotics
- ECE 499: Special Topics in Electrical Engineering
- ECE 511: Microprocessors
- ECE 521: Modern Systems Theory
- ECE 528: Introduction to Random Processes in Electrical and Computer Engineering
- ECE 590: Selected Topics in Engineering

**Total Credits: 13-14**

1. Control systems topic only
2. Must be pre-approved by advisor
3. For a minimum of 3 credits.

### Concentration in Electronics (ELE)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 434</td>
<td>Linear Electronics II Laboratory</td>
</tr>
<tr>
<td>or ECE 435</td>
<td>Digital Circuit Design Laboratory</td>

<tr>
<td>ECE 492</td>
<td>Senior Advanced Design Project I (Mason Core)</td>
</tr>
<tr>
<td>ECE 493</td>
<td>RS: Senior Advanced Design Project II (Mason Core)</td>
</tr>
</tbody>
</table>

Select three from the following: 9-10 credits

- ECE 430: Principles of Semiconductor Devices
- ECE 431: Digital Circuit Design
- ECE 447: Single-Chip Microcomputers
- ECE 448: FPGA and ASIC Design with VHDL
- ECE 499: Special Topics in Electrical Engineering
- ECE 513: Applied Electromagnetic Theory
- ECE 555: Introduction to Optical Electronics
- ECE 567: Optical Fiber Communications
- ECE 584: Semiconductor Device Fundamentals
- ECE 586: Digital Integrated Circuits
- ECE 587: Design of Analog Integrated Circuits
- ECE 590: Selected Topics in Engineering
- PHYS 306: Wave Motion and Electromagnetic Radiation
- PHYS 308: Modern Physics with Applications

**Total Credits: 13-14**

1. Electronics topic only
2. Must be pre-approved by advisor
3. For a minimum of 3 credits.

### Accelerated Master's

**Electrical Engineering, BS/Electrical Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Electrical Engineering, BS (p. 1027) have the option of obtaining an accelerated Electrical Engineering, MS (p. 1032).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission Requirements**

Students in the Electrical Engineering, BS (p. 1027) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.25. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS (p. 1032) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students admitted to the accelerated program must maintain an overall GPA of at least 3.25 during the entire BS/MS program and present a GPA of at least 3.25 for the 24 credits of graduate work submitted for the MS degree.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is
submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Electrical Engineering, BS/Telecommunications, Accelerated MS**

**Overview**

Highly-qualified students in the Electrical Engineering, BS (p. 1027) have the option of obtaining an accelerated Telecommunications, MS (p. 1039).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission Requirements**

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.10 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Telecommunications Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.10 undergraduate GPA.

**Accelerated Option Requirements**

Students must complete 145 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.00 during the MS program and present a GPA of at least 3.00 for the 24 credits of graduate work submitted for the MS degree.

**Degree Conferral**

Students must apply to have the BS conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

**Electrical Engineering, MS**

**Banner Code:** VS-MS-ELEN

**Academic Advising**

MSN 1G5
4400 University Drive
Fairfax, VA 22030

Phone: 703-993-1569
Email: ece@gmu.edu
Website: https://ece.gmu.edu/graduate-studies/masters-programs/ms-electrical-engineering

The electrical engineering program offers the following specialization areas: bioengineering, communications and networking, signal processing, control and robotics, microelectronics/nanoelectronics, and system architectures.

**Admissions & Policies**

**Admissions**

**Categories of Admission**

Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive a B or better in two core courses specific to the student’s selected program and specialization. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

**Requirements**

To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Two letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
- Resume and detailed statement of career goals and aspirations
- For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
- For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship.

**Non-ECE Students**

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.
Policies

Student Advising

Newly-admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students are expected to select a specialization from those available in each MS degree program. Students then are assigned an academic advisor from that specialization.

GPA Requirements

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

Requirements

Degree Requirements

Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor's degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one area; it cannot be a set of disjointed courses. The plan of study for the degree must include the following:

Plan of Study

Before the end of the second semester, each student must submit to the graduate coordinator’s office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

Core Courses

Select two courses from the following: ¹

<table>
<thead>
<tr>

<td>Introduction to Optical Electronics</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 6

¹ Must earn a B or better in each.

Upper Level Courses

Three courses at the 600 level or above: ¹

Total Credits 9

¹ Students must earn a B or better in each course. Must be a coherent set of courses, not including ECE 798 Research Project or ECE 799 Master’s Thesis. For guidance for selecting a coherent set of courses, students are referred to the courses listed for each of the program’s specialization areas listed on the ECE website. A maximum of 6 credits of non-ECE courses may be used, subject to prior department approval.

Seminar Requirement

Graduate students are expected to participate actively in the exchange of knowledge and ideas in their discipline. Towards this objective, all degree candidates must attend a minimum of 6 graduate seminars approved for the degree program. Approved seminars are publicized on the departmental webpage.

To demonstrate completion of the seminar requirement, students must register for ECE 795 Engineering Seminar in their final semester. The department office will verify that the seminar requirement has been met and submit a grade of S (satisfactory) upon completion of the requirement. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 Engineering Seminar in subsequent semesters until the requirement is met.

Thesis/Scholarly Paper Option

To complete the program, students may select one of the following options:

Thesis Option

Students who select this option must complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 799</td>
<td>Master’s Thesis</td>
<td>6</td>
</tr>
<tr>
<td>Coursework</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 30

The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the Electrical Engineering program (p. 1032), this committee consists of at least three full-time faculty members, including two from the student’s major specialization, and one from outside the specialization. For the Computer Engineering Program (p. 1023), this committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering (p. 1023) Program, one of whom must be from the ECE Department. Thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

Scholarly Paper Option

Students who select to complete their degree program with a scholarly paper must:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complete 30 credits of coursework</td>
<td>30</td>
<td></td>
</tr>
<tr>
<td>ECE 797</td>
<td>Scholarly Paper</td>
<td>0</td>
</tr>
<tr>
<td>Enroll in a 600-level or above course requiring a research project</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Write a Scholarly Paper project report and present findings as part of the course requirements</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 30
An acceptable scholarly paper must be technically sound, adhere to accepted formatting standards for technical reports, and contain a significant literature review evidenced by a comprehensive list of cited references.

A list of courses requiring projects that can be used to satisfy the scholarly paper requirement will be published on the department website. Scholarly papers must be individual written project reports – not group projects. To qualify as a scholarly paper an oral presentation of the project is required. A passing grade for the project, reflecting both the written report and the oral presentation, satisfies the scholarly paper requirement.

A successful scholarly paper will be recorded by awarding a satisfactory (S) grade for ECE 797 Scholarly Paper. Students are eligible to attempt the scholarly paper and register for ECE 797 Scholarly Paper after completion of 18 hours of coursework. Students choosing the scholarly paper option are not eligible for graduation until they have received a final, passing grade for ECE 797 Scholarly Paper.

### Accelerated Master's

### Electrical Engineering, BS/Electrical Engineering, Accelerated MS

**Overview**

Highly-qualified students in the Electrical Engineering, BS (p. 1027) have the option of obtaining an accelerated Electrical Engineering, MS (p. 1032).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission Requirements**

Students in the Electrical Engineering, BS (p. 1027) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.25. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS (p. 1032) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students admitted to the accelerated program must maintain an overall GPA of at least 3.25 during the entire BS/MS program and present a GPA of at least 3.25 for the 24 credits of graduate work submitted for the MS degree.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

### Electrical and Computer Engineering, PhD

**Banner Code:** VS-PHD-ECE

**Academic Advising**

MSN 1G5
4400 University Drive
Fairfax, VA 22030
Phone: 703-993-1570
Email: ecephd@gmu.edu
Website: ece.gmu.edu/graduate-studies/phd-programs/ece-phd-program

The PhD program in Electrical and Computer Engineering educates students to do original research on ECE topics and to become technical leaders in their fields. It has a strong and growing reputation, as graduates from the department have become professors at other universities and researchers in various industrial and government research centers. Students may choose a research emphasis in areas such as communications, networking, computer engineering, control and robotics, signal processing, micro/nano-electronics, and bioengineering. The ECE PhD program requires coursework, a qualifying exam, a teaching assignment, a dissertation proposal and research competency exam, a research seminar, dissertation research, and a dissertation defense. Mason's general doctoral requirements apply to this program.

### Admissions & Policies

#### Admissions

All general Mason and specific Volgenau School admission requirements apply. Applicants must submit official transcripts, a resume, a goals statement, three letters of recommendation and official GRE General Test results. The GRE requirement is waived for Mason ECE master’s graduates with a 3.0 or greater GPA. Applicants whose native language is not English must demonstrate proficiency by taking the TOEFL or IELTS exam. The minimum score required for admission is 575 on the TOEFL paper-based exam, 230 on the TOEFL computer-based exam, 88 on the TOEFL internet-based exam (with a minimum of 20 in each section), or 6.5 on the IELTS exam. Application materials are reviewed by the ECE PhD committee, which makes a recommendation to the ECE department chair.

#### Policies

##### Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master’s degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.
Program Requirements

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. More than half of the 72 credits applied to the doctoral degree must be earned at Mason. The degree plan outlined in Degree Requirements is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Requirements

Degree Requirements

Total credits: 72

Doctoral Coursework

Courses that constitute a student's plan of study will be chosen in consultation with the student's advisor and/or dissertation committee, to include:

Select 18-30 credits

<table>
<thead>
<tr>
<th>Total Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>18-30</td>
</tr>
</tbody>
</table>

- 3 credits at the 600-level outside the department in a subject considered foundational for the area of emphasis. Typical examples are advanced mathematics or statistics courses for those pursuing an emphasis in communications, signal processing or control, physics courses for those desiring an emphasis in micro-/nano-electronics, computer science courses for those pursuing the computer engineering emphasis, and biology courses for those pursuing a bioengineering emphasis. Because such courses are usually not taken for master's degrees, this requirement can rarely be satisfied with a course taken previously.
- 6 credits within the department but outside the area of emphasis. This requirement may be satisfied with courses taken during previous studies, subject to approval.
- A maximum of 6 credits may be at the 500-level.
- A maximum of 6 credits of individualized reading courses at any level. Note that ECE 798 Research Project is primarily a master's level course and is not intended to be part of the PhD coursework.

Qualifying Exams

The ECE PhD Qualifying Exam tests students' knowledge of fundamental concepts and assesses their basic research skills. The exam consists of two parts: a written technical qualifying exam and a research qualifying exam requiring a written report and a presentation.

Technical Qualifying Exam

The Technical Qualifying Exam (TQE) is an in-class written exam that tests knowledge of fundamental concepts in a particular technical area. Students select one of three topics for their TQE:

1. Topic 1: Signals and Systems
2. Topic 2: Digital Design and Computer Organization
3. Topic 3: Circuits, Electronics, and Devices

Students must take the Technical Qualifying Exam within the first year after they have entered the program. The TQE is typically offered in late August, prior to the start of the fall semester. Students who enter the PhD program in the spring semester may request to take the TQE in January; such a request must be filed by the end of the spring semester.

Research Qualifying Exam

The purpose of the Research Qualifying Exam (RQE) is to assess whether students can define a research problem, critically review the literature related to the problem, apply appropriate research methods to study the problem, and interpret and communicate their results. The RQE requires students to complete a short research project and to document their results in a written report and an oral presentation. The RQE topic is defined by a faculty advisor in consultation with the student. A committee of three faculty members (the advisor plus two additional members) evaluates the written report and the oral presentation. During the presentation the student is expected to answer questions about their project and about fundamental concepts related to the research.

Evaluation

After a student has taken both the TQE and the RQE, the ECE PhD Committee reviews the exam results, the student's transcript, and a letter of recommendation from the student's advisor. Based on this information, the PhD Committee determines whether the student is qualified for the PhD program. If the student does not qualify on their first try, they may repeat one or both of the exams in the following year. The TQE and RQE may be repeated once. A student who fails to qualify on their second try is removed from the program.

Dissertation Research

A maximum of 24 credits of ECE 998 Doctoral Dissertation Proposal and ECE 999 Doctoral Dissertation may be applied to the degree. Students who choose to take fewer than 24 credits of ECE 998 Doctoral Dissertation Proposal and ECE 999 Doctoral Dissertation may earn the remaining credits from approved course work. Students cannot enroll in ECE 999 Doctoral Dissertation before they have advanced to candidacy. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for ECE 999 Doctoral Dissertation. Students cannot advance to candidacy and defend their dissertation during the same semester. Once enrolled in ECE 999 Doctoral Dissertation, students must maintain continuous registration in ECE 999 Doctoral Dissertation each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of ECE 999 Doctoral Dissertation during that summer term.

Total Credits 12-24
Advisor, Dissertation Director, and Dissertation Committee

The process of finding a dissertation topic and dissertation director is governed by the university’s policies, as described in the Requirements for Doctoral Degrees in the Academic Policies section of the catalog. Upon admission to the program, each student is assigned an ECE faculty member as an academic advisor. After the student passes the qualifying exam, the student proposes and the ECE department chair appoints a dissertation director who must be a Mason graduate faculty member with a full-time appointment. The dissertation director becomes the student’s academic advisor. Normally, the dissertation director is a member of ECE department; however, a member of another department may be appointed if warranted by the dissertation research topic. A dissertation committee should be formed within a year after the student has passed the qualifying exam. The dissertation committee consists of the dissertation director who acts as chair plus three or four additional members. All dissertation committees must include at least three members of the Mason graduate faculty, at least two of whom must be from the ECE Department. At least one member of the dissertation committee must be from outside the discipline of electrical and computer engineering. The outside member may be faculty from another Mason department or, if justified by the research topic, a qualified scientist or engineer from outside the university. All committee members must have a doctoral level degree. The dissertation committee must be approved by the ECE department chair. The dissertation director, as academic advisor, and the ECE Department chair must approve all decisions concerning a student’s course requirements and dissertation.

Dissertation Proposal, Research Competency Exam, Advancement to Candidacy

The student prepares a written dissertation proposal outlining the proposed research and submits it to the dissertation committee for approval. After completing coursework requirements and preparing a proposal, the student takes a research competency exam to demonstrate their preparation for dissertation research. The exam consists of a presentation of the dissertation proposal followed by an oral exam. The exam is administered by the student’s dissertation committee. The purpose of the oral exam is to verify that the student is familiar with the relevant material related to their research. The student is advanced to candidacy when he or she passes the oral exam and the dissertation committee approves the proposal.

Dissertation Research and Defense

Students conduct dissertation research under the guidance of their dissertation director, with regular consultation with other members of the dissertation committee. During this period, students must present their research results at least once in the form of a department seminar. The dissertation must represent an achievement in research, must be a significant contribution to its field, and should be deemed publishable in refereed journals or at highly selective conferences. On completion of the dissertation the student may be asked, at the discretion of the dissertation committee, to present a predefense in the presence of the committee members. The dissertation committee and the department chair approve the student’s application for a public defense of the doctoral dissertation. A copy of the dissertation must be placed in the University Libraries four weeks prior to the public defense. After a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of doctor of philosophy.

Teaching Requirement

To acquire teaching experience, each PhD student is required to participate in the department’s teaching activity. The requirement is typically satisfied by working as a recitation instructor for one semester, presenting several lectures within a course, or performing other teaching work approved by the department.

Website: ece.gmu.edu/graduate-certificates/certificate-program-networks-system-integration-and-testing

This graduate certificate provides graduate students with the opportunity to reach a demonstrated level of competence in computer networks, system integration, and software testing. Coursework toward the graduate certificate may be used for credit toward the MS in Electrical Engineering or Computer Engineering degrees; however, the certificate’s primary purpose is to provide a well-defined program for students who want to advance their knowledge of modern networks, systems integration and testing, but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions

The networks, system integration, and testing certificate program is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities, with a GPA minimum established by The Volgenau School for all MS programs.

Policies

Program Requirements

The certificate is awarded on successful completion of five graduate courses (15 credits) from the list of required courses. A cumulative GPA of 3.00 is required, at most one course with a grade of C may be applied toward the certificate, and no more than one, 3-credit graduate course in the appropriate discipline may be transferred into the certificate from an appropriately accredited program at another institute of higher learning.

Fairfax, VA 22030

Phone: 703-993-1569
Email: ece@gmu.edu
Website: ece.gmu.edu/graduate-certificates/certificate-program-signal-processing

The Department of Electrical and Computer Engineering, in conjunction with the Department of Statistics, offers the certificate in signal processing, which provides graduate students with an opportunity to reach a demonstrated level of competence in signal processing. Coursework for the graduate certificate can be used for credit toward the MS in Statistical Science as well as the MS in Electrical or Computer Engineering. However, the certificate’s primary purpose is to provide a well-defined body of information for students who want to advance or update their knowledge in this fast-moving field, but who do not necessarily wish to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions

The graduate certificate is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities and hold graduate status (either degree or non-degree) in the Volgenau School.

Policies

Program Requirements

The certificate is awarded on completion of five graduate courses (15 credits) in signal processing. A cumulative GPA of 3.00 is required, and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two foundation courses taken by all students and three elective courses.

Tactical Computer Operations (TCO) is a discipline involving the offensive side of computer and forensics operations. Expertise in this field includes the ability to understand and work at the operating system kernel level, understand and work with shared libraries and application program interfaces, manipulation of network traffic at the frame level, network stack redirection, anti-forensic obfuscation, penetration engineering, and reverse engineering. Mobile devices have also opened up a plethora of offensive opportunities that needs to be understood and mastered in order to better protect and serve.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions
Students applying to this certificate must hold a bachelor's degree in either computer science or computer engineering. Prospective students without these specific degrees will need to have a technical bachelor's degree and show academic competence in the areas of: C (C++, C#, Objective C), Assembler, discrete mathematics, and computer networking. An undergraduate grade point average (GPA) of 3.0 or better (4.0 scale) is required. The Graduate Record Exam (GRE) is not required.

Policies
Course Prerequisites
Students must meet prerequisites for courses by either taking the appropriate undergraduate courses or through instructor permission.

The innovative, interdisciplinary MS in Telecommunications Program provides a blend of cutting-edge engineering-oriented courses in wireless and fiber communications systems, networks, computers, and Internet protocols, combined with courses on telecommunications policy, legal, business, and international aspects. The interdisciplinary program is designed for students who wish to enter the field of telecommunications or are working in the field and want to advance their knowledge of telecommunications. It concentrates on practical applications of telecommunications rather than on a theoretical approach. It focuses on the engineering and IT aspects of telecommunications, in combination with the interdisciplinary knowledge offered by selected courses in telecommunications business and policy. More than 30 new engineering and IT courses have been designed especially for this program, including four certificate programs that may be incorporated into, and taken concurrently with, the MS in telecommunications.

Program Structure

A novelty of the program is its structure, which consists of four emphasis areas. This structure allows students to identify more clearly the various specialties in telecommunications technology. Students enjoy considerable flexibility because they are able to design their master's programs to fit their technical preferences, including the option of taking courses in other programs at Mason. A majority of the course material comes from the Electrical and Computer Engineering (ECE) Department and the Systems Engineering and Operations Research (SEOR) Department. Courses offered by ECE focus on network technologies, such as fiber optics, and Internet protocols; network applications, such as networked multicomputer systems, client-server architectures, and network management; and wireless communications, such as digital communications, satellite communications, mobile communications, and GPS. Unique courses in the telecommunications program, such as Border Gateway Protocols, Interior Gateway Protocols, MPLS, GPS, and Advanced Link Design, complement courses given in ECE programs. In addition to the many new telecommunications courses developed for this program, ECE already offers a number of other graduate courses in communications as part of the graduate electrical engineering and computer engineering programs. Those courses may also be taken for credit under the MS in Telecommunications Program, provided students have the prerequisite background. Courses related to systems engineering, project management, and business of telecommunications (including the design and optimization of large, complex communication networks) are offered by SEOR. Both SEOR fields, systems engineering and operations research, play significant roles in all aspects of the design, operation, and business of telecommunications, and this knowledge is important for students of telecommunications. The blend of in-depth knowledge of specific elements of telecommunications technology, combined with knowledge of broader issues in telecommunications, is increasingly necessary for people who intend to work in a management or decision-making position within the telecommunications industry, telecommunications-related businesses, or government institutions dealing with telecommunications. The MS in telecommunications provides that blend.

Telecommunications, MS

Banner Code: VS-MS-TCOM

Admissions & Policies

Admissions Requirements

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?)
academicUnit=VS&_ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

The program is open to students who hold a BS or BA degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, and students who have equivalent work experience indicating analytical aptitude. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary course work before they are allowed to enroll in any of the core courses or emphasis courses in the program. Applicants who have not studied mathematics beyond the equivalent of algebra II/trigonometry at high school or introductory calculus classes (such as those offered in business or database management programs) will be required to take TCOM 530 Data Communications Fundamentals, the foundation course that prepares students for TCOM 521 Systems Engineering for Telecommunications Management, prior to being allowed to take TCOM 500 Modern Telecommunications. A minimum undergraduate GPA of 3.00 is usually required.

Students may be admitted to the MS program as degree seeking students, or they may be admitted for nondegree study within the program, allowing them to take individual courses. Students in the nondegree program may apply to the degree program, provided their GPA within the MS in Telecommunications Program is 3.00 or above. Up to 12 credits earned in nondegree study may be transferred into the degree program, provided each of the courses to be transferred in was passed with a grade of B or above.

**Policies**

**Program Format**

The program consists of 9 credits of mandatory engineering and technology core courses (TCOM 500 Modern Telecommunications, TCOM 530 Data Communications Fundamentals and TCOM 521 Systems Engineering for Telecommunications Management); 6 credits of electives drawn from an interdisciplinary group of core courses (PUBP 726 Telecommunications Policy, TCOM 547 Project Management in Telecommunications, or TCOM 750 Coordinating Seminar), and a basic switching lecture and laboratory course (TCOM 514 Basic Switching: Lecture and Laboratory Course) or an Internet protocol routing lecture and laboratory course (TCOM 515 Internet Protocol Routing: Lecture and Laboratory Course); and four areas of emphasis. Students who enter the program with an undergraduate degree that shows evidence of successfully completing LAN and WAN technologies may substitute TCOM 535 The TCP/IP Suite of Internet Protocols for TCOM 530 Data Communications Fundamentals in their mandatory core program, respectively.

Students must complete 30 credits of coursework through a combination of core and emphasis courses. The core consists of 15 credits, with the remaining 15 credits earned in areas of emphasis. The emphases are sub-areas of telecommunications that provide necessary depth.

Students are usually expected to take courses from at least two emphasis areas. Up to 6 credits from the core program may be carried forward into the emphases, thus permitting up to 6 credits of electives to be taken inside or outside the prime emphasis area chosen by the student. TCOM 530 Data Communications Fundamentals may be carried forward into emphasis area 1, 2, or 3; TCOM 521 Systems Engineering for Telecommunications Management may be carried forward into emphasis area 4. Double counting is not permitted, but the courses carried forward into a given emphasis may permit that area's credit requirement to be satisfied, thus allowing elective courses to be taken outside that area. Usually, a minimum of 6 credits is needed to satisfy one emphasis area.

**Program Requirements**

Students must complete a minimum of 30 graduate credits with a GPA of 3.00 or higher. Students must earn a B (3.00) or above in core courses TCOM 500 Modern Telecommunications, TCOM 521 Systems Engineering for Telecommunications Management and TCOM 530 Data Communications Fundamentals. Up to 6 credits of a combination of C grades may be carried within the program from the remaining core courses or from the emphasis courses, provided the overall GPA is 3.00 or higher.

**Telecommunications Certificates**

Four 15-credit certificates are offered by the MS in TCOM Program. Students may pursue these certificates as stand-alone programs or as part of their degree program. For the former, they are required to submit a graduate program application indicating their desire to enroll in the appropriate graduate certificate program. For the latter, because they are already enrolled in a degree program, they need only add the appropriate graduate certificate to their graduate program status at least one semester prior to the award of the certificate. The courses within the certificates are drawn directly from the MS in TCOM Program. If a student initially signs up for only a certificate program, it is possible to transfer into the degree program later, transferring up to 12 credits into the degree program. Students must therefore ensure they have transferred into the degree program prior to starting course work beyond 12 credits in the certificate program to ensure that all credits from the certificate program may transfer into the degree program. Students who transfer from a certificate program into the degree program may earn the certificate and the degree on satisfactory completion of the respective requirements. Applicable courses may count for the certificate and the degree programs.

Students may transfer in one 3-credit course from another program or institution toward their TCOM certificate, provided the course in question was passed with a B grade or higher. Students are permitted to carry one C grade within their certificate program, provided the overall GPA is 3.00 or above.

- Advanced Networking Protocols for Telecommunications Graduate Certificate (p. 1019)
- Network Technologies and Applications Graduate Certificate (p. 1036)
- Telecommunications Forensics and Security Graduate Certificate (p. 1038)
- Wireless Communications Graduate Certificate (p. 1044)

<tr>
<td>TCOM 547</td>
<td>Project Management in Telecommunications</td>
</tr>
<tr>
<td>TCOM 750</td>
<td>Coordinating Seminar</td>
</tr>
</tbody>
</table>

**Area of Emphasis**

Total Credits: 15

Areas of Emphasis

A minimum of 15 credits is required. Students usually take 15 credits from at least two of the four emphasis areas, or they may elect to take all 15 credits from the systems engineering of telecommunications area (emphasis 4). Students electing to carry forward a core course (TCOM 530 Data Communications Fundamentals or TCOM 521 Systems Engineering for Telecommunications Management) into an appropriate emphasis area have the option of taking an elective course in that area or an alternate area to bring the total number of credits in the emphasis area to 15.

An area of emphasis can be completed by courses listed under the emphasis or considered applicable to that area for a total of at least 6 credits. Some emphasis courses are in more than one area; for example, TCOM 535 The TCP/IP Suite of Internet Protocols is in emphasis 1, network technologies, and emphasis 2, network applications.

Basic courses in each emphasis have been specially designed for the telecommunications program. These courses do not require completion of prerequisites from other MS programs in the Volgenau School. Other courses, which are marked with asterisks, are from other MS programs in the Volgenau School and represent viable options for students who have appropriate prerequisites in some technical areas. Although these courses assume certain prerequisites from their specific MS programs, advanced students who already know the prerequisite material can seek instructor permission to enroll in those courses.

Alternatives to completing each emphasis area by using appropriate combinations of courses not listed under a given module may be admissible subject to prior approval by the program director. In addition, independent study, reading, and research courses may be taken in all five areas. These courses permit students to make use of their work experiences to undertake non-classroom courses for credit within the program.

Mason has negotiated an articulation agreement with the University of Virginia that allows up to 12 credits of the Informational Systems Management Certificate Program from the University of Virginia to be transferred into emphasis area 4 of the TCOM Program. In addition, graduate students from the National Defense University (NDU) may transfer up to 9 credits from NDU’s Information Security Certificate Program.

A capstone project course, TCOM 699 Telecommunications Project Course, is required under the systems engineering of telecommunications area (emphasis 4) should the student elect to take all 15 credits in this area.

Courses listed below from other graduate programs in the Volgenau School listed can be taken for credit in this program if the student has the appropriate prerequisites. Other courses from other programs may be taken for credit, with prior approval.

### Accelerated Master’s

#### Electrical Engineering, BS/Telecommunications, Accelerated MS

**Overview**

Highly-qualified students in the Electrical Engineering, BS (p. 1027) have the option of obtaining an accelerated Telecommunications, MS (p. 1039).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

#### Admission Requirements

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.10 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Telecommunications Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.10 undergraduate GPA.

#### Accelerated Option Requirements

Students must complete 145 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.00 during the MS program and present a GPA of at least 3.00 for the 24 credits of graduate work submitted for the MS degree.

#### Code | Title | Credits
--- | --- | ---
TCOM 535 | The TCP/IP Suite of Internet Protocols | 3
TCOM 551 | Digital Communication Systems | 3
TCOM 552 | Introduction to Mobile Communications Systems | 3
TCOM 562 | Network Security Fundamentals | 3
TCOM 606 | Advanced Mobile Communications Systems | 3
TCOM 607 | Satellite Communications | 3
TCOM 653 | Global Positioning System (GPS) | 3
TCOM 660 | Network Forensics | 3
TCOM 707 | Advanced Link Design | 3
ECE 732 | Mobile Communication Systems | 3
ECE 741 | Wireless Networks | 3

#### Emphasis 3, Wireless Communications

Select 6 credits from the following:

TCOM 535 | The TCP/IP Suite of Internet Protocols | 3
TCOM 551 | Digital Communication Systems | 3
TCOM 552 | Introduction to Mobile Communications Systems | 3
TCOM 562 | Network Security Fundamentals | 3
TCOM 606 | Advanced Mobile Communications Systems | 3
TCOM 607 | Satellite Communications | 3
TCOM 653 | Global Positioning System (GPS) | 3
TCOM 660 | Network Forensics | 3
TCOM 707 | Advanced Link Design | 3
ECE 732 | Mobile Communication Systems | 3
ECE 741 | Wireless Networks | 3

#### Emphasis 4, Systems Engineering of Telecommunications

This area of emphasis can be taken as one of two emphases or as one 15-credit emphasis. No more than two SYST courses can be taken within this area.

TCOM 547 | Project Management in Telecommunications | 3
TCOM 561 | Security, Privacy, and Applied Cryptography for Telecommunications | 3
TCOM 699 | Telecommunications Project Course | 3
SYST 510 | Systems Definition and Cost Modeling | 3
SYST 513 | Total Systems Engineering, Reengineering and Enterprise Integration | 3
SYST 542 | Decision Support Systems Engineering | 3
INFS 612 | Principles and Practices of Communication Networks | 3
INFS 614 | Database Management | 3
INFS 640 | Introduction to Electronic Commerce | 3
ITRN 772 | International Telecommunications | 3

#### Degree Conferral

Students must apply to have the BS conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

#### Individualized Study, BIS/Telecommunications, Accelerated MS

**Overview**

Highly-qualified students in the individualized Study, BIS (p. 529) have the option of obtaining an accelerated Telecommunications, MS (p. 1039).
For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Individualized Study, BIS (p. 529) program may apply for this option if they have earned 90 undergraduate credits (including 15 Mason resident credits) with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1039) program.

Accelerated Option Requirements
Students must complete all requirements for the BIS and MS programs, with 6 credits overlap.

Students select TCOM courses from the list below to meet the requirements of the accelerated program. Six credits of TCOM courses will be applied to meet the requirements of both the BIS and MS TCOM programs. An additional three credits of TCOM courses is required for the BIS Individualized Concentration (IND) with emphasis on telecommunication. Note that accelerated students can only take the courses in the list below if they passed the listed prerequisite course with a B or higher.

BIS Concentration
Total credits: 34-46

Students who are pursuing the Individualized Study, BIS (p. 529), Individualized concentration (IND) with an emphasis on telecommunications must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select an additional 500-level TCOM course(s) from the list below</td>
<td>3</td>

<tr>
<td>TCOM 608</td>
<td>Optical Communications Systems</td>
<td>3</td>
</tr>
<tr>
<td>TCOM 631</td>
<td>Voice Over IP</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Accelerated students who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 530 in the Telecommunications, MS core. Other TCOM courses may be approved on a case-by-case basis.

See each course for individual prerequisite requirements.

Degree Conferral
Students must apply the semester before they expect to complete the BIS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Telecommunications, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Telecommunications, MS (p. 1039).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Information Technology, BS (p. 1051) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1039) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select six credits from the following (the TCOM courses listed for 1.5 credits must be taken in pairs):</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>TCOM 500</td>
<td>Modern Telecommunications (To satisfy the IT 300 BS, AIT requirement)</td>
<td></td>
</tr>
<tr>
<td>TCOM 530</td>
<td>Data Communications Fundamentals (To satisfy the IT 341 BS, AIT requirement)</td>
<td></td>
</tr>
<tr>
<td>TCOM 535</td>
<td>The TCP/IP Suite of Internet Protocols (To satisfy the IT 441 BS, AIT requirement)</td>

</tr>
<tr>
<td>TCOM 631</td>
<td>Voice Over IP (To satisfy the IT 484 BS, AIT requirement)</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>6</td>
</tr>
</tbody>
</table>

Note:
Students in the accelerated option who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 530 Data Communications Fundamentals,
which is listed in the MS TCOM core. Alternative sections of TCOM courses to satisfy requirements in the AIT undergraduate program may be made with the approval of the undergraduate academic advisor.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Systems Engineering, BS/Telecommunications, Accelerated MS**

**Overview**

Highly-qualified students in the Systems Engineering, BS (p. 1082) have the option of obtaining an accelerated Telecommunications, MS (p. 1039).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission Requirements**

Students in the Systems Engineering, BS (p. 1082) program who preferably have chosen to take the systems engineering of telecommunications elective sequence may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Other students will be considered on their individual merit. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1039) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap selected from the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCOM 500</td>

1 Students may earn the credits from the Telecommunications, MS (p. 1040) emphasis areas 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

**Department of Information Sciences and Technology**

Phone: 703-993-3565
Website: ist.gmu.edu

Information Sciences and Technology offers undergraduate and graduate programs to develop expertise in applying information technology to
support business applications. The programs emphasize problem-solving, communication, and technical and leadership skills.

Undergraduate

The BS in Information Technology program aims to meet the existing and emerging needs of industry by educating students in current principles and practices in the application of information technology. The program focuses on equipping graduates with effective skills for interacting at the management level as well as the technical level. Graduates are hired in positions that focus on the application of IT in an increasing number of emerging sub-disciplines, including network administration and telecommunications, information security, web development and multimedia, database technology and programming, and health information technology.

Graduate

The MS in Applied Information Technology is the very best graduate education in IT for high-potential leaders, especially those working on IT solutions that affect the federal government, industry or non-profit. Its objective is to graduate individuals of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. The MS in AIT provides a high quality curricula for students seeking to pursue their careers in the leading IT areas including Cyber Security, Big Data Analytics, Knowledge Mining, Data Analytics in Social Media, and Cyber-Human Interaction.

At the doctoral level, the department offers a concentration in the Volgenau School’s PhD in IT program.

Certificates and Minor

The department also offers two certificate programs, IT Entrepreneurship and Information Technology, for students seeking to add an IT certification to their existing credentials. Students currently pursuing undergraduate degrees in other disciplines may choose to add a minor in Information Technology.

The MS in Applied Information Technology is the very best graduate education in IT for high-potential leaders, especially those working on IT solutions that affect the federal government, industry or non-profit. Its objective is to graduate individuals of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. The MS in AIT provides a high quality curricula for students seeking to pursue their careers in the leading IT areas including Cyber Security, Big Data Analytics, Knowledge Mining, Data Analytics in Social Media, and Cyber-Human Interaction. Faculty include professors from the Volgenau School, the School of Business, and the College of Humanities and Social Sciences, plus industry leaders with unique reputations in the subject area as adjunct professors and guest lecturers. The faculty expose students to the pragmatic issues of IT, not just the theory.

Admissions & Policies

Admissions
Applicants must have completed a baccalaureate degree from an accredited program with a reputation for high academic standards and an earned GPA of 3.00 or better in their 60 highest-level credits. They must be experienced in the fundamentals of IT and quantitative methods. In addition, applicants must:

- Provide two letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s professional accomplishments.
- Provide a resume and detailed statement of career goals and professional aspirations.
- If their native language is not English, students must earn a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam (a minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship).

Requirements

Degree Requirements
Total credits: 30-36 credits

Completion of the MS program requires a minimum of 30 approved graduate credits (10 courses). To provide a common background in the fundamentals of information sciences and technology, all students are required to complete four core courses. In addition to the core courses, students must choose a concentration within the program by taking six courses from one of the concentration areas listed below.

Students in all concentrations may take other VSE graduate-level courses not listed below as part of their MS technical electives subject to advisor approval.

1 Students in this concentration may also take other IST graduate-level courses not listed below as part of their MS technical electives, subject to approval of the advisor.

---

**Accelerated Master’s**

**Individualized Study, BIS/Applied Information Technology, Accelerated MS**

**Overview**

Highly-qualified students in the individualized Study, BIS (p. 529) have the option of obtaining an accelerated Applied Information Technology, MS (p. 1046).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 66). Mason undergraduate students in the BIS Program can apply in the semester in which they will have completed 90 or more credits (including 15 Mason resident credits) applicable toward the BIS. Students must have an overall GPA of at least 3.30 to apply to the program. Criteria for admission are identical to criteria for admission into the MS in AIT Program, except that students do not need to have completed an undergraduate degree prior to acceptance into the accelerated program.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form (http://registrar.gmu.edu/forms).

**Accelerated Option Requirements**

Students in the accelerated master’s option must maintain a minimum 3.30 GPA in the undergraduate segment until they have satisfied all requirements for the BIS degree. On completion and conferral of the undergraduate degree they submit the Bachelor’s/Accelerated Master’s Transition Form (http://registrar.gmu.edu/forms) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. Students must complete all credits that satisfy requirements of the BIS program and those of the MSAIT program, with two courses overlapping from the courses necessary to earn the BiS with a
concentration IND (individualized), applied information technology emphasis as listed below.

Note: All of the prerequisite courses indicated below must be passed with a grade of C or higher.

### Information Technology, BS/Applied Information Technology, Accelerated MS

#### Overview
Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Applied Information Technology, MS (p. 1046).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

#### Admission Requirements
Students in the Information Technology, BS (p. 1051) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Applied Information Technology, MS (p. 1046) program.

#### Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of AIT 500-level core courses in place of the corresponding IT 300-level courses required for the undergraduate degree requirements.

Students must register for two of the following courses in place of the corresponding 300-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 512</td>
<td>Algorithms and Data Structures Essentials (satisfies the IT 306 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>AIT 524</td>
<td>Database Management Systems (satisfies the IT 314 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>AIT 542</td>
<td>Fundamentals of Computing Platforms (satisfies the IT 342 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 76).

### Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

### Information Technology Entrepreneurship Undergraduate Certificate

**Banner Code: VS-CERB-ITER**

**Phone:** 703-993-3565  
**Email:** bsit@gmu.edu  
**Website:** http://ist.gmu.edu/programs/undergraduate-programs/

This certificate prepares IT and engineering students for successful careers as entrepreneurs in the area of information technology. Specifically, they will acquire a unique body of knowledge related to innovation, both on the information technology/engineering/inventive side and on the entrepreneurial side, which will give them a competitive advantage in the difficult market where only very few new companies are able to survive and grow.

This certificate is designed for students who are working on or possess an undergraduate degree in information technology, computer science, engineering or a related domain and want to focus on IT innovation and entrepreneurship.

Students enrolled in the certificate must be part of an entrepreneurship team (E-Team) with the goal of creating an IT venture. The E-Teams will be mentored by faculty associated with the certificate. Students who will create, or be a core team member of, a start-up company that has cumulated revenues and funding of $10,000 during their enrollment in the certificate will graduate with a Certificate of Excellence in IT Entrepreneurship.

The undergraduate certificate in Information Technology Entrepreneurship may be pursued on a full-time basis except when limited by prerequisite constraints.
Admissions & Policies

Admissions

Students must have information technology experience at the level of IT 106 Introduction to IT Problem Solving Using Computer Programming, IT 206 Object Oriented Techniques for IT Problem Solving, IT 213 Multimedia and Web Design, IT 214 Database Fundamentals, and IT 223 Information Security Fundamentals and either a BS in a technical field (with a 3.00 GPA or higher) or current enrollment in a technical undergraduate major.

Information Technology Minor

Banner Code: INFT

Academic Advising

5400 Nguyen Engineering Building
Fairfax Campus

101 Bull Run Hall
Science and Technology Campus

Phone: 703-993-3565
Email: bsi@gmu.edu
Website: http://ist.gmu.edu/programs/undergraduate-programs/

The minor is designed primarily for students who desire to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this minor provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The minor requires a minimum of 18 credits, including 12 credits of core courses. Beyond these requirements, students must select two additional technical focus courses (6 credits). Students pursuing the IT minor should consult with an advisor to select their additional courses.

Students must satisfy all prerequisites and other requirements in order to take any of the courses listed below. Courses chosen for the technical focus must be chosen with a coordinator in the Information Sciences and Technology department. Not all courses are offered each semester.
This certificate is designed primarily for those students who have earned a bachelor's degree or current undergraduate students who desire deeper knowledge than what can be accomplished through the IT minor. It allows students to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this undergraduate certificate provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The certificate requires a minimum of 24 credits, including 15 credits of core courses. Beyond these requirements, students must select three additional IT courses (9 credits, at least 3 upper division credits). Students pursuing the IT undergraduate certificate should consult with an advisor to select their additional courses.

Students pursuing only the undergraduate certificate in information technology will not maintain full-time status which requires a minimum of 12 credits per semester.

</table>
The Information Technology, BS prepares students to apply IT to support business processes. The degree produces graduates with strong problem-solving, writing, and communication skills who successfully compete for technical employment and are prepared for advanced study. The objectives of the Information Technology, BS program relate to the abilities of the graduates several years after graduation. Graduates of the program are expected within three to five years of graduation to have:

- Been employed in a position in which they have successfully used their information technology skills (including: problem solving, analytic, presentation and personal skills) as evidenced by achieving improved organizational objectives;
- Progressed through increasing levels of responsibility in the workplace;
- Demonstrated ethical, social and professional responsibility consistent with professional societies;
- Worked effectively in teams, whether as a participant or as a leader;
- Grown through self-study, continuing education and professional development relevant to their profession.

The program can be successfully completed in eight full-time semesters with an average of 15 credits each semester. It is also possible for students to complete the degree on a part-time basis. The 120-credit degree requirement consists of Mason Core requirements, IT foundation and core courses, and courses required for the chosen IT concentration. At least 30 credits toward the BS degree must be earned at Mason, and at least 45 credits must be at or above the 300 level. Upper division courses in the program are taught at the Science and Technology campus, where many Department of Information Sciences and Technology faculty offices are located.

This bachelor’s degree program is accredited by the Computing Accreditation Commission of ABET (http://www.abet.org).

Admissions & Policies

Admissions

Students who meet Mason’s general eligibility requirements may apply for admission to the IT major. Admission is based on the appropriateness of the student’s academic objectives and the likelihood of the student benefiting from the program. Preference in admission is given to students who have four years of high school mathematics, including precalculus.

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 84).

Change of Major

Mason students considering a change of major to Information Technology must have a minimum GPA of 3.00 in all completed 100 and 200 level IT foundation and core courses completed at Mason that are required for the major, and a grade of C or better in IT 106 Introduction to IT Problem Solving Using Computer Programming. Grades in approved foundation and core substitution courses taken at Mason will be included.
Note: IT courses at the 300 and 400 level are restricted to students who have declared an Information Technology major, minor, or undergraduate certificate, and to students in the BAS or BIS program.

Advanced Study

Mason offers students the ability to complete both BS and MS degrees in a shorter time through an Accelerated Masters (MS) program. Choosing to pursue an accelerated MS may affect a student’s choice of courses in the BS program. Students should consult with an advisor for assistance.

Grades

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the BS in Information Technology, students must have a GPA of 2.75 or better across the IT foundation, core, capstone, and concentration courses. Additionally, students must have a C or better in their foundation, core, capstone, and concentration courses. Furthermore, students must have a B or better in gateway courses for the respective concentration.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Web Development and Multimedia (WDM)
To fulfill the requirements for a concentration, students need 15 credits made up of four courses from their chosen concentration and a fifth course chosen from any of the six concentrations. Students may choose to have two concentrations. To be eligible, the student must have a B or better in the gateway course for each concentration. If two concentrations are declared, the student must take four courses in each concentration, for a total of eight concentration courses.

Four courses selected from a single concentration 12
One course chosen from a different concentration 3
Total Credits 15

Network and Telecommunications (NTEL)
- ECE 301 Digital Electronics 3
- IT 366 Network Security I 3
- IT 441 Network Servers and Infrastructures 3
- IT 445 Advanced Networking Principles 3
- IT 455 Wireless Communications and Networking 3
- IT 465 Peer-to-Peer Systems and Overlay Networks 3
- IT 484 Voice Communications Technologies 3
- IT 488 Fundamentals of Satellite Communications 3

Web Development and Multimedia (WDM)
- IT 315 Mobile Development 3
- IT 331 Web I: Web Development 3
- IT 332 Web Server Administration 3
- IT 335 Web Development using Content Management Systems 3
- IT 390 Rapid Development of Scalable Applications 3
- IT 415 Information Visualization 3
- IT 431 Web II: Advanced Web Development 3
- IT 436 Agile Web Development with Open Source Frameworks 3

Other Major Requirements
Select 7 credits of natural science, including at least one 4-credit course with lab 1
- COMM 100 Public Speaking (Mason Core) (p. 135) 3
  or COMM 101 Interpersonal and Group Interaction (Mason Core) (p. 135) 3
- IT 293 Applied IT: Junior Transition 1
- MATH 108 Introductory Calculus with Business Applications (Mason Core) (p. 135) 3-4
  or MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 135) 3-4
Total Credits 14-15

1 Students should choose these from the list of courses approved for Mason Core (these credits can also apply toward Mason Core requirements).

Additional Mason Core
Students must complete all Mason Core (p. 135) requirements not fulfilled by major requirements. All students must complete at least 24 credits of social science and humanities coursework, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed here, including COMM 100 Public Speaking (Mason Core)
Information Technology, BS

(p. 135) or COMM 101 Interpersonal and Group Interaction (Mason Core) (p. 135).

Written Communication (p. 135) 6
Literature (p. 140) 3
Arts (p. 137) 3
Western Civilization/World History (p. 143) 3
Social and Behavioral Sciences (p. 142) 3
Global Understanding (p. 139) 3
Total Credits 21

Writing-Intensive Requirement
The university writing-intensive requirement is satisfied by IT 343 IT Project Management.

Electives
Select additional coursework to bring the total number of credits to 120 8-9
Total Credits 8-9

Accelerated Master’s

Information Technology, BS/Information Security and Assurance, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1002).

Admission Requirements
Students in the Information Technology, BS (p. 1051) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the Information Security and Assurance, MS (p. 1002) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 614</td>
<td>Database Management (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>INFS 622</td>
<td>Information Systems Analysis and Design (satisfies as one DTP concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students must complete MATH 125 Discrete Mathematics I (Mason Core) (p. 135) as their discrete math requirement and IT 306 Program Design and Data Structures as part of their concentration requirements in the BS program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred in addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Information Systems, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Information Systems, MS (p. 1006).

Admission Requirements
Students in the Information Technology, BS (p. 1051) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the Information Systems, MS (p. 1006) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

<table>
<thead>
<tr>

<td>3</td>
</tr>
<tr>
<td>INFS 622</td>
<td>Information Systems Analysis and Design (satisfies as one DTP concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students must complete MATH 125 Discrete Mathematics I (Mason Core) (p. 135) as their discrete math requirement and IT 306 Program Design and Data Structures as part of their concentration requirements in the BS program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Information Technology, BS/Software Engineering, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Software Engineering, MS (p. 1012).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Information Technology, BS (p. 1051) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Software Engineering, MS (p. 1012) Program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>SWE 619</td>
<td>Object-Oriented Software Specification and Construction (satisfies as one DTP concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students must complete MATH 125 Discrete Mathematics I (Mason Core) (p. 135) as their discrete math requirement and IT 306 Program Design and Data Structures as part of their concentration requirements in the BS program

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Digital Forensics and Cyber Analysis (title change pending SCHEV approval), Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Digital Forensics and Cyber Analysis, MS (p. 1025).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Information Technology, BS (p. 1051) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics and Cyber Analysis, MS (p. 1025) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with two of the following three courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis (satisfies the IT 357 requirement for the INFS concentration course in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics (satisfies as one NTEL concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Telecommunications, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Telecommunications, MS (p. 1039).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Information Technology, BS (p. 1051) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1039) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs.

Select six credits from the following (the TCOM courses listed for 1.5 credits must be taken in pairs):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCOM 500</td>
<td>Modern Telecommunications (To satisfy the IT 300 BS, AIT requirement)</td>
<td>3</td>
</tr>
<tr>
<td>TCOM 530</td>
<td>Data Communications Fundamentals (To satisfy the IT 341 BS, AIT requirement)</td>
<td>3</td>
</tr>
</tbody>
</table>
Intelligence Technologies Graduate Certificate

TCOM 535  The TCP/IP Suite of Internet Protocols (To satisfy the IT 441 BS, AIT requirement)
TCOM 631  Voice Over IP (To satisfy the IT 484 BS, AIT requirement)

Total Credits 6

Note:

Students in the accelerated option who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 530 Data Communications Fundamentals, which is listed in the MS TCOM core. Alternative sections of TCOM courses to satisfy requirements in the AIT undergraduate program may be made with the approval of the undergraduate academic advisor.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Applied Information Technology, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS (p. 1051) have the option of obtaining an accelerated Applied Information Technology, MS (p. 1046).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements

Students in the Information Technology, BS (p. 1051) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Applied Information Technology, MS (p. 1046) program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of AIT 500-level core courses in place of the corresponding IT 300-level courses required for the undergraduate degree requirements.

Students must register for two of the following courses in place of the corresponding 300-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 512</td>
<td>Algorithms and Data Structures Essentials (satisfies the IT 306 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>AIT 524</td>
<td>Database Management Systems (satisfies the IT 314 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 76).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

This graduate certificate offers courses in four key elements of intelligence analysis. Designed for professionals who work for, or in support of, intelligence community agencies, it provides additional academic preparation for post-bachelor’s students who may not wish to complete a full master’s program, as well as for master’s graduates who wish to take the area-specific courses a certificate provides.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

A bachelor’s degree is required for admission to the program.

</table>
Mechanical engineering is the broadest of the engineering disciplines, and traces its origins to antiquity. The discipline of mechanical engineering involves anything that moves or uses energy. There are two major stems in mechanical engineering: mechanical systems and thermal fluid systems. Mechanical engineers design, build, and analyze complex devices, systems, and processes that involve the conversion of energy from one form to another, the production of work, and the transport of energy and mass from one location to another.

Today, the scope of the mechanical engineering discipline is ever-expanding. Mechanical engineers work in industries that include, but are not limited to, the aerospace, bio-pharmaceutical, civil, computer and cyber, biomedical, industrial, materials and manufacturing industries. They provide innovative solutions for contemporary problems and address problems yet identified. For example, 3-D printed components are readily being used in manufactured components, as part of medical implants and devices and even in structural applications. The mechanical performance of the components will likely vary dramatically from the ideal laboratory environment in which they were produced. Mechanical engineers are needed to characterize these aggressive environments in which they may be used, design test matrices to study their performance, and determine environmentally-based mechanical properties needed for design.

The Mechanical Engineering, BS is designed to support the goal of educating leaders for the future – men and women capable of meeting the needs of society. The curriculum is designed to provide its graduates with the technical skills and competencies to analyze and design both mechanical and thermal systems, and to give them an in-depth experience in one of these two areas. With a solid foundation in these discipline-specific areas, graduates of the program will be well-prepared to enter any of the industries identified above. All students will take core courses in both content areas through their junior year. During their senior year, they will have the opportunity to focus their program of study with a design elective and three technical electives. These electives can be arranged to focus on areas such as advanced manufacturing, aerospace, bioengineering, robotics, or sustainable energy.

Admissions & Policies

Admissions
To be admitted to the minor, students must have completed MATH 114 Analytic Geometry and Calculus II and PHYS 160 University Physics I (Mason Core) (p. 135)/PHYS 161 University Physics I Laboratory (Mason Core) (p. 135) with a grade of C or better.

Policies
The minor in mechanical engineering consists of a minimum of 20-21 credit hours of coursework. All students must complete 14 credit hours of core courses. They must also choose one of three 6-7 credit hour elective options. All courses must be completed with a grade of C or better.
Today, the role of mechanical engineer is ever expanding in order to find innovative solutions for contemporary problems, and to address problems yet to be identified. To meet the growing demands of worldwide energy needs spurred by population growth and dwindling supplies of fossil fuels, for instance, mechanical engineers seek innovations in nuclear energy, bio-fuels, wind, and tidal energies to build an energy portfolio that exploits these seemingly limitless resources. From product design, which spans from biomedical devices to turbo-machinery, to manufacturing, which develops machines and systems needed to process raw materials into these products, an awareness of the benefits of advanced materials for sensing and monitoring the health of these systems and an awareness of the stealth threats to manufacturing brought on by an ever present cyber threat are in the minds of the mechanical engineers. Now more mechanical engineers oversee the operations and management of large systems along with the fiscal and human resources needed to run them.

James Michener once said, "Scientists dream about doing great things. Engineers do them." Mechanical engineers use science to advance technologies and to develop products for the benefit of society, in a discipline which dates back to the earliest of times in civilization. The major in mechanical engineering has three program education objectives, namely:

- Graduates have demonstrated success as a mechanical engineer or their chosen career field;
- Graduates have advanced their educational pursuits through graduate education, professional registration, or similar means;
- Graduates have advanced their careers by engaging in professional society participation and community service outreach.

### Admissions & Policies

#### Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 84).

#### Change of Major

See Change of Major (p. 955) for more information.

#### Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

### Grade Requirements and Advising

Degree requirements include 121 credits distributed in three main areas: mechanical engineering, mathematics and basic science, and humanities and social sciences. Students must complete all math, science and Volgenau School of Engineering courses presented as part of the required 121 credits for the degree with a grade of C or better.

Students are required to see their faculty advisor at least once each year to plan their curriculum.

1  Both lower and upper level requirement.

Writing Intensive Requirement
Mason’s writing-intensive requirement is satisfied by ME 444 Mechanical Design II (Mason Core) (p. 135) (pending approval).

Capstone Experience Requirement
Mason’s synthesis requirement for mechanical engineering majors is satisfied by ME 444 Mechanical Design II (Mason Core) (p. 135).

Department of Statistics
Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

Statistical methods and methods for data analysis are crucial for researching and exploring the life sciences, natural sciences, social sciences, business, nursing, education, and engineering. The Statistics Department offers a variety of introductory courses and more advanced course work in specialized statistical methodology and applications. The focus of the department’s offerings is applied, computational, and theoretical, with special emphasis on biostatistics, graphics and visualization, federal statistics, and data analytics.

The department offers an undergraduate degree in statistics, as well as a minor in data analysis and a minor in statistics. A variety of advanced undergraduate courses are also available for inclusion in other degree programs.

At the graduate level, the department offers two master’s degrees, and two dual master’s degree programs, as well as a doctoral program.

Courses
Introductory courses are targeted for undergraduates in the College of Humanities and Social Sciences and the College of Health and Human Services, as well as in the Volgenau School of Engineering. The STAT 250 Introductory Statistics I (Mason Core) (p. 135)–STAT 350 Introductory Statistics II sequence is targeted for general audiences, while the STAT 344 Probability and Statistics for Engineers and Scientists I–STAT 354 Probability and Statistics for Engineers and Scientists II sequence is targeted for technical and scientific audiences. STAT 362 Introduction to Computer Statistical Packages deals with computer statistical packages and is appropriate as a second or third course for students from a wide variety of backgrounds. It is strongly recommended for students who elect to minor in data analysis.

Applied Statistics Graduate Certificate

Banner Code: VS-CERG-ASTA
Phone: 703-993-4835
Email: statistics@gmu.edu
Website: statistics.gmu.edu

This graduate certificate trains students in data analysis and statistical methodology. It is intended to complement PhD and MS programs outside the Department of Statistics. It is also intended to be responsive to the needs of those who teach or work in government/industry and want to increase their knowledge of statistics.

The certificate emphasizes the application of statistical tools, not theory. As such, there are no required prerequisite math courses, although one semester of calculus is strongly recommended.

This certificate provides a clear record of additional instruction in statistics for future graduate programs or employers.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions
Applicants should have an undergraduate degree from an accredited institution, with a minimum overall GPA of at least 3.00 (on a 4.00 scale). No specific undergraduate degree is required. Applicants are expected to have basic computer literacy. Successful completion of an undergraduate course in statistics is required for admission. One semester of calculus is strongly recommended.

Biostatistics, MS

Banner Code: VS-MS-BSTA

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The MS in Biostatistics will allow students to specialize in the design and analysis of health-related and biological studies, while maintaining the rigor and technical training of the Statistical Science master's program.

In this degree, students will take a statistics core and a "bio" core, involving courses in public health, biology, and clinical medicine (including ethics). It also involves a research core which allows students to solve real data problems in the biological or health area and collaborate with other scientists in an interdisciplinary team. Finally, students will choose from electives in bioinformatics, global and community health, or targeted statistics courses.

This graduate degree prepares students for analyzing difficult data specific to biology and health. The program, with its research core, will also be sufficiently rigorous for students who wish to pursue a PhD in Biostatistics.

Admissions & Policies

Admissions

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy. They also must hold a bachelor's degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, and calculus-based probability. Applicants with degrees in such fields as mathematics, statistics, and some engineering programs usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the listed Mason courses.

Note that coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&_ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

Requirements

Degree Requirements

Total credits: 30 (pending SCHEV approval)

In addition to meeting general requirements that apply to master's degrees at Mason, all students must complete the 21-credit core requirements for the degree. A grade of "B" or better is required in all 500-level statistics core courses. Students build on these core requirements by choosing 9 credits of electives.

Core Courses

Statistics Core

The Statistics core provides the basic probability, statistical analysis techniques, and statistical modeling tools that all biostatisticians must know, and provides a basis for higher level elective coursework.

<table>
<thead>
<tr>

</tbody>
</table>

Total Credits: 9
**Bio Core**
The Bio core is designed to provide the biological background necessary for biostatisticians. These courses offer preparation in the areas of public health and epidemiology (GCH 712 Introduction to Epidemiology), as well as bioinformatics (BINF 630 Bioinformatics Methods). In addition, this portion of the core curriculum ensures that students are trained in the statistical techniques required for clinical medicine, and includes material on ethics in research (STAT 560 Biostatistical Methods).

