Equal Opportunity/Affirmative Action

George Mason University is an Equal Opportunity/Affirmative Action institution. See General Policies section in this catalog for a full statement of the university's Equal Opportunity/Affirmative Action policies.

The Catalog

Although this catalog was prepared on the basis of the best information available at the time of publication, all information, including statements of tuition and fees, course offerings, and admissions and graduation requirements, is subject to change without notice or obligation.

The catalog is produced by University Publications in cooperation with the Office of the Provost.

Academic Calendar
Academic Calendar, 1990-91

Fall Semester 1990

January 2
Last day for filing international student (immigrant status) undergraduate admissions applications for fall 1990.

January 15
Music major auditions and music competency placement tests (by appointment).

January 15 and 16
Foreign language placement test.

February 1
Last day for filing freshman undergraduate admissions applications for fall 1990.

February 1
Last day for filing D.A.Ed. admissions and Graduate School fellowship applications for fall 1990.

February 1
Last day to apply for acceptance to the School of Business Administration for summer 1990.

February 15
Last day for filing Psy.D. admissions and Graduate School fellowship applications for fall 1990.

February 15
Last day for filing Graduate School fellowship applications for M.F.A. in creative writing for fall 1990.

March 1
Last day for filing D.N.Sc. admissions and Graduate School fellowship applications for fall 1990.

March 5
Music major auditions (by appointment).

March 12 and 13
Foreign language placement test.

March 15
Last day for filing School of Nursing junior standing applications for fall 1990.

March 15
Last day for filing transfer undergraduate admissions applications for fall 1990.

March 19-23
Foreign language placement test.

April 1
Last day for filing Ph.D. biology, Ph.D. economics, and D.P.A. admissions and Graduate School fellowship applications for fall 1990.

April 2
Music major auditions (by appointment).

April 2 and 3
Foreign language placement test.

April 6
Dance major auditions (by appointment).

April 7
University Day.

April 9, 18, 26
Foreign language placement test.
May 1
Last day for filing applications for fall 1990 admission to doctoral program in information technology.

May 1
Last day for filing for fall 1990 admission to master's program in conflict management and doctoral program in conflict analysis and resolution.

May 1
Last day for filing Graduate School fellowship applications for fall 1990.

May 1
Music major auditions.

May 22-24
Foreign language placement test.

June 11
Music major auditions (by appointment).

June 11-15
Foreign language placement test.

June 11-15, June 25-30
Orientation programs and placement testing for undergraduates; early registration for certain newly admitted students (by invitation only).

June 25-29
Foreign language placement test.

June 29
Art portfolio reviews (by appointment).

July 1
Last day to apply for acceptance to the School of Business Administration for fall 1990.

July 2
Earliest date for submission of undergraduate application for spring and fall semesters 1991.

July 4
Independence Day observed; university closed.

July 5
Music major auditions (by appointment).

July 9-13
Orientation program and early registration for certain newly admitted students (by invitation only).

July 9-13
Foreign language placement test.

July 15
Master's theses and doctoral dissertations due in Office of the Graduate Dean for August graduation.

July 16
Start counseling for fall extended studies enrollees. Call for appointment on or after July 5.

July 16-20
Orientation program and early registration for certain newly admitted students (by invitation only).

July 16-20
Foreign language placement test.

August 8
Tuition and fees due for early registered students (payment with late fee will be received until August 19).

August 17
BIOL 124, 125 examination for nurses.

August 19
Fall registrations canceled for early registered students who have not made arrangements for payment with cashier (canceled students who do not reregister for fall classes are assessed a $20 administrative fee).

August 20
Music competency placement tests (by appointment).

August 20
Art portfolio review for art majors (by appointment).

August 20-21
Welcoming days, orientation programs for new faculty and for certain newly admitted students (by invitation only).

January 28
Last day for a full tuition refund (less $20 fee).

February 1
Last day for filing freshman undergraduate admissions applications for fall 1991.

February 1
Last recommended date for new students filing the Financial Aid Form (FAF) for fall 1991.
February 1
Last day to apply for acceptance to the School of Business Administration for fall 1991.

February 1
Last day for filing D.A.Ed. admissions and Graduate School fellowship applications for fall 1991.

February 4
Last day for schedule adjustment for spring classes.

February 4
Last day for partial tuition refund, second week.

February 8-28
Pick up spring bachelor’s, master’s, and doctoral degree and certificate applications at Office of Student Records (application must be completed and returned with fee no later than February 28).

March 6-8
Foreign language placement test.

March 8-28
Pick up summer bachelor’s degree applications at Office of Student Records (applications must be completed and returned with fees no later than March 28).

March 8-April 28
Pick up summer master's and doctoral degree applications at the Office of Student Records (applications must be completed and returned with fee no later than April 28).

March 10
Third deferred tuition payment due.

March 10-17
Mid-semester recess.

March 15
Last day for filing transfer undergraduate admissions applications for fall 1991.

March 15
Deadline for application for junior standing in nursing for fall 1991.

March 18, 19
Foreign language placement test.

March 25-29
Foreign language placement test.

March 29
Art portfolio reviews (by appointment).

March 30
Master’s theses and doctoral dissertations due in Office of the Graduate Dean for May graduation.

April 1
Deadline for financial aid applications for summer 1991.

April 1
Last recommended date for filing the Financial Aid Form (FAF) for returning upperclassmen, fall 1991.
**April 1**
Last day for filing D.P.A., Ph.D. biology, and Ph.D. economics admissions and Graduate School fellowship applications for fall 1991.

**April 1-5**
Foreign language placement test.

**April 1**
Music major auditions (by appointment).

**April 5**
University Day.

**April 9, 17, 25**
Foreign language placement test.

**April 12**
B.F.A. in dance auditions (by appointment).

**April 19**
Mason Day.

**May 1**
Last day for upperclassmen to submit completed financial aid requirements for priority consideration of aid for fall 1991.

**May 1**
Last day for filing for fall 1991 admission to master's program in conflict management and doctoral program in conflict analysis and resolution.

**May 1**
Last day for filing Graduate School fellowship applications and for admission to doctoral program in information technology for fall 1991.

**May 4**
Last day of classes.

**May 6**
Music major auditions (by appointment).

**May 6-13**
Examinations (for times and snow day make-up, see Schedule of Classes).

**May 18**
Spring commencement.

---

**May 27**
Memorial Day observed; university closed.

**May 28**
Summer Session begins.

**June 1**
Last day for filing EXCEL admission applications.

**June 17-21, 24-28**
Orientation and registration for new undergraduates (by invitation).

**June 17-21**
Foreign language placement testing for undergraduates.

---

**Summer Session 1991**
Summer session consists of four terms of five or eight weeks from May 28 to August 1. More than 600 day or evening classes are scheduled, making it possible to earn up to 14 credits. For details, consult the Summer Session Catalog, available in early March.

http://catalog.gmu.edu
Profile of George Mason University
George Mason University is a dynamic, forward-looking institution that provides a diverse and interactive curriculum to educate students for life in a rapidly changing, highly technical world. Approximately 20,000 students study in close to 100 degree programs at the undergraduate, master's, doctoral, and professional levels. By emphasizing high technology, public policy, and the fine and performing arts, the university has formed links with the community by meeting its needs while taking advantage of the best it has to offer in people and resources. Its innovative programs and visionary outlook have attracted a faculty of world-renowned scholars and teachers.

Both George Mason and surrounding Fairfax County have experienced phenomenal development over the past several years. From its beginning in 1957 as a two-year branch of the University of Virginia, George Mason has grown into a comprehensive institution offering degrees through the doctoral level. From a rural suburb of Washington, D.C., Fairfax County has developed into a center of high technology enterprise, promising to rival the West Coast's Silicon Valley and the Boston area's Route 128 corridor.

The university's growing stature and reputation are exemplified by the presence of Virginia's first Nobel laureate, economist James Buchanan. The George Mason professor won the 1986 Nobel Prize in economics for his public choice theory of political decision making. Buchanan is executive director of the university's Center for Study of Public Choice, which applies scientific economic methods to the "public choice behavior" of voters, party leaders, and other politicians, lobbyists, and bureaucrats. This center and 35 other GMU centers and institutes enhance university scholarship and contribute, both directly and indirectly, to the intellectual growth of the George Mason student.

Location
Located in Northern Virginia, George Mason is convenient to all the resources of the nation's capital and the greater Washington, D.C., metropolitan area. Situated on 583 wooded acres near the city of Fairfax, the university's Main Campus combines the quiet of a suburban setting with accessibility to Washington's libraries, galleries, and museums; Virginia's historic sites; and Fairfax County's high-technology firms. Metrorail, the Washington area's subway system, enables GMU riders to reach the U.S. Capitol in 35 minutes. It also provides a quick ride to GMU's 55-acre Arlington Campus, which houses the law school, a professional center, and a conference center.

Programs
The university's main academic divisions are the College of Arts and Sciences, College of Education and Human Services, School of Business Administration, School of Information Technology and Engineering, School of Nursing, Graduate School, School of Law, and School of Continuing and Alternative Learning. GMU offers nearly 100 degree programs, including 53 undergraduate, 35 master's, 9 doctoral, and a juris doctor degree.

Many innovative and distinctive programs are available. For example, the university's Plan for Alternative General Education (PAGE), an interdisciplinary program, received the 1986 G. Theodore Mitau Award for Innovation and Change in Higher Education from the American Association of State Colleges and Universities. The George Mason English Department, with several noted writers on its faculty, is establishing a national reputation. Its seminars and workshops attract many internationally known authors as workshop leaders and seminar speakers.

Students
The majority of the university's approximately 20,000 students are from Virginia, with the other 49 states and 81 foreign countries well represented in the student body. While full-time undergraduates, 18 to 24 years in age, make up the largest student group, part-time graduate and undergraduate students, 25 and up, are growing in numbers. George Mason welcomes qualified students with a wide range of interests and backgrounds.

http://catalog.gmu.edu
Faculty
The university's 641 full-time instructional faculty members are experts in a broad range of fields, who have published widely, contributed to major research findings, and consulted with government and business. The faculty includes a Nobel laureate, winners of awards from the Guggenheim Foundation and the National Endowments for the Arts and the Humanities, and winners of Fulbright Awards and Mellon Fellowships.

Of particular interest to undergraduates are the Robinson Professors, outstanding scholars in the liberal arts and sciences who have come to George Mason from prestigious positions elsewhere. They are concerned with broad and fundamental intellectual issues, and are dedicated to undergraduate teaching. The Schedule of Classes printed every semester gives details about courses being taught by Robinson Professors.

Campus Facilities
George Mason has matched its rapid development with a carefully planned building program. Its academic facilities include modern classroom buildings and state-of-the-art scientific laboratories and computer centers supporting student class work and faculty research.

Several state-of-the-art mainframe computers, including IBM 4381 and Digital VAX 8820 and 8530 systems, provide large-scale, contemporary software environments. Several hundred microcomputers (primarily IBM PC and AT compatibles) and terminals are available for student use in general purpose computer laboratories in many of the academic classroom buildings, the library, dormitories, and other key locations, providing access to a variety of microcomputer-based software and to the mainframes. Additional computing facilities, used for special applications such as artificial intelligence, computer graphics, elementary and secondary teacher education, library searching, and English composition, are also available. Students have ready access to computing throughout the campus by means of MASONet, a campus-wide data communications network. All academic buildings are linked to the central Computer Center through MASONet, and a student with the capability at home can dial-in to the network.

Automation also aids students using the university's library facilities. The five-story Fenwick Library is a leader in the field of applying computerized automation to library functions and services. XLibris, the on-line library data management system, is available on the IBM 4381 for patron use in the library and from other campus locations. Also available is microcomputer-based access to more than 300 databases of interest to researchers in all fields. Combined university library facilities, including Fenwick Library on the Main Campus and the Law Library at the Arlington Campus, house collections of approximately 900,000 volumes, with annual additions of 20,000 books. Periodical subscriptions total 7,600. In addition, the library is a member of the Washington Research Library Consortium.

A second Science and Technology Building is under construction on the Main Campus, and a new Arts Center recently opened. The Center, expected to become a cultural focal point in Northern Virginia, is featuring international entertainers for its premiere season in 1990. The Harris Theatre, the Experimental Theatre in the new Performing Arts Building, and the 2,000-seat concert hall in the Arts Center provide ample space for performing arts presentations on campus.

The Patriot Center, a 10,000-seat sports and entertainment arena, provides a spacious home for George Mason's major campus and varsity athletic activities and benefits the larger Northern Virginia community. The center is designed for basketball, indoor soccer, concerts, and other sports and entertainment events, as well as large convocations such as commencement.

The multipurpose Sports and Recreation Complex features 64,000 square feet of space indoors, including a 200-meter track; basketball, tennis, handball/raquetball, and volleyball courts; a baseball and softball diamond and batting cage; a weight room; saunas; and golf and archery nets. Outdoor features include a 400-meter track, a baseball diamond, and soccer and other playing fields.

The university's dormitory buildings house approximately 3000 students. A variety of dining facilities, meeting rooms, a bank, the campus bookstore, and other student services are available in George Mason's two student unions.

Arlington Campus Professional Center and Conference Center
The Arlington Campus Professional Center and Conference Center are on the third floor of the Arlington Campus building, 3401 North Fairfax Drive, near the Virginia Square-GMU Metro Station (Orange Line).

Both graduate and undergraduate courses are offered at the Professional Center, including several liberal arts undergraduate courses. Most credit courses are taught in convenient one-per-week sessions, with beginning times of 4:30, 6:00, and 7:20 p.m. Non-credit courses are scheduled from 8:00 a.m. to 4:00 p.m. Approximately 300 non-credit courses are taught in the Professional Cen-
Professional Programs and Activities

School of Law
The School of Law is at the Arlington Campus, 15 minutes from downtown Washington via the Metrorail's orange line. The school offers programs leading to the first professional degree in law, the juris doctor. Full-time faculty members teach most courses in both the day and evening divisions. The school is fully accredited by the American Bar Association and is a member of the Association of American Law Schools.

The curriculum provides the basic knowledge and skills necessary for practice in any state. Many courses are problem oriented or involve extensive writing. The faculty includes perhaps the largest concentration of law and economics scholars in the United States.

The School of Law offers an innovative series of specialty tracks—in patent law, corporate and securities law, and banking and financial services—that allow students to supplement their general legal education with in-depth study of a specialized area of practice. Two additional tracks, real estate finance and international trade law, are being developed.

For more information, see the School of Law catalog or write or call George Mason University School of Law, Admissions Office, 3401 N. Fairfax Drive, Arlington, VA 22201-4498; (703) 841-2640.

George Mason University Press
The George Mason University Press provides a scholarly publishing dimension to the university's overall mission of creating and disseminating knowledge through teaching, research, and publications. The GMU Press publishes monographs, books, research reports, conference proceedings, symposia, and reference works developed by local faculty and by authors throughout the world of scholarly endeavor. Among its publications, the press issues an annual series of lectures presented on The Legacy of George Mason. GMU Press books are advertised, exhibited, promoted, and sold worldwide by the exclusive agent of the press, University Publishing Associates.

Visiting the Campuses
Visitors are always welcome at the university, and prospective students are especially encouraged to visit the campuses, preferably while the university is in session. Administrative offices are open Monday through Friday, but because hours vary, appointments are suggested.

Parking on campus is by permit or decal only, Monday through Friday from 7 a.m. to 8 p.m. Decals are not required on weekends. Parking places are provided for disabled persons. Parking permits and assistance in parking are available at both campuses through the Parking Services office and Finley Circle information booth.

Accreditation
George Mason University is fully accredited by the Southern Association of Colleges and Schools to award bachelor's, master's, and doctoral degrees, and is a member of the Council of Graduate Schools in the United States.

Mission
The mission statement of the Board of Visitors reads as follows:

George Mason University will provide superior, traditional education enabling students to develop critical and analytical modes of thought and to make rigorous, honorable decisions. The university seeks to prepare students to interpret the complex questions facing them and society. It further seeks to meet the needs of students by providing the opportunity for innovative educational methods and programs; and it will enhance these programs with undergraduate, graduate, and professional courses of study that are cross-disciplinary.

The university will support a faculty which is excellent in teaching, active in pure and applied research, and responsible to the needs of the community.

The university will strive to be a resource of the commonwealth serving government and private enterprise, and to be the intellectual and cultural focus of Northern Virginia.
Student Life
Student Life

Student Support Services

George Mason University provides many support services to enable students to take full advantage of the university's educational and personal enrichment opportunities.

Student Unions

The two student unions are the centers for co-curricular life on the campus. The unions contain meeting rooms, lounges, the campus food service, several cafeterias, the bookstore, game room, and Rathskeller. The Counseling Center, Career Development Center, Minority Student Services, and International Student Services are among the student services housed in the unions.

Student organizations and their activities are served through the student development centers in Student Union I, which also houses offices for the Student Government, the Broadside student newspaper, and GMView video yearbook.

The unions are home to many shops and services, including the Copy Center, the Mason Jar, and the Patriots Locker. Students or visitors needing information about campus programs, services, and events can contact the Information Desk in Student Union I (323-2374).

Other Recreational Facilities

The Patriot Center, a 10,000-seat arena, is home to the university's varsity sports, as well as a center of activity for Northern Virginia. Large gatherings such as commencement are held there, as are community activities and recreational events. Among 1989's Patriot Center events were Torvill and Dean on Ice, McDonald's American Cup Gymnastics, and the 10,000 Maniacs concert.

The Harris Theatre produces smaller-scale events and performing arts activities. In addition to concerts and plays staged by the university companies, an International Arts Festival featuring professional performers is held in the theatre each year. Facilities of the Sports and Recreation Complex are available at no charge to university students.

These include indoor and outdoor tracks and playing fields, a weight room and sauna, and other sports facilities.

Writing Center

The Writing Center offers one-to-one or small group sessions on all stages of writing to university students, faculty, staff, and alumni. Writing Center tutors are graduate teaching assistants carefully selected by the English Department and trained in the teaching of writing. They help clients overcome writer's block, develop revising and organizing strategies, and learn editing skills. The center is equipped with computers to assist with writing and revising.

Appointments should be made in advance by calling 323-2700 or by coming to Robinson I, Room 1136, to schedule a session.

Student Health Center

Personnel in the Student Health Center treat minor illnesses, administer first aid, and dispense nonprescription medications. They also provide referral services to outside health resources, offer information and counseling on matters of hygiene, and assist in the administration of a health and accident insurance program and a student dental plan. Pregnancy tests, throat cultures, and TB testing are performed for a minimal fee. Abortion counseling and referrals are also offered. During the academic year, the health center emphasizes preventive health care.

The center's health educator offers information and counseling on a variety of health-related issues. With the help of student peer educators, programs are presented in classrooms and residence halls, to student organizations, and during special-interest promotions.

The Health Center staff includes a director, one full-time nurse, a part-time nurse, the health educator, and a consulting physician. The Student Health Center is on the Main Campus in Student Union I, Room 232 (323-2584).
Health Insurance and Dental Plan
All George Mason University students are eligible, on a voluntary basis, to enroll in the university-endorsed Accident and Sickness Health Insurance Plan and the university-sponsored dental plan made available through DENTICARE of Virginia.

The health insurance policy includes provisions for major medical coverage, outpatient laboratory fees and x-ray coverage, as well as the usual provisions for hospital room and board and surgical expenses. At minimal cost, this policy covers the insured student 12 months per year, 24 hours per day, worldwide, at the university or elsewhere. For insured student 12 months per year, 24 hours per day, worldwide, at the university or elsewhere. For minimal yearly fee, the dental plan provides x-rays, teeth cleaning, and office visits at no charge, and various dental procedures such as fillings, crown and bridgework, and root canal therapy at reduced costs.

Health insurance brochures, enrollment applications, and claim forms, as well as dental plan information, may be obtained at the Student Health Center.

Services to Disabled Persons
Students with disabilities, including learning disabilities, have access to a wide range of services and assistance. Because students who need special consideration in curriculum, assignments, or testing must provide documentation of their disability, they are advised to forward existing documentation to Disabled Student Services. Please contact the adviser to disabled students at (703) 323-2523 (voice/TTY) for more information.

Housing
The university has on-campus housing for nearly 3,000 students. In recent years, more than half the freshmen have chosen to live on campus. Students living on campus are guaranteed housing throughout their undergraduate years.

Six residential complexes offer a variety of accommodations designed to meet the needs of a diverse population. Freshmen usually live in double rooms in traditional residence halls. Upperclassmen and transfer students are housed in suite-style residence halls, apartments, and townhouses. All are carpeted and furnished.

The residence life staff includes both students and full-time professionals who operate under a philosophy of education and service. Their primary goal is to provide an atmosphere conducive to learning and growth in both areas.

For information about housing costs see the Tuition, Expenses, and Financial Aid section of the catalog. For more information about on-campus housing, write or call the Office of Housing and Residential Life, (703) 323-2354.

Counseling Center Services
The Counseling Center helps students achieve their academic and personal goals. Specifically, the center offers individual and group counseling services to help students (1) acquire interpersonal and coping skills to manage personal problems that may interfere with learning and academic progress, (2) develop the study skills and habits needed for success in an academic environment, and (3) make realistic decisions about personal and educational goals. The center also provides peer support programs for black students.

For personal counseling, peer support, and workshop information, call 323-2165. For study skills counseling/workshops and tutoring assistance, call 323-2018, or stop by the Counseling Center in Student Union Building I, Room 364, for more information and a copy of the service brochures.

The university Counseling Center is accredited by the International Association of Counseling Services. All services to students are confidential and no information is released without the student's written consent.

Career Development Center
The Career Development Center's primary purposes are to foster career planning throughout a student's involvement with the university, to encourage students to look to the future and to make sound career decisions based on their knowledge, skills, and values; and to build relationships with employers in the community that ease students' passage from college to career. The office, located in Student Union I, Room 348, is open Monday through Friday from 8:30 a.m. until 5 p.m. and on Tuesday and Wednesday evenings during the fall and spring semesters. For information call 323-2476. The following major program areas are available:

Career Counseling
Through individual counseling sessions and workshops, students learn to assess personal interests, skills, values, and motivations and to research appropriate majors and relevant career opportunities. Counselors are also available to assist students with various aspects of their job search.

http://catalog.gmu.edu
Career Seminars and Workshops
Workshops are offered on the following topics: Interests, Values, Skills Assessment; Career Identification; Exploring Majors and Careers; Adult Career Planning; Applying to Graduate/Professional School; Job Hunting Strategies; Resume Writing; and Interviewing Skills. Check the Career Development Center brochure for the workshop schedule and program descriptions. Evening programs are available.

Career Resource Library
This specialized library contains information on career fields, graduate and professional schools, government employment, researching employers, and job hunting. SIGI Plus, a computerized career information system, is available to assist students with their career explorations. Videotapes and handouts on career planning and job hunting topics are available for students who want to work on their own.

Cooperative Education
Cooperative Education is a program that provides qualified students with professional-level, progressively responsible, paid work experience in positions related to their majors. Two calendar plans are available: the alternate plan, in which students alternate periods of full-time work with substantially full-time study; and the parallel plan, in which students work 15 to 20 hours per week while carrying 9 to 12 credit hours. Positions are open to both undergraduate and graduate students in all disciplines. Participation is recognized by the university through notation of the work assignments on academic transcripts. Orientation sessions are scheduled weekly to provide more complete information.

Job Center
This "one-stop" student employment resource area provides listings for part-time professional jobs, internships, summer jobs, and other part-time jobs.

On-Campus Interviews
During the fall and spring semesters, employers conduct interviews on campus for full-time career positions with their organizations. Graduating students and alumni can participate by first attending an orientation session, completing a registration form, and submitting it with a copy of their resume. A schedule of employers is available at the beginning of each semester.

Job Leads
Graduating students and alumni can register to receive weekly bulletins of full-time job vacancies. Job notices are also filed in the Career Resource Library and posted on a job bulletin board outside the office.

Credential File
Graduating students and alumni may establish credential files containing references, resumes, and course listings to support application for employment or graduate school.

Veterans Services
The veterans coordinator in the university's Office of Veterans Services assists veterans, service personnel, dependents, and survivors in obtaining authorized educational benefits. The office staff also helps veterans adjust to university life. Located in Student Union I, the office is open Monday through Friday from 8:30 a.m. to 5 p.m., and two days a week until 7 p.m. during regular semesters. (Late days vary. Check with the office at 323-2381.)

Minority Student Services
Minority Student Services is an administrative office that coordinates the university's planning and programming for ethnic minority students. The office staff works with minority students to help them understand their academic needs and then find appropriate ways to meet those needs. The office also participates in an ongoing evaluation and assessment of the impact of university policies and procedures on minority students. Minority program initiatives are designed to stimulate multicultural understanding and create an educational atmosphere in which minority students will be successful. The Minority Student Services Center is in Student Union I, Room 345, (703) 323-2383.

Campus Ministry
The Campus Ministry is an ecumenical group available on campus to assist students, faculty, and staff. The ministry includes religious counseling, Bible study, worship services, social-action opportunities, education programs, social activities, seminars, retreat weekends, and fellowship gatherings. The Campus Ministry offices are in Student Union I, Rooms 207 and 229, and are open daily for discussion and assistance of any kind. For more information, call 323-2160 or contact the individual ministries: Assemblies of God (323-2160); Baptist (323-3848); Episcopal (323-4217); Greek Orthodox (671-1515); International Students (830-3483); Jewish (323-3848 or 301-468-3422); Mormon (323-2160); Navigators (323-2160); People of the World (323-2160); Roman Catholic (323-4218 or 425-0022); United College Ministries (820-2144); Muslim (476-0519 or 471-1133).
Office of International Student Services

The Office of International Student Services is responsible for all matters pertaining to U.S. immigration law affecting students at the university, for example, admitting international students and helping students maintain their immigration status. ISS seeks to foster the intellectual, cultural, and personal development of international students during their time at GMU and in the United States.

Services consist of the following:

1. Reviewing and verifying documents relative to admission and financial support for issuance of certificate of eligibility (Form I-20 and Form IAP-66) to international students.
2. Advising international students on immigration and visa requirements.
3. Advising international students and faculty concerning cross-cultural understanding, and academic, housing, and personal problems.
4. Advising the university on immigration matters and serving as liaison between the university and the Immigration and Naturalization Service.
5. Organizing activities for international students to integrate them into the academic process, the campus student population, and the surrounding community.
6. Conducting intercultural events on campus, such as International Week, United Nations Day, Ethnic Days, International Coffee Hour, films, and lectures.
7. Representing the interests of international students at GMU before the U.S. Immigration and Naturalization Service, the State Department, government agencies in international education, and foreign embassies.
8. Establishing links between international students and the local community through program activities and holiday hosting.
9. Disseminating via newsletters and other publications information of importance to international students and their American counterparts.

Student Activities

Student participation helps shape the character and the quality of the students and the university. Thus, George Mason encourages people to express their talents and interests through participation in student government, student publications, and membership in academic, Greek, international, special interest, law, cultural, religious, and athletic organizations.

While involvement in such activities is a desirable adjunct to classroom learning, participation must be complemented by academic progress. For this reason, only students in good academic standing are eligible to hold or run for elective or appointive office in any organization or activity associated with the university, to participate in any athletic or other activity representing the university on either an intercollegiate or club level, or to serve as a working staff member of any student organization. The individual student is responsible for notifying an organization when becoming ineligible.

Athletic Activities

The intercollegiate athletic program of 19 men's and women's sports at George Mason University offers student athletes competition with universities in the Washington, D.C., area, the commonwealth of Virginia, and throughout the United States.

The men's and women's programs are members of the National Collegiate Athletic Association, the Colonial Athletic Association, and the Eastern Collegiate Athletic Conference. To be eligible for athletics, all student athletes must be in good academic standing and must be making satisfactory progress toward a degree at George Mason University. Satisfactory progress is defined as (a) satisfactory completion prior to each fall term of a cumulative total of semester hours equivalent to an average of 12 or more semester hours during each of the previous terms in academic years in which the student athlete has been enrolled in a term or terms, or (b) satisfactory completion of 24 semester hours of academic credit since the beginning of the previous fall term (from the NCAA Manual 1988-89).

Intercollegiate competition for men includes baseball, basketball, cross-country, golf, soccer, tennis, indoor and outdoor track and field, volleyball, and wrestling.

Intercollegiate athletic competition for women includes basketball, cross-country, indoor and outdoor track and field, tennis, soccer, volleyball, and softball.

Athletic scholarships and financial aid (based on need) are available to both male and female student athletes.

Athletic highlights include the following: GMU's first NCAA championship—women's soccer 1985; first NCAA tournament post-season play in men's basketball 1989; Rob Muzzio—twice NCAA decathlon champion 1984-85; Abdi Bile—NCAA...

More than 300 student athletes carry the banner of George Mason on courts and playing fields throughout the United States. Scholarship support for the university's student athletes is generated by the Patriot Club and private fund raising.

Performing Arts Activities
George Mason offers students the opportunity to participate in many arts events throughout the school year. The George Mason University Dance Company presents two annual concerts and all students are encouraged to audition.

Theatre events include four major productions, as well as several student-directed, one-act, and experimental plays. Auditions for theatre events are open to all George Mason students and are held each semester. Students interested in technical theatre can work in a variety of production crews, including light and sound, costumes, and publicity. Information concerning auditions, crew work, and performance dates may be obtained from the Department of Dance and Theatre.

Students interested in music may audition to perform in the following: Symphony Orchestra, Symphonic Band, Jazz Ensemble, Pep Band, and various chamber ensembles. No auditions are required for participation in the university Chorale and Symphonic Chorus. All members of the university community are invited to attend concerts and recitals given by the Department of Music.

Forensics Team
George Mason's nationally ranked forensics team has been named the First Place Team on the East Coast.

Academic credit is available for participation on the Forensics Team. Interested students should contact Bruce B. Manchester, Director of Forensics, in the Department of Communication.

Debate Team
George Mason's nationally prominent debate team competes in more than 25 intercollegiate debate tournaments each year with universities from throughout the country. The debate team enables George Mason students, regardless of previous experience, to develop speaking, analytical thinking, writing, and research skills that prepare them for a variety of professional pursuits.

Academic credit is available for participation on the debate team and membership is open to any full-time undergraduate student. Interested students are encouraged to contact Warren Decker, Director of Debate, Department of Communication.

Student Leadership Development Center
George Mason provides a variety of opportunities for students to develop their leadership skills, including workshops, retreats, conferences, credit courses, a resource collection, and individual consultations. Center programs are open to all students interested in developing their leadership abilities. For more information on program dates and times, contact the Student Leadership Development Center, 305 Student Union I, (703) 323-3846.

Student Organizations
Approximately 200 on-campus student organizations complement the university's curricular programs and provide opportunities for students to exercise and develop their talents. The organizations span a wide range of interests, including politics, forensics, drama, music, journalism, academic, service, recreation, business, social life, religion, and fellowship. Membership in student organizations is open to any registered George Mason University student and can open vistas to new friendships, informal contact with faculty and staff, learning opportunities, and leadership experience.

Recognized student organizations are also members of larger umbrella organizations. These clusters of organizations facilitate coordinated development of campus activities, interaction with other student organizations, and fee funding for
student organizations. They also provide a university mailing address, access to file and storage space, duplicating services, and a channel of communication with the university administration regarding support services for student organizations.

George Mason now recognizes 17 fraternities and 9 sororities. They contribute to campus life by sponsoring numerous social and service activities throughout the year. These organizations encourage their members to achieve high academic standards while participating in social and service activities within and around the university community. To obtain additional information on fraternities or sororities at George Mason, contact the Student Activities office, Student Union I, Room 305, (703) 323-2574.

The Student Activities office also maintains updated information on names and phone numbers of contact persons in each organization. The Student Organization Manual, a "how-to" resource handbook for student leaders, can be obtained there. The office staff also consults with students or student organizations that are planning programs for students; assists new clubs in attracting members and receiving recognition; and offers leadership training through workshops, retreats, and credit course formats to organization members and to students not affiliated with a club.

WGMU Radio is a student-run radio station, broadcasting to members of the university community. The station is committed to educational radio, and offers opportunities for all interested students, with or without experience in radio. For more information, contact Fred Odum, general manager, (703) 323-4296, 111B Thompson Hall, or the station manager, (703) 323-3592, 216 Thompson Hall.

Broadsie is the university's student-run newspaper. The paper provides opportunities in news writing, sports reporting, feature writing, editing, layout, advertising, public relations, and many other areas. Contact the Broadsie staff in Student Union I for more information.

Student Alumni Association
The Student Alumni Association consists of students who work with and assist the Alumni Association and the Alumni Relations Office. They participate in homecoming, reunion, the annual phonathon, and other events.

The Office of Alumni Relations is at 10720 Kelley Drive, a short walk from the center of campus. Alumni and students are welcome to visit the office from 8:30 a.m. to 5:00 p.m. daily. The staff is eager to answer students' questions and to ar-

range for students to meet alumni. For more information, call 323-2136.

Awards
George Mason University recognizes students for excellence and grants them awards that are given by various administrative offices and academic departments. The Student Activities Office (323-2574) coordinates the Annual Student Awards Ceremony and maintains the most comprehensive awards listing.
Admission
Admission Policies

Admission to George Mason is competitive in that the number of qualified candidates for admission generally exceeds the number of new students who can be accommodated. Each candidate who presents sufficient admission qualifications is reviewed in the context of other qualified applicants.

Acceptance into junior-level courses, in particular, is limited in business, communication, education, nursing, and social work (see appropriate catalog sections). Junior-level applicant selection is competitive, with priority placed on potential for success. Grades are an important part of the selection process, but may not be the only criterion used by selection committees.

The university expects applicants for undergraduate admission to be in the upper 50 percent of their class. They must also demonstrate considerable facility in using the English language and an understanding of basic mathematical processes.

The following factors are considered when reviewing applications for admission:

- Cumulative high school grade point average for course work completed in grades 9 through 12.
- Level of difficulty of course work elected throughout the high school years, particularly in English, mathematics, laboratory science, and foreign language.
- Scores from the Scholastic Aptitude Test (SAT) and/or the American College Test (ACT).

The Admissions Office evaluates applications after all required materials have been received. Applicants are notified of decisions in the first week of April.

To ensure that applicants with unusual qualifications are not denied admission, the above criteria are applied flexibly. Applicants with unusual qualifications should describe them in the narrative section of the application for admission. Personal interviews and recommendations are not required unless requested.

Freshman Requirements

The following table specifies the minimum units of college preparatory work required for admission, as well as the minimum units recommended. The recommended units reflect the typical high school program of students who have succeeded in competing for admission in recent years. Columns (1), (2), and (3) refer to the following categories:

1. Students applying for a bachelor of arts (excluding those in category 3), bachelor of fine arts or bachelor of music degree program, or with an undeclared major.
2. Students applying for a bachelor of science degree program, excluding those in category (3).
3. Students applying with an intended major in chemistry, computer science, engineering, geology, mathematics, or physics.

One unit equals one academic year of study.

** Selected from biology, chemistry, physics.

Early Decision

Freshman applicants for fall semesters who apply for admission before December 1 are reviewed automatically for early consideration. Successful candidates are notified beginning in December and continuing until January 15. If an early decision cannot be given, the student's application is considered at the time all other applications are reviewed and evaluated.
Early Admission
Rising high-school juniors who have either completed high-school graduation requirements or have only senior English and government to complete may, with the recommendation of their high-school guidance counselor, principal, or headmaster, apply for admission and thereby enter the university one year early. Applicants should present above-average grades, SAT/ACT scores, and a high school course of study demonstrating a rigorous academic preparation for university-level work. Candidates for this program must arrange an interview with the dean of admissions.

Concurrent Enrollment (Enrichment)
Advanced high-school students may apply for admission as part-time students in the concurrent enrollment program. Applicants should have at least a 3.0 grade point average and have taken the ACT or SAT examination. Additionally, students must be recommended by their high-school guidance counselor, principal, or headmaster, and the appropriate department chair at GMU. Interested students may contact the Admissions Office for more information.

Transfer Requirements
The university accepts qualified students who wish to transfer from other colleges. An applicant for admission who has attended a college institution for any period of time should request that the registrar of each institution attended send two official transcripts of records, including a statement of academic standing, to the Office of Admissions. A complete secondary school record is ordinarily required. In certain cases, however, college transcripts showing transferable work comparable to the basic degree requirements of the intended major may be accepted in lieu of high school transcripts, SAT, or ACT scores. Students planning to transfer into computer science should consult the catalog section titled Admission to Computer Science, under the Computer Science listing. Students transferring from vocational programs or nonaccredited institutions are normally expected to meet the university's requirements governing admission of freshmen.

Application for admission as a transfer student is competitive. To be academically eligible for consideration, a transfer student must present a grade point average of at least 2.0 on a 4.0 scale on all collegiate work attempted. Students on active social or academic probation, suspension, or dismissal are not eligible for transfer admission. The number of offers of admission that the university can make in a competitive environment is determined by the number of applicants.

To be considered for admission to the computer science, engineering, or mathematics programs, a transfer applicant should present a cumulative GPA of 2.5 on a 4.0 scale, or better.

Students should read the appropriate section of the catalog to determine if the school or college governing the programs to which they seek admission have special requirements.

Transfer students should note the requirements shown under the heading Credits Earned at Other Colleges.

Readmission
Undergraduate students whose study at the university is interrupted for any reason may reenter by simply registering for classes for the semester in which they wish to return, provided they were in good academic standing when they left the university. Readmitted students may graduate by meeting the requirements of the catalog under which they were admitted, provided they apply for readmission within five years of their last semester in attendance; otherwise, they must meet the requirements of the catalog in force at the time of readmission.

Admission of International Students
General Requirements for International Students
Application for admission to the university by international students holding or seeking F-1 or J-1 visas should be made directly to the Admissions Office before January 1 for the subsequent academic year. All educational support documents and test scores completing the application must be received in the Admissions Office by April 1 or the application will be canceled. The deadline is enforced to ensure adequate time to process applications.

Applications from international students are considered for the fall semester only and are reviewed and evaluated with all other applications. Students in the English Language Institute (ELI) should consult the Admissions Office for application procedures. Applicants with permanent residence in the United States and nonimmigrant visa holders (A-1, G-4, etc.) must meet freshman or transfer admission requirements. Admission to the university is competitive; therefore, while minimum standards ensure that an application will be considered, they do not guarantee admission. The number of offers of admission that the university can make in a competitive environment is deter-
minded by the number of applicants, the qualifications of the applicant pool, and the amount of available space. In addition to overall admission requirements, some schools and colleges have individual requirements for acceptance into the major. (See school or college admission requirements.)

**Freshman Requirements for International Students**

1. If applicants have not completed a year of collegiate work at a college or university in the United States, they are required to submit a satisfactory score on the Scholastic Aptitude Test (SAT) or American College Test (ACT).
2. Individuals whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) in addition to the SAT or ACT exam.
3. A minimum score of 570 on the TOEFL and 4.5 on the TOEFL essay are required for an applicant to be considered for admission. Official test scores must be sent directly from the Educational Testing Service. Information concerning the time and place of the TOEFL can be obtained from TOEFL, Educational Testing Service, CN 6151, Princeton, NJ 08541-6151, USA. Phone: (609) 882-6601.

In addition to the academic requirements mentioned above, international students must meet the following conditions:

1. An international student holding an F-1 or J-1 visa must comply with current U.S. Immigration and Naturalization Laws.
2. With the application for admission, a student must present certified documents on subjects studied, grades received, examinations taken, and degrees earned from all secondary schools, colleges, and universities attended. Records of state or national examinations and certificates are also required. Students must establish that they have completed at least the equivalent of a United States high school diploma. Non-English documents must be presented in original form, and with certified translations.
3. Applicants must also provide a completed and notarized GMU financial statement that includes a bank statement verifying that funds have been earmarked for school expenses. Yearly expenses are estimated to be $14,950 (subject to change). International students may be required to have their financial resources verified by an American banking institution.
4. Students enrolled at the university on F-1 or J-1 visas must maintain full-time status each semester, excluding summer session.
5. All new students at the university must submit the Admissions Medical Form signed by a health professional. The form must verify that the student is in good health and that his or her inoculations are current.

6. Health insurance is mandatory for students on F-1 and J-1 visas. Students who do not enroll in the university's insurance program must show proof of comparable coverage. Students must submit the fee for health insurance (call Student Health Center, 703-323-2584) or proof of comparable coverage with their confirmation to enroll. No acceptance of the offer of admission is valid unless accompanied by insurance fee or proof of comparable coverage.
7. Students with F-1 or J-1 visas must initially attend the educational institution that issued the Certificate of Eligibility (Form I-20 or IAP-66). Transfer from one U.S. educational institution to another must be authorized by the U.S. Immigration and Naturalization Service. Forms are available from the international student adviser.
8. The I-20 form is available to those who, after acceptance, require an F-1 student visa. Students sponsored by their government or the U.S. government are required to enter the United States on J-1 visas. The form IAP-66 will be provided by the university after admission, if necessary.

**Transfer Requirements for International Students**

A transfer student is a student who has completed a year of work at a college or university located in the United States. In addition to the above requirements, international transfer students must meet the standards listed below:

1. International students (F-1 or J-1 visa holders) transferring from American colleges or universities must complete the equivalent of a year of college-level academic work (24 semester hours or 36 quarter hours) before admission to George Mason University. The academic work must include a year of college-level English composition.
2. Transfer applicants from American colleges or universities who have not completed one year of English composition and one year of literature with grades of C or better must also submit satisfactory TOEFL and SAT or ACT scores.
3. Transfer applicants from non-American colleges and universities are required to submit satisfactory scores on the SAT examination. Transfer applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) in addition to the SAT.
4. All transcripts must be evaluated and translated before an admissions decision can be made. The applicant is responsible for the timely translation and evaluation of documents and for all costs and fees associated with these services. (Suggested evaluation agencies are World Education Services, Inc., P.O. Box 745, Old Chelsea Station, New York, NY 10011; Credentials Evaluation Services, Inc., P.O. Box 66940, Los Angeles, CA 90066; World Educational Credentials Evaluators and College Planning, P.O. Box 726, Herndon, VA 22070.)

Special Types of Enrollment

Extended Studies Enrollment

The extended studies enrollment procedure allows qualified persons who are not admitted students to request enrollment in on- and off-campus courses.

Approved extended studies enrollees register on a space-available basis according to an assigned priority date and time as determined at the time of counseling and course approval in the Extended Studies Enrollment office. See the section entitled "School of Continuing and Alternative Learning" for more information on extended studies enrollment.

Guest Matriculant Enrollment

Persons enrolled in undergraduate or graduate degree programs at other accredited institutions who wish to take courses at the university for transfer to their home institutions enroll through the School of Continuing and Alternative Learning. Such students should submit evidence of permission to enroll from the appropriate dean or registrar of their home institutions to a counselor in the Extended Studies Enrollment office.

Senior Citizens Enrollment

The Extended Studies Enrollment office in the School of Continuing and Alternative Learning coordinates enrollment under the Senior Citizens Higher Education Act of 1974, as amended and as applicable to the university. Under the terms of this act, eligible Virginia residents over 60 years of age with taxable incomes less than $7,500 are entitled to enroll in courses offered for academic credit on a space-available basis without payment of tuition and fees.

In addition, the Act provides for audit of courses offered for academic credit and also for enrollment in noncredit courses without payment of tuition and fees, regardless of taxable income level, on a space-available basis. Tuition may be charged, however, for courses designed exclusively for senior citizen groups. No senior citizen may change registration status in any semester once registered for classes.

Graduate Course Enrollment by Undergraduates

Undergraduates may enroll in graduate courses only if they have exhausted all upper-level undergraduate courses relevant to their educational objective and can demonstrate the level of maturity required for graduate-level courses. Undergraduates must have completed all requirements for the graduate course in which they wish to enroll. Undergraduates in these circumstances may, with the written permission of the course instructor and the chair of the department offering the course, register for graduate courses numbered 500-599 and apply the credit earned toward an undergraduate degree.

Students may seek to take graduate courses for reserve graduate credit; this earned credit is held in reserve to apply later toward a graduate degree. Approval to register is normally given only to George Mason seniors who are within 15 hours of completion of undergraduate study. Approval for reserve graduate credit does not imply approval for admission into a graduate program at the university or that credit so earned will be accepted at another graduate school. (See the Graduate School catalog for details.)

Summer Session Enrollment

Summer enrollment is open to eligible undergraduate students on a first-come, first-served basis. Enrollment in the summer session does not constitute undergraduate admission to a fall or spring semester.

Summer EXCEL Program

EXCEL (Experience College Education and Living) is a month-long summer residential program designed to give high-ability college-bound students an opportunity to sample college life and learning. The program provides a first-hand experience in preparing for the academic and social challenges of college. EXCEL students are immersed in the university community by living on campus, taking one or two freshman-level courses, and participating in organized social, recreational, and learning activities.

Admission Procedures

Applying for Admission

Application for undergraduate admission should be made to the Office of Admissions on forms provided upon request. A nonrefundable and nontransferable fee of $25 must accompany the application.

http://catalog.gmu.edu
Application Deadlines
Undergraduate applications for fall admission should be submitted no later than February 1 for freshman applicants and March 15 for transfers. Admission decisions for freshmen are usually made after the first-semester grades of the senior year and all appropriate test results have been received by the Office of Admissions. Transfer decisions are made as files become complete. Admission is contingent upon satisfactory completion of requirements and graduation from high school.

Test Requirements
Freshman candidates for admission are required to take the SAT or the ACT. Official test scores should be sent directly from the appropriate testing service. In addition, freshmen are required to present three Achievement Test scores. While applicants are encouraged to submit scores with their applications, achievement tests may also be taken during freshman orientation programs. Undeclared students and those seeking B.A. degrees must present the following achievement scores: English Essay, Mathematics level I or II, and a foreign language. All other majors must present achievement scores in English Essay, Mathematics level I or II, and a third test of applicant’s choice.

Notice of Acceptance
The university complies with the College Board candidate reply date of May 1, but encourages students to confirm their intention to enroll by returning the confirmation card before that date. Prompt confirmation of the offer of admission qualifies students for early advising and course selection, registration, housing, and other services. The order in which confirmation cards are received in the office determines priority for advising and course selection. Candidates approved for admission must confirm their intention to enroll. Failure to comply adversely affects reserved space.

Right to Withdraw Offer of Admission
The university reserves the right to withdraw offers of admission if applicants fail to satisfy all requirements prior to the closing of spring or fall registration.

Admissions Committee
An Admissions Committee reviews undergraduate admission decisions and appeals.

Other Stipulations
The Office of Admissions or the Admissions Committee may make other stipulations or recommendations regarding the admission of an individual.

Academic Testing
Testing Center
As a means of assessing the academic preparation of its students, the university regularly requires the submission of certain test information.

Students may make arrangements with Academic Testing for taking College Level Examination Program (CLEP) tests and may obtain applications for the Test of English as a Foreign Language (TOEFL), the Graduate Record Examination (GRE), Law School Admission Test (LSAT), Graduate Management Admission Test (GMAT), Medical College Admission Test (MCAT), Dental Admission Test (DAT), Veterinary Aptitude Test (VAT), and the Miller Analogies Test (MAT).

Advanced Placement Program with Credit
First-semester freshmen who have completed advanced-level courses in secondary schools and have passed College Board Placement Examinations with scores of 4 or 5 may be granted a maximum of 30 semester hours credit (without grades) upon recommendation of the department concerned and with the approval of the appropriate dean. Credit for a score of 3 is at the discretion of the department. Advanced credit earned in this manner by entering freshmen will be counted toward or will fulfill any pertinent university or departmental graduation requirements.

International Baccalaureate (IB) Diploma
George Mason University recognizes the IB curriculum as a strong pre-university academic program and encourages applicants to complete the requirements for the IB diploma. Advanced standing is awarded for Higher Level examinations with scores of 5, 6, and 7. Students may receive a maximum of 20 semester hours. Official transcripts must be issued by the International Baccalaureate North America, 200 Madison Avenue, Suite 2403, New York, NY 10016-3903.

Proficiency, Advanced Placement Examinations, and Credit by Examination
Proficiency examinations are offered in a number of courses normally taken during the first two years. Each January and August, the Department of Biology administers an examination in BIOL 124, 125, Human Anatomy and Physiology, to candidates presenting some evidence of similar training. Application and authorization forms must be obtained from the School of Nursing. A copy of a
transcript indicating past course work equivalent to BIOL 124,125 must accompany the form requesting credit by examination. This form should be submitted to the Department of Biology at least one week before the announced examination date. Four credits are awarded for a grade of C or above. Examinations may not be repeated.

Examinations in English, government, geography, mathematics, and music are usually announced by the appropriate departments. A satisfactory score on an examination affords a student credit for the course in question.

On the basis of examinations presenting evidence of qualification, regularly enrolled students may be granted up to 30 semester hours of undergraduate credit for courses in the university curriculum. The only exceptions to this regulation are registered nurses enrolled in the nursing B.S.N. program (see School of Nursing for details). Credit is recorded for grades of C or above, but does not affect the student’s grade point average computation.

Students may not earn credit by examination in courses in which they are enrolled beyond the time allotted for adding courses in that semester or in courses already audited or failed at the university. Transfer students may not earn by examination any part of the 30 hours that must be completed at George Mason University to earn a degree.

These examinations conform to university policies, evaluate the competence of students, and afford a reliable basis for assigning students to more advanced courses. Credit by Examination forms are available in the offices of the academic deans.

Foreign Language Placement, Testing, and Credit by Examination

The CEEB Achievement Test in a foreign language (normally given to high school students) is used for placement in French, German, classical Greek, Latin, Russian, and Spanish. This placement test is mandatory for all students who have studied one of these languages in high school and wish to continue study of the same language at the university.

Students who have taken the CEEB Achievement Test in a foreign language before admission may have their score used for placement. Students must either provide official test scores or take the test at George Mason. The testing dates are listed in the Academic Calendar. It is the student’s responsibility to apply for and take the test before initial enrollment. Interested students should contact the Department of Foreign Languages and Literatures.

Students may not enroll for credit in a course at a level lower than the one in which they are placed. The foreign language requirement for the B.A. degree may be waived for international students who present satisfactory evidence of having studied for four or more years in an educational institution in which the primary language of instruction was other than English. No credit through the intermediate level is awarded when the foreign language requirement is waived. College Board Advanced Placement Test scores may be used for advanced placement and credit, provided the test was taken during the three years prior to the student’s registration at GMU.

On the basis of examinations administered by the department, students may be granted credit for undergraduate courses above the intermediate level in foreign languages offered at the university. Credit by examination will not be awarded in conversation and/or composition courses.

Transfer students receiving credit for college-level foreign language study completed at other colleges must consult the department to determine their correct placement. If through transfer credit, a placement test score, or GMU course work, a student meets the prerequisite for a lower-division foreign language course which is not offered during a particular semester, the dean will normally grant permission to continue the foreign language sequence by taking courses at another college or university.

All students are urged to start or to continue foreign language study in their first year. Elementary and intermediate courses should be completed in immediate succession, preferably by the end of the sophomore year.

Credit by examination is no longer awarded in elementary and intermediate foreign language courses.

College Level Examination Program (CLEP)

The university does not recognize credits earned by CLEP General Examinations. As part of the Credit by Examination process, certain departments may use CLEP Subject Examination scores for total or partial credit in certain courses. Consult the individual department. The Testing Service is a certified CLEP Administration Center. Interested students should consult the Testing Service for further details.

National Teacher Examinations

Persons seeking initial certification as teachers in Virginia are required to submit scores on the National Teacher Examination. Academic Testing can provide information and applications for taking this examination.
Transfer Credit
A student transferring into the university may not assume that credit will be given for work at other institutions until an officially signed statement has been received from the college in which the student intends to major. The student is responsible for seeing that the Office of Admissions receives official transcripts of all work taken elsewhere.

In general, credits are accepted from institutions accredited by the appropriate regional association, provided that the credits carry a grade of C or better and that the courses are of a quality equal to those offered at George Mason University. Generally, no more than half of the total required semester hours in a baccalaureate program may be transferred from junior or community colleges. For students enrolled in a unit of the Virginia Community College System (VCCS), particularly Northern Virginia Community College, a university transfer manual and a VCCS/GMU transfer guide facilitate the orderly transfer of credits. A maximum of six semester hours may be transferred from correspondence courses sponsored by regionally accredited institutions. The VCCS/GMU transfer guide is available from the VCCS counseling offices or the GMU Office of Admissions. Students intending to major in accounting, decision sciences, general business administration, finance, management, or marketing must take the hours required for the major at GMU.

Credit Earned at Nonaccredited Colleges
Transfer credits from nonaccredited colleges are tentatively evaluated upon admission. Transcript information is used for purposes of advanced placement, and transfer credit is recommended after the performance of the student at George Mason has been established. Transfer credit is not granted for study in noncollegiate institutions, except in the Bachelor of Individualized Study (B.I.S.) Degree Program.

Credit to Be Earned at Other Institutions
A student who applies for admission to the university to profit from its educational programs would not normally be expected to seek simultaneous credit enrollment at another collegiate institution. In those unique situations when a student seeks to enroll in credit courses at another collegiate institution concurrently, the student must obtain advance written approval from the appropriate George Mason dean. (This rule applies to courses taken through the Consortium for Continuing Higher Education in Northern Virginia as well.)

This process permits a student to enroll elsewhere in a suitable course unavailable at George Mason. Catalog numbers and descriptions of courses to be taken elsewhere must be submitted with the request for approval.

Study Abroad
The university recognizes the educational value of travel and study abroad and allows students to broaden and enrich their education through approved overseas programs. Through the Office of Overseas Studies, the university assists students who wish to participate in overseas study programs administered in cooperation with academic departments.

Students interested in studying abroad should contact the Office of Overseas Studies (OOS), where a library on opportunities for study abroad is housed. Before departing, students must have programs approved by OOS, by the department chair supervising the major field, and by the appropriate dean. They must also attend an orientation program organized by OOS.
Tuition, Expenses, and Financial Aid
Tuition and Fees

By registering, students accept responsibility for the charges of the entire semester. The basic premises are:

1. Registration is not allowed if a student has outstanding financial obligations to the university.
2. Payments are due at the Cashier's Office on or before due dates (regardless of postmark).
3. Failure to receive a bill does not waive the requirement for payment when due.
4. The Office of Student Records must receive written notice of withdrawal from students who find they cannot attend classes during the semester for which they are registered.
5. Determination of domicile requires completion of the Virginia Domicile Classification Form available in the Office of Admissions.
6. The entire student registration is cancelled if payment or payment arrangements are not made in full.
7. The student is responsible for maintaining a current billing address at the Office of Student Records.

All residents, with the exception of those residing in the townhouses and apartments, are required to have a meal plan.

Payment Methods

WHERE:
Window; Cashier's Office, 106 Krug Hall, 9:00 a.m. to 4:30 p.m.
Drop Box, outside Cashier's Office, 107 Krug Hall
U.S. Mail, George Mason University, Cashier’s Office, Fairfax, VA 22030-4444

HOW:
Cash: At window only
Check: Payable to GMU, student ID# written on front. Third-party checks not accepted.
Credit card (subject to credit approval): MasterCard or Visa. Daytime phone number must be provided.

For payment information or information on payment plan options, please call the Bursar's Office at 323-2370.

Payment Plan Options

Installment Payments
Academic Management Services provides installment service or a deferred payment service for GMU students. Students may budget all or part of the annual tuition, room, and board in 10 equal monthly installments. The annual cost is $45 including a Life Benefit Insurance plan. For information, call 800-556-6684 toll free.

Deferred Payments
A deferred contract must be completed at the Bursar's Office and be submitted to the Cashier's Office with a down payment (1/2 of contract amount plus fee). The contract fee is $25; minimum contract amount is the cost of 6 credit hours.

Second and third deferred payments are sent directly to Academic Management Services (AMS) and must be received on or before the due date:

- Fall 1990: 2nd payment September 10
- Fall 1990: 3rd payment October 10
- Spring 1991: 2nd payment February 10
- Spring 1991: 3rd payment March 10

A $25 late fee is assessed by GMU on all payments received late by AMS.

Financial Penalties

Late Fee
Failure to make any payment on or before the due date results in a late charge of $25.

Returned Check Charge
Any check returned to the university by a bank results in a $15 penalty fee for the payer. Students who fail to clear their accounts within five calendar days following notification by the Cashier's Office are placed on financial suspension without further notice.

Financial Suspension
All academic service is withheld for students who are not in good financial standing with the university. This means that no transcripts of record are issued, no diplomas are released, and no registrations are permitted until outstanding obligations, including the reinstatement fee, have been paid in full.

Reinstatement Fee
Students placed on financial suspension because of outstanding obligations in excess of $50 are assessed a $25 reinstatement fee.

Collection of Accounts
Failure to meet financial obligations to the university may result in the delinquent account being placed with a collection agency, withholding of money from tax returns, and other collection procedures. Students are responsible for any additional costs incurred in collecting delinquent accounts. Fines owed for traffic and parking violations and to libraries of institutions and participating public libraries of the Consortium for Continuing Higher Education in Northern Virginia similarly affect students' status.

Refund Policies

Tuition
Students withdrawing from the university before the beginning of the semester or during the first week of classes may have their tuition refunded, less an administrative charge of $20. Assessed penalties are nonrefundable. Partial refunds for a semester are processed after the schedule adjustment period.

Tuition is refunded on a graduated scale for voluntary drops and withdrawals during the second and third weeks of classes. The calculation of the amount of refund is based on the date of the drop or withdrawal as certified by the Student Records office. Hours dropped after the third week of classes must be paid for in full. To initiate the refund process, the student submits a request to the Bursar's Office.

Students who do not submit a written withdrawal request to the Office of Student Records are liable for payment of full tuition charges.

Tuition Refund Scale:
- Week 1: 100% less $20
- Week 2: 66.7% of total
- Week 3: 33.3% of total

Housing
Refunds of housing reservation deposits, prepayments, and room charges are made according to the following schedule:

1. The $200 prepayment fee is nonrefundable.

http://catalog.gmu.edu
2. The $100 damage deposit is refunded as follows: Fall semester—the damage deposit is fully refundable if cancellation is received by August 1. Spring Semester—for new students, the damage deposit is fully refundable if cancellation is received by December 20. Current residents are charged a $200 prepayment fee and forfeit the $100 damage deposit unless a contract release is approved by the Friday before Thanksgiving, within the guidelines of the Contract Release Procedure.

3. Housing charges are refunded as follows: (a) students who cancel during the first week of classes receive a full refund less the prepayment and damage deposit; (b) students who cancel during the second week of classes receive a refund equal to 66.7 percent of the housing charges and the damage deposit is forfeited; (c) students who cancel during the third week of classes receive a refund equal to 33.3 percent of the housing charges and the damage deposit is forfeited; (d) students who cancel beginning the fourth week of classes do not receive a refund and the damage deposit is forfeited.

4. Refunds are rounded to the nearest whole dollar.

Food Service Contract
Refunds for food contracts are made according to the following schedule:

1. Changes: New residents may change food plans during the first two weeks of classes. Current residents may change for spring semester during the designated change period in the fall semester.
2. When a plan is cancelled, a per-week charge plus a $50 cancellation fee is assessed. The balance is refunded to the student.
3. All refunds are rounded to the nearest whole dollar.

Off-Campus Courses
Students enrolling in GMU off-campus courses are assessed tuition and fees at the same rates as those for on-campus courses.

Credits Earned Elsewhere
A few George Mason University degree programs include academic credits that students must earn at other institutions. Students enrolling for academic credits at other institutions assume all financial responsibility for these arrangements.

Eligibility for In-State Tuition
To be eligible for in-state tuition charges, a person must have been domiciled in Virginia for at least one year prior to the semester for which in-state tuition is sought. A person becomes domiciled in Virginia when legally capable of establishing a domicile and when present in Virginia with the intention of remaining in the state permanently.

Domicile, however, is primarily a question of intent and the burden of proof of domicile is upon the student seeking the benefit of in-state tuition. See the receptionist in Finley Building for a copy of the complete domicile legislation.

Change of Domicile Classification
Students requesting a change of classification from out-of-state to in-state must file the required form before the first day of the semester for which in-state status is sought. Forms are available in the Finley Building reception area.

Penalties
A student who provides false information or refuses or conceals information for the purpose of achieving in-state status, or who fails to notify the university of a change of facts which might affect reclassification from in-state to out-of-state status, shall be required to pay retroactively any tuition and fees that would normally have been charged and shall be subject to appropriate disciplinary action.

Other Expenses
International Student Health Insurance
Health insurance is required for all F-1 and J-1 Visa holders. Health insurance fees are deducted from all payments received by the university before funds are applied to tuition or other charges, which could result in cancellation of classes for nonpayment of tuition.

