**ARTH 376**: Twentieth-Century Latin American Art. 3 credits. Major movements and important artists in 20th-century Latin American art discussed in relation to social, cultural, and political conditions in the region. Offered by History & Art History (p. 387). May not be repeated for credit.

**Mason Core**: Arts (p. 137)

**Recommended Prerequisite**: 24 credits.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 382**: Arts of India. 3 credits. History, culture, and arts of south Asia from earliest civilizations along the Indus River to onset of Western colonialism. Emphasizes role of material evidence in the creation of the South Asian history and how political, social, and religious developments affected the arts. Discusses monuments and artifacts in a variety of media in relation to historical contexts. Offered by History & Art History (p. 387). May not be repeated for credit.

**Mason Core**: Global Understanding (p. 137)

**Specialized Designation**: Non-Western Culture

**Recommended Prerequisite**: 24 credits.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 383**: Arts of Southeast Asia. 3 credits. Examines various cultural and artistic traditions of ancient Southeast Asia, from the earliest archaeological evidence to onset of colonialism. Lectures and discussions focus on material culture of the great civilizations that arose within borders of modern Thailand, Cambodia, Indonesia, Burma (Myanmar), Vietnam, Laos, and Malaysia. Offered by History & Art History (p. 387). May not be repeated for credit.

**Mason Core**: Global Understanding (p. 137)

**Specialized Designation**: Non-Western Culture

**Recommended Prerequisite**: Completion of 24 credits.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 384**: Arts of China. 3 credits. Explores the complex and dynamic history of China by examining ways in which social, religious, and political shifts have given rise to new and
variant forms of material culture. Offered by History & Art History (p. 387). May not be repeated for credit.

Mason Core: Global Understanding (p. 137)

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ARTH 385: Arts of Japan. 3 credits.
Art and architecture of Japan, with particular attention to the ways political changes, religious movements, and social developments influenced and shaped those creations. Discusses monuments and artifacts in a variety of media in relation to social and historical contexts. Offered by History & Art History (p. 387). May not be repeated for credit.

Mason Core: Global Understanding (p. 137)

Specialized Designation: Non-Western Culture

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ARTH 386: The Silk Road. 3 credits.
Explores luxury arts and material culture of Eurasian trade routes between Mediterranean and China in historical, religious, and social contexts. Emphasizes cultural interactions in medieval Central Asia. Offered by History & Art History (p. 387). May not be repeated for credit.

Mason Core: Global Understanding (p. 137)

Specialized Designation: Non-Western Culture

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ARTH 393: Art History Internships. 3-6 credits.
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor. Notes: Strongly recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits. Offered by History & Art History (p. 387). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Art History major or minor and permission of instructor.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ARTH 394: The Museum. 3 credits.
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations; focus varies with instructor. Offered by History & Art History (p. 387). May not be repeated for credit.

Mason Core: Synthesis (p. 137)

Recommended Prerequisite: 6 credits in art history at the 300-level and completion or concurrent enrollment in ENGH 302.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ARTH 398: Study Abroad in the History of Art. 1-6 credits.
Study abroad. Course topics, content, and locations vary. Notes: A maximum of 6 credits may be applied to the major or minor with permission of the program. Offered by History & Art History (p. 387). May be repeated within the term for a maximum 12 credits.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ARTH 399: Special Topics in the History of Art. 3 credits.
Topics vary. Notes: May be repeated when topic is different. Offered by History & Art History (p. 387). May be repeated within the term.

Schedule Type: Lecture

Additional Course Details: Title varies by section and/or semester

400 Level Courses

ARTH 400: Historiography and Methods of Research in Art History (Topic Varies). 3 credits.
Historical investigation of theories, methods, and critiques involved in the discipline of art history. Approach or focus may vary with instructor. Offered by History & Art History (p. 387). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302 and 6 credits in art history at the 300 level or permission of instructor.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ARTH 420: Advanced Studies in Ancient Art. 3 credits.
Studies a particular area of ancient art of the Mediterranean, Near East, or Middle East. Topics may be art form or medium, geographical area, theme, function, or context. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 387). May be repeated within the term.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ENGL 302/ENGH 302 and 6 credits in Art History at the 300 level, or permission of instructor.
**ARTH 460:** RS: Advanced Studies in 20th-Century European Art. 3 credits.
Studies a particular aspect of 20th-century European art. Topics may be monographic, thematic, or concentrated on the art of a smaller time period or a particular area. Notes: May be repeated when topic is different. Offered by History & Art History (p. 387). May be repeated within the term for a maximum 9 credits.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** ENGL 302/ENGH 302 and a 3XX level course in modern or contemporary art, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 472:** RS: Advanced Studies in 20th-Century Latin American Art. 3 credits.
Study of a particular topic in 20th-century Latin American art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions. Notes: May be repeated when topic is different. Offered by History & Art History (p. 387). May be repeated within the degree for a maximum 9 credits.

**Specialized Designation:** Research/Scholarship Intensive, Writing Intensive in the Major

**Recommended Prerequisite:** ENGL 302/ENGH 302 and a 3XX level course in 19th or 20th century art of Europe or the Americas, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 482:** Advanced Studies in Art of the United States. 3 credits.
Study of a particular topic in American art. Course may focus on a specific period, region, movement, medium, or theoretical approach. Notes: May be repeated when topic is different. Offered by History & Art History (p. 387). May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** ENGL 302/ENGH 302 and 3XX level coursework in modern or contemporary art, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 474:** Advanced Studies in Contemporary Art. 3 credits.
Study of a topic in contemporary art in a research seminar setting. Focus on particular theme, region, artist, or medium, or take a comparative approach. Notes: May be repeated when topic is different. Offered by History & Art History (p. 387). May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** ENGL 302/ENGH 302; 3XX level coursework in any area of Asian art, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 482:** RS: Advanced Studies in Asian Art. 3 credits.
Seminar-style discussions on a specific topic in Asian art. May focus on the art of a particular period, movement, reign, or region, as well as theoretical issues or works in a particular medium. Notes: May be repeated when topic is different. Offered by History & Art History (p. 387). May be repeated within the term for a maximum 6 credits.

**Specialized Designation:** Research/Scholarship Intensive, Non-Western Culture, Writing Intensive in the Major

**Recommended Prerequisite:** ENGL 302/ENGH 302, and a 3XX-level course in any area of Asian art, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 490:** Independent Study in Art History. 3 credits.
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor. Offered by History & Art History (p. 387). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** 60 credits, ENGH 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 491:** Independent Study in Art History. 3 credits.
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor. Offered by History & Art History (p. 387). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** 60 credits, ENGH 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 492:** Honors Directed Readings. 3 credits.
Linked individualized courses, usually given by same instructor. Involves directed readings. Notes: Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently. Offered by History & Art History (p. 387). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** 60 credits, ENGH 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 493:** Honors Directed Research. 3 credits.
Linked individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings. Notes: Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently. Offered by History & Art History (p. 387). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** Admission to Art History Honors Program, ENGH 302, permission of instructor and chair.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 495:** RS: Objects and Archives in Art History. 3 credits.
Conduct hands-on research with objects and primary and secondary sources. Select particular artifacts, works of art, or group of objects and undertake original research, and bring objects from storage to publication to exhibition. Develops skills in material analysis, critical reading, and academic writing. Focuses on VA/DC/MD libraries, archives, and storerooms. Offered by History & Art History (p. 387). May not be repeated for credit.

**Specialized Designation:** Research/Scholarship Intensive, Writing Intensive in the Major

**Recommended Prerequisite:** 6 credits of 300-level courses in the College of Humanities and Social Sciences and ENGH 302.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ARTH 499:** Advanced Studies in Art History. 3 credits.
Seminar-style discussion on specific subjects in art history. Notes: May be repeated when topic is different. Offered by History & Art History (p. 387). May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** ENGL 302/ENGH 302 and 3XX level course in Art History; or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**500 Level Courses**

**ARTH 570:** Proseminar in History of Decorative Arts. 3 credits.
A writing-intensive course designed to equip students with the skills required for professional scholarship in the history of decorative arts. Examines a variety of theories and methods for analyzing objects. Teaches visual and contextual analysis skills as well as critical thinking about and documentation of primary and secondary sources. Offered by History & Art History (p. 387). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
ARTH 571: Survey of Decorative Arts I. 3 credits.
Overview of European decorative arts from fifteenth to eighteenth centuries, with focus on objects from Italy, France, and England. Examines the role of decorative arts in the formation of identity of the elite in Renaissance Italy as well as Renaissance France and England. Also concentrates on European decorative arts from seventeenth and eighteenth centuries, with emphasis on Paris and London. Offered by History & Art History (p. 387). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to students with a major in History of Decorative Arts.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ARTH 572: Survey of Decorative Arts II. 3 credits.
This writing-intensive course is designed to equip students with the skills required for professional scholarship in the history of decorative arts. Students will examine a variety of theories and methods for analyzing objects through assigned readings, class discussions, and short writing assignments. Offered by History & Art History (p. 387). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to students with a major in History of Decorative Arts.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ARTH 573: Internship in Art History and the Decorative Arts. 3-6 credits.
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor. Notes: Recommended for advanced art history students seeking exposure to professional work in visual arts. Offered by History & Art History (p. 387). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: BA or equivalent or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ARTH 594: The Museum. 3 credits.
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations. Focus may vary with instructor. Offered by History & Art History (p. 387). May not be repeated for credit.

Recommended Prerequisite: Baccalaureate degree or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ARTH 596: Independent Study. 1-3 credits.
Independent reading and research on specific project under direction of department member. Notes: Written report is required. May be repeated for credit. Offered by History & Art History (p. 387). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: Baccalaureate degree or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ARTH 599: Special Topics in Art History and the Decorative Arts. 1-6 credits.
Topics vary. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 387). May be repeated within the term.

Recommended Prerequisite: Baccalaureate degree or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

600 Level Courses

ARTH 600: Methods and Research in Art History. 3 credits.
Investigates theories, methods, and research strategies in discipline of art history. Designed for first-semester students in art history MA program; foundation for further graduate-level work in the program. Offered by History & Art History (p. 387). May not be repeated for credit.

Recommended Prerequisite: Admission to the Art History MA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ARTH 601: Colloquium in Art History. 3 credits.
Offers graduate-level survey in academic art history led by an instructor of record, with input from full Art History faculty. Participants review the current field through lectures, focused readings and group discussions with relevant faculty member. Participants may read in more depth in areas of special interest. Provides preparation for MA exams and professional preparation for teaching. Offered by History & Art History (p. 387). May not be repeated for credit.

Recommended Prerequisite: Admission to the MA Program in Art History.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ARTH 610: Theory of Decorative Arts. 3 credits.
Covers the analysis of objects and design from a number of different perspectives: cultural studies, art history, Marxism, the Frankfurt School, and feminism among others. Offers different tools and viewpoints for each approach to analyze and understand decorative arts. Offered by History & Art History (p. 387). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ARTH 620: Topics in Individual Decorative Arts. 3 credits.
Survey of a single decorative art including media and methods of production. Covers connoisseurship issues such as identifying materials and techniques, fakes, forgeries, repairs, reproductions. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 387). May be repeated within the term for a maximum 24 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ARTH 630: Material Culture Studies. 3 credits.
Introduction to traditions that have contributed to the field of material culture study. Examines a broad range of the material world from the past to the present. Surveys the field’s historical roots and examines approaches to material culture scholarship. Notes: May be repeated for credit when topic is different. Offered by History & Art History (p. 387). May be repeated within the term for a maximum 24 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ARTH 640: European Decorative Arts.** 3 credits.
Examines one or more European decorative arts from periods from the Renaissance to the early 20th century. Arts may include tapestries, pottery and ceramics, silver, furnishing, jewelry and metalwork, glass as well as distinctive stylistic periods. Notes: May be repeated for credit when topic is different. Offered by History & Art History. (p. 387). May be repeated within the term for a maximum 24 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ARTH 650: Global Decorative Arts.** 3 credits.
Examines specific key media, moments, or locations in the global decorative arts beyond the Western tradition. Notes: May be repeated for credit with topic is different. Offered by History & Art History. (p. 387). May be repeated within the term for a maximum 24 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ARTH 656: Independent Directed Readings.** 3 credits.
Designed to prepare students for comprehensive exams by integrating past work and filling gaps in expected knowledge before the exam. Notes: Taken in final semester of art history MA. Offered by History & Art History. (p. 387). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Art History MA program and permission instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ARTH 660: Museum Studies.** 3 credits.
Explores the role of museums, through presentations by key museum personnel and discussion of required readings. Administrators, curators, conservators, educators, editors, among others, work with students to expand their knowledge of how museums function. Notes: May be repeated for credit when topic is different. Offered by History & Art History. (p. 387). May be repeated within the term for a maximum 24 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**ARTH 669: Topics in Art History.** 3 credits.
Research seminar on aspects of art history. Topics vary, but course entails extensive critical readings and discussion, development of bibliographies, and advanced-level research papers. Notes: May be
Lectures address practical concerns but emphasize social, ethical, and philosophical aspects of visual arts professions. Notes: Students who enrolled at Mason in Fall 2007 or later must take AVT 101 during or before their first semester as an AVT major. Required of all AVT majors. May be taken prior to declaring the major or during the first semester as a declared AVT major. Offered by School of Art (p. 813). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 103: Introduction to the Artist’s Studio. 3 credits.
Through projects, readings, class critiques, visuals, and field trips, students explore materials, techniques, concepts, and processes essential to understanding the language of visual arts and the artist’s role. Develops imaginative thinking and sensitivity to visual environment. Note: for non-majors only. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Arts (p. 137)

Registration Restrictions:
Students cannot enroll who have a major in Art and Visual Technology.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 104: Two-Dimensional Design and Color. 4 credits.
Explores elements and principles of two-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects build fundamental knowledge, skills, understanding of precedents, and contemporary practices in visual arts. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Arts (p. 137)

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 105: Three-Dimensional Design and Beyond. 4 credits.
Explores elements and principles of three-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects explore form and composition, time-based media, materials, precedents, and contemporary practices in visual arts. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 104, or permission of instructor.

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 180: New Media in the Creative Arts. 3 credits.
Introduces computing from artist’s perspective. Emphasizes computer use for artistic creation and research. Overview of image making and time-based media within the broad context of contemporary art, new media art, and mediated culture. Offered by School of Art (p. 813). May not be repeated for credit.
Mason Core: Information Technology: Without Ethics (p. 137)

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

200 Level Courses

AVT 204: Visual Thinking. 3 credits.
Explores the ways contemporary artists use principles of design and perception to challenge how we see our world physiologically, psychologically, or socially. Examples drawn from film, photography, new media art, and other contemporary artistic media. Offered by School of Art (p. 813). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 206: Color. 4 credits.
Color theory and principles of color interaction, including additive, subtractive, and partitive color experience; study of harmony, contrast, focus, space, opacity, transparency, temperature and value in both wet and dry media; and related applications of color technology. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 104, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 215: Typography. 3 credits.
Introduction to history and use of type. Reading and projects develop awareness of type as a linguistic and visual communication tool. Introduces typographic design elements, including color, hierarchy, integration with imagery, structure, and content. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Arts (p. 137)

Recommended Prerequisite: Admittance into the Graphic Design Undergraduate Certificate or permission of instructor.

Registration Restrictions:
Required Prerequisites: AVT 104 and 180.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 222: Drawing I. 4 credits.
Introduction and exploration of the fundamentals of drawing methods and materials, with emphasis on observational study and critical analysis of the effective and expressive use of line, mass, value, perspective, and formal composition. Emphasis on problems involved in representational and abstract visual interpretations of forms. Notes: AVT majors encouraged to take AVT 222 with AVT 104. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Arts (p. 137)

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 232: Painting I. 4 credits.
Introduction to the basic methods and principles of painting with a focus on observation, paint application, formal composition, color mixing, and the articulation of form. Students develop a visual awareness as they become familiar with the language of image making, construction, analysis, and awareness. Students prepare portfolios for collaborative and reflective critique. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Arts (p. 137)

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 243: Printmaking I. 4 credits.
Introduction to basics of hand printing. Emphasis on translation and transferal of images, tools, equipment, and technical skills for making a well-defined print. Students explore drawing, synthesis, and multiplicity in this interactive and collaborative course. Presentations and field trips focus on aesthetic and cultural concerns of making multiple images. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Arts (p. 137)

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 252: Darkroom Photography I. 4 credits.
Introduces photographic study and investigation of the fundamental practices and techniques of both film and digital forms with attention to its history and contemporary practices. Class discussions, field trips and critiques enhance visual and verbal vocabularies. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Arts (p. 137)

Schedule Type: Studio

Grading:
AVT 253: Digital Photography I. 4 credits.
Introduction to the digital camera as a tool for electronic photographic image making. Students will be introduced to principles and exploration of the aesthetics of digital photography and also learn basic image-editing skills in a computer environment. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 104, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 254: Photography. 4 credits.
Introduces photographic study and investigation of the fundamental practices and techniques of both film and digital forms with attention to its history and contemporary practices. Class discussions, field trips and critiques enhance visual and verbal vocabularies. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Restricted to AVT majors and AVT minors.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 262: Sculpture I. 4 credits.
Projects in sculpture that emphasizes contemporary theory and issues, the development of individual concepts, and creative solutions. Explores the application of materials, tools, and imaginative processes. Faculty demonstrations, lectures, gallery and museum visits, and regular student work critiques. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Arts (p. 137)

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 272: Interdisciplinary Arts. 4 credits.
Introduces contemporary interdisciplinary art practice through readings and studio projects in performance and installation. Provides students with opportunities to deepen understanding of conceptual art, nontraditional media practices, and collaborative practice in visual arts. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Arts (p. 137)

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 280: Introduction to New Media Arts. 4 credits.
Investigates ways in which contemporary artists employ tools in response to social, political and cultural conditions. Students create meaningful works of art that demonstrate conceptual and contextual awareness plus technical ability. Offered by School of Art (p. 813). May not be repeated for credit.

AVT 300: Artsbus Attendance. 0 credits.
Students travel to New York or other destinations aboard the AVT Artsbus to attend faculty-selected exhibitions. Notes: AVT majors must satisfactorily complete course once for each semester they are enrolled as majors, up to five times. Repeatable up to three times per semester. Offered by School of Art (p. 813). May be repeated within the term.

Schedule Type: Laboratory

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

AVT 301: Visual Voices Colloquium. 1 credit.
Students attend AVT Visual Voices lecture series during the semester and complete assignments related to the topics covered. Notes: AVT majors must accumulate at least 3 credits in this colloquium to graduate. Offered by School of Art (p. 813). May be repeated within the degree for a maximum 8 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 305: Creative Processes. 3 credits.
Study of the creative process in general, with emphasis on the inspiration, working methods, and final creations of various artists. Students explore their own creative processes through journal keeping, collaborative exercises, and projects. Offered by School of Art (p. 813). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 307: Aesthetics. 3 credits.
Interdisciplinary course examines broad range of contemporary art and culture to engage an expansive conception of aesthetic experience. Students engage with historical and contemporary aesthetic theories, build heightened aesthetic sensibility, and explore their personal aesthetic. Offered by School of Art (p. 813). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 309: Art as Social Action. 3 credits.
Interdisciplinary exploration of work by citizen-artists whose art-making engages the social world. Students learn about the history of socially engaged art-making and experiment with individual and collaborative projects addressing social issues. Offered by School of Art (p. 813). May not be repeated for credit.

Schedule Type: Lecture
**AVT 311:** *Graphic Design Methods and Principles.* 3 credits.
Emphasis on developing design solutions requiring demographic, historical, and/or cultural research. Course strengthens design and typography skills, introduces conceptual problem solving, audience considerations, and broad-based tools designers use to develop effective visual communication solutions. Offered by School of Art (p. 813). May not be repeated for credit.

**Required Prerequisite:** AVT 215C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 313:** *Editorial Design.* 3 credits.
Development and production of long-form design projects (magazines, newspapers, catalogs, and other serial and/or multipage publications). Emphasis on narrative, consistency, structure, clarity. Addresses information design issues and reinforces conceptual skills and integration of imagery and text. Offered by School of Art (p. 813). May not be repeated for credit.

**Required Prerequisite:** AVT 311C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 318:** *History of Graphic Design.* 3 credits.
A survey of design history. Looks at print and web design as both a reaction to and shaper of the broader culture (including other fine applied arts) through the study of major movements and designers. Offered by School of Art (p. 813). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 319:** *Mobile App Design.* 3 credits.
Introduces students to designing user interfaces, and experiences for mobile devices. Students will be exposed to designing for a variety of mobile platforms including tablet, phone, and mobile web interfaces. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** C or higher in AVT 311.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 324:** *Figure Drawing.* 3 credits.
Drawing with an emphasis on the observational study of the human body. Human anatomy and proportion are examined through a series of methodological approaches, including gesture, contour, mass, and modeling. Offered by School of Art (p. 813). May not be repeated for credit.

**Required Prerequisite:** AVT 222C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 326:** *Nontraditional Approaches to Drawing.* 3 credits.
Encourages students to challenge some traditional approaches to drawing by creating innovative works that combine familiar drawing techniques with a variety of materials, approaches, and unusual formats. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 222 or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 327:** *Illustration.* 3 credits.
This course is intended to provide an overview of illustration as a visual communication medium. Sharing the tools and techniques of gallery artists and the communicative goals of graphic designers, illustrators work across media to make concepts understandable and powerful in the service of editorial, informational or persuasive goals. Students will begin to discover individually unique methods of problem solving by developing a personal visual vocabulary and relating it to historical and contemporary trends of art, design and illustration. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 222 or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 323:** *Drawing II.* 3 credits.
Students develop observational, sketching, and rendering skills. Introduction to a range of materials, methods, formal concepts, drawing in series, and critique vocabulary. Offered by School of Art (p. 813). May not be repeated for credit.

**Registration Restrictions:**

**AVT 328:** *Mixed Media.* 3 credits.
Students investigate the contemporary innovations and disciplinary cross-pollination which have revolutionized and expanded the boundaries of traditional fine arts. Projects incorporate text, sound, computer generated imagery, collaboration and installation. Offered by School of Art (p. 813). May not be repeated for credit.
AVT 333: Painting II. 3 credits.
Focuses on the development of formal and technical skills, with an emphasis on paint application, color interaction, and support building and preparation. Introduces concepts, methodologies, and approaches relevant to contemporary painting. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 104\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 336: Experimental Painting. 3 credits.
Using contemporary painting practices as starting place, students explore a variety of experimental and conceptual approaches to painting. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 232\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 337: Figurative Painting. 3 credits.
Working primarily with live models, students explore the human form as the main subject for a variety of visual and expressive inquiries. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 232, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 343: Printmaking II. 3 credits.
An introduction to relief, screenprint, and intaglio printing; including the study of historical antecedents and their relevancy to contemporary printmaking. Students learn reductive and additive techniques in preparing printing surfaces. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 243\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 345: Paper/Print/Book as Language. 3 credits.
Introduces the artist’s book as both physical structure and creative association of words and images. Students learn techniques of bookmaking, binding, and traditional and digital printmaking to produce an artist-made book with narrative and sequential elements. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 180, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 346: Digital Printmaking. 3 credits.
A beginning course in hand printing digitally processed images. Projects focus on electronic means of creating and manipulating imagery. Students achieve skills in multiple steps and incremental development required in making prints. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 180, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 353: Darkroom Photography II. 3 credits.
Continuation of Fundamentals of Photography with further investigation into the aesthetics of photography through experimentation with new camera formats, films, papers, developers and development of a photographic portfolio. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: AVT 252\(^C\) or 254\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 354: Digital Photography II. 3 credits.
A computer-intensive class in which students create digital images from the viewpoint of a photographic artist. Emphasis on digital photo techniques, including making digital negatives, concept development, and visual aesthetics. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 180, or permission of instructor.

Registration Restrictions:
Required Prerequisite: AVT 253\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 356: Photo Studio Techniques. 3 credits.
Introduces Theory, concepts and applications of photographic studio lighting. Emphasis on the ability to control and manipulate light in a photographic lighting studio environment using large format film
cameras. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 353 or AVT 354, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 359:** *Photography Seminar.* 3 credits.
A combined studio and lecture course investigating photography’s history, critical theory, philosophy, and practice. Lectures, discussions, readings, and projects focus on a medium that has enormously influenced art and culture. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 353 or permission of the instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 363:** *Sculpture II.* 3 credits.
Expands on the principles and processes introduced in Sculpture I, developing a higher level of technical competence and critical sophistication. Notes: Lectures, independent student research, and gallery and museum visits required. Vigorous critiques. Offered by School of Art (p. 813). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** AVT 262C.
*C* Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 370:** *Entrepreneurship in the Arts.* 3 credits.
Combined lecture and studio course in developing entrepreneurial skills in arts. Special focus on developing communication skills and planning strategies, as well as on nurturing skills that enable students to creatively solve problems and think about opportunities. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 180, or 280, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 371:** *Visual Perception and the Arts.* 3 credits.
Review of major approaches to the study of visual perception. Topics include analysis of picture perception, visual thinking, the relationship between symbolic and non-symbolic thinking and representation, and how pathologies of vision affect art production. Offered by School of Art (p. 813). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 372:** *Hip Hop Culture.* 3 credits.
Examines hip hop as an art form within a continuum of cultural expression. Explores multilayered social, political, and aesthetic aspects of hip hop, historical causes and precedents, and contemporary derivatives and implications. Offered by School of Art (p. 813). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 373:** *Performance Studio.* 3 credits.
Studio course focused on theory and practice of collaborative performance art. Detailed analysis of creation and production processes from interdisciplinary perspective in conjunction with practical training in multimedia technologies, body sculpture, and theater of images. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 272, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 374:** *Sound Art I.* 3 credits.
Introduction to the physics, phenomenology, and production of sound as an expressive medium. Using analog and digital tools, students will explore constructing with sound. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 180, or 280, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 376:** *Live Movies.* 3 credits.
Advanced performance studio emphasizing cinematic forms and multimedia technologies. Also covers sound design, scenic design and materials, production planning, and interdisciplinary approaches to narrative and content in performance. Notes: Students collaborate on production projects. Offered by School of Art (p. 813). May not be repeated for credit.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 377:** *Cyberpunk.* 3 credits.
Traces the ways that cinema, music, fiction, cultural theory, visual art, television, theater, and performance have embraced and been shaped by cyberpunk and cyberculture. Includes readings, writings, discussion, screenings, guest speakers, and research projects. Offered by School of Art (p. 813). May not be repeated for credit.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
AVT 380: Thinking Through Animation. 3 credits.
Students will be encouraged to expand their abilities and capabilities as thinkers, artists and citizens. This course will provide an introduction to issues relating to the production and reception of animated media bracketing the turn of the 21st century. Offered by School of Art (p. 813). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 382: 2D Experimental Animation. 3 credits.
Introduces conceptual, contextual, technical, and aesthetic practices of two-dimensional experimental animation. Students learn to animate hand-drawn and computer-generated images. Students work to create an imaginative and meaningful short animation with sound. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 280, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 383: 3D Experimental Animation. 3 credits.
Students create socially relevant 3D scenes with scaled objects, surface textures, lights, and shadows. These scenes serve as environments for short, thought-provoking animations. Emphasis on idea development, critical examination of animation practices, and visual aesthetics. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 280 or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 385: EcoArt. 3 credits.
Develop collaborative projects that explore art and visual culture, the environment, and sustainability. Students are given access to the School of Art Permaculture Studio as a “green” work space for developing course projects. Offered by School of Art (p. 813). May be repeated within the degree for a maximum 8 credits.

Mason Core: Arts, Encore:Sustainability, Synthesis, Encore:Well-Being (p. 137)

Specialized Designation: Green Leaf Course

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 390: Video Art. 3 credits.
Integrates study of contemporary art theory, montage theory, and artistic practices with application to new media and technology. Special focus on visual culture and video art, sound design, and the sociopolitical implications of media. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 280 or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 393: Field Experience in the Arts. 1-6 credits.
Introductory working and learning experience with an organization or individual in the arts or as a teaching assistant. Students must complete 45 hours of work at the internship site for each credit. Note: Departmental permission required to register. Notes: Placement documentation to include 45 hours of work per credit. Offered by School of Art (p. 813). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Junior standing and permission of instructor and academic advisor.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 394: Honors Seminar. 1 credit.
Offers highly motivated students opportunities to interact with art world professionals through field trips, research, critiques, and creative assignments. Notes: Students accrue credits toward graduation with AVT honors. Offered by School of Art (p. 813). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: Open only to qualified AVT honors students by invitation.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 395: Writing for Artists. 3 credits.
Practical writing seminar in which students practice typical writing needs of creative professionals; including artist’s statements, grant proposals, and reviews; while also exploring ways in which artists have used writing, books, and language in art making. Offered by School of Art (p. 813). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: ENGH 302C or ENGL 302C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 396: Writing for Designers. 3 credits.
Practical writing seminar in which students practice typical statements, design briefs and proposals, and reviews; while also exploring ways in which designers have used writing, publications, and language in expressing critical design thinking. Offered by School of Art (p. 813). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: C or higher in ENGH/ENGL 302.

Schedule Type: Lecture
Grade:
This course is graded on the Undergraduate Regular scale. (p. 82)

400 Level Courses

AVT 407: Advanced Aesthetics. 3 credits.
Advanced examination of aesthetic concepts and theories, focusing on issues pertinent to artmaking. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 307C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grade:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 408: Visual Communication Theories. 3 credits.
Advanced lecture course focusing on key theories and themes that have informed 20th and 21st century design practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of the designers as thinkers and writers. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: C or higher in ENGH/ENGL 302 or permission of instructor.

Schedule Type: Seminar

Grade:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 410: Experiential Design History. 3 credits.
This hybrid lecture/studio course provides a historical perspective of the evolution of graphic design and examines graphic design’s contribution to culture through writing and design projects. The course will have both lecture and studio content, providing ‘hands-on’ experiential opportunities in traditional graphic techniques. Offered by School of Art (p. 813). May not be repeated for credit.

Schedule Type: Seminar

Grade:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 411: Motion Design. 3 credits.
Motion Design introduces the theories, techniques and practices of motion design and the integration of design, image, sound, video and animation. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: AVT 217C and 311C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Graphic Design or Web Design.

Enrollment limited to students in the AR-BFA-AVT program.

Schedule Type: Studio

Grade:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 412: Advanced Typography. 3 credits.
An advanced exploration of type, design and the graphic organization of visual information. Emphasis is on the aesthetic and technical execution of typographic hierarchy in visual communications. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 313C.
C Requires minimum grade of C.

Schedule Type: Studio

Grade:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 413: Professional Design Practices. 3 credits.
Addresses the nature of the professional graphic designer in terms of career development and self-marketing, visual presentations of design work, preparation of written materials and interview techniques. Special emphasis will be given to the development of a design business, as well as freelance and pro-bono design work. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisites: AVT 313C and 414C.
C Requires minimum grade of C.

Schedule Type: Studio

Grade:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 414: Corporate Design and Branding. 3 credits.
Fundamentals of branding and identity design. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphics standards guide. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admittance into the Graphic Design Undergraduate Certificate, or Graphic Design Minor, or permission of instructor.

Registration Restrictions:
Required Prerequisites: (AVT 252C or 253C) and (AVT 311C and 395C).
C Requires minimum grade of C.

Schedule Type: Studio

Grade:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 415: Web Design and Usability. 3 credits.
Introduces students to web design, usability, and the use of popular applications for static, interactive, and motion-based web development. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (AVT 217C and 311C) and (AVT 313C or 414C).
C Requires minimum grade of C.

Schedule Type: Studio

Grade:
This course is graded on the Undergraduate Regular scale. (p. 82)
AVT 416: Advertising Design. 3 credits.
Provides insight and practice in the creative design process behind effective and memorable advertising. Emphasis on the design and presentation of a series of portfolio-ready advertising campaigns for actual client use. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 414C.
C Requires minimum grade of C.

Enrollment limited to students in the AR-BFA-AVT program.

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 417: Package Design. 3 credits.
Provides a focused studio experience to conceptualize and design multiple applications for contemporary package design. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 414C.
C Requires minimum grade of C.

Enrollment limited to students with a concentration in Graphic Design.

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 419: Topics in Graphic Design. 1-6 credits.
Rotating subjects give students a deep look into and appreciation of a specific topic in design practice. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by School of Art (p. 813). May be repeated within the term.

Registration Restrictions:
Required Prerequisites: AVT 311C and (AVT 313C or 414C).
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

AVT 420: Advanced Web Design. 3 credits.
Building on the principles and skills gained in AVT 415, this course delves deeper into web-related concepts and techniques. Students will gain advanced knowledge in evolving web technology, preparing them for professional entry into the web design field. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 415C.
C Requires minimum grade of C.

Enrollment limited to students in the AR-BFA-AVT program.

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 422: Drawing III. 3 credits.
Builds on intermediate drawing skills, emphasizing individual exploration and expressive techniques. Along with rigorous observational study, students work from a variety of sources to develop a broad understanding of visual solutions within contemporary art practice. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 323C.
C Requires minimum grade of C.

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 423: Drawing IV. 3 credits.
Students learn and practice advanced drawing skills and techniques in a variety of media and formats. Emphasis on development of content, personal sources, techniques, presentation strategies, and methods of analysis through critique. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 422C.
C Requires minimum grade of C.

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 432: Painting III. 3 credits.
Intermediate course with an emphasis on developing personal content, concepts, painting strategies, and a practical understanding of contemporary ideas in painting. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 333C.
C Requires minimum grade of C.

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 433: Painting IV. 3 credits.
Builds on intermediate painting skills, emphasizing individual exploration and expressive techniques. Along with rigorous observational study, students work from a variety of sources to develop a broad understanding of visual solutions within contemporary art practice. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 432C.
C Requires minimum grade of C.

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
AVT 434: Advanced Painting II. 3 credits.
Students work rigorously and independently, advancing individual studio practice through in-depth dialogue with faculty and formal group critiques. Emphasis on individual decision making, personal initiative, and critical vocabularies. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 433C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 435: Advanced Painting III. 3 credits.
Advanced directed research in painting. Employing rigorous concepts, presentation strategies, and in-depth critique, students develop independent projects into a cohesive body of work. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 434C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 442: Printmaking III. 3 credits.
An intermediate print media course with an emphasis on a wider variety of tools and concepts that investigate photo-based imagery and advance personal narrative. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 343C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 443: Printmaking IV. 3 credits.
An advanced print media course that uses hand-drawn, digital, and photo-based imagery. Students explore traditional and new printmaking techniques in a series of related prints and explore their relevancy to contemporary printmaking. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 442C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 444: Printmaking V. 3 credits.
Advanced print media course incorporating three-dimensional applications of hand printmaking. Students develop concepts in digital printmaking, book making, sculptural prints, and installation works. Explores issues in contemporary printmaking through critical discussions, reading, and writing assignments. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AVT 443C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 453: Professional Practices. 3 credits.
This course prepares studio art majors for their professional careers. Each student will select a facet of interest to develop assets for a professional portfolio. Emphasis will be placed on developing your professional brand and accompanying materials such as portfolio, websites, CVs etc. with critiques focusing on the individual's process. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Completion of 60 credits, including 12 credits of upper-level studio coursework.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 454: Alternative Photo Processes. 3 credits.
Introduction to 19th century and nontraditional photographic processes including cyanotype, van dyke, gum bichromate, liquid emulsion, and image transfer. Exploration and discussion of photography's influences, application, and use in other mediums. Offered by School of Art (p. 813). May not be repeated for credit.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 455: Digital Printing Techniques. 3 credits.
Continuation of 354 Digital Photo Methods with further examination into digital techniques, personal expression and digital printing. Course emphasis is on the fine art and craft of the digital print and portfolio development. Notes: Continuation of AVT 354 Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 354, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 457: Documentary Photography. 3 credits.
Introduces documentary photography: techniques, history, choices, and ideas necessary to create meaningful photo essays that incorporate a personal, committed, in-depth approach to seeing and depicting lives and situations. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 353 or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 458: Advanced Studio Lighting.** 3 credits.
The advanced study of photographic studio lighting concepts using electronic strobes and power packs with emphasis placed on constructing studio materials, metering techniques, staging complex sets, and on-location photography. Offered by School of Art (p. 813). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: AVT 356C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 462: Sculpture III.** 3 credits.
Advanced studio course for continued individual, conceptual, and critical development in sculpture. Biweekly seminar, independent research, museum and gallery visits, vigorous individual and group critiques, required documentation, and portfolio preparation supporting studio projects. Offered by School of Art (p. 813). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: AVT 363C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 463: Sculpture IV.** 3 credits.
Intensive studio course for advanced sculpture students to further individual, conceptual, and critical development. Students produce a body of work based on technical exploration, critical discussion, reading, and writing. Offered by School of Art (p. 813). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: AVT 462C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 464: Sculpture V.** 3 credits.
Advanced studio course for rigorous and independent production of sculpture. Weekly topical seminar, vigorous critiques, museum and gallery visits, professional documentation, and research resulting in a body of work to be exhibited. Offered by School of Art (p. 813). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: AVT 463C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 465: Sculpture VI.** 3 credits.
Students work rigorously and independently, gaining insights into personal process and direction through one-on-one critical dialogue with faculty and formal group critiques. Emphasizes individual decision making and personal initiative. Notes: Continuation of advanced work in AVT 464. Offered by School of Art (p. 813). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: AVT 464C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 472: Critical Theory in the Visual Arts.** 3 credits.
Examination of currents in theory and criticism that inform contemporary practice and critical analysis in the visual arts. Offered by School of Art (p. 813). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: ARTH 374C.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 473: Advanced Performance Studio.** 3 credits.
Advanced laboratory for performance. Emphasis on new technologies and their applications, multimedia scriptwriting and storyboarding, and the creation of audiovisual performance. Students participate in collaborative production. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 373 or Permission of Instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 474: Sound Art II.** 3 credits.
Extends a working knowledge of the materiality of sound into an in-depth exploration of creation in the sonic realm. May include synthesis, circuit-bending, use of field recordings and other samples, and live performance. Offered by School of Art (p. 813). May not be repeated for credit.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 482: Advanced Image Making.** 3 credits.
In-depth look at the processes and mechanisms used to generate, reconstruct, and/or create new media images. Students are required to create a series of contextually related images and to further develop their critical analysis abilities. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 280, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 483: RS: Art and Interactivity. 3 credits.**
Provides a context for art making as an interactive and participatory experience while critically examining the ways in which technologies may aid and also inhibit engagement with the social and political world. Offered by School of Art (p. 813). May not be repeated for credit.

**Specialized Designation:** Research/Scholarship Intensive

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 487: Advanced Topics: New Media Art. 3 credits.**
Provides a context for exploring current developments in new media art practice in and outside the studio. Specific course content adapts and responds to ongoing movements in new media art and contemporary culture. Offered by School of Art (p. 813). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** AVT 280 plus one 3XX-level New Art Course, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**AVT 489: Internship in Art and Visual Technology. 1-6 credits.**
Unpaid professional-level work experience in a professional organization or with an individual artist, related to the student's concentration and career plans. Students must complete 45 hours of work at the internship site for each credit. Note: departmental permission required to register. Notes: Placement documentation to include 45 hours of work per credit. Offered by School of Art (p. 813). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Senior standing, completion of 12 concentration credits, and permission of instructor.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 491: Independent Study in Art and Visual Technology. 1-6 credits.**
Opportunity for development of advanced skills and concepts in a field of interest. Study proposal must be approved by instructor prior to registration. Students must complete 45 hours of work at the internship site for each credit. Notes: Project documentation to include 45 hours of work per credit. Offered by School of Art (p. 813). May be repeated within the term for a maximum 24 credits.

**Recommended Prerequisite:** Senior standing, completion of 12 concentration credits, and permission of instructor.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 493: Teaching Visual Thinking Through Media, PK-12. 3 credits.**
Investigates range and appropriateness of media and materials that encourage creative expression in the art classroom for PK-12 students, and expands the artist-teacher's visual repertoire. Incorporates art history, criticism, and aesthetics, as well as language arts and other content areas that challenge students' artistic growth and human development. Offered by School of Art (p. 813). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** AVT 495C.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 494: Strategies in Art Room: PK-12. 3 credits.**
The study of various media, skills and concepts adapted for PK-12 curriculum. Includes instructor demonstrations, prototypes, practicum, and class presentations. Participants will learn appropriate instructional strategies for implementation. Offered by School of Art (p. 813). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** AVT 495C.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 495: Introduction to Art Teaching and Learning. 3 credits.**
Explores art-teaching profession through readings, discussion, hands-on activities, and visits to diverse area public schools. Students discover a variety of ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students. Notes: Prior to enrollment, students must complete art education inquiry form. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Junior standing, and completion of at least 20 credits of AVT coursework with a C or higher; or permission of art education advisor.

**Registration Restrictions:**
**Required Prerequisites:** (ENGH 302C and AVT 307C).
C Requires minimum grade of C.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**AVT 496: Special Topics. 1-4 credits.**
Explores topical studies in AVT including theoretical and critical aspects of art or studio production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by School of Art (p. 813). May be repeated within the degree.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
Additional Course Details: Title varies by section and/or semester

AVT 497: Senior Project. 3 credits.
Capstone course in which students develop and present a cohesive body of work along with written materials and documentation. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Capstone, Synthesis (p. 137)

Recommended Prerequisite: Senior Art and Visual Technology major, completion of 12 concentration credits, and completion or concurrent enrollment in all required Mason Core courses.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AVT 498: Senior Design Project. 3 credits.
Capstone course in which students develop and present a design project exploring the possibilities of personal or professional expression. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals. Offered by School of Art (p. 813). May not be repeated for credit.

Mason Core: Capstone, Synthesis (p. 137)

Recommended Prerequisite: Senior Art and Visual Technology major.

Registration Restrictions:
Required Prerequisites: AVT 311C, 313C and 414C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

AVT 507: Advanced Aesthetics. 3 credits.
Graduate seminar in aesthetic concepts and theories, focusing on issues pertinent to artmaking. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the MFA program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 519: Special Topics in Graphic Design. 1-6 credits.
Exploration of topical studies in graphic design, including theoretical and critical aspects of studio production. Offered by School of Art (p. 813). May be repeated within the term for a maximum 13 credits.

Recommended Prerequisite: Admission to AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 522: Drawing V. 4 credits.
Drawing on an advanced level, emphasizing individual decision-making and personal initiative. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 523: Drawing VI. 4 credits.
Drawing on an advanced level, emphasizing individual decision-making and personal initiative. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, AVT 522, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
AVT 595: Introduction to Art Teaching and Learning. 3 credits.
Explores art-teaching profession through readings, discussion, hands-on activities, visits to diverse area public schools and action research. Students analyze ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the MAT Program or permission of the art education advisor or director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 596: Independent Study. 1-6 credits.
Independent reading and research on specific project under department faculty member’s direction. Notes: Written reports required. Offered by School of Art (p. 813). May be repeated within the term.

Recommended Prerequisite: Admission to AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 599: Special Topics in Art and Visual Technology. 1-6 credits.
Exploration of topical studies in AVT, including theoretical and critical aspects of art or studio production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by School of Art (p. 813). May be repeated within the term.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

600 Level Courses

AVT 600: Research Methodologies. 3 credits.
Graduate seminar focusing on development of independent research project in student’s area of emphasis. Explores principal methods of researching and documenting art and arts practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research systems. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Art Education, Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 605: Issues and Research in Art Education. 3 credits.
Readings and projects explore historical and contemporary ideas, issues, philosophies, pedagogy, and research in art education. Investigates teachers’ use of research-oriented questions and data to explore classroom issues and improve teaching and learning. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the MAT graduate program and permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 606: Creativity and Cognition in the Arts and Media. 3 credits.
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings. Offered by School of Art (p. 813). May not be repeated for credit. Equivalent to EDEP 601.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 610: Graduate Seminar.** 2 credits.
Students present their work or the work of contemporary artists for discussion and peer and faculty critiques. Special focus on developing public communication and presentation skills on contemporary issues in the arts. Notes: Seminar course required of all AVT graduate students four times during course of study. Offered by School of Art (p. 813). May be repeated within the degree for a maximum 8 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Art Education, Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 611: Graduate Design Seminar.** 1 credit.
A laboratory for the exploration of contemporary design theory and practice through writing and design making, this class will have rotating topical content. Offered by School of Art (p. 813). May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 612: Independent Project Research.** 1 credit.
Provides the development and research phase in preparation for AVT 794: Independent Design Project, the capstone course in the Graphic Design masters program. Students will prepare their written final project proposal for presentation to the AVT GD Graduate Faculty Committee. Notes: To be completed prior to enrolling in AVT 794: Independent Design Project. Offered by School of Art (p. 813). May be repeated within the degree.

**Recommended Prerequisite:** completion of 30 graduate credits

**Registration Restrictions:**
AVT 615: Technology for Art Teachers. 3 credits.
Addresses use of technology in PK-12 art classroom. Focuses on research, presentation and instruction, and image creation. Students develop technology-enhanced teaching units for different grade levels and explore related issues, including copyright, plagiarism, and appropriation. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the Art Education concentration ASTL and/or permission of art education director.

Registration Restrictions:
Enrollment limited to students with a class of Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 616: Advanced Art and Interactivity. 4 credits.
Studio, lecture course investigating art as networked activity. Particular attention focused on Internet as context for creation, distribution, and patronage of art. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to AVT graduate program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 617: Advanced Typography. 4 credits.
Students will produce a body of work exploring the opportunities and limitations of typographical design. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to graphic design MA (or MFA) program, AVT graduate program or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 618: Visual Communication Theories. 2 credits.
Advanced graduate seminar focusing on key theories and themes that have informed 20th and 21st century design practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of designers as thinkers and writers. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to MFA program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 619: Advanced Web Design. 4 credits.
Develops skills for the application of information, interaction, usability, and visual design for web site developments. Students gain in-depth knowledge of user behaviors and broader context of social, cultural, and contemporary issues in web communication. Students learn professional design processes and integrate multiple web developing technologies. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to Graphic Design MA program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 620: Theory, Criticism, and the Arts. 3 credits.
Cross-disciplinary graduate seminar focusing on key theories and themes that have informed 20th- and 21st-century arts practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of artists as thinkers and writers. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to Graphic Design MA program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 621: Art Writing Seminar. 3 credits.
Includes criticism, the artist statement, manifestos, and language as visual art. Offered by School of Art (p. 813). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment limited to students in the AR-MFA-AVT or AR-MFA-VPA programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 622: Advanced Drawing. 4 credits.
Advanced directed research in drawing with continued development of individual aesthetic. Study of historical and philosophical precedents integral. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 632: Graduate Painting I. 4 credits.
Entering students are expected to be competent painters, with technical proficiency, a disciplined process, and a directed personal vision. Students work rigorously and independently toward the understanding and mastery of techniques, methods, and concepts relevant to formal expression of personal content. Students expected to participate in critical discourse with supervising faculty. Achievement measured by faculty review board at mid-semester and term’s end. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 633: Graduate Painting II. 4 credits.
Building on research and practices established in Graduate Painting I, students continue to develop strategies for the expression of personal vision and style. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term’s end. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 632, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 634: Advanced Graduate Painting I. 4 credits.
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term’s end. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 633, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 635: Advanced Graduate Painting II. 4 credits.
Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty.
Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 634, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 641: Graduate Graphic Design I. 4 credits.**
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 642: Graduate Printmaking I. 4 credits.**
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, AVT 643, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 643: Graduate Printmaking II. 4 credits.**
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 642, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 644: Advanced Graduate Printmaking I. 4 credits.**
Intensive course of creative exploration in print media that furthers students’ independence through production of individualized body of work reflecting interests within the broader contexts of contemporary social, technological, and cultural issues. Students also engage in collaborative studio practices to integrate visual technologies in their work. These may include digital imaging, drawing, graphic design, painting, performance, photography, and sculpture. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, AVT 643, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 645: Advanced Graduate Printmaking II. 4 credits.**
Intensive studio course that furthers student independence through production of a body of work reflecting a broad context of social, cultural and contemporary issues. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program, and AVT 644.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 646: Graduate Graphic Design II. 4 credits.**
Continuing to work independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art and design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end. (This is the second course in a two-course sequence.) Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program, and AVT 647.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 647: Advanced Graduate Graphic Design I. 4 credits.**
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program, and AVT 646.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 648: Advanced Graphic Design II. 4 credits.**
Continuing to work independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art and design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term’s end. (This is the second course in a two-course sequence.) Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program, and AVT 647.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 652: Graduate Photography I. 4 credits.**
Critical theory and directed practice in photography focusing on development of a personal voice and working method through intellectual activity and creative work. Emphasizes ability to explore concepts, develop skills, and evolve as a communicator of ideas and photographic artist. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 653: Graduate Photography II. 4 credits.**
An intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others’ work, the cultural climate, and issues involved in one’s own work as it progresses. Notes: Continuation of Graduate Photography I. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
AVT 654: Advanced Graduate Photography I. 4 credits.
Intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others’ work, the cultural climate, and issues involved in one’s own work as it progresses. Notes: Advanced graduate photography course. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, AVT 653, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 655: Advanced Graduate Photography II. 4 credits.
AVT 655, Advanced Graduate Photography II, Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 652, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 656: Advanced Graduate Sculpture I. 4 credits.
Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, AVT 652, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 657: Advanced Graduate Sculpture II. 4 credits.
Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, AVT 653, or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio
Grading:
This course is graded on the Graduate Regular scale. (p. 82)
Recommended Prerequisite: AVT 664 or permission of the instructor.

AVT 664: Three-Dimensional Art Making Across Cultures. 3 credits.
Explores the diversity of art forms in world cultures and work of traditional and contemporary artists. Students learn basic three-dimensional art-making techniques, including ceramics and fibers, and learn to design three-dimensional art instruction for PK-12 levels. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the ART graduate program or permission of the art education director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 668: Four Dimensional Art Making: Technology and New Media. 4 credits.
Develops teacher skills for the application of advanced technology for the PK-12 art program and examines the changing nature and uses of technology for expanding visual literacy through pedagogical strategies. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Special scale. (p. 82)

AVT 670: Performance Studio I. 1 credit.
Supervised classroom teaching practicum in Mason's undergraduate program or community college program. Offered by School of Art (p. 813). May be repeated within the degree for a maximum 4 credits.

Recommended Prerequisite: Admission to AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 674: Advanced Performance Studio. 4 credits.
Advanced laboratory for creating and producing performance art. Emphasizes new technologies and their applications, multimedia scriptwriting and storyboarding, and the creation of audiovisual performance. Students work independently and also contribute to collaborative production. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** AVT 673 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

AVT 676: Graduate Sound Art. 4 credits.
Assuming basic competency in digital audio production and within the theory of sounded experience, students will be assisted in the incorporation of sonic material into their graduate research projects. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

AVT 678: Interface and CD-ROM Design. 5 credits.
Combined lecture and studio course in multimedia interface and CD-ROM design. Focuses on exporting traditional visual and aural artistic aesthetic to the computer environment within a multimedia context. Assigned class readings augmented and supported by presentations of various digital interfaces and CD-ROM examples. Discusses commercial, entertainment, and educational titles, as well as CD-ROM experimental art works. Studio time divided between AVT labs and area multimedia facilities. Students conceive, design, and develop two CD-ROM or kiosk interfaces due at midterm, and complete a dual platform CD-ROM project due at semester end. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

AVT 682: Experimental 2D Animation. 4 credits.
Designed to broaden range of visually expressive, time-based media from cell animation and stop motion animation to rotoscoping and two-dimensional digital animation. Emphasizes idea generation, concept development, and visual aesthetics. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

AVT 684: Advanced Image Making. 4 credits.
Overview of two-dimensional computer-imaging applications in the arts, including painting, printmaking, mixed media, illustration, video, and animation. Lectures combine technical and aesthetic material, including image processing for artists and color reproduction. Emphasis on developing advanced studio portfolio. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to AVT Graduate Program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

AVT 685: Video Art. 4 credits.
Explores video as medium that is transforming art and is transformed by art. Emphasizes developing an approach to personal narrative, creative skills, and construction of meaning, as well as on acquiring technical skills. Offered by School of Art (p. 813). May not be repeated for credit.
Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 686: Experimental 3D Animation. 4 credits.
Teaches how to create realistic, three-dimensional scenes with scaled objects, surface textures, lights, and shadows. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities. Students required to render a portfolio of high-resolution images. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to AVT Graduate Program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 687: Advanced Topics: New Media. 4 credits.
Advanced course in digital media, including layer compositing, digital video editing, rotoscoping, and cell animation. Emphasizes integrating traditional techniques with software applications; and publishing projects to CD-ROM, DV tape, DVD, and Internet. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

AVT 688: Hybrid Animation. 4 credits.
Study of digital two-dimensional and three-dimensional animation practices. Introduces lighting, camera movement, object motion, timing, and texture mapping as students plan and produce a short animation. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 691: Elementary Art Education. 3 credits.
Concepts and methods in early childhood and elementary art education. Notes: Students spend three hours per week in class and one hour per week in required field experience in public schools and other educational settings. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the MAT program and permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 692: Secondary Art Education. 3 credits.
Concepts and methods in secondary art education. Notes: Students spend three hours per week in class, and one hour per week in required field experience in the public schools and other educational settings. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: AVT 691, or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
**AVT 694: Advanced Studies in Teaching Critical Response to Art, PK-12.** 3 credits. Develops visual literacy and critical thinking skills by examining diverse theoretical models and applying strategies to expand knowledge about art and artifacts in the PK-12 classroom and museum. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Art Education concentration ASTL and/or permission of the art education director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 695: Internship in Art Education (Student Teaching).** 5 credits. Full-time internship in which students teach in elementary and secondary schools with guidance from cooperating mentor teachers. College supervisors make periodic site visits to observe, assess, and evaluate progress. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Completion of all other MAT program requirements.

**Recommended Corequisite:** AVT 696.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 696: Internship in Art Education Seminar.** 1 credit. Weekly professional seminar focused on needs and concerns of student teachers. Covers issues as they emerge in practice, and concludes with an "Art of Teaching Art" exhibit of work by students of preservice teachers. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Corequisite:** AVT 695.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**AVT 697: Advanced Strategies and Curricular Innovations in the Visual Arts.** 3 credits. Synthesizing knowledge and understandings gained in ASTL program, seminar focuses on innovative curriculum design, mastery of effective instructional strategies, and developing leadership potential for the field of visual art education. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Completion of all ASTL Art Education Concentration courses.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**AVT 698: Independent Study/Directed Readings.** 1-3 credits. Offered by School of Art (p. 813). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to the MAT or Art Education Concentration (ASTL) and permission of art education director

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**700 Level Courses**

**AVT 794: Graphic Design Project.** 4 credits. The capstone course in the graphic design Master of Arts degree. Provides for the independent development, design, production and presentation of a graduate-level design project guided by faculty and design professionals. Offered by School of Art (p. 813). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT Graphic Design graduate program and completion of 30 graduate credits.
Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Independent Study
Grading:
This course is graded on the Graduate Special scale. (p. 82)

AVT 796: Directed Reading. 1 credit.
The development of independent research into the historical precedents, theoretical underpinnings, cultural forms, and idea territories pertinent to student’s individual studio practice. Individualized section under the direction of division member. Notes: One of three courses comprising the MFA comprehensive experience for AVT students. Offered by School of Art (p. 813). May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 798: Directed Project and Exhibition. 1-6 credits.
The construction and presentation of a professional-quality public exhibition. Course includes significant independent studio production of a comprehensive body of work, leading to the MFA Thesis Exhibition. Exhibition must demonstrate student’s mastery of studio craft and concept. Individualized section under the direction of division member. Notes: One of three courses comprising the MFA comprehensive experience for AVT students. Offered by School of Art (p. 813). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AVT 799: Thesis. 1-3 credits.
The written thesis informs, documents, and enhances the MFA thesis exhibition, which is the student’s primary creative research activity. The content of the written thesis may vary in accordance with artistic discipline and final exhibition. Individualized section under the direction of division member. Notes: One of three courses comprising the MFA comprehensive experience for AVT students. Offered by School of Art (p. 813). May be repeated within the degree.

Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Arts Management (AMGT)
400 Level Courses

AMGT 402: Professional Development. 1 credit.
Seminar course that involves the development of workplace frameworks for success. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Junior standing, admission to the arts administration minor, or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AMGT 405: Seminar in Arts Management. 3 credits.
Focuses on not-for-profit visual and performing arts organizations. Topics covered include the evolution of the field, the internal culture and structure, external influences, governance, planning, human resources, marketing, fundraising, financial management, economic impact, and other topics. Students will be introduced to a wide range of arts organizations, working arts administrators, and institutional models through field trips, guest lectures, readings, and institutional data. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Junior standing, admission to arts administration minor, or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AMGT 410: Arts Advocacy and Community. 3 credits.
This course is an overview of advocacy and community engagement as practiced by the arts manager, artist, and educator. Students will learn to identify the need for community engagement and to develop successful techniques to implement outreach. Other topics will include accessibility, diversity, volunteerism, and governance. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Junior standing or permission of program director.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AMGT 471: Introduction to Grant Writing. 1 credit.
Course focuses on developing the skills necessary for successful grant applications for arts organizations. Study of relevant funding sources, awareness of available research materials, ability to construct coherent proposals, and defining fund-raising strategy for an arts organization. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.
Recommended Prerequisite: Junior standing, admission to the arts administration minor, or permission of the instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AMGT 472: Technology in the Arts. 1 credit.
The one constant in life is change. In today’s world, both technology and arts organizations are changing. This course will give a broad overview of the technologies commonly used in entrepreneurial, small, and large arts organizations and examines the intersection of technology, management, and the arts. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Junior standing.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

AMGT 489: Internship in Arts Management. 1-4 credits.
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with the minor coordinator before enrollment. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 4 credits.

Recommended Prerequisite: Junior Standing, completion of 6 credits of courses in area of residency, AMGT 305, or permission of instructor.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

AMGT 504: Professional Development Arts Management. 1 credit.
Combines experimental facets happening within the creative community and the development of an increasing awareness of self. Professional development is not only for the manager, but also for those who work for that manager. It is collaborative, ideally incorporating an evaluative stage. Topics addressed include professional development, consultation, coaching, communities of practice, lesson study, mentoring, reflective supervision and technical assistance. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 511: Introduction to Grant Writing. 1 credit.
Places components of the grant writing process; including research, proposal writing, terminology, oral and written techniques, and specific focus; within broader context of nonprofit management. Introduction to perspectives of grant seeker and maker. Discover resources and compelling writing skills pertaining to proposal and letters of intent. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 512: Grant Writing in the Arts. 1 credit.
Places components of grant writing process within broader context of nonprofit management. Introduction to perspectives of grant seeker and maker. The grant writing process: research, proposal writing, terminology, oral and written techniques, and specific focus. Discover resources and compelling writing skills pertaining to proposal and letters of intent. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 513: Technology in the Arts. 1 credit.
The one constant in life is change. In today’s world, both technology and arts organizations are changing. This course will give a broad overview of the technologies commonly used in entrepreneurial, small, and large arts organizations and examines the intersection of technology, management, and the arts. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 599: Special Topics in Arts Management. 1-6 credits.
Provides opportunity to explore special and timely topics in arts management including theoretical and applied areas. Topics and credit vary; may be repeated for up to 12 credits taken under different topics. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the term for a maximum 12 credits.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

600 Level Courses

AMGT 601: Fund Raising/Development I. 3 credits.
Overview for students seeking general knowledge, as well as introductory course for those who will complete the fund-raising concentration. Teaches role of fund raising as management function and part of overall strategic intention of arts organizations, presenting fund raising as a multifaceted, team-based process. Analyzes tools and techniques for effective fund raising. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 602: Seminar in Arts Management. 3 credits.
Develops tools and techniques necessary for successful pursuit of a management career in visual and performing arts. Introduces wide range of arts organizations, working arts administrators, and institutional models through guest lectures, readings, field trips, and analysis of institutional data. Students gain understanding of organizational structures and functions, as well as models for general management. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to English Language, Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 603: Arts and Society. 3 credits.
Examines role of visual and performing arts, with emphasis on historic traditions and trends that have most directly influenced contemporary American practice. Consideration is given to the functions of art in society in addressing questions: What constitutes good or bad art? What is the value of art? What encouragements or impediments does our society offer to the creative artist or arts institution? Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 604: Public Relations and Marketing Strategies for the Arts I. 3 credits.
Teaches strategic way of thinking about audience, community, and markets. Structured into four modules, beginning with fundamentals of strategic planning. Students learn about external and internal environments and the interplay among them; discuss marketing fundamentals pertaining to arts audiences; and are introduced to fundamentals of applied marketing media and advertising fundamentals. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 606: Governance and Leadership. 3 credits.
Board development including oversight and management of a board, as well as understanding board functions. Board relationships, including volunteers, are essential through all of the stages of a management career. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 609: Performing Arts Management. 3 credits.
Bridging strategic planning and marketing; audience development; financial management; and board and volunteer management with issues of scheduling, ticketing and sales, mission integration and strategic challenges of new facilities, and growth and operations of existing ones. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 610: Visual Arts Management. 3 credits.
Covers the many facets of visual art gallery management, from practical considerations of daily operations to the broader examination of gallery's role in art education, criticism, and art market. Topics such as exhibition coordination and installation, contracts, artist representation, fine art insurance, exhibition policies, budgets, and marketing are covered, along with the responsibility of educating a diverse public. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 620: Legal Aspects in Arts Management. 3 credits.
Overview of practical legal issues that will be encountered by arts managers of both for-profit and not-for-profit arts organizations, including contracts, copyrights, licensing, and for-profit and non-profit incorporation. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 640: Programming and Project Arts Management. 3 credits.
Provides both a theoretical framework for thinking about and assessing the value of various programming options and practical examples of the potential partners and resources available for program and project implementation. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses

AMGT 704: Finance and Budgeting for Arts I. 3 credits.
Introduces budget and finance as fundamentals of the budget process, specifically tailored to needs of arts organizations. Provides overview of accounting as tool to manage and control arts organizations. Involves laboratory component for teaching software application frequently encountered in fiscal operation of arts organizations. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 705: Finance and Budgeting for Arts II. 2 credits.
Introduces budgeting, planning, and finance as fundamentals of the strategic planning process and management control, specifically tailored to the needs of arts organizations. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: AMGT 704

Registration Restrictions:
Required Prerequisite: AMGT 704
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 706: Festivals and Special Events. 3 credits.
Technical aspects of events and festival management. Topics may include cultural understanding, tourism, sponsorship, fund raising and development, logistics of scheduling and contracts, and the relationship to larger venues, marketing and sales, and budgeting. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 710: Arts Policy. 3 credits.
Reviews current state of the sector, familiarizing students with most common rationales for public support of the arts and respective roles of federal, state, and local governments and private policy actors. Examines dilemmas that arts organizations face in balancing need for government support and artistic integrity with push and pull of the market. Compares U.S. policies to other developed countries. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: AMGT 602B- and 603B-.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 711: Directed Readings and Project. 1-6 credits.
Opportunity to engage in a more intensive study or project in arts management. Students partner with faculty member for intensive readings and project in strategy and planning in the arts, fundraising and development, entrepreneurial project work, arts marketing, arts policy and law, or other specialized areas pertinent to arts administration. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 740: Internal Internship. 2 credits.
Builds on apprenticeship as a core means of teaching applied concepts of arts management. Augments use of Center of the Arts and active arts environment, both performing and visual, as a learning laboratory. Builds on practical learning and provides internal training as preparation for external internship. Minimum 42 hours/credit. Required for developing practical application. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
AMGT 742: Internship I. 3 credits.
Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Minimum 42 hours/credit. Required for developing practical application. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program, 15 credit standing; or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 752: Arts Entrepreneurship. 3.6 credits.
Lecture course in discovering and developing entrepreneurial skills in the arts. Students will conceive, develop, and present a for-profit or not-for-profit business plan and strategy; which will include model(s), market overview, management structure, along with revenue streams, an acquisition strategy, and technical and information technology strategies. Advanced course focuses on developing financial planning skills, funding strategies, marketing and arts sales. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to Arts Management program or permission of program director; AMGT 704.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 790: External Internship. 1-4 credits.
Designed to follow internal internship. Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Students advised to pursue a three-pronged approach toward specialization: electives; internal internship in the same area as concentrated electives; and external internship consistent with specialized course work and internal internship. Minimum 42 hours/credit. Required for developing practical application. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 4 credits.

Recommended Prerequisite: Admission to Arts Management program, 15 credit standing or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 792: Internship II. 3 credits.
Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Elective. Minimum 42 hours/credit. Required for developing practical application. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program, 15 credit standing; or permission of program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

AMGT 795: Capstone in Arts Management. 1 credit.
Required in order to complete the MA AMGT degree and must be taken in the last semester. Provides students with the opportunity to deepen, expand, and demonstrate mastery of one area of arts management expertise. Builds on work undertaken in a completed AMGT course or internship. Faculty will provide guidance and approve capstone topics. The capstone is a required one-credit course. Students may register for the capstone after having completed all core course requirements for the MA AMGT degree. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 2 credits.

Recommended Prerequisite: All core course requirements for the MA AMGT degree.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Assistive Technology (EDAT)

400 Level Courses

EDAT 410: Introduction to Assistive Technology. 3 credits.
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for individuals with disabilities. Presentation and exploration experiences enable students to better use assistive technology in education, work, community, and home environments. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDAT 421: Augmentative Communication. 3 credits.
Provides an overview of augmentative and alternative communication tools for use by individuals with speech and communication disabilities. Exploration experiences enable students to locate, use and train others on the range of AAC technologies available. Field experience may be
required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EDAT 422: Assistive Technology for Individuals with Sensory Impairments.** 3 credits.
Provides an overview of specific technology and resources available to enhance and improve the ability of individuals who are visually impaired/blind or hearing-impaired/deaf. Field experience may be required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EDAT 423: Accessibility and Input Modifications.** 3 credits.
Provides an overview of accessibility strategies and input modifications designed for use by individuals with disabilities. Exploration experiences enable students to locate, use and train others on the range of technologies available as well as design opportunities for constructing unique devices. Field experience may be required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**500 Level Courses**

**EDAT 510: Introduction to Assistive Technology.** 3 credits.
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for individuals with disabilities. Presentation and exploration experiences enable students to better use assistive technology in education, work, community, and home environments. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDAT 523: Accessibility and Input Modifications.** 3 credits.
Provides an overview of accessibility strategies and input modifications designed for use by individuals with disabilities. Exploration experiences enable students to locate, use and train others on the range of technologies available as well as design opportunities for constructing unique devices. Field experience may be required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDAT 524: Universal Design for Learning.** 3 credits.
Describes the foundations and principles of Universal Design for Learning (UDL). Focuses on teaching students with various disabilities including those with learning disabilities from preschool to postsecondary education implementing technology-based and other UDL strategies. Applies UDL principles to the design of accessible instructional materials. Students have the opportunity to develop and implement UDL lesson plans. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDAT 525: Software and Mobile Applications for Individuals with Disabilities.** 3 credits.
Provides overview with software, mobile applications, and accessibility features. Identifies design features to meet individual's special needs; provides hands-on experiences with the range of software and mobile applications that incorporate evidence-based strategies for individuals with disabilities across environments, settings and the life span. Field experience may be required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDAT 527: Assistive Technology for Independent Living and Employment.** 3 credits.
Provides an overview of assistive technology accommodations and public policy related to independent living for individuals with disabilities throughout their life span. Focuses on assistive technologies that support daily living tasks and workplace accommodations to improve the performance of daily living and work activities for individuals with disabilities. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDAT 530: Assistive Technology for Independent Living.** 3 credits.
Provides an overview of activities of daily living (ADLs) for individuals who have disabilities and the elderly. ADLs include but are not limited to assistive technologies that support dressing, feeding, hygiene, housework and safety. Field experience may be required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDAT 531: Assistive Technology in the Workplace.** 3 credits.
Provides an overview of workplace accommodations, functional barriers commonly experienced in the workplace, assistive technology, ergonomic strategies, and universal design approaches to improve performance of work activities for individuals with disabilities, including but not limited to mobility, dexterity, sensory, communication, and cognitive impairments. Field experience may be required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDAT 597: Special Topics in Assistive Technology.** 1-6 credits.
Provides advanced study on selected topic or emerging issue in assistive technology. Offered by Graduate School of Education (p. 157). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDAT 599: Independent Study in Assistive Technology.** 1-6 credits.
Studies assistive technology research, theory, or practice under direction of faculty member. Offered by Graduate School of Education (p. 157). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

### 600 Level Courses

**EDAT 610: Designing Adapted Environments.** 3 credits.

Provides an overview of environmental adaptations for individuals with disabilities to increase their access to community, workplace, and school activities. Covers legal issues within the ADA for adapting environments and addresses programmatic and physical access issues. Notes: Field Experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** EDAT 510B.

B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

**EDAT 649: Assistive Technology Assessment.** 3 credits.

Provides an overview of AT consideration and assessment procedures with emphasis on generated assessment plan and written report. Review and administer existing assistive technology (AT) evaluation instruments. Notes: Field Experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** EDAT 510B.

B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

### Astronomy (ASTR)

#### 100 Level Courses

**ASTR 103: Astronomy.** 3 credits.

Introduction to origin of life, Earth, planets and sun, stars, galaxies, quasars, nature of space radiation, and general theory of relativity. Note: ASTR 103 with ASTR 112 or ASTR 114 can be used to fulfill a 4-credit lab science requirement. Not for physics majors. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Mason Core:** Natural Science Overview (p. 137)

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**ASTR 111: Introductory Astronomy: The Solar System.** 3 credits.

Topics include history of astronomy, evolution of the solar system, properties of planets, scientific method, critical thinking, nature of light, and principles of telescope design. Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Mason Core:** Natural Science with Lab (p. 137)

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**ASTR 112: Introductory Astronomy Lab: The Solar System.** 1 credit.

Laboratory course associated with ASTR 111. Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Mason Core:** Natural Science with Lab (p. 137)

**Schedule Type:** Laboratory

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**ASTR 113: Introductory Astronomy: Stars, Galaxies, and the Universe.** 3 credits.

Topics include electromagnetic radiation, stellar evolution, interstellar medium, galaxies, cosmology, scientific method, and critical thinking. Notes: ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Mason Core:** Natural Science with Lab (p. 137)

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**ASTR 114: Introductory Astronomy Lab: Stars, Galaxies, and the Universe.** 1 credit.

Laboratory course associated with ASTR 113. Notes: ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.
Astronomy (ASTR)

**Mason Core: Natural Science with Lab (p. 137)**

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ASTR 115: Finding New Worlds.** 4 credits.
Topics include the search for planets outside the solar system, and new developments in the theory of solar system formation with an emphasis on student-led investigation using public data sources. Notes: ASTR 115 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Mason Core: Natural Science with Lab (p. 137)**

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

### 200 Level Courses

**ASTR 210: Introduction to Astrophysics.** 3 credits.
Introduction to astrophysics for scientists. Topics include astronomical measurement, celestial mechanics, electromagnetic radiation, stellar structure and evolution, the interstellar medium, galaxies, and a selection of topics at the forefront of astrophysics including space physics, exoplanets, galaxies, and cosmology. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** PHYS 160C.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

### 300 Level Courses

**ASTR 301: Astrobiology.** 3 credits.
Physical science perspective on origin and evolution of life on Earth and how life, in turn, has significantly influenced Earth's evolution. Topics include origin of Earth, mechanisms and sites for origin of life, co-evolution of life and Earth's atmosphere, habitability of planets, and the search for extraterrestrial life. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Recommended Prerequisite:** MATH 108 or 113.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ASTR 302: Foundations of Cosmological Thought.** 3 credits.
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe. Notes: No advanced background in mathematics or natural sciences required. This course does not satisfy elective-category requirements for the physics and astronomy majors. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Mason Core: Natural Science Overview (p. 137)**

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ASTR 328: Stars.** 3 credits.
Stellar structure and evolution; radiative transfer. Includes computational work. Previous programming experience is not required, as it will be developed in the course, but it is helpful. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** ASTR 210C and PHYS 260C.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

### 400 Level Courses

**ASTR 401: Computer Simulation in Astronomy.** 3 credits.
Techniques and methods to simulate astronomical phenomena using a computer. Examples taken from a wide variety of astronomical phenomena, including radiation transfer in astrophysical objects, self-gravitating systems, hydrodynamics, and stellar models. Notes: Requires minimum grade of C.

**Registration Restrictions:**
**Required Prerequisites:** ASTR 210C and PHYS 251C.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ASTR 402: RS: Methods of Observational Astronomy.** 4 credits.
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project. Fulfills writing intensive requirement in the major. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.
Mason Core: Capstone (p. 137)

Specialized Designation: Research/Scholarship Intensive, Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: ASTR 210C and PHYS 260C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ASTR 403: Planetary Science. 3 credits.
Introduction to the physics and chemistry of planets and their natural satellites, asteroids, and comets. Topics include history of the solar system; origin and evolution of planets, their internal structure and atmospheres; and analytical techniques used in remote and in situ study. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: ASTR 210C and PHYS 260C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ASTR 404: Galaxies and Cosmology. 3 credits.
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe. Computational tools introduced in ASTR 328 are developed further. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: ASTR 328C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ASTR 405: Honors Thesis in Astronomy I. 3 credits.
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 406. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: ASTR 405C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Astronomy.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ASTR 406: Honors Thesis in Astronomy II. 3 credits.
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 406. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: ASTR 405C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Astronomy.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ASTR 408: Senior Research. 3 credits.
Independent work under guidance of faculty member on research project in experimental, observational, or theoretical astronomy. Notes: Students may not receive more than 6 credits of ASTR 408 and 409. Written report on project required. May be taken twice with department permission. Offered by Physics & Astronomy (p. 750). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Required Prerequisites: (ASTR 210C) and (ASTR 328C, 402C, PHYS 303C or 305C).
C Requires minimum grade of C.

Schedule Type: Research

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ASTR 409: Astronomy Internship. 3 credits.
On-the-job experience for astronomy majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical astronomy, and prepare written report at end of internship. Notes: See department for other requirements and application procedure prior to enrollment. Students may not receive more than 6 credits of ASTR 408 and 409. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (ASTR 210C) and (ASTR 328C, 402C, PHYS 303C or 305C).
C Requires minimum grade of C.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ASTR 480: The Interstellar Medium. 3 credits.
Physical processes in the interstellar medium. Topics include the production and transfer of radiation, ionization and recombination, atomic and molecular excitation, dust physics, gas heating and cooling, and star formation. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: ASTR 210C and PHYS 260C.
C Requires minimum grade of C.
Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses
ASTR 532: Phys Interplanetary Med. 3 credits.
Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Recommended Prerequisite: PHYS 303, 305, 308; MATH 214.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ASTR 590: Selected Topics in Astronomy and Astrophysics. 1-6 credits.
Advanced topics from recent theoretical or observational developments and their applications. Satisfies needs of professional community to keep abreast of current developments. Offered by Physics & Astronomy (p. 750). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

600 Level Courses
ASTR 602: Methods of Observational Astronomy. 4 credits.
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ASTR 603: Planetary Sciences. 3 credits.
Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Recommended Prerequisite: ASTR 210, PHYS 260.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ASTR 604: Galaxies and Cosmology. 3 credits.
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Recommended Prerequisite: ASTR 328 and MATH 214.

Recommended Corequisite: PHYS 308.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ASTR 660: Plasma Physics for Space and Astrophysics. 3 credits.
Equivalent to PHYS 660.

Recommended Prerequisite: PHYS 305

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**ASTR 680: Physics of Interstellar Media.** 3 credits.
Physical processes in the interstellar media. Topics include the production and transfer of radiation, ionization and recombination, atomic and molecular excitation, dust physics, gas heating and cooling, and star formation. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Recommended Prerequisite:** PHYS 402 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
  
**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses

**ASTR 730: Stellar Astrophysics.** 3 credits.
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Recommended Prerequisite:** MATH 214, PHYS 303, 305, 308.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
  
**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ASTR 764: Computational Astrophysics.** 3 credits.
Covers statistical mechanics concepts important in astrophysics. Present unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-Lanck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics. Offered by Physics & Astronomy (p. 750). May not be repeated for credit. Equivalent to CSI 764.

**Recommended Prerequisite:** ASTR 530.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
  
**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ASTR 765: High-Energy and Accretion Astrophysics.** 3 credits.
Overview of the field of atomic and nuclear physics, including nuclear reactions of use to high-energy astrophysics. Discusses radiation processes in cosmic plasmas emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

**Recommended Prerequisite:** PHYS 502 and 513, and ASTR 530; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
  
**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ASTR 790: Topics in Astronomy and Astrophysics.** 1-6 credits.
Topics from recent theoretical or observational developments and applications not covered in fixed-content astronomy and astrophysics courses. Notes: Satisfies need of professional community to keep abreast of current developments. Offered by Physics & Astronomy (p. 750). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
  
**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ASTR 796: Directed Reading and Research.** 1-12 credits.
Reading and research on a specific topic in astronomy, astrophysics, or related field under direction of faculty member. Offered by Physics & Astronomy (p. 750). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Admission to masters program and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Research
  
**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
ASTR 798: Research Project. 3 credits.
Research project chosen and completed under guidance of graduate faculty member resulting in an acceptable technical report. Offered by Physics & Astronomy (p. 750). May not be repeated for credit.

Recommended Prerequisite: Nine graduate credits or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

ASTR 799: Master’s Thesis. 1-6 credits.
Research project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report and oral defense acceptable to three-faculty-member thesis committee. Offered by Physics & Astronomy (p. 750). May be repeated within the degree.

Recommended Prerequisite: 9 graduate credits and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

900 Level Courses

ASTR 998: Doctoral Dissertation Proposal. 1-12 credits.
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation. Notes: No more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Out of the 24, no more than 12 credits of ASTR/PHYS 998 may be applied. Offered by Physics & Astronomy (p. 750). May be repeated within the degree for a maximum 21 credits.

Recommended Prerequisite: Admission to the Physics doctoral program, and permission of advisor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

ASTR 999: Doctoral Dissertation. 1-12 credits.
Doctoral research performed under direction of dissertation director. Notes: No more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Offered by Physics & Astronomy (p. 750). May be repeated within the degree for a maximum 24 credits.

Recommended Prerequisite: Admission to doctoral candidacy in Physics PhD program and permission of advisor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Athletic Training Education Program (ATEP)

100 Level Courses

ATEP 120: First Aid and Emergency Care. 2 credits.
Covers emergency management procedures for various injuries and sudden illnesses, including 1- and 2- person CPR, and use of an Automated External Defibrillator (AED) for cardiac emergencies and basic first aid techniques; certification in first aid and CPR. Offered by Recreation, Health & Tourism (p. 210). Limited to two attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

ATEP 150: Introduction to Athletic Training and Preventative Care Techniques. 3 credits.
Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

200 Level Courses

ATEP 201: Medical and Scientific Terminology. 3 credits.
Foundations of scientific and medical vocabulary including prefixes, suffixes and stems used to form compound words. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ATEP 203: Prevention, Recognition, and Management of Athletic and Fitness Related Injuries. 3 credits.
Provides coaches and fitness professionals with theory on the prevention, recognition, and management of injuries and conditions that occur
in athletic competition and recreational fitness activities. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

ATEP 250: Cultural Competence. 3 credits.
Explores cultural competence and its integration for effective professional practice. Includes communication styles, daily living practices, common sensitivities, self-awareness, and historical cultural implications in multicultural environments. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** Grade of C or higher in ATEP 150, ATEP 130, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, ATEP 180, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

ATEP 255: Physical Assessment of the Lower Body. 3 credits.
An analysis of the principles of physical assessment of the lower body. Notes: Formal acceptance to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.

**Recommended Corequisite:** ATEP 256, ATEP 266

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

ATEP 265: Clinical Techniques II: Physical Assessment of the Upper Body. 3 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on physical assessment of the upper body. Notes: Formal acceptance to the professional phase of the ATEP. Emergency Cardiac Care (ECC) Certification Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.

**Recommended Corequisite:** ATEP 265, ATEP 266

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

ATEP 270: General Medical Conditions and Pharmacology in Physically Active Populations. 3 credits.
An examination of assessment and management techniques of general medical conditions and pharmacological principles in physically active populations. Notes: Formal acceptance to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 300, BIOL 124, 125.

**Recommended Corequisite:** ATEP 260, ATEP 265
This course is graded on the Undergraduate Regular scale. (p. 82)

**300 Level Courses**

**ATEP 300: Functional Anatomy.** 3 credits.
Increase students’ knowledge and exposure to the structural and functional components of human anatomy including musculoskeletal origins, insertions, actions and innervations. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** C or better in BIOL 124 and BIOL 125.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 310: Advanced Functional Anatomy.** 3 credits.
Investigates the musculoskeletal anatomy including innervation, vascular anatomy, and function of the neck, trunk and limbs. Synthesizes anatomy physiology, and human movement as it relates to injury; case studies are used to enhance the understanding of human anatomy and interpret movement impairments. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 320.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 300\(^C\) and KINE 310\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Special scale. (p. 82)

**ATEP 320: Therapeutic Interventions Foundations.** 3 credits.
Explores foundational knowledge and skills necessary for the safe, effective, and evidence-based application of therapeutic interventions. Investigates physiologic response to injury and healing, physiologic cause of pain, physiologic response of tissue to therapeutic intervention including modalities and exercise. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 310.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 328\(^C\), KINE 310\(^C\) and 320\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Special scale. (p. 82)

**ATEP 325: Athletic Training Foundations.** 3 credits.
Investigates the knowledge, skill and professional foundations of the athletic training. Emphasizes is placed on the role of the athletic trainer as a member of the health care system by decision-making through evidence-based practice and foundational skills including fitting protective equipment and devices, and prophylactic preventative taping. Admission to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 120\(^C\), 150\(^C\), 201\(^C\), 300\(^C\), BIOL 124\(^C\), 125\(^C\) and HEAL 230\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 330: Emergency Procedures for Athletic Trainers.** 3 credits.
Investigates the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to athletic trainers. Develops knowledge, critical thinking and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings. Admission to the professions phase of ATEP. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 340, 345, 351, 354.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 310\(^C\), 320\(^C\) and KINE 450\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 340: Lower Body Physical Assessment.** 3 credits.
Analyzes principles of lower body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Admission to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 330, ATEP 340, ATEP 351, ATEP 354.

**Registration Restrictions:**
**Required Prerequisites:** KINE 450\(^C\), ATEP 310\(^C\) and 320\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 345: Athletic Training Clinical Techniques 1.** 3 credits.
Applies principles of lower body, thoracic and lumbar spine physical assessment. develops evaluation skills including special testing leading to diagnosis. Admission to the professional phase of ATEP. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 330, ATEP 340, ATEP 351, ATEP 354.

**Registration Restrictions:**
**Required Prerequisites:** KINE 450\(^C\), ATEP 310\(^C\) and 320\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 350: Therapeutic Interventions I.** 3 credits.
Integrates the use of therapeutic modalities and rehabilitation in the treatment of injuries and conditions including indications, contraindications, physiological effects, special programs, and resistance methods used with therapeutic modalities and prevention/rehabilitation...
methods. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.

**Recommended Corequisite:** ATEP 355 and 356.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 351: Lower Body Therapeutic Interventions.** 3 credits.
Develops, implements, and evaluates treatment plans using therapeutic modalities and rehabilitation interventions in the treatment of lower body injuries and conditions. Establishes an evidence-based approach to therapeutic interventions use in patient treatment. Admission to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 330, ATEP 340, ATEP 345, ATEP 354.

**Registration Restrictions:**
Required Prerequisites: KINE 450, ATEP 310 and 320.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 354: Athletic Training Clinical Techniques 2.** 3 credits.
Applies therapeutic interventions for the lower body in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care. Admission to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 330, ATEP 340, ATEP 345, ATEP 351.

**Registration Restrictions:**
Required Prerequisites: KINE 450, ATEP 310 and 320.
C Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 355: Clinical Techniques 3: Therapeutic Interventions I.** 3 credits.
An examination of the scientific theory and standard operating procedures necessary for the safe application of therapeutic modalities in a physically active patient population. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.

**Recommended Corequisite:** ATEP 350 and 356.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Athletic Training.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 356: Practicum III: Therapeutic Modalities.** 3 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on therapeutic modalities. Notes: Formal Acceptance into the ATEP Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.

**Recommended Corequisite:** ATEP 350, 355.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 360: Therapeutic Interventions 2.** 3 credits.
Integrated approach to the use of therapeutic modalities and rehabilitation in the treatment of injuries and conditions. Special consideration to specific body regions including a focus on the development, implementation, and evaluation of treatment plans. Notes: Formal acceptance into the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.

**Recommended Corequisite:** ATEP 365, 366.

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Athletic Training.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 361: Upper Body Therapeutic Interventions.** 3 credits.
Utilizes an integrated approach to therapeutic interventions including modalities and rehabilitation in the treatment of upper body, head and neck injuries and conditions. Includes development, implementation, and evaluation of treatment plans for upper body, head and neck injuries. Admission to the professional phase of the ATEP. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 365, 367, ATEP 370, ATEP 375.

**Registration Restrictions:**
Required Prerequisites: ATEP 351, 354, 330, 340 and 345.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 365: Athletic Training Clinical Techniques 4.** 3 credits.
Applies therapeutic interventions for the upper body, head and neck in a laboratory setting. Develops rehabilitation treatment plans and skills...
necesary to carry out patient care. Offered by Recreation, Health & Tourism. May not be repeated for credit.

**Registration Restrictions:**
Students with a class of Freshman or Sophomore may not enroll.

Enrollment is limited to students with a major in Athletic Training.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 366:** Practicum IV: Therapeutic Rehabilitation. 3 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on therapeutic rehabilitation. Notes: Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** Grade of C or Better ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356; BIOL 124, 125; HEAL 110, 230; PHED 300 and 450.

**Recommended Corequisite:** ATEP 360, ATEP 365.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 367:** Athletic Training Practicum I. 2 credits.
Emphasizes physical assessment and therapeutic interventions of the lower body in a clinical immersion practicum field experience under the direct supervision of a preceptor for 150 hours. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** ATEP 361, ATEP 365, ATEP 370, ATEP 375.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 330\(^C\), 340\(^C\), 345\(^C\), 351\(^C\) and 354\(^C\). C Requires minimum grade of C.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Special scale. (p. 82)

**ATEP 370:** Upper Body Physical Assessment. 3 credits.
Analyzes the principles of upper body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** ATEP 361, ATEP 365, ATEP 367, ATEP 375.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 330\(^C\), 340\(^C\), 345\(^C\), 351\(^C\) and 354\(^C\). C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 375:** Athletic Training Clinical Techniques 3. 3 credits.
Applies principles of upper body, head and neck physical assessment. Develops evaluation skills including special testing leading to diagnosis. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 361, ATEP 365, ATEP 367, ATEP 370.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 330\(^C\), 340\(^C\), 345\(^C\), 351\(^C\) and 354\(^C\). C Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**400 Level Courses**

**ATEP 400:** Pathopharmacology. 3 credits.
Examines the assessment and management techniques of general medical conditions and pharmacological principles and interventions. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 300\(^C\) and KINE 310\(^C\). C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 441:** Senior Seminar in Athletic Training. 3 credits.
Capstone educational experience focusing on current topics in the Athletic Training Profession and career development issues. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Mason Core:** Capstone (p. 137)

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; KINE 300, 360.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ATEP 450:** Administration and Management in Athletic Training. 3 credits.
Focuses on the professional management and administrative issues in athletic training including the planning, designing, development, organization, implementation, direction, and evaluation of a health care program. Discusses current issues in athletic training related to professional conduct and practice. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Registration Restrictions:**
Students with a class of Freshman or Sophomore may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
ATEP 456: Practicum 5 Professional Integration. 6 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on professional skill integration. Notes: Formal acceptance into the professional phase of the ATEP: Current Emergency Cardiac Care (ECC) Certification. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 356, 360, 365, 366, BIOL 124, 125; HEAL 110, 230, KINE 310, 360.

Recommended Corequisite: ATEP 450.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ATEP 457: Athletic Training Practicum 2. 1 credit.
Emphasizes physical assessment and therapeutic interventions of the upper body with non-sport populations and assessment of general medical conditions in a clinical practicum field experience under the direct supervision of a preceptor for 75 hours. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit. Equivalent to ATEP 354.

Recommended Corequisite: ATEP 450.

Registration Restrictions:
Required Prerequisites: ATEP 361C, 365C, 367C, 370C, 375C and 400C.
C Requires minimum grade of C.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Special scale. (p. 82)

ATEP 460: Pediatric Sports Medicine. 3 credits.
Examines evidence-based practices for injury prevention, sport safety, emergency preparedness, and risk management within youth and scholastic sport. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Recommended Corequisite: ATEP 470, 476.

Registration Restrictions:
Required Prerequisites: ATEP 300C and KINE 310C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ATEP 466: Athletic Training Practicum 3. 2 credits.
Emphasizes injury prevention administration physical assessment and therapeutic intervention during athletics preseason in a clinical practicum field experience under the direct supervision of a preceptor for 150 hours. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: ATEP 361C, 365C, 367C, 370C, 375C and 400C.
C Requires minimum grade of C.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Special scale. (p. 82)

ATEP 470: Post Rehabilitative Therapeutic Interventions. 2 credits.

Recommended Corequisite: ATEP 476.

Registration Restrictions:
Required Prerequisites: ATEP 450C, 457C and 466C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ATEP 476: Athletic Training Practicum 4. 4 credits.
Emphasizes physical assessment and therapeutic interventions of the upper body in a clinical practicum field experience under the direct supervision of a preceptor for 300 hours. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Recommended Corequisite: ATEP 470.

Registration Restrictions:
Required Prerequisites: ATEP 450C, 457C and 466C.
C Requires minimum grade of C.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ATEP 480: Athletic Training Research. 3 credits.
Examines methods for critically evaluating clinical research techniques and interventions to improve patient outcomes specific to the practice of athletic training. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Recommended Corequisite: ATEP 486.

Registration Restrictions:
Required Prerequisites: ATEP 460C, 470C and 476C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ATEP 486: Athletic Training Practicum 5. 6 credits.
Emphasizes professional skill integration with a clinical practicum field experience under the direct supervision of a preceptor for 400 hours. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Recommended Corequisite: ATEP 480.

Registration Restrictions:
Required Prerequisites: ATEP 460C, 470C and 476C.
C Requires minimum grade of C.
Students in a Non-Degree Undergraduate degree may

Enrollment is limited to Graduate, Non-Degree or Undergraduate level

Graduate, Non-Degree or Senior Plus.

Enrollment limited to students with a class of Advanced to Candidacy,

Registration Restrictions:

Recommended Prerequisite: Functional anatomy knowledge.

Recommended Prerequisite: Basic human anatomy and physiology and

Recommended Corequisite: ATEP 520 and 525.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy,

Enrollment is limited to Graduate, Non-Degree or Undergraduate level

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:

This course is graded on the Graduate Special scale. (p. 82)

ATEP 520: Therapeutic Interventions Foundations. 3 credits.

Investigates the musculoskeletal anatomy including innervation, vascular

anatomy, and function of the neck, trunk and limbs. Synthesizes anatomy,

physiology, and human movement as it relates to injury; case studies

are used to enhance the understanding of human anatomy and interpret

movement impairments. Offered by Recreation, Health & Tourism

(p. 210). May not be repeated within the degree.

Recommended Prerequisite: ATEP 510.

Recommended Corequisite: ATEP 525.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy,

Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:

This course is graded on the Graduate Regular scale. (p. 82)

ATEP 530: Emergency Procedures for Athletic Trainers. 3 credits.

Investigates the knowledge, skill and professional foundations of the

athletic training. Emphasizes is placed on the role of the athletic

trainer as a member of the health care system by decision-making

through evidence-based practice and foundational skills including fitting

protective equipment and devices, arid prophylactic preventative taping.

Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Recommended Corequisite: ATEP 540, 545, 550, 555.

Registration Restrictions:

Required Prerequisites: ATEP 510B and 520B.

B- Requires minimum grade of B-.

Enrollment limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:

This course is graded on the Graduate Regular scale. (p. 82)

ATEP 540: Lower Body Physical Assessment. 3 credits.

Analyzes principles of lower body physical assessment. Investigates

mechanisms of injury, the evaluation process, and testing leading to
diagnosis. Offered by Recreation, Health & Tourism (p. 210). May not be

recommended for credit.

Recommended Corequisite: ATEP 530, 545, 550, 555.
Registration Restrictions:
Required Prerequisites: ATEP 510B and 520B.
B- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ATEP 545: Athletic Training Clinical Techniques 1. 3 credits.
Applies principles of lower body, thoracic and lumbar spine physical assessment. Develops evaluation skills including special testing leading to diagnosis. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Recommended Corequisite: ATEP 530, 540, 545, 555.

Registration Restrictions:
Required Prerequisites: ATEP 510B and 520B.
B- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ATEP 560: Upper Body Therapeutic Interventions. 3 credits.
Utilizes an integrated approach to therapeutic interventions including modalities and rehabilitation in the treatment of upper body, head and neck injuries and conditions. Includes development, implementation, and evaluation of treatment plans for upper body, head and neck injuries. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

Recommended Corequisite: ATEP 565, 566, 570, 575, 600.

Registration Restrictions:
Required Prerequisites: ATEP 530B, 540B, 545B, 550B and 555B.
B- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ATEP 565: Athletic Training Clinical Techniques 4. 3 credits.
Applies therapeutic interventions for the upper body, head and neck in a laboratory setting. Develops rehabilitation treatment plans and skills
necessary to carry out patient care. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 560, 566, 570, 575, 600.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 530^B^, 540^B^, 545^B^, 550^B^ and 555^B^.
^B^ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ATEP 566: Athletic Training Practicum 1.** 2 credits.
Emphasizes clinical examination and acute care of injuries during a clinical immersion practicum field experience under the direct supervision of a preceptor for 150 to 200 hours. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 560, ATEP 565, ATEP 570, ATEP 575, 600.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 530^B^, 540^B^, 545^B^, 550^B^ and 555^B^.
^B^ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**ATEP 570: Upper Body Physical Assessment.** 3 credits.
Analyses principles of upper body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 560, 565, 566, 575, 600.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 530^B^, 540^B^, 545^B^, 550^B^ and 555^B^.
^B^ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ATEP 575: Athletic Training Clinical Techniques 3.** 3 credits.
Applies principles of upper body, head and neck physical assessment. Develops evaluation skills including special testing, leading to diagnosis. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 560, 565, 566, 570, 600.

**Registration Restrictions:**
**Required Prerequisites:** ATEP 530^B^, 540^B^, 545^B^, 550^B^ and 555^B^.
^B^ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**600 Level Courses**

**ATEP 600: Pathopharmacology.** 3 credits.
Examines the assessment and management techniques of general medical conditions and pharmacological principles and interventions. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Prerequisite:** Basic human anatomy and physiology and Functional Anatomy knowledge needed.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ATEP 650: Administration and Management in Athletic Training.** 3 credits.
Focuses on the professional management and administrative issues in athletic training including the planning, designing, development, organization, implementation, direction, and evaluation of a health
care program. Discusses current issues in athletic training related to professional conduct and practice. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 656.

**Registration Restrictions:**
Required Prerequisites: ATEP 560\(^B\), 565\(^B\), 566\(^B\), 570\(^B\) and 575\(^B\).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ATEP 660:** Athletic Training Practicum 2. 1 credit.
Emphasizes therapeutic interventions with non-sport populations during a clinical practicum field experience under the direct supervision of a preceptor for 75 to 125 hours. Offered by Recreation, Health & Tourism (p. 210). May not be repeated for credit.

**Recommended Corequisite:** ATEP 650.

**Registration Restrictions:**
Required Prerequisites: ATEP 560\(^B\), 565\(^B\), 566\(^B\), 570\(^B\) and 575\(^B\).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**ATEP 667:** Athletic Training Practicum 3. 2 credits.

**Recommended Corequisite:** ATEP 660, 670.

**Registration Restrictions:**
Required Prerequisites: ATEP 650\(^B\), 656\(^B\) and 667\(^B\).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ATEP 670:** Post Rehabilitative Therapeutic Interventions. 2 credits.

**Recommended Corequisite:** ATEP 660, 676.

**Registration Restrictions:**
Required Prerequisites: ATEP 650\(^B\), 656\(^B\) and 667\(^B\).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ATEP 676:** Athletic Training Practicum 4. 4 credits.

**Recommended Corequisite:** ATEP 660, 670.

**Registration Restrictions:**
Required Prerequisites: ATEP 650\(^B\), 656\(^B\) and 667\(^B\).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Bachelor of Individualized Study (BIS)

300 Level Courses

BIS 300: Understanding Interdisciplinary Studies. 3 credits.
Focuses on literature and issues relevant to interdisciplinary and multidisciplinary studies and the BIS program. Students explore selected topics, develop and gather feedback on individualized concentration proposals, and review BIS program requirements. Notes: Open only to pre-BIS students and BIS majors. Offered by School of Integrative Studies (p. 567). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Individualized Study or Undeclared.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIS 390: The Research Process. 3 credits.
Focuses on skills to develop a research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete senior project. Notes: Open only to pre-BIS students and BIS majors. Students cannot receive credit for both BIS 390 and 391. Offered by School of Integrative Studies (p. 567). May not be repeated for credit. Equivalent to BIS 391.

Recommended Prerequisite: BIS 300 and grade of 2.0 or above in ENGL 302/ENGH 302.

Registration Restrictions:
Enrollment is limited to students with a major in Individualized Study.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIS 391: The Research Process for Honors. 3 credits.
Focuses on skills to develop an honors-level research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete Honors Senior Research Project (BIS 490). Approved research proposal required prior to registration in BIS 490. Notes: Students cannot receive credit for both BIS 390 and 391. Offered by School of Integrative Studies (p. 567). May not be repeated for credit. Equivalent to BIS 390.

Recommended Prerequisite: Acceptance to pursue honors in the major.

Registration Restrictions:
Enrollment is limited to students with a major in Individualized Study.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
BIS 399: Special Topics. 1-3 credits.
Selected topics reflecting interest in specialized areas. Notes: May be repeated when topic is different. Offered by School of Integrative Studies (p. 567). May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment is limited to students with a major in Individualized Study.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

400 Level Courses

BIS 489: Directed Readings and Research. 1-3 credits.
Readings and research on a topic directly relevant to student's core concentration. Notes: Open only to pre-BIS students and BIS majors. Individualized sections by arrangement. Guided by instructor with expertise. Topics must be approved by instructor and BIS director prior to enrollment. Offered by School of Integrative Studies (p. 567). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Open only to degree students in the Bachelor of Individualized Study Program.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIS 490: RS: Senior Project. 3 credits.
Project or thesis on a topic directly relevant to student's concentration. Guided by student's faculty advisor and 490 instructor. Notes: Open only to BIS majors. Individualized sections for BIS honors. Capstone course in BIS core concentration. Research proposals must be approved by faculty mentor, executive committee, and BIS director prior to enrollment. Offered by School of Integrative Studies (p. 567). May not be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Open only to degree students in the Bachelor of Individualized Study Program.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Mason Core: Synthesis (p. 137)

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: BIS 390.

Recommended Corequisite: BIS 491.

Registration Restrictions:
Enrollment limited to students in the LA-BIS-INDV program.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Special scale. (p. 82)

BIS 491: Senior Project Presentation. 1 credit.
Focuses on preparation and delivery of a formal presentation of student's BIS 490 project. Includes review of basic presentation techniques. Notes: Open only to BIS majors. Offered by School of Integrative Studies (p. 567). May not be repeated for credit.

Specialized Designation: Research Associated

Recommended Prerequisite: BIS 390.

Recommended Corequisite: BIS 490.

Registration Restrictions:
Enrollment is limited to students with a major in Individualized Study.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Special scale. (p. 82)

Bachelor's of Applied Science (BAS)

300 Level Courses

BAS 300: Building Professional Competencies. 3 credits.
This course serves as an orientation to the BAS degree program. Current strengths are assessed and future planning is highlighted. Core competency areas related to personal effectiveness and academic/workplace success are stressed. Introduction to the university online learning system and other available resources useful for degree completion are also emphasized. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students in a Bachelor of Applied Science degree.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

400 Level Courses

BAS 490: Introduction to Research Methods. 3 credits.
This course introduces students to fundamental research methods and processes. Students will explore their research interests and identify one topic as well as learn to set up research questions, review literature, and define appropriate methods for data collection. This course intends to prepare students for their practicum study in BAS 491. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Applied Science.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Recommended Prerequisite: BAS 300C.
C Requires minimum grade of C.
BAS 491: Applied Sciences Capstone. 3 credits.
Students participate in an approved fieldwork study program and complete a research project as identified in BAS 490 Introduction to Research Methods. The Capstone project involves choosing and researching a workplace problem; designing, implementing and evaluating a specific plan of action; and formally presenting the project once completed. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Mason Core: Capstone (p. 137)

Registration Restrictions:
Required Prerequisite: BAS 490C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Applied Science.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Biodefense (BIOD)

600 Level Courses

BIOD 604: Emerging Infectious Diseases I: Bacteria and Toxins. 3 credits. Covers the microbiology, pathogenesis, clinical effects, and epidemiology of bacteria and toxins that pose threats to global health or can be utilized as biological weapons. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOD 605: Emerging Infectious Diseases II: Viral Agents. 3 credits. Covers the microbiology, pathogenesis, clinical effects, and epidemiology of viruses that pose threats to global health or can be utilized as biological weapons. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOD 607: Introduction to Biodefense/Threat Analysis III: Toxins. 3 credits. Discusses the threat of toxins as biological weapons. Special focus on microbiological toxins, including botulinum toxin, and biochemical action of toxins. Comparison to chemical weapons and debate about classification as such. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 609: Biodefense Strategy. 3 credits. Introduces students to the biodefense and biosecurity strategies and policies of the United States, other nations, and international organizations. Evaluates the effectiveness of these policies in strengthening defenses, improving intelligence, increasing oversight, enhancing nonproliferation, and reinforcing norms. Examines the interaction of biodefense and biosecurity with homeland, national, and international security. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605; or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 610: Advanced Topics in Global Health Security. 1-4 credits. Different topics, depending on instructor's specialty. Topics include ethical, legal, scientific, security, political, and/or policy aspects of global health security, emphasizing current problems and research. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 941). May be repeated within the term for a maximum 18 credits.