GCH 712  Introduction to Epidemiology  3
BINF 630  Bioinformatics Methods  3
STAT 560  Biostatistical Methods  3
Total Credits  9

**Research Core**
The Research core has been designed to assist students in the development of the requisite skills for careers in consulting or research. These courses will allow students to consult directly with biologists and medical and public health scientists on real data problems and provide opportunities to write reports and give oral presentations.

STAT 634  Case Studies in Data Analysis  3
or STAT 798  Master’s Research Project  3
Total Credits  3

**Electives**
The electives labeled STAT are specifically chosen from the department’s master’s-level electives to include techniques that are particularly important for biostatisticians.

Select three electives from the following:  9

GCH 782  International Research Ethics and Methods
GCH 806  Advanced Multivariate Statistics and Data Analysis for Health Care Research
STAT 652  Statistical Inference
STAT 655  Analysis of Variance
STAT 657  Nonparametric Statistics
STAT 662  Multivariate Statistical Methods
STAT 663  Statistical Graphics and Data Exploration I
STAT 665  Categorical Data Analysis
STAT 668  Survival Analysis
STAT 756  Alternative Regression Methods
STAT 760  Advanced Biostatistical Methods
STAT 773  Statistical Methods for Longitudinal Data Analysis

Total Credits  9

**Data Analysis Minor**

Banner Code: DATA

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The minor provides students with a background in data analysis and statistical methodology. It is intended to complement undergraduate degree programs such as computer science, economics, environmental engineering, geography, mathematics, nursing, psychology, public administration, sociology, and systems engineering.

**Admissions & Policies**

**Policies**

**Program Requirements**
The minor requires 15 credits: a core sequence of 6 credits, plus 9 credits of electives. Grades of C or better are required in all courses. At least 9 of the 15 credits must be in STAT courses. At least 8 credits must be in courses not required by the student’s major.

**Requirements**

**Minor Requirements**

Total credits: 15

**Core Sequence Credits**

Select one sequence from the following:  6

Sequence 1:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core) (p. 135)</td>
</tr>

Federal Statistics Graduate Certificate

Banner Code: VS-CERG-FSS

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

This professional program is targeted at upgrading the skills of practitioners. The federal statistical system is a complex data collection and analysis system that requires a wide variety of multidisciplinary skills for its maintenance. The federal statistics certificate is intended to respond to the need for broad training in statistics, survey methods, and data analysis, including graphics and data visualization. The program is extremely flexible and can be tailored to the needs of students within the federal statistical sector. It is also intended to be responsive to the needs of those in state and local governments, and those in the private sector involved in the collection, interpretation, or statistical analysis of federal data.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions

Potential candidates must hold a bachelor’s degree and have taken at least two courses in calculus and one course in calculus-based probability and statistics. These minimal course requirements are normally satisfied by students who have successfully completed courses equivalent to the following Mason courses: MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 135), MATH 114 Analytic Geometry and Calculus II, and STAT 344 Probability and Statistics for Engineers and Scientists I. Candidates must also be computer literate. Applicants typically have degrees in such fields as sociology, economics, engineering, mathematics, statistics, and business. Candidates should inquire with the department’s graduate coordinator for information on program planning. Courses are offered in late afternoon and evening and are particularly suitable for part-time students.

Requirements

Certificate Requirements

Total credits: 12

Some courses may have prerequisites beyond minimal admission requirements for which students must qualify or seek a waiver from the appropriate instructor.

Coursework

The certificate courses build the foundations of statistical analysis and survey methods.

Select 9 credits from the following list: ¹

Email: statistics@gmu.edu
Website: statistics.gmu.edu

Statistical science is regarded as one of the oldest and most successful information technology (IT) subjects. It focuses on the conversion of raw data into information. In this graduate program, students are trained in the theory and practice of statistical methodology, particularly as it relates to high-technology applications.

Admissions & Policies

Admissions
In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy. They also must hold a bachelor’s degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, and calculus-based probability. Applicants with degrees in such fields as mathematics, statistics, and some engineering programs usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the following Mason courses:

</table>

Coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

Requirements

Degree Requirements
Total credits: 30

In addition to meeting general requirements that apply to master’s degrees at Mason, all students must complete the 12-credit core requirements for the degree. Grades of B- or better are required in two of the core courses: STAT 544 Applied Probability and STAT 554 Applied Statistics I. Students build on these core requirements by choosing 12 credits of methodology courses and 6 credits of electives.

Students select either the professional or research option, depending on career ambitions. This choice must be made no later than the end of the semester in which 15 credits have been completed. The professional option provides MS degree qualifications to those seeking an expanded knowledge base in modern statistical theory and practice but do not wish to pursue a research career. The research option is for students planning to continue with a PhD degree, or begin/continue careers in statistical methodology research.

Professional Option
The professional option focuses on completing coursework in modern statistical theory and practice. 30 credits are required for the degree: 12 credits of core courses (taken by all MS students), 12 credits of methodology courses, and 6 credits of electives. Students electing this option are encouraged to pursue a broad background in statistical science, and they may seek to concentrate on applications of statistical methodology to other disciplines.

Students who select the professional option may elect to complete a master’s research project resulting in a technical report. This report is not an original research report but a scholarly essay on a topic of current interest in the statistical science discipline. The technical report is usually about 20 to 25 pages long and demonstrates the student’s ability to read and synthesize current technical literature into a scholarly essay. The report is evaluated by the student’s adviser, taking into account the comprehensiveness of the coverage of the scientific literature, the accuracy of presentation and interpretation, and the literary style. Students are notified of their evaluations, and they may be required to revise their report to further develop their skills in preparing reports on technical subjects. The report is usually written in the context of 3 credits of STAT 798 Master’s Research Project, which count as elective credits. Students opting not to complete a research project must take 30 credits of coursework.

Research Option
The research option requires 30 credits, including 6 credits that must be independent research (thesis). Research is done under the guidance of a faculty member. Research may be carried out at Mason or, if appropriate, at nearby facilities. For example, students may pursue research at their place of employment on topics of interest to their employer, provided the research meets the standards of the university. The thesis is usually written in the context of 6 credits of STAT 799 Master’s Thesis, which count as elective credits. The remaining 24 credits include the 12 core credits and 12 methodology credits.

In addition to satisfying general university requirements for a master’s degree, candidates who select the research option must submit a thesis based on the research to the student’s thesis committee, which must
give preliminary approval. The composition and appointment of this committee follows graduate program policies.

Candidates also must pass a final oral exam that concentrates on, but is not limited to, the area on which the thesis is written. The exam is administered by the student’s thesis committee, and all interested members of the graduate faculty are invited to attend and participate in the questioning. The thesis committee makes the final decision on whether the candidate passes or fails.

Core Courses
The core coursework covers the basic elements of statistics at the graduate level. STAT 544 Applied Probability covers the major mathematical framework for statistical theory and practice. STAT 652 Statistical Inference provides basic statistical theory. After completing this course, students have the theoretical basis from which statistical methods are derived.

STAT 554 Applied Statistics I is a survey of statistical methods that have become the backbone of statistical practice. Focus in this course is on techniques that quantify random behavior. The final core course is STAT 654 Applied Statistics II, which provides an overview of principles of statistical modeling.

Notes:

- Credit toward the MS in Statistical Science will not be given for both STAT 515 Applied Statistics and Visualization for Analytics and STAT 663 Statistical Graphics and Data Exploration I.
- Credit toward the MS in Statistical Science will not be given for both MATH 654 Construction and Evaluation of Actuarial Models II and STAT 668 Survival Analysis.
- A student concurrently enrolled in the Actuarial Sciences Graduate Certificate (p. 708) and the MS in Statistical Science may count MATH 555 Actuarial Modeling I and MATH 556 Actuarial Modeling II as elective courses and may count MATH 653 Construction and Evaluation of Actuarial Models I and MATH 654 Construction and Evaluation of Actuarial Models II as methodology courses. The Graduate Certificate in Actuarial Sciences (p. 708) must be completed prior to or concurrently with the MS in Statistical Science. Otherwise, at most two of MATH 555 Actuarial Modeling I, MATH 556 Actuarial Modeling II, MATH 653 Construction and Evaluation of Actuarial Models I, and MATH 654 Construction and Evaluation of Actuarial Models II can be counted toward the MS in Statistical Science as elective courses; none can be applied as methodology courses.

Dual Degree Options

Mathematics and Statistical Science Dual-Degree MS
This program allows students to earn an MS in Mathematics (p. 721) and an MS in (p. 1064) Statistical Science (p. 1064) by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements
Applicants must satisfy admission requirements for both the MS in Mathematics (p. 721) and the MS in Statistical Science (p. 1064) programs. A joint faculty committee from the Department of Mathematical Sciences (p. 707) and the Department of Statistics (p. 1060) make final admission decisions into the dual-degree program.

Elective Credits in STAT Courses

Select 12 elective credits from any STAT courses numbered 540-775

Total Credits 12

Notes

• Students currently enrolled in one of the MS programs must declare pursuit of the dual MS within one year of matriculation into the first MS program.

• A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.

• Students in either the BS (selected)/Operations Research, Accelerated MS program (p. 1079) or the BS (selected)/Statistical Science, Accelerated MS program (p. 1067) cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.

• If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the MS in Operations Research (p. 1076) or the MS in Statistical Science (p. 1064).

• Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.
Accelerated Master's

BS (selected)/Statistical Science, Accelerated MS

Overview
Highly-qualified students in selected BS programs (see below) have the option of obtaining an accelerated Statistical Science, MS (p. 1064). Students in an accelerated degree program must fulfill all university requirements for the master's degree.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students enrolled in a BS degree in any one of the Volgenau School (p. 953) major areas, in the Mathematics, BS (p. 716) program from the College of Science (p. 593), or in the Economics, BS (p. 342) program from the College of Humanities and Social Sciences (p. 295) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.00. Criteria for admission are identical to criteria for admission to the Statistical Science, MS (p. 1064) program, which include successful completion of the following Mason courses each with a grade of C or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 113</td>
<td>Analytic Geometry and Calculus I (Mason Core) (p. 135)</td>
<td>4</td>
</tr>
<tr>
<td>MATH 114</td>
<td>Analytic Geometry and Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core) (p. 135)</td>
<td>3</td>

<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 351</td>
<td>Probability</td>
<td></td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with grades of B or better in two 500-level STAT courses selected from STAT 544 Applied Probability, STAT 554 Applied Statistics I, and STAT 574 Survey Sampling I.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Statistical Science, PhD
Banner Code: VS-PHD-STAT

The PhD in Statistical Science represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and practice. The degree program is a hybrid of mathematical theory, computation, and data analysis; and students are expected to be proficient in all three. Current research areas of key department faculty in the program include biostatistics, statistical genetics, statistical graphics, data confidentiality, networking analysis, and data analytics.

Admissions & Policies

Admissions
Students should have a master's degree in a mathematically-intensive discipline with a minimum 3.50 GPA. Students entering with a master's degree are expected to have completed coursework equivalent to STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 652 Statistical Inference, and STAT 654 Applied Statistics II with exceptional performance. The program also requires a course in advanced calculus, MATH 315 Advanced Calculus I or equivalent, with a B or better. In exceptional circumstances, talented students with a mathematically-intensive undergraduate degree may be admitted.

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&_ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

Policies

Reduction of Credit
Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 24 credits with a master’s degree in statistics, mathematics, or similar discipline, or by 30 credits with a Master's degree from the George Mason University Department of Statistics. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Requirements

Degree Requirements
Total credits: 72

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. The following degree plan is based on a student who receives a 24 credit reduction. Students who receive more or less than a 24 credit reduction should consult with their advisor.

Doctoral Coursework
Students are required to complete 24 credits of advanced emphasis coursework, including four core courses:
1068  Statistics Minor

| STAT 778 | Algorithms and Simulation for Statistics in C | 3 |
| STAT 971 | Probability Theory | 3 |
| STAT 972 | Mathematical Statistics I | 3 |
| STAT 973 | Mathematical Statistics II | 3 |
| The remaining four courses are selected and approved by the doctoral supervisory committee and the PhD Program Director and should be numbered 600 or above. | 12 |
| Total Credits | 24 |

1  STAT 652 Statistical Inference and STAT 654 Applied Statistics II do not count toward advanced emphasis coursework, if a student has received a 24 credit reduction.

Qualifying Exam
Written qualifying exams will be taken in the following areas:

- Applied Probability
- Applied Statistics
- Statistical Inference

Qualifying exams are offered in August and January. Students are required to take the qualifying exams within one year of admission. Supported students entering with a Master's degree are required to take the qualifying exams within one semester of admission. Students who do not pass all three exams in two consecutive exam periods are terminated from the program.

Dissertation Research
In order to advance to candidacy, students must complete all coursework, pass the qualifying and comprehensive examinations, and defend a dissertation proposal.

Select 24 credits from the following:

| STAT 990 | Dissertation Topic Presentation (required) | 24 |
| STAT 998 | Doctoral Dissertation Proposal |
| STAT 999 | Doctoral Dissertation (must complete a minimum of 12 credits) |
| Total Credits | 24 |

Doctoral Committee Selection
Following successfully passing the qualifying exams, students should select a dissertation director and a doctoral studies committee. The chair of the doctoral studies committee must be a member of the graduate faculty with a regular appointment in the Department of Statistics, and will typically be the dissertation director. The doctoral studies committee consists of a chair, two members of the graduate faculty who hold regular appointments in the Department of Statistics, and an external member. The doctoral studies committee must be approved by the director of the doctoral program in statistical science.

Advancement to Candidacy
Admission to candidacy is acquired on completion of an oral comprehensive exam administered by the doctoral supervisory committee, covering the four core courses and four advanced emphasis courses, and a dissertation proposal. A student who fails the oral comprehensive exam may take it a second time, within six months. If the student fails a second time, the student is terminated from the program. A student must wait at least six weeks after passing the oral comprehensive exam before the dissertation proposal. A student who fails the dissertation proposal may take it a second time, within six months. If the student fails a second time, the student is terminated from the program.

Doctoral Defense
The dissertation defense serves as the student’s final examination and is conducted by the doctoral supervisory committee. Both the comprehensive exam and final exam are scheduled on approval of a written request to the department chair.

Statistics Minor
Banner Code: STIC
Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The minor in Statistics provides students with a background in the theory and application of statistical methodology. It is intended to complement undergraduate degree programs in the Volgenau School and the College of Science, especially those programs that require MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 135), MATH 114 Analytic Geometry and Calculus II, and STAT 344 Probability and Statistics for Engineers and Scientists I as a part of the major requirements.

Admissions & Policies

Admissions
To be admitted to the minor, students must have completed MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 135) and MATH 114 Analytic Geometry and Calculus II with a grade of C or better.

Policies
The minor in Statistics requires 15 credit hours of coursework. Grades of C or better are required in all courses. At least 8 credits must be in courses not required by the student’s major.

Requirements

Minor Requirements
Total credits: 15

Core Requirements

| STAT 344 | Probability and Statistics for Engineers and Scientists I | 3 |
| STAT 354 | Probability and Statistics for Engineers and Scientists II | 3 |
| STAT 362 | Introduction to Computer Statistical Packages | 3 |
| STAT 456 | Applied Regression Analysis | 3 |
| Total Credits | 12 |

1  STAT 346 Probability for Engineers and a course in statistics, such as STAT 250 Introductory Statistics I (Mason Core) (p. 135), can be substituted for the STAT 344 Probability and Statistics for Engineers and Scientists I core requirement.
Students enrolled in the Mathematics, BS (p. 716) may substitute MATH 351 Probability and MATH 352 Statistics for STAT 344 Probability and Statistics for Engineers and Scientists I and STAT 354 Probability and Statistics for Engineers and Scientists II.

Elective Requirement
Select one from the following:

Total Credits: 3

Statistics, BS (pending SCHEV approval)

Banner Code: VS-BS-STIC

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

Note: As of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia (SCHEV) for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted. Check the school/department website for current program status.

The Bachelor of Science in Statistics is designed to provide a framework for students to develop connections between statistical concepts and theories and their applications to statistical practice. It will prepare statisticians who can use modern statistical techniques to design studies, collect data, analyze and visualize high dimensional data sets, and draw valid conclusions in an increasingly data-centric world. In this program, students will meld the time-tested concepts and theories of statistics with modern methods of analysis, in order to interpret the data that is collected in nearly every discipline and every sector of industry and government.

The BS in Statistics requires a total of 120 credit hours, including major core requirements, concentration requirements, and Mason Core requirements. The program’s major core curriculum provides students with a firm foundation in statistics, mathematics, and computing. Selection of a concentration allows a student to specialize in applied, theoretical, or computational aspects of statistical practice. Students will select one of three concentrations: Applied Statistics, Mathematical Statistics, or Statistical Analytics. The Applied Statistics concentration focuses on developing proficiency in analytical methods applicable to a specific discipline of the student’s choosing. This is accomplished through the requirement to complete a minor in a field that makes substantial use of data analysis. The Mathematical Statistics concentration is designed for students interested in mastering the theoretical underpinnings of statistics and probability; this concentration is recommended for students who intend to continue graduate studies in statistics or whose main focus is on research. The Statistical Analytics concentration blends the disciplines of computer science and statistics in a very modern way and is designed for students interested in applying concepts from statistics and computer science to the analysis of massive data sets.

Graduates of this program can look forward to careers in local, state, and federal government, and in the many industries that conduct scientific research, collect, and analyze data. They will enter the workforce with the ability to impact science, public policy, technology, and industry in a positive way through their expertise in data collection, analysis, synthesis, and interpretation, each with the highest ethical standards. Graduates will also be well prepared to continue their studies in graduate schools if they so desire.

Admissions & Policies

Advanced Placement, Credit by Exam
A score of 5 on the Advanced Placement (AP) statistics exam qualifies students for credit in STAT 260.

Change of Major
Students considering changing their major to Statistics should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students must have a cumulative GPA of at least 2.75 and completed MATH 114 with a grade of C or better. See Change of Major (p. 955) for more information.

Grades
Students must earn a C or better in Major Core Requirement courses as well as in courses required to satisfy prerequisites.

Termination from major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for
that major at any time, regardless of what the student’s major was at the
time the courses were taken.

**Total Credits** 9

1. May not be used to fulfill other degree requirements.

### Technical

Select nine credits of technical electives. Specific course selections must be pre-approved by the undergraduate coordinator. Students may need to choose electives to satisfy prerequisites for some of these courses. In some cases, students will need to contact other departments for permission to enroll.

- CDS courses numbered above 200 (p. 1316)
- CS courses numbered above 200 (p. 1328)
- MATH courses numbered above 200 (p. 1717)
- OR courses numbered above 300 (p. 1799)
- BENG 322 Health Data Challenges
- CYSE 325 Discrete Events Systems Modeling
- ENGH 388 Professional and Technical Writing
- IT 214 Database Fundamentals
- SYST 473 Decision and Risk Analysis
- SYST 488 Financial Systems Engineering

**Total Credits** 9

### Concentrations

Select one concentration and complete all requirements.

#### Concentration in Applied Statistics (ASTA)

Focuses on developing proficiency in analytical methods applicable to a specific discipline of the student’s choosing. This is accomplished through the requirement to complete a minor in a field that makes substantial use of data analysis.

Students must complete 15 - 21 credits in a pre-approved minor, selected in consultation with the undergraduate coordinator. Courses taken to fulfill the minor requirements that are not used to fulfill Major Core or Restricted Electives requirements are considered unique to the minor. At least 15 credits of the minor coursework, technical electives, general electives, and additional Mason Core course must be at or above the 300 level.

<table>
<thead>
<tr>
<th><strong>Concentration in Mathematical Statistics (MTHS)</strong></th>

General Electives
The number of general elective credits varies with choice of concentration 7-16

Total Credits  7-16

Department of Systems Engineering and Operations Research

Ariela Sofer, Chair
Phone: 703-993-1670
Website: seor.gmu.edu

The Systems Engineering and Operations Research (SEOR) Department offers a bachelor's degree in systems engineering, a minor in systems engineering and operations research, a minor in aviation flight training and management, a master's degree in systems engineering, a master's degree in operations research, and a doctoral degree in systems engineering and operations research. The department also offers a concentration in predictive analytics within a school-wide Data Analytics Engineering, MS. In addition, the department offers six certificate programs at the master's level: architecture-based systems integration; command, control, communications, computing, and intelligence (C4I); military operations research; computational modeling; financial systems engineering and systems engineering of software-intensive systems. The Department also offers a dual degree MS in Operations Research and Statistical Science jointly with the Statistics Department.

There is much overlap between systems engineering and operations research. The department encourages students of either discipline to elect courses in the other. For more information, go to the department's website (http://seor.gmu.edu).

Systems Engineering
Systems engineers determine the most effective ways to use all of a system's components: people, machines, materials, information, and energy. The engineers plan, design, implement, and manage integrated systems, working to ensure performance, safety, reliability, and maintainability. They also work to ensure that systems are delivered on time at a reasonable cost. Examples of systems are computer networks, the national airspace system, automobiles, intelligent robots, the electric grid, the Metro, and Mason. Whereas other engineering disciplines concentrate on individual aspects of a system, such as electronics, ergonomics, or software, systems engineers focus on the system as a whole. Systems engineering, perhaps more than any other engineering discipline, is involved with the human and organizational aspects of developing the desired system. Systems engineering is the people-oriented engineering profession.

Operations Research
Operations research is the professional field that uses analytical methods in engineering to support management decision making, often focusing on how best to allocate limited resources. Operations researchers do for organizations what physicists do for the physical world: they try to find order in apparent chaos by identifying the structure in complex situations and understanding how the components of organizations interact. The goal is to explain and predict the effects of actions taken on these systems, and use the information to make informed decisions. Much of this work is developing and manipulating mathematical and computer models of organizational systems composed of people, machines, information, procedures, and frequently, big data. The overall purpose is to provide a rational basis for decision-making.

Faculty

Professors
Adelman, Chang, Chen, Hoffman, Laskey, Nash, Pyster, Shortle, Sofer (chair), Zaidi

Associate Professors

</tbody>
</table>

Total Credits 18

1 Students who have work experience in systems engineering should consult with their advisor on replacing SYST 505 Systems Engineering Principles with a higher-level SYST course.

Aviation Flight Training and Management Minor
Banner Code: AVIM

Academic Advising
2100 Nguyen Engineering Building
Fairfax Campus
Phone: 703-993-1670
Email: seor@gmu.edu
Website: http://seor.gmu.edu/bsse/aviationminor.html

Students completing the minor will take classes for Pilot Ground School and Flight Training leading up to a solo flight. In addition, students will study aspects of aviation from systems engineering of air traffic control, design of airports, human factors and psychology, and financial planning and management. Students will be trained for required government licensing exams such as the Federal Aviation Administration (FAA) Knowledge Test and FAA Flight tests. Special fees will apply. Students are responsible for meeting all eligibility requirements.

Admissions & Policies

Policies
For policies governing all minors, see AP.5.3.4 Minors (p. 86).

Website: http://seor.gmu.edu/msse/cert-c4i.html

C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The C4I certificate focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions
The certificate is available to students who hold bachelor’s degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the Systems Engineering, MS (p. 1087).

Policies
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

Requirements

Certificate Requirements
Total credits: 12

The certificate requires 12 credits (4 courses). Students must complete the following with an average grade of B or better:

Required Courses
SYST 680  Principles of Command, Control, Communications, Computing, and Intelligence (C4I)  3
or ECE 670  Principles of C4I
OR 542  Operations Research: Stochastic Models  3
or ECE 528  Introduction to Random Processes in Electrical and Computer Engineering
Select two from the following:  6
SYST 584  Heterogeneous Data Fusion
SYST 664  Bayesian Inference and Decision Theory
SYST 683  Modeling, Simulation, and Gaming
OR 635  Discrete System Simulation
ECE 542  Computer Network Architectures and Protocols
ECE 630  Statistical Communication Theory
ECE 642  Design and Analysis of Computer Communication Networks

Total Credits  12

Completing the C4I Certificate within the Systems Engineering Master’s Program
In addition to the four certificate courses above, students must complete the following six courses:

SYST 505  Systems Engineering Principles  3
SYST 510  Systems Definition and Cost Modeling  3
SYST 520  System Engineering Design  3
SYST 530  Systems Engineering Management I  3
SYST 611  System Methodology and Modeling  3
Computational Modeling Graduate Certificate

Email: seor@gmu.edu
Website: seor.gmu.edu/msor/modeling.html

This graduate certificate provides knowledge, tools, and techniques to those who work or plan to work in the field of computational modeling. The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions

For admission into the certificate program, applicants must meet minimum entrance requirements for the MS in operations research (p. 1076), the MS in statistical science (p. 1064), or the PhD in computational sciences and informatics (p. 652).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

Courses taken for this certificate can count toward a master’s degree in operations research or statistics or a PhD in computational sciences and informatics (p. 652). One must be concurrently enrolled in the program for courses to count toward the certificate and the other degree.

Electives

The remaining two electives must be taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective. Some certificate electives may require stronger math requirements.

Electives 6

Select at least one course from the following:

- SYST 514 Systems Thinking
- INFS 622 Information Systems Analysis and Design
- SWE 619 Object-Oriented Software Specification and Construction
- SYST 542 Decision Support Systems Engineering
- SYST 584 Heterogeneous Data Fusion
- SYST 630 Systems Engineering Management II

Select the second course from the courses listed above or from the following:

- CS 555 Computer Communications and Networking
- ECE 542 Computer Network Architectures and Protocols
- INFS 612 Principles and Practices of Communication Networks

Total Credits 6

Financial Systems Engineering Graduate Certificate

Banner Code: VS-CERG-FNSE

Admissions & Policies

Admissions

The FE certificate will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a GPA minimum established by VSE for all MS programs. Students who are already enrolled in a master’s program must submit an application form to enroll in this certificate program; all others must apply for graduate admission to this certificate program.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

Requirements

Certificate Requirements

Total credits: 12

To be eligible for a certificate in Financial Systems Engineering, students must complete three required courses (9 credits) plus one elective course (3 credits) with an average grade of B or better.

- SYST 584 Heterogeneous Data Fusion
- SYST 671 Judgment and Choice Processing and Decision Making

Total Credits 3

Financial Systems Engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions, as well as facilitating the risk management of those decisions. The Graduate Certificate in Financial Systems Engineering (FSE) is intended for students who want to advance their knowledge in global financial systems, financial engineering, and financial decision analysis. Students get an understanding of the theory and/or tools of the financial systems, derivatives, investment analysis, and risk management. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School of Engineering (VSE).

This graduate certificate may only be pursued on a part-time basis.
Military Operations Research Graduate Certificate

Website: seor.gmu.edu/msor/military.html

This graduate certificate program provides knowledge, tools, and techniques to those who work or plan to work in the field of military operations research. It is appropriate for students who cannot complete requirements for a master’s degree in operations research, but who want a concentrated study of military modeling.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions
Admissions requirements are identical to those for the Operations Research, MS (p. 1076).

Policies
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 90).

Requirements

Certificate Requirements
Total credits: 15

Certificate candidates must complete five courses, with an average grade of B or better, for a total of 15 graduate credits.

Total Credits 15

Operations Research, MS

Banner Code: VS-MS-OPRS

The MS prepares students for research and professional practice associated with the formulation and analysis of mathematical models for decision making and their computer implementation. Major components include optimization, queuing and network modeling, computer simulation and modeling, applied and computational probability, and application of these components to realistic and relevant operational analysis problems. Students are expected to become proficient in these areas, as well as in supporting areas of information technology necessary to implement operations research methods.

The program includes core courses and electives selected by the student with the aid of a faculty advisor. To obtain the MS degree, students complete an approved plan of study that contains a minimum of 30 graduate credits. Students may take courses through the Commonwealth Graduate Engineering Program. Appropriate courses may be transferred, with advisor approval, into this Mason degree program.

Admissions & Policies

Admissions
To be admitted to the program, students must hold a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also must have completed courses in:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&_ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

The department offers SYST 500 Quantitative Foundations for Systems Engineering as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics. On acceptance, students will be required to take a foundation qualification test a week or two before school.
starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500 Quantitative Foundations for Systems Engineering. A sample test is available from the department.

Students with minor deficiencies in preparation may be accepted conditionally pending removal of the deficiencies. Courses taken to remove admission deficiencies (including SYST 500 Quantitative Foundations for Systems Engineering) extend minimum requirements for the degree. Students whose undergraduate training was in the quantitative social sciences or quantitatively oriented business administration may be allowed to complete a portion of the mathematics prerequisite by taking SYST 500 Quantitative Foundations for Systems Engineering.

### Requirements

#### Degree Requirements

Total credits: 30

Students must complete four core courses and the project (15 credits). The remaining 15 credits are electives subject to the requirements below, and can be taken in one of five concentration areas or in an individual plan approved by the student’s advisor.

#### Required Core Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>OR 541</td>
<td>Operations Research: Deterministic Models</td>
<td>3</td>
</tr>

<td>3</td>
</tr>
<tr>
<td>OR 568</td>
<td>Applied Predictive Analytics</td>
<td>3</td>
</tr>
<tr>
<td>OR 635</td>
<td>Discrete System Simulation</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 12

#### Project

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>OR 699</td>
<td>Masters Project</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 3

#### Methods Courses

Select at least one deterministic methods and one stochastic methods course:

<table>
<thead>
<tr>
<th>Deterministic Methods Courses:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>OR 641</td>
<td>Linear Programming</td>
</tr>
<tr>
<td>OR 642</td>
<td>Integer Programming</td>
</tr>
<tr>
<td>OR 643</td>
<td>Network Modeling</td>
</tr>
<tr>
<td>OR 644</td>
<td>Nonlinear Programming</td>

<tr>
<td>OR 674</td>
<td>Dynamic Programming</td>
</tr>
<tr>
<td>OR 675</td>
<td>Reliability Analysis</td>
</tr>
<tr>
<td>SYST 664</td>
<td>Bayesian Inference and Decision Theory</td>
</tr>
</tbody>
</table>

Total Credits: 6

#### Additional Electives

Select up to three additional electives with written concurrence of the advisor

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
</table>

Total Credits: 9

1. At least two of these electives must be taken from SEOR course offerings, and one of these must be OR 600-level or higher. The remaining course should be taken in an area appropriate to the student’s interests, such as operations research, systems engineering, computer science, information systems, statistics, data analytics, electrical and computer engineering, economics, mathematics or supply chain management.

#### Concentrations

Students may construct concentration areas by choosing electives from among special groupings. The six concentrations available are data analytics, decision analysis, financial engineering, military operations research, optimization, and stochastic modeling. In addition to the required core courses (12 credits) and project course (3 credits), the remaining 15 credit hours consist of methods and elective courses associated with the concentration areas as outlined below. Students can also devise their own grouping of electives subject to prior approval of their advisor.

#### Concentration in Data Analytics (DNIC)

Students concentrating in data analytics must complete the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining</td>
<td>3</td>
</tr>
<tr>
<td>One deterministic methods course</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>One stochastics methods course</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>and two courses from the following list:</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>OR 604</td>
<td>Practical Optimization</td>
<td></td>
</tr>
<tr>
<td>OR 670</td>
<td>Metaheuristics for Optimization</td>
<td></td>
</tr>
<tr>
<td>STAT 663</td>
<td>Statistical Graphics and Data Exploration</td>
<td></td>
</tr>
<tr>
<td>SYST 584</td>
<td>Heterogeneous Data Fusion</td>
<td></td>
</tr>
<tr>
<td>SYST 664</td>
<td>Bayesian Inference and Decision Theory</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 15

#### Concentration in Decision Analysis (DA)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>OR 671</td>
<td>Judgment and Choice Processing and Decision Making</td>
<td>3</td>
</tr>
<tr>
<td>OR 681</td>
<td>Decision and Risk Analysis</td>
<td>3</td>
</tr>
<tr>
<td>SYST 664</td>
<td>Bayesian Inference and Decision Theory</td>
<td>3</td>
</tr>
<tr>
<td>Select one deterministic methods course</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Select one stochastic methods course</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 15

#### Concentration in Financial Engineering (FNNE)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>OR 588</td>
<td>Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives</td>
<td>3</td>
</tr>
<tr>
<td>OR 688</td>
<td>Financial Systems Engineering II: Derivative Products and Risk Management</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one from the following: 3
### OR 538 Analytics for Financial Engineering and Econometrics
### OR 645 Stochastic Processes
### OR 671 Judgment and Choice Processing and Decision Making
### OR 681 Decision and Risk Analysis
### OR 682 Computational Methods in Engineering and Statistics

Students must also complete:
- One deterministic methods course
- One stochastics methods course

| Total Credits | 15 |

1. If the student has already taken OR 645 Stochastic Processes this can be substituted for an elective course with written concurrence of the student’s advisor.

### Concentration in Military Operations Research (MOR)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>OR 651</td>
<td>Military Operations Research I: Cost Analysis</td>
<td>3</td>
</tr>
<tr>
<td>OR 652</td>
<td>Military Operations Research Modeling II: Effectiveness Analysis</td>
<td>3</td>
</tr>
<tr>
<td>SYST 683</td>
<td>Modeling, Simulation, and Gaming</td>
<td>3</td>
</tr>
</tbody>
</table>

One deterministic methods course
One stochastics methods course

| Total Credits | 15 |

### Concentration in Optimization (OPT)

Select three courses from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>OR 604</td>
<td>Practical Optimization</td>
<td></td>
</tr>
<tr>
<td>OR 641</td>
<td>Linear Programming</td>
<td></td>
</tr>
<tr>
<td>OR 642</td>
<td>Integer Programming</td>
<td></td>
</tr>
<tr>
<td>OR 643</td>
<td>Network Modeling</td>
<td></td>
</tr>
<tr>
<td>OR 644</td>
<td>Nonlinear Programming</td>
<td></td>
</tr>
<tr>
<td>OR 646</td>
<td>Stochastic Optimization</td>
<td></td>
</tr>
<tr>
<td>OR 670</td>
<td>Metaheuristics for Optimization</td>
<td></td>
</tr>
<tr>
<td>OR 682</td>
<td>Computational Methods in Engineering and Statistics</td>
<td></td>
</tr>
</tbody>
</table>

One deterministic methods course
One stochastics methods course

| Total Credits | 15 |

### Concentration in Stochastic Models (STM)

Select three courses from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>OR 645</td>
<td>Stochastic Processes</td>
<td></td>
</tr>
<tr>
<td>OR 647</td>
<td>Queuing Theory</td>
<td></td>
</tr>
<tr>
<td>OR 674</td>
<td>Dynamic Programming</td>
<td></td>
</tr>
<tr>
<td>OR 719</td>
<td>Graphical Models for Inference and Decision Making</td>
<td></td>
</tr>
<tr>
<td>SYST 664</td>
<td>Bayesian Inference and Decision Theory</td>
<td></td>
</tr>
<tr>
<td>STAT 554</td>
<td>Applied Statistics I</td>
<td></td>
</tr>
<tr>
<td>or STAT 663</td>
<td>Statistical Graphics and Data Exploration I</td>
<td></td>
</tr>
</tbody>
</table>

Select must also complete:

- One deterministic methods course
- One elective course with written concurrence of the student’s advisor

| Total Credits | 15 |

### Dual Degree Options

#### Operations Research and Statistical Science Dual-Degree MS

This program allows students to earn an MS in Operations Research (p. 1076) and an MS in Statistical Science (p. 1064) by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

#### Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research (p. 1076) Program and the MS in Statistical Science (p. 1064) Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

#### MS-OPRS/STAT Dual Degree Requirements

Total credits: 48

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>OR 541</td>

| Total Credits | 12 |
### Elective Credits in STAT Courses

**Code** | **Title** | **Credits**
---|---|---
Select 12 elective credits from any STAT courses numbered 540-775 | 12

**Total Credits**: 12

### Notes

- Students currently enrolled in one of the MS programs must declare pursuit of the dual MS within one year of matriculation into the first MS program.
- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS (selected)/Operations Research, Accelerated MS program (p. 1079) or the BS (selected)/Statistical Science, Accelerated MS program (p. 1067) cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research (p. 1076) or the MS in Statistical Science (p. 1064).
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

### Accelerated Master’s

**BS (selected)/Operations Research, Accelerated MS**

**Overview**

Highly-qualified students in selected BS programs (see below) have the option of obtaining an accelerated Operations Research, MS (p. 1076).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

**Admission Requirements**

Mason undergraduate students majoring in the following disciplines may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1076) program.

- Civil and Infrastructure Engineering (p. 1091)
- Computer Engineering (p. 1020)
- Computer Science (p. 991)
- Electrical Engineering (p. 1027)
- Systems Engineering (p. 1082)

**Accelerated Option Requirements**

Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree.

These two courses may be chosen from the graduate courses in the following table.

For BS candidates, these graduate courses replace the corresponding undergraduate courses. The undergraduate version of these courses may not be applied to the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 420</td>
<td>SYST 521</td>
<td>Credit may not be received for both courses.</td>
</tr>
<tr>
<td>SYST 473</td>
<td>SYST 573</td>
<td>Credit may not be received for both courses.</td>
</tr>
<tr>
<td>OR 441</td>
<td>OR 541</td>
<td>Credit may not be received for both courses.</td>
</tr>
<tr>
<td>OR 442</td>
<td>OR 542</td>
<td>Credit may not be received for both courses.</td>
</tr>
</tbody>
</table>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

### Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

### Prerequisites

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.

---

**Admissions & Policies**

### Admissions

All general Mason and specific Volgenau School admissions requirements apply. Candidates for the PhD program typically must hold an MS degree from an accredited institution of higher education in systems engineering, operations research or related areas in engineering, mathematics, and computer science with a minimum graduate GPA of 3.50 and a minimum undergraduate GPA of 3.00. In addition, well-qualified candidates holding a BS degree in these areas may apply directly to the PhD program.

All applicants should have a strong background in engineering mathematics, which includes three semesters of calculus, differential equations, linear algebra, and probability. In addition, students entering the doctoral program must have a sound working knowledge in computing.

The admission process involves submitting the application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results, three letters of reference, a résumé and a statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided, if they are not in English; in some cases, applicants will be required to have documents evaluated by an external agency. A satisfactory score on the TOEFL examination is required for non-native English speakers. All of an applicant's background is examined before an admission decision is made.

### Policies

#### Program Requirements

The program includes: course requirements, a qualifying exam that tests fundamental concepts in systems engineering and operations research; a comprehensive exam that tests the research competency of the student; dissertation proposal defense; dissertation research; and dissertation predefense and defense. All general Mason and specific Volgenau School requirements apply to this program.

PhD dissertations are extremely time intensive, and successful completion requires full time focus. It is expected that students who have reached candidacy (that is, successfully presented their dissertation proposal) will spend full time on their research for at least one academic year and will attend the majority of the SEOR departmental seminars throughout that period.

### Reduction of Credit

The doctoral program is a 72 credit hour program; however, students entering with a Master’s degree in a related discipline will be given a reduction of credit up to 24 hours. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

The 72 hours of required doctoral-level credits typically consist of 48 credits of coursework and 24 credits of dissertation research. Students who receive a reduction of credit will complete a minimum of 48 credits as outlined in Degree Requirements; students entering without an MS will need at least 24 additional credits of coursework.
All decisions concerning the student’s course requirements and plan of study must be approved by the dissertation committee chair, as well as by the department’s doctoral coordinator.

### Requirements

#### Degree Requirements

**Total credits: 72**

**Doctoral Coursework**

A GPA of 3.50 is required, and no grade of C is allowed in these 24 credits. Students lacking prerequisites for their courses or lacking the coursework to complete the qualifying exams or their dissertation may be required to take additional courses.

- **OR 568**  Applied Predictive Analytics  3
- **SYST 763**  Research Methods in Systems Engineering and Information Technology  3
- Select 12 credits of 700-level SEOR approved courses (p. 1993)  12
- Select 6 credits in SYST or OR courses numbered 600 or higher  6
  - SYST Courses (p. 1799)
  - OR Courses (p. 1979)

**Total Credits**  24

1. A list of approved courses is available from the department
2. No more than 3 credits are allowed for a directed reading course. All courses and course substitutions must be approved by the student’s dissertation committee chair and the SEOR doctoral coordinator.
3. Excluding SYST 699 Masters Project and OR 699 Masters Project

**Additional Coursework Requirements**

Students entering without a Master’s degree are required to complete an additional 24 credits of Master’s level courses, including the following:

- **SYST 505**  Systems Engineering Principles  3
- **SYST 520**  System Engineering Design  3
- **OR 541**  Operations Research: Deterministic Models  3
- **OR 542**  Operations Research: Stochastic Models  3
- Select 12 additional credits from one of two alternatives (systems engineering or operations research)  12

**Total Credits**  24

1. Consult the SEOR Department for the list of allowable courses.

### Note

With appropriate selection of courses, students may obtain the MS degree in systems engineering or operations research by completing 6 additional credits, including 3 approved credits from the advanced emphasis courses (which may also apply towards the PhD degree advanced emphasis requirements) and 3 credits of either SYST 699 Masters Project or OR 699 Masters Project. Consult the SEOR Department for further detail. Credits taken in the courses SYST 699 Masters Project or OR 699 Masters Project may not be applied towards the PhD degree program requirements.

#### Qualifying Exams

The exams are primarily for testing the students’ familiarity with fundamental concepts. Each student must take the following four exams within two years of enrolling in the program:

- Systems Engineering Principles
- Systems Engineering Design
- Deterministic Models
- Stochastic Models

A student who passes three of the four exams in the first attempt must retake and pass the failed exam within one year. A student who passes fewer than three exams in the first attempt must retake and pass an entire set of four exams within one year. After two unsuccessful attempts, a student is dismissed from the PhD program.

**Dissertation Research**

Choose 24 credits from the following:

- **SEOR 998**  Doctoral Dissertation Proposal  24
- **SEOR 999**  Doctoral Dissertation (must complete a minimum of 12 credits)

**Total Credits**  24

#### Doctoral Supervisory Committee

Students should select a dissertation director and a doctoral supervisory committee as soon as possible. It is recommended that the committee be formed by the end of the second or third semester of study. The dissertation director must be a member of the SEOR graduate faculty or a member of the Mason graduate faculty with approval from the SEOR department chair. The doctoral supervisory committee must include at least three members from the SEOR department-approved graduate faculty, and at least one non-SEOR member from the Mason graduate faculty. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. At least four members of the committee must be members of the Mason graduate faculty.

#### Comprehensive Exam

The comprehensive exam is taken after the student has satisfactorily completed all the advanced emphasis course work requirements in the approved plan of study filed by the student. The examiners will include the supervisory committee plus any outside examiners considered appropriate. However, the supervisory committee determines whether the student passes or not. The comprehensive exam consists of a written examination of 8 hours in length and an oral examination. The committee will determine if the student has a mastery of the advanced emphasis coursework. If a student fails the comprehensive exam, the student may request a re-examination within 60 days of receiving notice of the exam result. The request should be made in writing to the doctoral coordinator. If the student fails the re-examination or does not request a re-examination within 60 days, the student will be dismissed from the PhD program. In such a case, with recommendation of the supervisory committee and approval of the SEOR Chair, the student may apply his/her coursework towards a Master’s degree.

#### Dissertation Proposal

After passing the comprehensive exam, each doctoral student prepares a written dissertation proposal, which is presented to the doctoral
supervisory committee. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree.

Dissertation Defense
When the central portions of the research have been completed to the point where the student is able to describe the original contributions of the dissertation effort, a candidate submits the written dissertation to the supervisory committee and schedules an oral predefense with the committee. The predefense is attended by the supervisory committee. The supervisory committee must approve the work or the student must schedule a second predefense.

Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, with an announcement posted for at least two weeks. The defense must be attended by the supervisory committee and the department's doctoral coordinator, unless an exception has been approved in advance by the doctoral coordinator. Following a satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in systems engineering and operations research. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than the general time limits for the doctoral degree. An additional predefense is not required, but the student is strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program.

Website: http://seor.gmu.edu/undergrad.html

The mission of the undergraduate program is to equip students with the ability to participate productively in the many professional activities associated with engineering a trustworthy system that satisfies client needs. The term "system" is interpreted broadly to include information, telecommunication, defense, health delivery, transportation, energy or manufacturing systems, as well as corporate processes.

Objectives
The objectives of the Bachelor of Science in Systems Engineering program at George Mason University are to produce graduates who are able to:

- Apply critical thinking, quantitative methods, systems thinking, and principles of engineering to the engineering of contemporary and future systems.
- Apply systems engineering methods, processes, models and tools to the engineering of contemporary and future systems.
- Work successfully, professionally, and ethically as members and leaders of multi-disciplinary teams.

Accreditation
This program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org). The requirements for the degree may be satisfied through part-time enrollment.

Admissions & Policies

Policies
Change of Major
See Change of Major (p. 955) for more information.

Grade Requirements
All students in the Systems Engineering program must complete the following courses with a grade of C or better:

<table>
<thead>
<tr>
<th>Course</th>

</tbody>
</table>

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for
a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

OR 442  Stochastic Operations Research  3  
Select 3 approved technical electives selected from one of the Technical Emphasis Areas below  9  
Total Credits  55  

Additional Mason Core  
Students must complete all Mason Core (p. 135) requirements not fulfilled by major requirements.  
ENGH 101  Composition (Mason Core) (p. 135)  3  
ENGH 302  Advanced Composition (Mason Core) (p. 135)  3  
Literature (p. 140)  3  
Arts (p. 137)  3  
Western Civilization/World History (p. 143)  3  
Global Understanding (p. 139)  3  
Total Credits  18  

Technical Emphasis Areas  
The systems engineering program requires 9 credits of technical electives. Students must select one of the following technical emphases, each containing three courses. Students must complete each of these courses with a grade of C or better.  

Aviation Systems  
SYST 420  Network Analysis  3  
SYST 460  Introduction to Air Traffic Control  3  
SYST 461  Air Transportation System Engineering  3  
Total Credits  9  

Bioengineering  
BENG 313  Physiology for Engineers  3  
Select two from the following:  6  
BENG 304  Modeling and Control of Physiological Systems  
BENG 406  Introduction to Biomechanics  
BENG 420  Bioinformatics for Engineers  
Total Credits  9  

Control Systems  
ECE 201  Introduction to Signals and Systems  3  
ECE 220  Continuous-Time Signals and Systems  3  
SYST 421  Classical Systems and Control Theory  3  
Total Credits  9  

Computer Network Systems  
SYST 420  Network Analysis  3  
ECE 465  Computer Networking Protocols  3  
TCOM 500  Modern Telecommunications  3  
Total Credits  9  

Data Analytics  
SYST 468  Applied Predictive Analytics  3  
IT 214  Database Fundamentals  3  
STAT 463  Introduction to Exploratory Data Analysis  3  
or SYST 438  Analytics for Financial Engineering and Econometrics  
Total Credits  9  

Financial Engineering  
SYST 438  Analytics for Financial Engineering and Econometrics  3  
SYST 488  Financial Systems Engineering  3  
And choose one of the following:  3  
STAT 463  Introduction to Exploratory Data Analysis  
STAT 455  Experimental Design  
SYST 468  Applied Predictive Analytics  
Total Credits  9  

Mechanical Engineering  
Select one of the following options:  9  

Option 1: Mechanical Design  
ME 211  Statics  
or CEIE 210  Statics  
ME 212  Solid Mechanics  
or CEIE 310  Mechanics of Materials  
ME 341  Design of Mechanical Elements  
or ME 231  Dynamics  
Total Credits  9  

Option 2: Thermal Fluids  
ME 221  Thermodynamics  
ME 322  Fluid Mechanics  
ME 323  Heat Transfer  
or ME 342  Design of Thermal Systems  
Total Credits  9  

Operations Research  
OR 481  Numerical Methods in Engineering  3  
SYST 420  Network Analysis  3  
SYST 468  Applied Predictive Analytics  3  
Total Credits  9  

Software-Intensive Systems  
CS 310  Data Structures  3  
CS 321  Software Engineering  3  
CS 332  Object-Oriented Software Design and Implementation  3  
Total Credits  9  

Synthesis Requirement  
Mason’s synthesis requirement for systems engineering majors is satisfied by successful completion of SYST 495 Senior Design Project II (Mason Core) (p. 135). Students who do not pass SYST 495 Senior Design Project II (Mason Core) (p. 135) with a C or better must retake both SYST 490 Senior Design Project I and SYST 495 Senior Design Project II (Mason Core) (p. 135).  

Writing-Intensive Requirement  
Mason’s writing-intensive requirement for systems engineering majors is satisfied by successful completion of SYST 489 Senior Seminar.
Advising and Plan of Study
All systems engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study. This plan of study, which is available from the SEOR office, constitutes a learning plan for the degree program and must be signed by the student’s advisor and the Department Chair. The plan of study must be updated and signed by the advisor at least once a year.

Accelerated Master’s

BS (selected)/Operations Research, Accelerated MS
Overview
Highly-qualified students in selected BS programs (see below) have the option of obtaining an accelerated Operations Research, MS (p. 1076).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Mason undergraduate students majoring in the following disciplines may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1076) program.

• Civil and Infrastructure Engineering (p. 1091)
• Computer Engineering (p. 1020)
• Computer Science (p. 991)
• Electrical Engineering (p. 1027)
• Systems Engineering (p. 1082)

Accelerated Option Requirements
Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table.

For BS candidates, these graduate courses replace the corresponding undergraduate courses. The undergraduate version of these courses may not be applied to the MS degree.

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

BS (selected)/Statistical Science, Accelerated MS
Overview
Highly-qualified students in selected BS programs (see below) have the option of obtaining an accelerated Statistical Science, MS (p. 1064). Students in an accelerated degree program must fulfill all university requirements for the master’s degree.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students enrolled in a BS degree in any one of the Volgenau School (p. 953) major areas, in the Mathematics, BS (p. 716) program from the College of Science (p. 593), or in the Economics, BS (p. 342) program from the College of Humanities and Social Sciences (p. 295) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.00. Criteria for admission are identical to criteria for admission to the Statistical Science, MS (p. 1064) program, which include successful completion of the following Mason courses each with a grade of C or better:

<table>
<thead>
<tr>
<th>Code</th>

</tbody>
</table>

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with grades of B or better in two 500-level STAT courses selected from STAT 544 Applied Probability, STAT 554 Applied Statistics I, and STAT 574 Survey Sampling I.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at
the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

BS (selected)/Systems Engineering, Accelerated MS

Overview
Highly-qualified students in selected BS programs (see below) have the option of obtaining an accelerated Systems Engineering, MS (p. 1087). For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Mason undergraduate students majoring in civil and infrastructure engineering (p. 1091), computer engineering (p. 1020), computer science (p. 991), electrical engineering (p. 1027), or systems engineering (p. 1082) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Option Requirements
Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table.

For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

BS (selected)/Data Analytics Engineering, Accelerated MS

Overview
Qualified undergraduate students have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 959) with a concentration in predictive analytics. For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
While no specific undergraduate degree is required, Mason undergraduate students majoring in systems engineering or any other engineering, business, computer science, statistics, mathematics, or information technology may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

For the predictive analytics concentration, students must submit evidence of:

- Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.
- Familiarity with analytical modeling software, such as spreadsheets or math packages.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYS 473</td>
<td>SYS 573</td>
</tr>
<tr>
<td>OR 441</td>
<td>OR 541</td>
</tr>
</tbody>
</table>

For the predictive analytics concentration, any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

OR 541 Operations Research: Deterministic Models will substitute for the OR 531 Analytics and Decision Analysis core requirement in the MS DAE program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Systems Engineering, BS/Telecommunications, Accelerated MS

Overview
Highly-qualified students in the Systems Engineering, BS (p. 1082) have the option of obtaining an accelerated Telecommunications, MS (p. 1039).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Systems Engineering, BS (p. 1082) program who preferably have chosen to take the systems engineering of telecommunications elective sequence may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Other students will be considered on their individual merit. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1039) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap selected from the following courses:

<table>
<thead>
<tr>

Mason’s educational and research program in systems engineering addresses a broad range of issues relevant to the design, implementation, analysis and management of systems. Concentration areas include: Advanced Transportation Systems; Architecture-Based Systems Integration; Command, Control, Communications, Computing, and Intelligence; Financial Systems Engineering; Systems Engineering and Data Analytics; Systems Engineering of Software-Intensive Systems; and Systems Management. Research activities include both fundamental and applied research. Mason’s graduate program in Systems Engineering recognizes the importance of balancing an education in quantitative models and engineering tools with a proper understanding of the systems "perspective."

The program prepares students for a professional career in conceptualization, architecture, design, development, and management of large complex engineered systems. The program emphasizes both analytical and practical aspects of engineering complex systems. Students are expected to demonstrate proficiency in several quantitative modeling disciplines. Students are also expected to master issues relevant to practical aspects of systems architecture, design, and management.

Admissions & Policies

Admissions
Foundation and Admission Requirements
Applicants should have a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also should have completed courses in calculus (MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 135), MATH 114 Analytic Geometry and Calculus II, and MATH 213 Analytic Geometry and Calculus III), matrix algebra (MATH 203 Linear Algebra), differential equations (MATH 214 Elementary Differential Equations), applied probability (STAT 346 Probability for Engineers), and a scientific programming language (CS 112 Introduction to Computer Programming (Mason Core) (p. 135)).

Other requirements are as follows:

- Evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have achieved a satisfactory score on the TOEFL exam.
- Two letters of recommendation submitted by former professors or supervisors
- A goals statement and resume
- Working background in engineering mathematics and computer systems. Students with minor deficiencies in preparation may apply for admission to the program, but they will be required to take one or more foundation courses. The department offers SYST 500 Quantitative Foundations for Systems Engineering as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics.

Students who have not completed a basic engineering undergraduate mathematics sequence will be required to complete courses in engineering calculus and matrix algebra prior to acceptance. On acceptance, students will be required to take a foundation qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500 Quantitative Foundations for Systems Engineering.
Engineering or other foundation courses. A sample test is available from the department.

Familiarity with analytical modeling software, such as spreadsheets or math packages, is also expected. Students should acquaint themselves with these software packages before beginning classes.

Policies
Advising & Plan of Study
Each student is assigned a faculty advisor with whom to work to complete an approved plan of study. This plan of study must include five core courses, three required courses in a concentration area, one elective, and a capstone systems engineering project (3 credits) for a total of 10 courses (30 credits for graduation). A thesis option that replaces the 3-credit capstone course with a 6-credit thesis (for a total of 33 credits for graduation) is available in some situations. Matriculation requirements for candidates needing additional work in mathematics or engineering also may be included in the plan of study.

Requirements
Degree Requirements
Total credits: 30-33

All Systems Engineering MS students must complete 5 core courses, 3 concentration courses, an elective, and a project or thesis.

Core Courses
Students must complete the following five courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 505</td>
<td>Systems Engineering Principles</td>
<td>3</td>
</tr>
<tr>
<td>SYST 510</td>

<td>Systems Engineering Management I</td>
<td>3</td>
</tr>
<tr>
<td>SYST 611</td>
<td>System Methodology and Modeling</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 15

1 Students who have work experience in systems engineering should consult with their advisor on replacing SYST 505 Systems Engineering Principles with a higher-level SYST course.

Concentrations
Students may construct 12 credit concentration areas by choosing electives from among special groupings. Students may also devise their own grouping of electives subject to prior approval of their advisor.

Concentration in Advanced Transportation Systems (ATS)
The air transportation system is among the most complex networked systems. This concentration is designed to provide students with the skills to address the next generation of challenges of the air transportation system. Topics addressed include congestion and safety of the national air space, economic and human factors, impact of technology innovation, and public policy. The program emphasizes design, modeling, and analysis to support decision making for government and the aviation industry.

One free elective, chosen under advisement: 3

Total Credits: 12

Concentration in Command, Control, Communications, Computing, and Intelligence (C4I)
C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

This concentration focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

With careful planning, students who complete this concentration might be able to complete the Command, Control, Communications, Computing,
and Intelligence Graduate Certificate (p. 1073) simultaneously with their MS.

OR 542 Operations Research: Stochastic Models 3
or ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
SYST 680 Principles of Command, Control, Communications, Computing, and Intelligence (C4I) 3
or ECE 670 Principles of C4I
SYST 584 Heterogeneous Data Fusion 3
One free elective, chosen under advisement: 3
Total Credits 12

Concentration in Energy Systems (NRGS)
With the rising economic and environmental costs to power homes, businesses and the transportation systems that move people and goods from place to place, innovative solutions are required to meet the world’s expanding energy needs. Students completing the energy systems concentration will build upon a foundation in systems engineering design by incorporating physical principles of thermal fluid energy transfer into system models. Students will develop the tools to model and analyze generation, transmission, and utilization systems in steady and dynamic operation. Students will optimize these systems by considering physical principles, economics, local policy and security concerns. Graduates will be able to apply their expertise to work with: traditional power generation facilities; renewable energy integration; national, local, and smart grids; mechanical and electrical energy storage systems; utilization of energy in building and transportation systems.

ME 521 Energy Transfer 3
ME 531 Energy Transmission 3
ME 541 Power Generation 3
One free elective, chosen under advisement: 3
Total Credits 12

Concentration in Financial Systems Engineering (FNSE)
Financial engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions, as well as facilitating the risk management of those decisions. While mathematics is indispensable in financial engineering, the concentration will try best to focus on the concepts and ideas of finance, while limiting the math within a scope acceptable to most students in engineering.

