

# GLOBAL HEALTH MINOR

**Banner Code:** GLOH

The global health minor requires 18 credits of coursework and is designed to increase students' awareness of the major health problems and issues that transcend national boundaries. Students develop an understanding of the critical global health concerns that affect health equity and health care for all people worldwide. Students examine the public health implications of globalization and learn to think critically about how specific global health challenges may be solved in culturally appropriate ways. The minor will enhance the education of students who are planning to work in a variety of settings with a global health focus, including health care, government, education, and non-governmental organizations.

## Admissions & Policies

### Policies

For policies governing all minors, see AP.5.3.4 Minors.

## Requirements

### Minor Requirements

Total credits: 18