Recommended Prerequisite: BIOD 604 and 605 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**BIOD 620: Global Health Security Policy.** 3 credits.
Explores issues emerging from the interaction of health and security that represent novel challenges to policy makers confronting a rapidly changing international landscape. Examines the origin and evolution of the concept of health security. Analyzes strategic impact of infectious disease outbreaks, global health security case studies, global health governance, and formulation and implementation of U.S. global health security policy. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and BIOD 605; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture
BIOD 709: Nonproliferation and Arms Control. 3 credits.
Examines the array of national and international measures used to slow, halt, and reverse the spread of nuclear, biological, chemical, and missile weapons. Explores the theory and practice of proliferation to provide insights into the supply and demand aspects of proliferation. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 720: Health Security Preparedness. 3 credits.
Examines national and international public health and medical preparedness for and response to natural disasters, terrorist acts, and disease outbreaks. Explores organizational and policy architecture, implementation challenges, and strategies for preventing, detecting, and mitigating these threats. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 722: Examining Terrorist Groups. 3 credits.
Introduction to terrorism including the history and evolution of terrorism, case studies of key terrorist groups, the current nature of the terrorist threat and counterterrorism strategies. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 723: Legal Dimensions of Homeland Security. 3 credits.
Introduces the impact of legal issues on homeland security and biodefense. Topics include the origins of the Department of Homeland Security, the relationship between public health and law enforcement, the role of the military in homeland security, trade-offs between privacy and security, legal aspects of public-private cooperation in biodefense and homeland security, quarantine authority and enforcement, ensuring compliance with international treaties, and implementing biosecurity regulations. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 725: Terrorism and Weapons of Mass Destruction. 3 credits.
Examines the capabilities and intentions of terrorists to acquire and use chemical, biological, radiological, and nuclear (CBRN) weapons. The course provides an in-depth understanding of the history of CBRN terrorism, the current challenges posed by this threat, and the range of national and international policy tools available to address this threat. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and BIOD 605; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 726: Food Security. 3 credits.
Analyzes threats to food security globally including those related to climate change and environmental degradation; animal and plant diseases; access to clean water; agricultural terrorism; and antimicrobial resistance. Explores the national and global health, economic, social, and ethical impacts of these disruptive forces. Examines strategies for enhancing the security of the global food production and supply systems. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Recommended Prerequisite: BIOD 604 and 605; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 751: Biosurveillance. 3 credits.
Provides an understanding of the capabilities required to provide reliable early warning of disease outbreaks and identify their etiological agents. Assesses strengths and limitations of physicians, laboratories, epidemiologists, aerosol sensors, and syndromic surveillance systems. Considers challenges posed by the integration and analysis of the
information collected by these sources. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and BIOD 605; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 752: *The Role of the Military in Homeland Security.* 3 credits.
Analyzes the role that the armed forces play in homeland security, including historical and legal developments, the role of the National Guard, capabilities for crisis and consequence management, and case studies of military assistance to civilian authorities in response to riots, terrorist incidents, and natural disasters. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and 605; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate, Non-Degree or Washington Consortium level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

Introduces students to the intersection of science, technology, and policy in national security. Will examine the players in the formation of science policy; the roles they play; how the types, uncertainties, and availability of data affect science policy debates; and how science policy decisions are made. Topics to be covered include weapons of mass destruction, nonlethal weapons, nanotechnology, bioengineering, energy security, and pandemic influenza. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and 605; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate, Non-Degree or Washington Consortium level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 762: *Biotechnology and Society.* 3 credits.
Examines the growing role of biotechnology in modern society, including benefits to human and animal health, industrial applications, and potential for misuse. Analyzes key variables influencing the revolution in biotechnology and impact in both developed and developing countries.

Explores the political, economic, social, legal, security, and ethical implications of advances in life sciences and biotechnology. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 766: *Development of Vaccines and Therapeutics.* 3 credits.
Analyzes the process of developing new medical countermeasures against biological weapons and emerging infectious diseases such as SARS and pandemic influenza. Special attention is paid to the scientific, technical, political, regulatory, and economic obstacles to developing new vaccines and therapeutics. Examines the causes and potential solutions of public and private sector failures. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 780: *Master's Supervised Internship.* 1-6 credits.
Internship under supervision of qualified professional in biodefense at a government agency, consulting firm, industrial firm, or other acceptable agency. Offered by Schar School of Policy & Govt (p. 941). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of program director or advisor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

BIOD 790: *Global Health Security Capstone.* 3 credits.
Provides students with the opportunity to hone their research, writing, collaboration, and presentation skills through completion of a capstone project that synthesizes the theoretical and subject matter knowledge
students have gained in the program. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 793: Directed Studies in Biodefense. 1-3 credits.
Individualized study of topics not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, or lab or field study, determined in consultation with instructor. Offered by Schar School of Policy & Govt (p. 941). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Permission of instructor and program director.

Registration Restrictions:
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Special scale. (p. 82)

BIOD 798: Master's Research Project in Biodefense. 3 credits.
Research project related to student's concentration under supervision of faculty advisor. Student produces substantial and original contribution to the field of biodefense on the model of an article in a scholarly journal. Offered by Schar School of Policy & Govt (p. 941). May not be repeated for credit.

Recommended Prerequisite: 24 credits in BIOD and permission of project director.

Registration Restrictions:
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

800 Level Courses

BIOD 810: Advanced Seminar in Biodefense. 3 credits.
Explores issues of contemporary and emerging concern in biodefense and biosecurity. Topics may include legal, ethical, scientific, economic, and political aspects of biodefense and biosecurity. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt (p. 941). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: BIOD 604 and 605 or permission of adviser.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOD 890: Doctoral Supervised Internship. 1-6 credits.
Internship under supervision of qualified biodefense professional at government agency, consulting firm, industrial firm, or other acceptable agency. Offered by Schar School of Policy & Govt (p. 941). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Permission of program director or advisor.

Registration Restrictions:
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate level students.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale. (p. 82)

BIOD 899: Directed Research in Biodefense. 1-12 credits.
Research on a pertinent topic in biodefense; scope and subject determined by instructor. Offered by Schar School of Policy & Govt (p. 941). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Approval of program director.

Registration Restrictions:
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate level students.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

900 Level Courses

BIOD 998: Doctoral Dissertation Proposal. 1-12 credits.
Development of a research proposal, which forms the basis for doctoral dissertation under guidance of dissertation director committee. Notes: Only 12 credits may be applied to the degree. Offered by Schar School of Policy & Govt (p. 941). May be repeated within the degree.

Recommended Prerequisite: Approval of program director.

Registration Restrictions:
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)
BIOD 999: Doctoral Dissertation. 1-12 credits.
Doctoral dissertation research under direction of dissertation chair.
Offered by Schar School of Policy & Govt (p. 941). May be repeated within the degree.

Recommended Prerequisite: BIOD 998.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Bioengineering (BENG)

100 Level Courses

BENG 101: Introduction to Bioengineering. 3 credits.
Surveys the field of bioengineering and the global impact of technology innovation in solving problems in biology and medicine with an emphasis on engineering tools and concepts. Introduces mathematical modeling and analysis of bioengineering problems through the use of standard software packages for simulation. Other topics include: prototyping and design, ethics and regulatory affairs, and history and career paths in Bioengineering. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

200 Level Courses

BENG 220: Physical Bases of Biomedical Systems. 3 credits.
Introduces the physical basis of biomedical systems and signals. Demonstrates basic concepts of systems and signals theory, and shows their derivation from the biophysical concepts such as mechanics, fluid mechanics, pharmacokinetics and molecular biophysics which underlie the signals in living systems. Aims at providing the student with the mathematical and physical understanding to quantitatively describe biological systems. Offered by Bioengineering (p. 1010). Limited to two attempts. Equivalent to ECE 220.

Registration Restrictions:
Required Prerequisites: BENG 101C, MATH 203C and PHYS 160C (MATH 214C or 216C).

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

300 Level Courses

BENG 301: Bioengineering Measurements. 3 credits.
Introduces the basic concepts and tools for making biomedical measurements, describes instrumentation design and analysis considerations, and discusses several practical applications. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: BENG 380C, 320C and 313C.

C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 302: Bioengineering Measurements Lab. 1 credit.
Provides hands-on experience with sensors and instrumentation relevant to the analysis of living systems and related processes. Biomedical measurements include electrocardiograms, electromyograms, spirometry, pulse oximetry, and glucose monitoring. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: BENG 301C.

May be taken concurrently.

C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 304: Modeling and Control of Physiological Systems. 3 credits.
Introduces a systems-level understanding of biomedical systems. Emphasis on mathematical modeling of dynamic systems, including the role of feedback. Analogies between electrical and mechanical systems will be discussed. Examples covered will include multiple scales ranging from cells to organ systems. Offered by Bioengineering (p. 1010). Limited to two attempts.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: MATH 214C and PHYS 260C and (BENG 320C or SYST 320C) and BENG 313C.

C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
BENG 313: Physiology for Engineers. 3 credits.
Provides a broad introduction to the subject of human physiology, focusing on learning the subject matter from an engineering viewpoint. Emphasis on organs and physiological systems where engineering has a significant role. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (BENG 101C and (MATH 114B or 116B) and (BIOL 213C)).
C Requires minimum grade of C.
B- Requires minimum grade of B-.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 320: Bioengineering Signals and Systems. 3 credits.
Introduces the conversion of analog signals to digital ones and methods for using digitally processed signals in biomedical applications. Offered by Bioengineering (p. 1010). Limited to two attempts. Equivalent to ECE 320.

Registration Restrictions:
Required Prerequisites: BENG 101C, 220C and MATH 214B.
C Requires minimum grade of C.
B- Requires minimum grade of B-.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 327: Cellular, Neurophysiological, and Pharmacological Neuroscience. 3 credits.
What makes neurons different from other cells? What do they do and how do they work? How do they communicate with each other? In this course, we will answer these questions and many more. We will cover the basics of cellular, neurophysiological, and pharmacological neuroscience, including cellular anatomy and membrane function, electrical properties of neurons, intracellular and intercellular signaling, synaptic plasticity, and circuit connectivity. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CHEM 211C.
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 341: Introduction to Biomaterials. 3 credits.
To provide a fundamental understanding of current, state of the art, and future directions of biomaterials. Offered by Bioengineering (p. 1010). Limited to two attempts.

Specialized Designation: Scholarly Inquiry

Registration Restrictions:
Required Prerequisites: (CHEM 251C or 211) and (MATH 113C) and (BIOL 213C).
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 380: Introduction to Circuits and Electronics. 3 credits.
Builds on simple circuit concepts introduced in PHYS 260. Includes circuit analysis using superposition, equivalent circuits and transient analysis of RL, RC and RLC circuits; sinusoidal excitations, AC steady state analysis; frequency response; operational amplifiers; semiconductor devices such as diodes, field effect and bipolar transistors; and digital logic circuits. (Not intended for those majoring in electrical or computer engineering.) Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (PHYS 260C and MATH 214B) and BENG 320 C-.
* May be taken concurrently.
C Requires minimum grade of C.
B- Requires minimum grade of B-.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
BENG 381: Circuits and Electronics Lab. 1 credit.
Lab associated with BENG 380. Provides laboratory experience in basic electronics emphasizing issues and considerations that are paramount for biomedical instrumentation. Not intended for those majoring in electrical or computer engineering. Notes: Not intended for those majoring in electrical or computer engineering. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: PHYS 261\(^C\) and BENG 380\(^{10C}\).
\(^C\) May be taken concurrently.
\(^{10C}\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 390: Engineering Design and Fabrication. 3 credits.
Project based course where students will design projects containing analog and digital components as well as mechanical parts. Students will simulate, build, and test their projects. Offered by Bioengineering (p. 1010). Limited to two attempts. Equivalent to ECE 390.

Registration Restrictions:
Required Prerequisites: (BENG 380\(^C\), ECE 280\(^C\) or 285\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 395: RS: Mentored Research in Bioengineering. 1-3 credits.
Introduces the scientific research process through “hands on” experience: students are matched with faculty mentors who are actively involved in Bioengineering-related research. Requires no less than 60 hours per semester working with mentors. Offered by Bioengineering (p. 1010). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Research/Scholarship Intensive
Recommended Prerequisite: At least 60 credit hours applicable to the Bioengineering program.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

400 Level Courses
BENG 406: Introduction to Biomechanics. 3 credits.
This course introduces the fundamental principles of musculoskeletal biomechanics, computational simulation of movement, and OpenSim simulator. Topics include functions and models of the musculoskeletal structures, mathematical description of motion, kinetics, and simulation of movement using OpenSim. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (PHYS 160\(^C\) or 243\(^C\)) and MATH 203\(^C\) and 214\(^C\) and (BENG 220\(^C\), SYST 220\(^C\) or ECE 220\(^C\)) and BENG 313\(^C\).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 417: Bioengineering World Health. 3 credits.
This course covers the major types of medical equipment, including the principles of operation, the physiology underlying the measurement, the major functional (system) pieces for each instrument, and typical problems/applications of each instrument. Special focus is placed on making reliable and safe repairs in a low resource setting: Troubleshooting, creative problem solving, calibration and testing. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Enrollment limited to students with a class of Junior, Senior Plus or Senior.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 420: Bioinformatics for Engineers. 3 credits.
This course introduces the fundamental techniques and tools for analyzing biomedical data, important for many biomedical engineering problems. Topics include regression, classification, clustering, dimensionality reduction, data representation, pattern matching and algorithm performance evaluation. This innovative course will leverage hybrid learning through a combination of lectures, on-line content, and individual and group projects involving hands-on analysis. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: BENG 320\(^C\), SYST 320\(^C\) or ECE 320\(^C\).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 421: Introduction to Tissue Engineering. 3 credits.
Designed to provide exposure to the concepts of cell/tissue functions and behavior and strategies to manipulate their responses, biomaterials to construct scaffolds, modern techniques of artificial organ development and wound healing and most importantly, the utilization of engineering principles for biomedical applications. Offered by Bioengineering (p. 1010). May not be repeated for credit.

Recommended Prerequisite: BENG 220.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
BENG 429: Mason-Inova Applied Technologies. 3 credits.
This Mason-based class will provide students with the opportunity to learn fundamentals concepts in the classroom and interact with clinical technologies, through 3-hour practical experiences at the Fairfax Inova hospital every three to four weeks. Students will work with faculty and clinicians in both an academic and simulated clinical environment. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: BENG 313\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.
Enrollment limited to students with a class of Junior.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 437: Medical Image Processing. 3 credits.
Covers the basic concepts of image processing in the context of medical applications. It focuses on the basics of image enhancement in the spatial domain, image enhancement in the frequency domain, image restoration, morphological image processing, image registration, and segmentation feature extraction and classification. Offered by Bioengineering (p. 1010). Limited to two attempts.

Recommended Prerequisite: BENG 320.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 441: Nanotechnology in Health. 3 credits.
Introduces fundamental principles of a wide range of nanoscale biomaterials and their applications in medicine and engineering. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (BIOL 213\textsuperscript{C} or PHY 160\textsuperscript{C}) and (CHEM 251\textsuperscript{C} or 211\textsuperscript{C} ).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 451: Translation and Entrepreneurship in Bioengineering. 3 credits.
This course focuses on teaching the process of translational research and on creating both a medical device and a company vision. Emphasis is made on creating a robust medical device prototype based on a deep understanding of the disease. Regulatory and reimbursement processes are also addressed in detail. This course will draw upon lectures and different guest speakers. Offered by Bioengineering (p. 1010). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (BIOL 213\textsuperscript{C} and (CHEM 251\textsuperscript{C} or 211\textsuperscript{C} ).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 491: Bioengineering Senior Seminar I. 1 credit.
Covers the variety of responsibilities of bioengineers to society. Topics include ethics, regulation, research, industry, entrepreneurship, and cost issues. Professional approaches to job searching and effective technical communication will also be discussed. Speakers include faculty, invited guests from industry and government, as well as students. Notes: Students cannot receive credit for both BENG 491 and ECE 491. Offered by Bioengineering (p. 1010). Limited to two attempts. Equivalent to ECE 491.

Registration Restrictions:
Enrollment limited to students with a class of Senior Plus or Senior.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 492: Senior Advanced Design Project I. 2 credits.
Conception of senior design project in bioengineering and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan. Notes: Students cannot receive credit for both BENG 492 and ECE 492. Offered by Bioengineering (p. 1010). Limited to two attempts.

Mason Core: Capstone, Synthesis (p. 137)

Specialized Designation: Research Associated

Recommended Prerequisite: 90 credit hours applicable to the Bioengineering Program.

Registration Restrictions:
Required Prerequisites: (COMM 100\textsuperscript{C} or 101\textsuperscript{C} ) and ENGH 302\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BENG 493: RS: Senior Advanced Design Project II. 2 credits.
Implementation of project for which preliminary work was done in BENG 492. Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion. Notes: Implementation of project for which preliminary work was done in BENG 492. Offered by Bioengineering (p. 1010). Limited to two attempts.

Mason Core: Capstone, Synthesis (p. 137)
**Specialized Designation:** Research/Scholarship Intensive

**Registration Restrictions:**

**Required Prerequisite:** BENG 492\(^C\).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BENG 495:** Bioengineering Senior Seminar II. 1 credit.
Covers a variety of responsibilities of bioengineers. Topics include dealing with biomedical ethics, regulatory requirements, global considerations, and health care costs. Speakers will include faculty as well as guests from industry, government, and academia. Students are required to explore and then present some material themselves. Offered by Bioengineering (p. 1010). Limited to two attempts.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** 90 credit hours applicable to the Bioengineering Program.

**Registration Restrictions:**

**Required Prerequisite:** COMM 100\(^C\).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BENG 499:** Special Topics in Bioengineering. 0-4 credits.
Topics of special interest to undergraduates. Notes: May be repeated if topics substantially differ. Offered by Bioengineering (p. 1010). May be repeated within the term for a maximum 11 credits.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BENG 501:** Bioengineering Research Methods. 3 credits.
Examines approaches for scientific research with emphasis on bioengineering. Topics include biophysical origins of bioengineering measures, tools and technology for bioengineering data collection, basic principles of experimental design and statistical analyses, and interpretation of scientific results. Special attention will be given to ethical issues associated with the collection, use, and dissemination of data. Offered by Bioengineering (p. 1010). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BENG 525:** Neural Engineering. 3 credits.
Provides an overview of topics in Neural Engineering. Topics covered range from sensory and motor prosthetic devices, stimulation of biological tissue, bioelectrodes and characterization techniques, brain-machine interfaces, and engineered devices to ameliorate neuropsychiatric disorders. Prior knowledge in electrical or computer engineering disciplines required. Offered by Bioengineering (p. 1010). May not be repeated for credit. Equivalent to ECE 526.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BENG 537:** Introduction to Medical Image Processing. 3 credits.
Topics include overview of medical imaging systems, image representation and formats, basic filtering operations, feature detection, and introduction to image segmentation. Projects will focus on biomedical image applications. Offered by Bioengineering (p. 1010). May not be repeated for credit.

**Recommended Prerequisite:** BENG 320 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BENG 538:** Medical Imaging. 3 credits.
Provides an introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. In addition, this course introduces engineering students to clinical applications of medical imaging. The emphasis is on diagnostic ultrasound and magnetic resonance imaging methods, although several other modalities are covered. The course also provides an overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learned in class to real-world problems. Offered by Bioengineering (p. 1010). May not be repeated for credit. Equivalent to ECE 538.
Recommended Prerequisite: ECE 220 or equivalent

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BENG 541: Biomaterials. 3 credits.
Covers the principles of biomaterials and biological interactions with materials, including an overview of biomaterials characterization, design and testing. Specific topics include the use of polymers, ceramics and metallics in biomaterials, drug delivery applications, tissue engineering from an orthopedic and vascular perspective, biocompatibility, acute and chronic biological response to implanted material, and in vitro and in vivo testing of biomaterials. Offered by Bioengineering. (p. 1010). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or BENG 213 with a C or better
CHEM 211 or CHEM 251 or BENG 201 with a C or better

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BENG 590: Selected Topics in Bioengineering. 3 credits.
Addresses selected topics from recent developments in various Bioengineering disciplines. Content may vary each semester depending on instructor and students' interests. Offered by Bioengineering. (p. 1010). May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BENG 555: Advanced Biomechanics. 3 credits.
Introduces the fundamental concepts of musculoskeletal biomechanics, and how to apply mechanical principles to quantitatively describe and analyze movement. Topics include properties, functions, and models of the musculoskeletal structures, 3D kinematics, locomotion, and instrumentation systems applied in musculoskeletal biomechanics and movement analysis. Offered by Bioengineering. (p. 1010). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

600 Level Courses

BENG 600: Bioengineering Seminar. 0 credits.
Students are required to attend seminars, including talks by distinguished speakers, faculty candidates, and Mason faculty. Notes: Required attendance and participation in a minimum of 2 seminars per semester. Offered by Bioengineering. (p. 1010). May be repeated within the degree.
Recommended Prerequisite: Admission to MS Bioengineering program.

Registration Restrictions:
Enrollment limited to students with a class of Graduate.

Schedule Type: Seminar

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

BENG 636: Advanced Biomedical Signal Processing. 3 credits.
Provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include introduction to physiological origins of biomedical signals, stochastic and adaptive signal processing, spectral estimation, signal modeling and analysis of nonstationary signals. Offered by Bioengineering (p. 1010). May not be repeated for credit.

Recommended Prerequisite: ECE 535 or equivalent; ECE 528 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BENG 641: Advanced Nanotechnology in Health. 3 credits.
Presents interdisciplinary scientific and engineering approaches to solve relevant medical problems. Contents include polymer structure, composition, and material properties, natural and synthetic polymers, and their application to design novel nanocarriers for controlled drug release, scaffolds for tissue engineering, and new vectors for vaccines. The relevance of nanotechnology to advance treatments for cancer, infectious and neurodegenerative diseases are discussed in depth. Offered by Bioengineering (p. 1010). May not be repeated for credit.

Recommended Prerequisite: BENG 541, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BENG 649: Advanced Topics in Bioengineering. 3 credits.
Advanced topics of current interest in bioengineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas. Offered by Bioengineering (p. 1010). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

700 Level Courses

BENG 725: Computational Motor Control. 3 credits.
Uses approaches from robotics, control theory, and neuroscience to understand biological motor systems. Contents include modeling muscles, reflexes and neural systems to understand how the central nervous system plans and controls movement of the eyes and limbs. The theoretical control problem is compared to known neuronal properties of the motor system and diseases of the motor system affecting movement control. Offered by Bioengineering (p. 1010). May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BENG 738: Advanced Medical Image Processing. 3 credits.
Advanced Medical Image Processing covers advanced processing techniques used in modern medical imaging. The course aims at developing an understanding of the mathematical background, principles and application of techniques such as segmentation, registration, morphometry, general linear modeling, principal and independent component analysis. Offered by Bioengineering (p. 1010). May not be repeated for credit.

Recommended Prerequisite: BENG 320 (or equivalent), ECE 537 (or equivalent).

Registration Restrictions:
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BENG 745: Biomedical Systems and Microdevices.** 3 credits.
Bio-micro-electro-mechanical systems (BioMEMS) provide a robust approach to mimic in vivo microenvironments within controlled in vitro settings. This course introduces students to the highly interdisciplinary field of Lab-on-a-Chip technologies with emphasis on its advanced applications in biological and biomedical engineering. In addition to the microfabrication processes, a variety of analytical techniques routinely used in biomedical research will also be covered. Offered by Bioengineering (p. 1010). May not be repeated for credit.

**Registration Restrictions:
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BENG 750: Modeling and Simulation of Human Movement.** 3 credits.
Introduces the development and simulation of data-driven 3D neuro-musculoskeletal models to quantitatively study human movement in health and disease. Topics include reconstructing 3D models from imaging data, estimating kinematics from motion data, simulating movement incorporating multimodality data, and analyzing muscle and joint forces. Students use computational biomechanics software. The course consists of lectures, article presentations, modeling assignments and a project. Offered by Bioengineering (p. 1010). May not be repeated for credit.

**Recommended Prerequisite:** BENG 550 or permission of instructor.

**Registration Restrictions:
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BENG 798: Independent Reading and Research in Bioengineering.** 1-6 credits.
Independent study in Bioengineering under the supervision of a faculty member, resulting in an acceptable technical report or presentation. This course may be repeated once for a total of 12 credit hours towards a graduate degree in Bioengineering. Offered by Bioengineering (p. 1010). May be repeated within the degree for a maximum 12 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**BENG 799: Master's Thesis.** 1-6 credits.
Research project chosen and completed under guidance of graduate faculty member that results in a technical report and an oral defense acceptable to thesis committee of faculty members. Offered by Bioengineering (p. 1010). May be repeated within the degree.

**Recommended Prerequisite:** 9 graduate credits, and permission of instructor.

**Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**BENG 800: Bioengineering Colloquium.** 0 credits.

Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty. Notes: Required attendance and participation in a minimum of 3 seminars per semester. Offered by Bioengineering (p. 1010). May be repeated within the degree.

**Recommended Prerequisite:** Admission to PhD Bioengineering program.

**Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**BENG 820: Seminar in Neuroengineering.** 3 credits.

Selective analysis and discussion of topics in neuroengineering in areas of current research interest. Topics may include brain machine interfaces, advanced materials for implantable devices, computational neuroscience, neuronal biosensors and assays, and neuroprosthetics. Offered by Bioengineering (p. 1010). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to PhD Bioengineering program or permission of instructor.

**Registration Restrictions:
Enrollment is limited to Graduate level students.**
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BENG 830: Seminar in Biomedical Imaging.** 3 credits.
Selective analysis and discussion of topics in biomedical imaging in areas of current research interest. Topics may include techniques and analyses for ultrasound, magnetic resonance imaging (MRI), functional MRI, nuclear imaging, computer assisted tomography, positron emission tomography, and emergent approaches to imaging for health and disease. Offered by Bioengineering (p. 1010). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to PhD Bioengineering program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BENG 840: Seminar in Nano-scale Bioengineering.** 3 credits.
Selective analysis and discussion of topics in nano-scale bioengineering in areas of current research interest. Topics may include nanoengineered materials, nanoscale devices and systems, and novel nano-scale fabrication and modeling approaches with application to biomedicine. Offered by Bioengineering (p. 1010). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to PhD Bioengineering program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BENG 850: Seminar in Biomechanics.** 3 credits.
Selective analysis and discussion of topics in biomechanics in areas of current research interest. Topics may include computational and physiological modeling for biomechanics, multiscale representation of biomechanical systems, data fusion techniques for biomechanics, and application of quantitative biomechanics for diagnostics or medical intervention. Offered by Bioengineering (p. 1010). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to PhD Bioengineering program or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BENG 898: Doctoral Dissertation Proposal.** 1-12 credits.
Work on research proposal that forms basis for doctoral dissertation. May be repeated as needed. Notes: No more than 24 credits of BENG 898 and 999 may be applied to doctoral degree requirements. Offered by Bioengineering (p. 1010). May be repeated within the degree for a maximum 12 credits.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**BENG 998: Doctoral Dissertation.** 1-12 credits.
Formal record of commitment to doctoral dissertation research under direction of faculty member in bioengineering. May be repeated as needed. Notes: Once enrolled in 999, students must maintain continuous registration in 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer. Offered by Bioengineering (p. 1010). May be repeated within the degree for a maximum 12 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**Bioinformatics (BINF)**

**300 Level Courses**

**BINF 334: Perl for Bioinformatics.** 3 credits.
Introduction into Perl programming language. Topics include data representation, control structures, file input/output, subroutines, regular expressions, debugging, relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL or equivalent query language. Offered by School of Systems Biology (p. 775). May not be repeated for credit.
**Recommended Prerequisite:** Knowledge of programming language or CS 112 or equivalent.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BINF 354: Foundations in Mathematical Biology. 3 credits.**
Interdisciplinary introduction to life sciences for physicists, chemists, engineers, and mathematicians. Combines knowledge from natural sciences, social and behavioral sciences, quantitative reasoning, and information technology. Covers selected topics in ecology, physiology, biochemistry, and behavior. May include biochemical reaction kinetics, Hodgkin-Huxley model for cellular electrical activity, continuous and discrete population interactions, and neural network models of learning. Techniques utilized include ordinary differential equations, difference equations, algebraic equations, and computer simulations. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Mason Core:** Synthesis (p. 137)

**Recommended Prerequisite:** Completion or concurrent enrollment in all other required Mason Core courses (must include a chemistry course); MATH 114 or equivalent.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**400 Level Courses**

**BINF 401: Bioinformatics and Computational Biology I. 3 credits.**
Covers the following topics and related methodology: protein sequence, structure prediction, and modeling methods; nucleic acid sequence and structure prediction; gene structure prediction in prokaryotes and eukaryotes; elements of system biology. Students will learn programming approaches to solve bioinformatics problems. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213, BIOL 214 and CDS 130 with a grade of C or better, or its equivalent, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BINF 402: Bioinformatics and Computational Biology II. 3 credits.**
Continuation of BINF401 and studies in-depth several algorithms and methods used in bioinformatics and computational biology. Students will learn sequence alignment and assembly algorithms, hidden Markov models, classification and prediction methods, genome annotation. These techniques will then be applied to current bioinformatics problems. Programming assignments are incorporated in the course program. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** BINF 401.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BINF 403: Bioinformatics and Computational Biology Lab I. 1 credit.**
Laboratories will introduce students to bioinformatics tools designed to answer research problems in the topics covered in lectures, such as sequence alignment, sequence pattern recognition, structural conformation modeling, phylogenetic analysis methods and image comparisons. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Corequisite:** BINF 401.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BINF 404: Bioinformatics and Computational Biology Lab II. 1 credit.**
Laboratories will introduce students to research bioinformatics tools relevant to lecture topics such as: the correspondence of measured fragments to parent biomolecules, inference methods for gene and protein networks, predicting system outputs given specified inputs. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Corequisite:** BINF 401.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BINF 450: Bioinformatics for Life Sciences. 4 credits.**
Teaches students how to understand the basis of and use of bioinformatics software in database searching, sequence analysis, gene identification, genomics, protein structure and phylogeny. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213, and either BIOL 482 or CHEM 463 or BIOL 483.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BINF 470: Molecular Biophysics. 3 credits.**
Offers a broad introduction into molecular biophysics. Demonstrates that the application of methods of physics provides a unique opportunity to tackle complex biological problems. Designed for physics or chemistry majors; also useful for biology majors interested in bioinformatics and computational biology. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to PHYS 370.

**Recommended Prerequisite:** PHYS 307 or CHEM 331, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BINF 490: Independent Senior Research in Bioinformatics and Computational Biology. 3 credits.**
Course offers individual research in bioinformatics and computational biology under the guidance of faculty member. Written report required
upon course completion. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BINF 491: Senior Thesis in Bioinformatics.** 1 credit.
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member. Notes: An oral progress report with a poster at the fall semester Bioinformatics Student Research Day is required. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Corequisite:** BINF 401.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BINF 492: Senior Thesis in Bioinformatics.** 1 credit.
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member. Notes: A written thesis in standard format is required. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Corequisite:** BINF 402.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

### 500 Level Courses

**BINF 530: Introduction to Bioinformatics Methods.** 3 credits.
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 531: Molecular Cell Biology for Bioinformatics.** 3 credits.
Intensive review of biochemistry, molecular biology, and cell biology necessary OT begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and expression and control. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate 300 and 400 level courses in biochemistry or cell biology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 550: Introduction to Bioinformatics Database Design.** 3 credits.
Students will acquire skills needed to exploit public biological databases, and establish and maintain personal databases that support their own research. Skills include learning underlying data models and the basics of DBMS and SQL. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Introductory computer programming course, or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

### 600 Level Courses

**BINF 630: Bioinformatics Methods.** 3 credits.
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 631: Molecular Cell Biology for Bioinformatics.** 3 credits.
Intensive review of biochemistry, molecular biology, and cell biology necessary to begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication, transcription,
and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and gene expression and control. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate background in biochemistry, or cell biology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 633:** Molecular Biotechnology. 3 credits.
Introduction to the theory and practice of molecular biotechnology, with emphasis on the application of tools in today's society. Includes study of recombinant DNA technology, genomics, and bioinformatics as applied to commercially important products. Lectures reflect more recent advances and applications in the commercial aspects of biology. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 634:** Bioinformatics Programming. 3 credits.
Data representation, control structures, file input/output, subroutines, regular expressions, debugging, introduction to relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL, or equivalent query language. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 636:** Microarray Methodology and Analysis. 3 credits.
Theory and practice of genome analysis including genetics, biochemistry, and tools for analyzing global gene expression, and detection and quantification of genes and gene products. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** BINF 633 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 637:** Forensic DNA Sciences. 3 credits.
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 639:** Introduction to Biometrics. 3 credits.
Introduction to methods for measuring humans. Topics include face, speaker, fingerprint, and shoeprint recognition; and handwriting analysis. Students develop computer programs to perform many of these tasks. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** CSI 603 and 604 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
**BINF 641**: Biomolecular Modeling. 3 credits.
Introduction to basic principles and practice of computational biomolecular modeling. Students learn the elements of physical chemistry and molecular biology, which constitute the foundation of molecular modeling. Practical application of biomolecular software and development of related skills are emphasized through online lectures, homework, and course project. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite**: Students are expected to be familiar with basic concepts of physics, calculus, and biology on undergraduate level.

**Registration Restrictions**:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**Grading**:
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 650**: Introduction to Bioinformatics Database Design. 3 credits.
Students will acquire skills needed to exploit public biological databases and establish and maintain personal databases that support their own research; such skills include learning underlying data models and the basics of DBMS and SQL. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite**: BINF 634 or equivalent, or permission of instructor.

**Registration Restrictions**:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**Grading**:
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 690**: Numerical Methods for Bioinformatics. 3 credits.
Computational techniques for solving scientific problems focusing on applications in bioinformatics and computational biology. Students develop the ability to convert a quantitative problem into computer programs to solve the problem. Emphasizes efficiency and readability of code. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite**: CS 112, MATH 113 or permission of instructor.

**Registration Restrictions**:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**Grading**:
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 701**: Systems Biology. 3 credits.
Systems biology seeks to understand how a complex biological system functions. This involves the use of computational methods and models to integrate information obtained about these systems through a wide range of methods that span multiple spatial and temporal scales. Current research examples will be used to motivate and demonstrate these approaches. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to BIOS 701.

**Recommended Prerequisite**: Admission to the Ph.D. program in Biosciences or Bioinformatics, CHEM 663 or equivalent.

**Registration Restrictions**:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**Grading**:
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 702**: Biological Data Analysis. 3 credits.
Trains students in research methodologies for life sciences. Covers the three phases of biological research projects: experimental design, data collection and data analysis. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite**: Admission to PhD program in bioinformatics or biosciences or permission of instructor.

**Registration Restrictions**:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**Grading**:
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 703**: Bioinformatics Lab Rotation. 1 credit.
Short-term introductory research on a specific topic in computational sciences and informatics under direction of faculty member. Offered by School of Systems Biology (p. 775). May be repeated within the term for a maximum 3 credits.

**Recommended Prerequisite**: Permission of instructor.

**Registration Restrictions**:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Laboratory
**BINF 704: Colloquium in Bioinformatics.** 1 credit.
Seminar presentations in a variety of areas of bioinformatics and computational biology by COS faculty, staff, advanced PhD students, and professional visitors. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum of 3 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 705: Research Ethics.** 1 credit.
Examines ethical issues in scientific research, reflecting on purpose and reviewing foundational principles for evaluating ethical issues. Provides skills for survival in scientific research through training in moral reasoning and teaching of responsible conduct. Students learn to apply critical-thinking skills to design, execution, and analysis of experiments and analysis of ethical issues in research, including use of animals and humans, standards in computer community, and research fraud. Guidelines for data ownership, manuscript preparation, and conduct of people in authority may be presented and discussed. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 730: Biological Sequence and Genome Analysis.** 3 credits.
Fundamental methods for analyzing nucleic acid and protein sequences, including pairwise and multiple alignment, database search methods, profile searches, and phylogenetic inference. Development of probabilistic tools, including hidden Markov models and optimization algorithms. Survey of current software tools. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** A course in molecular biology, a course in probability, and ability to program in a high-level language, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 731: Protein Structure Analysis.** 3 credits.
Computational methods for analyzing, classifying, and predicting three-dimensional protein structures. Covers theoretical approaches, techniques, and computational tools for protein structure analysis. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor, or previous courses in molecular biology, biochemistry, and computer programming.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 732: Genomics.** 3 credits.
Surveys computational tools and techniques to study whole genomes, and explores biological basis of genome analysis algorithms. Topics include genome mapping, comparative genomics, and functional genomics. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** General biology, programming experience, CSI 700 or equivalent, CSI 731, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 733: Gene Expression Analysis.** 3 credits.
Analyzes gene expression data. Topics include cluster analysis and visualization of expression data, inference of genetic regulatory networks, and theoretical models of genetic networks. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor, ability to program in a high-level language and a course in molecular biology, S-Plus or Matlab experience recommended.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 734: Advanced Bioinformatics Programming.** 3 credits.
Topics include algorithm design, complex data structures, object oriented programming, relational databases, designing modules, and graphics and web programming. Students complete a bioinformatics programming project. Offered by School of Systems Biology (p. 775). May not be repeated for credit.
**Recommended Prerequisite:** BINF 634, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 739: Topics in Bioinformatics.** 1-3 credits.
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses. Offered by School of Systems Biology (p. 775). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**BINF 740: Introduction to Biophysics.** 3 credits.
Introduces biophysics, focusing on physical and chemical concepts and their relation to rapidly expanding interdisciplinary interfaces among biology, chemistry, and physics. Reveals multiscale nature of biophysics, and includes exploration of macroscopic and microscopic applications. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to PHYS 630.

**Recommended Prerequisite:** Undergraduate courses in General Physics, Calculus, and Biology.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 741: Introduction to Computer Simulations of Biomolecules.** 3 credits.
Details computational methods in biomolecular simulations, such as molecular dynamics and Monte Carlo algorithms. Special emphasis given to practical applications. Reviews most recent advances in biomolecular simulations. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Good programming skills, BINF 690 and 701, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 751: Biochemical and Cellular Systems Modeling.** 3 credits.
Mathematical and computational methods for analysis of cellular and subcellular processes. Topics may include ion channels, whole cell models, intracellular signaling, biochemical oscillations, pathway modeling, parameter estimation, and sensitivity analysis. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Calculus and knowledge of a computer programming language; and BINF 690 and 701; or permission of instructor. Course in differential equations is recommended.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 760: Machine Learning for Bioinformatics.** 3 credits.
Machine learning and data mining methods relevant to application to problems in computational biology. Methods include decision trees, random forests, rule learning methods, support vector machines, neural networks, genetic algorithms, instance-based learning, Bayesian networks, and evaluation metrics for learning systems. Applications include cancer prediction, gene finding, protein function classification, gene regulation network inference, and other recent bioinformatics applications selected from the literature. Notes: In addition to lectures from the instructor, students will present papers from the literature and complete a machine learning project. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** BINF 630, BINF 631, and BINF 634, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BINF 795: Bioinformatics Internship.** 1-3 credits.
Involves off-campus, professional work with approved agencies, institutions, non-profits, or businesses throughout the semester. The internship work must produce one or more products such as a comprehensive report, a departmental presentation, a research project, or an article. Internship placement and product type must be approved by the student's faculty advisor. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Internship placement and parameters must be approved by the faculty advisor prior to registration.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Internship
Grading: 
This course is graded on the Graduate Regular scale. (p. 82)

BINF 796: Directed Reading and Research. 1-6 credits. 
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:** 
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

Grading: 
This course is graded on the Graduate Regular scale. (p. 82)

BINF 798: Research Project. 3 credits.
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Twelve graduate credits and permission of instructor.

**Registration Restrictions:** 
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

Grading: 
This course is graded on the Graduate Special scale. (p. 82)

BINF 799: Master’s Thesis. 1-6 credits.
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report (master’s thesis) and oral defense. Offered by School of Systems Biology (p. 775). May be repeated within the degree.

**Recommended Prerequisite:** Twelve graduate credits and permission of instructor.

**Registration Restrictions:** 
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

Grading: 
This course is graded on the Graduate Special scale. (p. 82)

BINF 841: Research Topics in Biomolecular Simulations. 3 credits.
Research-oriented course combining lectures and work on individual projects in biomolecular simulations. Topics include protein and peptide aggregation, binding, and unfolding and folding. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** BINF 741, or permission of instructor.

**Registration Restrictions:** 
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

Grading: 
This course is graded on the Graduate Regular scale. (p. 82)

BINF 996: Doctoral Reading and Research. 1-6 credits. 
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to doctoral program or permission of instructor.

**Registration Restrictions:** 
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

Grading: 
This course is graded on the Graduate Regular scale. (p. 82)
BINF 998: Doctoral Dissertation Proposal. 1-12 credits.
Covers development of research proposal, which forms basis for doctoral
dissertation, under guidance of dissertation director and doctoral
committee. Offered by School of Systems Biology (p. 775). May be
repeated within the degree.

Recommended Prerequisite: Permission of advisor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BINF 999: Doctoral Dissertation. 1-12 credits.
Doctoral dissertation research under direction of dissertation director.
Notes: No more than 24 credits in BINF 998 and 999 may be applied to
doctoral degree requirements. Offered by School of Systems Biology
(p. 775). May be repeated within the degree.

Recommended Prerequisite: Admission to doctoral candidacy. Students
should contact the department for permission and CRN to register.
Please indicate your major and semester in the subject heading.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Biology (BIOL)

100 Level Courses

BIOL 103: Introductory Biology I. 4 credits.
Topics include chemistry of life, cell structure and function, Mendelian
genetics, evolution, and diversity of life. Notes: Survey course suitable for
any major. May not be taken after BIOL 200-level or above courses have
been taken. Offered by Biology (p. 634). May not be repeated for credit.
Equivalent to BIOL 103T, BIOL 105.

Mason Core: Natural Science with Lab (p. 137)
Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 105: Introductory Biology I Laboratory. 1 credit.
The chemical basis of life, the structure and function of the cell,
Mendelian and human genetics, and the major animal phyla are
presented. Notes: Not available to students who have taken BIOL 103 or
the equivalent. Offered by Biology (p. 634). May not be repeated for credit.
Equivalent to BIOL 103.

Recommended Prerequisite: Permission of BIOL 103/104 coordinator and
department chair.

Schedule Type: Laboratory
Grading:

BIOL 106: Introductory Biology II Laboratory. 1 credit.
The structure and function of major organ systems of animals and an
examination of the structure and function of plants, emphasizing the
higher plants. Notes: Not available to students who have taken BIOL 104
or the equivalent. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to BIOL 104.

Mason Core: Natural Science with Lab (p. 137)
Recommended Prerequisite: Permission of BIOL 103/104 coordinator and
department Chair.

Registration Restrictions:
Required Prerequisites: BIOL 107C or 104T.C.
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 107: Intro Biology II Lecture. 3 credits.
Topics include animal (including human) structure, function, homeostatic
mechanisms, organ systems, behavior, higher plant systems, and major
concepts in ecology. Note: Students are strongly urged to take BIOL 103
prior to BIOL 107. Survey course suitable for any major. May not be taken
after BIOL 200-level or above courses have been taken. Offered by Biology
(p. 634). May not be repeated for credit.

Mason Core: Natural Science Overview (p. 137)
Recommended Prerequisite: BIOL 106, concurrent enrollment permitted.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 124: Human Anatomy and Physiology. 4 credits.
Introduction to structure and function of body’s major organ systems.
Note: must be taken in sequence. Does not satisfy the natural science
requirement in COS or CHSS. Course requires use of organisms. Not
available for Biology major credit. Offered by Biology (p. 634). May not be repeated for credit.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 125: Human Anatomy and Physiology. 4 credits.
Introduction to structure and function of body’s major organ systems.
Notes: Does not satisfy the natural science requirement for the BA in
COS or CHSS. Not available for Biology major credit. Offered by Biology
(p. 634). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: BIOL 124.C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 140: Plants and People.** 3 credits.
An introduction to the interaction of plants and people from a biological perspective and the tools to continue life-long critical evaluation of emerging issues in human nutrition, agriculture, medicine, and global environmental change as they relate to plant biology. Designated a Green Leaf Course. Offered by Biology (p. 634). May not be repeated for credit.

**Mason Core:** Natural Science, Encore: Sustainability (p. 137)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 177: Ecological Applications.** 3 credits.
This course introduces ecosystem concepts and applications to natural and managed ecosystems. This course will discuss the natural environment, ecological processes, and human interaction with and management of this environment. Humankind plays a major role in all worldwide environments and there is very little, if any, of the surface of this planet that remains untouched by human actions. Biologists, ecologists, environmental scientists, and policy makers, must provide for the needs of humanity while mitigating negative impacts on the natural environment. Offered by Biology (p. 634). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

## 200 Level Courses

**BIOL 213: Cell Structure and Function.** 4 credits.
For science majors and preprofessionals in life sciences. Introduction to cell chemistry, metabolism, and genetics. Note: for science majors and pre-professionals in the life sciences. Offered by Biology (p. 634). May not be repeated for credit.

**Mason Core:** Natural Science with Lab (p. 137)

**Recommended Corequisite:** CHEM 211

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 214: Biostatistics for Biology Majors.** 4 credits.
An introduction to statistics used in the life sciences. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Corequisite:** BIOL 213

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 246: Introductory Microbiology.** 3 credits.
Introduction to microbial cell structure, physiology, and pathogenicity. Emphasizes control of microorganisms, host-parasite interactions including immunology, and viral and bacterial pathogens. Note: not available for Biology major credit or to students who have BIOL 213, 302, 305, or 418. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 124 and 125, one year of general biology, or permission of instructor.

**Recommended Corequisite:** BIOL 306.

**Registration Restrictions:**
Students cannot enroll who have a major in Biology.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 295: Summer Research in Biology.** 1-3 credits.
Students enrolled in this course study life science related topics in an approved research environment during the summer. This course may involve one or more of the following: reading peer reviewed literature, conducting a field or laboratory study, attending scientific seminars and workshops, writing an abstract, preparing and presenting a poster, or writing a research paper. Notes: May be taken for 1 to 3 credits and repeated once for a total of 3 credits. Total limit for BIOL 295 is 3 credits toward 44 credits for BS or BA (as long as the number of 100-200 level credits for the biology areas has not been exceeded). Offered by Biology (p. 634). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Permission of instructor and Biology Program Director.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

## 300 Level Courses

**BIOL 301: Biology and Society.** 3 credits.
Biological problems facing society including pollution, cloning, emerging diseases, global warming, and overpopulation. Notes: Not available for biology major or minor elective credit. May be repeated if topic is different. Offered by Biology (p. 634). May be repeated within the term.

**Mason Core:** Synthesis (p. 137)

**Recommended Prerequisite:** BIOL 103 and 60 credits, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 302: Alternative Careers in Biology.** 1 credit.
This course will explore non-traditional careers that utilize a biology degree. Weekly seminars will allow biology undergraduates to discuss and explore the broad-range of career options that utilize a biology degree with professionals in those fields. Notes: Biology majors only. Offered by Biology (p. 634). May not be repeated for credit.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
BIOL 303: Animal Biology. 4 credits.
Emphasizes structure and function of vertebrates, but surveys all animal groups and protozoa. Also covers evolutionary theory, and evolutionary history of major animal groups. Course requires use of organisms. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to BIOL 310.

**Recommended Prerequisite:** C or better in BIOL 213 or U213 or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 304: Plant Biology. 4 credits.
Introduction to study of plants, their structure, development, nutrition, and ecology. Emphasizes flowering plants, but surveys all groups and their phylogenetic relationships. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to BIOL 310.

**Recommended Prerequisite:** C or better in BIOL 213 or U213, or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 305: Biology of Microorganisms. 3 credits.
Morphology, physiology, and pathogenicity of certain groups of bacteria, fungi, and viruses; stresses host-parasite interactions. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Corequisite:** BIOL 306.

**Registration Restrictions:**
**Required Prerequisites:** (BIOL 213C or U213). 
C Requires minimum grade of C.

Students cannot enroll who have a major in Nursing.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 306: Biology of Microorganisms Laboratory. 1 credit.
Laboratory techniques in culturing, staining, and identifying microorganisms. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Corequisite:** BIOL 305 or 246.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 308: Foundations of Ecology and Evolution. 5 credits.
An examination of the principles of ecology, evolution, and the impact of humans on the world around them. Topics will include evolutionary history, biological diversity, and analyzes of interactions among organisms and between organisms and their environment. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to BIOL 308T, BIOL 328, BIOL 338.

**Recommended Prerequisite:** Scholarly Inquiry, Writing Intensive in the Major

**Recommended Prerequisite:** BIOL 311.

**Registration Restrictions:**
**Required Prerequisites:** (BIOL 213C and 214C) or (EVPP 110C and BIOL 214C).
C Requires minimum grade of C.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 309: Introduction to Oceanography. 3 credits.
Introduction to chemical, biological, and geological aspects of oceanic environment. May include field trips. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 309, GEOL 309.

**Recommended Prerequisite:** Two of the following lab sciences courses are required for a total of 8 credits: [GEOL 101 or 102], [EVPP 110 or 210], [CHEM 211 and 213], [BIOL 103 or 213], [PHYS 160 and 161 or 243 and 244].

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 310: Biodiversity. 3 credits.
Explores the fundamental principles governing organismal biology while introducing the three domains of life: the Archaea, the Bacteria, the Eukaryotes, plus viruses. One off-campus field trip is required. Notes: BIOL 310 has replaced BIOL 303 and 304. Students who have taken BIOL 310 may not receive credit toward the major for BIOL 303 and/or BIOL 304. Offered by Biology (p. 634). May be repeated within the degree. Equivalent to BIOL 303, BIOL 304.

**Specialized Designation:** Scholarly Inquiry

**Recommended Corequisite:** BIOL 330.

**Registration Restrictions:**
**Required Prerequisite:** (BIOL 213C).
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 311: General Genetics. 4 credits.
Basic principles of heredity and modern developments in this field. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 214.

**Registration Restrictions:**
**Required Prerequisite:** (BIOL 213C).
C Requires minimum grade of C.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
BIOL 312: Biostatistics for Bioinformatics. 4 credits.
Use of probability and descriptive and inferential statistical techniques in interpreting biological data. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 214 and CDS 130 with a grade of C or better, or its equivalent or permission of the instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 314: Introduction to Research Design and Analysis. 4 credits.
Introduction to research design in a wide range of biological disciplines. Lecture will concentrate on how to design experiments with proper controls for statistical analysis, as well as obtaining permits and approvals from appropriate agencies. In recitation students will be given data sets to analyze. Offered by Biology (p. 634). May not be repeated for credit.

Specialized Designation: Scholarly Inquiry

Recommended Prerequisite: BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211, 212, 213, 214; Completion of Biology core recommended; Must be enrolled in Biology Research Semester.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 318: Conservation Biology. 3 credits.
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 318.

Recommended Prerequisite: BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 320: Comparative Chordate Anatomy. 4 credits.
Compares anatomy and morphology of major chordate groups. Lab emphasizes shark, mudpuppy, cat, and rabbit. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310 or permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 322: Developmental Biology. 3 credits.
Principles of embryonic development and differentiation in animal species at cellular, molecular, tissue, and whole organism levels. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or U213 and BIOL 311 or L311 or permission of instructor.
BIOL 331: Invertebrate Zoology. 4 credits.
Survey of invertebrate phyla, excluding insects, showing morphology, phylogeny, and general biology of these groups. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 332: Insect Biology. 4 credits.
Survey of insects including taxonomy, morphology, physiology, behavior, ecology, and economic importance. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 334: Vertebrate Paleontology. 4 credits.
Vertebrate Paleontology explores the evolution of vertebrates from the early Paleozoic to Recent. The course will cover the systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions will include fishes, early tetrapods & amniotes, dinosaurs, birds and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts. A weekend field trip is included. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to GEOL 334.

Recommended Prerequisite: Any two courses from the following list: GEOL 101, GEOL 102, BIOL 103, BIOL 104, BIOL 213, BIOL U213, BIOL 310 or the permission of the instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 335: Forensic Entomology. 3 credits.
Explores the use of insects and other arthropods in field of forensic science as it pertains to the investigations of human and animal deaths and abuse, food and other product contamination, thefts, the illegal drug trade and unethical entomological practices. The use and presentation of this information from such investigations in court room proceedings will be discussed. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or U 213 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 336: Invertebrate Paleontology. 4 credits.
Classification, evolutionary trends, and distribution of common invertebrate fossils. May include field trips. Notes: May include field trips.

Offered by Biology (p. 634). May not be repeated for credit. Equivalent to GEOL 312.

Recommended Prerequisite: Either GEOL 101 and GEOL 102; or BIOL 103 and BIOL 104; or BIOL 213 or U213 and BIOL 310.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 338: Lab for Fundamentals of Ecology and Evolution. 2 credits.
This is a writing intensive experience and laboratory for transfer students who have previously taken an equivalent course to BIOL 308 that did not have a lab and did not meet the writing intensive requirements in the biology major. This course is paired with BIOL 308. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: Permission of Biology Program Director and faculty coordinator of BIOL 308.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 344: Plant Diversity and Evolution. 4 credits.
Investigates the diversity of vascular plants, including angiosperms, their evolutionary relationships, and the bases of their classification and identification. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 345: Plant Ecology. 4 credits.
Investigates the interaction of plants with their abiotic and biotic environment, native Virginian plant communities and their causes, and global processes affecting plant distributions over geological time. Notes: Three Saturday or Sunday field trips required. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 350: Freshwater Ecosystems. 4 credits.
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Lectures, field trips, and lab exercises teach physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 350.

Recommended Prerequisite: CHEM 211/ 213 and CHEM 212/214 or CHEM 155/156 and BIOL 308 or EVPP 301.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 351: Conservation Seminar. 2 credits.**
Examines key conservation issues, based on readings and discussions from the primary literature. Teaches professional development skills for scientists in conservation including fundraising, poster presentations, and interpretation of findings for diverse audiences. Develops skills for obtaining internships, jobs, or graduate positions. Offered by Biology (p. 634). May be repeated within the degree for a maximum 4 credits. Equivalent to CONS 400.

**Recommended Prerequisite:** EVPP 301 or EVPP 302 or BIOL 308 or INTS 401 (or equivalent course) or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 352: Monitoring and Assessment of Biodiversity. 4-6 credits.**
Assessment, monitoring and conservation of species and habitats. Use tools for sampling species and habitats as well as how to evaluate their effectiveness. Apply this practical, hands-on knowledge to prepare a series of reports and recommendations for future work. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to CONS 404.

**Recommended Prerequisite:** EVPP 301 or EVPP 302 or BIOL 308 or INTS 401 (or equivalent course) or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 353: Small Population Management. 4 credits.**
Investigates species vulnerability to extinction and the methodologies of preserving genetic diversity in small populations, both in the wild and in captivity. Teaches modeling and laboratory techniques that promote successful captive breeding, such as hormone analysis and assisted reproductive techniques. Examines captive species in the Smithsonian Conservation Biology Institute to learn husbandry practices and skills from keepers and biologists. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to CONS 406.

**Recommended Prerequisite:** EVPP 301 or EVPP 302 or BIOL 308 or INTS 401 (or equivalent course) or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 354: Research in Conservation. 5 credits.**
One-on-one research experience with a conservation practitioner over 5 weeks (about 36 hours per week) on a conservation research project associated with that practitioner’s program. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 301 or EVPP 302 or BIOL 308 or INTS 401 (or equivalent course) or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 355: Ecological Engineering and Ecosystem Restoration. 4 credits.**
Provides definition, classification and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration, and the utilization of natural processes to provide ecosystem services to society and benefits to nature. Provides students with a systems-oriented perspective on environmental studies. Students will study principles in general system ecology and ecological engineering and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with field microcosms/mesocosms in a newly established Wetland Mesocosm Compound on the campus. This course will involve a field trip (1-2 days). Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 211 and CHEM 213, BIOL 308 or EVPP 301, and PHYS 243.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 356: Landscape and Macrosystems Ecology. 4 credits.**
Detect and characterize patterns in landscapes. Investigate how they form and change over time, and with anthropogenic influences. Models populations and communities across landscapes, and ways of managing them to achieve goals in managing species and ecosystem processes at local, regional, and continental scales. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to CONS 405.

**Recommended Prerequisite:** (EVPP 301 and EVPP 302) or BIOL 308 or INTS 401 or equivalent course.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 357: Ecology Field Skills. 4 credits.**
In this course, you will be introduced to a variety of field techniques used in ecological research through occasional classroom lectures and intensive field activities. You start with an overview of sampling methodologies common to the discipline and progress to hands-on and remote sampling techniques for plants, insects, amphibians, reptiles, birds and mammals. You will become familiar with Virginia’s flora and fauna, gain experience in sampling and identifying representative plants, invertebrates and vertebrates, and obtain experience in making observations and characterizing ecological interactions related to population, community, and behavioral ecology. Also, you will maintain a field journal and complete a research proposal following adapted guidelines of Mason’s OSCAR program. Come to Front Royal ready to work hard and to spend long days in the field. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or BIOL 310 (or equivalent) or INTS 401

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 374: Biogeography: Space, Time, and Life. 3 credits.**
A survey of the relationship between the distribution of plants and animals on the earth surface and the physical geography and
environmental characteristics. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to GGS 321.

**Recommended Prerequisite:** One of the following: BIOL 310, GGS 122, GGS 102, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 377: Applied Ecology. 3 credits.**
Introduction to ecosystem concepts and their applications to natural and managed ecosystems. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 377.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 378: Applied Ecology Laboratory. 1 credit.**
Application of ecosystem concepts in natural and managed ecosystems. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Corequisite:** BIOL 377 or EVPP 377.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 379: RS: Ecological Sustainability. 4 credits.**
Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 378.

**Mason Core:** Capstone (p. 137)

**Specialized Designation:** Green Leaf Course, Research/Scholarship Intensive

**Recommended Prerequisite:** BIOL 308 or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 382: Introduction to Virology. 3 credits.**
An introduction to the fundamental nature of viruses, their classification, morphology, chemistry and their role in human disease. Offered by Biology (p. 634). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (BIOL 305 or L305).

**C** Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 385: Biotechnology and Genetic Engineering. 3 credits.**
Emphasizes theory and applications, including significance and societal implications of biotechnology applied to medicine, agriculture, and environment. Offered by Biology (p. 634). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** BIOL 311 or L311.

**C** Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

### 400 Level Courses

**BIOL 401: Phage Discovery. 3 credits.**
Discovery-based undergraduate research course where students purify phage from soil, use a variety of microbiology techniques, annotate phage genomes and use bioinformatics analyses. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 311 or equivalent or permission of Instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 402: Applied and Industrial Microbiology. 3 credits.**
Biology of microorganisms of ecological and industrial significance. Includes food production, spoilage and preservation, fermentation technology, waste disposal, water purification, biodeterioration, and decomposition. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213 or U213, BIOL 305 or BIOL L305 or BIOL 306 or BIOL L306, CHEM 211/213, CHEM 212/214 or permission of instructor

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 403: Techniques in Applied and Industrial Microbiology. 1 credit.**
Lab exercises illustrate basic and applied methodologies, including isolation of commercially useful strains. Discusses production and purification of industrial products. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213 or U213, BIOL 305 or L305, BIOL 306 or L306, CHEM 211/213, CHEM 212/214; BIOL 402 (concurrent enrollment is permitted) or permission of instructor

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 404: Medical Microbiology. 3 credits.**
Basic principles of infectious diseases caused by bacteria and viruses. Discusses genetics and molecular mechanisms of pathogenicity. Offered by Biology (p. 634). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: (BIOL 305\textsuperscript{C} or L305).
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 405: Microbial Genetics. 4 credits.
Study of structure and function of bacterial DNA, emphasizing mechanisms of gene transfer, expression and regulation. Introduces DNA repair, mutation, and life cycles of bacteriophage. Offered by Biology (p. 634). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (BIOL 305\textsuperscript{C} or L305) and (BIOL 306\textsuperscript{C} or L306).
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 406: Microbial Physiology and Metabolism. 4 credits.
Study of complexity and diversity of microbial physiology and metabolism with emphasis on bacteria. Nutrition, growth, transport, and anabolic and catabolic processes are emphasized. Laboratory includes quantification of cellular macromolecules, enzyme purification and kinetics, column chromatography, and bacterial responses to environmental stimuli. Offered by Biology (p. 634). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (BIOL 305\textsuperscript{C} or L305) and (BIOL 306\textsuperscript{C} or L306).
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 407: Microbial Diversity. 4 credits.
Studies effect of microorganisms on ecological and medical phenomena. Stresses evolution of microbial species, biochemical cycling, and species interactions. Laboratory stresses use of cultural, biochemical, and phylogenetic methods to study microbial isolation, metabolism, and identification. Offered by Biology (p. 634). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (BIOL 305\textsuperscript{C} or L305) and (BIOL 306\textsuperscript{C} or L306).
\textsuperscript{C} Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 408: Mushrooms, Molds and Society. 3 credits.
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 408.

Recommended Prerequisite: BIOL 213 with a grade of C or better.

Schedule Type: Research

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 412: Phage Genomics. 3 credits.
Bacteriophages, viruses that infect bacteria, are the most abundant organisms in the biosphere. This course explores the genomes of mycobacteriophages (bacteriophages that infect mycobacteria) using bioinformatics tools. In this course, two mycobacteriophage genomes will be annotated and compared to other sequenced mycobacteriophage genomes. Bioinformatics tools will be used to learn more about bacteriophage protein function, immunity and genome structure. Each student in the course will formulate a comparative genomics question and use learned bioinformatics techniques to answer that question. The results of these experiments will be conveyed in the form of a research paper and oral presentation. This class is designed to give students the opportunity to actively participate in the process of scholarship and research in addition to learning valuable genomic and bioinformatics skills. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 311 or equivalent or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 411: Advanced General Genetics. 3 credits.
Topics include quantitative genetics, extrachromosomal inheritance, and special techniques such as mutation screening, developmental genetics, cancer genetics, behavior genetics, evolutionary genetics, and ethics of genetic technology. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: C or better in BIOL 311 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 409: Medical Mycology. 3 credits.
Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 409.

Recommended Prerequisite: BIOL 213 or U213 with a grade of C or better.
BIOL 413: Histotechniques. 3 credits.
Introduces theory and methods for the preparation of tissue samples from animal or plant specimens for examination with light or electron microscopy. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 311 and permission of instructor. May not be combined with BIOL 572 for credit. For Biology majors only. Undergraduate courses in biology and chemistry or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 417: Selected Topics in Molecular and Cellular Biology. 1-4 credits.
Study of current topics in molecular and cellular biology. Lecture, laboratory. Notes: Topics vary. Offered by Biology (p. 634). May be repeated within the term for a maximum 8 credits.

Recommended Prerequisite: BIOL 311 or BIOL 482 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 418: Current Topics in Microbiology. 3 credits.
Study of current topics in microbiology. Notes: Topics vary. Offered by Biology (p. 634). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: BIOL 305 or BIOL L305.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 420: Vaccines. 3 credits.
Immunology, virology, and microbiology of vaccines. Classical and new generation vaccine practices and strategies. Current and future vaccines. Offered by Biology (p. 634). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (BIOL 305C or L305) and (BIOL 306C or L306). C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 421: Genetics of Human Diseases. 3 credits.
Emphasizes strategies used for identification of genes involved in human genetic diseases. Both monogenic and complex human genetic diseases, as well as principles of genetic screening and counseling, will be presented. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 311.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 422: Stem Cell Biology and Regenerative Medicine. 3 credits.
A broad overview of the biological principles governing stem cell populations. The functional roles stem cells play in regulating normal development and contributing to disease-state pathologies. An examination of the therapeutic potential of stem cells through "regenerative medicine." Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 311.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 423: Biology of Obesity and Weight Loss. 3 credits.
This course covers the causes and consequences of obesity and weight loss, including the general epidemiology and pathology of co-morbid conditions associated with obesity. The relative contributions of genetic and environmental factors influencing weight gain will be covered as well as recent trends in obesity research. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or U213 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 425: Human Physiology. 3 credits.
Organ system approach to study of homeostasis, including cardiovascular, respiratory, renal, digestive, endocrine, and nervous system functions. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or U213 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 426: Mechanisms of Aging. 3 credits.
A course where students will develop knowledge of cellular and molecular mechanisms which drive the systematic changes that result in aging, and to understand the overall biological processes involved in complex biological systems. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or U213 and BIOL 311 or L311 or equivalent; or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
BIOL 430: Advanced Human Anatomy and Physiology I. 4 credits.
Organ system approach to studying the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of anatomical structures and their functions of the endocrine, nervous, muscular, skeletal, and integumentary systems following introduction to the cellular and tissue levels of organization. Topics also include selected pathology for each organ system; current therapeutic interventions are addressed. Notes: Biology 124 is not approved for Biology Majors. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: 60 credits.

Registration Restrictions:
Required Prerequisite: BIOL 213C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 431: Advanced Human Anatomy and Physiology II. 4 credits.
Continued study of the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of anatomical structures and their functions of the cardiovascular, lymphatic, respiratory, urinary, digestive and reproductive organ systems. Topics also include selected disorders for each organ system to illustrate disruption of homeostasis. Offered by Biology (p. 634). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: BIOL 430C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 433: Selected Topics in Plant Biology. 1-4 credits.
Lecture or field course in botany. Topic varies with instructor’s specialty. Offered by Biology (p. 634). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: BIOL 310 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 435: Selected Topics in Biology. 4 credits.
Topics vary with instructor's specialty. Offered by Biology (p. 634). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: Permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 437: Ornthology. 4 credits.
Study of evolution, systematics, physiology, ecology and behavior of birds, emphasizing field work. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 438: Mammalogy. 4 credits.
Study of evolution, systematics, physiology, ecology and behavior of mammals, emphasizing field work. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 439: Herpetology. 4 credits.
Study of evolution, systematics, physiology, ecology and behavior of reptiles, emphasizing field work. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 440: Field Biology. 0-4 credits.
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site. May include field trips. Notes: Students bear cost of required field trips. May be repeated with permission of Biology Program. Total limit of 4 credits. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory. Offered by Biology (p. 634). May be repeated within the degree for a maximum 4 credits. Equivalent to EVPP 440.

Recommended Prerequisite: BIOL 308 or BIOL 310 or permission of instructor.

Schedule Type: Fieldwork

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 442: Urban Ecosystems and Processes. 4 credits.
Overview and introduction of challenges and opportunities that urban environments present to the plants and animals inhabiting cities and the ways that those organisms and entire ecosystems respond. Ecosystem ecology for engineered ecosystems along with reviews on urban metabolism, energy budgets, water cycles, and soil ecology taught. Creating and restoring green infrastructures is discussed. Note: the
course will involve students to design and conduct a small-scale green infrastructure experiment/project on the campus. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 442.

Recommended Prerequisite: CHEM 211 and CHEM 213 and MATH 113 or equivalent and BIOL 308 and PHYS 243 or permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 443: Tropical Ecology. 3 credits.
An introduction to the abiotic and biotic factors that define tropical habitats. The course emphasizes evolution, taxonomic diversity, and plant- animal interactions in terrestrial tropic forests. Offered by Biology (p. 634). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: BIOL 308 C or 310 C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 444: Tropical Ecology Laboratory. 1 credit.
An introduction to field-based scientific research. This course focuses on methods for testing hypotheses related to tropical plant and animal biology. Offered by Biology (p. 634). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: BIOL 308 C or 310 C.
C Requires minimum grade of C.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 446: Ecological and Evolutionary Physiology. 3 credits.
Physiological responses organisms use to survive and reproduce successfully in their ever-changing environments. Responses to temperature, salinity, low oxygen levels and diet will be covered from a phylogenetic and energetic perspective. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, and BIOL 326 or BIOL 430 and BIOL 431, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Biology.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 449: Marine Ecology. 3 credits.
Plants and animals of marine environments and physical and chemical conditions that affect their existence. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 449.

Recommended Prerequisite: BIOL 308 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 450: Marine Conservation. 3 credits.
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. The course also provides an overview of marine environmental law and policy issues related to marine conservation policy. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 421.

Recommended Prerequisite: BIOL 309 or equivalent, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 452: Immunology. 3 credits.
Topics include structure and function of immunoglobulins, role of cell-mediated immunity, protective role of immune system, and disease and injury related to malfunctions of immune system. Offered by Biology (p. 634). May not be repeated for credit.

Specialized Designation: Scholarly Inquiry

Recommended Prerequisite: BIOL 311.

Registration Restrictions:
Required Prerequisites: BIOL 213 C and (BIOL 305 C or L305) and (BIOL 306 or 306 C).
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BIOL 453: Immunology Laboratory. 1 credit.
Techniques relevant to BIOL 452, including enzyme-linked immunosorbent assay, immunodiffusion, protein electrophoresis, and immune fixation. Offered by Biology (p. 634). May not be repeated for credit.

Specialized Designation: Scholarly Inquiry

Recommended Prerequisite: BIOL 452 (concurrent enrollment is also permitted).

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
**Biol 454: Marine Mammal Biology and Conservation.** 3 credits.
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 419.

**Recommended Prerequisite:** BIOL 309 or BIOL 449 or equivalent; or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Biol 455: Marine Mammal Biology and Conservation Field Course.** 1 credit.
Provides laboratory, seminar sessions and field work to accompany BIOL 454-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. May take place in the US or abroad. The two week residential field course takes place in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 420.

**Recommended Corequisite:** EVPP 419 or 454

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Biol 457: Reproductive Strategies.** 3 credits.
Introduction to the research and evolutionary theory of sex and reproduction. Covers topics from the evolution of sex and gender to the evolution of complex reproductive strategies involving behaviors such as mate recognition, courtship displays, territoriality, polygamy, and offspring care. Lectures focus primarily on multi-cellular animals but also include discussions of unicellular prokaryotes and eukaryotes as well as plants. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 307 or 308 and 60 hours.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Biol 459: Fungi and Ecosystems.** 3 credits.
Considers impact of fungi on ecosystems in terms of biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to BIOL 559, EVPP 551.

**Recommended Prerequisite:** BIOL 308 or BIOL 310 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Biol 460: Infectious Diseases Wildlife.** 3 credits.
During this course, diseases of wildlife will be examined with emphasis on causes and mechanisms, pathobiology, ecology and epidemiology and population significance. We will explore methods of diagnosis, control, prevention and outbreak investigation as they apply to management and conservation of wildlife populations. Also, diseases crossing species barriers will be examined. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to EVPP 460.

**Recommended Prerequisite:** 60 credits and BIOL 308 or EVPP 301 or permission of the instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Biol 465: Histology.** 4 credits.
Microscopic structure of animal tissues and organs, with emphasis on vertebrates. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or 310.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Biol 468: Vertebrate Natural History.** 4 credits.
Introduces vertebrates with emphasis on systematic, evolution, life history, behavior and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or permission of the instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Biol 470: Dinosaur Biology.** 3 credits.
Introduction to the evolution, diversity, and biology of the dinosaurs and their descendants. Emphasis on how current biological knowledge is used to estimate and inter the morphology, physiology and ecology of these extinct animals. Offered by Biology (p. 634). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or BIOL 310 or permission of instructor.

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Biol 471: Evolution.** 3 credits.
Process of evolution emphasizing role of genetics, properties of populations, and population differentiations. Offered by Biology (p. 634). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** (BIOL 308$^C$).

$^C$ Requires minimum grade of C.
Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

B I O L  4 7 2 :  I n t r o d u c t o r y  A n i m a l  B e h a v i o r .  3  c r e d i t s .
Study of mechanisms, functions, and evolution of behavior. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

B I O L  4 7 3 :  I n t r o d u c t o r y  L a b o r a t o r y  i n  A n i m a l  B e h a v i o r .  1 c r e d i t .
Field or laboratory study in animal behavior with emphasis on mechanisms, functions, and evolution of behavior. Stresses experimental design and analysis of data. Writing-intensive laboratory. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 472 (concurrent enrollment also permitted).

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

B I O L  4 8 0 :  T h e  D i v e r s i t y  o f  F i s h e s .  3 c r e d i t s .
This course delves into the biology and ecology of fishes. Subjects of this class include fish anatomy, taxonomy, evolution, habitat adaptations, community dynamics, and ecosystem interactions. The course will also touch on human impacts on fishes, and conservation. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 309, BIOL 310, and BIOL 350/EVPP 350.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

B I O L  4 8 2 :  I n t r o d u c t i o n  t o  M o l e c u l a r  G e n e t i c s .  3 c r e d i t s .
Basic concepts of structure and function of genetic material at molecular level. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or U213, BIOL 311 or L311 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

B I O L  4 8 3 :  G e n e r a l  B i o c h e m i s t r y .  4 c r e d i t s .

Registration Restrictions:
Required Prerequisites: (BIOL 213C or U213C) and (CHEM 313C or L313C).

C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

B I O L  4 8 4 :  C e l l  S i g n a l i n g  a n d  D i s e a s e .  3 c r e d i t s .
Expands on the key concepts of eukaryotic cell biology including the cell cycle, the cytoskeleton, cellular transport, the membrane and protein trafficking and cellular signaling. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 483 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

B I O L  4 8 5 :  C e l l  S i g n a l i n g  L a b o r a t o r y .  2-3 c r e d i t s .
Introduction research method application via techniques of cellular and molecular biology including: tissue culture, western blotting, PCR, microscopy, cellular transfection and transformation. Offered by Biology (p. 634). May not be repeated for credit. Equivalent to BIOL 585.

Recommended Prerequisite: BIOL 484 or permission of instructor.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

B I O L  4 8 6 :  M o l e c u l a r  B i o l o g y  a n d  B i o t e c h n o l o g y  L a b o r a t o r y .  2 c r e d i t s .
Introduction to theory, techniques, and practices used in modern molecular biotechnology laboratories. Offered by Biology (p. 634). May not be repeated for credit.

Recommended Prerequisite: BIOL 385 or BIOL 482.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

B I O L  4 8 9 :  T e a c h i n g  P r a c t i c u m .  1-3 c r e d i t s .
Student gains teaching experience in a lecture, laboratory or field environment under the supervision of a faculty member. Student responsibilities may include a lecturing component, but may also include lab preparation, design of course materials, tutoring and grading. Course may be repeated once. Offered by Biology (p. 634). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: BIOL 213 or U213, 311 or L311, 60 credit hours and permission of instructor, course coordinator (where applicable) and Program Director.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

B I O L  4 9 2 :  S e n i o r  S e m i n a r .  1 c r e d i t .
Weekly seminar course dealing with recent advances in biology. Topics selected from recent publications in the field. May be repeated for credit.
Offered by Biology (p. 634). May be repeated within the degree for a maximum 2 credits.

**Recommended Prerequisite:** BIOL 311 and 90 credit hours, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biology.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**BIOL 493: Honors Research in Biology.** 1-2 credits.
Laboratory of field investigation under guidance of faculty member.
Notes: Total limit for BIOL 493, 495 and 497 is 8 credits toward the 44 credit hours required for the Biology BS degree and only 4 credits toward the 32 hours required for the BA degree. Combined 493, 495 and 497 may not exceed 4 credit hours in any one semester. Offered by Biology (p. 634). May be repeated within the degree for a maximum 2 credits.

**Recommended Prerequisite:** Admission to the Biology Honors Program, permission of instructor and Biology Program Director.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biology.

Enrollment limited to students in the College of Science College.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 494: Honors Seminar in Biology.** 1 credit.
Weekly seminar course dealing with recent advances in biology. Notes: Topics selected from recent publications in field. Offered by Biology (p. 634). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Acceptance into Biology honors program and permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 495: Directed Studies in Biology.** 1-3 credits.
Study of a topic not otherwise available to student. May involve reading assignments, tutorials, lectures, papers, presentations, or field or laboratory study, determined in consultation with instructor. May be taken for 1 to 3 credits and repeated once for a total of 3 credits. Total limit for combination of 495 and 497 is 6 credits toward 44 credits for BS and 4 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory. Offered by Biology (p. 634). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Permission of instructor and Biology Program Director.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 497: Special Problems in Biology.** 1-4 credits.
Lab or field project leading to written report of research. Research and paper completed under instructor’s guidance. Notes: Total limit for 495 and 497 combined is 6 credits toward the 44 credits required for BS and 4 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory. Offered by Biology (p. 634). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 60 credits and permission of instructor and chair.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 498: Research Seminar.** 2 credits.
Seminar discussing current scientific literature and literature related to research project undertaken by student as part of the research semester. Note: Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director and is limited to students who are enrolled concurrently in BIOL 499. For students in the Biology Honors Program, this course may be used to substitute for one credit of BIOL 494: Honors Seminar in Biology. Offered by Biology (p. 634). May not be repeated for credit.

**Specialized Designation:** Research Associated

**Recommended Prerequisite:** BIOL 213 or U213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311 or L311, CHEM 211/213-212/214; Completion of Biology core recommended.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**BIOL 499: RS: Research in Biology.** 6-9 credits.
Laboratory or field investigation under faculty guidance. Students will earn 6-9 credits toward the BA or BS degrees in Biology. Note: Must be enrolled in Biology Research Semester. Registration requires successful application and approval by Biology Program and faculty sponsor. Student receiving 9 credits for 499 will not be allowed to use BIOL 440, BIOL 495 and/or 497 neither toward the 32 BIOL hours needed for the BA degree, nor toward the 44 BIOL hours needed for the BS degree. This course will satisfy one upper division laboratory requirement for both the BA and BS degrees in Biology. Offered by Biology (p. 634). May not be repeated for credit.

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** BIOL 213 or U213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311 or L311, CHEM 211/213-212/214; Completion of Biology core recommended.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
500 Level Courses

BIOL 501: Microbial Diversity: An Organismal Approach. 3 credits.
In-depth study of nonpathogenic microbial world, emphasizing detection, enumeration, and classification of microorganisms; their physiological and evolutionary relationships; and biotechnological applications. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: An undergraduate course in microbiology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 506: Selected Topics in Microbiology. 1-4 credits.
Topic depends on instructor's specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: BIOL 305 or L305 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 507: Selected Topics in Ecology. 0-4 credits.
Topic depends on instructor’s specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: Course in Ecology and permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 508: Selected Topics in Animal Biology. 1-4 credits.
Topic depends on instructor’s specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: BIOL 303 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 509: DNA Analysis of Biological Evidence. 3 credits.
Historical development of DNA profiling methods, current DNA typing techniques and the ongoing development of new forensic DNA typing methods. Emphasis will be placed on various analytical techniques used in the analysis of forensic evidence. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 311 or permission of instructor

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 510: Forensic DNA Analysis Laboratory. 1 credit.
Provides hands-on experience with the methodologies of forensic DNA analysis. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 311

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 515: Developmental Neurobiology. 3 credits.
Introduction to developmental neurobiology with overview of embryological development of the nervous system. Topics include neural induction, patterning/cell fate specification, and neural circuit assembly together with modern molecular methods for exploring neural development. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: Completion of 60 hours, including PSYC 372 or BIOL 213 or BIOL U213 and BIOL 310.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 516: Mammalian Neurobiology. 3 credits.
Functional anatomy of mammal brains emphasizing regional and systems neuroanatomy of humans. Correlates with material from clinical neurology, where possible. Laboratory component includes brain dissections and clinical correlations. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to PSYC 531.

Recommended Prerequisite: BIOL 515.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 518: Conservation Biology. 3 credits.
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 307 and BIOL 311 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Additional Course Details: Title varies by section and/or semester

BIOL 532: Animal Behavior. 3 credits.
Ecological aspects of animal behavior. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 324 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 533: Selected Topics in Plant Biology. 1-4 credits.
Topic depends on instructor's specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: Course in plant biology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

BIOL 537: Ornithology. 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: Course in Ecology, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
BIOL 538: Mammalogy. 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing field work. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 538.

Recommended Prerequisite: Course in ecology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 539: Herpetology. 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: Course in ecology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 543: Tropical Ecosystems. 4 credits.
Terrestrial, aquatic, and marine ecosystems in tropics, emphasizing plant communities, plant-animal interactions, and role of humans in the tropics. Notes: Field trip to tropics required as part of laboratory. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 543.

Recommended Prerequisite: General Chemistry and a course in ecology.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 550: Waterscape Ecology and Management. 3 credits.
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 550.

Recommended Prerequisite: BIOL 452 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 553: Advanced Topics in Immunology. 3 credits.
Comprehensive study of immunologic mechanisms as they pertain to immunologic diseases and transplantation. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: BIOL 452 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 555: Lab in Waterscape Ecology. 1 credit.
Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 555.

Recommended Prerequisite: BIOL 550 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 556: Advanced Topics in Microbial Physiology and Metabolism. 3 credits.
Comprehensive study of microorganisms including growth, nutrition, transport, autotrophic and heterotrophic metabolism, regulation, and differentiation. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 305 or L305 and 306 or L306 or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 559: Fungi and Ecosystems. 3 credits.
Considers impact of fungi on ecosystems in terms of their effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to BIOL 459.

Recommended Prerequisite: BIOL 304 and/or a course in microbiology or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

BIOL 561: Comparative Animal Physiology. 3 credits.
Detailed study of selected physiological systems of invertebrates and vertebrates, emphasizing current research. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 326 or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

BIOL 562: Personalized Medicine. 3 credits.
Covers basic principles of molecular medicine, including the definition and the need for individualized diagnostics and therapeutics. Students will study the application of proteomics, genomics and bioinformatics as they relate to individualized therapy, and review the major advances in these fields which have relevance to molecular medicine of the future. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: Advanced undergraduate coursework in Genetics and Molecular Cell Biology.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduation Deadline Extended, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

BIOL 563: Virology. 3 credits.
Fundamental concepts of nature of viruses, virus classification, cultivation, and biochemistry. Emphasizes bacteriophage and animal viruses. Offered by School of Systems Biology (p. 775). May not be repeated for credit.
Recommended Prerequisite: BIOL 482 or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

BIOL 564: Techniques in Virology. 2 credits.
Basic techniques of animal virus propagation, isolation, and quantitation. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 563 (concurrent enrollment is also permitted) or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

BIOL 566: Cancer Genomics. 3 credits.
Review of modern concepts in cancer biology including taxonomy of human tumors, common cancer syndromes, and genome instability. Genetic and molecular studies of tumor cell proliferation, migration, invasion, and death. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: A course in genetics or biochemistry.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

BIOL 572: Human Genetics. 3 credits.
Inheritance of humans emphasizing current problems, including genetic control of metabolic diseases, effects of radiation and chemical agents in environment, and directed genetic change. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 311 or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

BIOL 573: Developmental Genetics. 3 credits.
Genetic approaches to problem of eukaryotic development, emphasizing current research on regulation of gene enzyme systems. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 311 or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

BIOL 574: Population Genetics. 3 credits.
Genetic structure and dynamics of populations, both real and ideal. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 482 or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

BIOL 568: Advanced Topics in Molecular Genetics. 3 credits.
Comprehensive study of regulatory mechanisms controlling gene expression in viruses, prokaryotes, and eukaryotes, emphasizing current research. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 6 credits. Equivalent to BIOL 668.
Recommended Prerequisite: BIOL 308 and 311, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 575: Selected Topics in Genetics. 1-4 credits.
Different topics in different years, including molecular, developmental, physiological, and classical genetics, emphasizing current problems and research. Notes: May be repeated once with permission of department chair. Offered by School of Systems Biology (p. 775). May be repeated within the term for a maximum 8 credits.

Recommended Prerequisite: BIOL 311, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 577: Biogeochemistry: A Global Perspective. 3 credits.
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and their integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 307, CHEM 211, 212 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 578: Mutation, DNA Repair, and Environmental Contamination. 3 credits.
Overview of relationship between environmental contamination and genetic damage. Covers types of contamination that result in mutations, and molecular mechanisms of DNA damage and repair. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 307 and 311.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 579: Molecular Evolution and Conservation Genetics. 3 credits.
Evolution of genes and gene families at molecular level, including gene duplication and divergence, positive and negative selection, genetic drift, and molecular clocks. Also includes selected applications in conservation genetics, such as molecular phylogenetics and estimates of population size. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 311.

Recommended Corequisite: BIOL 471, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 580: Computer Applications for the Life Sciences. 3 credits.
Studies computer use in biological sciences. Combines lectures, supervised exercises on mainframe and microcomputers. Students present seminars on advanced application and complete project using computers to fulfill a major assignment associated with another course or employment. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: 12 hours of biology and one year of college mathematics, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOL 581: Estuarine and Coastal Ecology.** 3 credits.
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 581.

**Recommended Prerequisite:** Course in ecology and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOL 582: Estuarine and Coastal Ecology Laboratory.** 1 credit.
Continues EVPP 546/BIOL 546 as the laboratory section focusing on the approach and methods of estuarine research, including analysis and communication of results. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 582.

**Recommended Corequisite:** BIOL 581 or EVPP 581.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOL 583: General Biochemistry.** 4 credits.
Structure and function of proteins, carbohydrates and lipids, enzymology, and metabolism and its controls. Emphasizes chemistry of nitrogen compounds. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to BIOL 483.

**Recommended Prerequisite:** BIOL 213 or BIOL U213, CHEM 313 or CHEM L313, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOL 591: Special Topics.** 1-6 credits.
Offered by School of Systems Biology (p. 775). May be repeated within the degree.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

600 Level Courses

BIOL 607: Fundamentals of Ecology. 3 credits.
Overview of concepts in physiological, population, community, and ecosystem ecology. Restricted to graduate students with little or no background in ecology. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 607.

Recommended Prerequisite: Permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 608: Topics in Biology. 1-4 credits.
In-service course to strengthen and update teacher’s knowledge of biology. Topics include organismal biology, cell biology, ecology, microbiology, or genetics. Notes: Not available for credit toward MS in biology, or PhD in environmental science and public policy. May be repeated for credit with permission of department chair. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Employment or anticipated employment as a science teacher.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 643: Microbial Ecology. 4 credits.
Study of relationships between microorganisms and their natural environment, and methodology for observing their natural environment and biochemical activities in that environment. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 643.

Recommended Prerequisite: Course in microbiology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 644: Wetland Ecology and Management. 4 credits.
Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: CHEM 211, 212, BIOL 307, PHYS 106 and 107 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 645: Freshwater Ecology. 3 credits.
Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: EVPP 550 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 648: Population Ecology. 3 credits.
Survey of ecological models and theory. Topics include population growth and regulation; competition; predator-prey, herbivore-plant, and parasite-host interactions; mutualism; and metapopulation ecology. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 648.

Recommended Prerequisite: Course in ecology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 649: Biological Resource Management. 3 credits.
Applies modern ecological theories and methods to biological resource management in developing and developed countries. Explores problems in achieving optimum productivity of specific resources and application of systems analysis. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: Course in ecology, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 650: Environment Analysis and Modeling. 4 credits.
Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 650.

Recommended Prerequisite: 8 hours of ecology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 665: Environmental Hazards to Human Health. 3 credits.
Health effects of chemical contaminants of air, water, and food resulting from industrialized society. Includes identifying, evaluating, and controlling hazards. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: Courses in animal physiology and organic chemistry, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**BIOL 665: Human Genetics Concepts for Health Care.** 3 credits.
Principles of genetically determined diseases with emphasis on clinical aspects of these diseases, genetic counseling, and laboratory methods used in human genetics. Extended studies students preparing to enter medical or dental school are welcome. Notes: Course in cell or molecular biology. Not available to students who have taken BIOL 572. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** BS degree or enrollment in accelerated MS program. Course in cell or molecular biology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOL 666: Advanced Techniques in Molecular Biology.** 4 credits.
Experimental studies using current methods for purification and characterization of biologically important compounds. Provides training for research in molecular biology. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** BIOL 568 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOL 668: Pathogenic Microbiology.** 3 credits.
Molecular mechanisms of bacterial pathogenicity and immune response in infectious diseases. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Courses in microbiology and biochemistry.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOL 675: Aerosol Biology.** 4 credits.
Provides students with familiarity with the state of the art aerosol equipment and techniques used in laboratory-based research pertaining to biomedical warfare or terrorism threats. Emphasis will be placed on biosafety procedures, techniques, and equipment used in conducting experiments with infectious organisms in a contained environment. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate courses in physics, math, and microbiology, and permission of the Director of the Center for Biodefense.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOL 678: Cell-Based Assays.** 2 credits.
Focus on 1) basics of eukaryotic cell culture; 2) various cell based assay techniques; 3) Real-Time PCR based functional analysis of the signaling pathways. Students will maintain their cell cultures for the duration of the experiments, perform at least one functional assay and analyze the resultant data. Students are expected to learn the properties and limitations of each cell based assay and should be able to explain their results regardless of the outcome. Each student will be responsible for submitting a written report summarizing the design of their experiments and its results. Each report will include the following sections: Introduction, Methods, Results and Discussion, and a special Troubleshooting section. Notes: A lab fee of $300 will be charged per student for lab supplies. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Permission of Instructor. 400-level coursework in cell or molecular biology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment limited to students in the SC-MS-BCB, SC-MS-BIOL or SC-NDG-UNDE programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
BIOL 680: Experimental Design and Analysis for the Life Sciences. 4 credits. Advanced course in applying probability and statistics to research in life sciences. Examples drawn from environmental, medical, physiological, genetic, and chemical biology. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: Course in biostatistics or permission of instructor.

Registration Restrictions: 
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 682: Advanced Eukaryotic Cell Biology. 3 credits. Structure and function of biomembranes, cytoskeleton, and transport systems. Also discusses protein trafficking, cell cycle, and cell adhesion molecules. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 483, CHEM 313, CHEM 314, or permission of instructor.

Registration Restrictions: 
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Biology or Biosciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 685: Emerging Infectious Diseases. 3 credits. Students will gain an understanding of the pathogenesis of emerging and/or re-emerging infectious diseases in terms of immune response and systemic alterations. Factors contributing to emergence and virulence for each pathogen will be emphasized. Epidemiology, disease progression, treatment strategies and/or control measures of identified emerging infectious diseases will be discussed. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: BIOL 213 or U213 and 311 or L311, 482 or equivalent; or permission of instructor.

Registration Restrictions: 
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 690: Introduction to Graduate Studies in Biology. 1-2 credits. Required of all new MS students in biology. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Registration Restrictions: 
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 691: Current Topics in Biology. 1-4 credits. Study of current topics in biology as determined by instructor. Topics vary and center on emerging areas of investigation in the biological sciences. Offered by School of Systems Biology (p. 775). May be repeated within the term for a maximum 8 credits.

Registration Restrictions: 
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOL 692: Seminar in Biology. 1 credit. Topics vary. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 2 credits.

Registration Restrictions: 
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester
BIOL 693: Directed Studies in Biology. 1-8 credits.
Study of topic not otherwise available in graduate program. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or laboratory or field study, determined in consultation with instructor. Notes: May not be used to fulfill explicit undergraduate prerequisites for graduate work. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 8 credits.

Recommended Prerequisite: Permission of instructor and graduate committee.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

Grading:
This course is graded on the Graduate Special scale. (p. 82)

BIOL 695: Seminar in Molecular, Microbial, and Cellular Biology. 1 credit.
Review and discussion of recent literature in specialized area. Includes student presentations. Offered by School of Systems Biology (p. 775). May be repeated within the term for a maximum 2 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses

BIOL 715: Microbial Physiology. 3 credits.
Comprehensive study of functioning of microbial cells, with emphasis on pathogens. Stresses growth, transport, cell-to-cell signaling, biofilm formation, antibiotic resistance, and secondary metabolites. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: An undergraduate lecture/lab course in microbiology, and a course in biochemistry.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 718: Techniques in Microbial Pathogenesis. 3 credits.
Laboratory-based class in which students perform current techniques in microbial pathogenesis. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD biosciences program, the MS biology program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 720: Microbial Metabolism. 3 credits.
Discussions of catabolic and anabolic pathways of bacterial pathogens and regulation and integration of these pathways. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: An undergraduate lecture/lab course in microbiology and a course in biochemistry.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 745: Environmental Toxicology. 3 credits.
Study of nature, distribution, and interaction of toxic chemicals released into the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and implications for government regulation. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 745.

Recommended Prerequisite: Courses in ecology and physiology, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOL 793: Research in Biology. 1-3 credits.
Library, laboratory, or field investigation under supervisor’s guidance. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: 8 hours of graduate hours in BIOL and permission of instructor and chair.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**BIOL 798: Master's Research Project.** 1-3 credits.
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Comprehensive report acceptable to student’s advisory committee is required. Notes: Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 798. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor and chair.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**BIOL 799:** Thesis. 1-6 credits.
Thesis research under direction of supervisor. Notes: Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 799. Offered by School of Systems Biology (p. 775). May be repeated within the degree.

**Recommended Prerequisite:** 8 graduate hours in BIOL and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

---

**Biomedical Sciences (BMED)**

**500 Level Courses**

**BMED 550: Special Topics in Biomedicine.** 2 credits.
This course presents various topics in biomedicine in a lecture/seminar format. Students build on the ABS Certificate curriculum to enhance their understanding of biomedical issues and better prepare for careers in the health professions. Offered by College of Science (p. 608). May not be repeated for credit.

**Recommended Prerequisite:** Successful completion of first semester of the ABS Certificate curriculum (Biochemistry, Biostatistics, Histology).

**Recommended Corequisite:** Spring ABS Certificate courses (Human Anatomy, Human Physiology).

**Registration Restrictions:**
Enrollment limited to students in the SC-CERG-ABS program.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

---

**600 Level Courses**

**BMED 601: Cell and Molecular Physiology.** 4 credits.
Principles of biochemistry and cell signaling and current concepts regarding physiological processes at the cellular and molecular levels. Offered by College of Science (p. 608). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 602: Biomedical Statistics.** 3 credits.
Basic principles of biostatistics and epidemiology in theoretical and practical context including: exploring and displaying data appropriately, exploring relationships between two variables, issues of gathering sample data, and understanding randomness and probability. Offered by College of Science (p. 608). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 603: Cell Biology and Microscopic Anatomy.** 3 credits.
Examines basic histological techniques, ultrastructure of the cell, basic tissue types and histology of specific organ systems. Structure-functional and clinical correlations are described. Offered by College of Science (p. 608). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 604:** Fundamentals of Human Physiology. 5 credits.
Essential concepts of physiology and mechanisms of body function are presented at various levels of organization, ranging from cellular and molecular to tissue and organ system levels. Emphasis is placed on understanding the integrated regulation of various body processes among the major systems. Offered by College of Science (p. 608). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 605:** Introduction to Human Anatomy. 3 credits.
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities. Offered by College of Science (p. 608). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 610:** Principles of Systems Biology. 2 credits.
Students will build on their knowledge of cellular and molecular biology, genetics, and physiology to understand how these components combine to give rise to complex systems function found in biology. Offered by College of Science (p. 608). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Biomedical Sciences master's degree.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 611:** Molecular Genetics. 2 credits.
Students will build on their knowledge of molecular biology and genetics to understand how these components' functions are altered during the inception and course of human disease. Offered by College of Science (p. 608). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Biomedical Sciences master's degree.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 612:** Principles of Gross Anatomy. 1 credit.
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities. Offered by College of Science (p. 608). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Biomedical Science's master's program

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 613:** Pathophysiology. 3 credits.
Students build on knowledge of physiologic principles and apply the information to pathologic conditions. A higher understanding of the molecular and genetic basis of pathology will be developed as the mechanisms of disease are studied. Offered by College of Science (p. 608). May not be repeated for credit.
**Recommended Prerequisite:** Admission to Biomedical Sciences master’s program

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 614: Introduction to Neuroscience.** 3 credits.
Achieve specific knowledge of the developmental and evolutionary aspects of the nervous system, to introduce systems neurobiology through study of the visual system and motor system pathways. Offered by College of Science (p. 608). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Biomedical Science’s master’s program

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 651: Physician and Society.** 1 credit.
Seminar series explores the cultural, social, economic and ethical factors that affect the practice of medicine in the 21st century. Offered by College of Science (p. 608). May be repeated within the degree for a maximum 2 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 660: Molecular and Cellular Physiology.** 3 credits.
Biochemistry and physiology of the typical cell. The biochemical focus will be on the fundamentals of the forces affecting molecular interactions, the structure-function relationships of proteins and carbohydrates, kinetics and catalysis, and high-throughput analysis of proteins in clinical samples. The physiological focus will be on the structure and function of subcellular organelles, and the foundations of some specialized cells blood and lymphoid cells, muscle cells, and nerve cells. Offered by College of Science (p. 608). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Biomedical Sciences master’s program

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 652: Biomedical Career Pathways.** 1 credit.
Series of workshops, presentations and field trips. Students will learn study and interview skills to become better prepared to complete AMCAS and secondary applications to medical schools. Offered by College of Science (p. 608). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Biomedical Sciences master’s program

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences or Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**BMED 653: Forum and Research.** 3 credits.
Bi-weekly seminar-style presentations and reading assignments, followed by short student reports, followed by a small group discussions on topics of current interest. Students will prepare a detailed research paper on a topic related to one of the forum topics. Offered by College of Science (p. 608). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Biomedical Sciences master’s degree

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMED 660: Molecular and Cellular Physiology.** 3 credits.
Biochemistry and physiology of the typical cell. The biochemical focus will be on the fundamentals of the forces affecting molecular interactions, the structure-function relationships of proteins and carbohydrates, kinetics and catalysis, and high-throughput analysis of proteins in clinical samples. The physiological focus will be on the structure and function of subcellular organelles, and the foundations of some specialized cells blood and lymphoid cells, muscle cells, and nerve cells. Offered by College of Science (p. 608). May not be repeated for credit.

**Recommended Prerequisite:** Admission to Biomedical Sciences master’s program

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
BIOS 661: Metabolism, Nutrition and Endocrinology. 4 credits.
Students will learn the pathways involved in energy metabolism, biosynthesis, and catabolism of waste products in preparation for excretion. Major emphasis will be on the coordination of metabolic pathways in the major organs and tissues through hormonal regulation. Offered by College of Science (p. 608). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BMED 662: Cardiopulmonary Biology. 1-5 credits.
Anatomy, hemodynamic function, and electrophysiology of the cardiovascular and respiratory system. Offered by College of Science (p. 608). May be repeated within the degree for a maximum 5 credits.

Recommended Prerequisite: Admission to the Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Special scale. (p. 82)

BMED 663: Gastrointestinal Biology. 2 credits.
Embryologic development, gross and micro-anatomy, and physiologic function of the GI tract. Emphasis will be placed on understanding the integrated regulation of GI processes. Offered by College of Science (p. 608). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BMED 664: Renal Biology. 2 credits.
Structural, functional and integrative aspects of the kidney and urinary system; identify the basic physiologic mechanisms that underpin renal function; and explain the role the kidney plays in fluid and electrolyte homeostasis, including acid-base balance. Offered by College of Science (p. 608). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BMED 665: Sexual Development and Reproduction. 3 credits.
Cellular and anatomical components of reproduction and early development. These components include the development of the reproductive track, development of gametes, fertilization, and formation of the germ layers and endocrinology of the system. Offered by College of Science (p. 608). May not be repeated for credit.

Recommended Prerequisite: Admission to Biomedical Sciences master’s program

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Biosciences (BIOS)

700 Level Courses
BIOS 701: Systems Biology. 3 credits.
Introduces biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Readings include articles from current literature in molecular biosciences. Application of molecular techniques within biosciences is now universal, and the underlying question remains “What is the structure of a cell, and how does it
Recommended Prerequisite: General Biochemistry.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOS 702: Research Methods. 3 credits.
Trains students in research methodologies, techniques, and data analysis in life sciences. Divided into three modules that introduce separate but equally significant components of any research project: parameters required to outline and synthesize a problem, techniques of measurement and analysis used by life scientists, and approaches for data analysis and interpretations. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD program in Biosciences

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOS 703: Laboratory Rotation. 3 credits.
Intensive introduction to research laboratory in biosciences. Students read background material pertinent to problem under study, learn and practice research methods of laboratory, and formulate short final project that may be proposal or actual project, demonstrating some mastery of techniques and approaches employed. Notes: Should be repeated three times (except by permission of concentration director). Offered by School of Systems Biology (p. 775). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission to the PhD program in Biosciences.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory
Grading:
This course is graded on the Graduate Special scale. (p. 82)

BIOS 704: Topics in Biosciences. 1 credit.
Combines invited seminars from internal and external faculty with graduate student seminars. Seminar presentation required for advancement to candidacy, generally given in last semester before candidacy. Includes discussion section led by course coordinator. Notes: Required of all students during each semester prior to advancement to candidacy. Should be repeated three times (except by permission of concentration director). Offered by School of Systems Biology (p. 775). May be repeated within the term for a maximum 3 credits.

Recommended Prerequisite: Admission to the PhD program in Biosciences.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOS 710: Current Topics in Bioscience. 1-3 credits.
Studies current topic in biosciences. Notes: Topics vary. May be repeated for credit with permission of concentration director. Offered by School of Systems Biology (p. 775). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission to the PhD program in biosciences or to the MS program in biology.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

BIOS 715: Molecular Ecology. 3 credits.
Introduces students to basic concepts of molecular biology, genetics, molecular evolution, bioinformatics, NextGen Sequencing and Technology. Students should have prior background in genetics and evolution. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 515.