SYST 538 Analytics for Financial Engineering and Econometrics 3
SYST 588 Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives 3
SYST 688 Financial Systems Engineering II: Derivative Products and Risk Management 3
One free elective, chosen under advisement: 3
Total Credits 12

Concentration in Systems Engineering and Data Analytics (SEDA)
Systems engineers must address a broad range of issues relevant to the design, implementation, analysis, and management of systems. This concentration provides methodological tools that can be applied to the systems engineering process. Areas of focus include decision support systems, distributed intelligent systems, knowledge-based planning systems, network systems, probabilistic reasoning systems, sensor fusion systems, and optimization methods.

OR 531 Analytics and Decision Analysis 3
SYST 568 Applied Predictive Analytics 3
SYST 573 Decision and Risk Analysis 3
One free elective, chosen under advisement: 3
Total Credits 12

Concentration in Systems Engineering of Software-Intensive Systems (SESII)
This concentration addresses the software component of the systems engineering life cycle. It specifically covers the allocation of system requirements to software. Practitioners are concerned with the theoretical and practical aspects of technology, cost, and the social effect of computer systems that are reliable, maintainable, secure, efficient, and cost effective. The program emphasizes the integration of hardware, software, and firmware, and the management of these complex computer systems over their life cycle through systems engineering methods, tools, and processes.

With careful planning, students who complete this concentration might be able to complete the Engineering Resilient Enterprise Systems Graduate Certificate (p. 1074) simultaneously with their MS.

SYST 542 Decision Support Systems Engineering 3
SYST 618 Model-based Systems Engineering 3
One from the following: 3
ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
OR 531 Analytics and Decision Analysis
OR 541 Operations Research: Deterministic Models
OR 542 Operations Research: Stochastic Models
OR 568 Applied Predictive Analytics
or SYST 568 Applied Predictive Analytics
SYST 563 Evidence-Based Systems Engineering
SYST 573 Decision and Risk Analysis
SYST 620 Discrete Event Systems
SYST 664 Bayesian Inference and Decision Theory
One free elective, chosen under advisement: 3
Total Credits 12

Concentration in Systems Management (SMG)
The management aspect of systems engineering involves tracking and control of system development through the major phases of the system lifecycle, identifying and resolving problems to minimize their effect on cost, schedule, or performance, and iteratively improving product and process. This concentration emphasizes the theory and practice of systems management and prepares students for careers in management.

SYST 514 Systems Thinking 3
SYST 618 Model-based Systems Engineering 3
SYST 630 Systems Engineering Management II 3
One free elective, chosen under advisement: 3
Total Credits 12
Project or Thesis

Students must complete a capstone project (3 credit hours) or thesis (6 credit hours) under the direction of a Systems Engineering faculty member.

Under the project option, the student completes three credit hours of SYST 699 Masters Project. Students in these courses work in teams on an approved applied project. A project report is submitted at the end of the semester, and a final project presentation is made to the entire faculty of the SEOR Department.

The thesis option requires approval by the department chair and approval is only given in rare circumstances. Under the thesis option, the student completes six credit hours of SYST 799 Master’s Thesis. The master’s thesis should reflect a significant independent research effort. The work is conducted under the guidance of a faculty thesis advisor, and the final written thesis and oral defense are approved by a three-member faculty committee and submitted to the library. The thesis work is expected to be completed while taking six semester hours of SYST 799 Master’s Thesis. Although a student is required to maintain continuous enrollment by registering for SYST 799 Master’s Thesis each semester until the thesis is completed, only six hours will be applied to the degree.

Accelerated Master’s

BS (selected)/Systems Engineering, Accelerated MS

Overview
Highly-qualified students in selected BS programs (see below) have the option of obtaining an accelerated Systems Engineering, MS (p. 1087).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Mason undergraduate students majoring in civil and infrastructure engineering (p. 1091), computer engineering (p. 1020), computer science (p. 991), electrical engineering (p. 1027), or systems engineering (p. 1082) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Option Requirements
Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table.

For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>

<td>OR 541</td>
</tr>
<tr>
<td>OR 542</td>
<td>Credit may not be received for both courses.</td>
</tr>
</tbody>
</table>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Liza Wilson Durant, Acting Chair

Phone: 703-993-1675
Website: civil.gmu.edu

The Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering (CEIE) offers BS, MS, MEng, and PhD degrees. These degree programs focus on the physical and organizational infrastructure essential to the functioning of society.

Civil and infrastructure engineering is the study of land, transportation, water resources, environment, structures, geotechnology, and construction from a civil engineering perspective and within a complex technological, social, political, economic, and environmental context. The focus is on how these systems are successfully conceived, developed, designed, built, operated, maintained, and renewed in the built environment. This applies to major metropolitan areas in developed countries, such as Washington, D.C. and its integrated suburbs, and extends to infrastructure issues in developing nations which often involve very different issues.

An urban society thrives and prospers when adequate, appropriate, reliable, robust, secure, and cost-effective infrastructure systems are provided. The investment in existing infrastructure and other urban systems in the United States and abroad is enormous. The investment required to maintain, operate, renew, and manage the evolution of these infrastructure systems in the future is even greater. The need for highly educated and creative professionals to confront and solve these continuing vital problems is pressing. Examples of infrastructure systems
include water supply and distribution; streets, roads, and highways; wastewater management; transit; storm water management; public utilities; energy supply and distribution; telecommunications; buildings, facilities and structures; and solid waste management.

Faculty

Professors
Arciszewski (emeritus), Durant (acting chair), Goodings, Houck, Miller-Hooks

Associate Professors
Kosoglu, Tanyu, Urgessa, Venigalla

Assistant Professors

Lisa Nolder, Associate Director for Undergraduate Programs

Phone: 703-993-1675
Email: snolder@gmu.edu
Website: http://civil.gmu.edu/undergraduate

The bachelor’s degree program provides essential underpinnings in the theory and design methods of civil and infrastructure engineering for engineering practice. Students benefit from exposure to practical civil, environmental, and infrastructure engineering problems and their solutions in the classroom, lab, and field. The educational objectives of the Civil and Infrastructure Engineering program describe expectations for graduates approximately three to five years after obtaining their BS CIE degree. Graduates of the program will be professionals who:

• Engage in the engineering practice of planning, designing, constructing, operating and maintaining sustainable infrastructure;
• Participate in public discussions concerning infrastructure in the urban, suburban, and exurban setting by providing professional guidance;
• Stay current through continuing education opportunities, professional conferences, graduate school, and other self-learning experiences; have the ability to obtain and maintain professional licensing.

Civil engineering students can look forward to a career in local, state, and federal government organizations, and in architectural and engineering firms that specialize in land development, transportation, water resources, environment, structures, geotechnical, construction, and other related fields. The program also prepares students for continuing graduate studies for sophisticated practice, research, and teaching.

The bachelor’s program in civil and infrastructure engineering is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

This is a Green Leaf program (p. 102).

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 84).

Change of Major
See Change of Major (p. 955) for more information.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated. For more information, see AP.5.2.4 Termination from the Major (p. 85).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 135) and STAT 250 Introductory Statistics I (Mason Core) (p. 135).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Program Requirements
Degree requirements include 120 credits distributed in three main areas: mathematics and basic science, humanities and social sciences, and civil engineering analysis and design. Students must complete all math,
science and Volgenau School of Engineering courses presented as part of the required 120 credits for the degree with a grade of C or better.

The prerequisite structure for these courses is extensive. Sample schedules, available from the department, provide a comprehensive listing of major and Mason Core requirements and serve as a guide to the progression of the courses to satisfy all prerequisites.

Students are required to see their faculty advisor at least once each year to plan their curriculum, and to develop an approved plan of study, which constitutes a learning plan for the degree program.

</table>

**Total Credits**: 6

## Writing-Intensive Requirement

The university’s writing-intensive requirement for civil and infrastructure engineering majors is satisfied by the successful completion of CEIE 301 Engineering and Economic Models in Civil Engineering.

## Additional Mason Core

Students must complete all Mason Core (p. 135) requirements not fulfilled by major requirements with one modification. CIE students are required to take 6 credits of written communication, 3 credits of literature, and courses in two of the following three areas: arts, global understanding, and western civilization/world history. This exemption means that CIE students meet the Volgenau School of Engineering’s requirement for humanities and social science courses by taking 21 credits rather than 24. The two additional Mason Core (p. 135) areas to be satisfied must be approved by the CEIE faculty advisor with the goal of best meeting the Mason Core (p. 135) needs of the student. All other Mason Core (p. 135) requirements must be met.

- **Written Communication** (p. 135): 6 credits
- **Literature** (p. 140): 3 credits
- **Select courses from two of the following areas**: 6 credits
  - Arts (p. 137)
  - Western Civilization/World History (p. 143)
  - Global Understanding (p. 139)

**Total Credits**: 15

## Honors

### Honors in the Major

The Sid and Reva Dewberry Department of Civil, Environmental and Infrastructure Engineering offers an Honors Program in Civil and Infrastructure Engineering that creates a community of outstanding scholars in civil engineering who share a commitment to learning, service, and leadership. The Program is crafted around the civil and infrastructure curriculum, and is distinct from the University Honors Curriculum. Entry to the Honors Program is by invitation, extended to students with a minimum high school GPA of 3.80.

## Requirements

The Honors program is challenging, designed for the highly motivated student, and consists of 120 credits. Honors students must satisfy requirements in addition to those of the normal BS CIE degree, including:

- An advanced communication course, COMM 320 Business and Professional Communication or COMM 637 Risk Communication, which may serve as a substitute for one CEIE (4xx) level senior technical elective.
- A minimum of 6 credits of CEIE graduate (5xx/6xx) level courses (these courses may substitute for CEIE (4xx) level senior technical electives by approval of the Department Chair). Students must submit a Graduate Course for Undergraduate Credit Form for approval to the course instructor and Department Chair.

Once admitted to the Honors Program, students must remain in good standing and maintain a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each semester for all courses counting toward the BS CIE degree, maintain continuous enrollment working toward the BS CIE degree, and abide by the Mason Honor Code.

## Accelerated Master's

### Civil and Infrastructure Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS

#### Overview

Highly-qualified students in the Civil and Infrastructure Engineering, BS (p. 1091) have the option of obtaining an accelerated Civil and Infrastructure Engineering, MS (p. 1095).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

#### Admission Requirements

Students in the Civil and Infrastructure Engineering, BS (p. 1091) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. All other criteria for admission are identical to criteria for admission into the Civil and Infrastructure Engineering, MS (p. 1095) program.

#### Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs. Students register for 6 credits of overlapping graduate level courses in place of undergraduate technical elective courses. The courses selected for this purpose must be approved by the academic advisor.

#### Degree Requirements

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Bachelor's Degree (Green Leaf)/Environmental Science and Policy, Accelerated MS

Overview
This degree option allows highly qualified George Mason University students to earn an Environmental Science and Policy, MS (p. 664) in less time than if they had first graduated with an environmentally-focused Green Leaf-designated (p. 102) BA or BS degree and then applied to the MS program sequentially.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 89). For policies governing all graduate programs, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated (p. 102) major or minor may apply for provisional acceptance into this accelerated master’s program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) (p. 135) and CHEM 212 General Chemistry II (Mason Core) (p. 135)) and three semesters of biology, including a course in ecology, or the equivalent, for example:

Select one of the following options:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 213</td>
<td>Cell Structure and Function (Mason Core) (p. 135)</td>

<td>6</td>
</tr>
<tr>
<td>BIOL 308</td>
<td>Foundations of Ecology and Evolution</td>
<td>6</td>
</tr>
</tbody>
</table>

Reserve Graduate Credits
Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate environmentally-focused graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 27-31 credits to receive the master’s degree.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms) (as noted above).

Students may take up to 6 additional environmentally-focused graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, an MS could be completed with 21 post-bachelor’s credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

Website: civil.gmu.edu/graduate/master-of-science

This MS is designed for students who have completed a bachelor’s degree in civil engineering, although students with related undergraduate degrees may be considered for provisional admission. The MS educates students in the theory and practice of civil engineering science and design, with a technical concentration. The master’s degree is increasingly expected for high level practice in civil engineering, and prepares graduates to practice in civil engineering for: federal, state, or local government; engineering design firms; construction firms; public utilities; non-governmental organizations; and local and regional planning firms, among others. The MS degree serves as a foundation for subsequent study in a doctoral program in civil engineering, as well as for graduate studies in architecture, law, business, economics, finance, and public policy and administration.

Full-time students typically complete the degree in one and a half, to two years.

Admissions & Policies

Admissions
To be considered for admission to the program, a candidate must:

• Satisfy general University and Volgenau School requirements for admission to a graduate program,
• Have earned a baccalaureate degree in engineering or a related science,
• Provide two letters of reference, submitted by former professors or supervisors,
• Provide a goals statement and professional résumé.

Acceptance to the degree program is based on an assessment of the applicant’s capacity to pursue graduate studies successfully. Consideration is given to the undergraduate record, any previous graduate work, professional work experience, and reference letters. Students with minor admission deficiencies may be provisionally admitted subject to completing an articulation program. Prescribed courses taken in the articulation program are not creditable toward the MS degree.

Requirements

Degree Requirements
Total credits: 30

All MS students must develop a faculty-approved plan of study with a minimum of 30 graduate credits. These credits include two core courses (CEIE 601 Infrastructure Modeling and CEIE 605 Risk and Uncertainty in Civil Engineering), specific requirements of a concentration declared by the student, and seminar requirement (CEIE 795 Civil and Infrastructure Engineering Seminar).

Plan of Study
Students are responsible for developing and receiving advisor approval on a plan of study no later than the end of their second semester of study. Courses taken without prior approval by the faculty advisor may not be accepted for credit toward the degree. No more than three courses used for credit toward the MS may be cross-listed as undergraduate courses. None may repeat material completed as part of the student’s previous studies. Most MS courses are offered on a three-semester rotation.

Core Courses
All MS students must complete the following two core courses within the first 12 credit hours of their MS studies. These courses provide a common background for understanding the breadth and complexity of civil and infrastructure engineering and for analyzing and solving engineering problems.

CEIE 601 Infrastructure Modeling 3
CEIE 605 Risk and Uncertainty in Civil Engineering 3

Note:
Electives outside of the chosen concentration can only be taken or
substituted with the approval of the faculty advisor.

Project or Thesis Option
As part of the plan of study, students may elect to pursue research
credits.

Research Project
Students complete CEIE 798 Research Project in Civil Engineering, during
which they prepare and present a scholarly paper. The scholarly paper
is a technical report on an independent study, laboratory or computer
experimentation, or literature search on a current civil and infrastructure
engineering topic selected under the guidance of a faculty advisor.
CEIE 798 Research Project in Civil Engineering credits count toward the
30 credit hours required for the MS degree.

CEIE 798  Research Project in Civil Engineering  3

Total Credits  3

Master's Thesis
Students complete CEIE 799 Master's Thesis which counts toward the
30 credit hours required for the MS degree. The MS thesis should reflect
a significant, independent research effort that advances engineering
science, and is worthy of publication. The work is conducted under the
guidance of a faculty thesis advisor, and the final written thesis and
oral defense are defended before a three-member faculty committee.
In addition, students must make a satisfactory presentation of the
thesis in the CEIE graduate seminar. The thesis is recommended for
those students who wish to develop and document their research skills,
or contemplate subsequent enrollment in a PhD program. Students
are advised of the university’s continuous registration requirement for
thesis and dissertation research credits. Upon first enrolling in CEIE 799
Master's Thesis, the student must continue registration for each fall and
spring semester until the thesis is successfully completed. CEIE 799
Master's Thesis credits count toward the 30 credit hours required for the
MS degree.

CEIE 799  Master's Thesis (must complete 6 credits)  1-6
Total Credits  1-6

Seminar Requirement
All degree candidates must attend a minimum of five graduate seminars
approved by the CEIE Department for the degree program. Students must
enroll in CEIE 795 Civil and Infrastructure Engineering Seminar each
semester (fall and spring) for the duration of their MS studies until they
receive a satisfactory (S) grade. This course is used to verify the seminar
attendance requirement and is repeatable.

CEIE 795  Civil and Infrastructure Engineering Seminar  0

Total Credits  0

Accelerated Master's

Civil and Infrastructure Engineering, BS/
Civil and Infrastructure Engineering,
Accelerated MS

Overview
Highly-qualified students in the Civil and Infrastructure Engineering, BS (p. 1091) have the option of obtaining an accelerated Civil and Infrastructure Engineering, MS (p. 1095).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 89). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 87).

Admission Requirements
Students in the Civil and Infrastructure Engineering, BS (p. 1091) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. All other criteria for admission are identical to criteria for admission into the Civil and Infrastructure Engineering, MS (p. 1095) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for both the BS and MS programs. Students register for 6 credits of overlapping graduate level courses in place of undergraduate technical elective courses. The courses selected for this purpose must be approved by the academic advisor.

Degree Requirements
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Civil and Infrastructure Engineering, PhD

Banner Code: VS-PHD-CEIE

Academic Advising
Phone: 703-993-1675
Email: ceiegrad@gmu.edu
Website: civil.gmu.edu/graduate/doctor-of-philosophy

The Doctor of Philosophy in Civil and Infrastructure Engineering (CIE) was created to prepare students for advanced leadership positions in
research and development in the public or private sector, academics, or government. Students may elect to study in the areas of: environmental and water resources engineering, geotechnical engineering, structural engineering, or transportation engineering. Admitted students will complete both required and applicable course work in their technical interest area based on a plan of study prepared with a doctoral advisor. They will take qualifying exams that assess student’s breadth of knowledge at the graduate level and competency to conduct research. They will form a doctoral committee and prepare and defend a dissertation proposal leading to PhD candidacy. Finally, they will conduct original scholarly research and prepare, then defend a doctoral dissertation. Both part-time and full-time study is available.

Admissions & Policies

Admissions

Requirements

All general George Mason University and specific Volgenau School admission requirements (including deadlines) apply. In addition, all applicants, including Mason undergraduates, must submit the following:

• Official transcript of undergraduate and graduate course work,
• For applicants whose official language is not English, official TOEFL scores which meet the minimum requirements set by the Volgenau School,
• Three letters of recommendation from individuals knowledgeable about the applicant’s professional or academic work (at least two of the letters should be from individuals with doctorates),
• Recent professional résumé,
• Substantial statement of interest that includes a description of the specific area of proposed dissertation research, contacts the student has made with potential faculty advisors, and an explanation of career and research goals,

Admission decisions will be based on the student’s qualifications and the availability of a faculty advisor in their proposed area of research. The application materials will be reviewed by the department doctoral committee and decisions made with input from appropriate faculty members.

Financial support for outstanding applicants is available in the form of fellowships as well as research and teaching assistantships. For best consideration, applicants are encouraged to apply early and to contact potential faculty advisors to express interest in support.

Policies

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 24 credits from a completed master’s degree in civil engineering or other related fields. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Program Requirements

The PhD in Civil and Infrastructure Engineering requires 72 graduate credits, including 48 credits of graduate coursework and 24 credits of research. Admitted students are expected to hold a Bachelor of Science in Civil Engineering or degree in a closely-related science field.

Exceptionally-qualified students without a related bachelor’s or master’s degree may be admitted provisionally and required to take additional undergraduate- and graduate-level articulation courses prescribed by the doctoral committee, which will not count towards the PhD degree.

The degree plan outlined in Degree Requirements is based on a student who receives a full 24 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Requirements

Degree Requirements

Total credits: 72

Doctoral Coursework

A minimum GPA of 3.50 is required and no C grades are allowed for the 24 credits earned beyond the MS. A detailed plan of study will be prepared for each student upon acceptance into the program and in consultation with the faculty advisor, which outlines all course requirements to include:

Required Courses

The following must be completed while in residence in the program.

CEIE 800 Civil, Environmental, and Infrastructure Engineering Colloquium (must be taken at least twice)
CEIE 990 Civil and Infrastructure Dissertation Topic Presentation
Select one from the following: 3
CEIE 603 Research Methods in Civil Engineering
CEIE 796 Directed Reading

Total Credits 6

Courses Chosen with Advisor

Courses, especially in the student’s technical interest area, chosen in consultation with his or her advisor 1

Total Credits 18

1 No more than three courses used for credit toward the PhD may be cross-listed as undergraduate courses. None may repeat material completed as part of the student’s previous studies.

Qualifying Exam

The PhD qualifying exam is offered twice a year prior to the start of the fall and spring semesters. The qualifying exam is intended to test students’ breadth of knowledge at the MS level in their research area and to evaluate readiness for research. Students entering with a MS degree are required to attempt the qualifying exam within 18 months of admission to the program. Students entering without a MS degree must attempt the qualifying exam within two years of admission to the program.
Dissertation Committee

A dissertation committee (separate from the examination committee) is formed upon successful completion of the qualifying exams. The student, in consultation with their advisor, shall select at least three full-time CEIE Department faculty members, and at least one committee member from outside of the CEIE department. At least three members of the committee are to be members of the Mason graduate faculty. All committee members must hold earned doctorates and possess applicable knowledge and experience in the student’s chosen topic. The CEIE Department Chair must approve the composition of the dissertation committee. Additional committee members from outside Mason (e.g., from industry, other institutions, etc.) may be appointed if approved by the majority of the CEIE faculty. The committee must be formed and approved before admission to candidacy (described in the next section) and before registering for CEIE 999 Doctoral Dissertation. Substitutions to the dissertation committee are allowed with the approval of the CEIE Department chair.

Dissertation Proposal Preparation and Advancement to Candidacy

After successfully passing the qualifying exams and forming of a dissertation committee, the student may register for CEIE 998 Doctoral Dissertation Proposal research credits and begin preparation of the dissertation research proposal. The student will consult with his or her advisor on the selection of an original scholarly topic and preparation of a formal research proposal. Students are also encouraged to register for the required CEIE 990 Civil and Infrastructure Dissertation Topic Presentation course during this time. Students must schedule a formal proposal defense (also known as the research competency exam) with all members of their chosen committee present. This cannot be done before successful completion of the qualifying exams. Committee members should receive printed copies for the final proposal not less than two weeks prior to the scheduled defense date.

The research competency exam (proposal defense) includes the written proposal and a presentation of the planned dissertation research. The dissertation proposal defense shall not include already completed research. The dissertation proposal defense is the main opportunity for the committee to provide input and for the dissertation committee members to examine the student’s knowledge in higher-level course work and familiarity with existing and emerging research related to the student’s research area. After the student’s presentation, and after private deliberation, the committee makes a pass/fail determination that is given to the student by his or her advisor.

Students who pass the research competency exam are admitted to candidacy and become PhD Candidates. Students who do not pass the exam may, in consultation with their advisor, schedule a second exam within 120 days of receiving notice of the first exam result. Students who do not re-schedule and successfully pass the research competency within this period are dismissed from the program.

Dissertation Research

Students become eligible for CEIE 998 Doctoral Dissertation Proposal upon passing the qualifying exam (preceding section). Upon admission to candidacy, which requires satisfactory preparation and defense of a dissertation proposal, students may register for CEIE 999 Doctoral Dissertation.

Select 24 credits from the following: 24

<table>
<thead>
<tr>

<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEIE 998</td>
<td>Doctoral Dissertation Proposal</td>
<td>12</td>
</tr>
<tr>
<td>CEIE 999</td>
<td>Doctoral Dissertation (minimum 12 credits required)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 24

The requirements of the written exam (deadlines for exam request, list of topics, allowed aid sheets, calculator policy etc.) are posted on the department’s website. The oral exam is conducted by an examining committee of three CEIE graduate faculty, of whom two must be in the student’s research area. Students give a five minute research presentation, and answer questions from the examination committee about the written exam, the research presentation and other related topics.

Students who receive an overall passing grade form a dissertation committee and register for CEIE 998 Doctoral Dissertation Proposal. Students who receive an overall failing grade may petition to repeat the exam. If granted, the second attempt, which includes both the written and the oral exam, must be completed within one calendar year. The petition to repeat the exam must be received within one month of the first exam attempt. No more than two exam attempts are permitted. Students who do not receive an overall passing grade are terminated from the program.

The qualifying exam consists of one written exam and one oral exam in the student’s primary research area. The available examination areas include:

- Area A: Environmental Engineering
- Area B: Geotechnical Engineering
- Area C: Structural Engineering
- Area D: Transportation Engineering
- Area E: Water Resources Engineering

The research competency exam (proposal defense) includes the written proposal and a presentation of the planned dissertation research. The dissertation proposal defense shall not include already completed research. The dissertation proposal defense is the main opportunity for the committee to provide input and for the dissertation committee members to examine the student’s knowledge in higher-level course work and familiarity with existing and emerging research related to the student’s research area. After the student’s presentation, and after private deliberation, the committee makes a pass/fail determination that is given to the student by his or her advisor.

Students who pass the research competency exam are admitted to candidacy and become PhD Candidates. Students who do not pass the exam may, in consultation with their advisor, schedule a second exam within 120 days of receiving notice of the first exam result. Students who do not re-schedule and successfully pass the research competency within this period are dismissed from the program.

Dissertation Research and Defense

On successful completion of the dissertation proposal, students are to conduct original research under the guidance of their dissertation director and dissertation committee members. Students are not to schedule their dissertation defense sooner than two semesters after a successful proposal defense. The dissertation must represent achievement in research, must be a significant contribution to the field of civil engineering, and should be deemed publishable in refereed journals. When the majority of the research has been completed, the candidate is to submit a written draft of the dissertation to the doctoral dissertation committee and schedule an oral pre-defense with the doctoral dissertation committee. The pre-defense is to be attended by the doctoral dissertation committee and the department chair.

A final, public, oral defense may be scheduled no sooner than one month after the conclusion of the pre-defense, which will allow for a minimum of two weeks to advertise it broadly. The final defense is to be attended by the doctoral dissertation committee and the department chair. On successful completion of the oral defense, students must submit a final dissertation that meets the guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to defend the dissertation successfully, the student may request a second defense following the same procedures as the initial defense. This request has no time limit, other than the general time limits for the doctoral degree as per Mason policy. An additional pre-defense is not required; however, the student is strongly advised to consult with the committee before scheduling the second defense. If the student fails on the second attempt to defend the dissertation, the student will be
dismissed from the PhD program. Following a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of Doctor of Philosophy.

Teaching Opportunities
All PhD students are encouraged to participate in teaching activities in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student’s advisor.

Environmental Engineering Minor
Banner Code: EENG
Lisa Nolder, Associate Director for Undergraduate Programs
Phone: 703-993-1675
Email: snolder@gmu.edu
Website: http://civil.gmu.edu/undergraduate/minors

Students with engineering majors in CEIE (p. 1091), BIOE (p. 970), and SEOR (p. 1082), and non-engineering majors in Biology (p. 619), Chemistry (p. 637), Environmental Science and Policy (p. 661), Geography and Geoinformation Science (p. 689), and Geology (p. 611) are especially encouraged to consider this offering. The minor prepares students through additional coursework for subsequent graduate studies in water and environmental engineering at Mason or elsewhere, and for employment in environmental engineering, although the minor by itself does not constitute an engineering qualification.

Geotechnical, Construction, and Structural Engineering, MEng
Banner Code: VS-MENG-GCS

Admissions & Policies
Admissions
Requirements
To be considered for admission to the MEng program, a candidate must:
• Satisfy general University and Volgenau School requirements for admission to a graduate program,
• Have earned a baccalaureate degree in engineering or a related science,
• Provide two letters of recommendation from individuals knowledgeable about the applicant’s academic or professional work,
• Provide a goals statement and professional résumé.

Acceptance to the degree program is based on an assessment of the applicant’s capacity to pursue graduate study successfully. Students are assumed to have completed an undergraduate degree in civil engineering. Consideration is given to the undergraduate record, any previous graduate work, professional work experience, and reference letters. Students with minor admission deficiencies or with undergraduate degrees in related fields, such as geology or another branch of engineering, may be provisionally admitted subject to completing an articulation program of civil engineering undergraduate courses. Courses required for articulation are not creditable toward the MEng degree.

Research Assistantships & Fellowships
Research Assistantships and Fellowships are typically not awarded to students pursuing the MEng Program because it is entirely a course-based degree, rather than a research degree. Students interested in Teaching Assistantships (usually reserved for full-time graduate study) should indicate their interest on their application and also contact the department after an admissions decision is made.

Policies
Plan of Study
All MEng students must develop a faculty-approved plan of study with a minimum of 30 credits of graduate coursework. The coursework
presented for the degree must include at least three MEng core courses (9 credits) and approved electives (21 credits). Note that the fourth or fifth core course that is not counted for the core requirement may also be selected as an elective. There is no project or thesis requirement for the MEng degree. Most MEng courses are offered once every three semesters and are scheduled to meet in the late weekday afternoons or evenings.

## Requirements

### Degree Requirements

**Total credits: 30**

#### Core Courses

Select 9 credits from the following:

- CEIE 524 Introduction to Bridge Engineering
- CEIE 525 Structural Evaluation and Rehabilitation
- CEIE 531 Earth Retaining Structures and Slope Stability
- CEIE 575 Design for Constructability
- CEIE 605 Risk and Uncertainty in Civil Engineering

**Total Credits** 9

#### Electives

Select 21 credits from the following:

- CEIE 512 Structural Steel Design
- CEIE 513 Reinforced Concrete Design
- CEIE 526 Advanced Steel Design
- CEIE 527 Pre-stressed Concrete
- CEIE 532 Foundation Design
- CEIE 535 Engineering Geology
- CEIE 571 Construction Administration
- CEIE 572 Building Information Modeling
- CEIE 573 Legal Aspects of the Construction Process
- CEIE 576 Construction Cost Estimating
- CEIE 607 Public Infrastructure Management and Finance
- CEIE 611 Advanced Structural Analysis
- CEIE 612 Structural Mechanics
- CEIE 613 Structural Dynamics
- CEIE 619 Special Topics in Structural Engineering
- CEIE 620 Intelligent Structural Systems
- CEIE 623 Advanced Reinforced Concrete Design
- CEIE 634 Groundwater and Geoenvironmental Design
- CEIE 635 Advanced Soil Mechanics
- CEIE 636 Sources of Geotechnical Data
- CEIE 638 Advanced Foundation Design
- CEIE 639 Special Topics in Geotechnical Engineering
- CEIE 679 Special Topics in Construction Management

**Total Credits** 21

1 Cross-listed as undergraduate courses

### Interdisciplinary Programs and Courses

#### Programs

- Applied Science, BAS

#### Administration

- Janette Kenner Muir, Academic Director and Associate Provost for Academic Initiatives and Services
- Marcy R. L. Glover, Curriculum Coordinator
- Krystal Dains, Coordinator, Volgenau School of Engineering concentrations
- Jane Walker, Coordinator, School of Conflict Analysis and Resolution concentration
- Hermione Pickett, Adult Learning Advisor

The Bachelor of Applied Science (BAS) is an undergraduate liberal arts degree program for adult learners. It is designed primarily to deepen student knowledge in an academic area and foster critical thinking, analytic reasoning, and an ability to synthesize information.

The BAS articulates well with specialized Applied Associate Science (AAS) degree programs, providing a streamlined path to completion of traditional academic requirements leading to the baccalaureate degree. It meets students’ professional and personal goals while developing a depth of knowledge and proficiency of skill that translates well to the workplace. However, it is not organized in the same way as a traditional baccalaureate degree. Students planning graduate study should consult with an academic advisor prior to undertaking this degree program.

### Admissions & Policies

#### Admissions

As a prerequisite to enrollment in the BAS, students must be at least 7 years out of high school and have received an Associate of Applied Science (AAS) degree from an accredited two-year institution in an approved area of specialization. The AAS degree will normally fulfill some, but not all, Mason Core (p. 135) requirements. Students who do not meet the 7 year rule may be eligible for an Admissions waiver if additional criteria are met. Details are available at the program’s website. (http://bas.gmu.edu)
Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 84).

Program Requirements

BAS students must fulfill all requirements for bachelor's degrees including Mason Core (p. 135) requirements, to include 45 credits of upper-level coursework. All Mason Core (p. 135) requirements must be met with either George Mason courses or transferrable equivalents.

The minimum credit requirement for a bachelor's degree is 120 credits; however, while there is some variation between concentration areas, fulfilling all Mason Core (p. 135) requirements and an academic concentration or specialization is likely to require most BAS students to complete at least 63-66 credits at George Mason, which may lead to over 120 credits of coursework in order to receive the degree.

Admitted BAS students will be academically advised by the appropriate BAS Program concentration Advisor to plan their course of study including completion of the Mason Core (p. 135), the BAS concentration or specialization, and any remaining requirements. See the website (http://bas.gmu.edu) for more information.

The degree plan outlined is based on a student who transfers in a minimum of 30 credits from a completed AAS degree. Some of these credits may count only towards the elective requirement within the BAS degree.

Degree Requirements

Total credits: 120-126

Concentrations are intended to provide focus for the BAS curriculum in an area relevant to the student's AAS degree while allowing for the breadth of study associated with a liberal arts baccalaureate degree. Please note that determination of current transfer work for these concentrations may impact course requirements.

In addition to satisfying all Mason Core (p. 135) requirements, students must satisfy the requirements for one of the seven concentrations. Students who do not wish to pursue a concentration may seek permission to plan a course of study in a specialization outside the concentration areas in collaboration with the program advisor.

Concentration in Applied Conflict Analysis and Resolution (ACAR)

This concentration is in collaboration with the School for Conflict Analysis and Resolution (p. 882).

Core Requirement

- CONF 340 Global Conflict Analysis and Resolution 3
- CONF 340 Community, Group, and Organizational Conflict Analysis and Resolution 3

Applied Coursework

- CONF 300 Conflict Resolution Techniques and Practice 3
- Choose three credits of Skills Coursework from:
  - CONF 325 Dialogue and Difference 3
  - CONF 370 Internship Field Experience 3
  - CONF 385 International Field Experience 3
  - CONF 398 Special Topics in Advanced Techniques and Practices 3
  - CONF 425 Mediating Conflict 3
- or foreign language completed at the 250 level.
  - CONF 490 RS: Integration (Mason Core) (p. 135) 3

Electives

In consultation with their advisor, students are required to take 18 credits of concentration coursework; at least 9 credits must be from the CONF department. The concentration list can be found in the catalog or on our website.

Total Credits 42

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Conservation Studies (CNST)

This concentration is in collaboration with New Century College and the Smithsonian-Mason School of Conservation. This degree is ideal for students who have earned an AAS in Veterinary Technology. One semester of study at the Smithsonian-Mason School of Conservation is required for completion of degree requirements.

- BAS 300 Building Professional Competencies 3
- BAS 490 Introduction to Research Methods 3
- BAS 491 Applied Sciences Capstone (Mason Core) (p. 135) 3

Select one of the Smithsonian Semesters listed below: 16

Smithsonian Semester: Conservation, Biodiversity and Society:

- CONS 320 Conservation in Practice
- CONS 401 Conservation Theory
- CONS 402 Applied Conservation
- CONS 410 Human Dimensions in Conservation (Mason Core) (p. 135)
- CONS 490 RS: Integrated Conservation Strategies (Mason Core) (p. 135)

Smithsonian Semester: Wildlife Ecology and Conservation:

- CONS 400 Conservation Seminar
- CONS 404 Biodiversity Monitoring
- CONS 405 Landscape and Macrosystems Ecology
- CONS 496 Research in Conservation
### Smithsonian Semester: Endangered Species and Conservation

Electives
Select 12-15 hours of required 300/400 level elective coursework, in consultation with the advisor as need to complete the required 45 hours

Total Credits 63-66

Electives
All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Health, Wellness and Social Services (HWSS)
This concentration is in collaboration with the College of Health and Human Services (p. 235).

To enroll in this concentration, students must have an AAS in one of the following areas:
- Health Information Management
- Hospitality Management, Nutrition Management specialization
- Nursing
- Physical Therapist Assistant
- Respiratory Therapy

Core Requirements
BAS 300 Building Professional Competencies 3
SOCW 200 Introduction to Social Work 3
GCH 205 Global Health (Mason Core) (p. 135) 3
NURS 434 Vulnerable Populations 3
BAS 490 Introduction to Research Methods 3
BAS 491 Applied Sciences Capstone (Mason Core) (p. 135) 3

Total Credits 18

Additional Concentration Requirements
To complete the Health, Wellness and Social Services concentration, students must complete one of the two following areas:
- Health Care Administration
- Physical and Mental Health Care Delivery

Health Care Administration
HAP 301 Health Care Delivery in the United States 3
HAP 360 Introduction to Health Information Systems 3
HAP 442 Introduction to Health Care Politics and Policy 3
SOCW 380 Changing Social Policies and Systems 3

Total Credits 12

Physical and Mental Health Care Delivery
HAP 301 Health Care Delivery in the United States 3
NUTR 295 Introduction to Nutrition (Mason Core) (p. 135) 3

Select one from the following:
GCH 360 Health and Environment 3
HHS 432 Healthy Aging 3
SOCW 375 Human Behavior and the Family Life Course (Mason Core) (p. 135) 3
SOCW 435 Introduction to Gerontology 3
SOCW 483 Selected Approaches to Social Work Intervention 3

Total Credits 9

Electives (variable)
All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Human Development and Family Science (HDFS)
This concentration is in collaboration with College of Humanities and Social Sciences, New Century College and College of Education and Human Development.

Core Requirement
BAS 300 Building Professional Competencies 3
HDFS 200 Individual and Family Development 3

Concentration Requirements
Adult Development and Aging:
PSYC 415 Psychological Factors in Aging 3

Family Processes:
Select one from the following: 3-4
ECED 404 Engaging Families of Diverse Young Learners
INTS 317 Issues in Family Relationships
PSYC 466 Psychology of Intimate Relationships
SOCI 309 Marriage, Families, and Intimate Life

Diversity:
Select one from the following: 3-6
ANTH 315 Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective
ATEP 205 Cultural Competence
EDUC 203  Disability in American Culture (Mason Core) (p. 135)
HEAL 350  Interventions for Populations and Communities at Risk
INTS 320  Construction of Differences: Race, Class, and Gender
INTS 336  Poverty, Wealth and Inequality in the US
PSYC 379  Applied Cross-Cultural Psychology (Mason Core) (p. 135)
SOCI 355  Social Inequality (Mason Core) (p. 135)

Applied Research Methods:
Select one from the following: 3
- PRLS 450  Research Methods
- PSYC 301  Research Methods in Psychology
- SOCI 303  Methods and Logic of Inquiry

Human Service Delivery:
HD 300  Individual and Family Services Delivery 3
(fulfills synthesis and writing intensive requirement)

Internship:
HD 498  Internship and Analysis in Human Development and Family Science 3
HD 499  Advanced Internship Analysis in Human Development and Family Science 3

Total Credits 27-31

Electives (variable)
All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Legal Studies (LGLS)
This concentration is in collaboration with New Century College and Volgenau School of Engineering.

Core Requirements
BAS 300  Building Professional Competencies 3
BAS 490  Introduction to Research Methods 3
BAS 491  Applied Sciences Capstone (Mason Core) (p. 135)

Concentration Requirements
Required Courses:
- BULE 303  Legal Environment of Business 3
- GOVT 301  Public Law and the Judicial Process 3
- GOVT 422  Constitutional Interpretation 3
or GOVT 423  Constitutional Law: Civil Rights and Liberties
- PHIL 311  Philosophy of Law 3
Select 15 credits from the following: 15
- COMM 475  Journalism Law
- GOVT 307  Legislative Behavior
- GOVT 420  American Political Thought
- GOVT 446  International Law and Organization
- GOVT 452  Administrative Law and Procedures
- INTS 304  Social Movements and Community Activism
- INTS 305  Conflict Resolution and Transformation
- INTS 362  Social Justice and Human Rights
- SOCI 301  Criminology
- SOCI 302  Sociology of Delinquency
- SOCI 471  Prevention and Deterrence of Crime

Total Credits 36

Concentration in Technology and Innovation (TCNV)
This concentration is in collaboration with School of Business and Volgenau School of Engineering.

Core Requirements
BAS 300  Building Professional Competencies 3
BAS 490  Introduction to Research Methods 3
BAS 491  Applied Sciences Capstone (Mason Core) (p. 135)

Concentration Requirements 1
- IT 105  IT Architecture Fundamentals 3
- IT 213  Multimedia and Web Design 2 3
- IT 214  Database Fundamentals 2 3
- IT 223  Information Security Fundamentals 3
- IT 304  IT in the Global Economy (Mason Core) (p. 135) 3
- IT 343  IT Project Management 3
- MBUS 300  Accounting in a Global Economy 3
- MBUS 301  Managing People and Organizations in a Global Economy 3
- MBUS 302  Managing Information in a Global Economy 3
- MBUS 303  Marketing in a Global Economy 3
- MBUS 305  Introduction to International Business (Mason Core) (p. 135) 3

Total Credits 42

1 All courses for this concentration are available in an online format with most offered as asynchronous delivery.
2 The Information Sciences and Technology department offers 1-credit, self-paced, online review courses; ending with an in-class final exam. Students who register for a 1-credit course and successfully pass will receive credit (not a waiver) for the corresponding 3-credit course. Students who are not successful must take the respective course at Mason to meet their degree requirements.

Review courses are available as follows:
- for IT 213 Multimedia and Web Design: IT 193 Review of Multimedia and Web Design
- for IT 214 Database Fundamentals: IT 194 Review of Database Fundamentals
Electives (variable)
All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.
A-Z COURSES

For more detailed information on courses, see please go to AP.2 Course Information (p. 79). See Courses at Mason (http://catalog.gmu.edu/course-search) for additional schedule details.

Academic English (AE)

000 Level Courses

AE 000: AE Pre-Registration. 0 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 010: Level 1 Core. 10 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 005.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 011: Level 1 Oral Comm Skills. 6-8 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 007.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 012: Level 1-2 Special Topics. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 021.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 013: Vocabulary in Daily Life. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 014: Listening in Daily Life. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 015: Writing Daily Life. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 017: Listening and Speaking. 6 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 020: Level 2 Core. 10 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 010.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 021: Level 2 Oral Comm Skills. 6-8 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 012.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 022: Level 2-3 Special Topics. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 023: Basic Spelling Skills. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 024: Basic Pronunciation Skills. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 030: Level 3 Core. 10 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 020.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture
AE 031: Level 3 Oral Comm Skills. 6-8 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 022.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 032: Level 3-4 Special Topics. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 051.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 033: Reading Plus. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 034: Dictionary Skills. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 035: Developing Vocabulary. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 060.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 036: American Culture. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 040: Level 4 Core. 10 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 025.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 041: Level 4 Oral Comm Skills. 6-8 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 027.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 042: Level 4-5 Special Topics. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 044: Intro to IELTS Academic. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 045: Developing Spelling Skills. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 046: Developing Pronunciation Skill. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 047: Intro to TOEFL iBT. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 048: Present Yourself. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 050: Level 5 Core. 10 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 030.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 051: Level 5 Oral Comm Skills. 6-8 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit. Equivalent to AE 032.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture
AE 052: Level 5-6 Special Topics. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 053: Newspaper Production. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 054: TED Talks. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 055: Let's Talk Math. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 056: Business English. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 083: SuperTOEFL. 4 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

AE 088: Elective Topic 3. 2 credits.
Offered by INTO Mason (p. 123). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Seminar

Accounting (ACCT)

200 Level Courses

ACCT 203: Survey of Accounting. 3 credits.
Introduction to financial and managerial accounting. Financial accounting from viewpoint of those who prepare and use financial information. Financial accounting topics include recording financial transaction, creating financial statements, the study of cash and internal controls. Managerial accounting topics include introduction to job order costing, breakeven analysis, standard costs and variances and short term decision making. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to ACCT 204.

Registration Restrictions:
Required Prerequisite: ECON 103C.
C Requires minimum grade of C.

Schedule Type: Lecture, Recitation

ACCT 204: Honors Survey of Accounting. 3 credits.
Introduction to financial and managerial accounting. Financial accounting from viewpoint of those who prepare & use financial information. Financial accounting topics include recording financial transaction, creating financial statements, the study of cash and internal controls. Managerial accounting topics include introduction to job order costing, breakeven analysis, standard costs and variances and short term decision making. Project on a global corporation is conducted to reinforce accounting concepts. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to ACCT 203.

Recommended Prerequisite: Cum GPA of 3.5 or higher

Schedule Type: Lecture

ACCT 301: Financial Accounting and Managerial Decision Making. 3 credits.
Examines financial accounting from the viewpoint of both users and preparers of financial statements, emphasizing use of financial statement information to make financing, operating, and investing decisions. International Financial Reporting Standards (IFRS) are introduced. School of Business students will not be permitted to make more than three attempts to achieve a C or higher in ACCT 301. Note: Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible...
to receive a degree from the School of Business. Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities. Students cannot receive credit for ACCT 301 and ACCT 303/330. This course will not meet School of Business requirements for students with catalog year Fall 2015 or forward. Offered by School of Business (p. 846). Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (ACCT 203\(^C\) or 204\(^C\)).
\(^C\) Requires minimum grade of C.

Students with a class of Freshman may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

ACCT 303: Accounting for Decision Making. 3 credits.
Examines accounting from the viewpoint of managers and users of accounting information including using financial statement information to make financing, operating, and investing decisions, recognizing how tax system and body of tax law impacts business decision making, using managerial accounting information to make operating and compensation decisions, and understanding importance of internal and external audits to business and capital markets. Notes: Students cannot receive credit for ACCT 301 and ACCT 303/ACCT 330. School of Business students will not be permitted to make more than three attempts to achieve a C or higher in ACCT 303. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. This course will not meet School of Business requirements for students with a catalog year before Fall 2015. Offered by School of Business (p. 846). Limited to three attempts.

Recommended Prerequisite: BUS 103 and BUS 200 are strongly recommended.
Registration Restrictions:
Required Prerequisites: (ACCT 203\(^C\), U203, 204\(^C\) or U204) and (BUS 100\(^C\), SOM 100\(^C\) or BUS U100) and (BUS 210\(^C\) or U210) and (MATH 108\(^C\), U108, 113\(^C\), U113, 114\(^C\), U114, HNRT 225\(^C\) or U225).
\(^C\) Requires minimum grade of C.

Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

ACCT 311: Managerial and Cost Accounting. 3 credits.
Develops skills in identifying business processes, transforming data into useful information, and making managerial decisions. Designed for students in all areas of management, especially those whose career aims include cost management. Topics include analyzing and managing costs, developing cost systems that facilitate decision making, identifying opportunities for improving business process, creating financial and operating budgets for planning and control, and developing measures to assess performance. Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to accommodate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities. Offered by School of Business (p. 846). Limited to three attempts.

Recommended Prerequisite: Degree status.
Registration Restrictions:
Required Prerequisites: ACCT 301\(^C\) or 330\(^C\).
\(^C\)Requires minimum grade of C.

Students with a class of Freshman may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

This is the first of the three-course financial accounting sequence that examines financial accounting from the viewpoint of preparers and users of financial statements, including preparing financial statements to reflect financing, operating, and investing decisions of the firm and using financial statement information to make financing, operating and investing decisions for the firm. Notes: ACCT 330 is required for all School of Business Accounting and Finance majors. School of Business students will not be permitted to make more than three attempts to achieve a C or higher in ACCT 330. Those who do not successfully complete this course within three attempts will be terminated from their major. For more information about this, see the “Termination from the Major” section under Academic Policies. Offered by School of Business (p. 846). Limited to three attempts.

Recommended Prerequisite: BUS 103 and BUS 200 are strongly recommended.
Registration Restrictions:

\(^C\) Requires minimum grade of C.

Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

ACCT 331: Financial Accounting II. 3 credits.
This is the second of the three-course financial accounting sequence that examines financial accounting from the viewpoint of preparers and users of financial statements, including preparing financial statements to reflect financing, operating, and investing decisions of the firm and using financial statement information to make financing, operating and investing decisions for the firm. Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to accommodate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities. Offered by School of Business (p. 846). Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (ACCT 301\(^C\) or 330\(^C\)).
\(^C\) Requires minimum grade of C.
ACCT 332: Financial Accounting III. 3 credits.
This is the third of the three-course financial accounting sequence that examines financial accounting from the viewpoint of preparers and users of financial statements, including preparing financial statements to reflect financing, operating, and investing decisions of the firm and using financial statement information to make financing, operating and investing decisions for the firm. Continuation of ACCT 331. Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities. Offered by School of Business (p. 846). Limited to three attempts.

Registration Restrictions:
Required Prerequisites: ACCT 331C and (FNAN 301C, L301, 303C or L303).  
C Requires minimum grade of C.
Students with a class of Freshman may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

ACCT 351: Taxation and Managerial Decision Making. 3 credits.
Introduction to fundamental topics in taxation using a business-entities approach. Specific topics include gross income, deductions, losses, and property transactions. The course emphasizes the identification of planning and compliance issues and the application of tax law to resolve those issues. Both tax and non-tax factors affecting decision making are considered. Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities. Offered by School of Business (p. 846). Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (ACCT 301C, 303C or 330C).  
C Requires minimum grade of C.
Students with a class of Freshman may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

ACCT 360: Introduction to Accounting Information Systems. 3 credits.
This course involves the study and development of accounting information systems. The focus is on business processes covering many industries with an emphasis on data modeling and internal control. Special topics including XBRL and commercial systems are incorporated throughout the course. Offered by School of Business (p. 846). Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (ACCT 301C, 303C or 330C) and (MIS 301C or 303C).  
C Requires minimum grade of C.
Students with a class of Freshman may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

ACCT 370: Accounting in a Global Economy. 3 credits.
International Accounting is study of entity reported as multinational company or entity whose reporting obligations to stakeholders are located in a different country. Course focuses on effects of financial reporting, managerial planning and control, international taxation, and international financial statement analysis on multinational reporting entity, and as the convergence of U.S. Generally Accepted Accounting Principles and International Financial Reporting Standards. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: ACCT 301C, 303C, 330C, L301, L303, L330, 301T, 303T or 330T.  
C Requires minimum grade of C.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

ACCT 372: Financial Statement Analysis. 3 credits.
Detailed overview of financial statement analysis by users of financial statements. Students learn about common features of mandatory and voluntary accounting disclosures, behaviors and interactions among different users of financial statement information. Primary focus is analysis of financial statement information in body of financial statements and footnotes, and implications of those disclosures for firm valuation, fraud prediction, taxation, and governance. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (ACCT 331C or FNAN 341C).  
C Requires minimum grade of C.
Students with a class of Freshman may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

ACCT 411: Advanced Managerial Accounting. 3 credits.
Managerial uses of accounting information in planning, controlling, motivating, and decision making. Emphasizes quantitative and behavioral aspects of managerial accounting. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: (ACCT 311C).
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

**ACCT 461: Assurance and Audit Services.** 3 credits.
Introduction to audit and other assurance services' objectives, theory, and practices. Focuses on developing skills for interpreting business strategies and identifying related business risks, describing internal control solutions to those risks, identifying evidential sources, providing assurance about those risks and controls, and designing strategies to provide assurance services about the reliability of business information. Offered by School of Business (p. 846). Limited to three attempts.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: ACCT 331<sup>C</sup> and 361<sup>C</sup>.<br>C Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.
Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.
contact the School of Business for internal eligibility requirements. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 6 credits. Equivalent to BUS 492.

**Registration Restrictions:**

**Required Prerequisites:** ACCT 330\(^C\) or L330.  
\(^C\) Requires minimum grade of C.

Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the terminated from BU major attribute may **not** enroll.

**Schedule Type:** Internship

**ACCT 499:** Independent Study. 1-3 credits. 
Research and analysis of selected problems or topics in accounting. Notes: Must be arranged with an instructor, and students must receive written approval from the associate dean for undergraduate programs before registration. Written report required. May be repeated if topics vary. Offered by School of Business (p. 846). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** 9 hours in upper-level accounting courses.

**Registration Restrictions:**  
Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree or Washington Consortium level students may **not** enroll.

Students with the terminated from BU major attribute may **not** enroll.

**Schedule Type:** Independent Study

### 500 Level Courses

**ACCT 531:** Foundations of Financial Reporting I. 3 credits. 
Upon completing course students will be knowledgeable about global business and trade as it applies to international financial reporting standards. Students will be capable of recording, analyzing, interpreting, and communicating financial and non-financial information for users of such information in accordance with applicable professional authoritative literature. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** ACCT 301 or BMGT 613, or equivalent with grade of B- or higher or permission of program director.

**Registration Restrictions:**  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment limited to students in a Master of Science degree.

**Schedule Type:** Lecture

**ACCT 532:** Foundations of Financial Reporting II. 3 credits. 
Upon completing course students will be knowledgeable about global business and trade as it applies to international financial reporting standards. Students explore topics including: current liabilities and contingencies, bonds and long term notes, leases, accounting for income taxes, pensions, shareholder’s equity and share based compensation. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** ACCT 331, ACCT 531, or equivalent and FNAN 301, BMGT 643 or equivalent, both with a grade of B- or higher or permission of program director.

**Registration Restrictions:**  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in a Master of Science degree.

**Schedule Type:** Lecture

**ACCT 551:** Foundations of Taxation of Business Entities. 3 credits. 
The objective of this course is to build a sound conceptual and technical foundation for the study of federal income taxation that provides students with the tools necessary to stay current with the ever-changing tax law. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Permission of program director.

**Registration Restrictions:**  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in a Master of Science degree.

**Schedule Type:** Lecture

**ACCT 561:** Foundations of Assurance Services. 3 credits. 
The course focuses on planning, performing and reporting on an audit of financial statements conducted in accordance with U.S. generally accepted auditing standards (U.S. GAAS). It also introduces the public accounting profession and the services CPAs provide. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** ACCT 331 or ACCT 531 with a B- or better or permission of MSA Program Director.

**Registration Restrictions:**  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in a Master of Science degree.
Schedule Type: Lecture

600 Level Courses

ACCT 601: Online MSA Orientation Course. 0 credits.
The main objective of this course is to help students understand program expectations and time commitment and prepare themselves for online communication and technology requirements necessary to successfully complete their online MSA degree. Offered by School of Business (p. 846). May not be repeated for credit.

Recommended Prerequisite: Enrollment in the online MSA program or permission of the MSA academic director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

ACCT 611: Advanced Managerial Accounting. 3 credits.
Examines the firm's planning and control decisions that require a more sophisticated approach than the rule-of-thumb procedures advocated for traditional cost accounting problems. Students will work with real-world issues and problems and apply the appropriate analytical model to develop relevant management accounting treatments. Offered by School of Business (p. 846). May not be repeated for credit.

Recommended Prerequisite: Admission to the MSA program and ACCT 311 or equivalent, or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ACCT 630: Advanced Financial Accounting. 3 credits.
This course covers advanced topics in financial accounting like business combinations and preparation of consolidated financial statements. Students are also introduced to specialized accounting issues related to partnerships and segment reporting. Offered by School of Business (p. 846). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting, Business Administration or Forensic Accounting.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ACCT 633: Identifying and Resolving Advanced Issues in Financial Accounting. 3 credits.
Students will gain knowledge and skills used in the interpretation of complex corporate financial accounting issues and in the preparation of complex financial statements. Topics include acquisitions, consolidations, derivatives, segment reporting, partnerships, and SEC reporting. Students also will learn to conduct research using the FASB Accounting Standards Codification to resolve ambiguous reporting issues. Offered by School of Business (p. 846). May not be repeated for credit.

Recommended Prerequisite: Permission of MSA Director if not already enrolled in the MSA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Accounting or Business Administration.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ACCT 636: Fraud Examination. 3 credits.
Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets. Several real-life cases and examples will be used to illustrate how to detect and prevent fraud. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to ACCT 744, MBA 744.

Recommended Prerequisite: Admission to MSA program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ACCT 651: Identifying and Resolving Advanced Issues in Taxation. 3 credits.
Examines the application of the federal income tax law to C-corporations, S-corporations, and partnerships. Topics will include the formation, operations, and dissolutions of such entities. Students will read and apply primary tax authorities to client fact patterns and engage in significant professional research and writing. Offered by School of Business (p. 846). May not be repeated for credit.

Recommended Prerequisite: Admission to the MSA program or permission of the program director. ACCT 351 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ACCT 662: Seminar in Accounting.** 3 credits. Provides selective analysis of important issues in contemporary accounting practice. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Permission of program director if not already admitted to MSA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ACCT 672: Governmental and Nonprofit Accounting.** 3 credits. Accounting and Reporting for non-business organizations. Emphasizes accounting issues unique to these entities, including non-exchange transactions and lack of ownership interest. Includes accounting and reporting for state and local governments, nongovernment organizations, and the federal government. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MSA program or permission of the program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ACCT 690: Professional Accounting Colloquium.** 3 credits. The Professional Accounting Colloquium is designed to give graduate accounting students the opportunity to identify, develop, and improve professional skills and attributes critical to success in the accounting profession. Students will gain an understanding of these professional accounting skills and attributes from both a theoretical and applied perspective. Offered by School of Business (p. 846). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MSA program or permission of the program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ACCT 695: Graduate Field Experience.** 1-3 credits. This course provides a framework for approaching, successfully completing, and reflecting upon a professional field experience in accounting. The course is designed for students who will complete semester long internship in the field of accounting either in public accounting or in industry. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Permission of MSA Program Director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**ACCT 696: Directed Studies in Accounting.** 1-3 credits. Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum. Offered by School of Business (p. 846). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Admission to the MSA program or permission of the program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**ACCT 697: Special Topics in Accounting.** 1-3 credits. Sections established as necessary to focus on various topical issues that emerge in practice of accounting. Offered by School of Business (p. 846). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Admission to the MSA program or permission of the program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

### 700 Level Courses

**ACCT 701: Business Valuation.** 3 credits.
Provides hands-on-experience in financial statement analysis and valuation. Takes an accounting-based valuation perspective and offers a comprehensive framework for analyzing financial statements consisting of (a) Business Strategy, (b) Accounting Analysis, (c) Financial Analysis, and (d) Prospective Analysis and Valuation. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 701.