Lab Cards
Breakage cards are available at the Cashier's Office for $5. Lab cards are required by the end of the second week of class by students enrolled in chemistry laboratory courses. Cost of items lost or damaged are recorded on the card. Unused portions of the card which have been validated by the Chemistry Department may be redeemed at the Cashier's Office no later than May 31, 1990.

Transcript Fee
A $2 fee is charged for the first copy of each transcript of record requested by students, and $1 for each additional copy ordered at the same time. Payment must accompany the request.
Graduation Fee
The university requires a $15 graduation fee. See Application for Degree for more information.

Motor Vehicle Registration Fees
Students who park their vehicles on university property must register them with Parking Services and pay a fee for a parking decal. Decals are available for a year, semester, summer, or week. Parking Services is in Student Union I. For decal sales and fine payments come to Room 201A, Main Lobby, Monday through Thursday, 9:00 a.m. to 7:30 p.m., and Friday, 9:00 a.m. to 4:30 p.m. For special requests or problems come to Room 354, Monday through Friday, 9:00 a.m. to 4:30 p.m. For information call 323-2610.

Financial Aid
Office of Student Financial Planning and Resources
The Office of Student Financial Planning and Resources provides a variety of services to help students finance their education. These services include financial counseling, referral and information resources, and financial assistance. Student financial assistance consists of grants, loans, and employment. Awards are based on financial need. Located in Student Union Building I, Room 354, the office is open Monday through Friday from 9 a.m. until 4:30 p.m., and Tuesday until 7 p.m.

To apply for financial aid, each year new students must obtain a copy of the George Mason University Financial Aid Application and return the completed form to the Student Financial Planning and Resources Office. In addition, all students must complete a Financial Aid Form (FAF) and forward it to the College Scholarship Service in Princeton, New Jersey, four weeks prior to the application deadline. The application deadlines for consideration of federal and most of the state funds are as follows:

1990-91 Academic Year
Freshmen ...................... March 1, 1990
Returning Students .......... May 1, 1990
Summer 1990 .................. April 1, 1990
Transfer Students .......... March 1, 1990

Students must mail the completed Financial Aid Form to College Scholarship Service at least one month prior to the deadline. Applications received after the deadline are evaluated according to the availability of funds.

The university administers federal, state, and other aid programs as outlined below.

Federal Programs
Perkins Student Loan Program
Long-term, 5 percent interest loans from the federally sponsored Perkins Student Loan Program are available to qualified students. Repayment begins six months after graduation but may be deferred for students entering graduate school, the Peace Corps, VISTA, or military service. Those temporarily disabled may defer payment for three years. Students must be enrolled at least half-time to qualify. Half-time is defined as six credit hours for both undergraduate and graduate students.

Supplemental Educational Opportunity Grant
A limited number of direct grants are available to undergraduate students who are enrolled at least half-time, who show financial need, and who require such assistance to attend college.

College Work-Study Program
Funds to provide part-time work opportunities to help meet college expenses are available to students enrolled at least half-time.

Pell Grant
This need-based program makes funds available to students attending eligible post-high-school institutions at least half-time. Students who have received a first bachelor's degree are not eligible to apply for Pell Grants. Students may apply with the Financial Aid Form or to Pell directly.

Stafford Student Loan Program
Students must demonstrate need and be enrolled in a degree program half-time to qualify. While most loans are made by commercial lenders, some states are also lenders.

Undergraduates may borrow up to $2,625 as freshmen and sophomores and $4,000 for upper-level undergraduate study, with cumulative limits of $17,250. The government pays the 8 percent interest until the repayment period begins, six months after the student leaves school. Interest remains 8 percent through the fourth year of repayment and increases to 10 percent beginning the fifth year of repayment. Applications may be obtained from the Student Financial Planning and Resources Office or most commercial banks in Virginia or the student's home state.

PLUS Loan Program
PLUS is an additional form of financial aid to be used in conjunction with the Stafford Student Loan (SSL) program. PLUS loans may also be available to students who, for certain reasons, are ineligible for the SSL. This program can assist middle-income families and others who are not able to meet the costs of education through

http://catalog.gmu.edu
grants, scholarships, loans, and other financial aid programs. All parents of dependent undergraduates and graduate students are eligible to apply. The program has no income ceiling, so anyone may participate. Detailed information may be obtained by contacting the Student Financial Planning and Resources Office.

Virginia Programs for State Residents

Virginia Loans
The state provides funds to be used for long-term, low-interest loans for eligible full-time Virginia residents.

Virginia Scholarships
These scholarships are for full-time Virginia residents who demonstrate financial eligibility and who have established a record of academic and personal achievement.

Virginia College Scholarship Assistance Program (CSAP)
This program uses both federal and state funds to provide aid to needy students who are full-time undergraduates and legal residents of Virginia.

State Nursing Scholarships
The Bureau of Public Health Nursing provides limited scholarships to Virginia residents. These scholarships are based on need and are available to graduates and undergraduates. Applications are made directly to the Bureau of Public Health Nursing. The application deadline for students previously enrolled in a nursing program is March 1; for new students entering a nursing program the deadline is June 1. Applications are available in the Student Financial Planning and Resources office.

Emergency Loan Program

Mary E. Ferguson Emergency Loan Program
Currently enrolled students may borrow funds for legitimate emergencies excluding tuition, fees, books, and supplies. Emergency loans must be repaid within 30 days; overdue payment results in a late charge of $5 for each 30 days past due. Failure to repay the loan within 30 days, without requesting an extension for a reasonable excuse, will result in financial suspension. Students financially suspended for nonpayment of an emergency loan are ineligible for any future emergency loans.

Doug Beaman Emergency Loan Program
The George Mason Alumni Association has established an emergency loan fund through which students may borrow up to $100; repayment is due within 30 days. The program is available to all students, with priority to children of alumni. Application is made through the Office of Student Financial Planning and Resources.

Reserve Officers Training Corps (ROTC)

Army ROTC
The U.S. Army Reserve Officers Training Corps (ROTC) provides college-trained officers for the Active Army, the Army National Guard, and the U.S. Army Reserve. The ROTC program is designed to develop managerial ability, leadership skills, and self-confidence. Students receive commissions as second lieutenants after their completion of ROTC and the normal college requirements.

The ROTC program consists of two components: a core curriculum and professional military education. The core curriculum involves classroom instruction and practical exercises in leadership and general military subjects and skills. Professional military education is provided by any curriculum leading to a baccalaureate degree that includes academic courses in human behavior, written communication skills, military history, national security policy, and management.

George Mason University students may participate in the Army ROTC program offered on campus by enrolling in Military Science (MLSC) courses. Scholarships available through the Department of the Army cover tuition, fees, textbooks, and all required equipment for the MLSC courses are provided by the U.S. Army.

For more information, contact the Army ROTC instructor at George Mason University in the Field House Module, Room F28, or call (703) 323-3768.

Air Force ROTC
Air Force ROTC (AFROTC) is available to George Mason students through an agreement with the University of Maryland at College Park. AFROTC courses are scheduled so that students from the university may complete all AFROTC requirements during one morning per week at the College Park campus. In addition, students are eligible to compete for all AFROTC scholarships and for pilot and navigator training programs. The seven-, six-, five-, and four-semester scholarships pay for tuition at the University of Maryland and George Mason University, cover the cost of
required books, and provide a $100 per month subsidy.

After graduation from the university and completion of the AFROTC curriculum at the University of Maryland, students are commissioned second lieutenants in the Air Force. Students interested in AFROTC may contact AFROTC, Cole Field House, Second Floor, University of Maryland, College Park, MD 20742, (301) 454-3242.

ROTC Courses
Although ROTC courses are offered at the university, military science credit is not transferable to the university.

Veterans Services
Veterans Educational Benefits
Students eligible for Veterans Educational Benefits while attending the university must contact the Office of Veterans Services. The following actions are required:

1. Veterans, active duty, and reserve personnel who have never received benefits must apply on form 22-1990. The application should be turned in to the Veterans Services office on campus with a certified copy of the student’s DD-214 (where applicable).

2. Students who have received benefits from another school or who are changing either their type of program or course objectives must fill out form 22-1995 — Request for Change of Program or Place of Training.

3. Veterans’ dependents who receive educational benefits under Chapter 35 of Title 38 USC must establish eligibility with the Veterans Services office. They should fill out form 5490 or 5495. The office then sends the paperwork to the Veterans Administration with the school certification.

4. Students must request the veterans counselor to send an enrollment certificate to the Veterans Administration Regional Office each school year (each semester if the students are under half-time, on active duty, or in continuing education). Students must apply separately for a summer session. Students in continuing education will be certified for no more than two semesters while the GMU application is pending.

5. Students are responsible for notifying the Veterans Services office on campus of any change in status. Such changes include:
   a. adding or dropping courses
   b. change in marital status
   c. addition of a dependent
   d. change of address (notify VARO immediately)
   e. withdrawal from school (notify immediately)

Forms for making these changes are available at the Office of Veterans Services in Room 355 of Student Union I.

6. VA benefits are paid on the following basis:

<table>
<thead>
<tr>
<th>Time</th>
<th>Undergraduate</th>
<th>Graduate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full</td>
<td>12 hours</td>
<td>9 or more</td>
</tr>
<tr>
<td>3/4</td>
<td>9-11 hours</td>
<td>6, 7, 8 hours</td>
</tr>
<tr>
<td>1/2</td>
<td>6-8 hours</td>
<td>4, 5 hours</td>
</tr>
<tr>
<td>less than 1/2</td>
<td>4-5 hours</td>
<td>3 hours</td>
</tr>
<tr>
<td>more than 1/4</td>
<td>less than 4 hours</td>
<td>less than 3 hours</td>
</tr>
</tbody>
</table>

Students on active duty and those taking fewer than six undergraduate hours are paid either tuition and fees or the rate set for the training time, whichever is less. Books and supplies are not included. Benefits are not payable for ENGL 101 or 102 when a no-credit grade is received. The Veterans Administration will not pay for an audit course.

Public Law 98-525 established a new GI Bill (Chapter 30) and also a new educational assistance program for members of the Selected Reserve (Chapter 106). Details may be obtained from the Veterans Services Office on campus.

Tutorial Service for Veterans
The VA will pay $84 per month, not to exceed $1,008 per year, for needed tutorial services. For further information, see the Veterans Office on campus.

Virginia War Orphans Education Program
The Virginia War Orphans Program provides educational assistance to children of qualified veterans. To be eligible an applicant must meet the following requirements:

1. The applicant must be between the ages of 16 and 25.

2. The applicant’s parent must have served in the armed forces of the United States and must (a) be totally disabled due to an injury or disease incurred in a time of armed conflict; or (b) have died as a result of injury or disease incurred in a time of armed conflict; or (c) be listed as a prisoner of war or missing in action.

3. The applicant’s parent must have been a resident of the Commonwealth of Virginia at the time of entry into active military duty, or must have been a resident of the state for at least 10 consecutive years immediately prior to the date of application.

4. The applicant must provide written verification of acceptance as a student in a state-supported post-secondary school.

Eligible individuals are entitled to a maximum of 48 months of tuition-free education at a state-sup-
ported educational institution. For more information, contact the Office of Veterans Services.

**Departmental Scholarships**

**Applied Music Scholarships**

A limited number of applied music scholarships are available to incoming freshmen and transfer students at George Mason University. Application should be made to the Department of Music.

**Student Education Association Endowment Scholarships Fund**

This fund provides grants to a limited number of eligible George Mason University students of demonstrated scholastic achievement, during their student teaching semester.
Registration
Registration

Registration Procedure
The Schedule of Classes, distributed by the Office of Student Records before early registration each semester, contains written instructions for registration. Courses listed in the Schedule of Classes are withdrawn when enrollment is insufficient. The university reserves the right to change the class schedule and adjust the individual section enrollment as necessary.

Students are responsible for registering properly. They should confirm the correctness of their enrollments and report any apparent error immediately to the Office of Student Records. Students must be present at the first meeting of every laboratory course (lecture and laboratory) to claim their registration. If students cannot attend the first meeting, they must notify the department beforehand if they intend to continue in that section. Otherwise, their names will be stricken from that class roll.

Registration is not canceled for failure to attend lecture courses. Students are responsible for full tuition payment and grades received for all courses in which they are registered unless (1) they are canceled for nonpayment in which they registered early; (2) they are canceled administratively by the university staff due to suspension or dismissal; (3) the section in which they are registered is canceled; or (4) they do not attend the first meeting (lecture or lab) of a laboratory course.

Academic Load
Although many students must work to meet living expenses, employment must not take priority over academic responsibilities. Students employed more than 20 hours a week are strongly urged not to attempt a full-time academic load. Students employed more than 40 hours a week should attempt no more than six credit hours per semester. Students failing to observe these guidelines may expect no special consideration for academic problems arising from the pressures of employment. Although 12 semester hours per semester represents a minimum full-time load, students wishing to graduate in four years need to carry an average of at least 15 credit hours per semester. A load in excess of 17 hours must be approved by the student's academic dean.

For planning purposes, applicants for admission are asked to indicate their preference for full- or part-time status and for day or evening classes. However they may freely choose between evening and day sections of courses and may change their full- or part-time status.

Adviser's Permission to Register
Freshmen, entering transfer students, students on academic probation, and students returning from academic suspension are required to obtain an adviser's signature for registration. Students in the School of Nursing and in the departments of Biology, Dance and Theatre, Electrical and Computer Engineering, Foreign Languages and Literatures, Health and Physical Education, Music, Physics, and Social Work, must obtain an adviser's signature before every registration. A Course Request Form, included in the Schedule of Classes for each registration period, is used for this purpose. All students are encouraged to consult with their advisers concerning course registration.

In addition to the above, all students must meet with an adviser for a program-planning session after completing 60 credit hours and before reaching 83 hours. Students who complete this session are granted registration priority. Those who reach 83 credit hours without completing the session are not allowed to register. See Advising Upon Entrance into the Upper Division in the Academic Policies section that follows for more details.

Early Registration
Early registration for the next semester begins about midsemester by priority groups. Registration for the summer session begins after the spring break and is conducted on a first-come, first-served basis.
Student Information

Before or during each registration period, students are asked to provide directory and other types of information used in preparing a student education record and numerous statistical reports. Such information is collected and disseminated in compliance with the Family Educational Rights and Privacy Act of 1974, as amended, which provides that the university maintain the confidentiality of student education records and establish the right of students to inspect and challenge the data maintained in those records. Personally identifiable data from a student’s education record may be released only to persons described in the Act, including “school officials with a legitimate educational interest.”

The university may release directory information to any outside party at its discretion except when a student requests in writing that some or all directory information be withheld.

Category I of directory information includes the student’s date of attendance, major(s), full-or part-time status, and awards received.

Category II of directory information includes student’s address, telephone number(s), date and place of birth, participation in recognized activities and sports, weight and height (normally given only for athletics), most recent previous institution attended, and other similar information.

A student who wishes to withhold directory information from the public should submit a written request to the Office of Student Records at the time of registration for a semester or summer session. Since such withholding may prohibit the Office of Student Records from providing confirmation of enrollment to prospective employers or even residence address to the student’s own family, the student who is considering such a request should consult that office. Withholding directory information will also prevent the posting of confirmation of registration in student locators.

Students may inspect their education records and obtain more information about the Privacy Act at the Office of Student Records. They may also obtain copies of most parts of their records for a nominal fee. Those desiring to do so should schedule an appointment with the registrar.

Student Identity Card

After registering, each student may obtain a university photo identification card. It must be presented to receive a library card and is required for admission to university events and when using university facilities after normal operating hours. It is not transferable and is validated each semester after payment is made for classes; validation stickers are sent by mail. Questions may be directed to the Photo ID office at 323-6372.

Change of Status and Address

Each student is required to notify the Office of Student Records any change in local home address and telephone number, permanent address, or legal name. When a student’s legal name is changed, the Office of Student Records reserves the right to require a certified copy of documents authorizing the change. Such documents are kept in the student’s permanent file.

Canceling Registration/Withdrawal

Students who cannot attend classes during the semester for which they have early registered should cancel registration by written notice to the Office of Student Records prior to the early registration deadline for payment. Students who register and then cancel/withdraw after the deadline, but prior to the beginning of classes or during the first week of classes, are charged a $20 administrative fee. Students who withdraw on or after the first day of class must complete a withdrawal form at the Office of Student Records. Refunds of tuition on and after the first day of classes are made according to a schedule posted at the Cashier’s Office and published in the Tuition and Fees section of this catalog. Withdrawal after the last day for dropping a course (specified in the Academic Calendar) requires approval by the student’s academic dean and is permitted only for nonacademic reasons that prevent course completion.

Continuous Registration

Undergraduate students who fail to attend two consecutive semesters must reapply to the Office of Admissions. Summer session does not count as a semester.

Changing Registration (Schedule Adjustment)

Once registered, students may change their registration only by using an Add/Drop Form, available in departmental offices and at the registration site. Registration changes should be completed within the schedule adjustment period defined below and shown in the Academic Calendar. Permission to enter a closed section must be obtained in writing from the academic department offering the course on a Force Add Slip and submitted with the Add/Drop Form.
When completed, the Add/Drop Form must be delivered in person to the registration site. Schedule changes are made only on the Schedule Adjustment Days shown in the Schedule of Classes or after classes begin.

The last day for adding or dropping a 14-week course is two calendar weeks after and including the first day of classes.

After the date listed in the Academic Calendar for the end of the schedule adjustment period, actions require approval by the chair of the academic department offering the course. Late drop approval is given for all courses at once, constituting withdrawal from a semester (see procedure below).

Withdrawal from a Semester

Upon approval by the student's academic dean, a student may withdraw from a semester after the end of the schedule adjustment period without academic penalty, but only for nonacademic reasons preventing completion of the courses. A student who withdraws from a semester after the schedule adjustment period without the dean's approval receives F's in all courses. Withdrawal forms are available at the Office of Student Records.

Upon withdrawal after the end of the schedule adjustment period the following notation is made on the student's permanent record: "Withdrawn voluntarily for nonacademic reasons on (date) in the (number) week of a (number)-week semester." A list of the student's courses follows, together with W grades.

Auditing a Course

Auditing a course requires the permission of the chair of the department in which the course is offered. Audit forms are available at the Office of Student Records. A previously audited course may be taken for credit at a later date. A student may also audit a course previously taken and passed. A student may not change from credit to audit status after the schedule adjustment period. The usual tuition and fees apply to audit status.

Repeating a Course

Courses passed with a grade of C or better by undergraduates may not be repeated (except for audit). When a course is repeated, the following conditions apply: (1) all hours attempted count toward probation, suspension, or dismissal; (2) the transcript shows both the original and repeat grades; (3) only one grade per course may be presented on the degree application.

Catalogs of Other Institutions

The Office of Student Records maintains a reference collection of undergraduate catalogs of other institutions; the Career Development Center makes accessible a similar collection of graduate and professional school catalogs.

Degree Requirements

See Baccalaureate Degree Requirements under Academic Policies following this section for guidance in choosing courses.
Academic Policies

Academic Advising
Each undergraduate student is encouraged to meet periodically with an academic adviser to discuss academic programs, educational goals, and career plans. With the adviser’s help, each degree student should plan an academic program to meet the general degree requirements and the specific requirements within the student’s major field. During their freshman and sophomore years, students in the Plan for Alternative General Education (PAGE) should plan their schedules through PAGE advisers. Every department coordinates advising of its PAGE students through this office (222 Thompson Hall). Responsibility for reading the catalog and knowing and fulfilling the requirements of a specific baccalaureate degree rests with the student.

Since individual departments establish their own advising processes, students should check with their departments for the appropriate procedures. Students who have not yet decided on a major or who are considering a change of major are advised in the Academic Advising Center.

See Adviser’s Permission to Register in the Registration section for categories of students who may not register without an adviser’s signature.

Advising Upon Entrance into the Upper Division
Every student must meet with an adviser upon entrance into the upper division to adopt a program of study. This meeting should include (1) a review of the requirements for the degree and major the student has chosen, (2) a review of the student’s record including any deficiencies which must be made up, (3) a discussion of the career and/or graduate study options open to the student enrolled in such a program, and (4) an opportunity for departmental faculty to evaluate the student’s suitability to major in the chosen discipline. Students become responsible for fulfilling this requirement during any semester at the end of which they complete 60 or more acceptable hours.

As inducement for students to complete this requirement promptly, those who do enjoy a higher registration priority than students with the same number of hours who have not done so. To ensure that a student does not unduly delay fulfillment of this requirement, no student who has failed to complete the program-planning advising session is permitted to register beyond 83 hours. Once the adviser and student have worked out a program of studies that has been approved (as evidenced by a copy of the program of study signed by both the adviser and the student and placed in the student’s file), the student is no longer required to seek the advice of an adviser. Each department should specifically assign each student a full-time faculty member as an adviser.

The procedures described above are also used for change of major by upper-division students to ensure better advice for those students. Those in a lower-division status may change majors as in the current system. However, once a student has completed 60 hours, a change of major requires an extended session with an adviser in the new major before the change is complete. The above are the minimal advising procedures to be followed by all undergraduate segments of the university. They are not intended, however, to prevent any department from requiring additional advising sessions.

Academic Advising Center
Students who have not yet decided on a major or who are considering a change of major are advised in the Academic Advising Center, located in Finley Building, Room 205. For freshmen who have not declared a major, advising is required for the first two semesters of enrollment. Staff members in the center are usually available for individual advising Monday through Friday, 8:30 a.m. until 5 p.m., and some evenings.

Students are encouraged to walk in or call the center for information about general education requirements, programs, policies, and procedures. They may request help in the selection of a major or the best use of electives. The center also provides information for students who are interested.
in law, medical, dental, veterinary, and divinity schools.

**Medical Sciences Advisory Committee**

Students interested in medicine, dentistry, veterinary medicine, or a related medical field may receive guidance from a special advisory committee. The Medical Sciences Advisory Committee consists of faculty members from appropriate departments within the university who understand the admissions requirements and standards of the professional medical science programs, and who will help students apply to professional schools. Students seeking guidance in gaining admission to a professional medical program may write to the Chair, Medical Sciences Advisory Committee, c/o James Fletcher, Associate Provost, Mason Hall, Room D109, George Mason University, Fairfax, Virginia 22030-4444.

**Attendance Policies**

Students are expected to attend the class periods of the courses for which they register. Although absence alone is not reason for lowering a grade, students are not relieved of the obligation to fulfill course assignments, including those that can only be fulfilled in class. In particular, a student who misses an exam without an excuse may have the course grade lowered. Students who fail to participate (by virtue of extensive absences) in a course in which participation is a factor in evaluation may have the grade lowered.

**Final Examination Policies**

Final examinations are normally given at the end of all undergraduate courses. In predominantly laboratory courses, examinations may be given in the last regularly scheduled laboratory period. Scheduled final examinations should not exceed two hours and 45 minutes. Changes in location or time of in-class final examinations must be approved by the appropriate department chair and appropriate dean. A professor who is considering the assignment of a take-home examination should inform the students at the beginning of the semester. Such examinations should be distributed by the beginning of the last week of classes so that students can coordinate them with preparation for other examinations. Students should not be required to submit examinations prior to the date of the regularly scheduled examination for a class. Final reexaminations are not permitted.

**Absence from Final Examinations**

Absence from final examinations will not be excused except for sickness on the day of the examination or for other cause approved by the student's academic dean. If such absence is unexcused or the examination (with dean's approval) is not taken within 10 days, the course grade is F. A student whose absence from an examination is excused may take a special examination within the 10 days on a date to be arranged between the student and the instructor.

**Grading Policies**

University course work is measured in terms of quality and quantity. A semester hour normally represents one hour per week of lecture recitation or not less than two hours per week of laboratory work throughout a semester. Using the semester hour as the unit of credit, the number of semester hours is a measure of quantity. The grade is a measure of quality.

Additional work of any type submitted to improve a grade after the final grade has been assigned and sent to the Office of Student Records is never accepted.

**A-B-C-D-F.** The normal grading system for undergraduate credit is A, B, C (satisfactory), D (unsatisfactory, passing), and F (unsatisfactory, failing).

**A-B-C-No Credit.** A student successfully completing English Composition and Introduction to Literature (ENGL 101) or Composition for Foreign Students (ENGL 100) is graded either A, B, or C; a student not attaining a level of at least C in these courses receives no credit (NC). Until a minimum grade of C is attained, these courses are not entered on a student's permanent record, nor do they fulfill degree requirements.

**S-NC.** Undergraduates may take up to six credit hours to be graded S-NC. This option applies only to electives outside the major field. Students must obtain the instructor's permission on a Credit Without Grade Form for this provision, and submit the form to the registrar by the end of the add period. An S grade reflects satisfactory (C or better) work. The S grade, but not the NC grade, appears on the transcript.

**IN (Incomplete).** A student who is passing a course may be unable to complete scheduled course work for a cause beyond reasonable control. In such a case, the instructor assigns a temporary grade of Incomplete (IN). The student must then complete all requirements in time for the instructor to assign a regular grade by the last day of classes of the next semester. (Spring incompletes must be changed by the last day of the fall semes-
If the student fails to do so, the mark of IN is changed by the registrar to an F. The student is responsible for submitting work to the instructor with sufficient time for evaluation.

While the mark of IN remains on the transcript, it is treated as an unsatisfactory grade in determining probation, suspension, or dismissal. Removal of IN's from the transcript may result in retroactive elimination of probation, suspension, or dismissal.

IP (In Progress). When the work of BIS 490 or of a course which is graded A-B-C-NC or S-NC is not completed within one semester, a mark of In Progress (IP) is entered on the record. IP is not treated as an unsatisfactory grade. With the exception of BIS 490, an IP not changed to a satisfactory grade by the last day of classes of the next semester results in deletion of the course from the record. An IP in BIS 490 not changed to a permanent grade within the same time limit is changed by the registrar to F.

AB and SP. A student who has received an excuse from the appropriate dean to be absent from a final examination may receive a grade of AB. The AB automatically becomes F within 10 days after the date of the regular examination if testing has not been completed. While the AB remains on the transcript, it is treated as an unsatisfactory grade in determining probation, suspension, or dismissal. The grade of SP is given by the appropriate dean to a student faced with delinquency because of very special circumstances, such as major illness.

Grade Point Average

Grade points for each semester hour are assigned on a scale of 4 for A, 3 for B, 2 for C, 1 for D, and 0 for F. A grade point score is computed by multiplying the value of a letter grade by the number of credits for the course. For example, a student receiving an A in a 3-semester-hour course earns 12 grade points.

Three kinds of grade point average (GPA) are used at George Mason. Current GPA is the measure of academic performance in one semester, affecting both the dean's list and academic warning. Cumulative GPA is one of several criteria affecting academic dismissal. Degree GPA affects graduation with distinction.

Dividing the total grade points earned in a semester by the number of normally graded semester hours attempted in that semester gives the current GPA. Similarly, dividing the number of grade points earned in all George Mason University courses by the number of normally graded semester hours attempted at the university gives the cumulative GPA. A degree GPA is computed at graduation on the basis of the normally graded courses the student completes at the university and includes in the degree application. This average is noted on the transcript and the course grades are listed.

Classification of Students

Admitted undergraduates are classified as follows: freshman, 0-30 semester hours completed; sophomore, 31-59 semester hours completed; junior, 60-89 semester hours completed; senior, 90 or more semester hours completed.

Grade Reports

Grade reports are sent to the student and to the adviser each semester and summer in which the student is registered, including semesters in which the student withdraws after the end of the drop period. The report includes all courses for that semester and the grades received, the cumulative hours of satisfactory grades, the cumulative hours of unsatisfactory grades, and the cumulative hours of credits completed successfully in courses graded under the S-NC option.

Appeal of Grade

Although it is generally acknowledged that the individual faculty member is the best judge of a student's performance, there may be instances in which a student feels a grade has been assigned unfairly. In such cases, the student should ask the instructor to reconsider the grade. If the student remains dissatisfied, the matter may be appealed to the department chair. Upon receiving an appeal, the chair should ask the student to return to the instructor for further consultation. If the instructor and the student are unable to reach a mutually satisfactory agreement, and if the chair believes the student may have a legitimate complaint, the chair forms a committee of three faculty members who are peers of the instructor who assigned the grade. The instructor or the student may challenge and have replaced one of the three members of the committee without giving a reason for the challenge. The committee meets separately with the instructor and with the student to explore the particulars of the case. Every effort is made to avoid an adversarial relationship.

After the committee has reviewed the case thoroughly, it issues to the chair (with a copy to the faculty member) a written recommendation that includes the reasons for its findings. At this time, the faculty member has an opportunity to take the recommended action, if any. If the matter is not re-
solved at this point, the chair considers the committee recommendation and forwards a recommendation to the dean of the school or college in which the course was taken. If the dean decides that a change of grade is appropriate and the faculty member refuses to make the change, the dean may order the registrar to do so. Chairs do not accept grade appeals after the last day of classes of the following semester. Appeals of grades in spring courses must be made by the last day of classes in the next fall semester.

Pending Grade Appeal
In select cases, a student may request a delay from the dean in imposing academic suspension because of a pending grade appeal which could change the student’s status. An approved delay would allow the student to register.

If the grade appeal is successful, the official transcript is corrected and the student continues in classes as a student in good academic standing. If the grade appeal is not successful, the student is required to stop attending all classes immediately. No record of registration for the academic period appears on a transcript and the student receives the appropriate refund as of the date of decision.

Academic Standing
Dean’s List
Students who take at least 12 credit hours in a semester and earn a grade point average of 3.500 or higher for courses attempted that semester merit placement on the Dean’s List.

Good Academic Standing
A student is in good academic standing unless dismissed, suspended, or on probation.

Satisfactory Performance
Students perform satisfactorily during any academic period (semester or summer session) in which they earn a grade point average for that period of 2.000 or higher (1.800 for those in the first or second academic period of the freshman year). In computing the grade point average, a grade of IN is counted as an F, and the grade NC is not counted.

Academic Warning
Students receive an academic warning at the end of any academic period in which they fail to attain a grade point average for that period of 2.000 or better (1.800 for those in the first or second academic period of the freshman year).

Academic Period
For determining the duration of probation and suspension, an academic period is defined as follows:

Each academic period (semester or summer session) begins on the 15th day following the last scheduled day of final examinations for the previous period. Each academic period ends on the 14th day after the last scheduled day of final examinations.

Example: Assume that the last scheduled day of final exams for a semester is Monday, December 23. That period then ends on Monday, January 6. The next period begins on Tuesday, January 7.

Academic Probation
Students who receive two warnings during any four consecutive academic periods of enrollment are on probation during the academic period of enrollment following the second warning. (Consecutive academic periods of enrollment are successive periods during which the student enrolled, regardless of whether there were intervening periods during which the student did not enroll.)

Suspension
A student receiving academic warnings in two immediately consecutive periods of enrollment is suspended. The two consecutive periods are extended to three if the student attempts less than 12 credit hours during either of those periods.

Suspension is included in a student’s permanent record. Course credits earned at other colleges during the period of suspension from the university (for academic or nonacademic reasons) are not accepted for the degree program.

A student’s first suspension is for two academic periods, unless it is imposed at the end of the summer, in which case it is for one semester. A second suspension is for one calendar year, for example, two regular semesters and a summer. A third suspension results in dismissal.

Effect of Suspension on the Reenrolled Student
A student reenrolling after suspension is on probation for one academic period of enrollment. A warning received at the end of that period results in continuation of probation but not suspension.

Dismissal
A third suspension results in dismissal. An undergraduate is also dismissed at the end of any academic period when all of the following occur:

1. The student has received at least one earlier probation or suspension.
2. The work done during the just-completed academic period is unsatisfactory, for example, the grade point average for that work is below 2.000.

3. The student's cumulative grade point average for all work attempted at the university is below a minimum acceptable value that depends on the number of semester hours attempted at the university plus hours transferred from other institutions or obtained by testing as follows:

After being dismissed from the university a student is usually ineligible to reenter.

Effect of Academic Standing on Student Activities

Only students in good academic standing are eligible to hold or run for elective or appointive office in any organization or activity associated with the university, or to participate in any athletic or other activity representing the university on either an intercollegiate or club level, or to serve as a working staff member of any student organization.

A student whose eligibility for an activity requires the completion of a semester will have fulfilled that requirement when the student's publicly scheduled exams are over, unless the student's continued eligibility depends on the grades received. In the latter case, the student will not become eligible until the end of the semester as defined for probation and suspension purposes.

The Undergraduate Major

Academic Advising

Each undergraduate is urged to see an academic adviser periodically to discuss academic programs, educational goals, and career plans. In consultation with the adviser, each degree student should plan an academic program to meet the general degree requirements and the specific requirements within a major field. Responsibility for reading the catalog and knowing and fulfilling the requirements of a specific baccalaureate degree rests with the student.

Individual departments establish their own advising processes; each student should check with the appropriate department. Students who have not yet decided on a major or who are considering a change of major are advised in the Academic Advising Center.

Every student must meet with an adviser upon entrance into the upper division (completion of 60 or more acceptable hours) to adopt a program of study. (See Advising upon Entrance into the Upper Division for complete details.)

Selection of a Major

To plan a sound academic program, the undergraduate should select a major as soon as it is practical, but no later than four weeks before the end of the sophomore year. For declaration of a major, a student should confer with the appropriate department chair and/or faculty adviser and file the necessary form.

Change of Major

A student who wishes to change majors should see a faculty adviser or the Academic Advising Center. Departmental sections of this catalog contain requirements for acceptance into the major programs. A student not meeting the requirements may appeal to the department chair for an exception.

Once a student has completed 60 hours, a change of major requires an extended session with an adviser in the new major before the change is complete. (See Advising Upon Entrance into the Upper Division for details.)

Forms for changing a major are available in the Office of Student Records.

Credit for More than One Undergraduate Major

A student who desires to graduate with a B.A. degree or a B.S. degree in two or more subjects having established degree programs must meet departmental requirements for the major in each field.

The applicant should present to the involved department chairs a detailed program showing the curriculum to be pursued. This program must be approved by the appropriate department chairs and deans. Department chairs and deans also must approve all changes.

A student may begin the program at any time that permits its completion prior to the contemplated graduation date.

Robinson Scholars

Students who wish to pursue interdisciplinary programs may apply to the dean for Undergraduate Studies before the beginning of the sophomore or junior year to become Robinson Scholars. Appointment then requires the written permission of
three Robinson Professors who are willing to serve as an academic committee for the student. The student's curriculum is designed with the advice and consent of the committee, but must fulfill all university degree requirements. Robinson Scholars are required to submit a senior thesis or project demonstrating scholarly competence in their areas of study. Students completing this program are eligible for a bachelor of individualized study degree.

Baccalaureate Degree Requirements

Literacy

Literacy, the ability to read, write, and understand complex ideas in prose, is the cornerstone of a liberal education. Everyone involved in training university students should consider literacy of paramount importance. Because literacy is an essential part of university training, a substantial amount of writing, in some appropriate form, is required in all university programs.

The English Composition Requirement

Because the ability to write well is so important to success in university studies and professional careers, the university requires students to complete two semesters of English composition. Students must enroll in ENGL 101 (or 100) upon admission, unless they have received credit through transfer or proficiency examination. The remaining university composition requirement is satisfied by English 302, or an equivalent transfer course. Students must attain a minimum grade of C in composition courses to fulfill university degree requirements.

Students enrolled in the Plan for Alternative General Education (PAGE) complete the English composition requirement by completing their PAGE program.

Core Requirements

Each undergraduate degree program requires a substantial core from the arts and sciences (24 semester hours). Six semester hours must be in English composition (see English Composition Requirement). Of the remaining 18 hours, 6 must be in each of the following three areas:

<table>

</tbody>
</table>

Catalog Requirements

Bachelor's degree candidates may elect to graduate under the provisions of the catalog in effect at the time of admission or under the provisions of a catalog subsequent to admission if the student has been enrolled in a continuous progression from date of admission to the receipt of a degree (summer sessions and one-semester absences are excluded). A student who fails to register for two or more consecutive semesters must meet either the requirements of the catalog in effect at the time of initial admission, if readmitted within five years of the last attendance, or the catalog in force at the time of readmission.

When the university or one of its academic units makes changes in course requirements, grading procedures, and/or the level of qualitative performance expected of its students for acceptance into particular programs, academic standing, or graduation, the changes apply to all students enrolled in the university at the time of the implementation of the change and thereafter. The Special Collections section of the Fenwick Library has a copy of all previous catalogs for use by staff and students. Copies may not be checked out but may be photocopied.

Residence Requirements

At least one-fourth of the total semester hours presented on the degree application must be completed at the university and must include at least 12 semester hours of advanced-level courses (numbered 300 or above) in the major program. Students are expected to complete the final one-fourth of their college study at the university. However, a student of junior standing who has completed 24 semester hours of advanced-level courses, including 12 upper-level semester hours in the major, may apply to the appropriate dean for permission to complete the remaining degree requirements elsewhere. Such applications must follow the procedures outlined in the section Credit to be Earned at Other Colleges. Permission is granted only in special circumstances, such as moving from the area or enrolling in an accredited professional school.

A student who gains early admission to an accredited professional school may be granted a George Mason bachelor's degree while enrolled in a professional school if certain conditions are met. In this context, a professional school is defined as a school of dentistry, law, medicine, optometry, oste-
opathy, or veterinary medicine. Before leaving the university, a student must obtain certification signed by the department chair and the appropriate dean that the residence, general education, and major requirements for the degree have been met. The student also must secure from the dean prior approval of those professional school courses which are to be applied only as elective credits to the total semester hour requirement for the bachelor's degree.

Academic Requirements
To qualify for a degree, a student must have been admitted, must have fulfilled all stated requirements for the specific degree, and must have earned a GPA of at least 2.00 on the courses presented for graduation. An undergraduate may present all courses in which satisfactory grades have been received and up to 12 hours of courses in which D grades have been received. However, a student may not use a grade of D in BIS 490 and may not use more than six hours of D grades in the major or in the B.I.S. core of study. Some programs may have a more restrictive policy regarding the number of D grades allowable in the major. Please refer to the appropriate section of the catalog for further information.

Students seeking a bachelor's degree must apply at least 45 hours of upper-division coursework (numbered 300 or above) toward graduation requirements.

A Graduation Appeals Committee in each college or school considers written appeals from students failing to meet degree or certain area requirements.

Application for Degree
Students who expect to complete graduation degree requirements must complete an Application for Degree Form and return it to the Office of Student Records by the date designated on the Academic Calendar. A graduation fee is payable at the time of submission; payment is required each time a new application is submitted.

A person undertaking academic study with the university, including supervised research, must be registered as a student and pay the prescribed charges.

Any student not in attendance at the university who is preparing a thesis under the active supervision of a faculty member, or who wishes to return to receive a degree or take an examination, pays a $15 registration fee for that semester and is exempt from all other tuition and fees.

Second Bachelor's Degree
A second bachelor's degree may be earned, either concurrently or sequentially, by completing all requirements for that degree and by presenting on the degree application an additional 30 semester hours of credit earned at the university but not presented toward the first degree.

Graduation with Distinction
A student graduates with distinction from the university when at least 60 semester hours earned at the university are applied toward graduation and the student's grade point average in all work applied toward graduation is at least equal to one of three values:

3.500 (with distinction)
3.700 (with high distinction)
3.900 (with highest distinction)

Students admitted before spring 1989 may choose to satisfy the conditions for graduation with distinction in the 1988-89 Undergraduate Catalog instead of the above conditions.

Graduation with Distinction and Recognition
A student graduates with distinction and with recognition of a distinguished senior project if, in addition to meeting the criteria for graduation with distinction, the student completes a research project or other substantial piece of creative work directed by a faculty member and judged by the student's department to be of distinguished quality. The departmental faculty establishes criteria by which a student graduating with distinction may attempt to receive this recognition.

A B.I.S. student attempting this recognition is evaluated by the B.I.S. Advisory Committee.

Comprehensive Examinations
Undergraduates who have passed with distinction a voluntary departmental comprehensive examination may have the following notation placed in the remarks section of the transcript: “Voluntary comprehensive examination in (area) passed with distinction (date).”

Commencement
Commencement exercises provide an opportunity for students and their families to share in the conferral of academic degrees. Degree candidates who do not desire to participate in the formal graduation ceremonies should notify the Office of Student Records at least six weeks in advance.

Graduate Academic Policies and Procedures
Academic policies and procedures applicable to graduate students appear in the Graduate Catalog.

http://catalog.gmu.edu
Knowledge of University Policies
Each student is responsible for knowing the rules, regulations, requirements, and academic policies of the university. A student in doubt concerning an academic matter should consult a faculty advisor or dean.

Honor System and Code
George Mason University shares in the tradition of an honor system that has existed in Virginia since 1842. The Honor Code is an integral part of university life. On the application for admission, students sign a statement agreeing to conform to and uphold the Honor Code. Therefore, students are responsible for understanding the provisions of the code. In the spirit of the code, a student's word is a declaration of good faith acceptable as truth in all academic matters. Therefore, attempted cheating, plagiarism, lying, and stealing of academic work and related materials constitute Honor Code violations. To maintain an academic community according to these standards, students and faculty must report all alleged violations of the Honor Code to the Honor Committee. Any student who has knowledge of, but does not report, an Honor Code violation may be accused of lying under the Honor Code.

The Honor Committee is independent of the Student Government and the university administration. It is made up of students selected by the student body and has the primary duty of espousing the values of the Honor Code. Its secondary function is to sit as a hearing committee on all alleged violations of the code.

At the beginning of each semester faculty members have the responsibility of explaining to their classes their policy regarding the Honor Code. They must also explain the extent to which aid, if any, is permitted on academic work. The complete Honor Code is printed below:

Honor Code
To promote a stronger sense of mutual responsibility, respect, trust, and fairness among all members of George Mason University, and with the desire for greater academic and personal achievement, we, the members of George Mason University, have set forth the following code of honor.

I. The Honor Committee
The Honor Committee is a group of students elected from the student body whose primary and indispensable duty is to instill the concept and spirit of the Honor Code within the student body.

The secondary function of this group is to sit as a hearing committee on all alleged violations of the code.

II. Extent of the Honor Code
Duties of the Honor Committee:
The Honor Code of George Mason University deals specifically with:
A. Cheating and attempted cheating,
B. Plagiarism,
C. Lying, and
D. Stealing.

A. Cheating encompasses the following:
1. The willful giving or receiving of an unauthorized, unfair, dishonest, or unscrupulous advantage in academic work over other students.
2. The above may be accomplished by any means whatsoever, including but not limited to the following: fraud; duress; deception; theft; trick; talking; signs; gestures; copying from another student; and the unauthorized use of study aids, memoranda, books, data, or other information.
3. Attempted cheating.

B. Plagiarism encompasses the following:
1. Presenting as one's own the words, the work, or the opinions of someone else without proper acknowledgment.
2. Borrowing the sequence of ideas, the arrangement of material, or the pattern of thought of someone else without proper acknowledgment.

C. Lying encompasses the following:
The willful and knowledgeable telling of an untruth, as well as any form of deceit, attempted deception, or fraud in an oral or written statement relating to academic work. This includes but is not limited to:
1. Lying to administration and faculty members.
2. Falsifying any university document by mutilation, addition, or deletion.
3. Lying to Honor Committee members and counsels during investigation and hearing. This may constitute a second charge, with the committee members who acted as judges during that specific hearing acting as accusers.

D. Stealing encompasses the following:
Taking or appropriating without the permission to do so, and with the intent to keep or to make use of wrongfully, property belonging to any member of the George Mason University community or any property located on the university campus. This includes misuse of university computer resources (see Ethics of Computer Resource Use under General Policies). This section is relevant only to academic work and related materials.
III. Responsibility of the Faculty
Professors are responsible, to the best of their ability, for maintaining the integrity of the learning and testing process, both in the classroom and outside of it, and for fostering conditions of academic integrity. Faculty members may actively proctor examinations in situations which they believe warrant it.

To alleviate misunderstandings, all professors are required to delineate at the beginning of each semester what constitutes a violation of the Honor Code in their classes. This should include an explanation of:

A. The extent to which collaboration or group participation is permissible in preparing term papers, laboratory exhibits or notebooks, reports of any kind, tests, quizzes, examinations, homework, or any other work.

B. The extent to which the use of study aids, memoranda, books, data, or other information is permissible to fulfill course requirements.

C. Guidelines on what constitutes plagiarism, including requirements for citing sources.

All professors are encouraged to send the Honor Committee a written copy of their Honor Code policies, which are kept on file. These requirements should also be stated before each test, examination, or other graded work to clarify what is permissible.

Faculty members who witness an Honor Code violation should proceed as outlined under Procedure for Reporting a Violation.

IV. Responsibility of the Students
Students should request a delineation of policy from each professor if none is given at the beginning of each semester. Students should also request an explanation of any part of the policy they do not understand. Students are responsible for understanding their professors' policies with regard to the Honor Code. Students are also responsible for understanding the provisions of the Honor Code.

As participating members of this community, all students have the duty to report to a member of the Honor Committee, within the prescribed time outlined under Procedures for Reporting a Violation, any violations of the Honor Code. This duty is important not only because it enforces the Honor Code, but also because it gives all students the opportunity to express their respect for personal integrity and an honest academic community.

V. Procedure for Reporting a Violation
All students or faculty members witnessing or discovering a violation of the Honor Code should enlist, whenever and whenever possible, one or more corroborating witnesses to the overt act. The accuser(s) (student, faculty, or staff), within 15 working days from date of realization, mails a letter of accusation to the suspected party. This letter is addressed to the accused student's current mailing address listed with the Office of Student Records.

The Honor Committee retains a copy of the accusation letter. The letter informs the suspected parties that they have five Honor Committee working days to contact the Honor Committee office and make an appointment to see the committee chair, who advises them of their rights and options. The Honor Committee begins an investigation, which does not involve a presumption of guilt on the part of the accused. Any member of the George Mason University academic community who knows of but does not report an Honor Code violation may be accused of lying under the Honor Code.

VI. Counsel for the Accused and Accuser
Counsel for the accused and accuser may be provided by any member of the George Mason University student community, including members of the Honor Committee, but not including students of the School of Law.

VII. Appearance of Witnesses
The Honor Committee may require any member of the university community to appear as a witness before the Committee at the time of the hearing. All requests for such appearances are issued by the chair of the Honor Committee, or by the counselor appointed to that case. The appearance of the accuser is required.

VIII. Verdict
To find a student guilty of an honor violation, there must be a four-fifths majority vote (four to one) for a verdict of guilty. Clear and convincing evidence must be presented to find the student guilty.

A student may not be tried more than once for the same offense except when an appeal is granted.

IX. Penalty
If the accused is found guilty of an honor violation, the Honor Committee determines the nature of the penalty by majority vote.

The Honor Committee is not restricted to one kind of penalty but determines one commensurate with the seriousness of the offense. Typical of the range of penalties which may be given are:

A. Oral reprimand: An oral statement to the student given by the chair of the hearing. No entry is made on the student's scholastic record.
B. Written reprimand: A written censure placed in the confidential files of the Honor Committee and in the student's academic file but not made part of the student's scholastic transcript records.

C. Non-academic probation: Exclusion from holding or running for an elected or appointed office in any organization or activity associated with the university. Ineligibility to participate in any activity representing the university on either an intercollegiate or club level and ineligibility to serve as a working staff member of any student organization. This action is noted in the judicial administrator's file but is not made a part of the student's scholastic record.

D. Service hours: Library or other supervised university service hours to be completed by a specific time. Upon completion the hold on the student's records is removed.

E. Failing grade: Recommendation in writing to the instructor for a grade of F for the work involved, or for the entire course. The student's permanent record reflects the academic evaluation made by the instructor.

F. Recommendation of suspension from the university for one or more semesters: A student's scholastic record would read: "Non-academic suspension from (date) to (date)." The recommendation is made to the Associate Provost and Dean for Undergraduate Studies or the Dean of the Graduate School.

G. Recommendation of expulsion from the university: A student's scholastic record would read: "Non-academic expulsion as of (date)." This penalty is recommended to the Associate Provost and Dean for Undergraduate Studies or the Dean of the Graduate School only in extraordinary circumstances, such as for repeated offenses.

X. Appeal
A written request for an appeal, detailing new evidence, procedural irregularities, or other sufficient grounds that may have sufficient bearing on the outcome of the trial, must be presented to the chair of the Honor Committee within seven working days after the date on which the verdict was rendered.

The written request is reviewed by at least three voting members who were not involved with the original case. If a new hearing is granted, no voting member from the original hearing may vote in a second or subsequent hearings of the same case.

XI. Keeping of Records
The records of the hearing are kept in the Honor Committee's files. These records include a tape or a full transcript of the hearing and all evidence presented at the hearing. If the evidence belongs to any person other than the accused, the original is returned to the owner and a copy kept with the records of the Honor Committee.

XII. Composition of the Committee
The Honor Committee is proportionally composed of students from each school and faculty adviser(s), although the latter are nonvoting members. Undecided majors, B.I.S. students, and continuing education students are considered together as a school. The total number of members is as close to one-half of one percent of the student body as possible. Freshmen are appointed in the fall to serve until the following spring election. One or more clerks appointed by the committee from the student body serve as aides to the chair.

The chair of the committee is elected by majority vote of the committee members. For each hearing, five members of the Honor Committee are designated as voting members.

A faculty hearing adviser, acting as a nonvoting member of the committee, sits with and advises the committee at all hearings. The faculty adviser and faculty hearing adviser are chosen by the Honor Committee.

Previous Honor Committee members may serve during the summer term.

XIII. Eligibility of Members
Any student who maintains a 2.0 grade-point average and is in good standing with the university is eligible for the Honor Committee. A committee member must maintain a 2.0 average to continue in office.

XIV. Election of the Honor Committee
The Honor Committee is elected in the spring semester. The term of office begins upon election and runs until the following spring election.

In the fall semester the chair appoints new members to fill any vacancies that have occurred and to fill the freshman seats on the committee.

XV. The Challenging and Voluntary Withdrawal of a Member of the Committee from Participation in a Particular Hearing
An accused person who challenges the right of any member of the Honor Committee to sit in judgment on him or her must present cause to the chair of the hearing.

The hearing committee then decides the validity of the challenge with the challenged member abstaining from voting. A simple majority decides the validity of any challenge. A successfully challenged committee member must not be present during the hearing.
A member of the Honor Committee who feels prejudiced as to the facts of the case, is a close friend or relative of the accused, or would not be able to render an impartial judgment must withdraw from a specific hearing.

XVI. Provision for Amendments

Upon petition of 20 percent of the student body, amendments to or revisions of the Honor Code may be proposed for ratification. Said amendments and/or revisions are voted on by the student body as a whole. A two-thirds majority of the votes cast is necessary for acceptance of any amendment or revision.

The Honor Committee may also propose amendments to be voted on by the student body as described in paragraph one of this section.

Approved amendments take effect immediately for all new cases. New provisions are not applied to cases initiated prior to the amendments.
College of Arts and Sciences
The College of Arts and Sciences is the largest and most diverse academic unit within the university. Its programs reflect the traditions of the liberal arts and sciences and the contemporary innovation of flexible interdisciplinary offerings. Undergraduates are taught by a faculty that has achieved a record of academic excellence. Faculty members strive to prepare the undergraduate for the complexities and changes of modern society.

The disciplines within the college’s 18 departments represent the core curricula of a modern university. Through its programs, the college exposes students to principles of sound reasoning and judgment, while providing the skills for understanding and using information. The college strives to give students some of the knowledge needed in today’s world and to develop within them the lifelong process of self-education.

The college offers ample opportunities for double majors that can be tailored to student needs, combining intellectual pursuits with preparation for employment. Faculty advisory committees assist undergraduates who are interested in careers such as medicine, law, and the ministry.

Degree Requirements
Students should consult the Baccalaureate Degree Requirements section of Academic Policies for information concerning the literacy requirement, English composition requirement, catalog requirements, residence requirements, and academic requirements.
General Education Requirements

The general education portions of the bachelor degree programs offer insights into a broad range of human thought and activity. General education prepares students to fulfill various roles in society by providing a foundation for continued learning and personal development.

Through general education, students gain knowledge of the basic disciplines, skill in relating materials within the disciplines, and some understanding of human civilization as a whole. All courses fulfilling general education requirements are intended to combine these elements. Thus, in a single course, students should gain basic knowledge of a particular discipline, skill in the methods that produced that knowledge, and an understanding of the discipline's common attitudes and its place within human thought and activity.

Students at George Mason meet their general education requirements either by completing the number of hours in the courses listed below or by completing the interdisciplinary courses of the PAGE program.

The courses are grouped below to allow the student to exercise certain options among disciplines using similar modes of thought.

Bachelor of Arts
Degree Requirements

A. General Education .......................... 62

1. Communication ............................. 21
   a. Written ................................. 6
      ENGL 101, 302. Nonnative speakers
      of English with limited proficiency
      in the language may substitute
      ENGL 100 for ENGL 101. Students
      must attain a minimum grade of C
      to have ENGL 100, 101, 302 fulfill
      degree requirements.
   b. Oral ................................... 3
      COMM 100, 101, 110, 120, or 130
   c. Foreign Language ....................... 12
      The student must demonstrate
      proficiency in one foreign language
      offered by the university through
      the intermediate level, either by
      examination or course work.
      International students should
      consult with an assistant dean
about possible waiver of this
requirement.

2. Analytical Reasoning ........................ 3
   Logic (PHIL 173 or 376) or
   mathematics, STAT 250, or
   DESC 200.

3. Humanities ................................. 12
   a. Literature ............................... 6
      Any course in literature at the 200
      level in English, the 200 level or
      above in foreign languages and
      literatures, or PHIL 253.
   b. Fine Arts ................................. 3
      Art, dance, film (ENGL 332), music,
      or theatre (lecture, studio, ensemble,
      or private lessons).
   c. Philosophy or religious studies ....... 3
      A logic course does not satisfy
      this requirement.

4. Social Science .............................. 12
   a. Economics, geography, ............... 6
      government, history
   b. Anthropology, psychology .......... 6
      sociology, AMST 205 and 302

5. Natural Science ............................ 8
   A two-semester laboratory science
   sequence in astronomy, biology,
   chemistry, geology, or physics. BIOL
   124, 125 does not satisfy this
   requirement. Students who seek to
   fulfill this requirement by taking a
   hyphenated course, such as CHEM
   103-104 or CHEM 211-212, can
   receive credit only if both semesters
   of the course are completed
   satisfactorily.

6. Non-Western Culture ........................ 6
   6 credits must be earned in courses
   devoted to non-Western culture. This
   requirement is waived for a student
   who has attended for more than four
   years a native school in a non-
   Western country. Requests for a
   waiver should be made through the
dean of the College of Arts and
   Sciences. The following courses, which
   are designated as meeting this
   requirement, may also be presented
   in partial fulfillment of requirements
   stated in sections 1, 3, and 4:
   ANTH 114, 300, 301, 302, 304, 305, 306,
   307, 308, 311, 313, 332
   ARTH 180, 280, 319, 320

http://catalog.gmu.edu
Bachelor of Science Degree Requirements

A. General Education .................. 24-63

1. English and Literature ............... 12
   a. English Composition ............. 6
      ENGL 101, 302. Students admitted
      prior to fall 1983 may substitute
      ENGL 102 for 302. Nonnative
      speakers of English with limited
      proficiency in the language may
      substitute ENGL 100 for 101.
      Students must attain a minimum
      grade of C to have ENGL 100,
      101, 302 fulfill degree requirements.
   b. Literature ....................... 6
      Any courses in literature at the
      200 level or above in English,
      foreign languages and literatures,
      and PHIL 253.

2. Course Work Outside the Area ....... 12
   of Specialization
   a. 12 hours outside the fields of
      economics, geography, government,
      or history if the degree is in one of
      these fields; six of these hours must
      be chosen from these fields: astronomy,
      biology, chemistry, computer science,
      geology, mathematics, and physics.
   b. 12 hours outside the natural
      sciences or mathematics fields if the
      degree is in those fields; six of these
      hours must be chosen from these fields:
      anthropology, economics, geography,
      government, history, linguistics,
      psychology, and sociology.
   c. 12 hours outside the fields of
      anthropology or psychology if the
      degree is in one of these fields; six of
      these hours must be chosen from
      these fields: astronomy, biology,
      chemistry, computer science, geology,
      mathematics, and physics.

3. Additional Required Courses ....... 16-39
   See departmental sections of the
   catalog for specifics.

B. Major ................................ 38-74
   Fulfillment of requirements for the
   major as listed under the respective
   departments: Biology, Chemistry,
   Economics, Geology, Mathematical
   Sciences, Physics, Psychology, and
   Public Affairs.

C. Electives ........................... 15-41
   Total minimum semester hours ....... 120
   (45 of these must be upper-division hours)

Bachelor of Music Degree Requirements

A. General Education .................. 32

1. English Composition ............... 6
   ENGL 101, 302. Nonnative speakers
   of English with limited proficiency
   in the language may substitute
   ENGL 100 for 101. Students must
   attain a minimum grade of C to have
   ENGL 100, 101, 302 fulfill degree
   requirements.
2. Literature ........................... 6
   Any courses in literature at the
   200 level or above in English,
   foreign languages and literatures,
   and PHIL 253.

3. Natural Sciences/Mathematics/ ....... 6
   Computer Science
   Chosen from astronomy, biology,
   chemistry, computer science, geology,
   mathematics, or physics.

4. Social Sciences ........................ 6
Chosen from anthropology, economics, geography, government, history, linguistics, psychology, or sociology.

5. Additional Nonmusic Courses 8

B. Major 76
1. Basic Musicianship 58
2. Music Concentration 18

C. Electives 22

Total minimum semester hours 130 (45 of these must be upper-division hours)

Bachelor of Fine Arts
Degree Requirements

A. General Education 32
1. English Composition 6
ENGL 101, 302. Nonnative speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. A student must attain a minimum grade of C to have ENGL 100, 101, or 302 fulfill degree requirements.

2. Literature 6
Any courses in literature at the 200 level or above in English, foreign languages and literatures, and PHIL 253.

3. Natural Sciences/Mathematics/Computer Science 6-8
Chosen from astronomy, biology, chemistry, computer science, geology, mathematics, physics, or logic (PHIL 173, 376). Dance majors must take Biology 124 and 125 to fulfill the natural science requirement.

4. Social Sciences 6
Chosen from anthropology, economics, geography, government, history, linguistics, psychology, or sociology.

5. Additional Nonmajor Courses 6-8
See major department for recommended list.

B. Major 86-88

The Department of Dance and Theatre offers major programs under the Bachelor of Fine Arts degrees. The dance division offers a general modern dance major that allows for concentrated study in performance, choreography, or teaching. The theatre division offers a major program with emphasis in acting and design/theatre technology. See the appropriate departmental sections of the catalog for details and the requirements of these major programs.

C. Electives 10-12

Total minimum semester hours 130 (45 of these must be upper-division hours)

PAGE Requirements

Students enrolled at George Mason University may fulfill their general education requirements through the Plan for Alternative General Education (PAGE).

General Education Requirements/PAGE Equivalents

PAGE courses correspond to general education requirements as detailed. Note that most PAGE courses contribute to meeting more than one requirement.

Equivalent Semester Hours

1. Communication 21
   a. Semesters I, II, and III 3 (equivalent to English 101 or 100)
   b. Semester IV 3 (equivalent to English 302)
   c. Semesters I, II, III, and IV 3 (equivalent to COMM 100, 110, 120, or 130)
   d. Foreign Language 12 (PAGE does not satisfy this requirement.)

2. Analytical Reasoning 3
   PAGE 120 and 125, or mathematics substitution as approved (equivalent to logic or mathematics)

3. Humanities 12
   a. PAGE 150, 151, 122, 130 3 (equivalent to Literature I)
   b. PAGE 152, 153, 123, 131 3 (equivalent to Literature II)
   c. PAGE 150, 151, 152, 153, 122, 123 (equivalent to fine arts)
d. PAGE 150, 151, 152, 153, 130, 131 (equivalent to philosophy or religion, except logic)

4. Social Science ........................................ 12
   a. PAGE Semesters II and IV ............... 6
      (equivalent to economics, geography, government, or history)
   b. PAGE Semesters I and III ............. 6
      (equivalent to anthropology, psychology, or sociology)

5. Natural Science ....................................... 8
   PAGE 125, 225, 227, 228, or .......... 8
      mathematics/science sequence as
      approved (equivalent to two-semester science sequence)

6. Non-Western Culture ............................... 6
   a. PAGE 150, 151, 122, 123, 130, 131 (equivalent to Culture I)
   b. PAGE 250, 251, 230 ................. 3
      (equivalent to Culture II)

PAGE Courses Total ......................... 45
   PAGE Courses total 45 credit hours and
   fulfill all general education requirements
   except foreign language.