Recommended Prerequisite: Undergraduate course in Genetics and Chemistry or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

BIOS 716: Methods in Evolutionary Biology. 4 credits.
Intended for students who plan to do research in Molecular Ecology, Molecular Evolution, Conservation Genetics, Genomics or Biocomplexity. The lecture reviews basic concepts while the lab provides students the opportunity to experience the detailed protocols necessary for research in molecular biology. The course integrates theory, protocols, analysis and interpretations. Offered by School of Systems Biology (p. 775). May not be repeated for credit. Equivalent to EVPP 782.
bioinformatics. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** BIOS 715 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 719: Extremophiles.** 5 credits.
Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 740: Laboratory Methods in Functional Genomics and Biotechnology.** 3 credits.
Current laboratory techniques in molecular biology and genomics, including nucleic acid isolation, gene cloning and sequencing, gel blot analysis, PCR, in vitro mutagenesis, and theory and practice of DNA microarray analysis of gene expression. Topics may vary from year to year depending on advances in field. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Graduate standing and undergraduate courses in genetics and molecular biology.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 741: Genomics.** 3 credits.
Genetic structure and function at whole genome level. Includes some sequence analysis, comparative genomics, classical genetics, and developmental genetics, as well as analysis of synteny groups, isochores, gene families, genetic complexity, C value paradox, directed discovery of gene functions, and animal models of human disease. Readings from recent texts and primary research literature. Students expected to give one or two oral presentations of primary research papers, as well as complete midterm and final exams. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** At least one undergraduate course in genetics and molecular biology, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 742: Biotechnology.** 3 credits.
Theory and applications of biotechnology. Includes promoter design, gene fusions, protein targeting, techniques of protein purification, construction of transgenic organisms, cloning of animals and plants, ethical and legal issues. This is a relatively new area of study that is rapidly changing; course strives to keep students abreast of current literature. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate coursework in genetics and molecular biology.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 743: Genomics, Proteomics, and Bioinformatics.** 3 credits.
Fundamental methods for analyzing genomic and proteomic data, including nucleic acid and protein sequences, pair-wise and multiple alignment, database search methods, clustering and presentation of data, prediction modeling, and survey of available software and freeware tools. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD program in biosciences or to MS program in biology.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 744: Molecular Genetics.** 3 credits.
Develops understanding of principles of modern molecular genetics and methods of investigation of genomes of pro- and eukaryotes, including types of genetic manipulations conducted in research laboratories today. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate coursework including BIOL 311; CHEM 313, 314, 315, and 318; equivalents; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 760:** *Seminar in Molecular Systematics*. 1-3 credits.
Presentations and discussion by students and faculty of research papers and projects. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 761:** *Dispersal Patterns of Biological Agents*. 3 credits.
Introduces military and terrorist methods of dispersal patterns. Covers physics of aerosols, engineering and mechanics of building ventilation systems, and mechanical dissemination including handheld, automatic, vehicle, and truck-mounted systems. Also covers viability of specific agents involved. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD Biosciences program or MS/Biology program, and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 762:** *Phylogenetic Analysis*. 4 credits.
A consideration of molecular systematics techniques in biology, especially cladistics and phenetics methods. Species concepts, biological nomenclature, and classifications will also be discussed. Laboratory will emphasize phylogenetic methods using online sources of comparative data. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 765:** *Molecular Systematics*. 4 credits.
Comparative evolutionary techniques applied to molecular data. Use of molecular techniques, molecular databases, and analytical techniques will be covered. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 767:** *Molecular Evolution*. 3 credits.
A review of the diversity and organization of genomes and evolutionary processes that operate at the molecular level. Emphasis will be placed on processes of molecular evolution and techniques used to analyze these processes. Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BIOS 782:** *Interdisciplinary Issues in Bioethics: Law and Policy*. 3 credits.
Offered by School of Systems Biology (p. 775). May not be repeated for credit.

**Recommended Prerequisite:** BIOS 780 and 781.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**800 Level Courses**

**BIOS 898:** *Directed Studies in Biosciences*. 1-12 credits.
Studies of specialized topics in biosciences. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, or tutorials. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 24 credits.

**Recommended Prerequisite:** Permission of Research Advisor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**BIOS 899:** *Directed Research in Biosciences*. 1-12 credits.
Research on a pertinent topic in biosciences. Scope and subject of research to be determined by instructor. Offered by School of Systems Biology (p. 775). May be repeated within the degree for a maximum 24 credits.
BUS 100: Business and Society. 3 credits.
Provides students with a foundation for understanding the role of business in society by exploring the nature and history of business enterprise, the social context of business, and the interaction of individuals with business by selecting current events in business and analyzing the content as well as the impact of the reported activities. Offered by School of Business (p. 877). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 137)

Recommended Prerequisite: Degree status.

Registration Restrictions:
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BUS 103: Develop Professional Skills I: Foundational Elements. 3 credits.
Students will investigate and develop their professional skill set. Topics include introduction to the business school and business world, what it means to be professional, how to consume the business press, and how to research business issues. Develop professional writing and presentation skills, explore career options and the job search process, and develop personal educational and professional development plans. Offered by School of Business (p. 877). May not be repeated for credit.

Registration Restrictions:
Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

200 Level Courses

BUS 200: Global Environment of Business. 3 credits.
As world becomes increasingly connected, business serves as core institution that mediates relations between individuals across national boundaries. Provides overview of global environment of business through study of political economy, international institutions and international trade theories, and global conflicts and cooperation around issues (natural resources, labor, human rights, distribution of income, and the environment). Addresses implications of topics for business. Designated a Green Leaf Course. Offered by School of Business (p. 877). May not be repeated for credit.

Mason Core: Global Understanding, Encore:Sustainability (p. 137)

Specialized Designation: Green Leaf Course

Registration Restrictions:
Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BUS 210: Business Analytics I. 3 credits.
Course introduces business analytics and why businesses use analytics to create and sustain competitive advantage. Topics include data types, summarization and graphical display of data, application of basic probability rules, and probability distributions. Introduces fundamentals of spreadsheets and their use in business applications. Learn how to apply appropriate analytical tools to gain useful insights from real-life datasets. Offered by School of Business (p. 877). May not be repeated for credit.

Registration Restrictions:
Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Business (BUS)

100 Level Courses

BUS 100: Business and Society. 3 credits.
Provides students with a foundation for understanding the role of business in society by exploring the nature and history of business enterprise, the social context of business, and the interaction of individuals with business by selecting current events in business and analyzing the content as well as the impact of the reported activities. Offered by School of Business (p. 877). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 137)

Recommended Prerequisite: Degree status.

Registration Restrictions:
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
300 Level Courses

BUS 303: Develop Professional Skills II: Advanced Elements. 3 credits.

In this course, students will continue to develop their professional skill set. Topics covered include understanding the modern work environment, business ethics and professional responsibilities, and professional judgment. Students will also continue to hone their professional writing and presentation skills, prepare for the job search process, and develop personal job search and professional development plans. Notes: School of Business students will not be permitted to make more than three attempts to achieve a C or higher in BUS 303. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the “Termination from the Major” section under Academic Policies. Offered by School of Business (p. 877). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (BUS 103) or (U103).
C Requires minimum grade of C.

Students with a class of Freshman may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BUS 310: Business Analytics II. 3 credits.

Introduces modeling relationships contained in data and linear models to make (predictions in business. Topics include estimation, hypotheses testing, statistical inference, analysis of variance and linear regression techniques. Fundamentals of linear programming to solve optimization problems in business. Apply analytical tools to gain insights from real-life datasets. Hands-on experience and application of the methods to data sets using spreadsheet software. Offered by School of Business (p. 877). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: BUS 210, U210 or 210T.
C Requires minimum grade of C.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

400 Level Courses

BUS 492: Undergraduate Internship. 3 credits.

Opportunity to gain practical, professional experience in conjunction with academic development. Internship is an important part of academic and career preparation. May be used as elective credit, but may not be repeated. Notes: No more than 6 credits of School of Business internship coursework (BUS 492 or ACCT 492) can be applied towards a student’s 120 (BU) degree applicable credits. Students must receive departmental approval in order to register for this course; please contact the School of Business for internal eligibility requirements. Offered by School of Business (p. 877). May be repeated within the degree for a maximum 6 credits. Equivalent to ACCT 492, FNAN 492, MKTG 492, OM 492.

Recommended Prerequisite: Grade of C or higher in the 301 or 303 in the major. ISOM majors must complete MIS 301 or MIS 303 and OM 301 or OM 303.

Registration Restrictions:
Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

BUS 498: Capstone Course: Advanced Business Models. 3 credits.

Advanced integrated exploration of business models and industry dynamics that uses case analyses to assess competition, organizational strategy, and firm performance. Students examine strategic change in organizations from multiple perspectives, integrating knowledge from core course work into several papers and major presentation. Students receive coaching from area business leaders as they complete their presentations. The minimum grade of D or higher only reflects the prerequisite requirement for BUS 498. Students must earn a C or higher in order to meet the Business Core and Foundations degree requirements. Offered by School of Business (p. 877). May not be repeated for credit.

Mason Core: Capstone (p. 137)

Registration Restrictions:
Required Prerequisites: (ACCT 301, 303, 330, L301, L303 or L330) and (BULE 303, 305, 312, L302 or L303) and (BUS 303, L303, SOM 301 or L301) and (FNAN 301, 303, L301 or L303) and (MGMT 301, 303, L301 or L303) and (MIS 301, 303, L301 or L303) and (MKTG 301, 303, L301 or L303) and (OM 301, 303, L301, L303, SOM 301 or OM L303) and (BUS 310, 310, OM 210, 210, DESC 210, 210, U210 or OM U210).
D Requires minimum grade of D.
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Business Management (BMGT)

600 Level Courses

BMGT 603: Economics for Successful Firm Management. 3 credits.

Provides fundamental understanding of applying microeconomics concepts to managerial decision making. Explores principles of microeconomic theory, including market supply and demand, production and cost functions, industry structure, and product and resource pricing. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 877). May not be repeated for credit.
Recommended Prerequisite: Admission to BMGT program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**BMGT 612: Performance Evaluation Through Cost Management.** 3 credits.
Examines impact of cost and cost allocation on performance and evaluation. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: Admission to BMGT program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**BMGT 613: Financial Reporting and Firm Analysis.** 3 credits.
Foundation course focusing on economics and analysis of business transactions and financial reporting issues. Topics include introduction to accounting framework in financial reporting; analysis of financial statements, economic events and impact on financial reports, and impact of accounting methods on financial reports. Due to presentation and application of course material, course only open to students enrolled in the Master of Science in Management program. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: Admission to BMGT program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**BMGT 623: Marketing and Firm Performance.** 3 credits.
Develops market-based knowledge and skills for effective marketing decision making, strategy design, implementation, and evaluation in variety of institutional and competitive situations. Addresses importance of companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects. Due to the presentation and application of course material, this course is only open to students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: Admission to BMGT program.

Registration Restrictions:
Enrollment limited to students with a class of Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**BMGT 633: Statistical Analysis for Management.** 3 credits.
Use statistical methods as analytical tools for understanding and solving business problems and supporting business decision making. Includes descriptive statistics, sampling, inferencing and regression. Extensive use of applied business scenarios to illustrate concepts and computer software for data analysis. Due to presentation and application of course material, this course can only be taken by students in the Master of Science in Management Program. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: Admission to BMGT program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**BMGT 638: Managing Business Operations in a Global Environment.** 3 credits.
Focuses on design, planning, and control activities to produce and deliver goods/services in organizations. Introduces operations management decisions; operations strategy, process analysis and design, capacity planning, supply chain management, total quality management, and project management. Uses quantitative modeling, case studies, and computer software to analyze/solve problems. Due to the presentation and application of course material, course only open to Master of Science in Management students. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: Admission to BMGT program.
Registration Restrictions:  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:  
This course is graded on the Graduate Regular scale. (p. 82)

BMGT 643: Financial Management in a Global Environment. 3 credits.  
Introduces theory and practice of finance within corporations. Topics include intertemporal choice, valuation, capital budgeting and structure, working capital management, and risk and return analysis. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: Admission to BMGT program.

Registration Restrictions:  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:  
This course is graded on the Graduate Regular scale. (p. 82)

BMGT 653: Fundamentals of Behavior in Organizations. 3 credits.  
Emphasizes development of conceptual tools for understanding and analyzing individual and group behavior in organizations and organizational processes. Considerable focus on developing relevant skills for working in groups and teams. Lectures, discussions, case analyses, and class exercises. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management program. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: Admission to BMGT program.

Registration Restrictions:  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:  
This course is graded on the Graduate Regular scale. (p. 82)

BMGT 662: Management of Information Technology. 3 credits.  
Strategic, economic and managerial aspects of managing organization’s IT assets are covered. Business value of IT is understood and assessed in context of its impact on organization’s structure and strategy. Includes discussion on major issues pertaining management of IT infrastructure. Due to presentation and application of course material, course is only open to students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: Admission to BMGT program.

Registration Restrictions:  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:  
This course is graded on the Graduate Regular scale. (p. 82)

BMGT 673: Business Legal Environment. 1.5 credit.  
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: Admission to BMGT program.

Registration Restrictions:  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:  
This course is graded on the Graduate Regular scale. (p. 82)

BMGT 674: Ethics in the Global Business Environment. 1.5 credit.  
Strengthens student’s ability to identify, critically analyze, appropriately respond to, and provide leadership regarding issues of ethical and socially responsible behavior which they may confront as employees and managers of people, objects and organizations. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: Admission to BMGT program.

Registration Restrictions:  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**BMGT 678: Business Strategy and Firm Leadership.** 3 credits.
Capstone focusing on strategy development at business unit and corporate level. Cases, readings, and project format familiarize students with strategic management function and help develop analytical, organizational, and managerial skills to analyze complex business situations. Opportunities to integrate knowledge gained in prior course work. Due to presentation and application of course material, course only open to students enrolled in the Master of Science in Management program. Offered by School of Business (p. 877). May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**BMGT 692: Professional Development Experience.** 1-3 credits.
Professional experience in conjunction with academic development. Hands-on experience is an important part of academic and career preparation and may be completed by an internship, consulting project, independent study or additional global experience. Must involve an average of 15 hours per week and be approved by program director. Offered by School of Business (p. 877). May be repeated within the term for a maximum of 3 credits.

**Recommended Prerequisite:** completion of 18 credit hours in BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in a Master of Science degree.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**BMGT 695: Global Business Perspectives.** 3 credits.
Includes a weeklong international student study tour lead by a full-time School of Business professor. Students interact with business and government leaders, participate in seminars, and visit sites of local or multinational companies. Focus on developing an increased understanding of global markets, competition, business strategy, and business opportunities in addition to the social and cultural dimensions of global business. Offered by School of Business (p. 877). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in a Master of Science degree.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**Business Management of Secure Information Systems (MSIS)**

**600 Level Courses**

**MSIS 611: Leadership and Change Management.** 2 credits.
Distinguishes between leadership and management, and focuses on the critical roles and functions of leadership, including communication ability, use of power and influence, providing direction, aligning an organization's systems, motivating a workforce, and creating a culture for effectiveness. It also focuses on strategies for developing oneself as an effective leader. Offered by School of Business (p. 877). May not be repeated for credit. Equivalent to TECM 611.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**MSIS 614: Financial and Cost Accounting.** 2 credits.
Provides managers with an overview of the purpose and importance of accounting within the organization and the financial valuation of information technology companies, projects, and product line. Students focus on the economics and analysis of business transactions and their related financial reporting issues from internal and external stakeholder perspectives. Students improve their skills in analyzing financial issues and presenting results in a case analysis framework. Offered by School
of Business (p. 877). May not be repeated for credit. Equivalent to TECM 614.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

MSIS 620: Economics of Technology Management. 2 credits.
Enables students to build and evaluate economic and business models that can be used to analyze real managerial questions that affect all types of institutions, especially firms in the information technology industry. Students develop a better understanding of the operation of markets in general and the use of various quantitative and qualitative methods when making decisions within the firm. The use of economic analysis allows students to identify and evaluate decision alternatives; including their strategic importance. Students evaluate and use financial management models and gain an understanding of how finance can be employed as a source of potential competitive advantage. Surveys the theory and practice of corporate financial management with specific application to the technology sector. Students develop an understanding of key elements required in the valuation of project alternatives; including their strategic importance. Students evaluate and use financial management models and gain an understanding of how finance can be employed as a source of potential competitive advantage. Offered by School of Business (p. 877). May not be repeated for credit. Equivalent to TECM 620.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

MSIS 643: Managerial Finance. 2 credits.
Surveys the theory and practice of corporate financial management with specific application to the technology sector. Students develop an understanding of key elements required in the valuation of project alternatives; including their strategic importance. Students evaluate and use financial management models and gain an understanding of how finance can be employed as a source of potential competitive advantage. Offered by School of Business (p. 877). May not be repeated for credit. Equivalent to TECM 643.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum. Offered by School of Business (p. 877). May be repeated within the degree for a maximum 4 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading: This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

MSIS 697: Special Topics in Management of Secure Information Systems. 1-3 credits.
Sections established as necessary to focus on various topical issues that emerge in practice of management of secure information systems. Offered by School of Business (p. 877). May be repeated within the term for a maximum 6 credits.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Special scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

700 Level Courses

MSIS 711: Deriving Strategic Value from IT Investments. 2 credits.
Prepares students to be educated consumers of information technology to maximize strategic advantage of IT to an organization. Information technologies, architectures, and products are categorized and analyzed with a view to develop and maintain the most favorable IT asset portfolio to successfully carry out business goals and strategies. Techniques for making group technology assessments, outsourcing decisions, project bidding, and contract negotiations. Offered by School of Business (p. 877). May not be repeated for credit. Equivalent to TECM 711.

Registration Restrictions: Enrollment limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:

MSIS 735: Capstone Project. 1-3 credits.
Teams undertake a strategic evaluation and plan for IT-driven business initiatives. Presentation includes analysis of competitive forces and the value chain; recommendations, including changes in goals and organizational design; plan of action integrating marketing, human resource development, organizational design, finance, and information technology; and implementation plan using theories of communication and change management, to include business case and business plan. Offered by School of Business (p. 877). May not be repeated for credit. Equivalent to TECM 735.

Registration Restrictions: Enrollment limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:

MSIS 747: Enterprise Information Security Audit. 2 credits.
Focuses on defining a control framework, control objectives and the logging, monitoring and reporting and subsequent change management for an enterprise relying on secure information systems to its business objectives. Students will learn the process of creating a control structure with goals and objectives, audit a given IT infrastructure against it, and if found inadequate, establish a systematic remediation procedure. Offered by School of Business (p. 877). May not be repeated for credit.

Recommended Prerequisite: C or higher in MSEC 510 or equivalent.

Registration Restrictions: Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:

Students spend a week in an international residency. Emphasizes dealing with technological changes across international markets and amid global developments, virtual organizations, and project management across cultures. Corporate site visits combined with presentations by professors from universities outside the United States and relevant practitioners. Offered by School of Business (p. 877). May not be repeated for credit.

Registration Restrictions: Enrollment limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

**Business and Legal Studies (BULE)**

**300 Level Courses**

**BULE 303: Legal Environment of Business.** 3 credits.
Survey of the legal environment of business, emphasizing legal concepts and legal reasoning to prepare students to recognize legal problems and formulate appropriate responses. Topics include the federal and state court systems, constitutional and administrative law, business torts, and crimes, contracts and business ethics. Lecture, discussion, cases. Notes: School of Business students will not be permitted to make more than three attempts to achieve a C or higher in BULE 303. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies. Students cannot receive credit for both BULE 302 and BULE 303. Offered by School of Business (p. 877). Limited to two attempts.

**Recommended Prerequisite:** Degree status; sophomore standing

**Registration Restrictions:**
Students with a class of Freshman may not enroll.

Non-Degree or Washington Consortium level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**400 Level Courses**

**BULE 402: Commercial Law.** 3 credits.
Survey of commercial law emphasizing the Uniform Commercial Code. Lecture, discussion, cases. Offered by School of Business (p. 877). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** BULE 302, L302, 303 or L303. C Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Chemistry (CHEM)**

**100 Level Courses**

**CHEM 101: Introduction to Modern Chemistry.** 3 credits.
Physical and chemical discoveries and properties of matter presented along with their application and impact on way of life. Topics include atomic and molecular structure, nuclear chemistry, and chemistry in Earth and atmosphere. Note: does not fulfill the requirement for a laboratory course in chemistry. Not for chemistry majors. No credit given for both CHEM 101 and CHEM 103 or for both CHEM 101 and CHEM 211-212. No previous knowledge of chemistry required. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CHEM 203, CHEM 204.

**Mason Core:** Natural Science Overview (p. 137)

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 102: Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry.** 3 credits.
Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future. Notes: Does not fulfill the requirement for a laboratory course in Chemistry. Not for Chemistry majors. No credit for both CHEM 102 and CHEM 104, or CHEM 212. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CHEM 203, CHEM 204.

**Mason Core:** Natural Science Overview (p. 137)

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 103: Chemical Science in a Modern Society.** 4 credits.
Terminal course in chemistry for nonscience and nursing majors. Principles and application of chemistry. Notes: CHEM 103 and CHEM 101 are taught simultaneously in the same room. CHEM 101 is for those students who are not required to complete the lab component of CHEM 103. Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Topics are those described for CHEM 101 and 102 but with lab to enhance scientific experience. Offered by Chemistry (p. 653). May not be repeated for credit.

**Mason Core:** Natural Science with Lab (p. 137)

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 104: Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry.** 4 credits.
Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future. (CHEM 104 requires concomitant registration in a 104 laboratory section). Notes: Not open to students majoring in chemistry. Credit will not be given for both CHEM 104 and CHEM 212. Offered by Chemistry (p. 653). May not be repeated for credit.

**Mason Core:** Natural Science with Lab (p. 137)

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 105: Introductory Chemistry Laboratory I.** 1 credit.
Introductory laboratory course to demonstrate principles and application of chemistry. Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Students will enroll in CHEM 105 by Individualized Section and attend one of the CHEM 103 lab sections. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CHEM 211, CHEM 212.

**Recommended Prerequisite:** CHEM 101.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 106: Introductory Chemistry Laboratory II.** 1 credit.
1-credit laboratory course for non-science majors. Laboratory experience to demonstrate principles and application of chemistry. Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Students will enroll in CHEM 106 by Individualized Section and attend one of the CHEM 104 lab sections. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CHEM 211, CHEM 212.

**Recommended Prerequisite:** CHEM 102.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 155: Introduction to Environmental Chemistry I.** 4 credits.
Basic chemical principles of Earth's water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Notes: Credit will not be given for this course and CHEM 103, 104. Offered by Chemistry (p. 653). May not be repeated for credit.

**Mason Core:** Natural Science with Lab, Encore:Sustainability (p. 137)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 156: Introduction to Environmental Chemistry II.** 4 credits.
Basic chemical principles of Earth's water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Notes: Credit will not be given for this course and CHEM 103, 104. Offered by Chemistry (p. 653). May not be repeated for credit.

**Mason Core:** Natural Science with Lab, Encore:Sustainability (p. 137)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**200 Level Courses**

**CHEM 201: Introductory Chemistry I.** 3 credits.
Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; and properties of gases, liquids, and solids. Notes: Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 211 or 103. General chemistry course for students interested in science, engineering, mathematics, or computer science who do not require a lab. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CHEM 211.

**Mason Core:** Natural Science Overview (p. 137)

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 202: Introductory Chemistry II.** 3 credits.
Fundamentals of reaction rates and equilibrium. Topics include kinetics, properties of solutions, ionic equilibrium, chemical thermodynamics, electrochemistry, and nuclear chemistry. Notes: Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 212 or 104. Second-semester general chemistry course for those interested in science, engineering, mathematics, or computer science who do not require a lab. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CHEM 212.

**Mason Core:** Natural Science Overview (p. 137)

**Recommended Prerequisite:** CHEM 201 or 211.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 203: General Chemistry Laboratory I.** 1 credit.
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience to demonstrate general chemistry principles and applications. Students will enroll in CHEM 203 by Individualized Section and attend one of the CHEM 211 lab sections. Notes: Credit will not be given for this course and CHEM 101 or 102 to students majoring in science, engineering, or mathematics. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CHEM 101, CHEM 102, CHEM 213.

**Recommended Prerequisite:** CHEM 201.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 204: General Chemistry Laboratory II.** 1 credit.
Second semester general chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience to demonstrate general chemistry principles and applications. Students will enroll in CHEM 204, by Individualized Section, and attend one of the CHEM 212 lab sections. Notes: Credit will not be given for this course and CHEM 101 or 102 to students majoring in science, engineering, or
mathematics. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CHEM 101, CHEM 102, CHEM 214.

**Recommended Prerequisite:** CHEM 202.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 211:** General Chemistry I. 3 credits.  
Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; properties of gases, liquids, and solids. Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence. General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience will demonstrate general chemistry principles and applications. Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence. Limited to three attempts. Equivalent to CHEM 204.  

**Mason Core:** Natural Science with Lab (p. 137)

**Registration Restrictions:**  
**Required Prerequisites:** CHEM 213, 653 or 211T.  
* May be taken concurrently.  
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 212:** General Chemistry II. 3 credits.  
Fundamentals of colligative properties, reaction rates and equilibrium. Topics include kinetics, properties of solutions, ionic equilibrium, chemical thermodynamics, electrochemistry, and nuclear chemistry. Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence. Offered by Chemistry (p. 653). Limited to three attempts. Equivalent to CHEM 202.

**Mason Core:** Natural Science with Lab (p. 137)

**Registration Restrictions:**  
**Required Prerequisites:** CHEM 211, 653 or 211T) and (CHEM 212, 653 or 212T).  
* May be taken concurrently.  
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 214:** General Chemistry Laboratory II. 1 credit.  
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience will demonstrate general chemistry principles and applications. Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence. Offered by Chemistry (p. 653). Limited to three attempts. Equivalent to CHEM 204.

**Mason Core:** Natural Science with Lab (p. 137)

**Registration Restrictions:**  
**Required Prerequisites:** CHEM 212, 653 or 212T or 214T and (CHEM 211*, 653 or 211T or U211) and (CHEM 213*, 653 or 213T or U213).  
* May be taken concurrently.  
C Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 251:** General Chemistry for Engineers. 4 credits.  
Fundamental principles of chemical structure and reactivity including atomic and molecular structure; chemical bonding; structures of ionic, covalent, and metallic lattices; oxidation reduction; electrochemistry and chemistry of metals; and introduction to organic chemistry and polymers. Notes: Enrollment restricted to students intending to major in engineering. Students who need two semesters of chemistry should enroll in CHEM 211. Credit will not be given for this course and CHEM 211. Offered by Chemistry (p. 653). May not be repeated for credit.

**Mason Core:** Natural Science with Lab (p. 137)

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 271:** General Chemistry for Engineers Lecture. 3 credits.  
Fundamental principles of chemical structure and reactivity including atomic and molecular structure; chemical bonding; structures of ionic, covalent, and metallic lattices; oxidation reduction; electrochemistry and chemistry of metals; and introduction to organic chemistry and polymers. Notes: Enrollment restricted to students intending to major in engineering. Students who need two semesters of chemistry should enroll in CHEM 211/CHEM 213 and CHEM 212/CHEM 214. Credit will not be given for this course and CHEM 211/CHEM 213. Offered by Chemistry. May not be repeated for credit. Corequisite CHEM 272. Offered by Chemistry (p. 653). Limited to two attempts.

**Registration Restrictions:**  
**Required Prerequisite:** CHEM 272*.  
* May be taken concurrently.  
C Requires minimum grade of C.
Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 272: General Chemistry for Engineers Lab.** 1 credit. Lab course to accompany CHEM 271 Lecture. General Chemistry laboratory course for students majoring in engineering. Laboratory experience will demonstrate general chemistry principles and applications. Corequisite CHEM 271. Offered by Chemistry (p. 653). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** CHEM 271°C.
* May be taken concurrently.
C Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 300: Chemistry of Semiconductor Processing.** 3 credits. Chemical aspects of the manufacture of semiconductor devices. Topics include oxidation of silicon, photoresists, plasma etching, removal of metal contaminants by acid etching, and analysis of semiconductor thin films. Notes: Does not satisfy chemistry course requirements for BS in biology. Cannot be used as a chemistry elective toward BA, BS, or minor in chemistry, and does not fulfill premedical requirements. Offered by Chemistry (p. 653). May not be repeated for credit.

**Recommended Prerequisite:** 30 credit hours or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 313: Organic Chemistry I.** 3 credits.
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds. Offered by Chemistry (p. 653). Limited to three attempts.

**Recommended Corequisite:** CHEM 315.

**Registration Restrictions:**
**Required Prerequisites:** (CHEM 212°C or U212).
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 314: Organic Chemistry II.** 3 credits.
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds. Offered by Chemistry (p. 653). Limited to three attempts.

**Recommended Corequisite:** CHEM 318.

**Registration Restrictions:**

**Required Prerequisites:** (CHEM 313°C or L313). C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 315: Organic Chemistry Lab I.** 2 credits. Lab techniques and reactions arranged to accompany CHEM 313. Notes: One-hour recitation. Offered by Chemistry (p. 653). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CHEM 313°C or L313). C Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 318: Organic Chemistry Lab II.** 2 credits. Continuation of CHEM 315, arranged to accompany CHEM 314. Notes: One-hour recitation. Offered by Chemistry (p. 653). Limited to two attempts.

**Recommended Corequisite:** CHEM 314

**Registration Restrictions:**
**Required Prerequisites:** (CHEM 315°C or L315). C Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 321: Quantitative Chemical Analysis.** 4 credits. Principles of chemical analysis emphasizing ionic equilibria. Lab consists of gravimetric, volumetric, and instrumental methods illustrating principal types of quantitative determinations. Offered by Chemistry (p. 653). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** CHEM 212°C, MATH 111°C, CHEM 211°C and MATH 114°C. C Requires minimum grade of C.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHEM 331: Physical Chemistry I.** 3 credits. Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry. Offered by Chemistry (p. 653). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CHEM 212°C, 211°C, 213°C and 214°C) and (MATH 114°C or 116°C) and (PHYS 243°C or 160°C). C Requires minimum grade of C.

* May be taken concurrently.
CHEM 337: *Physical Chemistry Lab II*. 2 credits.
Continuation of CHEM 336. Notes: One-hour recitation. Offered by Chemistry (p. 653). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: (CHEM 314\(^C\) or 314L) and (CHEM 318\(^C\) or 318L) and CHEM 331\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 336: *Physical Chemistry*. 3 credits.
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry. Offered by Chemistry (p. 653). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: (MATH 114\(^C\) and CHEM 331\(^C\)) and (PHYS 243\(^C\) or 160\(^C\)) and (PHYS 244\(^C\) or 260\(^C\)).
\(^C\) May be taken concurrently.
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 413: *Synthetic and Mechanistic Organic Chemistry*. 3 credits.
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationships of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Offered by Chemistry (p. 653). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: CHEM 314\(^C\) or 314L and (CHEM 318\(^C\) or 318L) and CHEM 331\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 423: *Instrumental Methods of Chemical Analysis Laboratory*. 2 credits.
Laboratory-based introduction to quantitative analysis of organic and inorganic substances by using modern analytical instrumentation. Laboratory highlights practice of atomic and molecular spectroscopy, spectrophotometry, chromatography, voltammetry, and potentiometry in relation to chemical experimentation. Offered by Chemistry (p. 653). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: CHEM 422\(^C\).
\(^C\) Requires minimum grade of C.
CHEM 424: Principles of Chemical Separation. 3 credits.
Theories and models of separation with applications to analyses of a wide range of chemical, biological, and environmental samples. Topics include high-resolution gas and high-performance liquid chromatography. Emphasizes theory of reverse phase, normal phase, ion exchange, size exclusion, and affinity based separations. Also presents instrumentation such as detectors, pumps, columns, and data acquisition. Offered by Chemistry (p. 653). May not be repeated for credit.

Required Prerequisite: CHEM 332 or CHEM 422 or Permission of instructor

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 425: Electroanalytical Chemistry. 3 credits.
Review of basic electrochemistry. Emphasizes analysis and research for applications of modern electrochemical techniques such as chronoamperometry, cyclic, stripping, and AC voltammetry; pulse polarography; coulometry; electrochemical sensors; and instrumentation. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 332 or CHEM 422 or permission of instructor

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 427: Aquatic Environmental Chemistry. 3 credits.
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CHEM 321C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 438: Atmospheric Chemistry. 3 credits.
The fundamental chemical processes of the Earth’s atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CLIM 438.

Registration Restrictions:
Required Prerequisite: CHEM 332C.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 439: RS: Atmospheric Chemistry II: Air Analysis Techniques. 3 credits.
The theory, design and implementation of air sampling and analysis techniques for investigating GMU and regional air quality. Offered by Chemistry (p. 653). May not be repeated for credit.

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: CHEM 438 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 441: Properties and Bonding of Inorganic Compounds. 3 credits.
Interpretation of physical and chemical properties of inorganic compounds in terms of currently used bonding concepts. Topics include molecular symmetry and applications of symmetry, structure and bonding in ionic solids; reactions and characterizations of solids; electronic and magnetic properties and applications of solids. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 332C and 337C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 445: Inorganic Preparations and Techniques. 2 credits.
Application of techniques of inorganic chemistry to preparation, purification, and spectroscopic characterization of selected substances. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CHEM 441C.
C Requires minimum grade of C.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 446: Bioinorganic Chemistry. 3 credits.
Application of inorganic coordination chemistry and physical methods in study of structure and function of metal ion sites in biomolecules. Properties of transition metal ions, ligand field theory. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, oxygen transport, iron storage, electron transfer, inorganic model compounds, metals in medicine, and toxicity of inorganic species. Notes: Students may take this course concurrently with CHEM 463 or after taking CHEM 463. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CHEM 463C or BIOL 483C) and CHEM 331C and 336C.
CHEM 451: Special Projects in Chemistry. 1-3 credits. Introduction to chemical research or development. Includes literature search, conferences, and lab. Notes: Written and oral technical reports required. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CHEM 314C, 318C, 321C, 331C and 336C.
\(^{C}\) Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major in Chemistry.

Schedule Type: Research

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 452: Special Projects in Chemistry. 1-3 credits. Introduction to chemical research or development. Includes literature search, conferences, and lab. Notes: Written and oral technical reports required. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CHEM 451C.
\(^{C}\) Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major, minor, or concentration in Chemistry.

Schedule Type: Research

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 455: Honors Research in Chemistry. 3 credits. Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations. Notes: Credit will not be given for both these courses and CHEM 451, 452. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 455C and 490C.
\(^{*}\) May be taken concurrently.
\(^{C}\) Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major in Chemistry.

Schedule Type: Research

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 456: Honors Research in Chemistry. 3 credits. Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations. Notes: Credit will not be given for both these courses and CHEM 451, 452. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 455C and 490C.
\(^{*}\) May be taken concurrently.
\(^{C}\) Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major in Chemistry.

Schedule Type: Research

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 458: Chemical Oceanography. 3 credits. The world’s oceans, including a variety of closed basins and estuaries, comprise a complex and dynamic system of chemical processes that interact with biological, geological, physical, and atmospheric processes to play a significant role in shaping the earth’s fragile environment. This course will present an overview of the origin, occurrence, and distribution of the chemical components in sea water and an introduction to the basic principles of the chemical processes taking place in the marine environment. Designated a Green Leaf Course. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to GEOL 458.

Specialized Designation: Green Leaf Course

Registration Restrictions:
Required Prerequisites: CHEM 211C and 212C and (CHEM 321C or GEOL 309C).
\(^{C}\) Requires minimum grade of C.

Enrollment limited to students with the Honors Coll Schlrshp Confirmd, Honors College. or Honors in the Major. attributes.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 463: General Biochemistry I. 4 credits. Brief introduction to biochemistry, followed by in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function, and primary metabolism. Emphasizes enzymes and their chemical mechanisms, and metabolism. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to BIOL 483.

Registration Restrictions:
Required Prerequisites: (CHEM 313C or L313) and BIOL 213C.
\(^{C}\) Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 464: General Biochemistry II. 3 credits.
Continuation of general biochemistry, focusing on secondary metabolism, cell signaling, and processes of replication, transcription, and translation. Emphasizes important biochemistry research topics; much material drawn from current biochemical literature. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 463C and (CHEM 314C or 314L).
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 465: Biochemistry Lab. 2 credits.
Introduction to modern biochemical experimental methods of studying chemical and physical properties of biological molecules. Includes separation, identification, and characterization of biomolecules. Offered by Chemistry (p. 653). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: Grade of C or better in CHEM 315 and CHEM 463.

Recommended Corequisite: CHEM 463.

Registration Restrictions:
Required Prerequisites: CHEM 463C and (CHEM 315C or 315L).
C Requires minimum grade of C.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 467: The Chemistry of Enzyme-Catalyzed Reactions. 3 credits.
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 463C, 464C, 314C and 331C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 468: Bioorganic Chemistry. 3 credits.
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: CHEM 463C, 464C and 314C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 470: Laboratory Instructional Methods for Chemistry. 3 credits.
Lecture and laboratory experience teaching chemistry in laboratory. Students work closely with faculty members and are responsible for all aspects of teaching undergraduate laboratory techniques. Students also learn techniques for acquisition and storage of chemicals and laboratory apparatus, safety, disposal of chemical waste, and literature of chemical education. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 314.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CHEM 490: Undergraduate Seminar. 1 credit.
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a one-page summary of each talk attended. This course will also be used to teach students how to give effective presentations. May be repeated for a total of 2 credits. Offered by Chemistry (p. 653). May be repeated within the degree for a maximum 2 credits.

Registration Restrictions:
Required Prerequisites: (CHEM 331C or 336C).
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major, minor, or concentration in Chemistry.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

CHEM 500: Selected Topics in Modern Chemistry. 3 credits.
Topics of interest in analytical, biological, environmental, geological, geochemical, inorganic, organic, and physical chemistry. Notes: Credit not allowed toward major in chemistry. Credit not allowed toward minor in chemistry. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
Additional Course Details: Title varies by section and/or semester

CHEM 513: Synthetic and Mechanistic Organic Chemistry. 3 credits. General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Organic core course. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: Grade of C or better in CHEM 314, CHEM 318 and CHEM 331.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 529: Instrumental Techniques of Analysis. 2 credits. Principles and operation of modern instrumentation, emphasizing applications to analysis of chemical, biological, and environmental samples. Methods include combined capillary column gas chromatography and mass spectrometry, high-performance liquid chromatography, optical methods, surface analysis methods, magnetic resonance spectroscopy, atomic emission and absorption spectrometry, and electroanalytical methods. With approval of research committee, students choose methods studied. Offered by Chemistry (p. 653). May be repeated within the term.

Recommended Prerequisite: CHEM 321 and 422 or 521 or permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 563: General Biochemistry I. 4 credits. Brief introduction to biochemistry, followed by an in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function and primary metabolism. Emphasizes enzymes and their chemical mechanisms and metabolism. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 313, BIOL 213.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 564: General Biochemistry II. 3 credits. Previous course in biology recommended but not required. Important biological compounds, including proteins, carbohydrates, lipids, and nucleic acids, and their interrelations. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 563 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 567: The Chemistry of Enzyme-Catalyzed Reactions. 3 credits. Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 313 and 463 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 568: Bioorganic Chemistry. 3 credits. Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids. Offered by Chemistry (p. 653). May not be repeated for credit.
Recommended Prerequisite: CHEM 314 and 463, or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 579: Special Topics. 1-6 credits.
Current topics in chemistry, depending on instructor’s specialty. Notes: May be repeated with different topics, with department approval. Offered by Chemistry (p. 653). May be repeated within the term.

Recommended Prerequisite: CHEM 313 and 314, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

600 Level Courses

CHEM 613: Modern Polymer Chemistry. 3 credits.
Synthetic and analytical chemistry of synthetic macromolecules. Topics include polymer solutions, molecular weight determination, spectroscopy, thermal analysis, x-ray crystallinity, polymerization types, and commercial and electroactive polymers. Organic core course. Offered by Chemistry (p. 653). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 624: Principles of Chemical Separation. 3 credits.
Methods of sensing and measurement of radiation, particles, pressure, concentrations of specific elements and compounds. Topics include basic operational amplifier circuits for analog signals, digitizing devices and computerized data collection, noise and noise-reduction methods, and specialized instrumentation systems for various areas of chemistry and physics. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 332 or CHEM 422 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 620: Modern Instrumentation. 3 credits.
Methods of sensing and measurement of radiation, particles, pressure, concentrations of specific elements and compounds. Topics include basic operational amplifier circuits for analog signals, digitizing devices and computerized data collection, noise and noise-reduction methods, and specialized instrumentation systems for various areas of chemistry and physics. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 332 or CHEM 422 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 614: Physical Organic Chemistry. 3 credits.
Principles underlying molecular structure, reactivity, and reaction mechanisms. Topics include valence-bond and molecular-orbital theory, electronic interpretation of organic reactions, stereochemistry, conformational analysis, kinetics and thermodynamics of organic reactions, and photochemistry. Organic core course. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 314 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 625: *Electroanalytical Chemistry*. 3 credits.
Review of basic electrochemistry. Emphasizes analysis and research for applications of modern electrochemical techniques such as chronoamperometry; cyclic, stripping, and AC voltammetry; pulse polarography; coulometry; electrochemical sensors; and instrumentation. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 332 or CHEM 422 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 627: *Aquatic Environmental Chemistry*. 3 credits.
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 321 or GEOL 302 or equivalent courses or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 633: *Chemical Thermodynamics and Kinetics*. 3 credits.
Advanced study covering application of kinetics to the elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates. Physical core course. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CSI 711.

Recommended Prerequisite: CHEM 331 and 332.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Focuses on the design and synthesis, structure and bonding of solid state compounds; physical properties and characterization of solids. Topics of current interest will also be included. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 441 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 646: *Bioinorganic Chemistry*. 3 credits.
Applies inorganic coordination chemistry and physical methods to understand structure and function of metal ion sites in biomolecules. Biochemical roles of metal centers in oxygen transport, metalloenzymes, and electron transfer. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, inorganic model compounds, and metals in medicine. Inorganic core course. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 441, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 651: *Environmental Chemistry of Organic Substances*. 3 credits.
Study of principles governing multimedia distribution and fate of organic chemicals in environment. Overview of origin and occurrence of major classes of natural and anthropogenic organic chemicals in environment. Environmental core course. Offered by Chemistry (p. 653). May not be repeated for credit.
Recommended Prerequisite: One semester of Physical Chemistry, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CHEM 660: Protein Biochemistry. 3 credits.**
Proteins play critical roles in most biological processes. Therefore, to understand these processes, it is necessary to understand proteins. This course will introduce students to proteins, their biosynthesis/biodegradation and their biophysical and biochemical properties. Biochemistry core course. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 463 or equivalent or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CHEM 661: Antibiotic Chemistry and Resistance. 3 credits.**
Introduces the various classes of antibiotics. Focus on the chemistry of antibiotics and how they inhibit bacterial growth and/or cause death and the response of bacteria to these compounds. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 463 or equivalent or permission of instructor

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CHEM 662: Modern Methods of Drug Discovery. 3 credits.**
Introduction to the process of drug discovery. Covers modern methods and strategies of target identification, lead identification, and lead optimization. Biochemistry core course. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 463 (or equivalent) or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CHEM 665: Protein-Protein Interactions: Methods and Applications. 3 credits.**
Introduction to the fundamental principles of protein-protein interactions, including experimental design considerations and methods for quantification of these interactions. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 463 (or equivalent), or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CHEM 670: Teaching Practicum. 2 credits.**
Prelaboratory lecture and laboratory teaching in chemistry. Students work closely with faculty and are responsible for all aspects of teaching undergraduate laboratory techniques. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: Enrollment in the graduate program and permission of Chair.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship
Grading:
This course is graded on the Graduate Special scale. (p. 82)

700 Level Courses

CHEM 728: Introduction to Solid Surfaces. 3 credits.
Introduces properties of solid surfaces. Topics include gas absorption isotherms, surface area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas adsorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and surface sensitivities, instrumentation; and principles of vacuum technology. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CSI 712.

Recommended Prerequisite: CHEM 422 or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 735: Astrophysical Chemistry of Planetary Bodies. 3 credits.
In depth review of the chemistry of planets, comets and other bodies in the Solar System. Emphasis will be placed on the laboratory techniques and measurements made in order to understand and predict astronomical observations. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 331, or ASTR 403, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 736: Computational Quantum Mechanics. 3 credits.
Study of fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, electron-atom solutions to Schrodinger's equation, electron spin in many electron systems, atomic structure calculations, algebra of many electron calculations, Hartree-Fock, self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations. Offered by Chemistry (p. 653). May not be repeated for credit. Equivalent to CSI 783, PHYS 736.

Recommended Prerequisite: PHYS 502, 510, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 767: Industrial Biochemistry. 3 credits.
An introduction to industrial biochemistry. Includes a mechanistic examination of the biosynthesis of several industrially important secondary metabolites, the industrial scale process of obtaining commercially valuable biochemical products, and the regulations that oversee the industrial biochemical process. Offered by Chemistry (p. 653). May not be repeated for credit.

Recommended Prerequisite: CHEM 463 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 790: Graduate Seminar. 1 credit.
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a 1 page summary of each talk attended. Course also used to teach students effective presentation methods. Notes: Requires, in last semester, seminar presentation on student’s research or another topic acceptable to department. Three credits of CHEM 790 required for MS degree; an additional 3 credits required after admission to PhD program. Offered by Chemistry (p. 653). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Admission to a graduate program in Chemistry and Biochemistry, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 796: Directed Reading and Research. 1-6 credits.
Reading and research on a specific topic in chemistry or biochemistry under direction of a faculty member. Offered by Chemistry (p. 653). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Admission to a graduate program in Chemistry and Biochemistry or affiliated programs.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CHEM 798: Research Project. 3-6 credits.
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Notes: Requires comprehensive report acceptable to advisory committee, and final oral exam on report.
Offered by Chemistry (p. 653). May be repeated within the degree for a maximum 6 credits.

**Recommended Corequisite**: Permission of department; 6 credits of CHEM 798 or 799 (credit will not be given for both).

**Registration Restrictions**: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type**: Thesis

**Grading**: This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CHEM 799**: Master’s Thesis. 1-6 credits.

Laboratory thesis research and writing under direction of supervisor. Notes: Minimum of 3 credits for first two enrollment periods. Offered by Chemistry (p. 653). May be repeated within the degree.

**Recommended Corequisite**: Permission of the department.

**Registration Restrictions**: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type**: Thesis

**Grading**: This course is graded on the Satisfactory/No Credit scale. (p. 82)

### 800 Level Courses

**CHEM 814**: Advanced Bioorganic Chemistry. 3 credits.

Introduces the chemical nature of biomolecules, with a focus on their organic properties. Focuses on the chemical principals that underlie the diverse structures, properties and reactions of biomolecules. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry (p. 653). May not be repeated for credit.

**Recommended Corequisite**: CHEM 313, 314, and 463 or equivalent; or permission of instructor.

**Registration Restrictions**: Enrollment is limited to Graduate level students.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Graduate Regular scale. (p. 82)

**CHEM 817**: Organic Structural Spectroscopy. 3 credits.

Spectroscopic determination of organic molecular structure using 1H, 13H, 19F, and 31P nuclear magnetic resonance, infrared, ultraviolet, visible, and Raman spectroscopy, and mass spectrometry. Offered by Chemistry (p. 653). May not be repeated for credit.

**Recommended Corequisite**: CHEM 314 or equivalent.

**Registration Restrictions**: Enrollment is limited to Graduate level students.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Graduate Regular scale. (p. 82)

**CHEM 821**: Theory of Analytical Processes. 3 credits.

Theory and application of contemporary analytical processes and methods used in chemistry research. Emphasis on analytical signals and accompanying noise, sample preparation techniques, and quality assurance in measurements. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry (p. 653). May not be repeated for credit.

**Recommended Prerequisite**: Admission to Chemistry and Biochemistry doctoral program.

**Registration Restrictions**: Enrollment is limited to Graduate level students.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Graduate Regular scale. (p. 82)

**CHEM 833**: Physical Chemistry and Biochemistry. 3 credits.

The theory and practical use of thermodynamics, kinetics, spectroscopy and quantum chemistry in chemical and biochemical research. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry (p. 653). May not be repeated for credit.

**Recommended Prerequisite**: CHEM 331 or permission of instructor.

**Registration Restrictions**: Enrollment is limited to Graduate level students.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Graduate Regular scale. (p. 82)

**CHEM 891**: Doctoral Scientific Critique, Writing and Presentation. 3 credits.

Development of skills associated with scientific communication and research such as oral presentation of scientific material, analysis of scientific research and preparation of scientific proposals. In preparing scientific proposals, students will learn how to identify scientific questions of interest and how to plan a course of experiments to address these questions. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry (p. 653). May not be repeated for credit.

**Recommended Prerequisite**: Permission of academic advisor, research advisor and/or research committee

**Registration Restrictions**: Enrollment is limited to Graduate level students.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Graduate Regular scale. (p. 82)

**CHEM 896**: Doctoral Directed Reading and Research. 1-6 credits.

Reading and research on a specific topic in Chemistry or Biochemistry under direction of a faculty member. Offered by Chemistry (p. 653). May be repeated within the degree for a maximum 15 credits.

**Recommended Prerequisite**: Admission to the PhD in Chemistry and Biochemistry or affiliated programs.

**Registration Restrictions**:
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

### 900 Level Courses

**CHEM 998:** Doctoral Dissertation Proposal. 1-12 credits.
Development of a research proposal under the guidance of the research advisor and graduate committee. The resulting proposal, once approved by the student's research advisor and committee, forms the basis of the student's doctoral dissertation. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998. Offered by Chemistry (p. 653). May be repeated within the degree.

**Recommended Prerequisite:** Permission of research advisor and/or graduate committee.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CHEM 999:** Doctoral Dissertation Research. 1-12 credits.
Research in the concentration pertinent to student's program of study under the direction of their research advisor and committee. Students may enroll for credits in this course once their research proposal has been approved. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998. Offered by Chemistry (p. 653). May be repeated within the degree.

**Recommended Prerequisite:** Admission to candidacy in Chemistry and Biochemistry Doctoral Program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

### Chinese (CHIN)

#### 100 Level Courses

**CHIN 101:** Elementary Chinese. 3 credits.
Introduction to Mandarin, including basic grammar, oral expression, listening comprehension, reading, and writing. Notes: Students may not receive credit for CHIN 101 and CHIN 109 or 110. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit. Equivalent to CHIN 109, CHIN 110.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHIN 102:** Elementary Chinese. 3 credits.
Continuation of CHIN 101. Notes: Students may not receive credit for CHIN 102 and CHIN 109 or 110. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit. Equivalent to CHIN 109, CHIN 110.

**Recommended Prerequisite:** CHIN 101.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHIN 110:** Elementary Chinese. 6 credits.
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Notes: Lab work required. Students may not receive credit for CHIN 110 and CHIN 101, 102, or 109. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit. Equivalent to CHIN 101, CHIN 102, CHIN 109.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

### 200 Level Courses

**CHIN 201:** Intermediate Chinese I. 3 credits.
Further development of skills acquired in CHIN 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing. Notes: CHIN 201 and 202 must be taken in sequence. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

**Recommended Prerequisite:** CHIN 101 and 102, or CHIN 110.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CHIN 202:** Intermediate Chinese II. 3 credits.
Continuation of CHIN 201. CHIN 201 and 202 must be taken in sequence. Notes: Students may not receive credit for CHIN 202 and CHIN 209. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

**Recommended Prerequisite:** CHIN 201.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Taught in Chinese

**CHIN 209:** Intensive Intermediate Chinese. 6 credits.
Recommended for students who desire training in Chinese to an intermediate level of competence in a relatively short period of time. Notes: Equivalent to CHIN 201 and 202 taught in single semester. Students may not receive credit for CHIN 209 and the CHIN 201/202 sequence. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.
Recommended Prerequisite: CHIN 102, 109, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

300 Level Courses

CHIN 300: Reading Skills Development. 3 credits.
Develops reading proficiency, emphasizing vocabulary and grammar of standard written Chinese. Introduces discourse structure, sociolinguistic and cultural knowledge, and strategies for reading Chinese at an advanced level. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Recommended Prerequisite: CHIN 202, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in Chinese

CHIN 301: Advanced Grammar and Syntax. 3 credits.
In-depth review of Chinese grammar and syntax. Provides extensive practice in controlled and free writing, emphasizing fundamental difficulties and points of interference between English and Chinese. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Recommended Prerequisite: CHIN 202 or equivalent, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in Chinese

CHIN 305: Chinese for the Business World. 3 credits.
Introduces terminology and structure of business Chinese. Emphasizes acquiring vocabulary and developing facility in Chinese business articles and correspondence. Offered by Modern & Classical Languages (p. 419). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: CHIN 202 or equivalent, appropriate placement score; or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in Chinese

CHIN 310: Survey of Chinese Literature. 3 credits.
Introduces outlines of Chinese literature to the 19th century, presented through literary sources arranged in roughly chronological order. Readings include poetry; fiction; personal essays; documents of philosophy, history, and religion; and transcribed oral records. Notes: Knowledge of Chinese helpful but not required. May be repeated when topic is different with approval of department. Offered by Modern & Classical Languages (p. 419). May be repeated within the degree for a maximum 6 credits.

Mason Core: Literature (p. 137)

Recommended Prerequisite: ENGL 101/ENGH 101, or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

CHIN 311: Modern Chinese Literature in Translation. 3 credits.
Introduction of outlines of modern Chinese literature from early 20th century to post-Mao era, presented through literary sources arranged in roughly chronological order. Readings include poetry, fiction, personal essays. Notes: Knowledge of Chinese helpful but not required. May be repeated when topic is different with approval of department. Offered by Modern & Classical Languages (p. 419). May be repeated within the term for a maximum 6 credits.

Mason Core: Literature (p. 137)

Recommended Prerequisite: ENGL 101/ENGH 101 or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

CHIN 318: Introduction to Classical Chinese. 3 credits.
Introduces basic structures and vocabulary of Classical Chinese, which still has a significant influence on the formal written prose of modern newspapers and documents. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Mason Core: Capstone (p. 137)

Specialized Designation: Non-Western Culture

Recommended Prerequisite: CHIN 202, appropriate placement score, or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in Chinese

CHIN 320: Contemporary Chinese Film. 3 credits.
Explores China from 1949 to present through cinematic and literary representations. Discussions focus on representations of cultural, social, and political changes in the movies. Also introduces critical readings that address issues of gender and youth, family, ethnicity, modernity and the nation, as well as visuality and memory. Notes: Knowledge of Chinese language helpful but not required. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.
Specialized Designation: Non-Western Culture

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

CHIN 325: Major Chinese Writers. 3 credits.
Studies works of major Chinese writers. Writers studied may vary. Notes: Knowledge of Chinese helpful but not required. May be repeated when topic is different with approval of department. Offered by Modern & Classical Languages (p. 419). May be repeated within the degree for a maximum 6 credits.

Mason Core: Literature (p. 137)

Specialized Designation: Non-Western Culture

Recommended Prerequisite: ENGL 101/ENGH 101, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

CHIN 328: Asian American Women Writers. 3 credits.
Introduction to selected works by female writers of Chinese, Filipino, Indian, Japanese, and Korean descent.Analyzes themes, form, style, language, and structure of a variety of works, mainly novels and short stories. Assesses role and significance of writings as part of ethnic American and women's literature by exploring questions of identity formation and disintegration, and how they are rooted in gender, social status, ethnicity, community, geography, and generational conflict. Notes: Knowledge of Asian languages not required. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Mason Core: Literature (p. 137)

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

CHIN 355: Readings in Chinese Poetry and Poetics. 3 credits.
Close readings and discussions of primary texts covering major periods in Chinese poetry to 1949. Analyzes variety of themes, forms, and styles. Notes: May be repeated when readings are different with permission of department. Offered by Modern & Classical Languages (p. 419). May be repeated within the degree for a maximum 6 credits.

Mason Core: Capstone (p. 137)

Recommended Prerequisite: CHIN 300 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in Chinese

CHIN 365: Readings in Chinese Fiction after Mao. 3 credits.
Close readings and discussions of primary texts after the Cultural Revolution. Analyzes themes, subjects, language, and styles. Notes: May be repeated when readings are different with permission of department. Offered by Modern & Classical Languages (p. 419). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: CHIN 300 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in Chinese

400 Level Courses

CHIN 470: Special Topics in Chinese Studies. 3 credits.
Covers topics on Chinese language, literature, or culture organized by theme, genre approach, or era. Notes: May be repeated when topic is different with permission of department. Offered by Modern & Classical Languages (p. 419). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English, Title varies by section and/or semester

CHIN 475: Chinese Popular Culture. 3 credits.
Combines language learning with an introduction to the complex and vibrant popular culture of contemporary China: music, food, games, gender and family issues, commercial culture, and digital media. Authentic texts will include popular music and poems, films, TV shows, and social media posts. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Mason Core: Capstone (p. 137)

Recommended Prerequisite: Three years of college Chinese or equivalent.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in Chinese

CHIN 480: Fourth-Year Chinese I. 3 credits.
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: CHIN 300 and 301; appropriate placement score, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
Additional Course Details: Taught in Chinese

CHIN 481: *Fourth-Year Chinese II*. 3 credits.
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in Chinese

Work with schools, social service programs, government agencies, interest groups, museums, or corporations locally and in Chinese-speaking regions. With a faculty supervisor, students develop an internship contract, which requires the approval of the director. For each credit, student works on site at least 45 hours. Notes: Contact the department one semester prior to enrollment. Offered by Modern & Classical Languages (p. 419). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: CHIN 202 or equivalent.

Schedule Type: Internship
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

**Civil and Infrastructure Engineering (CEIE)**

**100 Level Courses**

CEIE 100: *Environmental Engineering around the World*. 3 credits.
Society's relationship with the environment is: (1) fundamental to its success; (2) complex, involving economics, finance, law, culture, religion, politics, education, science, technology, and engineering; (3) widespread, often with impacts not just locally but regionally, nationally or globally; and (4) constantly changing with potentially enormous short-term and long-term benefits and costs that may be in conflict. This relationship can drive a society to thrive or decline. Humans today have unprecedented ability to affect the environment both locally and globally, and to be affected by it. Technology and engineering are key drivers in society's efforts to manage our environment. This course will examine the history of various societies' interactions—including our own—with the environment; explore our ability to affect the environment—in small and enormous ways—through modern science, technology and engineering; and foster debate on today's critical environmental issues. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Mason Core: Global Understanding, Encore:Sustainability (p. 137)

Specialized Designation: Green Leaf Course

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**200 Level Courses**

Introduces topographic surveying and engineering drawing for civil engineering applications. Topics include surveying, GPS, GIS, digital terrain modeling, design of horizontal and vertical curve geometry for road applications, engineering drawing concepts, and drawing with CAD-based software. Fieldwork required on selected topics. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 117C or CDS 130C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 210: *Statics*. 3 credits.
Covers force vectors and operations in 2D and 3D; equilibrium of a particle; moment of a force vector; equilibrium of a rigid body; truss analysis; center of gravity, centroid and moment of inertia; shear force and bending moment diagrams; dry friction; virtual work. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (PHYS 160C) and (MATH 114C or 116C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 240: *Hydraulics*. 3 credits.
Principles of fluids in equilibrium and motion. Topics include hydrostatic pressure; continuity, Bernoulli, and momentum equations; viscosity flow problems; pressure pipe flow and turbomachinery; measuring instruments; and applications to closed conduits and open channels. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: (PHYS 160C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**300 Level Courses**

CEIE 301: *Engineering and Economic Models in Civil Engineering*. 3 credits.
Applies planning, analysis, control, and engineering economic models to life cycle of physical infrastructure. Introduces infrastructure design process and application of quantitative and probabilistic
models. Presents applications of model building for engineering economics; decision making; forecasting; resource scheduling and allocation; estimating; work measurement and materials; and quality and process control in water, transportation, environmental, energy, and telecommunications infrastructure systems and the built environment. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Specialized Designation:** Writing Intensive in the Major

**Registration Restrictions:**
**Required Prerequisites:** (STAT 344C or L344) and (ENGL 302C, ENGH 302C, ENGL L302, ENGH L302 or HNRS 3533C). C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 304:** Jr Engineering Competency Exam. 0 credits.
Assess student preparation for the Fundamentals of Engineering exam after completing engineering science requirements for a BS degree in engineering. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the term for a maximum 0 credits.

**Registration Restrictions:**
**Required Prerequisites:** (MATH 114C or 116C) and (PHYS 160C). C Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CEIE 310:** Mechanics of Materials. 3 credits.

**Registration Restrictions:**
**Required Prerequisites:** (ENGR 210C or CEIE 210C). C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 311:** Structural Analysis. 3 credits.
Basic concepts and assumptions of structural analysis, including statical and geometric redundancy. Analysis, by integration of deformation of simple structural members. Virtual work method for the analysis of deformations of simple structural systems such as articulate beams, trusses, frames, and arches. Method of forces to analyze statically indeterminate systems, method of displacements to analyze geometrically indeterminate systems, and symmetry and antisymmetry in structural analysis. Uses computer programs for structural analysis. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (ENGR 310C, L310, CEIE 310C or L310). C Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 331:** Soil Mechanics. 3 credits.
Covers soil classification, soil properties and engineering characteristics of soils. Includes seepage effects, effective stresses, soil strength and deformation characteristics. Also, the determination of immediate and consolidation settlement, lateral earth pressures and bearing capacities. Introduces foundation design fundamentals. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (ENGR 210C or CEIE 210C) and (CEIE 230C or 240C). C Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 340:** Water Resource Engineering. 3 credits.
Introduces principles and practice of water resources engineering. Topics include hydrology, governing principles, design and evaluation methods, common models, and typical applications in water resource engineering. Laboratory and field work required on selected topics. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CEIE 230C, U230, 240C or U240). C Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
CEIE 355: Environmental Engineering and Science. 3 credits.
Introduces students to the concepts of water pollution, air pollution, noise, and solid waste generation and management. Relationships between human population growth and pollution are introduced. Contemporary environmental engineering topics such as sustainability and global climate change are presented. Offered by Civil, Environ & Infrast Engr (p. 1145). Limited to two attempts.

Specialized Designation: Green Leaf Course

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 360: Introduction to Transportation Engineering. 3 credits.
Introduces transportation systems and the factors that influence their planning, design, and operation. Topics include fundamentals of urban travel, travel demand forecasting, and traffic flow; principles of highway design; highway capacity and level of services; introduction to traffic control; traffic signal control systems; intersection design; speed zoning and control; and introduction to Intelligent Transportation Systems and travel demand management. Requires laboratory, field work on selected topics. Offered by Civil, Environ & Infrast Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CHEM 211, U211, 251, U251 or 271) and (CEIE 230C, U230, 240C or U240). Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Schedule Type: Lecture

CEIE 370: Construction Systems. 3 credits.
Overview of the modern construction industry and principles and practices of construction management. Topics include project planning, construction administration, the contract environment, equipment operations, cost estimation and scheduling, and legal theories. Current industry trends are emphasized as are the uses of modern scheduling and cost-estimating software and online databases. Offered by Civil, Environ & Infrast Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 290C, U290, 203C or U203) and (CEIE 304) and (ENGR 210C, U210, CEIE 210C or U210). Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Schedule Type: Lecture

CEIE 395: Mentored Research in Civil and Environmental Engineering. 1-3 credits.
Introduces the scientific research process through hands-on experience: students are matched with faculty mentors who are actively involved in civil engineering-related research. Requires no less than 60 hours per semester working with mentors. Notes: Three credits of CEIE 395 may substitute for a maximum of 3 credits of CEIE 4xx technical elective credits with department permission. Offered by Civil, Environ & Infrast Engr (p. 1145). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: At least 60 credit hours applicable to the Civil and Infrastructure Engineering program.

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Schedule Type: Independent Study

400 Level Courses

CEIE 400: Civil Engineering Planning and Management. 3 credits.
Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduces policies, programs, and regulations that influence land development, history-enabling legislation, governing and regulating bodies, control of site plan development, and approval process. Examines structure, function, and purpose of urban design systems and how they can be achieved. Discusses physical relationships among development, land use, transportation, energy, communications, and water systems. Studies public- and private-sector urban development industry. Other topics include innovation, competition, new technology, and environmental issues. Requires design projects. Offered by Civil, Environ & Infrast Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 340C or L340) and (CEIE 360C or L360). Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Schedule Type: Lecture

CEIE 401: Sustainable Land Development. 3 credits.
Introduces students to sustainable land development topics including low impact development, site resource conservation, ultra-low water design, deconstruction and materials reuse, healthy building design, green house gas reduction, zero and low energy design, and other topics related to sustainable practices in facilities and infrastructure design and construction. Offered by Civil, Environ & Infrast Engr (p. 1145). Limited to two attempts.
Specialized Designation: Green Leaf Course

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 402: Highway Design and Construction. 3 credits.
Provides a survey of the tools, techniques, and methods used by the various civil engineering disciplines to design and construct highways. Combines lectures, individual readings, and hands-on exposure to the tools and processes used in design and construction of highways. All facets of a project are covered including planning, project management, survey and mapping, preliminary design, geotechnical, pavements, environmental, hydraulics, bridge design, PS&E design, materials, and construction. Notes: Course meets off-campus at the Federal Highway Administration Eastern Federal Lands Highway Division in Sterling, VA. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CEIE 310C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture
Grading:

This course is graded on the Satisfactory/No Credit scale. (p. 82)

CEIE 409: Professional Practice and Management in Engineering. 1 credit.
Introduces professional ethics and management principles, and prepares students for leadership roles in practice. Topics include introduction to professional and technical societies; code of ethics related to the public, clients, contractors, suppliers, employers, agreements, contracts, competitive bidding, the engineering profession, conflict of interest, legal responsibilities and case law. Case studies of professional ethics; professional licensure; engineering versus engineering management; personal development; time management, career versus grad school, continuing education; public policy considerations in engineering practice; practical considerations in project management; effectively communicating with employees, contractors and clients; marketing, competitive bidding and project selection; conflict resolution; and managing a small business. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Enrollment limited to students with a class of Junior, Senior Plus or Senior.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:

This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 412: Structural Steel Design. 3 credits.
Covers analysis and design of structural steel members including tension members, compression members, bolted and welded connections, columns, beams, and beam-columns. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CEIE 311C or L311.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture
Grading:

CEIE 413: Reinforced Concrete Design. 3 credits.
Covers analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure and shear; determining serviceability limits; detailing reinforcing steel bars. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 311C or L311).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 414: Structural Modeling for Engineers. 3 credits.
This course provides an introduction to the computer modeling tools that underpin modern structural engineering practice: finite element analysis. Emphasis a combination of theory and practical experience with modeling software. Modeling concepts and the assumptions that engineers must make while building finite element models will be discussed. Topics include applications from structural analysis, structural design, and dynamic vibration analysis. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Recommended Prerequisite: CEIE 311.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 432: Foundation Design. 3 credits.
Introduction to various principles and practices of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations and capacity analysis of deep foundations. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CEIE 305C or 331C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 435: Engineering Geology. 3 credits.
Introduction to formation and occurrence of earth materials: rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 305C or 331C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 440: Water Supply and Distribution. 3 credits.
Analysis and design of public water supplies. Topics include: water supply evaluation; water quality; demand projections; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; surge analysis; water modeling; concepts in management, business, and public policy of public water supplies; and federal, state, and local government laws and regulations related to public water systems. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 340C or U340).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 442: Open Channel Flow. 3 credits.
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; and modeling and computer applications in open channel analysis and design. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 340C or U340).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CEIE 444: Water Resources Planning and Design. 3 credits.
Concerned with effective use of water as a manageable natural resource. It assesses the impacts by various water resources development activities with economic, socio-cultural and environmental considerations. Methods for conducting tradeoff analyses among the engineered, human, and environmental aspects of projects are developed and applied in a term project. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.
**Recommended Prerequisite:** C or better in CEIE 340.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 450: Environmental Engineering Systems.** 3 credits.
Introduces the concepts and applications of systems analysis in environmental engineering. Tools and methodologies of systems analysis are applied to improve the understanding and resolution of complex environmental engineering problems related to air, soil, water quality and pollution. Scientific, engineering, political, social, legal, regulatory, medical, economic, and financial impacts of environmental engineering decisions are considered. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**

**Required Prerequisites:** (CEIE 355 or L355).

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 453: Water and Wastewater Treatment Processes.** 3 credits.
Reviews unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisite:** (CEIE 355).

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 454: Sustainable Water Resources Infrastructure in Developing Countries.** 3 credits.
This course addresses the principles of infrastructure engineering and planning in developing countries, with a focus on sustainable technologies for rural and small-scale water supply and wastewater treatment. Students will design simple, reliable water supply and sanitation systems for developing countries with limited human and material resources and with regard to local customs and socio-cultural public health and economic factors. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisite:** CEIE 355.

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 457: Remote Sensing in Civil Engineering.** 3 credits.
This course provides an introduction to the fundamentals of remote sensing. It will focus on how remote sensing data are acquired, displayed, restored, enhanced, and analyzed. The course will be taught with an emphasis on remote sensing techniques as a tool for engineering practices, such as regional planning, site investigation, terrain mapping, urban infrastructure development, water resources engineering, and flood monitoring. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Recommended Prerequisite:** C or better in CEIE 355.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 461: Traffic Engineering.** 3 credits.
Elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** (CEIE 360 or L360).

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 462: Urban Transportation Planning.** 3 credits.
Technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation, trip distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** (CEIE 360 or L360).

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 471: Construction Administration.** 3 credits.
Examines the principals of project planning and administration using modern specification and project delivery methods. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CEIE 370C or L370).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 472: Building Information Modeling.** 3 credits.
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CEIE 370C or L370).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 490: Senior Design Project.** 3 credits.
Capstone design experience. Integrates all design fundamentals employed by a typical civil engineering design team. Major team efforts include land use, transportation, water and sewerage, storm water, site analysis, economic and regulatory considerations, sectioning, grading, and siting. Students focus on teamwork, interdisciplinary interaction, and tradeoff decision making. Design team analyzes all aspects of a major urban project, develops solutions to design problems, and produces project report and oral presentation. Design effort completed and report is prepared, presented, and evaluated. Primary course goal is to produce design for contemporary civil infrastructure project. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts.

**Mason Core:** Capstone, Synthesis (p. 137)

**Recommended Prerequisite:** Three 4xx level technical electives.

**Registration Restrictions:**
**Required Prerequisites:** (CEIE 301C or L301) and (CEIE 311C or L311) and (CEIE 340C or L340) and (CEIE 355C or L355) and (CEIE 360C) and (CEIE 305C, L305, 331C or L331) and (CEIE 370C) and (CEIE 404).
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 497: Applied Engineering Abroad.** 3 credits.
Introduces students to applications of engineering processes outside USA. The students will gain hands-on project management, critical thinking, intercultural and career skills by exploring engineering aspects such as auto assembly, airliner manufacturing, metropolitan infrastructure, and bridge designs. By visiting technology museums, students will learn to appreciate the rich history of the country’s technology and manufacturing. Offered by Civil, Environ & Infrastr Engr (p. 1145). Limited to two attempts. Equivalent to ME 497, SYST 497.

**Mason Core:** Global Understanding (p. 137)

**Registration Restrictions:**
Enrollment limited to students with a class of Junior, Senior Plus or Senior.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 498: Independent Study in Civil Engineering.** 1-3 credits.
Directed self-study of special topics of current interest. Notes: May be repeated if topics substantially differ. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the term.

**Recommended Prerequisite:** Permission of the Department Chair.

**Registration Restrictions:**
Enrollment limited to students with a class of Junior or Senior.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CEIE 499: Special Topics in Civil Engineering.** 1-3 credits.
Varies with nature of topic. Topics of special interest to undergraduates. Notes: May be repeated if topics substantially differ. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the term.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
Additional Course Details: Title varies by section and/or semester

500 Level Courses

CEIE 501: Sustainable Development. 3 credits. Introduction to sustainability concepts and terminology including the development and use of sustainability indices. Exploration of sustainability tools and frameworks such as the Leadership in Energy and Environmental Design (LEED) Green Building Rating System, American Institute of Architects Sustainable Design Resources Guide, and the Natural Step (TNS) Framework. Methods for evaluation of sustainable sites, water/energy efficiency, sustainable materials and resources, and indoor air quality are presented. Designated a Green Leaf Course. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

CEIE 510: Geographic Information Systems in Engineering. 3 credits. Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other engineering-related decision situations. Introduces methods and technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Knowledge of computer programming and databases or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

CEIE 512: Structural Steel Design. 3 credits. Covers analysis and design of structural steel members including tension members, compression members, bolted and welded connections, columns, beams, and beam-columns. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: CEIE 311

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Enrollment is limited to Graduate, Non-Degree or Undergraduate level students. Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

CEIE 513: Reinforced Concrete Design. 3 credits. Covers analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure and shear; determining serviceability limits; detailing reinforcing steel bars. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: CEIE 311

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Enrollment is limited to Graduate, Non-Degree or Undergraduate level students. Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

CEIE 524: Introduction to Bridge Engineering. 3 credits. A balanced theoretical and practical insight into the art and science of bridge engineering. Various methodologies of bridge design and evaluation are investigated, including constructability reviews. Bridges of steel, reinforced concrete, and pre-stressed concrete materials are included. Short-span composites; major innovation and low cost solutions targeted at aging infrastructure. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE; CEIE 512 or CEIE 513 or equivalent.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 525: Structural Evaluation and Rehabilitation.** 3 credits.
Structural condition survey and evaluation for strength and serviceability of existing structures including foundation elements; older building practices and materials; criteria for rehabilitation; retrofit techniques for change in function, loading, and seismic forces. Historic preservation issues. Repair, remediation, and structural strengthening methods and current trends. Carbon fiber external P.T. Material selection criteria, including mechanical and environmental factors. Cost/value feasibility analysis; estimating remedial construction costs; engineering oversight of rehabilitation work. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 526: Advanced Steel Design.** 3 credits.
Behavior, strength, and design of vertical steel structures using the LRFD approach; plate girders, composite beams, welded built-up columns, bolted and welded connections, beam-columns, and torsion; introduction to plastic analysis and its application to members and vertical structures; erection procedure and methods field inspection issues; unique properties of high strength steels. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE; CEIE 512 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 532: Foundation Design.** 3 credits.
Introduction to various principles and practice of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes the study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations for deep foundations. Offered by Civil, Environ & Infrasr Engr (p. 1145). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 535: Engineering Geology.** 3 credits.
Introduction to formation and occurrence of earth materials -rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance. Offered by Civil, Environ & Infrasr Engr (p. 1145). May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 542: Open Channel Flow.** 3 credits.
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; modeling and computer applications in open channel analysis and design. Offered by Civil, Environ & Infrasr Engr (p. 1145). May not be repeated for credit.

**Recommended Prerequisite:** A course in hydraulics or fluid mechanics.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 550: Environmental Engineering Systems.** 3 credits.
Introduces the concepts and applications of systems analysis in environmental engineering. Tools and methodologies of systems analysis are applied to improve the understanding and resolution of complex environmental engineering problems related to air, soil, and water quality and pollution. Scientific, engineering, political, social, legal, regulatory, medical, economic, and financial impacts of environmental engineering decisions are considered. Offered by Civil, Environ & Infrasr Engr (p. 1145). May not be repeated for credit.

**Recommended Prerequisite:** CEIE 355.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 553: Water and Wastewater Treatment Processes.** 3 credits.
Studies unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 556: Environmental Law.** 3 credits.
Introductory course in the study of environmental laws as they pertain to urban systems infrastructure management. Reviews the National Environmental Policy Act, Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, and other environmentally related legislation. Also reviews laws for allocation of surface and groundwater supplies, and reviews environmental law databases. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduation Deadline Extended, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 560: Public Transportation Systems.** 3 credits.
Analyzes public transportation systems in terms of their role in urban transportation. Topics include history of public transportation in the United States, quantitative performance attributes of different modes, analytical techniques for planning and operation, and management and administrative concepts. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Recommended Prerequisite:** CEIE 360.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 561: Traffic Engineering.** 3 credits.
Covers elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Recommended Prerequisite:** CEIE 365.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 562: Urban Transportation Planning.** 3 credits.
Covers technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation and distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.
Recommended Prerequisite: CEIE 360.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 571: Construction Administration. 3 credits.
Examines the principals of project planning and administration using modern specification and project delivery techniques. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 573: Legal Aspects of the Construction Process. 3 credits.
Examines the legal principles associated with the construction process. Introduces legal and project delivery concepts and review of the rights and responsibilities of construction project participants. Topics include the application of differing site conditions clauses, delay claims, termination rights, remedies for breach of contract, and dispute resolution techniques. Also includes review of industry legal issues, such as principles of risk management, LEED liability, and design-build contracts. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 575: Design for Constructability. 3 credits.
Systems design of structures to consider foundations, structures and constructability; foundation alternatives; structural design to simplify erection; prefabrication, modulation of structures; material handling on a construction site; crane selection and placement; temporary works. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 576: Construction Cost Estimating. 3 credits.
Overview of cost estimating and financial management in the modern construction industry. Techniques and software applications for construction take-offs, bidding, bonding, insurance, equipment ownership, material and labor costing. Additional topics include: cost recovery planning; budgeting, forecasting, acquisition, cast flow management, managerial accounting concepts, and taxes. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

600 Level Courses

CEIE 601: Infrastructure Modeling. 3 credits.
Concepts of modeling for infrastructure engineering systems. Covers deterministic and stochastic modeling, multi-objective decision-making, and solution algorithms for civil infrastructure problems. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 605: Research Methods in Civil Engineering. 3 credits.
Familiarizes students with the process of rigorous research in civil engineering by providing a strong background in research methods, such as critical thinking, experimental design (idea, concept, design, development), writing a scientific article, and interpretation of results (uncertainty quantification, assumptions, etc.). Introduces common quantitative methods in civil engineering research such as descriptive and inferential statistics, data assimilation, and hypothesis testing. Encourages critical thinking and collaboration among students from different civil engineering disciplines. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 607: Public Infrastructure Management and Finance. 3 credits.
Current and projected outlook for managing and financing public works infrastructure including, transportation, public utilities, water and waste water facilities, energy, and public buildings; Infrastructure management including the impact of built infrastructure on the environment, tracking and improving infrastructure performance, government regulations, emerging technologies, social concerns, and the impacts of disasters; Infrastructure finance including public and private sources of capital, special financing districts, bond markets, federal and state grants, public-private partnerships, and design-build project delivery. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: STAT 344.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)
CEIE 611: Advanced Structural Analysis. 3 credits.
Application of the stiffness method in planar trusses, beams, planar frames, curved beams, and three-dimensional structures; Introduction to non-linear structural analysis with emphasis on geometric non-linearity. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 612: Structural Mechanics. 3 credits.
Covers the foundations of structural modeling and theories of elasticity. Topics include: multidimensional theories of stress and strain, governing equations of elasticity, numerical solution techniques, material failure criteria, basics of nonlinear analysis. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 613: Structural Dynamics. 3 credits.
This course covers the fundamental principles necessary to analyze the responses of structures subjected to dynamic loads such as blast, earthquake, rotating machinery, etc. Idealized linear structural models subjected to free vibrations, harmonic vibrations, and impulsive loadings are presented. Practical applications of structural dynamics for solving simplified problems in blast and earthquake engineering are included. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Differential Equations.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 619: Special Topics in Structural Engineering. 0-3 credits.
Advanced topics in recently developed areas of structural engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the term.

Recommended Prerequisite: Graduate standing in CEIE or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CEIE 620: Intelligent Structural Systems. 3 credits.
Covers modern "smart" structures, structural health monitoring, and intelligent inspection technologies. Laboratory exercises with sensing and data acquisition systems. Applied data filtering and pattern recognition (machine learning). Modern image analysis and inspection techniques. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 623: Advanced Reinforced Concrete Design. 3 credits.
Covers the behavior, analysis and design of two-way reinforced concrete slabs; design of long columns including slenderness effects; structural design of isolated footings, combined footings and pile caps; design of deep beams using the strut-and-tie models; introduction bearing, retaining and shear wall designs. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Reinforced Concrete Design.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 634: Groundwater and Geoenvironmental Design. 3 credits.
Equations of groundwater flow and seepage, groundwater site investigations, parameter determination, flow nets, well design and aquifer testing, design of dewatering systems, seepage control. Conservative and non-conservative pollutant transport in groundwater, transport processes, modeling techniques for flow and transport. Groundwater remediation technologies, Brownfields and land revitalization. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 635: Advanced Soil Mechanics. 3 credits.
Consolidation of soil: primary and secondary; and rate. Soil strength in the framework of Critical State Soil Mechanics: normally consolidated, lightly and heavily overconsolidated, drained and undrained, elastic and plastic deformation. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 636: Sources of Geotechnical Data. 3 credits.
Resources for conducting desk top studies; tools for field investigations; subsurface investigations (options and selection of techniques); laboratory testing of soil and rock; accepted testing procedures; typical values; empirical relationships between properties and testing techniques; risk and uncertainty; use of lab testing, insitu strength testing, and empirical methods in design; identifying slickensides. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 638: Advanced Foundation Design. 3 credits.
Design of shallow and deep foundations for civil engineering structures, including time rate of consolidation settlement, stress distribution, elastic settlement, and bearing capacity. Driven piles and drilled shafts subjected to axial and lateral loading, both single and group action. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 639: Special Topics in Geotechnical Engineering. 1-3 credits.
Advanced topics in recently developed areas of geotechnical engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the term.

Recommended Prerequisite: Graduate standing in CEIE or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CEIE 641: Water Resources Engineering I: Principles and Practice. 3 credits.
Introduction to the principles of hydrology and hydraulics and their application to the planning, design and management of modern water resources. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate standing in CEIE; CEIE 340 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 642: Flood Hazards Engineering. 3 credits.
Introduction to the principles of flood hazards engineering. Theory and practice of the application of hydrology and hydraulics to flood hazards delineation. Theory and practice of the application of geospatial analyses to support flood hazards modeling. Application of computational methods to support planning, design and management of flood hazards. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate standing in CEIE and CEIE 340 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 643: Coastal Flood Hazards. 3 credits.
Introduction to the theory and practice of coastal flooding and hazards engineering. Topics include the theory of hurricane storm surges, tides, coastal hydromorphastics, waves and coastal processes. Use of the Surface Water Modeling System (SMS) and the Advanced Circulation Model (ADCIRC) for coastal flooding analysis. Introduction to High Performance Computing (HPC) modeling of hurricane storm surge. Introduction to Geographic Information Systems (GIS) applications to support coastal flood modeling and hazard analysis. Applications of coastal engineering to support coastal flood mapping and hazard prevention. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 644: Groundwater Systems Modeling. 3 credits.
Introduces groundwater hydrology and modeling, including quantity and quality aspects. Topics include characterization of subsurface regime; well hydraulics; consideration of two-dimensional steady and unsteady-state flows; exploration of modeling approaches; simulation and optimization modeling; contaminant transport; parameter estimation; and design of systems to control groundwater quantity and quality. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: Graduate standing in CEIE and CEIE 340 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 649: Special Topics in Water Resources Engineering.** 0-3 credits.
Advanced topics in recently developed areas of water resources engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the term.

**Recommended Prerequisite:** Graduate standing in CEIE or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CEIE 657: Environmental Engineering Microbiology.** 3 credits.
Addresses the fundamental aspects of microbial physiology and ecology and their application to environmental engineering processes. Specific topics include cell structure and function, energetics, metabolism, enzyme and growth kinetics, microbial/environmental interactions (e.g. interactions with organic pollutants), biogeochemical cycles, and an introduction to engineering applications including bioremediation, wastewater treatment, biosensors and microbial fuel cells. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 658: Water Quality.** 3 credits.
This course addresses the physical, chemical and biological principles that define water quality. Mathematical and chemical models are formulated and employed to predict fate and transport of contaminants in both surface and groundwater. Laboratory and field-work are required. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 659: Environmental Engineering Microbiology.** 3 credits.
Addresses the fundamental aspects of microbial physiology and ecology and their application to environmental engineering processes. Specific topics include cell structure and function, energetics, metabolism, enzyme and growth kinetics, microbial/environmental interactions (e.g. interactions with organic pollutants), biogeochemical cycles, and an introduction to engineering applications including bioremediation, wastewater treatment, biosensors and microbial fuel cells. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 662: Travel Demand Modeling.** 3 credits.
Covers elements of Travel Demand Modeling at considerable detail. Design and execution of travel surveys; analysis of survey data; economic and demographic data and analysis; development of classification, regression and discrete choice models for four-step and activity based travel demand models; spatial analysis of data; matrix methods; validation and calibration of models; traffic and transit assignment methods and their application; select-link anal sis. Hands-on modeling assignments. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

CEIE 663: Intelligent Transportation Systems. 3 credits.
Advanced transportation system operations and safety through the use of wireless and wireline communications; integrated transportation systems; in-vehicle technologies; industry standards; and systems architecture. Provides skills to apply advanced technologies to transportation systems to improve operational and safety performance. Provides nontraditional tools to address issues of congestion and improved safety performance. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Recommended Prerequisite: CEIE 561 or 562.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

CEIE 664: Transportation Engineering and the Environment. 3 credits.
Introduction to transportation and air quality; Clean Air Act; greenhouse gases, climate change, and modeling for greenhouse gases; travel activity; The NEPA process for transportation projects; road transportation and noise; noise abatement. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

CEIE 665: Travel Survey Methods and Data Analysis. 3 credits.
Covers the concept and practice of travel survey methods; national household travel survey; Census transportation survey and products; travel diary based, roadside, mail-in and web-based and GPS-based travel surveys; longitudinal vs. cross-sectional surveys; stated-preference survey; interactive and adaptive survey method; transit survey methods; special generator surveys; sampling approach and representativeness analysis; econometric data analysis; panel data; self-selection issues; other data mining methods; data security, privacy, IRB process, and ethics. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

CEIE 667: Multi-modal Transportation Systems. 3 credits.
Topical coverage of freight and logistics; non-motorized transportation considerations; and public transit planning. Freight topics include demand and supply modeling concepts; freight flow data sources; and truck size and weight policies. Bicycle and pedestrian planning considering traveler response to facility and policy improvements and identifying common resources for addressing non-motorized project concerns. Public transportation planning coverage including mass transit technology typologies, corridor planning and operations concepts, and finance and public policy issues, including environmental justice. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

CEIE 668: Transportation Economics. 3 credits.
Application of micro- and macro-economic theories to transportation system analysis; interaction between transportation system, land use, and regional economics; mobility, accessibility, and system reliability; market equilibrium; pricing, willingness to pay, and welfare analysis; cost benefit analysis; project finance. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.
**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CEIE 669: Special Topics in Transportation Engineering.** 0-3 credits.
Advanced topics in recently developed areas of transportation engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the term.

**Recommended Prerequisite:** Graduate standing in CEIE or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CEIE 679: Special Topics in Construction Management.** 0-3 credits.
Advanced topics in recently developed areas of construction management. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the term.

**Recommended Prerequisite:** Graduate standing in CEIE or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CEIE 686: Transportation System Security and Safety.** 3 credits.
Focuses on critical transportation systems infrastructure and operations, and technologies for predicting and managing damage and disruptions caused by potential threats, including natural and technological disasters and terrorist threats. Includes asset management, methodologies for assessing vulnerabilities, potential impact of damage and disruption, applying state-of-the-art technologies and R&D processes for harnessing best analysis methods, and technologies for hardening transportation infrastructure systems. Includes sensing and surveillance using satellite and aerial remote sensing imagery, application of GIS and spatial information technologies, information and communication, intelligent transportation systems, hardening systems, and making intelligent choices for implementing technology advances to transportation security and safety. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Recommended Prerequisite:** BS in Engineering, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CEIE 688: Water and Wastewater Systems Security.** 3 credits.
Examines overall security of water and wastewater systems. Covers theory and methods to define water and wastewater infrastructure as physical and organizational systems. Explores concepts of infrastructure systems security; identifies actors, interactions in organizational infrastructure, and threats to water and wastewater infrastructure; describes behavior of physical and organizational infrastructures under stress; examines history of threats or attacks against water and wastewater systems; and explores evolution of design, operations, and maintenance paradigms in response to changes in threats. Covers proactive responses to security threats through vulnerability assessments, and models of organizational and physical infrastructure system. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Recommended Prerequisite:** BS in Civil Engineering or CEIE 440 and CEIE 455.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CEIE 689: Water and Wastewater Systems Security.** 3 credits.
Examines overall security of water and wastewater systems. Covers theory and methods to define water and wastewater infrastructure as physical and organizational systems. Explores concepts of infrastructure systems security; identifies actors, interactions in organizational infrastructure, and threats to water and wastewater infrastructure; describes behavior of physical and organizational infrastructures under stress; examines history of threats or attacks against water and wastewater systems; and explores evolution of design, operations, and maintenance paradigms in response to changes in threats. Covers proactive responses to security threats through vulnerability assessments, and models of organizational and physical infrastructure system. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Recommended Prerequisite:** BS in Civil Engineering or CEIE 440 and CEIE 455.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
SCHEDULE TYPE: Lecture

GRADING:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 690: Topics in Civil Engineering. 3 credits.
Topics not covered in the regular civil engineering offerings. Notes: Course content may vary each semester. Course may be repeated with change in topic. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the term.

SPECIALIZED DESIGNATION: Green Leaf Course

REGISTRATION RESTRICTIONS:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

SCHEDULE TYPE: Lecture

GRADING:
This course is graded on the Graduate Regular scale. (p. 82)

ADDITIONAL COURSE DETAILS: Title varies by section and/or semester

700 LEVEL COURSES

Introduces concepts, applications, and tools of systems analysis for water resources planning, management, and design. Problems including river basin planning, real-time hydro system operations, water quality management, capacity expansion, urban drainage network design, and sanitary sewer design used to illustrate applications of systems analysis. Tools include optimization and simulation modeling and knowledge-based systems. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

RECOMMENDED PREREQUISITE: Graduate Standing in CEIE; CEIE641 or equivalent.

REGISTRATION RESTRICTIONS:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

SCHEDULE TYPE: Lecture

GRADING:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 762: Network Models for Transportation Planning. 3 credits.
Covers network models for transportation systems analysis - theory, mathematical structure, and applications of equilibrium, iterative, incremental, dynamic and stochastic equilibrium models. Also covers data structures and heuristic methods for computer implementation of various algorithms such as shortest path and direction search algorithms; specialty network topics such as tracking and prohibition of turn movements, k-shortest path algorithms and select-link analysis. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

RECOMMENDED PREREQUISITE: CEIE 562 or 660; CEIE 601.

REGISTRATION RESTRICTIONS:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

SCHEDULE TYPE: Lecture

GRADING:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 763: Discrete Choice Analysis in Transportation. 3 credits.
Utility theory and individual choice behavior; Binary choice model; Multinomial choice model; Characteristics of Probit and Logit models; Aggregate forecasting techniques; Travel survey and sampling; Test and choice of model structure; Correlation and nested Logit Model, Advanced models and estimation techniques; Travel, route choice and car ownership models. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

RECOMMENDED PREREQUISITE: CEIE 561.

RECOMMENDED COREQUISITE: CEIE 601.

REGISTRATION RESTRICTIONS:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

SCHEDULE TYPE: Lecture

GRADING:
This course is graded on the Graduate Regular scale. (p. 82)
**CEIE 795: Civil and Infrastructure Engineering Seminar.** 0 credits.
Invited speakers, faculty, and CEIE graduate students lecture on current topics and research. Fulfills seminar requirement for MS in civil and infrastructure engineering. Notes: Students must enroll in CEIE 795 each semester (fall and spring) for the duration of their MS studies. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CEIE 796: Directed Reading.** 1-3 credits.
Reading on specific topic under direction of faculty member. Notes: May be repeated with change in topic. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the degree.

**Recommended Prerequisite:** Graduate standing and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 798: Research Project in Civil Engineering.** 3 credits.
Analyzes and investigates contemporary problem in civil, environmental, and infrastructure engineering. Requires prior approval by faculty member who supervises student's work. Notes: Written report also required. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

**Recommended Corequisite:** CEIE 795.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 799: Master's Thesis.** 1-6 credits.
Research project chosen and completed under guidance of graduate faculty member that results in technical report acceptable to three-

**Policy and Gov or Volgenau School of Engineering colleges.**

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

---

**800 Level Courses**

**CEIE 800: Civil, Environmental, and Infrastructure Engineering Colloquium.** 1 credit.
Seminar series required of Civil and Infrastructure PhD students. Features variety of speakers from universities, government, and private sectors. Topics include civil engineering technologies, research advancements, and policies. Doctoral students take 2 credits of CEIE 800 and make a presentation of their dissertation research at the seminar. No more than 1 credit per semester may be taken. Students eligible to register upon successful completion of qualifying exams. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the degree for a maximum 2 credits.

**Registration Restrictions:**
Enrollment limited to students in the VS-PHD-CEIE program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CEIE 890: Special Topics in Urban Transportation.** 3 credits.
Includes traffic safety analysis, simulation in transportation, intelligent transportation systems, advanced public transportation systems, congestion and travel demand management, geographic information systems and information technology, and innovative refinancing and public-private partnerships. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** CEIE 560 and 660 or equivalent; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
Additional Course Details: Title varies by section and/or semester

CEIE 892: Special Topics in Environmental and Water Resource Systems Engineering. 3 credits.
Possible topics include studies in waste minimization; pollution prevention; hazardous waste management; wastewater management; air pollution control; solid waste management; environmental decision making; sustainability; water resource and environmental economics; wetlands management, design and construction; groundwater contamination modeling; stochastic hydrology; river basin planning and management; and water quality modeling. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: CEIE 601

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CEIE 894: Design and Inventive Engineering. 3 credits.
Topics include Fundamentals: successful intelligence and creative intelligence, creative class, the Medici Effect, the Renaissance Man and Da Vinci's Seven Principles, engineering creativity; Design Engineering: system designing and architecting, designing as search, evolutionary designing, constraint search, constructive induction, Axiomatic and Inferential Design Theories; Inventive Engineering: Brainstorming, Synectics, Morphological Analysis, TRIZ, Visual Thinking, Inventive Design in Practice, Project Presentations. Notes: This is a transdisciplinary course focused on creativity in engineering and science. Open to all graduate students in the Volgenau School of IT and Engineering; graduate students from other schools are encouraged to register with the instructor's permission. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CEIE 896: Civil Engineering Research Topics. 3 credits.
Reading on specific topic under direction of faculty member. May be repeated with change in topic. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission into CEIE PhD program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a class of Advanced to Candidacy.

Registration Restrictions:
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

900 Level Courses

CEIE 990: Civil and Infrastructure Dissertation Topic Presentation. 1 credit.
Opportunity for PhD students to present research proposal for critique. Covers presentation of research topic for PhD in Civil and Infrastructure Engineering. Students complete dissertation research proposal. May be repeated with change in topic, but degree credit is given only once. Offered by Civil, Environ & Infrastr Engr (p. 1145). May not be repeated for credit. Equivalent to STAT 990.

Recommended Prerequisite: Graduate Standing; completion of all course work required for PhD in Civil and Infrastructure Engineering or permission of instructor.

Registration Restrictions:
Enrollment limited to students in the VS-PHD-CEIE program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Research

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

CEIE 998: Doctoral Dissertation Proposal. 1-12 credits.
Work on research proposal that forms basis for doctoral dissertation. May be repeated for credit. Notes: No more than 24 credits of CEIE 998 and 999 may be applied to doctoral degree requirements. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the degree.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

CEIE 999: Doctoral Dissertation. 1-12 credits.
Formal record of commitment to doctoral dissertation research under direction of faculty member in civil engineering and infrastructure engineering. May be repeated in the degree, but no more than 24 combined credits of CEIE 998 and CEIE 999 may be applied to the doctoral degree requirements. Offered by Civil, Environ & Infrastr Engr (p. 1145). May be repeated within the degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
Classics (CLAS)

200 Level Courses

CLAS 240: Greek and Latin Elements in English. 3 credits.
Studies formation of English vocabulary derived from Greek and Latin prefixes, stems, and suffixes to increase word power in English (vocabulary, style). Special emphasis on bioscientific, medical, and legal terminology. Intended for native and non-native speakers of English. Literary texts illustrate word analyses, vocabulary uses. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Recommended Prerequisite: ENGL 101/ENGH 101, or equivalent or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

CLAS 250: Classical Mythology. 3 credits.
Illustrates role of classical myths in classical and modern literature and art. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Mason Core: Literature (p. 137)
Recommended Prerequisite: ENGL 101/ENGH 101, equivalent, or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

CLAS 260: The Legacy of Greece and Rome. 3 credits.
Introduces history, culture, and literature of Greece and Rome through close readings of central passages from classical literature dealing with some of the most important aspects of human existence. Illustrates importance of classical antiquity for the Western tradition. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Mason Core: Literature (p. 137)
Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

300 Level Courses

CLAS 330: Roman Law and Society. 3 credits.
Introduces the Roman legal system, from the Law of the Twelve Tables to Justinian's Digest. Explores the fundamental concepts of Roman Law and its importance for Roman society and the legal history of the West. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

CLAS 340: Greek and Roman Epic. 3 credits.
Examines development of classical epic as genre, from beginnings with Homer to transformations in the works of later Greek and Roman authors. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Mason Core: Literature (p. 137)
Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

CLAS 350: Greek and Roman Tragedy. 3 credits.
Follows development of tragedy from its origins to the works of Aeschylus, Sophocles, and Euripides, and its reappearance in the Roman world in the tragedies of Seneca. Considers influence of Greek tragedy on later cultures. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Mason Core: Literature (p. 137)
Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Taught in English

CLAS 360: Greek and Roman Comedy. 3 credits.
Studies forms, contexts, and developments of comedy as a dramatic form in Greco-Roman world. Traces development of New Comedy in Hellenistic age and translation and adaptation of New Comedy by Roman dramatists Plautus and Terence. Notes: Coursework in English. Offered by Modern & Classical Languages (p. 419). May not be repeated for credit.

Mason Core: Literature (p. 137)
Recommended Prerequisite: ENGL 101/ENGH 101 or equivalent or permission of instructor.
**Climate Dynamics (CLIM)**

**100 Level Courses**

**CLIM 101: Global Warming: Weather, Climate, and Society.** 3 credits. Survey of the scientific and societal issues associated with weather and climate variability and change. Examines physical phenomena observed in the Earth's weather and climate, providing sufficient scientific and technical background to enable students to critically examine arguments being discussed by policymakers and the public at large. Also reviews the current debate on climate change from a scientific point of view with a focus on those aspects that have the largest potential impact on global society. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

**Mason Core:** Natural Science Overview, Encore:Sustainability (p. 137)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CLIM 102: Introduction to Global Climate Change Science.** 4 credits. The scientific basis of computer models that simulate past and present climate and predict future climate change; How complex models are built, tested, and interpreted to better understand physical, chemical, and biological processes; how uncertainty is managed. Students conduct laboratory experiments through an online interface and apply results to policy and planning. Designated a Green Leaf Course. Notes: Computer models are used in the lab. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

**Mason Core:** Natural Science with Lab, Encore:Sustainability (p. 137)

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** Basic math skills (Geometry, Algebra).

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CLIM 111: Introduction to the Fundamentals of Atmospheric Science.** 3 credits. An overview of the Earth's atmosphere, its history, and the physical and chemical processes that determine its characteristics. The focus is on key concepts from thermodynamics, radiation, chemistry, and dynamics that are essential for understanding the state, variability, and long term evolution of the atmosphere, especially in the context of comparisons with other planetary atmospheres. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit. Equivalent to PHYS 111.

**Mason Core:** Natural Science with Lab, Encore:Sustainability (p. 137)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CLIM 112: Introduction to the Fundamentals of Atmospheric Science Lab.** 1 credit. Laboratory course associated with PHYS 111/CLIM 111. Study of the Earth's atmosphere based on concepts taken from thermodynamics, radiation transport, chemistry, and dynamics. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit. Equivalent to PHYS 112.

**Mason Core:** Natural Science with Lab, Encore:Sustainability (p. 137)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**300 Level Courses**

**CLIM 301: Weather Analysis and Prediction.** 4 credits. Large-scale behavior of mid-latitude weather systems. Includes coupling of synoptic motion to mesoscale processes that lead to significant weather events. Introduces the observational network, numerical weather models, and prediction. Laboratory portion gives practical experience in weather analysis, prediction, and technology currently used for
visualization and analysis. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

**Recommended Prerequisite:** MATH 113 or equivalent; one of CLIM/PHYS 111/112 or EOS 121 or GGS 121.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CLIM 312:** Physical Climatology. 3 credits.