**Recommended Prerequisite:** Admission to the MSA program or permission of instructor. Grade of B or better in MBA 613.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ACCT 708: Taxes and Business Strategy.** 3 credits.
Provides a framework for making managerial decisions in a global tax environment. Examines business decisions such as location of facilities, employee compensation, mergers and acquisitions, capital and asset structure, and business form. Focuses on tax planning concepts and the effect of taxes on business decisions. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 708.

**Recommended Prerequisite:** Admission to the MSA program or permission of instructor. Completion of MBA core requirements.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ACCT 737: Fraud and the Law.** 3 credits.
Provides an overview of US legal system including law-making process, structure of court system, and how frauds are brought to trial, prosecuted and resolved. Explores common fraud statutes used to penalize wrongdoers. Course will examine evidentiary rules including types of evidence, hearsay, impeachment and privileges. Highlight the legal requirements for serving as an expert witness and testifying in court. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ACCT 738: Advanced Topics in Fraud.** 3 credits.
Course will cover advanced topics in forensic accounting. The focus will be on contemporary issues in fraud. Examples of topics include litigation support, money laundering, consumer fraud, bankruptcy, divorce and tax fraud, fraud in e-commerce, insurance fraud and mortgage fraud. The course will provide a comprehensive look at fraud investigation. Offered by School of Business (p. 846). May not be repeated for credit.

**Registration Restrictions:**

---

**Required Prerequisites:** ACCT 636\textsuperscript{C} or MBA 744\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ACCT 741: Information Technology Auditing.** 3 credits.
Introduces methodologies to assess security and control issues concerning accounting and other information systems. Key feature of course is applying computer-assisted audit tools and techniques to test effectiveness of application controls. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 741.

**Recommended Prerequisite:** Permission of program director if not already admitted to MSA or MBA program.

**Registration Restrictions:**
Enrollment is limited to students with a major in Accounting or Business Administration.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ACCT 742: Corporate Governance and Ethics.** 3 credits.
Focuses on developing understanding of corporate governance issues and ethical decision making. Topics include examination of internal and external international governance issues, and ethical analysis in current business environment. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 742.

**Recommended Prerequisite:** Permission of program director if not already admitted to MSA or MBA program.

**Registration Restrictions:**
Enrollment is limited to students with a major in Accounting or Business Administration.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ACCT 743: Corporate Financial Reporting.** 3 credits.
Addresses contemporary issues in corporate financial reporting. Focuses on role of financial reporting in providing decision-useful information to participants of capital market, and theoretical and empirical assessments of its performance. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 743.

**Recommended Prerequisite:** Permission of program director if not already admitted to MSA or MBA program.

**Registration Restrictions:**
Enrollment is limited to students with a major in Accounting or Business Administration.

Students in a Non-Degree Undergraduate degree may **not** enroll.
Schedule Type: Seminar

ACCT 745: International Financial Reporting. 3 credits. Examines accounting from an international perspective, including the study of various functional areas of accounting across countries and the reporting requirements encountered by companies engaged in international trade and making foreign direct investments. Offered by School of Business (p. 846). May not be repeated for credit. Equivalent to MBA 745.

Recommended Prerequisite: Completion of MBA or MSA core requirements, or permission of program director.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ACCT 792: Seminar in Accounting. 3 credits. Selective analysis of topics addressing important issues in contemporary accounting practice. Discussion of two or three major topics. Offered by School of Business (p. 846). May be repeated within the term for a maximum 6 credits.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

ACCT 795: Global Accounting Environment. 3 credits. Examines the activities of accounting firms competing in the global business environment. Students will observe these activities in residency and study the decision-making processes of international accounting firms to develop an understanding of the regulatory environment of global accounting. Offered by School of Business (p. 846). May not be repeated for credit.

Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ACCT 796: Independent Studies/Directed Readings. 1-3 credits. Research and analysis of selected problems or topics in accounting not otherwise available in curriculum. Notes: Approval of faculty member and program director required. Offered by School of Business (p. 846). May not be repeated for credit.

Recommended Prerequisite: Permission of Program Director.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

African and African American Studies (AFAM)

200 Level Courses

AFAM 200: Introduction to African American Studies. 3 credits. Interdisciplinary introduction to the field of African American studies. Includes comparative analysis of approaches, methodologies, and key concepts related to the study of people of African descent in the United States, continental Africa, and throughout the African diaspora. Lectures and discussion integrate attention to such issues as diversity and multiculturalism from national and global perspectives. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Lecture

300 Level Courses

AFAM 390: Special Topics in African and African American Studies. 3 credits. Study of selected topics related to the study of people of African descent in Africa, the United States, the Caribbean, Latin America and throughout the African Diaspora. Notes: May be repeated when topic is different. Offered by Humanities & Social Sciences (p. 295). May be repeated within the term for a maximum 12 credits.

Schedule Type: Lecture

400 Level Courses

AFAM 490: Internship. 2-6 credits. Approved work-study program in cooperation with specific organizations including area museums; NGOs; and local, state, and federal agencies. Students should arrange for an internship in the semester before they wish to enroll. Permission required from program director, Dr. Wendi Manuel-Scott. Notes: Credit to be determined by the African American Studies Program. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

Schedule Type: Internship

AFAM 499: Independent Study. 1-3 credits. Investigation of an area related to African American studies according to individual interest, with emphasis on research. Permission required from program director, Dr. Wendi Manuel-Scott. Offered by Humanities & Social Sciences (p. 295). May not be repeated for credit.

Schedule Type: Independent Study

Anthropology (ANTH)

100 Level Courses

ANTH 114: Introduction to Cultural Anthropology. 3 credits. Overview of major ideas and approaches to the study of cultures around the world. Surveys kinship, social organization, political economy, religious beliefs, language and other aspects of non-Western cultures. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Specialized Designation: Non-Western Culture
Schedule Type: Lecture

ANTH 120: *Unearting the Past: Prehistory, Culture and Evolution*. 3 credits.
Introduction to archeology and bioanthropology. Explore issues and debates in human biological evolution, prehistory and social change, as well as lab and field methods for understanding archaeological remains. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Schedule Type: Lecture

ANTH 135: *Introduction to Biological Anthropology*. 3 credits.
Uses an evolutionary perspective to introduce students to the study of humans and non-human primates as biological organisms. The course will analyze the genetic and environmental bases for modern human biological variation, understand primate behavior and biological relationships, and reconstruct the fossil record. Discussions about prehistoric skeletal remains will emphasize biological responses to changes in subsistence and social structure. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Natural Science Overview, Social/Behavioral Sciences (p. 135)

Schedule Type: Lecture

200 Level Courses

ANTH 299: *Independent Study*. 1-3 credits.
Individual study in anthropology on topic organized in advance by student and instructor. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 114 or permission of instructor.

Schedule Type: Independent Study

300 Level Courses

ANTH 300: *Civilizations*. 3 credits.
Cross-cultural and transtemporal examination of complex societies and civilizations. Explores developmental schema for rise, articulation, spread, and decline of historic and contemporary civilizations. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ANTH 301: *Native North Americans*. 3 credits.
Exploration of native North American cultures and selected aspects of Indian-white historical relations. Emphasizes cultural persistence as well as change. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ANTH 302: *Peoples and Cultures of Latin America*. 3 credits.
Examines Latin American cultures and selected aspects of historical record. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Recommended Prerequisite: ANTH 114, 60 hours, or permission of instructor.

Schedule Type: Lecture

ANTH 303: *Peoples and Cultures of the Andes*. 3 credits.
Examines issues and problems of selected regions of highland and lowland Andean South America. Provides knowledge of people of the Andes, their diverse cultural practices and adaptations, and the causes and consequences of conflicts. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ANTH 306: *Peoples and Cultures of Island Asia*. 3 credits.
Examines cultures of the Island Asia culture region, focusing on native cultures of Indonesia, Borneo, and the Philippines. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ANTH 307: *Ancient Mesoamerica*. 3 credits.
Examines the peoples and cultures of ancient Mesoamerica, including Olmec, Maya, Teotihuacan, and Aztec societies. Major topics include the rise of civilization, the development of the Mesoamerican cultural tradition, the growth of cities, trade, exchange, writing systems, political organization, religion, conflict, and the archaeological study of this indigenous heritage. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ANTH 308: *Peoples and Cultures of the Middle East*. 3 credits.
Examines the anthropological literature on peoples and cultures of the Middle East, with particular attention to political and social change over the course of the 20th century. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ANTH 309: *Peoples and Cultures of India*. 3 credits.
Examination of South Asia, with emphasis on India. Includes general overview of prehistory and history; impact of colonialism; contemporary Indian culture, including the changing relations of caste and class, family organization, and the roles of women, religion, and ideology; and current trends in economic development and socioeconomic differences in
different parts of the country. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ANTH 312: Political Anthropology. 3 credits. Examines cultural and ecological contexts of political structures and competition for power in selected societies; and cross-cultural and comparative approaches to study of political conflict, leadership, values, and symbolism. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Recommended Prerequisite: ANTH 114, 60 hrs, or permission of instructor.

Schedule Type: Lecture

ANTH 313: Myth, Magic, and Mind. 3 credits. Examines religion as a cultural system. Topics include mythology, ritual, symbolism, and dogma. Emphasizes cross-cultural and predominantly non-Western material. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ANTH 314: Zombies. 3 credits. Examines the social, cultural, and political history of the Caribbean Sea islands and coastal Central and South American lowlands that collectively constitute the geographic and cultural region known as the Caribbean. Emphasizes the central role this region has historically played in creating a sense of global interconnectedness among diverse regions of the world. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Recommended Prerequisite: ANTH 114, 60 hours, or permission of instructor.

Schedule Type: Lecture

ANTH 316: Peoples and Cultures of the Caribbean. 3 credits. Examines the social, cultural, and political history of the Caribbean Sea islands and coastal Central and South American lowlands that collectively constitute the geographic and cultural region known as the Caribbean. Emphasizes the central role this region has historically played in creating a sense of global interconnectedness among diverse regions.
Recommended Prerequisite: ANTH 114, 60 credits, or permission of instructor.

Schedule Type: Lecture

ANTH 331: Refugees. 3 credits.
Introduction to causes and consequences of forced dislocation as a global issue. Covers formally recognized refugees, as well as people such as internally displaced persons and asylum seekers who are in refugee-like circumstances. Focuses on understanding the personal experiences of refugees and examining efforts on their behalf at national and international levels. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Recommended Prerequisite: ANTH 114, 60 credits, or permission of instructor.

Schedule Type: Lecture

ANTH 332: Cross-Cultural Perspectives on Globalization. 3 credits.
Examines the varieties of cultural experience. Several cultures are studied in depth; with attention to local histories, global contexts, and shifting perspectives on the practice of ethnography. Notes: May be used for credit toward the BA in sociology. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ANTH 340: Comparative Perspectives on Immigration. 3 credits.
Considers the dimensions and meanings of the immigrant experience in the United States, with a focus on the diversity of immigrants and refugees who have arrived during the past 30 years. Emphasis on the social context in which immigration occurs and on the bearing of institutional and cultural influences on patterns of adaptation, assimilation, and exclusion from the host society. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Specialized Designation: Scholarly Inquiry

Schedule Type: Lecture

ANTH 350: Human Growth and Development. 3 credits.
Introduces human developmental stages in terms of behavior, biology, and genetics. Addresses the history and methods of human growth research. Explores the environmental and socioeconomic influences on human growth. Investigates the evolution of uniqueness in human developmental stages of the human species in comparison of other primates. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

ANTH 355: Human Origins. 3 credits.
Explores the fossil evidence for human and primate evolution. Exposes students to evidence for the origins of mammals and primates, and to discussions of human evolution. Uses human fossils as tools to understand evolutionary relationships (phylogenetics), behavior, functional anatomy, and broader adaptation. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

ANTH 357: Bioarchaeology. 3 credits.
Introduces students to the study of human skeletal remains and their associated archaeological artifacts, focusing on using the human skeleton to address behavior, growth, stress, ritual, social complexity, diet, disease, and violence in the past. Uses the human body and associated artifacts to provide a detailed analysis of cultural transitions, expression of socioeconomic inequality, the origins of ritual complexity, violence, and disease. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

ANTH 360: Evolution, Sex, and Society. 3 credits.
Inquiry into the biological dimensions of humans as culture-bearing animals. Topics include altruism, aggression, primate social organization, morphology, comparative ethnology, and microevolutionary genetic differentiation. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 135, 60 credits or permission of instructor.

Schedule Type: Lecture

ANTH 363: Humans, Disease, and Death. 3 credits.
Explores human health and disease from anthropological and evolutionary perspectives. Examines what a disease is, what causes them, how we have co-evolved with diseases, how disease patterns have changed over human history, and the future of disease. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 135)

Specialized Designation: Scholarly Inquiry

Schedule Type: Lecture

ANTH 365: Human Variation. 3 credits.
Examines biological dimensions of human variation and the beginnings of race as a concept. Discusses evolution of human biodiversity in culturally distinct human groups related to environment, physiology, genetics, nutrition, and disease. Explores use of scientific analyses of human biodiversity. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 135, 60 hours or permission of instructor.

Schedule Type: Lecture

ANTH 366: Food and Human Evolution. 3 credits.
Explores the relationship between diet and human adaptation from biological, archaeological, cultural, and evolutionary perspectives. Examines how humans are unique in our ability to find and process a wide range of foods. Introduces agriculture as a co-evolutionary strategy between humans and other species. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Specialized Designation: Scholarly Inquiry
Anthropology (p. 482). May not be repeated for credit.

**anthropology**

Interactions with the animal kingdom. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** ANTH 114, or 60 hours, or permission of instructor.

**Schedule Type:** Lecture

**ANTH 370: Environment and Culture.** 3 credits.
Examines relationships among environment, culture, and human behavior with an emphasis on cultural ecological explanations in mainly non-Western contexts. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** ANTH 114, or 60 hours, or permission of instructor.

**Schedule Type:** Lecture

**ANTH 372: Cultures of Disaster, Risk, and Hope.** 3 credits.
By using ethnographic accounts on disasters in different cultural settings, this course explores cultural meanings of disasters as well as broader anthropological issues such as risk, power, modernity, memory, trauma, temporality, monster, nature, science and technology, and hope. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Mason Core:** Social/Behavioral Sciences (p. 135)

**Schedule Type:** Seminar

**ANTH 375: Culture, Power, History.** 3 credits.
Use of ethnographic, archaeological, linguistic, and documentary data, in light of anthropological theory, to interpret the past and processes of change among indigenous peoples throughout the world. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Schedule Type:** Lecture

**ANTH 376: Food and Culture.** 3 credits.
Examines a variety of experiences through foods, which bring not only nutritional but also sociocultural debates to our table (e.g. identity, memory, senses, ethnicity, gender, geopolitics, climate change, and globalization). Focuses on both Western and non-Western cultures. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Schedule Type:** Lecture

**ANTH 377: Mortuary Archaeology.** 3 credits.
Focuses on the study of burial patterns and death rituals in antiquity by introducing students to the methods of burial excavation, examining the history of mortuary archaeology theory and engagement with processual and postprocessual schools of thought, and examining case studies from around the world to decode the complex symbolisms encoded in burial practices. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Recommended Prerequisite:** ANTH 135.

**Schedule Type:** Lecture

**ANTH 378: Humans and Animals.** 3 credits.
Provides an introduction to anthropology of human’s relationship with animals across a large geographic and temporal span. From domestication of animals to animism, pets and animal classification systems, course explores society’s attitudes toward and dynamic interactions with the animal kingdom. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Schedule Type:** Lecture

**ANTH 379: Andean Archaeology.** 3 credits.
Examines 12,000 years of pre-Hispanic cultures of the Andean region of western South America. Focuses on the development and key achievements of some of the most remarkable civilizations of the New World, including the Chavin, Paracas, Cupisnique, Moche, Sicán, Nasca, Chimú, Wari, and Inka. Considers as well the nature, priorities, and accomplishments of scientific Andean archaeology. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Recommended Prerequisite:** ANTH 135.

**Schedule Type:** Lecture

**ANTH 380: Language and Culture.** 3 credits.
Anthropological analyses of language behavior, origins, and change. Emphasizes the interplay of language, culture, anthropology, and linguistics. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Recommended Prerequisite:** ANTH 114, 60 credits, or permission of instructor.

**Schedule Type:** Lecture

**ANTH 381: Medical Anthropology.** 3 credits.
Surveys the discipline of medical anthropology, focusing on traditional medical beliefs and the diverse responses to modern scientific medicine in developing countries and among cultural minorities in the United States. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** ANTH 114, 60 credits, or permission of instructor.

**Schedule Type:** Lecture

**ANTH 382: Urban Anthropology.** 3 credits.
Uses tools and resources of sociocultural anthropology to study life in cities in a comparative, global context, including topics such as poverty, discrimination, migration, transnationalism, and urban planning. Case studies draw from different urban environments in Asia, Latin America, Europe, Africa, and North America. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 135)

**Recommended Prerequisite:** ANTH 114 and 60 credits, or Permission of Instructor.

**Schedule Type:** Lecture

**ANTH 383: Cities of the Global South.** 3 credits.
Explores ethnographic perspectives on urban life in Latin America, Africa, and Asia in order to build a ground-up, comparative approach to studying cities. Examines the global connections between cities and critically evaluates north/south and first/third world paradigms. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture
ANTH 387: Zooarchaeology. 4 credits.
Explores the methods and theories applied in zooarchaeology through integrating hands-on assignments working with a comparative collection. Examines how archaeologists can understand human-animal relationships in the past including their role in reconstructing paleoenvironments, their contribution to ancient foodways, domestication of animals, and ritual uses of fauna. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Schedule Type: Laboratory, Lecture

ANTH 388: Human Osteology. 3 credits.
Introduces students to the methods of modern human skeletal analysis in bio- and forensic anthropology. Covers introductory human skeletal and dental gross anatomy and describes analytical techniques spanning including age and sex estimation, osteometry, and paleopathology. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 135.

Recommended Corequisite: ANTH 388.

Schedule Type: Laboratory

ANTH 389: Human Osteology Lab. 2 credits.
Laboratory course associated with ANTH 388. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

ANTH 390: Theories, Methods, and Issues I. 3 credits.
First of a two-course sequence that reviews the major theoretical traditions and schools of thought in anthropology. Notes: Required for anthropology majors. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 114 and 60 credits, including 6 credits of ANTH 300-level (or above) courses, or permission of instructor

Schedule Type: Lecture

ANTH 391: Forensic Anthropology. 3 credits.
Human remains play key roles in medicolegal investigations. Provides an overview of contemporary forensic anthropology including age and sex estimation from human remains, estimation of the time since death, analysis of sharp force, blunt force, and gunshot trauma, mass disaster contexts, and the forensic archaeological recovery of buried remains. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

ANTH 392: Forensic Anthropology Lab. 2 credits.
This lab class in the companion to ANTH 391. Involves hands-on lab exercises in the learning of methods in modern forensic anthropology, covering age and sex estimation from human remains, estimation of the time since death, analysis of traumatic trauma, individual identification, and archaeological recovery of buried remains. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

ANTH 393: Paleopathology. 3 credits.
Provides an introduction to the field of paleopathology which involves identification of pathological conditions in human skeletal remains, and reconstruction of the natural history and co-evolution of disease with humans. Covers the differential diagnosis and history of infectious pathogens, skeletal trauma, oral diseases, metabolic abnormalities, developmental defects, and more. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Introduction to the anthropology of work, technology, and society, with emphasis on information technology. Covers general conceptual issues of information technology and also involves specific practical exercises with computers, their operating systems, the logic of automated production, databases, and web-based communication. Attention also directed to social and ethical issues raised by contemporary information technology. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Mason Core: Information Technology: With Ethics (p. 135)

Recommended Prerequisite: ANTH 114, 60 hours, or permission of instructor.

Schedule Type: Lecture

ANTH 396: Issues in Anthropology. 3 credits.
Topic of contemporary interest in anthropology, focusing on social science topics of interest. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology (p. 482). May be repeated within the term for a maximum 18 credits.

Mason Core: Social/Behavioral Sciences (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ANTH 398: Study Abroad. 1-6 credits.
Field project or study abroad experience leading to the production of a written report Notes: May be repeated with permission of department. Offered by Sociology & Anthropology (p. 482). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Lecture

ANTH 399: Issues in Anthropology. 3 credits.
Topic of contemporary interest in anthropology, changing from semester to semester, and focusing on topics such as sex roles, anthropology and ethics, and primate social organization. Notes: May be repeated for credit when topic is different. Offered by Sociology & Anthropology (p. 482). May be repeated within the term.

Recommended Prerequisite: ANTH 114, 60 hours, and permission of instructor.
Schedule Type: Lecture

400 Level Courses

ANTH 400: Engaging the World: Anthropological Perspectives. 3 credits.
Examines selected topics with emphasis on the integration of different kinds of knowledge and the balancing of alternative ways of assessing meaning and relevance. Topics usually drawn from issues of global economic processes, civic rights and responsibilities, ethics, museums, public policy, the environment, and migration. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology (p. 482). May be repeated within the term for a maximum 9 credits.

Mason Core: Synthesis (p. 135)

Recommended Prerequisite: ANTH 114, 60 credits, or permission of instructor.

Schedule Type: Seminar

ANTH 420: Interpretation in Archaeology. 3 credits.
Explores theoretical and methodological issues in archaeology. Considers patterns and contexts of archaeological remains, analytic problems, and interpretation of material culture. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: 6 credits of ANTH, including ANTH 120 or permission of instructor.

Schedule Type: Lecture

ANTH 427: Historic Cemetery Survey. 4 credits.
Explores demographic, stylistic, and religious aspects of historic cemeteries. Students learn to survey, record, and analyze gravestone data through field projects. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 120, or permission of instructor.

Schedule Type: Lecture

ANTH 430: Research Methods in Archaeology. 3 credits.
Studies archaeological research process through discussions of current archaeological methodologies and student participation in designing and critiquing research projects. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 120, 60 hrs, or permission of instructor.

Schedule Type: Lecture

ANTH 435: Special Projects: Archaeology and Biological Anthropology. 1-3 credits.
Lab or field project leading to a written report of the research. Notes: Research and paper completed under instructor’s guidance. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 120 or 135, 60 credits, and Permission of Instructor.

Schedule Type: Lecture

ANTH 436: Special Projects: Archaeology and Biological Anthropology. 1-3 credits.
Lab or field project leading to a written report of the research. Notes: Research and paper completed under instructor’s guidance. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 120 or 135, 60 credits, and Permission of Instructor.

Schedule Type: Lecture

ANTH 440: Applied Anthropology. 3 credits.
Examines the needs and problems of communities and organizations and develops professional skills for a career in applied anthropology. Topics include the history of applied anthropology, research methods and ethics, fields in which applied anthropologists work, career options, and professionalization. Students prepare a career portfolio and other documents common in the workplace for applied anthropologists. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 114, 60 hours, or permission of instructor.

Schedule Type: Lecture

ANTH 450: Qualitative Methods: Nonstatistical Approaches in Culture and Social Research. 3 credits.
Explores some of the most useful nonquantitative research techniques in social sciences and offers practice in their application. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: 60 credits and 6 credits of ANTH including ANTH 114, or permission of instructor.

Schedule Type: Lecture

ANTH 488: Gender, Sexuality, and Culture. 3 credits.
Examines how gender, sexuality, race, and class come together as analytically distinct, yet practically intertwined, systems of meaning and practice. Examples highlight questions of political economy and history while focusing on specific ethnographic or historical readings. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: 60 hours and ANTH 340 or Permission of Instructor.

Schedule Type: Lecture

ANTH 490: Theories, Methods, and Issues II. 3 credits.
Second of a two-course sequence that reviews major theoretical traditions and schools of thought in anthropology. Notes: Required for anthropology majors and usually taken as a senior seminar. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: 60 hours and 9 hours of ANTH, including ANTH 390, or permission of instructor.

Schedule Type: Lecture
ANTH 492: Contemporary Controversies in Anthropology. 3 credits. Examines recent important works, issues, and controversies in anthropology. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: 60 hours and 9 hours of ANTH, including ANTH 390, or Permission of instructor.

Schedule Type: Lecture

ANTH 495: Internship. 1-6 credits. Supervised project in applying anthropology in relevant settings including public and historical archaeology, developmental anthropology, museums, non-profit organizations, advocacy, communications, or consulting organizations. Notes: Students must complete 45 hours of work at the internship site for each credit. Offered by Sociology & Anthropology (p. 482). May be repeated within the degree for a maximum of 6 credits.

Recommended Prerequisite: 60 hours or 9 hours of ANTH, including ANTH 390, or Permission of instructor.

Schedule Type: Internship

ANTH 496: Evolutionary Theory. 3 credits. Considers evolution as a biological as well as cultural concept. Parallels and contrasts among conceptual approaches allow a critique of the potential of evolution as a unifying biosocial theory. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: 60 hours and 9 hours of ANTH, including ANTH 390, or Permission of instructor.

Schedule Type: Lecture

ANTH 499: Independent Research. 1-12 credits. Individual research on a topic to be organized in advance by student and instructor. Offered by Sociology & Anthropology (p. 482). May be repeated within the term for a maximum of 12 credits.

Schedule Type: Independent Study

500 Level Courses

ANTH 535: Anthropology and the Human Condition: Seminar I. 3 credits. Examines some of the major theorists of 19th- and early 20th-century cultural theory. Marx, Freud, Durkheim, and Weber are surveyed as foundational thinkers for reading the works of such 20th-century theorists as Boas, Malinowski, Benedict, and Sapir. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: ANTH 535.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

ANTH 555: Policy and Culture. 3 credits. Examines the relevance of cultural processes to policymaking and the culture of policymaking organizations. Topics include development, welfare policy, environmental and energy policy, regulation and risk; health care and immigration policy; and the war on drugs. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Recommended Prerequisite: ANTH 535.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ANTH 557: Human Origins. 3 credits. Examines recent important works, issues, and controversies in anthropology. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.
Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ANTH 570:** *Andean Archaeology*. 3 credits.
Examines 12,000 years of pre-Hispanic cultures of the Andean region of western South America - that constituted the most remarkable complex civilizations of the New World. Focuses on the development and key achievements of the Chavin, Paracas, Cupisnique, Moche, Sican, Nasca, Chimú, Wari, and Inka cultures, and the nature, priorities, and accomplishments of scientific Andean archaeology. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ANTH 576:** *American Cultures*. 3 credits.
Examines U.S. cultures and explores concept of an American culture. Course readings and discussions explore underpinnings of the American experience, document broad historical shifts, and detail the experience of diverse groups of Americans, thus forming the basis for a critical, analytical, and comparative discussion of American life and life in America. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ANTH 577:** *Mortuary Archaeology*. 3 credits.
Focuses on the study of burial patterns and death rituals in antiquity by introducing students to the methods of burial excavation, examining the history of mortuary archaeology theory and engagement with processual and postprocessual schools of thought, and examining case studies from around the world to decode the complex symbolisms encoded in burial practices. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ANTH 578:** *Humans and Animals*. 3 credits.
Provides an introduction to anthropology of human's relationship with animals across a large geographic and temporal span. From domestication of animals to animism, pets and animal classification systems, course explores society's attitudes toward and dynamic interactions with the animal kingdom. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ANTH 580:** *Environmental Anthropology*. 3 credits.
Covers major theoretical trends and ethnographic works in environmental anthropology, focusing on the frameworks developed and used by environmental anthropologists, including cultural ecology, ecological anthropology, environmentalism, political ecology, new ecology, and science and technology studies. Explores how environmental anthropologists have contributed to broader debates about modernity, globalization, power, kinship, science and technology, and human-environmental relations. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ANTH 582:** *Human Osteology*. 3 credits.
Introduces students to the methods of modern human skeletal analysis in bioarchaeological and forensic science. Covers introductory human skeletal and dental gross anatomy and describes analytical techniques spanning including age and sex estimation, osteometry, and paleopathology. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

**Recommended Corequisite:** ANTH 583.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
ANTH 583: Human Osteology Lab. 2 credits.
Laboratory course associated with ANTH 582. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Corequisite: ANTH 582.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

ANTH 584: Paleopathology. 3 credits.
Provides an introduction to the field of paleopathology which involves identification of pathological conditions in human skeletal remains, and reconstruction of the natural history and co-evolution of disease with humans. Covers the differential diagnosis and history of infectious pathogens such as tuberculosis and syphilis, skeletal trauma, oral diseases, metabolic abnormalities neoplasms developmental defects joint disease and more. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ANTH 585: Bioarchaeology. 3 credits.
Explores the cutting-edge methods of bioarchaeological science and reconstructs ancient living worlds from the remarkable information encoded in bones via patterns of demography, disease, diet, trauma, violence, lifestyle, social structures, sex and gender, ethnicity, and identities on a global scale and over the last 10,000 years of history. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ANTH 590: Forensic Anthropology Lab. 2 credits.
Laboratory course associated with ANTH 590. Involves hands-on lab exercises in the learning of methods in modern forensic anthropology, covering age and sex estimation from human remains, estimation of postmortem intervals, analyses of traumatic trauma, individual identification, forensic taphonomy, and archaeological recovery of buried remains. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Corequisite: ANTH 591.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ANTH 591: Forensic Anthropology. 3 credits.
Explores the changing relations between culture, indigenous groups, representation and knowledge by examining how meaning is created and conveyed in museums and exhibits. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Corequisite: ANTH 590.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

ANTH 593: Zooarchaeology. 4 credits.
Explores the methods and theories applied in zooarchaeology through integrating hands-on assignments working with a comparative collection. Examines how archaeologists can understand human-animal relationships in the past including their role in reconstructing paleoenvironments, their contribution to ancient foodways, domestication of animals, and ritual uses of fauna. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Corequisite: ANTH 591.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

600 Level Courses

ANTH 600: Anthropology and Museums. 3 credits.
Explores the methods and theories applied in zooarchaeology through integrating hands-on assignments working with a comparative collection. Examines how archaeologists can understand human-animal relationships in the past including their role in reconstructing paleoenvironments, their contribution to ancient foodways, domestication of animals, and ritual uses of fauna. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ANTH 615:** *Ritual and Power in Social Life.* 3 credits.

Domains of religion and politics are conjoined by questions of power: its deployment, distribution, and forms of resistance it engenders. Course investigates connections among religious thought, ritual practice, and political action by drawing on a variety of theoretical orientations in the social sciences including structuralism, semiotics, psychoanalysis, and performance theory. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ANTH 616:** *Anthropology of the City.* 3 credits.

Examines classic and contemporary works in urban theory, in light of broader scholarly discussions of modernity and globalization. Uses a case-study approach to analyze topics such as: public and private space, citizenship and governance, architecture and design, housing, transportation, formal and informal settlements, and the contest over space and environmental resources in cities around the world. Notes: Course may be offered fall or spring. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

**ANTH 617:** *Political Economy.* 3 credits.

Human societies have always engaged in complex political relations and economic exchanges. The cultural meanings people create are shaped by, and in turn shape, systems of power. Political economy is the attempt to understand the relationship between politics and economics, at the juncture of local meanings and global histories. Course reviews major works and models of political economy, especially as they relate to social and cultural analysis. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ANTH 620:** *Theory: Archaeology and Biological Anthropology.* 3 credits.

Examines theoretical approaches in archaeology, paleoanthropology, and biological anthropology. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: Course in ARCHAEOLOGY or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ANTH 631:** *Refugees in the Contemporary World.* 3 credits.

Explores major refugee flows since the mid-20th century, emphasizing mechanisms for providing assistance, asylum, and resettlement. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ANTH 632:** *International Migration in Comparative Perspective.* 3 credits.

International migration in the contemporary world, focusing on the full range of economic, political, and social reasons for migration and the effects of different national policies on that process. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ANTH 635:** *Regional Ethnography.* 3 credits.

In-depth study of peoples and cultures of a specific world region (Latin America, East Asia, the Pacific, or United States). Content may include cultures defined by diaspora, migration, and other global forces and processes. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology (p. 482). May be repeated within the degree for a maximum 6 credits.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

**ANTH 640: Applied Anthropology.** 3 credits.
Explores the application of contemporary anthropological ideas, theories, and methods to find solutions to practical problems as defined by various organizations and institutions including business, government, nongovernmental organizations, and various institutions. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**ANTH 650: Methods in Anthropology.** 3 credits.
Reviews and examines major research methods commonly employed in cultural anthropological field study, with emphasis on ethnographic research design and the use of standard ethnographic techniques. Includes practice in designing ethnographic research project and using ethnographic methods and techniques in a field setting. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ANTH 655: Nationalism, Transnationalism, and States: Local and Global Perspectives.** 3 credits.
Explores different approaches to understanding the interaction of nationalism, transnationalism, and states given the apparently simultaneous dissolution of demographic, economic and cultural borders, and modernist social science paradigms. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ANTH 670: Regional Studies in Archaeology.** 3 credits.
Regional survey of specific culture area in archaeology to be chosen by student and instructor. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Recommended Prerequisite: Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

**ANTH 677: Anthropology and History.** 3 credits.
Considers anthropological approaches to the study of history, the ways in which people construct their histories, and social historians' effort to incorporate anthropological and ethnographic orientations into their accounts. Attention to tensions between culture and power in the constitution of historiography and to methodological challenges of interpreting qualitative and quantitative data. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

**ANTH 684: Independent Study in Sociocultural Anthropology.** 1-6 credits.
Directed reading and research on a specific topic, agreed on by student and faculty member, resulting in a written project. May be repeated for maximum of 6 credits. Offered by Sociology & Anthropology (p. 482). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

**ANTH 687: Medical Anthropology.** 3 credits.
Explores the wide variety of cultural interpretations of health, illness, and curing. Examines a number of different curing systems, both traditional and modern, and compares them with cosmopolitan biomedicine. Several book-length case studies cover a wide variety of cultural groups, health topics, and theoretical orientations. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Special attention to the role of cultural differences in the structuring of culture, power, and conflict. Explores power and social conflict through the lens of cultural analysis.

ANTH 721: Culture, Power, and Conflict. 3 credits. 
Explores power and social conflict through the lens of cultural analysis. Special attention to the role of cultural differences in the structuring of conflict and the deployment of cultural theory in formulating a practice of conflict resolution. Offered by Sociology & Anthropology (p. 482). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ANTH 690: Internship. 3-6 credits.
All internships must be approved by faculty advisor to ensure suitability to the student's course of study. Introduction to applied anthropology through approved work and study at a museum, institute, agency, or other approved site. Offered by Sociology & Anthropology (p. 482). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Graduate standing, with 3 hours of methods and 12 hours in program, or by permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

ANTH 698: Study Abroad. 1-6 credits.
Intended for participation in formally organized course offered by Center for Global Education or an overseas institution or engagement in a field project related to the Master's thesis or project. May be repeated for a maximum of 6 credits. Offered by Sociology & Anthropology (p. 482). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

ANTH 699: Contemporary Issues in Sociocultural Anthropology. 3 credits.
Explores current issues and debates in sociocultural anthropology. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology (p. 482). May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ANTH 769: Gender, Sexuality, and Culture. 3 credits.
Explores current issues and debates in sociocultural anthropology. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology (p. 482). May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

ANTH 696: Master's Research Project. 1-6 credits.
Capstone research project conducted under the supervision of a faculty project director and project evaluation committee. Project should be a substantial contribution to anthropological knowledge and is in lieu of a thesis. Notes: Students must initially enroll for a minimum of 3 credits of ANTH 796 and maintain continuous enrollment in 796 until project is submitted. A maximum of 6 credits of ANTH 796 may be applied to the degree. Offered by Sociology & Anthropology (p. 482). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Approval of project proposal.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

ANTH 796: Master's Research Project. 1-6 credits.
Capstone research project conducted under the supervision of a faculty project director and project evaluation committee. Project should be a substantial contribution to anthropological knowledge and is in lieu of a thesis. Notes: Students must initially enroll for a minimum of 3 credits of ANTH 796 and maintain continuous enrollment in 796 until project is submitted. A maximum of 6 credits of ANTH 796 may be applied to the degree. Offered by Sociology & Anthropology (p. 482). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Approval of project proposal.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

ANTH 798: Thesis or Project Proposal. 3 credits.
Work on research proposal that forms basis for master's thesis or project. Offered by Sociology & Anthropology (p. 482). May be repeated within the degree for a maximum 6 credits.
Recommended Prerequisite: Completion of 15 credits, including all other core courses.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

ANTH 799: Master's Thesis. 1-6 credits.
Master's thesis research and writing under direction of thesis committee.
Notes: Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree. Offered by Sociology & Anthropology (p. 482). May be repeated within the degree for a maximum 24 credits.

Recommended Prerequisite: Approval of thesis proposal.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Applied Information Technology (AIT)

500 Level Courses

AIT 500: Quantitative Foundations for Information Systems Analysis. 3 credits.
Provides common background in basic quantitative areas focused on decision making, information processing, and telecommunications. Topics include review of precalculus, introduction to matrix algebra, problems in optimization, and introduction to probability and statistics.
Notes: Does not fulfill any VSITE graduate degree requirement. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Recommended Prerequisite: MATH 108 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

AIT 501: Software Engineering Essentials. 3 credits.
Provides an overview of essential topics in software engineering, including problem solving with computers, requirements, software design, software development, testing, verification, validation, usability, and management. Discuss concepts related to building software, including data structures, object-oriented programming, event handling in GUIs, and web application technologies and how these concepts are handled in various languages, but without requiring the students to program.
Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course
enormous amounts of data available from numerous sources. Lectures and non-technical disciplines required to collect, process and use scientific, governmental and other applications. Topics include technical

Course provides an overview of Big Data and its use in commercial, applied information technology. Enrollment is limited to students with a major, minor, or concentration in information systems, and networking. This graduate course provides an overview of OS and networking elements of information systems, and examines commercial systems. Computing lab. Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit. Equivalent to INFS 524.

**Recommended Prerequisite:** Academic or industry experience with database systems.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 524:** Database Management Systems. 3 credits.
Relational database management systems. Covers logical and physical database design; query languages and database programming; and examines commercial systems. Computing lab. Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit. Equivalent to INFS 524.

**Recommended Prerequisite:** Academic or industry experience with database systems.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 542:** Fundamentals of Computing Platforms. 3 credits.
Contemporary information systems are platforms inextricably combining operating systems and networks. This graduate course provides an overview of OS and networking elements of information systems, and examines the particular issues relating to the range of platforms, from handheld mobile devices to cloud and supercomputer systems. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** Academic or industry experience with operating systems and computer networks.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Applied Information Technology.

**Schedule Type:** Lecture

**AIT 580:** Analytics: Big Data to Information. 3 credits.
Course provides an overview of Big Data and its use in commercial, scientific, governmental and other applications. Topics include technical and non-technical disciplines required to collect, process and use enormous amounts of data available from numerous sources. Lectures cover system acquisition, law and policy, and ethical issues. It includes brief discussions of technologies involved in collecting, mining, analyzing and using results. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 581:** Problem Formation and Solving in Big Data. 3 credits.
The course explores challenges facing analysts exploiting Big Data or Bespoke Data in combination with Big Data, and looks at solutions, mindful of the fact that our intellectual and practical practices are based entirely on the 5000 year old Bespoke Data paradigm, and considering that Big Data practices are too recent to lead to comparable Big Data tools and practices. Notes: Course may be used in other certificate and degree programs. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 582:** Applications of Metadata in Complex Big Data Problems. 3 credits.
The course explores technical and analytical issues, solutions and gaps in processing large volumes of data by leveraging metadata. The goal is to find “facts of interest” (intelligence) that represent threats to, or even opportunities for, a given industry or domain (e.g., healthcare, finance or national intelligence/national defense) where there is limited time. Notes: Course may be used in other Certificate or Degree programs. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture
AIT 590: Topics in Applied Information Technology. 3 credits.
Topics in the application of information technology. Students are expected to participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Notes: Course cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

AIT 597: Developing IT Leaders of Integrity. 3 credits.
Considers the cultural and organizational influences and focuses on leadership's ethical dimensions. Students identify their core values, study the attributes of effective and toxic leaders, and examine the difference between managing and leading through selected readings, discussions, team projects, in-class activities and guest presentations. Students practice and receive in-class coaching to hone their leadership skills. Notes: Course cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Recommended Prerequisite: Registered student in MS, Applied IT or instructor's permission.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

600 Level Courses

AIT 601: Foundations of Applied Information Technology. 3 credits.
Introduces students to foundational scholarship in applied information technology. Reviews seminal readings and applications of information technology. Students learn about the interdisciplinary history of the field, are introduced to influential scholars and important topics, and get an overview of key theoretical paradigms in applied information technology. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Recommended Prerequisite: Admission to a graduate program in Applied IT.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

AIT 602: Introduction to Research in Applied Information Technology. 3 credits.
Introduces students to research methods required to conduct original research in applied information technology. Reviews different research approaches and methods, discusses issues of data collection, validity reliability, data analysis, and interpretation. Throughout, seminal research papers will be used as case studies and students will also learn to read and understand research. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Recommended Prerequisite: Admission to a graduate program in Applied IT.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

AIT 603: Research Practice. 3 credits.
Complementing AIT 602's treatment on the nature of AIT research, this course examines various pragmatic aspects of conducting research, including: research venues, public & private funding sources, grant proposals, publishing, regulation and reporting obligations, operating labs and centers, legal and intellectual property issues, collaboration nationally and internationally. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Recommended Prerequisite: AIT 602 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

AIT 614: Big Data Essentials. 3 credits.
Hands-on course discusses emerging technologies for big data analytics and their applications in real-world environments. Students apply learned concepts and best practices using several emerging technology
tools simulating development, implementation, and use of big data analytical systems. Topics include RDBMS, SQL, NoSQL, R, MapReduce Programming paradigm, Hadoop, HDFS, HIVE, PIG and others in the Hadoop ecosystem for unstructured data analytics. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** Academic or industry experience with database systems.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 624: Knowledge Mining from Big-Data.** 3 credits.
Introduction to methods and tools related to knowledge mining/representation/visualization, and annotation and retrieval for Big-Data Applications from an applied perspective with the focus on emerging research problems. This course combines survey lectures with in-depth presentation of relevant issues through seminars, and hands-on experience using existing technologies and public data sources. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** AIT 582B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 631: Advanced Decision Making in IT Ventures.** 3 credits.
The course provides students with an understanding of decision making processes and methodologies needed to successfully run IT companies. Topics include: assessment of IT ideas and investments; measuring IT investments performance; forecasting methods; multi-criteria information technology decision making methods; decision support systems; value analysis and benefit/risk methodologies. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** IT 496 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 650: Distributed Systems and Overlay Networking.** 3 credits.
This graduate level seminar examines advanced networking research topics and potential applications, including distributed systems, peer-to-peer and overlay net workings, routing, protocols, replication strategies, tree formation, resource sharing, fault tolerance, and network modeling. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** Thorough understanding of computer networking, IP and TCP protocols, congestion control, queuing, and addressing and routing mechanisms.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**AIT 660: Cyber Security Fundamentals.** 3 credits.
Introduces fundamental security principles and real-world applications of cyber security. Topics covered in the course include access control, common classes of attacks, monitoring, attack and intrusion detection, basic cryptography, computer security models, legal and privacy issues, and risk analysis. The course also provides students with opportunities
to gain hands-on experience with several security tools (e.g., protocol analyzers). Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Applied Information Technology.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 664: Information: Representation, Processing and Visualization.** 3 credits.
The course explores basic concepts to understand and analyze the design of information systems, and focuses on conceptual understanding of data, information, and knowledge, boundaries in representing and processing information for humans and machines, information theory, and basic techniques to organize, structure, and interact with the information through visualization. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** AIT 524 or permission of department.

**Schedule Type:** Lecture

**AIT 665: Managing Information Technology Programs in the Federal Sector.** 3 credits.
This case study-grounded seminar introduces student team members to the unique complexities of the Federal Sector, including Congressional and Executive Branch oversight, reporting, justifying and sustaining annually very large IT programs. Notes: Course cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**AIT 670: Cloud Computing Security.** 3 credits.
Offers a survey of security and privacy issues in Cloud Computing systems, along with an overview of current solutions and available technologies. Examines cloud computing models and threat model and security issues related to data and computation outsourcing, and explores practical applications of secure Cloud Computing. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** AIT 542.

**Registration Restrictions:**
Required Prerequisite: AIT 660B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 671: Information System Infrastructure Lifecycle Management.** 3 credits.
Examines information system infrastructure lifecycle management including the audit process, IT governance and best practices, system and infrastructure control, IT service delivery and support, protection of information assets, physical security, business and disaster recovery. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** Registration in MS, Applied IT program or permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 672: Identity and Access Management.** 3 credits.
Provides a hands-on in-depth description of the principles, concepts, and technology of Identity Management. Topics include digital identity, credentials, authentication, authentication protocols, trust frameworks, cryptography and digital signatures, identity tokens (smart cards), and smart card-based identity verification and authorization applications. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** Admission into MS AIT program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

AIT 673: Cyber Incident Handling and Response. 3 credits.
Examines Computer Emergency Response Team (CERT), including Incident Response, Vulnerability Assessment, Incident Analysis, Malcode Analysis, Forensics and Investigations. Includes exercises in CERT operations and a final Incident Handling project. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Recommended Prerequisite: AIT 670 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

AIT 674: Research, Development and Technology in the Intelligence Community. 3 credits.
Provides overview of research, development and engineering components of agencies within U.S. Intelligence Community, how they prioritize research and deliver products used in collection, processing, and dissemination of information. Examines different types of technical intelligence and related phenomenologies employed in their collection. Highlights evolution of technologies used in gathering and discusses new and emerging trends in intelligence collection and analysis. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

AIT 675: Overview of the National Intelligence Community. 3 credits.
Introduces structure and basic operations of the U.S. national intelligence community (IC). Students learn general information about organization, structure and missions of the IC and about the tools and techniques employed by intelligence agencies of the U.S. and other intelligence services. Surveys the range of intelligence problems and challenges, types of data and data collectors employed, and how information is processed, analyzed, and disseminated. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Recommended Prerequisite: Admission into the MS-AIT degree program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

AIT 676: Intelligence Technologies, Research and Development in the Intelligence Community. 3 credits.
Overview of R & D and engineering components of agencies within U.S. Intelligence. Describes: process by which these agencies prioritize research and deliver products to collect, process and disseminate information; types of technical intelligence and the related phenomenologies employed in their collection; evolution of technologies used in gathering, and; discusses new and emerging trends in intelligence collection and analysis. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Recommended Prerequisite: Admission into the MS-AIT degree program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

AIT 677: Intelligence Analysis Methods. 3 credits.
Presents various intelligence analysis methods addressing basic topics: substance-blind analysis of evidence and its credentials, chain of custody analysis, combination of evidence, divide and conquer paradigm for analysis, sources of uncertainty, competing hypotheses and analyses. Discusses case studies in various domains following a hands-on approach using educational analysis tools. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

Recommended Prerequisite: AIT 524.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 678: National Security Challenges.** 3 credits. Presents the process by which decision makers identify and prioritize intelligence problems and allocate collection and analysis resources to their solutions. Discusses nation-state issues such as Russia, China, and Iran, and transnational issues such as terrorism, weapons proliferation, narcotics and smuggling, and cyber conflict and the intelligence shortcomings and needs in regard to these problems. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** Admission into the MS-AIT degree program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 679: Law and Ethics of Big Data.** 3 credits. Examines Law, Ethics and Policy in Big Data operations. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MS, AIT program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Recommended Prerequisite:** Registered students in Homeland Security Information Systems and Cyber MS or permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 681: Secure Software Development.** 3 credits. Provides secure software development approaches for putting software security principles into practice and addressing software-induced security risk by studying software fundamentals and software security best practices. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** AIT 542B. B: Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non Degree.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 682: Network and Systems Security.** 3 credits. Introduces the principles and practices of cryptography, network security, and secure software by covering security policies, models, and mechanisms for secrecy, integrity, and availability; basic cryptography and its applications; secret key cryptography; hash functions; basic number theory and public key cryptography; trusted intermediaries, and network security (firewalls, IDS, IPsec, and SSL) etc. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** AIT 660.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non Degree.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 685: Capstone Seminar.** 3 credits. Student team-based experience grounded on solid understanding of the proceeding nine courses mastered in each of the program’s three areas of study. Teams analyze cases of mega-system programs from the 20th Century. Notes: Course cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.
**Recommended Prerequisite:** Completion of all core courses and at least nine credits of concentration courses in the program, or permission of department.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students in the MS Applied Info Technology program.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**AIT 686:** Capstone: Student Design Solution. 3 credits.
Student teams examine several historical or hypothetical cases that demonstrate vulnerabilities to the homeland security of the nation. Task is to choose one case, conduct appropriate outside research, then design and brief detection/prevention/mitigation processes that can protect the nation. Must be among the last two courses attempted in the degree program. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**AIT 690:** Advanced Topics in Applied Information Technology. 3 credits.
Students participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Notes: Course cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology (p. 1044). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**AIT 699:** Research Project. 3 credits.
Research project chosen and completed under guidance of graduate faculty member that results in technical report. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Applied Information Technology.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Independent Study

**700 Level Courses**

**AIT 701:** Cyber Security: Emerging Threats and Countermeasures. 3 credits.
Covers emerging security threats and current best practices in several applicative domains, ranging from the enterprise to the military. Discusses advanced topics, including advanced persistent threats, security of cyber-physical systems, distributed denial of service attacks, and mobile security. Also presents current trends and open research problems in the cyber security space. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 702:** Incident Handling and Penetration Testing. 3 credits.

Presents students with a principled approach to ethical hacking, and offers an in-depth analysis of the overall process, including aspects related to scanning, testing, ethically attacking, and eventually securing systems and networks. The course covers popular attack tools such as Social Engineering and DDoS, and concludes with a discussion about open challenges and current research in the area. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**

- **Required Prerequisite:** AIT 660\(^\text{B-}\).
  - \(B^-\) Requires minimum grade of \(B^-\).

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 710:** Design of Learning and Educational Technologies. 3 credits.

Examines foundations, theoretical perspectives, underlying learning theories, case studies, and key enabling technologies to provide context for understanding, designing, and researching learning and educational technologies. Considers technologies for diverse areas and users including teachers, instructors, higher education and K-12 learners, and learning among informal communities of interest. Technologies demonstrations are combined with hands-on activities involving participation in multiple learning environments. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** AIT 501 or permission of department.

**Registration Restrictions:**

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 711:** Rapid Development of Scalable Applications. 3 credits.

Presents software engineering, programming techniques, security practices, platforms and tools necessary for rapid development of applications. Provides a survey of programming techniques and static code analysis, including security and privacy consideration throughout the application life cycle. Students work in small teams and develop or maintain scalable applications exercising risk based analysis and techniques and practices presented in the course. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**

- **Required Prerequisites:** AIT 512\(^\text{B-}\) and 524\(^\text{B-}\).
  - \(B^-\) Requires minimum grade of \(B^-\).

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 716:** Human Computer Interaction. 3 credits.

Covers the foundations of Human Computer Interaction, including: (1) Basic definitions and motivations of HCI, history, theories, interaction paradigms, design principles and models; (2) User-centered design methods, studies, design approaches for interfaces and interaction, quality factors, evaluation methods and techniques for data analysis; (3) Research frontiers of HCI, accessibility, universal design, and ubiquitous computing (mobile and wearable applications). Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**

Enrollment is limited to students with a major, minor, or concentration in Applied Information Technology.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**AIT 721:** Design of IT Artifacts, Applications and Systems. 3 credits.

This course will introduce students to design principles and design thinking in applied information technology. Students will learn different approaches to design IT applications across a range of domains. Students will learn how to approach design of systems for large organizations and also for individuals. Students will learn about the interdisciplinary nature of design and get introduced to influential designers. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** Enrollment in the IST concentration of the PhD in IT program and AIT 501, or permission of department.

**Registration Restrictions:**

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 724:** Data Analytics in Social Media. 3 credits.

Introduce the necessary theories and the state-of-the-art techniques in Web mining, network analysis, information retrieval, and predictive modeling to study emerging problems with social media. These problems include information diffusion, recommendations, behavior analysis, and event analytics in social media. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Registration Restrictions:**

- **Required Prerequisite:** AIT 664\(^\text{B-}\).
  - \(B^-\) Requires minimum grade of \(B^-\).

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 734: Advanced Web Analytics Using Semantics.** 3 credits. Covers a range of current practices for metadata extraction, knowledge discovery from big complex data, as well as knowledge representation and reasoning. This course discusses Data Modeling issues in Web Information Systems and Internet of Things (IoT) Web Semantics. Current trends and open problems are also covered in this course. Offered by Info Sciences & Technology (p. 1044). May not be repeated for credit.

**Recommended Prerequisite:** AIT 582, 624.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non Degree.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**AIT 799: Master's Thesis.** 1-6 credits. Research project chosen and completed under guidance of graduate faculty members that results in a thesis manuscript and a presentation accepted by a committee of three faculty members. Offered by Info Sciences & Technology (p. 1044). May be repeated within the degree for a maximum of 6 credits.

**Recommended Prerequisite:** Open only to students in the MS AIT program with at least 18 credit hours of coursework prior to registration and with advisor approval.

**Registration Restrictions:**
Enrollment limited to students with a major, minor, or concentration in Applied Information Technology.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Thesis

**800 Level Courses**

**AIT 800: Applied Information Technology Colloquium.** 1 credit. Students attend a series of colloquia including talks by distinguished speakers, faculty candidates and Mason faculty. Topic areas include research advances in technology, its application, and policy issues. Notes: Students must attend a minimum of three events per semester to earn one credit in this course. PhD INFT students with a concentration in Information Science and Technology must complete at least two credits of AIT 800. Offered by Info Sciences & Technology (p. 1044). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Completion of AIT Core and at least 6 credits of AIT Field Requirements in PhD program.

**Schedule Type:** Seminar

**Arabic (ARAB)**

**100 Level Courses**

**ARAB 101: Introduction to the Arabic Language.** 3 credits. Introduction to Arabic language, dialects, countries, and culture. Beginning modern standard and classical Arabic, with emphasis on the written language, script and phonology. Basic grammar covering gender, numbers, cases, prepositions, nominal sentences, and basic conversation and greetings. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to ARAB 110.

**Schedule Type:** Lecture

**ARAB 102: Introduction to the Arabic Language.** 3 credits. Introduction to developing reading skills in formal settings. Emphasizes modern standard Arabic in oral communication. Beginning grammar level focuses on verbal sentences, present tenses, questions, and compound nouns. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to ARAB 110.

**Recommended Prerequisite:** ARAB 101.

**Schedule Type:** Lecture

**ARAB 110: Elementary Arabic.** 6 credits. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to ARAB 101, ARAB 102.

**Schedule Type:** Lecture

**200 Level Courses**

**Recommended Prerequisite:** ARAB 101, 102.

**Schedule Type:** Lecture

**Recommended Prerequisite:** ARAB 201.

**Schedule Type:** Lecture

**ARAB 210: Intermediate Arabic.** 3 credits. Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Arabic-speaking regions. Offered
by Modern & Classical Languages (p. 414). May not be repeated for credit. Equivalent to ARAB 201, ARAB 202.

**Recommended Prerequisite:** ARAB 110 or appropriate placement score.

**Schedule Type:** Lecture

**ARAB 250:** Gateway to Advanced Arabic. 3 credits.
Integration of advanced intermediate-level Arabic reading, writing, listening, and speaking skills and the development of critical thinking and understanding authentic texts from the Arabic world. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in Arabic

**Recommended Prerequisite:** ARAB 250.

**Schedule Type:** Lecture

**ARAB 300:** Advanced Arabic. 3 credits.
Introduces new complex syntactical and grammatical structures for critical enhancement of fluency in Modern Standard Arabic. Emphasis is placed on sentence structure and vocabulary enrichment. Students also gain additional exposure to linguistic diglossia, culture, and history. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Recommended Prerequisite:** ARAB 250.

**Schedule Type:** Lecture

**ARAB 325:** Major Arab Writers/Stories. 3 credits.
Studies works of major Arab writers or collections such as The Arabian Nights. Notes: Knowledge of Arabic helpful but not required. May be repeated when topic is different with permission of department. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Literature (p. 135)

**Specialized Designation:** Taught in English

**Recommended Prerequisite:** ENGL 101/ENGH 101 or permission of instructor.

**Schedule Type:** Lecture

**ARAB 330:** Reading and Conversation I. 3 credits.
Development of conversational fluency and reading skills in modern standard Arabic through class discussion, reports, and presentations. Includes readings from newspapers, journals, magazines, web sites, literary works, and other sources. Notes: ARAB 330 and 331 must be taken in sequence. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in Arabic

**Recommended Prerequisite:** ARAB 250, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**ARAB 331:** Reading and Conversation II. 3 credits.
Continuation of ARAB 330. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in Arabic

**Recommended Prerequisite:** ARAB 250 or equivalent; appropriate placement score; or permission of instructor

**Schedule Type:** Lecture

**ARAB 350:** Media Arabic I (Written Media). 3 credits.
Develops advanced reading skills through work with current written media in Arabic. Offered by Modern & Classical Languages (p. 414). May not be repeated for credit.