Physical Education Courses
Activity courses offered by the Department of Health, Sport, and Leisure Studies in the College of Education and Human Services cannot be counted toward the hours required for a degree in the College of Arts and Sciences.

Secondary Teacher Certification
Students who wish to become elementary or secondary school teachers should consult the sections on certification found in the catalog under the College of Education and Human Services.

Minors
Beginning in the academic year 1990-91, students may elect minor programs in addition to their major field of study. Minors require no fewer than 15 hours and no more than 21 hours of study. At least 6 hours of the minor must be completed at GMU. No more than 3 hours of D grade in the minor is accepted. Not all departments in the College of Arts and Sciences offer minor programs. The following minors are now available:

- Astronomy
- Chemistry
- Foreign Languages and Literatures
- History
- Linguistics
- Music
- Philosophy
- Physics
- Religious Studies
- Urban and Suburban Studies
- Women’s Studies

American Studies

Faculty

Course Work
The American Studies faculty offers all course work designated AMST in the Course Descriptions section of this catalog, and AMST 690 listed in the Graduate School catalog.

Requirements for B.A. Degree in American Studies
The interdisciplinary program in American Studies culminates in the conferral of the B.A. degree in American Studies and requires a minimum of
120 hours of course work. All students must satisfy requirements for the B.A. degree at the university and requirements for a major in American Studies. The major requires 36 hours in American Studies divided as follows:

1. American History
   Six hours in HIST 121-122.

2. Introductory Seminar
   Three hours in AMST 302. Students are advised to take AMST 302 in the second semester of their sophomore year or in the first semester of their junior year.

3. English 340

4. Disciplinary Concentration
   9 hours in the courses of a single discipline. Three courses from any one of the following approved sets, or other courses approved by adviser.
   a. Economics: ECON 310, 320, 365
   b. Art and Art History, Music, Dance and Theatre: ARTH 315, 350, 370, 371 (170), 470; MUSI 105, 107; THR 352, 353
   d. Government: GOVT 103, 204, 241, 243, 244, 303, 305, 307, 309, 312, 318, 344, 402, 420
   e. History: HIST 333, 335, 336, 341, 342, 345, 348, 351, 352, 379, 390, 391, 392, 393, 401, 403, 404, 406, 409, 410, 411, 412, 413, 414, 415, 416, 420, 495
   g. Philosophy and Religious Studies: PHIL 331; RELI 231, 331, 332, 333
   h. Sociology: SOCI 152, 206, 301, 302, 304, 308, 332, 350, 373, 382, 401, 402.

5. Interdisciplinary Concentration
   Nine hours in an interdisciplinary concentration defined by adviser and student or by the specific set of interdisciplinary concentrations the program offers. Courses should be selected from those designated appropriate to the concentration in the courses AMST 310, 320, 330, and 340 or from courses so designated in the college disciplines. For 1989-90 the program offers specific interdisciplinary concentrations in Urban and Suburban Culture in America, the 1930s in America, Women in American Culture, and Work and Leisure in America.

6. Senior Project
   3 hours in AMST 410. A seminar in methodology and completion of a project in the field of the interdisciplinary concentration.

7. AMST Elective
   3 additional hours from (a) or (b) below:
   a. AMST 201, 202, 310, 320, 330, 340, 403, 490, 502
   b. A course selected in consultation with the student’s adviser.

American Studies as Part of a Double Major

Many students elect to double major in American Studies and another discipline. Students majoring in anthropology, economics, English, geography, government, history, philosophy, psychology, public administration, or sociology can usually also fulfill the requirements for a second major in American Studies with the minimum 120 hours required for all College of Arts and Sciences degrees. Students wishing to design a double major should discuss their plans with the chair of American Studies. A sample schedule follows.

Sample Schedule for a Double Major in American Studies and History

PAGE Students

The general education requirements (with the exception of foreign language) for the B.A. degree are satisfied by successful completion of the Program for Alternative General Education (PAGE). See PAGE category in this catalog, and see PAGE office for sample schedule for majors in American Studies.
Area Studies

Students can pursue a bachelor’s degree in area studies by focusing on Asian, European, Latin American, Middle East, or Russian Studies. Asian Studies is supervised by a faculty chaired by Louis Golomb of the Department of Sociology and Anthropology; European Studies by a faculty chaired by Amelia Rutledge of the Department of English; Latin American Studies by a faculty chaired by Martha Francescato of the Department of Foreign Languages and Literatures; and Russian Studies by a faculty chaired by James Levine of the Department of Foreign Languages and Literatures.

Asian Studies

Faculty
Chu (Education); Chung (Economics); Duara (History); Golomb (Sociology and Anthropology), Acting Chair; Grewal (English); Liu (Nursing); Nguyen (Public Affairs); Ro (Philosophy and Religious Studies); Saeed (History); Tsukui (English); Williams (Sociology and Anthropology)

Course Work
The Asian Studies faculty offers all course work designated ASST in the Course Descriptions section of this catalog.

B.A. Degree Requirements with a Major in Area Studies
Asian Studies. The student must present a minimum of 120 semester hours of course work for graduation, including satisfaction of general requirements for the B.A. degree and completion of 42 semester hours of course work in Asian studies as follows:

1. 9 hours in Asian Studies seminars: ASST 450, 460 (A or B), 470. These seminars may be taken in any order. See Asian Studies courses (ASST) in the Course Descriptions section of this catalog.

2. 33 hours in the following 4 areas of concentration, at least 3 hours (or one semester course) to be taken in each of the 4 areas. At least 18 hours must be earned at the 300 level or above.
   a. Humanities
   b. Social Sciences
   c. Language/Literature
   d. Cross-cultural Studies

Approved Courses
Department of Art and Art History: ARTH 280
Department of Curriculum and Instruction: (with permission of Asian Studies chair), EDCI 517, 518

European Studies

Faculty
Bergoffen, Brown, Brunette, Censer, Clark, Comito, DeNys, Deshmukh, Ebiasah, Elstun, Efolio,
Course Work
The European Studies faculty offers all course work designated EUST in the Course Descriptions section of this catalog.

B.A. Degree Requirements with a Major in Area Studies

European Studies. The student must present a minimum of 120 semester hours of course work for graduation, including satisfaction of general requirements for the B.A. degree and completion of 45 semester hours of course work in European studies as follows:

1. 12 hours in interdisciplinary seminars: EUST 300, 350, 400, 450
2. 3 hours of European geography: GEOG 320
3. 30 hours in an area of concentration consisting of two related disciplines, selected from the following list. At least 9 of the hours in each discipline must be earned at the 300 level or above.
   a. Language (English, French, German, or Spanish) and the fine arts
   b. Language and history
   c. Language and government
   d. Language and philosophy
   e. History and the fine arts
   f. History and philosophy
   g. History and government
   h. Government and philosophy

Approved Courses

Department of Economics: ECON 380, 390, 481

Department of Art and Art History: ARTH 200, 201, 210, 315, 321, 322, 323, 332, 340, 341, 342, 344, 345, 360, 362, 399 (with permission of program chair), 420, 460

Departments of Dance and Theatre and Music: DANC 101

THR 101, 351, 352, 457

* A maximum of six hours earned in musical ensemble and/or private music instruction may be applied to the European Studies program. Private music instruction is applicable to the European Studies program when the student presents evidence to the chair of the European Studies faculty showing that the repertoire studied was predominantly European. Consult Course Descriptions under MUSI for areas of private instruction available.

Latin American Studies

Faculty
Bufill, Clark, DeCosta-Willis, Fonseca, Forchê, Francescato, Guzman, Hazera, Jacobs, Kelso, Knowles, Lancaster, Meyer, Rader, Ruth, Soder

B.A. Degree Requirements with a Major in Area Studies

Latin American Studies. A student must present a minimum of 120 semester hours of course work for graduation, including satisfaction of general requirements for the B.A. degree.

In addition, the student must present 36 semester hours of course work divided to include:

1. 18 semester hours in a core discipline - any discipline in which a major is possible, and
2. 18 semester hours of Latin American-oriented courses other than in the core discipline, including the interdisciplinary seminar on contemporary Latin America (LAS 491).

Proficiency in Spanish or Portuguese must be demonstrated either by examination or by completion of the requisite 202 or 209 foreign language course.

Approved Courses

The following courses may be presented to meet the second requirement listed above. Students are advised to consult the Course Descriptions in this catalog for course prerequisites.

Department of Economics: ECON 360, 361

Department of Music: MUSI 106

Department of Foreign Languages and Literatures: PORT 202

SPAN 202 or 209 (3 credit hours only), 301, 311, 322, 325, 329, 351, 352, 353, 359, 420, 451, 452, 461, 466, 472, 480, 481 (when topic is applicable)

Middle East Studies

Faculty
Avruch (Sociology and Anthropology), Bakhash (Robinson Professor, History), Dawisha (Public Affairs), Friedlander (Public Affairs), Holsinger (History), Katz (Public Affairs), Price (Foreign Languages and Literatures), Sabbagh (Public Affairs), Saeed (History)

Course Work
The Middle East faculty offers all course work designated MEST in the Course Descriptions section of this catalog.

B.A. Degree Requirements with a Major in Area Studies
Middle East Studies. The student must present a minimum of 120 semester hours of course work for graduation, including satisfaction of general requirements for the B.A. degree and completion of 42 semester hours of course work in Middle East studies as follows:
1. 6 hours in Middle East Studies seminars: MEST 300 and 400
2. 6 hours in History of the Middle East: HIST 281, 282
3. 3 hours in Anthropology of the Middle East: ANTH 207
4. 3 hours in Government of the Middle East: GOVT 332
5. 6 hours in Philosophy and Theology of the Middle East: RELI 211, 374
6. 12 hours in Foreign Languages of the Middle East: ARAB 101, 102, 201, 202; or HEBR 101, 102, 201, 202

Sample Schedule for a B.A. in Area Studies, Middle East Studies

First Semester
- ME language 101
- ENGL 101
- Natural science
- PHIL 173 (or math)
- HIST 101

Second Semester
- Natural science
- COMM 100, 101
- Economics
- ME language 102
- ANTH 114

Third Semester
- ME language 201
- HIST 281
- MEST 300
- Literature
- GOVT 132 or 133

Fourth Semester
- ME language 202
- HIST 282
- ANTH 207
- ECON 103 or 104
- Literature

Fifth Semester
- ENGL 302
- GOVT 332
- ANTH 332
- GEOS 325
- ARTH 319 or 320

Sixth Semester
- HIST 456
- Sociology of ME
- Electives (300+)

Seventh Semester
- GOVT (Per. Gulf)
- Philosophy or religion
- Education of ME
- ECON 380
- HIST (Islamic Thought)

Eighth Semester
- MEST 400
- GOVT (Conf)
- History elective
- SOC1 or ANTH (ME)
- Art, philosophy, or religion

Russian Studies

Faculty
Aksyonov (Robinson Professor, Foreign Languages and Literatures), Alexeev (Economics), Andrews (Public Affairs), Christensen (Foreign Languages and Literatures), Hecht (Foreign Languages and Literatures), Jensen (History), Katz (Public Affairs), Lavoie (Economics), Levine (Foreign Languages and Literatures, Program Chair), Wade (History), Zabolotnyi (Foreign Languages and Literatures)

B.A. Degree Requirements with a Major in Area Studies
Russian Studies. Two principal directions are possible within this degree program: Area (Russian) Studies as one element of a double major, or Area (Russian) Studies as a single degree program. In the first option, students must fulfill all requirements of the Area (Russian) Studies program as noted below. Students must also fulfill requirements of the second major. Obvious combinations with Area (Russian) Studies may be geography, history, international studies, and economics. This program may be accomplished within a four-year period and is recommended for most students.
who intend to seek employment in government, industry, or journalism.

The second option is recommended primarily for students who intend to study Russian in graduate school, who are interested in careers as translators, or who are studying for self-enrichment.

All degree students must present a minimum of 120 semester hours of course work for graduation, to include satisfaction of the general requirements for the B.A. degree, and the following:

1. Russian language through the intermediate level through course work or testing
2. RUSS 380 and 381
3. RUSS 480 or 481 (preferably both)
4. Russian literature (two courses). (May be used to satisfy the literature requirement for the B.A. degree)
5. Three additional upper-division courses bearing the RUSS designator, two of which must be selected from the following: 252, 303, 310, 311, 401, 410, and 480 or 481 (whichever is not applied to the basic requirement)
6. RUSS 353 or HIST 328 (may be used to satisfy the non-Western culture requirement for the B.A. degree)
7. RUSS 354 or HIST 329 (may be used to satisfy the non-Western culture requirement for the B.A. degree) or GOVT 338
8. GEOG 330

Qualified students are encouraged to participate in study-abroad programs in the Soviet Union, e.g., at Leningrad State University or the Pushkin Language Institute in Moscow. Students are asked to consult with Professor Levine or Professor Hecht, either of whom will assist them in the application process.

Approved Courses
Department of Foreign Languages and Literatures: RUSS 101, 102, 109, 201, 202, 209 (subject to language proficiency examination), 252, 300, 303, 310, 311, 325, 326, 327, 353, 354, 380, 381, 401, 402, 407, 410, 415, 480, 481, 490, 491

Department of History: HIST 328, 329
Department of Public Affairs: GEOG 330

Cognate Courses: ANTH 114
ARTH 360, 362
ECON 380
EDUC 435
ENGL 300, 377, 378, 391
EUST 300, 350, 400, 450
GEOG 103
GOVT 132
MKTG 307
THR 351, 352

Art and Art History

Faculty
Associate Professors: Clapsaddle, ffolliott, Hammond, Kravitz, Mattusch (Chair), Ward
Assistant Professors: Butler, Mones-Hattal, Sokolove, Todd
Lecturers: Antholt, Firmani, Jones, Kendall, Sherman

Course Work
The Art and Art History Department offers all course work designated ARTH and ARTS in the Course Descriptions section of this catalog.

B.A. Degree with a Major in Art
The major program in art prepares students for graduate study in studio art or art history, as well as for research and professional work in art. Students may choose to concentrate in art history or studio art.
Concentration in Art History
In addition to the general degree requirements for a B.A. degree, students concentrating in art history must complete 39 credit hours as follows:
1. Visual Thinking (3) or ARTS elective (3) with permission of the department
2. Art History electives at the 100 or 200 level (6)
3. Art History electives at the 300 level (24)
4. Art History electives at the 400 level or above (6)
Up to 3 credits in American Studies or European Studies may be applied toward requirements for the major with departmental approval. Students contemplating graduate study in art history should acquire a reading knowledge of French and/or German.
45 hours at the 300 level or above are required for graduation. These may be taken in any department.

Courses in Support of Graduate Programs. Although a graduate degree program in art history is not now available, these courses are offered in support of other graduate programs: ARTH 592, 593, 596, 599. See the Course Descriptions section of this catalog.

Concentration in Studio Art
In addition to general requirements for a B.A. degree, students concentrating in studio art must complete 42 credit hours as follows:
1. Visual Thinking (3 hours)
2. Studio Fundamentals I and II (6 hours)
3. Survey of Western Art or two art history courses at the 300 level (6 hours)
4. Studio art electives at the 300 level (21 hours)
5. Studio art electives at the 400 level or above (6 hours)
Certain courses outside the department may be presented for credit toward the studio art major with departmental approval.

**Biology**

**Faculty**

*Professors:* Emsley, Ernst, Hart (Assistant Dean), Morowitz (Robinson Professor), Shaffer, Stanley, Taub, Willett (Chair)

*Associate Professors:* Adamkewicz, Andrykovitch, Bradley, Brown, Jonas, Jones, Kelso, Lawrey, Rockwood, Royt, Sheldon, Skog, Torzilli, Wilson

*Assistant Professors:* Birchard, Christensen, Gretz, Heliotis, Oates, Toth-Allen, Walbridge

*Adjunct Professors:* Cook, O’Brien

*Lecturers:* Bright, Egghart, Nejad, Yanosky

**Course Work**

This department offers all course work designated BIOL and MTCH in the Course Descriptions section of this catalog.

**Opportunities in Biology**

The B.A. and B.S. degrees in biology provide a sound liberal education with substantial experience in quantitative and analytical thought along with preparation for a related profession. In addition to providing the strong background necessary for graduate study in the many fields of biological science, the broad course work selection at George Mason allows students to concentrate in the following career-related areas: environmental management, microbiology, molecular biology, biotechnology, genetics, secondary education, natural history, and medical technology. Alternatively, students may prepare for graduate-level studies in medicine, dentistry, veterinary medicine, wildlife management, fisheries biology, or marine science. Suggested courses for each of the above may be obtained in person or requested by mail or phone from the department office, David J. King Hall, Room 3005, (703) 323-2181.

**Laboratory Requirement**

Most biology courses include a required laboratory in which students are expected to actively participate. Laboratories include field trips, experiments with live plants and animals, and dissections of preserved specimens.

**B.A. Degree with a Major in Biology**

In addition to the general requirements for the B.A. degree, candidates must present the following:

1. 32 hours in biology, including BIOL 113, 303, 304, 307, 311, and 383
2. CHEM 211-212
3. One of these combinations: MATH 113-114, 113-110, 110-113, or 110-111

Students expecting to enter graduate or professional school are strongly urged to complete MATH 113 and 114. Organic chemistry and PHYS 106, 107, or 343, 344, 345, 346 are recommended.

**B.S. Degree with a Major in Biology**

In addition to the general requirements for the B.S. degree, candidates must present the following:

1. 44 hours of biology, including BIOL 113, 303, 304, 307, 311, and 383
2. CHEM 211-212, 313-314, 315, and 318 or 320
3. PHYS 106, 107 or PHYS 343, 344, 345, 346
4. At least 9 hours from among the following, including at least 2 math courses:
   - MATH 110, 111 (6)
   - MATH 113, 114 (8)
   - CS 103 (3)
   - STAT 250 (3)
   - BIOL 312 (4)

Courses Approved for Undergraduate Biology

Major Credit: GEOL 202, 307, 309; CHEM 563, 564, 565

Advising

All biology and medical technology majors must have an adviser's signature to register.

Transfer Students

Residence Requirement

Students majoring in biology are required to complete 16 semester hours of credit for the major at the 300 and 400 level at the university.

PAGE Students

The general education and mathematics requirements for the B.A. and B.S. degrees are satisfied by successful completion of the Program for Alternative General Education (PAGE). See the PAGE office (222 Thompson) for sample schedules for majors in biology.

Premedical, Predental, and Preveterinary Students

Students planning to enter medical, dental, or veterinary schools may choose to major in biology. The specific requirements for admission to these schools vary considerably and often may be met by either a B.A. or a B.S. degree. Most programs, however, do require applicants to complete organic chemistry (CHEM 313-314, 315 and 318 or 320) and a year of physics (PHYS 343 through 346). A course in calculus is required by some and highly recommended by others. Some schools prefer students with more extensive backgrounds in biological or physical sciences, while others indicate that the undergraduate years are better devoted to humanistic pursuits that are unavailable in professional schools. Because these schools vary both in their philosophies and in their specific requirements, it is wise for the student to become aware of such information well in advance of applying for admission. The Department of Biology Health Sciences Adviser may be contacted for assistance and for information about the university's Health Sciences Advisory Committee.

Students transferring to an accredited medical, dental, or veterinary school should refer to the Residence Requirements section of this catalog.

Secondary Teacher Certification

Students who wish to become secondary school teachers of biology are required to earn a bachelor's degree with a major in biology as awarded at George Mason University. The courses taken should include the biology core courses. A year of mathematics and general chemistry are also required. The professional preparation component of the state-approved teacher education programs for secondary school teachers is offered in the College of Education and Human Services. See Certificates for Secondary School Teaching under that college's section in the catalog.

Students seeking certification in biology or general science are required to consult with the Biology Department Secondary Education Adviser and the appropriate discipline adviser in the College of Education and Human Services. Grades of C or better in science courses are required for students teaching in biology.

Environmental Management Certificate

The Department of Biology offers an undergraduate certificate program in environmental management for students interested in environmental issues. The program consists of 27 hours of course work, most of which, with appropriate planning, could be counted toward the fulfillment of B.S. or B.A. requirements in biology. The curriculum provides a substantive appreciation of the biological, physical, and social aspects of environmental problems and methods for their analysis and resolu-
tion. It should particularly interest students wishing to pursue graduate work or seeking employment in the environmental field. All biology majors are eligible to enroll. For further information contact the certificate coordinator, Francis Heliotis, David J. King Hall, Room 3037, (703) 323-2181.

**Biology for Nonmajors**

Students in the College of Arts and Sciences who are not majoring in science or mathematics, and students in the School of Business Administration who wish to fulfill their natural science requirement with a two-semester laboratory sequence in biology, should enroll in BIOL 103, 104. Exceptions include candidates for the B.S. in psychology, who must take BIOL 113, 114. Students in the College of Education and Human Services normally fulfill their biology requirements as follows: Physical Education majors: BIOL 124, 125; Health Education majors: BIOL 103, 104, 124, 125, and 261. Nursing majors take BIOL 124, 125, and 261.

Students who decide to major in biology after completing one or more of the above courses should consult the undergraduate coordinator of the Department of Biology when planning their academic program. The department offers a variety of general interest nonmajor courses for those seeking additional elective credit. Students who have completed one year of nonmajor biology also qualify for a number of advanced biology courses.

**B.S. Degree with a Major in Medical Technology**

This program requires the equivalent of three years of full-time preprofessional study at the college level preceding a senior year of professional education in an affiliated school of medical technology. All affiliated schools are accredited by the Committee on Allied Health and Education Accreditation (CAHEA) of the American Medical Association.

Responsibility for applying to schools of medical technology and gaining admission rests with the students. However, guidance is provided by the Medical Technology Program director in the Department of Biology. Admission to schools of medical technology is selective. Candidates should strive for strong academic standing. Students who fail to gain admission to a CAHEA-approved school are unable to complete the degree program. Such students may transfer to a biology major without loss of credits.

Application to medical technology schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the preprofessional curriculum, makes it imperative that students in the program consult regularly with their faculty advisers. All medical technology majors and prospective majors are urged to enroll in MTCH 200 as early as possible. This course provides information on the profession and on the educational demands placed on candidates.

Students should be aware that the senior year spent off campus requires the following special interpretation of university policies: Transfer students must present at least 16 hours of 300- or 400-level biology or chemistry taken at George Mason University. Students may present no more than 6 hours of D grades in the biology and chemistry courses required in the 3 years of preprofessional study. No unsatisfactory grades may be presented for courses in the senior year of professional study. Transfer students entering with more than 45 hours of transfer credit are often unable to complete the preprofessional phase of their program in the usual 3 years of full-time study.

Senior students are registered at the university through special procedures. For details consult the program director.

In addition to the college requirements for bachelor of science degrees and MTCH 200, candidates for the B.S. with a major in medical technology must present the following courses in their preprofessional programs:

1. Biology, a minimum of 20 hours, including BIOL 113, 302, 303, 383, and 452
2. Chemistry, a minimum of 22 hours, including CHEM 211-212, 313, 314, 315, and either 318 or 320
3. Mathematics, a minimum of 6 hours (STAT 250 recommended; MATH 106 not applicable)

Students are encouraged to elect additional basic science courses during their preprofessional years. Recommended are BIOL 311, 380, 465, 552; CS 103; CHEM 321; PHYS 106, 107.

The professional study during the senior year requires 30 semester hours of course work, including MTCH 401, 402, 403, 404, 405, and 406. The distribution of credit hours in these courses varies with the school of medical technology. No more than 30 hours of professional credit may be applied toward the degree.

*Anthropology, economics, geography, government, history, linguistics, psychology, or sociology

Professional Phase: Twelve months' clinical education at an affiliated school of medical technology.

Medical Laboratory Technician (MLT) Articulation Track

A special track is available for MLTs who are graduates of associate degree programs. This track provides substantial credit for the scientific and clinical aspects of the associate degree, but requires that the student meet the clinical requirement for national certifying examinations through approved work experience. For details contact the program director.

The Major in Medical Technology as a Second Bachelor's Degree

While the standard program for medical technologists is three years on campus followed by a fourth year at a clinical affiliate (3 + 1), many students elect to complete a bachelor's degree before entering the clinical program (4 + 1). Students who have completed a B.S. with a major in biology or chemistry at GMU and who then undertake a fifth year at a clinical affiliate may be eligible for a second bachelor's degree with a major in medical technology. Students wishing to receive the second degree must make application before entering their fifth year. For further information contact a medical technology adviser.

Biology Clubs and Societies

Beta-Beta-Beta Biological Honor Society: Active members must have completed at least 54 credit hours and have a 3.0 biology GPA with an overall

3.0. The goal of this organization is to promote scholarship, research, and dissemination of biological knowledge.

Biology Club: The club functions as both a social and informational network for all interested students. In addition it serves the Biology Department by sponsoring a seminar program and working at university functions.

Premedical Society: The Premedical Society is a student support group providing professional school tours, educational programs, and lectures on health topics and on the professional school admissions process to students interested in health-related fields such as medicine and dentistry.

Chemistry

Faculty

Professors: Cozzens, Mushrush (Chair), Stalick
Associate Professors: Chen, Davies, Davis (Associate Chair), Roth, Schreifels, Slayden
Assistant Professors: Foster, Honeychuck, Hussam, Kelp, Weber
Lecturers: Kianpour

Course Work

This department offers all course work designated CHEM in the Course Descriptions section of this catalog.

B.A. Degree with a Major in Chemistry

This program, when coordinated with the necessary courses in education, meets requirements for state certification in chemistry for secondary teachers. It also meets requirements for entrance to medical and other professional schools (see below). In addition to general requirements for a B.A. degree, candidates must complete the following:

1. 37 hours of chemistry courses, including CHEM 211-212, 313-314, 315, 318, 320, 321, 331, 332, 336, and 337
2. MATH 113, 114, and 213
3. PHYS 343-346

B.S. Degree with a Major in Chemistry

This program is accredited by the American Chemical Society; students completing the program are certified to the society. Students plan-

http://catalog.gmu.edu
ning professional careers in chemistry should choose the B.S. program.

Minimum course requirements are as follows:

- **Chemistry** .................. 49
- **Mathematics** .................. 14
- **Physics** .................. 8
- **Other** .................. 49
- **Total** .................. 120

Required courses in chemistry include those indicated for the B.A. degree plus CHEM 422, 441, and 445.

Mathematics must include MATH 113, 114, 213, and 304. Physics must include either PHYS 343-346 or PHYS 250, 350, 351, 352, and 353. The latter sequence is recommended for students planning to attend graduate school. In addition, CS 161 or 103 or ENGR 110 is required.

Graduate Programs

In conjunction with the Departments of Biology, Electrical and Computer Engineering, and Geology, the Department of Chemistry offers interdisciplinary graduate programs leading to the degree of Master of Arts in Interdisciplinary Studies. The department also offers a program leading to the Master of Science in Chemistry. Information about graduate programs may be obtained from the Graduate School catalog and from the Department of Chemistry.

Classical Studies

Faculty

Burns (Philosophy and Religious Studies), Chamberlain (Foreign Languages and Literatures), Davis (Foreign Languages and Literatures), Lytton (History) (Acting Chair), Mattusch (Art and Art History), Rutledge (English), Wehrle (Philosophy and Religious Studies), Winkler (Foreign Languages and Literatures)

B.A. Degree with a Major in Classical Studies

Candidates must present a minimum of 120 semester hours of course work for graduation. In addition to the general requirements for the B.A. degree, candidates must complete 36 semester hours of course work, with at least 24 hours at the upper-division level (numbered 300 or above), including the following:

1. 21 hours in Latin beyond LATN 102, including LATN 499
2. 6 hours in classical history from HIST 301, 302, 390 (with approval), and 480
3. 9 hours in classical art, literature, philosophy, European studies, or religious studies from the following: ARTH 102, 111, 321, 322, 323, 333, 399 (with approval), 420; CLAS 250, 300, 301, 302, 310, 390; EUST 300; PHIL 301; RELI 252, 371

Some classical studies requirements can be used to satisfy B.A. degree requirements; see Bachelor of Arts Degree Requirements section of the catalog. See Baccalaureate Degree Requirements section for academic requirements, especially the 45 hours of upper-division (300 or 400 level) course work graduation requirement.

*These should be at the 300 or 400 level to meet the 45 semester hours of upper-division course work required for graduation.

Communication

Faculty

Professors: Boileau (Chair), Manchester, Taylor
Associate Professors: Broome, Decker, Friedley, Lont
Assistant Professors: Akwule, S. Muir, Schulman
Instructor: J. Muir

Adjunct Professors: Chesebro, Gaudino, Harris, Joffe, Lieb-Brilhart, Keever, Ndolo, Starosta, Walsh
Lecturers: Coles, Dulan, Forman, Larson, Rainey, Schaefer, Wood

Course Work

This department offers all course work designated COMM in the Course Descriptions section of this catalog.
B.A. Degree with a Major in Speech Communication

Study in communication prepares students for graduate study or entry-level positions in one of three areas of concentration:

1. Public communication
2. Interpersonal communication
3. Mass communication, including journalism

In addition to the general requirements for the B.A. degree, speech communication majors must complete 36 semester hours in communication, including the following:

1. Five required communication courses, which must be completed with grades of C or better:
   - COMM 300 (3)
   - COMM 301 (3)
   - COMM 302 (3)
   - COMM 400 (to be taken in fall of junior year) (3)
   - COMM 420 (to be taken in last semester of senior year) (3)

2. The remaining 21 hours of communication electives, 12 of which must be at the 300 or 400 level, should be selected in consultation with an adviser. These 21 hours of COMM electives may include no more than 10 hours total from among the following courses: COMM 140, 141, 142, 143, 145, 146, 148, 340, 341, 342, 343, 345, 346, 348, 349, 357, 450, 451.

No more than 3 hours of internship credit (COMM 450) may be applied toward COMM electives; no more than 9 hours credit in COMM 450 may be applied toward the 120 hours required for graduation.

Students should go to the department office for guidance in choosing courses. The department has handouts with recommendations for students pursuing careers in law, journalism, teaching, mass communication, public communication, interpersonal communication, public relations, association work, and political communication. Different career goals lead to different options for completing general education courses.

All students are encouraged to participate in one of the communication activities: WGMU radio, Broadside newspaper, Debate, Forensics, Video Yearbook. Many students include an internship during their senior year as a way of gaining practical experience with national and international businesses, associations, or government agencies.

To fulfill CAS general education communication requirements, COMM majors must take COMM 101, 110, 120, or 130.

The general education requirements for COMM majors, except foreign language and COMM 101, 110, 120, or 130, may be satisfied by successful completion of the Plan for Alternative General Education (PAGE). See PAGE category in this catalog; sample schedules are available in the PAGE office.

COMM majors are urged to consult with an adviser in planning an appropriate schedule that will contribute to developing a strong cognate field.

Dance and Theatre

Faculty

Professors: D’Andrea (Robinson Professor), L. Brown (Interim Chair)

Associate Professors: Miller, Murphey

Assistant Professors: Campbell, Houser, Studd

Lecturers: Brophy, Leshin, Vaughn

Dance

Two degrees in dance are offered:
1. Bachelor of Fine Arts with a major in Dance
2. Bachelor of Arts with a major in Dance

The two dance degree programs prepare students for graduate work in performance, choreography, teaching, history, and criticism, and for professional and creative opportunities in dance.

B.F.A. Degree with a Major in Dance

The bachelor of fine arts degree in dance is specifically a performance-oriented program designed to prepare students professionally as performers, choreographers, and teachers, as well as to prepare them for graduate study. Students in this program devote a significant portion of their college careers to an intensive and comprehensive level of dance study.

The B.F.A. degree offers a general modern dance major that allows for concentrated study in performance, choreography, or teaching. Technical training includes ballet, jazz, and a strong emphasis on modern dance. Entrance into the B.F.A. program is by audition. Auditions are held twice a year, in April and November, and interested students must make arrangements in advance by contacting the Department of Dance and Theatre. Transfer students are also required to audition. Approval for the dance program does not mean that a student has been admitted to the university. For admission to the university each student must submit an application to the Office of Admissions.
Because of the professional nature of this degree, the program requires completion of 130 hours of course work.

### Degree Requirements

| Semester Hours |  
|----------------|---
| **General Education** | 32  

See requirements for B.F.A. degree under the College of Arts and Sciences section of the catalog. Dance majors must take Biology 124 and 125 to fulfill the natural science requirement.

Theatre

The Theatre Division of the Department of Dance and Theatre offers B.A. and B.F.A. degree programs that prepare students for graduate study in acting, directing, scene design, costume design, lighting design, technical theatre, and history/theory/criticism, as well as for professional activities and research.

B.A. Degree with a Major in Theatre

In addition to the general requirements for the bachelor of arts degree, theatre majors must complete a minimum of 42 hours in the major: 33 hours of required courses and 9 hours of theatre electives. All majors are expected to participate in theatre productions.

B.F.A. Degree with a Major in Theatre

In addition to the general education requirements for the bachelor of fine arts degree, theatre majors must complete a minimum of 88 hours in the major: 33 hours of required courses and 55 hours in an area of emphasis. Areas of emphasis are acting and design/theatre technology. Students interested in directing are advised to follow the B.A. program.

Entry into the B.F.A. program with a major in theatre is by interview and audition or portfolio presentation only. In addition to demonstrating artistic potential in their chosen field, applicants must convince the faculty jury of their serious interest in the concentrated study of production and performance. Applicants should have sophomore standing and have completed THR 150, 230, 231, and 220 or 232, but should apply no later than the fall semester of their junior year. Special cases such as transfers or late changes of major may be permitted to apply for the B.F.A. after the fall semester of the junior year. However, given the extensive requirements of the major, such applicants should expect to enroll for an extra semester or more to finish the degree. See the Theatre Division coordinator for details and a schedule of audition and presentation dates. Theatre majors are expected to participate in GMU theatre productions.

Economics

Faculty

University Professor: Buchanan

Professors: Bennett, Bloch, Crain, Heiner, Phillips, Rowley, Snively (Emeritus), Tollison, Vanberg, Vaughn, Wagner (Chair), Williams

Associate Professors: Chung, Congleton, Cowen, High, Lavoie, Levy, Reid, Roback, Wiest

Assistant Professors: Alexeev, Boudreaux, Ellig, Grier, Meyer, Thorbecke

Course Work

This department offers all course work designated ECON in the Course Descriptions section of this catalog.

B.A. Degree with a Major in Economics

In satisfying the general requirements for a B.A. degree, candidates must complete the following:

1. 33 hours in economics, including ECON 103, 104, 306, and 311
2. DESC 200 and 202
3. MATH 108
4. 12 hours in one of the following areas: anthropology, geography, government, history, mathematics (above the 113 level), philosophy, psychology, or sociology

http://catalog.gmu.edu
All economics courses, DESC 200 and 202, and MATH 108 may be applied to the B.A. degree in economics only if passed with a grade of C or better.

Since changes in the program may be made after the catalog is published, students should obtain a complete list of requirements from the Economics Department office.

### B.S. Degree with a Major in Economics

In addition to the general requirements for a B.S. degree, candidates must complete the following:

1. 39 hours in economics, including ECON 103, 104, 306, 311, and 345
2. STAT 362
3. DESC 200 and 202
4. MATH 113 and 114
5. CS 103 or IRM 201
6. CS 362
7. A two-semester sequence in a laboratory science
8. 12 hours in one of the following areas: anthropology, geography, government, history, mathematics (above the 113 level), philosophy, psychology, or sociology

Courses in economics may be applied to the B.S. degree only if passed with a grade of C or better. No more than six hours of D grades in other required courses may be applied to the B.S. degree.

Students considering graduate study in economics are advised to complete at least one course in calculus beyond MATH 114.

Since changes in the program may be made after the catalog is published, students should obtain a complete list of requirements from the Economics Department office.

### Secondary Teacher Certification

Students who wish to become elementary or secondary school teachers should consult the sections on certification under the *College of Education and Human Services*. Those interested in secondary school teaching should consult with the secondary education adviser in their department.

### PAGE Students

The general education requirements (with the exception of foreign language) for the B.A. and B.S. degrees are satisfied by successful completion of the Program for Alternative General Education (PAGE). See *PAGE* category in this catalog; sample schedules for economics majors are available in the PAGE office.
English

Faculty

Professors: Bausch, Baxter, L. Brown, S. Brown, Brunette, Comito, D’Andrea (Robinson Professor), Garson, Gras, Kelley, Shreve, Williams

Associate Professors: Bergmann (Chair), Cheuse, Forche, Foreman, Foster, Gallehr, Goodwin, Hammond, Hodges, Holisky, Irvine, Jann, Kaplan, Karlson, Keane, Klappert, Kubrick, Lathbury, Melosh, Nadeau, O’Connor, Owens, Palmieri, Radner, Rutledge, Story, Sypher, Thaiss, Tsukui, Yocom

Assistant Professors: Albanese, Brady, Brogan, Derrick, Fuchs, Golden, Grewal, Jones, Kaufmann, Mobley, Tichy, Weinberger

Visiting Assistant Professors: Crouch, De Nys, Leith, Mack, Mandel, Nunnally, Williams

Course Work

The English Department offers all course work designated ENGL in the Course Descriptions section of this catalog.

B.A. Degree with a Major in English

To major in English, students must complete the General Education requirements listed under the Bachelor of Arts Degree Requirements in this catalog and 10 courses (30 semester hours) in English beyond the 200 level. General education requirements (except foreign language) for the B.A. degree may be satisfied by successfully completing the Program for Alternative General Education (PAGE). See the PAGE section of this catalog for a description of the program; sample schedules for English majors are available in the PAGE office.

The English Department offers two programs within the English major: the Literature Program and the Writing Program. Both include required and elective courses. Students should seek the help of their advisers in choosing elective courses.

Literature Program

The Literature Program prepares students for graduate work in a variety of disciplines, for teaching, and for careers in industry and government in which skills in English are important. The program focuses on the history and nature of literary texts, including fiction, non-fiction, drama, poetry, and film. It requires 10 English courses beyond the 200 level, distributed as follows:

1. ENGL 325, Dimensions of Literature (may be taken at the same time as the second sophomore literature course)
2. Four literature courses at the 400 level
3. One course in a major author (ENGL 471, 472, 473, 474, 477, 478)
4. One course in language, style, or criticism (ENGL 337, 397, 398, 481, 485, 489, 494, 495, 511, 551, 556, 557, and 592)
5. Three elective English courses above ENGL 302

Writing Program

The Writing Program prepares students for graduate work in a variety of disciplines, for teaching, for careers in creative writing, and for careers in industry and government in which skills in English are important. The program places special emphasis on the writing of fiction, poetry, and non-fiction. It requires 10 English courses beyond the 200 level, distributed as follows:

1. ENGL 325, Dimensions of Literature (may be taken at the same time as the second sophomore literature course)
2. At least four writing courses (ENGL 309, 397, 398, 410, 458, 464, 489, 503, 504)
3. Three elective literature courses above ENGL 302
4. Two elective English courses, including but not limited to literature courses, above ENGL 302

Related Courses

Students interested in courses in Classicism and Romanticism or the Twentieth Century in Europe should see EUST 350 and EUST 450 in the Course Descriptions section of this catalog. Either, but not both, may be counted toward the English major. Courses offered by other departments are occasionally cross-listed with English and given ENGL course numbers; such courses may be counted toward the English major.

The Comparative Literature Option

The English Department and the Department of Foreign Languages and Literatures offer a B.A. in English with a concentration in Comparative Literature. This program permits the student to com-
bine the study of literature in English with the study of literature in a foreign language. It requires 11 courses above the 200 level, distributed as follows:
1. CL 300, Introduction to Comparative Literature
2. One course in literary criticism (chosen from ENGL 494, ENGL 551, FREN 381, or SPAN 311, as appropriate for the student’s interests and focus in foreign literature)
3. Four courses in English and/or American literature above ENGL 302
4. Four courses in the literature of a modern foreign language (of the eight courses in requirements 3 and 4, four courses must comprise a core in genre, period, or movement designed by the student and adviser)
5. CL 514, Theories of Comparative Literature

For more information, contact the English Department or the Department of Foreign Languages and Literatures.

**English in a Double Major**
For students who want a double major, the English Department accepts certain courses outside of English for credit toward the English major. The English Department offers a double English-Philosophy major in cooperation with the Department of Philosophy and Religious Studies. The Philosophy and Religious Studies section of this catalog describes the English-Philosophy major. Contact the English Department for details. Students interested in designing their own double majors are encouraged to discuss their plans with their English advisers and the Director of Undergraduate Programs in English.

**Undergraduates in Graduate English Courses**
The English Department permits qualified undergraduates to enroll in its graduate courses numbered 500-599, either for undergraduate or for reserved graduate credit. See the department for details on how to enroll.

**Secondary Teacher Certification**
Students interested in becoming elementary or secondary school teachers should consult the requirements for teacher certification listed in this catalog under College of Education and Human Services. See the English Department’s secondary education adviser for more information.

**Graduation with Distinction and Recognition**
Students who wish to graduate with distinction in English must meet the requirements for grade point average listed under Academic Policies in this catalog. Those who wish to graduate with recognition in English must meet the requirements for graduation with distinction and successfully complete the English Department’s Honors Program. This may be done in one of two ways:

1. By completing four special studies seminars, or Honors Seminars, in sequence during the junior and senior years. Although the Honors Seminars are open to all English majors, students must obtain permission from the department to enroll in them. See the English Department for application procedures and further information. In addition, students must submit term papers from three Honors Seminars to the English Honors Committee for evaluation. If the committee judges all three papers to be of distinguished quality, the student graduates with recognition.
2. By completing an honors thesis, for which the student receives three hours of independent study credit. The thesis may be submitted as a substitute for the four Honors Seminars. If the thesis is judged by the student’s thesis director and two other members of the English Department to be of distinguished quality, the student graduates with recognition.

Foreign Languages and Literatures

Faculty

Professors: Aguera, Aksyonov (Robinson Professor), Eistun, Francescato, Hecht, Lewis (Dean), Warner (Chair)

Associate Professors: Chamberlain, Cordero, Goldin, Hazera, LePage, Levine, Meyer, Wagner, Winkler

Assistant Professors: Berroa, Bufill, Christensen, Ricouart, Wekerle

Visiting Acting Assistant Professors: Cabrera, Davis, Kabia, Morton

Course Work

This department offers all course work designated ARAB, CHIN, CL, CLAS, FREN, FRLN, GERM, GREE, HEBR, ITAL, JAPA, KORE, LATN, PORT, RUSS, SPAN, and VIET in the Course Descriptions section of this catalog.

B.A. Degree in Foreign Languages with Concentrations in French, German, or Spanish

The B.A. in Foreign Languages replaces the separate B.A.'s in French, German, or Spanish, allowing students greater flexibility in the choice of options, including concentrations in two languages. It also brings the undergraduate program in harmony with the graduate, where the department offers the M.A. in Foreign Languages.

Concentrations in French, German, or Spanish prepare students for teaching careers at the secondary school level, for graduate study in a foreign language, and for research and professional work in government and private enterprise.

Students who want a double major in a foreign language and another subject should plan a program of study in consultation with advisers from both disciplines.

Other Foreign Language Courses

Elementary and intermediate courses are offered in Arabic, Chinese, French, German, Greek, Italian, Japanese, Latin, Portuguese, Russian, and Spanish, and may be used to fulfill the foreign language area requirement for the B.A. degree. The language laboratory complements the oral and written work of the classroom with tapes, drills, exercises, and cultural materials.

Courses Offered in English

The following courses are offered in English (the knowledge of a foreign language is not required):

- CLAS 250, 300; FREN 325, 329; FRLN 431; GERM 301, 302, 305, 325; JAPA 301, 302; KORE 450, 451; RUSS 300, 326, 327, 353, 354; SPAN 321, 322, 325, 329; VIET 301, 302.

(Courses numbered 325 may be repeated once for credit if the authors studied are different.)

Courses that Fulfill General Requirements

1. Language courses through the intermediate level fulfill the foreign language requirement.
2. All literature courses on the 200 level and above fulfill the general requirement in literature for baccalaureate degrees.
3. The following courses fulfill the non-Western culture requirement: FREN 451; KORE 450, 451; RUSS 353, 354; VIET 353, 354; VIET 301, 302.

Secondary Teacher Certification

Students who want to become elementary or secondary school teachers should consult the sections on certification found in the catalog under the College of Education and Human Services. Those planning to become secondary school teachers should consult with the secondary education adviser in their department.

Comparative Literature Option

The Department of Foreign Languages and Literatures and the Department of English offer a B.A. in foreign language with a concentration in comparative literature. The requirements are as follows:

1. CL 300, Introduction to Comparative Literature (3)
2. A course in literary criticism chosen from ENGL 494, ENGL 551, FREN 381, or SPAN 311, as appropriate for the student's interests (3)
3. 12 semester hours in the literature of a modern language, at the 300 level and above
4. 12 semester hours in English and American literature, or in the literature of a second modern foreign language at the 300 level and above

Of the 24 hours in (3) and (4) above, 12 hours must comprise a core in genre, period, or movement designed by the student and his or her adviser.

http://catalog.gmu.edu
5. CL 514, Theories of Comparative Literature (3)
For more information, contact the Department of Foreign Languages and Literatures or the Department of English.

Certificate in Translation
The Department of Foreign Languages and Literatures offers a program leading to a certificate in translation. For details, see the catalog section on Certificates and University Courses.

B.A. Degree in Foreign Languages with a Concentration in French
In addition to meeting the general requirements for the B.A. degree, students must complete a minimum of 27 semester hours in French courses at the 300 level and above. Students are expected to complete a balanced program that includes courses in language, culture, and civilization, and literature. The 27 hours required in the major must include the following:

1. One advanced language course (FREN 350, 351, 352, 355, 356, 460, 461, or 462)
2. One course in French civilization (FREN 375 or 376)
3. One survey course in French literature (FREN 377 or 378)
4. Four courses at the 400 level or above
No more than one course (3 credit hours) conducted in English may be taken for major credit in French.

Students are encouraged to take courses in other languages and literatures, and in related disciplines such as music, art, history, and philosophy.

B.A. Degree in Foreign Languages with a Concentration in German
In addition to meeting the general requirements for the B.A. degree, students must complete 27 semester hours in German courses at the 300 level or above. No more than 6 hours of courses taught in English may be applied to the major; in addition to certain courses listed in the Course Descriptions under GERM, these may include EUST 350 and 450. Students are expected to complete a balanced program that includes courses in language, culture, and civilization, and literature. GERM 340 and either GERM 301 or 302 are required. Students are encouraged to include related courses in English, history, and philosophy among their electives.

Study in Germany
George Mason University's student exchange program with the University of Wurzburg in south central Germany is open to undergraduates in all majors who have attained junior standing. Students interested in applying for admission to the program should contact Professor Esther N. Elstun, Department of Foreign Languages, or Professor Vernon W. Gras, Department of English.

B.A. Degree with a Concentration in Spanish
In addition to meeting the general requirements for the B.A. degree, students must complete 27 semester hours in Spanish courses at the 300 level or above for the Spanish major. Students are expected to complete a balanced program that includes courses in language, culture, and civilization, and literature. The 27 hours required in the major must include the following:

1. One course in Hispanic civilization (SPAN 461 or 466).
2. Two advanced language courses—one at the 300 level and one at the 400 level (SPAN 301, 351, 352, 353, 359, 451, 452).
3. Three literature courses (SPAN 311, 471, 472). Students considering graduate study in Hispanic literature are encouraged to take at least two 400-level courses in literature.
4. No more than one course (3 credit hours) conducted in English may be taken for major credit in Spanish.

Minor in Foreign Languages (French, German, Russian, or Spanish)
Prerequisite: completion of an intermediate (202 or 209) course in French, German, Russian, or Spanish, or equivalent placement test score.

A minor in a foreign language consists of 18 credit hours above the intermediate level in a single foreign language. No more than one course taught in English may be applied to the minor.

Requirements for the Minor in French
Three of the following (9 hours):
FREN 350 French Conversation
FREN 351 Advanced French Grammar
FREN 352 French Composition
FREN 357 Translation of Texts in Specialized Fields
FREN 391 French for the Business World

Two of the following (6 hours):
FREN 375 French Civilization: From Ancient Gaul to the French Revolution
FREN 376 French Civilization: From the Revolution to Contemporary France
FREN 377 Survey of French Literature: Middle Ages to 1800
FREN 378 Survey of French Literature: 1800 to Present
One French elective at the 300 level or higher (3 hours)

Requirements for the Minor in German
Three of the following (9 hours):
GERM 310 German Conversation and Composition
GERM 316 German for the Business World
GERM 318 Translation of Texts
GERM 415 Advanced Grammar and Style
GERM 418 Advanced Composition
One of the following (3 hours):
GERM 340 Survey of German Literature
Genre courses at the 300 level
Period courses at the 400 level
One of the following (3 hours):
GERM 301 German Culture and Civilization
GERM 302 Germany Today
One German elective at the 300 level or higher (3 hours)

Requirements for the Minor in Russian
Three of the following (9 hours):
RUSS 252 Russian Conversation and Composition or RUSS 303 Russian Advanced Conversation
RUSS 380 Advanced Russian I
RUSS 381 Advanced Russian II
One of the following (3 hours):
RUSS 310 Readings in Russian Literature
RUSS 311 Contemporary Soviet Short Fiction
One of the following (3 hours):
RUSS 353 Russian Civilization
RUSS 354 Contemporary Soviet Life
One Russian elective at the 300 level or higher (3 hours)

Requirements for the Minor in Spanish
Three of the following (9 hours):
SPAN 301 Grammar and Syntax
SPAN 351 Spanish Conversation
SPAN 352 Spanish Composition
SPAN 353 Spanish for the Business World
SPAN 359 Introduction to Translation
SPAN 451 Advanced Oral Spanish
SPAN 452 Advanced Written Spanish
Two of the following (6 hours):
SPAN 311 Introduction to Hispanic Literary Analysis
SPAN 461 Spanish Civilization and Culture
SPAN 466 Latin American Civilization and Culture
SPAN 471 The Literature of Spain
SPAN 472 The Literature of Spanish America
One Spanish elective at the 300 level or higher (3 hours)

Geology

Faculty
Professors: Brown, Hazen (Robinson Professor), Mose (Chair)
Associate Professor: Diecchio
Assistant Professors: Kline, Zielinski
Adjunct Professor: Zietz

Course Work
This department offers all course work designated GEOL in the Course Descriptions section of the catalog.

B.S. Degree with a Major in Geology
In addition to the general requirements for the B.S. degree, candidates are required to submit the following:
1. 40 semester hours of geology, including GEOL 101, 102, 108, 201, 202, 207, 301, 303, 304, 317, and 410, plus 5 hours at the 300 and 400 level
2. MATH 113-114
3. CHEM 211-212
4. PHYSICS 343-345 or 250-350
5. GEOL 316 or a computer science course

Minimum course requirements for the B.S.

### General Guidelines

Geology majors are strongly encouraged to take a six-week summer field-camp course approved by the field-camp adviser. Geology majors unable to attend a field camp are encouraged to take GEOL 407, which combines with GEOL 108 and 303 to constitute 6 credit hours of field mapping experience that may be considered equivalent to a field-camp course. One year of biology, one year of computer science, and two years of French, German, or Russian are strongly recommended for geology majors who contemplate graduate study in geology.

Students must receive a C average or better in GEOL 101-102 to enroll in 200 through 400-level geology courses. Students with a B average or better in PAGE 227-228 can substitute the PAGE 227-228 course for GEOL 101-102. At least 45 hours of credit in all courses numbered 300 or above are required for a degree in geology. Students who have been continuously enrolled since their admission to the university have the option of graduating under the provisions of any catalog subsequent to their admission.

Persons with a B.S. or B.A. degree in geology are eligible to obtain a provisional certificate (good for two years) to teach earth science in Virginia secondary schools if the courses used to satisfy the geology degree requirements include the following: ASTR 103 or 105, CHEM 211, BIOL 113 or...
151, MATH 113, GEOG 206 or 309, GEOL 309, and PHYS 250 or 341. Additional information on the requirements for a collegiate professional certificate to teach earth science (good for five years, renewable) may be obtained from the Geology chair.

Certificate Programs in Geology
The Department of Geology offers three certificate programs: Certificate in Earth Science Teaching, Certificate in Geoscience Programming, and Certificate in Geochemistry. See the catalog section on Certificates, Interdisciplinary Minors, and University Courses for details or contact the Geology Department chair.

PAGE Students
The general education requirements (with the exception of foreign language) for the B.A. degree are satisfied by successful completion of the Plan for Alternative General Education (PAGE). See PAGE category in this catalog. See the PAGE office for sample schedules for Geology majors.

History

Faculty

Professors: Bakhash (Robinson Professor), Cassara, J. R. Censer, Diner, Lovett (Provost), Pacheco, Wade, Wilkins (Robinson Professor)

Associate Professors: Deshmukh (Chair),Duara, Gleissner, Harsh, Henriques, Holsinger, Holt, Jensen, Lytton, Rosenzweig, Saced, Soder, Walker

Assistant Professors: J. T. Censer, Cohen, Copelman, Hawkes, J. Stewart

Lecturers: Ambacher, Angel, Bailey, Butowsky, Hood, Jessup, Mitchell, Orens, Ramirez, Silsbay, B. Stewart, Swann

Course Work
This department offers all course work designated HIST in the Course Descriptions section of this catalog.

B.A. Degree with a Major in History
In addition to the general requirements for a B.A. degree, candidates must complete 36 semester hours of history, with at least 21 hours of the total presented for the degree in the 300 and 400 series. No more than 42 hours may be counted toward completion of the program, but hours of history in excess of that number may be presented as elective hours to be counted toward graduation.

Three hours of the history major requirement may be satisfied by LAS 491; AMST 310, 320, 330, 340; or EUST 300 or 400. Requirements for a degree in history include:

1. U.S. history: 6 semester hours
2. European history (including Russia): 6 semester hours
3. Global, Latin American, African, Asian, or Middle Eastern history: 6 semester hours
4. HIST 300 Interpretations of History: 3 semester hours
5. HIST 499 Senior Seminar in History: 3 semester hours
6. At least 12 hours of history electives at the 300 and/or 400 levels to complete the 21-hour upper-division history requirement.

Total: 36 semester hours

See Bachelor of Arts Degree Requirements section for history courses that can be used to fulfill the non-Western culture requirement. See Baccalaureate Degree Requirements section for academic requirements, especially the 45 hours of upper-division (300 or 400 level) course work graduation requirement.

Secondary Teacher Certification
History majors and majors in disciplines other than history who wish to become secondary school teachers in history or history and social science should consult the secondary education adviser in the Department of History. The professional preparation component of the state-approved teacher education programs for elementary and secondary school teachers is offered in the School of Continuing and Alternative Learning. See the sections on certification under that school's listing in the catalog.

Mathematical Sciences

Faculty
Professors: Levy, Saperstone (Chair), Smith (Mathematics Education), Struppa
Associate Professors: Alligood, Brown (Visiting), Cabell, Fischer, Gabel (Senior Associate Dean), Kiley, J. Lawrence, Lim, Lin, Sachs, Shapiro, Zoltek
Assistant Professors: Beslagic, Colonna, Kan, Kulesza, B. Lawrence, Loustaunau, McDaniel, Morris, Sauer, Singman
Lecturers: Cameron, Donelson, Haberkorn, Lawson, Lieberman, McAllister, Morse, Weidner, Wilson
Visiting Lecturers: Nelson, Paddock

The degree programs in mathematics serve the needs of students with various interests and career goals from business/industry/research to graduate and professional school. Concentrations are available for students in traditional mathematics or applied mathematics. Students may complement other interests by taking a double major in mathematics and a related field such as economics, physics, computer science, or engineering.

Course Work
This department offers all course work designated MATH in the Course Descriptions section of this catalog.

B.A. Degree with a Major in Mathematics
In addition to general requirements for a B.A. degree, the following courses are required: MATH 113, 114, 125, 215, 290, and 306, plus 15 additional hours numbered above 310 for a total of 37 semester hours in mathematics. Computer Science 112 is recommended.

Students who are not majoring in mathematics but are pursuing certification for secondary school teaching are advised to take MATH 290, 302, 303, and CS 103 or 112.

B.S. Degree with a Major in Mathematics
In addition to the general requirements for a B.S. degree, the student must complete all course work in each of the four groups A, B, C, and D below:

B. Science Requirement (14-16 semester credits):
1. A year of natural science must be chosen from one of the following four sequences:
   (a) BIOL 113, 114
   (b) CHEM 211, 212
   (c) GEOL 101, 102
   (d) PHYS 250, 350, 351
2. A second year must be chosen from one of the following three options:
   (a) The list above
   (b) 6 semester hours chosen from more advanced courses in one of the natural science fields represented in the list above. (Only courses that are acceptable for credit toward the natural science major are permitted.)
   (c) PHYS 352, 353

C. Computer Science Requirement: CS 112

D. Concentrations: The student must choose traditional mathematics or applied mathematics.
1. Traditional mathematics concentration (18 semester credits):
   (a) MATH 316
   (b) MATH 321 or 431
   (c) 12 semester credits, 9 of which must be numbered above MATH 310
2. Applied mathematics concentration (18 semester credits):
   (a) MATH 325, 351, 413, and 414
   (b) 6 semester credits, 3 above MATH 310

The department recommends that a two-year proficiency in either French, German, or Russian be demonstrated.

MATH 213 and 304 are not recommended for mathematics majors. In special circumstances a student may substitute both MATH 303 and 304 for MATH 306. MATH 106, 108, 110, 111, 371, and 372 do not count toward satisfying the requirements for a major in mathematics.
For all students:
1. Students may not receive credit for (a) both MATI-1125 and MATI-1305 (b) both MATI-1213 and MATI-1215 (c) both MATI-1303 and MATI-1306 (d) both MATI-1304 and MATI-1306
2. After receiving a grade of C or better in one of the courses listed below in the left column, students may not receive credit for the corresponding course in the right column.

MATI-113 . . . MATI-105 or 108
MATI-351 . . . . . . . MATI-110
MATI-441 . . . . . . . MATI-111
MATI-325 . . . . . . . . MATI-305

For Nonmajors:
MATI courses 108, 110, and 111 are designed for students in the social and behavioral sciences. Liberal arts majors are advised to take either MATI-106 or the sequence 110, 111. Students in the natural sciences who plan to do graduate work are advised to add to their basic calculus sequence from MATI-1313, 314, 351, 352, 382, 441, 442, 446, 447.

PAGE Students
The general education requirements (with the exception of foreign language) for the B.A. degree are satisfied by successful completion of the Plan for Alternative General Education (PAGE). See PAGE category in this catalog, and see PAGE office for sample schedule for majors in mathematics.

</table>

The above sample schedules are meant for illustrative purposes only; some courses listed are not required, only suggested. Electives should be chosen to satisfy distribution requirements and the requirement of 45 upper-division semester credits.

A student who chooses to take physics as a natural science will not start the physics sequence until the second semester. CS 112 would be an appropriate replacement in the first semester.

Music

Faculty
Professors: Burton, di Bonaventura, Gabriel (Chair), Maiello, J. Smith
Associate Professors: Brawley, Hill, Kanyan (Assistant Dean), G. Smith
Assistant Professor: Giles
Lecturers: Anthony, Beveridge, Blair, Casner, Cheilek, Maley, Renfroe

Applied Music Faculty:
Accompanying. Dale Anthony, Adjunct Associate Professor. B.A., Bob Jones University; M.M., University of Southern California; coach and accompanist for Metropolitan Opera singers and other renowned musicians in the United States.

Bassoon: Truman Harris, Adjunct Associate Professor. B.A., North Texas State University; M.M.,

http://catalog.gmu.edu
The Catholic University of America; bassoonist, National Symphony Orchestra.

**Cello.** Yvonne Caruthers, Adjunct Assistant Professor. B.M., Eastman School; cellist, National Symphony Orchestra.

**Clarinet.** Lora Ferguson, Adjunct Associate Professor. B.M., Oberlin Conservatory; M.M., The Catholic University of America; clarinetist, Kennedy Center Opera House Orchestra.

Joseph Kanyan, Associate Professor. B.S., Indiana University of Pennsylvania; M.M., D.M.A., The Catholic University of America; former clarinetist, National Symphony Orchestra.

**Composition.** Stephen Burton, Professor. M.M., Peabody Conservatory.

Sam di Bonaventura (see listing under Violin).

Glenn Smith, Associate Professor. B.A., M.A., California State University, Hayward; D. Mus., Indiana University.