**Recommended Prerequisite:** CLIM/PHYS 111/112 or GGS 121; and PHYS 243,244, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CLIM 314:** Severe and Extreme Weather. 3 credits.
Behavior of weather events ranging from small scale (e.g., thunderstorms and tornados) to mesoscale (e.g., fronts and hurricanes). Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit. Equivalent to GGS 314.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** MATH 113 or equivalent; CLIM/PHYS 111/112 or EOS 121 or GGS 121.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CLIM 319:** Air Pollution. 3 credits.
Description of major types of air pollution and introduction to how their characteristics are influenced by interaction with the atmosphere. Topics include sources and distribution of pollution from local to global scales, effects of radiation and wind on pollution, modeling of plume dispersion, and pollution effects on climate. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** CLIM 111 or GGS 121.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CLIM 390:** Topics in Climate Research. 1-4 credits.
Selected topics not covered in fixed content courses. May be included for credit by AOES majors in the 45 credits of courses required for BS degree. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 15 credits of AOES courses within concentration.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

### 400 Level Courses

**CLIM 408:** Senior Research. 3 credits.
Independent research under guidance of faculty member on a research project in numerical, experimental, observational, or theoretical atmospheric or climate-related research. A written report on the project is required. Notes: May be repeated with department permission. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** 15 credits of AOES courses within major.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CLIM 409:** Research Internship. 3 credits.
On-the-job experience for AOES majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical research, and prepare a written report at the end of the internship. Notes: May be repeated with department permission. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 75 credits. 15 credits of courses in major and permission of department.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CLIM 411:** Atmospheric Dynamics. 3 credits.
Observational bases and fundamentals of fluid dynamic principle for understanding atmospheric motions across multiple spatial and temporal scales; covers basic conservation laws of mass, momentum, and energy; concepts of circulation and vorticity; balanced atmospheric flows, e.g. geostrophic wind and shear, thermal wind; quasi-geostrophic and isentropic potential vorticity analysis for mid-latitude cyclones and fronts. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

**Recommended Prerequisite:** CLIM 111 and MATH 213, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
CLIM 412: Physical Oceanography. 3 credits.
Reviews global patterns of temperature, salinity, currents and waves in the world's oceans and how these patterns influence marine biota, climate, and human activity. Introduces key concepts which explain physical features of the ocean ranging from microscopic turbulence to global circulation. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit. Equivalent to GEOL 412.

Recommended Prerequisite: CHEM 331 and 332 or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

CLIM 429: Atmospheric Thermodynamics. 3 credits.
Thermodynamics of the atmosphere, properties of dry and moist air, air parcel as a thermodynamic system, atmospheric stability and convection, cloud formation and stability indices. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: CLIM 111, MATH 114 and PHYS 260; or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

CLIM 438: Atmospheric Chemistry. 3 credits.
Reviews fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change. Includes some review of extraterrestrial atmospheric chemistry. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit. Equivalent to CHEM 438.

Recommended Prerequisite: CHEM 331 and 332 or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

CLIM 440: Climate Dynamics. 3 credits.
Structure, dynamics and thermodynamics of atmospheric and oceanic circulations that maintain the climate. Role of the large scale transport of energy, moisture and angular momentum. Relationships of large scale circulation to weather and weather extremes, and implications for past and future climates. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: MATH 213, MATH 214, and CLIM 411.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

CLIM 456: Introduction to Atmospheric Radiation. 3 credits.
Provides fundamentals, physical understanding and quantitative analysis of radiative transfer in the atmosphere, discusses radiation processes-reflection, refraction, absorption, transmission, emission, and scattering and introduces tools for atmospheric radiative transfer. Provide students the basics for more advanced topics such as remote sensing or satellite meteorology. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit. Equivalent to GGS 456.

Recommended Prerequisite: CLIM 111, MATH 114, and PHYS 260 or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

CLIM 470: Numerical Weather Prediction. 3 credits.
Concepts and techniques of numerical prediction of weather, including the numerical models used and the rationale for large suites of meteorological forecasts. Sources of errors in the forecast: errors in the initial conditions and in the numerical weather prediction models. Interpretation of model output. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: MATH 213, MATH 214, and CLIM 411.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

CLIM 512: Physical Oceanography. 3 credits.
Course describes the global patterns of temperature, salinity, currents and waves in the world's oceans, and how these patterns influence marine biota, climate, and human activity. Course introduces key concepts which explain physical feature of the ocean ranging from microscopic turbulence to global circulation. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: MATH 113 or MATH 115; PHYS 160 or PHYS 243; or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale. (p. 82)

600 Level Courses

CLIM 690: Scientific Basis of Climate Change. 3 credits.
A rigorous treatment of global warming, especially with regard to anthropogenic causes, based on the IPCC 4th Assessment Report "The Physical Science Basis". Topics include 1) Overview of observed climate, 2) Variability of climate, 3) Modeling of climate response to greenhouse gas forcing, 4) Greenhouse gases, chemistry, and aerosols,

**Recommended Prerequisite:** BS or MS in a natural science or engineering, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**700 Level Courses**

**CLIM 700: Climate Comprehensive Exam.** 1 credit.
Preparation for and completion of written comprehensive exam, on a climate-related subject, within AOES department. The exam is part of the degree requirements in lieu of writing a master’s thesis. Instructor should be the chair of the examination committee. The exam committee will specify exam content. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May be repeated within the degree for a maximum 2 credits.

**Recommended Prerequisite:** At least 15 graduate credits, approved project proposal, and permission of major advisor or chair of the examination committee.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CLIM 710: Introduction to Atmospheric Dynamics.** 3 credits.
Covers basic conservation laws of mass, momentum, and energy and scaling analysis of equation of motion and thermodynamic equation. Discusses balanced flows in atmosphere, such as geostrophic wind and its vertical shear, and thermal wind relationship. Also explores circulation and vorticity; role of atmospheric boundary layer in mass, momentum, and energy transfer; synoptic scale motions; and role of gravity and Rossby waves in controlling general circulation of atmosphere. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

**Recommended Prerequisite:** BS or MS in mathematics or a physical science, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
This course is graded on the Graduate Regular scale. (p. 82)

CLIM 714: Land-Climate Interactions. 3 credits. 
Interdisciplinary course providing detailed description of surface energy and water balance over land and radiative and turbulent transfer. Introduces numerical techniques for modeling land surface and applications in weather, climate, and hydrologic forecasting and simulation. Includes hands-on experience with land surface models in computer laboratory, including sensitivity experiments to reinforce theoretical concepts. Exposure to contemporary research through reading and reviewing seminal journal papers. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: BS or MS in mathematics or physical science, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CLIM 715: Numerical Methods for Climate Modeling. 3 credits. 
Foundation and theory of computational methods for atmosphere and ocean modeling, with special emphasis on finite-difference and spectral methods. Topics include accuracy, consistency, convergence and stability; time stepping schemes; nonlinear computational stability; energy and enstrophy conserving schemes for momentum equations; staggered and curvilinear grids; alternate vertical coordinate systems; implicit and split-explicit barotropic mode solution; pressure gradient errors and vorticity constraints; spectral methods for atmospheric models; and treatment of model physics. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: CLIM 712 or 711 or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CLIM 750: Geophysical Fluid Dynamics. 3 credits. 
Introduces geophysical fluid dynamics, the study of rotating stratified flows. Covers hydrostatics; equations of motion, gravity wave dynamics, and stratified flow; effects of rotation, midlatitude dynamics, Rossby number and quasigeostrophic expansion; beta plane approximation; and equatorial Kelvin and Rossby waves. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: CLIM 711, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CLIM 751: Predictability and Prediction of Weather and Climate. 3 credits. 
Covers predictability and seamless prediction of weather and climate for timescales ranging from days to decades. Studies limitations to predictability due to chaos, and possible sources of predictability due to slowly varying surface boundary conditions produced by interactions among atmospheres, ocean and land system. Discusses predictability of droughts and floods, monsoons, ENSO, decadal variations and climate change. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: CLIM 711B-.

B- Requires minimum grade of B-.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CLIM 752: Ocean General Circulation. 3 credits. 
Description and theory of large-scale ocean circulation and how it affects climate. Focus is on ubiquitous flow structures such as gyres, equatorial currents, and meridional overturning cells. Examines how the circulation follows from wind and thermohaline forcing, as well as physical principles. The influence of the circulation on heat transport and climate variability is also discussed. Conceptual guideposts include barotropic gyres, Ekman cells, potential vorticity, western intensification, the interplay of gravity and the Earth's rotation, advective-diffusive balance, multiple flow states, and Rossby waves. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: CLIM 712 or 711 or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CLIM 753: General Circulation of the Atmosphere. 3 credits. 
Overview and several theoretical perspectives of atmospheric transport of energy, moisture, and angular momentum, and how these processes fundamentally affect the climate on various time scales. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: CLIM 710 and CLIM 711.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CLIM 754: Elements of the Tropical Climate System. 3 credits.
Observations and dynamics of key processes of tropical weather and climate. Topics include: structure of the tropical atmosphere and ocean, convection, dynamics of tropical waves in the atmosphere and ocean, tropical intraseasonal variability, tropical the global monsoons, cyclones, and stratospheric quasi-biennial oscillation. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: CLIM 711.

Recommended Corequisite: CLIM 710.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CLIM 759: Topics in Climate Dynamics. 3 credits.
Covers selected topics in climate dynamics not covered in fixed-content courses. Notes: May be repeated for credit when offered with different content. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CLIM 762: Statistical Methods in Climate Research. 3 credits.
Introduction to a core set of statistical methods that have proven useful to modern climate and predictability research. Topics include detecting and attributing climate change, describing climate variability with empirical orthogonal functions, statistical forecasting with regression and time series models, and identifying coupled patterns of variability with canonical correlation analysis. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: Undergraduate level linear algebra and STAT 344 (or equivalent), or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CLIM 763: Advanced Statistical Methods in Climate Research. 3 credits.
Introduction to multivariate statistical techniques commonly used in climate science, with special emphasis on estimation in large dimensional spaces. Topics include: multivariate regression, canonical correlation analysis, predictable component analysis, field significance tests, data assimilation (especially the ensemble Kalman Filter), discriminant analysis, and multivariate detection and attribution of climate change. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May not be repeated for credit.

Recommended Prerequisite: CLIM 762 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CLIM 796: Directed Reading and Research. 1-6 credits.
Reading and research on a specific topic in climate dynamics under the direction of a faculty member. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission into the climate dynamics doctoral program and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

CLIM 799: Master's Thesis in Climate. 1-6 credits.
Research project in climate science or related topic chosen and completed under the supervision of a faculty member. Resulting thesis
acceptable to student’s committee and potentially publishable is required for completion. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May be repeated within the degree for a maximum 18 credits.

**Recommended Prerequisite:** Degree candidacy, thesis proposal approved by thesis committee, and permission of major advisor or instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**900 Level Courses**

**CLIM 991:** Climate Dynamics Seminar. 1 credit.
Presentations in climate dynamics field by Mason faculty and invited speakers. Notes: A maximum of 3 credits may be applied toward the climate dynamics PhD. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CLIM 996:** Doctoral Reading and Research. 1-6 credits.
Reading and research on a specific topic in climate dynamics under the direction of a faculty member. Offered by Atmospheric/Oceanic/Earth Sci (p. 614). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Admission into the climate dynamics doctoral program and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**College of Science (COS)**

**100 Level Courses**

**COS 120:** Introduction to Research. 1-3 credits.
Introduction to research, involving work on a research project. May involve lab study, computer modeling and analysis, mathematics, or other original research as appropriate. Research formulated and completed under instructor’s guidance. Culminates in a written or oral final report. Offered by College of Science (p. 608). May be repeated within the degree for a maximum 6 credits.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**300 Level Courses**

**COS 300:** Professional Preparation for STEM Disciplines. 3 credits.
Prepares any undergraduate major that is interested in enhancing their competences in science writing, technical communication and social media skills. Students will be prepared to become more competitive in the next generation workforce. Covers these topics: drafting and revising papers, dissecting scientific journal articles, communicating science to non-scientists, creating a podcast, writing grant proposals, and preparing CVs, resume and “elevator pitches.” By the end of the course, the student will not only be familiar but more confident in effectively disseminating information in their own field of interest. Offered by College of Science (p. 608). May not be repeated for credit.

**Recommended Prerequisite:** ENGH 302 or its equivalent and COMM 100 or COMM 101 or their equivalents. Students should be at the sophomore level or above.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
**400 Level Courses**

**COS 400: Problem Solving and Leadership in STEAM.** 3 credits.
In this course, participants will experience a hands-on approach to incorporating global problem solving principles into the STEAM (Science, Technology, Engineering, Arts and Mathematics) disciplines and consider implications for application in research and development. This course consists of face to face meetings, follow up webinars and a collaborative project. Notes: This course will culminate with international travel; locations will vary by semester. Offered by College of Science (p. 608). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COS 401: RS: Discipline Based Education Research.** 2-3 credits.
Students will conduct an original Discipline-Based Education Research (DBER) project with their faculty mentor and STEM Accelerator faculty mentor. Offered by College of Science (p. 608). May not be repeated for credit.

**Specialized Designation:** Research/Scholarship Intensive

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**500 Level Courses**

**COS 500: Professional Preparation for STEM Disciplines.** 3 credits.
Prepares graduate students that are interested in enhancing their competences in science writing, technical communication and social media skills. Students will be prepared to become more competitive in the next generation workforce. Covers these topics: drafting and revising papers, dissecting scientific journal articles, communicating science to non-scientists, creating a podcast, writing grant proposals, and preparing CVs, resume and “elevator pitches.” By the end of the course, the student will not only be familiar but more confident in effectively disseminating information in their own field of interest. Offered by College of Science (p. 608). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**600 Level Courses**

**COS 600: Multidisciplinary Problem Solving and Leadership.** 3 credits.
Participants will experience a hands-on approach to incorporating global problem solving principles into the STEAM (Science, Technology, Engineering, Arts and Mathematics) disciplines and consider implications for application in research and development. This course consists of face to face meetings, follow up webinars and a collaborative project. Notes: This course may culminate with international travel, locations will vary by semester. Offered by College of Science (p. 608). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COS 602: Special Topics in Science.** 1-4 credits.
Explore an array of exciting topics in science; the course’s topic will vary by section offered. Offered by College of Science (p. 608). May be repeated within the term for a maximum 8 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**College of Visual and Performing Arts (CVPA)**

**100 Level Courses**

**CVPA 101: Arts Pass.** 2 credits.
Introduction to appreciation of the arts through lectures and demonstrations in visual art, music, dance, and theater. Emphasizes aesthetic principles in modern society. Students attend performances and exhibitions and develop analytical skills through written journal and discussion. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 4 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CVPA 102: Experiencing the Arts.** 3 credits.
Reserved for high school students enrolled in CVPA. Introduces collaborative and interdisciplinary arts experiences in visual art, music, dance, theater, film, and media through daily intensive immersion in the arts for two and a half weeks. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CVPA 105: Special Topics in the Arts.** 1-3 credits.
Explore topical studies on the arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester
300 Level Courses

CVPA 308: Cross-Cultural Arts Appreciation. 3 credits.
Provides cumulative arts experience by tying subject matter to major cultural production of Center for the Arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the term for a maximum 12 credits.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CVPA 399: Special Topics in the Arts. 1-6 credits.
In-depth presentation and exploration of topical studies on the arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the term for a maximum 24 credits.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

400 Level Courses

CVPA 430: Topics in Arts and Wellness. 1-3 credits.
In-depth presentation and exploration of topical studies in arts and wellness or related areas such as injury prevention, performance enhancement, and health and wellness training. Notes: Topic depends on instructor. May be repeated if taken under different topics. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: 90 hours or permission of instructor, concurrent enrollment is permitted.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CVPA 489: Field Experience in the Arts. 3-6 credits.
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with division director before enrollment. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Junior standing and completion of six credits in CVPA courses in the area of residency, CVPA 305, or permission of instructor.

Schedule Type: Internship
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CVPA 499: Research/Performance/Topics in the Arts. 3-6 credits.
Advanced research, performance, or exploration of topical studies in arts. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 6 credits.

500 Level Courses

CVPA 530: Topics in Arts and Wellness. 1-3 credits.
In-depth presentation and exploration of topical studies in arts and wellness and/or related areas (e.g., injury prevention, performance enhancement, health and wellness training to educators and arts professionals). Topic depends on instructor. Notes: May be repeated if taken under different topics. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: 90 hours or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CVPA 592: Special Topics in Interdisciplinary Arts Studies. 1-3 credits.
Topics in interdisciplinary arts. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the term for a maximum 12 credits.

Recommended Prerequisite: Undergraduate degree or equivalent, or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CVPA 599: Independent Study. 1-6 credits.
Independent reading, performance, or research on specific project under direction of selected faculty member. May include attendance in parallel undergraduate course. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.
Recommended Prerequisite: Undergraduate degree or equivalent, or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading: This course is graded on the Satisfactory/No Credit scale. (p. 82)

600 Level Courses

CVPA 600: CVPA Graduate ProSeminar. 0 credits.
Introduces students into graduate studies in the arts; the course reviews graduate practices and policies. Students are required to take this within their first year of graduate study in CVPA. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Acceptance into a CVPA Graduate Program.

Registration Restrictions: Enrollment limited to students with a class of Graduate.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading: This course is graded on the Satisfactory/No Credit scale. (p. 82)

700 Level Courses

CVPA 700: Academic Writing in the Arts. 1 credit.
Prepares graduate students for the rigors of academic writing in the arts at the advanced level and supports students’ acculturation in the academic writing skills and practices of their discourse communities. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading: This course is graded on the Satisfactory/No Credit scale. (p. 82)

CVPA 701: Thesis and Project Writing. 1 credit.
Students will develop an expertise within the specific rhetorical context of the thesis/project genre, understand the specialized features of the final project or thesis, and apply the strategies they have learned in their disciplines to their capstone event. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Completion of 21 graduate credits in a CVPA graduate degree.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading: This course is graded on the Satisfactory/No Credit scale. (p. 82)

Communication (COMM)

100 Level Courses

COMM 100: Public Speaking. 3 credits.
Presents principles to develop effective presentations for public and professional settings while integrating appropriate technologies. Emphasizes analyzing audience; composing meaningful, coherent messages; conducting responsible research; developing effective arguments; and improving delivery skills to strengthen confidence and credibility. Offered by Communication (p. 306). May not be repeated for credit.

Mason Core: Oral Communication (p. 137)

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 101: Fundamentals of Communication. 3 credits.
Presents principles to develop appropriate and effective communication strategies in one-to-one and small group communication settings. Emphasizes analyzing and assessing communication skills to create and sustain effective communication in personal and professional relationships. Offered by Communication (p. 306). May not be repeated for credit.

Mason Core: Oral Communication (p. 137)

Schedule Type: Laboratory, Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 140: Forensics Seminar I. 0-4 credits.
Intensive work in creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking. Offered by Communication (p. 306). May be repeated within the degree for a maximum 5 credits.

Recommended Prerequisite: Audition required.

Schedule Type: Seminar

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 141: Forensics Seminar II. 0-4 credits.
Intensive work in creative forensics events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation. Offered by Communication (p. 306). May be repeated within the degree for a maximum 5 credits.

Recommended Prerequisite: Audition required.
COMM 142: Debate Seminar I. 0-4 credits.
Work in affirmative research, case construction, and oral presentation; directed toward affirmative analysis of intercollegiate debate proposition. Offered by Communication (p. 306). May be repeated within the degree for a maximum 5 credits.

Recommended Prerequisite: Audition required.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 143: Debate Seminar II. 0-4 credits.
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition. Offered by Communication (p. 306). May be repeated within the degree for a maximum 5 credits.

Recommended Prerequisite: Audition required.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 145: Newspaper Workshop I. 1 credit.
Practical experience in writing, editing, or business aspects of newspaper production at Broadside or other papers. Coordinated by newspaper faculty advisor. Offered by Communication (p. 306). May be repeated within the term for a maximum 3 credits.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 148: Radio Workshop I. 1 credit.
Students receive individual guidance while learning to be on-air show hosts at student internet radio station WGMU. New technologies such as computer automation systems and advanced production software are integrated throughout the curriculum to prepare students to engage in the most current applications for commercial and internet radio and podcasting. Offered by Communication (p. 306). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: One 100 level COMM course, or permission of instructor.

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 157: Digital Media Workshop. 1 credit.
Offers students a hands-on introduction to digital tools of creative expression, involving the use of specific software and hardware, including operating systems, media editing programs, authoring applications, and software utilities. Notes: Students who have already completed or are in COMM 208 are not eligible to take this course. Offered by Communication (p. 306). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: COMM 100 or 101 and declared major or minor in communication, undeclared major, or permission of undergraduate program director.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

200 Level Courses

COMM 200: Communication Theory. 3 credits.
Introduces the field of communication, including perspectives on theory and research, topical areas within the discipline, basic research methodologies, and a survey of theories in those areas. Covers basic procedures for theory-building, research, and writing about communication. Offered by Communication (p. 306). May not be repeated for credit.

Specialized Designation: Discovery of Scholarship
Recommended Prerequisite: COMM 100 or COMM 101 or permission of undergraduate program director.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 201: Small Group Communication. 3 credits.
Principles of communicating effectively in small group situations. Emphasizes problem-solving group communication. Practice in working cooperatively with others to complete projects using systematic approach to problem solving. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 101, or equivalent course.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 202: Media and Society. 3 credits.
Examines the relationship between media and society through the study of the development of various media systems in the United States, including print media, radio, television, film, the recording industry, and new communication technologies. Introduces media effects and basic theories. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 203: Introduction to Journalism. 3 credits.
American journalism including history and First Amendment components; role of professional journalist; print, broadcast, and computer assisted news operations; economics of publishing; and effect of new technologies. Serves as starting point for those interested in journalism careers and as orientation for those interested in learning more about news business operations. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 204: Introduction to Public Relations. 3 credits.
Introduces the evolving field of public relations and the role it plays in global business, politics and social interactions. Focuses on creation of integrated digital communication and social media engagement. This is a required course for the Communication Department Public Relations concentration and a prerequisite for several upper-level public relations courses. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 208: Introduction to Media Production. 3 credits.
Provides a general introduction to media production with emphasis on the basics of multimedia tools for camera, audio, lighting, and editing, focusing on non-fiction, journalism, or public relations/advocacy presentations. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 210: Voice and Articulation. 3 credits.
Principles of voice production, with practice in effective vocal use of American English. Emphasizes student participation. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 230: Case Studies in Persuasion. 3 credits.
Examines common persuasive message strategies and approaches. Covers basic principles of persuasive process. Case studies include advertisements, speeches, and persuasive activities from all segments of society. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 249: Communication Field Experience. 1-2 credits.
Field training and experience related to one of the five communication department concentrations through faculty-approved activity support. Offered by Communication (p. 306). May be repeated within the term for a maximum 4 credits.

Recommended Prerequisite: 45 credits total.

Schedule Type: Activity-Based

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

COMM 255: Introduction to Media Literacy. 3 credits.
Principles and practices of media literacy. Emphasizes critical viewing, listening, and reading media skills; and media effects on consumer. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 260: Basic Debate Theory and Practice. 3 credits.
Theory and practice of formal debate, including approaches to analytical reasoning, research, delivery, and conceptual basis for debate. Does not require tournament participation. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 261: Theories of Argumentation. 3 credits.
Analyzes argument within communicative settings. Emphasizes deductive and inductive forms of reasoning, fallacies in reasoning, tests of evidence, and models for such analyses. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 271: Theory and Practice of Formal Debate. 3 credits.
Theory and practice of formal debate, including approaches to analytical reasoning, research, delivery, and conceptual basis for debate. Does not require tournament participation. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 283: Media Theory. 3 credits.
Provides a comprehensive review of mass communication and media theory, focusing on media effects and the complex relationships between media producers, messages, technologies, and users/audiences.
Examines role of media in news, politics, and popular culture. Offered by Communication (p. 306). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 303:** *Writing across the Media.* 3 credits.
Foundation course focusing on writing for the mass media: Internet, public relations, newspapers, broadcast (television and radio) and advertising with a strong emphasis on adherence to Associated Press Style. Notes: Prerequisite for all communication media writing courses. Lab work required. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** 30 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 304:** *Foundations of Health Communication.* 3 credits.
Explores health communication research practice: the role of communication in health care delivery, health promotion and disease prevention, risk communication, and personal as well as psychological well-being. Examines interpersonal, organizational, team, family, and intercultural relationships. Offered by Communication (p. 306). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 305:** *Foundations of Intercultural Communication.* 3 credits.
Analyzes communication variables as they relate to intercultural encounters. Emphasizes culture’s influence on communication process, particularly influence of verbal and nonverbal communication on how message is interpreted. Notes: Communication majors are encouraged to complete COMM 200 prior to enrolling in this course. Offered by Communication (p. 306). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 137)

**Recommended Prerequisite:** 3 credits of 100 or 200-level COMM courses or 60 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 306:** *Issues in Intercultural Communication.* 3 credits.
Applies basic principles of intercultural communication to analyze specific situations involving communication and cultural differences. Notes: Continuation of COMM 305. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** COMM 305, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 307:** *Field Study in Communication.* 3 credits.
Structured communication learning experience: one to three weeks of travel in a foreign environment involving another country or relevant U.S. co-cultures. Students must complete appropriate readings, laboratory assignments, and personal learning paper to process communication concepts and experiences. Notes: May be repeated for credit when field study is substantially different with permission of the undergraduate director. Offered by Communication (p. 306). May be repeated within the degree.

**Recommended Prerequisite:** Permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 310:** *Performance for Communication Arts.* 3 credits.
Principles and theories of performance for communication arts. Practice in spoken performance of prose, poetry, and drama. Offered by Communication (p. 306). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 320:** *Business and Professional Communication.* 3 credits.
Study of basic theories and skills of communication in professional contexts, including interviewing, relationship maintenance, small group teams, and public presentations. Emphasizes developing practical and critical thinking skills. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** COMM 100, 101, or 104 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 326:** *Rhetoric of Social Movements and Political Controversy.* 3 credits.
Social and political forces of contemporary era from communication perspective, emphasizing political leadership, pressures for social and political change, and transformations in communicative environment. Offered by Communication (p. 306). May not be repeated for credit.

**Mason Core:** Synthesis (p. 137)

**Recommended Prerequisite:** COMM 300.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 327:** *Political Communication.* 3 credits.
Studies how political communication shapes development of "political reality." Examines interactions between media and politics with respect to the ways communication functions in political settings. Offered by Communication (p. 306). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 330: Principles of Public Relations. 3 credits.
Surveys nature, history, scope, and practice of public relations in business, trade associations, nonprofit organizations, and educational and government institutions. Covers principles, practice of public relations, including media relations, issues management, and public service announcements; marketing and research; planning and publicity for special events; house publications; and institutional advertising. Offered by Communication (p. 306). May not be repeated for credit.

Required Prerequisite: 3 hours of COMM credit and 60 hours, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 331: Advanced Principles in Public Relations. 3 credits.
Develops the conceptual knowledge and practical skills students need to thrive in challenging public relations situations, such as crisis management, research for clients, communication with clients, and development of client work. Students complete the course with a portfolio of research, writing, and visual materials they have created. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 204C, 330C, U204 or L330.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 332: Nonverbal Communication. 3 credits.
Theory, principles, and methods to analyze nonverbal communication. Emphasizes physical behavior, facial expression, personal space and territoriality, physical appearance, vocal cues, and environment. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 333: Family and Health Communication. 3 credits.
Examines how family communication contributes to physical, psychological, and social wellness. Explores how family communication affects our experience with health transitions (e.g., coping with cancer; becoming a caregiver; losing a loved one), contributes to health outcomes (e.g., stress and anxiety; disordered eating behavior; schizophrenia; drug abuse), and is central to health promotion behavior (e.g., understanding health history and genetics). Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 334: Organizational Communication. 3 credits.
Theory, practice, and methods to analyze communication in organizations. Emphasizes process and structure, interaction formats, mechanisms for modification, and career paths in organizational communication. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 100, 101, or 301, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 340: Forensics Seminar III. 0-4 credits.
Intensive work in various types of creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking. Offered by Communication (p. 306). May be repeated within the degree for a maximum 5 credits.

Recommended Prerequisite: Completion of 60 hours, or 4 hours of COMM 140. Audition required.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 341: Forensics Seminar IV. 0-4 credits.
Intensive work in various types of creative forensics events, including dramatic duos, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation. Offered by Communication (p. 306). May be repeated within the degree for a maximum 5 credits.

Recommended Prerequisite: Completion of 60 hours, or 4 hours of COMM 141. Audition required.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 342: Debate Seminar III. 0-4 credits.
Work in affirmative research, case construction, and oral presentation directed toward affirmative analysis of intercollegiate debate proposition. Offered by Communication (p. 306). May be repeated within the degree for a maximum 5 credits.

Recommended Prerequisite: Completion of 60 hours, or 4 hours of COMM 142. Audition required.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 343: Debate Seminar IV. 0-4 credits.
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition. Offered by Communication (p. 306). May be repeated within the degree for a maximum 5 credits.

Recommended Prerequisite: Completion of 60 hours, or 4 hours of COMM 143. Audition required.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
COMM 345: Newspaper Workshop II. 1 credit.
Practical experience in writing and editing for student newspaper or other papers. Offered by Communication (p. 306). May be repeated within the term for a maximum 3 credits.

Recommended Prerequisite: 3 credits of COMM 145, 351, or permission of instructor.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 346: Yearbook Workshop. 1 credit.
Practical experience in promotion, marketing, and sales of video yearbook, or practical experience working on Senior Expressions, a print supplement to the video yearbook. Offered by Communication (p. 306). May be repeated within the term for a maximum 3 credits.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 347: Cable TV Programming and Marketing. 1 credit.
Practical experience in television programming, promotion, and marketing of a campus television cable network operation. Offered by Communication (p. 306). May be repeated within the degree for a maximum 3 credits.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 348: Radio Workshop II. 1 credit.
Intensive practical application of previously acquired on-air show hosting skills at student internet radio station WGMU. Skill development in commercial production and writing included. New technologies such as social media, computer automation systems and advanced production software are integrated throughout the curriculum to prepare students to engage in the most current applications for commercial and internet radio and podcasting. Offered by Communication (p. 306). May be repeated within the term for a maximum 3 credits.

Recommended Prerequisite: COMM 148, or permission of instructor.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 350: Mass Communication and Public Policy. 3 credits.
Investigates how matters of public importance are communicated via various mass communication channels. Emphasizes regulations to minimize influence of mass media on public decision-making, and media manipulation by pressure groups, politicians, and media gatekeepers. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 202, 255, or 302, or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 351: News Writing and Reporting. 3 credits.
Experience in actual news gathering. Students write and report for print and online outlets. Numerous in-class and out-of-class writing assignments train students in unique styles of print and online journalism. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 303C or L303.
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 352: News Editing: Print and Beyond. 3 credits.
Copy preparation, headline writing, news judging, and layout for various forms of print and electronic formats. Introduces working on news copy desks. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 303C or L303.
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 353: Broadcast Journalism. 3 credits.

Registration Restrictions:
Required Prerequisites: COMM 303C or L303.
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 354: Radio Production. 3 credits.
Offers theory and practice of operational digital media and radio broadcasting. The curriculum emphasizes core skills and knowledge in writing and digital radio production. Topics include content creation, production techniques (including digital audio software) and promotion, management and other aspects of commercial and noncommercial radio, internet radio, satellite radio, podcasting, and other audio/radio art forms. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 302 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 356: Video: Performance and Writing. 3 credits.
Writing for video, performance skills for on-air work, interviewing. Offered by Communication (p. 306). May not be repeated for credit.
Recommended Prerequisite: 45 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 358: Multi-Camera Studio Production. 3 credits.
Provides an in-depth exploration of the creative, technical, logistical, and aesthetic requirements of production in a multiple camera environment. The fundamental skills learned in this class will serve as a foundation for narrative, event, live sports, talk show, broadcast journalism, and magazine-styled television and webcast programming. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 355C, FAVS 255C, COMM 208C, L355, FAVS U255 or COMM U208.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 359: Media Management. 3 credits.
Principles, practices of media management from general techniques to operation of individual departments within a media organization. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 360: Digital Postproduction. 3 credits.
Offers instruction on delivering high-quality image and video products for digital media. Students will be introduced to an array of video-audio editing and digital image software for integrating video, audio, photo and graphic postproduction. Student projects focus on journalism, public relations, and advocacy contexts. Offered by Communication (p. 306). May not be repeated for credit. Equivalent to FAVS 260.

Registration Restrictions:
Required Prerequisites: COMM 355C, FAVS 255C, COMM 208C, L355, FAVS U255 or COMM U208.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 361: Online Journalism. 3 credits.
Focuses on online journalism, research, reporting, web page and weblog creation, and writing for Internet. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 303C or L303.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 362: Argument and Public Policy. 3 credits.
Develops argumentative skills while examining contemporary public policy. Applies methods of argumentative analysis to design, implementation of public policy. Students learn by constructing, examining, and using public argument. Offered by Communication (p. 306). May not be repeated for credit.

Mason Core: Synthesis (p. 137)

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 363: Media Career Seminar. 1 credit.
Practicum for students with production experience; students produce a final resume in area of expertise. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: Two courses completed in area of media production focus.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 364: Videography. 3 credits.
Provides a comprehensive overview of the principles and practices of visual storytelling, encompassing short documentaries, campaigns, commercial work, news and other non-fiction narratives. Mobile, DSLR and fixed-lens cameras will be used to explore all facets of visual production that tell human stories, with emphasis on character, conflict, drama, and surprise. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 355C, FAVS 255C, COMM 208C, L355, FAVS U255 or COMM U208.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 365: Gender, Race, and Class in the Media. 3 credits.
Introduces concepts of power, influence of mass media. Allows students to see themselves as products, producers of media influence, and gives sense of the roles in the media or lack thereof, of groups based on their gender, race and/or class. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 302 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 366: Visual Communication. 3 credits.
Teaches visual communication theories and applies them to creation of videos, web pages, multimedia production, Computer Based Training (CBT) and other technologies. Covers limits of visual communication in terms of perception, economics, and technology. Partial distance course includes viewing video modules and using electronically mediated
discuss. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 208\(^C\), FAVS 255\(^C\), COMM U208 or FAVS U255.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 367: Children and Media. 3 credits.
Provides an overview of the relationships between children and mass media. Focus of the course is on the effects of media consumption on children's social and psychological well-being. Students will learn major child development theories, review history, economics and regulation of children's programming, and explore children's use of and responses to various media. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 370: Feature Writing. 3 credits.
Introduces aspiring journalists to research techniques and critical writing skills needed to produce publishable magazine or newspaper feature stories. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 303\(^C\) or L303.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 371: Sports Writing and Reporting. 3 credits.
Experience in actual sports-related news gathering and reporting. Covers writing and reporting on sports-related subjects for print and online media. Numerous in-class and out-of-class writing assignments train students in the unique style of covering sports events, reporting breaking news, and writing feature stories. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 303\(^C\) or L303.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 372: Sports and the Media. 3 credits.
Examines the role of mass media in constructing images of athletes, sport, and sports culture. Critical attention is given to broadcast, print, and film of sport media. Assesses sociological and cultural issues that shape sport media and culture. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 373: Business and Economic Journalism. 3 credits.
Writing and reporting about business and the economy with focus on understanding financial news and reporting about companies, trade, and markets for print, broadcast, and online media. Students practice through in-class and out-of-class writing assignments. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 303\(^C\) or L303.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 374: Political Journalism. 3 credits.
Writing and reporting about politics, elections and campaigns, and the legislative and executive branches of government for print, broadcast, and online media. Students practice the style and substance of covering political news through in-class and out-of-class writing assignments. A unique collaboration with C-SPAN including video conference opportunities with political and media personalities. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 303\(^C\) or L303.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 375: Mass Communication Advertising and Promotions. 3 credits.
History, regulation, and ratings of advertising, as well as media buying, advertising campaigns, and strengths and weaknesses of media vehicles used in advertising. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 302 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 376: Media Criticism. 3 credits.
Examines practical criticism of a wide variety of media texts including television programs, newspapers, articles, films, photographs, and advertisements. Introduces principles of major contemporary modes of analysis for systematically interpreting visual and verbal forms of communication. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: Completion of 60 hours or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 384: Public Relations and Social Media. 3 credits. 
Explores the role of social media in contemporary public relations. 
Students engage in social media research and analysis, examine best practices for successful campaigns, seek to understand conditions for viral media, implement a personal branding strategy, create strategic engagement plans, and design campaigns. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 385: Special Topics in Interpersonal and Organizational Communication. 3 credits. 
Topics vary. Counts toward Organizational and Interpersonal Communication concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 306). May be repeated within the degree.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

COMM 386: Special Topics in Political Communication. 3 credits. 
Topics vary. Counts toward Political Communication concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 306). May be repeated within the degree.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

COMM 387: Special Topics in Journalism. 3 credits. 
Topics vary. Counts toward Journalism concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 306). May be repeated within the degree.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

COMM 388: Special Topics in Public Relations. 3 credits. 
Topics vary. Counts toward Public Relations concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 306). May be repeated within the degree.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 389: Public Relations for Associations and Nonprofits. 3 credits. 
Principles of editing and journalism applied to publications, public relations, and advertising needs within corporate environment. Job requirements of editorial positions in public relations, publications, and information as defined by trade associations, nonprofit organizations, and large corporations. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: 60 credits, or 3 credits of lower-division COMM courses.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 390: Issues in Public Relations. 3 credits. 
Focuses on current issues in corporate, government, and nonprofit public relations. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 204C, 330C, U204 or L330. 
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 391: Writing for Public Relations. 3 credits. 
Focuses on public relations writing including news releases, client memos, broadcasting, speeches, brochures, journals, and advertisements. Includes writing styles, formats, organization, and writing research. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: COMM 303C or L303. 
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 392: Public Relations Study Abroad. 3 credits. 
Concentrated survey course in public relations for business, trade associations, nonprofit organizations, and governmental institutions from the perspective of a location abroad. Emphasis placed on the global and intercultural aspects of public relations. Offered by Communication (p. 306). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 395: Special Topics in Health Communication. 3 credits. 
Topics vary. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 306). May be repeated within the degree.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**COMM 396:** Special Topics in Mass Communication. 3 credits.
Topics vary. Counts toward Media Production and Criticism Concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 306). May be repeated within the degree.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**COMM 397:** Special Topics in Production. 1-3 credits.
Provides hands-on media production experience. Topics vary. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 306). May be repeated within the term.

**Recommended Prerequisite:** 60 credits including at least 9 hours of COMM credit toward the major; minimum GPA of 2.5 overall and 3.0 in the major; approval of department.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**COMM 398:** Research Practicum in Communication. 1-3 credits.
Work individually with a faculty member on a faculty research project. Requires readings in research methods and topic area and a final project. Notes: Students must submit an application for COMM 398 at least one week prior to the beginning of the semester. Offered by Communication (p. 306). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 60 credits including at least 9 hours of COMM credit toward the major; minimum GPA of 2.5 overall and 3.0 in the major; approval of department.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**COMM 399:** Special Topics in Communication. 1-3 credits.
Topics vary; some require laboratories. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 306). May be repeated within the term.

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**COMM 400:** Research Methods in Communication. 3 credits.
Explores applications for primary research methodologies used in communication. Research project with focus on survey, critical ethnographic, or experimental methodologies. Notes: Students may not receive credit for both COMM 400 and COMM 490. Offered by Communication (p. 306). May not be repeated for credit. Equivalent to COMM 490.

**Specialized Designation:** Scholarly Inquiry

**Recommended Prerequisite:** Two of COMM 300, 301, 302, 305 each one with a minimum grade of 2.00 (C).

**Registration Restrictions:**
**Required Prerequisites:** COMM 200 or U200. Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 401:** Interpersonal Communication in the Workplace. 3 credits.
Comprehensive study of theories and research associated with dynamics of interpersonal relationships in the workplace. Emphasizes individual motivation, interpersonal needs, communication styles, leadership, problem solving, decision making, diversity, interpersonal conflict, individual adaptation to organizational change, and influence of technology on workplace relationships. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** COMM 301, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 411:** Public Relations Practicum. 3 credits.
Helps communication majors apply their public relations education. Covers three general areas: public relations theory and applications, writing and editing, and networking/story placement. Includes public relations strategy and tactics, interviewing and analysis, writing and message delivery. Offered by Communication (p. 306). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** COMM 331 or L331. Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 412:** Politics and the Mass Media. 3 credits.
Covers responsibilities; freedoms of mass media in a democracy; and media influence on citizens' opinions, elections, and decisions of public officials. Offered by Communication (p. 306). May not be repeated for credit. Equivalent to GOVT 412.

**Recommended Prerequisite:** GOVT 103 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 430:** Persuasion. 3 credits.
Theories of persuasive communication including traditional and contemporary attitudinal change; relationship among speaker, message, and audience; and relationship between attitudinal and behavioral
change. Offered by Communication (p. 306). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 431: New Media and Democracy.** 3 credits.
Examines how an evolving media environment, including new information sources and new opportunities to produce content, changes how people understand their place in American society. Engages with questions of where and how people learn about, discuss, and engage with issues of public importance, such as political policy concerning science, health, technology, and society. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** 60 credits or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 433: Environmental Communication.** 3 credits.
Rhetoric and persuasion about environmental issues in contemporary society. Investigation of case studies in corporate, institutional, and movement attempts to mobilize and cope with ecological concerns. Critical assessment of public communication is emphasized. Offered by Communication (p. 306). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 434: Interviewing.** 3 credits.
Theory, principles, and practical skills essential to interview process. Emphasizes information gathering, journalistic, persuasive, employment, and performance-appraisal interviews. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** 60 hours or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 435: Digital Communication.** 3 credits.
Offers practical application, skill development, and theoretical and critical assessment of mediated communication, including digital networking and social media. Discusses and engages with digital communication in terms of culture and language, functional and dysfunctional communication, social interaction, critical perspectives and ideology, copyright, freedom, ethics and responsibility, and images of the future. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** 60 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 440: Ceremonial Speech Writing and Performance.** 3 credits.
Provides students with the opportunities to develop speaking skills for a variety of contexts from eulogies to commencement speeches. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** 75+ hours or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 450: Internship in Communication.** 3 credits.
On-the-job training in communication through approved field work study programs. Internships arranged and supervised by Department of Communication through internship coordinator. Related class work in resume preparation and job interviewing. Notes: See department for the application process. Offered by Communication (p. 306). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 60 credits, major or minor in communication, journalism, or sport communication; 15 credits in COMM for majors, 12 credits for non-COMM majors, and permission of department.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Special scale. (p. 82)

**COMM 451: Facilitating Communication Education.** 3 credits.
Theory and practice in facilitating learning of communication principles and skills. Students work as instructional aides in lower-division classes under direct supervision of faculty member. Activities may include online learning support, social media updates, media production, facilitating small-group activities and individually critiquing oral performances. Offered by Communication (p. 306). May not be repeated for credit.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 452: Media Production Practicum.** 1-3 credits.
Theory and practice in creation, distribution, and response to media productions. Students complete minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of media production facilities on campus, under supervision of a sponsoring faculty member. Notes: Only 3 credits may be applied to the communication major. Offered by Communication (p. 306). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** COMM 208, 303, or 348.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 453: Multimedia Journalism.** 3 credits.
Applies concepts of advanced visual storytelling within today’s fluid media landscape. Students report and tell compelling stories across multiple platforms using simple, portable equipment and software essential to reporters working in the contemporary converged newsroom. Highlights a multimedia approach to journalism to include broadcast,
mobile reporting skills and backpack journalism techniques. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** COMM 353.

**Registration Restrictions:**
**Required Prerequisites:** COMM 303C or L303.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 454: Free Speech and Ethics.** 3 credits.
Major issues surrounding roles of speech, press, and electronic media in society. Includes history of free speech and press issues in society, government role in regulating marketplace of ideas, and responsibility of individual in free society. Offered by Communication (p. 306). May not be repeated for credit.

**Mason Core:** Synthesis (p. 137)

**Recommended Prerequisite:** 60 credit hours or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 455: History of Journalism.** 3 credits.
Development of print journalism, emphasizing interaction of technology, audience, and government intervention. Topics include birth of press, development of modern newspaper, and American development including Revolutionary and Civil wars, rise of independent press, and yellow journalism. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** 3 hours of COMM or HIST.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 456: Comparative Mass Media.** 3 credits.
Survey of major foreign mass media systems as they compare with American system. Focuses on broad dimensions of international mass media and describes issues facing global journalism and media systems. Provides substantive framework to critically evaluate various national media systems. Offered by Communication (p. 306). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 137)

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 455: Topics in Communication and Gender.** 3 credits.
Topics may include gender and culture, women as rhetors, male and female communication, and communication and gender roles. Examines specific interests, ideally in seminar setting. Notes: May be repeated for credit when topic is different with permission of department. Offered by Communication (p. 306). May be repeated within the term.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**COMM 475: Journalism Law.** 3 credits.
Examines law as it relates to working journalist. Topics include libel, invasion of privacy, free press and fair trial, First Amendment, broadcast regulation, access to media, advertising, and effect of new technologies on these issues. Uses case approach to study leading court decisions in mass media law. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** 60 credits or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 480: College to Career: Strategies for Transition.** 1 credit.
Designed to assist soon-to-be graduates in the employment transition process. Fundamental to the course are effective communication skills, creative research, and the desire to actively and aggressively seek meaningful employment. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** 60+ credits or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 487: Washington Media Institute.** 3 credits.
Special topics offered through the Washington Media Institute. Students must be enrolled in the communication department’s professional experience in communication minor. Notes: May not be applied to the communication major or minor. Offered by Communication (p. 306). May be repeated within the degree for a maximum 15 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 490: Honors Research Project in Communication.** 3 credits.
Honors version of COMM 400. Notes: Students may not receive credit for both COMM 400 and 490. Offered by Communication (p. 306). May not be repeated for credit. Equivalent to COMM 400.

**Specialized Designation:** Scholarly Inquiry

**Recommended Prerequisite:** Acceptance to pursue honors in the major.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 490: Honors Research Methods in Communication.** 3 credits.
Honors version of COMM 400. Notes: Students may not receive credit for both COMM 400 and 490. Offered by Communication (p. 306). May not be repeated for credit. Equivalent to COMM 400.

**Specialized Designation:** Scholarly Inquiry

**Recommended Prerequisite:** Acceptance to pursue honors in the major.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**COMM 491: RS: Honors Research Project in Communication.** 3 credits.
Completion of independent honors research project under the guidance of the student’s faculty sponsor. Offered by Communication (p. 306). May be repeated within the term.
Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: Completion of COMM 490 with minimum grade of 3.0 and approval of honors project prospectus.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 498: RS: Research Projects in Communication. 3 credits.
Students plan, execute, and present an empirical research project exploring communication issues of their own choosing. Offered by Communication (p. 306). May not be repeated for credit.

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: COMM 200, COMM 400.

Registration Restrictions:
Enrollment is limited to students with a major in Communication.
Enrollment limited to students in a Bachelor of Arts degree.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

COMM 499: Independent Study in Communication. 1-3 credits.
Study of a selected area in communication. Independent study application must be processed before start of semester in which work is to take place. Notes: May be repeated for credit with permission of director of undergraduate program. Communication courses at the 500 level open to post-baccalaureate students or advanced undergraduates with permission of department. Offered by Communication (p. 306). May be repeated within the term.

Recommended Prerequisite: 75 credits and permission of department.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

COMM 504: Communication and Interpersonal Conflict. 3 credits.
Focuses on interpersonal interactions, including dyadic and small-group levels in various settings such as friendships, marriage, family, and workplace. Examines factors that generate conflicts and communication strategies and skills that help shape conflict interaction toward productive ends. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 506: Communication in International Organizations. 3 credits.
Analyzes communication variables as they relate to organizational and managerial functions in international organizations. Topics include developing understanding of how cultural differences influence managerial activities and learning to deal effectively with differences. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 530: Theories of Small Group Communication. 3 credits.
Advanced-level theory and practice of small group interaction. Examines current research with a focus on learning applications of theories to relevant settings. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 590: Seminar in Communication. 3 credits.
Intensive study of specific topics; content varies. Notes: May be repeated for credit when topic is different. Offered by Communication (p. 306). May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
600 Level Courses

COMM 600: Introduction to Graduate Studies. 3 credits.
Offers a broad introduction to the field of communication in terms of
communication-based theories and research. Offered by Communication
(p. 306). May not be repeated for credit.

Recommended Prerequisite: Admission to graduate program in
communication or permission of graduate program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate or Senior Plus.

Enrollment is limited to students with a major in Communication.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 601: Communication in Professional Relationships. 3 credits.
Explores theoretical perspectives and relevant research to
communication strategies and skills for various professional roles
and situations. Relates theoretical foundations to practice, assessing
theories and applications in individual professional fields. Offered by
Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 602: Theories and Research of Mass Communication. 3 credits.
Explores theories that have guided development of mass media.
Emphasizes major scientific and humanistic approaches to mass media
effects. Offered by Communication (p. 306). May not be repeated for
credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 604: Communication Research Practicum. 3 credits.
Helps communication master's students determine focus for program of
study, thesis, and projects. Includes readings in applied communication
research and exercises in topic selection, analysis. Offered by
Communication research and exercises in topic selection, analysis. Offered by
Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 634 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 605: Intercultural Communication. 3 credits.
Analyzes communication variables related to communication
across cultures. Topics include nonverbal communication, time
conceptualizations, perceptions and attitudes, values, social organization
patterns, cultural norms, language, ethics, conflict across cultures, and
research in intercultural communication. Offered by Communication
(p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 615: Political Communication. 3 credits.
Examines the interactions between media content and political action
in election campaigns. Offered by Communication (p. 306). May not be
repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
COMM 620: Health Communication. 3 credits.
Examines interpersonal communicative processes associated with health in consumer-provider, family, and health communication campaign contexts. Focus on understanding cultural differences in perceptions of communication about health and disease. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 630: Theories of Public Relations. 3 credits.
Provides a survey of public relations theories and major ethical issues. Examines ways theories relate to organizations, mass and international communication research, rhetoric, persuasion, and social movements. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 631: Approaches to Group Facilitation. 3 credits.
Introduces various theoretical and practical approaches to group facilitation with in-depth focus and practice in one approach. Students participate in group sessions, analyze videotapes of decision-making groups, and practice methodologies for facilitating group interaction. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 632: Persuasion Theory. 3 credits.
Introduces students to the processes and effects of persuasive communication. Covers key theories of persuasion, behavior change, information processing, message effects, as well as important frameworks that guide the practice of persuasion in applied settings.

Particular attention is paid to message features that generate predictable effects and how such effects may vary across different communicative situations. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 634: Theories of Interpersonal Communication. 3 credits.
Analyzes contemporary theories, concepts, and approaches to improving interpersonal communication. Examines interpersonal communication research. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 301 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 635: Organizational Communication. 3 credits.
Analyzes communication systems, processes in public and private organizations. Topics include conflict management, group decision making, interviewing, technical presentations, and using various channels for improving internal and external communication. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 636: Communication Consulting. 3 credits.
Investigates theories providing foundation for communication consulting. Provides theoretical information and mechanisms for application
necessary to modify communicative behavior within organizations. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 637: Risk Communication. 3 credits.
Research on sharing information about physical hazards such as toxic waste, radiation, disease, injury, biohazards. Topics include communication concerning workplace safety, environmental problems, risk assessments, and scientific uncertainties. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 639: Science Communication. 3 credits.
Reviews research on best practices in science communication for scientists and communication professionals. Explores theory on conceptualizing science communication as disseminating knowledge, promoting informed decision making, involving citizens in scientific research (i.e., citizen science), promoting legislative and individual actions, or creating entertainment. Students practice communicating complex science and designing contexts for public engagement with scientific research. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 640: Controversies in Science Communication. 3 credits.
Examines the communication implications related to selected current topics of scientific controversy. Offered by Communication (p. 306). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 641: Advanced Communication Skills for STEM. 3 credits.
Examines the specific oral, written, and mediated communication competencies needed by STEM professionals in modern society. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 642: Science and the Public. 3 credits.
Examines the relationship between science and society, with a particular emphasis on the role of communication in shaping public opinion on issues related to science and technology. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 644: Analysis and Criticism of Science Journalism. 3 credits.
Examines media coverage of technically complex topics in science, social science, environment, health and medicine, and technology. Explores the influence of institutional media practices on news about science and technology. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COMM 650: Research Methodologies in Communication.** 3 credits. Introduces various research methods used by communication professionals. Focus on achieving understanding and knowledge of social scientific research, qualitative and quantitative, and critical analysis through use and application. Offered by Communication (p. 306). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Communication.

Enrollment limited to students in the LA-MA-COM, LA-MAIS-ISIN or LA-PHD-COM programs.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COMM 653: Graduate Seminar in Instructional Communication.** 3 credits. Investigates theoretical and practical implications of instructional communication. Exposes graduate students to communication principles and practices of teaching college courses at upper and lower divisions. Offered by Communication (p. 306). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COMM 655: Theory and Practice of Digital Communication.** 3 credits. Applies visual communication theory to the production of digital media. Emphasizes theories of narrative digital filmmaking, sound theory for audio production, and ethical and aesthetic topics in digital storytelling. Provides a community engaged learning component allowing students to partner with community organizations to produce digital media tools that address issues of social importance. Offered by Communication (p. 306). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COMM 660: Climate Change and Sustainability Communication Campaigns.** 3 credits. Explores contemporary issues in communication theory, research, and practice. Notes: Topics vary. May be repeated when topic is different. Offered by Communication (p. 306). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COMM 670: Social Marketing.** 3 credits. Offers practical application, skill development, and theoretical basis of communication campaigns developed in response to global warming and other threats to sustainability. Focuses on purposeful campaigns to promote changes in individual behavior and public policy. Offered by Communication (p. 306). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COMM 690: Special Topics in Communication.** 3 credits. Offers conceptual overview of social marketing: marketing methods designed to influence people to behave in ways that benefit society. Develops skills necessary to conduct a social marketing initiative and provides an opportunity for practical application of those skills. Offered by Communication (p. 306). May not be repeated for credit.
**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**COMM 694:** Communication Internship. 3 credits.
Students work in approved, professional-level communication position, meeting regularly with internship supervisor from department. Requires paper, journal, minimum 60 hours work for each credit of enrollment. Students usually enroll in internships at end of program of study. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** 18 graduate credits and permission of department.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**COMM 696:** Directed Readings and Research. 1-3 credits.
Reading and research on specific topic under direction of faculty member. Written report required; oral or written exam may be required. Offered by Communication (p. 306). May be repeated within the term for a maximum of 6 credits.

**Recommended Prerequisite:** Permission of department.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**COMM 697:** Independent Production. 1-3 credits.
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** Permission of department.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**COMM 700:** Building Social Science Theory. 3 credits.
Explores the process of developing and testing social science theories. Emphasizes the components and mechanisms of theory - such as variables and causality - in a manner intended to inform rigorous social science inquiry using quantitative or qualitative methods. Offered by Communication (p. 306). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COMM 701:** Communication Science Research Practicum. 3 credits.
Coordinates students into a research team to propose, test and report the findings of a two or three variable hypothesis. Conduct a research project that will make a publishable contribution to the communication science literature. May not be repeated for credit. Offered by Communication (p. 306). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COMM 705:** Intercultural Health and Risk Communication. 3 credits.
Examines intercultural health and risk communication interventions; including health communication campaigns, public relations and advertising for health organizations, and how the media and Internet present health information. Offered by Communication (p. 306). May not be repeated for credit.

**Registration Restrictions:**
Communication (COMM)

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 706: Strategic Communication. 3 credits.
Examines commonalities of strategic communication campaigns across fields (e.g., military, diplomacy, health, politics, marketing, public relations) in order to understand strategic communication, compare fields, and emphasize strategic and evaluative research across fields. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 630 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 716: International Public Relations. 3 credits.
Provides a survey of international public relations with an emphasis in three areas: applied knowledge for actual international practice, relevant theory, and ethical issues. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 706 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 720: Consumer-Provider Health Communication. 3 credits.
Explores relational health communication research and practice. Examines the role of interpersonal communication in health care delivery, health promotion, disease prevention, risk communication, and promoting personal and psychosocial well-being. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 721: E-Health Communication. 3 credits.
Explores the use of computer-mediated communication technologies in health care and health promotion, including examination of technology in health information dissemination, health education, health communication interventions, and the management of health care delivery. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 725: Qualitative Methods. 3 credits.
Examines qualitative research in communication. Emphasis is placed on techniques of naturalistic inquiry such as observation, interviewing, focus group methods, and ethnography, as well as tools for analyzing and reporting qualitative data. Offered by Communication (p. 306). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 735: Crisis Communication. 3 credits.
Examines crisis communication contexts with a particular emphasis on the role of communication in a variety of crises and how the media and Internet present crisis information to the public. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

COMM 750: Research Methods II. 3 credits.
Extends basic research knowledge and skills learned in COMM 650 Research Methods I. Students will be taught to analyze and synthesize literature, develop theoretical linkages, and construct measurement scales. Offered by Communication (p. 306). May not be repeated for credit.

Recommended Prerequisite: COMM 650.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
**COMM 775: Media Content Analysis.** 3 credits. Introduces content analysis, a research technique for making replicable and valid inferences about text in sources such as news articles, advertisements, and television programs. Students design and conduct research using content analysis techniques. Offered by Communication (p. 306). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COMM 798: Communication Studies Project.** 3 credits. Final research seminar for all MA in communication students. Students discuss practical and theoretical issues related to project or thesis. Includes readings related to underlying theoretical, methodological, and ethical issues facing contemporary communication researchers and practitioners. Offered by Communication (p. 306). May not be repeated for credit.

**Recommended Prerequisite:** COMM 600 and COMM 650.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**COMM 799: Master's Thesis.** 1-6 credits. Original research endeavor related to student’s concentration in communication under supervision of faculty committee. Offered by Communication (p. 306). May be repeated within the degree.

**Recommended Prerequisite:** 24 graduate credits and approval of thesis proposal by faculty committee.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**800 Level Courses**

**COMM 800: Studies for the Doctor of Philosophy in Education.** 3-6 credits. Program of studies designed by student’s discipline director and approved by doctoral committee. Students participate in research activity of discipline director and write paper reporting original contributions. Offered by Communication (p. 306). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**COMM 820: Health Communication Campaigns.** 3 credits. Explores use of communication campaigns to promote health and reduce health risks; examines how health communication campaigns are designed, implemented, and evaluated; and describes the role of communication research throughout the campaign process. Offered by Communication (p. 306). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**COMM 890: Special Topics in Communication.** 3 credits. Selected topics reflecting specialized areas in communication. Notes: Topics vary. May be repeated for credit when topic is different. Offered by Communication (p. 306). May be repeated within the degree.

**Recommended Prerequisite:** PhD rank or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**COMM 896: Independent Study.** 1-3 credits. Independent reading on a topic agreed on by student and faculty member. Notes: Content varies. Offered by Communication (p. 306). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** PhD rank or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**900 Level Courses**

**Recommended Prerequisite:** Approval of program director.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)
Research on an approved dissertation topic under the direction of
dissertation committee. Notes: No more than 18 credits of COMM 998
and 999 may be applied to doctoral degree requirements. Offered by
Communication (p. 306). May be repeated within the degree.

Recommended Prerequisite: COMM 998.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Computational Science and
Informatics (CSI)

500 Level Courses

CSI 500: Computational Science Tools. 3 credits.
Introduces computer skills and packages commonly used in quantitative
scientific research. Notes: CSI 601 and CSI 602, including additional
material, have merged to create CSI 500. Offered by Computational &
Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: 1 year of college calculus, knowledge of
matrix algebra, and computer programming.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 501: Introduction to Scientific Programming. 3 credits.
Introduces and reviews programming in C and FORTRAN with emphasis
on the aspects used in the computational and data sciences. Conducted
through a combination of both lecture and interactive computer
laboratory. Offered by Computational & Data Sciences (p. 668). May not
be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 590: Quantitative Foundations for Computational Sciences. 3 credits.
Accelerated review of mathematical tools for scientific applications and
analysis. Topics include vectors and matrices; differential and
difference equations; linear systems; Fourier, Laplace, and Z-transforms; and
probability theory. Notes: Not applicable to 48-credit course total for CSI
PhD. Offered by Computational & Data Sciences (p. 668). Limited to two
attempts. Equivalent to SYST 500.

Recommended Prerequisite: MATH 213 and 214.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 597: Topics in Science and Engineering Simulation. 3 credits.
Covers selected topics in Science and Engineering simulation, not
covered in fixed content computational sciences and informatics
courses. Offered by Computational & Data Sciences (p. 668). May not be
repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

600 Level Courses

CSI 600: Quantitative Foundations for Computational Sciences. 3 credits.
Accelerated review of mathematical tools for scientific applications and
analysis. Topics include vectors and matrices; differential and
difference equations; linear systems; Fourier, Laplace, and Z-transforms; and
probability theory. Notes: Not applicable to 48-credit course total for CSI
PhD. Offered by Computational & Data Sciences (p. 668). May not be
repeated for credit. Equivalent to SYST 500.

Recommended Prerequisite: MATH 213 and 214.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.
CSI 606: Scientific Graphics and Visualization Tools. 1 credit. 
An introduction into the use of scientific visualization tools for data analysis. Use of specific packages will be taught. Packages will include PV-WAVE, S-Plus, XV, XMGR, and the pnm tools on a rotating basis. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** Competency in Linux of permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CSI 629: Topics in Continuum Systems. 3 credits.
Covers selected topics in the computational aspects of continuum systems not covered in fixed-content courses in dynamical systems. Possible topics are smooth-particle hydrodynamics, radiation hydrodynamics, algorithms for continuum systems, adaptive grids for continuum computations, spectral methods in computational fluid dynamics, algorithms for concurrent machines, formation of high energy particle jets in astrophysical applications, application to Earth atmospheric problems, and flow considerations in molten materials. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CSI 638: The Policy Process for Scientists. 2 credits.
Introduces relationship among government, science, scientists, and issues and processes that shape science policy. Emphasizes examples taken from space weather and meteorology. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CSI 639: Ethics in Scientific Research. 3 credits.
Reviews purpose of scientific research and principles for evaluating ethical issues. Teaches skills for survival through training in moral reasoning and responsible conduct. Discusses ethical issues and applying critical-thinking skills to design, execution, and analysis of experiments. Issues include using animals, humans in research; ethical standards in computer community; research fraud; and currently accepted guidelines for data ownership, manuscript preparation, and conduct of those in authority. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CSI 662: Introduction to Space Weather. 3 credits.
Introduction to space weather involving systems such as the sun, the heliosphere, and the Earth's magnetosphere and ionosphere. Covers the solar magnetic field, solar flares, coronal mass ejections, particle acceleration mechanisms, the solar wind, and the Earth's magnetic field, radiation belt, geomagnetic storms, and ionospheric disturbances. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** PHYS 303, PHYS 305, PHYS 307, MATH 213, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CSI 670: Economic Systems Design. 3 credits.
Introduces analytical and engineering principles used to develop exchange systems. Covers behavioral aspects of auction systems;
matching, assignment, and transportation problems; and information markets. Introduces methods for testbedding systems using experimental economics. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** Course in linear and nonlinear optimization, and course in linear algebra, or permission of instructor.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

**CSI 672: Statistical Inference.** 3 credits.

Fundamental principles of estimation and hypothesis testing. Topics include limiting distributions and stochastic convergence, sufficient statistics, exponential families, statistical decision theory and optimality for point estimation, Bayesian methods, maximum likelihood, asymptotic results, interval estimation, optimal tests of statistical hypotheses, and likelihood ratio tests. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to STAT 652.

**Recommended Corequisite:** STAT 554.

**Registration Restrictions:**

Required Prerequisite: STAT 544\(^B\).

\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

**CSI 674: Bayesian Inference and Decision Theory.** 3 credits.

Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach statistics problem, and how to combine data with informed expert judgment to derive useful and policy relevant conclusions. Teaches theory to develop understanding of when and how to apply Bayesian and frequentist methods; and practical procedures for inference, hypothesis testing, and developing statistical models for phenomena. Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to OR 664, SYST 664.

**Recommended Prerequisite:** STAT 544, STAT 554, or equivalent.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

**CSI 676: Regression Analysis.** 3 credits.

Simple and multiple linear regression, polynomial regression, general linear models, subset selection, step-wise regression, and model selection. Also covered are multicollinearity, diagnostics, and model building as well as the theory and practice of regression analysis. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to STAT 656.

**Registration Restrictions:**

Required Prerequisites: STAT 554\(^B\) and 544\(^B\).

\(^B\) May be taken concurrently.

\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

**CSI 678: Time Series Analysis and Forecasting.** 3 credits.

Modeling stationary and nonstationary processes; autoregressive, moving average and mixed model processes; hidden periodicity models; properties of models; autocovariance and autocorrelation functions, and partial autocorrelation function; spectral density functions; identification of models; estimation of model parameters, and forecasting techniques. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Registration Restrictions:**

Required Prerequisites: STAT 544\(^B\) and 554\(^B\).

\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 685: Fundamentals of Materials Science.** 3 credits.
Covers fundamentals of materials science with emphasis on physical topics including crystal structure and symmetry, dislocation theory, theory of interfaces, multicomponent phase diagrams, theory of phase transformations, nano-materials, metallic glasses. Includes a term project, assignments from current literature, and application of computation in materials science. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to PHYS 615.

**Recommended Prerequisite:** Undergraduate degree in electrical or mechanical engineering, materials science, physics, chemistry or related disciplines; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 687: Solid State Physics and Applications.** 3 credits.
Covers crystal structures, binding, lattice vibrations, free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to PHYS 512.

**Recommended Prerequisite:** PHYS 502 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 690: Numerical Methods.** 3 credits.
Covers computational techniques for solving science, engineering problems. Develops algorithms to treat typical problems in applications, emphasizing types of data encountered in practice. Covers theoretical development as well as implementation, efficiency, and accuracy issues in using algorithms and interpreting results. When applicable, uses computer graphical techniques to enhance interpretation. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to MATH 685, OR 682.

**Recommended Prerequisite:** MATH 203 and 214 or equivalent, and some programming experience.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 695: Scientific Databases.** 3 credits.
Study of database support for scientific data management. Covers requirements and properties of scientific databases, data models for statistical and scientific databases, semantic and object-oriented modeling of application domains, statistical database query languages and query optimization, advanced logic query languages, and case studies such as the human genome project and Earth-orbiting satellites. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** INFS 614 or equivalent, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**700 Level Courses**

**CSI 701: Foundations of Computational Science.** 3 credits.
Covers mapping of mathematical models to computer software, including all aspects of developing scientific software such as architecture, data structures, advanced numerical algorithms, languages, documentation, optimization, validation, verification, and software reuse. Examples in bioinformatics, computational biology, computational physics, and global change demonstrate scientific advances enabled by computation. Class projects involve working in teams to develop software that implements mathematical models, using software to address important scientific questions, and conducting computational experiments with it. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** Competency in UNIX and programming at CSI 501 level, and CSI 690; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
CSI 702: High-Performance Computing. 3 credits.
Hardware and software associated with high-performance scientific computing. Computer architectures, processor design, programming paradigms, parallel and vector algorithms. Emphasizes importance of software scalability in science problems. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: Competency in Linux and programming at CSI 501 level or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CSI 703: Scientific and Statistical Visualization. 3 credits.
Covers visualization methods used to provide new insights and intuition concerning measurements of natural phenomena and scientific and mathematical models. Presents case studies from myriad disciplines. Topics include human perception and cognition, introduction to graphics laboratory, elements of graphing data, representation of space-time and vector variables, representation of 3-D and higher dimensional data, dynamic graphical methods, and virtual reality. Work on a visualization project required. Emphasizes software tools on Silicon Graphics workstation, but other workstations and software may be used. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: STAT 554 or CS 551, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 707: Introduction to Solid Surfaces. 3 credits.
Includes gas absorption isotherms, surface-area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas absorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and their surface sensitivities, instrumentation needed, and principles of vacuum technology. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to CHEM 728.

Recommended Prerequisite: CHEM 331 and 332.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 710: Chemical Thermodynamics and Kinetics. 3 credits.
Advanced study of thermodynamics and kinetics. Covers application of kinetics to elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to CHEM 633.

Recommended Prerequisite: CHEM 331 and 332.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 712: Quantum Chemistry. 3 credits.
Illustrates fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: CHEM 332.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 714: Spectroscopy and Structure. 3 credits.
Covers quantum mechanics of the interaction of atoms and molecules with electromagnetic radiation. Also covers modern spectroscopic
methods as applied to the elucidation of molecular structure and
dynamics. Offered by Computational & Data Sciences (p. 668). May not
be repeated for credit.

**Recommended Prerequisite:** CHEM 332.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 719: Topics in Computational Chemistry.** 3 credits.
Covers selected topics in computational chemistry not covered in fixed-
content computational chemistry courses. Offered by Computational
& Data Sciences (p. 668). May be repeated within the degree for a
maximum 12 credits.

**Recommended Prerequisite:** Permission of Instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CSI 720: Fluid Mechanics.** 3 credits.
Covers basic and advanced fluid mechanics and continuous hypothesis
to define fluids. Introduces tensor analysis; Euclidean and Lagrangian
representations of fluid flow; Laplace’s equation; continuity equation;
Navier-Stokes equations; Bernoulli’s theorem and Crocco’s form of the
equations; steady and unsteady flows; potential, incompressible, and
compressible flows; gravity and sound waves; gas dynamics; and viscous
flows. Offered by Computational & Data Sciences (p. 668). May not be
repeated for credit.

**Recommended Prerequisite:** CSI 690 and CSI 780, or permission of
instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 721: Computational Fluid Dynamics I.** 3 credits.
Covers fundamentals including spatial and temporal approximation
techniques for partial differential equations, solution of large systems of
equations, data structures, solvers of the Laplace/ full potential equation,
and simple Euler solvers. Includes two major projects: Laplace solver and
2-D Euler solver on unstructured grids. Students expected to write their
own codes. Offered by Computational & Data Sciences (p. 668). May not
be repeated for credit.

**Recommended Prerequisite:** Course in partial differential equations
such as MATH 678 or equivalent; knowledge of linear algebra at level of
MATH 603 or CSI 740/MATH 625; coding experience in FORTRAN or C; or
permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 722: Computational Fluid Dynamics II.** 3 credits.
Covers more advanced topics in computational fluid dynamics, including
high-resolution schemes for hyperbolic PDEs, advanced Euler solvers,
Navier-Stokes solvers, grid generation, adaptive mesh refinement,
efficient use of supercomputing hardware, and future trends. Projects
include topics in grid generation and adaptive refinement. Students
expected to write their own codes. Offered by Computational & Data
Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSI 721 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 723: Fluid Mechanics II.** 3 credits.
Covers gas dynamics, shock waves, method of characteristics, boundary
layer flows, instabilities, and turbulence modeling. Special topics include
biological, non-Newtonian, and free surface flows; aeroelasticity; and
magneto-hydrodynamics. Offered by Computational & Data Sciences
(p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSI 720 or Permission of Instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 739: Topics in Bioinformatics.** 3 credits.
Selected topics in bioinformatics not covered in fixed-content
bioinformatics courses. Offered by Computational & Data Sciences
(p. 668). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Numerical and Nonlinear Modeling in the Natural Sciences. 3 credits.

This course is graded on the Graduate Regular scale. (p. 82)

**Course Description:**

Develops tools of mathematical modeling while carrying out numerical simulations. Considers examples from across the sciences. Topics include basic concepts such as models, simplification, linearity, and nonlinearity; dimensionless parameters; dimensional analysis; models involving differential equations; examples from population growth and chemical kinetics; models involving partial differential equations; diffusion, transport, nonlinearity, and shocks; probabilistic modeling; perturbation methods; and analysis of sensitivity of system to computer round off. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** MATH 203 and some programming experience.

**Registration Restrictions:**

Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

**CSI 740:** Numerical Linear Algebra. 3 credits.

This course is graded on the Graduate Regular scale. (p. 82)

Covers computational methods for matrix systems; theory and development of numerical algorithms for the solution of linear systems of equations, including direct and iterative methods; analysis of sensitivity of system to computer round off; and solution of least squares problems using orthogonal matrices. Also covers computation of eigenvalues and eigenvectors, singular value decomposition, and applications. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to MATH 625.

**Recommended Prerequisite:** MATH 203 and some programming experience.

**Registration Restrictions:**

Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

**CSI 742:** The Mathematics of the Finite Element Method. 3 credits.

The finite element method is commonly used for developing numerical approximations to problems involving ordinary and partial differential equations. Course develops underlying mathematical foundation, examines specific types of finite elements, analyzes convergence rates and approximation properties, and uses method to solve important equations. Students develop their own codes and are expected to complete independent projects. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** MATH 446 or 685, or permission of instructor.

**Registration Restrictions:**

Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

**CSI 744:** Linear and Nonlinear Modeling in the Natural Sciences. 3 credits.

This course is graded on the Graduate Regular scale. (p. 82)

Develops tools of mathematical modeling while carrying out numerical simulations. Considers examples from across the sciences. Topics include basic issues such as models, simplification, linearity, and nonlinearity; dimensionless parameters; dimensional analysis; models involving differential equations; examples from population growth and chemical kinetics; models involving partial differential equations; diffusion, transport, nonlinearity, and shocks; probabilistic modeling; perturbation methods; extrapolation; and introduction to stability. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**

Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

**CSI 747:** Nonlinear Optimization and Applications. 3 credits.

This course is graded on the Graduate Regular scale. (p. 82)

Introduction to practical aspects of nonlinear optimization. Covers applications of optimization algorithms to solving problems in science and engineering. Applications include data analysis, materials science, nanotechnology, mechanics, optical design, shape design, and trajectory optimization. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** MATH 213 and 216, or permission of instructor.

**Registration Restrictions:**

Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale. (p. 82)

**CSI 754:** Earth Science Data and Advanced Data Analysis. 3 credits.

This course is graded on the Graduate Regular scale. (p. 82)

Covers analysis and application of Earth observations and remote-sensing data for Earth system sciences and applications. Major topics are data formats, analysis and visualization tools, advanced data analysis methods, and data applications. Also covers combining innovative information technology techniques and Earth science data to set up online data centers for accessing data through the web. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to GGS 754.

**Recommended Prerequisite:** GGS 579 or permission of instructor.
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 758: Visualization and Modeling of Complex Systems. 3 credits.
Covers elements of modeling and analysis for scientific applications.
Concentrates on sample projects and student-initiated projects to use visualization, image and graphical analysis as they apply to modeling of complex data sets and systems. Reviews methods of creating and generating analysis and visualization packages. Data sets from multiple sources will be used. Modeling and analysis accompanied by appropriate readings from current literature. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 763: Statistical Methods in Space Sciences. 3 credits.
Covers statistical and data analysis methods applicable to problems in space science, remote sensing, and astrophysics. Includes parametric and nonparametric hypothesis testing, parameter estimation, correlation analysis, time series analysis, spatial analysis, and image reconstruction. Emphasizes imperfect nature of actual data sets and hypothesis. Examples drawn from current space science research. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: ASTR 530 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 764: Computational Astrophysics. 3 credits.
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-landk and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to ASTR 764.

Recommended Prerequisite: ASTR 530.
CSI 777: Principles of Knowledge Mining. 3 credits.
Principles and methods for synthesizing task-oriented knowledge from computer data and prior knowledge and presenting it in human-oriented forms such as symbolic descriptions, natural language-like representations, and graphical forms. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Practical model-building experience provided. Students apply what they learn to a project of their own choosing. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to OR 719.

Recommended Prerequisite: STAT 652 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 775: Graphical Models for Inference and Decision Making. 3 credits.
Theory and methods for inference and decision making in environments characterized by uncertain information. Covers graphical probability and decision models. Studies approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Practical model-building experience provided. Students apply what they learn to a project of their own choosing. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to OR 719.

Recommended Prerequisite: STAT 652 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 780: Principles of Modeling and Simulation in Science. 3 credits.
Applies numerical methods to study variety of physical systems, with emphasis on modeling and simulation. Develops numerical algorithms and simulation codes to gain understanding of mechanisms, processes in physical systems. Includes several projects drawn from such areas as atomic and molecular interactions, molecular dynamics, lattice dynamics, quantum systems, chaos, percolation, random walks, aggregation mechanisms of soft solids, nanomaterials, and nonlinear dynamics. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: Competency in programming at CSI 501 level and college physics, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 690, or permission of Instructor.

CSI 780: Principles of Modeling and Simulation in Science. 3 credits.

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 780: Principles of Modeling and Simulation in Science. 3 credits.
Simulation of Large Scale Systems. 3 credits.

Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to CHEM 736, PHYS 736.

**Recommended Prerequisite:** PHYS 502 and PHYS 613/CSI 780, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 786:** Molecular Dynamics Modeling. 3 credits.

Introduces simulation methods in physical chemistry sciences. Covers computational approaches to modeling molecular and condensed matter systems, including interatomic and molecular potentials, molecular dynamics, time averages, ensemble distributions, numerical sampling, thermodynamic functions, response theory, transport coefficients, and dynamic structure. Includes stochastic simulations such as Brownian motion, Langevin dynamics, Monte Carlo methods and random walks, and introduction to cellular automata. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSI 690 or equivalent, CSI 780 or CHEM 633/CSI 711, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 787:** Computational Materials Science. 3 credits.

Covers selected topics in computational aspects of condensed matter, such as methods of electronic structure calculations, surface science, molecular clusters, lattice dynamics, nanomaterials, semiconductors, superconductivity, magnetism, Hubbard model, mesoscopic systems, and liquids. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** PHYS 512/CSI 687 and PHYS 736/CSI 783, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 788:** Simulation of Large Scale Systems. 3 credits.

Study of diverse, large-scale physical systems with emphasis on modeling and simulation. Students will undertake several projects which will draw from such areas as many-body dynamics, atmospheric structure and dynamics, high-temperature plasmas, stellar structure, hydrodynamical systems, galactic structure and interactions, and cosmology.

Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSI 690 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 789:** Topics in Computational Physics. 3 credits.

Selected topics in computational physics not covered in fixed-content computational physics courses. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CSI 796:** Directed Reading and Research. 1-6 credits.

Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSI 798:** Research Project. 1-3 credits.

Research project chosen and completed under guidance of a graduate faculty member, resulting in acceptable technical report. The course is accepted for credit toward the Master in Computational Science (COMP) and is not accepted for the PhD in Computational Sciences and Informatics (CSI). Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** 12 graduate credits in the Master in Computational Science and permission of the graduate coordinator.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
CSI 799: Master’s Thesis. 1-6 credits.
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report (master’s thesis) and oral defense. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree.

Recommended Prerequisite: Completion of twelve graduate credits and Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

CSI 873: Computational Learning and Discovery. 3 credits.
Provides background knowledge on theory of causal discovery (point defects, interfaces, dislocations) and comparison with biological and cognitive models. Students make projects chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report and oral defense. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree.

Recommended Prerequisite: CS 580 or equivalent or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 876: Measure and Linear Spaces. 3 credits.
Covers measure theory and integration, convergence theorems, and the theory of linear spaces and functional analysis, including normed linear spaces, inner product spaces, Banach and Hilbert spaces, Sobolev spaces, and reproducing kernels. Topics include wavelets, applications to stochastic processes, and nonparametric functional inference. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: IT 776 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 877: Geometric Methods in Statistics. 3 credits.
Develops foundations of geometric methods for statistics. Topics include n-dimension Euclidian geometry; projective geometry; differential geometry, including curves, surfaces, and n-dimensional differentiable manifolds; and computational geometry, including computation of convex hulls, tessellations of two-, three-, and n-dimensional spaces, and finite element grid generation. Examples include applications to scientific visualization. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: STAT 690 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 885: Atomistic Modeling of Materials. 3 credits.
Advanced course focusing on utilization of atomistic modeling and computer simulation techniques to analyze structure of crystalline materials. Introduces modern methodology of largescale atomistic simulations and provides hands-on experience through numerous examples and homework assignments based on simulation packages. Includes background knowledge on theory of lattice defects (point defects, interfaces, dislocations) and thermal and mechanical properties of solid materials (plastic deformation, fracture). Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: CSI 685, 700, and 786, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
CSI 898: Research Colloquium in Computational Sciences and Informatics. 1 credit.
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors.
Notes: A maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD. Offered by Computational & Data Sciences (p. 668). May be repeated within the term.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

CSI 899: Colloquium in Computational and Data Sciences. 1 credit.
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors.
Notes: A maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD. Offered by Computational & Data Sciences (p. 668). May be repeated within the term.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

900 Level Courses

CSI 971: Probability Theory. 3 credits.
A rigorous measure-theoretic treatment of probability. Includes expectation, distributions, laws of large numbers and central limit theorems for independent random variables, characteristic function convergence, and Markov chains. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to STAT 971.

Registration Restrictions:
Required Prerequisites: STAT 544\textsuperscript{B} and MATH 315\textsuperscript{C}.
\textsuperscript{B} Requires minimum grade of B-.
\textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 972: Mathematical Statistics I. 3 credits.
Focuses on theory of estimation, exploring method of moments, least squares, maximum likelihood, and maximum entropy methods. Details methods of minimum variance unbiased estimation. Other topics include sufficiency and completeness of statistics, Fisher information, Cramer-Rao bounds, Bhattacharyya bounds, asymptotic consistency and distributions, statistical decision theory, minimax and Bayesian decision rules, and applications to engineering and scientific problems. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to STAT 972.

Registration Restrictions:
Required Prerequisites: (CSI 672\textsuperscript{B} or STAT 652\textsuperscript{B}) and (CSI 876\textsuperscript{B}, IT 876\textsuperscript{B}, STAT 876\textsuperscript{B}, IT 971\textsuperscript{B} or STAT 971\textsuperscript{B}).

\textsuperscript{B} Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 973: Mathematical Statistics II. 3 credits.
Concentrates on theory of hypothesis testing. Topics include characterizing the decision process; simple versus simple hypothesis tests; Neyman Pearson Lemma; and uniformly most powerful, unbiasedness, invariance, randomized, and sequential tests. Applies testing principles to situations in normal distribution family and other families of distributions. Notes: Continuation of CSI 972. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to STAT 973.

Registration Restrictions:
Required Prerequisite: CSI 972\textsuperscript{B}.
\textsuperscript{B} Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 978: Statistical Analysis of Signals. 3 credits.
Advanced course in analysis of discrete- and continuous-time signals using methods of stochastic differential equation and time series. Presumes familiarity with methods of harmonic analysis and times series modeling. Topics include state-space modeling and eigenvalue processing, nonlinear modeling of signals, non-Gaussian stochastic process structure, detection and estimation of vector-valued signals, robust signal detection, and array processing and target tracking. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: STAT 544 and 658, or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSI 979: Advanced Topics in Computational Statistics. 3 credits.
Covers selected topics in computational statistics not covered in fixed-content computational statistics courses. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
**Additional Course Details:** Title varies by section and/or semester

**CSI 986: Advanced Topics in Large-Scale Physical Simulation.** 3 credits. Covers simulation of physical systems not covered in fixed-content physical simulation courses. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CSI 991: Seminar in Scientific Computing.** 1 credit. Considers selected topics in specific area of computational sciences and informatics not covered in fixed-content courses or as extension of fixed-content courses. Format for presentation is seminar with student participation. Notes: Maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD. Offered by Computational & Data Sciences (p. 668). May be repeated within the term.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CSI 600:**
Computational Social Science (CSS)

**600 Level Courses**

**CSS 600: Introduction to Computational Social Science.** 3 credits. Graduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CSS 605:**
Computational Social Science (CSS)

**CSS 605:**
Computational Social Science (CSS)

**CSS 600 or approval from instructor or program director.** Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CSS 605:**
Object-Oriented Modeling in Social Science. 3 credits.

**Recommended Prerequisite:** CSS 600 or approval from instructor or program director. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)
This course is graded on the Graduate Regular scale. (p. 82)

**CSS 610: Agent-based Modeling and Simulation.** 3 credits.
Provides hands-on examination of agent-based models in social sciences by examining and experimenting with variety of social-simulation projects conducted in modeling environments such as Swarm, Repast, Ascape, and MASON (Multi-Agent Simulator of Networks and Neighborhoods). Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 or permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSS 620: Origins of Social Complexity.** 3 credits.
Examines when, where, and how social complexity emerged in human societies, emphasizing long-term analysis and comparative information processing in four civilizations of the ancient world: West Asia, East Asia, Andean Peru, and Mesoamerica. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSS 625: Complexity Theory in the Social Sciences.** 3 credits.
Examines social phenomena including language, terrorism, the Internet, warfare, and wealth based on power laws and far-from equilibrium nonlinear dynamics. Emphasizes data analysis, and modeling and interpreting complexity-theoretic dynamics. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSS 630: Comparative Computational Social Science.** 3 credits.
Applies comparative method for analyzing different types of computational models in the social sciences. Strong cross-domain and interdisciplinary emphasis akin to comparative economic systems, government, or linguistics. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 or permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSS 635: Cognitive Foundations of Computational Social Science.** 3 credits.
Examines cognitive foundations and information processing in computational social agents and compares to human cognitive phenomena, including emotions, trust, and reciprocity. Emphasizes modeling project. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 and CSS 610 or permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSS 640: Human and Social Evolutionary Complexity.** 3 credits.
Examines long-term evolution of human and societal complexity from global and cross-cultural perspective with emphasis on computational aspects leading to today's globalization. Global history from the computational social science perspective. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600, 620, and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSS 643: Land-Use Modeling Techniques and Applications.** 3 credits.
Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 (may be taken concurrently) or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSS 645: Spatial Agent-Based Models of Human-Environment Interactions.** 3 credits.
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hand-on development of simple ABM models. Investigates linkages between GIS and ABM. Notes: CSS 600 may be taken concurrently. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** GGS 631 or CSS 600 (may be taken concurrently) or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSS 650: Physics Methods for Analyzing Social Complexity.** 3 credits.
Surveys complexity theoretic tools including strange attractors, Ising models, correlation functions, ergodic theory, power spectra, meanfield theory, and renormalization group. Emphasizes application to social, economic, or political systems. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 and permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CSS 695: Agent-based Computational Economics. 3 credits. Methods and applications that examine complex social systems based on relations, structures, connectivity, matrix representations, location, roles, interactions, and other network properties. Applications to terrorism, cognition, organizations, and other social phenomena. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: CSS 610. Undergraduate microeconomics.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CSS 739: Topics in Computational Social Science. 3 credits. Selected topics in computational social science not covered in fixed-content computational social science courses. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CSS 796: Directed Reading and Research. 3 credits. Reading and research on specific topic in computational social science under direction of a faculty member. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CSS 798: Research Project. 3 credits. Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 12 graduate core requirement credits and permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Graduate Special scale. (p. 82)
**800 Level Courses**

**CSS 898: Research Colloquium in Computational Social Science.** 1 credit. Presentations in specific research areas in computational social science by Center for Social Complexity-associated faculty and professional visitors. Notes: Maximum 3 credits of CSS 898 and 899 may be applied toward PhD. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CSS 899: Colloquium in Computational Social Science.** 1 credit. Presentations in variety of areas of computational social science by Center for Social Complexity-associated faculty and professional visitors. Notes: Maximum 3 credits of CSS 898 and 899 may be applied toward PhD. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 2 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**900 Level Courses**

**CSS 909: Advanced Topics in Computational Social Science.** 3 credits. Covers selected topics in computational social science and socioinformatics not covered in fixed-content courses. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 9 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CSS 996: Doctoral Reading and Research.** 1-12 credits. Reading and research on specific topic in computational social science under direction of faculty member. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Admission to the doctoral program and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CSS 998: Doctoral Dissertation Proposal.** 1-12 credits. Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee. Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree.

**Recommended Prerequisite:** Permission of advisor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CSS 999: Doctoral Dissertation.** 1-12 credits. Doctoral dissertation research under direction of dissertation director. Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree.

**Recommended Prerequisite:** Approval of dissertation proposal.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**Computational and Data Sciences (CDS)**

**100 Level Courses**

**CDS 101: Introduction to Computational and Data Sciences.** 3 credits. Introduction to the use of computers in scientific discovery through simulations and data analysis. Covers historical development and current trends in the field. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

**Mason Core:** Natural Science with Lab (p. 137)

**Recommended Prerequisite:** Appropriate score on the math placement test.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
CDS 102: Introduction to Computational and Data Sciences Lab. 1 credit. Experiments in computational and data sciences explore the connections between on-going advances in the natural sciences and the rapid advances in computing and data handling. Lab exercises demonstrate the use of computers in analyzing data, in modeling science problems, and in creating numerical simulations across the science disciplines. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Mason Core: Natural Science with Lab (p. 137)

Recommended Prerequisite: CDS 101. Concurrent enrollment is permitted.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CDS 130: Computing for Scientists. 3 credits. Covers use of computers to solve practical scientific problems. Topics include creating effective scientific presentations, analysis of experimental data, online literature, data/information ethics, scientific modeling, and communication/collaboration tools. Designed to equip students with the knowledge and confidence they need to use future hardware and software systems both as students and throughout their scientific careers. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Mason Core: Information Technology: With Ethics (p. 137)

Recommended Prerequisite: Passing score on the math placement test for MATH 110 or MATH 113.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CDS 151: Data Ethics in an Information Society. 1 credit. Examination of ethical issues related to access and use of information and data in the Internet age, for the general student, with special emphasis on ethical issues that apply to the proper use and interpretation of scientific and technical information. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

200 Level Courses

CDS 201: Introduction to Computational Social Science. 3 credits. Undergraduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CDS 205: Introduction to Agent-based Modeling and Simulation. 3 credits. Undergraduate-level introduction to Agent-based Modeling. Provides a background onto why agent-based models and hands-on examination of agent-based models in the social sciences by examining and experimenting with a variety of social simulation projects. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CDS 230: Modeling and Simulation I. 3 credits. This course expands upon the foundation provided by CDS 130. Fundamental computational modeling techniques are used in a variety of science and engineering disciplines. Continued development of algorithmic thinking skills will be done using different computational environments. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: CDS 130 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CDS 251: Introduction to Scientific Programming. 3 credits. Focuses on elements of programming using the Fortran language and selected elements of the C language with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of lecture and interactive computer laboratory. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: CDS 130.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CDS 290: Topics in Computational and Data Sciences. 1-4 credits. Selected topics in Computational and Data Sciences. May be accepted for credit by CDS majors and CDS minors. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CDS 292: Introduction to Social Network Analysis. 3 credits. An introduction to methods and applications that examine social systems based on relations, structures, connectivity, location, roles, interactions, and other network properties. Example applications of Social Network Analysis covered will include politics, diseases, organizations, along with a variety of other social phenomena. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
### 300 Level Courses

**CDS 301: Scientific Information and Data Visualization.** 3 credits.  
The techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.  
**Recommended Prerequisite:** CDS 101 or CDS 130 or equivalent, or permission of instructor.  
**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**CDS 302: Scientific Data and Databases.** 3 credits.  
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of simple database systems. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.  
**Specialized Designation:** Writing Intensive in the Major  
**Recommended Prerequisite:** CDS 101 or CDS 130 or equivalent, or permission of instructor.  
**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**CDS 303: Scientific Data Mining.** 3 credits.  
Data mining techniques from statistics, machine learning, and visualization to scientific knowledge discovery. Students will be given a set of case studies and projects to test their understanding of this field and provide a foundation for future applications in their careers. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.  
**Recommended Prerequisite:** CDS 101 or CDS 130 or equivalent, or permission of instructor.  
**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

### 400 Level Courses

**CDS 401: Numerical Analysis II.** 3 credits.  
Numerical differentiation and integration, initial-value and boundary-value problems for ordinary differential equations, methods of solution of partial differential equations, iterative methods of solution of nonlinear systems, and approximation theory. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit. Equivalent to MATH 447.  
**Recommended Prerequisite:** MATH 214 and MATH 446, proficiency in at least one computer programming language and computer operating system; or permission of instructor.  
**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**CDS 411: Modeling and Simulation II.** 3 credits.  
Covers the application of modeling and simulation methods to various scientific applications, including fluid dynamics, solid mechanics, materials science, molecular mechanics, and astrophysics. Provides an introduction to modeling and simulation software, as well as high-performance computing. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.  
**Recommended Prerequisite:** MATH 446, PHYS 262 or PHYS 245, and a 200- or higher-level computational methods course, or permission of instructor.  
**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**CDS 421: Introduction to Computational Fluid Dynamics.** 3 credits.  
Covers the governing equations of fluid dynamics; numerical discretization of the governing equations and popular techniques for solving flow problems; applications of CFD to some classic fluid dynamics problems; and setting up the CFD simulation using a CFD software package. Students will understand the process of developing a geometrical model of the flow, applying appropriate boundary conditions, specifying solution parameters, and visualizing the results. Students are expected to complete several computer projects, including writing their own CFD computer program to analyze simple fluid flow problems, as well as setting up the CFD simulation using a CFD software package. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.  
**Recommended Prerequisite:** MATH 446, proficiency in at least one computer programming language and computer operating system, or permission of instructor.  
**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**CDS 461: Molecular Dynamics and Monte Carlo Simulations.** 3 credits.  
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.  
**Recommended Prerequisite:** Competency in programming at CDS 251 level, college physics, and MATH 214 or MATH 216, or permission of instructor.  
**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**CDS 486: Topics in Computational and Data Sciences.** 3 credits.  
Covers selected topics in computational and data sciences not covered in fixed content courses. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 6 credits.
CDS 478: Electronic Structure Computations. 3 credits.
Covers computational aspects of materials science, such as first-principles methods of electronic structure calculations of periodic solids, clusters, and molecules, as well as the use of empirical potentials. Examples will be drawn from metals, insulators, and semiconductors. Students will construct simple codes and be guided in the use of the more sophisticated available computational packages. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: PHYS 308 or PHYS 402.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CDS 491: Internship. 1-3 credits.
On-the-job experience for CDS majors and minors working in industry and government laboratories, including summer programs. Supervision and approval of this course must be arranged with department before registering. May be repeated in combination with CDS 490 for a total of 6 credits between the two classes. Offered by Computational & Data Sciences (p. 668). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.

Schedule Type: Independent Study
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CDS 492: Capstone in Data Science. 3 credits.
This course is intended to provide a capstone experience for undergraduate students by synthesizing knowledge and experience that they acquired in earlier coursework to address a complex Data Science problem. This course requires analytical, collaborative, and communication skills. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: CDS 230 and (CDS 301 or CDS 302) or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

CDS 501: Scientific Information and Data Visualization. 3 credits.
Techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: CDS 130 or CDS 101; or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CDS 502: Introduction to Scientific Data and Databases. 3 credits.
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of database systems. Examples from different disciplines will be given. Offered by Computational & Data Sciences (p. 668). May not be repeated for credit.

Recommended Prerequisite: CDS 130 or CDS 101; or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Computer Forensics (CFRS)

500 Level Courses

CFRS 500: Introduction to Forensic Technology and Analysis. 3 credits.
Presents an overview of technologies of interest to forensics examiners. It will provide an introduction to, software, hardware, analysis, and other
aspects required for forensic examinations. Offered by Electrical & Comp.
Engineering (p. 1061). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the following colleges:

- College of Science
- Schar School of Policy and Gov
- School of Business
- Volgenau School of Engineering

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 510: Digital Forensics Analysis.** 3 credits.
Explains computer forensics crime scene procedures, beginning with
initial walk-through and evaluation; identification and collection of
potential evidence; preparation of intrusion investigation; aspects
of working with investigators and attorneys; reverse engineering
with file identification and profiling; application of critical thinking in
determination of significance of artifacts; and analysis and reporting of
evidence. Offered by Electrical & Comp. Engineering (p. 1061). May not be
repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of
Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 590: Special Topics in Computer Forensics.** 3 credits.
Presents selected topics from recent developments and applications in
various computer forensics disciplines. Helps the professional computer
forensics community keep abreast of current developments, and provides
an applications-oriented introduction to emerging areas of computer
forensics. Offered by Electrical & Comp. Engineering (p. 1061). May be
repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of
Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 660: Network Forensics.** 3 credits.
Deals with the collection, preservation, and analysis of network-generated
digital evidence such that the evidence can be successfully presented in
a court of law (both civil and criminal). The relevant federal laws will be
examined as well as private sector applications. The capture/intercept
digital evidence, the analysis of audit trails, the recording of running
processes, and the reporting of such information will be examined.
Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated
for credit. Equivalent to TCOM 660.

**Recommended Prerequisite:** TCOM 535 and a working knowledge of
computer programming.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the following colleges:

- College of Science
- Schar School of Policy and Gov
- School of Business
- Volgenau School of Engineering

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 661: Digital Media Forensics.** 3 credits.
Covers the collection, preservation, and analysis of digital media such
that the evidence can be successfully presented in a court of law
(both civil and criminal). The relevant federal laws and private sector
applications will be examined, as well as the seizure, preservation, and
analysis of digital media. Offered by Electrical & Comp. Engineering
(p. 1061). May not be repeated for credit. Equivalent to TCOM 661.

**Recommended Prerequisite:** CFRS 500 and a working knowledge of
computer operating systems (e.g. CS 471, IT 342, or equivalent).

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.
Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the following colleges:

- College of Science
- Schar School of Policy and Gov
- School of Business
- Volgenau School of Engineering

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CFRS 663: **Operations of Intrusion Detection for Forensics.** 3 credits.
Introduces students to network and computer intrusion detection and its relation to forensics. Addresses intrusion detection architecture, system types, packet analysis, and products. Presents advanced intrusion detection topics such as intrusion prevention and active response, decay systems, alert correlation, data mining, and proactive forensics. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit. Equivalent to TCOM 663.

**Recommended Prerequisite:** TCOM 509 and TCOM 529, and a working knowledge of computer programming.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CFRS 664: **Incident Response Forensics.** 3 credits.
Addresses incident detection, response, and those aspects of computer forensics pertinent to the investigation of trade secret theft, economic espionage, copyright infringement, piracy, and fraud. Procedures for gathering, preserving, and analyzing forensic evidence are discussed in detail and are applied to both computer and network incident response forensics. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit. Equivalent to TCOM 664.

**Recommended Prerequisite:** TCOM 535.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CFRS 698: **Independent Reading and Research.** 1-3 credits.
Studies selected area in computer forensics under the supervision of a faculty member. A written report is required. Notes: No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** At least two core courses in the CFRS program, and permission of instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses

CFRS 710: **Memory Forensics.** 3 credits.
Introduces students to memory forensics, specifically the acquisition, investigation, and analysis of artifacts that reside in random access memory (RAM). Memory forensics provides an evidentiary wellspring of unique digital artifacts with regards to computer forensics and digital investigations (e.g. intrusion and malware incidents). Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500 and CFRS 660

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CFRS 720: **Digital Audio Video Forensics.** 3 credits.
Presents an overview of digital multimedia (audio, images, video) forensic analysis to include methods, legal framework, software, hardware, and other aspects required for forensic/investigative examination. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500 and CFRS 661

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.
Students in a Non-Degree Undergraduate degree may not enroll.

**Course Title:** Cloud Forensics (CFRS 725)

**Recommended Prerequisite:** CFRS 500 and CFRS 660

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 725: Linux Forensics.** 3 credits.

Presents the concepts, tools, and techniques used for forensic collection and analysis of Linux based operating systems and filesystems. Introduces, demonstrates, and discusses current research in the use of the Linux operating system and open source forensic tools with emphasis on developing custom functionality from multiple components. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500 and CFRS 660

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 730: Forensic Deep Packet Inspection.** 3 credits.

Presents tools, techniques, and methodologies used to conduct deep packet forensic analysis. Application of industry best practices to both the collection and subsequent analysis of network packets with an emphasis on hands-on exercises using various digital analytical tools. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 660.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 737: Cloud Forensics.** 3 credits.

Introduces students to various cloud platforms and their featured and prepares students to acquire memory, disk and other cloud resources from cloud providers. Students will perform forensics on gathered artifacts. The course will take students from understanding what resources are available in a cloud provider to what artifacts exists and how to capture and analyze them. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500 and CFRS 660 or permission from instructor Various cloud providers Virtual Machines and VM concepts

**Windows / Linux command line knowledge Basic scripting (Bash, python 2.7 and PowerShell)**

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 760: Legal and Ethical Issues in IT.** 3 credits.

Presents legal and ethics topics in the context of computer forensics. Includes legal principles, types of crimes, witness testimony, and forensics report writing. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 761: Malware Reverse Engineering.** 3 credits.

Reviews disassembled code for potentially malicious binary, or piece of malware, in order to gain a better understanding of how a binary functions when executed. Analyzes behavioral aspects as they are executed in a controlled environment. Environment changes (file, system, network, process, etc.), network communications, communications with remote devices, and so on, are closely observed for actionable information. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500 and CFRS 660.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 762: Mobile Device Forensics.** 3 credits.

Reviews forensic evidence contained within mobile devices, including address books, call logs, text messages, video files, audio files, and Internet history. Discusses procedures and technologies associated with mobile devices and how such procedures differ from traditional computer...
forensics. Analyzes collected data and correlates information with data from carriers. Hands-on exercises included. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500, CFRS 661.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 763: Registry Forensics - Windows.** 3 credits.

Presents the concepts, tools, and techniques used for forensic collection, identification, and analysis of the Windows registry; review the structure and layout of the Windows registry and be introduced to the types of artifacts that can be found within; evaluate and interpret data from the Windows registry with emphasis on hand-on exercises. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500, CFRS 661.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 764: Mac Forensics.** 3 credits.

Presents the basic tools and techniques used to conduct a Mac and iOS forensic analysis. Application of industry best practices to both the collection and subsequent analysis of Mac iOS systems with an emphasis on hands-on exercises using currently available open-source and commercial tools. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500, CFRS 661.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 767: Penetration Testing in Computer Forensics.** 3 credits.

Presents the concepts, tools, and techniques used for penetration testing, vulnerability exploitation, assessment, reporting, and forensics; teaches multiple attack vectors as well as the defensive measures protecting against such attacks; focuses heavily on post attack forensics allowing for a complete picture of the attack process. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 660, CFRS 663.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 768: Digital Warfare.** 3 credits.