**Specialized Designation:** Taught in Arabic

**Recommended Prerequisite:** ARAB 330 and 331 or appropriate placement score or permission of instructor.

**Schedule Type:** Lecture

**ARAB 351:** Media Arabic II (Spoken Media). 3 credits.
Develops advanced listening and speaking skills through work with current broadcasts in Arabic TV and Radio. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Capstone (p. 135)

**Specialized Designation:** Taught in Arabic

**Recommended Prerequisite:** ARAB 350 or permission of instructor.

**Schedule Type:** Lecture

**ARAB 360:** Topics in Arabic Cultural Production. 3 credits.
Focuses on major trends and issues in modern Arabic cultural production. In addition to material from the Middle East and North Africa, the course surveys works of art, cinema, media, and literature from across the global Arabic diaspora. Notes: Some knowledge of Arabic is preferable. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Taught in English, Non-Western Culture

**Schedule Type:** Lecture

**ARAB 375:** Study Abroad - Arab World. 1-6 credits.
Designated study abroad programs in the Arab world. Notes: must be approved by Arabic program coordinator. Offered by Modern & Classical Languages (p. 414). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ARAB 110.

**Schedule Type:** Independent Study

**ARAB 380:** Arabic Dialects. 3 credits.
Study of the structure of one Arabic dialect with comparison to Modern Standard Arabic and the classical Fus-ha. Includes study of literature, proverbs, and culture associated with that dialect. Notes: May be repeated when dialect covered is different. Offered by Modern & Classical Languages (p. 414). May be repeated within the term for a maximum 6 credits.

**Specialized Designation:** Taught in Arabic

**Recommended Prerequisite:** ARAB 250, appropriate placement score, or permission of instructor.
ARAB 390: Translation Methods: Arabic to English. 3 credits.
Provides students with essential tools and techniques to translate Arabic
texts to English. Includes practice applying these techniques to a variety
of documents including literary, media, and legal texts. Offered by Modern
& Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in Arabic

Recommended Prerequisite: ARAB 330 and 331 or appropriate placement
score or permission of instructor.

Schedule Type: Lecture

400 Level Courses

ARAB 420: Survey of Arabic Literature. 3 credits.
A survey of Arabic literature from its genesis to the present day. Offered
by Modern & Classical Languages (p. 414). May not be repeated for credit.

Specialized Designation: Taught in Arabic, Non-Western Culture

Recommended Prerequisite: Six credits of 300 level courses taught in
Arabic or permission of instructor.

Schedule Type: Lecture

ARAB 430: Advanced Arabic Grammar. 3 credits.
Introduction to traditional Arabic grammar. Covers parts of speech,
sentence structure, case marking, and verb structure. Combines
traditional with modern approaches to Arabic grammar and includes
practical drills. Offered by Modern & Classical Languages (p. 414). May not
be repeated for credit.

Specialized Designation: Taught in Arabic

Recommended Prerequisite: 6 credits of 300 level Arabic or permission
of instructor.

Schedule Type: Lecture

ARAB 440: Topics in Arabic Religious Thought and Texts. 3 credits.
Survey of the religious and intellectual heritage of the Arab world. Notes:
May be repeated when topic and texts are different. Offered by Modern
& Classical Languages (p. 414). May be repeated within the degree for a
maximum 9 credits.

Mason Core: Capstone (p. 135)

Specialized Designation: Taught in Arabic, Non-Western Culture

Recommended Prerequisite: Six credits of 300 level Arabic or permission
of instructor.

Schedule Type: Lecture

ARAB 498: Independent Study. 1-6 credits.
Designated independent study in the United States or abroad under the
direction of a full-time faculty member. Notes: Must be approved by
Arabic program coordinator. Offered by Modern & Classical Languages
(p. 414). May not be repeated for credit.

Recommended Prerequisite: ARAB 250.

Schedule Type: Independent Study

Art History (ARTH)

100 Level Courses

ARTH 101: Introduction to the Visual Arts. 3 credits.
Introduction to the content and principles of the visual arts. Approach
varies with instructor. Offered by History & Art History (p. 381). May not
be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Lecture

ARTH 102: Symbols and Stories in Art. 3 credits.
Introduces themes and imagery in art. Approaches and traditions to
explore vary with the instructor. Offered by History & Art History (p. 381).
May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Lecture

ARTH 103: Introduction to Architecture. 3 credits.
Introduces study, principle, and understanding of art of architecture.
Approach varies with instructor; may be historical, geographical,
technical, or thematic. Notes: Field trips required. Offered by History & Art
History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Lecture

200 Level Courses

ARTH 200: History of Western Art I. 3 credits.
Major periods, monuments, and themes of Western art and architecture.
Introduces Washington, D.C., museum collections and a historical
framework for further study in art history. Covers prehistory, the ancient
world, and the Middle Ages. Notes: Designed as a two-course sequence,
but each part may be taken independently without prerequisite. Offered
by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Lecture

ARTH 201: History of Western Art II. 3 credits.
Major periods, monuments, and themes of Western art and architecture.
Introduces Washington, D.C., museum collections and a historical
framework for further study in art history. Covers the art of the
Renaissance, the baroque period, and modern Europe and the Americas.
Notes: Designed as a two-course sequence, but each part may be taken
independently without prerequisite. Offered by History & Art History
(p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Lecture

ARTH 203: Survey of Asian Art. 3 credits.
Introduces the arts of South, Southeast, and East Asia. Examines aspects
of the culture and history of Asia. Discusses monuments and artifacts
in a variety of media and their relation to social and historical contexts.
Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)
Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ARTH 204: Survey of Latin American Art. 3 credits.
Introduces arts of Latin America from pre-Columbian to modern era. Discusses important examples of painting, sculpture, and architecture in relation to culture and history of region. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ARTH 206: Survey of African Art. 3 credits.
Introduces arts of Africa, from antiquity to the present day. Presents a variety of arts in relation to their historical and cultural contexts, and makes use of local museum resources. Offered by History & Art History (p. 381). May not be repeated for credit. Equivalent to ARTH 380.

Mason Core: Arts (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

300 Level Courses

ARTH 303: National Traditions. 1-3 credits.
Studies traditions of art and architecture within a single selected country or historical region. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: 24 hours or permission of instructor.

Schedule Type: Lecture

ARTH 311: Design of Cities. 3 credits.
Explores problems in urban design in a particular geographical region or historical period. Approach varies with instructor and may involve archaeological or theoretical approaches appropriate to the specific context. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

ARTH 315: Modern Architecture. 3 credits.
Studies in modern architecture from the Beaux Arts movement to the present; an investigation of stylistic, structural, or theoretical innovations. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

ARTH 318: Art and Archaeology of Ancient Egypt. 3 credits.
Explores the art, architecture, and archaeology of ancient Egypt in its cultural and historic context. Besides the famous monuments, students will also examine the influence of ancient attitudes about cultural identity on the art of the period as well as the impact of ancient Egyptian art on ancient Greece and modern western culture. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Non-Western Culture

Recommended Prerequisite: 24 credits (sophomore standing)

Schedule Type: Lecture

ARTH 319: Art and Archaeology of the Ancient Near East. 3 credits.
Aspects of the art, archaeology, and culture of ancient Near East and Bronze Age Mediterranean. Approach varies depending on instructor; emphasis may be on Mesopotamia, Iran, Egypt, Anatolia, the Levant, or the Aegean. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Recommended Prerequisite:

Schedule Type: Lecture

ARTH 320: Art of the Islamic World. 3 credits.
Introduction to Islamic art, from the time of Muhammad to present. Cultural and regional approach, utilizing local museum collections. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Recommended Prerequisite: Completion of 24 hours.

Schedule Type: Lecture

ARTH 321: Greek Art and Archaeology. 3 credits.
History of ancient Greek architecture, sculpture, and painting. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

ARTH 322: Roman Art and Archaeology. 3 credits.
History of Roman architecture, sculpture, and painting. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisite: Completion of 24 hours.

Schedule Type: Lecture

ARTH 324: From Alexander the Great to Cleopatra: The Hellenistic World. 3 credits.
Arts of the Hellenistic age within the context of history and culture of the period. Explores the powerful dynasties ruling wealthy empires; achievements in learning and literature housed in the Great Library at Alexandria; baroque sculpture adorning the Altar of Zeus at Pergamon; and Roman collectors of Greek art and antiques. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)
Recommended Prerequisite: Completion of 24 hours.

Schedule Type: Lecture

ARTH 333: Early Christian and Byzantine Art. 3 credits.
Aspects of medieval art and culture in eastern Mediterranean world. Topics may include late antiquity, early Christianity, and the Byzantine empire and its neighbors. Designed to take advantage of unique local museum resources. Notes: Specific focus varies with instructor. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisites: Completion of 24 hours.

Schedule Type: Lecture

ARTH 334: Western Medieval Art. 3 credits.
Aspects of art and architecture in medieval Europe, from the fall of the Roman Empire through the Gothic period. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

ARTH 335: Arts of Medieval England. 3 credits.
Studies in architecture, sculpture, and painting in the age of Giotto, Ghiberti, Masaccio, and Botticelli. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

ARTH 336: Early Renaissance Art in Italy, 1300-1500. 3 credits.
Studied in architecture, sculpture, and painting in the age of Leonardo, Michelangelo, Raphael, and Titian. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

ARTH 337: Northern Renaissance Art. 3 credits.
Studied in architecture, sculpture, and painting in the age of Caravaggio, Bernini, Velazquez, and Poussin. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

ARTH 338: High Renaissance Art in Italy, 1480-1570. 3 credits.
Studied in architecture, sculpture, and painting in the age of Caravaggio, Bernini, Velazquez, and Poussin. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)
Schedule Type: Lecture

ARTH 370: Arts of the United States. 3 credits.
Introduces students to high art (painting and sculpture) and popular material and visual cultural forms (prints, furniture, textiles) through a chronological and thematic survey of U.S. Art, 1600 to 1950. Explores changing roles of arts, artists, craftsmen; issues of gender, race, class; and formation of national identity through the arts. Lectures and discussion are featured. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisite: 24 hours of undergraduate credit.

Schedule Type: Lecture

ARTH 371: American Architecture and Material Culture. 3 credits.
Studies in the history of American architecture or decorative arts in cultural context. Topics range from 17th century to 20th century, depending on instructor. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: Completion of 24 hours.

Schedule Type: Studio

ARTH 372: Studies in 18th- and 19th-Century Art of the United States. 3 credits.
Developments in visual culture and the changing status of art practitioners throughout these periods. Focus is either chronological (Colonial Period, Gilded Age) or thematic (19th-century genre scenes, the American landscape and national identity). Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts (p. 135)

Recommended Prerequisite: 24 hours.

Schedule Type: Lecture

ARTH 373: Studies in 20th-Century Art of the United States. 3 credits.
Developments in 20th-century American visual culture across all media. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts (p. 135)

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

ARTH 374: Art Now. 3 credits.
Explores visual art production since 1980, drawing on regional resources. Examines social, institutional, and political issues in recent art and its markets. Notes: Requires students to work collaboratively and make several field trips, including one Saturday bus trip to New York. Specific topics and assignments vary with the changing art season and instructor. Lecture, discussion. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: Completion of 24 credits and one course in ARTH or AVT, or permission of instructor.

Schedule Type: Lecture

ARTH 376: Twentieth-Century Latin American Art. 3 credits.
Major movements and important artists in 20th-century Latin American art discussed in relation to social, cultural, and political conditions in the region. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

ARTH 382: Arts of India. 3 credits.
History, culture, and arts of south Asia from earliest civilizations along the Indus River to onset of Western colonialism. Emphasizes role of material evidence in the creation of the South Asian history and how political, social, and religious developments affected the arts. Discusses monuments and artifacts in a variety of media in relation to historical contexts. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

ARTH 383: Arts of Southeast Asia. 3 credits.
Examines various cultural and artistic traditions of ancient Southeast Asia, from the earliest archaeological evidence to onset of colonialism. Lectures and discussions focus on material culture of the great civilizations that arose within borders of modern Thailand, Cambodia, Indonesia, Burma (Myanmar), Vietnam, Laos, and Malaysia. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

ARTH 384: Arts of China. 3 credits.
Explores the complex and dynamic history of China by examining ways in which social, religious, and political shifts have given rise to new and variant forms of material culture. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

ARTH 385: Arts of Japan. 3 credits.
Art and architecture of Japan, with particular attention to the ways political changes, religious movements, and social developments influenced and shaped those creations. Discusses monuments and artifacts in a variety of media in relation to social and historical contexts. Offered by History & Art History (p. 381). May not be repeated for credit.
Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

**ARTH 386:** The Silk Road. 3 credits.
Explores luxury arts and material culture of Eurasian trade routes between Mediterranean and China in historical, religious, and social contexts. Emphasizes cultural interactions in medieval Central Asia. Offered by History & Art History (p. 381). May not be repeated for credit.

Mason Core: Global Understanding (p. 135)

Specialized Designation: Non-Western Culture

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

**ARTH 393:** Art History Internships. 3-6 credits.
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor. Notes: Strongly recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Art History major or minor and permission of instructor.

Schedule Type: Internship

**ARTH 394:** The Museum. 3 credits.
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations; focus varies with instructor. Offered by History & Art History (p. 381). May not be repeated for credit.

Schedule Type: Independent Study

**ARTH 398:** Study Abroad in the History of Art. 1-6 credits.
Study abroad. Course topics, content, and locations vary. Notes: A maximum of 6 credits may be applied to the major or minor with permission of the program. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 12 credits.

Schedule Type: Independent Study

**ARTH 399:** Special Topics in the History of Art. 3 credits.
Topics vary. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

Schedule Type: Lecture

**400 Level Courses**

**ARTH 400:** Historiography and Methods of Research in Art History (Topic Varies). 3 credits.
Historical investigation of theories, methods, and critiques involved in the discipline of art history. Approach or focus may vary with instructor. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: History at the 300 level or permission of instructor.

Schedule Type: Seminar

**ARTH 420:** Advanced Studies in Ancient Art. 3 credits.
Studies a particular area of ancient art of the Mediterranean, Near East, or Middle East. Topics may be art form or medium, geographical area, theme, function, or context. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302 and 6 credits in Art History at the 300 level or permission of instructor.

Schedule Type: Seminar

**ARTH 430:** Advanced Studies in Medieval or Islamic Art. 3 credits.
Studies a particular area of medieval or Islamic art. May focus on a particular period, region, or medium, or may explore cultural interconnections within medieval Eurasian world. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 12 credits.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302 and a 300-level course in medieval or Islamic art, or permission of instructor.

Schedule Type: Seminar

**ARTH 440:** RS: Advanced Studies in Renaissance and Baroque Art. 3 credits.
Studies a particular aspect of Renaissance or baroque art. Topics may be monographic, thematic, or concentrated on the art of a smaller time period or a particular area. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

Specialized Designation: Research/Scholarship Intensive, Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302 and a 300-level course in medieval or Islamic art, or permission of instructor.

Schedule Type: Seminar

**ARTH 460:** RS: Advanced Studies in 20th-Century European Art. 3 credits.
Study of a particular topic in 20th century European art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 9 credits.
Specialized Designation: Research/Scholarship Intensive, Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302 and 3XX level course in 19th or 20th century European or American art, or permission of instructor.

Schedule Type: Seminar

ARTH 471: Advanced Studies in Art of the United States. 3 credits.
Studies a particular area of American art, focusing on a form, such as landscape or genre painting; theme, such as nationalism, regionalism, or iconography of the family, or movement, such as American modernism. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302 and 6 credits in art history at the 3XX level or permission of instructor.

Schedule Type: Lecture

Study a particular topic in 20th-century Latin American art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 9 credits.

Specialized Designation: Research/Scholarship Intensive, Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302 and a 3XX level course in 19th or 20th century art of Europe or the Americas, or permission of instructor.

Schedule Type: Seminar

ARTH 474: Advanced Studies in Contemporary Art. 3 credits.
Study of a particular topic in contemporary art in a research seminar setting. Focus on particular theme, region, artist, or medium, or take a comparative approach. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302; 3XX level coursework in modern or contemporary art; or permission of instructor.

Schedule Type: Seminar

ARTH 482: RS: Advanced Studies in Asian Art. 3 credits.
Seminar-style discussions on a specific topic in Asian art. May focus on the art of a particular period, movement, reign, or region, as well as theoretical issues or works in a particular medium. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 6 credits.

Specialized Designation: Research/Scholarship Intensive, Non-Western Culture, Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302, and 3XX-level course in any area of Asian art; or permission of instructor.

Schedule Type: Seminar

ARTH 490: Independent Study in Art History. 3 credits.
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: 60 credits, ENGH 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

Schedule Type: Independent Study

ARTH 491: Independent Study in Art History. 3 credits.
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ENGH 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

Schedule Type: Independent Study

ARTH 492: Honors Directed Readings. 3 credits.
Linked individualized courses, usually given by same instructor. Involves directed readings. Notes: Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: Admission to Art History Honors Program, ENGL 302, permission of instructor and chair, departmental approval of Honors Proposal submitted term prior to registration.

Schedule Type: Independent Study

ARTH 493: Honors Directed Research. 3 credits.
Linked individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings. Notes: Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently. Offered by History & Art History (p. 381). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: Admission to Art History Honors Program, ENGL 302, permission of instructor and chair.

Schedule Type: Independent Study

ARTH 495: RS: Objects and Archives in Art History. 3 credits.
Conduct hands-on research with objects and primary and secondary sources. Select particular artifacts, works of art, or group of objects and undertake original research, and bring objects from storage to publication to exhibition. Develops skills in material analysis, critical reading, and academic writing. Focuses on VA/DC/MD libraries, archives,
Students in a Non-Degree Undergraduate degree may not enroll.

Specialized Designation: Research/Scholarship Intensive, Writing Intensive in the Major

Recommended Prerequisite: 6 credits of 300-level courses in the College of Humanities and Social Sciences and ENGH 302.

Schedule Type: Seminar

ARTH 499: Advanced Studies in Art History. 3 credits.
Seminar-style discussion on specific subjects in art history. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302 and 3XX level course in Art History; or permission of instructor.

Schedule Type: Seminar

500 Level Courses

ARTH 570: Proseminar in History of Decorative Arts. 3 credits.
A writing-intensive course designed to equip students with the skills required for professional scholarship in the history of decorative arts. Examines a variety of theories and methods for analyzing objects. Teaches visual and contextual analysis skills as well as critical thinking about and documentation of primary and secondary sources. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ARTH 571: Survey of Decorative Arts I. 3 credits.
Overview of European decorative arts from fifteenth to eighteenth centuries, with focus on objects from Italy, France, and England. Examines the role of decorative arts in the formation of identity of the elite in Renaissance Italy as well as Renaissance France and England. Also concentrates on European decorative arts from seventeenth and eighteenth centuries, with emphasis on Paris and London. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ARTH 572: Survey of Decorative Arts II. 3 credits.
This writing-intensive course is designed to equip students with the skills required for professional scholarship in the history of decorative arts. Students will examine a variety of theories and methods for analyzing objects through assigned readings, class discussions, and short writing assignments. Offered by History & Art History (p. 381). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

ARTH 593: Internship in Art History and the Decorative Arts. 3-6 credits.
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor. Notes: Recommended for advanced art history students seeking exposure to professional work in visual arts. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: BA or equivalent or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

ARTH 594: The Museum. 3 credits.
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations. Focus may vary with instructor. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: Baccalaureate degree or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
ARTH 596: Independent Study. 1-3 credits.
Independent reading and research on specific project under direction of department member. Notes: Written report is required. May be repeated for credit. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** Baccalaureate degree or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Independent Study

ARTH 599: Special Topics in Art History and the Decorative Arts. 1-6 credits.
Topics vary. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term.

**Recommended Prerequisite:** Baccalaureate degree or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**600 Level Courses**

ARTH 600: Methods and Research in Art History. 3 credits.
Investigates theories, methods, and research strategies in discipline of art history. Designed for first-semester students in art history MA program; foundation for further graduate-level work in the program. Offered by History & Art History (p. 381). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Art History MA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

ARTH 601: Colloquium in Art History. 3 credits.
Offers graduate-level survey in academic art history led by an instructor of record, with input from full Art History faculty. Participants review the current field through lectures, focused readings and group discussions with relevant faculty member. Participants may read in more depth in areas of special interest. Provides preparation for MA exams and professional preparation for teaching. Offered by History & Art History (p. 381). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MA Program in Art History.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

ARTH 610: Theory of Decorative Arts. 3 credits.
Covers the analysis of objects and design from a number of different perspectives: cultural studies, art history, Marxism, the Frankfurt School, and feminism among others. Offers different tools and viewpoints for each approach to analyze and understand decorative arts. Offered by History & Art History (p. 381). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

ARTH 620: Topics in Individual Decorative Arts. 3 credits.
Survey of a single decorative art including media and methods of production. Covers connoisseurship issues such as identifying materials and techniques, fakes, forgeries, repairs, reproductions. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 24 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

ARTH 630: Material Culture Studies. 3 credits.
Introduction to traditions that have contributed to the field of material culture study. Examines a broad range of the material world from the past to the present. Surveys the field's historical roots and examines approaches to material culture scholarship. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 24 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ARTH 640: European Decorative Arts.** 3 credits.
Examines one or more European decorative arts from periods from the Renaissance to the early 20th century. Arts may include tapestries, pottery and ceramics, silver, furnishing, jewelry and metalwork, glass as well as distinctive stylistic periods. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 24 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ARTH 650: Global Decorative Arts.** 3 credits.
Examines specific key media, moments, or locations in the global decorative arts beyond the Western tradition. Notes: May be repeated for credit with topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 24 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ARTH 660: Museum Studies.** 3 credits.
Explores the role of museums, through presentations by key museum personnel and discussion of required readings. Administrators, curators, conservators, educators, editors, among others, work with students to expand their knowledge of how museums function. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 24 credits.

Registration Restrictions:

**ARTH 670: Design and Design History.** 3 credits.
Examination of key moments in design history. Through focus on the chosen topic, discusses the nature of design. Covers history of interiors, furniture and architecture, and theories of design and design composition. Notes: May be repeated for credit with topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 24 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**ARTH 696: Independent Directed Readings.** 3 credits.
Designed to prepare students for comprehensive exams by integrating past work and filling gaps in expected knowledge before the exam. Notes: Taken in final semester of art history MA. Offered by History & Art History (p. 381). May not be repeated for credit.

Recommended Prerequisite: Admission to Art History MA program and permission instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

**ARTH 699: Topics in Art History.** 3 credits.
Research seminar on aspects of art history. Topics vary, but course entails extensive critical readings and discussion, development of bibliographies, and advanced-level research papers. Notes: May be repeated when topic is different. Offered by History & Art History (p. 381). May be repeated within the term for a maximum 15 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

### 700 Level Courses

**ARTH 797:** Thesis Writing Workshop. 0 credits.
Offered by History & Art History (p. 381). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**ARTH 799:** Master's Thesis. 1-3 credits.
Research and writing on approved thesis topic under direction of thesis committee. Notes: Students must register for a minimum of three credits in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 3 credits of 799 may be applied to the MA in art history and a maximum of 6 credits to the MA in the history of decorative arts. Offered by History & Art History (p. 381). May be repeated within the degree for a maximum 24 credits.

**Recommended Prerequisite:** Completion of 24 credits (for art history) or 45 credits (for history of decorative arts) and approval of thesis proposal by the faculty and program director.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Thesis

### Art and Visual Technology (AVT)

#### 100 Level Courses

**AVT 101:** New Majors Colloquium. 1 credit.
Provides a common core experience of contemporary perspectives on the broad range of professional career options open to studio art majors. Lectures address practical concerns but emphasize social, ethical, and philosophical aspects of visual arts professions. Notes: Students who enrolled at Mason in Fall 2007 or later must take AVT 101 during or before their first semester as an AVT major. Required of all AVT majors. May be taken prior to declaring the major or during the first semester as a declared AVT major. Offered by School of Art (p. 784). May not be repeated for credit.

**Schedule Type:** Lecture

**AVT 103:** Introduction to the Artist's Studio. 3 credits.
Through projects, readings, class critiques, visuals, and field trips, students explore materials, techniques, concepts, and processes essential to understanding the language of visual arts and the artist's role. Develops imaginative thinking and sensitivity to visual environment. Note: for non-majors only. Offered by School of Art (p. 784). May not be repeated for credit.

**Mason Core:** Arts (p. 135)

**Registration Restrictions:**
Students cannot enroll who have a major in Art and Visual Technology.

**Schedule Type:** Lecture

**AVT 104:** Two-Dimensional Design and Color. 4 credits.
Explores elements and principles of two-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects build fundamental knowledge, skills, understanding of precedents, and contemporary practices in visual arts. Offered by School of Art (p. 784). May not be repeated for credit.

**Mason Core:** Arts (p. 135)

**Schedule Type:** Studio

**AVT 105:** Three-Dimensional Design and Beyond. 4 credits.
Explores elements and principles of three-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects explore form and composition, time-based media, materials, precedents, and contemporary practices in visual arts. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 104, or permission of instructor.

**Schedule Type:** Studio

**AVT 180:** New Media in the Creative Arts. 3 credits.
Introduces computer use for artistic creation and research. Overview of image making and time-based media within the broad context of contemporary art, new media art, and mediated culture. Offered by School of Art (p. 784). May not be repeated for credit.

**Mason Core:** Information Technology: Without Ethics (p. 135)

**Schedule Type:** Studio

#### 200 Level Courses

**AVT 204:** Visual Thinking. 3 credits.
Explores the ways contemporary artists use principles of design and perception to challenge how we see our world physiologically, psychologically, or socially. Examples drawn from film, photography, new media art, and other contemporary artistic media. Offered by School of Art (p. 784). May not be repeated for credit.

**Schedule Type:** Lecture

**AVT 206:** Color. 4 credits.
Color theory and principles of color interaction, including additive, subtractive, and partitive color experience; study of harmony, contrast, focus, space, opacity, transparency, temperature and value in both wet and dry media; and related applications of color technology. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 104, or permission of instructor.

**Schedule Type:** Studio

**AVT 215:** Typography. 4 credits.
Introduction to history and use of type. Reading and projects develop awareness of type as a linguistic and visual communication tool. Introduces typographic design elements, including color, hierarchy,
integration with imagery, structure, and content. Offered by School of Art (p. 784). May not be repeated for credit.

Mason Core: Arts (p. 135)

Recommended Prerequisite: Admission to the Graphic Design Undergraduate Certificate or permission of instructor.

Registration Restrictions:
Required Prerequisite: AVT 104C and 180C.
C Requires minimum grade of C.

Schedule Type: Studio

AVT 217: Introduction to Web Design. 4 credits.
An introduction to contemporary web design, in particular to standards, as a successful tool in design communication. Students gain hands-on experience on design issues specific to Web-based presentations, learn web page layout, effective navigation and delve into the design process. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the Graphic Design Undergraduate Certificate or permission of instructor.

Registration Restrictions:
Required Prerequisite: AVT 180C.
C Requires minimum grade of C.

Schedule Type: Studio

AVT 222: Drawing I. 4 credits.
Introduction and exploration of the fundamentals of drawing methods and materials, with emphasis on observational study and critical analysis of the effective and expressive use of line, mass, value, perspective, and formal composition. Emphasis on problems involved in representational and abstract visual interpretations of forms. Notes: AVT majors encouraged to take AVT 222 with AVT 104. Offered by School of Art (p. 784). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Studio

AVT 232: Painting I. 4 credits.
Introduction to the basic methods and principles of painting with a focus on observation, paint application, formal composition, color mixing, and the articulation of form. Students develop a visual awareness as they become familiar with the language of image making, construction, analysis, and awareness. Students prepare portfolios for collaborative and reflective critique. Offered by School of Art (p. 784). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Studio

AVT 243: Printmaking I. 4 credits.
Introduction to basics of hand printing. Emphasis on translation and transferal of images, tools, equipment, and technical skills for making a well-defined print. Students explore drawing, synthesis, and multiplicity in this interactive and collaborative course. Presentations and field trips focus on aesthetic and cultural concerns of making multiple images. Offered by School of Art (p. 784). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Studio

AVT 252: Darkroom Photography I. 4 credits.
Introduces photographic study and investigation of the fundamental practices and techniques of both film and digital forms with attention to its history and contemporary practices. Class discussions, field trips and critiques enhance visual and verbal vocabularies. Offered by School of Art (p. 784). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Studio

AVT 253: Digital Photography I. 4 credits.
Introduction to the digital camera as a tool for electronic photographic image making. Students will be introduced to principles and exploration of the aesthetics of digital photography and also learn basic image-editing skills in a computer environment. Offered by School of Art (p. 784). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Studio

AVT 254: Photography. 4 credits.
Introduces photographic study and investigation of the fundamental practices and techniques of both film and digital forms with attention to its history and contemporary practices. Class discussions, field trips and critiques enhance visual and verbal vocabularies. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Restricted to AVT majors and AVT minors.

Schedule Type: Studio

AVT 262: Sculpture I. 4 credits.
Projects in sculpture that emphasizes contemporary theory and issues, the development of individual concepts, and creative solutions. Explores the application of materials, tools, and imaginative processes. Faculty demonstrations, lectures, gallery and museum visits, and regular student work critiques. Offered by School of Art (p. 784). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Studio

AVT 272: Interdisciplinary Arts. 4 credits.
Introduces contemporary interdisciplinary art practice through readings and studio projects in performance and installation. Provides students with opportunities to deepen understanding of conceptual art, nontraditional media practices, and collaborative practice in visual arts. Offered by School of Art (p. 784). May not be repeated for credit.

Mason Core: Arts (p. 135)

Schedule Type: Studio

AVT 280: Introduction to New Media Arts. 4 credits.
Investigates ways in which contemporary artists employ tools in response to social, political and cultural conditions. Students create meaningful works of art that demonstrate conceptual and contextual awareness plus technical ability. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 104, or permission of instructor.
Schedule Type: Studio

300 Level Courses

AVT 300: Artsbus Attendance. 0 credits.
Students travel to New York or other destinations aboard the AVT Artsbus to attend faculty-selected exhibitions. Notes: AVT majors must satisfactorily complete course once for each semester they are enrolled as majors, up to five times. Repeatable up to three times per semester. Offered by School of Art (p. 784). May not be repeated for credit.

Schedule Type: Laboratory

AVT 301: Visual Voices Colloquium. 1 credit.
Students attend AVT Visual Voices lecture series during the semester and complete assignments related to the topics covered. Notes: AVT majors must accumulate at least 3 credits in this colloquium to graduate. Offered by School of Art (p. 784). May be repeated within the degree for a maximum 8 credits.

Schedule Type: Lecture

AVT 305: Creative Processes. 3 credits.
Study of the creative process in general, with emphasis on the inspiration, working methods, and final creations of various artists. Students explore their own creative processes through journal keeping, collaborative exercises, and projects. Offered by School of Art (p. 784). May not be repeated for credit.

Schedule Type: Lecture

AVT 307: Aesthetics. 3 credits.
Interdisciplinary course examines broad range of contemporary art and culture to engage an expansive conception of aesthetic experience. Students engage with historical and contemporary aesthetic theories, build heightened aesthetic sensibility, and explore their personal aesthetic. Offered by School of Art (p. 784). May not be repeated for credit.

Schedule Type: Lecture

AVT 309: Art as Social Action. 3 credits.
Interdisciplinary exploration of work by citizen-artists whose art-making engages the social world. Students learn about the history of socially engaged art-making and experiment with individual and collaborative projects addressing social issues. Offered by School of Art (p. 784). May not be repeated for credit.

Schedule Type: Lecture

AVT 311: Graphic Design Methods and Principles. 3 credits.
Emphasis on developing design solutions requiring demographic, historical, and/or cultural research. Course strengthens design and typography skills, introduces conceptual problem solving, audience considerations, and broad-based tools designers use to develop effective visual communication solutions. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 215\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Studio

AVT 313: Editorial Design. 3 credits.
Development and production of long-form design projects (magazines, newspapers, catalogs, and other serial and/or multipage publications). Emphasis on narrative, consistency, structure, clarity. Addresses information design issues and reinforces conceptual skills and integration of imagery and text. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: D or higher in AVT 311 or permission of instructor.

Registration Restrictions:
Required Prerequisite: AVT 311\textsuperscript{D}.
\textsuperscript{D} Requires minimum grade of D.

Schedule Type: Studio

AVT 318: History of Graphic Design. 3 credits.
A survey of design history. Looks at print and web design as both a reaction to and shaper of the broader culture (including other fine applied arts) through the study of major movements and designers. Offered by School of Art (p. 784). May not be repeated for credit.

Schedule Type: Lecture

AVT 323: Drawing II. 3 credits.
Students develop observational, sketching, and rendering skills. Introduction to a range of materials, methods, formal concepts, drawing in series, and critique vocabulary. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 222\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Studio

AVT 324: Figure Drawing. 3 credits.
Drawing with an emphasis on the observational study of the human body. Human anatomy and proportion are examined through a series of methodological approaches, including gesture, contour, mass, and modeling. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 222\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Studio

AVT 326: Nontraditional Approaches to Drawing. 3 credits.
Encourages students to challenge some traditional approaches to drawing by creating innovative works that combine familiar drawing techniques with a variety of materials, approaches, and unusual formats. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 222 or permission of instructor.

Schedule Type: Studio

AVT 327: Illustration. 3 credits.
This course is intended to provide an overview of illustration as a visual communication medium. Sharing the tools and techniques of gallery artists and the communicative goals of graphic designers, illustrators work across media to make concepts understandable and powerful in the service of editorial, informational or persuasive goals. Students will
begin to discover individually unique methods of problem solving by developing a personal visual vocabulary and relating it to historical and contemporary trends of art, design and illustration. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 222 or permission of instructor.

**Schedule Type:** Studio

**AVT 328: Mixed Media.** 3 credits.
Students investigate the contemporary innovations and disciplinary cross-pollination which have revolutionized and expanded the boundaries of traditional fine arts. Projects incorporate text, sound, computer generated imagery, collaboration and installation. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**
- **Required Prerequisite:** AVT 104°C.
  - C Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 333: Painting II.** 3 credits.
Focuses on the development of formal and technical skills, with an emphasis on paint application, color interaction, and support building and preparation. Introduces concepts, methodologies, and approaches relevant to contemporary painting. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**
- **Required Prerequisite:** AVT 232°C.
  - C Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 336: Experimental Painting.** 3 credits.
Using contemporary painting practices as starting place, students explore a variety of experimental and conceptual approaches to painting. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 232 or permission of instructor.

**Schedule Type:** Studio

**AVT 337: Figurative Painting.** 3 credits.
Working primarily with live models, students explore the human form as the main subject for a variety of visual and expressive inquiries. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 232, or permission of instructor.

**Schedule Type:** Studio

**AVT 343: Printmaking II.** 3 credits.
An introduction to relief, screenprint, and intaglio printing; including the study of historical antecedents and their relevancy to contemporary printmaking. Students learn reductive and additive techniques in preparing printing surfaces. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**
- **Required Prerequisite:** AVT 243°C.
  - C Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 345: Paper/Print/Book as Language.** 3 credits.
Introduces the artist's book as both physical structure and creative association of words and images. Students learn techniques of bookmaking, binding, and traditional and digital printmaking to produce an artist-made book with narrative and sequential elements. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 180, or permission of instructor.

**Schedule Type:** Studio

**AVT 353: Darkroom Photography II.** 3 credits.
Continuation of Fundamentals of Photography with further investigation into the aesthetics of photography through experimentation with new camera formats, films, papers, developers and development of a photographic portfolio. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**
- **Required Prerequisites:** AVT 252°C or 254°C.
  - C Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 354: Digital Photography II.** 3 credits.
A computer-intensive class in which students create digital images from the viewpoint of a photographic artist. Emphasis on digital photo techniques, including making digital negatives, concept development, and visual aesthetics. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 180, or permission of instructor.

**Registration Restrictions:**
- **Required Prerequisite:** AVT 253°C.
  - C Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 355: Color Photo Methods.** 3 credits.
Introduces basic concepts, theories, histories, contemporary materials, and processes of color photography with focus on creative photographic expression and technique. Combines lecture, studio, and darkroom time to expand students’ photographic repertoire through work with both film and digital materials. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 353 or 356 or permission of the instructor.

**Schedule Type:** Studio

**AVT 356: Photo Studio Techniques.** 3 credits.
Introduces Theory, concepts and applications of photographic studio lighting. Emphasis on the ability to control and manipulate light in
a photographic lighting studio environment using large format film cameras. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 353 or AVT 354, or permission of instructor.

**Schedule Type:** Studio

**AVT 359: Photography Seminar.** 3 credits. A combined studio and lecture course investigating photography’s history, critical theory, philosophy, and practice. Lectures, discussions, readings, and projects focus on a medium that has enormously influenced art and culture. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 353 or permission of the instructor.

**Schedule Type:** Lecture

**AVT 363: Sculpture II.** 3 credits. Expands on the principles and processes introduced in Sculpture I, developing a higher level of technical competence and critical sophistication. Notes: Lectures, independent student research, and gallery and museum visits required. Vigorous critiques. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** AVT 262

**Notes:** Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 370: Entrepreneurship in the Arts.** 3 credits. Combined lecture and studio course in developing entrepreneurial skills in arts. Special focus on developing communication skills and planning strategies, as well as on nurturing skills that enable students to creatively solve problems and think about opportunities. Offered by School of Art (p. 784). May not be repeated for credit.

**Schedule Type:** Lecture

**AVT 371: Visual Perception and the Arts.** 3 credits. Review of major approaches to the study of visual perception. Topics include analysis of picture perception, visual thinking, the relationship between symbolic and non-symbolic thinking and representation, and how pathologies of vision affect art production. Offered by School of Art (p. 784). May not be repeated for credit.

**Schedule Type:** Lecture

**AVT 372: Hip Hop Culture.** 3 credits. Examines hip hop as an art form within a continuum of cultural expression. Explores multilayered social, political, and aesthetic aspects of hip hop, historical causes and precedents, and contemporary derivatives and implications. Offered by School of Art (p. 784). May not be repeated for credit.

**Schedule Type:** Lecture

**AVT 373: Performance Studio.** 3 credits. Studio course focused on theory and practice of collaborative performance art. Detailed analysis of creation and production processes from interdisciplinary perspective in conjunction with practical training in multimedia technologies, body sculpture, and theater of images. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 272, or permission of instructor.

**Schedule Type:** Studio

**AVT 374: Sound Art I.** 3 credits. Introduction to the physics, phenomenology, and production of sound as an expressive medium. Using analog and digital tools, students will explore constructing with sound. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 180, or 280, or permission of instructor.

**Schedule Type:** Studio

**AVT 376: Cybersound.** 3 credits. Explores and develops strategies for using computer software for sound design, synthesis, editing, and live performance. Required of students in Cyberpunk and Cyberculture. Offered by School of Art (p. 784). May not be repeated for credit.

**Schedule Type:** Lecture

**AVT 377: Thinking Through Animation.** 3 credits. Introduces conceptual, contextual, technical, and aesthetic practices of two-dimensional experimental animation. Students learn to animate hand-drawn and computer-generated images. Students work to create an imaginative and meaningful short animation with sound. Offered by School of Art (p. 784). May not be repeated for credit.

**Schedule Type:** Lecture

**AVT 380: Live Movies.** 3 credits. Advanced performance studio emphasizing cinematic forms and multimedia technologies. Also covers sound design, scenic design and materials, production planning, and interdisciplinary approaches to narrative and content in performance. Notes: Students collaborate on production projects. Offered by School of Art (p. 784). May not be repeated for credit.

**Schedule Type:** Studio

**AVT 382: 2D Experimental Animation.** 3 credits. Introduces conceptual, contextual, technical, and aesthetic practices of two-dimensional experimental animation. Students learn to animate hand-drawn and computer-generated images. Students work to create an imaginative and meaningful short animation with sound. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 280, or permission of instructor.

**Schedule Type:** Studio
AVT 383: 3D Experimental Animation. 3 credits.
Students create socially relevant 3D scenes with scaled objects, surface textures, lights, and shadows. These scenes serve as environments for short, thought-provoking animations. Emphasis on idea development, critical examination of animation practices, and visual aesthetics. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 280 or permission of instructor.

Schedule Type: Studio

AVT 385: EcoArt. 3 credits.
Develop collaborative projects that explore art and visual culture, the environment, and sustainability. Students are given access to the School of Art Permaculture Studio as a "green" work space for developing course projects. Offered by School of Art (p. 784). May be repeated within the degree for a maximum 8 credits.

Mason Core: Arts, Encore:Sustainability, Synthesis, Encore:Well-Being (p. 135)

Specialized Designation: Green Leaf Course

Schedule Type: Studio

AVT 390: Video Art. 3 credits.
Integrates study of contemporary art theory, montage theory, and artistic practices with application to new media and technology. Special focus on visual culture and video art, sound design, and the sociopolitical implications of media. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 280 or permission of instructor.

Schedule Type: Studio

AVT 392: Gallery Practices. 3 credits.
Introduction to practices of the contemporary art gallery including curatorship, exhibition planning and installation, care and proper handling of artwork, technology in the gallery, collaborating with outside curators, documentation, budget, publicity, and educational and docent activities. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: 3 credits of AVT or ARTH, or junior standing, or Permission of Instructor.

Schedule Type: Studio

AVT 393: Field Experience in the Arts. 1-6 credits.
Introductory working and learning experience with an organization or individual in the arts or as a teaching assistant. Students must complete 45 hours of work at the internship site for each credit. Note: Departmental permission required to register. Notes: Placement documentation to include 45 hours of work per credit. Offered by School of Art (p. 784). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Junior standing and permission of instructor and academic advisor.

Schedule Type: Internship

AVT 394: Honors Seminar. 1 credit.
Offers highly motivated students opportunities to interact with art world professionals through field trips, research, critiques, and creative assignments. Notes: Students accrue credits toward graduation with AVT honors. Offered by School of Art (p. 784). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: Open only to qualified AVT honors students by invitation.

Schedule Type: Seminar

AVT 395: Writing for Artists. 3 credits.
Practical writing seminar in which students practice typical writing needs of creative professionals; including artist's statements, grant proposals, and reviews; while also exploring ways in which artists have used writing, books, and language in art making. Offered by School of Art (p. 784). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: ENGH 302\(^C\) or ENGL 302\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

400 Level Courses

AVT 407: Advanced Aesthetics. 3 credits.
Advanced examination of aesthetic concepts and theories, focusing on issues pertinent to artmaking. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 307\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Seminar

AVT 410: Experiential Design History. 3 credits.
This hybrid lecture/studio course provides a historical perspective of the evolution of graphic design and examines graphic design's contribution to culture through writing and design projects. The course will have both lecture and studio content, providing 'hands-on' experiential opportunities in traditional graphic techniques. Offered by School of Art (p. 784). May not be repeated for credit. Equivalent to AVT 418.

Schedule Type: Lecture

AVT 411: Motion Design. 3 credits.
Motion Design introduces the theories, techniques and practices of motion design and the integration of design, image, sound, video and animation. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: AVT 217\(^C\) and 311\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Seminar

AVT 412: Advanced Typography. 3 credits.
An advanced exploration of type, design and the graphic organization of visual information. Emphasis is on the aesthetic and technical execution of type, design and the graphic organization of visual information. Emphasis is on the aesthetic and technical execution
of typographic hierarchy in visual communications. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**  
Required Prerequisite: AVT 313\(^\text{C}\).  
\(^\text{C}\) Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 413: Professional Design Practices.** 3 credits.  
Addresses the nature of the professional graphic designer in terms of career development and self-marketing, visual presentations of design work, preparation of written materials and interview techniques. Special emphasis will be given to the development of a design business, as well as freelance and pro-bono design work. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**  
Required Prerequisites: AVT 313\(^\text{C}\) and 414\(^\text{C}\).  
\(^\text{C}\) Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 414: Corporate Design and Branding.** 3 credits.  
Fundamentals of branding and identity design. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphics standards guide. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**  
Required Prerequisites: (AVT 252\(^\text{C}\) or 253\(^\text{C}\)) and (AVT 311\(^\text{C}\) and 395\(^\text{C}\)).  
\(^\text{C}\) Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 415: Web Design and Usability.** 3 credits.  
Introduces students to web design, usability, and the use of popular applications for static, interactive, and motion-based web development. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**  
Required Prerequisites: (AVT 217\(^\text{C}\) and 311\(^\text{C}\)\(^\text{D}\)) and (AVT 313\(^\text{C}\) or 414\(^\text{C}\)).  
\(^\text{C}\) Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 416: Advertising Design.** 3 credits.  
Provides insight and practice in the creative design process behind effective and memorable advertising. Emphasis on the design and presentation of a series of portfolio-ready advertising campaigns for actual client use. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**  
Required Prerequisite: AVT 414\(^\text{C}\).  
\(^\text{C}\) Requires minimum grade of C.

Enrollment limited to students in the BFA Art and Visual Technology program.

**Schedule Type:** Studio

**AVT 417: Package Design.** 3 credits.  
Provides a focused studio experience to conceptualize and design multiple applications for contemporary package design. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**  
Required Prerequisite: AVT 414\(^\text{C}\).  
\(^\text{C}\) Requires minimum grade of C.

Enrollment is limited to students with a concentration in Graphic Design.

**Schedule Type:** Studio

**AVT 419: Topics in Graphic Design.** 1-6 credits.  
Rotating subjects give students a deep look into and appreciation of a specific topic in design practice. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by School of Art (p. 784). May be repeated within the term.

**Registration Restrictions:**  
Required Prerequisites: AVT 311\(^\text{C}\) and (AVT 313\(^\text{C}\) or 414\(^\text{C}\)).  
\(^\text{C}\) Requires minimum grade of C.

**Schedule Type:** Lecture

**AVT 420: Advanced Web Design.** 3 credits.  
Building on the principles and skills gained in AVT 415, this course delves deeper into web-related concepts and techniques. Students will gain advanced knowledge in evolving web technology, preparing them for professional entry into the web design field. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**  
Required Prerequisite: AVT 415\(^\text{C}\).  
\(^\text{C}\) Requires minimum grade of C.

Enrollment limited to students in the BFA Art and Visual Technology program.

**Schedule Type:** Studio

**AVT 422: Drawing III.** 3 credits.  
Builds on intermediate drawing skills, emphasizing individual exploration and expressive techniques. Along with rigorous observational study, students work from a variety of sources to develop a broad understanding of visual solutions within contemporary art practice. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**  
Required Prerequisite: AVT 323\(^\text{C}\).  
\(^\text{C}\) Requires minimum grade of C.

**Schedule Type:** Studio

**AVT 423: Drawing IV.** 3 credits.  
Students learn and practice advanced drawing skills and techniques in a variety of media and formats. Emphasis on development of content, personal sources, techniques, presentation strategies, and methods of analysis through critique. Offered by School of Art (p. 784). May not be repeated for credit.
AVT 442: Painting III. 3 credits.
Intermediate course with an emphasis on developing personal content, concepts, painting strategies, and a practical understanding of contemporary ideas in painting. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 432C.
C Requires minimum grade of C.

Schedule Type: Studio

AVT 443: Advanced Painting I. 3 credits.
Students produce a body of print media work reflecting their interests, including the broader context of social, cultural, and contemporary issues. Students engage in collaborative studio practices and independent projects to integrate multiple visual technologies. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 432C.
C Requires minimum grade of C.

Schedule Type: Studio

AVT 444: Professional Practices. 3 credits.
This course prepares studio art majors for their professional careers. Each student will select a facet of interest to develop assets for a professional portfolio. Emphasis will be placed on developing your professional brand and accompanying materials such as portfolio, websites, CVs etc. with critiques focusing on the individual's process. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Completion of 60 credits, including 12 credits of upper-level studio coursework.

Schedule Type: Lecture

AVT 445: Alternative Photo Processes. 3 credits.
Introduction to 19th century and nontraditional photographic processes including cyanotype, van dyke, gum bichromate, liquid emulsion, and image transfer. Exploration and discussion of photography's influences, application, and use in other mediums. Offered by School of Art (p. 784). May not be repeated for credit.

Schedule Type: Studio
AVT 455: Digital Printing Techniques. 3 credits. Continuation of 354 Digital Photo Methods with further examination into digital techniques, personal expression and digital printing. Course emphasis is on the fine art and craft of the digital print and portfolio development. Notes: Continuation of AVT 354 Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 354, or permission of instructor.

Schedule Type: Studio

AVT 457: Documentary Photography. 3 credits. Introduces documentary photography: techniques, history, choices, and ideas necessary to create meaningful photo essays that incorporate a personal, committed, in-depth approach to seeing and depicting lives and situations. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 353 or permission of instructor.

Schedule Type: Studio

AVT 458: Advanced Studio Lighting. 3 credits. The advanced study of photographic studio lighting concepts using electronic strobes and power packs with emphasis placed on constructing studio materials, metering techniques, staging complex sets, and on-location photography. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 356C.
C Requires minimum grade of C.

Schedule Type: Studio

AVT 462: Sculpture III. 3 credits. Advanced studio course for continued individual, conceptual, and critical development in sculpture. Biweekly seminar, independent research, museum and gallery visits, vigorous individual and group critiques, required documentation, and portfolio preparation supporting studio projects. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 363C.
C Requires minimum grade of C.

Schedule Type: Studio

AVT 463: Sculpture IV. 3 credits. Intensive studio course for advanced sculpture students to further individual, conceptual, and critical development. Students produce a body of work based on technical exploration, critical discussion, reading, and writing. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 462C.
C Requires minimum grade of C.

Schedule Type: Studio

AVT 464: Sculpture V. 3 credits. Advanced studio course for rigorous and independent production of sculpture. Weekly topical seminar, vigorous critiques, museum and gallery visits, professional documentation, and research resulting in a body of work to be exhibited. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 463C.
C Requires minimum grade of C.

Schedule Type: Studio

AVT 465: Sculpture VI. 3 credits. Students work rigorously and independently, gaining insights into personal process and direction through one-on-one critical dialogue with faculty and formal group critiques. Emphasizes individual decision making and personal initiative. Notes: Continuation of advanced work in AVT 465. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 464C.
C Requires minimum grade of C.

Schedule Type: Studio

AVT 472: Critical Theory in the Visual Arts. 3 credits. Examination of currents in theory and criticism that inform contemporary practice and critical analysis in the visual arts. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: ARTH 374C.
C Requires minimum grade of C.

Schedule Type: Lecture

Recommended Prerequisite: AVT 373 or Permission of Instructor.

Schedule Type: Studio

AVT 474: Sound Art II. 3 credits. Extends a working knowledge of the materiality of sound into an in-depth exploration of creation in the sonic realm. May include synthesis, circuit-bending, use of field recordings and other samples, and live performance. Offered by School of Art (p. 784). May not be repeated for credit.

Schedule Type: Studio

AVT 482: Advanced Image Making. 3 credits. In-depth look at the processes and mechanisms used to generate, reconstruct, and/or create new media images. Students are required to create a series of contextually related images and to further develop their critical analysis abilities. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 280, or permission of instructor.

Schedule Type: Studio

AVT 483: RS: Art and Interactivity. 3 credits. Provides a context for art making as an interactive and participatory experience while critically examining the ways in which technologies
may aid and also inhibit engagement with the social and political world. Offered by School of Art (p. 784). May not be repeated for credit.

Specialized Designation: Research/Scholarship Intensive

Schedule Type: Studio

AVT 487: Advanced Topics: New Media Art. 3 credits.
Provides a context for exploring current developments in new media art practice in and outside the studio. Specific course content adapts and responds to ongoing movements in new media art and contemporary culture. Offered by School of Art (p. 784). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: AVT 280 plus one 3XX-level New Art Course, or permission of instructor.

Schedule Type: Studio

AVT 489: Internship in Art and Visual Technology. 1-6 credits.
Unpaid professional-level work experience in a professional organization or with an individual artist, related to the student's concentration and career plans. Students must complete 45 hours of work at the internship site for each credit. Note: departmental permission required to register. Notes: Placement documentation to include 45 hours of work per credit. Offered by School of Art (p. 784). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Senior standing, completion of 12 concentration credits, and permission of instructor.

Schedule Type: Internship

AVT 491: Independent Study in Art and Visual Technology. 1-6 credits.
Opportunity for development of advanced skills and concepts in a field of interest. Study proposal must be approved by instructor prior to registration. Students must complete 45 hours of work at the internship site for each credit. Notes: Project documentation to include 45 hours of work per credit. Offered by School of Art (p. 784). May be repeated within the term for a maximum 24 credits.

Recommended Prerequisite: Senior standing, completion of 12 concentration credits, and permission of instructor.

Schedule Type: Independent Study

AVT 493: Teaching Visual Thinking Through Media, PK-12. 3 credits.
Investigates range and appropriateness of media and materials that encourage creative expression in the art classroom for PK-12 students, and expands the artist-teacher's visual repertoire. Incorporates art history, criticism, and aesthetics, as well as language arts and other content areas that challenge students' artistic growth and human development. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 495C.
C Requires minimum grade of C.

Schedule Type: Lecture

AVT 494: Strategies in Art Room: PK-12. 3 credits.
The study of various media, skills and concepts adapted for PK-12 curriculum. Includes instructor demonstrations, prototypes, practicum, and class presentations. Participants will learn appropriate instructional strategies for implementation. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 495C.
C Requires minimum grade of C.

Schedule Type: Lecture

AVT 495: Introduction to Art Teaching and Learning. 3 credits.
Explores art-teaching profession through readings, discussion, hands-on activities, and visits to diverse area public schools. Students discover a variety of ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students. Notes: Prior to enrollment, students must complete art education inquiry form. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Junior standing, and completion of at least 20 credits of AVT coursework with a C or higher; or permission of art education advisor.

Registration Restrictions:
Required Prerequisites: (ENGH 302C and AVT 307C).
C Requires minimum grade of C.

Schedule Type: Seminar

AVT 496: Special Topics. 1-4 credits.
Explores topical studies in AVT including theoretical and critical aspects of art or studio production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by School of Art (p. 784). May be repeated within the degree.

Schedule Type: Studio

AVT 497: Senior Project. 3 credits.
Capstone course in which students develop and present a cohesive body of work along with written materials and documentation. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals. Offered by School of Art (p. 784). May not be repeated for credit.

Mason Core: Capstone, Synthesis (p. 135)

Recommended Prerequisite: Senior Art and Visual Technology major, completion of 12 concentration credits, and completion or concurrent enrollment in all required Mason Core courses.

Schedule Type: Studio

AVT 498: Senior Design Project. 3 credits.
Capstone course in which students develop and present a design project exploring the possibilities of personal or professional expression. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals. Offered by School of Art (p. 784). May not be repeated for credit.

Mason Core: Capstone, Synthesis (p. 135)

Recommended Prerequisite: Senior Art and Visual Technology major.

Registration Restrictions:
Required Prerequisites: AVT 311C, 313C and 414C.
C Requires minimum grade of C.

Schedule Type: Studio
500 Level Courses

AVT 507: Advanced Aesthetics. 3 credits.
Graduate seminar in aesthetic concepts and theories, focusing on issues pertinent to artmaking. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MFA program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

AVT 519: Special Topics in Graphic Design. 1-6 credits.
Exploration of topical studies in graphic design, including theoretical and critical aspects of studio production. Offered by School of Art (p. 784). May be repeated within the term for a maximum 13 credits.

**Recommended Prerequisite:** Admission to AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

AVT 522: Drawing V. 4 credits.
Drawing on an advanced level, emphasizing individual decision-making and personal initiative. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

AVT 523: Drawing VI. 4 credits.
Drawing on an advanced level, emphasizing individual decision-making and personal initiative. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, AVT 522, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

AVT 595: Introduction to Art Teaching and Learning. 3 credits.
Explores art-teaching profession through readings, discussion, hands-on activities, visits to diverse area public schools and action research. Students analyze ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MAT Program or permission of the art education advisor or director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

AVT 596: Independent Study. 1-6 credits.
Independent reading and research on specific project under department faculty member's direction. Notes: Written reports required. Offered by School of Art (p. 784). May be repeated within the term.

**Recommended Prerequisite:** Admission to AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Independent Study

AVT 599: Special Topics in Art and Visual Technology. 1-6 credits.
Exploration of topical studies in AVT, including theoretical and critical aspects of art or studio production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by School of Art (p. 784). May be repeated within the term.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

### 600 Level Courses

**AVT 600: Research Methodologies.** 3 credits.
Graduate seminar focusing on development of independent research project in student's area of emphasis. Explores principal methods of researching and documenting art and arts practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research systems. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a major in Art Education, Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**AVT 605: Issues and Research in Art Education.** 3 credits.
Readings and projects explore historical and contemporary ideas, issues, philosophies, pedagogy, and research in art education. Investigates teachers' use of research-oriented questions and data to explore classroom issues and improve teaching and learning. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MAT graduate program and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a major in Art Education, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**AVT 606: Creativity and Cognition in the Arts and Media.** 3 credits.
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings. Offered by School of Art (p. 784). May not be repeated for credit. Equivalent to EDEP 601.

**Registration Restrictions:**
Enrollment limited to students with a major in Art Education, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**AVT 610: Graduate Seminar.** 2 credits.
Students present their work or the work of contemporary artists for discussion and peer and faculty critiques. Special focus on developing public communication and presentation skills on contemporary issues in the arts. Notes: Seminar course required of all AVT graduate students four times during course of study. Offered by School of Art (p. 784). May be repeated within the degree for a maximum 8 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Art Education, Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**AVT 611: Graduate Design Seminar.** 1 credit.
A laboratory for the exploration of contemporary design theory and practice through writing and design making, this class will have rotating topical content. Offered by School of Art (p. 784). May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**AVT 612: Independent Project Research.** 1 credit.
Provides the development and research phase in preparation for AVT 794: Independent Design Project, the capstone course in the Graphic Design masters program. Students will prepare their written final project proposal for presentation to the AVT GD Graduate Faculty Committee. Notes: To be completed prior to enrolling in AVT 794: Independent Design Project. Offered by School of Art (p. 784). May be repeated within the degree.