**Conducting.** Thomas Beveridge, Adjunct Associate Professor. A.B., Harvard University; Soloist's Diploma, The Longy School of Music; conductor, McLean (Va.) Choral Society and Washington Men's Camerata; oratorio soloist in Europe and United States; recitalist at Library of Congress and National Gallery of Art.

Anthony Maiello, Professor. B.S., M.S., Ithaca College; former Director of Bands, Potsdam College of the State University of New York.

**Euphonium.** Brian Bowman, Adjunct Professor. B.M., M.M., University of Michigan; D.M.A., The Catholic University of America; euphonist, U.S. Air Force Band of Washington, D.C.

**Flute.** Thomas Perazzoli, Adjunct Associate Professor. Philadelphia Musical Academy; flutist, National Symphony Orchestra.

**Guitar (Classic).** Jeffrey Meyerrieks, Adjunct Associate Professor. B.M., North Carolina School of the Arts; concert tours in the United States, Europe, South America, and Caribbean; former guitarist, U.S. Navy Band of Washington, D.C.

**Harp.** Jeanne Chalifoux, Adjunct Assistant Professor. Artist Diploma, Curtis Institute of Music; former harpist, National Gallery Orchestra and National Symphony Orchestra.

**Harpichord.** Webb Wiggins, Adjunct Assistant Professor. B.M., Stetson University; M.M., Eastman School; harpsichordist, Smithsonian Chamber Orchestra and Smithsonian Chamber Players.

**Horn.** Edwin Thayer, Adjunct Associate Professor. B.M., M.M., University of Illinois, principal hornist, National Symphony Orchestra.

David Whaley, Adjunct Associate Professor. B.M.E., Drake University; M.M., D.M.A., University of Illinois; hornist, National Symphony Orchestra.

**Koto.** Kyoko Okamoto, Adjunct Assistant Professor. Bachelor in Languages, Kyoto University; For international concert artist.

**Percussion.** Kenneth Harbison, Adjunct Associate Professor. B.M., Eastman School; M.M., The Catholic University of America; principal oboist, Kennedy Center Opera House Orchestra, Filene Center (Wolf Trap) Orchestra, and National Gallery Orchestra.

**Piano.** Dale Anthony (see listing under Accompanying).

Thomas Brawley, Associate Professor. B.M., Greensboro College; M.M., Ph.D., Northwestern University.

Joanne Haroutounian, Adjunct Associate Professor. B.A., Trenton State College; M.A., The American University.

Judith Harrison, Adjunct Associate Professor. B.M.E., Florida State University; M.A., University of North Carolina, Chapel Hill; Ed.D., University of North Carolina, Greensboro.

Edward Newman, Adjunct Associate Professor. B.M., M.M., Juilliard School of Music; international concert artist.

Anita Renfroe, Adjunct Associate Professor. B.M., Florida State University; M.M., Memphis State University; D.M.A., Southern Baptist Theological Seminary; recitalist, lecturer, and clinician.

Elvin Schmitt, Adjunct Professor. Columbia University; Tobias Matthy Pianoforte School, London; Ecole Normale, Paris; Sorbonne, Paris; former soloist, U.S. and European orchestras; former head of piano departments, Drake and Syracuse Universities.

**Saxophone.** Richard Parrell, Adjunct Assistant Professor. B.A., B.M., George Mason University;
Music 91

M.M.E., North Texas State University; saxophonist, U.S. Army Band of Washington, D.C.

Dale Underwood, Adjunct Associate Professor. Texas Tech University; saxophone soloist, U.S. Navy Band of Washington, D.C.

Trombone. Paul Schultz, Adjunct Associate Professor. B.M., North Central College (Illinois); M.M., Northwestern University; D.M.A., The Catholic University of America; trombonist, U.S. Army Band of Washington, D.C.

Tuba. Michael Murray Bunn, Adjunct Assistant Professor. B.M., M.M., Peabody Conservatory; tubist, Kennedy Center Opera House Orchestra, Filene Center (Wolf Trap) Orchestra, and National Gallery Orchestra.

Viola. Richard Parnas, Adjunct Associate Professor. Curtis Institute of Music; principal violist, National Symphony Orchestra.

Ramón Scavelli, Adjunct Associate Professor. Philadelphia Musical Academy; violist, National Symphony Orchestra.

Viola Da Gamba. Kenneth Slowik, Adjunct Associate Professor. B.M., M.M., Roosevelt University; principal viola da gamba and cellist, Smithsonian String Quartet, Smithsonian Chamber Orchestra, and Smithsonian Chamber Players.

Violin. Sam di Bonaventura, Professor. B.S., Juilliard School; B.M., M.M., Yale University; M.A., Harvard University; D.M.A., Peabody Conservatory of Music.

William Haroutounian, Adjunct Associate Professor. B.M., Curtis Institute of Music; M.M., The Catholic University of America; violinist, National Symphony Orchestra.

Voice. Thomas Beveridge (see listing under Conducting).

Raymond Brown, Adjunct Professor. B.S., Johns Hopkins University; Teacher's Certificate, Peabody Conservatory; former Director of Choral Music and Professor Emeritus, Pennsylvania State University.

Martha Giles, Assistant Professor. B.M.E., M.M.E., D.M.E., University of Oklahoma.

Rilla Mervine. Adjunct Associate Professor. A.A., North Dakota State School of Science; Certificate, Peabody Conservatory; soloist, U.S. orchestras, oratorio and choral societies, Phillips Collection, and National Gallery of Art.

Vera Tilson, Adjunct Associate Professor. Mannes College of Music; music director, Unitarian Church of Arlington; former music director and conductor, Arlington Metropolitan Chorus.

Anastios Vrenios, Adjunct Associate Professor. B.M., University of the Pacific; M.M., Indiana University; soloist and recording artist, U.S. and European orchestras and opera companies.

Course Work
This department offers all course work designated MUSI in the Course Descriptions section of the catalog.

PAGE Students
The general education requirements (with the exception of foreign language) for the B.A. degree are satisfied by the successful completion of the Plan for Alternative General Education (PAGE) sequence of courses. For information, see the PAGE section in this catalog. Sample schedules for music majors are available in the PAGE Office.

Secondary Teacher Certification
Students seeking certification to teach vocal/general or instrumental music on the elementary and secondary levels must earn the Bachelor of Music degree. For students who have earned a baccalaureate degree and who are seeking state certification to teach music, this recommendation is normally made contingent upon completion of the sequence of courses listed under Bachelor of Music—Concentration in Music Education. The courses listed under General Education and Additional Courses in the Music Education Concentration are used to fulfill National Council for the Accreditation of Teacher Education (NCATE), state certification, and university requirements.
Affiliation with Shenandoah College and Conservatory

George Mason University and Shenandoah College and Conservatory have an affiliation whereby GMU music majors may take music courses at Shenandoah College and Conservatory.

Holbert L. Harris Theatre

The Holbert L. Harris Theatre, located in Robinson Hall, is George Mason's Main Campus performance facility for dance, music, and theatre. This 533-seat modified proscenium theatre houses dance events, music concerts, recitals, theatre performances, and conference events.

Requirements for the Minor in Music

All music minors must pass a music audition. Music minors in the keyboard area use the Class Piano I credit as a music elective.

Total Required 21

- Music Appreciation 3
- Class Piano I 1
- Harmony I and II 6
- Sight Singing and Ear Training I 2
- Undergraduate Private Music 6
- Instruction
- Ensembles 3

Requirements for the Major in Music (B.A., B.M.)

The two undergraduate degree programs prepare students for graduate work in music and music literature, for research and professional work in musical activities, and for state certification to teach vocal/general or instrumental music on the elementary and secondary levels. Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the Department of Music before the scheduled audition date. Auditions are held in November, January, and March through August (normally on the first Monday of each month except for January and August, when dates are scheduled during the university registration period). Competency placement tests are required of all transfer students who desire to present transfer credit in any of the following areas: keyboard harmony, sight singing, ear training, and class piano. (For dates, see the Academic Calendar in the front of this catalog.)

B.A. Degree with a Major in Music

In addition to general requirements for a B.A. degree, music majors must complete a minimum of 42 hours in music. A total of 120 semester hours is required for the bachelor of arts degree with a major in music.

Required Courses 42

- Harmony I, II, III, IV 11
- Keyboard Harmony 1
- Sight Singing and Ear Training I, II 4
- Historical, Theoretical, and Analytical Study of Music 9
- Class Piano I, II 2
- Ensemble 7

*Voice majors must earn seven credits in University Chorale and/or Symphonic Chorus. Orchestral string majors must earn seven credits in Symphony Orchestra. Wind and percussion majors must earn seven credits in Symphony Orchestra and/or Symphonic Band. Piano, harpsichord, and guitar majors must earn at least four credits in large ensembles: University Chorale, Symphonic Chorus, Symphony Orchestra, Symphonic Band.

A total of 130 semester hours is required for the Bachelor of Music degree. A total of 139 semester hours is required for a concentration in music education. The requirements by area are as follows:

General Education 32

See general education requirements for B.M. degree in the College of Arts and Sciences section of the catalog.

Basic Musicianship 58

- Harmony I, II, III, IV 11
- Keyboard Harmony 1
- Sight Singing and Ear Training I, II 4
- Survey of World Music 3
- Historical, Theoretical, and Analytical 12
- Study of Music I, II, III, IV 8
- Class Composition and Arranging 3
- General Conducting 2
- Class Piano I, II (Keyboard majors must substitute MUSI 271 and 272) 2
- Major Instrument or Voice (Private 12
- Music Instruction)
- Ensemble 8

*Voice majors must earn eight credits in University Chorale and/or Symphonic Chorus. Orchestral string majors must earn eight credits in Symphony Orchestra. Wind and percussion majors must earn eight credits in Symphony Orchestra and/or Symphonic Band. Piano, harpsichord, and guitar majors must earn at least four credits in large ensembles: University Chorale, Symphonic Chorus, Symphony Orchestra, and Symphonic Band. Voice, orchestral string, wind and percussion majors need earn only seven credits in the indicated ensembles if they are in the music education concentration.
To earn a B.M. degree, a music concentration must be selected from one of the following categories: accompanying, composition, performance, music history and literature, or music education.

Free Electives .................................................. 22

Total ............................................................ 130

Concentrations in Music
(Bachelor of Music)

Concentration in Accompanying
To be admitted into the concentration in accompanying, a student must be approved by an Accompanying Concentration Audition Committee.

The following required sequence of courses is in addition to those listed under Basic Musicianship (Bachelor of Music degree). Students must also earn nine semester hours in foreign languages: one semester each in French, German, and Italian.

Private Music Instruction .................... *8

* The 12 credits listed under Major Instrument or Voice (Basic Musicianship) and the 8 credits listed under Private Music Instruction (Music Concentration in Accompanying) must be divided as follows: 8 credits in Undergraduate Private Music Instruction—Instrumental (piano or harpsichord) and 12 credits at the 3-credit level in Undergraduate Private Music Instruction—Accompanying (piano).

Concentration in Composition
To be admitted into the concentration in composition, a student must submit a portfolio of compositions and be approved by a faculty committee.

The following required sequence of courses is in addition to those listed under Basic Musicianship (Bachelor of Music degree):

Private Music Instruction — ................. 8

Concentration in Music History
and Literature
To be admitted into the concentration in music history and literature, a student must pass an aural music literature identification test, as well as demonstrate basic writing skills through an essay on an assigned topic.

The following required sequence of courses is in addition to those listed under Basic Musicianship (Bachelor of Music degree). Students must also earn 12 semester hours in German.
Music Literature .................................. 12
Theory Elective .................................. 3
Independent Study ................................ 3

Concentration in Music Education (Virginia Certification to Teach Music)

The Music Education degree program is certified by the Virginia State Department of Education and the National Council for the Accreditation of Teacher Education (NCATE). General education courses and additional courses are derived from state certification and NCATE requirements as outlined under the Department of Education. The National Teachers Examination and the related music examination must be taken before state certification can be granted.

A total of 139 semester hours is required for the bachelor of music with a concentration in music education.

To be admitted into the concentration in music education, a student must satisfy the following requirements:

1. Maintain an overall GPA of 2.8
2. Earn no grade lower than C in music courses needed for graduation
3. Maintain a satisfactory level of musical performance and interpersonal relationships as determined by a yearly screening procedure conducted by the music education faculty
4. Maintain a satisfactory level of oral communication in course work and/or as determined by a formal evaluation by the end of the sophomore year. Transfer students must satisfy the requirement before applying for admittance to the Teacher Education Program. Students who need to strengthen their qualifications may be required to take COMM 120 or COMM 210.
5. Obtain a satisfactory recommendation from the full-time music faculty for the Teacher Education Screening Committee.
6. Meet all requirements set by the Teacher Education Screening Committee.

*Voice majors in the music education concentration must earn seven credits in University Chorale and/or Symphonic Chorus. Orchestral string majors must earn seven credits in Symphony Orchestra and/or Symphony Band. Piano, harpsichord, and guitar majors must earn at least four credits in large ensembles: University Chorale, Symphonic Chorus, Symphony Orchestra, Symphony Band."

**Instrumental Emphasis. The following secondary instrument/vocal courses are required: Class Voice I and all of the following instrument classes: Class Guitar; Class Strings; Violin and Viola; Class Strings: Cello and String Bass; Class Woodwinds: Flute and Clarinet; Class Woodwinds: Oboe and Bassoon; Class Brass; Class Percussion. Five of the seven required ensemble credits must be earned in Symphonic Band and/or Symphony Orchestra for students whose major instrument is not a band or orchestral instrument. Students whose major performance medium is something other than a band or orchestral instrument must earn a minimum of six additional credits of Private Music Instruction (or the equivalent) on such an instrument, the actual number to be determined by an audition committee.

Vocal Emphasis. One credit in each of the following courses is required: Class Woodwinds; Class Guitar; Class Percussion; Tech-

## PAGE (Plan for Alternative General Education)

### Faculty

Comito (Director), Albanese, Bergmann, Black, Bolstein, Brawley, Broome, Brown, Burns, Cabell, Campbell, Carroll, Censer, Clark, Davies, Denys, Derrick, Deshmukh, di Bonaventura, Dienie mann, Doyle, Duara, Ehrlich, Eldeib, Em isley, Evans, Feeg, Foreman, Francescato, Gaffney, Gerber, Gessner, Hammond, Hanson, Hecht, Hodges, Holley-Wilcox, Holman, Holsinger, Irvine, Jacob, Jacobs, Jann, Jenkins, Johnson, Jones, Kalof, Kaplan, Karlson, Keaney, Kelly, Kelso, Knowles, Kolk er, Kuebrich, Kunhi kanan, Lankford, Lewis, Levy, Linn, Mack, Mandes, Melosh, Metcalf, Miller, Mones-Hattal, Mose, Mushrush, Nash, Nguyen, O'Connor, Owens, Polivka, Rader, Radner, Rainey, Rosenblum, Rosenzweig, Rothbart, Ruth, Rutledge, Seligman, Siff, Story, Sypher, Taylor, Thaiss, Trefil, Tsukui, Wilson, Yocom, Zoltek.

The following PAGE faculty serve as course leaders of multidisciplinary courses listed in the Course Descriptions section of this catalog.

- Stephen Nash, PAGE 120; Eileen Sypher, PAGE 122; Margaret Yocom, PAGE 123; Stanley Zoltek, PAGE 125/225; Robert Karlson, PAGE 130; Eleanor Gerber, PAGE 131; Terry Comito, John Radner, PAGE 150/151; Douglas Mose, PAGE 227; Chris Jones, PAGE 228; Robert Clark, PAGE 230; David Kuebrich, PAGE 250/251; Brack Brown, PAGE 252; Victoria Rader, PAGE 253; Laura Brady, Writing Across the Curriculum; Linda Kalof, Computing Across the Curriculum

### Course Work

The PAGE faculty offers all course work designated PAGE in the Course Descriptions section of this catalog.

### PAGE Program

The George Mason Plan for Alternative General Education (PAGE) is an integrated, sequential, general education program that introduces students to a wide range of concepts and subject matter in the humanities, social sciences, sciences, and mathematics, as well as developing and increasing skills in writing, speaking, and using the computer. The PAGE program fulfills general education and graduation requirements for a bachelor's degree at George Mason University, with the exception of the foreign language requirement.

Students in PAGE not only explore a range of diverse academic fields, such as computer science, history, mathematics, physics, biology, arts, literature, sociology, and political science, but also learn how these disciplines influence and interact with each other. The program emphasizes both breadth of knowledge and acquisition of skills. It provides opportunities for students to integrate and apply both knowledge and skills to prepare themselves for living and working in contemporary society. Augmenting the interdisciplinary nature of the various courses in PAGE are two weekly lecture and performance series (one credit each) by PAGE faculty members and guests during each of the first three semesters.

### Academic Policies and Procedures Unique to PAGE

Students in PAGE are subject to university policy on admissions, transfers, and failure as stated in this catalog. In addition, students in PAGE (a special curriculum within this university structure) are subject to certain academic policies and procedures that are unique to this sequential program:

#### Admission

Admission to the PAGE program is open to all full-time entering freshmen on a space available basis.

#### Majors

Not a major in itself, PAGE fulfills general education requirements for every major a student may choose, except for the foreign language requirement in the College of Arts and Sciences. Specific
requirements of the departments in regard to their majors are available in the PAGE office and in the department offices.

Transfers
Within GMU—Because of the sequential and integrated nature of the program, PAGE courses do not correspond exactly to the general education courses in the traditional programs. A list of equivalencies is available in the College of Arts and Sciences section of this catalog, in the PAGE office, and in the offices of the deans.

Outside GMU—The PAGE program meets the general education requirements at other universities. Students transferring after one year or less, however, may have to take additional courses.

Failures
In addition to the university's policies on unsatisfactory work (grades of D or F) and on incompletes, the following apply to students in PAGE:

1. PAGE students failing (grade of F) a total of five or more hours of course work in PAGE in the first semester of the freshman year are dropped from the program.
2. PAGE students failing (grade of F) 2 to 4 hours of course work in PAGE in a given semester are placed on “Notice.”
3. If a student is placed on “Notice” in the first semester of the freshman year and then receives failing grades in five or more hours of the second semester, that student is dropped from the program.
4. If a student is placed on “Notice” in both semesters of the freshman year and then receives failing grades in five or more hours in PAGE in the first semester of the sophomore year, that student is dropped from the program.
5. Failing grades occurring in the second semester of the sophomore year do not lead to immediate dismissal from the program; however, students must realize that failing grades received at this time most likely mean a delay of at least two semesters before they can complete the PAGE program.
6. Unless they receive special permission from the director, students must retake the PAGE courses they have failed in the next semester in which these courses are offered. In exceptional cases, the PAGE office may allow a student to substitute a similar course, offered elsewhere in the university, for the PAGE course a student has failed.
7. Students may appeal to the director the policies stated above. Academic counseling is provided for all students failing courses in PAGE.

Like all other students in the university, PAGE students are bound by university policies governing “good academic standing.” Students should become familiar with these policies as they are stated in this catalog.

Students dropped from the PAGE program for reasons of failure must meet the traditional general education requirements of the university. A list of equivalencies between PAGE courses and courses in the traditional general education program is available in the PAGE office and in the offices of the deans. Special requirements of the departments in regard to their majors are available in the PAGE office and in the department offices.

Philosophy and Religious Studies

Faculty
Professors: Bergoffen, Lavine (Robinson Professor), McFarlane (Emeritus Professor)
Associate Professors: De Nys, Fletcher (Associate Provost), Froman (Chair), Holman, Jordan, McDermott, Ro, Rothbart
Assistant Professors: Burns, Paden, Wehrle
Lecturers: D. Gregory, M. Gregory, Schneider

Course Work
This department offers all course work designated PHIIL and RELI in the Course Descriptions section of this catalog.

B.A. Degree with a Major in Philosophy
The degree program in philosophy serves the needs of students with various interests and career goals. Major concentrations are available for students who wish to pursue graduate studies in philosophy; emphasize philosophy in acquiring a broad liberal arts education; prepare for certain professions, such as law, the ministry, government service; or complement other interests by taking a double major in philosophy and a related field of study.

The department offers a traditional philosophy major, a specially designed philosophy-English major in cooperation with the English Department, a specially designed philosophy-psychology major, and a specially designed religion track within the philosophy major. Each of these programs leads to a B.A. in philosophy.
The general education requirements (with the exception of foreign language) for the B.A. degree are satisfied by successful completion of the Program for Alternative General Education (PAGE). See PAGE category in this catalog, and see PAGE office for sample schedule for majors in philosophy.

**Traditional Philosophy Major**

In addition to the general requirements for a bachelor of arts degree, philosophy majors must complete at least 33 semester hours in philosophy. At least 21 semester hours must be courses at the 300 level or above, including 6 credit hours at the 400 level or above.

These hours must be distributed in the following way:

1. All majors must take:
   - PHIL 173 Introduction to Logic or PHIL 376: Symbolic Logic
   - PHIL 301 History of Western Philosophy (Ancient)
   - PHIL 303 History of Western Philosophy (Modern)

2. All majors must submit a minimum of three credits each from category A and category B courses:
   - **Category A: The Analytic Tradition**
     - PHIL 332 Twentieth-Century Analytic Philosophy
     - PHIL 355 Contemporary Ethical Theory
     - PHIL 371 Philosophy of Natural Sciences
     - PHIL 373 Theory of Knowledge
     - PHIL 374 Philosophy of Mind
     - PHIL 520 Current Issues in Philosophy of Science
     - PHIL 574 Current Issues in Philosophy of Psychology
   - **Category B: The Continental Tradition**
     - PHIL 325 Karl Marx’s Social and Political Thought
     - PHIL 335 Nineteenth-Century Philosophy
     - PHIL 336 Contemporary Continental Thought
     - PHIL 337 Contemporary Continental Thought
     - PHIL 531 Freud and Philosophy

3. All majors may submit no more than three credits from category C as credit toward the major:
   - **Category C: Ethics**
     - PHIL 305 Business Ethics
     - PHIL 306 Criminal Justice Ethics
     - PHIL 309 Medicine and Human Values
     - PHIL 510 Seminar in Ethics of Health Care
     - PHIL 555 Environmental Ethics

For students who plan to pursue graduate studies in philosophy, the following courses are recommended:

- Ethics or Social and Political Philosophy
- Metaphysics
- Philosophy of Mind or Theory of Knowledge
- Twentieth-Century Analytic Philosophy
- Contemporary Continental Thought (Existentialism and Phenomenology)

**Religious Studies Track in Philosophy**

This program offers students the opportunity to reflect on reciprocal relations, past and present, between philosophy and religion, and to approach contemporary questions and issues in religion, both substantive and methodological, through philosophical ideas pertinent to them. Students who plan to pursue a program in philosophy and religious studies must complete at least 33 semester hours in philosophy and religious studies.

All students pursuing this track must take:
- PHIL 173 Introduction to Logic or PHIL 376 (formerly 273): Introduction to Symbolic Logic
- PHIL 301 History of Western Philosophy (Ancient)
- PHIL 303 History of Western Philosophy (Modern)
- PHIL 313 Philosophy of Religion
- RELI 300 Approaches to the Study of Religion
- RELI 490 Comparative Religions

Students must also must submit a minimum of nine credits from among the following courses:
- RELI 315 Buddhism
- RELI 370 Judaism
- RELI 371 History of Western Christian Thought (I)
- RELI 372 History of Western Christian Thought (II)
- RELI 374 Islamic Thought

Also required are six hours of credit from among the following courses for credit toward the major:
- HIST 306 Reformation
- SOCI 385 Sociology and Religion
- ANTH 313 Anthropological Perspectives on Religion
- ENGL 320 Myth and Symbol in Western Literature

**Minor in Philosophy**

The minor in philosophy introduces students to the major traditions and issues that define philosophical thought. The minor also permits students the flexibility to pursue individual interests. A grade of C or better is required for the course to count toward the minor. The minor consists of 18 credits distributed as follows:
1. PHIL 173 Introduction to Logic or PHIL 376 Symbolic Logic (3 credits)
2. Any course at the 100 level or above, excluding PHIL 105 Critical Reasoning (3 credits)
3. PHIL 301 History of Philosophy: Ancient (3 credits)
4. One course from the following (3 credits):
   PHIL 302 History of Philosophy: Medieval
   PHIL 303 History of Philosophy: Modern
   PHIL 335 Nineteenth Century Philosophy
5. Any course at the 300 level or above (3 credits)
6. Any course at the 400 level or above (3 credits)
   (No single course can be used to fulfill two or more requirements above.)

Minor in Religious Studies
The minor in religious studies introduces students to the world’s religious traditions. Within the minor students may pursue biblical studies or western or eastern religious traditions. The minor consists of 18 credit hours, at least 9 of which must be taken at the upper division. Three credits must be taken from RELI 100 The Human Religious Experience, RELI 211 Religions of the Near East, or RELI 212 Religions of the Orient.

Philosophy-English Double Major
Students interested in pursuing the specially designed joint major in philosophy and English must fulfill the distribution and core requirements of each major. Students pursuing this program must take one class in philosophy and one in English from the following list of theoretical or methodological courses (6 credits). Both courses count toward both majors (i.e., the philosophy course is counted as part of the English major hours and vice versa).

   ENGL 320 Myth and Symbol in Western Literature
   ENGL 494 (313) Critical Approaches to Literature
   ENGL 551 Literary Criticism
   PHIL 356 Philosophy of Art
   PHIL 372 Philosophical Methods

Students must take 6 credits from one of the following pairs of historical courses. Both courses count toward both majors. (Some classes of English 496, 444, 446, and Philosophy 391, 392, 421, 422, 423, and 424 may fulfill these requirements, with the prior permission of the departments.)

1. ENGL 341 Chaucer; or ENGL 342 Literature of Middle Ages; or ENGL 431 Medieval Intellectual Topics
   PHIL 302 History of Western Philosophy (Medieval)
2. ENGL 401 (345) Literature of Sixteenth Century, or ENGL 472 (346) Spenser
   PHIL 301 History of Western Philosophy (Ancient)
3. ENGL 405 (358), 406 (361), 450 (370), 423 (381)
   PHIL 303 History of Western Philosophy (Enlightenment)
4. ENGL 425 (382) Literature of American Renaissance, or ENGL 452 (387) American Novel to 1914
   PHIL 331 Philosophy in the United States
5. ENGL 380, 390, 556 (555) (contemporary literature or language study)
   PHIL 332 Twentieth-Century Analytic Philosophy
6. ENGL 448 (375), 376, 377, 378, 454 (388) or 447 (389) continental literature or influence
   PHIL 336 or 337 Continental Philosophy: Phenomenology and Existentialism
7. ENGL 369 Women and Literature
   PHIL 333 Philosophy and Feminism

Students must take a four-credit, 500-level seminar. The topic of the seminar varies from term to term; possible topics include structuralism, technology, form and matter, conceptions of the future. The course is cross-listed and team taught. Prerequisites are senior standing, six hours of 300 level English and six hours of 300 level philosophy, and permission of instructor.

Philosophy-Psychology Double Major
Students pursuing the joint major in philosophy and psychology must fulfill all the requirements for each major, except that they may count up to 6 credits from each of the following lists toward both majors:

   Philosophy
   PHIL 357 Philosophy of the Social Sciences
   PHIL 372 Philosophical Methods
   PHIL 373 Theory of Knowledge
   PHIL 374 Philosophy of Mind
   PHIL 531 Freud and Philosophy
   PHIL 574 Current Issues in Philosophy of Psychology

   Psychology
   PSYC 220 Personality Theory
   PSYC 360 Theories and Systems of Psychology
   PSYC 365 History of Psychology
   PSYC 372 Physiological Psychology: Neuropsychology
   PSYC 506 Theories of Personality
   PSYC/ENGL 581 Survey of Psycholinguistics
Sample Schedule for Philosophy Majors

First Semester                                      Second Semester                                      
Natural science                                      Natural science

Foreign language                                     Foreign language                                     
            3                                                                 3                                                                 
PHIL 100, 111, or 173                                PHIL 151, 212 or 273                                 
            3                                                                 3                                                                 
Social science                                       Communication                                      
            3                                                                 3                                                                 
16                                                             16

Third Semester                                      Fourth Semester                                      
Literature                                            English composition                                 
            3                                                                 3                                                                 
Social science                                       Foreign language                                     
            3                                                                 3                                                                 
Philosophy elective                                   Non-Western culture                                 
            3                                                                 3                                                                 
PHIL 301 (231)                                       PHIL 303 (222)                                      
            3                                                                 3                                                                 
   15                                                                 15

Fifth Semester                                       Sixth Semester                                      
Social science                                       Social science                                       
            3                                                                 3                                                                 
Non-Western culture                                  Philosophy elective                                 
            3                                                                 3                                                                 
PHIL 332                                            Philosophy elective                                 
            3                                                                 3                                                                 
PHIL 301 or 308                                      Nonphilosophy elective                              
            3                                                                 3                                                                 
ENGL 302                                            3                                                                 3
   15                                                             15

Seventh Semester                                     Eighth Semester                                      
PHIL 421                                            PHIL 422 or 425                                      
            3                                                                 3                                                                 
Fine arts                                            Electives                                         
            3                                                                 12                                                                 
         15                                                                 15

Physics

Faculty
Professors: Dworzecka, Ehrlich, Ellsworth, Kafatos (Acting Chair), Lankford, Lieb, Mielczarek, Trefil (Robinson Professor)
Associate Professors: Ceperley, Evans
Assistant Professors: Kowalski, Satija, Toth-Allen
Instructor: Hannigan

Course Work
This department offers all course work designated ASTR and PHYS in the Course Descriptions section of this catalog.

B.S. Degree with a Major in Physics
In addition to general requirements for a B.S. degree, candidates must complete 45 semester hours in the major and 20 semester hours in mathematics, divided as follows:

1. A 31-hour core in physics, including PHYS 111, 250, 303, 305, 350, 351, 352, 353, 361, 402, 407, and 416 (may be taken for credit twice). The remaining 14 credits are to be elected from ECE 301, 302, 341, 342, 430, 432, 441, and 460; PHYS 307, 328, 355, 408, 412, 414, 417, 428, 510, 511, 512, and 514; MATH 446 and 447, with at least five semester hours in physics courses.

2. The following mathematics courses: the two-year calculus sequence – MATH 113, 114, 213 and 304; PHYS 311 or MATH 313; PHYS 312 or MATH 314.

The requirements for the B.S. in physics prepare the student for graduate school or for one of the many careers in business or industry where physics graduates are employed. In meeting the requirement for 11 credit hours outside the core, a student has the option of selecting an area of concentration. The courses required for each concentration are listed below. Students who wish to complete a concentration should plan a program of study in consultation with their adviser, with whom they are required to meet at least once a semester.

Graduate School Preparatory Concentration
Although any of the options listed here provide the successful student with a fully adequate background to enter graduate school, this concentration is for the student whose career goals definitely include graduate school in physics. To complete this concentration the student should take at least nine hours from the following courses: PHYS 414, 510, 511, 512, and 514. In addition, the student should complete a senior project (PHYS 408) in the specialty which they intend to pursue in graduate school.

Computational Physics Concentration
This concentration is for the student who wishes to pursue a career that applies computers to the solution of physical problems. To complete this concentration, the student should take at least nine hours from the following courses: PHYS 412, ECE 441, MATH 446 and 447. In addition, the student should complete a senior project (Physics 408) on a problem that involves the use of the computer for the solution of a physical problem.

Astrophysics Concentration
This concentration is for the student who is planning to attend graduate school in astrophysics or pursue a career in industry. To complete this concentration the student should take the following courses: PHYS 328; PHYS 428, 510, or 511; and MATH 446. In addition, the student should complete a senior project (PHYS 408) on an astrophysics problem.

Electronics Concentration
This concentration is for the student who wishes to pursue a career in industry applying a strong background in electronics to physical problems. To complete this concentration, the student should take at least nine credit hours from the fol-
lowing courses: ECE 301, 302, 341, 342, 430, 432, and 460. In addition, the student should complete a senior project (PHYS 408) on an electronics problem.

Applied Solid State Physics Concentration
This concentration is for the student who wishes to pursue a career in the semiconductor industry. To complete this concentration, the student should take the following courses: PHYS 512, ECE 430, and ECE 431. In addition, the student should complete a senior project (PHYS 408) in applied solid state physics.

B.A. Degree with a Major in Physics
In addition to the general requirements for a B.A. degree, candidates must complete 31 semester hours in the major and 17 semester hours of mathematics. The following physics courses are required: PHYS 111, 250, 350, 351, 352, 353, 303, 305, 361, and 416.

Minor in Physics
A minor in physics requires 20 credits, including PHYS 250, 350, 351, 352, and 353 and any two upper-level physics courses, except PHYS 300, 315, 316, 326, 343, 344, 345, 346, and 416.

Minor in Astronomy
A minor in astronomy requires the completion of a physics prerequisite and 15 credits in astronomy. The prerequisite consists of one of the two sequences PHYS 343, 344, 345, 346 or PHYS 250, 350, 351, 352, 353. Following the introductory physics sequence, students are required to take ASTR 105-106, PHYS 416, and two astronomy courses chosen from ASTR 228, 328, and 428.

PAGE Students
The general education requirements (with the exception of foreign language) for the B.A. degree are satisfied by successful completion of the Plan for Alternative General Education (PAGE). See PAGE category in this catalog, and see PAGE office for sample schedule for majors in physics.

Secondary Teacher Certification
Students who want to become elementary or secondary school teachers should consult the sections on certification found in the catalog under the College of Education and Human Services. Those planning to become secondary school teachers should consult with the secondary education adviser in their department.

Physics for Majors
Students who intend to major in physics should take the physics introductory sequence (PHYS 350, 351, 352, 353). However, students who decide to major in physics after completing PHYS 343-345 may do so, but only with written permission of the physics department. Such students are required to take at least five additional credits in approved physics courses.

Physics for Nonmajors
PHYS 343-345 are recommended for biology, chemistry, geology, and premedical students and for mathematics majors who seek a bachelor of arts degree. PHYS 106 and 107 are also recommended for biology majors. PHYS 103, 104, 141, 201, 300, 315, and 316 are intended for nonscience majors. PHYS 250, 350, 351, 352, and 353 consist of a calculus-based sequence in general physics to be taken by physics and engineering majors and chemistry, computer science, and mathematics students who pursue a bachelor of science degree. Students may receive credit for only one of the following three sequences: 343-345 or 103, 104 or 250, 350, 351, 352, and 353.

Psychology

Faculty
University Professor: Fleishman
Professors: Barocas, Boneau, Mandes (Associate Dean), Pasnak, Tyer
Associate Professors: Allen, Blaha, Buffardi, Erdwins, Flinn (Chair), Gerton, Gessner, Holt, Lehman, Maddux, Mellinger, Moretz, Riskind, Rugel, Sanford, R. Smith, Wahl, Zaccaro
Assistant Professors: Boehm-Davis, Denham, Friedman, Tangney
Adjunct Professors: Mutchler, V. Smith, Weisman
Lecturers: Bayer, Byrd, Chollar, Goodman, Ross, Stanhope, Vernon, Werber

Course Work
This department offers all course work designated PSYC in the catalog Course Descriptions.

B.A. Degree with a Major in Psychology
In addition to general requirements for a B.A. degree, students must complete 36 semester hours of course work in psychology, 24 of which must be upper division. These hours must include PSYC 100, 300; either 360 or 365; and one of the following: PSYC 304, 305, or 309.

B.S. Degree with a Major in Psychology
In addition to general requirements for a B.S. degree, candidates must complete the following:
1. 38 semester hours of psychology, 24 of which must be upper division, including PSYC 100, 300; either 360 or 365; and two of the following: 304, 305, 309, 323 or 372-373 (One of the courses must be 304, 305, or 309)
2. BIOL 113, 114
3. 6 hours of mathematics, selected from MATH 108, 110, 111, 113, 114 and 213
4. CS 103 with CS 262 strongly recommended
5. 9 additional hours of behavioral, natural, or social science, other than psychology, that are not applied to any other requirement
6. ENGL 101, 302
7. 6 semester hours of literature
8. 24 semester hours of cognate courses
9. 19-21 semester hours of electives
Candidates for the B.S. degree in psychology may choose from six specialty areas: clinical, developmental, experimental, industrial, physiological, and social. Each of these specialty areas requires 24 hours of cognate courses that are not in psychology but in related subjects, chosen from an approved list. Students are required to take psychology courses in their specialty area as determined by their adviser. Before or during their junior year, written approval of cognate and psychology specialty courses must be obtained. Students are required to plan their program of courses with a B.S. adviser in their specialty area. The planned program is then submitted to the undergraduate coordinator for final approval. Students who have not obtained approval by the end of their junior year may not be allowed to graduate with a B.S. degree in psychology. For information concerning cognate areas and specific courses within each cognate, students should contact the psychology department.

Students planning to go to graduate school should ascertain whether the school they plan to attend has a foreign language requirement. If so, they should select foreign language courses as electives.

Information for All Majors in Psychology
A grade of D in a required psychology course may not be used toward graduation. At least 24 of the semester hours credited toward the major must be completed at the 300 level or above. Students intending to major in psychology should note that a grade of C or better in PSYC 300 is a prerequisite to required 300-level laboratory courses.

No more than 6 semester hours of PSYC 326, 421, 422, 548, and 549 may be used to satisfy either the 36-hour psychology requirement for the B.A. degree, the 38-hour psychology requirement for the B.S. degree, or the 24-hour requirement for psychology courses at the 300 level or above.

Students planning graduate study in psychology are advised to take PSYC 320, 372, 373, and CS 103 and 262. In addition to course work, undergraduate research experience and letters of recommendation are major factors for admission to graduate school. Therefore, students interested in graduate school should distribute courses across a number of areas in psychology and work closely with one or more professors on an individual research project during the junior and senior years.

Students interested in developing skills in the application of psychology may wish to earn a psychology technician certificate or a gerontology certificate. These programs provide students with technical expertise for use in human service employment settings at the paraprofessional level. Further information on these programs may be found under Certificate Programs in this catalog.
PAGE Students

The general education requirements for the B.A. and B.S. degrees (with the exception of foreign language for the B.A.) are satisfied by successful completion of the Program for Alternative General Education (PAGE). See PAGE category in this catalog, and see PAGE office for sample schedules for majors in psychology.

Visiting Associate Commonwealth Professor: C. Brown
Associate Professors: Andrews, Fonseca (Associate Dean, Graduate School), Haack, J. Wood (Director, Geography Program)
Adjunct Associate Professor: Rundstrom
Assistant Professor: E. Anderson
Assistant Professor: Rundstrom
Adjunct Assistant Professors: Brand, Guptill, W. Wood
Lecturers: Guzman, Phoenix, Snyder, Stephenson, Thomas, Walochik

Course Work
This department offers all course work designated GECA, GEOG, GOVT, PUAD, and PUAF in the Course Descriptions section of this catalog.

PAGE Students
The general education requirements (with the exception of foreign language) for the B.A. and B.S. (except law enforcement) degrees are satisfied by successful completion of the Program for Alternative General Education (PAGE). See PAGE category in this catalog, and see PAGE office for sample schedule for majors in geography, government and politics, international relations, and public administration.

Secondary Teacher Certification
Students who wish to become elementary or secondary school teachers should consult the sections on certification found in the catalog under College of Education and Human Services. Those planning to become secondary school teachers should consult the secondary education adviser in their discipline.

Degree Requirements
B.A. Degree with a Major in Geography
In addition to the general requirements for the B.A. degree, candidates must present 37 semester hours of credit in geography including GEOG 102, 103, 310, 415 and three of the following: GEOG 301, 304, 305, 306, and 309. STAT 250 is also required but may not be counted toward the 37 hours in geography. A total of 120 credit hours is required for the degree.

Minor in Geography
The minor in geography consists of 18 semester hours of credit in geography, including
1. GEOG 101 or 103 and GEOG 102
2. Four upper-level courses, including one systematic course (such as GEOG 301, 304, 305, 306, or 309) and one regional course (such as GEOG 315, 316, 320, 325, 330, or 380)

Minor in Urban and Suburban Studies
The minor in urban and suburban studies is administered by the Program in Geography. See description under Certificates, Interdisciplinary Minors, and University Courses.

Certificate Program in Cartography
The Certificate in Cartography is administered by the Program in Geography. See description under Certificates, Interdisciplinary Minors, and University Courses.

B.A. Degree with a Major in Government and Politics
In addition to general requirements for the B.A. degree, candidates must complete the following:
1. 12 credit hours in the required core: GOVT 103, 132, 241, 250
2. 24 credit hours in distributive requirements of 8 courses, no more than 2 in any one field below:
   - American Institutions: GOVT 301-309, 401-409
   - Political Behavior: GOVT 310-319, 410-419
   - Political Theory: GOVT 320-329, 420-429
   - Comparative & Regional: GOVT 330-339, 430-439
   - International Relations: GOVT 340-349, 440-449
   - GOVT 480 internship or 490 seminar may be substituted for one of the upper-division courses with prior approval of adviser.
3. 3 credit hours in a skills course chosen from GOVT 359, 461, 462, 463; CS 103; IRM 201; STAT 250; DESC 200; SOCI 221, 405
A total of 120 credit hours are required for the B.A. degree. See College of Arts and Sciences section in the catalog for general education requirements. Government and politics courses may be applied to the B.A. degree only if passed with a grade of C or better.
B.A. Degree with a Major in International Studies

In addition to general requirements for the B.A. degree, candidates must complete the following:

1. 24 credit hours in a required core of international studies courses distributed as follows:
   - 6 hours of GOVT 132, 133 (preferably in freshman year)
   - 6 hours in HIST 130, GOVT 244 (preferably in sophomore year)
   - 6 hours in GOVT 340, 341 (preferably in junior year)
   - 3 hours in GOVT 449 (must be completed in last semester)
   - 3 hours in ECON 380 or 390

2. 18 credit hours of advanced courses in international studies distributed as follows:
   - 6 credit hours from two courses in GOVT 330s and 430s
   - 6 credit hours from two courses in GOVT 340s and 440s
   - 6 credit hours from two courses in other disciplines from a selected list, including geography, history, economics, sociology, anthropology, and foreign languages (list is revised annually)
   (3 hours of GOVT 480 or 490 may be substituted for the GOVT hours with permission of adviser)

3. An upper-level course taught in the same language in which the student has completed the fourth semester of the B.A. degree general education requirements. Literature courses taught in translation are excluded; RUSS 252 is included even though not taught at the upper level. This requirement is waived for international students from non-English-speaking countries.

A total of 120 credit hours are required for the B.A. degree. See College of Arts and Sciences section in the catalog for general education requirements.

B.S. Degree with a Major in Law Enforcement

This interinstitutional and interdisciplinary program requires a minimum of 128 semester hours of course work. Participants should familiarize themselves fully with the requirements for this degree and with the academic regulations of George Mason University. Credits earned in law enforcement courses may not be transferred to other majors. No more than one-half of the 128 semester hours required by this program may be transferred to the university from one or more junior or community colleges.

The quantitative and distributional requirements which must be fulfilled by candidates for this degree are summarized below. English composition or an equivalent course must be completed prior to entry into the program. Except for the specified professional courses and English composition, all requirements may be completed at this university.

Electives: 12

Total: 123

Sociology and Anthropology

Faculty

Professors: Bateson (Robinson Professor, Anthropology), Burns (Visiting Robinson Professor, Sociology), Dumont (Robinson Professor, Anthropology), Scimeca (Sociology), Stone (Sociology, Chair), Williams (Anthropology)

Associate Professors: Avruch (Anthropology), Black (Anthropology), Borkman (Sociology), Dietz (Sociology), Golomb (Anthropology), Horton (Sociology), Kolker (Sociology), Falkovich (Anthropology), Rader (Sociology), Rosenblum (Sociology), Tavani (Sociology)

Assistant Professors: Colvin (Sociology), Guagnano (Sociology), Jacobs (Sociology), Lancaster (Anthropology)

Lecturers: Neuschatz (Sociology), Trencher (Anthropology)

Course Work

This department offers all course work designated ANTH and SOCI in the Course Descriptions section of this catalog.

Degree Requirements

B.A. Degree with a Major in Anthropology

In addition to meeting the general requirements for a B.A. degree, students majoring in anthropology must complete 36 hours in anthropology, including ANTH 114, 120, 135, 332, 380, and 490, and 15 additional hours at the 300-400 level. SOCI 311 is also required. SOCI 221 may apply toward the 36-hour requirement in anthropology. ENGL 481 (General Linguistics) may substitute for ANTH 380.

The anthropology program offers three optional concentrations: sociocultural anthropology, applied anthropology, and archaeology. Suggested courses in anthropology and electives in other departments for each of these concentrations are detailed in a description of the program, available at the Anthropology office. A certificate in applied archaeology is also offered; see the catalog section on Certificates, Interdisciplinary Minors, and University Courses.

School of Business Administration
School of Business Administration

Departments and Programs
- Accounting and Business Legal Studies
- Decision Sciences
- Finance
- General Business Administration
- Management
- Marketing

The School of Business Administration strives to provide its students with high-quality education and to prepare them for the changing community needs and market demands of today's world. The school has attracted and continues to support a multidisciplinary faculty that meets the diverse intellectual interests of its students.

Acknowledging the interdependence of the university, the community, and the business sector, the school encourages its faculty members to balance teaching, research, scholarship, and community service. The school also fosters an atmosphere of open communication between students and faculty.

Administration
The administrative offices for the School of Business Administration are on the third and fourth floors of Robinson Hall.
Coleman Raphael, Dean
Richard L. Coffinberger, Associate Dean for Academic Programs
Robert Johnston, Associate Dean for Instructional Programs
John W. O'Malley, Associate Dean for Graduate and External Programs
Lloyd M. DeBoer, Distinguished Professor of Business Administration

James V. Fare, Assistant to the Dean
E. Penelope Webb, Director of Undergraduate Student Support Services

Course Work
The School of Business Administration offers all course work designated ACCT, BULE, DESC, FNAN, IRM, MGMT, and MKTG in the Course Descriptions section of this catalog.

Bachelor of Science Degree
The programs in business administration offered by the university culminate in a B.S. degree with majors in accounting, decision sciences, finance, general business administration, management, or marketing. A minimum of 122 hours of course work is required, of which at least 45 hours must be at the 300 or 400 level.

Students should consult the Baccalaureate Degree Requirements section of Academic Policies for information concerning the literacy requirement, English composition requirement, catalog requirements, residence requirements, and academic requirements.

In addition, students should carefully examine course prerequisites for courses offered by the School of Business Administration. Students who enroll in courses without having fulfilled the prerequisites may have those courses cancelled.

Students enrolling in evening classes exclusively should note that only two majors, general business administration and accounting, are available on a regular basis. The course work required for other majors offered by the school may be offered irregularly.

All students must complete at least 30 semester hours in this degree program following acceptance to the School of Business Administration. Of these 30 semester hours, at least 18 (21 for accounting majors) must be in upper-level courses with grades of C or higher within a specific major,
and 3 semester hours must be in the policy course (MGMT 498).

While a student may apply 12 hours of D grades toward graduation, no more than 6 hours of D grades may be applied to the business administration core and no D's may be applied to the major.

**Degree Requirements**

The following requirements must be met by all degree applicants:

**Semester hours**

**Business Administration Core Courses** 39

Accounting (ACCT 201, 202)* 6
Applied Statistical Analysis 6
(DESC 200, 202)* 6
Computer-Based MIS (IRM 201)* 3
Decision Models (DESC 301) 3
Business Legal Studies 6
(BULE 301, 401)
Finance (FNAN 301) 3
Management (MGMT 302) 3
Marketing (MKTG 301, 407) 6
Business Strategy and Policy 3
(MGMT 498; must be taken at George Mason University in the final semester.)

**Major** 18

Must be taken at George Mason University. Grades of C or higher required in each course presented on the graduation application.

**Language Arts and Culture** 18

English Composition 6
(ENGL 100 or 101 and 302)*
Speech Communication 3
(COMM 100, 101, or 130)
Literature and Humanities 9
(Humanities include DANC 101, 391;
MUSI 101, 105, 106, 107; THR 101, 351,
352, 353, 356, 357; any art history; any
philosophy; any religious studies; or any
foreign language course. Literature
includes all 200-level English courses
and all literature courses offered by the
Department of Foreign Languages and
Literatures. Students may take either 6
semester hours of literature and 3
semester hours of humanities, or vice versa.)

**Social Sciences** 21

Principles of Economics 6
(ECON 103, 104)*
Economics (upper-level, including 6
ECON 306 or 310)
History, Government, or Geography 3

Psychology, Sociology, and/or 6
Anthropology

**General Sciences** 12

Mathematics (MATH 108)* 3
Laboratory Sciences (Astronomy, 8
Biology, Chemistry, Geology, Physics)
Computer Science (CS 161) 1

**General Electives** **14**

May not include pure activity courses in any department such as those listed under the catalog designations dance, individual sports, physical education, team sports, recreational activities, music, theatre, and art. No more than 8 semester hours of general electives may be in courses offered by the School of Business Administration or the Department of Economics. Students must complete at least 6 semester hours of general electives in non-business and/or economics courses.

**Total** 122

May include a maximum of 62 semester hours of credit from accredited two-year institutions or a maximum of 92 semester hours from accredited four-year institutions.

*Completion with a grade of C or better is required before or during the semester of application to the School of Business Administration.

**Accounting majors must complete 21 semester hours in the major but may enroll for a maximum of 5 semester hours of general elective course work offered by the School of Business Administration and/or Department of Economics.

**Acceptance to the School of Business Administration**

A student interested in pursuing a major in accounting, general business administration, decision sciences, finance, management, or marketing must make a separate application to the School of Business Administration. Until the application is filed and approved, a student is classified as a pre-business administration major.

To be eligible to apply for acceptance into the School of Business Administration, the following requirements must be satisfied: (1) completion of 60 or more semester hours at George Mason University or through acceptable transfer hours, and (2) completion, at George Mason University or through acceptable transfer hours, of the following 30 hours with a grade of C or better in each course:

English Composition—ENGL 100 or 101 and 302
Micro and Macro Economics—ECON 103 and 104

http://catalog.gmu.edu
Financial and Managerial Accounting – ACCT 201 and 202  
Business Statistics – DESC 200 and 202  
Business Calculus – MATH 108  
Management Oriented Information Systems – IRM 201

Acceptance to the School of Business Administration is competitive. A composite score is computed by adding the grade point average on the 30 hours of course work listed above with the applicant's cumulative grade point average on all collegiate work attempted, regardless of the age or transferability of that course work. While a straight A average yields a composite score of 8.00, the applicant should check with the SBA dean's office for the standard for the semester of application. The standard, now 5.60, is set by the faculty and may change. Changes in the standard are announced in January and applied to students filing applications during the following fall for acceptance effective with the spring semester. Such changes apply to all students enrolled in the university at the time the change is implemented and thereafter. Applicants who receive an academic warning for the semester of application may be denied acceptance, regardless of their overall academic performance.

Applications for acceptance to the School of Business Administration must be submitted by October 1 for the following spring semester, by February 1 for the following summer session, or by July 1 for the following fall semester. Students should file the application at the end of the semester in which they anticipate completing the requirements set forth above.

Students must complete a minimum of 30 hours of course work applicable to the degree program following acceptance to the School of Business Administration. The 30 hours must include all upper-level business administration courses (with grades of C or better) required for a specific major and MGMT 498, Business Strategy and Policy. The business administration core classes other than MGMT 498 (i.e. BULE 301, 401; DESC 301; FNAN 301; MGMT 302; MKTG 301, 407) and the upper-level economics degree requirements may be completed prior to acceptance to the School of Business Administration.

PAGE Program
Students enrolled at George Mason University may fulfill their general education requirements through the Plan for Alternative General Education (PAGE) and concurrently fulfill the requirements for applying for acceptance to the School of Business Administration. PAGE students should contact the PAGE office for a sample schedule identifying the preferred sequence of courses during the first two years. PAGE students with questions about non-PAGE courses should call 323-2764 for an appointment with an academic adviser from the School of Business Administration.

Business Administration Students
Sample schedules for pre-business administration students are available in Room 4611 Robinson Hall. Pre-business students are encouraged to periodically consult with academic advisers. Call 323-2764 to schedule an appointment.

The sample schedule for students accepted to the School of Business Administration immediately after completing 60 semester hours is listed below. Courses need not be taken in the precise sequence or semester indicated, except as prerequisites or other necessities dictate.

Assistant Professors: Bradwick, Gopalakrishnan, Harr, Quarles, Wardlow

Visiting Assistant Professor: Skadden

Acting Assistant Professor: Fuller

Instructors: Blanchard, Joseph, Trussel

http://catalog.gmu.edu
Degree Requirements

The accounting faculty offers a major in accounting that prepares students for professional careers in public, private, and governmental accounting. In addition to the general requirements for the B.S. degree, students who pursue the accounting major must complete 21 credit hours in upper-level accounting courses, with grades of C or better in each course. The following courses are required of all accounting majors (18 credit hours): ACCT 311, 312, 331, 332, 351, and 461. Each student in the program must also complete one course from among the following (3 credit hours): ACCT 411, 431, 451, 471, 491, 499.

Advising materials are available in the department office (Robinson Hall, Room 4639) to provide guidance regarding recommended electives. Students should see their faculty adviser when selecting courses within the field of accounting. Students who anticipate sitting for the Uniform CPA or CMA examinations should consult applicable state regulations and discuss their program with a member of the accounting faculty.

Decision Sciences

Faculty
Professors: Anderson (Chair), Haynes, Render, Ruth
Associate Professor: Gulledge
Assistant Professors: Chen, Das, Evans, McGavin, Pugh, Texter, Warkentin, Young
Instructor: Quitmeyer, Schank
Lecturers: Arafa, Burgess, Eskew, Holmes, Mohamed, Schmuller, Sugumaran, Trigerio

Degree Requirements

The Decision Sciences Department offers a variety of courses and programs of study that apply mathematical modeling, statistical analyses, and computer-based information systems to the practical problems of business and government. Graduates receive a B.S. degree with a major in decision sciences. In addition to the general degree requirements for the B.S. degree, students who major in decision sciences must complete 18 hours of upper-level business administration courses with a grade of C or better in each course. Requirements include a common core of courses (9 semester hours) and electives (9 semester hours) as defined below.

Students have considerable flexibility in their choice of electives and may develop programs of study that develop expertise in areas such as computer systems applications, decision analysis, information resource management, knowledge-based systems, management sciences, managerial and decision economics, production and operations management, and statistical modeling. Students are urged to discuss their choice of electives and programs of study with a faculty adviser in the Decision Sciences Department.

Required courses: INFS 310, INFS 311, and DESC 352
Electives: 9 semester hours of noncore, upper-level 300-400 DESC and 300-400 IRM courses; 3 semester hours may be satisfied by ACCT 311, ACCT 312, INFS 312, INFS 315, or INFS 316

Finance

Faculty
Professor: Ferri (Chair)
Associate Professors: Crawford, Crockett, Hanweck, Hysom, Johnston
Assistant Professors: Hogan, Sugrue, Yau
Instructor: Erickson
Visiting Professor: Wang

Degree Requirements

The finance faculty offers a major in finance that prepares students for professional careers in various branches of finance. In addition to the general degree requirements for the major, students wishing to major in finance must complete 18 hours in upper-level business administration courses with grades of C or better in each course:

Required courses: PNAN 311, 321, 401.
Electives: Three or more from ACCT 351, DESC 353, FNAN 351, 411, 412, 421, 423, 440, 451, 452, 453, 491.

Students wishing to specialize in investments are encouraged to elect FNAN 411, 412, 440, and/or 451. Those wishing to specialize in financial institutions should take FNAN 421, 423, 440, and/or 451. Those interested in careers in real estate and urban development should take FNAN 351, 451, 452, and/or 453.
General Business Administration

Degree Requirements
The faculty of the School of Business Administration, with the associate dean for academic programs, offers a major in general business administration. Students may not use the major in business administration if credit for more than one major is desired.

In addition to the general requirements for the B.S. degree, students must complete 18 hours of upper-level business administration courses with grades of C or higher in each course:

Required: ACCT 311, DESC 352 or 354, FNAN 311 or 401, MGMT 312, MKTG 471.

Electives: One or more upper-level, noncore courses offered by the School of Business Administration.

Management

Faculty
Professors: English, Kovach, Pearce (Eakin Endowed Chair in Strategic Management, Department Chair), Steinhauer (Emeritus)
Associate Professors: Bracker, Sands (Emeritus), Zahra
Assistant Professors: Cohen, Fagenson, Fink, Hogan, Jackson, Patrick, Robbins
Instructor: Schulte

Degree Requirements
The management major prepares students for managerial careers in the public and private sectors. In addition to the general requirements for the B.S. degree, students must complete 18 hours in upper-level management courses with grades of C or higher in each course. Beyond MGMT 302, students are required to take the following:

MGMT 312 Management of Organizations
MGMT 321 Personnel Administration
MGMT 491 Seminar in Management

Beyond these three required courses, students must choose three required courses from the following:

MGMT 331 Labor-Management Relations
MGMT 341 Business Communication
MGMT 381 Management Problem Solving and Decision Making

Marketing

Faculty
Professors: Kernan (George Mason University Foundation Professor of Behavioral Analysis), McRohan (Chair), Tongren
Associate Professors: Entrikin, Domzal, Harvey
Assistant Professors: Cordell, Foxman, Sisodia, Tetreault
Instructor: Rishell
Lecturers: Engel, Hoelzel, Hollingshead, Jones, Mason

Degree Requirements
The marketing major prepares students for careers in marketing and related fields. In addition to the general requirements for the B.S. degree, students must complete 18 hours in upper-level marketing courses with grades of C or higher in each course. Beyond Marketing 301, students are required to take the following courses:

MKTG 312 Consumer Behavior
MKTG 313 Advertising Management
MKTG 351 Marketing Research Techniques and Applications
MKTG 471 Marketing Management

In addition, students must select two courses from the following:

MKTG 310 Business and Government Logistics
MKTG 311 Sales Management
MKTG 330 Purchasing Materials and Management
MKTG 332 Retail Management
MKTG 333 Industrial and Governmental Marketing
MKTG 451 Marketing Information Systems
MKTG 481 Marketing in the Non-Profit Sector
MKTG 491 Seminar in Marketing
School of Information Technology and Engineering
School of Information Technology and Engineering

Departments

- Computer Science
- Electrical and Computer Engineering
- Information Systems and Systems Engineering
- Operations Research and Applied Statistics

The School of Information Technology and Engineering (SITE) at George Mason University is primarily concerned with four study areas as represented by the school’s four departments. The careful integration of these areas results in a unique academic experience for highly motivated students.

SITE offers eight programs that concentrate on important contemporary technological issues and needs. Three bachelor’s degree programs are offered: computer science, electronics engineering, and systems engineering. Seven master’s degree programs are available: computer science, computer and electronics engineering, information systems, operations research and management science, and systems engineering. A single cross-disciplinary doctoral program is offered in information technology. See the Graduate Catalog for details about the master’s and doctoral programs.

The undergraduate degree programs prepare graduates to enter directly into professional employment or to continue studies at the graduate level. The requirements for the bachelor’s degrees include required and elective courses in mathematics, humanities, and general education, and specialty courses in computer science, electronics engineering, and systems engineering. Each program strongly emphasizes English composition and communication.

Students also have the opportunity to develop interest areas in other fields within SITE that offer undergraduate courses but do not now have undergraduate majors. The Bachelor of Individualized Study (B.I.S.) degree program may appeal to mature students who have completed a substantial portion of their studies at other institutions.

Administration

Andrew P. Sage, Dean
James D. Palmer, Associate Dean
George R. Umberger, Assistant Dean
E. Bernard White, Assistant Dean

Bachelor of Science
Degree Requirements

The following general requirements for a bachelor of science degree must be completed by all undergraduate students who receive bachelor’s degrees through majors in the School of Information Technology and Engineering:

1. Completion of at least 120 semester hours of academic work
2. Completion of at least 6 semester hours of English composition and 6 semester hours of literature
3. Completion of at least 12 additional semester hours in the humanities and social sciences; 6 of these hours must be chosen from the social science areas of anthropology, economics, geography, government, history, linguistics, psychology, and sociology
4. Completion of the requirements for the major as listed under the curricula for computer science, electronics engineering, or systems engineering
5. Completion of an acceptable plan of study formulated by the student and his or her adviser.