Presents concepts of forensic attribution, context, and motivations behind computer attacks including those tied to cyber warfare and cyber terrorism activities. Tactics, techniques, and procedures of current cyber-attacks will be addressed. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500, CFRS 660.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 769: Anti-Forensics.** 3 credits.

Presents concepts of anti-forensics and obfuscation used in order to inhibit, frustrate, and mislead computer forensics examiners. Techniques, attempts, and actions used to negatively impact the existence, volume, or amount of evidence from digital repositories will be examined with goal of understanding and detecting anti-forensics. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 500, CFRS 660.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
**CFRS 761: Kernel Forensics and Analysis.** 3 credits.
Introduces students to low level programming analysis and low level API's. Students will learn the basics of kernel level device drivers, how to load and unload software from the kernel, modification of kernel objects, interrupt and call hooking and memory hiding techniques. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 760.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 773: Mobile Application Forensics and Analysis.** 3 credits.
Presents mobile applications forensics and analysis. Analyze mobile applications on both the android and iPhone platforms in a lab environment in order to understand the weaknesses, pitfalls, and forensic challenges that exist or potentially exist when developing mobile client side software as well as identify forensic artifacts left behind from applications. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 762.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CFRS 775: Advanced Topics in Computer Forensics.** 3 credits.
Teaches advanced topics from recent developments and applications in various areas of computer forensics. Enhances the professional engineering community’s understanding of breakthrough developments in specific areas of computer forensics. Active participation of the students is encouraged in the form of writing and presenting papers.
in various research areas of the advanced topic. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Permission of Instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CFRS 790:** Advanced Computer Forensics. 3 credits.
Capstone course for the MS in computer forensics program. Students will be exposed to case studies and be required to conduct computer forensic investigations of digital media, intercepted packet switched data, and multisource log information to successfully complete each case study. Notes: To be taken in the last year prior to the completion of degree requirement. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** CFRS 660, 661, and (663 or 664), and a minimum of 18 credits in the MS Computer Forensics Program prior to registration.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Computer Game Design (GAME)**

### 100 Level Courses

**GAME 101: Introduction to Game Design. 3 credits.**
Introductory overview of the game development process with an emphasis on game design. Through detailed study of historical and current games, students will learn the language of game design and how each of these roles contributes to a game's overall design. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Mason Core:** Arts (p. 137)

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

### 200 Level Courses

**GAME 210: Basic Game Design. 3 credits.**
Introduction to computer game design and development including a brief history of the field and current industry practice and production. Current major game design software, hardware, and associated tools are explored through simple game design projects. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**GAME 230: History of Computer Game Design. 3 credits.**
History of computer game design including games as a new medium for education, entertainment, and communications. Aspects of the business of computer game publishing, game criticism, storytelling, interactive fiction, violence, and virtual communities will be explored. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**GAME 231: Computer Animation for Games. 3 credits.**
2D and 3D modeling, character design, and animation projects are constructed using commercial and proprietary software and game design tool kits and engines. Simple texturing and models rigging for game animation will be discussed. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
GAME 232: Online and Mobile Gaming. 3 credits.
Class covers the history, practice, and design of online and mobile games. Class will discuss the current state of the smartphone applications and study the best practices to be successful in the applications market. Students will learn the development process for smartphone applications and develop original and innovative applications in a team-based environment. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: GAME 210C and 230C.
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 250: Music for Film and Video. 3 credits.
Selection, editing, processing, and integration of sounds and music (post-production) for film, video, and animation. Time, frequency, and amplitude domain digital post-production techniques will be studied. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

300 Level Courses
GAME 300: Portfolio Preparation. 1 credit.
Student creates and refines a web portfolio to utilize throughout the course of study in presenting projects to aid in internship application and professional development. Notes: Must have passed GAME 231 and GAME 232 with a C or better. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 310: Game Design Studio. 3 credits.
Studio course that focuses on team-based game design. In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and/or entertainment games. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: GAME 231C and 232C.
C Requires minimum grade of C.

Schedule Type: Studio
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 320: Digital Painting for Games. 3 credits.
Students develop observational, sketching, and rendering skills in the digital medium. Students practice digital painting from reference and imagination as they create convincing game surfaces and simple concept drawings. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: GAME 231 AVT 323 or AVT 333.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 330: Computer Game Platform Analysis. 3 credits.
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: GAME 310 and CS 112.
Recommended Corequisite: GAME 331.
Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 331: Consumer Gaming Platform Analysis Lab. 1 credit.
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: GAME 310 and CS 112.
Recommended Corequisite: GAME 330.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 332: RS: Story Design for Computer Games. 3 credits.
Use of narrative structure and new media for designing computer game scenarios and stories. Traditional narrative techniques (text stories, novels, films) will be examined, as well as translations of the traditional to interactive, non-linear modes of communications. Analysis of current computer game story design theories, philosophies, and techniques will be covered. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Specialized Designation: Research/Scholarship Intensive, Writing Intensive in the Major
Recommended Prerequisite: Completion of 30 credits within major or permission of the instructor.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 367: Writing and Editing Music and Sound. 3 credits.
Composition, editing, processing, and integration of voice, environmental sounds and music into non-linear computer game environments. Special emphasis will be placed on HD sound and music post-production and mixing (3 & 5 transducer point listening spaces), sequential composition and sample-splicing techniques, and the study of competing
Recommended Prerequisite: Coll Visual & Performing Arts computer-based and online serious and entertainment games. Offered by design concentration, student teams design and develop complete In collaboration with undergraduate students from VSITE's CS game

GAME 410: Advanced Game Design Studio. 3 credits.
In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and entertainment games. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: GAME 310, GAME 330 and GAME 331.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 398: Advanced Game Design Animation. 3 credits.
Advanced 2D and 3D animation projects for interactive game scenes and scenarios are built using commercial and proprietary software and game design tool kits. Advanced texturing, rigging, lighting, and perspective manipulation will be covered. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: GAME 231C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 399: Special Topics. 1-4 credits.
In-depth presentation and exploration of topical studies in computer game design. Subject matter varies. Notes: May be repeated when topic is different. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the term for a maximum 12 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

400 Level Courses
GAME 400: Game Design Practicum. 3 credits.
Studio/lecture course focuses on the design strengths and weaknesses inherent in current entertainment and serious games. UI design, level design and map structure, scoring stratum, on-line support, game ecologies, gaming communities, and designing/writing documentation and specifications will be studied. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: GAME 330, 367 or 398. Must be a Computer Game Design minor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 410: Advanced Game Design Studio. 3 credits.
In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and entertainment games. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: GAME 310, GAME 330 and GAME 331.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 431: Advanced Game Animation I. 3 credits.
Builds advanced 3D character animation skills. Students animate from reference using the principles of weight, follow through, and anticipation. Projects focus on creating interactive motions for characters using commercial software and game engines. Intermediate rigging will also be covered. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: GAME 398.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 489: Pre-Internship Seminar. 1 credit.
Student prepares for interview and application processes associated with securing an internship, finishing the course with a professional resume and portfolio ready for submission to potential employers. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 490: Senior Game Design Capstone. 3 credits.
Student develops a case study of a publicly or commercially published computer game exploring the technical, economic, ethical, social and political ramifications on its intended target market. A public lecture of the case study is required. Notes: Students are required to complete 6 credits for the degree program. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 9 credits.

Mason Core: Capstone, Synthesis (p. 137)

Recommended Prerequisite: Completion of 60 credits in major. Students must be granted permission by the program director to take the course.

Registration Restrictions:
Enrollment is limited to students with a major in Computer Game Design.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 491: Internship. 3-4 credits.
Placement in an appropriate internship within a program approved by a federal, state or commercial game design/publishing agency or firm. Notes: 135 hours of internship on-site work must be completed for 3 credits. 180 hours of internship on-site work must be complete for 4 credits. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: GAME 489 and completion of 60 credits in major.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 492: Independent Study. 1-6 credits.
Advanced research, computer game design, or exploration of topical studies in computer game design. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 12 credits.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 499: Advanced Studies in Game Design. 1-4 credits.
Exploration of various issues in computer game design, including theoretical aspects of games studies and production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the term for a maximum 12 credits.

Recommended Prerequisite: Admittance to BFA Game Design Program or instructor permission.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

GAME 599: Advanced Studies in Game Design. 1-4 credits.
Exploration of various issues in computer game design, including theoretical aspects of games studies and production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: Admittance to MA Game Design Program or instructor permission.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 605: Game Design Graduate Seminar. 1-4 credits.
Students present their own research and projects, or the work of contemporary game designers for discussion and peer and faculty critiques. Special focus on developing professional public communication and presentation skills about contemporary issues in the game design and production fields. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 4 credits.

Recommended Prerequisite: Admittance to MA Game Design Program or instructor permission.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 610: Game Production. 3 credits.
Studio and lecture course in the history, practice and design and production of computer games with an emphasis on serious games development. Students will research, design and develop a fully functioning game, for desktop, console, and/or mobile platforms in this two-semester course. This course will also support the thesis research and project development. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admittance to the MA Game Design Program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

GAME 600: Research Methodologies in Game Design. 3 credits.
Graduate seminar focusing on development of independent research project in student's area of emphasis. Explores principal methods of researching and documenting game design and game practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research clouds and systems. Students will research and write a publishable paper following standard scientific research practice. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admittance to the MA Game Design Program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**GAME 617: Teaching Practicum.** 3 credits.
Supervised classroom teaching in Mason's Computer Game Design undergraduate program, or summer Game-focused Potomac Academy Program. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Recommended Prerequisite:** GAME 605 and 3 credits of GAME 610.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**GAME 626: Game Business, Entrepreneurship and Practice.** 3 credits.
Combined lecture and studio course in discovering and developing entrepreneurial skill sets in the game design, production and publishing industry. Special focus will be given to developing communication skills, planning strategies, and nurturing the aptitude and attitudes that enable students to creatively solve problems, identify opportunities, and execute those opportunities in the game design and production industry. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Recommended Prerequisite:** GAME 605 and GAME 610.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**GAME 628: Advanced Game Art.** 3 credits.
Studio and Lecture course in advanced computer game modeling processes and techniques. Advanced topics in modeling interactive characters and environments will be covered, including texture painting, photosourcing, and both low and high-polygon modeling. A broad variety of art styles and game production pipelines will be explored. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Recommended Prerequisite:** Admittance to MA Game Design Program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**GAME 630: Advanced Game Animation.** 3 credits.
Combined Studio and Lecture course in creating advanced animations for interactive games, with an emphasis on realtime characters. Non-bipedal motions, rotoscoping, rigging, and other advanced topics in animation will also be explored. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Recommended Prerequisite:** Admittance to the MA Game Design Program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**GAME 635: Issues in Interactive Entertainment.** 3 credits.
Studio and lecture course in advanced design concepts for interactive game and entertainment platforms and systems. Microsoft's Kinect, Nintendo's Wii U, and Apple's AirPlay Mirroring will be studied. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Recommended Prerequisite:** GAME 600, GAME 605 and 3 credits of GAME 610.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**GAME 638: Game Studio Management.** 3 credits.
Lecture Courses in managerial responsibilities and issues concerning successfully managing a small to mid-size game design studio in today's game industry marketplace. Human resources and personnel management, investor relations and board management, contract negotiations and development analysis, game design and production team oversight, research and development, budget management and realistic financial projections will be covered. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

**Recommended Prerequisite:** GAME 610 and GAME 626.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

GAME 650: Advanced Music and Sound for Games. 3 credits.
Combined studio and lecture course that will focus on the composition, editing, processing, mixing, and integration of sound assets, such as sfx, narration, and music into computer games. Time, frequency, and amplitude domain digital production and post-production techniques will be reviewed. Standard 2-channel, and 5.1 channel post-production/mixing, as well as contemporary middleware sound management applications will be studied. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Admittance to the MA Game Design Program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

GAME 658: Interactive Game Systems Design. 3 credits.
Studio and lecture course in advanced interactive games and simulations. A variety of entertainment platforms, systems, and their unique input devices will be explored, including augmented reality, social networks, and motion controllers. Games developed will use the latest online, mobile, and console platforms, as well as non-commercial prototype platforms. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: GAME 635.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses

GAME 710: Graduate Internship. 3 credits.
This course prepares students to succeed in the game design industry by assisting their placement in an appropriate internship within a program approved public or commercial game design/publishing agency or firm. A total of 180 hours of internship on-site work must be earned within the semester of registration. Each student is assigned a program internship coordinator, and an on-site internship supervisor. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: GAME 610 and GAME 617 and permission of Program Director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

GAME 796: Directed Reading. 1 credit.
Directed Reading must be taken in the fall of year two. Prior to the end of the first year, each student must identify a faculty member, based on interest and chosen topic that will serve as the student's faculty mentor for the thesis research and writing, or project development process. Students should also plan to devote the summer between the two academic years of study to focused preliminary reading and research for the thesis paper or project. Notes: Directed Reading is overseen by the chosen faculty mentor, and will be tailored to each student's original thesis research paper or project. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: GAME 600 and GAME 605.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

GAME 797: Proposal Writing. 1 credit.
Proposal Writing is overseen by the chosen faculty mentor, and will be tailored to each student's original thesis research paper or project. Prior to the end of the first year, each student must identify a faculty member, based on interest and chosen topic that will serve as the student's faculty mentor for the Proposal Writing course to prepare for the thesis writing, or project development process. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: GAME 796.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

GAME 798: Project and Applied Research. 3 credits.
The research project and supporting written document must reflect original research, development, and production of a complete serious game for graduate level work. The graduate project will involve a study of historical practice, and suitable for a public viewing experience and presentation. The written component will support the evolution of the creative process, the historical context of the work, the intended purpose and intent, all supported with scholarly citations and references. Faculty mentors will guide the project development process. Offered by Coll Visual & Performing Arts (p. 790). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Permission of Graduate Faculty Mentor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

GAME 799: Thesis. 4 credits.
The thesis project and or written document must reflect original research, analysis, and writing appropriate for graduate level work. The thesis written document should be between 85 to 100 pages in length, following university library standards of format for graduate thesis. If a thesis project is chosen, the project should compose a complete game design document, a completed and QA tested functional game using a commercially available engine, and a public presentation. Faculty mentors will guide the thesis development process for each student. Offered by Coll Visual & Performing Arts (p. 790). May not be repeated for credit.

Recommended Prerequisite: Permission of Graduate Faculty Mentor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Computer Science (CS)

100 Level Courses

CS 100: Principles of Computing. 3 credits.
This course is intended to help students learn to think in the manner necessary to fully grasp the nature and power of the digital world around us. The early era of the Internet and the personal computer led to the need for "computer literacy." Now, the changing nature of our global society requires that students learn new ways to think about problems and how to solve them, regardless of students' specific fields of endeavor. Through this course, students will explore major issues related to the "big ideas" of computational thinking (namely, (i) Creativity, (ii) Abstraction, (iii) Data, (iv) Algorithms, (v) Programming, (vi) Internet, and (vii) Societal Impact), as well as how these issues will impact their future lives. Offered by Computer Science (p. 1025). Limited to two attempts.

Mason Core: Information Technology: With Ethics (p. 137)

 Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 101: Preview of Computer Science. 2 credits.
Offers a broad overview of computer science designed to provide students with an introduction to the field of computer science and an orientation to the Computer Science department and the computing environment at the university. Includes a project to introduce problem solving using computers. All computer science majors are required to take this course within their first year. Notes: All computer science majors are required to take this course within their first year. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CS 112*C.
May be taken concurrently.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Applied Computer Science or Computer Science.

Enrollment limited to students in a Bachelor of Science degree.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

CS 105: Computer Ethics and Society. 1 credit.
Intensive introduction to legal, social, and ethical issues surrounding software development and computer use. Stresses professional conduct, social responsibility, and rigorous standards for software testing and reliability. Examines issues such as liability, ownership of information, and computer crime. Note: Students who have received credit for CS 305 or 306 should not register for CS 105. No credit will be given for CS 105 if a student has already received credit for CS 305 or 306. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 110: Essentials of Computer Science. 3 credits.
Offers a broad overview of computer science designed to provide computer science majors with an introduction to their discipline. Fundamental computing concepts such as number representation, programming environments, communication tools, and basic network security measures are covered. Privacy and ethical use of computing are also discussed along with guest lectures to sample current computer science research. Note: All computer science majors are required to take
this course within their first year as a computer science major. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Enrollment limited to students in the VS-BS-ACS or VS-BS-CS programs.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Special scale. (p. 82)

CS 222: Computer Programming for Engineers. 3 credits.
Introduction to C as a second programming language with emphasis on problems and language features relevant to engineers. Topics include basic data types, pointers, elementary data structures, file/output, bitwise operations, and Unix commands for compilation and debugging. Intended as terminal course in computer programming. Notes: Intended as terminal course in computer programming. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: (CS 112\textsuperscript{C}).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 262: Introduction to Low-Level Programming. 3 credits.
Introduction to the language C, as well as operating system concepts, in UNIX, to prepare students for topics in systems programming. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 110\textsuperscript{C} or 101\textsuperscript{C}) and (CS 211\textsuperscript{C} or 222\textsuperscript{C}).
* May be taken concurrently.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

300 Level Courses
CS 306: Synthesis of Ethics and Law for the Computing Professional. 3 credits.
Practical course to become effective computer professional. Examines legal and ethical issues surrounding computer technology and its use, as well as the foundation building that is necessary to deal with those challenges. Applies philosophical bases for ethical decision making to modern concerns raised by computers and technology. Addresses topics covered by CS 105 in a more intensive manner and focuses on the emerging legal and ethical issues involved in e-commerce and widespread use of the Internet. Notes: Computer science majors may use this course to satisfy the Mason Core synthesis requirement, so long as they have not previously taken CS 305 for credit. Offered by Computer Science (p. 1025). Limited to two attempts. Equivalent to IT 304.

Mason Core: Synthesis (p. 137)

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: Junior standing (at least 60 credit hours).

Recommended Corequisite: All required Mason Core courses.

Registration Restrictions:
Required Prerequisites: ((COMM 100\textsuperscript{C} and ENGH 302\textsuperscript{C}) or (HNRS 110\textsuperscript{C} and 122\textsuperscript{C}) or (HNRS 110\textsuperscript{C} and 130\textsuperscript{C}) or (HNRS 110\textsuperscript{C} and 131\textsuperscript{C}) or (HNRS 110\textsuperscript{C} and 230\textsuperscript{C}) or (HNRS 110\textsuperscript{C} and 240\textsuperscript{C})) and (CS 105\textsuperscript{C} or 110\textsuperscript{C}).
\textsuperscript{C} Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 310: Data Structures.** 3 credits.
Foci on object-oriented programming with an emphasis on tools and techniques for developing moderate to large programs. Topics include use and implementation of linear and nonlinear data structures and the design and analysis of elementary algorithms. Offered by Computer Science (p. 1025). Limited to two attempts.

**Recommended Corequisite:** CS 105 or CS 110

**Registration Restrictions:**
**Required Prerequisites:** (CS 211\(^C\) and MATH 113\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 321: Software Engineering.** 3 credits.
An introduction to concepts, methods, and tools for the creation of large-scale software systems. Methods, tools, notations, and validation techniques to analyze, specify, prototype, and maintain software requirements. Introduction to object-oriented requirements modeling, including use of case modeling, static modeling, and dynamic modeling using the Unified Modeling Language (UML) notation. Concepts and methods for the design of large-scale software systems. Fundamental design concepts and design notations are introduced. A study of object-oriented analysis and design modeling using the UML notation. Students participate in a group project on software requirements, specification, and object-oriented software design. Offered by Computer Science (p. 1025). Limited to two attempts. Equivalent to SWE 321.

**Specialized Designation:** Writing Intensive in the Major

**Registration Restrictions:**
**Required Prerequisites:** (CS 310\(^C\) and (ENGH 302\(^C\) or (HNRS 110\(^C\) and (HNRS 122\(^C\), 130\(^C\), 230\(^C\) or 240\(^C\)))).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Applied Computer Science, Computer Science, Software Engineering or Systems Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 325: Introduction to Game Design.** 3 credits.
Game design, in various electronic entertainment technologies, involves a diverse set of skills and backgrounds from narrative and art to computer programming. Surveys the technical aspects of the field, with an emphasis on programming. Offered by Computer Science (p. 1025). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CS 262\(^C\) and 310\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 330: Formal Methods and Models.** 3 credits.
Abstract concepts that underlie much advanced work in computer science, with major emphasis on formal languages, models of computation, logic, and proof strategies. Offered by Computer Science (p. 1025). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CS 211\(^C\) and MATH 125\(^C\)).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Applied Computer Science, Computer Science or Software Engineering.

Enrollment limited to students in a Bachelor of Science or Post-Baccalaureate Certificate degrees.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 332: Object-Oriented Software Design and Implementation.** 3 credits.
In-depth study of software design and implementation using a modern, object-oriented language with support for graphical user interfaces and complex data structures. Topics covered will be specifications; design patterns; and abstraction techniques; including typing, access control, inheritance, and polymorphism. Students will learn the proper engineering use of techniques such as information hiding, classes, objects, inheritance, exception handling, event-based systems, and concurrency. Offered by Computer Science (p. 1025). Limited to two attempts. Equivalent to SWE 332.

**Registration Restrictions:**
**Required Prerequisite:** (CS 310\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 351: Visual Computing.** 3 credits.
Focuses on programming essential mathematical and geometric concepts underlying computer graphics. Covers fundamental topics in computational geometry, 3D modeling, graphics algorithms, and graphical user interfaces using both 2D and 3D implementations. Reinforces object-oriented programming practices. Offered by Computer Science (p. 1025). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CS 262\(^C\) and 310\(^C\)).
**CS 367: Computer Systems and Programming.** 4 credits.
Introduces students to computer systems from a programmer’s perspective. Topics include data representation, assembly and machine-level representation of high-level language programs, the memory hierarchy, linking, exceptions, interrupts, processes and signals, virtual memory, and system-level I/O. Foundation for courses on compilers; networks; operating systems; and computer architecture, where a deeper understanding of systems-level issues is required. Offered by Computer Science (p. 1025). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CS 262C or 222C) and MATH 125C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 390: Research and Project Design Principles in Computing.** 3 credits.
This course introduces students to the research and project design process within the computing field. Students will learn about the tools of the trade, work through design principles beginning with the articulation of a question, reviewing methods of exploration, gathering evidence, communicating results, and assessing and evaluating research or project outcomes. Offered by Computer Science (p. 1025). Limited to two attempts.

**Specialized Designation:** Scholarly Inquiry

**Recommended Prerequisite:** CS 310 and CS 321.

**Registration Restrictions:**
**Required Prerequisite:** CS 262C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 391: Advanced Programming Lab.** 1 credit.
Programming-intensive lab course. Students refine problem-solving and programming skills while gaining experience in teamwork. Focuses on data structures, recursion, backtracking, dynamic programming, and debugging. Central focus is applying familiar and new algorithms and data structures to novel circumstances. Offered by Computer Science (p. 1025). May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
**Required Prerequisite:** CS 310C.
C Requires minimum grade of C.

**CS 444: Introduction to Computational Biology.** 3 credits.
Introduces computational methods in molecular biology. Covers a broad array of topics in bioinformatics and computational biology. Organized as 3 four-week modules intended to capture the current classification of...
bioinformatics and computational biology methods, thereby providing students with a broad view of the field. Offered by Computer Science (p. 1025). Limited to two attempts.

**Recommended Prerequisite:** C or better in CS 310.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 445: Computational Methods for Genomics.** 3 credits.
Fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignment, and assembly, gene prediction, and knowledge-based protein structure prediction. Projects involve designing and programming basic alignment and prediction methods. Offered by Computer Science (p. 1025). Limited to two attempts.

**Recommended Prerequisite:** C or better in CS 310 and STAT 344.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 450: Database Concepts.** 3 credits.
Covers basics to intermediate knowledge for the design, implementation, and use of relational database systems. Topics include the Entity-Relationship (ER) and Entity-Enhanced Relationship (EER) models for database design, Relational Algebra (RA), Structured Query Language (SQL), SQL programming techniques, functional dependencies and normalization, object and object-relational databases, and security. Students will practice to design, develop, and implement a relational ORACLE database and use the database for queries, transaction processing, and report generation. Offered by Computer Science (p. 1025). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CS 310\(^C\)) and (CS 330\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 451: Computer Graphics.** 3 credits.
Basic graphics principles and programming. Topics include scan conversion, transformation, viewing, lighting, blending, texture mapping, and some advanced graphics techniques. Offered by Computer Science (p. 1025). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (MATH 203\(^C\)) and (CS 310\(^C\)) and (CS 367\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 455: Computer Communications and Networking.** 3 credits.
Data communications and networking protocols, with study organized to follow layers of Internet Protocol Suite (TCP/IP family of protocols). Topics include role of various media and software components, local and wide area network protocols, network performance, and emerging advanced commercial technologies. Offered by Computer Science (p. 1025). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CS 310\(^C\)) and (CS 367\(^C\)) and (STAT 344\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 463: Comparative Programming Languages.** 3 credits.
Key programming mechanisms described independently of particular machines or languages, including control, binding, procedural abstraction, types, and concurrency. Includes basic programming competence in several different types of programming languages, including a language that provides concurrency. Notes: Students who have taken CS 363 may not receive credit for CS 463. Offered by Computer Science (p. 1025). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CS 330\(^C\)) and 367\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 465: Computer Systems Architecture.** 3 credits.

**Registration Restrictions:**
**Required Prerequisite:** (CS 367\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CS 468: Secure Programming and Systems.** 3 credits.
Fundamental principles and techniques for implementing secure computer systems. Topics include security and cryptography basics, vulnerability analysis, secure software development, and distributed
system security. Projects involve designing and programming basic security tools, secure programs, and distributed systems. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 367C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 469: Security Engineering. 3 credits.
Covers the software subsystems that are involved in defending computer systems. Studies threats and architecting solutions against them, including but not limited to access control and identity management, network and system security, intrusion detection and recovery systems, monitoring and forensic systems. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 330C) and (CS 367C) and (STAT 344C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 471: Operating Systems. 3 credits.
Issues in multiprogramming. Covers concurrent processes and synchronization mechanisms; processor scheduling; memory, file, I/O, and deadlock management; performance of operating systems; and projects dealing with synchronization in multiprogrammed OS and virtual memory management. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 367C) or ECE 445C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 475: Concurrent and Distributed Systems. 3 credits.
Practical issues in designing and implementing concurrent and distributed software. Topics include concurrent programming, synchronization, multithreading, local and wide-area network protocols, distributed computation, systems integration, and techniques for expressing coarsegrained parallelism at the application level. Projects involve network programming at application level. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 367C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 477: Mobile Application Development. 3 credits.
This project based course will teach fundamental principles of software development for the mobile device environment, emphasizing the application of numerous academic concepts and the new design and programming paradigms that stem from the use of mobile devices. Topics include user interfaces, event-based programming, interprocess communications, networking, mobile-specific capabilities and performance in a resource restricted environment. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CS 310C and 367C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 480: Introduction to Artificial Intelligence. 3 credits.
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. Uses LISP, PROLOG, or expert system programming language. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 330C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 482: Computer Vision. 3 credits.
Basic principles of visual perception and their implementation on computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Students complete projects involving real images. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (MATH 203C) and (STAT 344C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
CS 483: Analysis of Algorithms. 3 credits.
Analyzes computational resources for important problem types by alternative algorithms and their associated data structures, using mathematically rigorous techniques. Specific algorithms analyzed and improved. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (CS 330C) and (MATH 125C). 
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 484: Data Mining. 3 credits.
Basic principles and methods for data analysis and knowledge discovery. Emphasizes developing basic skills for modeling and prediction and performance evaluation. Topics include system design; data quality, preprocessing, and association; event classification; clustering; biometrics; business intelligence; and mining complex types of data. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310C) and (STAT 344C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 485: Autonomous Robotics. 3 credits.
Covers various basic topics in autonomous robotics, such as autonomous architectures and their interaction with physical hardware, elementary kinematics and robot control, motion and trajectory planning, localization, task planning, learning and adaptation, modeling, and sensor fusion. Includes projects involving physical robots. Offered by Computer Science (p. 1025). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CS 262C, 310C and MATH 203C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 490: Design Exhibition. 3 credits.
Capstone course focusing on design and successful implementation of major software project, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-industry panel. Offered by Computer Science (p. 1025). May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Two other CS 400-level courses; and senior standing.

Registration Restrictions:
Required Prerequisites: (CS 321C or 421C) and (CS 483C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 491: Industry-Sponsored Senior Design Project. 3 credits.
Senior design project course focusing on design and successful implementation of major software project specified by an industry sponsor, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-industry panel. Offered by Computer Science (p. 1025). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Required Prerequisites: CS 367C, 321C and 483C. 
* May be taken concurrently.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 498: Independent Study in Computer Science. 1-3 credits.
Research and analysis of selected problems or topics in computer science. Topic must be arranged with instructor and approved by department chair before registering. Notes: May be repeated if topics substantially different. Offered by Computer Science (p. 1025). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: 60 credits, CS major, and Permission of Instructor.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CS 499: Special Topics in Computer Science. 3 credits.
Topics of special interest to undergraduates. Notes: May be repeated if topics substantially different. Offered by Computer Science (p. 1025). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: 60 credits. Additional prerequisites may vary with nature of topic.

Registration Restrictions:
Required Prerequisites: CS 310C and 330C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.
Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

500 Level Courses

CS 504: Principles of Data Management and Mining. 3 credits.
Techniques to store, manage, and use data including databases, relational model, schemas, queries and transactions. On Line Transaction Processing, Data Warehousing, star schema, On Line Analytical Processing, MOLAP, HOLAP, and hybrid systems. Overview of Data Mining principles, models, supervised and unsupervised learning, pattern finding. Massively parallel architectures and Hadoop. Notes: This course cannot be taken for credit by students of the MS CS, MS ISA, MS SWE, CS PhD or IT PhD programs. Offered by Computer Science (p. 1025). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CS 530: Mathematical Foundations of Computer Science. 3 credits.
This course focuses on the topics of basic mathematical structures, mathematical logic and probability theory; and application of these concepts to problem solving and formal reasoning through hand-on practice with the use of computational tools. Notes: This course is restricted to provisional students. It must be taken in the first semester at GMU. Offered by Computer Science (p. 1025). May not be repeated for credit.

Recommended Prerequisite: MATH 125 and STAT 344.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CS 531: Fundamentals of Systems Programming. 3 credits.
Introduces systems and network programming for UNIX and Windows using lectures and hands-on labs. Covers ANSI C programming, system libraries and APIs, forking and threads, interprocess communications, synchronization, Windows API, and code debugging. Offered by Computer Science (p. 1025). May not be repeated for credit.

Recommended Prerequisite: CS 310 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CS 540: Language Processors. 3 credits.
Basic programming language processors such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code generation techniques. Lab includes construction of language processors and experience with programming environments. Offered by Computer Science (p. 1025). May not be repeated for credit.

Recommended Prerequisite: MATH 125 and CS 310 and CS 330 and CS 465.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CS 550: Database Systems. 3 credits.
An introduction to database management with focus on architecting databases and using them in applications. Topics to be covered include: data modeling with the Entity-Relationship model, the relational data model and its formal languages, SQL, the theory of database design, object databases, XML and Web data. Offered by Computer Science (p. 1025). May not be repeated for credit.

Recommended Prerequisite: (CS 310 and CS 330) or (INFS 501 and INFS 515 and INFS 519 and SWE 510).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CS 551: Computer Graphics. 3 credits.
Graphics principles and programming. Topics include graphics hardware, antialiasing, transformations, viewing, illumination, blending, texture mapping, color models, curves, surfaces, and animation. Offered by Computer Science (p. 1025). May not be repeated for credit.

Recommended Prerequisite: CS 310 and CS 367.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CS 555: Computer Communications and Networking. 3 credits.
Techniques and systems for communication of data between computational devices and layers of Internet Protocol Suite. Topics include role of various media and software components, local and wide area network protocols, network design, performance and cost considerations, and emerging advanced commercial technologies. Emphasizes TCP/IP family of protocols. Offered by Computer Science (p. 1025). May not be repeated for credit.

Recommended Prerequisite: CS 310 and CS 367 and STAT 344.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CS 557: Operating Systems. 3 credits.
Models of operating systems. Major functions including processes, memory management, I/O, interprocess communication, files, directories, shells, distributed systems, performance, and user interface. Offered by Computer Science (p. 1025). May not be repeated for credit.

Recommended Prerequisite: CS 310 and CS 367 and CS 465.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CS 580: Introduction to Artificial Intelligence. 3 credits.
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. LISP, PROLOG, or expert system programming language. Offered by Computer Science (p. 1025). May not be repeated for credit.

Recommended Prerequisite: CS 310 and CS 330.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CS 583: Analysis of Algorithms. 3 credits.
Topics include analyzing sequential and parallel algorithmic strategies such as greedy methods, divide and conquer strategies, dynamic programming, search and traversal techniques, and approximation algorithms; and analyzing specific algorithms falling into these classes, NP-Hard and NP-Complete problems. Offered by Computer Science (p. 1025). May not be repeated for credit.

Recommended Prerequisite: CS 310 and CS 330 and MATH 125.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CS 584: Theory and Applications of Data Mining.** 3 credits.
Concepts and techniques in data mining and multidisciplinary applications. Topics include databases, data cleaning and transformation, concept description, association and correlation rules, data classification and predictive modeling, performance analysis and scalability, data mining in advanced database systems, including text, audio, and images, and emerging themes and future challenges. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CS 595: Basic Topics in Computer Science.** 3 credits.
Special topics in computer science not occurring in existing courses. Offered by Computer Science (p. 1025). May be repeated within the degree for a maximum 9 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CS 600: Theory of Computation.** 3 credits.
Introduction to logic and proof techniques, formal languages, automata theory, and computational complexity. Specific topics include regular and context-free languages, Turing machines, NP-completeness, and undecidability. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 583B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CS 630: Advanced Algorithms.** 3 credits.
Provides an overview of advanced algorithm design and analysis techniques. Topics include algorithms for hash tables, matrix operations, number theory, string matching, computational geometry, combinatorial optimization, and linear programming; also the areas of NP-completeness and approximation algorithms. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 583B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 633:** *Computational Geometry*. 3 credits.

Basic principles and methods for computing in field of geometric modeling. Emphasizes data structures used to represent geometric objects and algorithms for manipulating those data structures. Topics include range searching, polygon triangulation, convex hulls, motion-planning, visibility, and mesh generation. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** CS 583B.

B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 635:** *Foundations of Parallel Computation*. 3 credits.

Covers three major parallel computing paradigms: MIMD computation, SIMD computation, and data flow computation. Emphasizes interfaces between algorithm design and implementation, architecture, and software. Examines parallel algorithms and parallel programming languages relative to architecture of particular parallel computers. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Recommended Prerequisite:** Proficiency in C programming language.

**Registration Restrictions:**

**Required Prerequisites:** (CS 583B and 571B).

B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 640:** *Advanced Compilers*. 3 credits.

Examines advanced compiler techniques such as code optimizations for sequential and parallel machines; compilers for logical, functional, or object-oriented languages; and other topics in current literature. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** (CS 540B and 583B).

B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 650:** *Advanced Database Management*. 3 credits.

Study of the internal architecture of database systems. Topics include: physical data organization and indexing, query processing and optimization, transaction processing, database system architectures, Web services and Web data security. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** (CS 550B or INFS 614B).

B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 655:** *Wireless and Mobile Computing*. 3 credits.

This course provides an introduction to wireless and mobile networking. Topics include principles and architectures of wireless and mobile networking and fundamental issues of wireless communications with energy-constrained, mobile devices. It discusses physical, data link and network layer protocols including IEEE 802.11, and emerging wireless networks such as Internet-of-Things, high-speed millimeter-waves, vehicular networks, and mobile and IoT sensing applications including...
involves indoor localization, smart-homes, and smart-cities. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Recommended Prerequisite:** CS 555

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 657:** Mining Massive Datasets with MapReduce. 3 credits.
Covers the techniques to mine large datasets, including Distributed File Systems and Map-Reduce, similarity search, and data stream processing. Covers classic problems in data mining, such as clustering, association rule mining, and others from the point of view of scalability. Includes a final project to exercise concepts covered in class. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 584B.
B- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 658:** Networked Virtual Environments. 3 credits.
Networked virtual environment overview, networking and multimedia concepts, virtual simulation concepts, efficiency/performance issues, and online conferencing/virtual classrooms. Course is based around a project with multiple segments, each covering one aspect of networked virtual environments, plus a final session where one- or two-person teams create a minimally functional networked virtual environment over the Internet using multicast network software. Lectures available online/recorded. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 555B.
B- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 662:** Computer Graphics Game Technologies. 3 credits.
Addresses some graphics game techniques including collision detection, levels of detail, physics-based simulations, textures, maps, and shadows. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 551B.
B- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 667:** Biometrics and Identity Management. 3 credits.
Basic principles and methods for automatic authentication of individuals. Technologies include face, fingerprint, and iris recognition; and speaker verification. Additional topics cover multimodal biometrics, system design, performance evaluation, and privacy concerns. Term project required. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 580B.
B- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 672:** Computer System Performance Evaluation. 3 credits.
Theory and practice of analytical models of computer systems. Topics include open and closed multiclass queuing networks, single and multiple class Mean Value Analysis, Markov Chains, performance and availability models of Internet data centers, software performance engineering, and
e-commerce performance. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 571\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CS 673: Multimedia Computing and Systems. 3 credits.
Focuses on technological and development environments in developing multimedia applications. Projects involve experience with multimedia authoring tools and simulations to assess performance. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 571\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CS 674: Data Mining on Multimedia Data. 3 credits.
Covers advanced techniques for managing, searching, and mining of various types of data such as text, web links, images, time series, video, and audio. Issues related to handling such data will be discussed, including feature selection, high dimensional indexing, interactive search and information retrieval, pattern discovery, and scalability. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 584\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CS 681: Knowledge Engineering. 3 credits.
Design, construction, and evaluation of software systems that solve problems generally deemed to require human expertise. Topics include modeling expert's knowledge, reasoning based on knowledge and evidence, ontology design and development, rule learning, and knowledge-based maintenance. Programming projects include development of tools or small-scale systems. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 580\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
**CS 682: Computer Vision.** 3 credits.
Study of computational models of visual perception and their implementation in computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 580B and 583B).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 683: Parallel Algorithms.** 3 credits.
Examines design and analysis of parallel algorithms. Material focuses on algorithms for both theoretical and practical models of parallel computation. Considers algorithm design and analysis for PRAM and existing SIMD and MIMD type architectures. Topics include sorting, graph algorithms, numerical algorithms, and computational complexity. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 580B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 684: Graph Algorithms.** 3 credits.
Data structures and analytical techniques to study graph algorithms. Data structures include disjoint sets, heaps, and dynamic trees. Algorithms include minimum spanning trees, shortest path, maximum flow, and graph planarity. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 583B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 685: Autonomous Robotics.** 3 credits.
Reviews developments in intelligent autonomous systems. Studies applications of artificial intelligence, computer vision, and machine learning to robotics. Topics include analysis and design of algorithms and architectures for planning, navigation, sensory data understanding, sensor fusion, spatial reasoning, motion control, knowledge acquisition, learning concepts and procedures, self-organization, and adaptation to environment. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 580B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 686: Image Processing and Applications.** 3 credits.
Concepts and techniques in image processing. Discusses methods for image capture, transformation, enhancement, restoration, and encoding. Students complete projects involving naturally occurring images. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 583B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.
**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 687: Advanced Artificial Intelligence.** 3 credits.
Explores foundational issues of artificial intelligence, such as roles of knowledge and search, formalization of knowledge and inference, and symbolic versus emergent approaches to intelligence. Studies advanced programming techniques for artificial intelligence, relationship to foundational issues, and important application areas for artificial intelligence. Notes: Major programming project required. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 580B^-.
B^- Requires minimum grade of B^-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 688: Pattern Recognition.** 3 credits.
Explores statistical pattern recognition and neural networks. Pattern recognition topics include Bayesian classification and decision theory, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, dimensionality reduction, feature extraction and selection, mixture models and EM, and vector quantization and clustering. Neural networks topics include feed-forward networks and back-propagation, self-organization feature maps, and radial basis functions. Emphasizes experimental design, applications, and performance evaluation. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** CS 580B^- or 584B^-.
B^- Requires minimum grade of B^-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 689: Planning Motions of Robots and Molecules.** 3 credits.
Covers topics from artificial intelligence, algorithms and databases. Presents algorithms that model and simulate physical and biological systems and focuses on motion-planning algorithms for robotic systems in the presence of obstacles. Simple deterministic and sampling-based approaches to motion planning will be covered, as well as advanced planning methods including planning with kinematics and dynamic constraints. Selected topics include sensor-based motion planning, manipulation planning, assembly planning, planning under uncertainty and robotics-inspired methods to compute functionally-relevant motions of molecular chains. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 583B^-.
B^- Requires minimum grade of B^-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 695: Topics in Computer Science.** 3 credits.
Special topics in computer science not occurring in regular computer science sequence. Notes: May be repeated for credit when topics are distinctly different. Offered by Computer Science (p. 1025). May be repeated within the term.

**Recommended Prerequisite:** Completion of at least two core courses and permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CS 697: Independent Reading and Research.** 1-3 credits.
Students may undertake a course of study under supervision of consenting faculty member. Students usually submit written statement of course content and tentative reading list as part of request for approval.
Literature review, project report, or other written product usually required. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Recommended Prerequisite:** Completion of at least two core courses, and permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

---

**CS 706:** *Concurrent Software Systems*. 3 credits.
Topics include concurrent programming languages and constructs, and specification, design, verification, and validation of concurrent programs. Students required to solve concurrent programming problems and check solutions by using verification, testing, and debugging tools. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 571B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

---

**CS 707:** *Interactive Graphics Software*. 3 credits.
Advanced graphics methods and tools. Topics include visualization, modeling, rendering, animation, simulation, virtual reality, graphics software tools, and current research topics. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 555B and 571B).
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 755: Advanced Computer Networks.** 3 credits.
Current and emerging issues in advanced computer networks and applications. Topics include software systems associated with packet and cell-switched networking architectures and protocols, high-performance LANs, scheduling and congestion control, mobile networking, multimedia applications, and next generation of Internet. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 555<sup>B−</sup>.
<sup>B−</sup> Requires minimum grade of B−.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 756: Performance Analysis of Computer Networks.** 3 credits.
Analytical, measurement, and simulation techniques for modeling and analyzing computer networks. Examines elementary queuing analysis; networks of queues; routing and flow controls; and applications to local and wide area networks, Internet, and emerging networking technologies. A large portion of the course is devoted to projects, normally performed in student teams, who apply the techniques presented. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 555<sup>B−</sup>.
<sup>B−</sup> Requires minimum grade of B−.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 775: Advanced Pattern Recognition.** 3 credits.
Studies recent advances in development of machine vision algorithms and knowledge-based vision systems. Topics include scalespace; Gabor and wavelet processing; distributed and hierarchical processing using neural networks; motion analysis; active, functional, and selective perception; object and target recognition; expert systems; data fusion; and machine learning. Emphasizes system integration in terms of perception, control, action, and adaptation. Presents applications to robotics, intelligent highways, inspection, forensic, and data compression. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 682<sup>B−</sup> and 686<sup>B−</sup>).
<sup>B−</sup> Requires minimum grade of B−.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 774: Computational Vision.** 3 credits.
Studies recent advances in development of machine vision algorithms and knowledge-based vision systems. Topics include scalespace; Gabor and wavelet processing; distributed and hierarchical processing using neural networks; motion analysis; active, functional, and selective perception; object and target recognition; expert systems; data fusion; and machine learning. Emphasizes system integration in terms of perception, control, action, and adaptation. Presents applications to robotics, intelligent highways, inspection, forensic, and data compression. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 682<sup>B−</sup> and 686<sup>B−</sup>).
<sup>B−</sup> Requires minimum grade of B−.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 773: Real-Time Systems Design and Development.** 3 credits.
Real-time systems and principles supporting design and implementation. Emphasizes fundamental results from real-time scheduling theory and relevance to computer system design. Topics include system design issues for real-time applications involving operating systems, communication networks, databases, and multimedia. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 571<sup>B−</sup>.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 777: Human-Computer Intelligent Interaction.** 3 credits.
Current and emerging issues in human-computer intelligent interaction, and human-centered systems and their applications. Topics include video processing, visualization, virtual environments, adaptation and tutoring, image and scene modeling, analysis and synthesis, face and gesture recognition, and speech and natural language processing. Notes: Term project and topical review required. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 580\(^B\) and 551\(^B\)) or (CS 682\(^B\)).
\(^B\): Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 779: Topics in Resilient and Secure Computer Systems.** 3 credits.
Covers study of alternate computer security, including how these methods can be combined in a layered defense and factors that affect the selection of the architectures. Reviews recent papers and reports. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** CS 571\(^B\) or ISA 562\(^B\).
\(^B\): Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 782: Machine Learning.** 3 credits.
Surveys machine learning concerning development of intelligent adaptive systems that are able to improve through learning from input data or from their own problem-solving experience. Topics provide broad coverage of developments in machine learning, including basic learning strategies and multistrategy learning. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 681\(^B\), 687\(^B\) or 688\(^B\)).
\(^B\): Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 787: Decision Guidance Systems.** 3 credits.
Decision-guidance systems support an iterative process of giving actionable recommendations to and extracting feedbacks from human decision-makers, with the goal of arriving at the best possible course of action. Focuses on models, languages, algorithms and applications of Decision-Guidance Management Systems, used for fast development of decision-guidance applications. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (INFS 614\(^B\) or CS 550\(^B\)).
\(^B\): Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 788: Autonomic Computing.** 3 credits.
Studies self-managing, self-optimizing, self-configuring, self-tuning, self-healing, and self-protecting computing systems. This course analyzes many examples of autonomic systems as well as various techniques to design and build such systems. This is a doctoral seminar based on reading and analysis of current papers. Offered by Computer Science (p. 1025). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 555\(^B\), 571\(^B\) or ISA 562\(^B\)).
\(^B\): Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CS 789: Advanced Topics in CS.** 3 credits.
Advanced topics not occurring in regular sequence. Notes: May be repeated for credit when subject differs. Satisfies MS breadth requirement only if explicitly stated in syllabus in given section. Only one such course should be used for breadth requirements. Offered by Computer Science (p. 1025). May be repeated within the term.

**Recommended Prerequisite:** Admission into computer science PhD program.
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CS 798: Project Seminar. 3 credits.
Master’s degree candidates undertake a project using knowledge gained in MS program. Notes: Topics chosen in consultation with advisor. Meets project or thesis requirement for MS in computer science. Offered by Computer Science (p. 1025). May not be repeated for credit.

Recommended Prerequisite: 18 hours of credit applicable toward the M.S. in computer science.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Thesis

Grading:
This course is graded on the Graduate Special scale. (p. 82)

CS 799: Thesis. 1-6 credits.
Original or expository work evaluated by committee of three faculty members. Offered by Computer Science (p. 1025). May be repeated within the degree.

Recommended Prerequisite: 18 hours of credit applicable toward the M.S. in Computer Science.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

CS 880: Research Topics in Artificial Intelligence. 3 credits.
Special topics in artificial intelligence not occurring in regular computer science sequence. Notes: Requires substantial student participation. Subject matter may include continuation of existing 600- or 700-level courses in artificial intelligence or other topics. May be repeated for credit.
when subject matter differs. Offered by Computer Science (p. 1025). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CS 884: Advanced Topics in Computer Vision and Robotics.** 3 credits.
Covers recent developments. Topics motivated by applications to autonomous robotic systems, mobile robot navigation, multirobot systems, human-computer-environment interaction, image/video search and analysis, content discovery, and visual surveillance. Topics include 3D structure and motion recovery, motion understanding, map building and localization, object detection and recognition, and target tracking. Projects and experimental evaluation emphasized. Notes: Course may be repeated with change of topic. Offered by Computer Science (p. 1025). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Required Prerequisites: (CS 682B or 685B). B- Requires minimum grade of B-

Enrollment is limited to Graduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CS 895: Research Topics in CS.** 3 credits.
Advanced topics not occurring in regular sequence. Notes: May be repeated for credit when subject differs. Only one such course should be used for breadth requirements. Offered by Computer Science (p. 1025). May be repeated within the term.

**Recommended Prerequisite:** Doctoral status.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CS 896: Directed Reading and Research.** 1-6 credits.
Reading and research on a specific topic under the direction of a faculty member. Notes: Students can sign up for this class only after satisfying the CS PhD breadth requirement. Offered by Computer Science (p. 1025). May be repeated within the degree for a maximum 18 credits.

**Recommended Prerequisite:** Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students in the VS-PHD-CS program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**900 Level Courses**

**CS 990: Dissertation Topic Presentation.** 0 credits.
Students put together a professional presentation of a research proposal and present it for critique to fellow students and interested faculty. Notes: Must be completed before the presentation of a dissertation research proposal. Offered by Computer Science (p. 1025). May not be repeated for credit. Equivalent to CEIE 990, IT 990, STAT 990.

**Recommended Prerequisite:** Student must have passed the PhD qualifying examinations.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Research

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CS 998: Doctoral Dissertation Proposal.** 1-12 credits.
Work on a research proposal that forms the basis for a doctoral dissertation. Notes: No more than 24 credits of CS 998 and 999 may be applied to the doctoral degree requirements. Offered by Computer Science (p. 1025). May be repeated within the degree.

**Recommended Prerequisite:** Student must have passed the PhD qualifying examinations and must have a dissertation advisor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CS 999: Doctoral Dissertation.** 1-12 credits.
Dissertation research under the supervision of the dissertation director. Notes: No more than 24 credits of CS 998 and 999 may be applied to the
Conflict Analysis and Resolution (CONF)

100 Level Courses

CONF 101: Conflict and Our World. 3 credits.
Brief history of field, survey of key conflict resolution themes and theories, and intervention methods. Overview includes general factors of conflict and its resolution; and nature of conflict in interpersonal, group, organizational, and international situations. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 137)

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

200 Level Courses

CONF 210: Theories of Conflict Analysis and Resolution. 3 credits.
Students will utilize critical thinking and analytical skills to begin an in-depth examination of the major theories of conflict analysis and resolution. Theories and case studies will include root causes and dynamics of conflict and methods of conflict analysis and resolution.
Notes: Required course for all CONF majors (BA and BS) beginning Fall 2011. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

300 Level Courses

CONF 300: Conflict Resolution Techniques and Practice. 3 credits.
Advanced consideration of CONF 101 topics, introduction of core notion of reflective practice, conflict resolution techniques, practice, third party roles, and ethics. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 301: Research and Inquiry in Conflict Resolution. 3 credits.
Introduces social science research methods at undergraduate level. Covers basic epistemology of social research, including quantitative and qualitative methods, emphasizing participatory action research, and evaluation and assessment work. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 302: Culture, Identity, and Conflict. 3 credits.
Covers deeply rooted, intractable, or protracted social conflicts around core issues of identity, including race, ethnicity, religion, and nationalism. Explores cultural, symbolic, and discursive approaches to identity conflict. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CONF 310: Special Topics in Practice. 1-3 credits.
Examines selected topics related to practice in the field of conflict analysis and resolution. Topics vary, addressing practical skills and knowledge necessary to conflict resolution practice. Notes: May be repeated if topics vary. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the term for a maximum 6 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 314: Advising Seminar for Conflict Majors. 1 credit.
Examines issues and opportunities relevant to CONF majors to enhance their overall success in the program. Topics may include academic planning, field experience processes, critical thinking in coursework, career exploration and readiness, and co-curricular opportunities. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 320: Interpersonal Conflict Analysis and Resolution. 3 credits.
Considers personal, relational, social and cultural dimensions of interpersonal conflict. Introduces concepts and skills for understanding the causes, patterns, systems and dynamics of difficult issues and situations. Uses readings, case studies, and role plays to develop ability to analyze and intervene in interpersonal conflicts. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
CONF 325: Dialogue and Difference. 3 credits.
Covers challenges of communicating across differences of age, gender, language, culture, political orientation, and contextual situations. Students will engage in preparing and analyzing communication strategies in conflict situations and will participate in a dialogue over the term that explores the meaning and experience of difference on the Mason campus. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 330: Community, Group, and Organizational Conflict Analysis and Resolution. 3 credits.
Covers conflict in communities, groups and organizations. Introduces theories of social harmony and conflict, drawing on sociology, social psychology, community psychology, organizational psychology, administration of justice, philosophy, and conflict resolution. Uses case studies, class presentations, and group projects to develop ability to analyze conflict and make recommendations for change. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 331: Simulation in Community and Organizational Conflict Resolution. 1 credit.
Builds on the theories and concepts presented in CONF 330 to focus on the practice of group and community conflict. Through intensive simulations using conflict cases, students will have the opportunity to practice conflict resolution skills such as dialogue, problem solving, mediation and negotiation and gain a practical understanding of third party roles and intervention strategies in community, group, and organizational settings. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 335: Justice and Reconciliation. 3 credits.
Explores justice and reconciliation from a conflict perspective. Drawing on approaches in the interdisciplinary fields of sociolegal studies and conflict analysis and resolution, the course considers these and other questions: How does injustice fuel conflict? What role should justice play in guiding conflict prevention and addressing the aftermath of violence? What is reconciliation and how do we know when it has been achieved? Are justice and reconciliation mutually reinforcing processes or does one stand in the way of the other? The first part of the course focuses on foundational concepts and questions understood through domestic US examples, examining topics such as: gender equality and gender violence, migration and integration, discrimination, identity politics, healing communities, and environmental justice. We then broaden our perspective geographically, as we examine justice and reconciliation as responses to mass atrocity. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 340: Global Conflict Analysis and Resolution. 3 credits.
Covers conflict at macro level, introducing theories of international and global violence and conflict, drawing from disciplines of international relations, political science, intercultural communication, and conflict resolution. Covers impact of globalization and structural causes of conflict. Uses class discussions, case studies, and final paper to develop analytical skills to help in analysis of conflict. Prepares for further course work for international conflict concentration. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Mason Core: Global Understanding (p. 137)

Schedule Type: Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 341: Simulation in Global Conflict Resolution. 1 credit.
Focuses primarily on global conflict resolution practice. Using the methodologies of dialogue, problem-solving, and intensive simulation, students will increase their theoretical and practical understanding of peace making, peace building, and transformation processes within a specific international case. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 2 credits.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 345: Social Dynamics of Terrorism, Security, and Justice. 3 credits.
Presents students with analytical frameworks to account for terrorist acts and organizations and explore social dynamics underlying the development of, and response to, terrorism. Topics may include recruitment into violent groups, counterterrorism and human rights concerns, role of religious and political ideologies in terrorism and counterterrorism, media coverage of terrorism, and effects of terrorism on social structures and processes. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONF 370: Internship Field Experience. 1-9 credits.
Internships will provide an opportunity for students to gain practical experience, reflect on those experiences, and apply academic theories outside of the normal classroom environment. Students will apply academic theories learned in the classroom to situations that arise in the work environment. Students must obtain approval and complete an internship proposal application in order to be registered for the course. Notes: Course does not have a regular meeting time; students submit work via blog and e-mail; some meetings with instructor. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 9 credits.

Schedule Type: Internship
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
**CONF 375: Special Programs Field Experience.** 1-6 credits.
Learning experience in the application of conflict analysis and resolution (CAR) skills in special program settings. Provides supervised practice in CAR techniques, leadership, program implementation, and strategies to facilitate conflict resolution in educational institutions or community settings. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 6 credits.

**Schedule Type:** Fieldwork

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 385: International Field Experience.** 3 credits.
Investigates conflict theory through international field experience including participation in formally organized courses offered by Global Education Office or another form of international field experience approved by program director. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** CONF 101 and permission of advisor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 386: Context and Synthesis: Study Abroad.** 1 credit.
Investigates conflict theory through cross cultural experience which includes participation in formally organized semester abroad programs offered by the Global Education Office or another form of international field experience approved by the program director. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 2 credits.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 392: Youth and Conflict.** 3 credits.
Explores aspects of youth and conflict in terms of context and dynamics at the local, regional, and global levels, as well as interactions with violence and peace. Youth is more than a distinct life phase or political category; this course challenges the boundaries of how we understand the considerations and constraints of the transition to adulthood. Objectives of the course are: to develop a better understanding of the generational and gendered dynamics of conflict and peace; to situate youth contextually, socially, culturally, economically, and politically; to explore impacts of gender, age, and context upon youth individually as well as within constituent groups; to incorporate youth into theoretical and practical maps of conflict analysis and resolution. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 393: Violence: Causes, Dynamics & Alternatives.** 3 credits.
Examines causes, sources, and origins of group violence with particular attention to group conflict and ethnic conflict. Explores alternative proposals that explain why violence becomes a primary, or at least a viable, form of resolving conflict in some societies. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 394: Human Rights and Inequality.** 3 credits.
Examines inequality, social justice, and human rights in an age of globalization. Topics may include international law and order, welfare-and social policy, regionalism and multilateralism, environmental protection, gender equality, terrorist and transnational criminal networks, human trafficking, modern slavery, world poverty, corporate military firms, governance of global financial institutions, security, and transnational social movements. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 397: Study Abroad Special Topics.** 1-9 credits.
Transfer credit for relevant coursework taken during direct exchange study abroad trips. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the term for a maximum 12 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CONF 398: Special Topics in Advanced Techniques and Practices.** 3 credits.
Examines selected topics relating to conflict resolution techniques and practices. Topics vary but may include mediation, negotiation, reflective practice, and facilitation. Notes: May be repeated if topics vary. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the term for a maximum 9 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 399: Special Topics in Conflict Analysis and Resolution.** 3 credits.
Examines selected topics relating to analysis or resolution of conflict. Topics vary but may include historical examination of conflict, social issues stemming from conflict, ethical issues in intervention, globalization, human rights, sources of conflict, or relationship of particular identity domains to conflict. Notes: May be repeated if topics vary. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the term for a maximum 9 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**400 Level Courses**

**CONF 425: Mediating Conflict.** 3 credits.
A skill development course connecting conflict resolution theory and practice to the mediation process through lectures, discussion, self-
reflection, experiential learning, and role-plays. This course has been approved to meet the 20-hour basic education requirements for mediation certification by the Judicial Council of Virginia and the Office of the Executive Secretary, Supreme Court of Virginia. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 435: Building Peace in Divided Societies.** 3 credits.
A major challenge to peacebuilding efforts domestically and globally are the boundaries that communities believe separates themselves from others. The boundaries have ethnic, racial, religious or cultural roots, often with long histories of division and violence. This class will examine case studies and strategies from around the globe of peacebuilding in complex communities. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 485: Service Learning Intensive.** 1-9 credits.
Provides students with real-world setting to link conflict theory to resolution practice. Students will engage with grassroots organizations in conflict assessment, resolution process designs, trainings, and project implementation in domestic and international settings. Notes: May require additional fees. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the term for a maximum 12 credits.

**Schedule Type:** Fieldwork

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 490: RS: Integration.** 3 credits.
Capstone course in which students reflect on what they have learned, integrating knowledge from course work and synthesizing it to cogent body of knowledge. Includes class discussion and final project that demonstrates understanding of conflict theory and reflective practice. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Mason Core:** Synthesis (p. 137)

**Specialized Designation:** Research/Scholarship Intensive

**Registration Restrictions:**

**Required Prerequisite:** CONF 301 C.
C Requires minimum grade of C.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONF 499: Independent Research in Conflict Analysis and Resolution.** 1-6 credits.
Readings and research conducted on individual basis in consultation with instructor. Notes: Student may not present more than 3 credits for graduation credit. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 6 credits.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**500 Level Courses**

**CONF 501: Introduction to Conflict Analysis and Resolution.** 3 credits.
Introduces field of conflict analysis and resolution. Examines definitions of conflict and diverse views of its “resolution.” Explores thinking about human behavior, and social systems as they relate to origins of conflict and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**600 Level Courses**

**CONF 600: Foundations of Conflict Analysis and Resolution.** 6 credits.
This course offers an integration of theory, research and practice to investigate the inner workings of our field. It includes conflict theories, models and modes of practice that function as the grounding to subsequent courses in the curriculum, and exploration of some of the key contemporary debates. The course includes opportunities for linking theory to practice with experimental learning activities. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 610: Conflict Inquiry.** 3 credits.
Introduces students to the philosophies behind social science research and the methods for conducting research in the field of conflict resolution. Focuses on the identification of research problems associated with particular conflict situations, selection of appropriate research methods, and the design of effective research projects. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 600.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.
Enrollment is limited to Graduate or Undergraduate level students. Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 611: MS-Research II.** 3 credits.
Guides students through design, execution, interpretation, analysis, presentation, and evaluation of field research in conflict and resolution. Builds on CONF 610. Notes: Builds on CONF 610. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 600 and 610.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 620: Reflective Practice in Interpersonal-Multiparty Conflicts.** 3 credits.
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, 600 or 801

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 625: Engaging Conflict.** 3 credits.
This course will provide students an experiential opportunity to consider the relationship between social science theories and conflict analysis and resolution work; and engagement in a variety of forms with real world conflict. Each course will provide students the opportunity to engage in research and practice activities, choosing the appropriate modalities for the conflict they are engaging with. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** CONF 600.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Fieldwork

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CONF 642: Integration of Theory and Practice.** 3 credits.
Taken in last semester of master's student course work. Assists in developing students' own theories of conflict and conflict resolution by reviewing and integrating prior course work. Students expected to demonstrate holistic comprehension by writing major essay of publishable quality. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501 or 600

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 650: Conflict Analysis and Resolution Advanced Skills.** 3 credits.
Introduces innovative practices and provides structure to reflect on and improve ability to work within conflict settings. Considers the intersection of theory and practice, with special attention to the challenges of translation, adaptation, and transfer of skills and models. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600 or CONF 801.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 653: World Religions, Diplomacy, and Conflict Resolution.** 3 credits.
Analyzes ways world religions play role in conflicts, war, diplomacy, peacemaking, and conflict resolution. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 654: Mass Atrocity: Early Warning and Prevention.** 3 credits.
This course provides students with scholarly, practical, and relevant knowledge of Genocide and Atrocity Prevention. Students will analyze genocide and mass-atrocities as part of a spectrum of violence and conflict, and gain expertise in prevention mechanisms, including: early warning indicators, early prevention strategies, diplomacy, international justice, legal infrastructures, negotiation, mediation, humanitarian relief and intervention, civilian protection, and civil society-based solutions. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Corequisite:** CONF 501 or CONF 600 or CONF 801

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 657: Facilitation Skills.** 3 credits.
Covers range of skills in group facilitation processes, with emphasis on conflict analysis and resolution approaches to improve group communication. Includes skill-building exercises. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science or Conflict Analysis Resolution colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 658: Diversity and Difference in Conflict Analysis and Resolution. 3 credits. Covers elements of cultural diversity, understanding, and awareness, as well as creative ways of approaching issues of diversity, identity, worldviews, and territory. Considered individuals, organizations, communities and nations. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 659: Leadership in Conflict Analysis and Resolution. 3 credits. Covers roles and styles of leadership in interpersonal, organizational, community, group, and international conflicts. Considers cultural roles of leaders as insider-partials, negotiators, facilitators, and mediators. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 660: Conflict Assessment and Program Evaluation. 3 credits. Covers assessment methods appropriate to conflict contexts and related evaluation approaches and techniques for use in areas of peace building, community processes, or interpersonal conflict. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 502. Concurrent enrollment is also permitted.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science or Conflict Analysis Resolution colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 665: Special Topics in Conflict Analysis and Resolution. 3 credits. In-depth study of contemporary areas of conflict resolution practice. Notes: Fulfills elective requirement for certificate program. Topics vary. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: CONF 501 or CONF 600.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CONF 668: Applied Integration for Graduate Certificates. 3 credits. Capstone course facilitating integration of learning in the graduate certificate programs and appropriate mentored application and experiential learning. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501; CONF 660; and CONF 650, 651, 652, or 653.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science or Conflict Analysis Resolution colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 682:** *Principles of Environmental Conflict Resolution.* 3 credits.
Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit. Equivalent to EVPP 682.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree, Undergraduate or Washington Consortium level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 683:** *Environmental Conflict Resolution: Situation Assessment, Process Design and Best Practices.* 3 credits.
Explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit. Equivalent to EVPP 683.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** One of CONF 501, CONF 600, CONF 682 or EVPP 682

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 690:** *Practicum in Conflict Analysis and Resolution.* 3 credits.
In-depth field study of ongoing conflict situations, and design and delivery of intervention processes to manage or resolve conflicts. Notes: Two semesters, 3 credits per semester. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** CONF 501, CONF 600 or CONF 801, and CONF 657

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Fieldwork

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**CONF 694:** *Internship.* 1-6 credits.
Students are expected to mesh theory and practice through observation and experience. Includes comprehensive report analyzing experiences. For 3 credits of internship students must complete 160 hours of work on site. Students must receive permission of the Internship Coordinator prior to registering. Notes: Under direction of internship coordinator, students spend at least 160 hours on project involving study; resolution of conflict for each 3-credit internship. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** 21 credits, including CONF 657.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)
CONF 695: Selected Topics. 3 credits.
Topics vary; announced each academic year. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the term for a maximum 12 credits.

Recommended Prerequisite: CONF 501, CONF 600 or CONF 801

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CONF 697: Directed Readings and Research. 1-6 credits.
Independent reading at master’s level on specific topic related to conflict analysis and resolution, as agreed to by student and faculty member. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: CONF 501 or CONF 600

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Research

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

700 Level Courses

CONF 702: Peace Studies. 3 credits.
Examines diverse meanings of peace, conflict, and violence, and then reviews different issues relevant to understanding peace and conflict, including the sources of war, poverty and economic disparities, and ecological degradation. Other topics to be covered are peace keeping, peace building, sustainable development, ecological preservation, nonviolence, and peace movements. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: CONF 501, CONF 600 or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 704: Narrative Approaches to Conflict Analysis. 3 credits.
This course provides participants with the analytic tools needed to conduct their own research on conflict and conflict resolution, using a narrative perspective. This course enables students to a) review the key narrative research in the field of conflict resolution; b) design a narrative analysis of conflict; c) conduct a narrative analysis of conflicts. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Corequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 705: Conflict and Discourse Analysis. 3 credits.
The study of discourse, culture, narratives and public interpretations are becoming ever more important to the field of Conflict Analysis and Resolution. In this class we explore these concepts as they have been used in cutting edge approaches to the analysis and resolution of conflict. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 706: Ethics and Conflict. 3 credits.
Students explore issues and controversies in our field about what is just and unjust, morally right and wrong, and good and bad. Such issues are relevant to analysis and practice before, during, after the occurrence of conflict; the major topics include: validity of pacifism, the notions of a just war, the challenges of genocide prevention, non-violent resistance, humanitarian interventions, and human rights activism. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.
Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 707: Gender and Violence. 3 credits.
This course will address gendered dimensions of violent conflict and its transformation. Key themes to be explored include gender and post-conflict justice and reconciliation; the gendered politics of memory, speech and representation; militarism and masculinity; sexual violence and discourses of trauma, victimization and agency; and the ethics and politics of analytic and practice approaches. Case studies will include the partition of India/Pakistan; wartime sexual assault in Bosnia/the DRC; and domestic violence in the U.S. and South Asia. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 708: Identity and Conflict. 3 credits.
Explores complex interrelations of social identity and postmodern conflicts in society. Emphasizes the role of identity in processes of conflict resolution and transformation. Critical rethinking of ethnic, national, and religious identities as both generators and outcomes of conflict are an important part of the course. Extends knowledge on structure and dynamics of identity-based conflicts and develops a framework for their resolution. Course includes lectures, simulations, and case studies. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 709: War, Violence, and Conflict Resolution. 3 credits.
Considers various theories, causes, and conditions of violence, and applies them to variety of cases: family abuse, religious and ethnic violence, terrorism, revolution, and warfare. Applies insights from study of initiation, escalation, management, resolution, and prevention of violence to theories about resolving deep rooted conflicts. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 720: Ethnic and Cultural Factors in Conflict Resolution. 3 credits.
Examines the role culture plays in genesis, structuring, and resolution of processes of conflict within and between groups. Special attention to ethnicity and other subcultural markers of identity in complex social systems as generators and outcomes of conflict. Explores relevance of variables to success or failure of conflict resolution. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 721: Conflict and Race. 3 credits.
Addresses historic analyses of racial and ethnic identity conflicts and their resolution. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
CONF 722: Conflict and Religion. 3 credits.
Explores role of religious ideas, practices, and organizations in conflict, war, peace making, and conflict resolution. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 723: Conflict and Gender. 3 credits.
Examines constructs of gender and conflict as they relate to critical analysis of theory and practice. Reviews feminist theories for contributions to social and conflict theories. Uses narratives to explore how gender, power dynamics interact in conflict. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 725: Conflict and Spirituality. 3 credits.
Explores the relationship of spirituality to the dynamics of conflicts and conflict resolution. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 726: Moral and Philosophical Foundations of Conflict. 3 credits.
Explores major historical and contemporary positions on the intellectual, moral, and religious foundations for analyzing and resolving conflict. Enhances critical abilities in metacritique, dialectics, and intellectual self-appropriation. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 727: Ethnographic Methods for Conflict Analysis and Resolution. 3 credits.
Looks at how ethnographic tools can be used for conflict analysis. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 728: Human Rights Theory and Practice in Comparative Perspective. 3 credits.
Introduces major controversies and debates surrounding use of human rights philosophy, uses case studies from around the world to examine problems and potential of human rights in today's globalized world. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 729: Approaches to Violence. 3 credits.
Explores violence from variety of intellectual and political perspectives. Readings are wide-ranging and interdisciplinary, addressing levels of analysis from biological to nation-state and transnational processes.
Conflict Analysis and Resolution (CONF)

Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 730: Structural Sources of Conflict.** 3 credits.

Examines how structures and institutions affect behavior and give rise to conflictual relationships at all social levels, from interpersonal to the international. Explores role of conflict resolution as political process providing opportunities for nonviolent system change. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 731: Conflict in Organizations.** 3 credits.

Explores intersection and dynamics of organizational behavior and dimensions of conflict. Involves theoretical perspectives and cases examining conflict analysis and resolution. Practices strategies for prevention and intervention. Field research in greater metropolitan area integrates course content. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 732: Conflict in Development.** 3 credits.

Examines the relationship between processes of political and economic change and conflict; the relationship between democratization and conflict; the relationship between structural adjustment policies and conflict; and the challenges of postconflict reconstruction. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 733: Law and Justice from a Conflict Perspective.** 3 credits.

Examines how structures and institutions affect behavior and give rise to conflictual relationships at all social levels, from interpersonal to the international. Explores role of conflict resolution as political process providing opportunities for nonviolent system change. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 736: Globalization and International Conflict.** 3 credits.

Explores economic, political, social, and cultural meanings of globalization; how they affect conflict processes at international level; and when and under what conditions globalization promotes cooperation or conflict. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 739: Collective Action, Social Movements, and Globalization.** 3 credits.

Explores how people translate underlying grievances into collective action. Examines how groups organize, frame, and develop strategies and tactics to pursue agendas, and how processes of globalization have
influenced social movement dynamics. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 740:** Conflict Roles, Resources, and Ethics. 3 credits.
Analyzes and critiques nature and roles in conflicts. Uses theoretical perspectives, case histories to understand how settings affect roles. Includes ethical assessment of interventions in variety of conflict settings. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 741:** Negotiations. 3 credits.
Uses negotiating experiences to construct framework for thinking about and analyzing negotiation processes. Framework then used to organize review of research literature on rhythms and patterns of negotiation and to analyze actual cases. Interweaves exercises, class projects with state-of-the-art concepts and findings. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600 or CONF 801

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 745:** Leadership Roles in Conflict and Conflict Resolution. 3 credits.
Leadership responses to conflict are affected by several variables, including race, ethnicity, and gender. Explores roles of leadership decision-making styles as agents of conflict across range of conflict scenarios at interpersonal, community, organizational, and international levels. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 746:** Peace Building. 3 credits.
Building on initiatives of United Nations and other multilateral organizations, explores dynamics of post-conflict peace building. Prepares students of conflict resolution to play innovative roles in reconstruction of civil societies. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 747:** Reconciliation. 3 credits.
Explores processes of acknowledgment, reconciliation, forgiveness, and restitution. Reviews literature, case studies, and other research to assess applicability and impact of these efforts. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 748:** Comparative Peace Processes. 3 credits.
Compares case studies drawn from actual peace processes, both successful and unsuccessful, to illuminate principles and complexities. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.
Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 751: Dynamics of Civil Wars. 3 credits.
Civil wars represent some of the most vexing challenges to peace in the contemporary world. In this seminar we investigate approaches to understanding the grievances and root causes of civil wars but also new research on the political economy of civil war, organizational characteristics of insurgent movements, how rebels and civilians interact during wartime, and how transnational processes shape civil wars. A better understanding of these structures and dynamics is essential to better peacebuilding in the context of internal conflicts. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 752: Dynamics of Post-War Peacebuilding. 3 credits.
This seminar examines the processes of war termination and comparative peace processes; components and dynamics of peacebuilding and the relationships among peacebuilding, democratization, and state-building; roles of third parties in promoting negotiations, peace implementation and sustainable peacebuilding, reconciliation and reconstruction. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

CONF 751 recommended.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 753: Post-Conflict Contexts: Between Global and Local. 3 credits.
Focuses on the aftermath of violent conflict, attending to issues of structural inequality, memory, narrative, gender, trauma, culture and identity. Critically evaluates theories and practices of transitional justice and post-conflict peacebuilding, including justice, reparation, truth-telling, reconciliation, memorialization and psychosocial repair. Considers forms of social change and governance that emerge through post-conflict interventions, and explores dynamic frictions between globalizing models and local concerns. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 754: Micro-theories of Conflict. 3 credits.
The goal of this course is to explore theoretical approaches to psychological processes, personality, in-group and intergroup dynamics, and social processes in the society as a whole with the emphasis on their role in the processes of conflict resolution and transformation. Critical understanding of psychological and socio-psychological phenomena as both generators and outcomes of conflict will be an important part of the course. This course has three main parts: psychological processes, approaches to person, and group processes and society. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 755: Transforming Conflict through Insight. 3 credits.
The Insight approach is best understood as an applied human science. Like other applied sciences, it requires students to master an explanatory framework that enables them to frame their questions, formulate their hypotheses, verify their findings, and plan their actions. Thus, the course is designed follow an activity-based, problem-solving approach to learning and using the Insight approach. The objective is to enable students to master the Insight approach by putting it to work, with course meetings build around analytical exercises and activities designed to illuminate assigned readings. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 756: Addressing Intractable Conflict. 3 credits.
This course is about the biggest problems facing our communities, our nation, and our world today. Our communities, our nations (the US and others), and the world have proven remarkably unable to "solve" any of these problems. Why? We assert it is because they are all underlain by a more fundamental problem the inability to constructively deal with difficult and intractable conflicts. These conflicts prevent us as individuals, organizations, and governments (at all levels) from making wise decisions or taking effective action that will address any of these pressing problems. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 757: Conflict and Literature. 3 credits.
The purpose of this course is to teach students to read/interpret written and oral texts; explore what imaginative literature can teach us about the causes, motives, dynamics, and possibilities of resolving violent social conflicts; deepen our understanding of the human dimensions of conflicts involving mass movements for social transformation; and practice creating imaginative works of our own. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 758: Social Dynamics of Terrorism. 3 credits.
Presents students with analytical frameworks to account for terrorist acts and organizations and explore social dynamics underlying the development of, and response to, terrorism. Topics may include recruitment into violent groups, counterterrorism and human rights concerns, role of religious and political ideologies in terrorism and counterterrorism, media coverage of terrorism, and effects of terrorism on social structures and processes. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 759: Building Peace in Divided Societies. 3 credits.
Explores the roots of peacebuilding as a conflict resolution strategy in terms of changes over time, basic assumptions underpinning the emergence and continuance of conflict, building peace, and challenges to community participation as well as varied reactions to the building peace enterprise. The tensions theoretically and practically between building peace and continuity of the conflictual status quo will be explored in detail throughout the course. The focus on communities intersects and often conflicts with the more prominent global peacebuilding frame, often considered an elite endeavor as well as the political economy of the status quo as evidenced in the United States. Why, for example, does the term peacebuilding not appear regularly when considering domestic US conflict and its effects? There are, of course, more questions than answers. However, the focus of the course is to expand our thinking, conceptualizing, and theorizing regarding the current state of peacebuilding. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to students with a major in Conf Analysis Resolution.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONF 795: Professional Development Seminars. 1-3 credits.
These 1- and 2-credit courses are scheduled conventionally using weekends, concentrated presentations, and intersession periods to develop advanced professional skills. Possible topics include marketing conflict resolution services, academic course design, training design, mediation, facilitation, family practice, fundraising, writing for publication, advanced field research techniques, and grassroots applications of conflict resolution. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll. Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CONF 797: Proposal Development.** 1 credit.
Covers development of research proposal for master’s thesis, including framing a question, literature review, and designing appropriate methodology. Students form master’s thesis committee and review Human Subjects Review Board’s guidelines and procedures. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 600 and CONF 610.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CONF 799: Thesis.** 1-6 credits.
Two semesters, usually taken as 3 credits per semester. Original research or analysis under direction of thesis committee. Contact the Graduate Advisor for registration code. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree.

**Recommended Prerequisite:** CONF 600 and CONF 610

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

### 800 Level Courses

**CONF 801: Introduction to Conflict Analysis and Resolution.** 3 credits.
Introduces field of conflict analysis and resolution for doctoral students. Examines definitions of conflict and diverse views of resolution. Explores thinking about human behavior and social systems as they relate to origins and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels. Notes: Prerequisite or corequisite for all PhD CONF students. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a major in Conf Analysis Resolution.

Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 802: Theories of the Person.** 3 credits.
Understanding human conflict requires knowledge of human behavior, motivation, and perception. Reviews and critically analyzes several psychological theories for application to conflict analysis and resolution theory and practice. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 801. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a major in Conf Analysis Resolution.

Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 803: Structural Theories.** 3 credits.
Understanding social conflict and potential for conflict resolution requires that both conflict and cooperation be perceived in relation to patterns of social change. Reviews and critiques significant theories of social change to establish a basis for creative conflict analysis and resolution. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 801. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a major in Conf Analysis Resolution.

Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CONF 804: Alternate Theoretical Foundations.** 3 credits.
Familiarizes students with the ideas generated by the Frankfurt School of social theorists and others who have extended or altered these ideas. Students will use these insights to deepen an understanding of serious social conflicts and to explore the implications of critical theories for
conflict resolution processes. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Corequisite:** CONF 801.

**Registration Restrictions:**
Enrollment limited to students in the CA-PHD-CONF program.
Enrollment is limited to Graduate level students.
Enrollment limited to students in a Doctor of Philosophy degree.
Enrollment limited to students in the Conflict Analysis Resolution college.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CONF 811: *Quantitative Foundations.* 3 credits.
Building on logic of inquiry, introduces steps in research process to prepare dissertation and implement published research. Covers wide array of quantitative research approaches in social sciences, with emphasis on conflict analysis. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 801

**Registration Restrictions:**
Enrollment limited to students in the CA-PHD-CONF program.
Enrollment is limited to Graduate level students.
Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CONF 812: *Qualitative Foundations: Social Sciences.* 3 credits.
Continuation of steps in research process to prepare dissertation and implement published research. Builds on CONF 811 by examining qualitative research approaches used in social sciences, with emphasis on conflict analysis. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 801

**Registration Restrictions:**
Enrollment is limited to students with a major in Conf Analysis Resolution.
Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CONF 813: *Qualitative Foundations: Humanities.* 3 credits.
Explores qualitative research design as it pertains to the humanities, including the methods and epistemology behind the various issues likely to emerge in the process of conducting research. In addition to material on research design and methodology, reading assignments include several monographs that employ different qualitative methodologies.

Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Prerequisite:** CONF 801.

**Registration Restrictions:**
Enrollment is limited to students with a major in Conf Analysis Resolution.
Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CONF 820: *Reflective Practice in Interpersonal-Multiparty Conflicts.* 3 credits.
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict. Offered by Conflict Analysis & Resolution (p. 916). May not be repeated for credit.

**Recommended Corequisite:** CONF 801.

**Registration Restrictions:**
Enrollment is limited to students with a major in Conf Analysis Resolution.
Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CONF 820: *Practicum in Conflict Analysis and Resolution.* 3 credits.
In-depth field study of ongoing conflict situations. Design and delivery of intervention processes to manage or resolve conflicts. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** CONF 801 and CONF 657.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.
Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Fieldwork

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

CONF 890: *Directed Reading.* 1-6 credits.
Independent reading at doctoral level on a specific topic related to conflict and conflict resolution as agreed to by student and faculty member. Offered by Conflict Analysis & Resolution (p. 916). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Conf Analysis Resolution.
Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Fieldwork

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)
Conservation Studies (CONS)

100 Level Courses

CONS 100: Introduction to Field Conservation Ecology. 2 credits.
In this immersive 1-week experience, students will acquire firsthand exposure to fieldwork in conservation and how conservation professionals contribute to the survival of species in natural habitats. Through a combination of lectures, discussions, fieldwork, and outdoor adventure students will be introduced to major concepts of ecology (including diversity, succession, species interactions, communities, populations, and ecosystems) in the context of species and habitat conservation. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Recommended Prerequisite: Participation in the Washington Youth Summit on the Environment.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONS 110: Special Topics in Conservation. 1-3 credits.

Students acquire first-hand exposure to a specific topic in conservation and how conservation professionals contribute to the long-term survival of species. Through a combination of lectures, discussions, and field/lab work, students explore current questions, methods, and applications related to a particular topic in conservation. Course Format: Sections of this Smithsonian-Mason School of Conservation course will be taught as an intensive, mixed-format (lectures, lab exercises, field exercises) offerings, in residential, full-day, 1-3-week sessions held at the 3,200 acre Smithsonian Conservation Biology Institute in Front Royal, VA. Students may also be required to complete pre-course reading assignments, and carry out and submit final projects during (or within six weeks after) the onsite session. Offered by Provost's Office (p. 1158). May be repeated within the degree for a maximum 6 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

300 Level Courses

CONS 320: Conservation in Practice. 3 credits.

Work with a conservation mentor in a practicum experience. Create a portfolio documenting professional development. Notes: Must be taken concurrently with CONS 401, CONS 402, CONS 410, and CONS 490 or CONS 403, CONS 404, CONS 411, and CONS 491. Only offered through the Smithsonian-Mason Semester. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Recommended Prerequisite: Junior standing and a college level biological or

Recommended Corequisite: environmental science course. CONS 401, CONS 402, CONS 410, and CONS 490.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

400 Level Courses

CONS 400: Conservation Seminar. 2 credits.

Examines key conservation issues, based on readings and discussions from the primary literature. Teaches professional development skills for scientists in conservation including fundraising, poster presentations, and interpretation of findings for diverse audiences. Develops skills for obtaining internships, jobs, or graduate positions. Offered by Provost's Office (p. 1158). May be repeated within the degree for a maximum 6 credits. Equivalent to BIOL 351.

Registration Restrictions:
Required Prerequisites: BIOL 308C, EVPP 301C, 302C, BIOL 377C, EVPP 377C or INTS 401C.

C Requires minimum grade of C.
Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONS 401: Conservation Theory. 3 credits.
Introduces the field of conservation biology and science-based management of threatened wildlife, habitats, and human landscapes. Provides theoretical background for understanding the importance of biodiversity conservation and sustainability. Notes: Must be taken concurrently with CONS 320, CONS 402, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester. Students cannot get credit for this course and Biology 318 or NCLC 401. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: Junior standing and a college level biological or environmental science course. CONS 320, CONS 402, CONS 410, and CONS 490.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONS 402: Applied Conservation. 4 credits.
A practical scientific approach to the nature of biodiversity and species loss. Students participate in field conservation exercises in a variety of settings, as well as endocrine and reproductive technology labs. Students apply field and laboratory experiences to understanding science's connection to management decision-making for conservation. Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: Junior standing and a college level biological or environmental science course. CONS 320, CONS 401, CONS 410, and CONS 490.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONS 404: Biodiversity Monitoring. 4 credits.
Covers the assessment, monitoring and conservation of species and habitats as well as the tools for sampling species and habitats and the evaluation of those tools' effectiveness. Students use this practical, hands-on knowledge to prepare a series of reports and recommendations for future work. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Registration Restrictions:
Required Prerequisites: BIOL 308C, EVPP 301C, 302C, BIOL 377C, EVPP 377C or INTS 401C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONS 405: Landscape and Macrosystems Ecology. 4 credits.
Identify and characterize patterns in landscapes, investigate how they form and change over time, and consider anthropogenic influences. Model populations and communities across landscapes, and consider ways of managing them to achieve goals in managing species and ecosystem processes at local, regional, and continental scales. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: BIOL 308C, EVPP 301C, 302C, BIOL 377C, EVPP 377C or INTS 401C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONS 406: Small Population Management. 4 credits.
Investigates species vulnerability to extinction and the methodologies of preserving genetic diversity in small populations, both in the wild and in captivity. Teaches modeling and laboratory techniques that promote successful captive breeding, such as hormone analysis and assisted reproductive techniques. Examines captive species in the Smithsonian Conservation Biology Institute to learn husbandry practices and skills from keepers and biologists. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: BIOL 308C, EVPP 301C, 302C, BIOL 377C, EVPP 377C or INTS 401C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CONS 410: Human Dimensions in Conservation. 3 credits.
Provides sociological, local and global perspectives on conservation issues including adaptive management, conflict resolution, environmental economics, sustainability, public policy, environmental values and public opinion, and conservation ethics. Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 490. Only offered through the Smithsonian-Mason Semester. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences, Encore:Sustainability (p. 137)

Specialized Designation: Green Leaf Course

Recommended Prerequisite: Junior standing and a college level biological or environmental science course. CONS 320, CONS 401, CONS 402, and CONS 490.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONS 440: Ecology Field Skills.** 4 credits.
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulation, data collection and analysis, and introduction to organisms of study site. May include field trips. Offered by Provost's Office (p. 1158). May not be repeated for credit. Equivalent to BIOL 357, EVPP 440.

**Recommended Prerequisite:** BIOL308 or BIOL310 (or equivalent course), or INTS 401 Conservation Biology

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONS 480: Primate Behavior, Ecology and Conservation.** 3 credits.
Using primates as a focal taxon, this two-week course examines the theoretical background on how ecology, behavior, and life history influence primate abundance, distribution, and population dynamics. Teaches data collection methods for primate behavior studies, survey methods and habitat assessment techniques. Topics include several conservation-related case studies. Includes the development of a research proposal concerning primate socio-ecological strategies to address larger conservation issues. Notes: Students have the option to register for an "add-on" field experience course, CONS 497 "Primate Behavior and Conservation in Peru", through the Mason Study Abroad Global Education Office (GEO). In this course, students conduct independent research on primate species in the wild. The course takes place at the Los Amigos Biological Research Station in Peru. Offered by Provost's Office (p. 1158). May not be repeated for credit.

**Recommended Prerequisite:** This course is open to 3rd and 4th year undergraduate students who have obtained a minimum GPA of 2.25. The course is also open to recent graduates, non-degree seeking students and non-Mason students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

Integrates the course work of the Smithsonian-Mason Semester through study of current conservation issues. Students incorporate interdisciplinary aspects of conservation into a summative group case study on a chosen conservation issue and present formally before a faculty panel. Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 410. Only offered through the Smithsonian-Mason Semester. Offered by Provost's Office (p. 1158). May not be repeated for credit.

**Mason Core:** Encore: Sustainability, Synthesis (p. 137)

**Specialized Designation:** Green Leaf Course, Research/Scholarship Intensive

**Recommended Prerequisite:** Junior standing and a college level biological or

**Recommended Corequisite:** environmental science course. CONS 320, CONS 401, CONS 402, and CONS 410.

**Schedule Type:** Lecture

---

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONS 491: RS: Conservation Management Planning.** 4 credits.
Explores strategies and decisions that help secure the long-term survival of threatened species and habitats. Focuses on the planning tools necessary to define and set conservation goals and quantitatively assess species and areas of conservation value and prioritization. Offered by Provost's Office (p. 1158). May not be repeated for credit.

**Mason Core:** Encore: Sustainability, Synthesis (p. 137)

**Specialized Designation:** Green Leaf Course, Research/Scholarship Intensive

**Registration Restrictions:**
**Required Prerequisites:** BIOL 308C, EVPP 301C, 302C, BIOL 377C, EVPP 377C or INTS 401C.

C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONS 496: Research in Conservation.** 6 credits.
One-on-one research experience with a conservation practitioner over 5 weeks (about 36 hours per week) on a conservation research project associated with that practitioner's program. Offered by Provost's Office (p. 1158). May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Capstone (p. 137)

**Recommended Prerequisite:** BIOL 308 (or equivalent course) or INTS 401, and EVPP301 and 302 (or equivalent) or permission of instructor.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONS 497: Special Topics in Conservation.** 1-4 credits.
Topics of current relevance to the field of conservation. Offered by Provost's Office (p. 1158). May be repeated within the degree for a maximum 9 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CONS 498: Internship.** 1-3 credits.
Directed readings and final reflective paper or project in conjunction with an internship subject to instructor approval. Permission to enroll must be obtained from the Mason Center for Conservation Studies at least two weeks prior to the start of the semester. Offered by Provost's Office (p. 1158). May be repeated within the degree for a maximum 9 credits.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
CONS 499: Independent Study/Research. 1-3 credits.
An independent project or directed exploration into an area of conservation not covered by other courses. Offered by Provost's Office (p. 1158). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Permission of instructor.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

CONS 540: Ecology Field Skills. 4 credits.
Graduate level directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site. May include field trips. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or BIOL 310, or EVPP 305 and EVPP 306, or INTS 401 or equivalent course

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Using primates as a focal taxon, this two-week course examines the theoretical background on how ecology, behavior, and life history influence primate abundance, distribution, and population dynamics. Teaches data collection methods for primate behavior studies, survey methods and habitat assessment techniques. Topics include several conservation-related case studies. Includes the development of a research proposal concerning primate socio-ecological strategies to address larger conservation issues. Notes: Students have the option to register for an “add-on” field experience course, CONS 497 “Primate Behavior and Conservation in Peru”, through the Mason Study Abroad Global Education Office (GEO). In this course, students conduct independent research on primate species in the wild. The course takes place at the Los Amigos Biological Research Station in Peru. Offered by Provost's Office (p. 1158). May not be repeated for credit.

Recommended Prerequisite: This course is open to graduate students who have obtained a minimum GPA of 3.0. The course is also open to non-Mason students.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONS 597: Special Topics in Conservation. 1-4 credits.
Topics of current relevance to the field of conservation. Offered by Provost's Office (p. 1158). May be repeated within the degree for a maximum 9 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

600 Level Courses

Teaches students to use spatial ecology, geospatial analysis, and remote sensing tools to assess and model species distribution and habitat use in dynamic landscapes. Includes computer and field labs with examples using data from Smithsonian research. Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program. Offered by Provost’s Office (p. 1158). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONS 625: Statistics for Ecology and Conservation Biology. 3 credits.
Provides an overview of experimental design and analysis techniques used in cutting-edge ecological research and conservation. Focuses on increasing knowledge of statistical tests, interpretation of results, and ability to disseminate and clearly explain these results. Students gain an overview of applied monitoring and analysis techniques such as distance sampling, genetic analysis, niche and species distribution modeling, and spatial analysis. Notes: Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program. Offered by Provost’s Office (p. 1158). May not be repeated for credit.

Recommended Prerequisite: Basic statistics course

Registration Restrictions: Basic statistics course

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONS 630: Species Monitoring & Conservation. 3 credits.
Explores monitoring and conservation research methods and approaches for specific taxa through lectures, case studies, lab exercises, and field work. Focuses on conservation science and conservation outreach techniques. Notes: May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate. Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program. Offered by Provost’s Office (p. 1158). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: A general biology (or relevant species-related) course and a statistics course, or permission of instructor. Prior coursework in environmental science, zoology and ecology recommended.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CONS 697: Special Topics in Conservation. 1-3 credits.
Topics of current relevance to the field of conservation. Notes: May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate. Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program. Offered by Provost’s Office (p. 1158). May be repeated within the degree for a maximum 9 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 525: Advanced Human Growth and Development. 3 credits.
Covers human development throughout the life span, including emotional, physical, and cognitive development; and emphasizes personal adjustment and achievement. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 601: Introduction to Research in Counseling. 3 credits.
Enhances knowledge of and involvement in counseling research by introducing techniques and principles to design, implement, and evaluate...
research projects and program development in community and school settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 602: Foundations in Counseling. 3 credits.
Provides students with an introduction to the field of professional counseling. Provides graduate students in counseling with knowledge about the history and foundations of counseling, the professional identity and multifaceted role of the counselor, program mission statement and its relationship to counseling. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 603: Counseling Theories and Practice. 3 credits.
Covers major theoretical approaches to counseling from a multicultural perspective and provides supervised introduction to basic skills. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCD 602 (may be taken concurrently).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education, Post-Masters Counseling Lic or Psychology.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 604: Assessment and Appraisal in Counseling. 3 credits.
Prepares students to become informed about psychological and educational tests and assessment procedures that are used and applied in a counseling context. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDCD 601 B.
B Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 606: Counseling Children and Adolescents. 4 credits.
Presents theories, techniques, and counseling issues relevant to children and adolescents. Counseling lab provides practice with an emphasis on process and culturally competent counseling strategies. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCD 525 and EDCD 603.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Post-Masters Counseling Lic or School Counseling.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 608: Group Processes and Analyses. 4 credits.
Presents theories appropriate to various types of groups and descriptions of group practices, methods, dynamics, and facilitative skills. Focuses on applying theory to practice. Includes lab. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCD 603; and EDCD 606 or EDCD 609.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Post-Masters Counseling Lic.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 609: Advanced Counseling Skills and Strategies.** 4 credits.
Covers counseling skills, process and strategies associated with major counseling theories. Provides intensive practice in both technical and conceptual skills with emphasis on self-awareness, case conceptualization, racial-cultural considerations, and supervised practice in a community setting. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 525 and EDCD 603.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Community Agency Counseling or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 610: Career and Educational Counseling.** 3 credits.
Presents theories and counseling issues relevant to career counseling in schools and community agencies. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603, 606 or 609.

**Recommended Corequisite:** EDCD 604.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 611: Introduction to Ethical and Legal Issues in School Counseling.** 2 credits.
Introduces principles, practices, and application of ethical and legal issues in school counseling. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 626.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Post-Masters Counseling Lic or School Counseling.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 613: Introduction to School Counseling.** 3 credits.
Addresses the role of the school counselor and provides an understanding of the coordination of counseling program components as they relate to the school and the wider community. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 626.

**Recommended Corequisite:** EDCD 604.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 615: School-Based Mental Health.** 3 credits.
Provides an overview of mental disorders and disabilities impacting children and adolescents, with particular attention devoted to early identification and intervention in a school setting. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDCD 602B* and 603B*.
*May be taken concurrently.
B* Requires minimum grade of B*.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 619: Trauma and Crisis Counseling.** 3 credits.  
Provides an introduction to trauma and crisis counseling using theories and techniques from biocological and multicultural-social justice perspectives. Covers assessments and interventions with individuals, families, and communities who have experienced trauma/crisis. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**  
**Required Prerequisites:** (EDCD 602^B\(^\) and (EDCD 603^B\(^\)) and (EDCD 606^B\(^\) or 609^B\(^\)).  
^B\(^_\) Requires minimum grade of B-.  
^B\(^_\) Requires minimum grade of B.  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.  
Enrollment is limited to students with a major in Counseling and Development.  
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 621: School, Family, and Community Collaboration.** 2 credits.  
Provides an overview of consultation and collaboration theories and practice. Helps students develop consultation and collaboration skills that may be applied in schools, community agencies, or other organizational settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**  
**Required Prerequisites:** EDCD 602^B\(^\), 613^B\(^\) or 654^B\(^\).  
^B\(^_\) Requires minimum grade of B-.  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.  
Enrollment is limited to students with a major in Counseling and Development.  
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 626: Principles and Practices of School Counseling.** 3 credits.  
Introduces school counseling program development at K-12 levels.  
Presents philosophy, principles, and practices of effective school counseling. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 602 (may be taken concurrently).

**Registration Restrictions:**  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.  
Enrollment is limited to students with a major, minor, or concentration in Post-Masters Counseling Lic or School Counseling.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 628: Counseling and Social Justice.** 3 credits.  
Discusses the Counseling and Development program's mission statement of Social Justice, Multiculturalism, Internationalism, Advocacy and Leadership. Provides an overview of theories and models of social justice, advocacy, and leadership. Examines theories and models from a multicultural perspective and discusses within the context of counseling in school and community settings. Examines the role of counselors as change agents, leaders, and advocates. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603, and 626 or 654.

**Recommended Corequisite:** EDCD 660.

**Registration Restrictions:**  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.  
Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Post-Masters Counseling Lic.  
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.  
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 652: Introduction to Substance Abuse Counseling.** 3 credits.
Introduces substance abuse counseling. Covers addiction issues, diagnosis and treatment planning, and individual and group counseling strategies with diverse populations. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603 or concurrent enrollment.

**Registration Restrictions:**  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.  
Enrollment is limited to students with a major, minor, or concentration in Community Agency Counseling or Post-Masters Counseling Lic.  
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.  
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Graduate Regular scale. (p. 82)
EDCD 654: Counseling, Ethics, and Consultation in Community Agencies. 3 credits.
Provides a foundation for engaging in counseling, consultation, and ethical decision making within agency settings. Examines the role of the community agency counselor, with attention to multicultural and social justice perspectives. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCD 603 or concurrent enrollment.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Community Agency Counseling or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 656: Diagnosis and Treatment Planning for Mental Health Professionals. 3 credits.
Introduces students to fundamental concepts in the classification of psychopathology as well as the clinical interviewing skills necessary to apply DSM-5 diagnoses to clients in a sound and ethical manner. Incorporates an explicit focus on the role of race and culture in diagnosis and treatment. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCD 603 (may be taken concurrently).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 658: Couples and Family Counseling. 3 credits.
Introduces major approaches to counseling couples and families. Uses case studies and simulations to facilitate transition from theory to practice. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCD 609 (may be taken concurrently).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Community Agency Counseling or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

EDCD 660: Multicultural Counseling. 3 credits.
Examines multicultural issues in counseling and explores the complexities of culture and its influence on the client/counselor relationship. Promotes awareness and understanding of cultural differences and their effect on the counseling relationship. Investigates variables that interact with culture that may interfere with the counseling relationship, such as historical, political, socioeconomic, psychosocial adjustment, racism, prejudice, discrimination, and oppression. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDCD 608B.
B Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses
EDCD 750: Practicum in Mental Health Counseling. 3 credits.
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Provides opportunities to practice counseling skills related to ethics, supervision, self-care, decision-making, and professional identity and relationships. Note: students without 30 hours of prior Counseling program coursework will be dropped. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDCD 608B.
B Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship
EDCD 751: Practicum in School Counseling. 3 credits.
Provides supervised practice in a school counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Provides opportunities to practice counseling skills related to ethics, supervision, self-care, decision-making, and professional identity and relationships. Note: students without 30 hours of prior Counseling program coursework will be dropped. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDCD 608 B.
B Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to students with a major in Counseling and Development.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

EDCD 755: Practicum in Counseling. 3 credits.
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Notes: Weekly graduate class emphasizes site processing. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Completion of CNDV program course work except for EDCD 610 or electives (total credits cannot exceed 3 credits); overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606/609 and 608; no more than two grades of C in any other graduate course work required by CNDV program; permission of advisor.

Registration Restrictions:
Enrollment limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment limited to students with a major in Counseling and Development.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

EDCD 792: Internship in Mental Health Counseling I. 3 credits.
Provides supervised practice in a clinical mental health counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Develops skills in case conceptualization, assessing needs, and applying counseling knowledge and skills with clients under supervision. Note: Completion of all required counseling program coursework with a B or better; permission of advisor; students may be concurrently registered for no more than 6 credits of the following courses: EDCD 610, EDCD 621, or electives. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to students with a major in Counseling and Development.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

EDCD 793: Internship in Mental Health Counseling II. 3 credits.
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Builds on previous practicum and Internship I experiences, including evaluating interventions and programs. Note: Completion of all required counseling program coursework with a B or better; permission of advisor; students may be concurrently registered for program electives. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDCD 792 B.
B Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to students with a major in Counseling and Development.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

EDCD 794: Internship in School Counseling I. 3 credits.
Provides supervised practice in a school counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Develops skills in case conceptualization, assessing needs, and applying counseling knowledge and skills with clients under supervision. Note: Completion of all required counseling program coursework with a B or better; permission of advisor; students may be concurrently registered for no more than 6 credits of the following courses: EDCD 610, EDCD 621, or electives. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to students with a major in Counseling and Development.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

EDCD 795: Internship in School Counseling II. 3 credits.
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Builds on previous practicum and Internship I experiences, including evaluating interventions and programs. Note: Completion of all required counseling program coursework with a B or better; permission of advisor; students may be concurrently registered for program electives. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDCD 794B–. B– Requires minimum grade of B–.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to students with a major in Counseling and Development.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

EDCD 797: Advanced Topics in Education. 1-6 credits.
See EDUC 797. Offered by Graduate School of Education (p. 157). May be repeated within the term.

Registration Restrictions:
Required Prerequisite: EDCD 603B–. B– Requires minimum grade of B–.

Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Post-Masters Counseling Lic.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

800 Level Courses

EDCD 894: Advanced Family and Systems Counseling. 3 credits.
Develops advanced level skills and competencies in the practice of family and systems counseling. Multiple theoretical models for practice in a multicultural society will be explored, as well as the applications of those models in multiple professional settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to PhD in Counseling and Development Program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 895: Emerging Issues in Counseling and Development. 3 credits.
Examines issues in counseling profession, including counseling theory and methodology, development of client groups, new roles and settings for counselors, emerging assessment procedures, new understanding of diagnosis; and impact of societal changes on counseling profession. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 896: Advanced Multicultural Counseling. 3 credits.
Focuses on advanced issues in multicultural counseling, including multicultural counseling theories, skills, assessment, supervision, research, and ethics. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Masters degree in counseling or related counseling field from an accredited institution of higher education and EDCD 660, or equivalent; EDCD 895; admission to Counseling and Development Doctoral Program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a major in Education.

Enrollment is limited to Graduate level students.
Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 897: Advanced Group Counseling.** 3 credits.
For doctoral students who have had experience and training in group work. Provides greater understanding and advanced skill application in group dynamics, group process, and group leadership. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Masters degree in counseling or related counseling field from an accredited institution of higher education and EDCD 608 or equivalent; EDCD 895; admission to the Counseling and Development Doctoral Program, or Permission of Instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 898: Grant Writing and Publishing.** 3 credits.
Focuses on grant writing and publishing in counseling and psychology. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Masters degree in counseling or related counseling field from an accredited institution of higher education and EDCD 608 or equivalent; EDCD 895; admission to the Counseling and Development Doctoral Program, or Permission of Instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 899: The Theory and Practice of Counseling Supervision.** 4 credits.
Explores counseling supervision theory from a multicultural and social justice perspective. Students will apply these theories by supervising Master’s level community agency and school counseling practicum students under the supervision of the instructor. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD in Counseling and Development Program; Master’s degree in Counseling or related field, or permission of the instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.
Enrollment is limited to Graduate level students.

**Schedule Type:** Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 900: Leadership and Advocacy in the Counseling Profession.** 4 credits.
Introduces students to broad theoretical concepts, strategies, and skills related to leadership and advocacy within the counseling profession, and will help students integrate leadership and advocacy into their professional identity. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD in Counseling and Development Program.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.
Enrollment is limited to Graduate level students.
Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 990: Advanced Internship in Counseling Leadership.** 3 credits.
Provides supervised practice in counseling leadership setting or position. Emphasizes counseling leadership in practice. Notes: Biweekly class emphasizes site processing, leadership skills, and topical seminars. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Ph.D. in Education program, Counseling and Development specialization; EDCD 628 or equivalent; EDCD 895.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.
Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**EDCD 991: Advanced Internship in Counseling.** 6 credits.
Provides supervised practice in counseling supervision setting or position. Emphasizes intensive use of multicultural competencies in practice, supervision, and program development and evaluation in order to address social justice issues for clients in school or community settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Ph.D. in Education program, Counseling and Development specialization; EDCD 628 or equivalent; EDCD 895 and EDCD 896.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.
Enrollment is limited to Graduate level students.
Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCD 992: Advanced Internship in Social Justice. 3 credits. Provides opportunities to implement programs and strategies to affect social justice for clients in school or community settings. Notes: Biweekly class emphasizes topical seminars and supervision. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD in Education program, Counseling and Development specialization; EDCD 628 or equivalent; EDCD 895.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale. (p. 82)

Criminology (CRIM)

100 Level Courses
CRIM 100: Introduction to Criminal Justice. 3 credits. Overview of the American system of criminal justice, covering theories of justice, criminal law, policing, courts and associated pre and post-trial legal processes, punishment and corrections, and juvenile justice. Required for all criminology majors and minors. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 137)

Specialized Designation: Discovery of Scholarship

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

200 Level Courses
CRIM 210: Introduction to Criminality. 3 credits. Explores and evaluates how crime is defined and measured, and examines crime patterns and trends. Provides an overview and critical assessment of the major theories of crime causation. Notes: CRIM majors who are concentrating in criminal justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 220: Introduction to Law and Society. 3 credits. Introduces the relationship between law and society. Discusses theoretical perspectives from a number of social science disciplines. Promotes a foundational understanding of the concept of law and the origins, development, and role of law in society, particularly outside of formal legal institutions. Topics covered may include legal mobilization, law and social change, social movements, law and inequality, and law's relationship to social control. Notes: CRIM majors who are concentrating in Law and Society are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 230: Introduction to Homeland Security. 3 credits. Introduces fundamental concepts of homeland security. Examines governmental actions designed to prevent, prepare for, respond to, and recover from man-made and natural disasters. Focuses on efforts to align preparedness, incident management, and emergency response plans from various agencies (federal, state, local, tribal, private sector, and non-governmental). Notes: CRIM majors who are concentrating in homeland security and justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

300 Level Courses
CRIM 301: Public Law and the Judicial Process. 3 credits. Covers American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to GOVT 301.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 302: Delinquency. 3 credits. Presents theories of juvenile delinquency and societal reactions to it, gender differences in rates and types, historical overview, development of juvenile justice system, and critical assessment of juvenile justice and its alternative. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 304: Computer Crime, Forensics, and Auditing. 3 credits. Covers computer crime, relevant laws, agencies, standards, auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Hands-on experience with forensics tools. Offered by
Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to IT 357.

Recommended Prerequisite: IT 103 or IT 104 and a grade of B or better in IT 223.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 305: Crime and Crime Policy. 3 credits.
Examines the development of crime policy, including the influence of crime trends, politics, public opinion, media, criminological theory, and empirical research. Considers the effectiveness of crime policy. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 306: Criminal Justice Ethics. 3 credits.
Analyzes ethical principles relevant for those working in criminal justice. Required for all criminology majors. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 307: Social Inequality, Crime, and Justice. 3 credits.
Explores the significance of social inequality (especially race and gender inequality) for several crime and criminal justice issues. Examines variations in criminal offending and victimization, and explores disparities in criminal justice processing. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 308: Human Rights and Justice. 3 credits.
Studies the norms, laws, and systems for the promotion and protection of human rights. Provides a foundation for understanding historical, legal, political, economic, and ethical aspects of human rights. Examines ideological and cultural perspectives, sources of violations, the United Nations, regional and national mechanisms, special issues (e.g., women, torture, children, minorities), and the role of nongovernmental organizations. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 310: Introduction to the Intelligence Community. 3 credits.
Introduces students to the structure, function, and process of the intelligence community including the basic skills in writing, research, and presentation used in intelligence analysis. Required for all intelligence analysis minors. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 312: Intelligence Analysis Techniques. 3 credits.
Introduces the key analytical techniques used by entry-level analysts in the Intelligence community. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CRIM 310D.
D Requires minimum grade of D.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 315: Research Methods and Analysis in Criminology. 3 credits.
Provides an introduction to research design, methods, and analysis in the field of criminology. Students learn to understand, interpret, and critique quantitative and qualitative research approaches, and become intelligent consumers of research. Notes: This course does not meet the College's IT requirements. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Specialized Designation: Scholarly Inquiry

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 320: Crime and Place. 3 credits.
Focuses on the analysis of locations that attract and repel crime, displacement of crime, and identifying and measuring crime concentrations. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 325: Hate Crime. 3 credits.
Provides an introductory understanding of the definitions of hate crime; extremist groups and individuals; reporting, investigation, and prosecution of hate crimes; and hate crime policy and legislation. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 350: Counterintelligence.** 3 credits.
Introduces the legal authority, objectives, and guidelines of the counterintelligence discipline. Covers the investigative, defensive, offensive, and collection activities of the counterintelligence function.

Notes: Elective course for the Intelligence Analysis minor. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: CRIM 310C.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**400 Level Courses**

**CRIM 400: Applied Criminal Psychology.** 3 credits.
Uses overview of psychological and criminological theories to apply behavioral science theory to practical application in forensic settings. Focuses on analysis of various crime scenes and characteristics of offenders. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 401: Policing in America.** 3 credits.
Fundamental issues relevant to contemporary public policing in America: role and history of police; impact on crime, disorder, and other social problems; discretion and its control; moral hazards; police legitimacy and public support; police culture and the police organization; and community policing. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 402: Punishment and Corrections.** 3 credits.
Covers theories on forms of punishment systems; punishment and corrections as a product of historical, cultural, and political changes; differences by race and gender in punishment and corrections; problems of social control and violence in prisons; alternative rehabilitation; and community prevention strategies. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 403: Community Corrections.** 3 credits.
Studies the purposes and goals of community-based corrections and its various components, including pretrial diversion, probation, parole, and emerging alternatives to traditional incarceration. Addresses issues related to offenders returning to the community and critical issues facing jails, community corrections, and the management of offenders in community settings. Examines the role of community corrections within the broader correctional system. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 404: Crime Victims and Victimization.** 3 credits.
Explores experiences of crime victims, distribution of the risks of victimization, and causes and consequences of victimization. Also considers nature and influence of victim’s rights advocates. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 405: Law and Justice around the World.** 3 credits.
Comparative inquiry into the models of legal and justice systems around the world. Considers how social and legal norms are created, and how different societies exercise powers of social control. Evaluates justice models in action, including law and courts, policing, corrections, and juvenile justice. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Mason Core:** Global Understanding (p. 137)

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 406: Family Law and the Justice System.** 3 credits.
Introduction to the elements of family law, and exploration of its influence on American social life and contemporary notions of justice. Topics include marriage and parenting, divorce, custody and support, nontraditional families, and domestic violence. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 407: Advanced Topics in Law and Society.** 3 credits.
Provides an in-depth examination of the law’s role in social life to deepen students’ appreciation of the law in action. Focuses on scholarly research that describes and explains how legal actors, processes, and institutions operate in the world. Topics include: theories of legal change, law’s relationship to class, gender, and race, and law, culture, and identity. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 100 or GOVT 301
CRIM 408: Criminal Courts. 3 credits.
Studies the workings, advantages, and frailties of criminal courts, and explores whether the system works effectively and efficiently. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100 or GOVT 301

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

CRIM 409: Community Policing. 3 credits.
Study of community policing, particularly in the United States. Covers history and development of community policing, community relations, problem solving, and issues of organizational change. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 410: Criminal Investigations. 3 credits.
Focuses on criminal investigations and the role of the criminal investigator in the criminal justice system. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 411: Innovations in Policing. 3 credits.
New developments in law enforcement's response to technical, legal, and social change. Examines law enforcement policies and practices in the past and present, and directions for the future. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 412: Controversial Legal Issues. 3 credits.
Focuses on the study of law as an institution that continuously interacts with other social institutions at the individual, community, state, and federal levels. Examines how constitutional and statutory laws are interpreted by the courts to determine and define the law through contemporary, controversial, legal issues. Explores how the courts, using the law, resolve today's most controversial issues. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 422: Constitutional Law: Civil Rights and Liberties. 3 credits.
Studies First Amendment freedoms of speech, press, assembly, association, and religion; the right to privacy; and Fourteenth Amendment right to equal protection. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to GOVT 423.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 424: Constitutional Law: Criminal Process and Rights. 3 credits.
Studies constitutional law pertaining to the rights of the criminally accused from investigation and evidence through attorney, trial, and punishment stages at federal and state levels. Required for all criminology majors. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 425: Criminal Justice Management. 3 credits.
Explains the management function for current and future criminal justice managers. Emphasizes communication, leadership skills, and organizational development. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: D or higher in CRIM 100

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 430: Criminal Law. 3 credits.
An overview of the definitions and elements of crimes, defense strategies, and the differences in criminal law across states. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 460: Surveillance and Privacy in Contemporary Society. 3 credits.
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions conducting surveillance, how they calculate and manage risk, and legal constraints on surveillance activities. Offered by
Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to GOVT 460.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 462: Law Enforcement and Homeland Security.** 3 credits.
Examines the effect of 9/11 on law enforcement organizations in the United States and explores the evolving relationship between the military, federal, state, and local law enforcement agencies in the post-9/11 era. Emphasis on understanding the entire framework of homeland security in the United States and the unique issues faced by local law enforcement. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 471: Prevention and Deterrence of Crime.** 3 credits.
Theoretical and practical strategies for crime prevention and deterrence. Discusses social, environmental, and mechanical developments, police courts, and correctional elements of law enforcement in terms of current effectiveness and future potential for crime prevention. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 475: Theory and Politics of Terrorism.** 3 credits.
Explores origins of terrorism, tracing development from early states to a modern mode of conflict. Presents national, regional, and global perspectives. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 479: Preparation for Internship.** 3 credits.
Preparation for internship in a justice organization or justice-related work activity. Students develop a relationship with a prospective internship sponsor and develop a plan for the internship and the research to be reported. Notes: This course is open only to students majoring in Criminology, Law and Society, and should only be taken by students who intend to complete an internship. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 100, 306, and 315.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 480: Internship.** 6-12 credits.
Application of classroom learning to an applied justice setting. Students maintain daily journals, conduct research, and deliver written and oral reports. Notes: Before enrolling, students must have a plan approved by the instructor. Seminars are held three times during the semester for discussion and oral presentation. Minimum of 45 hours of on-the-job work time required for each credit. Offered by Criminology, Law and Society (p. 326). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** CRIM 100, 306, 315, 479, and approval of department.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**CRIM 485: Study Abroad.** 1-12 credits.
Study Abroad. Course topics, content, and locations vary. Offered by Criminology, Law and Society (p. 326). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** CRIM 100.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CRIM 490: Special Topics.** 1-3 credits.
Recent developments in the field. Notes: Topics vary. May be used to fulfill requirements for different concentrations in the BS in criminology, law, and society depending on the topic. May be repeated when topic is different. Offered by Criminology, Law and Society (p. 326). May be repeated within the term for a maximum 15 credits.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CRIM 491: Honors Seminar I.** 3 credits.
Course includes readings, individual or group projects, and discussion of seminar papers. Notes: First of a two-course sequence; subject varies. May be repeated when topic varies. Offered by Criminology, Law and Society (p. 326). May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Research Associated

**Recommended Prerequisite:** Acceptance to pursue honors in the major.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
CRIM 492: RS: Honors Seminar II. 3 credits.
Course includes readings and discussion of seminar papers, leading to a
research project under the direction of a faculty member. Notes: Second
of a two-course sequence. Subject varies. Oral exam on the research and
report may be required. May be repeated when topic varies. Offered by
Criminology, Law and Society (p. 326). May be repeated within the degree
for a maximum 6 credits.

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: CRIM 491.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 495: Capstone in Criminology, Law and Society. 3 credits.
Provides an in-depth examination of a historical and contemporary
issues facing criminology and law and society scholars. Focuses on
the philosophies, practices, and procedures used by individuals and
organizations and uses a variety of materials, experiences and resources.
Offered by Criminology, Law and Society (p. 326). May not be repeated for
credit.

Mason Core: Synthesis (p. 137)

Specialized Designation: Scholarly Inquiry, Writing Intensive in the Major

Recommended Prerequisite: CRIM 100; ENGL 101/ENGH 101; ENGL 302/
ENGH 302; COMM 100, or 104; 60 credits.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 498: Research Practicum. 1-3 credits.
Supervised research experience with a professor in a non-classroom
setting. Offers students an opportunity to gain valuable research
experience and training in research. Students are required to work 45
hours (across the semester) per credit. Notes: Open to majors in CRIM
with 60 credits and permission of instructor and department. Offered by
Criminology, Law and Society (p. 326). May be repeated within the term
for a maximum 6 credits.

Recommended Prerequisite: CRIM 100 and CRIM 315.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in
Criminology, Law and Society.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CRIM 499: Independent Study. 1-3 credits.
Reading and research on a specific topic under the direction of a faculty
member. Notes: Open to majors in CRIM with 90 credits and permission
of instructor and department. Written report is required; an oral exam
or report may also be required. Degree requirements to be fulfilled by a
particular independent study determined by student’s advisor. Offered by
Criminology, Law and Society (p. 326). May be repeated within the term
for a maximum 9 credits.

Recommended Prerequisite: CRIM 100 and 90 credits.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

CRIM 509: Justice Organizations and Processes. 3 credits.
Examines structures, practices, and performance of organizations
involved in administration of justice: law enforcement, courts and legal
agencies, corrections, regulatory and related agencies, and private
organizations. Offered by Criminology, Law and Society (p. 326). May not
be repeated for credit. Equivalent to PUAD 509.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 510: Policing in a Democratic Society. 3 credits.
Fundamental issues in policing a democratic society: police mission,
subculture, performance measurement, moral hazards, discretion, impact
on crime and disorder, legitimacy, community policing, and other reforms.
Offered by Criminology, Law and Society (p. 326). May not be repeated for
credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 511: Evidence-based Crime and Justice Policy. 3 credits.
Examines the role that science and research play in criminal justice
agencies, policies and practices. Includes understanding the strengths
and limitations of the evidence-based practices framework, reviewing
evidence about the effectiveness, fairness, theoretical underpinnings,
and efficiency of various policies and practices to deal with crime and
justice issues, and understanding how research is translated into policy
and practice. Offered by Criminology, Law and Society (p. 326). May not
be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 512: Implementing Crime and Justice Policy. 3 credits.
Introduces students to the art and science behind implementing policies in today’s criminal justice organizations. While considering effective, best, and evidence-based practices, students will learn about both processes and outcomes related to adopting, adapting, implementing and sustaining reform in justice agencies. Key concepts include technology transfer, transportability, uptake, diffusion, fidelity, and change. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 513: Leadership in Justice Organizations. 3 credits.
Explores theory and evidence of various approaches to leadership and management as applied in justice organizations. Examples of leadership approaches include, trait, skills, style, contingency, path-goal, transformational, servant, team, and psychodynamic. Practical aspects of coping with the risks of leadership are included. Involves case studies and student self analysis using diagnostic tools. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 514: Legal and Ethical Issues in Criminal Justice. 3 credits.
Legal and ethical issues in the making and administration of criminal justice policy in the United States. Covers the legal framework governing each issue, competing values influencing policies and practice, and the history of legal reforms in the criminal justice system. Recurrent underlying themes are legalized discretion, gender and racial equality, due process, and procedural justice. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 515: Criminal Justice Research Methods and Data Analysis. 3 credits.
Methods of scientific inquiry applied to criminal justice issues. Includes formulation of research questions, logic of inquiry, research design, observation, measurement, and introduction to social statistics and applications to criminal justice data analysis. Learn to critique research and present data in agency reports. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

The major principles and approaches of program evaluation applied to crime and justice policies. Presents a conceptual framework for problem evaluation. Explores issues and methods for developing evaluation questions and assessing various aspects of program theory; operation and outcomes. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 515.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 517: Research Practicum in Justice Policy and Practice. 3 credits.
Student-initiated research project supervised by instructor. Student will identify a client criminal justice organization or stakeholder group and conduct useful research on an issue of interest to that organization or group, producing a policy-oriented white paper suitable for delivery to the organization or group. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.
Recommended Prerequisite: CRIM 515, CRIM 516.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Focuses on understanding legal doctrines that form basis of U.S. constitutional criminal procedural rights and how doctrines develop, why courts rule as they do, and evaluating strengths, weaknesses of rights. For MS Students. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 523: Law and Social Control. 3 credits.
Competing conceptions of law, political systems, and social control. Intellectual traditions behind social control, its definitions, and mechanisms for regulating public and private behavior, by both individuals and organizations in society. For MS Students. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 541: Conduct of Justice Organizations at the Street Level. 3 credits.
How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system). For MS students. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 544: Corrections. 3 credits.
Covers the social institutions and processes involved in punishment, control, and behavior change. Reviews the consequences of different policies and organizational approaches. For MS students. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 545: Crime Analysis. 3 credits.
Includes routine activities, pattern, and rational choice theories. Review of data types. Application of crime analysis to crime control tactics, strategies, and administration. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 551: Politics of Crime Policy. 3 credits.
Explores political context of crime policy. Examines influence of public opinion, interest groups, scientific community, and other political forces. In-depth, case-study comparison of several crime policies. For MS students. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CRIM 562:** *Crime and Place*. 3 credits.
Examines the concentration of crime at places, including geographic, environmental, and sociological features that attract or repel crime. Discusses theoretical explanations, crime prevention strategies, and the measurement of crime concentrations. For MS students. Offered by Criminology, Law and Society. (p. 326). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CRIM 595:** *Special Topics*. 3 credits.
Recent developments in the field or topics not covered by regularly listed courses. The course content varies. For MS students. Offered by Criminology, Law and Society. (p. 326). May be repeated within the term for a maximum 9 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

### 700 Level Courses

**CRIM 700:** *Values, Ethics, and Criminal Justice Policy*. 3 credits.
Overview of important public values and classical and contemporary theories for understanding how these values apply to the criminal justice process. Offered by Criminology, Law and Society. (p. 326). May not be repeated for credit. Equivalent to GOVT 726.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CRIM 710:** *Criminological Theory*. 3 credits.
Summarizes key principles and development of major criminological theories and evaluates the state of the empirical evidence for each one. Provides a critical assessment of different perspectives and identifies weaknesses and gaps. Offered by Criminology, Law and Society. (p. 326). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CRIM 720:** *Law and Social Science*. 3 credits.
Examines social science approaches to the law and the social processes that affect the behavior of legal actors and institutions. Includes theory and research in the law and society tradition. Offered by Criminology, Law and Society. (p. 326). May not be repeated for credit. Equivalent to GOVT 728.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CRIM 721:** *The Constitution, Criminal Procedure, and Security*. 3 credits.
Focuses on understanding legal doctrines that form basis of U.S. constitutional procedural rights and how doctrines develop, why courts rule as they do, and evaluating strengths, weaknesses of rights. Offered by Criminology, Law and Society. (p. 326). May not be repeated for credit. Equivalent to GOVT 713.

**Recommended Prerequisite:** CRIM 720 or GOVT 728, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CRIM 723:** *Law and Social Control*. 3 credits.
Competing conceptions of law, political systems, and social control. Intellectual traditions behind social control, its definitions, and mechanisms for regulating public and private behavior, by both individuals and organizations in society. Offered by Criminology, Law and Society. (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 720 or GOVT 728, or permission of instructor.
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 730: Courts and Constitutional Law. 3 credits.
Role, influence, and effects of U.S. courts in creating constitutional norms and interpreting them. Special attention to First and Fourteenth Amendments, Commerce Clause. Analyzes leading court cases. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 730: Courts and Constitutional Law. 3 credits.
Role, influence, and effects of U.S. courts in creating constitutional norms and interpreting them. Special attention to First and Fourteenth Amendments, Commerce Clause. Analyzes leading court cases. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

CRIM 740: Justice Organizations. 3 credits.
Understanding and evaluating criminal justice policies, practices, and structures in an organizational context. Draws on organizational theory and empirical research to explore the challenges and opportunities to shape criminal justice processes and outcomes. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to PUAD 790.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 740: Justice Organizations. 3 credits.
Understanding and evaluating criminal justice policies, practices, and structures in an organizational context. Draws on organizational theory and empirical research to explore the challenges and opportunities to shape criminal justice processes and outcomes. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to PUAD 790.

CRIM 741: Street Level Criminal Justice. 3 credits.
How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system). Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to PUAD 723.

Recommended Prerequisite: CRIM 740 or PUAD 790, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 741: Street Level Criminal Justice. 3 credits.
How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system). Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to PUAD 723.

Recommended Prerequisite: CRIM 740.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 741: Street Level Criminal Justice. 3 credits.
How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system). Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to PUAD 723.

Recommended Prerequisite: CRIM 740.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 742: Leadership in Justice and Security Organizations. 3 credits.
Examines leadership theories, and explores fundamental questions about leadership in justice and security organizations today. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 740 or GOVT 790, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 742: Leadership in Justice and Security Organizations. 3 credits.
Examines leadership theories, and explores fundamental questions about leadership in justice and security organizations today. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 740 or GOVT 790, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 743: Changing Justice and Security Organizations. 3 credits.
Examines challenges of changing justice organizations, how changes have been successfully and unsuccessfully implemented in the past, and what change strategies appear to be the most effective. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to PUAD 797.

Recommended Prerequisite: CRIM 740 or PUAD 790, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 743: Changing Justice and Security Organizations. 3 credits.
Examines challenges of changing justice organizations, how changes have been successfully and unsuccessfully implemented in the past, and what change strategies appear to be the most effective. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to PUAD 797.

Recommended Prerequisite: CRIM 740 or PUAD 790, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 743: Changing Justice and Security Organizations. 3 credits.
Examines challenges of changing justice organizations, how changes have been successfully and unsuccessfully implemented in the past, and what change strategies appear to be the most effective. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to PUAD 797.

Recommended Prerequisite: CRIM 740 or PUAD 790, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 744: Corrections. 3 credits.
Covers the social institutions and processes involved in punishment, control, and behavior change. Reviews the consequences of different policies and organizational approaches. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 740.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 744: Corrections. 3 credits.
Covers the social institutions and processes involved in punishment, control, and behavior change. Reviews the consequences of different policies and organizational approaches. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 740.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

CRIM 760: Evidence-Based Crime Policy. 3 credits.
Explores the theoretical and empirical support for crime and justice interventions and policies, and examines the translational link between research and criminal justice practices. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
CRIM 761: Politics of Crime Policy. 3 credits.
Explores political context of crime policy. Examines influence of public opinion, interest groups, scientific community, and other political forces. In-depth, case-study comparison of several crime policies. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 760/GOVT 792 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 762: Crime and Place. 3 credits.
Examines the concentration of crime at places, including geographic, environmental, and sociological features that attract or repel crime. Discusses theoretical explanations, crime prevention strategies, and the measurement of crime concentrations. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 760.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 764: Sentencing. 3 credits.
Explores theories of punishment and sentencing practices. Examines political, sociological, criminological, and organizational influences on sentencing processes and decisions. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** CRIM 760.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 780: Research Methods. 3 credits.
Introduces logic and methods of scientific inquiry in justice, law, and crime policy. Includes conceptualization of research questions, observation, measurement, research design, and principles of causality.

Evaluation of extant research according to scientific principles. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate course in social science research methods or statistics, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 781: Justice Program Evaluation. 3 credits.
Practical exploration of assessment techniques used in evaluating need for and consequences of justice programs and policies. Design and measurement, interpreting and presenting results. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit. Equivalent to PUAD 791.

**Recommended Prerequisite:** PUAD 511/612, CRIM 780, or two graduate-level statistics courses; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 782: Statistics I. 3 credits.
Focuses on descriptive and inferential statistical methods and theory with application to problems within the justice field. Explores the logic of inferential statistical methods in general and null hypothesis significance testing in particular. Covers widely used statistical procedures within the applied social sciences. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

**Recommended Prerequisite:** An undergraduate social science research methods course or an undergraduate statistics course.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 783: Statistics II. 3 credits.
Focuses on the theory and application of multivariate regression methods as applied within the justice field. Topics include tests for and consequences of violating assumptions of the generalized linear model, dummy coding of categorical variables, testing of interaction effects, logistic regression, ordered and multinominal logit, and missing data analysis. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.
Recommended Prerequisite: CRIM 782 or a comparable course.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 784: Experimental Criminology. 3 credits.
Discusses the methodological, statistical, ethical, and practical concerns associated with experimental research designs in criminology. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 780.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 790: Capstone in Policy and Practice. 3 credits.
Student-initiated research project supervised by instructor. Students must work with a justice organization to conduct useful research and produce a policy-oriented white paper. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 780 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 795: Special Topics. 3 credits.
Recent developments in field, or topics not covered by regularly listed courses. Notes: Topics vary. May be repeated when topic is different. Offered by Criminology, Law and Society (p. 326). May be repeated within the term for a maximum 15 credits.

Recommended Prerequisite: CRIM 780 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CRIM 799: Master's Thesis. 1-6 credits.
Research on approved master's thesis topic under direction of thesis committee with approval of chair. Notes: Minimum 3, maximum 6 credits for doctrate. Maximum of 6 credits of CRIM 799 applicable to masters degree requirements. Offered by Criminology, Law and Society (p. 326). May be repeated within the degree.

Recommended Prerequisite: Submission and approval of thesis proposal.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

CRIM 797: Professionalization Seminar. 0 credits.
Introduces doctoral students to research, scholarship and teaching practices in the field to promote their professional development. Notes: Required for Ph.D. students. Offered by Criminology, Law and Society (p. 326). May not be repeated for credit.

Recommended Prerequisite: CRIM 790 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

CRIM 998: Doctoral Dissertation Proposal. 1-6 credits.
Work on a research proposal forming basis for doctoral dissertation. Notes: Minimum 3, maximum 6 credits for doctrate. Maximum of 27 credits of CRIM 998/CRIM 999 applicable to doctoral degree requirements. Offered by Criminology, Law and Society (p. 326). May be repeated within the degree.

Recommended Prerequisite: Students must complete all core analytical course degree requirements.

Registration Restrictions:
Enrollment is limited to Graduate level students.

900 Level Courses

CRIM 998: Doctoral Dissertation Proposal. 1-6 credits.
Work on a research proposal forming basis for doctoral dissertation. Notes: Minimum 3, maximum 6 credits for doctrate. Maximum of 27 credits of CRIM 998/CRIM 999 applicable to doctoral degree requirements. Offered by Criminology, Law and Society (p. 326). May be repeated within the degree.

Recommended Prerequisite: Students must complete all core analytical course degree requirements.

Registration Restrictions:
Enrollment is limited to Graduate level students.
Schedule Type: Dissertation
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

CRIM 999: Doctoral Dissertation Research. 1-21 credits.
Doctoral dissertation research and writing under direction of student's dissertation committee. Notes: Minimum 12, maximum 21 credits for doctorate. Maximum of 27 credits of CRIM 998/CRIM 999 applicable to doctoral degree requirements. Offered by Criminology, Law and Society (p. 326). May be repeated within the degree for a maximum 21 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Cultural Studies (CULT)

300 Level Courses
CULT 320: Globalization and Culture. 3 credits.
Examines cultures in globalization, with special attention to the role of technologies and new media. Provides historical and contemporary contexts for understanding the relationships among circuits of production and consumption; population flows; social inequalities and collective identities; globalizations from "above" and "below;" built and natural environments. Offered by Cultural Studies (p. 514). May not be repeated for credit.

Recommended Prerequisite: GLOA 101 or SOCI 120

Registration Restrictions:
Students with a class of Freshman may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CULT 390: Topics in Cultural Studies. 1-3 credits.
Topics of current interest in interdisciplinary cultural studies, covering such fields as media, popular culture, political economy, social identities, or regions in globalization. Notes: May be repeated for credit when topic is different. Offered by Cultural Studies (p. 514). May be repeated within the term for a maximum 9 credits.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

800 Level Courses
CULT 802: Histories of Cultural Studies. 3 credits.
Historical survey of principal works and theories in the development of cultural studies. Notes: This course is designed for PhD level students. Students in a related MA program may take this course as the capstone to their MA as they are about to matriculate into the PhD in cultural studies. Offered by Cultural Studies (p. 514). May not be repeated for credit.

Recommended Prerequisite: Admission to doctoral program, related master's degree, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.
Enrollment is limited to Graduate level students.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CULT 804: Histories of Cultural Studies II. 3 credits.
Continues the historical survey of cultural studies up to the present and assesses possibilities for future development. Offered by Cultural Studies (p. 514). May not be repeated for credit.

Recommended Prerequisite: Admission to a PhD program and CULT 802 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CULT 806: Research Seminar in Cultural Studies. 3 credits.
Introduces research methods in cultural studies. Notes: Specific topics vary. Offered by Cultural Studies (p. 514). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral; completion of CULT 802, CULT 804.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CULT 808: Student/Faculty Colloquium in Cultural Studies. 1 credit.
Forum for presentation of original and current research in cultural studies. Notes: Students register for 1 credit per semester over a three-semester period. Offered by Cultural Studies (p. 514). May be repeated within the degree for a maximum 4 credits.

Recommended Prerequisite: Admission to doctoral program.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)
CULT 810: Culture and Political Economy. 3 credits.
Surveys social science and humanities classics that relate cultural production and consumption to underlying political economic conditions. Includes Marx, Lukacs, Frankfurt School, semiotic neo-Marxism, productivist theories of power indebted to Foucault, Baudrillard, Bourdieu, Harvey, Jameson, Mauss, Mill, Polanyi, Sahlin, A. Smith, and Weber. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 514). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CULT 812: Visual Culture. 3 credits.
Examines theories, production, consumption, and reception of visual culture. Covers film, video, visual arts, music, display, ritual, performance, performativity, and theories of the aesthetic. Includes key readings from theorists such as Adorno, Artaud, Benjamin, Brecht, Bryson, Doane, Fiske, Heath, Marcuse, Merleau-Ponty, and Sartre. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 514). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CULT 814: Gender and Sexuality. 3 credits.
Investigates notion of gender functions in maintaining and analyzing issues of social and cultural power. Examines conflicting notions of sexuality and their role in cultural signification. Seeks to explicate relationship of sexuality, gender. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 514). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CULT 816: Science/Technology. 3 credits.
Considers theories and major debates on culture of science, social construction of nature, and effects of technology on modern cultural forms. Includes readings from theorists such as Nietzsche, Heidegger, Horkheimer, Feyerabend, Bahro, Haraway, and Latour. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 514). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CULT 818: Social Institutions. 3 credits.
Considers theories of institutional practice and social structures, from Max Weber to Michel Foucault. Covers prisons, bureaucracies, museums, schools, political parties, and social movements. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 514). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

CULT 820: After Colonialism. 3 credits.
Surveys racial, ethnic, caste, and national identities in colonial contexts; scientific racism in periphery and core sites; subsequent history of race, ethnic, national identities and conflicts; classical and contemporary texts by authors such as DuBois, Fanon, Gilroy, and Spivak; and particular place of issues of national, racial, and ethnic identities in contemporary cultural studies. Notes: This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Offered by Cultural Studies (p. 514). May not be repeated for credit.

Recommended Prerequisite: Admission to a doctoral program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**CULT 860: Special Topics in Cultural Studies.** 3 credits.
Specialized interdisciplinary topics in cultural theory and analysis.
Notes: These courses are designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.
Topics vary. May be repeated for credit when topic is different. Offered by Cultural Studies (p. 514). May be repeated within the term.

**Recommended Prerequisite:** Admission to a doctoral program, or permission of the instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**CULT 870: Independent Study.** 1-3 credits.
Reading and research on a specific topic guided by advisors, supporting the development of a Field Concentration. Offered by Cultural Studies (p. 514). May be repeated within the term for a maximum 15 credits.

**Recommended Prerequisite:** Admission to a PhD program, successful completion of all core courses, or permission of director.

**Registration Restrictions:**
Enrollment is limited to students with a major in Cultural Studies.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**CULT 880: Field Concentration.** 3 credits.
Intensive research course, resulting in a Field Statement and oral defense. Notes: Requires permission of field advisor. Offered by Cultural Studies (p. 514). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Admission to cultural studies doctoral program, successful completion of core courses, and an additional 18 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Cultural Studies. 

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**900 Level Courses**

**CULT 998: Doctoral Dissertation Proposal.** 1-6 credits.
Develop research proposal that forms basis for doctoral dissertation. 
Notes: A maximum of 6 credits may be applied to the degree. Subject to continuous registration requirement. Offered by Cultural Studies (p. 514). May be repeated within the degree for a maximum 24 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**CULT 999: Doctoral Dissertation.** 1-12 credits.
Doctoral dissertation research and writing under direction of dissertation committee. Offered by Cultural Studies (p. 514). May be repeated within the degree.

**Recommended Prerequisite:** CULT 998.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to students with a major in Cultural Studies.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**Curriculum and Instruction (EDCI)**

**300 Level Courses**

**EDCI 370: Young Adult Literature in Multicultural Settings.** 3 credits.
Examines literary works written for and about young adults, introduces critical issues surrounding teaching of young adult literature in multiculturally diverse schools, and requires reading and review of young adult literature. Notes: Significant online work is required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EDCI 372: Teaching Mathematics in the Secondary School.** 3 credits.
Covers curricula, current issues, and research literature in secondary school mathematics. Emphasis is on developing different styles of teaching. Field experience is required for those seeking initial teacher licensure. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Corequisite:** EDUC 422

**Registration Restrictions:**
Enrollment is limited to students with a major, minor, or concentration in Secondary Ed - Mathematic 6-12.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
400 Level Courses

EDCI 469: Teaching English in Secondary School. 3 credits.
Provides study of advanced methods, materials, content, and organization of English programs in secondary school. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCI 422. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Second Ed - English 6-12.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCI 372, EDUC 422.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Second Ed - Mathematic 6-12.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDCI 473: Teaching Science in the Secondary School. 3 credits.
Builds fundamental knowledge of science teaching and learning including standards-based curriculum design and research-based teaching strategies. Notes: School-based field experience required for those seeking initial teacher licensure. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Secondary Education Program.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Second Ed - Biology 6-12, Second Ed - Chemistry 6-12, Secondary Ed - Physics 6-12 or Secnd Ed - Earth Science 6-12.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDCI 479: Advanced Methods of Teaching English in the Secondary School. 3 credits.
Guides students in working effectively with national and local standards for teaching secondary English. Continuation course in methods from EDCI 469. Offered by Graduate School of Education (p. 157). May not be repeated for credit. Equivalent to EDCI 669.

Recommended Prerequisite: EDCI 469.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Secondary Ed - English 6-12.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDCI 483: Advanced Methods of Teaching Science in Secondary School. 3 credits.
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, adapting instruction to needs of diverse learners, and promoting safety. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCI 473.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Secondary Ed - Biology 6-12, Secondary Ed - Chemistry 6-12, Secondary Ed - Physics 6-12 or Secnd Ed - Earth Science 6-12.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDCI 490: Student Teaching in Education. 6 credits.
Provides intensive, supervised clinical experience in approved school for fall or spring semester. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Completion of licensure and all endorsement course work.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Secondary Ed - Biology 6-12, Secondary Ed - Chemistry 6-12, Secondary Ed - Mathematic 6-12, Secondary Ed - English 6-12, Secondary Ed - Physics 6-12 or Secnd Ed - Earth Science 6-12.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Special scale. (p. 82)

EDCI 491: Internship Seminar in Secondary Training. 2 credits.
Focuses on critical reflection regarding effects of teacher actions others; develops skills as reflective practitioner; presents research-based rationales for instructional decision-making. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the professional semester.

Recommended Corequisite: EDCI 490.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Secondary Ed - Biology 6-12, Secondary Ed - Chemistry 6-12, Secondary Ed - Mathematic 6-12, Secondary Ed - English 6-12, Secondary Ed - Physics 6-12 or Secnd Ed - Earth Science 6-12.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

EDCI 510: Linguistics for PreK-12 ESOL Teachers. 3 credits.
Examines language as a system, with particular focus on teaching culturally and linguistically diverse students in grades PreK-12. Considers teaching implications of phonology, morphology, syntax, semantics, and pragmatics. Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDRD 515B, EDUC 511B and 537B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in English as a Second Language or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 516: Bilingualism and Language Acquisition Research. 3 credits.
Examines first and second language acquisition theories past and present. Explores how PK-12 bilingual and multilingual learners’ cultures and languages are valuable assets in classrooms and addresses implications for instruction and assessment. Develops understanding of research around instructional environments that promote bilingualism and biliteracy. Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDRD 515B, EDUC 511B and 537B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 520: Assessment of Language Learners. 3 credits.
Examines innovative approaches to assessing language learners. Topics include identification, placement, monitoring of student progress, development of authentic performance-based measures, design of portfolios, application of measurement concepts, analysis of assessment instruments, and linking assessments to instruction. Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDCI 516B or 517B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 521: Curriculum Development for Language Learners. 3 credits.
Examines current approaches to curriculum development for second language learners and language minority students. Participants review, evaluate, and develop curricular materials, with emphasis on learner-centered activities, cooperative learning, interdisciplinary and thematic approaches, authentic and problem-based learning, integration of language and content, and linking assessment and instruction. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCI 516, EDCI 519.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture
Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDCI 544: *Curriculum and Methods of Teaching in Elementary Education*. 3 credits.
Introduction to general methods of teaching in elementary schools focusing on planning, teaching strategies, management, assessment, and differentiation. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Elementary Education graduate program; must be taken in programmatic sequence.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 545: *Assessment and Differentiation*. 3 credits.
Provides a research-based introduction to differentiated instruction for children in grades PK-6. Emphasis on the assessment of learners and differentiation of instruction to meet the needs of all learners. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission into the Elementary Education graduate program, must be taken in programmatic sequence.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 546: *Integrating Technology in Elementary Classrooms: Literacy*. 1 credit.
Studies the development and integration of technology in the elementary education literacy curriculum. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission into Elementary Education graduate program

**Recommended Corequisite:** program. EDCI 556.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 547: *Integrating Technology in Elementary Classrooms: Mathematics*. 1 credit.
Studies the development and integration of technology in the elementary education mathematics curriculum. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission into Elementary Education graduate program

**Recommended Corequisite:** program. EDCI 552.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Studies the development and integration in the elementary education social studies and fine arts curriculum. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission into Elementary Education graduate program

**Recommended Corequisite:** program. EDCI 554.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Introduces methods for teaching all children topics in arithmetic, geometry, algebra, probability, and statistics in elementary grades. Focuses on using manipulatives and technologies to explore mathematics and solve problems. Notes: Requires field experience in
public schools. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Admission to the Elementary Education licensure program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

EDCI 553: *Science Methods for the Elementary Classroom*. 1-3 credits.
Develops skills and abilities in science teaching methods, applications of technology, safety practices, and creation of integrated science curricula. Examines science teaching based on contemporary theory, practice, and standards. Notes: Requires field experience in public schools. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Admission to the Elementary Education licensure program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

EDCI 554: *Methods of Teaching Social Studies and Integrating Fine Arts in the Elementary Classroom*. 3 credits.
Focuses on the design and delivery of standards-based integrated curriculum centered on the social sciences. Includes integration of fine arts and examines the central role of the arts in learning. Notes: School-based field experience required. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Admission into Elementary Education graduate program; must be taken in programmatic sequence.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

EDCI 555: *Literacy Teaching and Learning in Diverse Elementary Classrooms I*. 3 credits.
Provides research-based introduction to literacy teaching and learning for younger children. Emphasizes language development; reading and writing processes; emergent literacy; culture, families, and literacy; and literacy integration in the curriculum. Notes: School-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Elementary Education licensure program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 556: *Literacy Teaching and Learning in Diverse Elementary Classrooms II*. 1-3 credits.
Provides research-based introduction to literacy teaching and learning for older children. Emphasizes literacy and language processes and development; connections among cultures, families, and literacy; and literacy integration in curriculum. Notes: School-based field experience required. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Admission to the Elementary Education Licensure program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

EDCI 557: Integrating Technology in PreK-6. 3 credits. Studies the development and integration of technology in the elementary education curriculum including the use of technology to address the learning needs of diverse students. Notes: School-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Elementary Education licensure program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 559: Research and Assessment in Elementary Education. 3 credits. Provides teacher candidates an understanding of research paradigms utilizing systematic evidence to improve practice and further skills in assessment of learning outcomes. Emphasizes linking research and practice, making instructional decisions based on systematically collected data. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission into Elementary Education graduate program; capstone course for degree must be taken last in programmatic sequence.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 560: Methods of Teaching in Foreign/World Languages. 3 credits. Covers approaches, theories, and methods of teaching foreign and second languages, with practical application to classroom. Students demonstrate teaching strategies, develop lesson and unit-planning skills, and evaluate curricula and materials. Notes: Requires field experience in schools. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDCI 516 B or SPAN 502 B.

B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 567: Teaching Social Studies in the Secondary School. 3 credits. Provides teacher candidates an introduction to methods, frameworks, and practices of teaching social studies in secondary schools. Notes: Requires 15 hours of school-based field experience. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 522. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduation Deadline Extended, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 569: Teaching English in the Secondary School. 3 credits. Provides study of advanced methods, materials, content, and organization of English programs in secondary school. Notes: 15 hours school-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 522. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 570: Teaching Young Adult Literacy in a Multicultural Setting. 3 credits. Examines literary works written for and about young adults. Introduces critical issues surrounding teaching young adult literature in multiculturally diverse public schools and requires reading and reviewing...
young adult literature from several genres. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 572: Teaching Mathematics in the Secondary School.** 3 credits.
Emphasizes developing different styles of teaching. Notes: 15 hours school-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 522. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 573: Teaching Science in the Secondary School.** 3 credits.
Provides study of methods, materials, content, and organization of science programs. Emphasizes curriculum planning, current methodologies, safety, and trends in secondary schools. Notes: 15 hours school-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** EDUC 522. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 597: Special Topics in Education.** 1-6 credits.
Provides advanced study on selected topic or emerging issue in American or international education. Notes: May be repeated for credit with GSE permission. Offered by Graduate School of Education (p. 157). May be repeated within the degree.

**Recommended Prerequisite:** Admission to program in GSE.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL-History, ASTL-Instructional Technology, ASTL-Literacy/Reading, ASTL-Mathematics, ASTL-NBPTS Preparation Core, ASTL-Science or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**600 Level Courses**

**EDCI 600: Workshop in Education.** 1-6 credits.
Offers full-time workshops and weekend seminars on selected topics in education and education tour seminars. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 613: Curriculum and Assessment in Early Childhood Education.** 3 credits.
First of two-course sequence addressing current thinking about curriculum and assessment in programs for preschool through third grade. Gives overview of effective ways to plan and implement integrated curriculum; special focus on content, subject matter. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL-History, ASTL-Instructional Technology, ASTL-Literacy/Reading, ASTL-Mathematics, ASTL-NBPTS Preparation Core, ASTL-Science or Curriculum and Instruction.
Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science, Adv Stud T/L or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 617: Using Digital and Popular-Culture Media with Grades 4-12. 3 credits.
Exposes students to recent knowledge on how middle and high school teachers can use digital media and popular culture texts to engage students in subject area learning or literacy development. Focus is on grades 4-12. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to a GSE licensure, Master’s, or doctoral program and at least one year of PK-12 teaching experience, completion of EDCI 569, EDCI 567, EDCI 572, EDCI 573, or EDCI 544, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 621: Introduction to Gifted and Talented Learners. 3 credits.
Examines nature and needs of gifted and talented learners. Participants become knowledgeable about characteristics of gifted and talented students, and examine role of culture in manifestation of gifts and talents as well as gifted behaviors in special populations. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 622: Curriculum Differentiation for Diverse Learners. 3 credits.
Develops personal and professional rationale for differentiating instruction in mixed-ability classrooms, as well as skills and knowledge of strategies to utilize pre-assessment data and plan for and implement differentiated instruction. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Edu, Gifted Child Education, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 623: Models and Strategies for Teaching Gifted Learners. 3 credits.
Provides framework to examine and apply curriculum models and instructional strategies advocated for use with gifted students according to national and state standards that reflect best practices in gifted education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 624: Assessment, Identification, and Evaluation of Gifted Learners. 3 credits.
Examines broad understandings of intelligence and assessment. Provides techniques to identify gifted students. Develops specific understandings of assessment techniques and awareness of the influences of language, culture, ethnicity, gender, and exceptionality on recognition and subsequent identification of giftedness. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 625: Contemporary Issues and Trends in Gifted Education. 3 credits.
Focuses on research, trends, issues, legislation, and litigation concerning gifted and talented children. Provides professionals in gifted education and related fields with knowledge and skills to serve as advocates for gifted-child education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDCI 621, 622, 623, and 624.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 626: Action Research in Gifted Education. 3 credits.
Opportunity to identify and investigate school-based problem and apply inquiry, writing, and research skills to relevant issue or concern in gifted education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDCI 644: Mathematics Learning and Assessment (K-8). 3 credits.
Introduces students to learning theories and associated assessment practices specific to mathematics education. Intended for mathematics specialists and teachers interested in problems of learning and assessment across K-8 settings in mathematics education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the MEd in Education Leadership, Mathematics Education Leadership concentration

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction or Education Leadership.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 645: Curriculum Development in Mathematics Education. 3 credits.
Analysis, design, and evaluation of school mathematics curricula. Notes: Yearlong seminar for master’s-level students in mathematics education
leadership cohort program. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Mathematics Education Leadership Masters Degree Program or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction or Education Leadership.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDCI 646:** Mathematics Education Leadership for School Change. 3 credits.
Surveys current literature and large-scale studies in mathematics education. Engages students in research, study, and discussion of factors that affect teaching and learning of mathematics in school settings. Notes: Yearlong seminar for master’s-level students in mathematics education leadership cohort program. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Mathematics Education Leadership Masters Degree Program or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDCI 663:** Research in Science Teaching. 3 credits.
Investigates the research and methodology involved in teaching and learning biological, chemical, physical, and earth sciences from K-12. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Course in teaching science in elementary or secondary school, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science, Curriculum and Instruction or Education Leadership.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDCI 666:** Research in Mathematics Teaching. 3 credits.
Explores curricula, current issues, and research literature in elementary school mathematics. Emphasizes development of different styles of teaching. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 667:** Advanced Methods of Teaching Social Sciences in the Secondary School. 3 credits.
Emphasizes interdisciplinary curriculum and instruction, implementing national state standards, authentic assessment, and adaptations for diverse populations. Notes: School-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 567 and EDUC 522.

**Recommended Corequisite:** EDRD 619.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 669:** Advanced Methods of Teaching English in the Secondary School. 3 credits.
Continuation course in methods (See EDCI 569). Guides students in working effectively with national and local standards for teaching secondary English. School-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit. Equivalent to EDCI 479.

**Recommended Prerequisite:** EDCI 569 and EDUC 522.
**EDCI 670:** Advanced Methods in Science Teaching. 3 credits.
Application of major principles of education and psychology for the improvements of science teaching in secondary schools. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**EDCI 671:** Innovations in Science Teaching. 3 credits.
Focuses on the development and selection of teaching materials that reflect concepts of technology innovation with an emphasis on middle and secondary school science. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**EDCI 672:** Advanced Methods of Teaching Mathematics in the Secondary School. 3 credits.
Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment. School-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**EDCI 673:** Advanced Methods of Teaching Science in the Secondary School. 3 credits.
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, and adapting instruction to the needs of diverse learners. School-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**EDCI 684:** Advanced Methods of Teaching Foreign/Second Languages in PK-12 Schools. 3 credits.
Blends theoretical knowledge and practical application. Provides advanced study of second language pedagogy and teaching trends. Topics include multiple learning styles, alternative forms and assessment, and teaching diverse populations. Notes: Requires school-based field experience. Offered by Graduate School of Education (p. 157). May not be repeated for credit.
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses

EDCI 702: Internship in Mathematics Education. 3 credits.
Offers practical experiences and professional challenges for mathematics leaders in authentic educational settings. Activities emphasize school-based and classroom-based research and leadership. Develops the skills and abilities of the mathematics leaders to analyze classroom practice, investigate teaching and disseminate information about mathematics education in professional development settings for teachers. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Curriculum and Instruction or Education Leadership.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDCI 725: National and International Leadership Issues in Mathematics Education. 3 credits.
Students study research on mathematics teaching and learning, including current issues and trends in mathematics education leadership at national and international levels. Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Mathematics Education Leadership PhD program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDCI 726: State and Local Leadership Issues in Mathematics Education. 3 credits.
Students study issues and policies that affect mathematics teaching and learning, including current trends in mathematics school reform at state, district, and individual school levels. Notes: Yearlong seminar for PhD students in the mathematics education leadership cohort program. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Mathematics Education Leadership PhD program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDCI 776: Consultation & Collaboration in Diverse K-12 Settings. 3 credits.
Focuses on ways in which practicing education professionals collaborate in serving diverse learners and their families. Explores methods for co-planning and co-teaching in the general education classroom and ways for sharing responsibilities for instruction and assessment. Includes ways for dealing with difficult interactions are part of understanding how to implement collaborative and inclusive models of education for diverse learners. Note: Enrollment requires completion of all other program requirements. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Corequisite: EDCI 777

Registration Restrictions:
Required Prerequisite: EDCI 790.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDCI 777: Research to Practice. 3 credits.
Provides culminating experience that synthesizes and applies essential elements of teaching culturally & linguistically diverse and exceptional learners in international contexts. Emphasizes teacher as change agent through critical inquiry into practice. Promotes collaboration among teachers and school professionals to advance achievement of diverse learners. Note: Enrollment requires completion of all other program requirements. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Corequisite: EDCI 776

Registration Restrictions:
Required Prerequisite: EDCI 790.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDCI 784: Capstone Seminar in Early Childhood Education. 3 credits.
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through graduate course work as it applies to early childhood education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPATS Preparation Core, ASTL - Science or Curriculum and Instruction.
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 790: Internship in Education.** 1-6 credits.
Intensive, supervised clinical experience for full semester in accredited school. Students must register for appropriate section. Offered by Graduate School of Education (p. 157). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** EDUC 522, EDUC 672, two methods classes in content area; passing Praxis II and VCLA, completing all endorsements.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

**Recommended Corequisite:** EDCI 791.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**EDCI 791: Internship Seminar in Secondary Teaching.** 2 credits.
Focuses on critical reflection regarding effects of teacher actions on others; develops skills as a reflective practitioner; presents research-based rationales for instructional decision-making. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the professional semester.

**Recommended Corequisite:** EDCI 790.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 797: Advanced Topics in Education.** 1-6 credits.
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education. Notes: May be repeated for credit with CEHD approval. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

---

### 800 Level Courses

**EDCI 810: Foundations of Science Education Research.** 3 credits.
Explores and analyzes the range of research designs currently utilized by science education researchers. Develops an understanding of the assumptions and frameworks of different types of science education inquiry through an examination of ways of knowing. Examines historical trends that have taken place in science education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Recommended Corequisite:** EDCI 790.

**Registration Restrictions:**
Enrollment limited to students with a concentration in Science Education Research.

Enrollment limited to students in the E1-PHD-EDUC program.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 811: Current Trends in Science Education Research.** 3 credits.
Provides an in-depth examination and analysis of literature and research in science education. Examines theoretical foundations of research studies in science education, discusses methodologies of research, critique research, and examines trends in emerging science education research. Includes presentations by science education researchers as well as opportunities for graduate students to explore research ideas with colleagues within the class. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDCI 810.

**Registration Restrictions:**
Enrollment limited to students in the E1-PHD-EDUC program.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 813: Focused Science Education Research.** 3 credits.
Provides an opportunity for students to gain hands-on experience designing and conducting a research study in science education that leads to publication and/or conference presentations. The scholarship embodied in student development to this point in the doctoral program will lead students to work with a science education faculty member of their choice to development and seek to answer a research question of interest. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 810, EDRS 811, EDRS 827.

**Registration Restrictions:**
Students cannot enroll who have a concentration in Science Education Research.

Enrollment limited to students in the E1-PHD-EDUC program.
Enrollment is limited to Graduate level students.

**Schedule Type:** Internship  
**Grading:**  
This course is graded on the Graduate Regular scale. (p. 82)

**EDCI 855: Mathematics Education Research on Teaching and Learning.** 3 credits.  
Surveys most current research literature in mathematics education. Engages students in research, study, and discussion of mathematics education research on teaching and learning in school settings. Builds on students’ educational and professional experiences to ensure students are well versed in research that has influenced mathematics education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Mathematics Education Leadership Ph.D. program.

**Registration Restrictions:**  
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Graduate Special scale. (p. 82)

**EDCI 858: Mathematics Education Research Design and Evaluation.** 3 credits.  
Examines methods of research appropriate for mathematics education. Develops knowledge of the scope and evolution of research methodologies from a range of perspectives. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Mathematics Education Leadership PhD program.

**Registration Restrictions:**  
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Graduate Special scale. (p. 82)

**Cyber Security Engineering (CYSE)**

**100 Level Courses**

**CYSE 101: Introduction to Cyber Security Engineering.** 3 credits.  
Provides comprehensive introduction to the principles, applications, and practice of cyber security engineering. Students learn the basic concepts and terminology of cyber security and how cyber security is commonly addressed after the design and implementation phases. Students are introduced to the systems engineering and design processes and learn to integrate and apply cyber security tools and techniques in these processes. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

**Registration Restrictions:**  
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)

**200 Level Courses**

**CYSE 205: Systems Engineering Principles.** 3 credits.  
Introduction to systems engineering with a focus on cyber security engineering. Emphasize development of analytical, technical, management, and teamwork skills through exercises in planning, documentation, presentation, and the creative process of IT engineering design. Analyze case studies involving systems engineering role in cyber security. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

**Registration Restrictions:**  
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)

**CYSE 211: Operating Systems and Lab.** 3 credits.  
Addresses basic issues such as virtual memory, kernel and user mode, system calls, threads, context switches, interrupts, interprocess communication, coordination of concurrent activities. May also address: concurrency, processes and multi-threading, context switching,
synchronization, scheduling, and deadlock. Memory management, dynamic memory allocation, address translation. Management of file systems, storage devices, directories, protection, scheduling and crash recovery. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 220: Systems Modeling. 3 credits.
Introduces modeling of dynamical systems. Formulation of mathematical models from system descriptions, including computer, economic, transportation, electrical power and mechanical systems. Analytical and numerical methods for solving models and studying their behavior. Discrete-time and continuous time systems. Linear and nonlinear systems. Introduction to computer modeling using MATLAB. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: MATH 203\(^C\) and PHYS 160\(^C\).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 230: Computer Networking. 3 credits.
Introduces network concepts; OSI reference model and layering; data coding; analog/digital communications review; physical layer and data link control; Data Link Layer Control protocols; flow control; error control; link management; common link protocols. LAN and WAN; connection-oriented and connectionless packet switching; circuit-switched networks and control signaling; congestion control and traffic management; transport layer client-server model; domain name systems, routing methods. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CS 112\(^C\), CYSE 101\(^C\) and MATH 113\(^C\).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

300 Level Courses

CYSE 301: Digital Systems. 3 credits.
Introduces digital circuits, systems and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, coding and multiplexing, multi-vibrators, shift registers, counters, analog-to-digital converters, and elementary computer architecture. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts. Equivalent to ECE 301.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 325: Discrete Events Systems Modeling. 3 credits.
Introduces basic modeling of the dynamics of discrete event systems. Both analytical and simulation techniques for the modeling and analysis of such systems are considered. Relevant concepts from discrete mathematics are included and appropriate software tools are used to examine different engineering applications. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: STAT 344\(^C\).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 330: Introduction to Network Security. 3 credits.
Introduces cryptography and its applications in networks. Reviews basic firewalls architectures and VPNs. Overview of current network security protocols, security of routing protocols, the DNS, and e-mail security. Discuss threat of attacks that use viruses, worms, rootkits, botnets and countermeasures; distributed denial of service attacks and spam countermeasures. Introduces basic concepts of security of wireless networks. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CYSE 101\(^C\), CS 222\(^C\) and CYSE 230\(^C\).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

400 Level Courses

CYSE 411: Secure Software Engineering. 3 credits.
This course provides a foundation for building secure software by applying security principles to the software development lifecycle. Topics covered include: security in requirements engineering, secure designs, risk analysis, threat modeling, deploying cryptographic algorithms, defensive coding, penetration testing, fuzzing, static analysis, and security assessment. Students will learn the practical skills for developing and testing secure software. Notes: This course may be of interest to students specializing in software aspects of cyber security
engineering. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

**Registration Restrictions:**

Required Prerequisite: CS 222\(^C\).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**CYSE 421:** *Industrial Control Systems Security.* 3 credits.

**Registration Restrictions:**

Required Prerequisites: CYSE 220\(^C\), 230\(^C\) and 301\(^C\).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**CYSE 424:** *Embedded and Real Time Systems.* 3 credits.

Presents design methodology, principles and practice for the development of real-time embedded systems and their application to robotics, mechatronics, sensing, signal processing, and control. They include automated sensors, switches and PLCs. Topics include system decomposition, multi-tasking, task communication and synchronization, system modeling, time analysis, principles of filter and controller implementation, 'fuzzy' engineering, and multimicrocontroller systems. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

**Registration Restrictions:**

Required Prerequisite: CYSE 301\(^C\).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**CYSE 425:** *Secure RF Communications.* 3 credits.

**Registration Restrictions:**

Required Prerequisites: CYSE 230\(^C\) and CS 222\(^C\).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**CYSE 430:** *Critical Infrastructure Protection.* 3 credits.

Consists of a four week lecture course followed by ten weekly seminars presented by students. The lecture part provides a description of US Designated Critical Infrastructure Sectors and a corresponding list of federal sector specific agencies (SSAs). Each student selects a sector, develops and presents a seminar talk on critical cyber security issues involved in a given sector. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

**Registration Restrictions:**

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**CYSE 445:** *System Security and Resilience.* 3 credits.

Focuses on modeling and evaluation of the engineering systems that are expected to operate in a contested cyber environment. Covers architectures and modeling, uses a variety of techniques, establishing measures of performance that are relevant to the domain of operation, evaluating the security or vulnerability of the system to cyber exploits, and then assessing its resilience. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

**Recommended Corequisite:** CYSE 450.

**Registration Restrictions:**

Required Prerequisites: CYSE 325\(^C\) or 330\(^C\).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture
Security factors in the decisions on configuring wireless mobile devices and network infrastructure. Robust cryptography that is needed to attain the highest levels of integrity, authentication, and confidentiality. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 467: GPS Security. 3 credits.
Provides background in long-range navigation developments; early global systems; space based systems; GPS and GLONASS systems; system architecture; spacecraft and earth station characteristics; design concepts of the CA and P GPS signal modes; frequencies, modulation, and other design aspects; clock issues; range and accuracy calculations and limitations; advanced concepts. Explains advanced concepts in global navigation satellite systems. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CYSE 425C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 470: Human Factors and Cyber Security Engineering. 3 credits.
This course explores the human factor in cyber security engineering. The focus is on understanding human performance characteristics and limitations, and the various research, design, and evaluation methods needed to address them when engineering secure systems. Topics include, for example, perception, cognition, memory, situation awareness, decision making, stress, automation, and human-computer display and
interaction design principles. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CYSE 205C and STAT 344C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 475: Cyber Physical Systems. 3 credits.
Introduces cyber physical systems as an integration of physical processes, computation, and networking. Discusses modeling and simulation of cyber physical systems, system design and implementation. Analyze such systems based on abstractions for modeling physical systems and abstractions for modeling data transformations. Covers security issues in cyber physical systems and applications selected from infrastructure, energy, transportation, robotics, manufacturing, and communications domains. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CYSE 330C, 421C and 450C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 476: Cryptography and Computer Network Security. 3 credits.
Covers basic concepts of cryptology, types of cryptosystems, implementation of security services, key management, public key certificates, public key infrastructure, e-mail and web security. Discusses modern secret-key ciphers, modes of operation, hash functions, message authentication codes, public key cryptography, and digital signature schemes. Covers cryptographic standards and secure internet protocols. Introduces educational and public domain software implementing modern cryptographic algorithms. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CYSE 101C and 330C) or ECE 465C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 477: Intrusion Detection. 3 credits.
The objective of this course is to provide an in depth introduction to the science and art of intrusion detection. The course covers methodologies, techniques, and tools for monitoring events in computer systems or networks, with the objective of preventing and detecting unwanted process activity and recovering from malicious behavior. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CYSE 205C and 301C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 478: Cyber Security Audit and Compliance. 3 credits.
Fundamental concepts of the Cyber Security Compliance and Testing process. This will revolve around defining a control framework, the attendant control objectives and the reporting system for an organization. Covers the process of creating a control structure with goals and objectives, audit a given cyber infrastructure against it, and if found inadequate, establish a systematic remediation procedure. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CYSE 421C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 479: Methods of User Authentication. 3 credits.
Discusses limitations of passwords and PINs and introduces alternatives. Covers user authentication based on security tokens and smart cards. Introduces basics of biometric systems, based on information such as fingerprints, facial features, iris, and voice. Discusses the use and security of electronic ID cards and passports. Covers methods of distinguishing human from internet bots over the network, such as CAPTCHA's. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CYSE 211C, 301C and 330C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 480: Malicious Software and Hardware. 3 credits.
Introduces various types of malicious software (malware). Discusses malware analysis using virtual machines, sandboxers, process monitors, packet sniffers, de-obfuscation, etc. Introduces hardware Trojans and other forms of malicious hardware. Discusses prevention techniques at the design, fabrication, and post-fabrication level. Introduces various countermeasures against malicious software and hardware. The course has a lab with Windows and Android operating systems. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CYSE 211C and 301C.
Mason Core: to two attempts.

Offered by Volgenau School of Engineering required oral and written reports during project and at hardware if needed, conducting experiments or studies, and testing the physical security system, writing required software, assembling security Engineering program. Project includes designing a cyber-

CYSE 493: Engineering Senior Seminar. 2 credits.
This course covers a variety of responsibilities of cyber security engineers including: engineering ethics, government policies, laws and regulations affecting cyber security engineering, industry practices, entrepreneurship. Effective technical communications. Incorporates global implications of cyber security engineering. Speakers include faculty, invited guests from industry and government, as well as students. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Specialized Designation: Writing Intensive in the Major

Recommended Corequisite: CYSE 492.

Registration Restrictions: Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 492: Senior Advanced Design Project I. 2 credits.
First semester of a two semester capstone course in the Cyber Security Engineering program. Development of a design project by a team of students. Conception of the project and determination of its feasibility. Work includes developing preliminary design and implementation plan. Projects will aim at the integration of the technical material learned in several courses and incorporation of industry input. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Recommended Corequisite: CYSE 491.

Registration Restrictions: Enrollment is limited to students with a major, minor, or concentration in Cyber Security Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 493: Senior Advanced Design Project II. 3 credits.
Second semester of a two semester capstone course in the Cyber Security Engineering program. Project includes designing a cyber-physical security system, writing required software, assembling hardware if needed, conducting experiments or studies, and testing the complete system. Requires oral and written reports during project and at completion. Offered by Volgenau School of Engineering (p. 991). Limited to two attempts.

Mason Core: Capstone (p. 137)

Registration Restrictions:
Required Prerequisite: CYSE 492^C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

CYSE 499: Special Topics in Cyber Security Engineering. 3 credits.
Special Topics in the Cyber Security Engineering area, with different content in different terms. Offered by Volgenau School of Engineering (p. 991). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: 60 credits towards BS in Cyber Security Engineering.

Registration Restrictions: Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

Dance (DANC)

100 Level Courses

DANC 101: Dance Appreciation. 3 credits.
Introduces dance as universal human activity, expression of cultural identity, and art form. Survey of global dance includes folk, ceremonial and ritual, trance, court, classical, and theatrical. Offered by School of Dance (p. 832). May not be repeated for credit.

Mason Core: Arts (p. 137)

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 114: Rhythmic Analysis and Music Resources for Dance. 3 credits.
Introduces rhythmic structure, notation, and basic forms of music. Offered by School of Dance (p. 832). May not be repeated for credit.

Mason Core: Global Understanding (p. 137)

Specialized Designation: Non-Western Culture
DANC 131: Beginning Jazz Technique. 3 credits.
Introduces fundamentals of jazz dance technique, explores the musical and cultural traditions of jazz dance, and its historical context. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity. Also introduces jazz improvisation and choreography. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts (p. 137)

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 145: Ballet I. 3 credits.
Introduces fundamental elements of ballet technique and vocabulary. Stresses learning vocabulary and movement characteristics of this highly stylized art form. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing musicality.

Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts, Encore:Well-Being (p. 137)

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 146: Ballet II. 3 credits.
Consolidates technique and introduces elements of repertoire. Introduces the use of clear and focused imagery in ballet. Prerequisite: DANC 145. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts, Encore:Well-Being (p. 137)

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 150: Dance Improvisation. 3 credits.
Explores movement invention and discovery. Movement explored in relation to other art forms such as literature, painting, sculpture, and architecture; enhancing kinesthetic awareness; sensitivity to others; and the environment. Prerequisite for dance composition and choreography series. Offered by School of Dance (p. 832). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Dance.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 161: Introductory Tap Dance. 3 credits.
Introductory exploration of rhythms and steps basic to the art form of tap dancing including its musical and cultural traditions. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility and developing rhythmic sensitivity. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts (p. 137)

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 170: Orientation to Dance Production. 1 credit.
Introduces sound, lighting, and stage management elements and terminology as related to dance performance. Intensive workshop setting emphasizes laboratory experience. Offered by School of Dance (p. 832). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Dance.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 190: Special Topics in Dance. 1-3 credits.
Rotating topic. Introduction and exploration of topical studies in dance or related study areas; topic depends on instructor. Notes: May be repeated if course content differs. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 9 credits.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

DANC 199: Beginning Ballet. 3 credits.
Introduces fundamentals of ballet technique and vocabulary. Stresses learning vocabulary and movement characteristics of this highly stylized art form. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing musicality.

Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts, Encore:Well-Being (p. 137)
**200 Level Courses**

**DANC 210: Anatomy and Kinesiology for Dance.** 3 credits.
Covers aspects of anatomy and kinesiology that directly apply to correct development of dance technique. Emphasizes exercise correctives and imagery to correct insufficient muscle pattern and reduce stress on the body. Offered by School of Dance (p. 832). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Dance.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 225: Modern/Contemporary Dance II.** 3 credits.
Further develops knowledge, skills, and appreciation of modern dance through continued exploration of techniques, aesthetics, and creativity. Continuing the development of anatomical awareness and alignment, technical clarity, and rhythmic sensitivity. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 12 credits.

**Mason Core:** Arts (p. 137)

**Recommended Prerequisite:** DANC 125 or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 231: Intermediate Jazz Technique.** 3 credits.
Further study of the concepts of jazz dance technique, and in-depth study of 21st century jazz dance forms. Emphasizes furthering anatomical awareness and alignment, developing technical clarity, rhythm and syncopation. Continues exploration of jazz improvisation and choreography. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 12 credits.

**Mason Core:** Arts (p. 137)

**Recommended Prerequisite:** DANC 131 or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 245: Ballet II.** 3 credits.
Further develops fundamental elements of ballet technique and vocabulary. Stresses increasing vocabulary and movement characteristics of this highly stylized art form. Continuing emphasis on improving anatomical awareness and alignment, increasing strength and flexibility, and developing musically. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 9 credits.

**Mason Core:** Arts (p. 137)

**Recommended Prerequisite:** DANC 145 or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 251: Dance Composition I.** 3 credits.
Introduces basic principles for composing dance movement. Focuses on simple compositional forms as they apply to solo performer, discussion, analysis, and evaluation of artistic choices. Students maintain video and written journals to document their artistic process. Offered by School of Dance (p. 832). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: DANC 150C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Dance.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 252: Dance Composition II.** 3 credits.
Explores compositional elements in dance as they apply to group forms. Offers continued experience in developing and manipulating movement phrases using a variety of compositional forms. Introduces conducting rehearsals and selecting music. Students discuss, analyze, and evaluate artistic choices in composition using appropriate dance arts vocabulary and terminology, and maintain video and written journals to document artistic process. Offered by School of Dance (p. 832). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: (DANC 150C and 251C).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Dance.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 270: Dance Production Lab.** 1 credit.
Practical experience in stage crew, sound, or lighting of dance productions through rehearsal to public performance for university dance concerts or guest artist programs. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Required Prerequisite: DANC 170C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Dance.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**300 Level Courses**

**DANC 301: What is Dance?.** 3 credits.
Explores connections among literature, music, theater, and visual art within aesthetic framework of dance. Examines development and ideals of Western theatrical dance, and historical and social context in which they were created. Method of instruction includes lecture, discussion,
and studio experiences. Offered by School of Dance (p. 832). May not be repeated for credit.

Mason Core: Arts (p. 137)

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 318: Global Perspectives: World Dance Forms. 3 credits.
Continued in-depth study of world dance form including technique, music, and culture. Texts, video, performances, music, participatory events, and guest artist presentations. Lecture, studio. Area of concentration varies to include as many cultures as possible. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.

Mason Core: Global Understanding (p. 137)

Registration Restrictions:
Required Prerequisites: (DANC 118C or 119C).
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 324: Introduction to Dance Conditioning. 1-3 credits.
Course involves intensive rehabilitation and conditioning exercises and realignment training geared for the individual dancer. In-depth understanding of injury prevention and neuromuscular re-education are applied to ballet and modern technique classes. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 12 credits.

Registration Restrictions:
Enrollment is limited to students with a major in Dance.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 325: Modern/Contemporary Dance III. 1-3 credits.
Explores intermediate level of modern dance technique. Emphasizes improving anatomical awareness, increasing strength and flexibility, expanding modern dance vocabulary, and developing flow and dynamic range. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 24 credits.

Mason Core: Arts (p. 137)

Registration Restrictions:
Enrollment is limited to students with a major in Dance.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 331: Advanced Jazz Dance. 3 credits.
In-depth studio study of 21st century jazz dance forms. Continues concepts and vocabulary introduced in DANC 231, and further emphasizes alignment, technical clarity and virtuosity. Emphasizes mastery of rhythm and syncopation. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts (p. 137)

Recommended Prerequisite: DANC 231 or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Dance.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 345: Ballet III. 1-3 credits.
Provides continued ballet training for intermediate-level dancer. Emphasizes increasing technical proficiency, improving anatomical awareness, and developing deeper understanding of skills and principles of ballet technique and how they provide foundation to teach and perform. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 24 credits.

Mason Core: Arts (p. 137)

Registration Restrictions:
Enrollment is limited to students with a major in Dance.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 360: Choreography. 3 credits.
Continued choreographic exploration and research, culminating in bringing completed works to production. Offered by School of Dance (p. 832). May not be repeated for credit.

Specialized Designation: Research Associated

Registration Restrictions:
Required Prerequisites: (DANC 150C, 251C and 252C).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Dance.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 362: RS: Directed Choreography. 1 credit.
Faculty-guided, individual learning experience where students learn to choreograph a dance work by auditioning dancers, costuming, staging, lighting, selecting musical accompaniment, and composing original movement material. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 6 credits.

Specialized Designation: Research/Scholarship Intensive

Registration Restrictions:
Required Prerequisites: (DANC 150C, 251C, 252C and 360C).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Dance.
**DANC 370: Dance Performance.** 1 credit.
Practical experience in performance, repertory, and choreography through rehearsal and public performance of university dance concerts or guest artist programs. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Audition.

**Registration Restrictions:**
Enrollment is limited to students with a major in Dance.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 371: Residency Workshop.** 1 credit.
Rehearsal and performance of new or restaged dance by guest choreographer in intensive rehearsal setting. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Audition.

**Registration Restrictions:**
Enrollment is limited to students with a major in Dance.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 372: Advanced Dance Production.** 1 credit.
Methodology and practice of costume and lighting design, as dictated by specific needs of dance performance. Notes: Taught in series of workshop settings. Offered by School of Dance (p. 832). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (DANC 170<sup>C</sup> and 270<sup>C</sup>).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Dance.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 390: Dance History I.** 3 credits.
Examines dance as it developed as Western theatrical form from its beginnings in social and folk dance through evolution into ballet. Emphasizes romantic and classical ballet. Also studies American dance forms as they evolved in spectacles, burlesques, minstrelsy, and social dance. All forms of dance placed in social, political, cultural, aesthetic, and historical contexts. Offered by School of Dance (p. 832). May not be repeated for credit.

**Mason Core:** Arts (p. 137)

**Specialized Designation:** Writing Intensive in the Major

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 391: Dance History II.** 3 credits.
Examines revolutions in transformation of 20th-century Western dance into forms and institutions that radically departed from predecessors. Development of contemporary dance carried with it reflections of the influence of technology and media as well as concept of global culture. Renewed interest in traditional dance forms acknowledges power of dance to serve as carrier of cultural and societal values. Dance forms placed in social, political, cultural, aesthetic, and historical contexts. Offered by School of Dance (p. 832). May not be repeated for credit.

**Mason Core:** Arts (p. 137)

**Specialized Designation:** Writing Intensive in the Major

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 399: Independent Study.** 1-3 credits.
Individual research or creative project supervised by faculty member. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Permission of director of School of Dance.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**400 Level Courses**

**DANC 410: Introduction to Contemporary Movement Theories.** 3 credits.
Introduction to movement theories combining somatic theory with practical application to dance training. Focus on ways somatic practices can deepen perceptual processes and influence movement aesthetics. Theories studied may include: Alexander Technique, Feldenkrais Method, Body-Mind Centering, and Ideokinesis. Offered by School of Dance (p. 832). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** DANC 210<sup>C</sup>.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Dance.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**DANC 418: Global Dance Intensive.** 3 credits.
Intensive investigation of selected dance idiom within cultural and artistic contexts. Course work supplemented by participation in and observation of ambient culture. Analyzes similarities, differences, and common antecedents between selected culture and North American dance idioms. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Global Understanding (p. 137)
Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 420: Special Topics in Dance. 1-3 credits.
In-depth presentation and exploration of topical studies in dance or related study areas. Notes: Topic depends on instructor. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: 9 hours of DANC or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

DANC 425: Modern/Contemporary Dance IV. 1-3 credits.
Advanced-level exploration of modern dance technique. Emphasizes refining alignment, developing ability to self-correct, and replicating sophisticated movement sequences. Preparation to enter professional field of dance. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 18 credits.

Mason Core: Arts (p. 137)

Registration Restrictions:
Enrollment is limited to students with a major in Dance.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 445: Ballet IV. 1-3 credits.
Provides preprofessional ballet training for advanced-level dancer. Emphasizes attainment of high-quality technical and performance skills, application of anatomical principles, and mastery of sophisticated classical movement sequences. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 18 credits.

Mason Core: Arts (p. 137)

Registration Restrictions:
Enrollment is limited to students with a major in Dance.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 453: Teaching Creative Movement. 3 credits.
Provides theory, methodology, and practicum experience in preparation for teaching creative movement to children K-12, with some application to special populations. Offered by School of Dance (p. 832). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Dance.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 454: Methods of Teaching Dance. 3 credits.
Examines dance pedagogy, focusing on principles needed for teaching sound technique. Students learn skills, methods, and instructional procedures for classroom. Emphasizes curriculum development, proper course sequencing, implementation of teaching strategies, and classroom management techniques. Students study teaching methods appropriate for K-12, gifted and talented, and special-needs students. Intensive practice in implementing these skills includes lab, field-teaching experiences. Offered by School of Dance (p. 832). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Senior.

Enrollment is limited to students with a major in Dance.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

DANC 490: Senior Dance Seminar. 3 credits.
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work as it applies to dance, arts education, and professional development. Students develop senior project including written and oral presentation in public forum. Offered by School of Dance (p. 832). May not be repeated for credit.

Mason Core: Synthesis (p. 137)

Registration Restrictions:
Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major in Dance.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

DANC 501: Graduate Dance Seminar. 1-3 credits.
Presentation and discussion of current issues in dance specific to education, research, and professional development in the field. Offered by School of Dance (p. 832). May be repeated within the degree.

Recommended Prerequisite: Admission to MFA in Dance program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

DANC 510: Contemporary Movement Theories. 3 credits.
In-depth study of movement theories combining somatic theory with practical application to dance training. Focus is on ways somatic
Dance (DANC)

practices can deepen perceptual processes and influence movement aesthetics. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**DANC 520: Special Topics in Dance.** 1-3 credits.
In-depth presentation and exploration of topical studies in dance and/or related study areas. Notes: Topic depends on instructor. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**DANC 525: Advanced Modern Dance.** 1-3 credits.
Advanced study of modern technique, emphasizing sophisticated technical ability and performance skills, includes comparison of pedagogical perspectives. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 18 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**DANC 545: Advanced Ballet.** 1-3 credits.
Advanced study of ballet technique with an emphasis on high technical ability, performance skills and ballet vocabulary, includes comparison of pedagogical perspectives. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 18 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**DANC 550: Advanced Choreography.** 3 credits.
Intensive study and exploration of choreographic forms. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**DANC 570: Advanced Dance Performance.** 1-3 credits.
Public performance/presentations in university or professional productions. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Admission to Dance MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
DANC 571: Residency Workshop. 3 credits.
Rehearsal direction of a new or restaged work by a guest choreographer in an intensive rehearsal process. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

DANC 580: Laban Movement Analysis. 3 credits.
Introduction to the components of Laban Movement Analysis: body, shape, effort and space. Offered by School of Dance (p. 832). May not be repeated for credit.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

DANC 598: Philosophy and Aesthetics of Dance. 3 credits.
Study of philosophical theories and aesthetic principles of dance as a performing art. Offered by School of Dance (p. 832). May not be repeated for credit.

Recommended Prerequisite: DANC 390 and DANC 391, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

DANC 599: Independent Study. 3 credits.
Individual research or creative project. Offered by School of Dance (p. 832). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Special scale. (p. 82)

600 Level Courses

DANC 615: Contemporary Trends. 3 credits.
Study of contemporary art and artists and their philosophical theories, aesthetics and practices as they relate to the creation of new work. Offered by School of Dance (p. 832). May not be repeated for credit.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

DANC 627: Advanced Teaching Seminar. 3 credits.
Discussion and readings from varied pedagogical theories examining diverse approaches to teaching technique and theory culminating in development of a teaching portfolio. Offered by School of Dance (p. 832). May not be repeated for credit.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

DANC 672: Dance Production. 3 credits.
Artistic Direction of university or professional performance including mentoring of choreographers, adjudication of work, coordination with lighting designer, costumer, sound technician and managing director. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.
Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

DANC 680: Dance Management. 3 credits.
Exploration of the technical, financial and economical aspects of dance management including areas of marketing, fundraising, publicity, incorporation, booking non-profit vs. profit making organizations and issues relating to current practices in the performing arts industry. Offered by School of Dance (p. 832). May not be repeated for credit.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

DANC 790: Internship. 1-3 credits.
In depth study in selected subject area of interest. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

DANC 798: Directed Choreography/Project. 1-3 credits.
This course provides intensive independent choreographic study, culminating in the creation of a significant dance work or body of works, presented in a professional level public performance. The choreography must demonstrate the student's mastery of choreographic craft, an original concept and compelling artistry. Offered by School of Dance (p. 832). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to MFA in Visual and Performing Arts: Dance Concentration and DANC 560.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

DANC 799: Thesis. 1-6 credits.
Creation and documentation of original research including planning, performance, recording and written reflecting under direction of thesis committee. Offered by School of Dance (p. 832). May be repeated within the degree.

Recommended Prerequisite: Admission to Dance MFA program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Data Analytics Engineering (DAEN)

500 Level Courses

DAEN 500: Data Analytics Fundamentals. 3 credits.
Provides a foundation in data analytics from which the student will build. Focuses on a dataset where students will use analytics tools and apply statistical methodologies in order to extract information of value. Offered by Volgenau School of Engineering (p. 991). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

DAEN 527: Learning From Data. 3 credits.
This is an introductory course in machine learning and pattern recognition that covers basic theory, algorithms, and applications. Machine learning is the science of getting computers to act without being explicitly programmed. This course balances theory and practice, and covers the mathematical as well as the heuristic aspects. It provides a broad introduction to machine learning and pattern recognition. Topics include: (i) supervised learning (parametric/non-parametric algorithms,

Recommended Prerequisite: (MATH 203 and STAT 346) or equivalent

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

600 Level Courses
DAEN 690: Data Analytics Project. 3 credits.
Capstone project course for MS in Data Analytics program. Key activity is completion of a major applied team project resulting in an acceptable technical report and oral briefing. Student should plan to take this course in the last semester of studies. Offered by Volgenau School of Engineering (p. 991). May not be repeated for credit.

Recommended Prerequisite: Completion of 18 credit hours of coursework in the MS Data Analytics program. It is also recommended that DAEN 690 be taken in your last semester.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment is limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

DAEN 698: Data Analytics Research Project. 1-3 credits.
Conduct a research project to be chosen and completed under guidance of a graduate faculty member that results in an acceptable technical report. Notes: No more than a total of three credits may be taken from within the DAEN program. Offered by Volgenau School of Engineering (p. 991). May be repeated within the term for a maximum 3 credits.

Recommended Prerequisite: Graduate Standing, completion of at least two core courses and a minimum of 12 credits in the DAEN program, and permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Research
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Early Childhood Education (ECED)

400 Level Courses
ECED 401: Developmental Pathways of Diverse Learners, Birth-Adolescence. 3 credits.
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECED 402: Foundations of Language and Literacy for Diverse Prekindergarten and Kindergarten Learners. 3 credits.
Examines complexity of language and literacy development of diverse young learners. Emphasizes language acquisition, reading, and writing in prekindergarten and kindergarten contexts. Focuses on evidence-based assessment and instructional practices that promote prekindergarten and kindergarten children's language and literacy development. Explores social, cultural, affective, cognitive, and educational factors that play a role in language acquisition and literacy learning. Field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECED 403: Inclusive Curriculum for Young Learners: Planning Instruction and Guidance. 3 credits.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECED 404: Engaging Families of Diverse Young Learners. 3 credits.
Focuses on strategies for developing culturally appropriate family professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special initiatives.
needs. Explores theories and research supporting a family-centered approach, including family and professional rights and responsibilities, especially in the special education process. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 405:** *Introduction to Early Childhood Special Education*. 3 credits.
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery. Notes: Field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 406:** *Medical and Developmental Aspects of Disabilities of Diverse Young Learners*. 3 credits.
Focuses on medical and developmental aspects of children with disabilities, birth to age 5. Emphasizes the role of professionals in service delivery. Explores etiology, symptomatology, and management of neuromotor and developmental disabilities. Emphasizes positioning, adaptive strategies, and understanding assistive technology devices. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 411:** *Assessment of Diverse Young Learners*. 3 credits.
Examines types of assessment, including family-centered child assessment, for planning and implementing effective programs for culturally, linguistically, and ability diverse children, birth through third grade. Addresses selection, administration, analysis, and interpretation of formal and informal assessments. Field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: (ECED 401<sup>C</sup> or 501<sup>C</sup>) and (ECED 403<sup>C</sup> or 503<sup>C</sup>).

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 412:** *Language and Literacy Assessment and Instruction for Diverse Primary Grade Learners*. 3 credits.
Examines ways to assess and develop reading, writing, and the language arts in primary grade classrooms. Addresses instructional strategies and practices that promote language and literacy development in culturally, linguistically, socioeconomically, and ability diverse children. Offered by Graduate School of Education (p. 157). May not be repeated for credit. Equivalent to ECED 512.

**Registration Restrictions:**
Required Prerequisites: ECED 402<sup>C</sup> or 502<sup>C</sup>.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 413:** *Integrating Social Studies Across the Content Areas for Diverse Young Learners*. 3 credits.
Explores social studies content, assessment, curriculum development, planning, and instructional practices. Examines strategies for guiding children's behavior, integrating social studies instruction across content areas, and planning and implementing community of learners inclusive of children with diverse abilities and cultural, linguistic, and socio-economic backgrounds. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** ECED 403.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 414:** *Mathematics for Diverse Young Learners*. 3 credits.
Examines ways to foster development of mathematics in preschool to third-grade children. Covers construction of mathematics lessons and hands-on experiences that promote learning in children with diverse abilities and cultural and linguistic backgrounds. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** ECED 403.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 415:** *Science for Diverse Young Learners*. 3 credits.
Examines ways to foster development of science in preschool to third-grade children. Covers construction of science lessons and hands-on experiences that promote learning in children with diverse abilities and cultural and linguistic backgrounds. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** ECED 403.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 416:** *Developing Language, Literacy, and Communication of Diverse Infants and Toddlers*. 3 credits.
Examines instructional strategies, resources, and technologies, including assistive technologies, to develop language, literacy, and communication of diverse infants and toddlers. Explores monolingual and multilingual language acquisition, cultural and linguistic diversity, and language delays and disorders. Focuses on the importance of adult-child interaction and the role of the family in children's language, literacy, and communication development. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 423: Early Intervention for Infants & Toddlers with Disabilities: Collaborative & Consultative Approaches.** 3 credits.
Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 485:** Developmental Pathways of Diverse Learners, Birth-Adolescence. 3 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 490:** Internship in Early Childhood Education. 1-6 credits.
Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 12 credits.

**Schedule Type:** Student Teaching

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECED 497:** Special Topics in Early Childhood Education. 1-3 credits.
Provides study on selected topic or emerging issue in Early Childhood Education. Notes: May be repeated for credit with ECE program permission. Offered by Graduate School of Education (p. 157). May be repeated within the term for a maximum 9 credits.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**500 Level Courses**

**ECED 501:** Developmental Pathways of Diverse Learners, Birth-Adolescence. 3 credits.
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECED 502:** Foundations of Language and Literacy for Diverse Prekindergarten and Kindergarten Learners. 3 credits.
Examines complexity of language and literacy development of diverse young learners. Emphasizes language acquisition, reading, and writing in prekindergarten and kindergarten contexts. Focuses on evidence-based assessment and instructional practices that promote prekindergarten and kindergarten children's language and literacy development. Explores social, cultural, affective, cognitive, and educational factors that play a role in language acquisition and literacy learning. Notes: Field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECED 503:** Inclusive Curriculum for Young Learners: Planning Instruction and Guidance. 3 credits.
Explores principles of learning, curriculum development, and relationship between assessment and instruction. Examines role of play and active exploration in learning. Addresses guiding children's behavior and the role of families and culture in children's learning. Notes: Field experience required Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECED 504:** Engaging Families of Diverse Young Learners. 3 credits.
Focuses on strategies for developing culturally appropriate family professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special needs. Explores theories and research supporting a family-centered approach, including family and professional rights and responsibilities,
especially in the special education process. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECED 505:** *Introduction to Early Childhood Special Education*. 3 credits.
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery. Notes: Field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECED 506:** *Medical and Developmental Aspects of Disabilities of Diverse Young Learners*. 3 credits.
Focuses on medical and developmental aspects of children with disabilities, birth to age 5. Emphasizes the role of professionals in service delivery. Explores etiology, symptomatology, and management of neuromotor and developmental disabilities. Emphasizes positioning, adaptive strategies, and understanding assistive technology devices. Offered by Graduate School of Education (p. 157). May not be repeated for credit. Equivalent to EDSE 558.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECED 511:** *Assessment of Diverse Young Learners*. 3 credits.
Examines types of assessment, including family-centered child assessment, for planning and implementing effective programs for culturally, linguistically, and ability diverse children, birth through third grade. Addresses selection, administration, analysis, and interpretation of formal and informal assessments. Notes: Field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: (ECED 401B or 501B) and (ECED 403B or 503B).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECED 512:** *Language and Literacy Assessment and Instruction for Diverse Primary Grade Learners*. 3 credits.
Examines ways to assess and develop reading, writing, and the language arts in primary grade classrooms. Addresses instructional strategies and practices that promote language and literacy development in culturally, linguistically, socio-economically, and ability diverse children. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: ECED 403B or 503B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECED 513:** *Integrating Social Studies Across the Content Areas for Diverse Young Learners*. 3 credits.
Explores social studies content, assessment, curriculum development, planning, and instructional practices. Examines strategies for guiding children’s behavior, integrating social studies instruction across content areas, and planning and implementing community of learners inclusive of children with diverse abilities and cultural, linguistic, and socio-economic backgrounds. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** ECED 503

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.
ECED 514: Mathematics and Science for Diverse Young Learners. 3 credits. Examines ways to foster development of mathematics and science in preschool to third-grade children. Covers construction of math and science lessons and hands-on experiences that address the needs of culturally, linguistically, and ability diverse children. Notes: Field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Early Childhood Education program or approval of course instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 515: Mathematics for Diverse Young Learners. 3 credits. Examines ways to foster development of mathematics in preschool to third-grade children. Covers construction of mathematics lessons and hands-on experiences that promote learning in children with diverse abilities and cultural and linguistic backgrounds. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: ECED 403 or ECED 503.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 516: Science for Diverse Young Learners. 3 credits. Examines ways to foster development of science in preschool to third-grade children. Covers construction of science lessons and hands-on experiences that promote learning in children with diverse abilities and cultural and linguistic backgrounds. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: ECED 403 or ECED 503.

Registration Restrictions:
Enrollment limited to students with a class of Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 522: Developing Language, Literacy, and Communication of Diverse Infants and Toddlers. 3 credits. Examines instructional strategies, resources, and technologies, including assistive technologies, to develop language, literacy, and communication of diverse infants and toddlers. Explores monolingual and multilingual language acquisition, cultural and linguistic diversity, and language delays and disorders. Focuses on the importance of adult-child interaction and the role of the family in children's language, literacy, and communication development. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Early Childhood Education program or approval of course instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 523: Early Intervention for Infants & Toddlers with Disabilities: Collaborative & Consultative Approaches. 3 credits. Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Early Childhood Education program or approval of course instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 597: Special Topics in Early Childhood Education. 1-3 credits. Provides study on selected topic or emerging issue in Early Childhood Education. Notes: May be repeated for credit with ECE program permission. Offered by Graduate School of Education (p. 157). May be repeated within the term for a maximum 9 credits.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

600 Level Courses

ECED 601: Frameworks for Early Childhood Education. 3 credits.
Analyzes foundational frameworks for developing perspectives for working with culturally, linguistically, and ability diverse young learners, birth to age 8, and their families. Examines foundational work from fields of early childhood education, early childhood special education, multicultural education, and second language acquisition. Notes: Must be taken as final course or with final courses of the program. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 685: Applied and Teacher Research in Early Childhood Education. 3 credits.
Develops fundamental concepts, principles, and methods of research in early childhood education, with emphasis on interpreting and applying research results. Critiques research and uses findings in educational settings. Serves as a capstone course in early childhood education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Taken with or after final course of program or with permission of the program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 691: Policy Perspectives in Early Childhood Education. 3 credits.
Explores historical and current trends and issues involving legislation and policy in early childhood education, multilingual education, early childhood special education, and multicultural education. Focuses on historical role of social advocacy, development of advocacy skills, and collaboration and consultation with other professionals and staff in early childhood education of services and context of service delivery. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses

ECED 702: Early Writing: Cognition, Language, and Literacy. 3 credits.
Examines early writing research and practice related to cognition, language, and literacy in the early education of diverse learners, including special education and multicultural/multilingual education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Approval of instructor and admission to the PHD program.

Registration Restrictions:
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 704: Family Research and Practice in Early Childhood Education. 3 credits.
Explores the relationship between families and professionals in providing appropriate early care and education, birth through grade 3, including children with special education needs and those from culturally, linguistically, and economically diverse backgrounds. Includes in-depth study, analysis, and discussions of original research as well as synthesis of findings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Approval of instructor and admission to the PHD program.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 710: International Perspectives in Early Childhood Education. 3 credits.
Examines international perspectives in early childhood education in various contexts to increase students’ knowledge of approaches to planning and implementing effective programs for culturally, linguistically,
and ability diverse children by professionals working with young children and families to inform, connect, and enrich U.S. based programs in early childhood education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the M.Ed. in Curriculum and Instruction, Concentration in Early Childhood Education for Diverse Learners, the Ph.D. in Education, or permission of instructor.

**Registration Restrictions:** Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECED 788: Internship in Early Childhood Education Prekindergarten-Third Grade.** 6 credits.
Enables students to participate full time in an internship in early childhood education (prekindergarten through third grade). Links university course work to real world of working with diverse young learners and their families. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** ECED 401 or 501, ECED 403 or 503 and Admission to the Early Childhood Education Prekindergarten-Third Grade Licensure Graduate Certificate Program. Endorsement and standardized test requirements (Praxis Core Academics Skills for Educators or qualifying substitution, Praxis II, and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**ECED 789: Internship in Early Childhood Special Education Birth - Five.** 6 credits.
Enables students to participate full time in an internship in early childhood special education (birth-5). Links university course work to real world of working with children with special needs and their families. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** ECED 401 or 501, ECED 403 or 503, and Admission to the Early Childhood Special Educational Licensure Graduate Certificate Program. All standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met prior to applying to the internship.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**ECED 790: Internship with Diverse Preschool Children.** 3 credits.
Enables students to participate full time in an internship with diverse preschool children. Links university course work to real world of working with diverse young learners and their families. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ECED 401 or 501, ECED 403 or 503, and Admission to the Early Childhood Education Prekindergarten – Third Grade (Licensure) Graduate Certificate Program. All endorsement and standardized test requirements (Praxis Core Academics Skills for Educators or qualifying substitution, Praxis II, and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**ECED 791: Internship with Diverse Infants and Toddlers.** 3 credits.
Enables students to participate full time in an internship with diverse infants/toddlers. Links university course work to real world of working with diverse young learners and their families. Notes: Students enroll in both infant/toddler (3 credits) and preschool (3 credits) internships. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ECED 401 or 501, ECED 403 or 503, and Admission to the Early Childhood Special Education (Licensure) Graduate Certificate Program. All standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**ECED 792: Internship in Early Childhood Education-TFA.** 1-6 credits.
Enables students to participate full time in an internship in early childhood education. Links university course work to real world of working with diverse young learners and their families. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to the Early Childhood Education program or approval of course instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

ECED 793: Internship in Preschool Early Childhood Special Education. 3 credits.
Enables students to participate full time in an internship in preschool early childhood special education. Links university course work to real world of working with diverse young learners and their families. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: ECED 401 or 501, ECED 403 or 503, and Admission to the Early Childhood Special Education (Licensure) Graduate Certificate Program. All standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution and Virginia Communication and Literacy Assessment) must be met the semester prior to the internship.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

ECED 795: Internship in Kindergarten - Third Grade. 3 credits.
Enables students to participate full time in an internship in early childhood education in kindergarten through third grade. Links university course work to real world of working with diverse young learners and their families. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: ECED 401 or 501, ECED 403 or 503, and Admission to the Early Childhood Education Prekindergarten - Third Grade Licensure Graduate Certificate Program. Endorsement and standardized test requirements (Praxis Core Academic Skills for Educators or qualifying substitution, Praxis II, and Virginia Communication and Literacy Assessment) must be met prior to applying for the internship.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

800 Level Courses
ECED 801: Current Research and Trends in Early Childhood Education. 3 credits.
Examines research and trends in the early education of children. Explores issues that influence the education of young children with special education needs and children from culturally, linguistically, and economically diverse backgrounds. Examines practices appropriate for diverse young learners. Offered by Graduate School of Education (p. 157). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission to the PhD in Education program or post-master's status and approval of course instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 803: Teacher Preparation and Professional Development. 3 credits.
Examines writing research and practice related to cognition, language, and literacy in the early education of diverse learners, including children with special education needs and those from culturally, linguistically, and economically diverse backgrounds. Includes in-depth study, analysis, and discussions of original research as well as synthesis of findings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD in Education program or post-master's status and approval of course instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 804: Family Research and Practice in Early Childhood Education. 3 credits.
Examines research and current recommended practices related to teacher preparation and professional development. Provides opportunity for practical application with preservice or inservice teachers. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Equivalent to EDUC 803.

Recommended Prerequisite: Admission to the PhD in Education program or post-master's status and approval of course instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 812: Early Writing: Cognition, Language, and Literacy. 3 credits.
Examines research and practice related to cognition, language, and literacy in the early education of diverse learners, including children with special education needs and those from culturally, linguistically, and economically diverse backgrounds. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD in Education program or advanced-master's status with approval of course instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECED 816: Early Writing: Cognition, Language, and Literacy. 3 credits.
Examines research and practice related to cognition, language, and literacy in the early education of diverse learners, including children with special education needs and those from culturally, linguistically, and economically diverse backgrounds. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD in Education program or advanced-master's status with approval of course instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**Economics (ECON)**

### 100 Level Courses

**ECON 100: Economics for the Citizen.** 3 credits.
Not available to economics majors. Broad introduction to economic concepts and how they can contribute to a better understanding of the world around us. Applies and develops concepts to current economic and social problems and issues. Less formal modeling than in the 103-104 sequence. Offered by Economics (p. 339). May not be repeated for credit.

**Mason Core:** Social/Behavioral Sciences (p. 137)

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 103: Contemporary Microeconomic Principles.** 3 credits.
Introduces microeconomics in the context of current problems. Explores how market mechanism allocates scarce resources among competing uses; uses supply, demand, production, and distribution theory to analyze problems. Offered by Economics (p. 339). May not be repeated for credit.

**Mason Core:** Social/Behavioral Sciences (p. 137)

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 104: Contemporary Macroeconomic Principles.** 3 credits.

**Recommended Prerequisite:** ECON 103.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 105: Environmental Economics for the Citizen.** 3 credits.
Introduction to economic concepts and how they can be applied to environmental policy issues such as air and water pollution, climate change, natural resource use, and sustainability. Focus is on concepts, policy, and case studies rather than formal modeling exercises. Offered by Economics (p. 339). May not be repeated for credit.

**Mason Core:** Social/Behavioral Sciences, Encore:Sustainability (p. 137)

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 110: Introduction to Economic Science.** 2 credits.
Introduces economics as an observational science, covering personal vs. impersonal exchange, strategic interdependence and game theory, group decision making, and market design. Offered by Economics (p. 339). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

### 200 Level Courses

**ECON 296: Special Topics in Economics.** 3 credits.
Provides coverage of a specialized topic in economics at the introductory level. Topics vary by section. Notes: May be repeated for credit when topic is different. Offered by Economics (p. 339). May be repeated within the term for a maximum 9 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

### 300 Level Courses

**ECON 306: Intermediate Microeconomics.** 3 credits.
Basic factors of price and distribution theory, analysis of demand, costs of production and supply relationships, and price and output determination under various market structures. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** ECON 103 and 104 and MATH 108 or 113.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 308: Managerial Economics and Strategy.** 3 credits.
Analysis of major strategic business situations including pricing strategy, incentives and contracts, game theory, and vertical and horizontal integration. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** ECON 306.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 309: Economic Problems and Public Policies.** 3 credits.
Economic problems in light of current and proposed public policies. Topics include environmental issues, international trade policies, and regulatory issues and their historical roots. Offered by Economics (p. 339). May not be repeated for credit.