**Recommended Prerequisite:** completion of 30 graduate credits

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment limited to students in the MA Graphic Design program.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study
AVT 613: Experiential Design History. 3 credits.
This hybrid lecture/studio course provides a historical perspective of the
evolution of graphic design and examines graphic design’s contribution
to culture through writing and design projects. The course will have both
lecture and studio content, providing hands-on experiential opportunities
in traditional graphic techniques. Offered by School of Art (p. 784). May
not be repeated for credit.
Recommended Prerequisite: Admission to the AVT graduate program or
permission of the instructor.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.
Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

AVT 614: Brand Identity Design. 4 credits.
This is an advanced design course with an emphasis on brand identity
development. Topics include logo development, product packaging,
marketing and advertising collaterals, web branding, and broadcast
advertising development. Special attention is given to the creation of a
graphic standards guide. Offered by School of Art (p. 784). May not be
repeated for credit.
Recommended Prerequisite: Admission to the AVT graduate program or
permission of instructor.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.
Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

AVT 615: Technology for Art Teachers. 3 credits.
Addresses use of technology in PK-12 art classroom. Focuses on
research, presentation and instruction, and image creation. Students
develop technology-enhanced teaching units for different grade
debut and explore related issues, including copyright, plagiarism, and
appropriation. Offered by School of Art (p. 784). May not be repeated for
credit.
Recommended Prerequisite: Admission to the Art Education
concentration ASTL and/or permission of art education director.
Registration Restrictions:
Enrollment limited to students with a class of Graduate, Non Degree or
Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.
Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Studio

AVT 616: Advanced Art and Interactivity. 4 credits.
Studio, lecture course investigating art as networked activity. Particular
attention focused on Internet as context for creation, distribution, and
patronage of art. Offered by School of Art (p. 784). May not be repeated
for credit.
Recommended Prerequisite: Admission to AVT graduate program.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.
Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Studio

AVT 617: Advanced Typography. 4 credits.
Students will produce a body of work exploring the opportunities and
limitations of typographical design. Offered by School of Art (p. 784). May
not be repeated for credit.
Recommended Prerequisite: Admission to graphic design MA (or MFA)
program, AVT graduate program or permission of the instructor.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.
Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Studio

AVT 618: Visual Communication Theories. 2 credits.
Advanced graduate seminar focusing on key theories and themes that
have informed 20th and 21st century design practice. Explores theory
and criticism in a variety of contexts, from popular to scholarly, and
considers the role of designers as thinkers and writers. Offered by School
of Art (p. 784). May not be repeated for credit.
Recommended Prerequisite: Admission to MFA program, or permission
of instructor.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.
Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

AVT 619: Advanced Web Design. 4 credits.
Develops skills for the application of information, interaction, usability,
and visual design for web site developments. Students gain in-depth
knowledge of user behaviors and broader context of social, cultural, and
contemporary issues in web communication. Students learn professional
design processes and integrate multiple web developing technologies.
Offered by School of Art (p. 784). May not be repeated for credit.
Recommended Prerequisite: Admission to Graphic Design MA program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 620: *Theory, Criticism, and the Arts.* 3 credits.
Cross-disciplinary graduate seminar focusing on key theories and themes that have informed 20th- and 21st-century arts practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of artists as thinkers and writers. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Art Education, Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

AVT 621: *Art Writing Seminar.* 3 credits.
Includes criticism, the artist statement, manifestos, and language as visual art. Offered by School of Art (p. 784). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students in the MFA Art Visual Technology or MFA Visual and Performing Arts programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

AVT 622: *Advanced Drawing.* 4 credits.
Advanced directed research in drawing with continued development of individual aesthetic. Study of historical and philosophical precedents integral. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 632: *Graduate Painting I.* 4 credits.
Entering students are expected to be competent painters, with technical proficiency, a disciplined process, and a directed personal vision. Students work rigorously and independently toward the understanding and mastery of techniques, methods, and concepts relevant to formal expression of personal content. Students expected to participate in critical discourse with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 633: *Graduate Painting II.* 4 credits.
Building on research and practices established in Graduate Painting I, students continue to develop strategies for the expression of personal vision and style. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 632, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 634: *Advanced Graduate Painting I.* 4 credits.
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 633, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**AVT 635:** Advanced Graduate Painting II. 4 credits.

Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 634, or permission of instructor.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**AVT 641:** Graduate Graphic Design I. 4 credits.

Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**AVT 642:** Graduate Printmaking I. 4 credits.

Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, AVT 643, or permission of instructor.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**AVT 643:** Graduate Printmaking II. 4 credits.

Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 642, or permission of instructor.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**AVT 644:** Advanced Graduate Printmaking I. 4 credits.

Intensive course of creative exploration in print media that furthers students’ independence through production of individualized body of work reflecting interests within the broader contexts of contemporary social, technological, and cultural issues. Students also engage in collaborative studio practices to integrate visual technologies in their work. These may include digital imaging, drawing, graphic design, painting, performance, photography, and sculpture. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, AVT 643, or permission of instructor.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**AVT 645:** Advanced Graduate Printmaking II. 4 credits.

Intensive studio course that furthers student independence through production of a body of work reflecting a broad context of social, cultural and contemporary issues. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program, and AVT 644.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Independent Study

AVT 646: Graduate Graphic Design II. 4 credits.
Continuing to work independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art and design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end. (This is the second course in a two-course sequence.) Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students in a Non-Degree Undergraduate level.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

AVT 647: Advanced Graduate Graphic Design I. 4 credits.
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to MFA program, and AVT 646

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students in a Non-Degree Undergraduate level.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

AVT 648: Advanced Graphic Design II. 4 credits.
Continuing to work independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art and design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end. (This is the second course in a two course sequence.) Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to MFA program, and AVT 647.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

AVT 652: Graduate Photography I. 4 credits.
Critical theory and directed practice in photography focusing on development of a personal voice and working method through intellectual activity and creative work. Emphasizes ability to explore concepts, develop skills, and evolve as a communicator of ideas and photographic artist. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 653: Graduate Photography II. 4 credits.
An intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others’ work, the cultural climate, and issues involved in one’s own work as it progresses. Notes: Continuation of Graduate Photography I. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 654: Advanced Graduate Photography I. 4 credits.
Intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others’ work, the cultural climate, and issues involved in one’s own work as it progresses. Notes: Advanced graduate photography course. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, AVT 653, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 655: Advanced Graduate Photography II. 4 credits.
AVT 655, Advanced Graduate Photography II, Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 652, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 662: Graduate Sculpture I. 4 credits.
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 663: Graduate Sculpture II. 4 credits.
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 662, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 664: Advanced Graduate Sculpture I. 4 credits.
Emphasizes individual creative production and development, with periodic exposure of student’s work and ideas to the critical attention of the AVT teaching faculty and other graduate students. Notes: Writing and reading components. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, AVT 663, or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 665: Advanced Graduate Sculpture II. 4 credits.
Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: AVT 664 or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 667: Two-Dimensional Art Making: Form, Theme, and Context. 3 credits.
Through studio work and research on basic and innovative drawing strategies, students explore expressive visual qualities, composition, and color. Students develop professional portfolios that incorporate meaningful themes and contexts for developing visual literacy in PK-12. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the MAT in Art Education program and permission of instructor based on a portfolio review.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 668: Three-Dimensional Art Making Across Cultures. 3 credits.
Explores the diversity of art forms in world cultures and work of traditional and contemporary artists. Students learn basic three-dimensional art-making techniques, including ceramics and fibers, and
learn to design three-dimensional art instruction for PK-12 levels. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MAT program or Art Education Concentration ASTL and/or permission of the art education director

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**AVT 669:** *Four Dimensional Art Making: Technology and New Media.* 4 credits.
Develops teacher skills for the application of advanced technology for the PK-12 art program and examines the changing nature and uses of technology for expanding visual literacy through pedagogical strategies. Offered by School of Art (p. 784). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**AVT 670:** *Teaching Practicum.* 1 credit.
Supervised classroom teaching practicum in Mason's undergraduate program or community college program. Offered by School of Art (p. 784). May be repeated within the degree for a maximum 4 credits.

**Recommended Prerequisite:** Admission to the AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**AVT 672:** *Performance Studio I.* 4 credits.
Introductory studio course looking at performance as a visual art practice and focusing on time, space and the body. Emphasizes artist as performer. Students study the work of performance practitioners, make short performance pieces, document and exhibit their work, and go to galleries and performances locally and in New York. Notes: Substantial research project required. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**AVT 673:** *Advanced Performance Studio.* 4 credits.
Advanced laboratory for creating and producing performance art. Emphasizes new technologies and their applications, multimedia scriptwriting and storyboarding, and the creation of audiovisual performance. Students work independently and also contribute to collaborative production. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 672 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**AVT 674:** *Graduate Sound Art.* 4 credits.
Assuming basic competency in digital audio production and within the theory of sounded experience, students will be assisted in the incorporation of sonic material into their graduate research projects. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**AVT 676:** *Interface and CD-ROM Design.* 5 credits.
Combined lecture and studio course in multimedia interface and CD-ROM design. Focuses on exporting traditional visual and aural artistic aesthetic to the computer environment within a multimedia context. Assigned class readings augmented and supported by presentations of various digital interfaces and CD-ROM examples. Discusses commercial, entertainment, and educational titles, as well as CD-ROM experimental art works. Studio time divided between AVT labs and area multimedia facilities. Students conceive, design, and develop two CD-ROM or kiosk interfaces due at midterm, and complete a dual platform CD-ROM project due at semester end. Offered by School of Art (p. 784). May not be repeated for credit.
Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 682: Experimental 2D Animation. 4 credits.
Designed to broaden range of visually expressive, time-based media from cell animation and stop motion animation to rotoscoping and two-dimensional digital animation. Emphasizes idea generation, concept development, and visual aesthetics. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 684: Advanced Image Making. 4 credits.
Overview of two-dimensional computer-imaging applications in the arts, including painting, printmaking, mixed media, illustration, video, and animation. Lectures combine technical and aesthetic material, including image processing for artists and color reproduction. Emphasis on developing advanced studio portfolio. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to AVT Graduate Program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 685: Video Art. 4 credits.
Explores video as medium that is transforming art and is transformed by art. Emphasizes developing an approach to personal narrative, creative skills, and construction of meaning, as well as on acquiring technical skills. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 686: Experimental 3D Animation. 4 credits.
Teaches how to create realistic, three-dimensional scenes with scaled objects, surface textures, lights, and shadows. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities. Students required to render a portfolio of high-resolution images. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to AVT Graduate Program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 687: Advanced Topics: New Media. 4 credits.
Advanced course in digital media, including layer compositing, digital video editing, rotoscoping, and cell animation. Emphasizes integrating traditional techniques with software applications; and publishing projects to CD-ROM, DV tape, DVD, and Internet. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to AVT program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

AVT 688: Hybrid Animation. 4 credits.
Study of digital two-dimensional and three-dimensional animation practices. Introduces lighting, camera movement, object motion, timing, and texture mapping as students plan and produce a short animation. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**AVT 691: Elementary Art Education.** 3 credits. Concepts and methods in early childhood and elementary art education. Notes: Students spend three hours per week in class and one hour per week in required field experience in public schools and other educational settings. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MAT program and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**AVT 692: Secondary Art Education.** 3 credits. Concepts and methods in secondary art education. Notes: Students spend three hours per week in class, and one hour per week in required field experience in the public schools and other educational settings. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** AVT 691, or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**AVT 694: Advanced Studies in Teaching Critical Response to Art, PK-12.** 3 credits. Synthesizing knowledge and understandings gained in ASTL program, seminar focuses on innovative curriculum design, mastery of effective instructional strategies, and developing leadership potential for the field of visual art education. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Completion of all ASTL Art Education Concentration courses.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**AVT 695: Internship in Art Education (Student Teaching).** 5 credits. Full-time internship in which students teach in elementary and secondary schools with guidance from cooperating mentor teachers. College supervisors make periodic site visits to observe, assess, and evaluate progress. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Completion of all other MAT program requirements.

**Recommended Corequisite:** AVT 696.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**AVT 696: Internship in Art Education Seminar.** 1 credit. Weekly professional seminar focused on needs and concerns of student teachers. Covers issues as they emerge in practice, and concludes with an "Art of Teaching Art" exhibit of work by students of preservice teachers. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Corequisite:** AVT 695.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**AVT 697: Advanced Strategies and Curricular Innovations in the Visual Arts.** 3 credits. Develops visual literacy and critical thinking skills by examining diverse theoretical models and applying strategies to expand knowledge about art and artifacts in the PK-12 classroom and museum. Offered by School of Art (p. 784). May not be repeated for credit.

**Recommended Prerequisite:** Completion of all ASTL Art Education Concentration courses.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar
AVT 698: Independent Study/Directed Readings. 1-3 credits.
Offered by School of Art (p. 784). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to the MAT or Art Education Concentration (ASTL) and permission of art education director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

700 Level Courses

AVT 794: Graphic Design Project. 4 credits.
The capstone course in the graphic design Master of Arts degree. Provides for the independent development, design, production and presentation of a graduate-level design project guided by faculty and design professionals. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT Graphic Design graduate program and completion of 30 graduate credits.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Independent Study

AVT 796: Directed Reading. 1 credit.
The development of independent research into the historical precedents, theoretical underpinnings, cultural forms, and idea territories pertinent to student’s individual studio practice. Individualized section under the direction of division member. Notes: One of three courses comprising the MFA comprehensive experience for AVT students. Offered by School of Art (p. 784). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

AVT 798: Directed Project and Exhibition. 1-6 credits.
The construction and presentation of a professional-quality public exhibition. Course includes significant independent studio production of a comprehensive body of work, leading to the MFA Thesis Exhibition. Exhibition must demonstrate student’s mastery of studio craft and concept. Individualized section under the direction of division member. Notes: One of three courses comprising the MFA comprehensive experience for AVT students. Offered by School of Art (p. 784). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

AVT 799: Thesis. 1-3 credits.
The written thesis informs, documents, and enhances the MFA thesis exhibition, which is the student’s primary creative research activity. The content of the written thesis may vary in accordance with artistic discipline and final exhibition. Individualized section under the direction of division member. Notes: One of three courses comprising the MFA comprehensive experience for AVT students. Offered by School of Art (p. 784). May be repeated within the degree.

Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Arts Management (AMGT)

400 Level Courses

AMGT 402: Professional Development. 1 credit.
Seminar course that involves the development of workplace frameworks for success. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: Junior standing, admission to the arts administration minor, or permission of instructor.

Schedule Type: Lecture

AMGT 405: Seminar in Arts Management. 3 credits.
Focuses on not-for-profit visual and performing arts organizations. Topics covered include the evolution of the field, the internal culture and structure, external influences, governance, planning, human resources, marketing, fundraising, financial management, economic impact, and other topics. Students will be introduced to a wide range of arts organizations, working arts administrators, and institutional models through field trips, guest lectures, readings, and institutional data. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: Junior standing, admission to arts administration minor, or permission of instructor.

Schedule Type: Lecture

AMGT 410: Arts Advocacy and Community. 3 credits.
This course is an overview of advocacy and community engagement as practiced by the arts manager, artist, and educator. Students will learn to identify the need for community engagement and to develop successful techniques to implement outreach. Other topics will include accessibility, diversity, volunteerism, and governance. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: Junior standing or permission of program director.

Schedule Type: Lecture
**AMGT 471: Introduction to Grant Writing.** 1 credit.
Course focuses on developing the skills necessary for successful grant applications for arts organizations. Study of relevant funding sources, awareness of available research materials, ability to construct coherent proposals, and defining fund-raising strategy for an arts organization. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Junior standing, admission to the arts administration minor, or permission of the instructor.

**Schedule Type:** Lecture

**AMGT 472: Technology in the Arts.** 1 credit.
The one constant in life is change. In today’s world, both technology and arts organizations are changing. This course will give a broad overview of the technologies commonly used in entrepreneurial, small, and large arts organizations and examines the intersection of technology, management, and the arts. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Junior standing.

**Schedule Type:** Lecture

**AMGT 489: Internship in Arts Management.** 1-4 credits.
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with the minor coordinator before enrollment. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 4 credits.

**Recommended Prerequisite:** Junior Standing, completion of 6 credits of courses in area of residency, AMGT 305, or permission of instructor.

**Schedule Type:** Internship

**500 Level Courses**

**AMGT 504: Professional Development Arts Management.** 1 credit.
Combines experimental facets happening within the creative community and the development of an increasing awareness of self. Professional development is not only for the manager, but also for those who work for that manager. It is collaborative, ideally incorporating an evaluative stage. Topics addressed include professional development, consultation, coaching, communities of practice, lesson study, mentoring, reflective supervision and technical assistance. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**AMGT 512: Grant Writing in the Arts.** 1 credit.
Places components of grant writing process within broader context of nonprofit management. Introduction to perspectives of grant seeker and maker. The grant writing process: research, proposal writing, terminology, oral and written techniques, and specific focus. Discover resources and compelling writing skills pertaining to proposal and letters of intent. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**AMGT 513: Technology in the Arts.** 1 credit.
The one constant in life is change. In today’s world, both technology and arts organizations are changing. This course will give a board overview of the technologies commonly used in entrepreneurial, small, and large arts organizations and examines the intersection of technology, management, and the arts. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**AMGT 519: Special Topics in Arts Management.** 1-6 credits.
Provides opportunity to explore special and timely topics in arts management including theoretical and applied areas. Topics and credit vary, may be repeated for up to 12 credits taken under different topics.
Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

### 600 Level Courses

**AMGT 601: Fund Raising/Development I.** 3 credits.
Overview for students seeking general knowledge, as well as introductory course for those who will complete the fund-raising concentration.
Teaches role of fund raising as management function and part of overall strategic intention of arts organizations, presenting fund raising as a multifaceted, team-based process. Analyzes tools and techniques for effective fund raising. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**AMGT 602: Seminar in Arts Management.** 3 credits.
Develops tools and techniques necessary for successful pursuit of a management career in visual and performing arts. Introduces wide range of arts organizations, working arts administrators, and institutional models through guest lectures, readings, field trips, and analysis of institutional data. Students gain understanding of organizational structures and functions, as well as models for general management. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Corequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to English Language, Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**AMGT 603: Arts and Society.** 3 credits.
Examines role of visual and performing arts, with emphasis on historic traditions and trends that have most directly influenced contemporary American practice. Consideration is given to the functions of art in society in addressing questions: What constitutes good or bad art? What is the value of art? What encouragements or impediments does our society offer to the creative artist or arts institution? Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**AMGT 604: Public Relations and Marketing Strategies for the Arts I.** 3 credits.
Teaches strategic way of thinking about audience, community, and markets. Structured into four modules, beginning with fundamentals of strategic planning. Students learn about external and internal environments and the interplay among them; discuss marketing fundamentals pertaining to arts audiences; and are introduced to fundamentals of applied marketing media and advertising fundamentals. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**AMGT 606: Governance and Leadership.** 3 credits.
Board development including oversight and management of a board, as well as understanding board functions. Board relationships, including volunteers, are essential through all of the stages of a management career. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**AMGT 609: Performing Arts Management.** 3 credits.
Bridging strategic planning and marketing; audience development; financial management; and board and volunteer management with issues of scheduling, ticketing and sales, mission integration and strategic challenges of new facilities, and growth and operations of existing ones. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**AMGT 610: Visual Arts Management.** 3 credits.
Covers the many facets of visual art gallery management, from practical considerations of daily operations to the broader examination of gallery's role in art education, criticism, and art market. Topics such as exhibition coordination and installation, contracts, artist representation, fine art insurance, exhibition policies, budgets, and marketing are covered, along with the responsibility of educating a diverse public. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**AMGT 620: Legal Aspects in Arts Management.** 3 credits.
Overview of practical legal issues that will be encountered by arts managers of both for-profit and not-for-profit arts organizations, including contracts, copyrights, licensing, and for-profit and non-profit incorporation. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**AMGT 640: Programming and Project Arts Management.** 3 credits.
Provides both a theoretical framework for thinking about and assessing the value of various programming options and practical examples of the potential partners and resources available for program and project implementation. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**AMGT 704: Finance and Budgeting for Arts I.** 3 credits.
Introduces budget and finance as fundamentals of the budget process, specifically tailored to needs of arts organizations. Provides overview of accounting as tool to manage and control arts organizations. Involves laboratory component for teaching software application frequently encountered in fiscal operation of arts organizations. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**AMGT 705: Finance and Budgeting for Arts II.** 2 credits.
Introduces budgeting, planning, and finance as fundamentals of the strategic planning process and management control, specifically tailored to the needs of arts organizations. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

**Recommended Prerequisite:** AMGT 704

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**AMGT 706: Festivals and Special Events.** 3 credits.
Technical aspects of events and festival management. Topics may include cultural understanding, tourism, sponsorship, fund raising and development, logistics of scheduling and contracts, and the relationship to larger venues, marketing and sales, and budgeting. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.
Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

AMGT 710: Arts Policy. 3 credits.
Reviews current state of the sector, familiarizing students with most common rationales for public support of the arts and respective roles of federal, state, and local governments and private policy actors. Examines dilemmas that arts organizations face in balancing need for government support and artistic integrity with push and pull of the market. Compares U.S. policies to other developed countries. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: AMGT 602B and 603B.
B- Requires minimum grade of B-

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

AMGT 711: Directed Readings and Project. 1-6 credits.
Opportunity to engage in a more intensive study or project in arts management. Students partner with faculty member for intensive readings and project in strategy and planning in the arts, fundraising and development, entrepreneurial project work, arts marketing, arts policy and law, or other specialized areas pertinent to arts administration. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

AMGT 740: Internal Internship. 2 credits.
Builds on apprenticeship as a core means of teaching applied concepts of arts management. Augments use of Center of the Arts and active arts environment, both performing and visual, as a learning laboratory. Builds on practical learning and provides internal training as preparation for external internship. Minimum 42 hours/credit. Required for developing practical application. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director. 9-credit standing.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

AMGT 742: Internship I. 3 credits.
Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Minimum 42 hours/credit. Required for developing practical application. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program, 15 credit standing; or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

AMGT 752: Arts Entrepreneurship. 3,6 credits.
Lecture course in discovering and developing entrepreneurial skills in the arts. Students will conceive, develop, and present a for-profit or not-for-profit business plan and strategy, which will include model(s), market overview, management structure, along with revenue streams, acquisition strategy, and technical and information technology strategies. Advanced course focuses on developing financial planning skills, funding strategies, marketing and arts sales. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to Arts Management program or permission of program director; AMGT 704.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

AMGT 790: External Internship. 1-4 credits.
Designed to follow internal internship. Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Students advised to pursue a three-pronged approach toward specialization: electives; internal internship in the same area as concentrated electives; and external internship consistent with specialized course work and internal internship. Minimum 42 hours/credit. Required for developing practical application. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 4 credits.

Recommended Prerequisite: Admission to Arts Management program, 15 credit standing or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

AMGT 792: Internship II. 3 credits.
Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Elective. Minimum 42 hours/credit. Required for developing practical application. Offered by Coll Visual & Performing Arts (p. 763). May not be repeated for credit.
Recommended Prerequisite: Admission to Arts Management program, 15 credit standing; or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

AMGT 795: Capstone in Arts Management. 1 credit.
Required in order to complete the MA AMGT degree. Provides students with the opportunity to deepen, expand, and demonstrate mastery of one area of arts management expertise. Builds on work undertaken in a completed AMGT course or internship. Faculty will provide guidance and approve capstone topics. The capstone is a required one-credit course. Students may register for the capstone after having completed all core course requirements for the MA AMGT degree. Offered by Coll Visual & Performing Arts (p. 763). May be repeated within the degree for a maximum 2 credits.

Recommended Prerequisite: All core course requirements for the MA AMGT degree.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**Assistive Technology (EDAT)**

**400 Level Courses**

**EDAT 410: Introduction to Assistive Technology.** 3 credits.
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for individuals with disabilities. Presentation and exploration experiences enable students to better use assistive technology in education, work, community, and home environments. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDIT 410.

Schedule Type: Lecture

**EDAT 421: Augmentative Communication.** 3 credits.
Provides an overview of augmentative and alternative communication tools for use by individuals with speech and communication disabilities. Exploration experiences enable students to locate, use and train others on the range of AAC technologies available. Field experience may be required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

**EDAT 422: Assistive Technology for Individuals with Sensory Impairments.** 3 credits.
Provides an overview of specific technology and resources available to enhance and improve the ability of individuals who are visually impaired/blind or hearing-impaired/deaf. Field experience may be required. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDIT 412.

Schedule Type: Lecture

**EDAT 423: Accessibility and Input Modifications.** 3 credits.
Provides an overview of accessibility strategies and input modifications designed for use by individuals with disabilities. Exploration experiences enable students to locate, use and train others on the range of technologies available as well as design opportunities for constructing unique devices. Field experience may be required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Schedule Type: Lecture

**500 Level Courses**

**EDAT 510: Introduction to Assistive Technology.** 3 credits.
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for individuals with disabilities. Presentation and exploration experiences enable students to better use assistive technology in education, work, community, and home environments. Offered by Graduate School of Education (p. 155). May not be repeated for credit. Equivalent to EDIT 510, EDSE 510.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**EDAT 521: Augmentative Communication.** 3 credits.
Provides an overview of augmentative and alternative communication tools for use by individuals with speech and communication disabilities. Exploration experiences enable students to locate, use and train others on the range of AAC technologies available. Field experience may be required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**EDAT 522: Assistive Technology for Individuals with Sensory Impairments.** 3 credits.
Provides an overview of specific technology and resources available to enhance and improve the ability of individuals who are visually impaired/blind or hearing-impaired/deaf. Field experience may be required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

EDAT 523: Accessibility and Input Modifications. 3 credits.
Provides an overview of accessibility strategies and input modifications designed for use by individuals with disabilities. Exploration experiences enable students to locate, use and train others on the range of technologies available as well as design opportunities for constructing unique devices. Field experience may be required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDAT 524: Universal Design for Learning. 3 credits.
Describes the foundations and principles of Universal Design for Learning (UDL). Focuses on teaching students with various disabilities including those with learning disabilities from preschool to postsecondary education implementing technology-based and other UDL strategies. Applies UDL principles to the design of accessible instructional materials. Students have the opportunity to develop and implement UDL lesson plans. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDAT 525: Software and Mobile Applications for Individuals with Disabilities. 3 credits.
Provides overview with software, mobile applications, and accessibility features. Identifies design features to meet individual’s special needs; provides hands-one experiences with the range of software and mobile applications that incorporate evidence-based strategies for individuals with disabilities across environments, settings and the life span. Field experience may be required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDAT 527: Assistive Technology for Independent Living and Employment. 3 credits.
Provides an overview of assistive technology accommodations and public policy related to independent living for individuals with disabilities throughout their life span. Focuses on assistive technologies that support daily living tasks and workplace accommodations to improve the performance of daily living and work activities for individuals with disabilities. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDAT 530: Assistive Technology for Independent Living. 3 credits.
Provides an overview of activities of daily living (ADLS) for individuals who have disabilities and the elderly. ADLs include but are not limited to assistive technologies that support dressing, feeding, hygiene, housework and safety. Field experience may be required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDAT 531: Assistive Technology in the Workplace. 3 credits.
Provides an overview of workplace accommodations, functional barriers commonly experienced in the workplace, assistive technology, ergonomic strategies, and universal design approaches to improve performance of work activities for individuals with disabilities, including but not limited to mobility, dexterity, sensory, communication, and cognitive impairments. Field experience may be required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDAT 597: Special Topics in Assistive Technology. 1-6 credits.
Provides advanced study on selected topic or emerging issue in assistive technology. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDAT 599: Independent Study in Assistive Technology. 1-6 credits.
Studies assistive technology research, theory, or practice under direction of faculty member. Offered by Graduate School of Education (p. 155). May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDAT 610: Designing Adapted Environments. 3 credits.
Provides an overview of environmental adaptations for individuals with disabilities to increase their access to community, workplace, and school activities. Covers legal issues within the ADA for adapting environments and addresses programmatic and physical access issues. Notes: Field Experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDAT 510.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDAT 649: Assistive Technology Assessment. 3 credits.
Provides an overview of AT consideration and assessment procedures with emphasis on generated assessment plan and written report. Review and administer existing assistive technology (AT) evaluation instruments. Notes: Field Experience required. Offered by Graduate School of Education (p. 155). May not be repeated for credit.

Recommended Prerequisite: EDAT 510.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Astronomy (ASTR)

100 Level Courses

ASTR 103: Astronomy. 3 credits.
Introduction to origin of life, Earth, planets and sun, stars, galaxies, quasars, nature of space radiation, and general theory of relativity. Note: ASTR 103 with ASTR 112 or ASTR 114 can be used to fulfill a 4-credit lab science requirement. Not for physics majors. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

Mason Core: Natural Science Overview (p. 135)

Schedule Type: Lecture

ASTR 111: Introductory Astronomy: The Solar System. 3 credits.
Topics include history of astronomy, evolution of the solar system, properties of planets, scientific method, critical thinking, nature of light, and principles of telescope design. Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

Mason Core: Natural Science with Lab (p. 135)

Schedule Type: Laboratory

ASTR 112: Introductory Astronomy Lab: The Solar System. 1 credit.
Laboratory course associated with ASTR 111. Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

Mason Core: Natural Science with Lab (p. 135)

Schedule Type: Laboratory

ASTR 113: Introductory Astronomy: Stars, Galaxies, and the Universe. 3 credits.
Topics include electromagnetic radiation, stellar evolution, interstellar medium, galaxies, cosmology, scientific method, and critical thinking. Notes: ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

Mason Core: Natural Science with Lab (p. 135)

Schedule Type: Laboratory

ASTR 114: Introductory Astronomy Lab: Stars, Galaxies, and the Universe. 1 credit.
Laboratory course associated with ASTR 113. Notes: ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

Mason Core: Natural Science with Lab (p. 135)

Schedule Type: Laboratory

ASTR 115: Finding New Worlds. 4 credits.
Topics include the search for planets outside the solar system, and new developments in the theory of solar system formation with an emphasis on student-led investigation using public data sources. Notes: ASTR 115 can be used to fulfill a 4-credit lab science requirement; not for physics
majors. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

**Mason Core:** Natural Science with Lab (p. 135)

**Schedule Type:** Laboratory, Lecture

### 200 Level Courses

**ASTR 210: Introduction to Astrophysics.** 3 credits.
Introduction to astrophysics for scientists. Topics include astronomical measurement, celestial mechanics, electromagnetic radiation, stellar structure and evolution, the interstellar medium, galaxies, and a selection of topics at the forefront of astrophysics including space physics, exoplanets, galaxies, and cosmology. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

**Recommended Corequisite:** C or higher in PHYS 262.

**Registration Restrictions:**
- **Required Prerequisite:** PHYS 160C.
- May be taken concurrently.
- C Requires minimum grade of C.

**Schedule Type:** Lecture

### 300 Level Courses

**ASTR 301: Astrobiology.** 3 credits.
Physical science perspective on origin and evolution of life on Earth and how life, in turn, has significantly influenced Earth's evolution. Topics include origin of Earth, mechanisms and sites for origin of life, co-evolution of life and Earth's atmosphere, habitability of planets, and the search for extraterrestrial life. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

**Recommended Prerequisite:** MATH 108 or 113.

**Schedule Type:** Lecture

**ASTR 302: Foundations of Cosmological Thought.** 3 credits.
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe. Notes: No advanced background in mathematics or natural sciences required. This course does not satisfy the PHYS elective requirement. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

**Mason Core:** Natural Science Overview (p. 135)

**Schedule Type:** Lecture

**ASTR 328: Stars and Interstellar Medium.** 3 credits.
Stellar structure and evolution; radiative transfer; the interstellar medium. The course includes computational work. Previous programming experience is not required, as it will be developed in the course, but it is helpful. Offered by Physics & Astronomy (p. 724). May not be repeated for credit. Equivalent to PHYS 328.

**Recommended Prerequisite:** ASTR 210, PHYS 262.

**Schedule Type:** Lecture

**ASTR 390: Topics in Astronomy.** 1-4 credits.
Selected topics not covered in fixed-content courses. May be repeated for credit with permission of department if topics are different. Notes: May not be included for credit by physics majors in the 45 credits of physics courses required for BS degree, or in 31 credits of physics courses required for BA degree. Offered by Physics & Astronomy (p. 724). May be repeated within the term for a maximum 9 credits.

**Schedule Type:** Lecture

### 400 Level Courses

**ASTR 401: Computer Simulation in Astronomy.** 3 credits.
Techniques and methods to simulate astronomical phenomena using a computer. Examples taken from a wide variety of astronomical phenomena, including radiation transfer in astrophysical objects, self-gravitating systems, hydrodynamics, and stellar models. No advanced background in mathematics or natural sciences required. Notes: Emphasizes hands-on projects. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

**Recommended Prerequisite:** ASTR 210.

**Schedule Type:** Lecture

**ASTR 402: RS: Methods of Observational Astronomy.** 4 credits.
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project. Fulfills writing intensive requirement in the major. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

**Mason Core:** Capstone (p. 135)

**Specialized Designation:** Research/Scholarship Intensive, Writing Intensive in the Major

**Recommended Prerequisite:** ASTR 210.

**Schedule Type:** Laboratory, Lecture

**ASTR 403: Planetary Sciences.** 3 credits.
Introduction to the physics and chemistry of planets and their natural satellites, asteroids, and comets. Topics include history of the solar system; origin and evolution of planets, their internal structure and atmospheres; and analytical techniques used in remote and in situ study. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

**Recommended Prerequisite:** ASTR 210, PHYS 262.

**Schedule Type:** Lecture

**ASTR 404: Galaxies and Cosmology.** 3 credits.
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe. Computational tools introduced in ASTR 328 are developed further. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

**Recommended Prerequisite:** ASTR 328.

**Schedule Type:** Lecture

**ASTR 405: Honors Thesis in Astronomy I.** 3 credits.
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for
ASTR 405. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** 21 credit hours in Physics and Astronomy and acceptance into the astronomy honors program.

**Schedule Type:** Lecture

ASTR 406: *Honors Thesis in Astronomy II.* 3 credits.
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 406. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** ASTR 405 and 21 credit hours in Physics and Astronomy and acceptance into the astronomy honors program.

**Schedule Type:** Lecture

ASTR 408: *Senior Research.* 3 credits.
Independent work under guidance of faculty member on research project in experimental, observational, or theoretical astronomy. Notes: Students may not receive more than 6 credits of ASTR 408 and 409. Written report on project required. May be taken twice with department permission. Offered by Physics & Astronomy. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 15 hours of ASTR courses.

**Schedule Type:** Research

ASTR 409: *Astronomy Internship.* 3 credits.
On-the-job experience for astronomy majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical astronomy, and prepare written report at end of internship. Notes: See department for other requirements and application procedure prior to enrollment. Students may not receive more than 6 credits of ASTR 408 and 409. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** 75 credit hours, 15 ASTR credits.

**Schedule Type:** Internship

**500 Level Courses**

**ASTR 532: Phys Interplanetary Med.** 3 credits.
Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** PHYS 303, 305, 308; MATH 214.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ASTR 590: Selected Topics in Astronomy and Astrophysics.** 1-6 credits.
Advanced topics from recent theoretical or observational developments and their applications. Satisfies needs of professional community to keep abreast of current developments. Offered by Physics & Astronomy. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**600 Level Courses**

**ASTR 602: Methods of Observational Astronomy.** 4 credits.
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project. Offered by Physics & Astronomy. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**ASTR 603: Planetary Sciences.** 3 credits.
Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** MATH 213 and PHYS 262

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**ASTR 604: Galaxies and Cosmology.** 3 credits.
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** ASTR 328 and MATH 214.

**Recommended Corequisite:** PHYS 308.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ASTR 660: Plasma Physics for Space and Astrophysics. 3 credits.
Offered by Physics & Astronomy (p. 724). May not be repeated for credit. Equivalent to PHYS 660.

Recommended Prerequisite: PHYS 305

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ASTR 680: Physics of Interstellar Media. 3 credits.
Physical processes in the interstellar media. Topics include the production and transfer of radiation, ionization and recombination, atomic and molecular excitation, dust physics, gas heating and cooling, and star formation. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

Recommended Prerequisite: PHYS 402 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

700 Level Courses

ASTR 730: Stellar Astrophysics. 3 credits.
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation. Offered by Physics & Astronomy (p. 724). May not be repeated for credit. Equivalent to CSI 661.

Recommended Prerequisite: MATH 214, PHYS 303, 305, 308.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ASTR 764: Computational Astrophysics. 3 credits.
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-Planck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics. Offered by Physics & Astronomy (p. 724). May not be repeated for credit. Equivalent to CSI 764.

Recommended Prerequisite: ASTR 530, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ASTR 765: High-Energy and Accretion Astrophysics. 3 credits.
Overview of the field of atomic and nuclear physics, including nuclear reactions of use to high-energy astrophysics. Discusses radiation processes in cosmic plasmas emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations. Offered by Physics & Astronomy (p. 724). May not be repeated for credit. Equivalent to CSI 765.

Recommended Prerequisite: PHYS 502 and 513, and ASTR 530; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ASTR 790: Topics in Astronomy and Astrophysics. 1-6 credits.
Topics from recent theoretical or observational developments and applications not covered in fixed-content astronomy and astrophysics courses. Notes: Satisfies need of professional community to keep abreast of current developments. Offered by Physics & Astronomy (p. 724). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ASTR 796: Directed Reading and Research. 1-12 credits.
Reading and research on a specific topic in astronomy, astrophysics, or related field under direction of faculty member. Offered by Physics & Astronomy (p. 724). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Admission to masters program and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Research

ASTR 798: Research Project. 3 credits.
Research project chosen and completed under guidance of graduate faculty member resulting in an acceptable technical report. Offered by Physics & Astronomy (p. 724). May not be repeated for credit.

Recommended Prerequisite: Nine graduate credits or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

ASTR 799: Master’s Thesis. 1-6 credits.
Research project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report and oral defense acceptable to three-faculty-member thesis committee. Offered by Physics & Astronomy (p. 724). May be repeated within the degree.

Recommended Prerequisite: 9 graduate credits and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

900 Level Courses

ASTR 998: Doctoral Dissertation Proposal. 1-12 credits.
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation. Note: No more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Out of the 24, no more than 12 credits of ASTR/PHYS 998 may be applied. Offered by Physics & Astronomy (p. 724). May be repeated within the degree.

Recommended Prerequisite: Admission to the Physics doctoral program, and permission of advisor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

ASTR 999: Doctoral Dissertation. 1-12 credits.
Doctoral research performed under direction of dissertation director. Notes: No more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Offered by Physics & Astronomy (p. 724). May be repeated within the degree.

Recommended Prerequisite: Admission to doctoral candidacy in Physics PhD program and permission of advisor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Athletic Training Education Program (ATEP)

100 Level Courses

ATEP 120: First Aid and Emergency Care. 2 credits.
Covers emergency management procedures for various injuries and sudden illnesses, including 1- and 2-person CPR, and use of an Automated External Defibrillator (AED) for cardiac emergencies and basic first aid techniques; certification in first aid and CPR. Offered by Recreation, Health & Tourism (p. 211). Limited to two attempts.

Schedule Type: Lecture

ATEP 150: Introduction to Athletic Training and Preventative Care Techniques. 3 credits.
Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

200 Level Courses

ATEP 201: Medical and Scientific Terminology. 3 credits.
Foundations of scientific and medical vocabulary including prefixes, suffixes and stems used to form compound words. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

ATEP 203: Prevention, Recognition, and Management of Athletic and Fitness Related Injuries. 3 credits.
Provides coaches and fitness professionals with theory on the prevention, recognition, and management of injuries and conditions that occur in athletic competition and recreational fitness activities. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

ATEP 205: Cultural Competence. 3 credits.
Explores cultural competence and its integration for effective professional practice. Includes communication styles, daily living practices, common sensitivities, self-awareness, and historical cultural implications in multicultural environments. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Schedule Type: Lecture

ATEP 250: Physical Assessment of the Lower Body. 3 credits.
An analysis of the principles of physical assessment of the lower body. Notes: Formal acceptance to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: Grade of C or higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.
Recommended Corequisite: ATEP 255, ATEP 256

**Schedule Type:** Lecture

**ATEP 255:** *Clinical Techniques I: Physical Assessment of the Lower Body.* 3 credits.
An analysis of physical assessment clinical techniques of the lower body (including the lower extremity and abdomen). Notes: Formal acceptance to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.

**Recommended Corequisite:** ATEP 250, ATEP 256

**Schedule Type:** Laboratory

**ATEP 256:** *Practicum I: Physical Assessment of the Lower Body.* 3 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on physical assessment of the lower body. Notes: Formal acceptance to the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.

**Recommended Corequisite:** ATEP 250, ATEP 256

**Schedule Type:** Internship

**ATEP 260:** *Physical Assessment of the Upper Body.* 3 credits.
An analysis of the principles of physical assessment of the upper body. Notes: Formal acceptance to professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.

**Recommended Corequisite:** ATEP 265, ATEP 266.

**Schedule Type:** Lecture

**ATEP 265:** *Clinical Techniques II: Physical Assessment of the Upper Body.* 3 credits.
An analysis of physical assessment clinical techniques of the upper body (including the upper extremity, head, and neck). Notes: Formal acceptance to the professional phase of the ATEP Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.

**Recommended Corequisite:** ATEP 260, ATEP 266

**Schedule Type:** Laboratory

**ATEP 266:** *Practicum II: Physical Assessment of the Upper Body.* 3 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on physical assessment of the upper body. Notes: Formal acceptance to the professional phase of the ATEP; Emergency Cardiac Care (ECC) Certification Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Corequisite:** ATEP 260, ATEP 265

**Schedule Type:** Internship

**ATEP 270:** *General Medical Conditions and Pharmacology in Physically Active Populations.* 3 credits.
An examination of assessment and management techniques of general medical conditions and pharmacological principles in physically active populations. Notes: Formal acceptance to the professional phase of the ATEP Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 300; BIOL 124, BIOL 125.

**Schedule Type:** Lecture

**300 Level Courses**

**ATEP 300:** *Functional Anatomy.* 3 credits.
Increase students’ knowledge and exposure to the structural and functional components of human anatomy including musculoskeletal origins, insertions, actions and innervations. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit. Equivalent to KINE 300.

**Recommended Prerequisite:** C or higher in BIOL 124 and BIOL 125.

**Schedule Type:** Laboratory, Lecture

**ATEP 310:** *Advanced Functional Anatomy.* 3 credits.
Investigates the musculoskeletal anatomy including innervation, vascular anatomy, and function of the neck, trunk and limbs. Synthesizes anatomy physiology, and human movement as it relates to injury; case studies are used to enhance the understanding of human anatomy and interpret movement impairments. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Corequisite:** ATEP 320.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 300<sup>C</sup> and KINE 310<sup>C</sup>.
<sup>C</sup> Requires minimum grade of C.

**Schedule Type:** Lecture

**ATEP 320:** *Therapeutic Interventions Foundations.* 3 credits.
Explores foundational knowledge and skills necessary for the safe, effective, and evidence-based application of therapeutic interventions. Investigates physiologic response to injury and healing, physiologic cause of pain, physiologic response of tissue to therapeutic intervention including modalities and exercise. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Corequisite:** ATEP 310.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 325<sup>C</sup>, KINE 310<sup>C</sup> and 320<sup>C</sup>.
<sup>C</sup> Requires minimum grade of C.

**Schedule Type:** Lecture
ATEP 325: Athletic Training Foundations. 3 credits.
Investigates the knowledge, skill and professional foundations of
the athletic training. Emphasizes is placed on the role of the athletic
trainer as a member of the health care system by decision-making
through evidence-based practice and foundational skills including fitting
protective equipment and devices, and prophylactic preventative taping.
Admission to the professional phase of the ATEP. Offered by Recreation,
Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: ATEP 120\(^C\), 150\(^C\), 201\(^C\), 300\(^C\), BIO 124\(^C\), 125\(^C\) and HEAL 230\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

ATEP 330: Emergency Procedures for Athletic Trainers. 3 credits.
Investigates the scientific and philosophical foundations of pre-hospital
treatment emergency care principles pertinent to athletic trainers. Develops
knowledge, critical thinking and problem solving skills necessary to
correctly apply emergency care principles and associated skills in a
variety of clinical and professional settings. Admission to the professional
phase of ATEP. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 340, 345, 351, 354.

Registration Restrictions:
Required Prerequisites: ATEP 310\(^C\), 320\(^C\) and KINE 450\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

ATEP 340: Lower Body Physical Assessment. 3 credits.
Analyzes principles of lower body physical assessment. Investigates
mechanisms of injury, the evaluation process, and testing leading to
diagnosis. Admission to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 330, ATEP 340, ATEP 351, ATEP 354.

Registration Restrictions:
Required Prerequisites: KINE 450\(^C\), ATEP 310\(^C\) and 320\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

ATEP 345: Athletic Training Clinical Techniques 1. 3 credits.
Applies principles of lower body, thoracic and lumbar spine physical
assessment. develops evaluation skills including special testing leading
to diagnosis. Admission to the professional phase of ATEP. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 330, ATEP 340, ATEP 351, ATEP 354.

Registration Restrictions:
Required Prerequisites: KINE 450\(^C\), ATEP 310\(^C\) and 320\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Laboratory

ATEP 350: Therapeutic Interventions I. 3 credits.
Integrates the use of therapeutic modalities and rehabilitation
in the treatment of injuries and conditions including indications,
contraindications, physiological effects, special programs, and resistance
methods used with therapeutic modalities and prevention/rehabilitation
methods. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: Grade of C or higher in ATEP 150, 180,
250, 255, 256, 260, 265, 266, 270, 300; BIO 124, 125; HEAL 110, 230;
KINE 310.

Recommended Corequisite: ATEP 355 and 356.

Schedule Type: Lecture

ATEP 351: Lower Body Therapeutic Interventions. 3 credits.
Develops, implements, and evaluates treatment plans using therapeutic
modalities and rehabilitation interventions in the treatment of lower
body injuries and conditions. Establishes an evidence-based approach
to therapeutic interventions use in patient treatment. Admission to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 330, ATEP 340, ATEP 345, ATEP 354.

Registration Restrictions:
Required Prerequisites: KINE 450\(^C\), ATEP 310\(^C\) and 320\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

ATEP 354: Athletic Training Clinical Techniques 2. 3 credits.
Applies therapeutic interventions for the lower body in a laboratory
setting. Develops rehabilitation treatment plans and skills necessary to
carry out patient care. Admission to the professional phase of the ATEP.
Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 330, ATEP 340, ATEP 345, ATEP 351.

Registration Restrictions:
Required Prerequisites: KINE 450\(^C\), ATEP 310\(^C\) and 320\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Laboratory

ATEP 355: Clinical Techniques 3: Therapeutic Interventions I. 3 credits.
An examination of the scientific theory and standard operating
procedures necessary for the safe application of therapeutic modalities
in a physically active patient population. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: Grade of C or higher in ATEP 150, 180,
250, 255, 256, 260, 265, 266, 270, 300; BIO 124, 125; HEAL 110, 230;
KINE 310.

Recommended Corequisite: ATEP 350 and 356.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in
Athletic Training.

Schedule Type: Laboratory

ATEP 356: Practicum III: Therapeutic Modalities. 3 credits.
A clinical practicum field experience under the direct supervision of
a preceptor with emphasis on therapeutic modalities. Notes: Formal
Acceptance into the ATEP. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.
Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300 BIOL 124, 125; HEAL 110, 230; KINE 310.

Recommended Corequisite: ATEP 350, 355.

Schedule Type: Internship

ATEP 360: Therapeutic Interventions 2. 3 credits.
Integrated approach to the use of therapeutic modalities and rehabilitation in the treatment of injuries and conditions. Special consideration to specific body regions including a focus on the development, implementation, and evaluation of treatment plans. Notes: Formal acceptance into the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.

Recommended Corequisite: ATEP 350, 355.

Registration Restrictions: Enrollment is limited to students with a major, minor, or concentration in Athletic Training.

Schedule Type: Lecture

ATEP 361: Upper Body Therapeutic Interventions. 3 credits.
Utilizes an integrated approach to therapeutic interventions including modalities and rehabilitation in the treatment of upper body, head and neck injuries and conditions. Includes development, implementation, and evaluation of treatment plans for upper body, head and neck injuries. Admission to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 365, 367, ATEP 370, ATEP 375.

Registration Restrictions: Required Prerequisites: ATEP 351C, 354C, 330C, 340C and 345C. Requires minimum grade of C.

Schedule Type: Laboratory

ATEP 365: Athletic Training Clinical Techniques 4. 3 credits.
Applies therapeutic interventions for the upper body, head and neck in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 361, ATEP 365, ATEP 367, ATEP 375.

Registration Restrictions: Required Prerequisites: ATEP 330C, 340C, 345C, 351C and 354C. Requires minimum grade of C.

Schedule Type: Laboratory

ATEP 367: Athletic Training Practicum 1. 2 credits.
Emphasizes physical assessment and therapeutic interventions of the lower body in a clinical immersion practicum field experience under the direct supervision of a preceptor for 150 hours. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 361, ATEP 365, ATEP 370, ATEP 375.

Registration Restrictions: Required Prerequisites: ATEP 330C, 340C, 345C, 351C and 354C. Requires minimum grade of C.

Schedule Type: Internship

ATEP 370: Upper Body Physical Assessment. 3 credits.
Analyzes the principles of upper body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 361, ATEP 365, ATEP 367, ATEP 375.

Registration Restrictions: Required Prerequisites: ATEP 330C, 340C, 345C, 351C and 354C. Requires minimum grade of C.

Schedule Type: Lecture

ATEP 375: Athletic Training Clinical Techniques 3. 3 credits.
Applies principles of upper body, head and neck physical assessment. Develops evaluation skills including special testing leading to diagnosis. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 361, ATEP 365, ATEP 367, ATEP 370.

Registration Restrictions: Required Prerequisites: ATEP 330C, 340C, 345C, 351C and 354C. Requires minimum grade of C.

Schedule Type: Laboratory

400 Level Courses

ATEP 400: Pathopharmacology. 3 credits.
Examines the assessment and management techniques of general medical conditions and pharmacological principles and interventions. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions: Required Prerequisites: ATEP 300C and KINE 310C. Requires minimum grade of C.

Schedule Type: Lecture

ATEP 441: Senior Seminar in Athletic Training. 3 credits.
Capstone educational experience focusing on current topics in the Athletic Training Profession and career development issues. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Mason Core: Capstone (p. 135)
Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; KINE 300, 360.

Schedule Type: Internship

ATEP 450: Administration and Management in Athletic Training. 3 credits. Focuses on the professional management and administrative issues in athletic training including the planning, designing, development, organization, implementation, direction, and evaluation of a health care program. Discusses current issues in athletic training related to professional conduct and practice. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Students with a class of Freshman or Sophomore may not enroll.

Schedule Type: Lecture

ATEP 456: Practicum 5 Professional Integration. 6 credits. A clinical practicum field experience under the direct supervision of a preceptor with emphasis on professional skill integration. Notes: Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; KINE 310, 360.

Recommended Corequisite: ATEP 450.

Schedule Type: Internship

ATEP 457: Athletic Training Practicum 2. 1 credit. Emphasizes physical assessment and therapeutic interventions of the upper body with non-sport populations and assessment of general medical conditions in a clinical practicum field experience under the direct supervision of a preceptor for 75 hours. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit. Equivalent to ATEP 354.

Recommended Corequisite: ATEP 450.

Registration Restrictions:
Required Prerequisites: ATEP 361C, 365C, 367C, 370C, 375C and 400C.
C Requires minimum grade of C.

Schedule Type: Internship

ATEP 460: Pediatric Sports Medicine. 3 credits. Examines evidence-based practices for injury prevention, sport safety, emergency preparedness, and risk management within youth and scholastic sport. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 470, 476.

Registration Restrictions:
Required Prerequisites: ATEP 300C and KINE 310C.
C Requires minimum grade of C.

Schedule Type: Lecture

ATEP 466: Athletic Training Practicum 3. 2 credits. Emphasizes injury prevention administration physical assessment and therapeutic intervention during athletics preseason in a clinical practicum field experience under the direct supervision of a preceptor for 150 hours. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: ATEP 361C, 365C, 367C, 370C, 375C and 400C.
C Requires minimum grade of C.

Schedule Type: Internship

ATEP 470: Post Rehabilitative Therapeutic Interventions. 2 credits. Examines current topics of musculoskeletal injury prevention and intervention. Investigates injury epidemiology, pain and nutritional theories. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 476.

Schedule Type: Lecture

ATEP 476: Athletic Training Practicum 4. 4 credits. Emphasizes physical assessment and therapeutic interventions of the upper body in a clinical practicum field experience under the direct supervision of a preceptor for 300 hours. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 470.

Registration Restrictions:
Required Prerequisites: ATEP 450C, 457C and 466C.
C Requires minimum grade of C.

Schedule Type: Internship

ATEP 480: Athletic Training Research. 3 credits. Examines methods for critically evaluating clinical research techniques and interventions to improve patient outcomes specific to the practice of athletic training. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 486.

Registration Restrictions:
Required Prerequisites: ATEP 460C, 470C and 476C.
C Requires minimum grade of C.

Schedule Type: Lecture

ATEP 486: Athletic Training Practicum 5. 6 credits. Emphasizes professional skill integration with a clinical practicum field experience under the direct supervision of a preceptor for 400 hours. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 480.

Registration Restrictions:
Required Prerequisites: ATEP 460C, 470C and 476C.
C Requires minimum grade of C.
ATEP 499: Independent Study in Athletic Training. 1-6 credits.
Study of a topic area in athletic training research, theory, or practice under direction of a faculty member. May be repeated, but not more than 6 total credits may be earned. Offered by Recreation, Health & Tourism (p. 211). May be repeated within the degree.

Schedule Type: Independent Study

500 Level Courses

ATEP 510: Advanced Functional Anatomy. 3 credits.
Investigates the musculoskeletal anatomy including innervation, vascular anatomy, and function of the neck, trunk and limbs. Synthesizes anatomy, physiology, and human movement as it relates to injury; case studies are used to enhance the understanding of human anatomy and interpret movement impairments. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: Basic human anatomy and physiology and functional anatomy knowledge.

Recommended Corequisite: ATEP 520 and 525.

Schedule Type: Lecture

ATEP 520: Therapeutic Interventions Foundations. 3 credits.
Explores foundational knowledge and skills necessary for the safe, effective, and evidenced-based application of therapeutic interventions. Investigates physiologic response to injury and healing, physiologic cause of pain, physiologic response of tissue to therapeutic intervention including modalities and exercise. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Prerequisite: Basic human anatomy and physiology and functional anatomy knowledge.

Recommended Corequisite: ATEP 510 and 525.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ATEP 530: Emergency Procedures for Athletic Trainers. 3 credits.
Investigates the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to athletic trainers. Develops knowledge, critical thinking and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 540, 545, 550, 555.

Schedule Type: Lecture

ATEP 530: Emergency Procedures for Athletic Trainers. 3 credits.
Investigates the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to athletic trainers. Develops knowledge, critical thinking and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 540, 545, 550, 555.

Schedule Type: Lecture

ATEP 540: Lower Body Physical Assessment. 3 credits.
Analyzes principles of lower body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 530, 545, 550, 555.

Schedule Type: Lecture

ATEP 540: Lower Body Physical Assessment. 3 credits.
Analyzes principles of lower body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 530, 545, 550, 555.

Schedule Type: Lecture

ATEP 550: Athletic Training Foundations. 3 credits.
Investigates the knowledge, skill and professional foundations of the athletic training. Emphasizes is placed on the role of the athletic trainer as a member of the health care system by decision-making through evidence-based practice and foundational skills including fitting protective equipment and devices, and prophylactic preventative taping.

Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 510 and 520.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
ATEP 545: Athletic Training Clinical Techniques 1. 3 credits. 
Applies principles of lower body, thoracic and lumbar spine physical assessment. Develops evaluation skills including special testing leading to diagnosis. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Corequisite:** ATEP 530, 540, 550, 555.

**Registration Restrictions:**
- **Required Prerequisites:** ATEP 510\textsuperscript{B} and 520\textsuperscript{B}.
  \textsuperscript{B} Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

ATEP 550: Lower Body Therapeutic Interventions. 3 credits. 
Develops, implements, and evaluates treatment plans using therapeutic modalities and rehabilitation interventions in the treatment of lower body injuries and conditions. Establishes an evidence-based approach to therapeutic interventions use in patient treatment. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Corequisite:** ATEP 530, 540, 545, 555.

**Registration Restrictions:**
- **Required Prerequisites:** ATEP 510\textsuperscript{B} and 520\textsuperscript{B}.
  \textsuperscript{B} Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

ATEP 555: Athletic Training Clinical Techniques 2. 3 credits. 
Applies therapeutic interventions for the lower body in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Corequisite:** ATEP 530, 540, 545, 555.

**Registration Restrictions:**
- **Required Prerequisites:** ATEP 510\textsuperscript{B} and 520\textsuperscript{B}.
  \textsuperscript{B} Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

ATEP 560: Upper Body Therapeutic Interventions. 3 credits. 
Utilizes an integrated approach to therapeutic interventions including modalities and rehabilitation in the treatment of upper body, head and neck injuries and conditions. Includes development, implementation, and evaluation of treatment plans for upper body, head and neck injuries. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Corequisite:** ATEP 565, 566, 570, 575, 600.

