

# GLOBAL SYSTEMS MINOR

**Banner Code:** GLOS

## Academic Advising

359 Research Hall  
Fairfax Campus

Global systems have become increasingly important to the way we live and work, and a global perspective makes us more aware of how we are connected to others around the world and to the whole of nature.

The interdisciplinary minor in global systems is designed to complement virtually any undergraduate major. It works well for majors in business disciplines, economics, languages, geography, government and international politics, history, and other disciplines that take a global view. Students in professional programs learn to connect their professional concerns to global issues of health care, trade and finance, or technology. Students in the liberal arts gain insights into their disciplines as they learn how the arts, humanities, sciences, and social sciences are affected by global issues such as demographic change, telecommunications, and environmental protection.

Other globally oriented courses may also fulfill or substitute for the requirements of this program with written permission of the coordinator prior to registration.

This is an interdisciplinary minor offered by the Schar School of Policy and Government and the College of Humanities and Social Sciences.

## Faculty

Lopez-Santana (minor advisor)

## Admissions & Policies

## Policies

Students must complete all coursework with a minimum GPA of 2.00. At least 9 credits must be at the 300 level or above. Eight credits of coursework must be unique to the minor.

For policies governing all minors, see AP.5.3.4 Minors.

## Requirements

## Minor Requirements

Total credits: 18

## Required Course

Code	Title	Credits
Select one course from the following:		
GLOA 101	Introduction to Global Affairs (Mason Core)	3