Students should consult the Baccalaureate Degree Requirements section under Academic Policies in this catalog for detailed information concerning graduation requirements, curricula requirements, English composition and literature requirements, core requirements for the selected major, residence requirements, and academic quality require-
ments for graduation with a major in computer science, electronics engineering, or systems engineering. The portion of the catalog that concerns the School of Continuing and Alternative Learning discusses the requirements for the B.S. degree. The following sections provide a detailed description of the requirements for the computer science, electronics engineering, and systems engineering undergraduate degree programs.

Computer Science

Faculty
Professors: Kodratoff, Michalski, Rine (Chair), Seidman, Sood, Wechsler
Associate Professors: DeJong, Hamburger, Norris, Wang
Assistant Professors: Acuah, Diaz-Herrera, Gonzalez, Kjell, Littman, Pachowicz, Qu, Quammen, Tanner
Adjunct Professors: Bell, Berry, Cragg, Egan, Howes, Miller, Nejad, Patterson, Singh

Course Work
Undergraduate degree work in computer science provides students with essential background for studying the design and implementation of computer systems software, computer architecture, and computer software applications for science and business. The program emphasizes both computer systems fundamentals and computer software applications. Required areas of study include data structures, analysis of algorithms, operating systems and software systems, computer languages, and applications software design and development, including artificial intelligence, software engineering, networking, and graphics/vision. Evolving issues of software technologies are a major concern.

This department offers all course work designated CS in the Course Descriptions section of this catalog.

Admission to Computer Science
The demanding computer science curriculum takes a science and engineering approach to the design and development of computer systems used in engineering, business, and the arts and sciences. Students majoring in computer science may complement their studies by participating in the GMU cooperative education program or in a work-study program with local industry in the Washington/Northern Virginia area.

Transfer Students and Change of Major. Students transferring from another institution and GMU students desiring to change their major to computer science are encouraged to have completed at least one semester of analytic geometry and calculus (MATH 113 or equivalent) or discrete structures (MATH 125 or equivalent) with a minimum grade of B, and to have an overall GPA of 2.50. Students who do not meet this standard are advised to enroll in MATH 113, MATH 125, or an appropriate math course, and to reapply for change of major toward the end of the semester. A demonstration of B work in such courses is required before the department can approve the change of major.

Advanced Placement. The CS Department recognizes AP computer science scores of 3, 4, or 5, which can be used for credit toward CS 112, CS 211, or CS 312, as appropriate.

Grades. A student must earn a C or better in any course intended to satisfy a prerequisite for a CS course.

Testing. Well-prepared entering freshmen or transfer students may attempt to receive credit for CS 112 or CS 211 by examination, if they have not previously taken these courses and received credit for them by the university. Students wishing to pursue this option should contact the department for more information.

International Students. In addition to the preceding requirements, students whose native language is not English must present TOEFL scores of at least 550 to be admitted to the major.

Enrollment in computer science courses CS 112, 211, and 312 is generally reserved for students with the prerequisite mathematics and engineering background described in each course.

B.S. Degree with a Major in Computer Science
In addition to the general SITE degree requirements for a B.S. degree, the following courses are required:

1. Computer Science: CS 112, 211, 311, 312, 365, 468, and 483, plus 12 additional hours of CS courses numbered above 300 for a total of 31 hours.

2. Mathematics: MATH 113, 114, 213, 303, 305, and 446, for a total of 20 hours, plus MATH 351 or STAT 344, and ECE 301. A computer science major may take MATH 125 and MATH 325 in place of MATH 305; in this case the required number of computer science-
related courses is reduced from 12 to 9 semester hours.

3. Computer science-related courses: 12 hours chosen from OR 435, 441, 442; ECE 285, 431, 442, 511, 512; PHIL 371, 376, 422; any MATH course numbered above 300 except MATH 350, 371, 372; any CS course numbered above 300.

Courses for Nonmajors
CS 103, 161, and 262 are designed primarily for students in the social and behavioral sciences and business, and for others desiring an introduction to computer programming. These courses do not count toward satisfying the requirements for a major in computer science.

Electrical and Computer Engineering

Faculty
Professors: Bass, Cook, Gertler, Manitius, Tabak, Van Trees
Associate Professors: Athale, Baraniecki, Beale, Black (Chair), Capetanakis, Ceperley, Chang, Cooley, Hintz, Ioannou, Jabbari, Mulpuri, Schaefer, Stephanou, Stewart
Assistant Professors: Auletta, Berry, Cole, Earp, Eldeib
Visiting Associate Professor: Sutton
Visiting Assistant Professor: Ziavras
Lecturers: Coleman, DuBose, Gurfein, Jordan, Levin, Rao, Short, Smith, Toms

B.S. Degree in Electronics Engineering

This program prepares the graduate either for direct entry into a career in engineering or for graduate study. It is accredited by the Accreditation Board for Engineering and Technology.

Along with the general B.S. degree requirements, the electronics engineering course requirements are outlined in the sample schedule at the end of this section. Students may complete the requirements on a part-time or co-op basis. In either case, the program must be approved by an academic adviser. Sample schedules for PAGE students in electronics engineering are available in the ECE office or PAGE office.

The demanding electronics engineering curriculum requires 134 total credit hours. Students should seriously consider an extra semester or two to accomplish any of the following objectives:

1. Lighten the course load (particularly for those with part-time employment);
2. Participate in cooperative education or work-study (with local industry);
3. Have a double major (for example, with physics, math, computer science, or systems engineering).

The department also offers a master's degree in computer and electronics engineering and participates in the Ph.D. program in information technology through the School of Information Technology and Engineering (see Graduate Catalog).
Other Engineering Disciplines
Students interested in engineering disciplines other than electronics engineering and systems engineering may complete the first two years of course work, which meet most of the basic requirements of a standard engineering curriculum. Students completing the first two years of study may expect to complete a bachelor of science degree in any of the specialized areas offered at other engineering schools.

Advising
All engineering students are required to see their major adviser prior to course registration each semester. Students interested in engineering who are not declared majors are also strongly urged to see an electronics engineering adviser each semester.

Change of Major
Students who want to change their major to electronics engineering must have at least a 2.75 GPA in all math, physics, and engineering courses, and should have successfully completed MATH 114.

*See department list for approved electives; at least one should be at the 300 level or above.

**See department list for approved technical electives. Tracks in electronics, communications and signal processing, computer engineering, and controls systems and robotics are available. A non-track option is also available.

Information Systems and Systems Engineering

Faculty
Professors: Andriole, Fairley, Friesz, Gomaa, Kerschberg, Palmer, Sage, Sibley, Van Trees
Visiting Professors: Davis, Freeman, Ryan
Associate Professors: Adelman, Baum, Goicoechea, Hopple, Jajodia, Lehner, Might, Sanden, Sandhu, Siff, White
Assistant Professors: Aiken, Ammann, Kogan
Adjunct Professors: Cook, Donnell, Fletcher, Napoliello, Nidiffer, Post, Randall, Shelton, Shere, Spear
Instructors: Berkowitz, Ehrhart

Course Work
The Systems Engineering Department offers courses with the designators INFS and SYST in the Course Descriptions section of this catalog.

B.S. Degree in Systems Engineering
The undergraduate program in systems engineering at George Mason University has strong information systems components. It emphasizes behavioral factors associated with such subjects as human-machine interaction, the design of decision support and expert systems, software systems engineering, and system acquisition and procurement. These comprise the advanced portion of undergraduate study and follow such fundamental subjects as applied mathematics, engineering science, and computing.

The interdisciplinary curriculum draws upon knowledge and information from the social, behavioral, computer, mathematical, management, and engineering sciences. Students are prepared for specific problem solving, systems design, and testing and evaluation in industry, government, or academia.

Two more specialized programs within the Information Systems and Systems Engineering Department are systems engineering with options in information systems engineering or urban systems engineering. Students who specialize in information systems engineering obtain in-depth knowl-
edge in computer organization and operation systems, database management systems, data communications, distributed computing and computer networks, and the analysis and design of information systems.

The urban systems engineer is concerned with design decisions in systems such as transportation, water, energy, land, and communications, as well as the complications of the social, environmental, economic, and political pressures of development, design, and construction in heavily populated urban/suburban areas. Planning, analysis, design, operation, performance evaluation, and maintenance of systems associated with urban life are among the perspectives addressed in urban systems engineering studies.

Degree Requirements

In addition to the general requirements for the B.S. degree, students must meet specific requirements for this degree outlined in the accompanying sample schedule.

Advising

All systems engineering students are required to see their advisers at least once each semester to plan for the following semester's registration.

Each student in systems engineering is expected to complete an approved plan of study, which then constitutes a "learning plan" for the degree program. Sample schedules for PAGE students in systems engineering are available in ISSE or PAGE offices.

Systems engineering and information systems engineering technical elective sequences may be selected in digital systems engineering, control systems engineering, communications systems engineering, mathematical analysis, engineering science, or real-time systems engineering. Specific electives to support these sequences may be selected from courses in computer science, electrical and computer engineering, information systems, systems engineering, or approved courses in operations research, applied statistics, psychology, or business administration.
This department offers courses with the designators OR and STAT in the Course Descriptions section of this catalog.

Certificate Programs

The department offers two certificate programs in operations research and applied statistics. For more information, see the catalog section on Certificates, Interdisciplinary Minors, and University Courses.

Operations Research and Applied Statistics

Faculty

Professors: Greenberg, Harris, D. Miller, Schum, Wegman

Associate Professors: Bolstein, Gantz, Habib, Hoffman, J. Miller, Nash, Sofer

Assistant Professors: Richey, Sutton

Course Work

Operations research and applied statistics at George Mason University principally involve the theoretical and empirical sciences of managerial and operational processes. Courses include the traditions of mathematical optimization, random processes, and applied methods, while allowing broad consideration of managerial and operational problems. Models are needed for a variety of purposes in business, industry, and government to describe different environments and to relate alternative courses of action to performance. Thus, the courses in operations research and applied statistics focus on the modeling and analysis of systems.

Although the department does not offer an undergraduate degree in either operations research or statistics, a variety of courses are available for inclusion in other degree programs.
School of Nursing
School of Nursing

Nursing Program
The undergraduate nursing program at George Mason University prepares students to deliver superior nursing care and provide leadership in nursing in the increasingly complex and challenging field of modern health care. Graduates are in demand as professional nurses in hospitals, nursing homes, community health agencies, and other health care agencies. The program emphasizes early detection of potential health problems, health maintenance in ambulatory services, and preparation for the managerial responsibilities of nursing.

The program is accredited by the Virginia State Board of Nursing and the National League for Nursing.

Administration
Rita M. Carty, Dean
Catherine Malloy, Associate Dean
for Academic Programs
Georgine M. Redmond, Assistant Dean
for Student Affairs

Faculty
Professors: Ailinger, Carty (Dean), Dear, Johnson-Brown, Malloy (Associate Dean), Silva, Walker
Associate Professors: Connelly, Feeg, Harper, Jenkins, Kaseman, Liu, Moore, Smith, Sorrell, Trainor, Vail
Adjunct Associate Professor: Johnson
Assistant Professors: Boland, Boyd, Brenkus, Cianci, Conti, Coviello, Dienemann, Ehlke, Fant, Fisher, Gaffney, Harbin, Langley, Mill, Redmond (Assistant Dean), Roberts, Rudowski, Wiederhorn, Williams
Instructors: Chandler, Rice, Rigney
Lecturers: Bednash, Bouboulis, Cameron, Francis, Hall, Hassmiller, LaVoie, Maddox, Neill, Postal-Ranney, Rosetti, Sandefur, C. Smith, Tackett, Wu

PAGE Students
The general education requirements within the Bachelor of Science in Nursing (B.S.N.) program may be met through George Mason University's Plan for Alternative General Education (PAGE). The plan integrates the university's general education requirements in the form of a series of interdisciplinary courses that are completed during the first two years of a bachelor degree program. For nursing students, the PAGE option satisfies all requirements except the course work in nursing and biology.

Course Work
The School of Nursing offers all course work designated NURS in the Course Descriptions section of this catalog.

Bachelor of Science Degree
The B.S.N. degree prepares graduates to function as professional nurses in hospitals, nursing homes, and in the community. The program may be completed on a full- or part-time basis, and a special accelerated pathway for registered nurses takes into account the needs of the working R.N. A full-time accelerated pathway for students with baccalaureate degrees outside of nursing is also offered. Students interested in this pathway must contact the School of Nursing. All pathways lead to completion of the objectives of the undergraduate program.

Clinical nursing begins at the sophomore level. Students must complete a pre-nursing curriculum and be admitted to junior standing or to one of the accelerated pathways.

Candidates for the degree must present at least 124 semester hours of work. Specific requirements for the B.S.N. are as follows:

Degree Requirements

| Language Arts and Culture | 15 |

http://catalog.gmu.edu
ENGL 101, 302 (3 hours humanity ... 6
prerequisite to 302)
Communication .................. 3
Humanities ............................. 6
Art (appreciation, history, criticism, or theory)
Music (appreciation, history, criticism, or theory)
Literature (in addition to six hours
of ENGL 101, 302)
Philosophy, language, religion, or humanities

Social Behavior Sciences ......... 9
Sociology .............................. 3
Psychology ............................ 6

Natural Sciences ..................... 20
Chemistry (CHEM 103-104) ........ 8
Biology (BIOL 124, 125) .......... 8
Microbiology (BIOL 261) ......... 4
Statistics (STAT 250, PSYC 300, .. 3-4
or SOCI 221)

Nursing Major ......................... 46-62
NURS 250, 254, 262, 301, 302, 314, 315,
318, 319, 320, 324, 325, 411, 419, 420,
426, 430, 431, 450, 471, 475, 476

Physical Education Activities .... 2
(recommended)

Electives ................................. 13-15
(No more than three hours of nursing
electives may be used to satisfy this requirement.)

Total ................................... 124

The school provides opportunity for credit by ex-
amination in several courses for students present-
ing evidence of previous education. Registered
nurses may obtain a maximum of 30 hours of
credit toward the baccalaureate degree by satisfac-
tory performance on ACT-PEP examinations. Pro-
grams of study are based on student needs.

Special Requirements
Nursing students are required to obtain annual
health examinations and immunizations beginning
with registration for their first clinical course.
They are also responsible for their own uniforms
and transportation. Student liability insurance is
provided by the university. Students are strongly
advised to maintain health insurance coverage at
all times. Each student is responsible for his or
her health care, including emergency care. The
School of Nursing assumes no financial responsi-
bility for the health care of students. An accident
and health insurance plan is available through the
university.

A sophomore student must have CPR certifica-
tion before entering Nursing 262 and maintain it
through the remainder of the program. Either the
American Red Cross's Professional Rescuer or
the American Heart Association's Basic Life Sup-
port is required.

Graduating seniors are required to take the NLN
Diagnostic Readiness Test in their final semester.
The current fee for the exam is $27.50.

Because knowledge, skills, and behavior patterns
in the major field of this program are so vital to
the health and perhaps even the survival of indi-
viduals or groups being served, failure or border-
line achievement cannot be tolerated. Therefore,
the faculty of the School of Nursing has estab-
lished, with approval of university faculty and ad-
ministration, the following special major field
quality standards which go beyond the general un-
iversity quality standards printed elsewhere in this
catalog.

Acceptance into Junior Standing
In Nursing
Acceptance into junior standing in nursing is
based on a cumulative average of 2.8 in courses
prerequisite to junior-level nursing courses: anat-
omy and physiology; chemistry; microbiology; psy-
chology (three hours); sociology; and Nursing 250,
254, and 262. Students must achieve a C or better
in prerequisite courses. Students not accepted for
junior standing in nursing may re-petition and, if
they meet the criteria, may be admitted on a space-
available basis.

Students enrolled in the Program for Alternative
General Education (PAGE) must earn a C or bet-
ter in PAGE 130, 131, 227, and 228. In addition,
PAGE students must earn a 2.8 prerequisite cu-
mulative average in the following courses: BIOL
124, 125, and 261, and NURS 250, 254, and 262.

Permission to register for NURS 301, 302, 314,
315, 324, and 325 requires prior acceptance into ju-
nior standing in nursing. Application must be
made during the semester in which the student is
completing the prerequisites for the junior-level
courses.

Application for acceptance into junior standing in
nursing must be made prior to March 15 for the
fall semester and prior to November 15 for the
spring semester.

All prerequisite courses and credit by examination
must be successfully completed before recommenda-
tions are made to accept the student into junior
standing. These recommendations are made at
the end of the semester when all courses are completed and grades have been reported. The registered nurse student takes ACT-PEP exams for junior standing. Students in the Accelerated Pathway for College Graduates must have a 3.0 GPA in their previous degree or a 2.8 in sciences and social and behavioral science prerequisites for junior-level nursing courses.

Full-time nursing requires carrying a heavy schedule; therefore, outside obligations should be limited to ensure success.

Additional Academic Grade Standards

Progression

A final nursing course grade of less than C prohibits further progress in the sequence of required nursing courses until that course is repeated and a satisfactory grade is earned.

A nursing course in which a grade of less than C is earned may be repeated once. Upon earning a grade of C or better the student may resume progress in the sequence of required courses.

Failure to earn a grade of C or better in a course being repeated, or earning a grade of less than C in a second nursing school course, results in suspension of eligibility to progress in the sequence of required nursing courses.

A student so suspended may, after the subsequent academic period (fall semester, spring semester, or summer session), petition the Associate Dean for Academic Programs for permission to repeat the nursing course or courses that resulted in the suspension.

No more than two nursing courses may be repeated. Failure to produce a satisfactory grade of C or better in the trial course(s) or in any later nursing course results in exclusion from the university's nursing program.

Graduation

Graduation depends upon earning a C or better in all courses prerequisite for junior standing and all required nursing courses.
College of Education and Human Services
The College of Education and Human Services prepares scholars and practitioners in fields of human service through programs of study that have become increasingly multidisciplinary in response to the richness and complexity of a pluralistic society. In addition to providing the framework for the integration and application of knowledge from a variety of disciplines, the curricula of the college provide the opportunity for students to examine, evaluate, and practice professional knowledge, skills, and techniques. Since human service endeavors may respond to individual and group needs in many ways, the function of the faculty goes beyond imparting knowledge to include engaging students in critical thinking, research, analysis, and problem-solving activities.

Course Work
The College of Education and Human Services enrolls students preparing for specific professions and is composed of four departments. The following disciplines offer course work shown in this catalog:

- Department of Curriculum and Instruction: EDCI, EDUC
- Department of Health, Sport, and Leisure Studies: HEAL, PHED, PRLS
- Department of Social Work: SOCW

Some of those shown are graduate courses on the 500-level. See Graduate Course Enrollment by Undergraduates in this catalog for university policy on undergraduates enrolling in graduate courses.

See the Graduate Catalog for course work in the following disciplines:

- Department of Curriculum and Instruction: EDRD, EDSE
- Department of Educational Leadership and Human Development: EDAS, EDGC, EDRS, EDCC
- College of Education and Human Services: DAED

PAGE Students
Students enrolled at George Mason University may fulfill their general education requirements through the Plan for Alternative General Education (PAGE). PAGE students pursuing degrees in the College of Education and Human Services should follow the PAGE program approved by each department in the college.

Administration
Larry S. Bowen, Dean
James H. Finkelstein, Associate Dean
E. Clark Dobson, Assistant Dean

Teacher Certification
The College of Education and Human Services is responsible for professional courses, special standards, and certification recommendation for students desiring to complete requirements for the Virginia Collegiate Professional Teaching Certification in all state-approved and NCATE-accredited programs preparing teachers, administrators, counselors, and related instructional personnel. Virginia requires persons seeking initial certification to submit scores obtained on National Teacher Examinations. Information on these tests can be obtained from the teacher certification specialists in the Office of the Director of Teacher Education.
Academic Policies and Degree Requirements

College of Education and Human Services academic policies and undergraduate degree requirements are described in detail under the following departmental sections: Curriculum and Instruction; Health, Sport, and Leisure Studies; and Social Work. Academic policies and degree requirements for graduate programs are described in the Graduate Catalog.

Note that in addition to the requirements described under each departmental section, students should consult the Baccalaureate Degree Requirements section of Academic Policies for information concerning the literacy requirement, English composition requirement, catalog requirements, residence requirements, and academic requirements.

Sample Schedules

Sample schedules listed are illustrative only. Courses need not be taken in sequences or semesters indicated, except as prerequisites or other necessities prescribe.

Curriculum and Instruction

Faculty

Professors: Bindel, Bowen, Gilstrap, Martin, Montebello, Spikell

Associate Professors: Behrmann, Chu, Collier, Duck, Dzama, Given, Isenberg, Jones, Lecos, Levy, Raines, Sears, Smith

Assistant Professors: Burger (Research), White

Teacher Education Programs

Teacher education programs serve undergraduates in the College of Education and Human Services and in the Bachelor of Music degree program, and postbaccalaureate students in the Graduate School.

The following teacher preparation programs are available for students entering under the 1990-91 catalog:

1. Secondary Education — Grades 8 through 12 (Consult Graduate Catalog for description of the postbaccalaureate certification program in secondary education and the additional requirements to earn an M.Ed.)

2. Special Certification (Music Education, K-12; Health Education, 8-12; and Physical Education, K-12)

The following restructured teacher preparation programs will be available for students entering under the 1990-91 catalog:

1. Early Education (Nursery-Third Grade)
2. Middle Education (Grades 4-8)
3. Special Education (consult Graduate Catalog for requirements)

All certification programs are approved by the Virginia State Department of Education, the National Association of State Directors of Teacher Education and Certification, and the National Council for Accreditation of Teacher Education.

Certification for Elementary Teaching

During the 1990-91 academic year, no undergraduate transfer students will be admitted to the teacher education programs in early childhood or middle education. The department is phasing out its undergraduate teacher education programs in these areas. Students who wish to become certified teachers in early childhood (NK-3) or middle education (4-8) must first obtain a degree from the College of Arts and Sciences and then apply during the senior year to be admitted to the Graduate School for a fifth year of professional study as a postbaccalaureate student. Early childhood students may select any major. Middle education majors are encouraged to major in a discipline that they could teach in a middle school (English, speech, history, mathematics, foreign language, or science).

Students may apply for admission to the new postbaccalaureate certification program during 1990-91. (Consult Graduate Catalog for selection criteria and admission requirements.) Prerequisite 300-level courses (EDUC 300, 301, and 302) may be taken in the fall and spring of that year. Required 500-level courses will be scheduled in the summer of 1991. For more information, contact the Department of Curriculum and Instruction.

Undergraduate General Education Requirements

Students planning to apply to the new postbaccalaureate certification program should take the following general education courses as part of their undergraduate program:

<table>
<thead>
<tr>
<th>Semester Hours</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>ENGL 101 Composition and Introduction to Literature</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>ENGL 302 Advanced Composition</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>ENGL 205, 206, or 253 Readings in</td>
<td>3</td>
</tr>
</tbody>
</table>
English or American Literature 3
Any other 200-level ENGL literature course 3
HIST 121 Formation of the American Republic 3
HIST 122 Development of Modern America 3
GEOG 101 or 103 Major World Regions or Cultural Geography 3
COMM 100 or 120 Introduction to Communication or Public Speaking 3
Laboratory Science 12
Students may select three of the following disciplines:
1. BIOL 151 Introduction to Biology or BIOL 103 Contemporary Biology 3
2. CHEM 103 Chemical Science in a Modern Society 3
3. PHYS 141 Elementary Physics (3) and PHYS 142 Elementary Physics Lab (1) 4
4. ASTR 105 Introduction to Modern Astronomy 5
5. GEOL 101 Introductory Geology 3
ECON 103 or 104 Contemporary Economic Principles and Issues 3
MATH 106 Concepts of Mathematics (preferably MATH 371 and 372) 9
and 6 hours of approved math electives
HEAL 110 Personal Health 3
MUSI 100 or 101 Fundamentals of Music or Music Appreciation 3
ARTS 102 or ARTH 101 Art Appreciation or Visual Thinking 3
Total 57

Vocational Education Program
During the 1990-91 academic year, no students will be admitted to the undergraduate teacher education program in vocational education. The degree programs affected are technology education, trade and industrial education, and business education.

Opportunities to meet certain state certification standards will be available at the graduate level. Contact the Coordinator of Vocational/Technical Education, Department of Educational Leadership and Human Development, for more information.

Certification for Secondary School Teaching
The Secondary School Teacher Education Program has three components:

1. Courses in the teaching discipline as developed by the College of Arts and Sciences (CAS) and the College of Education and Human Services. CAS majors include biology, chemistry, economics, English, French, German, geography, geology, government, history, mathematics, music, physics, psychology, sociology, and Spanish. Added secondary endorsement certification is offered in pre-algebra, earth science, and general science. In addition, a specialization in bilingual/multicultural education is offered. Interested students should consult an adviser in the Bilingual/Multicultural Education office.

Students who major in music should consult the Department of Music. Students with majors in health education or physical education should consult the Department of Health, Sport, and Leisure Studies. Students majoring in technology education should consult the coordinator of technology education.

2. General Education Requirements as mandated by the State of Virginia. (Please refer to general education requirements on previous page.)

3. Professional Courses required by the Department of Curriculum and Instruction. Students who wish to be certified in a secondary school discipline must complete the following graduate-level 30-hour certification program in education. They must also complete the general education and discipline courses they need to meet state certification requirements. These courses may either be undergraduate or graduate courses. In addition, students must have an approved plan of study of course work needed for certification and be fully admitted to the Teacher Education Program in accordance with the regulations stated in the Graduate Catalog.

Education Courses Required
1. EDUC 522 Introduction to Secondary Education (3)
2. EDUC 539 Psychological Foundations of Adolescent Learning and Development (3)
3. EDUC 529 Pluralism and Exceptionality in US Education (3)
4. EDRS 531 Educational Tests and Measurements (3)
5. EDUC 593 Utilization of Instructional Technology (3)
6. Curriculum and Methods. Select one from the following (3):
EDCI 567 Social Studies
EDCI 569 English
EDCI 572 Math
EDCI 573 Science
EDCI 550 Foreign Language
EDCI 519 English as a Second Language
Prerequisites: Courses in Areas 1, 2, 3, and 4
7. Practicum: EDCI 515 Practicum in Secondary Education (12)

Total Hours (30)

Students who wish to earn a master of education degree in secondary education must complete 18 hours beyond the certification requirements for a total of 48 hours. This total includes 12 hours of practicum, which is the student teaching experience. The total number of hours any given student will complete depends on the individual's preparation in general education and in the liberal arts area of the discipline.

Students should consult with the secondary education adviser in the department of their discipline as well as the appropriate discipline adviser in the Department of Curriculum and Instruction. All students interested in certification should also consult the information in the Graduate Catalog that describes the additional courses needed to earn an M.Ed.

Undergraduate students may meet 6 semester hours of their certification requirements while completing their bachelor's degree. Since all education courses required for certification are at the 500 level, students must be in the upper division to obtain permission to enroll in the following courses: EDUC 510, 522, 524, 529, 593, and EDRS 531.

Certification for Special Education Teaching

Initial certification in special education may be earned at the graduate level in the following specializations:

1. Early childhood handicapped (ECH)
2. Severely and profoundly handicapped (SPH)
3. Emotional disturbance (ED)
4. Learning disabilities (LD)
5. Special education technology (SPT)

Up to 12 semester hours of the required courses may be taken as an undergraduate and applied toward an undergraduate degree.

Health, Sport, and Leisure Studies

Faculty

Professors: Goodale, Ruhling (Chair), Stein, Wiggins
Associate Professors: Bever, Cato, Metcalf, Miller, Schack
Assistant Professors: Benson, Linn, Wright
Adjunct Assistant Professor: Doyle

Course Work

The department offers all course work designated HEAL, PHED, and PRLS in the Course Descriptions section of this catalog.

PAGE Students

General education requirements are satisfied by successful completion of the Program for Alternative General Education (PAGE). Additional courses are required each semester the student is enrolled in the PAGE program. Students planning to major in health education; physical education; or parks, recreation, and leisure studies should contact the Department of Health, Sport, and Leisure Studies for the list of additional courses.

Physical Education (B.S.Ed.)

This degree prepares students for physical education careers in either public or private sector fitness and sport programs (Option I) or teaching (Option II) and for advanced study in exercise and sport sciences.

Degree Requirements

Regardless of the option selected, course work consists of a 55-hour general education core, with the following special requirements depending on the option selected.

Option I requires 122 total credit hours with a 24-hour specialization in a supporting discipline. The 24 hours must be selected with approval of the adviser from a discipline outside physical education, and 15 of these hours must be 300/400-level courses. The 24 hours must be exclusive of the general education requirements. The final semester is devoted to an internship. Students must have a 2.50 or higher GPA in the major and in the specialization course work.
Option II requires 137 total credit hours with the final semester devoted to student teaching. Students must have a 2.50 or higher GPA in the major and must demonstrate proficiency in swimming or enroll in and pass an intermediate-level swimming course. They must also complete a proficiency examination in writing before applying for graduation. Contact the Department of Curriculum and Instruction to register for the examination.

**Swimming Proficiency Examination**

All students enrolled in the teacher certification program must pass the following swimming proficiency test or enroll in and pass an intermediate-level swimming course:

http://catalog.gmu.edu
Health, Sport, and Leisure Studies

1. Swim 50 yards/meters using either freestyle or breast stroke
2. Swim 50 yards/meters using two strokes (25 yards/meters each) different from the first 50 yards (excluding elementary backstroke)
3. Swim 20 feet under water

Pre-Certification in Athletic Training

To receive certification at George Mason University for athletic training by the National Athletic Training Association (NATA), students must be in the teacher certification program and must meet the following education requirements:

1. Have a college degree with teaching certification (GMU requirement)
2. Complete the following NATA requirements:

<table>
<thead>
<tr>
<th>GMU Course Equivalent</th>
<th>Requirements</th>

</tr>
<tr>
<td>k. Clinical Experience — by arrangement with</td>
<td>a certified athletic trainer over a period of at least 2 years</td>
</tr>
</tbody>
</table>

Recommendations

1. Acting team physician
2. NATA supervising athletic trainer.

Examination

Students must pass written and practical tests administered by NATA and apply for certification.

Note: Requirements are subject to change and students must meet current NATA certification standards.

Student Teaching Admission

1. Students must maintain a GPA of 2.50 or above following admission to the teacher education program.
2. Students must complete the application process for student teaching through the Office of Teacher Education.
3. Students must have satisfactorily completed the swimming proficiency test.

Teacher Education Program (TEP)

The program in teacher education is accredited and approved by the National Council for Accreditation of Teacher Education and the Virginia State Department of Education. Admission is granted by the Teacher Education Screening Committee. Students should obtain an application form from the Office of Teacher Education and apply to the teacher education program during or upon completion of the fall semester of their junior year. To be considered for admission, students must:

1. Have completed or be in the process of completing 60 semester hours, 6 of which must have been taken at the university, before applying.
2. Have a GPA of 2.50 for the most recently completed 60 hours of collegiate work and for the professional GPA.
3. For the professional GPA the student must have completed or be in the process of completing:
   - For Physical Education (Option II)
     a. EDUC 302 and either 300 or 522; BIOL 124 and 125; PHED 300 and 303
     b. Four of the following: PHED 380, 381, 382, 383, 384, 385, 386, 387, 388, 389
   - For Health Education (Option II)
     a. BIOL 103-104 or 113-114, HEAL 110, 120, 205, 315
     b. One of the following: HEAL 220, 310, 325, 330
4. Have submitted the departmental checklist of requirements from the catalog year in which the student entered the university. This may be obtained from the Office of Teacher Education or the Department of Health, Sport, and Leisure Studies.
5. Have demonstrated proficiency in written and oral communication and computer literacy. (See the Department of Curriculum and Instruction to register for the examinations.)
6. Physical education and health education students must take the Core battery (General Knowledge, Communication Skills, and Professional Knowledge) and the respective specialty area examinations of the NTE. General Knowledge and Communication Skills scores and Competency Test scores should be reported when applying to TEP or these tests must be scheduled to be taken in the same semester the student is applying for the TEP. The Competency Tests are administered in the Department of Curriculum and Instruction.
7. Students may enroll in one 400-level course before they have been admitted to the Teacher Education Program.
**Internship Admission**

1. Students must have a current approved program contract.
2. Students must have completed and obtained approval for an internship application during the semester prior to the internship (request appropriate forms from department secretary).

**Health Education (B.S.Ed.)**

This degree prepares students for health education careers in teaching, community health agencies, and public and private sector health promotion programs, and for advanced study in health education.

**Degree Requirements**

Course work consists of a general education required core, 15 or 18 semester hours in a support discipline, and two options for concentration of major courses in a professional sequence. Support disciplines include sociology, psychology, communication, marketing, science, education, and physical education. (Note exceptions in Option II.) Courses in the support discipline must be exclusive of general education requirements with at least 9 or 12 semester hours at the 300-400 level.

The final semester of the program is devoted to student teaching and/or internship. Students selecting a teacher certification option must meet requirements set forth under the Teacher Education Program section that precedes the Health Education degree program description. Students planning to pursue this degree program must present a 2.50 or higher GPA in health education courses completed prior to applying for admission to the program. Applications to major in this program should be submitted to the Department of Health, Sport, and Leisure Studies upon completion of 45 semester hours (must include personal health and community health courses).

### Social Work

#### Faculty

**Associate Professors:** Raskin (Acting Chair), Schwamm

**Assistant Professors:** Davis, Slaght

**Instructor:** Blome

#### Course Work

This department offers all course work designated SOCW in the Course Descriptions section of this catalog.

#### B.S. Degree with a Major in Social Work

The social work program prepares students for beginning generalist professional practice in social work and has been granted full accreditation by the Council on Social Work Education.

To receive a bachelor of science with a major in social work, the student must successfully complete requirements for the bachelor of science degree, including:

1. **41 to 45 semester hours in social work**, including SOCW 301, 323, 324, 351, 352, 357, 358, 453, 454 or 455, 471, and two 400- or 500-level social work electives
2. SOC 101 and either SOC 221 or PSYC 300, PSYC 100, and either SOC 305 or PSYC 231
3. 6 semester hours in each of the following: English composition; English literature; philosophy/religion; and the social sciences (history/economics/government), to include GOVT 204
4. BIOL 103, 104
5. 3 semester hours in mathematics
6. 3 semester hours in economics
7. Additional semester hours to total 120 hours

To be admitted to the social work program, a student must have:

1. Completed at least 45 credits with a GPA of 2.5;
2. At least a C in SOCW 301, including a satisfactory evaluation of field experience, and SOCW 351.

3. Submitted application for social work major to the director of Social Work Admissions. Sophomores should file this application between January 1 and March 15, juniors between September 1 and November 1. The student's application for admission to the social work major will be reviewed by social work faculty members for action. A personal interview may be required.

The Social Work faculty evaluates the student's performance periodically and may require a student to withdraw from the program when, in its judgment, performance is not satisfactory. The decision is based on the quality of academic and field performance as well as on personal fitness for the profession of social work. The student has the right to appeal.

Insurance Coverage for Students Enrolled in SOCW 453, 454, and 455. Students who participate in internships are covered for liability under Virginia's Self-Insured General Liability Insurance Plan and for medical malpractice under the Medical Malpractice Insurance Plan established by the Department of General Services, Division of Risk Management. These plans cover activities that the instructor has determined to be part of the student's course work. Activities that are not part of the course practicum are not covered. (Exclusions in the plan are listed in Section VII.) A copy of the Self-Insured Liability Plan for the Commonwealth of Virginia is available in the Office of the Director of Field Instruction.

*The social work program can be completed in the final four semesters. Students who must do so are advised to take the courses with asterisks in their fifth (fall) semester. Otherwise, their graduation will be delayed.

**Students who wish to register for Block Placement (SOCW 455, 10 credits) must meet specific requirements and be advised by the director of field instruction.

***Students must have completed 6 credits of psychology before registering for this course.
School of Continuing and Alternative Learning
School of Continuing and Alternative Learning

The School of Continuing and Alternative Learning was created in 1988 as the result of a task force that recommended the university expand the responsibilities of the Division of Continuing Education. The school will lead the university in developing interdisciplinary and nontraditional curricula and in using technology as a delivery system for learning.

Programs and Services
The School of Continuing and Alternative Learning provides the Northern Virginia community with a comprehensive program of learning opportunities: the nontraditional Bachelor of Individualized Study (B.I.S.) degree program, undergraduate evening programs, the nursing continuing education program, in-service education, the extended studies enrollment procedure, credit courses designed and offered to accommodate nontraditional learning outcomes with alternative scheduling formats, contract courses (credit and noncredit), undergraduate and graduate guest matriculant enrollment, senior citizen enrollment, community services, and professional development noncredit courses through the Employee Development Institute (EDI). The school also administers graduate courses for six master’s degree programs and approximately 300 noncredit courses at the Arlington Campus Professional Center. In addition, the school administers a nontraditional master’s program through the Graduate School.

Academic programs offered through the School of Continuing and Alternative Learning originate in the appropriate colleges and schools of the university and are subject to official university regulations and procedures. The dean of the School of Continuing and Alternative Learning serves as the academic dean of all students enrolled in programs administered by the school.

Administration
Robert T. Hawkes, Jr., Dean
Sally J. Reithlingshoefer, Associate Dean
James F. Sanford, Assistant Dean for Individualized Study Programs

Extended Studies
The extended studies enrollment procedure serves the academic counseling and career information needs of adult learners and provides an opportunity for qualified students to apply for enrollment in courses without being formally admitted to the university. The program accommodates the diverse continuing education needs of students for achieving personal enrichment, upgrading skills, retraining for new jobs, increasing the enjoyment of retirement or leisure time, entering or reentering the job market, exploring new areas of study, or making up prerequisites to qualify for entry into a degree program. While meeting these needs, students earn credit that can be later applied to a degree program.

Extended studies enrollment is based on evaluative criteria and availability of space in course selections. Enrollment in high-demand fields may be restricted or prohibited from time to time.

Enrollment Procedures
Prior to each semester, professional academic counselors assist more than 3,000 students in selecting courses appropriate to their career goals. They also advise students about requirements for courses and programs, approve course selections, explain registration procedures, and acquaint students with the university services available to extended studies enrollees. All academic policies and procedures apply to extended studies enrollees. Completed courses, earned credits, and grades are recorded on regular university transcripts.

Counseling appointments are available to all new extended studies students and are required of all
returning students who have earned 15 or more semester hours as extended studies students at GMU. Counseling appointments are optional for all other returning extended studies students who have taken courses at some time during the past two years, have transcripts on file, and have earned 14 or fewer semester hours at GMU.

Counseling and enrollment services are available to the public throughout the entire year in the Extended Studies Enrollment office. During non-registration times, career and academic counseling services are available. During presemester registration periods, counseling services are limited to course approval only, and appointments are required. Interested students should call the Extended Studies Enrollment office for appointments and office hours.

Enrollment Requirements
Prospective enrollees are required to supply unofficial evidence of their academic background along with the enrollment request packet to the Extended Studies Enrollment office. Transcripts or grade reports of previous college course work are required prior to enrollment. Recently graduated high school students are not eligible to enroll through the Extended Studies Enrollment Program.

Extended studies enrollees are expected to achieve a semester average of at least C (2.00) in all undergraduate courses and at least B (3.00) in all graduate courses. Students who do not meet these criteria during two consecutive periods of enrollment are not permitted to register again as extended studies enrollees.

If an extended studies enrollee later applies for admission to a GMU degree program, grades earned while enrolled through extended studies remain a part of the student's permanent record and are counted in determining the student's future academic standing.

Credits Applicable to a Degree Program
If an extended studies enrollee wishes to apply for admission to a degree program, the regular graduate or undergraduate admissions procedures take effect. Extended studies enrollees may apply for formal admission at any time. The Office of Admissions applies the same criteria for admission of these students as for students transferring from other institutions.

If accepted for admission into a degree program and if the courses taken meet the current catalog requirements of the degree program, students may apply up to 60 hours earned as extended studies enrollees toward an undergraduate degree. A maximum of 12 hours of graduate credit earned through extended studies enrollment may be applied toward a master's degree program. It is the student's responsibility, after admission to the Graduate School and upon initial registration as a degree student, to initiate a request to the Student Records office to apply credit earned through extended studies enrollment to the appropriate graduate degree program.

If the student has transferable credit from another institution, the amount of applicable credit earned through extended studies enrollment is reduced accordingly. Grades for the graduate courses taken through extended studies enrollment, if approved toward a master's degree, are included in the student's GPA. Prospective degree-seeking students are urged to apply for regular admission as soon as possible or as soon as they are eligible to do so. Candidates for degrees must fulfill the degree requirements outlined in the catalog that is in effect at the time they are admitted.

Guest Matriculant Enrollment
Persons enrolled in undergraduate or graduate degree programs at other accredited institutions who wish to take undergraduate courses at the university for transfer back to their home institution enroll through the Extended Studies Enrollment office during the fall and spring semesters. Such students should submit transcripts and permission to enroll from the appropriate dean of the home institution to a counselor in the Extended Studies Enrollment office. Only students in good academic standing at their home institutions are permitted to enroll as guest matriculants at George Mason.

Guest matriculants should contact the Summer Session office to arrange for course work during the summer terms.

Senior Citizens Enrollment
The Extended Studies Enrollment office in the School of Continuing and Alternative Learning coordinates enrollment under the Senior Citizens Higher Education Act of 1974, as amended and as applicable to the university. Under the terms of this act, eligible Virginia residents over 60 years of age with a taxable income of less than $7,500 are entitled to enroll in courses offered for academic credit on a space-available basis without payment of tuition and fees.

In addition, the act provides for audit of courses offered for academic credit and also for enroll-
ment in noncredit courses without payment of tu-
ition and fees on a space-available basis, regard-
less of the taxable income level. Tuition, however,
may be charged for courses designed exclusively
for senior citizen groups. No senior citizen may
change registration status in any given semester
once he or she has initially registered for classes.

Undergraduate Evening Program
The School of Continuing and Alternative Learn-
ing coordinates undergraduate courses and pro-
grams scheduled after 4:15 p.m. for the under-
graduate colleges and schools. Undergraduate de-
gree programs in business administration, commu-
ication, economics, English, history,
mathematics, philosophy, psychology, and sociology
are completely available in the evening. All ac-
ademic departments offer evening courses.

The dean of the school administers many aca-
demic policies for undergraduate evening stu-
dents. Evening class schedules are included in the
university's Schedule of Classes.

Bachelor of Individualized Study Degree Program (B.I.S.)
The B.I.S. degree program offers adult students
an alternative to traditional baccalaureate degree
programs. With the guidance of a faculty adviser,
students develop an interdisciplinary, individuali-
ized program of study that meets their academic
needs and interests. The program provides for the
liberal transfer of credits earned at accredited in-
itutions. It also recognizes that adults may have
acquired college-level learning through varied pro-
essional, service, and personal experiences, and
provides mechanisms by which to translate this
learning into academic credit.

The program is administered by the assistant dean
for Individualized Study Programs in the School of
Continuing and Alternative Learning. The
dean of the School of Continuing and Alternative
Learning is the academic dean for all students in
the program.

Eligibility
Applicants to the B.I.S. program must have com-
pleted high school at least eight years prior to ad-
mission and have accumulated at least 30 semester
hours of college credit with a minimum grade of
C. At least 15 of the 30 hours required for ad-
mision must have been earned through conventional
classroom instruction.

Application and Acceptance
Students who meet eligibility requirements may
complete an application to the B.I.S. program
after a counseling session with a B.I.S. counselor.
Appointments for counseling may be made by call-
ing (703) 323-2342. While a student may apply to
the B.I.S. program before applying to George
Mason University, the B.I.S. application is consid-
ered only after admission to the university. Accep-
tance into the program is conditional until the
student obtains a faculty adviser and has an ap-
proved educational contract on file. Although
staff members in the Office of Individualized
Study Programs can assist students in the process,
students are responsible for finding a faculty ad-
viser.

Acceptance decisions are based on assessment of
the individualized, nontraditional nature of the
course of study proposed by the applicant, the
availability of courses relevant to the proposed
course of study within the Consortium for Con-
tinuing Higher Education in Northern Virginia,
the availability of academic advisers in the field, the
GPA of the student, and the likelihood of the
student's benefiting from the proposed course of
study. In general, a nontraditional, individuali-
course of study is defined as one not offered
through a traditional department or academic unit
within the university.

Reapplication to the B.I.S. program is required of
students who have been inactive for two years or
more or who wish to change the concentration of
their individualized course of study.

Program Requirements
The student must complete a minimum of 120 se-
mester hours of course work. At least 45 semester
hours must be in upper-level courses (numbered
in the 300, 400, and 500 sequences), and at least 30
semester hours must be completed at George
Mason University or at other institutions of the
Consortium of Northern Virginia.

The following minimum general education re-
quirements must be completed: (1) 6 hours in En-
lish Composition (ENGL 100 or 101, 302, or
equivalent), (2) 6 hours of science or mathe-
matics, (3) 6 hours of humanities, and (4) 6 hours of
social or behavioral sciences.

In conjunction with an adviser from the full-time
faculty of the university, a student designs and
completes an individualized program of course
work relevant to his or her nontraditional educa-
tional interest. The study core constitutes the
student's "individualized major." The core is en-
tered on an educational contract that must be ap-
proved by the Assistant Dean for Individualized
Study Programs. The student is encouraged to obtain a faculty adviser and submit an educational contract as early as possible in the program. A minimum of 24 hours of course work must be completed after an approved contract is on file.

The individualized study core must include a minimum of 30 semester hours of credit, at least 12 of which must be upper-level course work. No more than 6 hours of D grades may be included in the core. Courses in the core may not be counted toward general education requirements. No reduction in hours to be completed is approved and no approval to take course work at other academic institutions is granted if a student with less than 45 hours remaining in the program does not have an approved contract.

In addition to the study core, the student must complete a final project (BIS 490), normally completed during the last semester of study. The type of final project varies according to the student's program. It may be a research paper, an internship, or a creative project, but it must be appropriate to the student's interests and needs. Three credits are given for successful completion of the project (C or better). A student who fails to earn at least a grade of C must re-enroll in BIS 490 and complete another project. A grade of IP (In Progress) may be awarded to allow students additional time to complete the project. The IP grade is automatically changed to F if the project is not completed by the end of the following semester. The student's academic adviser and two other faculty members (or other qualified professionals) constitute the evaluation committee for the project. One member of the committee is selected by the faculty adviser and one member is selected by the student, subject to approval of the adviser.

The following are examples of the types of individualized, nontraditional concentrations designed by B.I.S. students in conjunction with faculty advisers:

- American Folk Culture
- Art Therapy
- Aviation Administration
- Community Resources Program Development
- Computer Applications to Health Care
- Consumerism
- Corporate/Community Relations
- Economics of Politics
- Eighteenth Century Medicine
- Environmental Design
- Procurement and Grants
- Graphic Arts and Photography
- Health Care Program Administration
- Interpretive Naturalist
- Liturgical Music
- Medical Illustration
- Meteorology and Oceanography
- Museum Management
- Music Management
- Philosophy and Psychology of Sports
- Senior Citizen Communities
- Therapeutic Recreation in Gerontology
- Women's Studies
- Writing for Government

Credit for Nontraditional Modes of Learning

In addition to liberal acceptance of credit earned through traditional course work at accredited institutions, the university's B.I.S. degree allows a student to receive college credit for learning acquired through a variety of nontraditional methods.

A maximum of 12 credits for experiential learning demonstrated by a portfolio may be granted. Additional credit earned through CLEP, USAFI, DANTES, or course equivalency examinations offered by academic departments may also be earned. Credit for experiential learning granted by other institutions, however, may not be transferred unless prior approval for portfolio evaluation is granted by the assistant dean for Individualized Study Programs. Credit earned through correspondence courses, television courses, and other nontraditional modes certified by regionally accredited institutions of higher learning may be applied toward the degree. Completion of certain recognized certificate programs may also be granted credit. Course work taken through the military, government agencies, and some private corporations may be transferred if such course work is indexed and evaluated as college-level work by the American Council on Education.

B.I.S. Course Work at Consortium Institutions

George Mason University awards the B.I.S. degree as the senior institution of the Consortium for Continuing Higher Education in Northern Virginia. The members of the Northern Virginia Consortium are George Mason University (the host institution), Marymount University, Northern Virginia Community College, Strayer College (Northern Virginia campuses), the Northern Virginia Centers of the University of Virginia, and Virginia Polytechnic Institute and State University.

Courses completed at any consortium institution count toward the 30-semester-hour consortium requirement of the B.I.S. degree. In addition, fewer restrictions apply to the transfer of consortium

http://catalog.gmu.edu
credits into the B.I.S. program than into traditional programs.
Although prior written permission must be obtained from the dean of the School of Continuing and Alternative Learning for B.I.S. students to take courses at other institutions, the B.I.S. program allows full use of the education resources of the consortium in work toward the B.I.S. degree.

Other Programs
Certificate Programs in Gerontology
The School of Continuing and Alternative Learning administers graduate and undergraduate certificate programs in gerontology. See the Certificates, Interdisciplinary Minors, and University Courses section of this catalog for details about the undergraduate certificate program and the Graduate Catalog for details about the graduate certificate program.

SCAL Credit Instruction
SCAL supports credit instruction in a variety of disciplines, including communication, history, English, mathematical sciences, education, and public affairs. The school administers more than 80 courses in 15 disciplines.

In addition to supporting traditional academic courses, SCAL works with university faculty to develop and offer evening and weekend courses using nontraditional instructional methods and alternative scheduling options to meet the learning needs of adult students.

The undergraduate and graduate courses are approved by the appropriate college or school in the university and are fully applicable as credit toward the appropriate degree at George Mason. Most of these courses are taught by full-time faculty members of the university.

Enrollment and registration procedures and offices for these courses are the same as those for other on-campus courses.

Employee Development Institute
Contract Courses
The university offers specialized courses designed to meet the specific needs of a business, government agency, or school system on campus, at the work site of the client, or at a designated location. These contract courses are approved by the appropriate college or school of the university. They are taught by faculty members or recognized authorities.

Contract courses are offered for credit or may be offered on a noncredit basis specifically designed for a particular audience. The students may receive Continuing Education Units (CEUs) or some other recognition of achievement that may apply toward professional certification. The major topical areas have been Management Information Systems, Technical Project Management, Proposal Writing, Logistics Management, Purchasing, Performance Appraisal, Production and Inventory Control, Expert Systems, and Communications. For more information, contact the Director of Regional Academic Services, School of Continuing and Alternative Learning.

Professional Awareness Programs
The School of Continuing and Alternative Learning Professional Awareness Programs provide quality training and education to professional managers and potential executives who are moving into positions requiring broad managerial or technical talent. Programs are usually conducted at the Professional Center at the Arlington Campus, and are open to the public. However, programs can be arranged on site at the organization or elsewhere in the Washington metropolitan area, if requested. Program offerings are reasonably priced and conveniently designed to avoid taking participants away from their jobs for substantial lengths of time.

Contact the Director of Regional Academic Services for information pertaining to offerings.

Inservice Education
The School of Continuing and Alternative Learning delivers innovative inservice education courses that provide professional development for the teaching and administrative staffs of Northern Virginia school divisions. Many of these courses involve innovative schedules and formats. They address specific needs in areas such as computers and technology, substance abuse, learning styles, and the teaching of writing.

Inservice courses, which are authorized and approved by university academic departments, may be applied to degree programs with adviser approval. Instructors are both adjunct and full-time university faculty members. For more information, contact the director of Inservice Education in
the School of Continuing and Alternative Learning.

Nursing Continuing Education
The School of Nursing, in cooperation with the university's School of Continuing and Alternative Learning, offers opportunities for credit and non-credit courses of interest to nurses and health care providers. When planning and presenting continuing education programs, the School of Nursing uses the wealth of available resources in Northern Virginia and the Washington metropolitan area.

Comments and suggestions for programming from the health care community are welcomed. One may be placed on the mailing list to receive notice of specific activities scheduled throughout the academic year by contacting either the School of Continuing and Alternative Learning or the School of Nursing.

Conferences and Community Services
The Office of Conferences and Community Services focuses on community education and service programs such as conferences, workshops, seminars, institutes, and short courses, which may be either sponsored or cosponsored by the university. The office directs and assists with the planning of conferences, workshops, seminars, and summer residential programs. It also assists faculty members in sponsoring conferences, workshops, and seminars to promote continuing education in their professions.
Certificates, Interdisciplinary Minors, and University Courses
Certificates, Interdisciplinary Minors, and University Courses

Certificate Programs

The Faculty Senate, acting on advice from the Committee on University Curriculum Matters, has established guidelines for the offering of certificate programs by the various units of the university. These programs are special sequences of credit study for which participants receive certificates upon completion of the programs. Certificate programs are not meant as substitutes for degree programs. Rather, they are designed for individuals who already hold degrees and are greatly interested in the fields in which these certificates are offered.

Each of the colleges and schools of the university may devise certificate programs, following university guidelines.

The following certificate programs are open to undergraduate and postbaccalaureate students. Completion of these programs requires the possession of a bachelor's degree either previously or simultaneously awarded. Additional certificate programs at the graduate level are described in the Graduate Catalog.

Certificate Program in Applied Archaeology

The certificate program in applied archaeology provides basic knowledge, skills, and practical experience to students who want to learn more about archaeology as a public and business concern. The program is open to students from all disciplines but should be particularly useful to those majoring in history, geology, geography, American studies, and similar disciplines allied with anthropology, and those who may be seeking employment in the fields of cultural resource management, contract archaeology, public archaeology, and museums. Individuals who wish to enter the certificate program should contact Dr. Ann M. Palkovich, Anthropology Program.

Program Requirements

The certificate program in applied archaeology consists of 24 semester hours of anthropology courses beyond the introductory level (ANTH 120). Students receiving the certificate must hold a baccalaureate degree or be receiving a baccalaureate degree from George Mason University at the time they receive the certificate. Only those courses with grades of C or better will be counted toward the certificate program.

The 24 semester hours include:

1. 15 semester hours of core courses:
   - ANTH 425 Public Archaeology
   - ANTH 430 Research Methods in Archaeology
   - SOCI 221 Statistics for the Behavioral Sciences
   - SOCI 305 Analysis of Social Data
   - ENGL 302 Advanced Composition
   - ANTH 220 Field School in Archaeology
   - ANTH 325 Field Methods in Archaeology

2. 6 semester hours of electives selected from the following:
   - ANTH 301 Native North Americans
   - ANTH 300 Civilizations
   - ANTH 305 Hunter-Gatherer Societies
   - ANTH 320 Lab Techniques in Archaeology
   - ANTH 322 Historical Archaeology
   - ANTH 370 Ecology and Culture
   - ANTH 375 Anthropological Perspectives on History
   - ANTH 420 Interpretation in Archaeology

Selected courses in allied disciplines may also be applied as elective hours (e.g., AMST 320, BIOL 371, GEOG 310, GEOL 304, HIST 300) with the approval of the certificate program adviser.

3. ANTH 495 Internship.

   The internship is arranged by the student in consultation with the certificate program director. It offers the student an opportunity to gain practical experience in public/contract archaeology. A minimum of 10 hours per week for a semester (150 hours) are to be devoted to the internship project. Students must complete ANTH 425, ANTH 220 or ANTH 325, and ANTH 430 before enrolling in the internship.

http://catalog.gmu.edu
Certificate Program in Canadian Studies

This certificate program is interdisciplinary and emphasizes the combined English and French cultures that give Canada its unique flavor and cause many of its most enduring social problems. Individuals going into careers in business, politics, or any of the public professions (law, public administration, communications, etc.) will benefit greatly from the knowledge gained in completing the program. In many cases it increases the individual's potential for employment and promotion within his or her chosen career.

Those interested in the program can obtain information from any of the faculty members involved in the program. The coordinator of the program is Harold F. Gortner (Department of Public Affairs).

Program Requirements

The certificate program in Canadian Studies consists of 24 semester hours of courses taken within a number of departments throughout the university. Students receiving the certificate must hold a baccalaureate degree or be receiving one from George Mason University at the time they receive the certificate. Only those courses with grades of C or better will be counted toward the certificate program. The requirements of the program are as follows:

1. CAST 300 Introduction to Canada
2. Three courses from among the five listed below:
   - ANTH 399 Issues in Anthropology: Native Canadian Ethnology and History
   - ENGL 360/FREN 480 Special Topics in Literature: Canadian/Quebec Literature
   - GEOG 335 Geography of Canada
   - GOVT 335 Government and Politics of Canada
   - HIST 379 History of Canada
3. Four elective courses chosen from an approved list, including any from the list above that are not counted toward the distributive core.
   - Courses chosen must be approved by the coordinator of the Canadian Studies Program. No more than two courses may be chosen from any discipline. Current courses available to use as electives include:
     - AMST 401 Themes in American Civilization*
     - ANTH 201 Native North America
     - ENGL 439 Special Topics: Non-British or American Literature*
     - ENGL 449 Special Topics in Drama*
     - ENGL 468 Special Topics in Poetry*
     - ENGL 490 Special Topics in Film*
     - FREN 202 Intermediate French (its equivalent, or any 300-level French language course)
     - FREN 452 French-Canadian Literature (taught in French)
     - FREN 481 Special Topics*
     - GEOG 420 Physiography of North America
     - GOVT 490 Seminar*
     - HIST 420 Topics in Twentieth Century U.S. Diplomacy*
   *Courses approved for the Canadian Studies certificate program, by the coordinator, based upon the content of the course. Other courses will be considered when the content is appropriate.

Certificate Program in Cartography

The certificate program in cartography provides specialized training in technical skills needed for advanced map design and production. Students learn aerial photograph interpretation and photogrammetry in addition to both computer-aided and photomechanical methods of map making. Students also gain a thorough knowledge of cartographic theory. We welcome students from all disciplines who are interested in specializing in cartography. The program may be especially useful for those in the natural and social sciences who wish technical training before possible employment in the many private sector mapping firms and government mapping agencies in the Washington, D.C., metropolitan area.

Inquiries should be directed to Prof. Robert Rundstrom, Geography Program.

Program Requirements

The certificate program in cartography requires completion of 26 semester hours. Students receiving the certificate must hold a baccalaureate degree or be receiving a baccalaureate degree from George Mason University at the time they receive the certificate. Only courses with grades of C or better are counted toward the certificate program.

No more than 12 hours may be completed at the 100 level. At least 12 hours must be completed at the 300-400 level. A maximum of six hours may be transferred from another institution, with the approval of the certificate program adviser.

The 26 hours required in the certificate program must include the following 17 hours of courses:

1. GEOG 310, 311, 411, 412, and 416.
2. 9 hours of electives approved by the certificate program adviser prior to enrollment. An effort is made to tailor electives to individual needs. Consult the certificate program adviser for a list of possible courses.

Certificate Program in Earth Science Teaching

The Department of Geology offers a certificate in earth science teaching for students who wish to become secondary school teachers of earth science in Virginia. This program is open to students ma-
joring in any science, but is designed primarily for geology majors. The certificate program consists of 31-32 semester hours, which, in conjunction with a college degree in science, makes a potential teacher eligible for a Provisional Certificate (good for two years) to teach earth science.

A Collegiate Professional Certificate (good for five years, renewable) follows the Provisional Certificate and may be obtained later by passing the National Teacher Examination, by demonstrating competency during the two years of Provisional Certificate teaching, and by accumulating at least 9 semester hours of education courses in the areas of human growth and development, foundations of education, and curriculum and development (at least one course in each area is required). Students who wish to obtain a certificate in earth science teaching must hold a baccalaureate degree or be receiving a baccalaureate degree at the time they receive the certificate.

The semester-hour requirement includes a year of introductory geology (GEOL 101-102) plus the following courses:

- **ASTR 103 Astronomy (3:3:0)**
- **CHEM 211-212 General Chemistry (4:3:3)**
- **BIOL 113 Biological Science (4:3:3)**
- **or BIOL 151 Introduction to Biology (4:3:3)**
- **GEOG 309 Introduction to Meteorology and Climate (3:3:0)**
- **GEOL 309 Introduction to Oceanography (3:3:0)**
- **MATH 113 Analytical Geometry and Calculus (4:4:0)**
- **PHYS 201 Energy and Environment (3:3:0)**
- **or PHYS 250 University Physics (4:3:1)**
- **or PHYS 343 College Physics (3:3:0)**
- **EDCI 573 Teaching Science in the Secondary School (3:3:0)**

### Certificate Program in Environmental Management

The certificate program in environmental management is designed primarily for students who may be seeking employment in the field or intending to pursue graduate studies, and who wish to add an applied environmental component to their training. Inquiries should be directed to Francis Heliotis, Department of Biology, 323-2181.

#### Program Requirements

The certificate program in environmental management consists of 27 semester hours of courses. Students receiving the certificate must hold a baccalaureate degree or be receiving a baccalaureate degree from the university at the time they receive the certificate. Students are required to complete a two-semester laboratory science sequence in biology, chemistry, or geology. Only courses with a grade of C or better are counted toward the certificate program.