**Mason Core:** Synthesis (p. 137)

**Recommended Prerequisite:** ECON 100 or 103 and 104 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
ECON 310: Money and Banking. 3 credits.
Monetary, commercial, and central banking systems, with particular emphasis on their relationship with American government programs, fiscal policies, and controls. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 103, 104 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 311: Intermediate Macroeconomics. 3 credits.
Aggregate economic accounts, including measuring national income; determinants of levels of income and output; and causes and solutions for problems of unemployment, inflation, and economic growth. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 103 and 104 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 320: Labor Problems. 3 credits.
Explores American labor unions and their effect on society, including causes of and proposed solutions to selected problems. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 103 and 104 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 321: Economics of Labor. 3 credits.
Defines factors that determine levels of wages and employment, and economic consequences. Emphasizes recent developments in unionism, collective bargaining, and industrial technology. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 306.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 330: Public Finance. 3 credits.
Covers intergovernmental financial relationships; types, incidences, and consequences of taxation; other sources of governmental income; governmental expenditures and their effect; public economic enterprises; public borrowing; and debt management and its economic effect. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 306 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 335: Environmental Economics. 3 credits.
Microeconomic analysis of environmental problems. Topics include externalities and market failure, alternative solutions and policies, problems in monitoring and enforcement, economic analysis of development of legislation and regulation, and applications to current policy issues. Offered by Economics (p. 339). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: ECON 103 and 104.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 340: Introduction to Mathematical Economics. 3 credits.
Mathematical treatment of theory of firm and household behavior, stabilization policy, growth theory, input-output analysis, and linear programming. Offered by Economics (p. 339). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (ECON 306C, 311C and MATH 113C).
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 345: Introduction to Econometrics. 3 credits.
Modern statistical techniques in estimating economic relations. Offered by Economics (p. 339). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Registration Restrictions:
Required Prerequisites: (ECON 306D and 311D) and (STAT 250D and 350D or STAT L350) or (STAT 344D and 354D).
D Requires minimum grade of D.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 355: The Political Economy of Nonprofit Institutions. 3 credits.
Applies the basic principles of economics to teach students to think critically about nonprofit institutions. Examines the economics of nonprofit institutions, how incentives influence the evolution of charities, and current issues in nonprofit organizations. Offered by Economics (p. 339). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ECON 103 and ECON 104 or permission of instructor.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
ECON 360: Economics of Developing Areas. 3 credits.
Economic growth characteristic of developing countries. Economic development, obstacles to development, policies, and planning. Offered by Economics (p. 339). May not be repeated for credit.

Mason Core: Global Understanding (p. 137)
Recommended Prerequisite: ECON 103 and 104 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 361: Economic Development of Latin America. 3 credits.
Economic development, institutions, and problems of Latin America. Offered by Economics (p. 339). May not be repeated for credit.

Mason Core: Global Understanding (p. 137)
Specialized Designation: Non-Western Culture
Recommended Prerequisite: ECON 103 and 104 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 362: African Economic Development. 3 credits.
Issues of economic development as applied to Africa. Includes overview of early economic history in Africa and post-independence development, and contemporary development problems. Offered by Economics (p. 339). May not be repeated for credit.

Mason Core: Global Understanding (p. 137)
Specialized Designation: Non-Western Culture
Recommended Prerequisite: ECON 103 and 104 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 365: Topics in Economic History. 3 credits.
Possible topics include ancient, medieval, modern European, and American economic history, using econometric analysis as necessary. Notes: May be repeated when topic is different. Offered by Economics (p. 339). May be repeated within the term for a maximum 6 credits.

Specialized Designation: Writing Intensive in the Major
Recommended Prerequisite: ECON 103 and 104.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 370: Economics of Industrial Organization. 3 credits.
Factors influencing industrial structure, and industrial conduct and performance. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 306 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 371: Health Economics. 3 credits.
Microeconomic analysis of health and medicine. Topics include the determinants of health, health externalities, health insurance, the health effects of medicine, the supply and demand of medicine, medical quality and regulation, and information asymmetries. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 103 and ECON 104 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 374: International Economic Policy. 3 credits.
Introduces economic way of thinking on trade and international finance. Presents historical and current information on consequences of trade and protectionism. Notes: May not be applied toward the elective course requirement needed for a major or minor in economics. Offered by Economics (p. 339). May not be repeated for credit.

Schedule Type: Lecture
ECON 390: International Economics. 3 credits.
Foreign exchange market, balance of payment, foreign trade policies, and theories of international trade. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 306 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

400 Level Courses

ECON 403: Austrian Economics. 3 credits.
Microeconomic and macroeconomic models and misallocation of resources. Alternative economic tools from noted Austrian economists. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 306 and 311.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 410: Public Choice. 3 credits.
Applies economic theory, methodology to study nonmarket decision making. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 306.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 412: Game Theory and Economics of Institutions. 3 credits.
Introduces game theory and its relevance for analyzing framework of rules and institutions within which economic processes occur. Applies game theoretical concepts to comparative analysis of causes and effects of alternative institutional arrangements. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 306 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 415: Law and Economics. 3 credits.
Economic analysis of the law. Topics include introduction to legal institutions and legal analysis; application of economic concepts to the law of property, contracts and torts, criminal and constitutional law; economic efficiency of common law; and public choice perspective on the evolution of the law. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 306 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 420: International Money and Finance. 3 credits.
Examines models of balance of payments, exchange rate behavior, and open economy macroeconomics. Includes international financial system and issues such as globalization and international financial instability. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 306 and 311, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 421: Financial Economics. 3 credits.
Provides a survey of financial economics including a brief overview of the U.S. and international financial system and the role of different financial institutions. Covers the leading theoretical models in the field. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 103, ECON 104, ECON 306, ECON 311.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 435: Economics of Energy. 3 credits.
Examines various issues in the energy industry using tools from microeconomic theory, law and economics and public choice. Topics include issues related to oil, historical and current energy regulation, and environmental issues associated with energy. Offered by Economics (p. 339). May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: ECON 306.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 440: Economic Systems Design: Principles and Experiments. 3 credits.
Introduces design principles to develop systems to allocate resources. Students must participate in experiment demonstrations of different allocation mechanisms. They also are exposed to experimental methods in economics and market design. Offered by Economics (p. 339). May not be repeated for credit. Equivalent to SYST 480.

Recommended Prerequisite: MATH 213.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECON 441: Economic Systems Design: Case Studies and Analysis. 3 credits.
Requires students to design and develop mechanism to specific allocation problem. Students develop analytical and working engineering
models of their mechanism. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** ECON 440.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 442:** *Economic Systems Design: Implementation.* 3 credits.
Involves students in developing experimental design to test proposed allocation solution. Design process includes construction of experimental parameters, treatments, and initial test in laboratory setting. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** ECON 441.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 445:** *Design and Analysis of Experiments.* 3 credits.
Topics include comparing two or more treatments, and computing and interpreting analysis of variance. Discusses randomized block, Latin square, and factorial designs; and applications to economics experiments. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** STAT 250 or 344, or MATH 351, or IT 250, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 460:** *Senior Seminar in Philosophy, Politics, and Economics.* 3 credits.
Covers issues in the philosophy, economics, and political science of institutions, information, and collective action. Through case studies of existing legal and political institutions, applies the insights to problems in politics, policy making, social-choice theory, and social, moral, and political philosophy. (Specific content varies). Notes: Serves as the capstone course for the PPE program. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** PHIL 358 and ECON 412 or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 462:** *Economics of Regulation.* 3 credits.
Examines various issues surrounding concepts of regulation using tools from microeconomic theory and public choice. Topics include antitrust, rate regulation, policy rationales for regulation, and issues of current interest. Offered by Economics (p. 339). May not be repeated for credit.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Prerequisite:** ECON 306.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 471:** *Airline Economics.* 3 credits.
Economic theory as it is applied to commercial airlines. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** ECON 306 or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 481:** *The Development of Economic Thought.* 3 credits.
Studies the thought of Adam Smith. As the first in a two-course sequence, course focuses on The Theory of Moral Sentiments. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** ECON 306 and 311 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 485:** *Smithian Political Economy I.* 3 credits.
Studies the thought of Adam Smith. As the second in a two-course sequence, course focuses on The Wealth of Nations. Offered by Economics (p. 339). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 486:** *Smithian Political Economy II.* 3 credits.
Studies the thought of Adam Smith. As the second in a two-course sequence, course focuses on The Wealth of Nations. Offered by Economics (p. 339). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 492:** *Study Abroad.* 1-6 credits.
Study abroad under supervision of George Mason faculty. Course topics, content, and locations vary. Notes: May be repeated with permission of department. Offered by Economics (p. 339). May be repeated within the degree for a maximum 12 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 494:** *Introduction to Independent Research in Economics.* 3 credits.
Develops skills in finding and evaluating sources, oral presentation, and academic writing. Offered by Economics (p. 339). May not be repeated for credit.

**Specialized Designation:** Research Associated
**Recommended Prerequisite:** ECON 306 and 311.

**Registration Restrictions:**
Enrollment limited to students with a class of Junior, Senior Plus or Senior.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECON 495:** RS: Honors Thesis in Economics. 3-6 credits.
Honors-level research on a self-selected topic in economics culminating in a substantial research paper and an oral presentation. Notes: Requirements for departmental honors in the major are in addition to the coursework required for the major. ECON 495 credit may not be applied toward the elective course requirement needed for a major or minor in economics. Offered by Economics (p. 339). May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** ECON 494 with minimum grade of B or permission from the instructor with an approved research proposal.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Special scale. (p. 82)

**ECON 496:** Special Topics in Economics. 3 credits.
Subject matter varies. Notes: May be repeated when topic is different. Offered by Economics (p. 339). May be repeated within the term for a maximum 24 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ECON 497:** Internship. 3-6 credits.
Students find economics-related internship with assistance from Career Services. Pre-internship proposal and final reflections paper required. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** 6 upper-level hours in economics, Junior standing, and permission of instructor.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**ECON 499:** Independent Study. 1-4 credits.
Individual study of selected area of economics. Notes: Directed research paper required. Offered by Economics (p. 339). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** Economics majors with 90 credits, and permission of both the department and instructor.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**500 Level Courses**

**ECON 535:** Survey of Applied Econometrics. 3 credits.
Applied introduction to estimating economic relationships. Includes simple equation and simultaneous equation system estimation. Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** Admission to master's program in economics or OM 210 or STAT 250 and 350, and ECON 306 and 311, and MATH 113; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**600 Level Courses**

**ECON 611:** Microeconomic Theory. 3 credits.
Covers theory of behavior of consumers, firms, and resource suppliers; theories of choice under risk and uncertainty; partial equilibrium analysis of competitive and noncompetitive markets; general equilibrium analysis; and welfare economics. Introduces capital theory. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

**Recommended Prerequisite:** Admission to master's program in economics or ECON 306 and 311, and MATH 113; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECON 612:** Microeconomic Theory II. 3 credits.
Nature of the firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND
ECON 602: Microeconomic Theory. 3 credits.
Introduces the fundamental concepts of microeconomics, including supply, demand, and market equilibrium. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: Admission to master's program in economics, or ECON 306 and 311, and MATH 113, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 603: Macroeconomic Theory. 3 credits.
Survey course covering monetary theory, theories of consumption and saving, budget deficits, economic growth, international finance, and monetary and fiscal policies. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: Admission to master's program in economics, or ECON 306 and 311, and MATH 113, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 604: International Macroeconomics. 3 credits.
Introduces the analysis of international trade and finance. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: Admission to master's program in economics, or ECON 306 and 311, and MATH 113, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 605: Econometrics I. 3 credits.
Introduces the principles of econometric analysis. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: Acceptance to PhD program in economics, or permission of instructor.

Registration Restrictions:
Economics (ECON)

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 676: Comparative Economic Systems. 3 credits.
Capitalism, socialism, and corporatism historical perspective. Includes examination of economies of representative contemporary countries. Offered by Economics (p. 339). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 695: Special Topics in Economics. 3 credits.
Topics vary according to interests of instructor. Emphasizes new areas of discipline. Notes: May be repeated when topic is different. Offered by Economics (p. 339). May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

700 Level Courses

ECON 715: Macroeconomic Theory I. 3 credits.
Covers classical, neoclassical, Keynesian, and post-Keynesian theories of income and employment determination; theories of inflation and growth; and demand for money and implications for effectiveness of monetary vs. fiscal policy. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: Admission to doctoral program in economics, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 799: Master's Thesis. 1-6 credits.
Research on approved thesis topic under direction of thesis committee. Notes: Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree. Offered by Economics (p. 339). May be repeated within the degree.

Recommended Prerequisite: Admission to MA economics program and permission of thesis advisor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

800 Level Courses

ECON 811: Microeconomic Theory I. 3 credits.
Theory and applications of behavior of consumers, firms, and resource suppliers. Partial equilibrium analysis of various market structures and introduction to intertemporal choice and capital theory. Review and analysis of classic works in microeconomic theory. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: Admission to doctoral program in economics, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 812: Microeconomic Theory II. 3 credits.
Examines nature of firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 811.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 816: Macroeconomic Theory II. 3 credits.
Aggregate economic activity and price levels with emphasis on dynamic models. Notes: Non-Degree students are permitted to enroll based on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 715 and 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 817: Monetary Theory and Policy. 3 credits.
Theory of mechanisms through which central banking affects economic activity and prices. Analyzes demand for money and its relationship to economic activity. Develops monetary theory with emphasis on current theories and controversies in the field. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 615 or 715 and 535 or 637, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 820: History of Economic Thought. 3 credits.
Explores major figures in history of economic thought and tools of analysis they created. Emphasizes classical, neoclassical, and Keynesian theories. Offered by Economics (p. 339). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 821: History of Economic Thought II. 3 credits.
Covers development of economic analysis from marginal revolution of 1877 to present. Emphasizes development of neoclassical economic theory. Offered by Economics (p. 339). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 823: Topics in Economic History. 3 credits.
Offers economic analysis of various historical epochs including Industrial Revolution, evolution of political reform, rise of unions, and growth of government. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 and 615, or ECON 715 and 811; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 825: Political Economy and Public Policy I. 3 credits.
Covers economic process of public policy formulation and implementation; and economic behavior of principals in policy making and execution. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 and 811, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 826: Political Economy and Public Policy II. 3 credits.
Specific issues related to political economy of public policy, including privatization, political economy of deficit spending, regulation and deregulation, and economics of rent seeking. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 827: Economic Philosophy. 3 credits.
Analyses philosophical organization, including interrelations between economics and legal and political institutions; philosophical presuppositions of capitalist economy under constitutional democracy; alternative presuppositions for non-capitalist economies; and critical evaluation of history of ideas in social and moral philosophy. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.
Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 828: Constitutional Economics. 3 credits.
Analyzes existing and proposed elements of economic constitution. Emphasizes fiscal, monetary, transfer, and regulatory powers of government and constitutional limits on such powers, especially in the United States. Includes analysis of proposed changes in limits. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 829: Economics of Institutions. 3 credits.
Analyzes framework of rules and institutions for economic activities and transactions. Includes emergence and working properties of different institutions, and classical and contemporary approaches to economic theory of institutions. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 830: Mathematical Economics I. 3 credits.
Includes algebra and multivariate calculus applied to advanced economic problems. Also covers unconstrained and constrained optimization, formal models of market equilibrium, and models of economic dynamics in continuous and/or discrete time. Notes: Non-degree students are permitted to enroll on space availability determined one week before the first day of classes AND on meeting the prerequisites AND with permission of instructor. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: Admission to doctoral program in economics, or ECON 306 and 311, and MATH 113, MATH 114, and familiarity with elementary differential calculus (univariate and multivariate), elementary integration (univariate), basic matrix/linear algebra (addition, multiplication, inversion), univariate optimization, and logarithms; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 831: Mathematical Economics II. 3 credits.
Develops the foundations of choice, price, and general equilibrium theory. Topics include choice, preference and utility; consumer demand; competitive firms; general equilibrium; and social choice and welfare. Special attention is paid to uncertainty and dynamic choice. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: Admission to doctoral program in economics, or ECON 306 and 311, and MATH 113; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 832: Econometrics II. 3 credits.
Explores econometric models and simultaneous equation systems. Includes identifying parameters and least squares bias, alternative estimation methods, and block recursive systems. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 637 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 833: Constitutional Economics II. 3 credits.
Uses economic analysis and methods to explore more deeply than in Constitutional Economics I specific issues in Constitutional Economics. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 828.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 834: Law and Economics I. 3 credits.
Uses economics to analyze U.S. Common-law system, evaluating efficiency and logic of evolution. Notes: No prior knowledge of law required. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
ECON 841: Law and Economics II. 3 credits.
Explores empirical analyses of law of property, torts, crime, and family. Also looks at law's effects on freedom and economic growth. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811, and ECON 535 or 637; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 843: Smithian Political Economy I. 3 credits.
Explores the moral philosophy of Adam Smith, with a focus on The Theory of Moral Sentiments, which is studied cover-to-cover in "Great Books" fashion. Offered by Economics (p. 339). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 844: Industrial Organization and Public Policy I. 3 credits.
Structure of American industry and underlying determinants. Includes structure and conduct on industrial performance in light of theory and empirical evidence; and rational antitrust policy and analysis of impact on structure and performance. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 845: Smithian Political Economy II. 3 credits.
Explores the political economy of Adam Smith, with a focus on The Wealth of Nations, which is studied cover-to-cover in "Great Books" fashion. Offered by Economics (p. 339). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 846: Industrial Organization and Public Policy II. 3 credits.
Covers relationship of law, economics, and theories of social control of property rights. Includes theories of market structure and industrial performance. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 844, and ECON 535 or 637; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 849: Public Finance. 3 credits.
Theoretical and institutional analysis of government expenditure, taxation, debt management, and intergovernmental fiscal relations. Includes allocative and distributional effects of alternative tax and subsidy techniques, principles of benefit cost, and cost-effectiveness analysis for government decisions. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 852: Public Choice I. 3 credits.
Applies economic theory and methodology to study of nonmarket decision making. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 854: Public Choice II. 3 credits.
Applies public choice approach to study such topics as causes and consequences of governmental growth, behavior of public bureaucracies, and economic reasoning behind constitutional limitations on size and growth of government. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 852 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 855: Industrial Organization and Public Policy III. 3 credits.
Covers relationship of law, economics, and theories of social control of property rights. Includes theories of market structure and industrial performance. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 844, and ECON 535 or 637; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture
ECON 856: Non-Market Decision Making. 3 credits.
Explores the economics of non-market decision making. Considers the application of rational choice theory to decision making by a variety of persons who are neither traditional buyers nor sellers in a variety of contexts that are not traditional markets. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 852 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 866: Economic Development. 3 credits.
Explores forces contributing to or retarding economic progress in developing countries. Includes role of foreign trade, economic integration, foreign investment, multinational corporations, and technological transfers. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 811 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 869: International Trade and Policy. 3 credits.
Studies classical, neoclassical, and modern theories of international trade; theory and practice of world trade models such as project LINK; foreign investment and economic growth; tariffs and nontariff barriers, and economic integration; and recent developments, with emphasis on natural resources. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 611 or 615, or 715 and 811, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 871: International Monetary Economics. 3 credits.
Examines international adjustment mechanism, price and income effects, controls, and monetarist approach; development of international monetary system; demand for international reserves; capital movements; and role of International Monetary Fund. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 615 or 715 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Examines theory developed by Menger, Mises, Hayek, and others of the Austrian School; and compares with other popular theories. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 880, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 881: Theory of Market Process II. 3 credits.
Continuation of ECON 880. Explores the market-process approach to analyzing capital accumulation and growth; money and credit institutions; inflation and unemployment; and industrial fluctuations. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 880, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 885: Experimental Economics. 3 credits.
Designed for graduate students to learn how experimental methods can be used to inform economic research and practice. Students expected to have working understanding of basic economic concepts and multivariate calculus. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 880, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

ECON 886: Experimental Economics II. 3 credits.
Research in experimental design. Topics represent basic tools to build, test, and implement exchange mechanisms in an applied setting. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 885 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 895: Special Topics in Economics. 3 credits. Topics vary according to interests of instructor. Emphasizes new areas of discipline. Offered by Economics (p. 339). May be repeated within the term.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ECON 896: Directed Reading and Research. 1-9 credits. Independent reading and research paper on a topic agreed on by student and faculty member. Offered by Economics (p. 339). May be repeated within the term.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

900 Level Courses

ECON 950: Seminar in Public Finance. 3 credits. Important public finance issues treated in seminar format. Offered by Economics (p. 339). May not be repeated for credit.

Recommended Prerequisite: ECON 849 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 985: Workshop in Experimental Economics. 3 credits. Designed for graduate students who have taken Experimental Economics and Economic Systems Design and are applying experimental methods to their own or collaborative research projects. Offered by Economics (p. 339). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: ECON 886.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECON 998: Doctoral Dissertation Proposal Research. 1-9 credits. Research on prospective dissertation topic. Notes: For students who have completed course work but have not yet advanced to candidacy. Offered by Economics (p. 339). May be repeated within the degree.

Recommended Prerequisite: Admission to PhD economics program, and completed at least 48 credits of coursework, and passed required doctoral exams, and permission of dissertation advisor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

ECON 999 is graded on the Satisfactory/No Credit scale. (p. 82)

Education (EDUC)

200 Level Courses

EDUC 203: Disability in American Culture. 3 credits. Examines disability, past and present, in American culture through changes in historical, political, legal and societal responses to people with disabilities. Analyzes the disability experience through social and behavioral science perspectives, including diversity, bioethical and human rights conceptualizations/constructs of disability. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Mason Core: Social/Behavioral Sciences (p. 137)

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

300 Level Courses

EDUC 300: Introduction to Teaching. 3 credits. Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines roles of teacher, nature of American schools, and potential contributions of students. Notes: Requires school-based field experience during course. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDUC 301: Educating Diverse and Exceptional Learners. 3 credits. Introduces psychological, sociological, educational, and physical aspects of diverse populations in today's schools for early and middle education. Emphasizes litigation and legislation pertaining to education of diverse populations. Notes: Requires school-based field experience during
course. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDUC 302: Human Growth and Development. 3 credits. Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines human development through life span with special emphasis on cognitive, language, physical, social, and emotional development of children. Emphasizes contemporary theories of human development and their relevance to educational practice. Notes: Requires school-based field experience during course. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDUC 303: Politics of American Education. 3 credits. Focus on the study of the American political system. Designed for students studying the American political system and students interested in careers in education. Explores how interactions between various levels and branches of government affect education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDUC 372: Human Development, Learning, and Teaching. 3 credits. Explores processes that influence intellectual, social, emotional, moral, ethical, and physical development of middle and high school students. Examines research and theories for understanding learning process. Notes: School-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDUC 511: Child and Adolescent Development in Global Contexts. 3 credits. Provides an introduction to teaching culturally & linguistically diverse and exceptional learners, includes analysis of human growth and development, an overview of psychology, and introduction to using technology across the curriculum. Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

EDUC 512: Teaching Elementary Social Studies in International Schools. 3 credits. Builds expertise in methods, including experiential and student-centered learning and developing comprehensive lessons plans to enhance teaching social studies in international PK-6 classrooms. Explores prospective teachers to critical issues and concerns in teaching social studies in the global classroom. Requires 20 hours of PK-6 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 400: In-Service Educational Development. 1-6 credits. Offered at request of school division or other educational agency. Notes: Content varies. May be repeated with permission of department, but no more than 6 credits in EDUC 695, 695, or 699 may be applied toward master’s degree. Offered by Graduate School of Education (p. 157). May be repeated within the term.

Schedule Type: Internship

Grading:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDUC 513:** *Teaching Elementary Math in International Schools.* 3 credits. Presents topics in school mathematics with particular emphasis on developing common PK-6 strands for application in international schools. Focuses on exploring, verifying, and explaining concepts using concrete materials. Requires 20 hours of PK-6 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** EDUC 511^B^.
^B^ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDUC 514:** *Teaching Elementary Science in International Schools.* 3 credits. Covers theory and practices of effective teaching of PK-6 science in international schools. Uses laboratory and discovery techniques to design essential science components and integrate them with other disciplines. Introduces design and implementation of activities for developing concepts solving problems, and strengthening thinking skills in PK-6 science. Requires 20 hours of PK-6 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDUC 511^B^, 512^B^, 513^B^, 537^B^ and EDRD 515^B^.
^B^ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDUC 516:** *Language Across the Elementary International School Curriculum.* 3 credits. Introduces current methods of teaching integrated language arts in elementary school settings (PK-6). Includes language and literacy development, second language acquisition, reading and writing in content areas, and children's literature. International focus considers needs of second-language learners in regular classroom settings. Requires 20 hours of PK-6 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDUC 511^B^, 512^B^, 513^B^, 537^B^ and EDRD 515^B^.
^B^ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDUC 520:** *Elementary Curriculum, Instruction, and Assessment in International Schools.* 3 credits. Addresses interrelationship of instruction, curriculum, and assessment in international schools. Includes review of research and effective practice. Requires 20 hours of PK-6 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDUC 511^B^, 512^B^, 513^B^, 537^B^ and EDRD 515^B^.
^B^ Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDUC 522:** *Foundations of Secondary Education.* 3 credits. Analyzes philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasizes applications to all disciplines taught in secondary schools. Examines current educational trends and issues in relation to sociology of secondary school settings. Notes: 15 hours school-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 537: Introduction to Culturally & Linguistically Diverse Learners. 3 credits.
Examines the ways intersections of race, ethnicity, language, socioeconomic status, gender, sexual orientation, and ability affect equity for PK-12 culturally and linguistically diverse (CLD) learners. Invites educators to interrogate ways that personal cultural identity and biases influence instructional and assessment practices with CLD learners and relationships with families. Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 539: Human Development and Learning PK-12. 3 credits.
Provides practicing teachers with foundations of psychological theory, research, and professional practice relating to development and learning in inclusive PK-12 classroom settings. Notes: School-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 542: Foundations of Education. 3 credits.
Examines the historical, philosophical, and sociological foundations of education as they relate to elementary schools, with a particular emphasis on teaching a culturally diverse population. Students will develop an understanding of the relationship between society and education. School-based field experience required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Elementary Education licensure program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 547: Scientific Inquiry and the Nature of Science. 3 credits.
Incorporates understanding about scientific knowledge in K-12 classrooms. Builds fundamental knowledge of scientific inquiry and the nature of scientific knowledge and skills to weave this knowledge explicitly in curriculum. Focuses on developing inquiry-based lessons for students to investigate science and assessing student understanding of science and the nature of science. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 543: Effective Collaboration for Teaching Diverse Learners in Secondary Social Studies. 3 credits.
Provides history-social studies candidates in secondary education with knowledge and skills necessary to meet the needs of diverse learners in the history-social studies classroom. Emphasizes teacher collaboration between general and special education teachers as an authentic model of practice. Notes: Taught concurrently and in close proximity with special education faculty teaching EDSE 662 to emphasize collaboration
between special education and general education teachers. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 595: Perspectives on Exceptl Tching. 3 credits.**
Provides an opportunity for pre-service and in-service teachers to interact with young people and teachers in a range of school settings, exploring and documenting their points of view on teaching using a range of methods and visual and technology-oriented media and interview procedures. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 597: Special Topics in Education. 1-6 credits.**
Provides advanced study on selected topic or emerging issue in American or international education. Notes: May be repeated for credit with GSED permission. Offered by Graduate School of Education (p. 157). May be repeated within the term.

**Recommended Prerequisite:** Admission to program in Graduate School of Education.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**600 Level Courses**

**EDUC 606: Education and Culture. 3 credits.**
Uses cultural inquiry process (CIP) and web site to acquire cultural, social, and language-related perspectives on educational processes; and teaches skills to analyze educational settings and expand strategies to address puzzlements in students' own practice. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
**Required Prerequisites:** EDUC 612B- and 613B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDUC 612: Inquiry into Practice. 2 credits.**
Provides experience using research skills to foster systematic and thoughtful inquiry into classroom practice. Explores relevant classroom practice issues through critical writing, action, and research. Emphasizes cultural diversity and gender issues in research. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, ASTL-Foreign Languages/French,
ASTL-Foreign Languages/ Spanish, Gifted Child Education, ASTL - History, ASTL-Instructional Technology, ASTL - Lit Reading Specialist, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - LIT PK12 Clsr Conf Teachers, ASTL-Physical Education, ASTL - Science, ASTL-Teacher Leadership, Curriculum and Instruction or Dsgnng DgIt Lrning in Schools.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 613: How Students Learn. 3 credits.
Advanced course in study of learning based on research and theory from different disciplines. Focuses on increasing students’ learning through study of different learning systems, and understanding each learner in context of learning process itself. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum of 6 credits.

Registration Restrictions:
Required Prerequisite: EDUC 612B*. 
B* Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 614: Designing and Assessing Teaching and Learning. 2 credits.
Explores design and development of curricular, pedagogical, and assessment strategies responsive to needs and interests of students. Investigates factors that affect teaching and learning, and examines multiple ways of knowing that teachers bring to classrooms. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum of 6 credits.

Registration Restrictions:
Required Prerequisites: EDUC 612B* and 613B*.
* May be taken concurrently.
B* Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 615: Educational Change. 2 credits.
Explores influences on educational change at classroom, school, community, state, and national levels. Investigates implications of factors and influences that affect educational change. Analyzes influences and factors, and involves students in reflecting on their own experiences. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDUC 612B*, 613B*, 614B* and 606B*.
* May be taken concurrently.
B* Requires minimum grade of B-.

Enrollment limited to students with a major in ASTL-Alternative Education, ASTL-Early Childhood Educ, Gifted Child Education, ASTL - History, ASTL-Instructional Technology, ASTL - Literacy/Reading, ASTL - Mathematics, ASTL-NBPTS Preparation Core, ASTL - Science or Curriculum and Instruction.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 621: Teaching and Learning in the International Baccalaureate Program. 3 credits.
Focuses on principles and practices of the International Baccalaureate, organized around four areas of inquiry curriculum processes, teaching & learning, assessment, and professional learning. Requires 20 hours of PK-12 classroom fieldwork. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a concentration in Tchng Clt Lng Div Excp! Lrn.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)
EDUC 622: Curriculum Development across IB Programs. 3 credits.
Explores the development of practical knowledge about the design and structure of the IB programs’ curricula. Provides a foundation for understanding how the programs are implemented and how student learning developed within them is assessed. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Corequisite: EDUC 621

Registration Restrictions:
Enrollment is limited to students with a concentration in ASTL- Adv Intl Baccalaureate or Tchng Clt Lng Div Excpnl Lrn.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 623: Models and Strategies for Teaching and Learning in IB Schools. 3 credits.
Focuses on the development of the capacity of teachers in IB schools to adopt appropriate teaching strategies and techniques instrumental in ensuring program learning outcomes are achieved. Furthermore, participants develop a deep understanding of the critical relationship between teaching and learning. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDUC 621B, 622B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree, Undergraduate or Washington Consortium level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 624: Assessment and Learning in IB Schools. 3 credits.
Explores the essential role of assessment in teaching IB learners. Addresses formative and summative assessment practices as an integral part of the IB curriculum as well as the use of assessment for differentiation and planning. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Corequisite: EDUC 623

Registration Restrictions:
Required Prerequisites: EDUC 621B, 622B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 626: Inquiry into Action: IB Teachers, Learners, and Schools. 3 credits.
Uses the action research and qualitative process to help educational practitioners plan and complete an action research study related to IB learners, teachers, or schools. Furthermore, the course examines the social, cultural, and ethical issues of conducting research with students. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDUC 621B, 622B, 623B, and 624B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 627: Contemporary Issues and Trends in IB. 3 credits.
Focuses on current IB research, trends, and issues as well as international, national, and state/provincial legislation concerning schools and the potential impact on IB schools. Participants are prepared as leaders and advocates for IB programs and their students. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to GSE, enrollment in FAST TRAIN IB certificate program and completion of EDUC 621, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 647: Critical Reflective Practice. 1.5 credit.
Engages students in a learning community of teachers to develop skills of critical reflection on professional practice. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 649: Critical Dialogue in Education. 1.5 credit.
Offers opportunity to develop critical dialogue and peer feedback skills focused on professional practice. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 651: Critical Theories and Pedagogies. 3 credits.
Explores critical theories and pedagogies experientially, including alternative assessments that address educational equity and access, power, and approaches for deepening our practice as citizens in a democracy. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 647.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 653: Technology and Learning. 3 credits.
Develops technological knowledge and skills to support teaching and learning and to sustain and enhance learning communities. Teachers explore and critique the possibilities and concerns of using technology in learning environments. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 647.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 655: Teacher Research Methods. 3 credits.
Introduces teacher research methods and situates them in relation to other research approaches. Emphasizes the understanding and use of various research methods as innovative approaches to teaching and learning. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 651 and EDUC 653.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 657: Teaching for Democracy and Social Justice. 3 credits.
Focuses on the research that supports teachers to create democratic classroom practices and to support PK-12 students in exercising civic rights. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 651 and EDUC 653.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 659: Teacher Leadership. 1.5 credit.
Engages learners in data gathering exercises toward articulating a leadership agenda in the context of PK-12 educational environments. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission into the MEd Curriculum and Instruction concentration in Teacher Inquiry, Development and Empowerment for Social Justice program (TIDES) cohort. Completion of EDUC 655 and EDUC 657.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 661: Teacher Empowerment and Policy. 1.5 credit.
Provides advanced study on a selected topic or emerging issue in American or international education with particular attention to developing policy solutions. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 655 and EDUC 657.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 663: Culturally Relevant Pedagogy. 3 credits.
Offers opportunity to view how language and culture shape realities, including perceptions of children as learners. Explores cultural constraints and transformative possibilities embedded within cultures. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 659.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 665: Teacher Inquiry in Practice I. 3 credits.
Builds further understanding of teacher research as teachers form and frame salient questions, examine the existing literature related to their questions, and take actions to improve teaching and learning. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 659.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 667: Teacher Inquiry in Practice II. 3 credits.
Builds on the teacher research project begun in Teacher Inquiry in Practice I as teachers continue to address their pedagogical questions, take actions to improve teaching and learning, gather, analyze and interpret multiple forms of data, and share their experience in communities of practice. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 663 and EDUC 665.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 669: Teaching and Learning in Practice. 3 credits.
Admission into the MEd Curriculum and Instruction concentration in Transformative Teaching program. Completion of the EDUC 663 and EDUC 665. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 663 and EDUC 665.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment is limited to students with a concentration in Transformative Teaching.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 671: Schools and Culture in the Future. 3 credits.
Focuses on relationship between schools and communities from the past to the future. Research-based education reform, ideas from futurists, and
ISTE technology standards influence teacher planning for students in the 21st century. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 522 and EDUC 670

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 672:** Human Development and Learning: Secondary Education. 3 credits.
Explores developmental issues associated with middle and high school students, and theories that provide basis for understanding learning process. Addresses implications for designing instruction and curriculum. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 674:** Assessing Learning and Teaching in the Secondary School Classroom. 3 credits.
Supports beginning teachers’ development and design of assessment practices for promoting student learning. Focuses on individual differences and classroom, teacher, school, and cultural factors that impact assessment; different types and purposes of assessment; and relationship of assessment to national and state standards. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 522 and advanced methods course.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction or Secondary Education Licensure.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 675:** Research in Secondary Education. 3 credits.
Links evidence of student learning to make informed instructional decisions. Engages students in critiquing various research paradigms, reviewing literature, and systematically collecting and interpreting evidence to improve practice. Facilitates completion of the M.Ed. exit requirement. Notes: All students enrolled in this course must be working daily in or have access to a classroom setting classroom setting, since the major course assignment involves a classroom-based teacher research project. The M.Ed. program exit requirement is completed in EDUC 675. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisite:** EDCI 790.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Curriculum and Instruction or Secondary Education Licensure.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 751:** Mentoring/Supervising Intern Teachers and Mentor Teacher Career Development. 3 credits.
Examines multiple roles of teachers as they mentor and supervise intern teachers in schools. Covers career development, leadership, and instructional roles and strategies. Designed to assist intern teachers in their first year, and provide quality career and staff development to their mentors. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 797:** Advanced Topics in Education. 1-6 credits.
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education. Notes: May be repeated for credit with GSED approval. Offered by Graduate School of Education (p. 157). May be repeated within the term.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.
Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

800 Level Courses

EDUC 800: Ways of Knowing. 3 credits.
Provides understanding of characteristic ways of knowing in various liberal arts disciplines while examining subject matter, scope, key concepts, principles, methods, and theories. Analyzes philosophical traditions underlying educational practice and research. Notes: Required course during first spring semester of study in the program. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD program.

Registration Restrictions:
Enrollment is limited to students with a major in Education.
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 802: Leadership Seminar. 3 credits.
Intensive study of leadership, emphasizing decision and change processes, and assessment and development of leadership skills. Notes: Required course during first semester of study in the program. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Education.
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 803: Teacher Preparation and Professional Development. 3 credits.
Explores research and current recommended practices related to teacher preparation and professional development. Provides opportunity for practical application with preservice or inservice teachers. Offered by Graduate School of Education (p. 157). May not be repeated for credit. Equivalent to ECED 803.

Recommended Prerequisite: Approval of instructor and acceptance to PhD program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 805: Research and Scholarship in Education. 2 credits.
Provides an intellectual framework for research and scholarship in education, including consideration of specific scholarship of CEHD faculty as representative of the range of educational scholarship that make up the educational research community. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Education.
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 815: Research Inquiries in International Education. 3 credits.
Focuses on the intersection of international education and research methodologies in educational settings. Students will delve into the construction, implementation, and impact of research in international settings or with an internationally-minded perspective. Through critical inquiry into practice, the course offers students the opportunity to develop more sophisticated understandings of the research process in international education settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 880 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 845: Multilingual Learners With Diverse Educational Needs. 3 credits.
Examines examine issues surrounding identification, assessment, and instruction of multilingual learners with diverse educational needs. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD Program in Education or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 850: The Study of Teaching. 3 credits.
Explores the history and development of the search for teaching effectiveness. The course will trace the various definitions of effectiveness and the methods created to assess effectiveness. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDRS 810.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
EDUC 851: Research on Teacher Education. 3 credits.
Explores the history and development of the search for effectiveness in
the preparation of preservice teachers and the continuing professional
development of practicing teachers. The students will examine the
substance and gaps in the study of the education of educators. Offered
by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDRS 810.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 852: Technology and Teacher Development. 3 credits.
Investigates the latest research and issues related to technology
integration in teacher education; includes research supporting the
incorporation of technology in staff development for in-service K-12
educators, as well as preservice university coursework. Offered by
Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 853: World Perspectives of Teacher Education. 3 credits.
Focuses on the cross-cultural analysis of current U.S. and internationally
based teacher preparation and continuing professional development
pedagogical models, policy reforms, and their historical contexts. Offered
by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to doctoral program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 854: Working in Schools: Spanning Boundaries/Expanding Roles. 3
credits.
Prepares future teacher educators and professional developers for
their work in K12 settings. Examines the principles of clinical field
experiences, the foundations of school-university partnerships, and the
roles/relationships of all stakeholders engaged in field-based teacher
preparation and teacher professional development. Offered by Graduate
School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students in the E1-PHD-EDHD or E1-PHD-EDUC
programs.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 856: STEM Education Research and Policy. 3 credits.
Examines research on science, technology, engineering, and mathematics
(STEM) education issues and education policy issues including the
rationale for STEM education, STEM education policy, models of STEM
schools in K-12 education, STEM education leadership, informal STEM
education, STEM curriculum and instruction, and research in STEM
education. Offered by Graduate School of Education (p. 157). May not be
repeated for credit.

Recommended Prerequisite: EDRS 810 (may also be taken concurrently).

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 870: Education Policy: Process, Context, and Politics. 3 credits.
Examines public policy decision-making in education at local, state,
and national levels, and its impact on education institutions, students,
and public. Focuses on theories and methodological approaches, and
resolution of competing policy arguments in political arena. Offered by
Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 871: Advanced Policy Issues in Education. 3 credits.
In-depth analysis of selected education policy issues. Focuses on issue
interactions and education-related policy actions by different levels of
government. Offered by Graduate School of Education (p. 157). May not
be repeated for credit.

Recommended Prerequisite: EDUC 870 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 872: Social Science Research and Education Policy. 3 credits.
Focuses on research base used to support education policy actions.
Focuses on analyzing strength of this research. Offered by Graduate
School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDRS 810,811, and 812 or permission of
instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
**EDUC 873: Education Policy: Comparative and International Perspectives.** 3 credits.
Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators in fostering social justice and global awareness. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to The PhD in Education program, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 874: The Achievement Gap.** 3 credits.
Focuses on achievement gap in schools. Students research and analyze gaps in student achievement related to race and ethnicity, limited English proficiency, family background, gender, poverty, and ableism, and practices designed to close the gap. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 870 (concurrent enrollment is also permitted) and admission to the PhD program.

**Registration Restrictions:**
Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 875: Contemporary and Emerging Issues in Education Policy.** 3 credits.
Focuses on identifying and analyzing factors that promote new initiatives in education policy agenda. Attention given to nontraditional sources of education policy initiatives. Notes: Must be admitted to PhD program. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 870 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 876: Teacher Development and Education Policy.** 3 credits.
Focuses on the impact of policy actions at the local, state, and national levels on teacher preparation and continuing professional development. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 870 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 877: Teacher Policy in Historic Perspective.** 3 credits.
Examines the history of policies pertaining to public school teachers in the United States. Evaluate and engage current policy debates by putting the past and present into conversation. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to The PhD in Education program, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 878: Intercultural Competence: Theory and Research Application to International Education.** 3 credits.
Explores and examines intercultural competence theory and research as a teaching and learning framework in international education. Emphasizes the comparison of alternative models of intercultural competence development, research paradigms using intercultural competence theory in international education, and empirical studies that examine and explore the use of intercultural competence theory in education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 880.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 879: Language and Second Language Acquisition Research in International Education.** 3 credits.
Examines the theoretical and historical role of language in international education, with special emphasis on the foundations and variables of second language acquisition. Focuses the role of language in cross-cultural and international contexts, the application of language acquisition theories and empirical studies globally. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 880.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 880: Introduction to International Education.** 3 credits.
Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators

**Recommended Prerequisite:** EDUC 880.
in fostering social justice and global awareness. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 881:** *Seminar in Bilingual Education: Policy.* 3 credits.
Examines historical development of education for language minority students in United States, including federal and state legislation and court decisions. Explores policy issues regarding administrative program models, instructional approaches, curricular reform, and assessment policies for language minority students developed in response to legal mandates, legislative decisions, and school reform movement. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 882:** *Second Language Acquisition: Theory, Research, and Practice.* 3 credits.
Examines the theoretical foundations of second language acquisition with focus on linguistic, anthropological, sociological, psychological, and educational research through theory and practice. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 883:** *Seminar in Sociocultural Theory.* 3 credits.
Explores and analyzes the theoretical contributions of sociocultural theory. Focuses on the growing body of contemporary research on literacy, equity in education and emancipatory teaching for diverse students. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to the PhD in Education program or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 885:** *History of Education in the United States.* 3 credits.
Examines the history of education in the United States and explores the social, political, cultural, and economic forces that have shaped reform initiatives. Uses history to engage questions around citizenship, equality, and democracy. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the PhD in Education program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 886:** *School Reform in the United States: Politics and Policies.* 3 credits.
Explores a broad range of reform initiatives shaping public education and examines the ways politics infuses education policy. Investigates the disciplinary and methodological frameworks scholars have used to study school reform. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to the PhD in Education program, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 887:** *Neighborhood, Community, Education Policy.* 3 credits.
Examines the history of education in the United States and explores the social, political, and economic policies and conditions and communities in the US. Focuses on understanding trends in the formation of neighborhoods and the development of American cities, schools, and communities. Examine the politics and policies of selected neighborhoods and communities through developing community development profiles and proposals. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD in Education program or with permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDUC 890:** *Doctoral Internship in Education.* 1-6 credits.
Interns work with appropriate staff member in cooperating school, school system, or other educational institution, agency, or setting. Notes: Requires 100 hours of on-site internship completed over at least a five-week period. Up to 6 credits of EDUC 890 may be applied toward PhD degree requirements. Offered by Graduate School of Education (p. 157). May not be repeated for credit.
Recommended Prerequisite: Admission to the PhD program and prior approval of the advisor and PhD director.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 892: Social Justice and Equity in International Education. 3 credits.
Examines ideological, cultural, and systemic structural inequities in various educational settings at national and international levels. Focuses on educational practices that promote equity and social change throughout the world. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDUC 880.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 893: Seminar in Educational Anthropology. 3 credits.
Examines theories and research from educational anthropology and educational sociology to clarify and address contemporary educational issues and concerns. Focuses on U.S. public schools, with comparative materials from other educational settings and societies. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD in Education program or permission of the instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 894: Seminar in Multicultural Education. 3 credits.
Examines knowledge base, policy issues, and curricular and instructional features of multicultural education in United States and other countries. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Ph.D. in Education program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 896: Special Topics in Education. 3 credits.
Explores selected topics in education across all doctoral specializations. Offered by Graduate School of Education (p. 157). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Admission to the PhD program and prior approval of advisor and PhD director.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDUC 897: Independent Study for the Doctor of Philosophy in Education. 1-6 credits.
Structured learning experience to extend and develop skills and knowledge relative to field of professional expertise. Offered by Graduate School of Education (p. 157). May be repeated within the term.

Recommended Prerequisite: Admission to the PhD program and prior approval of advisor and PhD director.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Special scale. (p. 82)

900 Level Courses

EDUC 994: Advanced Internship in Education. 3 credits.
Internship in setting related to student’s major area of study. Requires minimum of 100 hours completed over at least a five-week period. Each intern works with appropriate staff member in cooperating school, school system, or other educational institution or agency. Notes: Internship must be in setting that differs from regular employment. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD program and prior approval of advisor and PhD director.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDUC 998: Doctoral Dissertation Proposal. 1-6 credits.
Work on research proposal that forms basis for doctoral dissertation, under guidance of dissertation chair and doctoral committee. Notes: May be repeated, but no more than 6 credits of EDUC 998 may satisfy doctoral degree requirements. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 12 credits.
**Recommended Prerequisite:** Admission to candidacy in the PhD program, successful completion of the doctoral qualifying exam, and EDRS 810, 811, and 812 or their equivalents.

**Registration Restrictions:**
Enrollment is limited to students with a major in Education.

Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**EDUC 999: Doctoral Dissertation Research.** 1-9 credits.
Provides continued faculty assistance on individual basis to complete dissertation planned in EDUC 998 and initiate new projects. Notes: Requires successful completion of EDUC 998 and faculty approval of proposal. Offered by Graduate School of Education (p. 157). May be repeated within the degree.

**Recommended Prerequisite:** EDUC 998 and faculty approval of proposal.

**Registration Restrictions:**
Enrollment is limited to students with a class of Advanced to Candidacy.

Enrollment limited to students with a major in Education.

Enrollment limited to students in a Doctor of Philosophy degree.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**Education Instructional Technology (EDIT)**

**200 Level Courses**

**EDIT 201: Strategies for Online Learning Success.** 1 credit.
Helps students assess their readiness for online learning using effective strategies for online interaction and activities designed to promote successful online experiences. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**400 Level Courses**

**EDIT 401: Introduction to Learning Technologies.** 3 credits.
Provides an overview of the field of learning technologies, including its history, theoretical foundations, design processes, and technologies. Illustrates how learning technologies can be applied in a variety of teaching and training contexts including e-learning, educational software, instructional design, corporate training, and curriculum development. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EDIT 413: Technology, Society, and the Culture of Learning.** 3 credits.
Explores the relationship between technological change and education reform initiatives. Emphasis will be placed on the ways in which technological and social changes influence and shape the goals and outcomes of the K-12 educational process. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 300.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EDIT 426: Web Accessibility and Design.** 3 credits.
Provides instruction for accessible web design using HTML and existing authoring tools. Section 508 web accessibility standards and assistive technologies to access the computer will be explored. Notes: Class may be delivered via distance education. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**500 Level Courses**

**EDIT 504: Introduction to Educational Technology.** 3 credits.
Examines uses of and issues in educational technology. Explores curriculum integration of technology, and focuses on learning and using commercially available applications software. Notes: Field experience in public schools will be required during course. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDIT 526: Web Accessibility and Design.** 1-3 credits.
Develops understanding of principles of universal web design. Students apply this understanding by designing and developing accessible web site using web authoring tools. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
EDIT 530: Scripting and Programming. 2 credits.
Enables development of computer-based educational materials using widely known educational scripting language. Students explore basic authoring capabilities, and learn to apply those capabilities by designing and producing materials using commands, procedures, and functions of scripting language. Offered by Graduate School of Education (p. 157). May be repeated within the term for a maximum 10 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 561: Teaching with Telecommunications. 1 credit.
Develops expertise with various aspects of telecommunications tools, and models ways these tools can be used for personal learning and integration into teaching/learning process. Addresses e-mail, Internet, web, and online databases. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 562: Teaching with Databases. 1 credit.
Develops expertise with various aspects of databases, and models ways databases can be integrated into teaching and learning process. Focuses on strategies for searching, sorting, creating, and communicating with information, much of which is structured by variety of online and offline databases. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 563: Teaching with Graphics. 1 credit.
Explores various graphic programs available for constructing visual images. Addresses draw and paint programs, scanning and editing images, and using visual communication to support K-12 learning. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 564: Teaching with Web 2.0. 2 credits.
Develops expertise with social, cognitive, and learning implications of film, video, and television. Engages students in process of planning, storyboarding, and filming with video. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDIT 561.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 565: Teaching with Educational Software. 1 credit.
Explores variety of educational software, including simulations, problem-solving software, computational tools (calculators, probeware, LOGO, and spreadsheets), and drill-and-practice/ integrated learning systems. Emphasizes ways these programs support K-12 teaching and learning process. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 2 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)
EDIT 566: Teaching with Multimedia/Hypermedia. 2 credits.
Covers variety of hypertext/hypermedia and multimedia tools.
Emphasizes students' ability to use tools and then teach others. Covers
the ways integration of tools in K-12 curriculum support learning, and
difference between hypermedia and multimedia. Offered by Graduate
School of Education (p. 157). May be repeated within the degree for a
maximum 2 credits.

Recommended Prerequisite: EDIT 563.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 567: Teaching with Desktop Publishing. 2 credits.
Explores variety of publishing tools, including word processors,
desktop publishers, and idea processors. Emphasizes using tools to
communicate. Covers design and layout principles, appropriate use of
images to facilitate communication, and ways K-12 teachers can design
opportunities for students to learn concepts. Offered by Graduate School
of Education (p. 157). May be repeated within the degree for a maximum
2 credits.

Recommended Prerequisite: EDIT 563.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 568: Teaching with the Web. 2 credits.
Examines the various aspects of web-based learning and the ways these
tools can be integrated into the teaching/learning process. The course is
taught online. Offered by Graduate School of Education (p. 157). May not
be repeated for credit.

Recommended Prerequisite: EDIT 561.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 571: Visual Design and Applications. 1-3 credits.
Provides basic knowledge of the range of capabilities of available graphic
and visual design applications. Students learn to cultivate effective visual
design practices for creating instructional products. Offered by Graduate
School of Education (p. 157). May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 572: Digital Audio/Video Design and Applications. 1-3 credits.
Provides basic knowledge of the range of capabilities of available audio
and video design applications. Students learn to cultivate effective audio
and video design practices for creating instructional products. Offered by
Graduate School of Education (p. 157). May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 573: Project Management. 1-3 credits.
Explores project management principles and applications used to
manage, plan, and track large-scale, complex instructional design
projects. Offered by Graduate School of Education (p. 157). May be
repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
EDIT 574: Social Media and Digital Collaboration Applications. 1-3 credits.
Provides basic knowledge of the range of capabilities of available social networking, teleconferencing, and collaboration applications. Students learn to integrate the latest information and communication technologies into the creation of instructional products. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 575: e-Learning Design Applications. 1-3 credits.
Provides basic knowledge of available applications for creating, delivering, managing and tracking e-learning experiences. Students learn to create instructional products using the latest e-learning design applications. Notes: Content customized to particular software tool presented. Offered by Graduate School of Education (p. 157). May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 576: Mobile Learning and Applications. 1-3 credits.
Explores current best practices and techniques required to deliver effective learning content through mobile devices. Students learn pedagogical approaches to mobile learning as well as investigate various mobile platforms and applications. Offered by Graduate School of Education (p. 157). May be repeated within the term for a maximum 3 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 590: Educational Research in Technology. 3 credits.
Focuses on developing skills, insights, and understanding basics to performing research in the field of Instructional Design and Technology. Develops expertise in action research methodology, design, and implementation. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

600 Level Courses

EDIT 601: Instructional Design and Technology (IDT) Portfolio. 1 credit.
Enables students to create and publish digital portfolio that demonstrates effective and meaningful integration and synthesis of instructional design and technology concepts, principles, and competencies learned across program courses at mid-degree program point. Notes: To be taken at mid-degree program point with minimum 12 and maximum 15 credits. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Minimum of 12 credits and a maximum of 15 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 611: Innovations in e-Learning. 3 credits.
Explores leading-edge learning technologies and their integration into the e-learning design process. Hands-on activities focus on technology planning, selection, implementation, and evaluation utilizing instructional design best practices. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses
EDIT 701: Advanced Instructional Design and Technology (IDT) Portfolio. 1 credit.
Enables students to create and publish a digital portfolio that demonstrates effective and meaningful integration and syntheses of instructional design and technology concepts, principles, and competencies learned across program courses at end-degree program point. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: (EDIT 601B).
B Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 704: Instructional Technology Foundations and Theories of Learning. 3 credits.
Reviews practical and pedagogical issues related to design and development of technological instruction. Emphasizes investigating instructional design as a field and community of practice, and reviewing core learning theory constructs applicable to design of instructional technology. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 705: Instructional Design. 3 credits.
Helps students analyze, apply, and evaluate principles of instructional design to develop education and training materials spanning a wide range of knowledge domains and instructional technologies. Focuses on variety of instructional design models, with emphasis on recent contributions from cognitive science and related fields. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Teaching or Training Experience or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 706: Business of Learning Design and Technologies. 3 credits.
Explores the business issues underlying the selection, implementation and evaluation of technology-based learning interventions. Focuses on developing the skills necessary to improve performance and achieve measurable, positive change that supports an organization's strategic goals. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDIT 705 or instructor permission.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 710: Online Teaching Essentials. 1 credit.
Explores the essential concepts and skills to effectively teach online courses. Introduces the topics of designing and managing online courses, assessing online students’ knowledge and skills, facilitating online student collaboration and communication, and establishing a supportive online learning community. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 730: Advanced Instructional Design. 3 credits.
Provides students with the knowledge and skills for designing highly contextualized and engaging problem-solving learning environment using a grounded, theory-based design approach. Emphasizes the design of technology supported learning environments using a variety of pedagogical models. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDIT 705B or EDCI 705B.
B Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

EDIT 732: Analysis and Design of Technology-Based Learning Environments. 3 credits.
Enables design, implementation, and evaluation of technology-based education and training materials using advanced computer-based authoring tools. Offered by Graduate School of Education (p. 157). May not be repeated for credit.
Recommended Prerequisite: EDIT 730 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 750: Learning Technologies and Strategies for Innovation. 3 credits. Explores formal and non-formal learning technologies, models, theories, and strategies that support enterprise learning and performance. Assesses the potential of learning technologies to innovate the practice of the organization. Note: Should be taken in final year of degree work. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 751: Overview of Learning Analytics and Big Data. 3 credits. Explores the tools, technologies and methods for capitalizing on data stored in enterprise-wide information systems to support executive-level learning and performance support decision-making. Focuses on demonstrating the bottom line business value of learning through evidence-based talent needs. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to Executive Chief Learning Officer (ECLO) Certificate Program, or permission of advisor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 752: Design and Implementation of Technology-based Learning Environments. 3 credits. Students design and produce multimedia/hypermedia applications based on current theory and research in instructional design and cognitive science. Examines user needs, information models, structure, and media selection and uses to inform design and production of final project. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Required Prerequisite: (EDIT 732B). B Requires minimum grade of B.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 760: Blended and Online Teachers and Learners. 1 credit. Examines the attributes of teachers and K-12 learners with emphasis on attitudes, behaviors, and adaptations required by blended and online teachers and learners. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 761: Models of Blended and Online Learning. 2 credits. Provides opportunities for learners to identify, explore, and evaluate a range of educational models for K-12 blended and online learning. These include the flipped classroom, mentor-mentee dyad, group collaborative, synchronous, asynchronous, parent directed e-learning, mobile learning, and web-delivered instruction. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 762: Quality K-12 Blended and Online Learning. 1 credit. Examines and evaluates quality indicators for the design of blended and online learning pointing to the six major areas for consideration: instructor-learner, learner-learner, learner-content, learner-interface, learner-instructional strategies, and social presence. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 763: Tools for K-12 Blended and Online Learning. 2 credits. Examines tools that structure and support blended and online learning with particular emphasis on the unique affordances of each tool including tools for producing, delivering, and supporting blended and online learning. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDIT 764: Blended and Online Communication.** 3 credits.
Examines strategies to assess, respond to, and target blended and online communication. Develops expertise in questioning and listening, supporting self-regulation, and clarifying conceptual understanding. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDIT 765: Facilitating K-12 Blended and Online Learning.** 2 credits.
Develops expertise in facilitating and moderating blended and online learning to include synchronous and asynchronous environments, community building strategies, questioning strategies, prompting reflection, and facilitating conceptual understanding. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MED in Curriculum and Instruction Concentration in Blended and Online Learning in Schools.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDIT 766: Understanding Blended and Online Presence.** 2 credits.
Examines strategies to create teacher presence, to establish and express self, to promote learner-learner connections, and to compensate for situations where teacher-learner and learner-learner are separated. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDIT 767: Designing K-12 Blended and Online Learning.** 3 credits.
Develops frameworks for designing and structuring blended and online learning opportunities and emphasizes course content and learning outcomes, selection of appropriate online models, and organization of online lessons and courses, online learning tools, and assessment and evaluation strategies. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MED in Curriculum and Instruction Concentration in Blended and Online Learning in Schools.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDIT 768: K-12 Online Design I.** 1 credit.
Develops frameworks for designing and structuring online learning opportunities and emphasizes course content and learning outcomes, selection of appropriate online models, and organization of online lessons and courses online learning tools, and assessment and evaluation strategies. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MED in Curriculum and Instruction Concentration in Blended and Online Learning in Schools.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDIT 769: K-12 Online Design II.** 1 credit.
Focuses on the creation of online courses appropriate for K-12 learners and culminates in comprehensive design documents that detail goals, assessments, learning tools, and detailed scripts or documents ready for the production phase. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** Admission to MED in Curriculum and Instruction Concentration in Blended and Online Learning in Schools.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDIT 771: Overview of Digital Media.** 1-3 credits.
Provides overview of media and technology tools used in teaching, learning and training. Focuses on developing skills necessary to implement digital media approaches using a systematic design process. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 772: Virtual Worlds, Augmented Reality, and Gaming Applications. 1-3 credits.
Provides basic knowledge of available applications and platforms for creating contextually-based learning environments such as immersive virtual worlds, simulated worlds, alternate reality games, and massive multiplayer online role playing games for e-learning. Offered by Graduate School of Education (p. 157). May be repeated within the term.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 773: Human Computer Interface Design for Teaching and Learning. 3 credits.
Provides overview of human-computer interface issues related to instructional design of technology-centered learning environments. Examines continuum of human-computer feedback. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 780: Principles of School-Based Design. 3 credits.
Develops and applies a comprehensive set of digital design strategies appropriate for creating engaging learning opportunities for students in PreK-12 environments. Emphasizes school-based design principles, design processes, and design patterns at the intersection of technology, teaching, and learning. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Corequisite: EDIT 781.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 781: Designing for Information Using. 3 credits.
Explores ways in which PreK-12 teachers can design digital environments that connect learners' ability to search, sort, create, communicate, and synthesize information and information resources with learning activities. Emphasizes teachers' ability to design for digital citizenship and information use. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Corequisite: EDIT 780.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 782: Designing for Literacy. 3 credits.
Explores 21st century definitions of literacy related to multiple symbolic environments (e.g. visual, numeric, alphabetic). Examines the practice of design that integrates technology to promote literacy competence across media and across PreK-12 abilities and interests. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDIT 780 and EDIT 771.

Recommended Corequisite: EDIT 783.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 783: Designing for Problem Solving. 3 credits.
Examines problem solving as an educational goal, as a cognitive process, and as a series of strategies and habits of mind. Emphasizes and provides practice in the design of digital problem solving environments where technology affords opportunities at the intersection of content learning and problem solving. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDIT 780 and EDIT 781.

Recommended Corequisite: EDIT 782.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 784: Designing for Community Participation. 3 credits.
Explores the impact of social media, globalization, collaboration, and diversity as they influence, enable, and challenge learners' ability to participate in a variety of community settings. Emphasizes the practice of design strategies to prepare PreK-12 learners to use technology for learning and participating in varied and diverse communities. Offered by Graduate School of Education (p. 157). May not be repeated for credit.
Recommended Prerequisite: EDIT 782 and EDIT 783.

Recommended Corequisite: EDIT 785.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 786: Designing School-Based Digital Learning. 3 credits.

Develops frameworks for designing and structuring school-based digital learning. Emphasizes the interaction of design, technology, and content learning to influence teachers’ practice in service of PreK-12 learners’ abilities to problem solve, use information, participate productively in communities, become knowledgeable, and effectively communicate. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDIT 782 and EDIT 783.

Recommended Corequisite: EDIT 784.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 787: Design and Teacher Leadership. 3 credits.

Investigates how a design lens intersects with and informs PreK-12 teacher leadership and school-based learning initiatives. Examines a variety of PreK-12 teacher leadership roles and design-based leadership as an integral part of classroom, grade-level, school, and community practice. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: DDLS certificate or completion of MEd in Curriculum and Instruction Concentration: Integration of Technology in Schools or Equivalent.

Recommended Corequisite: EDIT 791.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 787: Teacher Leadership and Advocacy for Digital Learning. 3 credits.

Enables PreK-12 teacher leaders to support colleagues in the design of classroom and school-based digital learning. Explores advocacy as a strategy to engage colleagues and communities in the design of school-based initiatives related to teaching, learning, and technology. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDIT 782 and EDIT 783

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 789: Practicum in Instructional Technology. 1-6 credits.

Provides supervised practice in applying knowledge and skills of student’s chosen track through placement in appropriate work setting. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: EDIT 786.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDIT 789: Project Development Practicum I. 1-6 credits.

Engages students in the application of design and production process for the solution of learning challenges with particular emphasis on the design and development phase of the design process. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: EDIT 786.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 790: Practicum in Instructional Technology. 1-6 credits.

Provides supervised practice in applying knowledge and skills of student’s chosen track through placement in appropriate work setting. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: EDIT 786.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDIT 790: Project Development Practicum II. 1-6 credits.

Engages students in the application of design and production processes to the solution of learning challenges with particular emphasis on the implementation and evaluation phase of the design process. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: EDIT 786.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDIT 791: Advanced Topics in Education. 1-6 credits.

Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in
education. Notes: May be repeated for credit with CEHD approval. Offered by Graduate School of Education (p. 157). May be repeated within the degree.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

800 Level Courses

EDIT 801: Nature and Process of Design. 3 credits.
Examines multi- and cross-disciplinary perspectives on the nature and process of designing and developing learning technologies. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 802: Cognition and Technology: A Multidisciplinary Approach. 3 credits.
Examines learning interactions between cognition and technology using multiple disciplinary perspectives including, cognitive science, psychology, neuroscience, education, design theory, instructional design, technology design, anthropology, sociology, information science, philosophy, semiotics, and linguistics. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 803: Design-Based Research. 3 credits.
Provides an introduction to systematic cycles of design-based research in education. Applicable to all content domains to explore cycles of research within design, development and implementation of educational and training interventions. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDIT 801

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDIT 891: Design Research Independent Study. 1-9 credits.
Applies multiple design research cycles to an identified research problem to systematically test and improve technology-based product interventions or other curriculum/training strategies or materials in order to develop knowledge related to teaching, learning and/or training in context. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: EDRS 811, EDRS 812, and EDIT 803 or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDIT 895: Emerging Trends in Learning Technologies. 3 credits.
Covers selected emerging trends in learning technologies. Examines ways learning technologies provide infrastructure for creating, managing, and evaluating innovative types of teaching-learning environments. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Ph.D. program or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Education Leadership (EDLE)

400 Level Courses

EDLE 412: Schools and the Law. 3 credits.
Provides an extensive overview of legal and ethical issues in schools. In the course, students will review and analyze key legal and ethical principles, read court decisions, and examine federal and state statutes. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (EDUC 300C or L300).
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EDLE 420: Organization and Management of Schools. 3 credits.
Studies basic issues in leadership, organization, and governance of schools. Explores theories and models of leadership how leaders
conceptualize school organization, with an emphasis on distributed leadership in professional environments, systems thinking, and organizational change. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (EDUC 300<sup>C</sup> or L300).
<sup>C</sup> Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDLE 597: Special Topics in Education.** 1-6 credits.
Provides advanced study on selected topic or emerging issue in American or international education. Notes: May be repeated for credit with GSE permission. Offered by Graduate School of Education (p. 157). May be repeated within the degree.

**Recommended Prerequisite:** Admission to program in GSE.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**600 Level Courses**

**EDLE 610: Leading Schools and Communities.** 3 credits.
Examines critical functions of leadership and organizational management, complex decision making responsibilities of school executives, and constructive relationships between schools and communities. Incorporates historical, ethical, philosophical, and sociological foundations of American education and the impact of organizational structure on reform and student achievement. Practical and academic emphasis on leadership skill development and dispositions. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDLE 620<sup>B-</sup>, 690<sup>B-</sup> and 791<sup>IP</sup>.
<sup>B-</sup> Requires minimum grade of B-
<sup>IP</sup> Requires minimum grade of IP

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Education Leadership.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDLE 614: Managing Financial and Human Resources.** 3 credits.
Explores basic functions in financial and human resource management. Examines legalities, ethics, and politics of resource procurement and allocation. Provides experiences to help students better understand tasks typically performed by school leaders. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDLE 620<sup>B-</sup>, 690<sup>B-</sup> and 791<sup>IP</sup>.
<sup>B-</sup> Requires minimum grade of B-
<sup>IP</sup> Requires minimum grade of IP

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Education Leadership.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDLE 616: Curriculum Development and Evaluation.** 3 credits.
Examines the relationship of the written, taught, and tested curriculum and identifies critical leadership decisions that can positively impact student achievement. Identifies components of effective curriculum guides. Mini-document for personal use is constructed. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (EDLE 620<sup>B-</sup>, 690<sup>B-</sup> and 791<sup>IP</sup>).
EDLE 618: Supervision and Evaluation of Instruction. 3 credits.
Provides a theoretical and practical overview of the supervision and evaluation of instruction. Introduces the domains of supervision and inquiry into current issues and best practices in supervision. Uses a variety of interactive exercises to assist in the development of practical skills for using the clinical process and developmental approach to supervision. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDLE 620^B^, 690^B^ and 791^I^P^.
B^ Requires minimum grade of B.
I^ Requires minimum grade of IP.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.
Enrollment is limited to students with a major in Education Leadership.
Enrollment is limited to Graduate or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 620: Organizational Theory and Leadership. 3 credits.
Studies basic organizational theories and models of leadership and management. Emphasizes shared leadership in professional environments, communication skills, systems thinking, and personal and organizational change. Bridges theory to practical applications in educational settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Corequisite: Application to the Education Leadership program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 634: Contemporary Issues in Education Leadership. 3 credits.
Examines current and emerging issues and trends impacting education. Includes demographic shifts; globalization; technology; data-based decision making; inclusion of diverse learners in American schools; and recent research on student achievement when influenced by race, gender, and poverty. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.
Enrollment is limited to students with a major in Education Leadership.
Enrollment is limited to Graduate or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 635: Governance and the Independent School Boardroom. 3 credits.
Provides an overview of the best practices and workings of the independent school board and develops skills, insights, and understanding of how school heads/directors can "manage up" to accomplish their goals and objectives. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDLE 620 and EDLE 690.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 636: Adult Motivation and Conflict Management in Education Settings: A Case Study Approach. 3 credits.
Uses case studies and simulations to examine conflict mediation and resolution skills, and safety and security issues. Focuses on character and ethics education in schools, coaching and mentoring, and adult motivation to support positive behaviors in work settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.
Enrollment is limited to students with a major in Education Leadership.
Enrollment is limited to Graduate or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 690: Using Research to Lead School Improvement. 3 credits.
Develops skills, insights, and understanding of how leaders use research to improve schools, with emphasis on the use of assessment and research data to identify school improvement needs and to design school improvement projects. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDLE 620
B- Requires minimum grade of B-

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Education Leadership.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses

EDLE 770: Introduction to Education Leadership. 3 credits.
Introduces the study of education leadership, theoretical traditions in leadership studies, and scholarship on leadership and organizational change. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to Ph.D. in Education Program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 791: Internship in Educational Leadership. 3 credits.
Offers wide range of practical experiences and professional challenges in authentic educational settings. Activities emphasize strategic, instructional, organizational, political, and community leadership. Notes: Course must be taken in second term of program. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDLE 620 or EDSE 743 (may be taken concurrently).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

Enrollment is limited to students with a major in Education Leadership.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

EDLE 792: Internship in Independent School Leadership. 3 credits.
Offers a wide range of practical and professional experiences for aspiring and current school heads. Emphasizes strategic, instructional, organizational, political, and community leadership in the independent school context. Note: Course must be taken in the second term of program. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDLE 620.

Recommended Corequisite: EDLE 690.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

800 Level Courses

EDLE 801: Contemporary Organization Theory. 3 credits.
Engages students in the study of major organization theories that inform educational leadership research. Students use theory to help inform their own research interests. Students begin work on analytical literature review. Notes: May be taken as corequisite with EDLE 802. First in three-course sequence. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Ph.D. in Education program.

Recommended Corequisite: EDLE 802.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 802: Leadership and Decision Making. 3 credits.
Engages students in the study of major leadership and decision theories that inform educational leadership research. Students use theory to help inform their own research interests. Students begin work on analytical literature review. Notes: May be taken as corequisite with EDLE 801. Second in three course sequence. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDLE 801. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture
Recommended Prerequisite: EDLE 801, EDLE 802.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Emphasizes economic foundations of U.S. education, and evolution of school, district, and state leadership. Students complete work on analytical literature review. Notes: Third in a three-course sequence. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDLE 801, EDLE 802.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 813: Social and Political Forces in Education Leadership. 3 credits.
Examines the social and political forces that shape education in the United States and the effect of these forces on school leadership. Examines the social and political functions of schooling in the past and present. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to Ph.D. in Education Program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 815: Conceptual Frameworks in Education Leadership. 3 credits.
Introduces three different disciplinary perspectives on education leadership, and helps identify and articulate different conceptual frameworks. Major focus is designing a conceptual framework that informs research questions. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to the Ph.D. in Education Program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 816: Instructional Leadership-Curriculum Policy and Practice. 3 credits.
Focuses on curriculum and instruction theory, policy, and practice with research emphasis on instructional leadership. Students develop research proposals to investigate instructional leadership in schools and districts, and relate instructional leadership to their own specific research interests. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to Ph.D. in Education Program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 818: Instructional Leadership-Supervision Policy and Practice. 3 credits.
Introduces current topics and research in supervision and instruction, including theory and empirical work focused on instruction, teacher learning, teacher evaluation, and instructional leadership. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to Ph.D. in Education Program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDLE 895: Emerging Issues in Administration and Supervision. 3 credits.
Covers selected emerging issues in educational leadership. Students engage in research, study, discussion, and writing about various topics selected for study. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to PhD program, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Education.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Education Research (EDRS)

500 Level Courses

EDRS 531: Educational and Psychological Measurement. 3 credits.
Emphasizes techniques and principles used in the construction, administration, and quantification of measuring devices for evaluation purposes. Discusses interpretation of standardized tests of ability, aptitude, achievement, interest, and personality. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Appropriate methods and advanced methods courses. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
**EDRS 590: Education Research.** 3 credits.
Develops skills, insights, and understanding to perform research, with emphasis on interpreting and applying research results. Critiques research, and uses findings in educational settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDRS 620: Quantitative Inquiry in Education.** 3 credits.
Examines fundamental concepts and methods of statistics as applied to educational problems, including descriptive and inferential statistics. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 590 or equivalent experience.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDRS 621: Qualitative Inquiry in Education.** 3 credits.
Focuses on basic application of naturalistic research methods. Examines major theoretical frameworks and qualitative research techniques, which include content analysis, coding, and interpretation of data. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 590 or equivalent experience.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDRS 630: Educational Assessment.** 3 credits.
Examines research theory and practice relevant to assessments. Focuses on assessment strategies for students including developing skills to select, score, and interpret educational assessments. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDRS 631: Program Evaluation.** 3 credits.
Focuses on perspectives of existing and emerging issues, theories, and models of program evaluation. Involves implementation of program evaluation in related fields and school districts. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDRS 797: Advanced Topics in Education.** 1-6 credits.
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education. Notes: May be repeated for credit with CEHD approval. Offered by Graduate School of Education (p. 157). May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester
800 Level Courses

EDRS 810: Problems and Methods in Education Research. 3 credits.
Advanced course in interpreting and applying education research methods. Emphasizes comparison of alternative philosophies of research, ways of formulating questions and hypotheses, research plans, and analysis procedures. Students evaluate existing studies, and investigate a range of research approaches. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Required Prerequisite: Admission to the PhD program or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Education or Music Education.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDRS 811: Quantitative Methods in Educational Research. 3 credits.
Emphasizes advanced methods of conducting research using quantitative methods of data collection, and analysis appropriate for research in education. Includes design of experimental and quasi-experimental research studies, and methods of analysis appropriate to these studies, including analyzing variance and multiple linear regression. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Required Prerequisite: (EDRS 810 B-).
B- Requires minimum grade of B-.

Enrollment limited to students in the AR-PHD-MUE or E1-PHD-EDUC programs.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDRS 812: Qualitative Methods in Educational Research. 3 credits.
Teaches how to apply qualitative data collection and analysis procedures in educational research, including ethnographic and other field-based methods, and unobtrusive measures. Notes: Emphasizes vary depending on student interests and needs. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Required Prerequisite: (EDRS 810 B-).
B- Requires minimum grade of B-.

Enrollment limited to students in the AR-PHD-MUE or E1-PHD-EDUC programs.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDRS 818: Critical Discourse Analysis in Education Research. 3 credits.
Prepares students with a working knowledge of discourse analysis and its application to ethnographic and qualitative research in education. Focuses on critical discourse analysis as a resource to improve classroom interaction and transform educational practice and as an analytic tool for a social analysis of education in a wide variety of local, national and international education contexts and settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Required Prerequisite: EDRS 810 EDRS 811 EDRS 812 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Special scale. (p. 82)

EDRS 820: Evaluation Methods for Educational Programs and Curricula. 3 credits.
Explores development and types of current systems and models for evaluating educational programs and curricula. Emphasizes evaluation needs and problems of public and private elementary and secondary schools, and colleges and universities. Also considers needs of government agencies, industry, and health-related organizations. Notes: Prior completion of EDRS 811 and 812 helpful but not required. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Required Prerequisite: EDRS 810 B-.
B- Requires minimum grade of B-.

Enrollment limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDRS 821: Advanced Applications of Quantitative Methods. 3 credits.
Advanced study of applications of quantitative methods in educational research, reinforcing and building on concepts and skills acquired in EDRS 811. Uses modular approach, and provides advanced study of techniques appropriate to survey research, group-experimental and quasi-experimental research, selected multivariate procedures and factor analysis, and quantitative synthesis (meta-analysis) of research. Combines text reading assignments, critiques, and discussion of relevant journal articles; and application activities. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Required Prerequisite: EDRS 810 B- and 811 B-.
B- Requires minimum grade of B-.

Enrollment limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
EDRS 822: Advanced Applications of Qualitative Methods. 3 credits.
Advanced seminar devoted to study of current topics in qualitative research. Deals with cutting-edge information on selected advanced topics in qualitative research, and provides opportunities to apply new skills and knowledge to projects related to students’ interests. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDRS 810B and 812B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDRS 823: Advanced Research Methods in Single Subject/Case Design. 3 credits.
Prepares students to conduct research using single subject design and single case study design. Provides understanding of salient features as well as advantages, disadvantages of these research methodologies. Students critique and analyze published research using these methodologies. Provides opportunities to apply these methodologies to research questions related to student interests. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDRS 810B, 811B, and 812B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDRS 824: Mixed Methods Research: Integrating Qualitative and Quantitative Approaches. 3 credits.
Advanced research seminar that integrates qualitative and quantitative approaches, methods, and data in a single study. The course covers the paradigms and “mental models” that inform both approaches, and the ways in which qualitative and quantitative goals, questions, methods, and interpretive strategies can be productively combined. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDRS 810B, 811B, and 812B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDRS 825: Advanced Research Methods in Self-Study of Professional Practice. 3 credits.
Prepares students to conduct research using the self-study research methodology, a qualitative research approach for systematically examining one’s practitioner role for improvement-aimed purposes with contributions to the educational field and knowledge base. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: Admission to PhD in Education program.

Registration Restrictions:
Required Prerequisites: EDRS 810B, 811B, and 812B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDRS 826: Qualitative Case Study Methods. 3 credits.
Advanced research seminar on qualitative case study design and application in educational research. Topics include descriptive, theoretical, evaluation, and policy case study design and methods. Students will conduct and critique a case study appropriate to their discipline. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDRS 812B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDRS 827: Introduction to Measurement and Survey Development. 3 credits.
Develops knowledge and skills related to measurement and survey development and use in research for education, psychology, and related fields. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDRS 811B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Graduate.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDRS 828: Item Response Theory. 3 credits.
Develops knowledge and skills related to Item Response Theory with application in the context of education, psychology, and related fields. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: EDRS 821B or 827B.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.
**EDRS 830: Hierarchical Linear Modeling.** 3 credits.
Analyzes nested data structures (e.g. students within classrooms) as well as student growth. Students will learn through reading assignments, lecture and applications using a computer program for data analysis. Students will be expected to critically read multilevel methods used in published research, analyze data, and provide written report of results in APA format. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Registration Restrictions:**
**Required Prerequisite:** EDRS 821B-.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

**EDRS 831: Structural Equation Modeling.** 3 credits.
Focusing on the development of knowledge and skills related to structural equation modeling and research applications in education, psychology, and related fields. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDRS 832: Document Analysis and Archival Research.** 3 credits.
Examines the methodological foundations of and analytical approaches to document-based research. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDRS 833: Participatory Action Research.** 3 credits.
Explores theoretical concepts associated with participatory action research and teaches how to apply participatory data collection and analysis procedures in educational research. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** EDRS 812B-.
B- Requires minimum grade of B-.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDRS 836: Narrative Inquiry.** 3 credits.
Teaches theory behind narrative inquiry and application of narrative data collection and analysis procedures in educational research. Builds students' abilities to conduct narrative data collection and analysis. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 812.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDRS 850: Grounded Theory.** 3 credits.
Prepares students to apply and critique grounded theory and related methods. Includes various approaches to design with particular attention to analysis techniques and theoretical selection, sensitivity, and saturation. Recommends students obtain IRB approval prior to beginning this course. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDRS 822.

**Registration Restrictions:**
Enrollment is limited to students with a major in Qualitative Research.

**Schedule Type:** Research

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)
EDRS 897: Special Topics in Research Methods. 3 credits.
Develops knowledge and skills of selected advanced research methods
topic(s). Offered by Graduate School of Education (p. 157). May be
repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students in the E1-PHD-EDHD or E1-PHD-EDUC programs.
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

Educational Psychology (EDEP)

300 Level Courses

EDEP 350: Perspectives on Achievement Motivation. 3 credits.
Focuses on theories and concepts of human achievement motivation;
and examines strategies, techniques and interventions that promote and
sustain motivation in formal and informal learning contexts. Offered by
Graduate School of Education (p. 157). May not be repeated for credit.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

400 Level Courses

EDEP 405: The Neuroscience of Learning and Cognition. 3 credits.
Focuses on research regarding the development of cognitive processes
in children and adults of various ages, their neurobiological substrates,
and the imaging technology used to explore the functioning brain. Offered
by Graduate School of Education (p. 157). May not be repeated for credit.
Equivalent to EDEP 655.

Recommended Prerequisite: Junior standing or sophomore honors/
university scholar candidate.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

500 Level Courses

EDEP 550: Theories of Learning and Cognition. 3 credits.
Explores theoretical perspectives on learning and cognition, and relation
of these theories to construction of learning environments, student
motivation, classroom management, assessment, and technology to
support teaching and learning. Offered by Graduate School of Education
(p. 157). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDEP 551: Principles of Learner Motivation. 3 credits.
Focuses on theories and concepts of human motivation; and examines
strategies, techniques, and interventions that promote and sustain
learner motivation. Offered by Graduate School of Education (p. 157).
May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDEP 591: Data-Driven Decision Making for Continuous Educational
Improvement. 3 credits.
Provides an intellectual and practical framework for creating and
understanding formative and summative assessments of student
performance. Emphasis is placed on the learning principles, cognitive
processes, and psychometric models as they pertain to assessment
issues. Offered by Graduate School of Education (p. 157). May not be
repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EDEP 592: Data-Driven Decision-Making: Development of Assessments. 3
credits.
Focuses on strategies to design assessments for students and schools
with a particular emphasis on developing and using assessment
methods to inform instructional decisions. Offered by Graduate School of
Education (p. 157). May not be repeated for credit.

Recommended Prerequisite: EDEP 591-may be taken concurrently.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy,
Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level
students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 593: Data-Driven Decision Making: Analysis and Interpretation of Assessment Data.** 3 credits.
Focusing on the development of knowledge and skills related to analyzing and interpreting educational assessment data. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDEP 592.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 594: Data-Driven Decision-Making Application in Education Contexts.** 3 credits.
Applies fundamental knowledge of assessment using team-based projects. Incorporates development of assessments and the analysis, interpretation, and reporting of assessment data to inform curriculum and instruction based on the context-specific needs of educators. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDEP 593.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDEP 597: Special Topics in Educational Psychology.** 1-3 credits.
Covers critical current and emerging issues in educational psychology across the span of human development with an emphasis on research methodology and evidence-based practice. Offered by Graduate School of Education (p. 157). May be repeated within the term for a maximum of 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

**EDEP 601: Creativity and Cognition in the Arts and Media.** 3 credits.
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit. Equivalent to AVT 606.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 632: Human Development.** 3 credits.
Examines the course of human development from early childhood to adulthood within the context of educational psychology. Emphasizes principles of research in human development and the major areas of cognitive, linguistic, and social contexts of development as they pertain to learners in schools and beyond. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 650: High-Stakes Assessment and Accountability Systems.** 3 credits.
Focuses on school effectiveness, assessment tools, and accountability models on state and national levels. Explores issues and methods relevant to educational policy, standardized testing, and classroom assessment. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 652: Process of Learning and Development.** 3 credits.
Explores different theoretical perspectives on learning and development. Focuses on historical and contemporary theories of learning and cognitive development, and examines current research and its application in educational settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDEP 550.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 653: Culture and Intelligence.** 3 credits.
Explores different theoretical perspectives on intelligence as they relate to individual and cultural differences. Examines issues related to heritability and measures of intelligence, and intelligence in the cultural context. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 654: Learning, Motivation, and Self-Regulation.** 3 credits.
Focuses on theories and research on self-regulation of academic learning. Presents multidimensional conceptual framework for studying and applying self-regulation in educational contexts. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDEP 550, 551.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 655: The Neuroscience of Learning and Cognition.** 3 credits.
Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain. Offered by Graduate School of Education (p. 157). May not be repeated for credit. Equivalent to EDEP 405.

**Recommended Prerequisite:** EDEP 550

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**700 Level Courses**

**EDEP 798: Directed Inquiry in Educational Psychology.** 1-3 credits.
Offers a capstone experience to students after completion of majority of program coursework with the exception of 6 credit hours. Enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Project mentor approval and completion of coursework in the MS in Educational Psychology exclusive of 6 credit hours.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**EDEP 799: Thesis in Educational Psychology.** 1-3 credits.
The thesis is based on original research. It enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology. Offered by Graduate School of Education (p. 157). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Thesis chair approval and completion of coursework in the MS in Educational Psychology exclusive of 6 credit hours.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

### 800 Level Courses

**EDEP 820: Teaching, Learning, and Cognition.** 3 credits.
Focuses on foundational educational psychology theories including cognitive, social, and constructivist themes and their implications for improving instructional practices and learning at all developmental levels and content areas. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 800, EDUC 805, EDLE 802, and EDRS 810.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 821: Sociocultural Processes in Learning, Instruction, and Motivation.** 3 credits.
Examines processes by which social, cultural, and linguistic variables influence human behavior. Focuses on differences within and between cultural groups related to student’s learning and achievement in educational settings. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDUC 800, EDUC 805, EDLE 802, and EDRS 810.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 823: Teaching, Learning, and Cognition.** 3 credits.
Focuses on foundational educational psychology theories including cognitive, social, and constructivist themes and their implications for improving instructional practices and learning at all developmental levels and content areas. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDEP 820, 821, and 822.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EDEP 824: Research Project in Educational Psychology: Sequence II.** 3 credits.
Focuses on development and implementation of research studies in educational psychology. Students acquire skills regarding collecting, analyzing, and interpreting data. Notes: Second in two course sequence. Offered by Graduate School of Education (p. 157). May not be repeated for credit.

**Recommended Prerequisite:** EDEP 823.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

### Electrical and Computer Engineering (ECE)

#### 100 Level Courses

**ECE 101: Introduction to Electrical and Computer Engineering.** 3 credits.
Introduces fundamental concepts in Electrical and Computer engineering and provides insight to the various careers in each field. Both theory and practical applications of electronic components are covered through examples of real world applications. Topics are reinforced through hands-on laboratory experiments. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

#### 200 Level Courses

**ECE 201: Introduction to Signals and Systems.** 3 credits.
Provides an introduction to key concepts for the description and analysis of signals and systems with an emphasis on discrete-time signals and systems. Specific topics include sinusoidal and complex exponential signals, sampling, spectrum representation of signals via DTFT and DFT, system properties, convolution, impulse response and frequency response. The associated computer lab provides opportunities to apply
ECE 220: Continuous-Time Signals and Systems. 3 credits.
Introduction to the processing and analysis of continuous-time signals and systems in the time-domain via differential equations and in the transform-domain using Laplace and Fourier transforms. Specific topics include the frequency response of LTI systems, Bode plots, system functions, block diagrams, filter design, and a rigorous treatment of sampling and aliasing. Includes applications to communications, circuits, control, and signal processing. Students must register for lecture, lab, and recitation. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts. Equivalent to BENG 220.

Specialized Designation: Discovery of Scholarship

Registration Restrictions:
Required Prerequisites: ECE 201\textsuperscript{C}, ENGR 107\textsuperscript{C} and MATH 203\textsuperscript{C} and (MATH 214\textsuperscript{C} or 216\textsuperscript{C}).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECE 285: Electric Circuit Analysis I. 3 credits.
Covers the first half of electric circuit theory and practice. Topics include DC analysis of circuits including Ohm's and Kirchhoff's laws, Thevenin and Norton equivalents, and analysis of circuits with resistors, capacitors, inductors, and operational amplifiers. Includes lab experiments to reinforce topics covered in the course. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

Specialized Designation: Scholarly Inquiry

Registration Restrictions:
Required Prerequisites: (PHYS 260\textsuperscript{C} and 261\textsuperscript{C}) and (MATH 214\textsuperscript{C} or 216\textsuperscript{C}).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECE 286: Electric Circuit Analysis II. 3 credits.
Covers the second half of electric circuit theory and practice. Topics include AC analysis of circuits including phasors, frequency response, power analysis, and transformers. Includes a project and lab experiments to reinforce topics covered in the course. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

Specialized Designation: Scholarly Inquiry

Registration Restrictions:
Required Prerequisites: ECE 285\textsuperscript{C} and (MATH 214\textsuperscript{C} or 216\textsuperscript{C}).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

300 Level Courses

ECE 301: Digital Electronics. 3 credits.
Introduces digital systems, circuits, and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, coding and multiplexing, multivibrators, shift registers, counters, A/D converters, and elementary computer architecture. Notes: Not intended for those majoring in electrical or computer engineering. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts. Equivalent to CYSE 301.

Registration Restrictions:
Required Prerequisites: MATH 125\textsuperscript{C}, 114\textsuperscript{C}, IT 102\textsuperscript{C} or MATH 116\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Students with a class of Freshman may not enroll.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECE 305: Electromagnetic Theory. 3 credits.
Static and time varying electric and magnetic fields, dielectrics, magnetization, Maxwell's Equations, and introduction to transmission lines. Course uses vector calculus and algebra of complex numbers. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (MATH 214\textsuperscript{C} or 216\textsuperscript{C}) and PHYS 260\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECE 320: Signals and Systems II. 3 credits.
Second of two-semester sequence providing mathematical background for many ECE courses taken in junior, senior years. Provides methods of representing and analyzing discrete-time signals and systems. Studies effects of converting from continuous-time to discrete time, and presents
Z-transform as convenient analysis tool. Emphasizes powerful concept of frequency response of systems developed in first semester. Presents application examples from communications, circuits, control, and signal processing. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts. Equivalent to BENG 320.

**Specialized Designation:** Scholarly Inquiry

**Registration Restrictions:**
- **Required Prerequisites:** (ECE 220<sup>C</sup>) and (MATH 203<sup>C</sup>).
- C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 330:** *Circuit Theory.* 3 credits.
This course introduces circuit analysis and design for non-ECE majors. Students develop an understanding of circuit analysis concepts such as nodal, mesh, and source transformation. Circuits with inductors, capacitors, resistors, and operational amplifiers are analyzed. Two projects are designed and built by students. A circuit simulation environment is used to simulate and analyze circuits. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**
- **Required Prerequisites:** PHYS 260<sup>C</sup>, 261<sup>C</sup> and MATH 214<sup>C</sup> and (MATH 203<sup>C</sup> or ME 351<sup>C</sup>).
- * May be taken concurrently.
- C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 331:** *Digital System Design.* 3 credits.
Covers principles of digital logic and digital system design and implementation in VHDL. Topics include number systems; Boolean algebra; analysis, design, and minimization of combinational logic circuits; analysis and design of synchronous and asynchronous finite state machines; and introduction to VHDL and behavioral modeling of combinational and sequential circuits. Notes: ECE 332 should be taken concurrently with ECE 331. Credit may not be received for ECE 301 and 331. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**
- **Required Prerequisites:** (PHYS 260<sup>C</sup> and 261<sup>C</sup>) and (ECE 332<sup>C</sup>).
- * May be taken concurrently.
- C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 332:** *Digital Electronics and Logic Design Lab.* 1 credit.
Lab associated with ECE 331. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Recommended Corequisite:** ECE 331.

**Registration Restrictions:**
- **Required Prerequisites:** (PHYS 261<sup>C</sup> or 265<sup>C</sup>).
- C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 333:** *Linear Electronics I.* 3 credits.
Principles of operation and application of electron devices and linear circuits. Topics include semiconductor properties, diodes, bipolar and field effect transistors, biasing, amplifiers, frequency response, operational amplifiers, and analog design. Notes: ECE 334 is usually taken concurrently with ECE 333. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Specialized Designation:** Writing Intensive in the Major

**Recommended Corequisite:** ECE 286 (required only if ECE 285 is taken).

**Registration Restrictions:**
- **Required Prerequisites:** (ECE 280<sup>C</sup>) or (ECE 285<sup>C</sup>).
- C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 334:** *Linear Electronics Lab I.* 1 credit.
Lab associated with ECE 333. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Recommended Corequisite:** ECE 286 (required only if ECE 285 is taken).

**Registration Restrictions:**
- **Required Prerequisites:** (PHYS 260<sup>C</sup> or 265<sup>C</sup>).
- C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
ECE 350: Embedded Systems and Hardware Interfaces. 3 credits.
This course introduces embedded systems design through project-based activities. The platform runs on Linux and students design their own IoT (Internet of Things) system as well as demonstrate dashboards with cloud-based data. Hardware interfaces and several types of sensors and actuators are incorporated as part of the projects. Students also learn how to simulate and test signal-conditioning circuits, eventually integrating those as part of their projects. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CS 222\(^C\) and (ECE 280\(^C\), 285\(^C\) or BENG 380\(^C\)) and (ECE 301\(^C\) or (ECE 331\(^C\) and 332\(^C\))).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECE 370: Robot Design. 3 credits.
Introduces the concept of robot design and implementation. The focus will be on electrical design philosophies, mechanical design philosophies, and controller design. Assignments are heavily based on the design, simulation and implementation of real-world robotic applications. Assessments are primarily in project form and make use of 3D printing and other manufacturing techniques. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ECE 220\(^C\) and CS 222\(^C\) and (ECE 280\(^C\), 285\(^C\) or BENG 380\(^C\)) and (ECE 301\(^C\) or (ECE 331\(^C\) and 332\(^C\))).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECE 390: Embedded Systems and Hardware Interfaces. 3 credits.
This course introduces embedded systems design through project-based activities. The platform runs on Linux and students design their own IoT (Internet of Things) system as well as demonstrate dashboards with cloud-based data. Hardware interfaces and several types of sensors and actuators are incorporated as part of the projects. Students also learn how to simulate and test signal-conditioning circuits, eventually integrating those as part of their projects. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CS 222\(^C\) and (ECE 280\(^C\), 285\(^C\) or BENG 380\(^C\)) and (ECE 301\(^C\) or (ECE 331\(^C\) and 332\(^C\))).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ECE 392: Engineering Design Studio. 1 credit.
Identification and feasibility study of advanced engineering problems. Application of math, physics and engineering methods to challenging projects. Preliminary design, modeling, simulation and prototyping of projects. This course should be taken the semester preceding ECE/
Discusses use of microcomputers in control systems. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisite:** ECE 421\(^C\).

\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 429: Control Systems Lab.** 1 credit. Laboratory experiments for topics in control systems analysis, design, and implementation with emphasis on using microcomputers. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisite:** ECE 421\(^C\).

\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Laboratory

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 430: Principles of Semiconductor Devices.** 3 credits. Introduces solid-state physics and its application to semiconductors and semiconductor devices. Topics include band theory, doping, p-n junctions, diffusion theory, low-frequency circuits, devices including bipolar transistor, MOSFET, CMOS, and photo transistors. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** ECE 333\(^C\) and 305\(^C\) and (MATH 214\(^C\) or 216\(^C\)).

\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 431: Digital Circuit Design.** 3 credits. Analysis and design of CMOS digital integrated circuits. Topics include: MOSFET transistor design equations for "hand" analysis and models for computer (SPICE) simulations; static and dynamic characteristics of inverters; fabrication, mask layout, and simulation; static and dynamic CMOS, pass transistor and transmission gate integrated circuit styles; combinational and sequential integrated circuits; semiconductor memory cell types and memory cell arrays. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** ECE 331\(^C\) and 333\(^C\).

\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 433: Linear Electronics II.** 3 credits. Second course in linear electronics. Covers differential amplifiers, feedback circuits, power amplifiers, feedback amplifier frequency response, analog integrated circuits, operational amplifier systems, oscillators, wide band and microwave amplifiers, and computer-aided design. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** ECE 286\(^C\) and 333\(^C\).

\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 434: Linear Electronics II Laboratory.** 1 credit. Second lab course in linear electronics involving analysis and design of topics listed in ECE 433. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** ECE 334\(^C\) and 433\(^C\).

\(^C\) May be taken concurrently.

\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Laboratory

**Grading:**

This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 435: Digital Circuit Design Laboratory.** 1 credit. Lab experiments for topics covered in ECE 431. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Recommended Corequisite:** ECE 431.

**Registration Restrictions:**

**Required Prerequisite:** ECE 334\(^C\).

\(^C\) Requires minimum grade of C.
Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Laboratory  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**ECE 445: Computer Organization.** 3 credits.  
General overview of operating a digital computer. Topics include computer arithmetic, arithmetic unit, hardwired and microprogrammed control, memory, register-to-register, input-output operations, and behavioral modeling of computer organization using VHDL. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts. Equivalent to INFS 515.

**Registration Restrictions:**  
**Required Prerequisites:** (ECE 331\textsuperscript{C} and 332\textsuperscript{C}) and (CS 262\textsuperscript{C} or 222\textsuperscript{C}). \textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Laboratory, Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**ECE 446: Device Driver Development.** 3 credits.  
Addresses device driver and kernel level software programming and development. The C programming language and program trouble shooting are reviewed. Basics of device driver software, Character driver operations and data structures, concurrency and race conditions, kernel timers, memory allocation, communications with hardware, interrupt handling, kernel data types, memory mapping and Direct Memory Access concepts are explored. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**  
**Required Prerequisite:** (ECE 445\textsuperscript{C}). \textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**ECE 447: Single-Chip Microcomputers.** 4 credits.  
Explores designing with single-chip microcomputers and microcomputer interfacing. Topics include role of microcomputers compared with microprocessors and other computers, microcomputer architecture and organization, real-time control issues, assembly language programming for control, design of control software, input/output methods, design tools, and available single-chip microcomputers. Students select project and design, and construct system including single-chip microcomputer and ancillary hardware to implement control system. Notes: This course is highly recommended for ECE 492/493 students interested in using microcontroller technology in their senior design projects. It should be taken before ECE 493. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**  
**Required Prerequisites:** ECE 445\textsuperscript{C} and (CS 222\textsuperscript{C} or 367\textsuperscript{C}). \textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**ECE 448: FPGA and ASIC Design with VHDL.** 4 credits.  
Practical introduction to modeling of digital systems with VHDL for logic synthesis. Overview and comparative analysis of design flow and tools for FPGAs and standard-cell ASICs. Discusses verification of digital systems using testbenches, prototyping boards and modern testing equipment, and illustrates VHDL-based design methodology with multiple examples from communications, control, DSP, and cryptography. Laboratory experiments create link between simulation and actual hardware implementation based on FPGA boards. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**  
**Required Prerequisite:** (ECE 445\textsuperscript{C}). \textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Laboratory, Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**ECE 450: Mobile Robots.** 3 credits.  
Introduces mobile robotic systems. Topics include overview of power systems, motors, behavior-based programming, sensors, and sensor integration. Design projects conceived, developed, implemented, and presented. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**  
**Required Prerequisite:** ECE 350\textsuperscript{C}. \textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture  
**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)  

**ECE 460: Communication and Information Theory.** 3 credits.  
Introduction to analog and digital communications. Topics include review of important concepts from signals and systems theory and
This course is graded on the Undergraduate Regular scale.

**Grading:**

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

---

**ECE 461: Communication Engineering Laboratory. 1 credit.**

Lab experiments in analog and digital communication areas covered in ECE 460. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** ECE 331 and 460.  
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory

---

**ECE 462: Data and Computer Communications. 3 credits.**

Introduces modern data communications and computer networks. Topics include point-to-point communication links and transmission of digital information, modems, and codecs; packet switching, multiplexing, and concentrator design; multiaccess and broadcasting; local area and wide area networks; architectures and protocols for computer networks; OSI reference model and seven layers; physical interfaces and protocols; and data link control layer and network layer. Provides examples of data networks. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** (STAT 344 or 346) and (ECE 220 or ECE 331 C or 301 C).  
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

---

**ECE 463: Digital Communications Systems. 3 credits.**

Introduces digital transmission systems. Topics include quantization, digital coding of analog waveforms, PCM, DPCM, DM, baseband transmission, digital modulation schemes, ASK, FSK, PSK, MSK, QAM, pulse shaping, intersymbol interference, partial response, voice-band and wideband modems, digital cable systems, regenerative repeaters, clock recovery and jitter, multipath fading, digital radio design, optimal receiver design, MAP receiver, and probability of error. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisite:** ECE 460 C.  
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

---

**ECE 465: Computer Networking Protocols. 3 credits.**

Introduces computer networking protocols and concepts, emphasizing Internet and Internet Protocol Suite. Covers computer networking protocols at application, transport, and network layers, including multimedia networking protocols, and network security and management. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** (STAT 346 C or 344 C) and (CS 222 C or 211 C).  
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering, Electrical Engineering or Systems Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

---

**ECE 467: Network Implementation Laboratory. 1 credit.**

Hands-on experience in implementing, configuring, and operating local and wide area networks in live laboratory environment equipped with modern local and wide area network devices and technologies. Students exposed to real-world computer networking scenarios including local area network implementation, asynchronous communication setup, and wide area network implementation using various protocols and technologies covering all layers of computer network protocol stack. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Recommended Corequisite:** ECE 465.

**Registration Restrictions:**

**Required Prerequisite:** ECE 462 C.  
C Requires minimum grade of C.

Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 470: Introduction to Humanoid Robotics.** 3 credits.
Covers basic robot architecture with a focus on humanoid robotics. Topics include mechanical design philosophies, electrical design philosophies, and controller design of high DOF systems. Simulation of various parts and functionalities of humanoids culminates in a term project, which includes hardware demonstrations. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (C$^\text{S} 112^C$) and (ECE 280$^C$, 285$^C$ or BENG 380$^C$) and (ECE 301$^C$ or (ECE 331$^C$ and 331$^C$)).

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 491: Engineering Seminar.** 1 credit.
Engineering ethics, professionalism, role of engineer in society, current topics, and employment opportunities. Notes: Students cannot receive credit for both ECE 491 and BENG 491. Registration is allowed only after completion of at least 90 credits applicable to the electrical engineering or computer engineering program. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts. Equivalent to BENG 491.