**Registration Restrictions:**
- **Required Prerequisites:** ATEP 530\textsuperscript{B}, 540\textsuperscript{B}, 545\textsuperscript{B}, 550\textsuperscript{B} and 555\textsuperscript{B}.
  \textsuperscript{B} Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

ATEP 565: Athletic Training Clinical Techniques 4. 3 credits. 
Applies therapeutic interventions for the upper body, head and neck in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Corequisite:** ATEP 560, 566, 570, 575, 600.

**Registration Restrictions:**
- **Required Prerequisites:** ATEP 530\textsuperscript{B}, 540\textsuperscript{B}, 545\textsuperscript{B}, 550\textsuperscript{B} and 555\textsuperscript{B}.
  \textsuperscript{B} Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

ATEP 566: Athletic Training Practicum 1. 2 credits. 
Emphasizes clinical examination and acute care of injuries during a clinical immersion practicum field experience under the direct supervision of a preceptor for 150 to 200 hours. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

**Recommended Corequisite:** ATEP 560, ATEP 565, ATEP 570, ATEP 575, 600.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 530B, 540B, 545B, 550B, and 555B.

- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**ATEP 570:** Upper Body Physical Assessment. 3 credits.

- Analyzes principles of upper body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

- Recommended Corequisite: ATEP 560, 565, 566, 575, 600.

**Registration Restrictions:**

- **Required Prerequisites:** ATEP 530B, 540B, 545B, 550B, and 555B.

- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ATEP 575:** Athletic Training Clinical Techniques 3. 3 credits.

- Applies principles of upper body, head and neck physical assessment. Develops evaluation skills including special testing, leading to diagnosis. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

- Recommended Corequisite: ATEP 560, 565, 566, 570, 600.

**Registration Restrictions:**

- **Required Prerequisites:** ATEP 530B, 540B, 545B, 550B, and 555B.

- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**600 Level Courses**

**ATEP 600:** Pathopharmacology. 3 credits.

- Examines the assessment and management techniques of general medical conditions and pharmacological principles and interventions.

- Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

- **Recommended Prerequisite:** Basic human anatomy and physiology and Functional Anatomy knowledge needed.

**Registration Restrictions:**

- Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ATEP 650:** Administration and Management in Athletic Training. 3 credits.

- Focuses on the professional management and administrative issues in athletic training including the planning, designing, development, organization, implementation, direction, and evaluation of a health care program. Discusses current issues in athletic training related to professional conduct and practice. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

- **Recommended Corequisite:** ATEP 565.

**Registration Restrictions:**

- **Required Prerequisites:** ATEP 560B, 565B, 566B, 570B, and 575B.

- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**ATEP 656:** Athletic Training Practicum 2. 1 credit.

- Emphasizes therapeutic interventions with non-sport populations during a clinical practicum field experience under the direct supervision of a preceptor for 75 to 125 hours. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

- **Recommended Corequisite:** ATEP 650.

**Registration Restrictions:**

- **Required Prerequisites:** ATEP 560B, 565B, 566B, 570B, and 575B.

- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**ATEP 660:** Pediatric Sports Medicine. 3 credits.

- Examines evidence-based practices for injury prevention, sport safety, emergency preparedness, and risk management within youth and
ATEP 667: Athletic Training Practicum 3. 2 credits.
Emphasizes injury prevention, healthcare administration, clinical evaluation during and athletics pre-season clinical practicum field experience under the direct supervision of a preceptor for 150 to 200 hours. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: ATEP 650B, 656B.
B- Requires minimum grade of B-.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ATEP 670: Post Rehabilitative Therapeutic Interventions. 2 credits.
Explores current topics of musculoskeletal injury prevention and intervention. Investigates injury epidemiology, pain and nutritional theories. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 660, 676.

Registration Restrictions:
Required Prerequisites: ATEP 650B, 656B and 667B.
B- Requires minimum grade of B-.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

ATEP 680: Athletic Training Research. 3 credits.
Examines methods for critically evaluating clinical research techniques and interventions to improve patient outcomes specific to the practice of athletic training. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 686.

Registration Restrictions:
Required Prerequisites: ATEP 660B, 670B and 676B.
B- Requires minimum grade of B-.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

ATEP 686: Athletic Training Practicum 5. 6 credits.
Emphasizes professional development, evidence-based practice and integration of knowledge, skills and clinical decision-making during a clinical practicum field experience under the direct supervision of a preceptor for 400 to 600 hours. Offered by Recreation, Health & Tourism (p. 211). May not be repeated for credit.

Recommended Corequisite: ATEP 680.

Registration Restrictions:
Required Prerequisites: ATEP 660B, 670B and 676B.
B- Requires minimum grade of B-.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship
Bachelor of Individualized Study (BIS)

300 Level Courses

**BIS 300: Understanding Interdisciplinary Studies.** 3 credits.
Focuses on literature and issues relevant to interdisciplinary and multidisciplinary studies and the BIS program. Students explore selected topics, develop and gather feedback on individualized concentration proposals, and review BIS program requirements. Notes: Open only to pre-BIS students and BIS majors. Offered by Bachelor Individualized Study (p. 529). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Individualized Study or Undeclared.

**Schedule Type:** Lecture

**BIS 390: The Research Process.** 3 credits.
Focuses on skills to develop a research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete senior project. Notes: Open only to pre-BIS students and BIS majors. Students cannot receive credit for both BIS 390 and 391. Offered by Bachelor Individualized Study (p. 529). May not be repeated for credit. Equivalent to BIS 391.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** BIS 300 and grade of 2.0 or above in ENGL 302/ENGH 302.

**Schedule Type:** Lecture

**BIS 391: The Research Process for Honors.** 3 credits.
Focuses on skills to develop an honors-level research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete Honors Senior Research Project (BIS 490). Approved research proposal required prior to registration in BIS 490. Notes: Students cannot receive credit for both BIS 390 and 391. Offered by Bachelor Individualized Study (p. 529). May not be repeated for credit.

**Recommended Prerequisite:** Acceptance to pursue honors in the major.

**Schedule Type:** Lecture

400 Level Courses

**BIS 489: Directed Readings and Research.** 1-3 credits.
Readings and research on a topic directly relevant to student's core concentration. Notes: Open only to pre-BIS students and BIS majors. Individualized sections by arrangement. Guided by instructor with expertise. Topics must be approved by instructor and BIS director prior to enrollment. Offered by Bachelor Individualized Study (p. 529). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Open only to degree students in the Bachelor of Individualized Study Program.

**Schedule Type:** Independent Study

**BIS 490: RS: Senior Project.** 3 credits.
Project or thesis on a topic directly relevant to student’s concentration. Guided by student’s faculty advisor and 490 instructor. Notes: Open only to BIS majors. Individualized sections for BIS honors. Capstone course in BIS core concentration. Research proposals must be approved by faculty mentor, executive committee, and BIS director prior to enrollment. Offered by Bachelor Individualized Study (p. 529). May not be repeated for credit.

**Mason Core:** Synthesis (p. 135)

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** BIS 390.

**Recommended Corequisite:** BIS 491.

**Registration Restrictions:**
Enrollment limited to students in the BIS Individualized Study program.

**Schedule Type:** Independent Study

**BIS 491: Senior Project Presentation.** 1 credit.
Focuses on preparation and delivery of a formal presentation of student’s BIS 490 project. Includes review of basic presentation techniques. Notes: Open only to BIS majors. Offered by Bachelor Individualized Study (p. 529). May not be repeated for credit.

**Specialized Designation:** Research Associated

**Recommended Prerequisite:** BIS 390.

**Recommended Corequisite:** BIS 490.

**Registration Restrictions:**
Enrollment limited to students with a major in Individualized Study.

**Schedule Type:** Lecture

**BIS 495: Career Practicum.** 1-6 credits.
Supervised experience in application of specified area. Offered by Bachelor Individualized Study (p. 529). May be repeated within the degree for a maximum 9 credits.

**Recommended Prerequisite:** Permission of instructor or BIS Director.

**Schedule Type:** Internship
Bachelor's of Applied Science (BAS)

300 Level Courses

BAS 300: Building Professional Competencies. 3 credits.
This course serves as an orientation to the BAS degree program. Current strengths are assessed and future planning is highlighted. Core competency areas related to personal effectiveness and academic/workplace success are stressed. Introduction to the university online learning system and other available resources useful for degree completion are also emphasized. Offered by Provost’s Office (p. 1102). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students in a Bachelor of Applied Science degree.

Schedule Type: Seminar

400 Level Courses

BAS 490: Introduction to Research Methods. 3 credits.
This course introduces students to fundamental research methods and processes. Students will explore their research interests and identify one topic as well as learn to set up research questions, review literature, and define appropriate methods for data collection. This course intends to prepare students for their practicum study in BAS 491. Offered by Provost's Office (p. 1102). May not be repeated for credit.

Recommended Prerequisite: Student must have completed 85 credits prior to taking this course.

Registration Restrictions:
Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment limited to students with a major in Applied Science.

Enrollment limited to students in the BAS Applied Science program.

Schedule Type: Lecture

BAS 491: Applied Sciences Capstone. 3 credits.
Students participate in an approved fieldwork study program and complete a research project as identified in BAS 490 Introduction to Research Methods. The Capstone project involves choosing and researching a workplace problem; designing, implementing and evaluating a specific plan of action; and formally presenting the project once completed. Offered by Provost’s Office (p. 1102). May not be repeated for credit.

Mason Core: Capstone (p. 135)

Registration Restrictions:
Required Prerequisite: BAS 490C.
C Requires minimum grade of C.

Enrollment limited to students with a major in Applied Science.

Schedule Type: Internship

Biodefense (BIOD)

600 Level Courses

BIOD 604: Emerging Infectious Diseases I: Bacteria and Toxins. 3 credits.
Covers the microbiology, pathogenesis, clinical effects, and epidemiology of bacteria and toxins that pose threats to global health or can be utilized as biological weapons. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOD 605: Emerging Infectious Diseases II: Viral Agents. 3 credits.
Covers the microbiology, pathogenesis, clinical effects, and epidemiology of viruses that pose threats to global health or can be utilized as biological weapons. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOD 607: Introduction to Biodefense/Threat Analysis III: Toxins. 3 credits.
Discusses the threat of toxins as biological weapons. Special focus on microbiological toxins, including botulinum toxin, and biochemical action of toxins. Comparison to chemical weapons and debate about classification as such. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOD 609: Biodefense Strategy. 3 credits.
Introduces students to the biodefense and biosecurity strategies and policies of the United States, other nations, and international organizations. Evaluates the effectiveness of these policies in strengthening defenses, improving intelligence, increasing oversight, enhancing nonproliferation, and reinforcing norms. Examines the interaction of biodefense and biosecurity with homeland, national, and international security. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOD 610: Advanced Topics in Global Health Security.** 1-4 credits. Different topics, depending on instructor’s specialty. Topics include ethical, legal, scientific, security, political, and/or policy aspects of global health security, emphasizing current problems and research. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 18 credits.

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOD 620: Global Health Security Policy.** 3 credits. Explores issues emerging from the interaction of health and security that represent novel challenges to policy makers confronting a rapidly changing international landscape. Examines the origin and evolution of the concept of health security. Analyzes strategic impact of infectious disease outbreaks, global health security case studies, global health governance, and formulation and implementation of U.S. global health security policy. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and BIOD 605; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOD 621: Ethics and International Security.** 3 credits. Challenges students to wrestle with dilemmas raised by the desire to behave ethically in an international system in which consensus about ethical matters is absent. Students will develop, apply, and justify their own perspective on an ethical problem related to international security using ethical theory and social science research. Ethical issues related to nuclear, biological, and chemical weapons that confront researchers, policy makers, and practitioners will be addressed. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOD 622: Negotiating in the International Arena.** 3 credits. Provides students with the concepts and tools for analyzing complex negotiation processes and introduces them to the challenges facing international negotiators. Students will read about the frameworks and perspectives that have guided the scholarly research on negotiation, as well as the latest findings from that research; analyze complex cases of actual negotiations in the security, trade, and environmental areas; and negotiate key issues on the agendas of nations and international organizations. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOD 705: Intelligence: Theory and Practice.** 3 credits. Theory and practice of intelligence, including the intelligence cycle, organization of the intelligence community, and the origins and impact of recent reforms. Examines the capabilities and limitations of the different collection disciplines, analytic methodologies and pathologies, and the relationship between intelligence and policy. Analyzes challenges posed by collecting and analyzing intelligence on weapons of mass destruction programs conducted by states and terrorists. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOD 706: Nuclear, Biological, and Chemical Weapons Policy and Security.** 3 credits. Explores the causes, conduct, and consequences of the proliferation of nuclear, biological, and chemical weapons. Covers the historical, technological, normative, and strategic factors that have promoted and restrained the spread of these weapons. Addresses the motives for states to develop these weapons and the debate over the security implications of nuclear, biological, and chemical weapon proliferation. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.
Compliance with international treaties, and implementing biosecurity and homeland security, quarantine authority and enforcement, ensuring security, legal aspects of public-private cooperation in biodefense. Topics include the origins of the Department of Homeland Security, the role of the military in homeland security, trade-offs between privacy and security, legal aspects of public-private cooperation in biodefense and homeland security, quarantine authority and enforcement, ensuring compliance with international treaties, and implementing biosecurity regulations. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BIOD 709: Nonproliferation and Arms Control. 3 credits.**
Examines the array of national and international measures used to slow, halt, and reverse the spread of nuclear, biological, chemical, and missile weapons. Explores the theory and practice of proliferation to provide insights into the supply and demand aspects of proliferation. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BIOD 710: Health Security Preparedness. 3 credits.**
Examines national and international public health and medical preparedness for and response to natural disasters, terrorist acts, and disease outbreaks. Explores organizational and policy architecture, implementation challenges, and strategies for preventing, detecting, and mitigating these threats. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BIOD 722: Examining Terrorist Groups. 3 credits.**
Introduction to terrorism including the history and evolution of terrorism, case studies of key terrorist groups, the current nature of the terrorist threat and counterterrorism strategies. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BIOD 726: Food Security. 3 credits.**
Analyzes threats to food security globally including those related to climate change and environmental degradation; animal and plant diseases; access to clean water; agricultural terrorism; and antimicrobial resistance. Explores the national and global health, economic, social, and ethical impacts of these disruptive forces. Examines strategies for enhancing the security of the global food production and supply systems. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and BIOD 605; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BIOD 751: Biosurveillance. 3 credits.**
Provides an understanding of the capabilities required to provide reliable early warning of disease outbreaks and identify their etiological agents. Assesses strengths and limitations of physicians, laboratories, epidemiologists, aerosol sensors, and syndromic surveillance systems. Considers the challenges posed by the integration and analysis of the information collected by these sources. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and BIOD 605; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.
Schedule Type: Lecture

BIOD 752: The Role of the Military in Homeland Security. 3 credits.
Analyzes the role that the armed forces play in homeland security, including historical and legal developments, the role of the National Guard, capabilities for crisis and consequence management, and case studies of military assistance to civilian authorities in response to riots, terrorist incidents, and natural disasters. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOD 760: National Security Technology and Policy. 3 credits.
Introduces students to the intersection of science, technology, and policy in national security. Will examine the players in the formation of science policy; the roles they play; how the types, uncertainties, and availability of data affect science policy debates; and how science policy decisions are made. Topics to be covered include weapons of mass destruction, nonlethal weapons, nanotechnology, bioengineering, energy security, and pandemic influenza. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate, Non-Degree or Washington Consortium level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOD 762: Biotechnology and Society. 3 credits.
Examines the growing role of biotechnology in modern society, including benefits to human and animal health, industrial applications, and potential for misuse. Analyzes key variables influencing the revolution in biotechnology and impact in both developed and developing countries. Explores the political, economic, social, legal, security, and ethical implications of advances in life sciences and biotechnology. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605 or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOD 766: Development of Vaccines and Therapeutics. 3 credits.
Analyzes the process of developing new medical countermeasures against biological weapons and emerging infectious diseases such as SARS and pandemic influenza. Special attention is paid to the scientific, technical, political, regulatory, and economic obstacles to developing new vaccines and therapeutics. Examines the causes and potential solutions of public and private sector failures. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

BIOD 780: Master’s Supervised Internship. 1-6 credits.
Internship under supervision of qualified professional in biodefense at a government agency, consulting firm, industrial firm, or other acceptable agency. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Permission of program director or advisor.

Registration Restrictions:
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

BIOD 790: Global Health Security Capstone. 3 credits.
Provides students with the opportunity to hone their research, writing, collaboration, and presentation skills through completion of a capstone project that synthesizes the theoretical and subject matter knowledge students have gained in the program. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

BIOD 793: Directed Studies in Biodefense. 1-3 credits.
Individualized study of topics not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, or lab or field study, determined in consultation with instructor. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Permission of instructor and program director.

Registration Restrictions:
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**BIOD 798:** *Master's Research Project in Biodefense.* 3 credits.
Research project related to student's concentration under supervision of faculty advisor. Student produces substantial and original contribution to the field of biodefense on the model of an article in a scholarly journal. Offered by Schar School of Policy & Govt (p. 906). May not be repeated for credit.

**Recommended Prerequisite:** 24 credits in BIOD and permission of project director.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**800 Level Courses**

**BIOD 810:** *Advanced Seminar in Biodefense.* 3 credits.
Explores issues of contemporary and emerging concern in biodefense and biosecurity. Topics may include legal, ethical, scientific, economic, and political aspects of biodefense and biosecurity. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** BIOD 604 and 605 or permission of adviser.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**BIOD 890:** *Doctoral Supervised Internship.* 1-6 credits.
Internship under supervision of qualified biodefense professional at government agency, consulting firm, industrial firm, or other acceptable agency. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of program director or advisor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate level students.

**Schedule Type:** Internship

**BIOD 899:** *Directed Research in Biodefense.* 1-12 credits.
Research on a pertinent topic in biodefense; scope and subject determined by instructor. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Approval of program director.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate level students.

**Schedule Type:** Independent Study

**900 Level Courses**

**BIOD 996:** *Doctoral Reading and Research.* 1-9 credits.
Independent reading and research on specific biodefense topic under faculty member's direction. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, tutorials, or other formats. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree for a maximum 9 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate level students.

**Schedule Type:** Independent Study

**BIOD 998:** *Doctoral Dissertation Proposal.* 1-12 credits.
Development of a research proposal, which forms the basis for doctoral dissertation under guidance of dissertation director committee. Notes: Only 12 credits may be applied to the degree. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**BIOD 999:** *Doctoral Dissertation.* 1-12 credits.
Doctoral dissertation research under direction of dissertation chair. Offered by Schar School of Policy & Govt (p. 906). May be repeated within the degree.

**Recommended Prerequisite:** BIOD 998.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Bioengineering (BENG)**

**100 Level Courses**

**BENG 101:** *Introduction to Bioengineering.* 3 credits.
Surveys the field of bioengineering and the global impact of technology innovation in solving problems in biology and medicine with an emphasis on engineering tools and concepts. Introduces mathematical modeling and analysis of bioengineering problems through the use of standard software packages for simulation. Other topics include: prototyping and design, ethics and regulatory affairs, and history and career paths in Bioengineering. Offered by Bioengineering (p. 970). Limited to two attempts.
Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

200 Level Courses

BENG 220: Physical Bases of Biomedical Systems. 3 credits.
Introduces the physical basis of biomedical systems and signals.
Demonstrates basic concepts of systems and signals theory, and shows their derivation from the biophysical concepts such as mechanics, fluid mechanics, pharmacokinetics and molecular biophysics which underlie the signals in living systems. Aims at providing the student with the mathematical and physical understanding to quantitatively describe biological systems. Offered by Bioengineering (p. 970). Limited to two attempts. Equivalent to ECE 220.

Registration Restrictions:
Required Prerequisites: (BENG 101C, MATH 203C and PHYS 160C) and (MATH 214C or 216C).
May be taken concurrently.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

300 Level Courses

BENG 301: Bioengineering Measurements. 3 credits.
Introduces the basic concepts and tools for making biomedical measurements, describes instrumentation design and analysis considerations, and discusses several practical applications. Offered by Bioengineering (p. 970). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: BENG 380C, 320C and 313C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

BENG 302: Bioengineering Measurements Lab. 1 credit.
Provides hands-on experience with sensors and instrumentation relevant to the analysis of living systems and related processes. Biomedical measurements include electrocardiograms, electromyograms, spirometry, pulse oximetry, and glucose monitoring. Offered by Bioengineering (p. 970). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: BENG 301C.
May be taken concurrently.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

BENG 304: Modeling and Control of Physiological Systems. 3 credits.
Introduces a systems-level understanding of biomedical systems. Emphasis on mathematical modeling of dynamic systems, including the role of feedback. Analogies between electrical and mechanical systems will be discussed. Examples covered will include multiple scales ranging from cells to organ systems. Offered by Bioengineering (p. 970). Limited to two attempts.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: MATH 214C and PHYS 260C and (BENG 320C or SYST 320C) and BENG 313C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

BENG 313: Physiology for Engineers. 3 credits.
Provides a broad introduction to the subject of human physiology, focusing on learning the subject matter from an engineering viewpoint. Emphasis on organs and physiological systems where engineering has a significant role. Offered by Bioengineering (p. 970). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (BENG 101C) and (MATH 114B or 116B) and (BIOL 213C).
C Requires minimum grade of C.
B- Requires minimum grade of B-.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

BENG 320: Bioengineering Signals and Systems. 3 credits.
Introduces the conversion of analog signals to digital ones and methods for using digitally processed signals in biomedical applications. Offered by Bioengineering (p. 970). Limited to two attempts. Equivalent to ECE 320.

Registration Restrictions:
Required Prerequisites: BENG 101C, 220C and MATH 214B-.
C Requires minimum grade of C.
B- Requires minimum grade of B-.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

BENG 322: Health Data Challenges. 3 credits.
Covers methodology and tools used to work with health data structures supporting organizations’ needs for reliable data that are captured, stored, processed, integrated, and prepared for further querying, decision making, data mining and knowledge discovery for a variety of clinical and organizational purposes. Data security and privacy, data standards, data interoperability, health information exchange, and big data analytics are discussed. Offered by Bioengineering (p. 970). Limited to two attempts. Equivalent to IT 322.

Registration Restrictions:
**Required Prerequisites:** IT 214<sup>C</sup> and (STAT 250<sup>C</sup> or 344<sup>C</sup>).  
<sup>C</sup> Requires minimum grade of C.  
Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**BENG 341:** *Introduction to Biomaterials.* 3 credits.  
To provide a fundamental understanding of current, state of the art, and future directions of biomaterials. Offered by Bioengineering (p. 970). Limited to two attempts.  
**Specialized Designation:** Scholarly Inquiry  
**Registration Restrictions:**  
**Required Prerequisites:** (CHEM 251<sup>C</sup> or 211<sup>C</sup>) and (MATH 113<sup>C</sup>) and (BIOL 213<sup>C</sup>).  
<sup>C</sup> Requires minimum grade of C.  
Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**BENG 380:** *Introduction to Circuits and Electronics.* 3 credits.  
Builds on simple circuit concepts introduced in PHYS 260. Includes circuit analysis using superposition, equivalent circuits and transient analysis of RL, RC and RLC circuits; sinusoidal excitations, AC steady state analysis; frequency response; operational amplifiers; semiconductor devices such as diodes, field effect and bipolar transistors; and digital logic circuits. (Not intended for those majoring in electrical or computer engineering.) Offered by Bioengineering (p. 970). Limited to two attempts.  
**Registration Restrictions:**  
**Required Prerequisites:** (PHYS 260<sup>C</sup> and MATH 214<sup>B</sup>) and BENG 320<sup>C</sup>.  
<sup>1</sup> May be taken concurrently.  
<sup>C</sup> Requires minimum grade of C.  
<sup>B</sup> Requires minimum grade of B-.  
Enrollment is limited to students with a major, minor, or concentration in Bioengineering.  
Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture, Recitation

**BENG 381:** *Circuits and Electronics Lab.* 1 credit.  
Lab associated with BENG 380. Provides laboratory experience in basic electronics emphasizing issues and considerations that are paramount for biomedical instrumentation. Not intended for those majoring in electrical or computer engineering. Offers: Not intended for those majoring in electrical or computer engineering. Offered by Bioengineering (p. 970). Limited to two attempts.  
**Registration Restrictions:**  
**Required Prerequisites:** PHYS 261<sup>C</sup> and BENG 380<sup>C</sup>.  
<sup>1</sup> May be taken concurrently.  
<sup>C</sup> Requires minimum grade of C.  
Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Laboratory

**BENG 390:** *Engineering Design and Fabrication.* 3 credits.  
Project based course where students will design projects containing analog and digital components as well as mechanical parts. Students will simulate, build, and test their projects. Offered by Bioengineering (p. 970). Limited to two attempts. Equivalent to ECE 390.  
**Registration Restrictions:**  
**Required Prerequisites:** (BENG 380<sup>C</sup>, ECE 280<sup>C</sup> or 285<sup>C</sup>).  
<sup>C</sup> Requires minimum grade of C.  
Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**BENG 392:** *Engineering Design Studio.* 1 credit.  
Identification and feasibility study of advance engineering problems. Application of path, physics and engineering methods to challenging projects. Preliminary design, modeling, simulation and prototyping of projects. Notes: This course should be taken preceding ECE/BENG 492. Offered by Bioengineering (p. 970). May be repeated within the degree for a maximum 2 credits. Equivalent to ECE 392.

**Recommended Prerequisite:** 75 hours of completed coursework applicable to EE, CpE, or BIOE degree and permission of instructor.

**Schedule Type:** Lecture

**BENG 395:** *RS: Mentored Research in Bioengineering.* 1-3 credits.  
Introduces the scientific research process through "hands on" experience: students are matched with faculty mentors who are actively involved in Bioengineering-related research. Requires no less than 60 hours per semester working with mentors. Offered by Bioengineering (p. 970). May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Research/Scholarship Intensive  
**Recommended Prerequisite:** At least 60 credit hours applicable to the Bioengineering program.

**Registration Restrictions:**  
Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Independent Study

### 400 Level Courses

**BENG 406:** *Introduction to Biomechanics.* 3 credits.  
This course introduces the fundamental principles of musculoskeletal biomechanics, computational simulation of movement, and OpenSim simulator. Topics include functions and models of the musculoskeletal structures, mathematical description of motion, kinetics, and simulation of movement using OpenSim. Offered by Bioengineering (p. 970). Limited to two attempts.  
**Registration Restrictions:**  
**Required Prerequisites:** (PHYS 160<sup>C</sup>) or 243<sup>C</sup>) and MATH 203<sup>C</sup> and 214<sup>C</sup>  
and (BENG 220<sup>C</sup>, SYST 220<sup>C</sup> or ECE 220<sup>C</sup>) and BENG 313<sup>C</sup>.  
<sup>C</sup> Requires minimum grade of C.  
Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**BENG 420:** *Bioinformatics for Engineers.* 3 credits.  
This course introduces the fundamental techniques and tools for analyzing biomedical data, important for many biomedical engineering problems. Topics include regression, classification, clustering,
dimensionality reduction, data representation, pattern matching and algorithm performance evaluation. This innovative course will leverage hybrid learning through a combination of lectures, on-line content, and individual and group projects involving hands-on analysis. Offered by Bioengineering (p. 970). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: BENG 320\textsuperscript{C}, SYST 320\textsuperscript{C} or ECE 320\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may \textbf{not} enroll.

Schedule Type: Lecture

BENG 421: Introduction to Tissue Engineering. 3 credits.
Designed to provide exposure to the concepts of cell/tissue functions and behavior and strategies to manipulate their responses, biomaterials to construct scaffolds, modern techniques of artificial organ development and wound healing and most importantly, the utilization of engineering principles for biomedical applications. Offered by Bioengineering (p. 970). May not be repeated for credit.

Recommended Prerequisite: BENG 220.

Registration Restrictions:
Students with the terminated from VSE major attribute may \textbf{not} enroll.

Schedule Type: Lecture

BENG 437: Medical Image Processing. 3 credits.
Covers the basic concepts of image processing in the context of medical applications. It focuses on the basics of image enhancement in the spatial domain, image enhancement in the frequency domain, image restoration, morphological image processing, image registration and segmentation feature extraction and classification. Offered by Bioengineering (p. 970). Limited to two attempts.

Recommended Prerequisite: BENG 320.

Registration Restrictions:
Students with the terminated from VSE major attribute may \textbf{not} enroll.

Schedule Type: Lecture

BENG 441: Nanotechnology in Health. 3 credits.
Introduces fundamental principles of a wide range of nanoscale biomaterials and their applications in medicine and engineering. Offered by Bioengineering (p. 970). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (BIOL 213\textsuperscript{C} and PHYS 160\textsuperscript{C}) and (CHEM 251\textsuperscript{C} or 211\textsuperscript{C}).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may \textbf{not} enroll.

Schedule Type: Lecture

BENG 451: Translation and Entrepreneurship in Bioengineering. 3 credits.
This course focuses on teaching the process of translational research and on creating both a medical device and a company vision. Emphasis is made on creating a robust medical device prototype based on a deep understanding of the disease. Regulatory and reimbursement processes are also addressed in detail. This course will draw upon lectures and different guest speakers. Offered by Bioengineering (p. 970). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (BIOL 213\textsuperscript{C}) and (CHEM 251\textsuperscript{C} or 211\textsuperscript{C}).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may \textbf{not} enroll.

Schedule Type: Lecture

BENG 491: Bioengineering Senior Seminar I. 1 credit.
Covers the variety of responsibilities of bioengineers to society. Topics include ethics, regulation, research, industry, entrepreneurship, and cost issues. Professional approaches to job searching and effective technical communication will also be discussed. Speakers include faculty, invited guests from industry and government, as well as students. Notes: Students cannot receive credit for BENG 491 and ECE 491. Offered by Bioengineering (p. 970). Limited to two attempts. Equivalent to ECE 491.

Registration Restrictions:
Enrollment limited to students with a class of Senior Plus or Senior.

Students with the terminated from VSE major attribute may \textbf{not} enroll.

Schedule Type: Seminar

BENG 492: Senior Advanced Design Project I. 2 credits.
Conception of senior design project in bioengineering and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan. Notes: Students cannot receive credit for both BENG 492 and ECE 492. Offered by Bioengineering (p. 970). Limited to two attempts.

Mason Core: Capstone, Synthesis (p. 135)

Specialized Designation: Research Associated

Recommended Prerequisite: 90 credit hours applicable to the Bioengineering Program.

Registration Restrictions:
Required Prerequisites: (COMM 100\textsuperscript{C} or 101\textsuperscript{C}) and ENGH 302\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may \textbf{not} enroll.

Schedule Type: Lecture

BENG 493: RS: Senior Advanced Design Project II. 2 credits.
Implementation of project for which preliminary work was done in BENG 492. Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion. Notes: Implementation of project for which preliminary work was done in BENG 492. Offered by Bioengineering (p. 970). Limited to two attempts.

Mason Core: Capstone, Synthesis (p. 135)

Specialized Designation: Research/Scholarship Intensive

Registration Restrictions:
Required Prerequisite: BENG 492\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.
BENG 501: Bioengineering Research Methods. 3 credits.
Examines approaches for scientific research with emphasis on bioengineering. Topics include biophysical origins of bioengineering measures, tools and technology for bioengineering data collection, basic principles of experimental design and statistical analyses, and interpretation of scientific results. Special attention will be given to ethical issues associated with the collection, use, and dissemination of data. Offered by Bioengineering (p. 970). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy. Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

BENG 537: Introduction to Medical Image Processing. 3 credits.
Topics include overview of medical imaging systems, image representation and formats, basic filtering operations, feature detection, and introduction to image segmentation. Projects will focus on biomedical image applications. Offered by Bioengineering (p. 970). May not be repeated for credit.

Recommended Prerequisite: BENG 320 or permission of instructor.

Schedule Type: Lecture

BENG 538: Medical Imaging. 3 credits.
Introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. Introduces engineering students to clinical applications of medical imaging. Emphasis on diagnostic ultrasound and magnetic resonance imaging methods; several other modalities are also covered. Provides overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learnt in class to real-world problems. Offered by Bioengineering (p. 970). May not be repeated for credit. Equivalent to ECE 538.

Recommended Prerequisite: ECE 320 or equivalent; PHYS 262 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

BENG 541: Biomaterials. 3 credits.
Covers the principles of biomaterials and biological interactions with materials, including an overview of biomaterials characterization, design and testing. Specific topics include the use of polymers, ceramics and metallics in biomaterials, drug delivery applications, tissue engineering from an orthopedic and vascular perspective, biocompatibility, acute and chronic biological response to implanted material, and in vitro and in vivo disciplines required. Offered by Bioengineering (p. 970). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

BENG 525: Neural Engineering. 3 credits.
Provides an overview of topics in Neural Engineering. Topics covered range from sensory and motor prosthetic devices, stimulation of biological tissue, bioelectrodes and characterization techniques, brain-machine interfaces, and engineered devices to ameliorate neurodisorders. Prior knowledge in electrical or computer engineering
testing of biomaterials. Offered by Bioengineering (p. 970). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213 (or equivalent), CHEM 251 (or equivalent).

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**BENG 550: Advanced Biomechanics.** 3 credits.
Introduces the fundamental concepts of musculoskeletal biomechanics, and how to apply mechanical principles to quantitatively describe and analyze movement. Topics include properties, functions, and models of the musculoskeletal structures, 3D kinematics, locomotion, and instrumentation systems applied in musculoskeletal biomechanics and movement analysis. Offered by Bioengineering (p. 970). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**BENG 551: Translational Bioengineering.** 3 credits.
Demonstrates the process for the creation of both medical device prototypes and medical device companies. Focuses on designing and building a robust medical device prototype and writing a business plan. Also addresses cost of healthcare, reimbursement, regulatory processes, intellectual property, and marketing and sales aspects. Course will feature lectures, videos, and guest speakers who are successful medical device entrepreneurs. Offered by Bioengineering (p. 970). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**BENG 590: Selected Topics in Bioengineering.** 3 credits.
Addresses selected topics from recent developments in various Bioengineering disciplines. Content may vary each semester depending on instructor and students’ interests. Offered by Bioengineering (p. 970). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**BENG 636: Advanced Biomedical Signal Processing.** 3 credits.
Provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include introduction to physiological origins of biomedical signals, stochastic and adaptive signal processing, spectral estimation, signal modeling and analysis of nonstationary signals. Offered by Bioengineering (p. 970). May not be repeated for credit.

**Recommended Prerequisite:** ECE 535 or equivalent; ECE 528 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**BENG 641: Advanced Nanotechnology in Health.** 3 credits.
Addresses recent developments in various Bioengineering disciplines. Content may vary each semester depending on instructor and students’ interests. Offered by Bioengineering (p. 970). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** ECE 541, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BENG 699:** Advanced Topics in Bioengineering. 3 credits.
Advanced topics of current interest in bioengineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas. Offered by Bioengineering (p. 970). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**700 Level Courses**

**BENG 725:** Computational Motor Control. 3 credits.
Uses approaches from robotics, control theory, and neuroscience to understand biological motor systems. Contents include modeling muscles, reflexes and neural systems to understand how the central nervous system plans and controls movement of the eyes and limbs. The theoretical control problem is compared to known neuronal properties of the motor system and diseases of the motor system affecting movement control. Offered by Bioengineering (p. 970). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**BENG 738:** Advanced Medical Image Processing. 3 credits.
Advanced Medical Image Processing covers advanced processing techniques used in modern medical imaging. The course aims at developing an understanding of the mathematical background, principles and application of techniques such as segmentation, registration, morphometry, general linear modeling, principal and independent component analysis. Offered by Bioengineering (p. 970). May not be repeated for credit.

**Recommended Prerequisite:** BENG 320 (or equivalent), ECE 537 (or equivalent).

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**BENG 745:** Biomedical Systems and Microdevices. 3 credits.
Bio-micro-electro-mechanical systems (BioMEMS) provide a robust approach to mimic in vivo microenvironments within controlled in vitro settings. This course introduces students to the highly interdisciplinary field of Lab-on-a-Chip technologies with emphasis on its advanced applications in biological and biomedical engineering. In addition to the microfabrication processes, a variety of analytical techniques routinely used in biomedical research will also be covered. Offered by Bioengineering (p. 970). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**BENG 750:** Modeling and Simulation of Human Movement. 3 credits.
Introduces the development and simulation of data-driven 3D neuromusculoskeletal models to quantitatively study human movement in health and disease. Topics include reconstructing 3D models from imaging data, estimating kinematics from motion data, simulating movement incorporating multimodality data, and analyzing muscle and joint forces. Students use computational biomechanics software. The course consists of lectures, article presentations, modeling assignments and a project. Offered by Bioengineering (p. 970). May not be repeated for credit.

**Recommended Prerequisite:** BENG 550 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**BENG 758:** Independent Reading and Research in Bioengineering. 1-6 credits.
Independent study in Bioengineering under the supervision of a faculty member, resulting in an acceptable technical report or presentation. This course may be repeated once for a total of 12 credit hours towards a graduate degree in Bioengineering. Offered by Bioengineering (p. 970). May be repeated within the degree for a maximum 12 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Thesis
**800 Level Courses**

BENG 800: *Bioengineering Colloquium.* 0 credits.
Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty. Notes: Required attendance and participation in a minimum of 3 seminars per semester. Offered by Bioengineering (p. 970). May be repeated within the degree.

**Recommended Prerequisite:** Admission to PhD Bioengineering program.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

BENG 820: *Seminar in Neuroengineering.* 3 credits.
Selective analysis and discussion of topics in neuroengineering in areas of current research interest. Topics may include brain machine interfaces, advanced materials for implantable devices, computational neuroscience, neuronal biosensors and assays, and neuromorphetics. Offered by Bioengineering (p. 970). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to PhD Bioengineering program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

BENG 830: *Seminar in Biomedical Imaging.* 3 credits.
Selective analysis and discussion of topics in biomedical imaging in areas of current research interest. Topics may include techniques and analyses for ultrasound, magnetic resonance imaging (MRI), functional MRI, nuclear imaging, computer assisted tomography, positron emission tomography, and emergent approaches to imaging for health and disease. Offered by Bioengineering (p. 970). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to PhD Bioengineering program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

BENG 840: *Seminar in Nano-scale Bioengineering.* 3 credits.
Selective analysis and discussion of topics in nano-scale bioengineering in areas of current research interest. Topics may include nanoengineered materials, nanoscale devices and systems, and novel nano-scale fabrication and modeling approaches with application to biomedicine. Offered by Bioengineering (p. 970). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to PhD Bioengineering program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

BENG 850: *Seminar in Biomechanics.* 3 credits.
Selective analysis and discussion of topics in biomechanics in areas of current research interest. Topics may include computational and physiological modeling for biomechanics, multiscale representation of biomechanical systems, data fusion techniques for biomechanics, and application of quantitative biomechanics for diagnostics or medical intervention. Offered by Bioengineering (p. 970). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to PhD Bioengineering program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**900 Level Courses**

BENG 998: *Doctoral Dissertation Proposal.* 1-12 credits.
Work on research proposal that forms basis for doctoral dissertation. May be repeated as needed. Notes: No more than 24 credits of BENG 998 and 999 may be applied to doctoral degree requirements. Offered by Bioengineering (p. 970). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Admission to PhD Bioengineering program.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Dissertation

BENG 999: *Doctoral Dissertation.* 1-12 credits.
Formal record of commitment to doctoral dissertation research under direction of faculty member in bioengineering. May be repeated as needed. Notes: Once enrolled in 999, students must maintain continuous registration in 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer. Offered by Bioengineering (p. 970). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Admission to PhD Bioengineering program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Dissertation
Bioinformatics (BINF)

300 Level Courses

BINF 334: Perl for Bioinformatics. 3 credits.
Introduction into Perl programming language. Topics include data representation, control structures, file input/output, subroutines, regular expressions, debugging, relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL or equivalent query language. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Knowledge of programming language or CS 112 or equivalent.

**Schedule Type:** Lecture

BINF 354: Foundations in Mathematical Biology. 3 credits.
Interdisciplinary introduction to life sciences for physicists, chemists, engineers, and mathematicians. Combines knowledge from natural sciences, social and behavioral sciences, quantitative reasoning, and information technology. Covers selected topics in ecology, physiology, biochemistry, and behavior. May include biochemical reaction kinetics, Hodgkin-Huxley model for cellular electrical activity, continuous and discrete population interactions, and neural network models of learning. Techniques utilized include ordinary differential equations, difference equations, algebraic equations, and computer simulations. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Mason Core:** Synthesis (p. 135)

**Recommended Prerequisite:** Completion or concurrent enrollment in all other required Mason Core courses (must include a chemistry course); MATH 114 or equivalent.

**Schedule Type:** Lecture

400 Level Courses

BINF 401: Bioinformatics and Computational Biology I. 3 credits.
Covers the following topics and related methodology: protein sequence, structure prediction, and modeling methods; nucleic acid sequence and structure prediction; gene structure prediction in prokaryotes and eukaryotes; elements of system biology. Students will learn programming approaches to solve bioinformatics problems. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213, BIOL 214 and CDS 130 with a grade of C or better, or its equivalent, or permission of instructor.

**Schedule Type:** Lecture

BINF 402: Bioinformatics and Computational Biology II. 3 credits.
Continuation of BINF401 and studies in-depth several algorithms and methods used in bioinformatics and computational biology. Students will learn sequence alignment and assembly algorithms, hidden Markov models, classification and prediction methods, genome annotation. These techniques will then be applied to current bioinformatics problems. Programming assignments are incorporated in the course program. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BINF 401.

**Schedule Type:** Lecture

BINF 403: Bioinformatics and Computational Biology Lab I. 1 credit.
Laboratories will introduce students to bioinformatics tools designed to answer research problems in the topics covered in lectures, such as sequence alignment, sequence pattern recognition, structural conformation modeling, phylogenetic analysis methods and image comparisons. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Corequisite:** BINF 401.

**Schedule Type:** Laboratory

BINF 404: Bioinformatics and Computational Biology Lab II. 1 credit.
Laboratories will introduce students to research bioinformatics tools relevant to lecture topics such as: the correspondence of measured fragments to parent biomolecules, inference methods for gene and protein networks, predicting system outputs given specified inputs. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Corequisite:** BINF 402

**Schedule Type:** Laboratory

BINF 450: Bioinformatics for Life Sciences. 4 credits.
Teaches students how to understand the basis of and use of bioinformatics software in database searching, sequence analysis, gene identification, genomics, protein structure and phylogeny. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213, and either BIOL 482 or CHEM 463 or BIOL 483.

**Schedule Type:** Lecture

BINF 470: Molecular Biophysics. 3 credits.
Offers a broad introduction into molecular biophysics. Demonstrates that the application of methods of physics provides a unique opportunity to tackle complex biological problems. Designed for physics or chemistry majors; also useful for biology majors interested in bioinformatics and computational biology. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to PHYS 370.

**Recommended Prerequisite:** PHYS 307 or CHEM 331, or permission of instructor.

**Schedule Type:** Lecture

BINF 490: Independent Senior Research in Bioinformatics and Computational Biology. 3 credits.
Course offers individual research in bioinformatics and computational biology under the guidance of faculty member. Written report required upon course completion. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Schedule Type:** Research

BINF 491: Senior Thesis in Bioinformatics. 1 credit.
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member. Notes: An oral progress report with a poster at the fall semester Bioinformatics Student Research
Day is required. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Corequisite:** BINF 401.

**Schedule Type:** Research

**BINF 492: Senior Thesis in Bioinformatics.** 1 credit.
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member. Notes: A written thesis in standard format is required. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Corequisite:** BINF 402.

**Schedule Type:** Research

### 500 Level Courses

**BINF 530: Introduction to Bioinformatics Methods.** 3 credits.
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Graduate, Non-Degree or Undergraduate level students may **not** enroll.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BINF 531: Molecular Cell Biology for Bioinformatics.** 3 credits.
Intensive review of biochemistry, molecular biology, and cell biology necessary to begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and expression and control. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate 300 and 400 level courses in biochemistry or cell biology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BINF 550: Introduction to Bioinformatics Database Design.** 3 credits.
Students will acquire skills needed to exploit public biological databases, and establish and maintain personal databases that support their own research. Skills include learning underlying data models and the basics of DBMS and SQL. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Introductory computer programming course, or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

### 600 Level Courses

**BINF 630: Bioinformatics Methods.** 3 credits.
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BINF 631: Molecular Cell Biology for Bioinformatics.** 3 credits.
Intensive review of biochemistry, molecular biology, and cell biology necessary to begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and gene expression and control. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate background in biochemistry, or cell biology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BINF 633: Molecular Biotechnology.** 3 credits.
Introduction to the theory and practice of molecular biotechnology, with emphasis on the application of tools in today's society. Includes study of recombinant DNA technology, genomics, and bioinformatics as applied to commercially important products. Lectures reflect more recent advances and applications in the commercial aspects of biology. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Registration Restrictions:**
BINF 634: Bioinformatics Programming. 3 credits.
Data representation, control structures, file input/output, subroutines, regular expressions, debugging, introduction to relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL, or equivalent query language. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 635: Microarray Methodology and Analysis. 3 credits.
Theory and practice of genome analysis including genetics, biochemistry, and tools for analyzing global gene expression, and detection and quantification of genes and gene products. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: BINF 633 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 636: Forensic DNA Sciences. 3 credits.
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to FRSC 560.

Recommended Prerequisite: CSI 603 and 604 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 639: Introduction to Biometrics. 3 credits.
Introduction to methods for measuring humans. Topics include face, speaker, fingerprint, and shoeprint recognition; and handwriting analysis. Students develop computer programs to perform many of these tasks. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: CSI 603 and 604 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 641: Biomolecular Modeling. 3 credits.
Introduction to basic principles and practice of computational biomolecular modeling. Students learn the elements of physical chemistry and molecular biology, which constitute the foundation of molecular modeling. Practical application of biomolecular software and development of related skills are emphasized through online lectures, homework, and course project. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: Students are expected to be familiar with basic concepts of physics, calculus, and biology on undergraduate level.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 650: Introduction to Bioinformatics Database Design. 3 credits.
Students will acquire skills needed to exploit public biological databases and establish and maintain personal databases that support their own research; such skills include learning underlying data models and the basics of DBMS and SQL. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: BINF 634 or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 690: Numerical Methods for Bioinformatics. 3 credits.
Computational techniques for solving scientific problems focusing on applications in bioinformatics and computational biology. Students
develop the ability to convert a quantitative problem into computer programs to solve the problem. Emphasizes efficiency and readability of code. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** CS 112, MATH 113 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**700 Level Courses**

**BINF 701: Systems Biology.** 3 credits.
Systems biology seeks to understand how a complex biological system functions. This involves the use of computational methods and models to integrate information obtained about these systems through a wide range of methods that span multiple spatial and temporal scales. Current research examples will be used to motivate and demonstrate these approaches. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to BIOS 701.

**Recommended Prerequisite:** Admission to the Ph.D. program in Biosciences or Bioinformatics, CHEM 663 or equivalent.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BINF 702: Biological Data Analysis.** 3 credits.
Trains students in research methodologies for life sciences. Covers the three phases of biological research projects: experimental design, data collection and data analysis. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD program in bioinformatics or biosciences or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BINF 703: Bioinformatics Lab Rotation.** 1 credit.
Short-term introductory research on a specific topic in computational sciences and informatics under direction of faculty member. Offered by School of Systems Biology (p. 748). May be repeated within the term for a maximum 3 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**BINF 704: Colloquium in Bioinformatics.** 1 credit.
Seminar presentations in a variety of areas of bioinformatics and computational biology by COS faculty, staff, advanced PhD students, and professional visitors. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BINF 705: Research Ethics.** 1 credit.
Examines ethical issues in scientific research, reflecting on purpose and reviewing foundational principles for evaluating ethical issues. Provides skills for survival in scientific research through training in moral reasoning and teaching of responsible conduct. Students learn to apply critical-thinking skills to design, execution, and analysis of experiments and analysis of ethical issues in research, including use of animals and humans, standards in computer community, and research fraud. Guidelines for data ownership, manuscript preparation, and conduct of people in authority may be presented and discussed. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BINF 730: Biological Sequence and Genome Analysis.** 3 credits.
Fundamental methods for analyzing nucleic acid and protein sequences, including pairwise and multiple alignment, database search methods, profile searches, and phylogenetic inference. Development of probabilistic tools, including hidden Markov models and optimization algorithms. Survey of current software tools. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** A course in molecular biology, a course in probability, and ability to program in a high-level language, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BINF 731: Protein Structure Analysis.** 3 credits.
Computational methods for analyzing, classifying, and predicting three-dimensional protein structures. Covers theoretical approaches, techniques, and computational tools for protein structure analysis. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor, or previous courses in molecular biology, biochemistry, and computer programming.
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 732: Genomics. 3 credits. Surveys computational tools and techniques to study whole genomes, and explores biological basis of genome analysis algorithms. Topics include genome mapping, comparative genomics, and functional genomics. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to CSI 732.

Recommended Prerequisite: General biology, programming experience, CSI 700 or equivalent, CSI 731, or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 733: Gene Expression Analysis. 3 credits. Analyzes gene expression data. Topics include cluster analysis and visualization of expression data, inference of genetic regulatory networks, and theoretical models of genetic networks. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: Permission of instructor, ability to program in a high-level language and a course in molecular biology; S-Plus or Matlab experience recommended.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 734: Advanced Bioinformatics Programming. 3 credits. Topics include algorithm design, complex data structures, object oriented programming, relational databases, designing modules, and graphics and web programming. Students complete a bioinformatics programming project. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: BINF 634, or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 739: Topics in Bioinformatics. 1-3 credits. Selected topics in bioinformatics not covered in fixed-content bioinformatics courses. Offered by School of Systems Biology (p. 748). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 740: Introduction to Biophysics. 3 credits. Introduces biophysics, focusing on physical and chemical concepts and their relation to rapidly expanding interdisciplinary interfaces among biology, chemistry, and physics. Reveals multiscale nature of biophysics, and includes exploration of macroscopic and microscopic applications. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to PHYS 630.

Recommended Prerequisite: Undergraduate courses in General Physics, Calculus, and Biology.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 741: Introduction to Computer Simulations of Biomolecules. 3 credits. Details computational methods in biomolecular simulations, such as molecular dynamics and Monte Carlo algorithms. Special emphasis given to practical applications. Reviews most recent advances in biomolecular simulations. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: Good programming skills, BINF 690 and 701, or permission of instructor.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BINF 751: Biochemical and Cellular Systems Modeling. 3 credits. Mathematical and computational methods for analysis of cellular and subcellular processes. Topics may include ion channels, whole cell models, intracellular signaling, biochemical oscillations, pathway modeling, parameter estimation, and sensitivity analysis. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: Calculus and knowledge of a computer programming language; and BINF 690 and 701; or permission of instructor. Course in differential equations is recommended.

Schedule Type: Lecture

BINF 760: Machine Learning for Bioinformatics. 3 credits. Machine learning and data mining methods relevant to application to problems in computational biology. Methods include decision trees, random forests, rule learning methods, support vector machines, neural networks, genetic algorithms, instance-based learning, Bayesian networks, and evaluation metrics for learning systems. Applications include cancer prediction, gene finding, protein function classification, gene regulation network inference, and other recent bioinformatics applications selected from the literature. Notes: In addition to lectures from the instructor, students will present papers from the literature and complete a machine learning project. Offered by School of Systems Biology (p. 748). May not be repeated for credit.
**Recommended Prerequisite:** BINF 630, BINF 631, and BINF 634, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BINF 795:** *Bioinformatics Internship.* 1-3 credits.
Involves off-campus, professional work with approved agencies, institutions, non-profits, or businesses throughout the semester. The internship work must produce one or more products such as: a comprehensive report, a departmental presentation, a research project, or an article. Internship placement and product type must be approved by the student’s faculty advisor. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Internship placement and parameters must be approved by the faculty advisor prior to registration.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**BINF 796:** *Directed Reading and Research.* 1-6 credits.
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**BINF 798:** *Research Project.* 3 credits.
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Twelve graduate credits and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**BINF 799:** *Master's Thesis.* 1-6 credits.
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report (master's thesis) and oral defense. Offered by School of Systems Biology (p. 748). May be repeated within the degree.

**Recommended Prerequisite:** Admission to doctoral program or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**900 Level Courses**

**BINF 996:** *Doctoral Reading and Research.* 1-6 credits.
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to doctoral program or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.
BINF 998: Doctoral Dissertation Proposal. 1-12 credits.
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee. Offered by School of Systems Biology (p. 748). May be repeated within the degree.

Recommended Prerequisite: Permission of advisor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

BINF 999: Doctoral Dissertation. 1-12 credits.
Doctoral dissertation research under direction of dissertation director. Notes: No more than 24 credits in BINF 998 and 999 may be applied to doctoral degree requirements. Offered by School of Systems Biology (p. 748). May be repeated within the degree.

Recommended Prerequisite: Admission to doctoral candidacy. Students should contact the department for permission and CRN to register. Please indicate your major and semester in the subject heading.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Biology (BIOL)

100 Level Courses

BIOL 103: Introductory Biology I. 4 credits.
Topics include chemistry of life, cell structure and function, Mendelian genetics, evolution, and diversity of life. Notes: Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to BIOL 103T, BIOL 105.

Mason Core: Natural Science with Lab (p. 135)

Schedule Type: Laboratory, Lecture

BIOL 104: Introductory Biology II. 4 credits.
Topics include animal (including human) structure, function, homeostatic mechanisms, organ systems, behavior, higher plant systems, and major concepts in ecology. Course requires use of organisms. Notes: Students are strongly urged to take BIOL 103 prior to BIOL 104. Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to BIOL 104T, BIOL 106.

Mason Core: Natural Science with Lab (p. 135)

Schedule Type: Laboratory, Lecture

Recommended Prerequisite: BIOL 103/104 coordinator and department chair.

Biological Biology II Laboratory. 1 credit.
The structure and function of major organ systems of animals and an examination of the structure and function of plants, emphasizing the higher plants. Notes: Not available to students who have taken BIOL 104 or the equivalent. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to BIOL 104.

Recommended Prerequisite: Permission of BIOL 103/104 coordinator and department Chair.

Schedule Type: Laboratory

BIOL 124: Human Anatomy and Physiology. 4 credits.
Introduction to structure and function of body's major organ systems. Note: must be taken in sequence. Does not satisfy the natural science requirement in COS or CHSS. Course requires use of organisms. Not available for Biology major credit. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 124.

Registration Restrictions:
Required Prerequisite: BIOL 124C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

BIOL 125: Human Anatomy and Physiology. 4 credits.
Introduction to structure and function of body's major organ systems. Notes: Does not satisfy the natural science requirement for the BA in COS or CHSS. Not available for Biology major credit. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 124.

Registration Restrictions:
Required Prerequisite: BIOL 124.

Schedule Type: Laboratory, Lecture

BIOL 126: Plants and People. 3 credits.
An introduction to the interaction of plants and people from a biological perspective and the tools to continue life-long critical evaluation of emerging issues in human nutrition, agriculture, medicine, and global environmental change as they relate to plant biology. Designated a Green Leaf Course. Offered by Biology (p. 617). May not be repeated for credit.

Mason Core: Natural Science Overview, Encore:Sustainability (p. 135)

Specialized Designation: Green Leaf Course

Schedule Type: Lecture

200 Level Courses

BIOL 213: Cell Structure and Function. 4 credits.
For science majors and preprofessionals in life sciences. Introduction to cell chemistry, metabolism, and genetics. Note: for science majors and pre-professionals in the life sciences. Offered by Biology (p. 617). May not be repeated for credit.

Mason Core: Natural Science with Lab (p. 135)

Recommended Corequisite: CHEM 211

Schedule Type: Laboratory, Lecture
**BIOL 214: Biostatistics for Biology Majors.** 4 credits.
An introduction to statistics used in the life sciences. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Corequisite:** BIOL 213

**Schedule Type:** Lecture, Recitation

**BIOL 246: Introductory Microbiology.** 3 credits.
Introduction to microbial cell structure, physiology, and pathogenicity. Emphasizes control of microorganisms, host-parasite interactions including immunology, and viral and bacterial pathogens. Note: not available for Biology major credit or to students who have BIOL 213, 302, 305, or 418. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** C or better in BIOL 124 and 125, one year of general biology, or permission of instructor.

**Recommended Corequisite:** BIOL 306.

**Registration Restrictions:** Students cannot enroll who have a major in Biology.

**Schedule Type:** Lecture

**BIOL 295: Summer Research in Biology.** 1-3 credits.
Students enrolled in this course study life science related topics in an approved research environment during the summer. This course may involve one or more of the following: reading peer reviewed literature, conducting a field or laboratory study, attending scientific seminars and workshops, writing an abstract, preparing and presenting a poster, or writing a research paper. Notes: May be taken for 1 to 3 credits and repeated once for a total of 3 credits. Total limit for BIOL 295 is 3 credits toward 44 credits for BS or BA (as long as the number of 100-200 level credits for the biology areas has not been exceeded). Offered by Biology (p. 617). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Permission of instructor and Biology Program Director.

**Schedule Type:** Research

### 300 Level Courses

**BIOL 301: Biology and Society.** 3 credits.
Biological problems facing society including pollution, cloning, emerging diseases, global warming, and overpopulation. Notes: Not available for biology major or minor elective credit. May be repeated if topic is different. Offered by Biology (p. 617). May be repeated within the term.