Students select 27 hours of course work with the help of the certificate coordinator. The courses are divided into five categories. Courses listed in more than one category can only satisfy the requirements of one. Any substitution from the following list requires permission from the certificate coordinator.

1. **Environmental Certificate Core (4 courses):**
   - BIOL 377
   - One course from GEOG 303, GECA 503
   - One course from ECON 103, GOVT 241, GOVT 357
   - One course in statistics

2. **Physical Perspective (1 or 2 courses):**
   - BIOL 309; GEOG 102, 309, 430; GEOL 106, 204, 313, 314, 403, 405
   - One course in statistics

3. **Biological Perspective (1 or 2 courses):**
   - BIOL 307, 309, 344, 345, 371, 440, 446, 449, 471, 513, 526, 532, 543, 546, 549; HEAL 450

4. **Social Perspective (1 course):**
   - ANTH 305, 365, 370; ECON 350, 360; GEOG 301, 304, 305, 306, 307, 316, 325; GOVT 318, 357, 401, 463, 536; MGMT 312; PHIL 555; PRLS 300; SOCI 306

5. **Environmental Methods (1 course):**
   - GEOG 310, 411, 412, 413, 416; GECA 579; DESC 301

### Notes

1. **Biology majors** are required to complete 2 courses in Physical Perspective.
2. **Geology and Geography** majors are required to complete 2 courses in Biological Perspective.
3. All other majors may choose either Physical or Biological Perspective for 2 courses.
4. Development of proficiency in computer programming is highly recommended for certificate students.

### Certificate Program in Geochemistry

The Department of Geology offers a certificate in geochemistry for students who wish to pursue a career that combines geology and chemistry. Professional geochemists study the geological and chemical processes at work in nature in areas such as crystal chemistry, nuclear chemistry, thermodynamics, aqueous chemistry, and oceanic chemistry. Geochemists are employed in private, state, and federal agencies; in basic research; and in developmental and environmental research.

Students who wish to obtain a certificate in geochemistry must hold a baccalaureate degree or be
receiving one at the time they receive the certificate. The course requirements include a year of introductory geology (GEOL 101-102), a year of introductory chemistry (CHEM 211-212), plus 12 semester hours of geology courses related to geochemistry (Group A below) and 12 semester hours of chemistry courses related to geochemistry (Group B below). Students should consult with the geochemistry certification specialist before pursuing a certificate in geochemistry. The appropriate courses are as follows (alternate courses may be approved by the geochemistry certification specialist):

**Group A.** Geology courses—at least one course from each group, for a total of at least 12 credit hours
1. Mineralogy—GEOL 201, 305
2. Petrology—GEOL 207, 401
3. Geochemistry—GEOL 403, 404

**Group B.** Chemistry Courses—at least two courses from each group for a total of at least 12 credit hours
1. Analytical and Physical Chemistry—CHEM 321, 331, 335, 336, 422
2. Inorganic and Organic Chemistry—CHEM 313, 314, 315, 318, 341, 441, 445

**Certificate Program in Geoscience Programming**
Geoscience programming uses modern computer technology to understand and to solve geology-related problems in areas such as resource analysis, environmental assessment and remedial response policy, engineering geology, and cartographic interpretation. The Department of Geology offers a certificate in geoscience programming that, in conjunction with a baccalaureate degree in geology, prepares the student for a career in public and private agencies that gather and interpret geoscience data. Students who wish to obtain a certificate in geoscience programming must hold a baccalaureate degree or be receiving a baccalaureate degree at the time they receive the certificate. The course requirements include the following:

- CS 103 Introduction to Computing (3:3:0)
- CS 161 Introduction to Programming Language (1:1:0)
- CS 262 Introduction to Computer Statistical Packages (3:3:0)
- GEOG 310 Cartography I (4:3:2)
- GEOG 311 Cartography II (4:3:2)
- GEOG 411 Introduction to Computer Cartography (3:3:0)
- GEOL 316 Computers and Geology (3:3:0)
- MATH 113 Analytical Geometry and Calculus I (4:4:0)
- STAT 250 Introductory Statistics (3:3:0)

**Certificate Program in Gerontology**
The undergraduate certificate program in gerontology trains students for work with older adults, as well as professionals who are already working with the elderly. The program provides a background of basic knowledge in gerontology and then permits the student to train in professional skills in areas such as counseling, recreation, social services, nursing, and administration.

The certificate program in gerontology is administered by the Office of Individualized Study Programs in the School of Continuing and Alternative Learning. Six academic units participate in the program: College of Education and Human Services; School of Nursing; Department of Health, Sport, and Leisure Studies; Department of Psychology; Department of Social Work; and Department of Sociology and Anthropology. A Gerontology Certificate Committee determines program policy and curriculum. Counseling and an application form are available from the Office of Individualized Study Programs.

**Program Requirements**
The certificate program in gerontology consists of 24 semester hours of courses. Students receiving the certificate must either hold a baccalaureate degree or have earned one from George Mason University by the time they receive the certificate. Prerequisites are 8 hours of biology, anatomy, or physiology, or 3 hours of psychology or sociology.

The 24 semester hours are divided as follows:

1. A minimum of 12 semester hours selected from NURS 480, NURS 569, PRLS 415, PSYC 415, and SOCI 441
2. 6 semester hours in a practicum in gerontology: PSYC 548, 549 (Students must have completed at least 9 credits of core courses before enrolling in the practicum.)
3. 6 hours of electives selected from EDUC 510; HEAL 220; NURS 250, 495; PRLS 210, 310, 320, 400, 425; PSYC 325, 326, 420, 423; PUAD 502, 503; SOCI 350, 390, 599; SOCW 300, 351, 352; Reading and Research in Gerontology from any department

A student must have received satisfactory grades in all courses presented toward the certificate with no more than 6 hours of D grades.

http://catalog.gmu.edu

The Department of Operations Research and Applied Statistics offers two certificate programs to students enrolled in the computer science undergraduate degree program. The certificates augment the computer science curriculum with material on the computational aspects of operations research and statistics. Since the demand for people trained in the computational aspects of operations research and statistics is great in the Washington, D.C., area, these programs expand the career options available to students.

Inquiries should be directed to the Operations Research and Applied Statistics Department. Students who plan to work toward one of these certificates should seek advising from the department.

Course Requirements

Core courses for both certificates:

- STAT 344, STAT 381, OR 435, and OR 442

Additional courses for operations research certificate:

- OR 441, OR 451, and two chosen from STAT 354, STAT 363, and STAT 382

Additional courses for statistics certificate:

- STAT 354, STAT 362, and two chosen from STAT 363, STAT 382, STAT 455, and STAT 457

Certificate Program for Psychology Technicians

The psychology technician program provides the theoretical background and behavioral skills necessary for successful performance at the paraprofessional or introductory level in many human service settings and agencies. Completion of this program increases the graduate's ability to perform in settings such as group homes, sheltered workshops, and activity centers for emotionally disturbed children and adults; training centers for mentally retarded persons; adolescent treatment programs; and residential facilities for juvenile offenders and the aged. Inquiries should be directed to Carol Erdwins, Department of Psychology.

The psychology technician program is open to persons who are majoring in or have previously completed a B.A. or B.S. degree in psychology, sociology, social work, nursing or B.I.S. majors with a psychology-related focus. Application to the program may be made at any time during the academic year after the student's completion of PSYC 325 and 326 and preferably prior to beginning the two-semester practicum (PSYC 421, 422). Students ready to begin the practicum should contact Carol Erdwins prior to registration so that their names may be included for evaluation by a clinical review committee. Admission to the practicum is based on the student's demonstration of sound interpersonal skills as well as successful completion of prior course work.

Program Requirements

The program consists of 24 semester hours in psychology beyond the introductory-level course (PSYC 100, which is a prerequisite to all other courses), including:

1. PSYC 220, 325, 326, 322, 421, and 422
2. One of PSYC 211, 313, 314, or 415
3. One of PSYC 320, 321, 330, 414, or 423

Some courses are prerequisites to others and need to be taken in sequence. Specifically, PSYC 325 is a prerequisite to PSYC 326 and 414, and both PSYC 325 and 326 must be completed before beginning the practicum (PSYC 421, 422). This practicum is ordinarily taken during the student's senior year; it offers the student an opportunity to gain work experience under supervision in a variety of human service agencies. The work placement is for approximately 8 to 10 hours per week with a minimum of 240 hours during the two semesters.

Completion of the Program

The psychology technician certificate is awarded upon completion of the 24 semester hours listed above with no more than two unsatisfactory grades (D) and a minimum grade of B in each semester of the practicum. The certificate is awarded after completion of and in conjunction with the baccalaureate degree unless the student has previously completed this degree with a major in one of the five specified disciplines.

Course Work

Descriptions of all courses indicated in the above requirements are listed in the Course Descriptions section of this catalog.

Certificate Program in Real Estate and Urban Development

The certificate program in real estate and urban development allows students to enrich their understanding of the areas of study associated with urban planning, land development, real estate brokerage, law, finance, appraisal, investment, and management.

The certificate program consists of 24 semester hours of courses. It is primarily for students who have earned a baccalaureate degree in another dis-
ipline but plan to make a career in real estate and want additional recognition for their academic pursuits.

Individuals who wish to enter the certificate program may obtain an application from the Finance Department of the School of Business Administration.

**Foundation Courses**

Students must earn credit for the foundation courses listed below before enrolling for the five required courses. Concurrent registration is permissible for FNAN 301 and FNAN 351. Students should carefully examine prerequisites for all courses. Those who register for courses without having the stated prerequisites will have those courses cancelled.

- **ACCT 201** Financial Accounting
- **ACCT 202** Managerial Accounting
- **ECON 103** Contemporary Economic Principles I
- **ECON 104** Contemporary Economic Principles II
- **DESC 200** Statistical Analysis I
- **DESC 202** Statistical Analysis II
- **BULE 301** The Legal Environment of Business
- **FNAN 301** Financial Management

**Required Courses**

- **FNAN 351** Principles of Real Estate
- **FNAN 304** Real Estate Law (same as BULE 304)
- **FNAN 451** Real Estate Finance
- **FNAN 452** Real Estate Appraisal
- **FNAN 453** Real Estate Investment

**Elective Courses**

After completing the five required courses, a student can select either the Finance Option or the Information System Option.

**Finance Option**

Select any three of the following courses:

- **FNAN 311** Principles of Investment
- **FNAN 321** Financial Institutions
- **FNAN 411** Investment Analysis and Portfolio Management
- **FNAN 421** Money and Capital Markets

**Information Systems Option**

Select any three of the following four courses:

- **DESC 301** Decision Models in Business and Operations Management
- **IRM 403** Computer Systems Analysis and Design
- **IRM 410** Managerial Applications of Microcomputers
- **IRM 411** Management Information Systems

Students selecting the information systems option are required to have credit for the following courses, or their equivalents, before completing any courses in the information systems option:

- **MATH 108** Introductory Calculus with Business Applications
- **CS 161** Introduction to Programming
- **IRM 201** An Introduction to Computer-Based Management Information Systems

Only courses with grades of C or better are counted toward a certificate. Up to six hours of courses may be transferred from another institution as substitutes for the required or elective courses.

**Certificate Program in Translation**

The certificate program in translation provides professional training for students who wish to acquire proficiency in a specific language combination, either English-French or English-Spanish. Because of the interdisciplinary nature of translation, the program combines theoretical and applied course work in the departments of Foreign Languages and Literatures, English, and Communication.

Students applying to the program must be admitted to a George Mason University degree program or already hold a bachelor's degree and be admitted to the Graduate School in nondegree status. Acceptance into the program is based partly on a proficiency examination in English and one other language.

The certificate may be pursued concurrently with any of several degree programs offered through the Department of Foreign Languages and Literatures. Part of the work toward the certificate may be applicable toward degrees in other departments.

Students enrolled in degree programs outside the Department of Foreign Languages and Literatures who wish to work toward the certificate in translation must apply to the Department of Foreign Languages and Literatures for admission into the certificate program.

**Certificate Requirements**

Required core courses (12 credits):

- **ENGL 410** Technical and Report Writing (3)
- **COMM 505** Intercultural Communication (3)
- **FRLN 525** Literary Translation (3)
- **FRLN 565** Theory of Translation (3)

Language courses (9 credits):

- **FREN 357** Introduction to Translation (3)
- **FREN 576** Advanced Translation (3)
FREN 580 Contemporary French Culture and Society (3)

or

SPAN 359 Introduction to Translation (3)

SPAN 576 Advanced Translation (3)

SPAN 580 Contemporary Hispanic Institutions (3)

Required practical experience (3 credits):

FRLN 590 Internship and Seminar (3)

A translation project is required for completion of the program.

---

Interdisciplinary Minors

Linguistics

Linguistics is defined as the scientific study of language. But language is studied in a variety of ways: descriptively, theoretically, computationally, psychologically, as a social phenomenon, and so on. The field of linguistics thus informs and is informed by many other areas of study, including philosophy, psychology, sociology, computer science, the study of individual languages and literatures, literary studies, and education.

The minor in linguistics may be combined with a major in one of the areas listed above or in any other field. This minor introduces the student, through the required courses, to the fundamental concepts of modern linguistic theory and allows the student to explore, in the electives, how these concepts relate to various other disciplines.

Faculty

Droome, Chamberlain, Chu, Collier, Goldin, Golomb, Hamburger, Holisky (Coordinator), Jacob, Jones, Levine, Rothbart, Sanford, Weinberger

Requirements for a Minor in Linguistics

The minor in linguistics consists of 15 credit hours, distributed as follows:

1. 3 hours in general linguistics
2. 6 hours from syntactic theory, phonological theory, or linguistic semantics
3. 6 hours of electives, chosen in consultation with an adviser from the list below:

   ANTH 380 Anthropological Linguistics
   COMM 305 Foundations of Intercultural Communication
   COMM 306 Issues in Intercultural Communication
   CS 480 Introduction to Artificial Intelligence
   EDUC 532 Bilingualism and Language Acquisition Research
   EDCI 517 Introduction to Bilingual Education
   EDCI 518 Introduction to Multicultural Education
   EDCI 519 Methods of Teaching in Bilingual/ESL Settings
   ENGL 507 Internship in Applied Linguistics
   ENGL 521 Applied Linguistics: Teaching ESL
   ENGL 522 Modern English Grammar
   ENGL 581 Psycholinguistics
   ENGL 582 Applied Linguistics: Second Language Acquisition
   FREN 355 Phonetics and Oral Expression
   FREN 461 Linguistic Structure of Modern French
   FREN 560 History of the French Language
   FREN 561 Old French
   FREN 571 Applied French Linguistics
   FREN 575 Grammatical Analysis
   GERM 420 Linguistics of Modern German
   GERM 560 History of the German Language
   SPAN 420 Studies in Spanish Linguistics
   SPAN 500 History of the Spanish Language
   SPAN 501 Applied Spanish Grammar
   SPAN 502 Hispanic Sociolinguistics
   SPAN 505 Applied Spanish Stylistics
   SPAN 551 Special Topics In Spanish (when topic is linguistics)
   SPAN 576 Advanced Translation
   PHIL 332 Twentieth-Century Analytic Philosophy
   SOCI 414 Sociology of Language

Urban and Suburban Studies

Faculty

Diner, Fonseca, Gifford, Hart-Nibbrig, Haynes, Horton, Hysom, Mattusch, Rosenzweig, Ryan, Travis, Wood (Coordinator)

Course Work

The Urban and Suburban Studies faculty offers all course work designated USST in the Course Descriptions section of this catalog.

Requirements for the Minor in Urban and Suburban Studies

The minor in urban and suburban studies requires a minimum of 18 hours of related course work, including two required courses, USST 301 and 401, and a selection of additional courses from the list below.

Approved Courses

(Students should consult the Course Descriptions in this catalog for course prerequisites.)

Department of Art and Art History: ARTH 315
Department of Economics: ECON 350
Department of History: HIST 416, 417, 418

http://catalog.gmu.edu
Department of Public Affairs: GEOG 306, 406, 430; GOVT 309, 402; USST 390, 490
Department of Sociology and Anthropology: SOCI 332, 373
School of Business Administration: BULE 304, FNAN 351
School of Information Technology and Engineering: USE 300

Additionally, departmental-directed reading courses may be approved for USST credit at the discretion of the USST Coordinating Committee.

For more information contact Joseph S. Wood, coordinator of Urban and Suburban Studies, Geography Program.

Women's Studies (Pending Approval)

Faculty
Bergoffen (Philosophy and Religion), Brady (English), Brogan (English), Brown (English), J. T. Censer (History), Copelman (History), Cordero (Foreign Languages and Literatures), DeCosta-Willis (Foreign Languages and Literatures), Dienemann (Nursing), Foreman (English), Francescato (Foreign Languages and Literatures), Fuchs (English), Grewal (English), Hodges (English), Horton (Sociology and Anthropology), Irvine (English), Kaplan (English), Lewis (Foreign Languages and Literatures), Lont (Communication), Looney (Communication), Melosh (English), Rader (Sociology and Anthropology), Raskin (Social Work), Ricouart (Foreign Languages and Literatures), Rosenblum (Sociology and Anthropology) (Coordinator), Rosenzweig (History), Mobley (English), Sypher (English), Taylor (Communication), Todd (Art History), Travis (Public Affairs), Yocom (English)

Course Work
The Women's Studies faculty offers all course work designated WMST in the Course Descriptions section of this catalog.

Requirements for the Minor in Women's Studies
1. 9 hours in Women's Studies seminars: WMST 200, WMST 300, and WMST 330.
2. 12 hours selected from Women's Studies approved course offerings in other departments. No more than 6 of these hours may be taken in any one department.

University Courses

Committee on University Curriculum Matters
Guy O. Beale, Stephen J. Brown (Chair), Jeffrey T. Chamberlain, John M. Smith, Mary Trainor

Courses
University Courses are special academic offerings that are interdisciplinary, in-depth presentations of broad interest. Proposals for university courses are developed by faculty members, usually by several acting together. After review and approval by the University Faculty Standing Committee on Curriculum Matters, these courses are administered by the Office of the Provost. University courses at the 400 level are usually offered only once and, unless specific prerequisites are indicated, are open to all students.

The following are regularly offered University Courses:

UNIV 190 Freshman Seminar (3)
UNIV 290 Sophomore Seminar (3)
UNIV 301 Great Ideas in Science (3)

Previously offered University Courses include:

UNIV 407 Introduction to Irish Studies (3)
UNIV 410 Assassination and Terrorism as Political Weapons (3)
UNIV 411 Electronic Communication (Television) and the Representation of Reality (3)
UNIV 412 Family Law (3)
UNIV 413 Life in the Universe (3)
UNIV 414 Feminist Perspectives on Sexual Liberation (3)
UNIV 415 The New Deal: Its Impact on American Society, 1933-1980 (3)
UNIV 416 Intelligence in the Universe (3)
UNIV 417 Energy Alternatives for the Eighties (3)
UNIV 418 Corporate-Government Relations in the International Environment (3)
UNIV 420 Nuclear War (3)
UNIV 421 Archaeoastronomy (3)
UNIV 422 Popular Movements and Active Nonviolence in the U.S. (3)
UNIV 423 Consciousness and Modern Physics (3)
UNIV 424 South Africa: Crisis and Conflict (3)
UNIV 425 Utopias and Utopian Thought in the Western World (3)
UNIV 426 Human Allegiances and Modernization (3)
UNIV 427 Understanding Modern Japan: Its Social, Economic, and Political Characteristics and Interactions (3)
UNIV 428 Understanding the Brain (3)
UNIV 429 Security in the Nuclear Age (3)

Course Work
The Women's Studies faculty offers all course work designated WMST in the Course Descriptions section of this catalog.

Glossary

This section lists undergraduate and graduate courses offered by the university and available for credit to undergraduates. Courses are listed in alphabetical order beginning with Accounting and ending with Women's Studies. The computer name for courses is included with each heading, and the department offering the course is listed below. The following computer names are used:

- Accounting: ACCT
- American Studies: AMST
- Anthropology: ANTH
- Arabic: ARAB
- Art History: ARTH
- Art Studio: ARTS
- Asian Studies: ASST
- Astronomy: ASTR
- Bachelor of Individualized Study: BIS
- Biology: BIOL
- Business Legal Studies: BULE
- Canadian Studies: CAST
- Cartography: GECA
- Chemistry: CHEM
- Chinese: CHIN
- Classics: CLAS
- Communication: COMM
- Comparative Literature: CL
- Computer Science: CS
- Dance: DANC
- Decision Sciences: DESC
- Economics: ECON
- Education: EDUC
- Education: Administration/Supervision: EDAS
- Education: Elementary/Secondary: EDCI
- Education: Human Resource Development: EDHR
- Education: Research: EDRS
- Education: Reading: EDRD
- Education: Special Education: EDSE
- Electrical and Computer Engineering: ECE
- Engineering: ENGR
- English: ENGL
- European Studies: EUST
- Finance: FNAN
- Foreign Language: FRLN
- French: FREN
- Geographic and Cartographic Sciences: GECA
- Geography: GEOG
- Geology: GEOL
- German: GERM
- Government and Politics: GOVT
- Greek: GREE
- Health Education: HEAL
- Hebrew: HEBR
- History: HIST
- Information Resource Management: IRM
- Information Systems: INFS
- Italian: ITAL
- Japanese: JAPA
- Korean: KORE
- Latin: LATN
- Latin American Studies: LAS
- Management: MGMT
- Marketing: MKTG
- Mathematics: MATH
- Medical Technology: MTCH
- Middle East Studies: MEST
- Music: MUSI
- Nursing: NURS
- Operations Research: OR
- Parks, Recreation, and Leisure Studies: PRLS
- Philosophy: PHIL

Course Numbering

General
1. Course titles are followed by numbers in parentheses (0:0:0), separated by colons. The numbers have the following significance:
   First number: semester credit hours for the course
   Second number: hours of lecture/seminar per week for the course
   Third number: hours of laboratory/studio per week for the course
2. For independent study, reading, topics, or similar courses, individual instructors set hours.

Undergraduate
1. Courses numbered 499 and below are undergraduate courses. Course numbers in the 100 series are customarily taken by freshmen, the 200 series by sophomores, the 300 series by juniors, and the 400 series by seniors.
2. The number designations of the course descriptions below have the following significance:
   a. A single number (as HIST 301) indicates that the course is complete within a single semester, and that the semester course may be taken separately with credit toward a degree.
   b. A double number separated by a hyphen (as CHEM 103-104) indicates that the course extends through two semesters, that both semesters must be completed before the course may count toward a degree, and that the first semester is prerequisite to the second semester. Students may not take the second semester of a hyphenated course unless they have received either transfer credit for the equivalent of the first semester or advanced placement from the department concerned.
   c. A double number separated by a comma indicates that the subject matter or content of the course extends through two semesters but that either semester may be taken by itself. Unless otherwise specified, the first semester is not prerequisite to the second semester.
3. Advanced undergraduate students who have secured the permission of the department offering the course may select from courses numbered 500-599 to accumulate the hours necessary to complete an undergraduate degree. With the written permission of the dean of the Graduate School, they may take these courses for reserve graduate credit.

Courses

School of Business Administration

If a student takes noncore, upper-level business administration courses prior to acceptance to the School of Business Administration, those courses will not count on an undergraduate degree application for any major in the school (except as general elective credit). A grade of C or higher must be presented on the graduation application for each upper-level course in the major.

202 Managerial Accounting (3:3:0). Prerequisite: Grade of C or better in ACCT 201. Survey of managerial accounting. Manufacturing cost systems, budgets, and cost-volume-profit analysis are introduced. Special attention is directed to the use of accounting information in managerial decision making.

311 Cost Accounting (3:3:0). Prerequisite: ACCT 202. Topics include accumulation allocation, analysis, and reporting of internal financial data. Discussion of the use of cost information in inventory valuation, income determination, planning, controlling, and decision making.

312 Accounting Information Systems (3:3:0). Prerequisite: ACCT 311 and IRM 201. Examination of techniques for analysis and design of systems that provide accounting and financial data for both internal and external users. Emphasis is on the accountant's role in systems development and control.

332 Intermediate Accounting II (3:3:0). Prerequisite: ACCT 331. Continuation of ACCT 331.

351 Federal Taxation (3:3:0). Prerequisite: ACCT 202. Introduction to federal income taxation of individuals. Examination of tax laws and procedures through the use of illustrative examples and problems.

461 Auditing (3:3:0). Prerequisite: ACCT 312, ACCT 332, and DESC 202. Introduction to the public accounting profession with emphasis on the attest function and auditor’s report. Includes an examination of auditing standards and procedures, the impact of internal controls, professional ethics and responsibilities, and an introduction to statistical auditing and the audit of computerized accounting systems.

471 Governmental and Nonprofit Accounting (3:3:0). Prerequisite: ACCT 332. Introduction to the theory and practice of accounting and financial reporting for governmental and nonprofit organizations, including federal, state, and local governments, colleges and universities, hospitals, voluntary health and welfare agencies, and other nonprofit entities.

491 Accounting Seminar (3:3:0). Prerequisite: 84 hours and ACCT 332. Discussion of selected current topics in the theory and practice of accounting and auditing.

492 Field Experience in Accounting (3:3:0). Prerequisite: Senior standing. Faculty-governed field experience in a Northern Virginia business. Teams of students, matched with client firms through the Entrepreneurship Center, propose action plans relating to a major problem or opportunity faced by the company.

499 Independent Study (1-3:0:0). Prerequisite: 9 hours in upper-level accounting courses. Research and analysis of selected problems or topics in accounting. Must be arranged with an instructor and student must receive written approval of chair before registration. Written report required. May be repeated to a maximum of six hours if topics vary.

American Studies (AMST)

American Studies

101 Introduction to the American News Media (3:3:0). Examination of the rhetoric of print and broadcast news media, the process by which the news is gathered and produced, and the issue of whether and to what extent the content of the news is influenced by such economic and political factors as ownership, advertising, power of government.

201, 202 Studies in Popular Culture (3:3:0), (3:3:0). Aspects of popular culture and its significance in contemporary society. Topics include the social and intellectual background of American culture; themes and techniques of major forms of communication; and the conventions of such media as television, film, comics, advertising, and westerns. May be repeated for credit with permission of chair.

205 Introduction to American Culture (3:3:0). Introduction to American culture through the study of one or more issues, themes, or periods examined primarily but not exclusively from a literary perspective.

302 Introduction to American Studies (3:3:0). Prerequisite: 45 hours. Preference to American studies majors. Introduction to interdisciplinary methods and to the interdisciplinary concentrations offered by the American studies program. Seminars are limited to 20.

310 Places and American Culture (3:3:0). Prerequisite: 45 hours. Examination of the relationship between the natural landscape and American culture. Particular subtiles will be announced and the courses may be repeated when the subtitle is different. Seminars are limited to 20.

320 Peoples and American Culture (3:3:0). Prerequisite: 45 hours. Examination of the relationship between the various peoples of the American continent and American culture. Particular subtiles will be announced and the course may be repeated when the subtitle is different. Seminars are limited to 20.

330 Eras and American Culture (3:3:0). Prerequisite: 45 hours. Examination of the relationship between specific historical eras and American culture. Particular subtiles will be announced and the course may be repeated when the subtitle is different. Seminars are limited to 15.

340 Institutions and American Culture (3:3:0). Prerequisite: 45 hours. Examination of the relationship between American institutions and American culture. Particular subtiles will be announced and the course may be repeated when the subtitle is different. Seminars are limited to 15.

401 Themes in American Civilization (3:3:0). Prerequisite: 54 hours. Preference to American studies majors. Intensive study of a significant theme, motif, or idea in American culture. Subject determined by instructor. Seminars are limited to 15.

402 Readings in American Studies (3:3:0). Prerequisite: 54 hours. Preference given to American studies majors. Advanced application of American studies methods to primary documents and artifacts of American culture. Subject determined by instructor. Seminars are limited to 15.

403 American Studies Independent Study (1-6:0:0). Prerequisite: 54 hours, permission of chair and permission of instructor. Intensive study of a period, problem, or project related to American culture proposed by an individual student to be conducted in close consultation with an American studies faculty member.

410 Senior Seminar in American Studies (3:3:0). Prerequisite: American studies majors with 90 hours. Senior majors in the program will complete significant projects in the interdisciplinary concentration they have chosen. Seminars are limited to 15.

490 Internship (2-6:0:0). Prerequisite: 54 hours and permission of chair. Internships are nonpaying, work-study positions established by the American studies program with employers involved in interdisciplinary American studies issues. Qualified students are placed with area schools, interest groups, agencies, museums, parks, or corporations. Placement depends upon availability of positions.

502 Problems in American Culture (3:3:0). Prerequisite: Graduate standing. Interdisciplinary study of a particular aspect of American culture. Specific content varies and is announced before registration. May be repeated with permission of chair. Past offerings were The Hudson River, Early American Culture, The American Imagination and World War I, and The Enlightenment. Limited to 15 students.
Anthropology (ANTH)

Sociology and Anthropology

114 Introduction to Cultural Anthropology (3:3:0). Introduction to the branch of anthropology that describes people living in societies today, and that seeks to explain human behavior and various aspects of primarily non-Western culture and society. For non-Western credit.

120 Introduction to Archaeology (3:3:0). Introduction to survey of anthropological archaeology. Development and use of contemporary theory and field and lab methods.

135 Human Evolution and Prehistory (3:3:0). Exploration of human origins and nature; of primate social groups and behavior; of fossil evidence for human evolution and for the evolution of culture and human society; of natural and sexual selection, race and intelligence, aggression, and other topics.

220 Field School in Archaeology (3:6:0:0). Prerequisite: ANTH 120 or permission of instructor. Intensive four- to six-week summer term on-site introduction to archaeological field methods. Lectures on method and theory in archaeology, on local cultural history, and on specific research methods that accompany field and lab work. Time is spent at one site; location may change each summer.

299 Independent Study (1-3:0:0). Prerequisite: ANTH 114 or permission of instructor. Individual study in anthropology on topic organized in advance by student and instructor.

300 Civilizations (3:3:0). Prerequisite: 54 hours, ANTH 114, or permission of instructor. Cross-cultural and trans-temporal examination of complex societies and civilizations. Exploration of developmental schema for rise, articulation, spread and decline of historic and contemporary civilizations. For non-Western credit.

301 Native North Americans (3:3:0). Prerequisite: 54 hours, ANTH 114, or permission of instructor. Exploration of contemporary native North American cultures and of selected aspects of Indian-white historical relations. Emphasis on cultural persistence as well as change. For non-Western credit.

302 Peoples and Cultures of Latin America (3:3:0). Prerequisite: 54 hours, ANTH 114, or permission of instructor. Examination of contemporary Latin American cultures and of selected aspects of historical record.

303 Peoples and Cultures of Selected Regions (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Examination of contemporary cultures of a specific region, e.g., India, South America.

304 Peoples and Cultures of the Pacific (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Survey of twentieth century Melanesian, Polynesian, and Micronesian cultures. Case studies of interplay between contemporary cultural systems and island ecology. For non-Western credit.

305 Hunter-Gatherer Societies (3:3:0). Prerequisite: 54 hours, 6 hours of anthropology including ANTH 120 or permission of instructor. Examination of early human societies with emphasis on environmental, technological and cultural aspects of hunting and gathering as a successful prehistoric and contemporary means of adaptation. For non-Western credit.

306 Peoples and Cultures of Island Asia (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Examination of contemporary cultures of the Island Asia culture region; focus on native cultures of Indonesia, Borneo, and the Philippines. For non-Western credit.

307 Peoples and Cultures of the Middle East (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Examination of contemporary cultures in the Middle East and North Africa; focus on articulation of societies in the interplay of ecological and historical factors. For non-Western credit.

308 Peoples and Cultures of Africa (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Examination of contemporary cultures in sub-Saharan Africa. Several traditional societies are studied in depth, with attention to their emerging roles in modern African nation-states. For non-Western credit.

310 Social Organization and Kinship (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Examination of social organization, kinship, descent, and kinship terminology in mainly non-Western cultures, emphasizing both the meaning of specific cultural systems and cross-cultural similarities and differences.

311 Peoples and Cultures of Mainland Southeast Asia (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Survey of societies of mainland Southeast Asia, with emphasis on successive waves of outside cultural influences and relations between contrasting ethnic groups in modern states. Focus on Thailand and Malaysia. For non-Western credit.

312 Comparative Political Systems (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Examination of cultural and ecological contexts of political structures and competition for power in selected societies; a cross-cultural and comparative approach to study of political conflict, leadership, values, and symbolism.

313 Anthropological Perspectives on Religion (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Examination of religion as a cultural system. Topics include mythology, ritual, symbolism, and dogma. Cross-cultural and predominantly non-Western material are emphasized. For non-Western credit.

315 Socialization Processes (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Examination of selected aspects of the cultural transmission process in specific local cultures, selected from various world culture regions, with emphasis on transmission of cultures.

320 Laboratory Techniques in Archaeology (4:3:2). Prerequisite: ANTH 120, 54 hours, or permission of instructor. Study of research techniques by directed group projects in analysis of materials such as ceramics, glass, and lithics through discussions, demonstrations, and participation.

322 Historical Archaeology (3:3:0). Prerequisite: ANTH 120, 54 hours, or permission of instructor. Examination of material culture theories and methods of archaeology derived from and applied to historical sites, as they complement archival records.
325 Field Techniques in Archaeology (3-6:0:0). Prerequisite: ANTH 120, 54 hours, or permission of instructor. Intensive study of archaeological field techniques by directed group projects in site survey, site testing, recording techniques, and stratigraphy through discussions, demonstrations, and hands-on experience. May be repeated for a maximum of 6 credits.

332 Cultures in Comparative Perspective (3:3:0). Prerequisite: ANTH 114 or permission of instructor. Historical and comparative examination of various theoretical orientations in cultural anthropology and analysis of contrasting explanations of cultural data. Several cultures are studied in depth. For non-Western credit and credit for the sociology and international studies majors.

360 Biological Aspects of Human Sociality (3:3:0). Prerequisite: ANTH 135, 54 hours, or permission of instructor. Inquiry into the biological dimensions of humans as culture-bearing animals. Topics include altruism, aggression, primate social organization, morphology, comparative ethology, and microevolutionary genetic differentiation.

365 Human Diversity (3:3:0). Prerequisite: ANTH 135, 54 hours, or permission of instructor. Variations in culturally distinct human groups due to environmental, physiological, genetic, nutritional disease, and spatial factors.

370 Ecology and Culture (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Examination of relationships between environment, culture, and human behavior with an emphasis on cultural ecological explanations in mainly non-Western contexts.

371 Psychological Anthropology (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Survey of issues in study of relationships between cultural and psychological variables. Major topics viewed cross-culturally include personality, mental illness, projective systems, cognition and learning.

375 Anthropological Perspectives on History (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Use of ethnographic, archaeological, linguistic, and documentary data, in light of anthropological theory, to interpret the past and processes of change among indigenous peoples throughout the world.

380 Anthropological Linguistics (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Anthropological analyses of language behavior, origins, and change, emphasizing interplay between language and culture and anthropology and linguistics.

381 Comparative Medical Systems (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Survey of the discipline of medical anthropology with focus on traditional medical beliefs and on the diverse responses to modern scientific medicine both in developing countries and among cultural minorities in the U.S.

399 Issues in Anthropology (3-3:0:0). Prerequisite: ANTH 114, 54 hours, and permission of instructor. A topic of contemporary interest in anthropology, changing from semester to semester, and focusing on topics such as sex roles, anthropology and ethics, and primate social organization. Repeatable for credit.

420 Interpretation in Archaeology (3:3:0). Prerequisite: 6 hours of anthropology including ANTH 120 or permission of instructor. Exploration of theoretical and methodological issues encountered in archaeology. Terms and contexts of archaeological remains, analytic problems, and interpretation of material culture will be considered.

425 Public Archaeology (3:3:0). Prerequisite: 6 hours of anthropology including ANTH 120 or permission of instructor. Consideration of the public significance of archaeology and anthropological contributions to public concerns such as antiquities legislation and cultural resource management.

430 Research Methods in Archaeology (3:3:0). Prerequisite: ANTH 120, 54 hours, or permission of instructor. The archaeological research process will be studied through discussions of current archaeological methodologies and through student participation in designing and critiquing research projects.

435, 436 Special Projects in Archaeology (1-3:0:0). Prerequisites: ANTH 120, 325, or 430 and permission of instructor. Lab or field project leading to a written report of the research. Research and paper are completed under the instructor's guidance.

440 Applied Anthropology (3:3:0). Prerequisite: ANTH 114, 54 hours, or permission of instructor. Focus on anthropologists' contributions to major policy issues in development agencies in the U.S. and abroad. Attention to techniques that lead to prevention or management of social and cultural conflict.

450 Qualitative Methods in Sociocultural Research (3:3:0). Prerequisites: 54 hours and 6 hours of anthropology including ANTH 114, or permission of instructor. Exploration of some of the most useful nonquantitative research techniques used in social sciences and practice in their application.

490 Classics in Anthropology (3:3:0). Prerequisites: 54 hours and 9 hours of anthropology including ANTH 332, or permission of instructor. Examination of some of the most important works in anthropological theory and explanation. Explores merits of works recognized as classics and assesses their impact on the field. Required for anthropology majors and usually taken as a senior-junior seminar.

495 Internship (3-6:0:0). Prerequisite: ANTH 120, 54 hours, or permission of instructor. Supervised project in applying anthropology, i.e., public archaeology, development anthropology, museums. May be repeated for a maximum of 6 credits.

499 Independent Research (1-3:0:0). Prerequisite: 54 hours, 9 hours of anthropology, or permission of instructor. Individual research on a topic to be organized in advance by student and instructor.

Arabic (ARAB)

Foreign Languages and Literatures

101 Introduction to the Arabic Language (3:3:1). Introduction to Modern Standard Arabic, with emphasis on the written language. Lab work required.

102 Introduction to the Arabic Language (3:3:1). Prerequisite: ARAB 101 or permission of department. Continuation of ARAB 101. Lab work required.

201 Intermediate Arabic I (3:3:1). Prerequisite: ARAB 102 or equivalent. Further development of skills ac-

http://catalog.gmu.edu
required in ARAB 101 and 102 including grammar, vocabulary, listening, speaking, reading, and writing. Lab work required.

202 Intermediate Arabic II (3:3:1). Prerequisite: ARAB 201 or equivalent. Continuation of ARAB 201 with emphasis on the application of language skills to reading, composition, and discussion. Lab work required.

Art History (ARTH)

Art and Art History

101 Introduction to the Visual Arts (3:3:0). Introduction to the content and principles of the visual arts. Approach varies with instructor.

102 Symbols and Stories in Western Art (3:3:0). Classical and Christian themes and imagery in Western art from early Greece to the modern era.

112 History of Urban Design in Early Modern Europe (3:3:0). Development of city planning from Middle Ages to the Renaissance, the scenographic effects of the Baroque city, and the rise of the new industrial city in the eighteenth century. Considers placement of buildings and public monuments in urban design.

180 History of African Art (3:3:0). Highlights the variety of artistic styles and symbolic traits of cultures in Africa producing artistic artifacts. Concentrates on the central and western sub-Saharan regions and proceeds geographically.

202 Introduction to the History of Art (3:3:0) Historical introduction to selected western European and American buildings, paintings, and sculptures. Approach varies with instructor.

210 History of Design (3:3:0). Prerequisite: 100-level or above course in art history or studio art or permission of instructor. Role of design in arts from antiquity to the present.

280 Survey of Far Eastern Art (3:3:0). Art of India, China, Japan, Southeast Asia, Korea, and Indonesia from Bronze Age through the twentieth century, exploring role of Buddhism and Hinduism through visual representation.

301 Themes in Art History (3:3:0). Thematic approach to the content and principles of the visual arts for nonmajors and transfer students. Approach and topics vary with instructor.

315 History of Modern Architecture (3:3:0). Prerequisite: 100- or 200-level course in art history or studio art or permission of instructor. History and development of modernism in architecture from the Beaux Arts movement to the present, and an investigation of stylistic and structural innovations.

320 Art of the Islamic World (3:3:0). Prerequisite: 24 hours. Introduction to Islamic art, from the time of Muhammed to the present day. Cultural and regional approach, concentrating on Arabia, North Africa, Iraq, Iran, and Turkey.

321 Greek Art (3:3:0). Prerequisite: 24 hours. History of ancient Greek architecture, sculpture, and painting.

322 Roman Art (3:3:0). Prerequisite: 24 hours. History of Roman architecture, sculpture, and painting.

323 Ancient Painting (3:3:0). Prerequisite: 24 hours or a 100- or 200-level ARTH course. Ancient wall painting and its functions and styles in the Mediterranean area.

333 Early Christian and Byzantine Art (3:3:0). Prerequisite: 24 hours. Introduction to the art of the medieval Mediterranean world, concentrating on the Byzantine Empire, its neighbors and its legacy.

334 Western Medieval Art (3:3:0). Prerequisite: 24 hours. Introduction to the art of medieval western Europe, from the fall of the Roman Empire through the Romanesque and Gothic periods. Cultural approach, emphasizing the use of primary sources.

340 Early Renaissance Art in Italy (3:3:0). Prerequisite: 24 hours. Architecture, sculpture, and painting in Italy from circa 1300 to 1500.

341 Northern Renaissance Art (3:3:0). Prerequisite: 24 hours. Architecture, painting, and sculpture in France, Germany, and the Netherlands from circa 1300 to 1600.

342 High Renaissance Art in Italy, France, and Spain (3:3:0). Prerequisite: 24 hours. Development of the High Renaissance style in architecture, painting, and sculpture in Italy and its transformation through Mannerism.

344 Baroque Art in Italy, France, and Spain (3:3:0). Prerequisite: 24 hours. Architecture, sculpture, and painting in Southern Europe from circa 1600 to 1750.

345 Northern Baroque Art (3:3:0). Prerequisite: 24 hours. Architecture, painting, and sculpture in Belgium, England, Germany, and the Netherlands from circa 1600 to 1750.

350 History of Photography (3:3:0). Prerequisite: 24 hours. Development of photography from origins in France in the nineteenth century to the present.

360 Nineteenth Century European Art (3:3:0). Prerequisite: 24 hours. Movements from Neoclassicism to Symbolism will be discussed in relation to social, cultural, political, and technological changes in Europe.

362 Twentieth Century European Art (3:3:0). Prerequisite: 24 hours. Study of major movements (Fauvism, cubism, futurism, constructivism, surrealism, neoexpressionism) and important artists in twentieth century painting and sculpture. Discussion will center on art, art theory, and the relation of both to European history.

371 American Architecture (3:3:0). Prerequisite: 24 hours. Study of the history and development of American architecture in its cultural context from its inception in the seventeenth century through the twentieth century.

372 Nineteenth Century American Art (3:3:0). Prerequisite: 24 hours. Artistic developments and the chang-
ing status of the artist in an historical context; the rise of American landscape and westward expansion; genre painting and Jacksonian America.

373 American Art, 1900-1945 (3:3:0). Prerequisite: 24 hours. Major developments in painting and sculpture from the turn of the century to World War II. Selected topics will include the emergence of an American avant-garde, the development of new subject matter with urbanization, regionalism, and art and politics in the 1930s.

374 American Art Since World War II (3:3:0). Prerequisite: 24 hours. Topics including abstract expressionism, pop art, minimalism, conceptual art, feminist art, environmental art, the new figuration, and photorealism will be discussed in a historical and critical context.

392 Exhibition Projects (3:3:0). Prerequisite: 6 hours in studio art or 3 hours in art history or permission of instructor. Planning, promotion, and production of visual art presentations and related events on the GMU campus. Exhibitions are produced by students who alternatively serve in all operational capacities from proposal research and budget planning to the graphic design of announcements and the installation of exhibitions.

393 Art Apprenticeships (3-6:0:0). Prerequisite: Art major with permission of instructor. Seminar followed by an apprenticeship or internship project with a professional individual or organization in the field of visual arts in the D.C. area. An apprenticeship may provide an introductory work experience in the professional area in which the student is considering a career.

399 Special Topics in the History of Art (3:3:0). Topics vary and include women in art, art patronage, art criticism, and others.

400 Methods of Research in Art History (3:3:0). Prerequisite: Two courses in art history at the 300 level or permission of instructor. Investigation of different approaches involved in art historical research.

420 Advanced Studies in Ancient Art (3:3:0). Prerequisite: 300-level course in ancient art or permission of instructor. Study in a particular area of ancient art of the Mediterranean, the Near East, or the Middle East. Topics may be an art form or medium, a geographical area, an artist or group of artists, a theme, a function, or a context. May be repeated for credit.

430 Advanced Studies in Medieval Art (3:3:0). Prerequisite: 300-level course in medieval art or permission of instructor. Study of a single topic in medieval art. May focus on a particular period, region, or medium, or may explore cultural interconnections within the medieval world.

440 Advanced Studies in Renaissance and Baroque Art (3:3:0). Prerequisite: 300-level course in Renaissance or Baroque art or permission of instructor. Study in a particular aspect of Renaissance or Baroque art. Topics may be monographic, such as a study of Michelangelo or Rembrandt; thematic, such as a study of art theory or narrative art of a particular time; concentrated on the art of a smaller time period, e.g., 1500-1525, or concentrated on a particular area, such as Venetian art. May be repeated for credit.

460 Advanced Studies in European Art/Nineteenth-Twentieth Centuries (3:3:0). Prerequisite: 300-level course in modern art history. Study in a particular area of modern European art. Topic may focus on a movement or group of artists (i.e., realism, impressionism, or fauvism) or on a theme that includes several time periods.

471 Advanced Studies in American Art (3:3:0). Prerequisite: 300-level course in American art. Study in a particular area of American art, focusing on a form (landscape or genre painting), a theme (nationalism, regionalism, the iconography of the family), or a movement (American modernism).

490, 491 Independent Study in Art History (3:3:0), (3:3:0). Prerequisite: 54 hours, permission of instructor, permission of art faculty, and permission of chair, plus 9 hours in art history beyond ARTH 200, 201. Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor. Study proposal submitted prior to registration.

592 Exhibition Projects (3:3:0). Prerequisite: B.A. or equivalent or permission of instructor. Planning, promotion, and production of visual art presentations and related events on the GMU campus. Exhibitions are produced by students who alternatively serve in all operational capacities from proposal research and budget planning to the graphic design of announcements and the installation of exhibitions.

593 Art Apprenticeships (3-6:0:0). Prerequisite: B.A. or equivalent or permission of instructor. Seminar followed by an apprenticeship or internship project with a professional individual or organization in the field of visual arts in the D.C. area. An apprenticeship may provide an introductory work experience in the professional area in which the student is considering a career.

596 Independent Study (3:3:0). Prerequisite: B.A. or equivalent or permission of instructor. Independent reading and research on a specific project under the direction of a department member. A written report is required. May be repeated for credit.

599 Special Topics in the History of Art (3:3:0). Prerequisite: B.A. or equivalent or permission of instructor. Topics vary and include women in art, art patronage, art criticism and others.

Art Studio (ARTS)

Art and Art History

102 Visual Thinking (3:0:6). A studio primer including an investigation into drawing, sequential design, printmaking, and film-making imagery.

202, 203 Studio Fundamentals I, II (3:0:6), (3:0:6). Corequisite: ARTS 102. A two-semester course concerning basic visual decision making and the choice involved in ordering elements of a visual vocabulary into unified, coherent wholes. Establishes a basis for comprehension and use of the components of a visual language that is a foundation for further experience in the arts.

310 Graphic Design I (4:2:4). Prerequisite: ARTS 102, 202, and 203, or equivalent, or permission of instructor. Introduction to the concepts of graphic design and its techniques. Creation of a visual vocabulary to apply in solutions to typical problems in graphic design, such as in newspaper and advertising layout. Taught as a series of lectures with associated studio problems, in which stu-
Graphic Design II (4:2:4). Prerequisite: ARTS 102, 202, and 203, or equivalent, or permission of instructor. Graphic design concepts and techniques. Solutions to typical problems encountered by graphic designers in publication design and environmental design. Taught as a series of lectures and associated studio problems, in which students develop layouts from concept through final product. Every other fall semester.

Design I (3:0:6). Prerequisite: ARTS 102, 202, and 203, or permission of instructor. This course provides an opportunity to investigate and experiment with visual communication in two- and three-dimensional form. Emphasis is on developing an individual awareness of the relationship between concepts, communication, techniques, and media.

Basic Typography (4:2:4). Prerequisite: ARTS 102, 202, and 203, or equivalent, or permission of instructor. Introduction to elements of typographical composition. Historical development of letterforms; recognition, use, and specification of existing typefaces; alphabet design. Taught as a series of lectures with associated studio problems. Every other fall semester.

Drawing I, II (3:0:6), (3:0:6). Prerequisite: ARTS 102, 202, and 203, or permission of instructor. Fundamentals of drawing with emphasis on perspective systems and skills in representing space, objects, and textures with a variety of methods. Offered sequentially.

Painting I, II (3:0:6), (3:0:6). Prerequisite: ARTS 102, 202, 203, or permission of instructor. Painting taught as observation through techniques in oil or water-based media, varying with the instructor. Offered sequentially.

Printmaking I: Silkscreen (3:0:6). Prerequisite: ARTS 102, 202, and 203, or permission of instructor. The process and history of basic silkscreen printmaking will be practiced and studied: monotypes, paper stencil, liquid blockout, lacquer stencil film, direct and indirect photographic stencils. Applied design and techniques for the production of posters will be emphasized. Every other fall semester.

Printmaking II: Relief (3:0:6). Prerequisite: ARTS 102, 202, and 203, or permission of instructor. The process and history of basic relief methods of printmaking will be practiced and studied: woodcut, linoleum cut, wood engraving, and relief collagraph with an introduction to color relief printing in editions. The application of relief printmaking to the design, illustration, and production of books and portfolios will be emphasized. Every other spring semester.

Pinhole Photography (3:0:6). Prerequisite: ARTS 102, 202, and 203, or permission of instructor. Beginning photographic design. An introduction to photography using student-built pinhole cameras. Course includes darkroom work in processing and printing of paper negatives, an introduction to the use of a 4 x 5 studio camera, and film development.

Color Slide Photography (3:0:6). Prerequisite: Permission of instructor. A study of 35mm photography in terms of camera manipulation, basic optics and sensitivity, and aesthetics of the color slide medium. Students are required to provide a 35mm camera (preferably a single lens reflex camera), a light meter, and film.

Sculpture I, II (3:0:6), (3:0:6). Prerequisite: ARTS 102, 202, 203 or permission of instructor. Fundamentals of sculptural design with emphasis on three-dimensional forming processes in a variety of media. Practical knowledge of sculptural materials and techniques, i.e., clay modeling, mold making, carving, basic woodworking, and their applications to 3-D form, concepts, and spatial relationships.

Computer Graphics I (3:3:3) Prerequisites: ARTS 102, 202, 203, or permission of instructor. Emphasis on aesthetics and design, using the computer both as tool and medium. Elementary computer graphics techniques, programming concepts, and principles of design such as color, composition, and spatial relationships. Students construct a series of images to explore the creative process using elements of design. Through critiquing, students discuss the conceptual and visual quality of their work.

Computer Graphics II (3:3:3). Prerequisites: ARTS 102, 202, 203, 380, or permission of instructor. Emphasis on high-resolution electronic imaging using the computer both as tool and medium. Complex menu structures, rotations and scaling, color mapping and palette design, font generation, video digitizing techniques, composition studies, and aesthetic concerns. Students construct a series of images to explore the creative process using elements of design. Through critiquing, students discuss the conceptual and visual quality of their work.

Computer Art and Animation (3:3:3). Prerequisites: ARTS 102, 202, 203, 380, 381, or permission of instructor. Advanced computer graphics concepts as applied to computer animation. Lab assignments address the technical and aesthetic challenges of computer animation. Students learn to transfer computer-generated images to videotape format. Short animated sequences with accompanying audio are designed and executed.

Exhibition Projects (3:3:0). Prerequisite: 6 hours in ARTS, 3 hours in ARTH, or permission of instructor. Planning, promotion, and production of visual art presentations and related events on the GMU campus. Exhibitions are produced by students who alternatively serve in all operational capacities from proposal research and budget planning to the graphic design of announcements and the installation of exhibitions.

Art Apprenticeships (3-6:0:0). Prerequisite: Art major with permission of instructor. Introductory seminar followed by an apprenticeship or internship project with a professional individual or organization in the field of visual arts in the D.C. area. An apprenticeship may provide an introductory work experience in the professional area in which the student is considering a career.

Advanced Design I (3:0:6), (3:0:6). Prerequisite: ARTS 203 and 312. Continuation of Design I ideas and specialization in two-dimensional or three-dimensional design theories and practices.

Advanced Drawing skills and techniques with an emphasis upon individual exploration in a variety of media.
432, 433 Painting III, IV (3:0:6), (3:0:6). Prerequisite: ARTS 332 or 333 or permission of instructor. A more advanced painting course intended to develop individual control and direction of various media while exploring contemporary issues in painting.

442 Printmaking III: Intaglio (3:0:6). Prerequisite: ARTS 102, 202, and 203, or permission of instructor. The process and history of basic intaglio methods of printmaking are practiced and studied: monotype, metal and plastic engraving, etching, aquatint, embossing, soft and lift ground techniques, and an introduction to color intaglio printing. Every other fall semester.

443 Printmaking IV: Color (3:0:6). Prerequisite: ARTS 342, 343, or 442, or permission of instructor. The process and history of color printmaking in the silkscreen, relief, and/or intaglio methods are practiced and studied. The expressive and formal use of color are explored via various printmaking processes and developed in a serial format. Every other spring semester.

452, 453 Black and White Photography I, II (3:0:6), (3:0:6). Prerequisite: ARTS 350 or permission of instructor. Photography taught both as technical craft and as a way of seeing. Includes camera and darkroom operations and ideas relating to the photographic image.

462, 463 Sculpture III, IV (3:0:6), (3:0:6). Prerequisite: ARTS 362, or 363, or permission of instructor. Studio course to develop individual ideas and solutions by promoting more advanced thinking toward sculpture. Applying original concepts to problem-solving and exploring different ways to produce sculptural form is stressed. Emphasis is on strengthening basic technical skills and introducing new skills.

491, 492 Advanced Studio Problems (2-4:0:0), (2-4:0:0). Prerequisite: 54 hours, permission of instructor, and permission of chair. Study proposal submitted prior to registration. Opportunity for development of advanced skills and concepts in drawing, painting, sculpture, and other media. May be repeated for credit.

499 Special Topics in Studio Art (3:0:6). Prerequisite: 24 hours and permission of instructor. Topics of special interest in the studio arts. Content varies. May be repeated with permission of the department.

532, 533 Painting V, VI (3:0:6), (3:0:6). Prerequisite: ARTS 432 or 433 or permission of instructor. Painting on the advanced level. Emphasis on individual decision making and personal initiative.

562, 563 Sculpture V, VI (3:0:6), (3:0:6). Prerequisite: ARTS 462 or 463 or permission of instructor. Studio course involving advanced thinking about sculptural design, materials, and processes. Prior experience in sculpture is necessary because individual decision making and personal initiative are emphasized.

592 Exhibition Projects (3:0:0). Prerequisite: B.A. in art or equivalent or permission of instructor. Planning, promotion, and production of visual art presentations and related events on the GMU campus. Exhibitions are produced by students who serve in all operational capacities from proposal research and budget planning to the graphic design of announcements and the installation of exhibitions.

593 Art Apprenticeships (3-6:0:0). Prerequisite: B.A. in art or equivalent or permission of instructor. Introductory seminar followed by an apprenticeship or intern-ship project with a professional individual or organization in the field of visual arts in the D.C. area. An apprenticeship may provide an introductory work experience in the professional area in which the student is considering a career.

596 Independent Study (3:3:0). Prerequisite: B.A. in art or equivalent or permission of instructor. Independent reading and creative work on a specific project under the direction of a department member. A written report is required. May be repeated for credit.

**Asian Studies (ASST)**

**Area Studies**

450 Fundamental Themes and Issues of Asian Civilization (3:3:0). Prerequisite: Junior standing in the Asian studies major or permission of instructor. This seminar examines the religious and philosophical traditions of East and South Asia in their cultural and historical settings, with special emphasis on values, ethics, social organization, and political ideology.

460A Seminar in History, Society, and Literature with the Focus on Literature (3:3:0). Prerequisite: Junior standing in the Asian studies major or permission of instructor. Traces the development of Asian societies and cultures through time using major Asian literary works in English translation as source materials. Geographical foci depend on the instructor's expertise.

460B Seminar on Asian Society in Historical Perspective (3:3:0). Prerequisite: Junior standing in the Asian studies major or permission of instructor. Aims at understanding some of the common themes and historical forces that forged critical links between the civilizations of South Asia, Southeast Asia, and East Asia in both modern and premodern times.

470 Seminar in Major Issues in Contemporary Asia (3:3:0). Prerequisite: Junior standing in the Asian studies major or permission of instructor. Examination of the major problems currently facing individual Asian countries and the implications of these problems for the Asian and international communities.

**Astronomy (ASTR)**

**Physics**

105, 106 Introduction to Modern Astronomy (4:3:2), (4:3:2). Lab course in astronomy for nonscience majors. Topics include astronomical instruments, coordinates and time, celestial mechanics, astrophotography, planets, satellites, comets and meteorites, the sun, magnitudes and distances of the stars, and others. Can be used to fulfill the 8-hour lab science requirement; not for physics majors.

228 Foundations of Cosmological Thought (3:3:0). Examines the scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes a qualitative understanding of the development of cosmology con-
cluding with the present concept of the origin and evolution of the universe. No advanced background in mathematics or the natural sciences is required.

328 Introduction to Astrophysics (3:3:0). Prerequisite: PHYS 345 or 351 and MATH 113 or 115. Topics include physical concepts, magnitudes of stars, Hertzsprung-Russell diagram, stellar radiation, interstellar matter, dust and molecules, and others.

428 Relativity and Cosmology (3:3:0). Prerequisite: MATH 304 or 306; PHYS 303, 305 and 352; or permission of instructor. Special relativity, four-dimensional space-time, general relativity, non-Euclidean geometries, geodesics, and field equations; tests of general theory of relativity, black holes, cosmology, models of the universe, remnant blackbody radiation, big bang cosmology, thermodynamics, and the universe.

505 Fundamentals of Astronomy (3:3:0). Prerequisite: Graduate standing or permission of instructor. Emphasis on the connection of astronomy to other disciplines as well as the recent developments in astronomy. Planet earth, its origin and past history, and the origin of life. Ancient, Renaissance, and modern astronomers. Basic physics. Tools of the astronomer. The solar system, the sun, stars, our galaxy, quasars, general relativity, and cosmology. Recommended for teachers of general science.

Bachelor of Individualized Study (BIS)

School of Continuing and Alternative Learning

490 Bachelor of Individualized Study Project (3:0:0). Final course in the B.I.S. degree program. Open only to students in the Bachelor of Individualized Study Program. Completion of an approved project in the student's area of concentration, to be evaluated by a three-member faculty committee. Credit earned for the project may not be part of the 12 hours of upper-division work required in the core. Individualized sections by arrangement.

Biology (BIOL)

Biology

103 Contemporary Biology I (4:3:3). For nonscience majors. Emphasizes human structure, function, and homeostatic mechanisms. Students who have taken BIOL 113, 114 or BIOL 124, 125 are not eligible to take this course. Fall and summer term A.

104 Contemporary Biology II (4:3:3). Prerequisite: BIOL 103. Topics include genetics, evolution, plants, major ecosystems and ecological problems. Students who have taken BIOL 113, 114 or BIOL 124, 125 are not eligible to take this course. Spring and summer term D.

113 Biological Science (4:3:3). For science majors and preprofessionals in the life sciences. Topics include the chemical and cellular basis of life, genetics, and evolution. Students who have previously passed BIOL 103 or 103 and 104 should consult the department under-graduate coordinator before enrolling. Fall, spring, and summer term A.

114 Biological Science (4:3:3). Prerequisite: BIOL 113. Topics include the structure and function of plants and animals, ecology, and taxonomy. Spring and summer term D.

124, 125 Human Anatomy and Physiology (4:3:3), (4:3:3). Introduction to structure and function of major organ systems of the body. Open first to nursing and physical education majors. Must be taken in sequence. Does not satisfy the natural science requirement in the College of Arts and Sciences except for dance majors in the B.F.A. program. Not available for biology major credit. Fall, spring, summer.