**Specialized Designation:** Writing Intensive in the Major

**Registration Restrictions:**
**Required Prerequisites:** (COMM 100$^C$ or 101$^C$) and (ENGL 302$^C$ or ENGL 302$^C$) or HNRS 353$^C$.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 492: Senior Advanced Design Project I.** 1 credit.
Conception of senior design project and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan. Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493. Note: Registration is allowed only after completion of at least 90 credits applicable to the electrical engineering or computer engineering program. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Mason Core:** Capstone, Synthesis (p. 137)

**Specialized Designation:** Research Associated

**Registration Restrictions:**
**Required Prerequisites:** ((COMM 100$^C$ or 101$^C$) and (ENGL 302$^C$ or ENGL 302$^C$)) or HNRS 353$^C$ and ECE 220$^C$ and 286$^C$.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 493: RS: Senior Advanced Design Project II.** 2 credits.
Implementation of project for which preliminary work was done in ECE 492. Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion. Notes: Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493. If meeting time conflicts with other courses, come directly to the ECE department for registration. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

**Mason Core:** Capstone, Synthesis (p. 137)

**Specialized Designation:** Research/Scholarship Intensive

**Registration Restrictions:**
**Required Prerequisite:** ECE 492$^C$.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ECE 498: Independent Study in Electrical and Computer Engineering.** 1-3 credits.
Directed self-study of special topics of current interest in ECE. Topic must be arranged with an instructor and approved by department chair before registering. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the term for a maximum 3 credits.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Mason Core:** Capstone, Synthesis (p. 137)

**Specialized Designation:** Research Associated
Enrollment is limited to students with a major in Computer Engineering or Electrical Engineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

500 Level Courses

ECE 507: Seminar in Emerging Technologies. 3 credits.
Study of emerging technologies, how they are identified, how they evolve, actions which may encourage or stifle their growth, government influences, societal influences, examples of success and failure, and some lessons to be learned which are unique to government information technology. Topics covered will include a general introduction to emerging technologies, with emphasis on IT, discussion of difficulty in letting go of legacy systems, the DOD Global Information Grid, Cyberwarfare, Complex Adaptive Systems, and Federal Government support of Research and Development. Cannot be used in the PhD IT program. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 510: Real-Time Concepts. 3 credits.
Presents design methodology, principles and practice for the development of real-time embedded systems and their application to robotics, mechatronics, sensing, signal processing, and control. Topics include system decomposition, multi-tasking, task communication and synchronization, system modeling, time analysis, principles of filter and controller implementation, 'fuzzy' engineering, and multi-microcontroller systems. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 450 or ECE 447 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 511: Microprocessors. 3 credits.
Introduces microprocessor software and hardware architecture. Includes fundamentals of microprocessor system integration, instruction set design, programming memory interfacing, input/output, direct memory access, interrupt interfacing, and microprocessor architecture evolution. Studies Intel family of microprocessors, and reviews other microprocessor families and design trends. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 445 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 513: Applied Electromagnetic Theory. 3 credits.
Maxwell’s Equations, electromagnetic wave propagation, wave guides, transmission lines, radiation, and antennas. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 305 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 521: Linear Systems and Control. 3 credits.
Introduces linear systems theory and design of linear feedback control systems. Reviews linear algebra, state variables, state-space description of dynamic systems, analysis of continuous-time and discrete-time linear systems, controllability and observability of linear systems, and stability theory. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 421

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 522: Introduction to Random Processes in Electrical and Computer Engineering. 3 credits.
Provides a broad introduction to random processes and their applications. Topics include: (i) random variables and their functions; expectation and variance; conditional expectation; moment-generating and characteristic functions; random processes such as white noise and Gaussian; autocorrelation and power spectral density; linear filtering of random processes, and basic ideas of estimation and detection. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: (MATH 203 and STAT 346) or equivalent

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 528: Learning From Data. 3 credits.
This is an introductory course in machine learning and pattern recognition that covers basic theory, algorithms, and applications. Machine learning is the science of getting computers to act without being explicitly programmed. This course balances theory and practice, and covers the mathematical as well as the heuristic aspects. It provides a broad introduction to machine learning and pattern recognition. Topics include: (i) supervised learning (parametric/non-parametric algorithms, support vector machines, kernels, neural networks). (ii) Unsupervised learning (clustering, dimensionality reduction, recommender systems, autoencoders). (iii) Learning theory (bias/variance tradeoffs, VC theory, generalization). (iv) Ensemble methods (boosting and bagging, random forests). (v) Deep learning (deep belief networks, convolutional neural networks, deep autoencoders). The course will draw from numerous case studies and applications. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit. Equivalent to DAEN 527.

Recommended Prerequisite: ECE 527

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 529: Machine Learning. 3 credits.

Recommended Prerequisite: ECE 527

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 561: Neural Engineering. 3 credits.
Provides an overview of topics in Neural Engineering. Topics covered range from sensory and motor prosthetic devices, stimulation of biological tissue, bioelectrodes and characterization techniques, brain-machine interfaces, and engineered devices to ameliorate neurodisorders. Prior knowledge in electrical or computer engineering disciplines required. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 220 and STAT 346, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 530:** Sensor Engineering. 3 credits.
Presents the fundamentals of sensor characteristics and transfer functions, sensor circuits and interfacing, sensor noise, and protection methods. Studies of different methods used in sensing position, motion, acceleration, force, humidity, temperature, chemicals, etc. are developed, followed by an analysis of specific sensor designs. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 531:** Introduction to Wireless Communications and Networks. 3 credits.
Provides the basics of modern wireless communications and wireless networking at the first-year graduate level. Topics include wireless signal design, channel characterization, receiver structure, multiple access technologies, cellular concepts, capacity enlargement, mobility management, and wireless/wireless interworking. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 460 or equivalent

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 537:** Introduction to Digital Image Processing (DIP). 3 credits.
First course in digital-image processing; introduces scanning systems, focal plane array detectors, data acquisition methods, display hardware, image preprocessing algorithms, feature extraction, and basic image processing methods. Semester-long image processing project includes utilizing modern image processing system prototyping software. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 538:** Medical Imaging. 3 credits.
Provides an introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. In addition, this course introduces engineering students to clinical applications of medical imaging. The emphasis is on diagnostic ultrasound and magnetic resonance imaging methods, although several other modalities are covered. The course also provides an overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learned in class to real-world problems. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit. Equivalent to BENG 538.

**Recommended Prerequisite:** ECE 220 or equivalent

**Registration Restrictions:**
Digital System Design with VHDL.

This course introduces the design of complex digital systems using hardware description languages. Emphasizes the design methodology based on the partitioning of a digital system into a datapath and control unit. Introduces a clear sequence of steps leading from specification to the partitioning of a digital system into a datapath and control unit. Introduces and uses the concepts of VHDL simulation, verification, synthesis, mapping, placing, routing, timing analysis and performance optimization. Requires semester long project devoted to the design of a complex digital system using VHDL as a hardware description language and FPGA as an implementation platform. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Recommended Prerequisite:
ECE 331 or permission of instructor.

ECE 550: System Engineering Design. 3 credits.
System engineering design methods are studied and practiced, including object-oriented and structured analysis based techniques. Design description languages such as UML, SysML, IDEF0 and IDEF1x are introduced and used in carrying out complete system designs. Teams make presentations of their designs. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit. Equivalent to SYST 520.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)
ECE 565: *Introduction to Optical Electronics*. 3 credits.
Introduces optoelectronic devices for generation, detection, and modulation of light. Topics include electro-optic modulators, gas, solid state and semiconductor lasers, photodetectors, and detector arrays. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 305 and 333.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

ECE 567: *Optical Fiber Communications*. 3 credits.
Studies components and integration of fiber-optic transmission systems. Topics include optical fibers, signal degradation, optical sources, power launching and coupling, photodetectors, receiver circuits, link analysis, and optical measurements. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 565 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

ECE 584: *Semiconductor Device Fundamentals*. 3 credits.
Studies principals of operation of semiconductor devices based on solid state physics. Topics include band theory of solids, intrinsic and extrinsic semiconductor properties, pn junction diode, bipolar junction transistor, Schottky diode, metal insulator semiconductor junctions, field-effect transistors, and hetero-structures. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 430 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

ECE 585: *Semiconductor Device Fundamentals*. 3 credits.
Introduces optoelectronic devices for generation, detection, and modulation of light. Topics include electro-optic modulators, gas, solid state and semiconductor lasers, photodetectors, and detector arrays. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 305 and 333.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

Studies design and analysis of digital integrated circuits, emphasizing CMOS technology. Reviews MOSFET operation and SPICE modeling. Covers analysis and design of basic inverter circuits, structure and operation of combinational and sequential logic gates, dynamic logic circuits, chip I/O circuits, and brief introduction to VLSI methodologies. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 331 and ECE 430 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

ECE 587: *Design of Analog Integrated Circuits*. 3 credits.
Studies design methodologies of CMOS-based analog integrated circuits. Topics include differential amplifiers, current sources, output stages, operational amplifiers, comparators, frequency response, noise, and computer-aided design. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 333 and ECE 430 or 433 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 590: Selected Topics in Engineering.** 3 credits.
Selected topics from recent developments, and applications in various engineering disciplines. Designed to help professional engineering community keep abreast of current developments. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the term for a maximum of 15 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

### 600 Level Courses

**ECE 611: Advanced Microprocessors.** 3 credits.
Covers principles of advanced 32-bit and 64-bit microprocessors. Includes microprocessor structure and architecture, pipeline hazards, instruction-level parallelism, superscalar and superpipelined execution, thread-level parallelism; and RISC principles and advantages. Offers examples of RISC-type microprocessors. Studies in detail Intel IA-32, Intel and HP IA-64, and Motorola M68000 families. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 511 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 615: Software/Hardware Codesign.** 3 credits.
Introduces software/hardware codesign for modern all-programmable system on chip platforms. Covers profiling, design partitioning, interfacing, debugging using integrated logic analyzers, and optimizing performance and resource utilization. Demonstrates the development of hardware accelerators using existing intellectual property cores and establishing efficient communication between software and hardware parts of complex embedded systems. Introduces high-level synthesis for improved efficiency of the development process. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** ECE 511B- and 545B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 619: Nonlinear Systems and Control.** 3 credits.
Includes motivating examples; analysis techniques include basic fixed-point theory, implicit function theorem, and dependence of trajectories on initial data and parameters. Also covers computational simulation techniques; stability theory including Lyapunov's direct method; nonlinear control systems of input-output and absolute stability; strong positive real transfer functions; feedback linearization of nonlinear systems; nonlinear canonical forms; nonlinear decoupling; sliding control; and applications to adaptive control, neural networks, and robotics. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 521 or equivalent

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 621: Real-Time Embedded Systems.** 3 credits.
Study of real-time operating systems and device drivers for embedded computers. Emphasizes microprocessor systems and associated input device sampling strategies, including interrupt driven and polled I/O. Covers basic input/output operations, analog to digital conversion methods, I/O programming techniques and process, and communication control methodologies. Involves design project. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 620: Optimal Control Theory.** 3 credits.
Detailed treatment of optimal control theory and its applications. Topics include system dynamics and performance criteria, calculus of variations and Pontryagin’s minimum principle, computational methods in optimal control, and applications of optimal control. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit. Equivalent to ME 698, ME 699.

**Recommended Prerequisite:** ECE 521 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 621: Systems Identification.** 3 credits.

**Recommended Prerequisite:** ECE 521 and 528 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 622: Kalman Filtering with Applications.** 3 credits.
Detailed treatment of Kalman Filtering Theory and its applications, including some aspects of stochastic control theory. Topics include state-space models with random inputs, optimum state estimation, filtering, prediction and smoothing of random signals with noisy measurements, all within the framework of Kalman filtering. Additional topics are nonlinear filtering problems, computational methods, and various applications such as global positioning system, tracking, system control, and others. Stochastic control problems include linear-quadratic-Gaussian problem and minimum-variance control. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 521 and 528, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 627: Adaptive Control.** 3 credits.
Topics include identification algorithms, model reference adaptive control, self-tuning regulators, convergence, stability, robustness, averaging theory, singular perturbation, and intelligent learning schemes. Students are required to study literature and complete a course project. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 521 or equivalent

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 630: Statistical Communication Theory.** 3 credits.
Introduces optimum receiver design in the additive white Gaussian noise environment. Topics include efficient signal set design, modulation techniques, matched filter, correlation detector, coherent and noncoherent detections, fading and diversity channels, random amplitude and phase, diversity techniques, performance bounds of communications, and waveform communications. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
ECE 633: Coding Theory. 3 credits.
Mathematics of coding groups, rings, and fields, and polynomial algebra. Topics include linear block codes, generator and parity check matrices; error syndromes, binary cyclic and convolutional codes; and implementation of encoders and decoders. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

ECE 635: Adaptive Signal Processing. 3 credits.
Introduces adaptive systems and adaptive signal processing. Topics include correlation functions and matrices; performance functions; search of minimum; steepest descent and Newton algorithms; least mean squares algorithm; noise perturbed search and misadjustment; sequential regression algorithm and convergence issues; recursive least squares algorithm and forgetting factor; frequency domain algorithms; adaptive equalization; pseudorandom binary sequences and system identification; adaptive interference cancellation; and adaptive beam forming and arrays. Simulates adaptive algorithms. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

ECE 639: Satellite Communications. 3 credits.
Topics include introduction to satellite communications systems; historical aspects; orbital mechanics and launchers; satellite components such as payload, orbital maneuvering systems, cooling systems, and antennas; look angle predictions; link budget; overall link design; multiple access, such as TDMA, CDMA, ALOHA, TDMA, and MFTDMA; error control for digital satellite links; propagation effects on satellite links; elements of VSAT systems and non-geostationary satellite systems; and direct broadcast satellite services. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528 or ECE 542

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

ECE 642: Design and Analysis of Computer Communication Networks. 3 credits.
Introduces queuing theory. Other topics include concentrator design, multiplexing, capacity assignments, random access schemes, polling and probing techniques, topology design, flow control and routing, packet radio, protocol specification, and validation. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 542 and 528 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

ECE 643: Network Switching and Routing. 3 credits.
Fundamentals of switching and routing with application to communications networks, both wireline and wireless. Topics include concepts of space and time for switching and forwarding of data, scalability and performance, label swapping, algorithms for routing and path computation, constrained route optimization, traffic theory, control and signaling, and traffic engineering. The course also covers the concepts and issues underlying the design and implementation of the contemporary switched networks. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528 and ECE 542.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 645: Computer Arithmetic. 3 credits.
Covers computer arithmetic as applied to the design of general-purpose microprocessors and application-specific integrated circuits for cryptography, coding, and digital signal processing. Focuses on efficient implementations of all basic arithmetic operations in three major domains: integers, real numbers, and elements of Galois Fields GF(2n). Illustrates tradeoffs among various hardware algorithms and architectures depending on primary optimization criteria, such as speed, area, and power consumption. Demonstrates the use of software implementations as a source of test vectors for verification of hardware implementations and for evaluating hardware versus software speed-up. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 545 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 646: Cryptography and Computer Network Security. 3 credits.
Topics include need for security services in computer networks, basic concepts of cryptology, historical ciphers, modern symmetric ciphers, public key cryptography (RSA, elliptic curve cryptosystems), efficient hardware and software implementations of cryptographic primitives, requirements for implementation of cryptographic modules, data integrity and authentication, digital signature schemes, key exchange and key management, standard protocols for secure mail, the web and electronic payments, security aspects of mobile communications, key escrow schemes, zero-knowledge identification schemes, smart cards, quantum cryptography, and quantum computing. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 542 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 650: Robotics. 3 credits.
Introduces robotics and advanced automation from electrical engineering standpoint. Topics include hardware overview; coordinate systems and manipulator kinematics; differential motion and inverse Jacobian; manipulator path control and motion planning; design and control of articulated hands; sensory feedback; machine vision; and applications to industrial automation. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 521 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Provides broad introduction to fundamental principles of command, control, communication, computing, and intelligence (C4I). Applies principles, techniques to wide range of civilian and military situations. Discusses modeling, simulation of combat operations; studies sensing, fusion, and situation assessment processes. Derives optimal decision-making rules. Discusses concepts of C4I architectures and tools to evaluate and design systems such as queuing theory. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit. Equivalent to SYST 680.

Recommended Prerequisite: ECE 528 or SYST 611 or OR 542, or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 673: Discrete Event Systems. 3 credits.
Introduces modeling and analysis of discrete event dynamical systems. Course covers elements of discrete mathematics and then focuses on Petri Net models and their basic properties. Relation to other discrete event models of dynamical systems. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit. Equivalent to SYST 620.

Recommended Prerequisite: ECE 521, or SYST 611 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 674: Systems Architecture Design. 3 credits.
Architecture design and representation and the methodologies used to obtain them. Approaches based on system engineering constructs such as object orientation and service oriented architectures are used to design architectures and then represent them in conformance with an architecture framework such as DoDAF. Executable models of the architecture are derived to be used for architecture evaluation. Examples from current practice are used. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit. Equivalent to SYST 621.

Recommended Prerequisite: ECE 550.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 675: System Integration and Arch. Evaluation. 3 credits.

Recommended Prerequisite: ECE 674 or SYST 621.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 680: Physical VLSI Design. 3 credits.
Introduces NMOS, CMOS, and BICMOS integrated circuit technology and fabrication. Reviews MOS and BICMOS inverter structures and operation, MOS and BICMOS circuit design processes, MOS layers, stick diagrams, design rules, and layout. Covers subsystem design and layout illustration of design process through design of 4bit arithmetic processor and its parts, adder, multiplier, register, and memory cells; and aspects of system timing, test and testability. Reviews currently available VLSI CAD tools. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 586 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 681: VLSI Design for ASICs. 3 credits.
Introduces VLSI design of application-specific integrated circuits (ASICs) from front-end to back-end using HDL and modern design automation software. Covers simulation, synthesis of digital circuits using standard cells, static timing analysis, formal verification, power analysis, test generation/fault simulation, and physical design including floor planning, placement, routing, and design rule checking. Addresses deep submicron CMOS scaling issues and other advanced topics. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 586, or permission of instructor.

Recommended Corequisite: ECE 545.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 682: VLSI Test Concepts.** 3 credits.

Broad introduction to basic concepts, techniques, and tools of modern VLSI testing. Fundamentals of defect modeling, fault simulation, design for testability, built-in self-test techniques, and failure analysis. Test economics, physical defects and fault modeling, automated test pattern generation, fault simulation, design for test, built-in self-test, memory test, PLD test, mixed-signal test, iddq test, boundary scan and related standards, test synthesis, diagnosis and failure analysis, automated test equipment, embedded core test. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 586

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 684: MOS Device Electronics.** 3 credits.

Study of Metal Oxide Semiconductor (MOS)-based device theory, characteristics, models, and limitations. Topics include MOS capacitor, MOSFETs, CMOS, charge coupled devices, scaling, hot carrier effects, latchup, radiation effects, and isolation techniques. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 584 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 698: Independent Reading and Research.** 1-3 credits.

Independent study under the supervision of a faculty member, resulting in an acceptable technical report. Notes: Requires written report. May be taken no more than twice for graduate credit. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** At least two core courses and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 699: Advanced Topics in Electrical and Computer Engineering.** 1-6 credits.

Advanced topics of current interest in electrical and computer engineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and
presenting papers in research areas. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 728:** Random Processes in Electrical and Computer Engineering. 3 credits.
Recommended for advanced master’s and doctoral students. Provides background in random processes needed for pursuing graduate studies and research in statistical signal processing, communications, control, and computer networks. Covers probability spaces, random variables, Lebesgue integration, conditional mean on a sigma field, convergence of random variables, limit and ergotic theorems, Markov processes, and Martingales. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 732:** Mobile Communication Systems. 3 credits.
Topics include modeling of mobile communication channel, signal set and receiver design for mobile communication channel, access and mobility control, mobile network architectures, connection to fixed network, and signaling protocols for mobile communication.
systems. Examples of mobile communication systems are presented, including pan-European GSM, North American D-AMPS, and personal communication systems. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 542 and 630.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 734: Detection and Estimation Theory.** 3 credits.
Introduces detection and estimation theory with communication and radar and sonar applications. Topics include classical detection and estimation theory, detection of known signals in Gaussian noise, signal parameter and linear waveform estimation, and Wiener and Kalman filters. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 738: Advanced Digital Signal Processing.** 3 credits.
Theory and practice of advanced digital signal processing techniques. Topics may include efficient high-speed algorithms for convolution, correlation, orthogonal transforms, multirate processing of digital signals, multiresolution time-frequency and time-scale analysis of one- and two-dimensional signals, and multitaper spectral estimation. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528 and ECE 535.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 740: Digital Signal Processing Hardware Architectures.** 3 credits.
Addresses topics that include high-level DSP optimizations, such as pipelining, unfolding, and parallel processing; common DSP structures such as FFTs, filters, direct digital frequency synthesizers, and correlators; modeling of DSP algorithms in MATLAB and conversion of MATLAB models into fixed-point VHDL blocks; platform implementation issues: hardware vs. software, FPGA vs. ASIC, power, area, throughput, and applications of DSP hardware. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 535 and ECE 545 or equivalents or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 741: Wireless Networks.** 3 credits.
Theoretical foundation and practice in design of wireless networks. Emphasizes mobility and teletraffic modeling aspects, and networking issues and state-of-the-art performance evaluation methods of radio and system infrastructure applicable to wireless cellular and local networks. Topics include analysis of mobility, handoff, control traffic loading, resource allocation techniques, multiaccess protocols, admission policy and call control, network infrastructure and multilayer configuration, wireless LANs, and packet data systems. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 642 or equivalent.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 742: High-Speed Networks.** 3 credits.
Theories for design, analysis and evaluation of high-speed networks including scalability, performance, and issues related to local area, metropolitan, and wide area networks. Includes architecture, protocols, and applications of high-speed networks; performance modeling of high-speed networks; flow control and routing; design issues for high-speed switches, interfaces, and controllers; all optical networks and their architectures; examples of high-speed computer networks and Internet working; video, imaging, and multimedia applications; software issues, robustness, and applications; and selected topics in current research areas in high-speed computer networks. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.
Recommended Prerequisite: ECE 528 and 642, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 745: ULSI Microelectronics. 3 credits.
Studies UltraLargeScaleIntegration (more than a million devices in a single chip) by considering limits of packing density, modeling of devices, and circuit topology. Semiconductor material and device physics imposed "second order effects" and limitations on deep submicron CMOS performance. Reliability studied through analytical (compact) modeling and numerical simulations. Presents and evaluates new ULSI technologies such as SOI CMOS. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 684.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 746: Advanced Applied Cryptography. 3 credits.
Discusses complex cryptographic algorithms and their implementations in software and hardware. Provides mathematical background necessary to understand, implement, and break modern cryptogalgorithms. Covers implementations of cryptosystems using smart cards, network processors, and other platforms. Discusses side channel attacks against implementations of cryptography, including timing attacks, power analysis, fault analysis, cache attacks, etc. Introduces advanced topics, such as random and pseudorandom number generators, secret sharing, zero-knowledge, and quantum cryptography. Requires a semester-long project devoted to implementation of selected algorithms or protocols in software or hardware, and/or comparative analysis of various algorithms, protocols, or implementations. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 646 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 747: Cryptographic Engineering. 3 credits.
Discusses efficient implementations of cryptographic algorithms and protocols in hardware and software, ranging from high-performance to low-power, as well as resistance to side-channel and fault attacks. Covers code breaking algorithms and practical implementations of side-channel attacks. Introduces research techniques. Requires semester-long project devoted to study of a cryptographic engineering problem, including a comprehensive literature review, problem definition, and research plan. Notes: Course will be partially lecture style, partially seminar. Students will give hour long, in depth presentations on their research topics. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 646 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 751: Information Theory. 3 credits.
Introduces information theory, which is mathematical theory of communication systems. Topics include measures of information such as entropy, relative entropy, and mutual information; Shannon-McMillan-Breiman theorem and applications to data compression; entropy rate and source coding theorem; Huffman, arithmetic and Lempel-Ziv codes; method of types, channel capacity, and channel-coding theorem; joint source-channel coding theorem; differential entropy; Gaussian channel; rate distortion theory; and vector quantization. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: ECE 528 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ECE 754: Optimum Array Processing I. 3 credits.
Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 528 and ECE 535.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 780: Radio Frequency Electronics.** 3 credits.
This course addresses the design of electronic building blocks for radio frequency (RF) microelectronic circuits. Topics include trade-offs in RF design, transceiver architectures, low-noise amplifiers, mixers, oscillators, frequency-synthesizers, phase-locked loops, and power amplifiers. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ECE 587, 684, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ECE 795: Engineering Seminar.** 0 credits.
Fulfills seminar requirement for MS in electrical and computer engineering programs. Invited speakers, faculty, and ECE graduate students lecture on current topics and research. Notes: Students must enroll in ECE 795 the final semester they file to graduate. Once the department verifies that the seminar requirement has been met, a grade of S (satisfactory) will be submitted. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 in subsequent semesters until the requirement is met. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**ECE 797: Scholarly Paper.** 0 credits.
Student must develop a rigorous, technical report (called Scholarly Paper) on a topic of current interest in Electrical and Computer Engineering and make an oral presentation of this report. Students fulfill this requirement through and individual project in a 600-level or above ECE graduate course. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the degree.

**Recommended Prerequisite:** Completed 18 credit hours of graduate work.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Special scale. (p. 82)

**ECE 798: Research Project.** 1-6 credits.
Student must complete a one-semester long research project on an ECE technical topic under the guidance of a faculty advisor, and write a research report that will be presented as a departmental seminar. Notes: No more than a combined total of 3 credits may be taken towards satisfying the master's degree, although students may register for more credits. Students may not count both ECE 799 and ECE 798 for master's degree. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Completed 18 credit hours of graduate work.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

**ECE 799: Master's Thesis.** 1-6 credits.
Research project chosen and completed under guidance of graduate faculty member that results in technical report and oral defense acceptable to thesis committee of three faculty members. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the degree.

**Recommended Prerequisite:** 9 graduate credits, and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

800 Level Courses

ECE 899: Research Topics in ECE. 3 credits.
Studies advanced research areas in Electrical and Computer Engineering within a course format. Students will develop specialized research skills, which will also involve the presentation of their own work, developed individually and within groups. This course may be repeated for credit if the research areas differ. Notes: This will be an irregularly scheduled course intended for advanced master's students who want to pursue a specific topic to more depth than a typical course offers at the master's level. It will prepare students to undertake their individual research topics when they move on to pursue a Ph.D. program, or enter a research environment in their chosen professional careers. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the degree for a maximum of 9 credits.

Recommended Prerequisite: Completion of at least one 600 or 700 level course in the Research Topic area; and permission of instructor.

Registration Restrictions:
Enrollment limited to Graduate level students.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Research

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

900 Level Courses

ECE 998: Doctoral Dissertation Proposal. 1-12 credits.
Work on research proposal that forms basis for doctoral dissertation. Notes: No more than 24 credits of ECE 998 and 999 may be applied to doctoral degree requirements. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the degree.

Registration Restrictions:
Enrollment limited to Graduate level students.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

ECE 999: Doctoral Dissertation. 1-12 credits.
Formal record of commitment to doctoral dissertation research under direction of ECE faculty member. Notes: Students must complete minimum 12 credits of doctoral proposal (ECE 998) and doctoral dissertation research (ECE 999) Maximum of 24 credits of ECE 998 and 999 may be applied to degree. Students who choose to take less than 24 credits of ECE 998 and 999 may earn remaining credits from approved course work. Students cannot enroll in ECE 999 before research proposal accepted and approved by dissertation committee. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.
Enrollment is limited to Graduate level students.
Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Engineering (ENGR)

100 Level Courses

ENGR 107: Introduction to Engineering. 2 credits.
Introduces engineering profession fundamentals and problem-solving. Topics include description of engineering disciplines, functions of the engineer, professionalism, ethics and registration, problem solving and representation of technical information, estimation and approximations, and analysis and design. Offered by Electrical & Comp. Engineering (p. 1061). Limited to two attempts.

Recommended Prerequisite: Completion of at least 30 credit hours.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

300 Level Courses

ENGR 395: Engineering Internship. 0-3 credits.
Students will participate in experiential learning in an industrial setting. Students must identify work opportunity and seek advisor approval prior to registering. Course credit will not satisfy degree requirements. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the degree for a maximum of 6 credits.

Recommended Prerequisite: Completion of at least 30 credit hours.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

ENGR 396: Engineering Co-Op I. 0-3 credits.
1st Semester of a multi-semester co-operative education experience. Students will apply concepts and theories from the classroom to an industrial setting. Students must identify work opportunity and seek advisor approval prior to registering. Course credit will not satisfy degree requirements. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

Recommended Prerequisite: Completion of at least 30 credit hours.

Schedule Type: Lecture

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

ENGR 397: Engineering Co-Op II. 0-3 credits.
Second Semester of a multi-semester co-operative education experience. Students will apply concepts and theories from the classroom to an...
industrial setting. Students must continue employment from ME 396 and seek advisor approval prior to registering. Course credit will not satisfy degree requirements. Offered by Electrical & Comp. Engineering (p. 1061). May not be repeated for credit.

**Recommended Prerequisite:** ME 396.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

### 400 Level Courses

- **ENGR 498:** *Independent Study in Engineering*. 1-3 credits.
  Directed self-study of special topics of current interest in ENGR. Notes: May be repeated if topics substantially different. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

- **ENGR 499:** *Special Topics in Engineering*. 0-4 credits.
  Topics of special interest to undergraduates. Notes: May be repeated if topics substantially different. Offered by Electrical & Comp. Engineering (p. 1061). May be repeated within the term for a maximum 11 credits.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

### English (ENGH)

#### 100 Level Courses

- **ENGH 100:** *Composition for Multilingual Writers*. 4 credits.
  Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose. Methods and conventions of preparing research papers. Notes: Students must attain minimum grade of C to fulfill degree requirements. Offered by English (p. 354). May not be repeated for credit. Equivalent to ENGH 100, ENGH 122.

**Mason Core:** Written Communication (lower) (p. 137)

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

- **ENGH 101:** *Composition*. 3 credits.
  Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose. Methods and conventions of preparing research papers. Notes: Students must attain minimum grade of C to fulfill degree requirements. Offered by English (p. 354). May not be repeated for credit. Equivalent to ENGH 100, ENGH 122.

**Mason Core:** Written Communication (lower) (p. 137)

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

- **ENGH 121:** *Enhanced Composition For Multilingual Writers of English I*. 3 credits.
  Provides intensive practice in drafting, revising, and editing essays in common academic genres such as description, exposition, and analysis, with additional language support for building English fluency. Addresses logical, rhetorical, and linguistic structures of expository prose. This course is the first of a two-part course for students in the Undergraduate International Pathway Program. Offered by English (p. 354). May not be repeated for credit.

**Specialized Designation:** Discovery of Scholarship

**Recommended Prerequisite:** Admission to the Undergraduate International Pathway Program for international students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Special scale. (p. 82)

- **ENGH 122:** *Enhanced Composition For Multilingual Writers of English II*. 3 credits.
  Provides intensive practice in drafting, revising and editing essays in common academic genres such as argumentation and research based writing, with additional language support for building English fluency. Addresses logical, rhetorical, and linguistic structures of expository prose, and builds critical reading strategies. This course is the second of a two-part course for students in the Undergraduate International Pathway Program. Notes: Students must attain minimum grade of C to fulfill Mason Core degree requirement for written communication (lower level). Offered by English (p. 354). May not be repeated for credit. Equivalent to ENGH 100, ENGH 101.

**Specialized Designation:** Discovery of Scholarship

**Recommended Prerequisite:** Satisfactory progress in ENGL 121/ENGH 121.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Special scale. (p. 82)

#### 200 Level Courses

- **ENGH 201:** *Reading and Writing about Texts*. 3 credits.
  Close analysis of literary texts, including but not limited to poetry, fiction, and drama. Emphasizes reading and writing exercises to develop basic interpretive skills. Examines figurative language, central ideas, relationship between structure and meaning, narrative point of view. Offered by English (p. 354). May not be repeated for credit.

**Mason Core:** Literature (p. 137)
**Recommended Prerequisite:** 3 credits of 100-level English.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 202: Texts and Contexts.** 3 credits.
Studies literary texts within the framework of culture. Examines texts within such categories as history, gender, sexuality, religion, race, class, and nation. Notes: Builds on reading and writing skills taught in ENGH 201. Offered by English (p. 354). May not be repeated for credit.

**Mason Core:** Literature (p. 137)

**Recommended Prerequisite:** 3 credits of 100-level English.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 203: Western Literary Tradition.** 3 credits.
Major works of Western literature in historical progression. Covers writers such as Homer, Sophocles, Euripides, Dante, Cervantes, Machiavelli, and Montaigne. Notes: All readings are in modern English. Courses build on reading and writing skills taught in ENGH 201. Offered by English (p. 354). May not be repeated for credit.

**Mason Core:** Literature (p. 137)

**Recommended Prerequisite:** 3 credits of 100-level English.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 204: Western Literary Traditions.** 3 credits.
Major works of Western literature in historical progression. Covers writers such as Homer, Sophocles, Euripides, Dante, Cervantes, Machiavelli, and Montaigne. Notes: All readings are in modern English. Courses build on reading and writing skills taught in ENGH 201. Offered by English (p. 354). May not be repeated for credit.

**Mason Core:** Literature (p. 137)

**Recommended Prerequisite:** 3 credits of 100-level English.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 300: Cover to Cover.** 3 credits.
Introduction to various topics in English; many have an interdisciplinary emphasis. Appropriate for non-majors. Topic changes each time course is offered. Notes: May be repeated when topic is different. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ENGL 101/ENGH 101

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ENGH 301: The Fields of English.** 3 credits.
Introduces the fields of English studies, focusing on discipline-specific forms of practice within the concentrations in the major. Explores central concepts including reading, language, medium, text, author/producer. Maps histories and contexts of English as a discipline. Offered by English (p. 354). May not be repeated for credit.

**Specialized Designation:** Discovery of Scholarship

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 302: Advanced Composition.** 3 credits.
Intensive practice in writing and analyzing expository forms such as essay, article, proposal, and technical or scientific reports with emphasis on research related to student's major field. Notes: Students must attain minimum grade of C to fulfill degree requirements. Schedule of Classes designates particular sections of ENGH 302 in business, humanities, natural sciences and technology, and social sciences. Offered by English (p. 354). May not be repeated for credit.

**Mason Core:** Written Communication (upper) (p. 137)

**Recommended Prerequisite:** Completion of 45 credits.

**Registration Restrictions:**

**Required Prerequisites:** (ENGH 100, 101, 102, 122, ENGL 100, 101, U101, 122, HNRS 110, NCLC 203 or INTS 203 and (ARAB 325, L325, CHIN 310, 311, 325, 328, CLAS 250, 250, 260, 340, 350, 360, 380, ENGH 201, U202, 202, U202, 203, U203, 204, U204, FREN 325, L325, 329, FRLN 330, GERM 325, ITAL 320, 325, L325, JAPA 340, KORE 311, PHIL 253, RELI 235, U235, 333, RUSS 325, 327, SPAN 325, L325, ENGH 2, INTS 101, NCLC 101, or NCLC 131).

C Requires minimum grade of C.
D Requires minimum grade of D.

Students with a class of Freshman may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 303: Humanities College to Career.** 1 credit.
Focuses on career choices and effective self-presentation for soon-to-be graduating students with majors in the humanities. Explores how skills typically learned in humanities majors can be leveraged for a successful transition to post-graduation employment. Offered by English (p. 354). May not be repeated for credit. Equivalent to FRLN 309, HIST 385, PHIL 393, UNIV 420.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
ENGH 304: Topics: Literary Surveys. 3 credits.
Advanced introduction to major movements and representative figures of two or more centuries or periods of American, British, European, or world literature. Notes: May be repeated when topic is different. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ENGH 305: Dimensions of Writing and Literature. 3 credits.
Teaches students the conventions of writing in literary studies while emphasizing writing process. Develops interpretive skills for further study in the major though the teaching of in-depth close reading, intertextual analysis, and critical reading in scholarship. Offered by English (p. 354). May not be repeated for credit.

Specialized Designation: Scholarly Inquiry, Writing Intensive in the Major

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ENGH 307: English Grammar. 3 credits.
Overview of grammatical structure of English including word classes, phrases, and complex sentences. English grammar analyzed using modern syntactic theory. Students engage in language description through problem solving. Offered by English (p. 354). May not be repeated for credit. Equivalent to LING 307.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ENGH 308: Theory and Inquiry. 3 credits.
Investigates a problem or debate central to the discipline of English. Teaches students how to read, understand, and engage with theoretical texts. Notes: May be repeated for credit when topic is different. Offered by English (p. 354). May be repeated within the term.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ENGH 309: Topics in Literature. 1-3 credits.
Studies literature by topics, such as women in literature, science fiction, and literature of the avant garde. Notes: Topic varies. May be repeated for credit when topic is different. Offered by English (p. 354). May be repeated within the term.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ENGH 310: Topics: Women and Literature. 3 credits.
Explores experiences of women as both authors and subjects of imaginative literature. Notes: May be repeated when topic is different. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ENGH 315: Folklore and Folklife. 3 credits.
Topics include folktales, personal narratives, legends, proverbs, jokes, folk songs, folk art and craft, and folk architecture. Considers ethnicity, community, family, festival, folklore in literature, and oral history. Discusses traditions in students' own lives. Offered by English (p. 354). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ENGH 316: Topics in Myth and Literature. 3 credits.
Studies how traditional mythologies are reflected in English and American literature and other texts as themes, motifs, and patterns. Notes: May be repeated when topic is different. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ENGH 318: Introduction to Cultural Studies. 3 credits.
Introduces interpretive practices associated with cultural studies. Offered by English (p. 354). May not be repeated for credit.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture

Grading:

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ENGH 401: RS: Honors Thesis Writing Seminar.** 3 credits.
Provides guidance in research methods to students writing an honor thesis as well as workshop for critiquing works in progress. May be taken concurrently with another approved course offered by English Department, in which case thesis work may substitute for some assigned work in second course by arrangement of both instructors. Offered by English (p. 354). May not be repeated for credit.

**Mason Core:** Capstone (p. 137)

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** Acceptance into English honors; permission of department and ENGH 400/ENGL 414 or ENGH 402/ENGL 416.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 402: Honors Independent Study.** 1-3 credits.
Intensive writing course. Honors students concentrating in nonfiction writing and editing may use English 416 to replace English 414 as first course in honors program. Notes: Honors students concentrating in creative writing may use ENGH 402 to replace ENGH 401. Honors students concentrating in nonfiction writing who take ENGH 401 and complete a nonfiction thesis may use ENGH 402 in conjunction with an advanced course in nonfiction writing to replace ENGH 400. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Admission to honors program in English, and permission of instructor.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 408: Topics in Criticism.** 3 credits.
Studies selected approach to literary criticism, as announced, with exercises in critical analysis. Includes new criticism, structuralism, psychoanalysis, and Marxism. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the term.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 409: Topics in Folklore Studies.** 3 credits.
Theory and practice of folklore as a discipline, considering folklore from various times and places. Includes study of indigenous folklore and modern sociology, and cultural aspects of folklore. Notes: May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 412: Topics in Folklore Studies.** 3 credits.
Exploration of various aspects of folklore and folklife such as folklore and literature, folk arts, folk song, and material culture. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the term.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ENGH 414: Folklore and the Supernatural.** 3 credits.
Examines the role of supernatural phenomena in individuals' everyday lives. Introduces folkloristic approaches to the study of belief, paranormal experiences, and popular spirituality. Topics may include ghosts, spirit possession, superstitions, visions, near death experiences, dream interpretation, magic, the commodification of belief, and the supernatural and new media. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 415: Folk Arts and Folk Artists.** 3 credits.
Examines the traditional arts of everyday life, such as festive foods, mementos and other objects of memory, textile arts, pottery, carving in wood and stone, roadside shrines, and more. Explores the folk aesthetics of group-based creativity through the lenses of biography, history, literature, and folklore studies. Considers traditional objects as narratives in material form. Examples drawn from multiple cultures as well as traditions in students' own lives. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 416: Ethnicity and Migration in Folklore.** 3 credits.
Explores U.S. immigration trends and the historical basis for the concepts of ethnicity, identity, and immigration in folklore scholarship, literature, film, and popular media. The course explores at least three of the following ethnic groups: Latino, Asian, Jewish, European, Arab, or African. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 417: RS: Topics in Folklore Research.** 3 credits.
Topic-based course in research methods. Students conduct advanced research in folklore studies using traditional and digital research tools and approaches. Notes: May be repeated when topic is different. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Capstone (p. 137)

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** ENGH 305 (3 credit) and 85 credit hours earned.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 418: Cultural Constructions of Sexualities.** 3 credits.
Introductory survey of cultural, literary, and theoretical constructions of sexuality that seek to complicate traditionally fixed categories of identity. Examines various representations of human sexuality, with particular attention to intersections with gender, race, ethnicity, nationality, and class. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 419: Topics in Popular Literature.** 3 credits.
Studies specific topic or theme in popular literature. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ENGH 421: Topics in Medieval and Renaissance Literature.** 3 credits.
Studies selected topics, genres, themes or authors in medieval or Renaissance literature and culture. Notes: May be taken for credit by English or history majors. Specific topic may vary. Primary emphasis is literary or historical, depending on discipline of instructor. May consider relevant material from philosophy, theology, and art. May be repeated when topic is different. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits. Equivalent to FRLN 431.

**Specialized Designation:** Scholarly Inquiry

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 305 (3 credit) and 85 credit hours earned.**

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 422: Chaucer.** 3 credits.
Major works of Chaucer, with emphasis on The Canterbury Tales. Offered by English (p. 354). May not be repeated for credit.
**Additional Course Details:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 424:** Spenser. 3 credits.
Poetry of Edmund Spenser, with central emphasis on The Faerie Queene. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 428:** Milton. 3 credits.
Milton's major poetic works, with emphasis on Paradise Lost. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 431:** Topics: British Literary Periods. 3 credits.
In-depth study of selected period of British literature. In addition to literary examples, materials may be chosen from art, philosophy, or popular culture of the time. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 432:** Topics: American Authors. 3 credits.
Study of one or two major figures in American literature. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 451:** Science Fiction. 3 credits.
Major works of science fiction in terms of mode, themes, and narrative techniques, especially role of hypothesis in science fiction. Focuses on novels, short stories from early 19th century to present. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 452:** Critical Study of Children's Literature. 3 credits.
Examines the history and criticism of children's literature and the strategies used by authors of children's literature to address their audience. Selected readings range from Puritan to contemporary writing for children, as well as influential works in educational philosophy, such as those by Locke and Rousseau. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)
ENGH 453: Topics in Fiction. 3 credits.
Study of selected topics, periods, or authors. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ENGH 454: Topics in Poetry. 3 credits.
Study of selected topics, periods, or poets. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ENGH 455: Topics in Drama. 3 credits.
Studies selected topics, periods, or playwrights. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ENGH 456: Topics in Literary Nonfiction. 3 credits.
Special studies in literary nonfiction by topic, such as the personal essay, New Journalism, the "nonfiction novel," the memoir, or historical traditions of literary nonfiction. Notes: May be repeated when topic is different. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Satisfaction of University requirements in 100-level English and in Mason Core literature.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ENGH 458: RS: Topics in Literary Research. 3 credits.
Topic-based course in research methods. Students conduct advanced research in literary studies using traditional and digital research tools and approaches. Notes: May be repeated when the topic is different. Offered by English (p. 354). May be repeated within the degree.

Mason Core: Capstone (p. 137)

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: ENGH 305 (3 credit) and 85 credit hours earned.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ENGH 459: Internship. 1-3 credits.
Under supervision of a faculty director, students report and reflect on their work as interns at organizations of their choosing, usually in writing and/or editing positions. For 3 credits, students work on site at least 135 hours as specified in the agreement developed with the internship supervisor and approved by the faculty director. Notes: Contact the English Department one semester prior to enrollment. No more than 3 credits can be counted in concentration or English minor. May be repeated with permission of department. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Permission of internship director. 60 credits. English majors need 18 credits of English (3 credits of 100-level English course; 3-6 credits of 200-level English courses; 3 credits of ENGL302/ENGH 302 and 6-9 credits of upper-level English courses). Non-English majors must meet the same requirements, except that they replace one upper-level English course with an upper-level course in their major.

Schedule Type: Internship
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

ENGH 470: RS: Topics in Film/Media History. 3 credits.
Advanced studies of development of film language, both as cultural practice and medium for formal innovation. Topics might include studies of national cinemas, historical periods, genres, or individual directors. Notes: May be repeated when topic is different. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

Mason Core: Capstone (p. 137)

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: ENGL 332/ENGH 372 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

ENGH 472: Topics in Film/Media Theory. 3 credits.
Advanced studies of theories about various aspects of production, distribution, and reception of film-mediated experiences. Topics may include theories of spectator, semiotics, feminist film theory, theories of narrativity, structuralist film theory, or deconstruction. Notes: May
be repeated when topic is different. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** ENGL 332/ENGH 372 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ENGH 474:** Topics in Film/Media Studies. 3 credits.
American and foreign films selected by type, period, or director with emphasis varying from year to year. Required viewings, student discussion, and written critiques. Notes: May be repeated for a maximum of 6 credits with permission of department. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** ENGL 332/ENGH 372 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ENGH 479:** Digital Media and Web Design Capstone. 3 credits.
Student team-based experience grounded in the work of the preceding courses in the digital media and web design minor. Each individual student will produce a portfolio of digital media and web-design related products and features that demonstrate core competencies in coding, design, content, and accessibility. Students will work in cross-disciplinary teams to carry out a client-based web design project, the process and outcomes of which will also be represented in the individual portfolio. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Before enrolling in the Capstone seminar, students need to have completed all required courses for the Digital Media and Web Design Minor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Taught in English

**ENGH 483:** Technical Editing. 3 credits.
Instruction in revising, editing, and preparing specialized writing for print production. Emphasizes methods of achieving clarity, accuracy, and completeness. Lecture and discussion on editing and printing techniques; practical exercise in revision, layout, and production. Offered by English (p. 354). May not be repeated for credit.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Taught in English

**ENGH 484:** RS: Writing Ethnography. 3 credits.
Study and practice of ethnographic writing. Students conduct ethnographic investigations and practice journal keeping, field note recording, interviewing, transcription, and interpretation. Includes introduction to current issues in ethnographic writing. Offered by English (p. 354). May not be repeated for credit.

**Mason Core:** Capstone (p. 137)

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** ENGH 302.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 485:** Document Design. 3 credits.
Theory and practice of using computer programs to design and produce publications including brochures, fliers, newsletters, and small magazines. Includes readings, writing papers, and producing and editing copies and original publications. Offered by English (p. 354). May not be repeated for credit.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 486:** RS: Writing Nonfiction for Publication. 3 credits.
Workshop course. Intensive practice in advanced nonfiction writing; emphasizes writing for publication. Occasional special topics sections in such forms as autobiography and scientific writing. Offered by English (p. 354). May not be repeated for credit.

**Mason Core:** Capstone (p. 137)

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** ENGL 309/ENGH 382 or ENGL 399/ENGH 399 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 488:** Topics in Writing and Rhetoric. 3 credits.
Advanced studies in rhetoric and writing. Introduces key rhetorical terminology and examines how texts construct meaning and how those meanings are determined within social contexts. Topics may include the relationship between rhetorics and poetics, rhetoric and new media, histories of rhetoric, global rhetorics, argument theory, discourse analysis, theories of technical communication, or advanced theories of composition and pedagogy. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 499:** Topics in Film/Media Studies. 3 credits.
American and foreign films selected by type, period, or director with emphasis varying from year to year. Required viewings, student discussion, and written critiques. Notes: May be repeated for a maximum of 6 credits. Offered by English (p. 354). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ENH 460:** Media and Web Design Capstone. 3 credits.
Student team-based experience grounded in the work of the preceding courses in the digital media and web design minor. Each individual student will produce a portfolio of digital media and web-design related products and features that demonstrate core competencies in coding, design, content, and accessibility. Students will work in cross-disciplinary teams to carry out a client-based web design project, the process and outcomes of which will also be represented in the individual portfolio. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** Before enrolling in the Capstone seminar, students need to have completed all required courses for the Digital Media and Web Design Minor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Taught in English

**ENH 461:** Technical Editing. 3 credits.
Instruction in revising, editing, and preparing specialized writing for print production. Emphasizes methods of achieving clarity, accuracy, and completeness. Lecture and discussion on editing and printing techniques; practical exercise in revision, layout, and production. Offered by English (p. 354). May not be repeated for credit.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Taught in English

**ENH 462:** Writing Nonfiction for Publication. 3 credits.
Workshop course. Intensive practice in advanced nonfiction writing; emphasizes writing for publication. Occasional special topics sections in such forms as autobiography and scientific writing. Offered by English (p. 354). May not be repeated for credit.

**Mason Core:** Capstone (p. 137)

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** ENGL 309/ENGH 382 or ENGL 399/ENGH 399 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENH 468:** Topics in Writing and Rhetoric. 3 credits.
Advanced studies in rhetoric and writing. Introduces key rhetorical terminology and examines how texts construct meaning and how those meanings are determined within social contexts. Topics may include the relationship between rhetorics and poetics, rhetoric and new media, histories of rhetoric, global rhetorics, argument theory, discourse analysis, theories of technical communication, or advanced theories of composition and pedagogy. Notes: May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Satisfaction of University requirements in 100-level English and in Mason Core literature.
**ENGH 489: Proposal Writing and Development.** 3 credits.  
Provides foundation in the skills and knowledge required to effectively create proposals for various types of organizations. Emphasizes best practices in management, presentation, and research skills necessary to find funding, manage proposal efforts, and build relationships with funders. Reviews editing, concision, and technical writing skills required for proposal writers. Offered by English (p. 354). May not be repeated for credit.

**Recommended Prerequisite:** ENGH 302.

**Schedule Type:** Seminar

**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 492: Advanced Fiction Writing Workshop.** 3 credits.  
Workshop intensives practice in creative writing and study of creative process. Intended for students already writing original creative work. Notes: Enrollment is controlled. Submit 8-10 pages of fiction to instructor for review. May be repeated with permission of instructor. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ENGL 398/ENGH 398 and manuscript review.

**Schedule Type:** Lecture

**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 493: Advanced Workshop in Nonfiction.** 3 credits.  
Workshop in varieties of nonfiction, along with creative process and techniques such as research and interview methods. Includes reading and writing of essays, biographies, autobiographies, travel, journalism, etc. Notes: Registration is controlled. Submit 8-10 pages of nonfiction to instructor for review. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ENGH 396, ENGH 399.

**Schedule Type:** Lecture

**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 494: Advanced Poetry Writing Workshop.** 3 credits.  
Intensive practice in the craft of poetry and study of the imagination in creative process. Intended for students already writing original poetry. Notes: Enrollment is controlled. Submit 8-10 pages of poetry to instructor for review. May be repeated with permission of instructor. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ENGL 397/ENGH 397 and manuscript review.

**Schedule Type:** Lecture

**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)

**ENGH 497: Topics in Creative Writing.** 3 credits.  
Intensive practice in creative writing and study of creative process. Workshop course. Concentrates on specialized literary type other than short story or poetry such as playwriting, screenwriting, children's literature, travel literature, autobiography, gothic novel, or translation. Notes: For students already writing original creative work. Students must submit typed manuscript at least one week before registration. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** ENGH 396/ENGH 398 or equivalent and manuscript review. Enrollment is controlled. Contact instructor for manuscript guidelines.

**Schedule Type:** Lecture

**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ENGH 499: Independent Study.** 1-6 credits.  
Intensive study of particular author, genre, period, or critical or theoretical problem in literature or linguistics, to be conducted by student in close consultation with instructor. Student produces at least one substantial piece of written work during semester on research findings. Notes: May be repeated with approval of department. Offered by English (p. 354). May be repeated within the term for a maximum 6 credits.

**Schedule Type:** Independent Study

**Grading:**  
This course is graded on the Undergraduate Regular scale. (p. 82)

**500 Level Courses**

**ENGH 501: Introduction to Professional Writing and Rhetoric.** 3 credits.  
Provides historical and theoretical background in professional writing and editing in a seminar format. Explores professional writing's emergence as a field of scholarship and practice, emphasizes the relationships between rhetorical theories and practice, and introduces students to bibliographic research in the field. Offered by English (p. 354). May not be repeated for credit.

**Registration Restrictions:**  
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 502: Research Methods in Rhetoric and Professional Writing.** 3 credits.
Introduces theory, methods, and ethics of conducting research in rhetoric and professional writing. Students learn to conduct and evaluate research that may include rhetorical analysis, discourse analysis, historical methods, ethnography, user-centered design, document and usability testing, and others. Offered by English (p. 354). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 503: Theory and Practice of Editing.** 3 credits.
Instruction in revising, editing, and preparing specialized writing for printing. Emphasizes methods of achieving clarity, accuracy, and completeness. Lecture and discussion on editing and printing techniques; practical exercise in revision, layout, and production. Notes: May be repeated when topic is different. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 504: Internship.** 1-6 credits.
Under supervision of a faculty director, students report and reflect on their work as interns at organizations of their choosing, usually in writing and/or editing positions. For 3 credits, students work on site at least 135 hours as specified in the agreement developed with the internship supervisor and approved by the faculty director. Notes: Contact the English Department one semester prior to enrollment. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 505: Document Design.** 3 credits.
Theory and practice of using computer programs to design and produce publications including brochures, fliers, newsletters, and small magazines. Includes readings, writing papers, and producing and editing copies and original publications. Offered by English (p. 354). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 506: Research for Narrative Writing.** 3 credits.
Combines study of basic research tools with field work and writing workshop experience. Helps students develop techniques and skills necessary for writing a research-dependent project of sufficient complexity to be of book or long essay length. Emphasis on finding story behind facts, using material from numerous sources. Offered by English (p. 354). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 507: Web Authoring and Design.** 3 credits.
Provides a rhetorical foundation for web authoring and design in professional settings. Teaches basic principles of writing for the web, information architecture, coding for accessibility, and usability testing. Production-oriented component provides instruction in writing valid code and practice with web- and graphic-editing software tools. Offered by English (p. 354). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 508:** Digital Rhetoric. 3 credits.
Provides an examination of major works on digital rhetoric and digital media framed by contemporary rhetorical theories that inform the emergent field of digital rhetoric. Course work includes projects that engage in the design, analysis, and assessment of digital media. Offered by English (p. 354). May not be repeated for credit.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ENGH 602:** *Pedagogical Research.* 3 credits.
Introduces theories of and hands-on experiences for students interested in studying pedagogical practice, classroom environments, and learners in context. Methodologies include ethnography, case study, grounded theory, quasi-experimental, narrative analysis, Activity Theory, Archival Research, and Assessment. Students will examine the relationships between methodological frames, pedagogical context and theories of learning. Offered by English (p. 354). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 604:** *Internship in Folklore.* 1-6 credits.
Unpaid, approved work-study positions at specific sites arranged by interested students and their advisor. Under supervision of faculty advisor, student works as intern with site supervisor in agency of student's choosing, given advisor's permission. Notes: For 3 credits, students work 120 hours on site and write 3,500 words, or equivalent, given contract with advisor. Contact English Department one semester prior to enrollment. Offered by English (p. 354). May not be repeated for credit.
Recommended Prerequisite: A course in folklore, which may be taken concurrently.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ENGH 608: Craft Seminars. 3 credits.
Non-MFA students seeking permission must submit manuscript of original written work in appropriate genre. Various sections offer work in fiction, poetry, and nonfiction, each focusing in different ways on the practices and the craft development of writers. Numerous writing assignments mixed with reading followed by careful analytical and craft discussions. Notes: Assignments vary with genre and specific topic. May be taken concurrently with ENGH 564, 565, 566. Offered by English (p. 354). May be repeated within the term for a maximum 15 credits.

Recommended Prerequisite: Admission to MFA program or ENGL 464/ENGH 494, ENGL 458/ENGH 492, ENGL 489/ENGH 486, or permission of instructor. Non-MFA students must submit manuscript for review prior to registration.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ENGH 609: Online Writing. 3 credits.
Offers a craft seminar in writing for social media and online platforms. Students develop an online identity and presence, and compose work for public dissemination. Numerous writing assignments mixed with reading followed by careful analytical and craft discussions. Offered by English (p. 354). May not be repeated for credit.

Registration Restrictions:

Includes readings and discussion in a wide range of topics related to writing and rhetoric. May focus on a specific theory, method or practice in writing and rhetoric. Notes: May be repeated for credit when topic varies. Offered by English (p. 354). May be repeated within the term for a maximum 12 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**ENGH 695: Northern Virginia Writing Project Inservice Program.** 1-3 credits.
Offered at request of school division or other education agency to assist teachers in improving student writing and use of writing to learn.
Notes: Content varies. May be repeated for credit with permission of department. Offered by English (p. 354). May be repeated within the term.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 696: Northern Virginia Writing Project Teacher/Research Seminar.** 3 credits.
Includes readings and discussion in a wide range of topics related to writing and rhetoric. May focus on a specific theory, method or practice in writing and rhetoric. Notes: May be repeated for credit when topic varies. Offered by English (p. 354). May be repeated within the term.

**Recommended Prerequisite:** ENGL 615/ENGH 615, ENGL 695/ENGH 695

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar
Enrollment is limited to Graduate or Non-Degree level students.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ENGH 697: Composition Theory. 3 credits.
Acquaints classroom teachers with theory relating to writing and teaching composition. Focuses on explaining theories of participants, reading works of leading theorists, and developing statement describing implications of theoretical consistency in teaching writing. Offered by English (p. 354). May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ENGH 699: Workshop in English. 1-3 credits.
Concentrated workshops, educational tours, independent studies, and special seminars dealing with selected topics in writing, linguistics, film, electronic media, and literature written in English. Notes: All tours are optional, and may be replaced by specified work conducted on campus. May be repeated for a maximum of 12 credits with permission of department, but no more than 6 credits of ENGH 699 may be applied to master's degree in English. No more than 3 credits of 699 may be applied to literature requirement for MFA degree. Offered by English (p. 354). May be repeated within the term for a maximum 12 credits.

Recommended Prerequisite: Admission to MFA program or permission of department. Other interested graduate students should contact the English Department at (703) 993-1180.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Creative Writing.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

700 Level Courses

ENGH 701: Research in English Studies. 3 credits.
Introduces research in English studies, including practice in library methods, writing critical bibliography, evaluating issues and problems, and surveying scholarly activities in department. Offered by English (p. 354). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ENGH 702: Research Methods in Rhetoric and Writing. 3 credits.
Explores a variety of text-based and empirical approaches and methods for addressing questions and problems related to public rhetoric and writing programs. Seminar participants work through a complete research design and pilot study. Offered by English (p. 354). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ENGH 705: Literary Theory and Criticism. 3 credits.
Major theories of literature and methods of analyzing and evaluating literary works. Notes: Topics vary. May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ENGH 710: Histories of Institutional Rhetorics. 3 credits.
Examines the development of rhetorics within their historical and institutional contexts. Investigates rhetorical and rhetoricians across the development of oral rhetorics and the shift to written genres, the rise of scientific discourses, and the establishment of educational and bureaucratic organizations. Offered by English (p. 354). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale. (p. 82)

ENGH 722: Composition Pedagogies and Programs in Context. 3 credits.
Examines scholarship on pedagogy, curriculum design and assessment, faculty development, and program management related to the practice of teaching or training writers in an institutional setting: two- and four-year colleges, K-12 schools, and workplace training seminars. Students will complete independent projects analyzing a current or potential writing program. Offered by English (p. 354). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 724: Professional Writing Theory and Research.** 3 credits.
Examines current research in the field and the theories that inform it. Special emphasis is placed on workplace contexts and users in technological contexts. Course may include theories and methods such as activity theory, actor-network theory, complexity theory, cross-cultural rhetoric, digital rhetoric, discourse analysis, ethnography, genre theory, usability, and systems theory. Offered by English (p. 354). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 726: Rhetorical Theory and Public Spaces.** 3 credits.
Covers the major theories of public rhetoric and the public sphere; explores how rhetoric influences public perceptions; examines publics as a site of interpretive mediation. Offered by English (p. 354). May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 740: Seminar in English/Cultural Studies.** 3 credits.
Analyzes historical shifts in literary and cultural discourse or of relationships between literary and nonliterary elements of culture within specific historical moment. Notes: Major research paper required. Topics vary. May be repeated when topic is different with permission of department. Offered by English (p. 354). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 9 credits of graduate English credits, ENGL 701/ENGH 701, or permission of department.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 750: Advanced Workshop in Poetry Writing.** 3 credits.
Intensive practice in craft of poetry for experienced writers. Notes: May be repeated for credit with permission of department. Offered by English (p. 354). May be repeated within the degree.

**Recommended Prerequisite:** Admission to MFA concentration in poetry, ENGL 564/ENGH 564, and ENGL 617/ENGH 617.

**Registration Restrictions:**
Enrollment is limited to students with a major in Creative Writing.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 751: Advanced Workshop in Fiction Writing.** 1-6 credits.
Intensive practice in craft of fiction for experienced writers. Notes: May be repeated for credit with permission of department. Offered by English (p. 354). May be repeated within the degree.

**Recommended Prerequisite:** ENGL 566/ENGH 566, and ENGL 618/ENGH 618.

**Registration Restrictions:**
Enrollment is limited to students with a major in Creative Writing.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 752: Advanced Workshop in Nonfiction Writing.** 1-6 credits.
Intensive practice in craft of nonfiction for experienced writers. Notes: May be repeated for credit with permission of department. Offered by English (p. 354). May be repeated within the degree.

**Recommended Prerequisite:** ENGL 565/ENGH 565 and ENGL 616/ENGH 616.

**Registration Restrictions:**
Enrollment is limited to students with a major in Creative Writing.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**ENGH 750: Projects in Literary Studies.** 3 credits.
Students complete a capstone project guided by instructor and a faculty consultant based on work produced in a previous graduate course. Class meetings focus on building skills in research, revision, and editing, discussing topics related to professionalism both in and out of academia, and revising work in a workshop environment. Students will
Enrollment is limited to Graduate or Non-Degree level students.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis
Grading: This course is graded on the Graduate Special scale. (p. 82)

ENGH 799: Thesis. 1-6 credits.
Students who take ENGH 798 to develop thesis topic and then elect thesis option receive 3 credits for ENGH 799 on completion of thesis. Students who do not take ENGH 798, or who take it to work on project unrelated to thesis, receive up to 6 credits for ENGH 799 on completion of thesis. Offered by English (p. 354). May be repeated within the degree.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
ENGH 897: Directed Research. 1-3 credits.
Reading, research, and writing on a specific project under direction of faculty member. Offered by English (p. 354). May be repeated within the degree for a maximum 9 credits.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Independent Study
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

ENGH 898: Qualifying Exams Seminar. 1-3 credits.
Work on PhD qualifying exams. Offered by English (p. 354). May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Completion of 36 credits in coursework in the writing and rhetoric PhD Program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Independent Study
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

900 Level Courses

ENGH 998: Doctoral Dissertation Proposal. 1-6 credits.
Work on research proposal that forms the basis for the doctoral dissertation. Offered by English (p. 354). May be repeated within the degree for a maximum 12 credits.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

ENGH 999: Doctoral Dissertation. 1-12 credits.
Doctoral dissertation research and writing under direction of student’s dissertation committee. Offered by English (p. 354). May be repeated within the degree for a maximum 21 credits.

Recommended Prerequisite: ENGH 898.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Schedule Type: Dissertation
Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

100 Level Courses

ENGH 100: Special Topics. 0-8 credits.
EAP 100 is to be used as an incubator for special topics courses under development in the Undergraduate Pathway program at INTO Mason. EAP 100 will be used for the various content-based English Language Support courses that are paired with major or content courses required by Undergraduate Pathways students. Language support courses such as EAP 100 run concurrently with credit-bearing undergraduate content course. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 8 credits.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

EAP 102: Language Support for American Cultures. 1 credit.
Academic language support course for Undergraduate Pathways students taking American Cultures. Designed to increase students’ ability to comprehend and respond to readings, discussions, and lectures related to American Cultures. Emphasizes the development of successful strategies for intrapersonal and small/large group communication activities, student familiarity with anthropological and sociological terminology and effective application of reading/annotating strategies. Also listed as PROV 102. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: PROV 105.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EAP 103: Language Support for Public Speaking. 1 credit.
Academic language support course for Public Speaking. Focus on increasing students’ comprehension and use of key grammatical structures, vocabulary, word forms, and reading/annotating strategies in oral speech. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: COMM 100.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EAP 104: Language Support World History. 1 credit.
Academic language support course for Introduction to World History. Focus on increasing students’ comprehension and use of key grammatical structures, vocabulary, word forms, and reading/annotating strategies in literacy/reading. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: HIST 125.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EAP 107: The Grammar of Academic Writing. 3 credits.
This course is designed to improve students’ understanding of written language and to provide mechanisms that allow students to take advantage of this flexible but structured form of communication. Providing this knowledge and these tools will improve students’ abilities to identify and correct grammatical mistakes, write cohesive and coherent paragraphs, and condense essential information-necessary skills for effective academic writing. Offered by INTO Mason (p. 124). May be repeated within the degree.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EAP 108: Language Support for Business in American Society. 1 credit.
Academic language support course for Undergraduate Pathway students taking Business in American Society. This course is designed to increase students’ ability to read and analyze qualitative and quantitative information, understand and use business terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of group discussions, debates, and oral/written critiques of business-related current events. Also listed as PROV 108. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: SOM 100.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EAP 109: College Reading Skills. 1 credit.
Academic reading support for Undergraduate Pathways students in specific pathways. Designed to increase students’ ability to read, summarize, and analyze texts, including information graphics and visuals. Focuses on student comprehension and utilization of discipline-specific genres/terminology and effective literacy practices/strategies in anticipation of group discussions, reading research, and responding to writing assignments. Also listed as PROV 109. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: IT 101.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EAP 111: Language Support for Introduction to Information Technology. 1 credit.
Academic language support for Undergraduate Pathways students taking Information Technology. Designed to increase students’ IT literacy, including familiarity and accurate usage of terms related to digital devices, computer hardware, software, telecommunications, networking and multimedia. Supports students’ oral and written academic English skills in anticipation of class lectures, textbook readings, individual assignments, and online discussion boards. Also listed as PROV 111. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: CS 112.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EAP 112: Language Support for Introduction to Computer Programming. 1 credit.
Academic language support for Undergraduate Pathways students taking Computer Programming. This course is designed to increase students’ ability to respond accurately to computer programming problems in English, understand and use programming terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of class lectures, lab work, individual assignments, and online discussion boards. Also listed as PROV 112. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 3 credits.

Recommended Corequisite: SOM 100.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EAP 113: Language Support for University Physics. 1 credit.
Academic language support course for Undergraduate Pathways students taking program University Physics 1. This course is designed to increase students’ ability to respond accurately to physical problems in English, understand and use mathematical and physics terminology, and utilize oral English fluency and literacy practices/strategies in anticipation of class lectures, lab/recitation work, and online discussion
boards. Also listed as PROV 113. Notes: Students must attain minimum grade of C to fulfill requirements. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 3 credits.

**Recommended Corequisite:** PHYS 160 and PHYS 161.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EAP 114: Language Support for General Chemistry I.** 1 credit.
Academic language support for Undergraduate Pathways students taking General Chemistry I. This course is designed to increase students’ ability to read and comprehend qualitative and quantitative information, understand and use general science and chemistry-related terminology, set-up and solve numerical problems in English, and take notes from oral lectures and textbook chapters. Also listed as PROV 114. Notes: Students must attain minimum grade of C to fulfill requirements. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 3 credits.

**Recommended Corequisite:** CHEM 211.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EAP 115: Language Support for Introductory Geology I.** 1 credit.
Academic language support for Undergraduate Pathways students taking Introductory Geology I. This course is designed to increase students’ ability to read and comprehend qualitative and quantitative information in English, understand and use general science and geology-related terminology, take notes from oral lectures and textbook chapters, and participate in group discussions. Also listed as PROV 115. Notes: Students must attain minimum grade of C to fulfill program requirements. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 3 credits.

**Recommended Corequisite:** GEOL 101.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EAP 120: Linguistics Capstone.** 0 credits.
Required to complete all standard undergraduate pathways. Provides students with opportunity to demonstrate mastery of English language skills in reading, writing, speaking, listening, grammar and/or vocabulary. Builds on work in language support classes. Includes language assessment, feedback on skills, and review of post-program support. Required during second semester of the Undergraduate Pathways program. Also listed as PROV 120. Notes: A passing grade of "S" confirms the student’s English language proficiency is sufficient for degree-seeking study. Offered by INTO Mason (p. 124). May be repeated within the degree for a maximum 0 credits.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale. (p. 82)

### 500 Level Courses

**EAP 503: Interpersonal Communication for International Students: Practicum and Theory.** 2 credits.
The course requires that students use intensive practice in oral communication contexts typical at universities to build knowledge and skills for informal interpersonal communication settings with faculty, peers, and students, and skills needed for formal presentations, class discussion, and tutoring. Readings & assignments cover research on first impression management; informative and explanatory communication; conveying emotional support; listening, and narrative skill. Offered by INTO Mason (p. 124). May not be repeated for credit.

**Recommended Prerequisite:** Completion of undergraduate degree at a university outside of the US.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EAP 504: Advanced English for Academic Purposes Reading and Writing.** 2 credits.
This 8-week course is designed for graduate international students who are studying abroad, emphasizing advanced skill development in graduate-level English for Academic Purposes for reading and writing within their disciplines. Utilizing a multimodal and interactive format, students will complete guided and independent research papers as well as read, discuss and write about excerpts from college texts and academic journals. Notes: In as much as possible, materials for the course will be discipline specific and individualized course goals will be determined by the needs of the students and their cultural experiences. Offered by INTO Mason (p. 124). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to English Language, Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EAP 505: Special Topics in Advanced English for Academic Purposes.** 2 credits.
This special topics course is tailored to international students who received their undergraduate degrees outside the United States. The course provides intensive practice and individualized feedback in advanced communication methods appropriate at the graduate level. Offered by INTO Mason (p. 124). May not be repeated for credit.
Recommended Prerequisite: Completion of undergraduate degree at a university outside of the US.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to English Language, Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the INTO Mason college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

Additional Course Details: Title varies by section and/or semester

EAP 506: Graduate Communication in the Disciplines I. 4 credits.
Students develop strategies for completing research-based writing and presentations in their field and review rhetorical structures and organizational strategies common to US scholarly communications generally and in their particular field. Students will practice strategies at the sentence and discourse levels to increase the clarity, precision, and appropriateness of their communication skills. Group instruction will be supplemented by one-on-one conferencing. Offered by INTO Mason (p. 124). May not be repeated for credit.

Recommended Prerequisite: Completion of undergraduate degree at a university outside of the US.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to English Language, Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the INTO Mason college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EAP 507: Graduate Communication in the Disciplines II. 3-4 credits.
The second course in a series that helps students develop strategies for completing research-based writing and presentations in their field. Students will review rhetorical structures and organizational strategies common to US scholarly communications generally and in their particular field. Students will also practice strategies at sentence and discourse levels to increase the clarity, precision, and appropriateness of their communication skills. Offered by INTO Mason (p. 124). May not be repeated for credit.

Recommended Prerequisite: EAP 506.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the INTO Mason college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EAP 510: Linguistic Capstone. 0 credits.
Course builds on work in language support classes throughout the program and enables students to demonstrate acceptable mastery of their academic English language skills in reading, writing, speaking, listening, grammar, and vocabulary. Students take proficiency assessment receive feedback on skills, and review post-program language support resources. Offered by INTO Mason (p. 124). May not be repeated for credit.

Recommended Prerequisite: Standard pathway students must have completed first semester of program, or at least 9 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Satisfactory/No Credit scale. (p. 82)

Environmental Science and Policy (EVPP)

100 Level Courses
EVPP 110: The Ecosphere: An Introduction to Environmental Science I. 4 credits.
Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and earth sciences in integrated format with lecture, laboratory, and field exercises. Notes: One of two semesters of environmental lab science that fulfills Mason Core science requirements for non science majors. Along with EVPP 111, can be taken in any order. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Mason Core: Natural Science with Lab, Encore:Sustainability (p. 137)
Specialized Designation: Green Leaf Course

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 111: The Ecosphere: An Introduction to Environmental Science II. 4 credits.
Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and earth sciences in integrated format with lecture, laboratory, and field exercises. Notes: One of two semesters of environmental lab science that fulfills Mason Core science requirements for non science majors. Along with EVPP 110, can be taken in any order. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Mason Core: Natural Science with Lab, Encore:Sustainability (p. 137)
Specialized Designation: Green Leaf Course

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 112: Ecosphere: Introduction to Environmental Science II-Lecture. 3 credits.
Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and earth sciences in lecture format, focusing on major environmental issues from a scientific perspective. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Recommended Prerequisite: EVPP 113 (may be taken concurrently)
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 113: Ecosphere: Introduction to Environmental Science II–Lab. 1 credit.
Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and Earth sciences in a hands-on laboratory format, focusing on major environmental issues from a scientific perspective. Offered by Environmental Sci & Pub Policy. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EVPP 112**.
* May be taken concurrently.
** Requires minimum grade of C.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

200 Level Courses
EVPP 201: Environment and You: Issues for the Twenty-First Century. 3 credits.
Introduces broad aspects of human-environmental interactions in the contemporary world. Topics range broadly from global populations and wastewater treatment to environmental law, and genetic engineering. Includes both science and science policy of the environment. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Mason Core: Natural Science Overview, Encore:Sustainability (p. 137)
Specialized Designation: Green Leaf Course

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 210: Environmental Biology: Molecules and Cells. 4 credits.
This course provides environmental science majors with the cellular foundation required for subsequent courses in the BS curriculum with a focus on how biological systems respond to environmental threats. The course emphasizes the connection between cellular processes and a healthy environment, and how this relationship is jeopardized by a variety of chemical and physical environmental perturbations. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Recommended Corequisite: CHEM 211.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

300 Level Courses
EVPP 301: Environmental Science: Biological Diversity and Ecosystems. 4 credits.
This course provides environmental science majors with the necessary background in biological diversity and ecological science required for subsequent courses in the BS curriculum. The course reviews the diversity of life on earth and the structure and functioning of ecosystems and populations. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Required Prerequisite: EVPP 210**.
** Requires minimum grade of C.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 302: Environmental Science: Biomes and Human Dimensions.** 4 credits.
This course provides environmental science majors with the necessary background in biomes and human dimensions required for subsequent courses in the BS curriculum. The course reviews the functioning of aquatic and terrestrial biomes and human interactions with and impacts on the environment. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
**Required Prerequisite:** EVPP 301C.
C Requires minimum grade of C.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 305: Environmental Microbiology Essentials.** 3 credits.
Provides understanding of microbes and their function as a vital part of an environmental education. The role of microbes is central to many environmental issues such as climate change, biodegradation of toxics, wastewater treatment and drinking water contamination. Course provides an introduction to the breadth of microbiology including essential information for students studying environmental problems and their solution. Notes: Laboratory section (EVPP 306) is a corequisite unless previously completed. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 210 and 30 credit hours, or permission of instructor;

**Recommended Corequisite:** EVPP 306.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 306: Environmental Microbiology Essentials Laboratory.** 1 credit.
Laboratory study of environmental microbiology. Course provides an introduction to the microbiological techniques for students studying environmental problems and their solution. Examples include microbiology of natural ecosystems (e.g., Potomac River), bacteria in fresh and estuarine waters and sediments, Indicator organisms (e.g., coliform bacteria), molecular identification of unknown bacteria from nature, and visualization of bacteria in their natural habitat. Notes: Lecture section (EVPP 305) is a corequisite. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 210 and 30 credit hours, or permission of instructor.

**Recommended Corequisite:** EVPP 305.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 309: Introduction to Oceanography.** 3 credits.
Introduction to chemical, biological, and geological aspects of oceanic environment. May include field trips. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 309, GEOL 309.

**Recommended Prerequisite:** Two of the following lab sciences courses are required for a total of 8 credits: [GEOL 101 or 102], [EVPP 110 or 111 or 210], CHEM 211 and 213, [BIOL 103 or 213], [PHYS 160 and 161 or 243 and 244].

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 318: Conservation Biology.** 3 credits.
Introduces science used to identify species in need of conservation, and techniques to manage and protect organisms. Notes: Cannot be taken with Smithsonian Seminar (off campus classes). CONS 401, CONS 411. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 318.

**Recommended Prerequisite:** BIOL 308 or BIOL 310, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 322: Business and Sustainability.** 3 credits.
Examines the types of approaches businesses can take to respond to sustainability concerns. Designed to prepare students for assisting organizations to incorporate sustainability considerations into their strategic decision-making. Notes: Students from multiple disciplines (business, social sciences, natural sciences, humanities, education, etc.) can participate in the class without having had previous courses in management. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 30 credit hours, recommend EVPP 361/GOVT 361 Introduction to Environmental Policy

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 336: Human Dimensions of the Environment.** 3 credits.
Overview of current knowledge regarding human and environment interactions and human ecology. Topics include basic theoretical and conceptual issues, relationship between social and biological sciences, human causes and consequences of environmental change, and contemporary perspectives on environmental issues. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** One of either EVPP 110 or EVPP 111 or GEOL 101 or SOCI 101 or ANTH 114 or 60 credits.

**Schedule Type:** Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 337: Environmental Policy Making in Developing Countries. 3 credits.
Overview of environmental policy process in developing countries around the world. Major focus on understanding distinctive problems and dynamics of environmental policy making in poor countries to generate better policy decisions and management. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: 60 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 338: Economics of Environmental Policy. 3 credits.
Introduction to environmental, resource, and ecological economics for non-economist undergraduates. Covers basic theories of scarce resource allocation and examines conditions under which market allocations are efficient and sustainable. Includes graphical and verbal presentation of theory. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: ECON 100 or ECON 103 or ECON 105 or ECON 110, or permission from instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 350: Freshwater Ecosystems. 4 credits.
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Lectures, field trips, and lab exercises teach physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 350.

Recommended Prerequisite: CHEM 211/213 and CHEM 212/214 or CHEM 155/156 and BIOL 308 or EVPP 301.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 355: Ecological Engineering and Ecosystem Restoration. 4 credits.
Provides definition, classification, and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration (i.e., wetland and river systems), and the use of natural processes to provide ecosystem services to society. Provides students with a systems-oriented perspective on designing and managing ecosystems. Students will study principles in designing field ecological studies, ecological models, ecological engineering, and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with the field wetland mesocosm on the Mason campus. One field trip is required part of the course. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: CHEM 211 and EVPP 301 or BIOL 308; or permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 361: Introduction to Environmental Policy. 3 credits.
Environmental politics and policymaking since the 1970s. Primary focus on United States, with some discussion of global issues. Examines policy strategies and outcomes, ethical and economic debates, political controversies, lawmaking and enforcement, and role of key players. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to GOVT 361.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: 30 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 362: Intermediate Environmental Policy. 3 credits.
Examines environmental issues building on learning objectives from EVPP 361. Focuses on environmental and policy issues in the US and internationally, exploring the politics of nature and the interaction of environmental science and politics and resulting controversy. Risk and uncertainty loom large in most environmental issues. "Natural" disasters as well as direct "man-made" problems will be covered. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to GOVT 362.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: EVPP 361 or GOVT 361 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

EVPP 363: Coastal Morphology and Processes. 4 credits.
Studies global coastal geomorphology and processes with emphasis on U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, and storms; and human activities. Lectures and extended weekend field trips to mid-Atlantic coast. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to GEOL 363.

Recommended Prerequisite: BIOL/EVPP/GEOL 309 or GEOL 317; or 9 credits in geography, including GGS 309.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
**EVPP 377: Applied Ecology. 3 credits.**
Introduces ecosystem concepts and applications to natural and managed ecosystems. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 377.

**Recommended Prerequisite:** 60 credits including 8 credits of biology, geology, or chemistry, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 378: RS: Ecological Sustainability. 4 credits.**
Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 379.

**Mason Core:** Capstone (p. 137)

**Specialized Designation:** Green Leaf Course, Research/Scholarship Intensive

**Recommended Prerequisite:** BIOL 308 or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 395: Undergraduate Research in Environmental Science and Policy. 1-3 credits.**
Original research project. May involve field and lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor’s guidance. Notes: Culminates in final report. Offered by Environmental Science & Policy (p. 679). May be repeated within the degree for a maximum 10 credits.

**Recommended Prerequisite:** 45 credits and at least two upper level science lab courses.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 396: Directed Topic in Environmental Science and Policy. 1-4 credits.**
Study of topics not available in fixed-topics courses. May involve readings, lectures, lab assignments, and tutorials as jointly agreed on by student and instructor. Notes: Culminates in term paper, final exam, or both. Offered by Environmental Science & Policy (p. 679). May be repeated within the degree for a maximum 8 credits.

**Recommended Prerequisite:** 45 credits.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

---

**400 Level Courses**

**EVPP 401: Integrated Environmental Assessment. 3 credits.**
Presents strategic planning at the regional level, and focuses on the methods, format, and content of a Strategic Environmental Assessment (SEA), also referred to as a programmatic environmental impact statement (PEIS). Students will conduct research and develop their own SEA for Shenandoah National Park (NP). Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** 60 credit hours completed.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 402: Applied and Industrial Microbiology. 3 credits.**
Biology of microorganisms of ecological and industrial significance. Includes food production, spoilage and preservation, fermentation technology, waste disposal, water purification, biodeterioration, and decomposition. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 402.

**Recommended Prerequisite:** BIOL 213, 305, 306 or EVPP 210, 305, 306, CHEM 211 and CHEM 213; CHEM 212 and CHEM 214, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 408: Mushrooms, Molds and Society. 3 credits.**
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 408.

**Recommended Prerequisite:** EVPP 110 and 111 or EVPP 210 or BIOL 213.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 409: Medical Mycology. 3 credits.**
Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 409.

**Recommended Prerequisite:** EVPP 110 and 111 or EVPP 210 or BIOL 213.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 413: Histotechniques. 3 credits.**
Introduces theory and methods for the preparation of tissue samples from animal or plant specimens for examination with light or electron...
microscopy. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 210 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 419: Marine Mammal Biology and Conservation.** 3 credits.
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 454, EVPP 519.

**Recommended Prerequisite:** BIOL/EVPP/GEOL 309 or BIOL/EVPP 449; and 60 credit hours.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 420: Marine Mammal Biology and Conservation Field Course.** 1 credit.
This course provides laboratory, seminar sessions and field work to accompany EVPP 419-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 455.

**Recommended Prerequisite:** EVPP 419 or BIOL 454, concurrent enrollment is permitted.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 421: Marine Conservation.** 3 credits.
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. Provides an overview of marine environmental law and policy issues related to marine conservation policy. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 450.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** BIOL/EVPP/GEOL 309.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 423: Beekeeping and Sustainability** 3 credits.
Lectures and hands-on field experiences examining beekeeping as a tool for sustainable development. Also, they will examine the social impact and implications of beekeeping around the world, and explore its current place in the modern socio-economic structure. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 427: Disease Ecology and Conservation.** 3 credits.
Presents the trans-disciplinary discipline of conservation medicine, the study of relationships between organism and ecosystem health and environmental conditions. Topics include infectious and noninfectious diseases, pathogens, processes, and impacts on human, biotic, and ecosystem health, and how to address the consequences of diseases to populations and ecological communities. Notes: This course will co-meet with EVPP 527. Undergraduate students in this course will have separate (shorter) reading and writing assignments and will be graded according to a different rubric than the graduate students. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** 60 credits and BIOL 213 or BIOL/ EVPP 305/306 and BIOL 308 OR EVPP 301, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 429: Environmental Science Communication.** 3 credits.
Communicating environmental science is inherently challenging whether in academia, the public policy realm, or to the general public. The aim of this course is to expose students to the multiple ways environmental science can be communicated. Such exposure will be made both through a theoretical approach by examining science communication literature, as well as through practical, hands-on activities and assignments. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** (p. 82)

**Schedule Type:** Completion of 60 credit hours.

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 430: Fundamentals of Environmental Geographic Information Systems.** 3 credits.
Provides the basic knowledge to explore complex environmental conditions. Notes: Previous knowledge of fundamentals of geography, coordinate systems and map projections is an asset. Knowledge of operating systems, text editor and spreadsheet is required. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 110 and 111 or EVPP 210, and IT 103 or CDS 130, and 60 credits hours; or permission of instructor.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 432: Energy Policy. 3 credits.**
Overview of economic, political, and technological aspects of energy policy development. Students will examine various energy sources in the context of national and global considerations regarding electricity generation, efficiency and conservation, energy economics, and climate change. Updated yearly. The course may include one field trip. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Recommended Prerequisite: BIOL 308 or EVPP 301 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 437: Ornithology. 4 credits.**
Study of evolution, systematics, physiology, ecology and behavior of birds, emphasizing field work. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 437.

Recommended Corequisite: CHEM 211 and CHEM 213; MATH 113 or equivalent; BIOL 308 or EVPP 301; PHYS 243 or permission of instructor.

Recommended Prerequisite: BIOL 308 or EVPP 301 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 438: Mammalogy. 4 credits.**
Study of evolution, systematics, physiology, ecology and behavior of mammals, emphasizing field work. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 438.

Recommended Prerequisite: BIOL 308 or EVPP 301 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 439: Herpetology. 4 credits.**
Study of evolution, systematics, physiology, ecology and behavior of reptiles, emphasizing field work. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 439.

Recommended Prerequisite: BIOL 308 or EVPP 301 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 440: Field Environmental Science. 0-4 credits.**
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site. Notes: Students bear cost of required field trips. May be repeated with permission of Environmental Science and Policy. Offered by Environmental Science & Policy (p. 679). May be repeated within the term for a maximum 9 credits. Equivalent to BIOL 440.

Recommended Prerequisite: EVPP 301 or permission of instructor.

Schedule Type: Independent Study
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 442: Urban Ecosystems and Processes. 4 credits.**
Provides an overview of the challenges and opportunities that urban environments present to the plants and animals inhabiting cities and the ways that those organisms and entire ecosystems respond. Includes ecosystem ecology for engineered ecosystems, along with reviews of urban metabolism, energy budgets, water cycles, and soil ecology. Students design and conduct a small-scale green infrastructure experiment/project on campus. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 442.

Recommended Corequisite: Prereqs: CHEM 211 and CHEM 213; MATH 113 or equivalent; BIOL 308 or EVPP 301; PHYS 243 or permission of instructor.

Recommended Prerequisite: EVPP 210 or both EVPP 110 and 111; and CHEM 211 and CHEM 212; and 60 credit hours; or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 445: Principles of Environmental Toxicology. 3 credits.**
Explores basic principles of toxicology with an emphasis on the environment. Includes the history and scope of the field; absorption, distribution, metabolism and excretion of toxicants; mechanisms of toxic action; genetic toxicology; ecotoxicology as well as specific examples important toxiciants. Introduces regulatory toxicology and human and ecological risk assessment. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Recommended Prerequisite: EVPP 210 or both EVPP 110 and 111; and CHEM 211 and CHEM 212; and 60 credit hours; or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale. (p. 82)
**EVPP 449: Marine Ecology.** 3 credits.
Plants and animals of marine environments and physical and chemical conditions that affect their existence. Notes: Will be cross-listed with BIOL 449. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 449.

**Recommended Prerequisite:** BIOL 308 or EVPP 301 and BIOL/EVPP/GEOL 309; or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 451: Fungi and Ecosystems.** 3 credits.
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 301 or BIOL 308 or EVPP/BIOL 305/306; or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 460: Infectious Diseases of Wildlife.** 3 credits.
During this course, infectious diseases of wildlife will be examined with emphasis on causes and mechanisms, pathobiology, ecology and epidemiology and population significance. We will explore methods of diagnosis, control, prevention and outbreak investigation as they apply to management and conservation of wildlife populations. Also, diseases crossing species barriers will be examined. Note: Course will co-meet with BIOL 560/EVPP 560. Graduate students in this course will be graded according to a different rubric than the undergraduate students. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** 60 credits plus BIOL 308 or EVPP 301 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 472: Tools and Techniques for International Development.** 3 credits.
Systematic and comprehensive understanding of key concepts and skills essential to effective project management in international development. The skill set learned is oriented towards a ‘how-to-do/functional’ approach that can be applied to projects on environment, poverty reduction, green growth, health, climate change adaptation and mitigation, social development and more. Notes: This course will co-meet with EVPP 572. Graduate students in this course will be graded according to a different rubric than the undergraduate students. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 475: Global Biodiversity Governance.** 3 credits.
Study global biodiversity governance from a political/policy science perspective. Regime and governance literature, and empirical examples including intergovernmental policy, such as biodiversity-related climate change policy (REDD+), and certification standards, such as the Forest Stewardship Council (RSC), will be examined, with guest lecturers and a simulation of an intergovernmental negotiation. Designated a Green Leaf Course. Notes: This course will co-meet with EVPP 575. Undergraduate students in this course will be graded according to a different rubric than the graduate students. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Specialized Designation: Green Leaf Course**

**Recommended Prerequisite:** One (environmental) social science course.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 480: Sustainability in Action.** 4 credits.
Provide students with valuable and tangible experience in practical aspects of realizing sustainability goals and to transfer theory into practice. Allows students to engage in real-world, sustainability-related projects that provide benefits for a target community. Identify and attempt to solve a sustainability-related problem or address a sustainability-related need in a specific target community. Notes: Capstone course for the Sustainability Minor see Environmental Science and Policy department listing for details. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Mason Core:** Encore:Sustainability, Synthesis (p. 137)

**Specialized Designation:** Green Leaf Course, Scholarly Inquiry

**Recommended Prerequisite:** Completed or concurrent enrollment in all other required Mason Core courses; completion of 60 credits

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**EVPP 490: Special Topics in Environmental Science and Policy.** 0-4 credits.
Studies selected topics in environmental science and policy using lectures, guest lectures, student presentations, or laboratory exercises. Notes: Topics vary, but each offering has coherent syllabus. May be repeated for credit if topics are significantly different. Offered by Environmental Science & Policy (p. 679). May be repeated within the degree for a maximum 8 credits.

**Recommended Prerequisite:** 60 credits and permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**Additional Course Details:** Title varies by section and/or semester

**EVPP 494: Internship.** 1-3 credits.
Involves off-campus, professional student work with approved agencies, institutions, non-profits, or businesses. Work must produce one or more academic products such as: comprehensive report, departmental presentation, poster, or article. At least one substantive piece of work will
be assessed for each internship credit being undertaken. Scope of work, credits, and academic product(s) are determined in consultation with the internship instructor. Notes: Credit will be assigned based on the number of hours participating in the internship each week: 1 Credit = 4-6 hours/week, 2 Credits = 8-12 hours/week, 3 Credits = 12-18 hours/week. Offered by Environmental Science & Policy (p. 679). May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** 60 credits and permission of instructor.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale. (p. 82)

**500 Level Courses**

**EVPP 503: Field Mapping Techniques.** 3 credits.
Basic techniques for collecting, recording, and plotting spatial field data, including topographic maps, compass, transit, alidade, and global positioning systems. Field work and field-based research project. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to GEOL 506, GEOL 553.

**Recommended Prerequisite:** MATH 105 or equivalent, EVSC 110, GGS 102, or GEOL 101 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 505: Selected Topics in Environmental Science.** 0-4 credits.
Topic depends on instructor's specialty. Offered by Environmental Science & Policy (p. 679). May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** A course in Geology or Ecology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 515: Molecular Environmental Biology I.** 3 credits.
Introduces molecular environmental biology covering basic concepts of molecular biology, molecular evolution, and bioinformatics, and application to problems in molecular and environmental biology. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** Introductory biology and genetics or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
**EVPP 519: Marine Mammal Biology and Conservation**. 3 credits.
This course provides laboratory, seminar sessions and field work to accompany EVPP 519-001 marine mammal biology and conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad, including in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** Course in Ecology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 520:** Marine Mammal Biology and Conservation Field Course. 1 credit.
This course provides laboratory, seminar sessions and field work to accompany EVPP 519-001 marine mammal biology and conservation. Field work includes several day-long boat trips. The field course may take place in the US or abroad, including in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Corequisite:** EVPP 519.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

**EVPP 521: Marine Conservation.** 3 credits.
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. Provides an overview of marine environmental law and policy issues related to marine conservation policy. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** Basic algebra skills.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 524:** Introduction to Environmental and Resource Economics. 3 credits.

**Recommended Prerequisite:** Basic algebra skills.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** EVPP 524/GGS 524 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 527: *Disease Ecology and Conservation.* 3 credits. Presents the trans-disciplinary discipline of conservation medicine, the study of relationships between organism and ecosystem health and environmental conditions. Topics include infectious and noninfectious diseases, pathogens, processes, and impacts on human, biotic, and ecosystem health, and how to address the consequences of diseases to populations and ecological communities. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** Courses in microbiology, ecology, or conservation, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 529: *Environmental Science Communication.* 3 credits. Communicating environmental science is inherently challenging whether in academia, the public policy realm, or to the general public. The aim of this course is to expose students to the multiple ways environmental science can be communicated. Such exposure will be made both through a theoretical approach by examining science communication literature, as well as through practical, hands-on activities and assignments. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 531: *Land-use Modeling Techniques and Applications.* 3 credits. Surveys literature on spatially explicit empirical models of land-use change. Offers hands-on experience developing and running simple models. Includes statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to GGS 531.

**Recommended Prerequisite:** GGS 550 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 533: *Energy Policy.* 3 credits. Discusses resource options in the context of 3E’s: energy security, environment, and economics. Examines how these considerations apply to 3 P’s developed by Jennifer Sklarew: priorities, politics, and process. Examines sustainability and environmental angles of resources, reasons for specific nations’ policy choices, and possibilities for future energy policies. Considers how energy policies can create cooperation and conflict domestically and internationally. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 536: The Diversity of Fishes.** 3 credits.
This course delves into the biology and ecology of fishes. Subjects of this class include fish anatomy, taxonomy, evolution, habitat adaptations, community dynamics, and ecosystem interactions. The course will also touch on human impacts on fishes, and conservation. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** Course in ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 537: Ornithology.** 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** Course in ecology or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 538: Mammalogy.** 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing fieldwork. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 538.

**Recommended Prerequisite:** BIOL 303 and BIOL 307 or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 539: Herpetology.** 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** Course in ecology or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 542: Urban Ecosystems & Processes.** 4 credits.
Provides an overview of the challenges and opportunities that urban environments present to the plants and animals inhabiting cities and the ways that those organisms and entire ecosystems respond. Includes ecosystem ecology for engineered ecosystems, along with reviews of urban metabolism, energy budgets, water cycles, and soil ecology. Students design and conduct a small-scale green infrastructure experiment/project on campus. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** CHEM 211 and 213; MATH 113 or equivalent; BIOL 308 or EVPP 302; PHYS 243 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 543: Tropical Ecosystems.** 4 credits.
Terrestrial, aquatic, and marine ecosystems in the tropics, emphasizing plant communities, plant-animal interactions, and role of humans in the tropics. Notes: Requires field trip to tropics as part of lab. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 543.

**Recommended Prerequisite:** A course in ecology and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 545: Principles of Environmental Toxicology.** 3 credits.
Explores basic principles of toxicology with an emphasis on the environment, including the history and scope of the field; absorption, distribution, metabolism, and excretion of toxicants; mechanisms of toxic action; genetic toxicology; and ecotoxicology, as well as specific examples of important toxicants. Introduces regulatory toxicology and human and ecological risk assessment. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** Courses in ecology, physiology and chemistry; or permission of instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 549: Marine Ecology.** 3 credits.
Presents the Ecology of Marine Ecosystems including from the intertidal zone to the deep sea, and from coral reefs to seagrass beds and polar seas. Overviews the evolutionary characteristics and ecological processes and community structure of species and their habitats; and special problems that confront marine organisms due to anthropogenic change. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** EVPP or BIOL 308 and BIOL/EVPP/GEOL 309 (or the equivalent), or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 550: Waterscape Ecology and Management.** 3 credits.
Studies physical, chemical, and biological components of freshwater ecosystems with emphasis on streams, rivers, and lakes; links between watersheds and freshwater ecosystems; and impact of human management. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 550.

**Recommended Prerequisite:** A course in chemistry and a course in ecology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 551: Fungi and Ecosystems.** 3 credits.
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 559.

**Recommended Prerequisite:** BIOL 304 and/or a course in microbiology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 555: Lab in Waterscape Ecology.** 1 credit.
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 555.

**Recommended Prerequisite:** EVPP 550 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 560: Infectious Diseases of Wildlife.** 3 credits.
Examines infectious diseases of wildlife with emphasis on causes and mechanisms, pathobiology, ecology and epidemiology and population significance. Explores methods of diagnosis, control, prevention and outbreak investigation as they apply to management and conservation of wildlife populations. Also, diseases crossing species barriers will be examined. Note: Course will co-meet with BIOL 460/EVPP 460. Offered by
EVPP 563: Coastal Morphology and Processes. 4 credits.
Studies global coastal geomorphology and processes, emphasizing U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, storms; and human activities. Lecture, extended weekend field trips to mid-Atlantic coast. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to GEOL 563.

Recommended Prerequisite: Course in Geology, Oceanography, Marine Science, or Physical Geography; or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 575: Global Biodiversity Governance. 3 credits.
Study global biodiversity governance from a political/policy science perspective. Regime and governance literature, and empirical examples including intergovernmental policy, such as biodiversity-related climate change policy (REDD+), and certification standards, such as the Forest Stewardship Council (FSC), will be examined, with guest lecturers and a simulation of an inter governmental negotiation. Designated a Green Leaf Course. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Specialized Designation: Green Leaf Course

Recommended Prerequisite: One (environmental) social science course.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 577: Biogeochemistry: A Global Perspective. 3 credits.
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to the global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

Recommended Prerequisite: A course in ecology and a course in chemistry, or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 581: Estuarine and Coastal Ecology. 3 credits.
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 581.

Recommended Prerequisite: Course in ecology and permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 582: Estuarine and Coastal Ecology Laboratory. 1 credit.**
Provides training in field measurement of physical and chemical parameters, and collection and identification of local organisms. Emphasizes the practice of ecological field research. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 582.

**Recommended Corequisite:** EVPP/BIOL 581.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**600 Level Courses**

**EVPP 607: Fundamentals of Ecology. 3 credits.**
Overview of concepts in physiological, population, community, ecosystem, biogeographical and human ecology. Notes: Restricted to graduate students with little or no background in ecology. Students who have taken BIOL 307 or the equivalent elsewhere are ineligible for this course. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 607.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 608: Introduction to Environmental Social Science. 3 credits.**
The course Environmental Social Science - ESS - aims to provide insight into the some of the most relevant social sciences and social scientific perspectives for studying environmental issues. The course introduces students to different social scientific disciplines. They will also learn about different social scientific theoretical perspectives and concepts, which they will apply in a research project. Designated a Green Leaf Course. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 610: Bioremediation: Theory and Applications. 3 credits.**
Provides basis for understanding proper application of bioremedial technologies to treatment of hazardous wastes. Includes evaluation of data to determine successful treatment. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit. Equivalent to BIOL 610.

**Recommended Prerequisite:** Course in microbiology and either organic chemistry or biochemistry or Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 615: Molecular Environmental Biology II. 4 credits.**
Applied course covering theory and methodology of molecular environmental biology, including analysis of selected case studies in conservation biology of macro-organisms, molecular systematics, and microbial ecology. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** EVPP 515 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)
EVPP 619: *The Challenge of Biodiversity*. 3 credits.
The Challenge of Biodiversity examines the science and policy of biodiversity conservation, through case studies, current events, guest speakers, class discussion, reading and assignments. Emphasis is placed on problem solving, communication skills and critical thinking. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** 6 credit hours of graduate course work or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 620: *Development of U.S. Environmental Policies*. 3 credits.
Examines nature and historical development of environmental policy in the United States, including consideration of social, political, economic and environmental factors, and ways it is expressed and implemented. Also considers sustainability and emerging issues. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 8 graduate credits including graduate course in policy process and course in ecology; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 621: *Overview of Biodiversity Conservation*. 3 credits.
Lectures, reading assignments, class discussions, and orally presented and written case studies to explore what biodiversity is, why it is important, how conservation has evolved, and status today. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** 8 credits of graduate environmental policy and/or science, including ecology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 622: *Management of Wild Living Resources*. 3 credits.
Examines management of different types of wild living resources: animal and plant, aquatic and terrestrial. Reviews status of resources, analyzes factors that have led to present situation, and considers what may be required to achieve effective and sustainable management. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 8 graduate credits of ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 623: *Translating Environmental Policy into Action*. 3 credits.
Guest lecturers, class discussions, written and orally presented case studies, and assigned reading to identify and analyze factors involved in moving from science and policy to concrete action. Provides understanding of basic principles, skills, and strategies. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Recommended Prerequisite:** 8 credits of graduate environmental policy and/or science, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

EVPP 626: *Environment and Development in Asia*. 3 credits.
Examine environment and development in selected countries of South, Southeast, and East Asia. Reviews relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and
sustainable results. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** A course in policy process, a course in international development and a course in ecology, or Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale. (p. 82)

**EVPP 627: Environmental Policy in Latin America.** 3 credits.
Examine environmental policy in Latin America. Reviews evolution of environmental policy and relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results. Offered by Environmental Science & Policy (p. 679). May not be repeated for credit.

**Specialized Designation:** Green Leaf Course

**Recommended Prerequisite:** 8 graduate credits in policy process, international development, and ecology; or permission of instructor.