**Mason Core:** Synthesis (p. 135)

**Recommended Prerequisite:** BIOL 103 and 60 credits, or permission of instructor.

**Schedule Type:** Lecture

**BIOL 302: Alternative Careers in Biology.** 1 credit.
This course will explore non-traditional careers that utilize a biology degree. Weekly seminars will allow biology undergraduates to discuss and explore the broad-range of career options that utilize a biology degree with professionals in those fields. Notes: Biology majors only. Offered by Biology (p. 617). May not be repeated for credit.

**Schedule Type:** Seminar

**BIOL 303: Animal Biology.** 4 credits.
Emphasizes structure and function of vertebrates, but surveys all animal groups and protozoa. Also covers evolutionary theory, and evolutionary history of major animal groups. Course requires use of organisms. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to BIOL 310.

**Recommended Prerequisite:** C or better in BIOL 213, or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**BIOL 304: Plant Biology.** 4 credits.
Introduction to study of plants, their structure, development, nutrition, and ecology. Emphasizes flowering plants, but surveys all groups and their phyllogenetic relationships. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to BIOL 310.

**Recommended Prerequisite:** C or better in BIOL 213, or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**BIOL 305: Biology of Microorganisms.** 3 credits.
Morphology, physiology, and pathogenicity of certain groups of bacteria, fungi, and viruses; stresses host-parasite interactions. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Corequisite:** BIOL 306.

**Registration Restrictions:**

**Required Prerequisites:** (BIOL 213C or BIOL 214C or U213).

Requires minimum grade of C.

Students cannot enroll who have a major in Nursing.

**Schedule Type:** Lecture

**BIOL 306: Biology of Microorganisms Laboratory.** 1 credit.
Laboratory techniques in culturing, staining, and identifying microorganisms. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Corequisite:** BIOL 305 or 246.

**Schedule Type:** Laboratory

**BIOL 308: Foundations of Ecology and Evolution.** 5 credits.
An examination of the principles of ecology, evolution, and the impact of humans on the world around them. Topics will include evolutionary history, biological diversity, and analyzes of interactions among organisms and between organisms and their environment. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to BIOL 308T, BIOL 328, BIOL 338.

**Specialized Designation:** Scholarly Inquiry, Writing Intensive in the Major

**Recommended Prerequisite:** BIOL 311.

**Registration Restrictions:**

**Required Prerequisites:** (BIOL 213C and 214C) or (EVPP 110C and BIOL 214C).

Requires minimum grade of C.

**Schedule Type:** Laboratory, Lecture
**BIOL 309: Introduction to Oceanography.** 3 credits.
Introduction to chemical, biological, and geological aspects of oceanic environment. May include field trips. Notes: May include field trip. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to GEOL 309.

**Recommended Prerequisite:** Two of the following lab sciences courses are required for a total of 8 credits: [GEOL 101 or 102], [EVPP 110 or 111 or 210], CHEM 211, [BIOL 103 or 213], [PHYS 160 and 161 or 243 and 244].

**Schedule Type:** Lecture

**BIOL 310: Biodiversity.** 3 credits.
Explores the fundamental principles governing organismal biology while introducing the three domains of life: the Archaea, the Bacteria, the Eukaryotes, plus viruses. One off-campus field trip is required. Notes: BIOL 310 has replaced BIOL 303 and 304. Students who have taken BIOL 310 may not receive credit toward the major for BIOL 303 and/or BIOL 304. Offered by Biology (p. 617). May be repeated within the degree for a maximum credits. Equivalent to BIOL 303, BIOL 304.

**Specialized Designation:** Scholarly Inquiry

**Recommended Corequisite:** BIOL 330.

**Registration Restrictions:**
**Required Prerequisite:** (BIOL 213)$^C$.
$^C$ Requires minimum grade of C.

**Schedule Type:** Lecture

**BIOL 311: General Genetics.** 4 credits.
Basic principles of heredity and modern developments in this field. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 214.

**Registration Restrictions:**
**Required Prerequisite:** (BIOL 213)$^C$.
$^C$ Requires minimum grade of C.

**Schedule Type:** Laboratory, Lecture

**BIOL 312: Biostatistics for Bioinformatics.** 4 credits.
Use of probability and descriptive and inferential statistical techniques in interpreting biological data. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 214 and CDS 130 with a grade of C or better, or its equivalent or permission of the instructor.

**Schedule Type:** Laboratory, Lecture

**BIOL 313: Human Genetics for the Social Sciences.** 3 credits.
Emphasizes topics of interest to students in social sciences, but open to any non-biology major. Topics include human genome and its inheritance; nature versus nurture; genetic disease; genetics of sex determination, intelligence, personality, and mental illness; genetic differences within and between populations; and evolution of human beings. Notes: Not available for biology credit. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** One year of Biology and permission of instructor.

**Schedule Type:** Lecture

**BIOL 314: Introduction to Research Design and Analysis.** 4 credits.
Introduction to research design in a wide range of biological disciplines. Lecture will concentrate on how to design experiments with proper controls for statistical analysis, as well as obtaining permits and approvals from appropriate agencies. In recitation students will be given data sets to analyze. Offered by Biology (p. 617). May not be repeated for credit.

**Specialized Designation:** Scholarly Inquiry

**Recommended Prerequisite:** BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212. Completion of Biology core recommended. Must be enrolled in Biology Research Semester.

**Schedule Type:** Lecture, Recitation

**BIOL 318: Conservation Biology.** 3 credits.
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 318.

**Recommended Prerequisite:** BIOL 308 or BIOL 310, or permission of instructor.

**Schedule Type:** Lecture

**BIOL 320: Comparative Chordate Anatomy.** 4 credits.
Compares anatomy and morphology of major chordate groups. Lab emphasizes shark, mudpuppy, cat, and rabbit. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or BIOL 310 or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**BIOL 322: Developmental Biology.** 3 credits.
Principles of embryonic development and differentiation in animal species at cellular, molecular, tissue, and whole organism levels. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213 and BIOL 311, or permission of instructor.

**Schedule Type:** Lecture

**BIOL 323: Lab for Developmental Biology.** 1 credit.
This laboratory will explore early developmental processes using classical and modern developmental biology techniques. Students will have the opportunity to propose and carry out a small independent project using zebrafish as a model organism. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 322 or permission of instructor.

**Schedule Type:** Laboratory

**BIOL 326: Animal Physiology.** 3 credits.
General consideration of animal function emphasizing common life problems and methods for solving them. Topics include intercellular communication (nervous and endocrine), metabolism, water and solute balance, and cardiovascular and respiratory physiology. Offered by Biology (p. 617). May not be repeated for credit.
Recommended Prerequisite: BIOL 213 and BIOL 311, or permission of instructor.

Schedule Type: Lecture

**BIOL 328: Insect Biology.** 4 credits.
This is a writing intensive experience and laboratory for transfer students who have previously taken an equivalent course to BIOL 308 that did not meet the writing intensive requirements in the biology major. This course is paired with BIOL 308. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or BIOL 214 with a grade of C or better or permission of instructor.

Recommended Corequisite: BIOL 310.

Schedule Type: Laboratory

**BIOL 330: Biodiversity Lab and Recitation.** 2 credits.
Explores the fundamental principles governing organismal biology while introducing the three domains of life: the Archaea, the Bacteria, the Eukaryotes, plus viruses. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture

**BIOL 331: Invertebrate Zoology.** 4 credits.
Survey of invertebrate phyla, excluding insects, showing morphology, phylogeny, and general biology of these groups. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture

**BIOL 332: Insect Biology.** 4 credits.
Survey of insects including taxonomy, morphology, physiology, behavior, ecology, and economic importance. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture

**BIOL 334: Vertebrate Paleontology.** 4 credits.
Vertebrate Paleontology explores the evolution of vertebrates from the early Paleozoic to Recent. The course will cover the systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions will include fishes, early tetrapods & amniotes, dinosaurs, birds and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts. A weekend field trip is included. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to GEOL 334.

Recommended Prerequisite: Any two courses from the following list: GEOL 101, GEOL 102, BIOL 103, BIOL 104, BIOL 213, BIOL 303 or the permission of the instructor.

Schedule Type: Laboratory, Lecture

**BIOL 335: Forensic Entomology.** 3 credits.
Explores the use of insects and other arthropods in field of forensic science as it pertains to the investigations of human and animal deaths and abuse, food and other product contamination, thefts, the illegal drug trade and unethical entomological practices. The use and presentation of this information from such investigations in court room proceedings will be discussed. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or permission of instructor.

Schedule Type: Lecture

**BIOL 336: Invertebrate Paleontology.** 4 credits.
Classification, evolutionary trends, and distribution of common invertebrate fossils. May include field trips. Notes: May include field trips. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to GEOL 312.

Recommended Prerequisite: Either GEOL 101 and GEOL 102; or BIOL 103 and BIOL 104; or BIOL 213 and BIOL 310.

Schedule Type: Laboratory, Lecture

**BIOL 338: Lab for Fundamentals of Ecology and Evolution.** 2 credits.
This is a writing intensive experience and laboratory for transfer students who have previously taken an equivalent course to BIOL 308 that did not have a lab and did not meet the writing intensive requirements in the biology major. This course is paired with BIOL 308. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: Permission of Biology Program Director and faculty coordinator of BIOL 308.

Schedule Type: Laboratory

**BIOL 344: Plant Diversity and Evolution.** 4 credits.
Investigates the diversity of vascular plants, including angiosperms, their evolutionary relationships, and the bases of their classification and identification. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture

**BIOL 345: Plant Ecology.** 4 credits.
Investigates the interaction of plants with their abiotic and biotic environment, native Virginian plant communities and their causes, and global processes affecting plant distributions over geological time. Notes: Three Saturday or Sunday field trips required. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture

**BIOL 350: Freshwater Ecosystems.** 4 credits.
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Lectures, field trips, and lab exercises teach physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 350.
Recommended Prerequisite: CHEM 211/212 or CHEM 155/156 and BIOL 308.

Schedule Type: Laboratory, Lecture

**BIOL 355:** Ecological Engineering and Ecosystem Restoration. 4 credits.
Provides definition, classification and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration, and the utilization of natural processes to provide ecosystem services to society and benefits to nature. Provides students with a systems-oriented perspective on environmental studies. Students will study principles in general system ecology and ecological engineering and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with field microcosms/meocosms in a newly established Wetland Mesocosm Compound on the campus. This course will involve a field trip (1-2 days). Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: CHEM 211, BIOL 308 and PHYS 243.

Schedule Type: Laboratory, Lecture

**BIOL 374:** Biogeography: Space, Time, and Life. 3 credits.
A survey of the relationship between the distribution of plants and animals on the earth surface and the physical geography and environmental characteristics. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to GGS 321.

Recommended Prerequisite: One of the following: BIOL 310, GGS 122, GGS 102, or permission of instructor.

Schedule Type: Lecture

**BIOL 377:** Applied Ecology. 3 credits.
Introduction to ecosystem concepts and their applications to natural and managed ecosystems. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 377.

Recommended Prerequisite: Completion of 60 hrs including 8 hrs of BIOL, GEOL or CHEM or permission of instructor.

Schedule Type: Lecture

**BIOL 379:** RS: Ecological Sustainability. 4 credits.
Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 378.

Mason Core: Capstone (p. 135)

Specialized Designation: Green Leaf Course, Research/Scholarship Intensive

Recommended Prerequisite: BIOL 308 or permission of instructor.

Schedule Type: Laboratory, Lecture

**BIOL 382:** Introduction to Virology. 3 credits.
An introduction to the fundamental nature of viruses, their classification, morphology, chemistry and their role in human disease. Offered by Biology (p. 617). May not be repeated for credit.

Registration Restrictions:

Required Prerequisites: (BIOL 305<sup>C</sup> or L305).<sup>1</sup>

<sup>1</sup> Requires minimum grade of C.

Schedule Type: Lecture

**BIOL 385:** Biotechnology and Genetic Engineering. 3 credits.
Emphasizes theory and applications, including significance and societal implications of biotechnology applied to medicine, agriculture, and environment. Offered by Biology (p. 617). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: BIOL 311<sup>C</sup> or L311.

<sup>1</sup> Requires minimum grade of C.

Schedule Type: Lecture

**400 Level Courses**

**BIOL 401:** Phage Discovery. 3 credits.
Discovery-based undergraduate research course where students purify phage from soil, use a variety of microbiology techniques, annotate phage genomes and use bioinformatics analyses. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 311 or equivalent or permission of Instructor.

Schedule Type: Lecture

**BIOL 402:** Applied and Industrial Microbiology. 3 credits.
Biology of microorganisms of ecological and industrial significance. Includes food production, spoilage and preservation, fermentation technology, waste disposal, water purification, biodeterioration, and decomposition. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 213, BIOL 305 or BIOL 306; CHEM 211, CHEM 212 or permission of instructor.

Schedule Type: Lecture

**BIOL 403:** Techniques in Applied and Industrial Microbiology. 1 credit.
Lab exercises illustrate basic and applied methodologies, including isolation of commercially useful strains. Discusses production and purification of industrial products. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 213, BIOL 305, BIOL 306; CHEM 211, CHEM 212. BIOL 402 (concurent enrollment is permitted) or permission of instructor.

Schedule Type: Laboratory

**BIOL 404:** Medical Microbiology. 3 credits.
Basic principles of infectious diseases caused by bacteria and viruses. Discusses genetics and molecular mechanisms of pathogenicity. Offered by Biology (p. 617). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (BIOL 305<sup>C</sup> or L305) and (BIOL 306<sup>C</sup> or L306).<sup>1</sup>

<sup>1</sup> Requires minimum grade of C.

Schedule Type: Lecture

**BIOL 405:** Microbial Genetics. 4 credits.
Study of structure and function of bacterial DNA, emphasizing mechanisms of gene transfer, expression and regulation. Introduces DNA
repair, mutation, and life cycles of bacteriophage. Offered by Biology (p. 617). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (BIOL 305\(^C\) or L305) and (BIOL 306\(^C\) or L306).
\(^C\) Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

BIOL 406: Microbial Physiology and Metabolism. 4 credits.
Study of complexity and diversity of microbial physiology and metabolism with emphasis on bacteria. Nutrition, growth, transport, and anaerobic and catabolic processes are emphasized. Laboratory includes quantification of cellular macromolecules, enzyme purification and kinetics, column chromatography, and bacterial responses to environmental stimuli. Offered by Biology (p. 617). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (BIOL 305\(^C\) or L305) and (BIOL 306\(^C\) or L306).
\(^C\) Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

BIOL 407: Microbial Diversity. 4 credits.
Studies effect of microorganisms on ecological and medical phenomena. Stresses evolution of microbial species, biochemical cycling, and species interactions. Laboratory stresses use of cultural, biochemical, and phylogenetic methods to study microbial isolation, metabolism, and identification. Offered by Biology (p. 617). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (BIOL 305\(^C\) or L305) and (BIOL 306\(^C\) or L306).
\(^C\) Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

BIOL 408: Mushrooms, Molds and Society. 3 credits.
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 408.

Recommended Prerequisite: BIOL 213 with a grade of C or better.

Schedule Type: Lecture

BIOL 409: Medical Mycology. 3 credits.
Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 409.

Recommended Prerequisite: BIOL 213 with a grade of C or better.

Schedule Type: Lecture

BIOL 410: Advanced General Genetics. 3 credits.
Topics include quantitative genetics, extrachromosomal inheritance, and special techniques such as mutation screening, developmental genetics, cancer genetics, behavior genetics, evolutionary genetics, and ethics of genetic technology. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: C or better in BIOL 311 or permission of instructor.

Schedule Type: Lecture

BIOL 412: Phage Genomics. 3 credits.
Bacteriophages, viruses that infect bacteria, are the most abundant organisms in the biosphere. This course explores the genomes of mycobacteriophages (bacteriophages that infect mycobacteria) using bioinformatics tools. In this course, two mycobacteriophage genomes will be annotated and compared to other sequenced mycobacteriophage genomes. Bioinformatics tools will be used to learn more about bacteriophage protein function, immunity and genome structure. Each student in the course will formulate a comparative genomics question and use learned bioinformatics techniques to answer that question. The results of these experiments will be conveyed in the form of a research paper and oral presentation. This class is designed to give students the opportunity to actively participate in the process of scholarship and research in addition to learning valuable genomic and bioinformatics skills. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 311 or equivalent permission of instructor.

Schedule Type: Research

BIOL 413: Histotechniques. 3 credits.
Introduces theory and methods for the preparation of tissue samples from animal or plant specimens for examination with light or electron microscopy. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 311 and permission of instructor.
May not be combined with BIOL 572 for credit. For Biology majors only. Undergraduate courses in biology and chemistry or permission of instructor.

Schedule Type: Lecture

BIOL 417: Selected Topics in Molecular and Cellular Biology. 1-4 credits.
Study of current topics in molecular and cellular biology. Lecture, laboratory. Notes: Topics vary. Offered by Biology (p. 617). May be repeated within the term for a maximum 8 credits.

Recommended Prerequisite: BIOL 311 or BIOL 482 or permission of instructor.

Schedule Type: Lecture

BIOL 418: Current Topics in Microbiology. 3 credits.
Study of current topics in microbiology. Notes: Topics vary. Offered by Biology (p. 617). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: BIOL 305, 306.

Schedule Type: Lecture

BIOL 420: Vaccines. 3 credits.
Immunology, virology, and microbiology of vaccines. Classical and new generation vaccine practices and strategies. Current and future vaccines. Offered by Biology (p. 617). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (BIOL 305\(^c\) or L305) and (BIOL 306\(^c\) or L306). \(^c\) Requires minimum grade of C.

Schedule Type: Lecture

BIOL 421: Genetics of Human Diseases. 3 credits.
Emphasizes strategies used for identification of genes involved in human genetic diseases. Both monogenic and complex human genetic diseases, as well as principles of genetic screening and counseling, will be presented. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 311.

Schedule Type: Lecture

BIOL 422: Stem Cell Biology and Regenerative Medicine. 3 credits.
A broad overview of the biological principles governing stem cell populations. The functional roles stem cells play in regulating normal development and contributing to disease-state pathologies. An examination of the therapeutic potential of stem cells through "regenerative medicine." Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 311.

Schedule Type: Lecture

BIOL 423: Biology of Obesity and Weight Loss. 3 credits.
This course covers the causes and consequences of obesity and weight loss, including the general epidemiology and pathology of co-morbid conditions associated with obesity. The relative contributions of genetic and environmental factors influencing weight gain will be covered as well as recent trends in obesity research. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or permission of instructor.

Schedule Type: Lecture

BIOL 425: Human Physiology. 3 credits.
Organ system approach to study of homeostasis, including cardiovascular, respiratory, renal, digestive, endocrine, and nervous system functions. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or permission of instructor.

Schedule Type: Lecture

BIOL 426: Mechanisms of Aging. 3 credits.
A course where students will demonstrate knowledge of cellular and molecular mechanisms which drive the systematic changes that result in aging, and to understand the overall biological processes involved in complex biological systems. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 and BIOL 311 or equivalent; or permission of instructor.

Schedule Type: Lecture

BIOL 430: Advanced Human Anatomy and Physiology I. 4 credits.
Organ system approach to studying the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of anatomical structures and their functions of the endocrine, nervous, muscular, skeletal, and integumentary systems following introduction to the cellular and tissue levels of organization. Topics also include selected pathology for each organ system; current therapeutic interventions are addressed. Notes: Biology 124 is not approved for Biology Majors. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: 60 credits.

Registration Restrictions:
Required Prerequisite: BIOL 213\(^c\).
\(^c\) Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

BIOL 431: Advanced Human Anatomy and Physiology II. 4 credits.
Continued study of the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of anatomical structures and their functions of the cardiovascular, lymphatic, respiratory, urinary, digestive and reproductive organ systems. Topics also include selected disorders for each organ system to illustrate disruption of homeostasis. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 310 or permission of instructor.

Schedule Type: Lecture

BIOL 432: Selected Topics in Biology. 1-4 credits.
Lecture or field course in botany. Topic varies with instructor's specialty. May be repeated only with permission of Biology Program Director. Offered by Biology (p. 617). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: Permission of instructor.

Schedule Type: Laboratory, Lecture

BIOL 435: Selected Topics in Biology. 4 credits.
Topics vary with instructor's specialty. May be repeated only with permission of Biology Program Director. Offered by Biology (p. 617). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: BIOL 308 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture

BIOL 437: Ornithology. 4 credits.
Study of evolution, systematics, physiology, ecology and behavior of birds, emphasizing field work. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture

BIOL 438: Mammalogy. 4 credits.
Study of evolution, systematics, physiology, ecology and behavior of mammals, emphasizing field work. Offered by Biology (p. 617). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture
BIOL 439: *Herpetology*. 4 credits.
Study of evolution, systematics, physiology, ecology and behavior of reptiles, emphasizing field work. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or equivalent or permission of instructor.

**Schedule Type:** Laboratory, Lecture

BIOL 440: *Field Biology*. 4 credits.
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site. May include field trips. Notes: Students bear cost of required field trips. May be repeated with permission of Biology Program. Total limit of 4 credits. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory. Offered by Biology (p. 617). May be repeated within the degree for a maximum 4 credits. Equivalent to EVPP 440.

**Recommended Prerequisite:** BIOL 308 or BIOL 310 or permission of instructor.

**Schedule Type:** Fieldwork

BIOL 442: *Urban Ecosystems and Processes*. 4 credits.
Overview and introduction of challenges and opportunities that urban environments present to the plants and animals inhabiting cities and the ways that those organisms and entire ecosystems respond. Ecosystem ecology for engineered ecosystems along with reviews on urban metabolism, energy budgets, water cycles, and soil ecology taught. Creating and restoring green infrastructures is discussed. Note: the course will involve students to design and conduct a small-scale green infrastructure experiment/project on the campus. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 442.

**Recommended Prerequisite:** CHEM 211 and CHEM 213 and MATH 113 or equivalent and BIOL 308 and PHYS 243 or permission of instructor.

**Schedule Type:** Laboratory, Lecture

BIOL 443: *Tropical Ecology*. 3 credits.
An introduction to the abiotic and biotic factors that define tropical habitats. The course emphasizes evolution, taxonomic diversity, and plant-animal interactions in terrestrial tropic forests. Offered by Biology (p. 617). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** BIOL 306\(^C\) or 310\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

BIOL 444: *Tropical Ecology Laboratory*. 1 credit.
An introduction to field-based scientific research. This course focuses on methods for testing hypotheses related to tropical plant and animal biology. Offered by Biology (p. 617). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** BIOL 308\(^C\) or 310\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Laboratory

BIOL 446: *Ecological and Evolutionary Physiology*. 3 credits.
Physiological responses organisms use to survive and reproduce successfully in their ever-changing environments. Responses to temperature, salinity, low oxygen levels and diet will be covered from a phylogenetic and energetic perspective. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or BIOL 310, and BIOL 326 or BIOL 430 and BIOL 431, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biology.

**Schedule Type:** Lecture

BIOL 449: *Marine Ecology*. 3 credits.
Plants and animals of marine environments and physical and chemical conditions that affect their existence. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 449.

**Recommended Prerequisite:** BIOL 308 or permission of instructor.

**Schedule Type:** Lecture

BIOL 450: *Marine Conservation*. 3 credits.
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. The course also provides an overview of marine environmental law and policy issues related to marine conservation policy. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 421.

**Recommended Prerequisite:** BIOL 309 or equivalent, or permission of instructor.

**Schedule Type:** Lecture

BIOL 452: *Immunology*. 3 credits.
Topics include structure and function of immunoglobulins, role of cell-mediated immunity, protective role of immune system, and disease and injury related to malfunctions of immune system. Offered by Biology (p. 617). May not be repeated for credit.

**Specialized Designation:** Scholarly Inquiry

**Recommended Prerequisite:** BIOL 311.

**Registration Restrictions:**
**Required Prerequisites:** BIOL 213\(^C\) and (BIOL 305\(^C\) or L305) and (BIOL L306 or 306\(^C\)).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

BIOL 453: *Immunology Laboratory*. 1 credit.
Techniques relevant to BIOL 452, including enzyme-linked immunoabsorbant assay, immunodiffusion, protein electrophoresis, and
immune fixation. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 452 (concurrent enrollment is also permitted).

**Schedule Type:** Laboratory

**BIOL 454:** *Marine Mammal Biology and Conservation.* 3 credits.
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several, lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 419.

**Recommended Prerequisite:** BIOL 309 or BIOL 449 or equivalent; or permission of instructor.

**Schedule Type:** Lecture

**BIOL 455:** *Marine Mammal Biology and Conservation Field Course.* 1 credit.
Provides laboratory, seminar sessions and field work to accompany BIOL 454-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. May take place in the US or abroad. The two week residential field course takes place in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 420.

**Recommended Corequisite:** EVPP 419 or 454

**Schedule Type:** Seminar

**BIOL 457:** *Reproductive Strategies.* 3 credits.
Introduction to the research and evolutionary theory of sex and reproduction. Covers topics from the evolution of sex and gender to the evolution of complex reproductive strategies involving behaviors such as mate recognition, courtship displays, territoriality, polygamy, and offspring care. Lectures focus primarily on multi-cellular animals but also include discussions of unicellular prokaryotes and eukaryotes as well as plants. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 307 or 308 and 60 hours.

**Schedule Type:** Lecture

**BIOL 459:** *Fungi and Ecosystems.* 3 credits.
Considers impact of fungi on ecosystems in terms of biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to BIOL 559, EVPP 551.

**Recommended Prerequisite:** BIOL 308 or BIOL 310 or permission of instructor.

**Schedule Type:** Lecture

**BIOL 460:** *Infectious Diseases Wildlife.* 3 credits.
During this course, diseases of wildlife will be examined with emphasis on causes and mechanisms, pathobiology, ecology and epidemiology and population significance. We will explore methods of diagnosis, control, prevention and outbreak investigation as they apply to management and conservation of wildlife populations. Also, diseases crossing species barriers will be examined. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 305, EVPP 306, EVPP 460.

**Recommended Prerequisite:** 60 credits and BIOL 308; or EVPP 305 and EVPP 306; or permission of the instructor.

**Schedule Type:** Lecture

**BIOL 465:** *Histology.* 4 credits.
Microscopic structure of animal tissues and organs, with emphasis on vertebrates. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or 310.

**Schedule Type:** Laboratory, Lecture

**BIOL 468:** *Vertebrate Natural History.* 4 credits.
Introduces vertebrates with emphasis on systematic, evolution, life history, behavior and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to EVPP 468.

**Recommended Prerequisite:** BIOL 308 or permission of the instructor.

**Schedule Type:** Laboratory, Lecture

**BIOL 470:** *Dinosaur Biology.* 3 credits.
Introduction to the evolution, diversity, and biology of the dinosaurs and their descendants. Emphasis on how current biological knowledge is used to estimate and infer the morphology, physiology and ecology of these extinct animals. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or BIOL 310 or permission of instructor.

**Schedule Type:** Lecture, Recitation

**BIOL 471:** *Evolution.* 3 credits.
Process of evolution emphasizing role of genetics, properties of populations, and population differentiations. Offered by Biology (p. 617). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** (BIOL 308\(^c\)).
\(^c\) Requires minimum grade of C.

**Schedule Type:** Lecture

**BIOL 472:** *Introductory Animal Behavior.* 3 credits.
Study of mechanisms, functions, and evolution of behavior. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or BIOL 310 or permission of instructor.

**Schedule Type:** Lecture

**BIOL 473:** *Introductory Laboratory in Animal Behavior.* 1 credit.
Field or laboratory study in animal behavior with emphasis on mechanisms, functions, and evolution of behavior. Stresses experimental
design and analysis of data. Writing-intensive laboratory. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 472 (concurrent enrollment also permitted).

**Schedule Type:** Laboratory

**BIOL 480: The Diversity of Fishes.** 3 credits.
This course delves into the biology and ecology of fishes. Subjects of this class include fish anatomy, taxonomy, evolution, habitat adaptations, community dynamics, and ecosystem interactions. The course will also touch on human impacts on fishes, and conservation. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 309, BIOL 310, and BIOL 350/EVPP 350.

**Schedule Type:** Lecture

**BIOL 482: Introduction to Molecular Genetics.** 3 credits.
Basic concepts of structure and function of genetic material at molecular level. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213, BIOL 311 or permission of instructor.

**Schedule Type:** Lecture

**BIOL 483: General Biochemistry.** 4 credits.

**Registration Restrictions:**
**Required Prerequisites:** (BIOL 213\(^c\) and CHEM 313\(^c\)).
\(^c\) Requires minimum grade of C.

**Schedule Type:** Lecture

**BIOL 484: Eukaryotic Cell Biology.** 3 credits.
Structure and function of cell membranes and organelles with regard to cellular transport, sorting, compartmentalization, signaling, motility, and cell division. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 483 or permission of instructor.

**Registration Restrictions:**
**Required Prerequisite:** BIOL 311\(^c\).
\(^c\) Requires minimum grade of C.

**Schedule Type:** Lecture

**BIOL 485: Eukaryotic Cell Biology Laboratory.** 2-3 credits.
Laboratory experiments using cell biology techniques, including microscopy, spectrophotometry, centrifugation, chromatography, and electrophoresis. Offered by Biology (p. 617). May not be repeated for credit. Equivalent to BIOL 585.

**Recommended Corequisite:** BIOL 484 or permission of instructor.

**Schedule Type:** Laboratory

**BIOL 486: Molecular Biology and Biotechnology Laboratory.** 2 credits.
Introduction to theory, techniques, and practices used in modern molecular biotechnology laboratories. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 385 or BIOL 482.

**Schedule Type:** Laboratory

**BIOL 489: Teaching Practicum.** 1-3 credits.
Student gains teaching experience in a lecture, laboratory or field environment under the supervision of a faculty member. Student responsibilities may include a lecturing component, but may also include lab preparation, design of course materials, tutoring and grading. Course may be repeated once. Offered by Biology (p. 617). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** BIOL 213, 311, 60 credit hours and permission of instructor, course coordinator (where applicable) and Program Director.

**Schedule Type:** Internship

**BIOL 492: Senior Seminar.** 1 credit.
Weekly seminar course dealing with recent advances in biology. Topics selected from recent publications in the field. May be repeated for credit. Offered by Biology (p. 617). May be repeated within the degree for a maximum 2 credits.

**Recommended Prerequisite:** BIOL 311 and 90 credit hours, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biology.

**Schedule Type:** Lecture

**BIOL 493: Honors Research in Biology.** 1-2 credits.
Laboratory of field investigation under guidance of faculty member. Notes: Total limit for BIOL 493, 495 and 497 is 8 credits toward the 44 credit hours required for the Biology BS degree and only 4 credits toward the 32 hours required for the BA degree. Combined 493, 495 and 497 may not exceed 4 credit hours in any one semester. Offered by Biology (p. 617). May be repeated within the degree for a maximum 2 credits.

**Recommended Prerequisite:** Admission to the Biology Honors Program, permission of instructor and Biology Program Director.

**Registration Restrictions:**
Enrollment is limited to students in the College of Science college.

**Schedule Type:** Research

**BIOL 494: Honors Seminar in Biology.** 1 credit.
Weekly seminar course dealing with recent advances in biology. Notes: Topics selected from recent publications in field. Offered by Biology (p. 617). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Acceptance into Biology honors program and permission of instructor.

**Schedule Type:** Seminar
BIOL 495: Directed Studies in Biology. 1-3 credits.
Study of a topic not otherwise available to student. May involve reading assignments, tutorials, lectures, papers, presentations, or field or laboratory study, determined in consultation with instructor. May be taken for 1 to 3 credits and repeated once for a total of 3 credits. Total limit for combination of 495 and 497 is 6 credits toward 44 credits for BS and 4 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory. Offered by Biology (p. 617). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Permission of instructor and Biology Program Director.

**Schedule Type:** Independent Study

BIOL 497: Special Problems in Biology. 1-4 credits.
Lab or field project leading to written report of research. Research and paper completed under instructor’s guidance. Notes: Total limit for 495 and 497 combined is 6 credits toward the 44 credits required for BS and 4 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory. Offered by Biology (p. 617). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 60 credits and permission of instructor and chair.

**Schedule Type:** Research

BIOL 498: Research Seminar. 2 credits.
Seminar discussing current scientific literature and literature related to research project undertaken by student as part of the research semester. Note: Must be enrolled in Biology Research Seminar. Registration must be approved by a faculty sponsor and by the Biology Program Director and is limited to students who are enrolled concurrently in BIOL 499. For students in the Biology Honors Program, this course may be used to substitute for one credit of BIOL 494: Honors Seminar in Biology. Offered by Biology (p. 617). May not be repeated for credit.

**Recommended Prerequisite:** 60 credits and permission of instructor and chair.

**Schedule Type:** Research

BIOL 499: RS: Research in Biology. 6-9 credits.
Laboratory or field investigation under faculty guidance. Students will earn 6-9 credits toward the BA or BS degrees in Biology. Note: Must be enrolled in Biology Research Seminar. Registration requires successful application and approval by Biology Program and faculty sponsor. Student receiving 9 credits for 499 will not be allowed to use BIOL 440, BIOL495 and/or 497 neither toward the 32 BIOL hours needed for the BA degree, nor toward the 44 BIOL hours needed for the BS degree. This course will satisfy one upper division laboratory requirement for both the BA and BS degrees in Biology. Offered by Biology (p. 617). May not be repeated for credit.

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211-212. Completion of Biology core recommended.

**Schedule Type:** Laboratory

**500 Level Courses**

**BIOL 501: Microbial Diversity: An Organismal Approach.** 3 credits.
In-depth study of nonpathogenic microbial world, emphasizing detection, enumeration, and classification of microorganisms; their physiological and evolutionary relationships; and biotechnological applications. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 506: Selected Topics in Microbiology.** 1-4 credits.
Topic depends on instructor’s specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 8 credits.

**Recommended Prerequisite:** BIOL 305, 306 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 507: Selected Topics in Ecology.** 4 credits.
Topic depends on instructor’s specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 8 credits.

**Recommended Prerequisite:** Course in Ecology and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture
**BIOL 508: Selected Topics in Animal Biology.** 1-4 credits.
Topic depends on instructor's specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 8 credits.

**Recommended Prerequisite:** BIOL 303 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 509: DNA Analysis of Biological Evidence.** 3 credits.
Historical development of DNA profiling methods, current DNA typing techniques and the ongoing development of new forensic DNA typing methods. Emphasis will be placed on various analytical techniques used in the analysis of forensic evidence. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 311 or permission of instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 510: Forensic DNA Analysis Laboratory.** 1 credit.
Provides hands-on experience with the methodologies of forensic DNA analysis. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 311

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**BIOL 515: Developmental Neurobiology.** 3 credits.
Introduction to developmental neurobiology with overview of embryological development of the nervous system. Topics include neural induction, patterning/cell fate specification, and neural circuit assembly together with modern molecular methods for exploring neural development. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Completion of 60 hours, including PSYC 372 or BIOL 213 and BIOL 303.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 516: Mammalian Neurobiology.** 3 credits.
Functional anatomy of mammal brains emphasizing regional and systems neuroanatomy of humans. Correlates with material from clinical neurology, where possible. Laboratory component includes brain dissections and clinical correlations. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to PSYC 531.

**Recommended Prerequisite:** BIOL 515.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**BIOL 518: Conservation Biology.** 3 credits.
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 307 and BIOL 311 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 532: Animal Behavior.** 3 credits.
Ecological aspects of animal behavior. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 324 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

BIOL 533: *Selected Topics in Plant Biology*. 1-4 credits.
Topic depends on instructor's specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 8 credits.

**Recommended Prerequisite:** Course in plant biology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOL 537: *Ornithology*. 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Course in Ecology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

BIOL 538: *Mammalogy*. 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing field work. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 538.

**Recommended Prerequisite:** Course in ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

BIOL 539: *Herpetology*. 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Course in ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOL 543: *Tropical Ecosystems*. 4 credits.
Terrestrial, aquatic, and marine ecosystems in tropics, emphasizing plant communities, plant-animal interactions, and role of humans in the tropics. Notes: Field trip to tropics required as part of laboratory. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 543.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 550.

**Recommended Prerequisite:** General Chemistry and a course in ecology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOL 553: *Advanced Topics in Immunology*. 3 credits.
Comprehensive study of immunologic mechanisms as they pertain to immunologic diseases and transplantation. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** BIOL 452 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
**BIOL 560: Infectious Diseases of Wildlife. 3 credits.**
During this course, diseases of wildlife will be examined with emphasis on causes and mechanisms, pathobiology, ecology and epidemiology and population significance. We will explore methods of diagnosis, control, prevention and outbreak investigation as they apply to management and conservation of wildlife populations. Also, diseases crossing species barriers will be examined. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 560.

**Recommended Prerequisite:** Courses on evolution, ecology, zoology and conservation biology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 563: Virology. 3 credits.**
Fundamental concepts of nature of viruses, virus classification, cultivation, and biochemistry. Emphasizes bacteriophage and animal

**Schedule Type:** Lecture
viruses. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 482 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 564:** Techniques in Virology. 2 credits.  
Basic techniques of animal virus propagation, isolation, and quantitation. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 563 (concurrent enrollment is also permitted) or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**BIOL 566:** Cancer Genomics. 3 credits.  
Review of modern concepts in cancer biology including taxonomy of human tumors, common cancer syndromes, and genome instability. Genetic and molecular studies of tumor cell proliferation, migration, invasion, and death. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** A course in genetics or biochemistry.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 568:** Advanced Topics in Molecular Genetics. 3 credits.  
Comprehensive study of regulatory mechanisms controlling gene expression in viruses, prokaryotes, and eukaryotes, emphasizing current research. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 6 credits. Equivalent to BIOL 668.

**Recommended Prerequisite:** BIOL 482 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 572:** Human Genetics. 3 credits.  
Inheritance of humans emphasizing current problems, including genetic control of metabolic diseases, effects of radiation and chemical agents in environment, and directed genetic change. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 311 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 573:** Developmental Genetics. 3 credits.  
Genetic approaches to problem of eukaryotic development, emphasizing current research on regulation of gene enzyme systems. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 311 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 574:** Population Genetics. 3 credits.  
Genetic structure and dynamics of populations, both real and ideal. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 and 311, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 575:** Selected Topics in Genetics. 1-4 credits.  
Different topics in different years, including molecular, developmental, physiological, and classical genetics, emphasizing current problems and research. Notes: May be repeated once with permission of department
chair. Offered by School of Systems Biology (p. 748). May be repeated within the term for a maximum 8 credits.

**Recommended Prerequisite:** BIOL 311, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 577: Biogeochemistry: A Global Perspective.** 3 credits.
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and their integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 307, CHEM 211, 212 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 578: Mutation, DNA Repair, and Environmental Contamination.** 3 credits.
Overview of relationship between environmental contamination and genetic damage. Covers types of contamination that result in mutations, and molecular mechanisms of DNA damage and repair. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 307 and 311.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 579: Molecular Evolution and Conservation Genetics.** 3 credits.
Evolution of genes and gene families at molecular level, including gene duplication and divergence, positive and negative selection, genetic drift, and molecular clocks. Also includes selected applications in conservation genetics, such as molecular phylogenetics and estimates of population size. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 311.

**Recommended Corequisite:** BIOL 471, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 580: Computer Applications for the Life Sciences.** 3 credits.
Studies computer use in biological sciences. Combines lectures, supervised exercises on mainframe and microcomputers. Students present seminars on advanced application and complete project using computers to fulfill a major assignment associated with another course or employment. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** 12 hours of biology and one year of college mathematics, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 581: Estuarine and Coastal Ecology.** 3 credits.
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 581.

**Recommended Prerequisite:** Course in ecology and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 582: Estuarine and Coastal Ecology Laboratory.** 1 credit.
Continues EVPP 546/BIOL 546 as the laboratory section focusing on the approach and methods of estuarine research, including analysis and communication of results. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 582.
**Recommended Corequisite:** BIOL 581 or EVPP 581.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory

**BIOL 583: General Biochemistry.** 4 credits.
Structure and function of proteins, carbohydrates and lipids, enzymology, and metabolism and its controls. Emphasizes chemistry of nitrogen compounds. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to BIOL 483.

**Recommended Prerequisite:** BIOL 213, CHEM 313, CHEM 314, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BIOL 585: Eukaryotic Cell Biology Laboratory.** 1-2 credits.
Selected topics of laboratory procedures used in the study of eukaryotic cells. Notes: May be repeated one time with permission of program director. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to BIOL 485.

**Recommended Prerequisite:** BIOL 484 or BIOL 682 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BIOL 591: Special Topics.** 1-6 credits.
Offered by School of Systems Biology (p. 748). May be repeated within the degree.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Independent Study

**600 Level Courses**

Overview of concepts in physiological, population, community, and ecosystem ecology. Restricted to graduate students with little or no background in ecology. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 607.

**Recommended Prerequisite:** Permission of department.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BIOL 608: Topics in Biology.** 1-4 credits.
In-service course to strengthen and update teacher’s knowledge of biology. Topics include organismal biology, cell biology, ecology, microbiology, or genetics. Notes: Not available for credit toward MS in biology, or PhD in environmental science and public policy. May be repeated for credit with permission of department chair. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Employment or anticipated employment as a science teacher.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**BIOL 682: Teaching Practicum.** 1 credit.
Experience teaching biology in laboratory or in field under supervision of faculty member. Notes: Undergraduate assists instructor. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor, chair, and course coordinator.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
BIOL 610: Bioremediation: Theory and Applications. 3 credits.
Provides basis for understanding proper application of bioremedial
technologies to treatment for hazardous wastes. Includes evaluation of
data to determine successful treatment. Offered by School of Systems
Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 610.

Recommended Prerequisite: Course in microbiology and either organic
chemistry or microbial physiology or equivalent or permission of
instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOL 611: Techniques in Environmental Microbiology. 2 credits.
Laboratory exercises illustrate techniques to demonstrate microbial
degradation, detection of microbes, isolation, and evaluation of
physiological and genetic characteristics. Notes: Open first to those
enrolled in BIOL 610. Offered by School of Systems Biology (p. 748). May
not be repeated for credit.

Recommended Prerequisite: A laboratory course in microbiology or
permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

BIOL 643: Microbial Ecology. 4 credits.
Study of relationships between microorganisms and their natural
environment, and methodology for observing their natural environment
and biochemical activities in that environment. Offered by School of
Systems Biology (p. 748). May not be repeated for credit. Equivalent to
EVPP 643.

Recommended Prerequisite: Course in microbiology or permission of
instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

BIOL 644: Wetland Ecology and Management. 4 credits.
Offered by School of Systems Biology (p. 748). May not be repeated for
credit.

Recommended Prerequisite: CHEM 211, 212, BIOL 307, PHYS 106 and
107 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

BIOL 645: Freshwater Ecology. 3 credits.
Offered by School of Systems Biology (p. 748). May not be repeated for
credit.

Recommended Prerequisite: EVPP 550 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOL 648: Population Ecology. 3 credits.
Survey of ecological models and theory. Topics include population
growth and regulation; competition; predator-prey, herbivore-plant, and
parasite-host interactions; mutualism; and metapopulation ecology.
Offered by School of Systems Biology (p. 748). May not be repeated for
credit. Equivalent to EVPP 648.

Recommended Prerequisite: Course in ecology or permission of
instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOL 649: Biological Resource Management. 3 credits.
Applies modern ecological theories and methods to biological resource
management in developing and developed countries. Explores problems
in achieving optimum productivity of specific resources and application
of systems analysis. Offered by School of Systems Biology (p. 748). May
not be repeated for credit.

Recommended Prerequisite: Course in ecology, or permission of
instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

BIOL 650: Environment Analysis and Modeling. 4 credits.
Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 650.

**Recommended Prerequisite:** 8 hours of ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

BIOL 665: Environmental Hazards to Human Health. 3 credits.
Health effects of chemical contaminants of air, water, and food resulting from industrialized society. Includes identifying, evaluating, and controlling hazards. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Courses in animal physiology and organic chemistry, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

BIOL 666: Human Genetics Concepts for Health Care. 3 credits.
Principles of genetically determined diseases with emphasis on clinical aspects of these diseases, genetic counseling, and laboratory methods used in human genetics. Extended studies students preparing to enter medical or dental school are welcome. Notes: Course in cell or molecular biology. Not available to students who have taken BIOL 572. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BS degree or enrollment in accelerated MS program. Course in cell or molecular biology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

BIOL 668: Advanced Techniques in Molecular Biology. 4 credits.
Experimental studies using current methods for purification and characterization of biologically important compounds. Provides training for research in molecular biology. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 568 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

BIOL 669: Pathogenic Microbiology. 3 credits.
Molecular mechanisms of bacterial pathogenicity and immune response in infectious diseases. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate courses in physics, math, and microbiology, and permission of the Director of the Center for Biodefense.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

BIOL 675: Aerosol Biology. 4 credits.
Provides students with familiarity with the state of the art aerosol equipment and techniques used in laboratory-based research pertaining to biological warfare or terrorism threats. Emphasis will be placed on biosafety procedures, techniques, and equipment used in conducting experiments with infectious organisms in a contained environment. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate courses in physics, math, and microbiology, and permission of the Director of the Center for Biodefense.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

BIOL 678: Cell-Based Assays. 2 credits.
Focus on 1) basics of eukaryotic cell culture; 2) various cell based assay techniques; 3) Real-Time PCR based functional analysis of the signaling pathways. Students will maintain their cell cultures for the duration of the experiments, perform at least one functional assay and analyze the resultant data. Students are expected to learn the
properties and limitations of each cell based assay and should be able to explain their results regardless of the outcome. Each student will be responsible for submitting a written report summarizing the design of their experiments and its results. Each report will include the following sections: Introduction, Methods, Results and Discussion, and a special Troubleshooting section. Notes: A lab fee of $300 will be charged per student for lab supplies. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Permission of Instructor. 400-level coursework in cell or molecular biology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment limited to students in the MS Bioinformatics Comp Biol, MS Biology or NDG Undeclared programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**BIOL 680: Experimental Design and Analysis for the Life Sciences.** 4 credits. Advanced course in applying probability and statistics to research in life sciences. Examples drawn from environmental, medical, physiological, genetic, and chemical biology. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Course in biostatistics or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**BIOL 682: Advanced Eukaryotic Cell Biology.** 3 credits. Structure and function of biomembranes, cytoskeleton, and transport systems. Also discusses protein trafficking, cell cycle, and cell adhesion molecules. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 483, CHEM 313, CHEM 314, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Biology or Biosciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 685: Emerging Infectious Diseases.** 3 credits. Students will gain an understanding of the pathogenesis of emerging and/or re-emerging infectious diseases in terms of immune response and systemic alterations. Factors contributing to emergence and virulence for each pathogen will be emphasized. Epidemiology, disease progression, treatment strategies and/or control measures of identified emerging infectious diseases will be discussed. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213 and 311, 482 or equivalent; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 690: Introduction to Graduate Studies in Biology.** 1-2 credits. Required of all new MS students in biology. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 691: Current Topics in Biology.** 1-4 credits. Study of current topics in biology as determined by instructor. Topics vary and center on emerging areas of investigation in the biological sciences. Offered by School of Systems Biology (p. 748). May be repeated within the term for a maximum 8 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOL 692: Seminar in Biology.** 1 credit. Topics vary. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 2 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

BIOL 693: Directed Studies in Biology. 1-8 credits.
Study of topic not otherwise available in graduate program. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or laboratory or field study, determined in consultation with instructor. Notes: May not be used to fulfill explicit undergraduate prerequisites for graduate work. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: Permission of instructor and graduate committee.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

BIOL 695: Seminar in Molecular, Microbial, and Cellular Biology. 1 credit.
Review and discussion of recent literature in specialized area. Includes student presentations. Offered by School of Systems Biology (p. 748). May be repeated within the term for a maximum 2 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

700 Level Courses

BIOL 715: Microbial Physiology. 3 credits.
Comprehensive study of functioning of microbial cells, with emphasis on pathogens. Stresses growth, transport, cell-to-cell signaling, biofilm formation, antibiotic resistance, and secondary metabolites. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: An undergraduate lecture/lab course in microbiology, and a course in biochemistry.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOL 718: Techniques in Microbial Pathogenesis. 3 credits.
Laboratory-based class in which students perform current techniques in microbial pathogenesis. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD biosciences program, the MS biology program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

BIOL 720: Microbial Metabolism. 3 credits.
Discussions of catabolic and anabolic pathways of bacterial pathogens and regulation and integration of these pathways. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: An undergraduate lecture/lab course in microbiology and a course in biochemistry.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOL 745: Environmental Toxicology. 3 credits.
Study of nature, distribution, and interaction of toxic chemicals released into the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and implications for government regulation. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 745.

Recommended Prerequisite: Courses in ecology and physiology, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOL 793: Research in Biology. 1-3 credits.
Library, laboratory, or field investigation under supervisor's guidance. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: 8 hours of graduate hours in BIOL and permission of instructor and chair.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

BIOL 798: Master's Research Project. 1-3 credits.
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Comprehensive report acceptable to student’s advisory committee is required. Notes: Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 798. Offered by School of Systems Biology (p. 748). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Permission of instructor and chair.
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

BIOL 799: Thesis. 1-6 credits.
The thesis research under direction of supervisor. Notes: Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 799. Offered by School of Systems Biology (p. 748). May be repeated within the degree.

Recommended Prerequisite: 8 graduate hours in BIOL and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Biomedical Sciences (BMED)

500 Level Courses

BMED 550: Special Topics in Biomedicine. 2 credits.
This course presents various topics in biomedicine in a lecture/seminar format. Students build on the ABS Certificate curriculum to enhance their understanding of biomedical issues and better prepare for careers in the health professions. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Successful completion of first semester of the ABS Certificate curriculum (Biochemistry, Biostatistics, Histology).

Recommended Corequisite: Spring ABS Certificate courses (Human Anatomy, Human Physiology).

Registration Restrictions:
Enrollment limited to students in the CERG Adv Biomedical Sciences program.

Schedule Type: Lecture

600 Level Courses

BMED 601: Cell and Molecular Physiology. 4 credits.
Principles of biochemistry and cell signaling and current concepts regarding physiological processes at the cellular and molecular levels. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 602: Biomedical Statistics. 3 credits.
Basic principles of biostatistics and epidemiology in theoretical and practical context including: exploring and displaying data appropriately, exploring relationships between two variables, issues of gathering sample data, and understanding randomness and probability. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 603: Cell Biology and Microscopic Anatomy. 3 credits.
Examines basic histological techniques, ultrastructure of the cell, basic tissue types and histology of specific organ systems. Structure-functional and clinical correlations are described. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 604: Fundamentals of Human Physiology. 5 credits.
Essential concepts of physiology and mechanisms of body function are presented at various levels of organization, ranging from cellular and molecular to tissue and organ system levels. Emphasis is placed on understanding the integrated regulation of various body processes among the major systems. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
BMED 605: Introduction to Human Anatomy. 3 credits.
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 610: Principles of Systems Biology. 2 credits.
Students will build on their knowledge of cellular and molecular biology, genetics, and physiology to understand how these components combine to give rise to complex systems function found in biology. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 611: Molecular Genetics. 2 credits.
Students will build on their knowledge of molecular biology and genetics to understand how these components’ functions are altered during the inception and course of human disease. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 651: Physician and Society. 1 credit.
Seminar series explores the cultural, social, economic and ethical factors that affect the practice of medicine in the 21st century. Offered by College of Science (p. 593). May be repeated within the degree for a maximum 2 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

BMED 652: Biomedical Career Pathways. 1 credit.
Series of workshops, presentations and field trips. Students will learn study and interview skills to become better prepared to complete AMCAS and secondary applications to medical schools. Offered by College of Science (p. 593). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences or Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

BMED 653: Forum and Research. 3 credits.
Bi-weekly seminar-style presentations and reading assignments, followed by short student reports, followed by a small group discussions on topics of current interest. Students will prepare a detailed research paper on a topic related to one of the forum topics. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 660: Molecular and Cellular Physiology. 3 credits.
Biochemistry and physiology of the typical cell. The biochemical focus will be on the fundamentals of the forces affecting molecular interactions, the structure-function relationships of proteins and carbohydrates, kinetics and catalysis, and high-throughput analysis of proteins in clinical samples. The physiological focus will be on the structure and function of subcellular organelles, and the foundations of some specialized cells blood and lymphoid cells, muscle cells, and nerve cells. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 661: Metabolism, Nutrition and Endocrinology. 4 credits.
Students will learn the pathways involved in energy metabolism, biosynthesis, and catabolism of waste products in preparation for excretion. Major emphasis will be on the coordination of metabolic pathways in the major organs and tissues through hormonal regulation. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 662: Cardiopulmonary Biology. 1-5 credits.
Anatomy, hemodynamic function, and electrophysiology of the cardiovascular and respiratory system. Offered by College of Science (p. 593). May be repeated within the degree for a maximum 5 credits.

Recommended Prerequisite: Admission to Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 663: Gastrointestinal Biology. 2 credits.
Embryologic development, gross and micro-anatomy, and physiologic function of the GI tract. Emphasis will be placed on understanding the integrated regulation of GI processes. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
BMED 664: Renal Biology. 2 credits.
Structural, functional and integrative aspects of the kidney and urinary system; identify the basic physiologic mechanisms that underpin renal function; and explain the role the kidney plays in fluid and electrolyte homeostasis, including acid-base balance. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BMED 665: Sexual Development and Reproduction. 3 credits.
Cellular and anatomical components of reproduction and early development. These components include the development of the reproductive track, development of gametes, fertilization, and formation of the germ layers and endocrinology of the system. Offered by College of Science (p. 593). May not be repeated for credit.

Recommended Prerequisite: Admission to the Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Biosciences (BIOS)

700 Level Courses

BIOS 701: Systems Biology. 3 credits.
Introduces biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Readings include articles from current literature in molecular biosciences. Application of molecular techniques within biosciences is now universal, and the underlying question remains "What is the structure of a cell, and how does it function?" Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to BINF 701.

Recommended Prerequisite: General Biochemistry.

Registration Restrictions: General Biochemistry.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

BIOS 702: Research Methods. 3 credits.
Trains students in research methodologies, techniques, and data analysis in life sciences. Divided into three modules that introduce separate but equally significant components of any research project: parameters required to outline and synthesize a problem, techniques of measurement and analysis used by life scientists, and approaches for data analysis and interpretations. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD program in Biosciences

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

BIOS 703: Laboratory Rotation. 3 credits.
Intensive introduction to research laboratory in biosciences. Students read background material pertinent to problem under study, learn and practice research methods of laboratory, and formulate short final project that may be proposal or actual project, demonstrating some mastery of techniques and approaches employed. Notes: Should be repeated three times (except by permission of concentration director). Offered by School of Systems Biology (p. 748). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission to the PhD program in Biosciences.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

BIOS 704: Topics in Biosciences. 1 credit.
Combines invited seminars from internal and external faculty with graduate student seminars. Seminar presentation required for advancement to candidacy, generally given in last semester before candidacy. Includes discussion section led by course coordinator. Notes: Required of all students during each semester prior to advancement to candidacy. Should be repeated three times (except by permission of concentration director). Offered by School of Systems Biology (p. 748). May be repeated within the term for a maximum 3 credits.

Recommended Prerequisite: Admission to the PhD program in Biosciences.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

BIOS 710: Current Topics in Bioscience. 1-3 credits.
Studies current topic in biosciences. Notes: Topics vary. May be repeated for credit with permission of concentration director. Offered by School of Systems Biology (p. 748). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission to the PhD program in biosciences or to the MS program in biology.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 715: Molecular Ecology.** 3 credits.
Introduces students to basic concepts of molecular biology, genetics, molecular evolution, bioinformatics, NextGen Sequencing and Technology. Students should have prior background in genetics and evolution. Offered by School of Systems Biology (p. 748). May not be repeated for credit. Equivalent to EVPP 515.

**Recommended Prerequisite:** Undergraduate course in Genetics and Chemistry or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 716: Methods in Evolutionary Biology.** 4 credits.
Intended for students who plan to do research in Molecular Ecology, Molecular Evolution, Conservation Genetics, Genomics or Biocomplexity. The lecture reviews basic concepts while the lab provides students the opportunity to experience the detailed protocols necessary for research in molecular biology. The course integrates theory, protocols, analysis and bioinformatics. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** BIOS 715 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 719: Extremophiles.** 5 credits.
Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**BIOS 740: Laboratory Methods in Functional Genomics and Biotechnology.** 3 credits.
Current laboratory techniques in molecular biology and genomics, including nucleic acid isolation, gene cloning and sequencing, gel blot analysis, PCR, in vitro mutagenesis, and theory and practice of DNA microarray analysis of gene expression. Topics may vary from year to year depending on advances in field. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** Graduate standing and undergraduate courses in genetics and molecular biology.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 741: Genomics.** 3 credits.
Genetic structure and function at whole genome level. Includes some sequence analysis, comparative genomics, classical genetics, and developmental genetics, as well as analysis of synteny groups, isochores, gene families, genetic complexity, C value paradox, directed discovery of gene functions, and animal models of human disease. Readings from recent texts and primary research literature. Students expected to give one or two oral presentations of primary research papers, as well as complete midterm and final exams. Offered by School of Systems Biology (p. 748). May not be repeated for credit.

**Recommended Prerequisite:** At least one undergraduate course in genetics and molecular biology, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**BIOS 742: Biotechnology.** 3 credits.
Theory and applications of biotechnology. Includes promoter design, gene fusions, protein targeting, techniques of protein purification, construction of transgenic organisms, cloning of animals and plants, ethical and legal issues. This is a relatively new area of study that is rapidly changing; course strives to keep students abreast of current literature. Offered by School of Systems Biology (p. 748). May not be repeated for credit.