211 Heredity and Society (3:3:0). Basic principles of heredity, including elementary probability, nature of the gene, mutations and mutant genes in populations. Emphasis on human hereditary diseases, genetic counseling, and application of genetics to improving the quality of life. Not available for biology major credit.

225 Human Reproduction and Sexuality (3:3:0). Examination of the anatomy and physiology of human reproductive systems, physiology of sexual intercourse, normal pregnancy, birth, congenital conditions, sex determination and its expression, diseases of the reproductive organs, technical developments related to reproduction. Not available for biology major credit. Fall.

261 Introductory Microbiology (4:3:3). Prerequisite: BIOL 124, 125; BIOL 103, 104; BIOL 113, 114; or permission of instructor. Introduction to bacteria, molds, and viruses with emphasis on disease-causing organisms. Lab includes sterile technique and culture methods for microorganisms. Students who have taken cell biology or biology of microorganisms may not enroll. Open first to health education and nursing majors. Not available for biology major credit.

302 Biology of Microorganisms (4:3:3). Prerequisite: BIOL 113, CHEM 211-212, or permission of instructor. The morphology, physiology, and ecology of selected groups of bacteria, fungi, protozoa, and viruses. Applied topics, including host-parasite interactions, are stressed. Not available to students who have taken BIOL 261 or 361. Fall and spring.

303 Animal Biology (4:3:3). Prerequisite: C or better in BIOL 113 or BIOL 113 and 114 or permission of instructor. Emphasis on structure and function of vertebrates, adaptations to the environment, and evidence of evolution. Fall and spring.

304 Plant Biology (4:3:3). Prerequisite: C or better in BIOL 113 or BIOL 113 and 114 or permission of instructor. Introduction to the study of plants, their structure, development, nutrition, and ecology. Emphasizes flowering plants, but surveys all groups and their phylogenetic relationships. Fall and spring.

307 Ecology (4:3:3). Prerequisite: BIOL 303, 304, or permission of instructor. Physical environment, energy flow, structure and function of populations, the dynamics of communities, and succession. Fall, spring.

309/GEOL 309 Introduction to Oceanography (3:3:0). Prerequisite: GEOL 101 or 111 and BIOL 103 or 113, or permission of instructor. Introduction to chemi-
311 General Genetics (4:3:3). Prerequisite: BIOL 303, 304, or permission of instructor. Basic principles of heredity and modern developments in the field. Fall, spring, summer.

312 Biostatistics (4:3:3). Prerequisite: BIOL 303, 304, or permission of instructor. Use of probability and descriptive and inferential statistical techniques in the interpretation of biological data. Fall.

320 Comparative Chordate Anatomy (4:2:6). Prerequisite: BIOL 303 or permission of instructor. Comparison of anatomy and morphology of major chordate groups. Lab emphasizes shark, mudpuppy, cat, and rabbit. Fall of even-numbered years.

322 Patterns of Animal Development (4:3:3). Prerequisite: BIOL 303 and 54 hours or permission of instructor. Concepts of vertebrate organization, reproduction, embryogenesis, and organ system development. Spring.

324 Introductory Animal Behavior (4:3:3). Prerequisite: BIOL 303 or permission of instructor. Study of the mechanisms, functions, and evolution of behavior. Fall.

326 Animal Physiology (4:3:3). Prerequisite: BIOL 303 and CHEM 211-212. General consideration of invertebrate and vertebrate function emphasizing common life problems and a variety of methods for solving them. Topics include electrolyte balance, excretion, respiration, metabolism, thermoregulation, neuropeptide control, and physiological rhythms.

331 Invertebrate Zoology (4:3:3). Prerequisite: BIOL 303 or permission of instructor. Survey of the invertebrate phyla, excluding insects, showing the morphology, phylogeny, and general biology of these groups. Fall.

332 Insect Biology (4:3:3). Prerequisite: BIOL 303 or permission of instructor. Survey of insects including taxonomy, morphology, physiology, behavior, ecology, and economic importance. Summer term A.

333 Vertebrate Zoology (4:2:6). Prerequisite: BIOL 303 or permission of instructor. Phylogeny and systems of major vertebrate groups. Emphasis on ecological adaptation. Lab includes field studies of local fauna. Spring.

341 Phycology (4:3:3). Prerequisite: BIOL 304 or permission of instructor. Study of the biology of algae including taxonomy, reproduction, physiology, ecology, evolution, and economic importance.

342 Plant Morphology (4:3:3). Prerequisite: BIOL 304 or permission of instructor. Origin and development of organs, tissue systems, and life cycles of green plants, with phylogenetic comparisons from algae to angiosperms. Fall.

343 Mycology (4:3:3). Prerequisite: BIOL 304 or permission of instructor. Introduction to biology of the fungi including morphology, taxonomy, growth and development, physiology, reproduction and ecology. Lab emphasizes representative organisms and isolation and culturing techniques.

344 Taxonomy of Flowering Plants (4:3:3). Prerequisite: BIOL 304 or permission of instructor. Study of terminology and identification of flowering plants with emphasis on local flora. Spring.

345 Plant Communities (4:3:3). Prerequisite: BIOL 304 or permission of instructor. Plant associations and formations and their successions in North America. Three Saturday field trips required. Fall.

371 Animal Distributions (3:3:0). Prerequisite: BIOL 303, 304, or permission of instructor. Relations of the North and South American faunas with other regions in the light of continental drift. Emphasis on vertebrates. Spring.

377 Ecosystem Ecology (3:3:0). Prerequisite: 8 hours of biology, geology, or chemistry; 54 hours; or permission of instructor. Introduction to ecosystem concepts and their applications to natural and managed ecosystems.

380 Bioinstrumentation (4:3:3). Prerequisite: CHEM 211-212, BIOL 383, one semester college mathematics, or permission of instructor. Introduces modern instrumentation including basic electronics, data processing, principles of measurements, and sample handling. Presents theory necessary to understand bases of the instruments and principles involved in specific measurements. Spring.

383 Cell Biology (4:3:3). Prerequisites: BIOL 311, CHEM 211-212, MATH 110 or 113, and 54 hours. Cellular structure and function. Topics include fine structure, chemistry, metabolism and regulatory mechanisms. Fall, spring.

425 Mammalian Physiology (4:3:3). Prerequisite: BIOL 383 or permission of instructor. An organ system approach to the study of mammalian homeostasis, including cardiovascular, respiratory, renal, digestive, endocrine, and nervous system functions. Spring.

440 Field Biology (4:2:6). Prerequisite: BIOL 303, 304, and 54 hours, or permission of instructor. Directed field studies emphasizing ecology and behavior. Topics vary, but include design of field manipulations, data collection and analysis, and an introduction to organisms of study site. Students bear the cost of required field trip(s).

446 Environmental Physiology (3:3:0). Prerequisite: BIOL 326 or permission of instructor. Physiological responses of animals to environmental factors and changes in the natural environment. Topics include biorythms and adaptation to temperature, high pressure, and altitude. Emphasis on vertebrates.

449 Marine Ecology (3:3:0). Prerequisite: BIOL 307 or permission of instructor. Plants and animals of marine environments and physical and chemical conditions that affect their existence. Spring of odd-numbered years.

452 Immunology (4:3:3). Prerequisite: BIOL 383 or permission of instructor. Topics include structure and function of immunoglobulins, role of cell-mediated immunity, protective role of the immune system, and disease and injury related to malfunctions of the immune system. Spring.

465 Histology (4:3:3). Prerequisite: BIOL 303 and 54 hours, or permission of instructor. Microscopic structure of animal tissues and organs with emphasis on vertebrates. Fall.

471 Evolution (3:3:0). Prerequisite: BIOL 311 or permission of instructor. Process of evolution with emphasis on the role of genetics, the properties of populations, and population differentiations. Spring.
474 Plant Structure and Function (4:4:0). Prerequisite: BIOL 383 or permission of instructor. Corequisite BIOL 475. Structural and functional aspects of transport phenomena, photosynthesis, growth differentiation, and reproductive processes in plants are discussed. Spring.

495, 496 Special Readings in Biology (1-2:0:0), (1-2:0:0). Prerequisite: Permission of both instructor and chair. Literature investigation under instructor's guidance. Mastery of subject determined by examination or paper. Maximum of 2 credits.

497, 498 Special Problems in Biology (1-4:0:0), (1-4:0:0). Prerequisite: Permission of both instructor and chair. 84 hours. Lab or field project leading to a written report of research. The research and paper are completed under the instructor's guidance. Total credit limit for 495, 496, 497, and 498, in any combination, is 6 hours, not to exceed 4 credits in any one semester.

504 Virginia Natural History for Teachers (4:3:3). Interrelations of plants, wildlife, soil, and waters of local environments with emphasis on teaching their proper use and conservation. May be applied to the M.S. in biology in the interpretive track only and then within a six-hour maximum if combined with BIOL 605. Summer.

513 Food, Energy, and Insects (3:3:0). Prerequisite: BIOL 332 and permission of instructor. History and future of man's competition with insects in fields of agriculture and medicine.

514 Human Evolution and Ecology (3:3:0). Materialistic study of the evolution of humans and their prehistoric, historic, and contemporary relationship with the natural environment.

520 Systematics in Complex Angiosperm Families (3:1:6). Prerequisite: BIOL 344 or 534 or permission of instructor. Morphology and speciation of the more complex families such as Poaceae, Cyperaceae, and Asteraceae. Lab emphasizes identification of specimens and acquaintance with taxonomic literature. Fall of even-numbered years.

523 Reproductive Strategies (3:3:0). Prerequisite: permission of instructor. Evolution of reproductive tactics, including sexual and asexual reproduction, sex ratios, parental investment, propagule sizes and numbers, mating systems, and social structure. Animals and plants emphasized as appropriate.

526 Paleozoology (4:3:3). Prerequisite: Permission of instructor. Study of origin and evolution of interrelationships between components of the earth's major ecosystems.

527 (727) Current Problems in Evolutionary Theory (3:3:0). Prerequisite: Course in evolution or permission of instructor. Contemporary evolutionary thought.

528 Selected Topics in Invertebrate Zoology (3:3:0) or (3:2:3). Prerequisite: Course in invertebrate zoology or permission of instructor. Different topics in different years. Topics might include an examination of the biology of a single phylum or strategies of larval survival.

529 Vertebrate Paleontology (4:2:6). Prerequisite: Course in vertebrate zoology, comparative anatomy, or invertebrate paleontology, or permission of instructor. Study of evolutionary patterns of vertebrates. Emphasis on major adaptive radiations.

532 (632) Animal Behavior (3:3:0). Prerequisite: BIOL 324 or permission of instructor. Ecological aspects of animal behavior.

533 Selected Topics in Plant Biology (3:3:0) or (3:2:3). Prerequisite: 8 hours in 100-level BIOL, upper-division course in botany, and permission of instructor. Topic depends on instructor's specialty. May be repeated only with permission of chair.

534 Speciation and Field Studies in Flowering Plants (3:1:6). Prerequisite: Course in plant taxonomy or permission of instructor. Modes of speciation in flowering plants. Lab emphasizes field trips, collection, preparation, and identification of plants. Fall of odd-numbered years.

535 Ancient Plants and Their Environment (3:3:0). Prerequisite: BIOL 304 or a course in paleontology or permission of instructor. Evolution of fossil plants, their origin, history, and extinction, including the physical and biological selective pressures responsible for these events.

536 Ichthyology (4:3:3). Prerequisite: Course in ecology or permission of instructor. Study of the systematics, evolution, physiology, ecology, and behavior of fishes.

537 Ornithology (4:2:6). Prerequisite: Course in ecology or permission of instructor. Study of the evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work. Spring of odd-numbered years.

538 Mammalogy (4:2:6). Prerequisite: Course in ecology or permission of instructor. Study of the evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing field work. Fall of odd-numbered years.

539 Herpetology (4:2:6). Prerequisite: Course in ecology or permission of instructor. Study of the evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work. Spring of even-numbered years.

542 Ecology of Animal Communities (3:3:0). Prerequisite: Course in ecology or permission of instructor. In-depth study of animal communities emphasizing community structures and functions, changes in composition over time and space, stability and equilibrium properties, disturbances, and insularization effects.

543 Tropical Ecosystems (4:3:3). Prerequisite: Course in ecology or permission of instructor. Terrestrial, aquatic, and marine ecosystems in the tropics emphasizing plant communities, plant-animal interactions, and the role of man in the tropics. Field trip to the tropics is required as part of lab.

546 Estuarine and Coastal Ecology (4:3:3). Prerequisite: Course in ecology and permission of instructor. Emphasizes marine biology of estuarine and coastal habitats of the Chesapeake Bay region and factors affecting distribution and abundance of organisms. Lab provides training in field measurement of physical and chemical parameters and collection and identification...
of local organisms. Extended field trips made to mid-Atlantic sites. Summer.

547 Terrestrial Plant Ecology (4:3:3). Prerequisite: Course in ecology. Consideration of community organization, development, productivity, and mineral cycling; interactions between plants and competitors, herbivores, and various environmental factors, especially light, water and soil. Fieldwork and lab emphasize data collection and statistical analysis.

550 Limnology (3:3:4) Prerequisite: General chemistry and a course in ecology. Study of the origin of freshwater ecosystems and the chemical, physical, and ecological processes occurring in them. The impact of human activities on freshwater ecosystems is also considered.

552 Survey of Biochemistry (3:3:0). Prerequisite: BIOL 383, CHEM 313-314, or permission of instructor. Survey course in general biochemistry for advanced undergraduates and graduate students in biology and chemistry dealing with the chemical bases of biological systems emphasizing structure, regulation, and functions of cellular events.

553 Advanced Topics in Immunology (3:3:0). Prerequisite: BIOL 452 or permission of instructor. Comprehensive study of immunologic mechanisms as they pertain to immunologic diseases and transplantation.

556 Microbial Physiology and Metabolism (3:3:0). Prerequisite: BIOL 383 or permission of instructor. Comprehensive study of microorganisms covering aspects of growth, nutrition, transport, autotrophic and heterotrophic metabolism, regulation, and differentiation. Fall of odd-numbered years.

557 Experiments in Microbiology (2:0:6). Prerequisite: BIOL 383 or permission of instructor. Students perform a select group of experiments that illustrate techniques used in the study of microbial taxonomy, genetics, physiology, and metabolism. Spring of even-numbered years.

560 Biological Ultrastructure (4:2:6). Prerequisite: BIOL 383, CHEM 313-314, and permission of instructor. Introduction to techniques involved in electron microscopy and to the interpretation of electron micrographs of plants and animals. Fall.

561 Comparative Animal Physiology (3:3:0). Prerequisite: BIOL 326 or permission of instructor. Detailed study of selected physiological systems of invertebrates and vertebrates, emphasizing current research.

563 Virology (3:3:0). Prerequisite: BIOL 383 and 311 or permission of instructor. Fundamental concepts of the nature of viruses, virus classification, cultivation, and biochemistry. Bacteriophage and animal viruses emphasized. Fall.

564 Techniques in Virology (2:1:3). Co- or Prerequisite: BIOL 563 or permission of instructor. Emphasis on propagation of animal viruses in embryonated eggs and cell culture, titration of animal viruses and bacteriophage, serological techniques used in virology, and biochemical and biophysical characterization of viruses.

567 Molecular Genetics (3:3:0). Prerequisite: BIOL 383 or permission of instructor. Molecular structure of genetic material and control of gene expression in viruses, procaryotes, and eucaryotes.

572 Human Genetics (3:3:0). Prerequisite: BIOL 311 or permission of instructor. The inheritance of man, emphasizing current problems, including genetic control of metabolic diseases, effects of radiation and chemical agents in the environment, and directed genetic change. Fall, odd-numbered years.

573 Developmental Genetics (3:3:0). Prerequisite: BIOL 311 or permission of instructor. Genetic approaches to the problem of eucaryotic development emphasizing current research on the regulation of gene enzyme systems.

574 Population Genetics (3:3:0). Prerequisite: BIOL 307 and 311 or permission of instructor. The genetic structure and dynamics of populations, both real and ideal. Spring, even-numbered years.

575 Selected Topics in Genetics (3:3:0). Prerequisite: BIOL 311 or permission of instructor. Different topics in different years. Topics include molecular, developmental, physiological, and classical genetics emphasizing current problems and research. May be repeated once with permission of chair.

577 Biogeochimistry: A Global Perspective (3:3:0). Prerequisite: Introductory courses in ecology and chemistry or permission of instructor. Structure and function of ecosystems, their interactions as components of landscapes, and their contributions to the global environment. Course emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and their integration at the landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change.

Business Legal Studies (BULE)

School of Business Administration

If a student takes noncore, upper-level business administration courses prior to acceptance to the School of Business Administration, those courses will not count on an undergraduate degree application for any major in the school (except as general elective credit). A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced.

301 The Legal Environment of Business (3:3:0). Prerequisite: Completion of at least 60 semester hours including ENGL 101 and 302 and ECON 103 and 104. Legal environment in which business transactions are conducted including the Uniform Commercial Code and selected government regulations.

303 Law and Business Organizations (3:3:0). Prerequisite: BULE 301. Law of agency, bailments, business organizations, and property.

304 Real Estate Law (3:3:0) Prerequisite: BULE 301. Basic principles of modern real estate law including classifications of property, types of ownership, acquisition and transfer, leasing, government regulation, and taxation. Emphasis on the real estate sale including the contract of sale.

305 Government Contracting Law (3:3:0). Prerequisite: BULE 301 and MGMT 331. A survey of the legal aspects of contracting with the government including
formation, administration, modification, and termination of government contracts as well as the remedies available to the parties when a breach of contract occurs.

401 Law, Business, and Society (3:3:0). Prerequisite: Completion of a 300-400 level BULE course and at least 75 semester hours. Interrelationships between profit and nonprofit organizations and their external political, social, economic, international, and ethical environments. Also considers the public policy process and issues that arise out of the business environments.

Canadian Studies (CAST)

Public Affairs

300 Introduction to Canada (3:3:0). Prerequisite: 24 hours or permission of instructor. A survey of Canadian life from cultural, geographical, historical, political, social, and literary perspectives.

Chemistry (CHEM)

Chemistry

CHEM 211-212 is prerequisite to all other undergraduate chemistry courses except those numbered below 200. (See note 2(b) under Course Numbering at the beginning of Course Descriptions.)

103-104 Chemical Science in a Modern Society (4:3:3)-(4:3:3). (See note 2(b) under Course Numbering at the beginning of Course Descriptions.) Terminal course in chemistry for nonscience and nursing majors. Principles and application of chemistry. Topics include environmental pollution, medicine, synthetics, and earth and marine science. Credit will not be given for both this course and for CHEM 211-212. Not open to students majoring in chemistry.

211-212 General Chemistry (4:3:3)-(4:3:3). (See note 2(b) under Course Numbering at the beginning of Course Descriptions.) Basic facts and principles of chemistry, including atomic and molecular structure, gas laws, kinetics, equilibrium, electrochemistry, nuclear chemistry, and the properties and uses of the more important elements and their compounds. Students majoring in science, engineering, or mathematics should choose this course. Credit will not be given for both this course and CHEM 103-104.

251 General Chemistry for Engineers (4:3:3). Fundamental principles of chemical structure and reactivity, including atomic and molecular structure, chemical bonding, structures of ions, covalent, and metallic lattices, oxidation-reduction, electrochemistry, chemistry of metals, and introduction to organic chemistry and polymers. Enrollment is restricted to students majoring in computer and electrical engineering.

313-314 Organic Chemistry (3:3:0)-(3:3:0). (See note 2(b) under Course Numbering at the beginning of Course Descriptions.) Prerequisite: CHEM 211-212; corequisite for 313 is CHEM 315; corequisite for 314 is CHEM 318 or 320. The theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds. In the first semester all students take concurrently CHEM 315. In the second semester, students may choose either of two accompanying labs, CHEM 318 or 320; chemistry majors are required to take both.

315 Organic Chemistry Lab I (2:1:3).* Corequisite CHEM 313. Lab techniques and reactions arranged to accompany CHEM 313. One hour recitation.

318 Organic Chemistry Lab II (2:1:3).* Prerequisite: CHEM 315; corequisite CHEM 314. Continuation of CHEM 315, arranged to accompany CHEM 314. One hour recitation.

320 Organic Chemistry Lab II (2:1:3).* Prerequisite: CHEM 315; corequisite CHEM 314. Continuation of CHEM 315. Emphasis on separation and identification of organic compounds using both classical and instrumental methods. Arranged to accompany CHEM 314. One hour recitation.

*Students planning to graduate under the requirements of a catalog prior to the 1980-81 catalog can apply only one hour of credit for this course toward graduation.

321 Elementary Quantitative Analysis (4:2:6). Prerequisite: CHEM 211-212. Chemical principles with emphasis on ionic equilibria. Lab consists of gravimetric, volumetric, and instrumental methods illustrating the principal types of quantitative determinations.

322 General and Biochemical Equilibrium (2:2:0). Prerequisite: CHEM 211-212 and CS 103, 161, or ENGR 110. Study of general and biochemical equilibria in gas-phase, ionized, and heterogeneous systems. Topics include gas reactions, polyfunctional acids and bases, complex formation, solubility and free energy relationships, and the use of computer algorithms to solve equilibrium problems.

331, 332 Physical Chemistry I, II (3:3:0), (3:3:0). Prerequisite: CHEM 211-212 and MATH 113, 114; pre- or corequisite: PHYS 341 or 250. CHEM 331 is prerequisite to 332. Year-long survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

335 Physical Chemistry for the Life Sciences (3:3:0). Prerequisite: CHEM 211-212. Classical topics with emphasis on application to biology and health sciences. Rigorous mathematical approaches to the theory of physicochemical processes are avoided. Topics include gas laws and kinetic theory, structure of solids and liquids, applied thermodynamics, kinetics, and chemical equilibria. Not open to students who have passed CHEM 331. Credit is not allowed toward a major in chemistry.

337 Physical Chemistry Lab II (2:1:3). Pre- or corequisite: CHEM 332. Continuation of CHEM 336. One hour recitation.

341 Fundamental Inorganic Chemistry (3:3:0). Prerequisite: CHEM 211-212. Descriptive chemistry including chemical properties, reactions, and reaction mechanisms of inorganic elements and compounds. Topics include main group and transition elements, organometallic compounds, and bioinorganic chemistry.
422 Instrumental Analysis (4:2:6). Prerequisite: CHEM 314, 321, 331, or permission of instructor. Quantitative study of chemical reactions by the use of modern analytical instrumentation. Introduction to theory and practice of spectroscopy; ultraviolet, visible, and infrared absorption spectroscopy; electrical methods of analysis; gas chromatography; non-aqueous studies; and ion exchange.

441 Properties and Bonding of Inorganic Compounds (3:3:0). Prerequisite: CHEM 314, 332, or permission of instructor. Interpretation of physical and chemical properties of inorganic compounds in terms of currently used bonding concepts. Topics include structure and bonding of ionic compounds; covalent bonding including valence-bond, crystal-field, and molecular-orbital theories; and the stereochemical, electronic, and magnetic properties of elements.

451, 452 Special Projects in Chemistry (2:0:6), (2:0:6). Prerequisite: Chemistry major, 84 hr., and permission of department research committee. Introduction to chemical research or development. Includes literature search, conferences, and lab. Written and oral technical reports required.

500 Selected Topics in Modern Chemistry (3:3:0). Topics of interest in biochemistry and in physical, organic, inorganic, and analytical chemistry. Recommended for teachers of chemistry and general science.

501 Lab Demonstration Techniques in the Teaching of Chemistry (3:3:0). Lab for developing proficiency in conducting lab demonstrations. Recommended for teachers of chemistry and general science.

513 Special Topics in Organic Chemistry (3:3:0). Prerequisite: CHEM 313-314. Synthetic and mechanistic organic chemistry with emphasis on topics such as heterocycles, natural products, and biologically active compounds. Relation of applied organic chemistry to consumer products including drugs and agricultural chemicals.

514 Physical Organic Chemistry (3:3:0). Prerequisite: CHEM 313-314, or permission of instructor. The principles underlying molecular structures, reactivities, and reaction mechanisms. Topics include valence-bond and molecular-orbital theory, the electronic interpretation of organic reactions, stereochemistry, conformational analysis, the kinetics and thermodynamics of organic reactions, and photochemistry.

521 Theory of Analytical Processes (3:3:0). Prerequisite: CHEM 422 or permission of instructor. Physical-chemical principles and analytical techniques applicable to the analysis of solutions, including activity coefficients, solvation and ionic size, titration-curve theory, acidity functions and pH-scales, kinetic analysis, and modern techniques for designing experiments and interpreting data.

523 Selected Topics in Analytical Chemistry (3:3:0). Prerequisite: CHEM 422. Principles and applications of currently used methods of analysis. Topics include differential pulse polarography, anodic stripping voltammetry, atomic absorption, fluorescence, emission spectrometry, neutron activation, spectroscopy, and spark source mass spectrometry. Advances and applications to trace metal determinations in environmental samples.

525 Electroanalytical Chemistry (3:3:0). Prerequisite: CHEM 422 or permission of instructor. Theory of polarography, stationary-electrode and hydrodynamic voltammetry, chronopotentiometry, chromatography, controlled-potential electrolysis and coulometry at controlled potential, coulometric titration, and a number of related techniques, with emphasis on their applications in analysis and research.

529 Instrumental Techniques Laboratory (2:0:6). Prerequisite: Permission of instructor. Equipment, experimental procedures, and data interpretation for one or two instrumental techniques of analysis and research selected by the student, such as gas chromatography/mass spectrometry, high-performance liquid chromatography, magnetic resonance spectroscopy, and polarography and other electroanalytical techniques. An individual project is carried out in close collaboration with an instructor. Enrollment may be repeated if different techniques are selected.

533 Chemical Thermodynamics and Kinetics (3:3:0). Prerequisite: CHEM 331 and 332. Advanced study of topics in physical chemistry, selected from among the areas of thermodynamics, atomic and molecular structure, spectroscopy, and chemical kinetics. Content varies and is announced before registration. May be retaken for credit with permission of department.

546 Bioinorganic Chemistry (3:3:0). Prerequisite: CHEM 563 or permission of instructor. Survey of the structures, functions, and properties of metal ions in biological systems. Modern inorganic coordination chemistry and the study of metal-ion sites in metalloenzymes and metalloproteins. Enzymatic catalysis, oxygen carriers, electron-transport phenomena, and inorganic model systems.

551 Environmental Chemistry (3:3:0). Prerequisite: CHEM 313 and 314 or permission of department. CHEM 331 or 335 is recommended. Chemical behavior of pollutants in air, water, and soil. Emphasis on thermodynamic principles and chemical transformation processes important in the fate, transport, and effects of natural and synthetic organic substances in the environment. Topics include partitioning, photolysis, biodegradation, aqueous geochemistry, and modeling. Chemical basis of prominent environmental problems such as ozone depletion and acid rain is presented.

http://catalog.gmu.edu

565 Biochemistry Lab I (2:1:3). Prerequisite or corequisite: CHEM 563. Introduction to experimental methods used to study the chemical and physical properties of proteins, carbohydrates, lipids, and nucleic acids. Complements the corresponding lecture course. Designed for those who have had no previous exposure to the specialized techniques used in biochemical research. One-hour recitation.

566 Biochemistry Lab II (2:1:3). Prerequisite: CHEM 563 and 564. Continuation of CHEM 565. One-hour recitation.

567 Protein Biochemistry (3:3:0). Prerequisite: CHEM 563, 564, or permission of instructor. Topics include the structural, transport, and immunological roles of proteins with emphasis on the role of proteins as biological catalysts. Current theories of enzyme catalysis as well as pertinent experimental techniques. Important structural proteins from muscle and connective tissue and free and membrane-bound transport proteins.

Chinese (CHIN)

Foreign Languages and Literatures

101 Elementary Chinese (3:3:1). Introduction to Mandarin including basic grammar, oral expression, listening comprehension, reading, and writing. Language lab is an integral part of the course.

102 Elementary Chinese (3:3:1). Prerequisite: CHIN 101. Continuation of CHIN 101. Lab work required.

201 Intermediate Chinese I (3:3:1). Prerequisite: CHIN 102 or equivalent. Further development of skills acquired in CHIN 101 and 102 including grammar, oral expression, listening comprehension, reading, and writing. Three classroom hours and one laboratory hour per week. CHIN 201 and 202 must be taken in sequence. Lab work required.

202 Intermediate Chinese II (3:3:1). Prerequisite: CHIN 201 or equivalent. Continuation of CHIN 201. Lab work required.

Classics (CLAS)

Foreign Languages and Literatures

250 Classical Myths and Legends (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Myths and legends of Greece and Rome with illustration of their role in classical and modern literature and art. Course work in English. May be taken to fulfill general requirement in literature for baccalaureate degree.

300 Homer and Greek Tragedy (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. The Iliad and Odyssey and selected plays by Aeschylus, Sophocles, and Euripides. Discussion of the social setting of both types of literature. Course work in English. May be taken to fulfill general requirement in literature for baccalaureate degree.

301 Greek and Roman Tragedy (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Course follows the development of tragedy as a genre from its origins in the Greek archaic age through the various transformations it underwent in the works of Aeschylus, Sophocles, and Euripides and its reappearance in the Roman world in the Latin tragedies of Seneca. It considers the influences among the poets as well as the means by which Greek tragedy influenced Roman and later cultures. In addition to readings, a number of plays, or their later variants, may be studied in visual form. Course work in English. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

302 Greek and Roman Comedy (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Course studies the forms, contexts, and developments of comedy as a dramatic form in the Greco-Roman world, from its origins in archaic Greek ritual through the political satire of Aristophanes. It also traces the development, through the influence of Greek tragedy, of the situation comedies of New Comedy in the Hellenistic age, and the translation and adaptation of New Comedy by the Roman dramatists Plautus and Terence. In addition to readings, a number of plays, or their later variants, may be studied in film form. Course work in English. May be taken in fulfillment of the general requirement in literature for baccalaureate degrees.

310 Greek and Roman Epic (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Course explores the various developments of and within Greek epic as a genre, from its beginnings in the Greek archaic age in the works of Hesiod and Homer through the various transformations it underwent in the works of later Greek and Roman authors such as Apollonius of Rhodes, Lucretius, Virgil, Ovid, Statius, and Lucretius. Course work in English. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

390 Topics in Classical Literature (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Course studies the forms, contexts, and developments of a distinctive literary genre or cultural phenomenon in the Greco-Roman world, focusing on careful study of the most representative texts and authors. Course work in English. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

Communication (COMM)

Communication

100 Introduction to Communication (3:3:0). Students will gain an understanding of the elements affecting speech communication at each level: intrapersonal, interpersonal, small group, organizational, intercultural, public and mass communication. Effective listening and critical evaluation of persuasive messages will be stressed, as well as techniques for self-monitoring to improve speaker skills in communication.

101 Introduction to Interpersonal Communication (3:3:0). Principles involved in communicating in interpersonal relationships with the primary focus upon dyadic and nonpresentational group situations. Skill
108 Introduction to Oral Interpretation (3:3:0). Principles involved in the oral communication of the written word from writer, to reader, to audience. Practice in oral communication of prose, poetry, and drama.

110 Introduction to Small Group Discussion (3:3:0). Emphasizes the development of presentational ability in a group, decision-making group maintenance, and leadership and participant skills. Preliminary study of group dynamics.

140 Forensics Seminar in Creative Arts (1:0:6). Prerequisite: Audition. Intensive work in creative forensics events—rhetorical criticism, epidemic speech, informative speaking, persuasive speaking, extemporaneous speaking, after-dinner speaking, and impromptu speaking. May be taken four times.

141 Forensics Seminar in Re-creative Arts (1:0:6). Prerequisite: Audition. Intensive work in re-creative forensic events—dramatic duo, mixed interpretation, poetry interpretation, dramatic pairs, original poetry, and prose interpretation. May be taken four times.

142 Forensics Seminar in Debate: Affirmative Strategies (1:0:6). Work in affirmative research, case construction, and oral presentation, directed toward affirmative analysis of the intercollegiate debate proposition. May be taken four times.

143 Forensics Seminar in Debate: Negative Strategies (1:0:6). Work in negative research, case attacks, and oral presentation directed toward negative analysis of the intercollegiate debate proposition. May be taken four times.

145 Newspaper Workshop I (1:1:2). Prerequisite: Broadside staff position or permission of instructor. Practical experience in writing, editing, or business aspects of newspaper production at Broadside or other papers. Coordinated by the newspaper faculty adviser. May be repeated for a total of three semester hours.

146 Yearbook Workshop I (1:1:2). Prerequisite: COMM 100 or equivalent and permission of instructor. Practical experience in photography, layout, production writing, and sales for the university yearbook. Coordinated by the yearbook faculty adviser. May be repeated for a total of three semester hours.

148 Radio Workshop I (1:1:3). Prerequisite: 100-level COMM course or permission of instructor. Practical experience in production, newswriting, promotions, advertising, public relations, programming, or newscasting for the student radio station, WGMU. May be repeated for a total of three credits.

150 Communication Skills for International Students (3:3:0). Prerequisite: International student in first year of study in the U.S. or permission of instructor. Development of communication skills required to cope effectively with life in American society. Introduction to speaking, listening and nonverbal skills required to communicate appropriately in university study. Students become acquainted with U.S. media and U.S. social, political, economic, and religious values and customs. Does not fulfill general education requirements met by COMM 100, 101, 110, 120 or 130.

157 Television Workshop I (1:1:2). Practical experience in television production crew work (audio operator, television camera operator, floor manager, character generator operator, and grip). Students work with instructors to produce short programs and announcements. May be repeated for a total of 3 semester hours.

203 Introduction to Journalism (3:3:0). American journalism including components in journalism history and the First Amendment, the role of the professional journalist, print and broadcast news operations, the economics of newspaper publishing, and other topics. The course serves both as a starting point for those desiring to pursue journalism studies and an orientation for the news consumer interested in learning more about news business operations.

230 Case Studies in Persuasion (3:3:0). Case study applications of common persuasive message strategies and approaches. Basic principles of the persuasive process. Case studies include advertisements, speeches, and persuasive activities from all segments of society.

261 Theories of Argumentation (3:3:0). Critical analysis of argument within communicative settings with emphasis upon deductive and inductive forms of reasoning, fallacies in reasoning, tests of evidence, and the models for such analysis.

300 Foundations of Public Communication (3:3:0). Prerequisite: 3 hours of 100- or 200-level COMM credit, or 54 hours. Theories and principles of public communication with emphasis upon methods of persuasion, propaganda, speaker/listener alignments in the public setting, and measurements of effective public communication. Spring.

301 Foundations of Interpersonal Communication (3:3:0). Prerequisite: 3 hours of 100- or 200-level COMM credit, or 54 hours. Theories and principles of interpersonal communication with emphasis upon models of communication, verbal and nonverbal message systems, and analysis of communicative relationships. Fall.

302 Foundations of Mass Communication (3:3:0). Prerequisite: 3 hours of 100- or 200-level COMM credit, or 54 hours. Principles of mass communication covering history and development of mass media, external and internal factors affecting the media consumer, characteristics unique to the various forms of mass media, and the function and future of the media. Fall, spring.

305 Foundations of Intercultural Communication (3:3:0). Prerequisite: ANTH 114 and 3 hours COMM credit or permission of instructor. Analysis of communication variables as they relate to intercultural encounters. Emphasizes the influence of culture upon the communi-
Communication (COMM) 173

306 Issues in Intercultural Communication (3:3:0). Prerequisite: COMM 305 or permission of instructor. Continuation of COMM 305. Basic principles of intercultural communication are applied to the analysis of specific situations involving cultural differences. A model of intercultural communication analysis is developed and applied to issues dealing with relations between a dominant society and subcultures, social change in developing countries, and international relations.

307 Field Study in Intercultural Communication (3:3:0). Prerequisite: COMM 305 or permission of instructor. A structured communication learning experience centered on one to three weeks of travel in a foreign environment involving another country or a relevant subcultural group in the United States. Students must complete readings relevant to communication in the host society, laboratory assignments that require the student to make observations about intercultural communication, and a personal learning paper in which the student integrates learning from observation and interactions during the travel. Students must also attend seminar sessions and lectures. Intercultural communication concepts and principles are used to analyze the students' observations and communication experiences.

326 Rhetoric of Social Movements and Political Controversy (3:3:0) Prerequisite: 3 hours of COMM credit. Social and political forces of the contemporary era from a communication perspective with emphasis on political leadership, pressures for social/political change, and transformations in the communicative environment.

330 Principles of Public Relations (3:3:0). Prerequisite: COMM 230 and 54 hours or permission of instructor. Survey of the nature, history, scope and practice of public relations in business, trade associations, nonprofit organizations, and educational institutions. Principles and practice of public relations, including topics such as broadcast, publicity, and public service announcements; marketing and research; planning and publicity for special events; house publications; institutional advertising.

332 Nonverbal Communication (3:3:0). Prerequisite: 3 hours of COMM credit. Theory, principles, and methods of analysis of nonverbal communication. Emphasis on physical behavior, facial expression, personal space and territoriality, physical appearance, vocal cues, and environment.

335 Organizational Communication (3:3:0). Prerequisite: COMM 100, 130, or 301, or permission of instructor. Theory, practice, and methods of analysis of communication within organizations. Emphasis on the process and structure, interaction formats, mechanisms for modification, and career paths in organizational communication.

340 Forensics Seminar in Creative Arts (1:0:6). Prerequisite: 4 credits of COMM 140 or 54 hours and audition. Intensive work in various types of creative forensics events—rhetorical criticism, epideictic, informative, persuasive, extemporaneous, after-dinner, and impromptu speaking. May be taken four times.

341 Forensics Seminar in Re-creative Arts (1:0:6). Prerequisite: 4 credits of COMM 141 or 54 hours and audition. Intensive work in various types of re-creative forensics events—dramatic duo, mixed interpretation, dramatic pairs, original poetry. May be taken four times.

342 Forensics Seminar in Debate: Affirmative Strategies (1:0:6). Prerequisite: 4 hours of COMM 142 or 54 hours and audition. Work in affirmative research, case construction, and oral presentation directed toward affirmative analysis of the intercollegiate debate proposition. May be taken four times.

343 Forensics Seminar in Debate: Negative Strategies (1:0:6). Prerequisite: 4 credits of COMM 143 or 54 hours and audition. Work in negative research, case attacks, and oral presentation directed toward negative analysis of the intercollegiate debate proposition. May be taken four times.

344 Parliamentary Procedure (1:1:0). Prerequisite: 54 hours or permission of lecturer. Procedures of parliamentary law as practiced in voluntary organizations. Practice in chairing groups that conduct business according to Roberts Rules of Order Newly Revised. A brief review of other parliamentary systems.

345 Newspaper Workshop II (1:1:2). Prerequisite or corequisite: 3 hours of COMM 145, COMM 351, or permission of instructor. Practical experience in writing and editing for the student newspaper or other papers. Coordinated with the instruction in COMM 351. May be taken three times.

346 Yearbook Workshop II (1:1:2). Prerequisite or corequisite: COMM 351. Practical experience in writing and editing for the student yearbook. Coordinated with the instruction in COMM 351. May be taken three times.

347 Literary Magazine Workshop (1:1:2) Supervised experience in editing, page make-up, and reviewing submissions for the university's literary magazine. May be taken three times for a total of three credit hours.

348 Radio Workshop II (1:1:3). Prerequisite: 3 hours of COMM 148 or permission of instructor. Intense practical application of previously acquired skills in production, promotions, advertising, public relations, programming, or newswriting for the student radio station, WGMU.

349 Student Leadership Seminar (1:3:0). Prerequisite: 54 hours or permission of instructor. Introduction to leadership concepts. An experiential seminar focusing on practical application of leadership concepts in a student organization setting.

350 Mass Communication and Public Policy (3:3:0). Prerequisite: COMM 100, 302, or permission of instructor. Investigation of the manner in which matters of public importance are communicated via the various channels of mass communication. Emphasis on regulations designed to minimize the influence of mass media on public decision making, and manipulation of the media by pressure groups, politicians, and media gatekeepers.

351 Newswriting and Reporting (3:2:2). Prerequisite: ENGL 101 or COMM 203 and 40 wpm keyboard skill.
Experience in actual newsgathering. In addition to the news reporting component, numerous in-and-out-of-class writing assignments train students in the unique writing style of the journalist.

352 News Editing (3:2:2). Prerequisite: COMM 351 and keyboard skills. Techniques of copy editing, including copy preparation, headline writing, news judging, and newspaper make-up. Introduction to working on newspaper copy desks. Applications for anyone preparing copy for publication.

353 Broadc Journalism (3:3:0). Prerequisite: COMM 351 or permission of instructor, and keyboard skills. Investigation of the unique writing style of journalists in the electronic media. Emphasis on concise, conversational, and timely news writing. Techniques of mixing the words of the report with the sights and/or sounds of the news story.

354 Radio Broadcast Operations (3:1:4). Prerequisite: COMM 302 or permission of instructor. Theory and practice of operational radio broadcasting. Topics include the programming, production, and promotion aspects of commercial and noncommercial radio.

355 Television Production (3:1:6). Prerequisite: COMM 302 or permission of instructor. Theory and practice of television production. Includes work with video and audio equipment in a studio lab. Practice in all operational capacities in production of video programs.

356 Broadcast Performance (3:3:0). Prerequisite: COMM 120 or 210. Development of radio and television announcing skills. Practice in news, entertainment, commercial, and sports announcing. Discussion of studio technology and voice and diction skills for broadcasting.

357 Television Workshop (1:1:3). Prerequisite: COMM 100 or permission of instructor. Practical experience in television production while working in the university telecommunications studio. Coordinated by the faculty of the Department of Communication. May be repeated for a total of three hours.

358 Electronic Field Production (3:1:5). Prerequisite: COMM 302 or permission of instructor. Introduction to the techniques, theory, and practice of television field production, including preproduction, production, and postproduction. May be repeated for a total of three hours.

361 Advanced Newswriting and Reporting (3:2:3). Prerequisite: COMM 351 or permission of instructor. Advanced reporting course where students engage in actual newsgathering outside the classroom and writing for publication in the university newspaper or other sources.

375 Mass Communication Advertising and Promotions (3:3:0). Prerequisite: COMM 302 or permission of instructor. Covers the history, regulation, and ratings of advertising as well as media buying, advertising campaigns, and the strengths and weaknesses of media vehicles used in advertising.

389 Internal and Public Relations Communication for Trade Associations (3:3:0). Prerequisite: 54 hours or 3 hours lower-division COMM credit. Principles of editing and journalism as applied to the publication, public relations, and advertising needs within a corporate environment. Job requirements of editorial positions in the fields of public relations, publications, and information as defined by trade associations, nonprofit organizations, and large corporations.

399 Special Topics in Speech Communication (3:3:0). Prerequisite: Permission of instructor. Study of speech communication through topics such as basis for speech production, Afro-American rhetoric, and communication reticence. Topics vary and some topics require laboratories. May be repeated with permission of department.

400 Introduction to Research Methods in Communication (3:3:0). Prerequisite: 54 hours or permission of instructor. Primary research methodologies used in communication. Rhetorical and experimental-statistical methodologies. Fall.

401 Relational Communication (3:3:0). Prerequisite: COMM 301 or permission of instructor. Comprehensive study of the theories and research associated with the development and deterioration of interpersonal relationships. Emphasis on such dimensions as interpersonal needs, norms, rituals, attraction and attribution, intimacy, conflict and conflict resolution, roles, male-female communication, and rhetorical sensitivity.

411 Readers Theatre II (3:3:0) Prerequisite: COMM 410. Intensive practice in directing and performing group communication of literature.

420 Senior Seminar in Theories of Communicative Interaction (3:3:0). Prerequisite: Senior standing and acceptance into the communication major or permission of instructor. Primary theories explaining human communicative behavior. Traditional rhetorical theory and contemporary social science theories. Fall, spring.

430 Persuasion (3:3:0). Prerequisite: COMM 230 or permission of instructor. Theories of persuasive communication including traditional and contemporary attitudinal change theories; the relationship between speaker, message, and audience; and the relationship between attitudinal and behavioral change.

431/GOVT 431 Information Technology and the Political Process (3:3:0). Prerequisite: GOVT 103 or 133, or junior status as a major in communication, or permission of instructor. Study of the impact of the information network of wire and wireless communications and computers on the political process in advanced industrial countries.

434 Interviewing (3:3:0). Prerequisite: 54 hours or permission of instructor. Theory, principles, and practical skills essential to the interview process. Emphasis on situations such as the information-gathering interview, the journalistic interview, the employment interview, and the performance-appraisal interview.

450 Internship in Communication (3:1:10). Prerequisite: major in communication, 54 hours, and permission of department. On-the-job training in communication
through approved field-work study programs. Internships are arranged and supervised by the Department of Communication through an internship coordinator or adviser. May be repeated.

451 Facilitating Communication Education (3:1:5)
Theory and practice in facilitating the learning of communication principles and skills. Students work as instructor aides in lower-division classes under the supervision of a faculty member. Activities include facilitation of small group activities and individual critiquing of oral performances. May be repeated once for credit.

454 Responsible Communication in a Free Society (3:3:0). Prerequisite: COMM 300, 302, or permission of instructor. Major issues surrounding the role of speech, press, and electronic media in society. Areas of study include the history of free speech/press issues in society, the role of the government in regulating the marketplace of ideas, and the responsibility of the individual in a free society.

455/HIST 455 History of Print Journalism (3:3:0). Prerequisite: 3 hours COMM or HIST credit. Development of print journalism from its inception to the present, with emphasis on the interaction of technology, audience, and government intervention. Topics include birth of the press, development of the modern newspaper and American development including the Revolutionary and Civil Wars, the rise of the independent press, and the Yellow Journalism period.

456 Comparative Mass Media (3:3:0). Prerequisite: COMM 302 or permission of instructor. Major foreign mass media systems as they compare to the American mass media system. Emphasis on comparing the systems of America, England, France, Germany, and other countries.

460 American Public Address (3:3:0). Prerequisite: COMM 300 or permission of instructor. Analysis of religious, political, and social speaking from colonial times to the present. Such speakers as Susan B. Anthony, Jonathan Edwards, Daniel Webster, and others are considered.

465 Topics in Communication and Gender (3:3:0). Prerequisite: COMM 400 or permission of instructor. In-depth exploration of selected topics involving gender and communication. Topics covered may include women in media, women as rhetors, male/female communication, and communication and sex roles. Specific interests are examined in a seminar setting. Course may be repeated with approval of department.

475 Journalism Law (3:3:0). Prerequisite: permission of instructor. Law as it relates to the working journalist. Topics include libel, invasion of privacy, free press/fair trial, First Amendment, broadcast regulation, access to media, and advertising. Extensive use of the “case approach” involving the study of leading court decisions in mass media law.

499 Independent Study in Communication (3:0:0). Prerequisite: 54 hours and permission of department. In-depth study of a selected area in public, interpersonal, or mass communication or journalism. The independent study application must be processed before the start of the semester in which the work is to take place. May be repeated.

Communication courses at the 500-level are open to postbaccalaureate students or advanced undergraduates with permission of department.

501 Communication in Professional Relationships (3:3:0). Theoretical perspectives and relevant research related to communication techniques useful in various professional roles and situations. Relates theoretical foundations to practice, allowing students to assess theories of communication and their applications in individual professional fields.

502 Theories of Mass Communication (3:3:0). Prerequisite: 3 hours of COMM credit. Theories of mass communication that have guided the development of mass media. Emphasis on the major scientific and humanistic approaches to the question of mass media effects.

504 Communication and Interpersonal Conflict (3:3:0). Prerequisite: Admission to Graduate School, or senior standing and permission of instructor. Theoretical introduction and experiential learning in the role of communication in conflict management. The focus is upon interpersonal interactions, including dyadic and small-group levels in various settings such as friendships, marriage, family, and the workplace. The course examines the factors that generate conflicts and the communication strategies and skills that help shape conflict interaction toward productive ends. Class activities include lectures, guided discussions, case analyses, exercises, and simulations.

505 Intercultural Communication (3:3:0). Analysis of communication variables as they relate to communication across cultures. Topics include nonverbal communication, time conceptualizations, perceptions and attitudes, values, social organization patterns, cultural norms, language, ethics, conflict across cultures, and research in intercultural communication.

506 Communication in International Organizations (3:3:0). Analysis of communication variables as they relate to organizational and managerial functions within international organizations. Includes developing an understanding of how cultural differences influence managerial activities and on learning to deal effectively with these differences.

510 Studies in Oral Interpretation (3:3:0). A comprehensive examination of the role of the oral communicator in the selection, adaptation, and performance of literature. Seminar course topics vary depending on genre being considered. May be repeated three times for credit if each course is devoted to a different genre.

530 Theories of Small Group Communication (3:3:0). Advanced-level theory and practice of small group interaction. Examination of current research. Focus on learning applications of theories to relevant settings.

531 Approaches to Group Facilitation (3:3:0). Introduces various theoretical and practical approaches to group facilitation with in-depth focus and practice in one approach. Students participate in group sessions, analyze videotapes of decision-making groups, and practice methodologies for facilitating group interaction.

534 Theories of Interpersonal Communication (3:3:0). Prerequisite: COMM 301 or permission of instructor. Analysis of contemporary theories, concepts,
and approaches to the improvement of interpersonal communication. Includes extensive examination of interpersonal communication research.

535 Organizational Communication (3:3:0). Analysis of communication systems and processes within organizations, both public and private. Specific topics include conflict management, group decision making, interviewing, technical presentations, and using various channels for improving internal and external communication for the organization.

536 Communication Consulting (3:3:0). Prerequisite: COMM 335. Investigation of theories providing the foundation for communication consulting. Provides both the theoretical information and the mechanisms for application necessary to modify communicative behavior within organizations.

540 Directing Forensics Programs in Individual Events (3:3:0). Investigation of the role of the individual events forensics educator in developing a high school or college program, coaching and judging competitive original speaking and oral interpretation events, and managing tournaments.

542 Directing Debate Activities (3:3:0). Theory and practice of competitive debate. Emphasis on traditional and contemporary theories of debate, administrative activities related to the direction of a debate program, and methods of instruction in debate, including analysis of current debate topics. Designed for both novice and experienced debate coaches.

543 Advanced Debate Theory (3:3:0). Prerequisite: Prior debate and/or debate coaching experience or permission of instructor. Theoretical issues involved in the practice of debate. Critical examination of new issues in theory and discussion of theory revisions designed to enhance academic debate.

550 Communication in the Classroom (3:3:0). Prerequisite: 84 hours. Communication theories and skills needed to manage the communicative environment in the classroom. Nonverbal aspects of space, time, action, and form are considered as they affect teaching choices. Verbal patterns for skills of classroom management: questioning skills, enhancing students' self-concept, systematic feedback, parental communication, and student development.

551 Developing Students' Speaking and Listening Skills (3:3:0). Prerequisite: 84 hours. Emphasis on development of assignments that both directly and indirectly develop communication competence in children and adolescents. Covers five functions of communication and their development in the context of integrating basic skills at the elementary level and direct teaching at the secondary level. Philosophies of communication education and curriculum development, as well as competency assessment, are covered.

554 Telecommunications Policy and Regulation (3:3:0). Prerequisite: COMM 302 and senior standing in communication or public affairs, or a baccalaureate degree. Review of the history and principles of telecommunications regulation. Study of relevant policymaking and regulatory institutions and their roles in charting the course of telecommunications in the United States. Examination of the role of citizens and lobby groups in the regulatory process.

555 Theories of Telecommunications Production (3:3:0). Prerequisite: Master of Arts in Independent Study (MAIS), approval or permission of instructor. Theories of telecommunications production involving computers, computer graphics, television cameras, computerized editing, audio mixing, and the panoply of other production tools available for electronic communication. Explores the problems of fitting messages to the various media including the aesthetic demands of products imposed by new technologies.

556 Global Communication (3:3:0). Prerequisite: COMM 302 and senior standing in communication or public affairs, or a baccalaureate degree. Study of global telecommunication channels and artifacts of international mass communication, with focus on discussion of problems of free flow of information, the roles of nations and international organizations in fostering global communication, and other technologies. Specific perspectives are developed as to worldwide social, political, educational, and economic development.

590 Seminar in Communication (3:3:0). Intensive study of specific topics in interpersonal, public, and mass communication. Specific content varies. May be repeated for credit with permission of department.

596 Directed Readings and Research (1-3:0:0). Prerequisite: Permission of department. Reading and research on a specific topic under the direction of a faculty member. A written report is required; an oral or written examination may be required. Course may be repeated for a maximum of six credits.

597 Independent Production (1-3:0:0). Prerequisite: Permission of department. Media or creative production activities under the direction of a faculty member. A completed production is required; a written report and an oral examination may be required. Course may be repeated for a maximum of six credits.

Comparative Literature (CL)

English/Foreign Languages and Literatures

300 Introduction to Comparative Literature (3:3:0). Prerequisite: Junior standing and intermediate proficiency in a foreign language. Introduction to methods of comparative literature through study, in translation, of a selected theme or motif as it appears in various periods, genres, or national literatures. Readings drawn chiefly from English, American, or European literature; on occasion, non-Western literature is used. Students are encouraged to work with texts in the original language.

514 Theories of Comparative Literature (3:3:0). Prerequisite: CL 300 and senior standing or permission of instructor. Intensive study of the major theories of comparative literature with special emphasis on international movements and their characteristic themes. Students work with texts in the foreign language of their concentration; other texts are studied in translation.

Computer Science (CS)

Computer Science

Knowledge of high school algebra is a prerequisite for all computer science courses.
103 Introduction to Computing (3:3:0). Prerequisite: Knowledge of high school algebra. Introduction to computers and computer programming, including the organization of a computer system, the design and use of computer software, and the types and organization of data. Topics include the use of a computing system and the study and use of a high-level programming language and applications development. This course is intended for noncomputer science majors; credit for this course does not count toward the requirements for a major in computer science. Students who have received credit for CS 112 may not receive credit for this course.

112 Computer Science I (4:3:1). Prerequisite: Second year of high school algebra. Introduction to computer science for majors and others with a serious interest in computer science. Topics include an overview of computer system hardware and organization, problem-solving methods and algorithm development, program structures, abstract data types, simple data and file structures, introduction to algorithms of complexity and program correctness, and applications development in a high-level programming language that supports modular design.

161 Introduction to a Programming Language (1:1:0). Introduction to basic concepts of a computer language and its applications (e.g., computer graphics, expert systems, data base management packages, business applications).

211 Computer Science II (3:3:0). Prerequisite: Grade of C or better in CS 112. Continuation of CS 112. Topics include abstract data types and data structures (sets, files, strings, linked lists, stacks, queues, trees, graphs) and examples of their applications. Emphasis on program development continues and is reinforced through several larger programming projects. Additional programming language instruction will supplement the major topics of this course.

262 Introduction to Computer Statistical Packages (3:3:0). Prerequisite: CS 161 and a course in statistics. Use of computer packages in the statistical analysis of data. Topics include data entry, checking, and manipulation, the use of computer statistical packages for analysis, and analysis of variance.

311 Assembly Language Programming (3:3:0). Prerequisite: Grade of C or better in CS 211. Symbolic assembly language and computer structures: arithmetic and logical operations; machine representations of numbers, characters, and instructions; input-output and data conversions; addressing techniques; assembler directives; subroutine linkage; and macroprocessing.

312 (formerly 212) Computer Science III (3:3:0). Prerequisite: Grade of C or better in CS 211. Students are advised to take MATH 305 concurrently, or to have taken MATH 125. Additional examples of tree and graph algorithms, sorting, searching, and string processing. Introduction to resource management, such as memory, time, and processors. Continued emphasis on abstract data types, algorithmic strategies, and program verification and complexity. Additional topics may include logic programming, proof of correctness, and development of parallel algorithms.

331 Automata and Formal Languages (3:3:0). Prerequisite: CS 211 and MATH 305 or 125. Theory of formal languages, grammars, and abstract computing machines, Chomsky's hierarchies of grammars and languages, transducers and acceptors, deterministic and nondeterministic machines. Regular expressions and context-free grammars and their application in the design of software, such as compilers and text processors.

363 Comparative Programming Languages (3:3:0). Prerequisite: CS 311. Key programming mechanisms described independently of particular machines or languages including control, binding, procedural abstraction, and types. Systematic survey of diverse high-level language capabilities.

365 Computer Systems Architecture (3:3:0). Prerequisite: CS 311 and ENGR 301. Computer hardware organization, software structure, and data organization. Students complete a term project that simulates one computer system on another.

370 Introduction to File Processing (3:3:0). Prerequisite: CS 311. File organization methods and access methods for secondary storage. Examination of sequential and direct file structure on tapes and direct access devices.

421 Introduction to Software Engineering (3:3:0). Prerequisite: CS 311. Techniques in software design and development. Discussion of formal models of structured programming, software engineering methods and tools, functional or object-oriented design, and documentation. Working in teams, students organize, manage, and develop a software engineering project.

440 Language Processors and Programming Environments (3:3:0). Prerequisite: MATH 125, CS 311 and 312. Survey of basic programming language processors and software development tools: assemblers, interpreters, compilers, and CASE tools. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code generation techniques.

450 Data Base and Object-Oriented Concepts (3:3:0). Prerequisite: CS 365. 370 strongly recommended. Data models and data sublanguages for the relational, hierarchical and network approaches to data base management systems. Normal forms. External models, implementation, data independence, alternative logical views of data and object-oriented design. Comparison of approaches in the context of applications.

451 Computer Graphics and Software Design (3:3:0). Prerequisite: CS 211 and MATH 125 or CS 311. Graphics devices and line generation, 2D computer graphics, graphics packages, raster graphics, and a programming project that includes designing a menu-driven system.

455 Computer Networking Systems (3:3:0). Prerequisite: CS 365. Data base systems, data communication systems. Topics include the role of exchanges, concentrators, multiplexors, buffering, network analysis, cost and design; software consideration.

466 Computer System Programming (3:3:0). Prerequisite: CS 311 and 312. Assemblers, compilers, system structures, operating systems, and machine architecture.

480 Introduction to Artificial Intelligence (3:3:0). Prerequisite: CS 312 and MATH 305 or 325. Principles of representation, heuristic search, and control in the context of specific intelligent systems in such areas as problem solving, vision, medical diagnosis, and natural language. Includes the LISP programming language as a means of representation.

483 (465) Data Structures and Analysis of Algorithms (3:3:0). Prerequisite: CS 312 and MATH 305 or 325. Math necessary to properly analyze the computational effort of a given algorithm. Specific algorithms are analyzed and improved.

498 Independent Study in Computer Science (1-3:0:0). Prerequisite: 54 hours, major in computer science, and permission of instructor. Research and analysis of selected problems or topics in computer science. Must be arranged with an instructor and approved by the department chair before registering. May be repeated for a maximum of 6 credits if the topics are substantially different.

499 Special Topics in Computer Science (3:3:0). Prerequisite: 54 hours and permission of instructor; specific prerequisites vary with nature of topic. Topics of special interest to undergraduates. May be repeated for a maximum of 6 credits if the topics are substantially different.

Dance (DANC)

Dance and Theatre

101 Dance Appreciation (3:3:0). Introduction to dance as a cultural art form. Elements of dance are examined separately and combined in various dance forms. A brief survey of the basic forms leads to a more intensive study of modern and the new dance. Criticism and evaluation are stressed.

125 Beginning Modern Dance (3:3:0). Develops knowledge, skills, and an appreciation of modern dance through the presentation of fundamental techniques and creative movement experiences.

126 Beginning Intermediate Modern Dance (3:3:0). Prerequisite: DANC 125 or permission of instructor. Designed to further develop the knowledge, skills, and appreciation of modern dance through the continued exploration of techniques, aesthetics, and creativity.

127 Contemporary Dance I (3:3:0). Prerequisite: Permission of instructor. Beginning technique course in modern dance designed specifically to meet the professional needs of students who have declared, or are seriously considering, a major in dance. May be repeated once for credit.

131 Beginning Jazz Technique (3:3:0). Students are advised to take DANC 125 concurrently. Mechanics of movement in the jazz style of dance. Emphasis on development of techniques for jazz training. May be repeated once for credit.

141 Beginning Ballet (3:3:0). Introduction to the elements of ballet technique and vocabulary. Stress on learning the elementary positions and movements characteristic of this highly stylized art form. May be repeated once for credit.

142 Beginning Intermediate Ballet (3:3:0). Prerequisite: DANC 141 or permission of instructor. Further development of knowledge, skills, and appreciation through the technique, vocabulary, and history of ballet.

161 Beginning Tap Dance (3:3:0). Elementary exploration into the rhythms and steps basic to the art form of tap dancing.

224 Intermediate Modern Dance (3:3:0). Prerequisite: DANC 126 or permission of instructor. Continued exploration in movement and motion to further develop technical ability in dance. Emphasis on improvement of technical and performance skills. May be taken four times for credit.

231 Intermediate Jazz Technique (3:3:0). Prerequisite: DANC 131 or permission of instructor. Continued study of movement in the jazz style of dance. May be taken four times.

241 Intermediate Ballet (3:3:0). Prerequisite: DANC 141 or permission of instructor. Continued training at the intermediate level. Emphasis on increasing technical proficiency and aesthetic awareness. May be taken four times.

251 Dance Composition I (3:3:0). Prerequisite: DANC 125 or permission of instructor. Introduction to basic principles for composing movement for dance. Emphasis on simple compositional forms in dance as they apply to the solo performer.

252 Dance Composition II (3:3:0). Prerequisite: DANC 251 or permission of instructor. Exploration of the elements of compositional forms in dance as they apply to group forms. Experience in composing and performing duets, trios, quartets, and mass pieces.

305 Dynamic Alignment (3:3:0). Prerequisite: 6 hours of dance courses; course work in anatomy and kinesiology recommended. Aspects of anatomy and kinesiology that directly apply to the correct development of dance technique. Emphasis on the use of exercise correctives and imagery to correct insufficient muscle pattern and reduce stress upon the body.

313 Rhythmic Analysis and Music Resources for Dance (3:3:0). Prerequisite: MUSI 101, 6 hours prior work in dance, or permission of instructor. Examines rhythmic structure of music for dance through example, analytical methods, and compositional procedures. Music resources include study of forms and styles from the medieval period through the twentieth century.

314 Music Accompaniment for Dance (3:3:0). Prerequisite: DANC 313 or permission of instructor. Lecture practicum course that gives both dance and music students practical experience in dance accompaniment, primarily through the use of percussion instruments.
Students use their knowledge of music and rhythm to accompany and enhance a dance technique class.

327 Advanced Modern Dance (3:0:0). Prerequisite: DANC 224 or permission of instructor. Continued training for advanced students. Emphasis on attainment of high-quality technical and performance skills. May be taken eight times.

341 Advanced Ballet (3:3:0). Prerequisite: DANC 241 or permission of instructor. Performance/lab dealing with ballet at the advanced level. Emphasis on attainment of high-quality technical and performance skills. May be taken eight times.

350 Advanced Dance Improvisation (3:3:0). Prerequisite: DANC 125, 126, and 150, or permission of instructor. Lecture/performance course for continued study of dance improvisation. Each student is responsible for creating and directing advanced problems in dance improvisation.

360 Choreography (3:3:0). Prerequisite: DANC 252 or permission of instructor. Students learn to choreograph a dance work by auditioning dancers, costum ing, staging, lighting, selecting musical accompaniment, and composing original movement material.

370 Dance Performance (3:3:0). Prerequisite: Permission of instructor. Practical experience in performance, production, and/or repertory through participation in university dance productions or special guest artist programs. May be taken four times.

390, 391 Dance History (3:3:0), (3:3:0). Prerequisite: DANC 101 or 6 hours of dance courses. History of dance chronicling its growth and development through the twentieth century. Emphasis on the social, cultural, and philosophical factors shaping the progress of dance in successive historical periods.

420 Special Topics in Dance (3:3:0). Prerequisite: 9 hours of dance courses or permission of instructor. In-depth presentation and exploration of topical studies in dance and/or related study areas, e.g., dance as therapy, avant-garde dance, philosophic approach to twentieth-century dance artists, cinedance. Topic depends on instructor. May be taken twice.

454 Teaching Principles of Modern Dance (3:3:0). Prerequisite: 6 hours of dance technique and DANC 305. Provides advanced dance students with the methods, principles, and background knowledge for teaching modern dance. Students are expected to apply knowledge gained from previous courses in technique and alignment in the demonstration of their ability to teach a modern dance class.

510 Independent Study (3:0:0). Prerequisite: Dance major with 84 hours, graduate standing in dance or theater, or permission of instructor. Individual research or a creative project in close consultation with an instructor. Project selected from performance, choreography, technical theater as it applies to dance, management, dance history, or criticism.

Decision Sciences (DESC)

School of Business Administration

If a student takes noncore, upper-level business administration courses prior to acceptance to the School of Business Administration, those courses will not count on an undergraduate degree application for any major in the School of Business Administration (except as general elective credit). A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Prerequisites are strictly enforced.

200 Statistical Analysis for Decision Making I (3:3:0). Corequisite: CS 161. Prerequisite: MATH 108 (or MATH 113) with a grade of C or better. Frequency distributions, probability, probability distributions, decision theory, sampling distributions, estimation. Students who have received credit for MATH 256 or 351 may not receive credit for this course.

202 Statistical Analysis for Decision Making II (3:3:0). Prerequisite: DESC 200 with a grade of C or better. Use of statistical methods as scientific tools in the analysis of practical problems in business and economics. Methods include estimation and hypothesis testing, Chi-square tests, analysis of variance, regression and correlation analysis, time series analysis, index numbers, nonparametric statistics.

301 Decision Models in Business and Operations Management (3:3:0). Prerequisite: Completion of at least 60 semester hours including MATH 108 and DESC 202. Examination of the principal functions of operations managers in various settings. Analytic models are used to describe key planning and control activities in both product and service industries. Linear programming, service systems, network analysis, simulation, inventory models, quality control, forecasting, work measurement, and layout models are introduced as tools for effective management. Extensive use of computers in problem solving.

320 Logistics Systems Management (3:3:0). Prerequisite: DESC 301. Consideration of design, planning, and development of logistics systems with emphasis on the various logistics activities required throughout the system/product life cycle. Topics include development of concepts and factors in system design, test and evaluation, production/construction, operational support, and system retirement/disposal.

352 Methods and Models of Management Science (3:3:0). Prerequisite: DESC 301. Operation research for general management. Emphasis on effective application of math programming and stochastic process analysis. Topics include linear programming, integer programming, goal programming, decision theory, networks, simulation Markov processes, inventory theory, and queuing theory. Extensive use of microcomputer software in problem solving.

353 Intermediate Applied Statistics for Management (3:3:0). Prerequisite: DESC 202. Several of the more advanced statistical methodologies of importance in business application including survey sampling, experimental design, multiple regression, and correlation. Techniques are applied to areas such as marketing, personnel, accounting, auditing, and finance. Use of computer packages for analysis.

354 Decision Analysis (3:3:0). Prerequisite: DESC 301. Study of the organization and structure of static and dynamic decisions made under conditions of uncertainty, where there are multiple objectives, attributes,
and alternatives. A variety of business applications are considered.

355 Cases in Management Science and Operations Management (3:3:0). DESC 352 and INFS 311. Management science techniques and operations management concepts are applied to solve business problems. Case methodology requires identifying and structuring complex problems and performing appropriate analyses. Emphasis will be on drawing useful conclusions and supporting recommendations made in report to management. Includes term project and microcomputer applications of cases.

415 Manufacturing Planning and Control. Prerequisite: DESC 301. Focus on production planning, master production scheduling, material requirements planning, shop floor control, and inventory control. Problems in these areas are examined from the viewpoint of modern computer systems (e.g., MRP II systems) currently used for the control of manufacturing operations.

416 Inventory and Distribution Systems Management. Prerequisite: DESC 352. Application of analytical techniques to problems in inventory management and distribution. Topics include basic and advanced models for managing individual-item inventories, multi-location and multi-echelon inventory management, purchasing, distribution requirements planning, warehousing, and just-in-time inventory management.

435 Computer Simulation (3:3:0). Prerequisite: DESC 202 and INFS 310. Introduction to the basic concepts of simulating complex systems by computer. Topics covered include Monte Carlo methods, discrete-event modeling, a specialized simulation language, and the statistics of input and output analysis.

450 Managerial Economics (3:3:0). Prerequisite: DESC 301. Application of economic reasoning and analysis to management of the firm's resources. Topics include demand theory and analysis, uncertainty and risk in decision making, optimal assignment of resources to production and distribution, measurement of productivity, estimation of cost functions, pricing decisions for joint products and multiple markets, transfer pricing, and related public policy issues.

451 Optimization Models (3:3:0). Prerequisite: DESC 352. Examination of optimization models as applied to business problems. Both linear and nonlinear models are considered including dynamic, integer, and goal programming. Applications to management, finance, and marketing.

452 Forecasting Methods for Management (3:3:0). Prerequisite: DESC 202. Introduction to forecasting, examining alternative models and their application to a variety of business applications. Topics include trend analysis, moving averages, exponential smoothing, adaptive models, multiple regression and correlation, time series analysis.

456 Quality Planning and Control (3:3:0). Prerequisite: DESC 301. Development of the basic concepts and procedures associated with a quality control system. Extensive use is made of modeling and statistical inference in monitoring and evaluating performance quality control functions. Emphasis is placed on the management aspect of the quality control system. Both microcomputers and cases are used.

461 Advanced Operations Management (3:3:0) (formerly MGMT 461). Prerequisite: DESC 352. Advanced study of selected topics in the management of operations in manufacturing and service industries. Examination of integrated systems of production and contemporary topics of automation, technological change, and group technology. Cases and a group project complement lectures.

463 Seminar in Operations Management (3:3:0). Prerequisite: DESC 352. Aspects of productivity, technology, new processes, materials, products, equipment, and facilities. Implications of new technology in managing the operation (production) function are treated. Lecture, discussion, cases, and problems.

491 Seminar in Decision Sciences (3:3:0). Prerequisite: DESC 352 and INFS 311. Topics include contemporary research findings and case studies of decision sciences in business and other organizations.

492 Field Experience in Decision Sciences (3:3:0). Prerequisite: DESC 352 and INFS 311. Faculty-governed field experience in a Northern Virginia business. Teams of students, matched with client firms through the Entrepreneurship Center, propose action plans relating to a major problem or opportunity faced by the company.

499 Independent Study in Decision Sciences (1-3:0:0). Prerequisite: DESC 352 and INFS 311. Investigation of a business problem according to individual interest, utilizing state-of-the-art decision science methodology.

Economics (ECON)

Economics

Individual courses taken for credit under their former numbers may not be repeated for credit under their present numbers. A grade of C or better in ECON 103 and 104 is a prerequisite for all other economics courses.

103 Contemporary Economic Principles and Issues I (3:3:0). (May be taken after ECON 104). Introduction to microeconomics in the context of current problems. Explores how the market mechanism allocates scarce resources among competing uses; uses basic tools of supply and demand and production and distribution theory to analyze diverse problems.

306 Intermediate Microeconomics (3:3:0). Prerequisite: ECON 103 and 104, and MATH 108 or 113. Basic factors of price and distribution theory, including analysis of demand, costs of production and supply relationships, and price and output determination under various market structures.

309 Economic Problems and Public Policies (3:3:0). Prerequisite: ECON 103 and 104 or permission of instructor. Important economic problems in light of current and proposed public policies.

http://catalog.gmu.edu
310 Money and Banking (3:3:0). Prerequisite: ECON 103 and 104 or permission of instructor. Monetary, commercial, and central banking systems, with particular emphasis on relationship with American government programs, fiscal policies and controls.

311 Intermediate Macroeconomics (3:3:0). Prerequisite: ECON 103 and 104 or permission of instructor. Aggregate economic accounts, including the measurement of national income; determinants of levels of income and output; and causes and solutions for problems of unemployment, inflation, and economic growth.

316 Economic Growth and Business Cycle (3:3:0). Prerequisite: ECON 310 or 311 or permission of instructor. Factors contributing to sustained economic growth with additional emphasis on business fluctuations and their measurement.

320 Labor Problems (3:3:0). Prerequisite: ECON 103 and 104 or permission of instructor. American labor unions and their effect on society. Causes of and proposed solutions to selected problems.

321 Economics of Labor (3:3:0). Prerequisite: ECON 306. Factors that determine levels of wages and employment and economic consequences. Attention is directed to recent developments in unionism, collective bargaining, and industrial technology.

322 Economics of Income Distribution (3:3:0). Prerequisite: ECON 103 and 104. Theoretical models of functional and personal distribution of income with emphasis upon human capital welfare considerations and screening.

330 Public Finance (3:3:0). Prerequisite: ECON 306 or permission of instructor. Intergovernmental financial relationships; types, incidences, and consequences of taxation; other sources of governmental income; governmental expenditures and their effect; public economic enterprises; public borrowing; debt management and its economic effect.

340 Introduction to Mathematical Economics (3:3:0). Prerequisite: ECON 306 and 311 and MATH 113 and 114, or permission of instructor. Mathematical treatment of the theory of firm and household behavior, stabilization policy, growth theory, input-output analysis, and linear programming.

345 Introduction to Econometrics (3:3:0). Prerequisite: ECON 306 and 311 and DESC 200 and 202. Modern statistical techniques in estimating economic relations.

350 Regional and Urban Economics (3:3:0). Prerequisite: ECON 306 or permission of instructor. Regional development and metropolitan growth, including local decisions of households and firms and problems associated with high-density urban economic activity.

360 Economics of Developing Areas (3:3:0). Prerequisite: ECON 103 and 104 or permission of instructor. Economic growth characteristic of developing countries. Economic development, obstacles to development, policies, and planning.

361 Economic Development of Latin America (3:3:0). Prerequisite: ECON 103 and 104 or permission of instructor. Economic development, institutions, and problems of Latin America.

365 Topics in Economic History (3:3:0). Prerequisite: ECON 103 and 104. Subject matter varies. Possible topics include ancient, medieval, modern European, and American economic history, using econometric analysis as necessary. May be repeated once for credit with permission of instructor.

370 Economics of Industrial Organization (3:3:0). Prerequisite: ECON 306 or permission of instructor. Factors influencing industrial structure and industrial conduct and performance.

375 Economics of Transportation (3:3:0). Prerequisite: ECON 103 and 104. Transportation industry in the U.S. Structure modes and economic problems of the competing types of transportation.

380 Comparative Economic Systems (3:3:0). Prerequisite: ECON 103 and 104 or permission of instructor. Theory, programs, and practices of economic systems including capitalism, socialism, and fascism.

385 Soviet Economic System (3:3:0). Prerequisite: ECON 306, or ECON 103 and permission of instructor. General survey of the Soviet economic system and its institutions including historical and ideological background. Selected topics following the survey include analysis of Soviet agriculture, foreign economic relations, consumption, and defense expenditures.

390 International Economics (3:3:0). Prerequisite: ECON 306 or permission of instructor. Foreign exchange market, balance of payment, foreign trade policies, and theories of international trade.

403 Austrian Economics (3:3:0). Prerequisite: ECON 306 and 311. Microeconomic and macroeconomic models and the misallocation of resources. Alternative economic tools from the unique a priori and subjectivist approach of noted Austrian economists.

410 Public Choice (3:3:0). Prerequisite: ECON 306. Application of economic theory and methodology to the study of nonmarket decision making.

412 Game Theory and Economics of Institutions (3:3:0). Prerequisite: 306 or permission of instructor. Introduction to game theory and its relevance for the analysis of the framework of rules and institutions within which economic processes occur. Application of game theoretical concepts to a comparative analysis of the causes and effects of alternative institutional arrangements.

481 The Development of Economic Thought (3:3:0). Prerequisite: ECON 306 and 311 or permission of instructor. Developments in economic thought from 1500 to the present. Emphasis on historical origins, impact on contemporary economics, and theoretical validity.

490 Senior Seminar on Problems in Economics (3:3:0). Prerequisite: ECON 306 and 311, DESC 200 and 202, and senior status; economics majors only. Application of economic tools to investigate problems in economics.

496 Special Topics in Economics (3:3:0). Prerequisite: ECON 306, 311, or permission of instructor. Subject matter varies. May be repeated once for credit with permission of the department.

497 Economic Research Workshop (3:3:0). Prerequisite: ECON 306 and 311 and DESC 200 and 202. Indi-
vidual research project proposed by instructor or in conjunction with other departmental courses. Project includes research design, data collection, use of program packages, data processing, and analysis. Culminates in the preparation of a substantial paper.

498 Seminar in Economics (3:3:0). Prerequisite: ECON 306 and 311 and permission of instructor. Current economic problems studied and discussed in seminar format.

499 Independent Study (1-3:0:0). Prerequisite: Open only to economics majors with 84 hours and permission of both department and instructor. Individual study of a selected area of economics. Directed research paper required.

Education (EDUC)

Curriculum and Instruction

Courses numbered through the 400 series constitute the undergraduate program. Courses in the 300 series are open to all undergraduates. The 400 series, with the exception of EDUC 490, is open only to students admitted to a teacher education program. Students may not receive degree credit for more than one of the comparable courses relating to early and middle education. For example, students taking EDUC 407 may not receive degree credit for EDUC 408. See the catalog section on Graduate Course Enrollment by Undergraduates for university rules governing undergraduates enrolling in 500-level courses.

300 Introduction to Teaching (3:3:0). Introduction to the teaching profession through examination of the roles of a teacher, the nature of American schools, and the students' potential contributions. Field experience required.

301 Educationally Diverse Populations: Handicapped, Gifted, Multicultural (3:3:0). Introduction to the psychological, sociological, educational, and physical aspects of diverse populations to today's schools for early and middle education. Legislation and litigation pertaining to the education of diverse populations are emphasized.

302 Human Growth and Development (3:3:0) Examines human development through the life span with special emphasis on the cognitive language, physical, social, and emotional development of children. Contemporary theories of human development and their relevance to educational practice will be emphasized. Field experience required.

305 Children's Literature (3:3:0). Prerequisite: 9 hours of English. Historical development, types, representative authors, and illustrations of children's literature are studied. Topics include critical analyses of selected works, techniques of storytelling, and presentation of literature to children.

306 Teaching Language Arts in the Elementary School (3:3:0). Prerequisite: 54 hours and EDUC 305. Students are advised to take EDUC 403 or 404 concurrently. Study of the processes, methods, practices, and materials involved in the teaching of language arts in the elementary school. Emphasizes an integrated approach to speaking, listening, writing, and reading. Field experience in public schools required.

308 History and Philosophy of Technical Education (3:3:0). Introduction to the historical and philosophical background of technical education and its effect upon the industrial and business community. Includes an overview of representation of vocational offerings in all levels of secondary and postsecondary education with an analysis of future technology changes and their implications for education and the worker.

320 Introduction to Tests and Measurements (3:3:0). Introduces basic principles, techniques, and tests used in the quantification of measuring devices. Interpretation of standardized tests. Emphasis on construction and interpretation of measuring devices used in the classroom.

324 Utilization of Instructional Media and Technology (3:3:0). Experiential study of the use of instructional media, equipment, and emerging technologies as applied in the classroom. Primary focus on the student's competence relevant to equipment operations.

340 Microcomputer and Elementary School Mathematics (3:3:0). Prerequisite: Mathematics Competency Examination. Introduction to the use and programming of microcomputers in elementary school mathematics. Application of microcomputers to the solution of consumer mathematics problems. The primary programming language is BASIC.

344 Problem Solving in School Mathematics (3:3:0). Students learn to solve problems in logic, geometry, algebra, and number theory using heuristics based on the work of G. Polya.

359 Industrial Arts for the Elementary School (3:3:0). Designed for teachers who want to use construction activities as a teaching method for reinforcing the elementary school curriculum. Students use the same tools, materials, and activities as children to develop psychomotor skills and study technology.

364 Graphics Technology (3:3:0). Project and experiments are used to study aspects of graphics, drawing, photography, reproduction, printing, and modern technology in communications.

365 Manufacturing Technology (3:3:0). Combines experiences of manufacturing technology with appropriate teaching techniques. Organizational techniques, project, and activities from several resources are tried and adapted by class members for use in teaching manufacturing.

366 Construction Technology (3:3:0). Study of the practical application of materials and processes in building residential and commercial structures. Topics include designing, framing, and assembling buildings. Course provides practical laboratory experiences associated with current construction techniques and stresses teaching methodologies.

367 Power and Transportation Technology (3:3:0). Overview of the field of power and transportation industries. Combines technical experiences involving engines, power sources, and controls with appropriate teaching techniques. Projects are developed, experiments performed, and revisions made with power devices or vehicles.

http://catalog.gmu.edu
369 Career Guidance and Counseling in Vocational Education (3:3:0). Study of industrial technology related to trade and industrial courses offered in secondary schools. Includes industrial field trips, group discussion, and investigation of current industrial practices. Field experience required.

370 Wood Technology (3:0:3). Emphasis on basic skills and fundamental knowledge needed to teach woodworking. Materials, processes, techniques, occupations, and problems of the woodworking industry are studied via lecture-demonstrations, product analysis/planning, and construction of a project.

371 Metal Technology (3:0:3). Emphasis on basic skills and fundamental knowledge needed to teach metalworking. Materials, processes, techniques, occupations, and problems of the metals industry are studied via lecture-demonstrations, product analysis/planning, and construction of a project.

372 Plastics Technology (3:0:3). Emphasis on basic skills and fundamental knowledge needed to teach plastics technology. Materials, processes, techniques, occupations, and problems of the plastics industry are studied via lecture-demonstration, product analysis/planning, and construction of a project.

373 Electricity/Electronics Technology I (3:0:3). Laboratory course with emphasis on acquisition of basic skills and fundamental knowledge needed to teach electricity and electronics. The components, processes, techniques, concepts, occupations, and problems of modern electrical/electronic technology will be studied via lecture-demonstrations, experimentation, product analysis/planning, and construction of a project. Safe, effective instrument operation, tool use, and teaching strategies are stressed.

374 Drafting Technology (3:0:3). Emphasis on fundamental knowledge and skills needed to teach drafting. Equipment, techniques, occupations, and types of drawings typical in modern technical drawing are studied via lecture-demonstrations, exercises, and completion of mechanical drawings and sketches.

377 Electronics Technology II (3:3:0). Students are advised to take EDUC 373 concurrently. Laboratory course emphasizing acquisition of skills needed to teach electronics technology. Concepts and principles of electronic and digital logic circuits and systems are studied via lecture-demonstrations, experimentation, and construction of project. Safe, effective instrument operation, tool use, and teaching strategies are stressed.

386 Construction Technology: Energy Systems (3:3:0). Study of the practical application of energy systems in residential and commercial construction. Topics include design, installation, servicing, and analyzing of systems involving plumbing, electrical wiring, motors, climate control, communications, and mechanical functions. Course provides practical laboratory experiences associated with current installation and maintenance technologies and stresses teaching techniques.

400 Inservice Educational Development (2-6:0:0). Prerequisite: Employment in a professional capacity by sponsoring school division or educational agency, acceptability to the university, or permission of department. Offered upon request of a school division or other educational agency, or upon establishment of a need on the part of a group of educational personnel. Provides an opportunity for instruction in various educational areas, such as learning theory, curriculum, evaluation, materials, media, methods, reading, and others. The course may take the form appropriate to the area involved to include practice and workshops. May be repeated. If applicable to a specific degree program, may be accepted toward a degree.

401 Teaching Thinking Skills. Introductory training in selected strategies for teaching thinking in grades 4-8. Students study and apply a range of methods and materials for providing systematic, developmental learning of basic thinking processes and skills.

402 Teaching and Learning in Nursery School and Kindergarten (1:1:0). Study of the processes, programs, materials, and methods involved in teaching the nursery school and kindergarten child. Emphasizes meeting the educational needs and unique learning styles of young children in relation to developmental needs of the whole child. Field experiences in a preschool or kindergarten are required.

403 Developmental Reading for Early Education (3:3:0). Prerequisite: EDUC 300, 302, 313, and admission to the teacher education program. Prerequisite or corequisite: EDUC 305. Study of the theory, methods, practices, and materials involved in the teaching of reading in nursery school, kindergarten, and grades 1-4. Includes study of reading readiness abilities, readiness for reading at the primary level, word analysis and word recognition skills, vocabulary development, reading comprehension and critical reading, reading skills in content fields, and study skills. Emphasis is placed on lifetime reading habits for all students including below-level, beginning, gifted, multicultural, and bilingual readers. Field experience in public school required.

404 Developmental Reading for Middle Education (3:3:0). Prerequisite: EDUC 300, 302, 313, and admission to the teacher education program. Prerequisite or corequisite: EDUC 305. Study of reading in grades 4-8, including word analysis and word recognition skills in content fields, adaptive rates of reading, and study and interpretive reading skills. Emphasis is placed on lifetime reading habits for all students including below-level, gifted, multicultural, and bilingual readers. Field experience in public schools required.

407 Diagnostic Reading for Early Education (3:3:0). Prerequisite: EDUC 403 and admission to teacher education program. Study of theory, methods, practices, and materials involved in the diagnostic teaching of reading in nursery school, kindergarten, and grades 1-4. Includes techniques for evaluation, diagnostic techniques available, differentiation of instruction to fit individual capabilities, and corrective methods. Field experience required.

408 Diagnostic Reading for Middle Education (3:3:0). Prerequisite: EDUC 404 and admission to teacher education program. Review of theory, methods, practices, and materials involved in the teaching of reading skills in grades 4-8. Includes techniques for evaluation, formal and informal diagnostics, corrective methods and differentiation of instruction, and understanding of study skills and use of media. Field experience required.

411 Teaching Mathematics in the Elementary School (3:3:0). Prerequisite: MATH 371 and admission
to teacher education program. Study of theory, methods, practices and materials involved in teaching mathematics in the elementary school. Laboratory and discovery techniques emphasized for practical application of fundamental math concepts and reinforcement. Field experience required.

412 Teaching Social Studies and Humanities in the Elementary School (3:3:0). Prerequisite: 12 hours of social science and admission to teacher education program. Study of theory, processes, methods, practices, and materials involved in teaching social studies, art, and music in the elementary school. Emphasis on modern approaches to teaching social studies with emphasis on planning units of instruction that integrate art and music activities. Field experience required.

413 Teaching Science in the Elementary School (3:3:0). Prerequisite: Admission to teacher education program and completion of two of the required lab sciences. Emphasis on theories, practices, methods, materials, and resources necessary to teach the sciences in elementary school. Emphasis on relationship of child to environment, leading to the development of basic generalizations in science. Includes “hands-on” work in the biological, physical, and earth sciences. Field experience required.

417 Student Teaching in Vocational Education (9:12:0). Prerequisite: Completion of all courses in the approved program; admission to and good standing in the teacher education program. Intensive, supervised, full-semester clinical experience of a full semester in approved Virginia schools and a seminar series taught on campus by university faculty-supervisors. Experiences in both middle and secondary school settings.

418 Student Teaching in Music Education (9:9:0). Prerequisite: Completion of requirements for admission to the music education concentration and admission to and good standing in the teacher education program. Intensive, supervised clinical experience in approved Virginia schools and supplemental course work appropriate for the student’s area of concentration (vocal/choral or instrumental). Experiences in elementary and/or secondary school settings.

429 Junior Student Teaching in Early Education (6:0:0). Prerequisite: Admission to, and good standing in, the teacher education program. Intensive clinical experience in an approved school in Virginia. Experiences in kindergarten and grades 1, 2, 3, or 4 must be included.

430 Junior Student Teaching in Middle Education (6:0:0). Prerequisite: Admission to and good standing in the teacher education program. Intensive clinical experience in an approved Virginia school. Experiences in grades 4, 5, 6, 7 and 8.

431 Student Teaching in Early Education (9-15:0:0). Prerequisite: Completion of all courses in the approved program; admission to and good standing in the teacher education program. Intensive, full-semester clinical experience in an approved Virginia school and a seminar series conducted on campus by university faculty-supervisors. Experiences in kindergarten and grades 1, 2, 3, or 4 must be included.

432 Student Teaching in Middle Education (9-15:0:0). Prerequisite: Completion of all courses in the approved program and admission to and good standing in the teacher education program. Intensive, full-semester clinical experience in an approved Virginia school and a seminar series conducted on campus by university faculty-supervisors. Experiences in grades 4, 5, 6, 7, or 8.

438 Vocational Education, Trade Area Technical Certification (30 semester hours). Prerequisite: Teacher of vocational education. Advanced placement credit given to vocational teachers for certain teaching experience, completion of approved competency testing programs, or technical inservice training. Requests for approved credit must be submitted to the Office of Vocational Education and students must meet university admission requirements.

439 Internship in Vocational Education (3:3:0) or (6:0:0). Prerequisite: Admission to teacher education program. Opportunity to meet the work experience requirement and state certification requirement in trade and industrial education and to work in industry or at a technical occupation.

440, 441, 442 Independent Study in Education (1-3:0:0). Prerequisite: Admission to teacher education program and permission of both chair and instructor. Students repeating the course register for EDUC 441 or 442, as appropriate. By arrangement. Various subjects, principally by directed study, discussion, and research. Subject areas include elementary science, reading, the slow learner, mathematics, English, social studies, arts and crafts, health, secondary science, language arts, child growth and development, the culturally deprived, music, learning disabilities, guidance, the mentally retarded, and social foundations.

460 Organizing and Counseling Vocational Youth Groups (3:3:0). Prerequisite: Admission to teacher education program. Prepares the student to organize, manage, and advise school chapters of vocational youth groups. Emphasis on methods of making youth groups an integral part of the instructional program. The goals, activities, and contributions of youth groups are studied as students work with or observe actual chapters executing typical events. Field experience required.

463 Vocational and Technical Teaching Methods (3:0:3). Prerequisite: Admission to teacher education program. Emphasis on methods of teaching industrial arts: unit methods, group method, line production, seminar, demonstration, and project method. Students complete activities in each method and/or provide instructions to others. Content developed through lab activities. Work completed is evaluated in relation to goals and student needs.

465 Practicum in Laboratory Technology. Each student is placed in an exemplary program under a master teacher. Students perform the duties required of all vocational teachers except the presentation of lessons. Emphasis is on developing instructional methodology, project experiments, and evaluation instruments that can be used to teach technological literacy in the secondary schools.

466 Competency-Based Instruction in Trade and Industrial Education (3:3:0). Prerequisite: Admission to teacher education program. Combines practical and theoretical components of the competency-based programs in trade and industrial education in Virginia with methods and strategies for implementation. Field experiences required.
467 Curriculum Development in Technical Education (3:3:0). Prerequisite: Acceptance into teacher education program. Principles of instructional methods as applied to secondary technical education, preparation of lesson plans and courses of study, demonstration teaching in lab environment, curriculum construction emphasizing high-technology changes, and classroom management techniques including competency-based instructional systems.

469 Vocational and Technical Facility Management (3:0:3). Students plan and organize lab facilities for instruction. Systems for personnel, tool storage, supply purchase, maintenance, and record keeping are developed and tested. Selected labs are examined and recommendations are made for improvement of organization, management, or safety.

490 Selected Topics in Education (1-3:0:0). Examines special topics in education of interest to students, faculty, and the educational community. Topics vary. No more than 6 hours from EDUC 490, 440, 441, and 442 may be applied to the degree.

500 In-Service Educational Development (1-6:0:0). Prerequisite: Employment in professional capacity by sponsoring division or agency. Offered at request of school division or other educational agency. Content varies. May be repeated.

502 History of Education in the U.S. (2:2:0). Prerequisite: Admission to Graduate School or permission of instructor. History of ideas about learning in the U.S. analyzed from the perspective of what can be accomplished for determining the future of education.

503 Philosophy of Education (2:2:0). Prerequisite: Admission to Graduate School or permission of instructor. Critical analysis and examination of ancient and contemporary educational philosophies and their impact upon educational thought and practice. Method of instruction is primarily lecture.

504 Issues in Comparative Education (2:2:0). Overview of national systems of education from the perspective of their similarities to and differences from education in the U.S. Special focus on the countries of recent immigrants to the Northern Virginia-D.C. metropolitan area.

506 Education and Cultural Transmission (3:3:0). Prerequisite: Graduate standing in education or permission of instructor. Examination and application of studies in educational anthropology, with focus on the process of cultural transmission in the U.S. through formal and informal institutions. Analysis of U.S. values, cultural discontinuity, hidden transmission of values in schools, U.S. schools' response to cultural pluralism, cultural transmission in educational systems within other countries, school as an interface institution between cultures, and biculturalism in schools.

508 Human Relations for Educators (3:3:0). Helps students develop an awareness of self and self-concept, learn communication skills for improving interpersonal relations, and create a nondiscriminatory school environment.

509 Human Development: Infancy to Middle Childhood (2:2:0). Advanced course in the physical, psychological, cognitive, and personality development of the child from birth to age 12. Emphasis on the critical view of contemporary theories of human development and their relevance to educational practice.

515 (formerly 684) History and Philosophy of Vocational Education (3:3:0). Prerequisite: Completion of undergraduate degree or appropriate educational requirement. Study of historical, philosophical, and societal backgrounds of vocational education. Includes specialty areas of vocational education and their relationship to general education. Current trends in students' areas of specialty are studied in historical context.

521 Foundations of Education (3:3:0). Prerequisite: Graduate standing in education or permission of instructor. Overview of the various ways of educating and of the socialization processes operating within American educational institutions and other organizations. Current educational practices analyzed in terms of history, philosophy, psychology, and sociocultural factors of formal and informal learning. Emphasis on trends, issues, and alternative futures.

522 Introduction to Secondary Education (3:3:0). Prerequisite: Admission to Graduate School or permission of department. Analysis of the philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasis on applications to all disciplines taught in secondary schools. Current educational trends and issues examined in relation to the sociology of secondary school settings. Field experiences in public schools required.

529 Pluralism and Exceptionality in U.S. Education (3:3:0). Examination of cultural pluralism in American education. Focuses on the nature of linguistic and cultural diversity in public schools including special education settings, the relationship between nonverbal communication and language systems, and interpersonal skills needed for encouraging harmony between the dominant culture minority ethnic communities in the United States.

530 Contemporary Social Issues in Education (2:2:0). An examination of selected social issues in education. Uses concepts and information from social sciences to understand social issues and suggest possible remedies through practice and policy.

532 Bilingualism and Language Acquisition Research (3:3:0). Examination of research in first and second language acquisition including the interaction of a bilingual's two languages. Implications for the classroom.

565 Production of Instructional Materials (3:3:0). Prerequisite: Course in instructional media. Prepares teachers with basic knowledge needed to produce inexpensive teaching materials. Emphasizes planning, production techniques, and evaluation standards. Students are given an opportunity to work on individual projects in subject specialties.

571 Role and Function of the School Psychologist (3:3:0). Surveys roles and functions of the school psy-
chologist. Certification, ethical standards, and current issues and trends.

579 School Psychologist Practicum (3:0:0). Prerequisite: Permission of department. Field work with a practicing school psychologist in a school division two days per week.

581 Cooperative Work Study Programs (Curriculum and Methods) (3:3:0). Prerequisite: Completion of undergraduate requirements in vocational education for industrial cooperative instructors. Teachers learn to develop curriculum material for cooperative work-study courses and gain proficiency in the techniques of planning and teaching both generally and directly related curriculum materials.

586 Competency-Based Instruction in Vocational Education (3:3:0). Introduction to practical and theoretical components of Virginia’s competency-based programs in vocational education. Includes methods and strategies of implementation for specific areas of vocational education, industrial arts, trade and industrial education, home economics, business and office education, health occupations, and cooperative programs.

587 Administration and Coordination of Cooperative Work Programs (ICT)-(COE) (3:3:0). Prerequisite: Completion of undergraduate requirements in vocational education for industrial cooperative instructors. Prepares teachers to develop and select cooperative work stations. Teachers gain proficiency in planning and working with advisory groups. Course includes materials related to employment opportunities, rules and regulations of employment, and design and completion of necessary documentation. This is the second course in the required sequence for state certification of cooperative ICT instructors.

589 Materials and Processes Technology (Variable). Advanced laboratory course centering on the implementation of new technological methods of manufacturing and testing materials and products. Students build, research, and test individual products and ideas including the strategies required for classroom implementation.

593 (625) Utilization of Instructional Technology (3:3:0). Effective use of educational technology in the teaching-learning situation.

598 Directed Reading, Research, and Individual Projects (1-6:0:0). Prerequisite: Admission to a degree program and permission of department. Various subjects and projects, principally by directed study, discussion, research, and participation under the supervision of a member of the graduate faculty. May be repeated. No more than 6 hours of EDUC 500, 598 (may also be listed as EDAS, EDGC, EDRD, or EDSE), and/or 600 may be applied to degree credit.

Elementary/Secondary (EDCI)

Curriculum and Instruction

500—See EDUC 500.

501 Curriculum and Instruction in Early Childhood Education (3:3:0). Prerequisite: Admission to graduate school. Open to seniors with permission of department. Emphasis on designing curriculum based on the social studies unit, as well as health, nutrition, and safety issues. Focus on evaluating and planning appropriate environments and instruction. Historical foundations, model programs and early education initiatives are examined. Field experience required.

502 Developing Concepts in Early Childhood Mathematics and Science (3:3:0). Prerequisite: Admission to teacher education program or permission of department. Examines preoperational and concrete operational thought processes on conservation, seriation, comparison, classification, and early number concepts. Uses concrete science materials and experiences to foster development of quantitative thinking in geometry, measurement, graphing, and whole number arithmetic. Field experience required.

503 Language and Literacy in Early Childhood Education (3:3:0). Prerequisite: Admission to graduate school. Open to seniors with permission of department. Stresses the interrelatedness of reading, writing, listening, and speaking, and provides opportunities for developing appropriate instructional strategies for early childhood levels. Focuses on creative development and critical thinking in communication. Field experience required.

504 Introduction to Educational Technology (3:3:0). Prerequisite: Admission to graduate school. Open to seniors with permission of department. Examines uses of and issues in educational technology, explores Logo as a problem-solving tool, and focuses on learning and using commercial applications software. Both computer-based and noncomputer-based educational technology are addressed.

507 Internship in Applied Linguistics (3:0:3). Prerequisite: Graduate standing in the Curriculum and Instruction or English Department and EDCI 519 or ENGL 521 (ESL methods course). Internship requires 100 hours completed over at least a five-week period for three hours of credit. Internship provides practical experience as a teacher, administrator, counselor, or researcher in the fields of English as a Second Language (ESL) and applied linguistics. For placement, consult instructor before semester begins.

511 Preparing the Pre-Elementary Environment (3:3:0). Study of procedures, materials and organization of environments for young children (infancy-kindergarten). Field experiences required for students without previous teaching or administrative experience at the pre-elementary levels.

512 Home-School Relations in Pre-Elementary Education (3:3:0). Examines patterns and problems of family life to improve communication between teachers and parents.

513 Play as a Growth Process in Pre-Elementary Education (3:3:0). Play as an approach to teaching and learning and as an intellectual, social, and emotional function in children’s development.

514 Administering and Supervising Pre-Elementary Education (3:3:0). Examines programs and techniques relating to the administration and supervision of pre-elementary education programs. Emphasis on the director’s role in staff recruitment, hiring, development, and evaluation. Leadership and management techniques.
515 Practicum in Secondary Education (12:0:12). Prerequisite: Admission to and completion of all additional course work in the secondary education certification program, admission to and good standing in the teacher education program, and/or permission of instructor and adviser. An intensive, supervised, full-semester experience in an approved Virginia school. Experience at the secondary level. Participation in scheduled group sessions required.

517 Introduction to Bilingual Education (3:3:0). Analysis of concepts, principles, and issues of bilingual education; its present status; and its future direction. Focus on current programs and their relationship with curricula in English as a Second Language (ESL).

518 Introduction to Multicultural Education (3:3:0). A survey of multicultural education that examines problems faced by an individual in an alien culture, theories of bilingual/multicultural education, relationships between nonverbal communication and language systems, and interpersonal skills needed for encouraging harmony between our dominant culture and minority ethnic communities.

519 Methods of Teaching in Bilingual/English as a Second Language Settings (3:3:0). Examination of past and current methods and techniques for teaching English as a Second Language (ESL) in bilingual/ESL classrooms. Students analyze all program models and methods of instruction for students of limited English proficiency; practice teaching strategies based on recent second language acquisition research; and examine materials, textbooks, and resources available in the field. This course includes a field experience component and meets Virginia certification requirements for ESL teachers.

520 Assessment and Curriculum Development in Bilingual/English as a Second Language Settings (3:3:0). Examination of issues in testing students of limited English proficiency and development of curricular materials for bilingual/English as a Second Language (ESL) classrooms. Analysis of testing for placement, diagnosis, entry-exit criteria, and evaluation. Examination of sources and models of curriculum development for bilingual/ESL classrooms.

528 Teaching and Learning Mathematics in the Middle Grades (3:3:0). Prerequisite: Admission to teacher education program or permission of department. Focuses on the learning processes fundamental to the development of mathematical thinking. A variety of instructional strategies and materials are examined and related to the broad scope of mathematical content. Field experience required.

529 Teaching and Learning of Social Studies and the Humanities in the Middle Grades (3:3:0). Prerequisite: Admission to the graduate school and the teacher education program. Focuses on the design and delivery of an integrated curriculum centered on knowledge and skills from history and the social sciences for citizenship education. Development of the social studies unit as the unifying core of the middle grades (4-8) curriculum is examined. Field experience required.

530 Programming Microcomputers in BASIC for Instructional Applications (3:3:0). Students learn the fundamentals of operating a computer. Major focus is learning to use the BASIC language to program microcomputers for instructional applications.

532 Programming Microcomputers in LOGO for Instructional Applications (3:3:0). Prerequisite: EDCI 530 or permission of instructor. Students learn how to write and use programs in LOGO, an interactive programming language used in schools, and create microcomputer activities that develop problem-solving and programming skills.

550 (formerly EDUC 450) Teaching Foreign Languages in the Secondary School (3:3:0). Study of theories and methods of foreign language teaching, with practical application to the classroom. Field experience required for those seeking initial teacher certification. Fall semester only.

---

**Electrical and Computer Engineering (ECE)**

**Electrical and Computer Engineering**

240 Introduction to Microcomputer Applications (3:3:0). Introduction to hardware and software fundamentals of a typical microcomputer system. Topics include programming techniques, hardware considerations in various research applications, case study of microcomputer implementation, computer graphics, real-time machine interaction, word processors, and how to choose a microcomputer system. (Not intended for those majoring in computer and electronics engineering.)

285 Electric Circuit Analysis I (3:3:0). Prerequisite: CS 111 or 112; corequisite: MATH 213 and PHYS 350. Circuit applications of Ohm's and Kirchhoff's Laws, superposition, equivalent circuits, power and energy relations, RLC circuits, and transient and steady-state analysis.

286 Electric Circuit Analysis II (3:3:3). Prerequisite: Grade of C or better in ECE 285, corequisite: MATH
304. Principles of linear circuit analysis dealing with the frequency domain. Topics include sinusoidal excitation and phasors, AC steady-state analysis and power, complex frequency and network functions, frequency response, transformers, two-port networks, state variable analysis, Fourier methods, and Laplace transforms.

301 Digital Electronics (3:2:2). Introduction to digital systems, circuits, and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, coding and multiplexing, multivibrators, shift registers, counters, A/D converters, and elementary computer architecture. (Not intended for those majoring in computer and electronics engineering.)

302 Electronics (4:3:3). Prerequisite: PHYS 342 or 351 or permission of instructor. Lecture and laboratory course in electronics, semiconductor physics, electronic devices and circuits, feedback, design and operational characteristics of power supplies, amplifiers, and oscillators. (Not intended for those majoring in computer and electronics engineering.)

305 Electromagnetic Theory (3:3:0). Prerequisite: PHYS 352 and MATH 304. Static and time varying electric and magnetic fields, dielectrics, magnetization, Maxwell's Equations, and introduction to transmission lines. This course uses vector calculus and complex algebra.

331 Digital System Design (3:3:0). Prerequisite: Grade of C or better in ECE 285. ECE 332 is normally taken concurrently with ECE 331. Credit may not be received for ECE 301 and 331. Principles of digital logic and system design. Topics include number systems; logic fundamentals; simplification of Boolean functions; combinational logic; synchronous and asynchronous sequential logic; flip-flops, registers, counters, memory and arithmetic circuits; digital system design case studies; and elementary computer architecture.

332 Digital Electronics and Logic Design Lab (1:0:3). Prerequisite: PHYS 351 or permission of instructor; corequisite: ECE 331. Lab associated with ECE 331.

333 Linear Electronics I (3:3:0). Prerequisite: Grade of C or better in ECE 286 or PHYS 352 or equivalent. ECE 334 is normally taken concurrently with 333. Credit may not be received for ECE 302 and ECE 333. Principles of operation and application of electron devices and linear circuits. Topics include semiconductor properties, diodes, bipolar and field effect transistors, biasing amplifiers, frequency response, operational amplifiers, and analog design.

334 Linear Electronics Lab I (1:0:3). Prerequisite: PHYS 351 or permission of instructor; corequisite: ECE 333. Lab associated with ECE 333.

410 Introduction to Signal Processing (3:3:0). Prerequisite: ECE 360 and MATH 351 or STAT 344. Introduction to statistical signal processing. Review of probability theory with emphasis on continuous random variables and transformations. Treatment of discrete-time signals with introduction to sampling and filtering of random signals. Spectral analysis of random signals, detection of signals in noise, and estimation of signal parameters.

422 Digital Control Systems (3:3:0). Prerequisite: ECE 421. Introduction to the analysis and design of digital control systems, Z-transform, discrete linear systems, frequency domain, and state variable techniques. Use of microcomputers in control systems.

429 Control Systems Lab (1:0:3). Prerequisite: ECE 421; corequisite: ECE 422. Laboratory experiments for topics in control systems analysis, design, and implementation with an emphasis on the use of microcomputers.

430 Principles of Semiconductor Devices (3:3:0). Prerequisite: MATH 304, ECE 305 and 333, or permission of instructor. Introduction to solid state physics and its application to semiconductors and semiconductor devices. Topics include band theory, doping, p-n junctions, diffusion theory, low frequency circuits, devices including bipolar transistor, MOSFET, CMOS, photo transistors.

431 Digital Circuit Design (3:3:0). Prerequisite: ECE 331 and 333. Analysis and design of discrete and integrated switching circuits. Topics include the transient characteristics of diodes, bipolar, and field-effect transistors; MOS and bipolar inverters; nonregenerative and regenerative circuits; TTL, ECL, 12L, NMOS, and CMOS technologies; semiconductor memories; VLSI design principles; and SPICE circuit analysis.

433 Linear Electronics II (3:3:0). Prerequisite: ECE 333. A second course in linear electronics covering the following topics: differential amplifiers, feedback circuits, power amplifiers, feedback amplifier frequency response, analog integrated circuits, operational amplifier systems, oscillators, wide band and microwave amplifiers, and computer-aided design.

434 Linear Electronics II Laboratory (1:0:3). Prerequisite: ECE 334. A second lab course in linear electronics involving analysis and design of the topics listed in ECE 433.

435 Digital Circuit Design Laboratory (1:0:3). Corequisite: ECE 431. Lab experiments for topics covered in ECE 431.

442 Digital Computer Design and Interfacing (3:3:0). Prerequisite: ECE 445 or equivalent. Design of digital computers, microprocessor systems, and interfac-
ing techniques. Digital logic circuits, flow diagrams, memory systems, and I/O equipment.

445 (formerly 341) Computer Organization (3:3:0). Prerequisite: Grade of C or better in ECE 331 or 301. General overview of the operation of a digital computer. Includes computer arithmetic, the Arithmetic Unit, instruction set and addressing modes, DEC PDP-11 and VAX 11/780 systems, hardware and microprogramming control, memory, and input/output. Examples of actual computers and microprocessors.

447 Single-Chip Microcomputers (4:3:3). Prerequisite: ECE 332 and 445, both with a grade of C or better, or permission of instructor. Designing with single-chip microcomputers and microcomputer interfacing. Topics include the role of microcomputers as compared to microprocessors and other computers, microcomputer architecture and organization, real-time control issues, assembly language programming for control, design of control software, input/output methods, design tools, and available single-chip microcomputers. Students select a project and design and construct a system including a single-chip microcomputer and the ancillary hardware to implement a control system.

449 Computer Design Lab (1:0:3). Prerequisite: ECE 445. Laboratory course providing experience in the design and fabrication of a digital computer. Includes the specification of a computer system and the fabrication of a multichip random access memory, an arithmetic and logic unit and associated registers, input/output circuitry, and a control unit. The above entities are then combined to form a simple computer. Medium-scale integrated circuitry is used.

450 Introduction to Robotics (3:3:0). Prerequisite: ECE 360. Introduction to robotic manipulator systems. Topics include an overview of manipulation tasks and automation requirements; actuators, sensors, and computer interfaces; arm and hand kinematics; path, velocity, and force control; elements of computer vision; and real-time programming languages. Design projects will be conceived, simulated, and tested by the students.

451, 452 Energy Conversion I, II (4:3:3), (4:3:3). Prerequisite: ECE 305 or permission of instructor. Study of energy needs, sources, conversion, and use. Electric power generation, transmission and use. Electromechanical, electromagnetic, nuclear, and nonconventional energy conversion and transmission methods. Synchronous machines and generators. Solar cells, thermionic converters, fuel cells, and batteries.

460 Communication and Information Theory (3:3:0). Prerequisite: ECE 333, MATH 351 or STAT 344, and ECE 360, or permission of instructor. Signal analysis, Fourier transform, power spectrum, and sampling. Concepts of information content and channel capacity. Principles of modulation: amplitude, frequency, and phase modulation. Frequency and time division multiplexing. Digital transmission. Pulse Code Modulation and Delta Modulation. Applications to radio, telephone, and satellite systems.

461 Communication Engineering Laboratory (1:0:3). Prerequisite: ECE 460. Lab experiments in the analog and digital communication areas covered in ECE 460.

462 Data and Computer Communications (3:3:0). Prerequisite: ECE 460. Introduction to modern data and computer communications system. Topics include transmission links, modem and codec designs, packet switching, computer networks and protocol satellite broadcasting, optical-fiber wideband local area networks, data link control, multiplexing concentrator design, error-control coding, and examples of computer networks.

463 Digital Communications Systems (3:3:0). Prerequisite: ECE 460. Introduction to digital transmission systems. Topics include quantization, digital coding of analog waveforms, PCM, DPCM, DM, baseband transmission, digital modulation schemes, ASK, FSK, PSK, MSK, QAM, pulse shaping, intersymbol interference, partial response, voice-band and wideband modems, digital cable systems, regenerative repeaters, clock recovery and jitter, multipath fading, digital radio design, optimal receiver design, MAP receiver, and probability of error.

469 Microwave Circuit Laboratory (1:1:2). Prerequisite: ECE 305 and 334, or permission of instructor. Introduction to microwave engineering laboratory techniques and measurements. Design, fabrication, and test of microwave microstrip circuits.

490 Advanced Design Project (3:3:0). Prerequisite: 84 hours in electronics engineering program. Students conceive, design, construct (as appropriate), and test a project. Final oral and written reports are required at project's completion.

491 Engineering Seminar (1:1:0). Prerequisite: 84 hours in electronics engineering program. Engineering ethics, professionalism, the role of the engineer in society, current topics, and employment opportunities.

492 Senior Advanced Design Project I (1:1:0). Prerequisite: Senior status in electronics engineering program. Senior design project is conceived and feasibility of the proposed project is determined. Work includes development of a preliminary design and plan of study.

493 Senior Advanced Design Project II (2:2:0). Prerequisite: ECE 492, preferably in the preceding semester. Project for which preliminary work was done in ECE 492 is implemented. Includes design, construction of hardware, writing required software, conducting experiments or studies, and testing the complete system.

495 Engineering Seminar (2:2:0). Prerequisite: 84 hours in electronics engineering program. Oral communication, engineering ethics, professionalism, role of the engineer in society, current topics, and employment opportunities. Oral presentation required.

498 Independent Study in Electrical and Computer Engineering (1:3:0:0). Directed self-study of special topics of current interest in ECE. Must be arranged with an instructor and approved by the department chair before registering. Can be taken for a maximum of three credit hours.
511 Microprocessors (3:3:0). Prerequisite: ECE 445 or equivalent. Introduction to microprocessor architecture and structure. Intel 8080/8085 and Z-80 architecture and programming; microcomputer bus structure; microcomputer memory; microcomputer I/O, interrupt, DMA, and interface; microcomputer development systems; and applications examples. Introduction to 16-bit microprocessors. Includes a project involving hands-on experience with microcomputer systems.

512 Real-Time Microprocessor Systems (3:3:0). Prerequisite: ECE 421 and 511 or equivalent. Real-time microprocessor systems with emphasis on control, interfacing techniques, real-time operating systems, and related applications. Topics include basic input-output, interfacing the peripheral analog circuitry, operating systems, programming techniques, process control with microcomputers, and microprocessors for communications. Course includes a simulation and design project.

513 Applied Electromagnetic Theory (3:3:0). Prerequisite: ECE 305, MATH 313 or ECE 360, or equivalent. Maxwell's Equations, electromagnetic wave propagation, wave guides, transmission lines, radiation, and antennas.

516 Advanced Microprocessors (3:3:0). Prerequisite: ECE 511 or equivalent. 16-bit and 32-bit microprocessors. Detailed study of the Intel 8086 and Motorola 68000 families (up to 80386 and MC68020). Auxiliary chips of the above families, microcomputers, and applications. Brief coverage of NS32000, Z8000, Z80000, AT&T WES32100, NEC V70, V71, DEC MicroVAX 78032. Course includes a lab project and demonstration involving the Intel 8086 and MC68000 systems.

520 Electronic Systems Analysis (3:3:0). Prerequisite: ECE 433 or equivalent. Study of electronic circuits from a systems viewpoint. Topics consist of the analog building block circuits used in system design including operational amplifiers, voltage regulators, power amplifiers, video amplifiers, oscillators, modulators, phase detectors, phase-locked loops, multipliers, active filters, A/D and D/A converters, and optoelectronic circuits.

528 Random Processes in Electrical and Computer Engineering (3:3:0). Prerequisite: ECE 360 and MATH 351 or equivalent. Topics include random signals and noise in communications, stationary and ergodic random processes, spectral analysis, Gaussian processes, Brownian motions, mean square estimation, Kalman and adaptive filtering, Markov processes, and Poisson processes. Applications are drawn from computer, communication, control, and signal processing.

535 Digital Signal Processing (3:3:0). Prerequisite: ECE 360 and ECE 528 or permission of instructor. Representation analysis and design of digital signals and systems. Sampling and quantization. Z-transform and Discrete Fourier Transform. Digital filter realizations. Design techniques for recursive (IIR) and nonrecursive (FIR) filters. The Fast Fourier Transform algorithms. Spectrum analysis. Additional topics may include adaptive filtering, homomorphic digital signal processing, digital interpolation and decimation, and VLSI signal processors.

546 Parallel Computer Architectures (3:3:0). Prerequisite: ECE 445. Study of computation schemata, Petri nets, parallel floating point operations, instruction handling techniques, pipeline systems, functional parallelism, memory organization, arbitration and deadlock, pipeline computer architecture, and massive parallelism.

568 Microwave Engineering (3:3:0). Prerequisite: ECE 513 or permission of instructor. Study of the generation, control, and propagation of microwave signals. Transmission lines, waveguides, resonators, scattering parameters. Smith charts, measurement techniques, instrumentation, and microwave devices.

569 Introduction to Optical Electronics (3:3:0). Prerequisite: ECE 305 and 331. Introduction to optical systems for information gathering, transmission, storage, and processing. Topics include introduction to lasers, solid-state detectors, and optical fibers; variety of optical sensors, imaging and nonimaging; optical data storage techniques and optical signal processing; and optical communications.

570 Optical Fiber Communications (3:3:0). Prerequisite: ECE 305, 331, and 333. Study of the components and integration of fiber-optic transmission systems. Topics include optical fibers, signal degradation, optical sources, power launching and coupling, photo detectors, receiver circuits, link analysis, and optical measurements.

571 Network Analysis (3:3:0). Prerequisite: ECE 333 or permission of instructor. Study of linear active and passive networks. Topics include graph theory, network properties, scattering parameters, frequency and time domain representation, sensitivity measures, Tellegen's theorem, and computer-aided design.

584 Solid-State Device Theory (3:3:0). Prerequisite: ECE 430 or permission of instructor. Study of the theory of semiconductor devices based on solid-state physics. Topics include physics and properties of semiconductors, pn-junction diode, metal-semiconductor contacts, MIS diode and CCD, and bipolar and field-effect transistors.

586 Digital Integrated Circuit Analysis and Design (3:3:0). Prerequisite: ECE 331, ECE 430, or permission of instructor. Study of the devices and circuit topologies used in digital integrated circuits. Topics include large signal active device models, MOS and BJT gates, regenerative logic circuits, semiconductor memories, and LSI and VLSI circuits.

587 Analog Integrated Circuit Analysis and Design (3:3:0). Prerequisite: ECE 333, ECE 430, or permission of instructor. Study of the devices and circuit topologies used in analog integrated circuits. Topics include active device models, differential amplifiers, current sources, output stages, operational amplifiers, comparators, frequency response, noise, and computer-aided design.

590 Selected Topics in Engineering (3:3:0). Prerequisite: Graduate standing or permission of department. Selected topics from recent developments and applications in various engineering disciplines. De-
signed to help the professional engineering community keep abreast of current developments.

Engineering (ENGR)

Electrical and Computer Engineering

107 Engineering Fundamentals (2:2:0). Introduction to engineering profession fundamentals and problem solving. Topics include description of engineering disciplines, functions of the engineer, professionalism, ethics and registration, problem solving and representation of technical information, mechanical drawing, estimation and approximations, and analysis and design.

183 Engineering Computer Graphics (3:2:3). Prerequisite: ENGR 107 or permission of instructor. Fundamentals of engineering drawing, graph communication, descriptive geometry, multiview projection, and graphical analysis. Introduction to computer-aided drafting, visualization, and pictorial views. Reading of engineering drawings.

208 Mechanics of Materials (3:3:0). Prerequisite: ENGR 205 or 210. Concepts of stress, strain, elasticity and plasticity, combined stress, torsion, stresses and deflection of beams, statically indeterminate members, non-symmetrical bending, and buckling of columns.

209 Material Science (3:3:0). Prerequisite: CHEM 211 or 251. Introduction to microscopic structure of engineering materials and effects on macroscopic properties. Topics include crystalline and amorphous structures and defects, semiconductors, ceramics, metals, and polymers.

210 Engineering Mechanics (3:3:0). Prerequisite: PHYS 250, MATH 114, and CS 112. Resolution and composition of forces and torques by analytical methods and analysis of equilibrium and dynamics of rigid bodies. Topics include friction, stability, equations of motion, and planar kinematics of rigid bodies including simple robotic applications.

307 Engineering Thermodynamics (3:3:0). Prerequisite: MATH 213 and PHYS 250. Classical concepts of energy and temperature, first and second laws and their application to closed and open thermodynamic systems.

Properties of pure substances, equation of state, and analysis of thermodynamic processes and systems. Application to engineering systems.

308 Engineering Fluid Mechanics (3:3:0). Prerequisite: ENGR 206 and MATH 213. Principles of fluids in equilibrium and in motion. Topics include hydrostatic pressure; continuity, Bernoulli, and momentum equations; viscosity flow problems; measuring instruments; and applications to closed conduits and open channels.

311, 312 Mathematical Methods in Physics and Engineering (3:3:0), (3:3:0). Prerequisite: PHYS 352 and MATH 304 or 306 for ENGR (PHYS) 311; ENGR (PHYS) 311 or MATH 313 for ENGR (PHYS) 312. Study of mathematical techniques as applied in physics and engineering. Ordinary and partial differential equations, special functions, Fourier series, Laplace transforms, integral equations, matrices and complex variables.

355 Computer-Aided Design (3:2:3). Prerequisite: ENGR 205 or 210 and CS 112. Introduction to computer-aided design. Mechanical, architectural, and electronic drafting by computer; graph plotting; 2D and 3D wire-frame drawings; programming or menus; isometric and perspective drawing; color shading; animation; and introduction to computer-integrated manufacturing (CIM). Students write an interactive, menu-driven program with graphical output for solution of an engineering design problem.

390 Engineering Economy (3:3:0). Prerequisite: ENGR 107 and 205 or 210. Introduction to economic decision process in engineering design and analysis. Topics include methodology for selection of alternatives, measures of investment worth, income and cost evaluation, depreciation methods, benefit-cost and cost-effectiveness techniques, and applications of decision trees to capital investment.

English (ENGL)

English

Three credit hours of a 100-level English course are prerequisite for all 200-level courses; 3 credit hours of a 100-level English course and 6 credit hours of 200-level English courses are prerequisite for all English courses numbered above 302. Any two English courses on the 200 level, taken in any order, may be used to fulfill the general education requirement in literature.

Nonnative speakers of English with limited proficiency in the language are encouraged to take ENGL 100 instead of ENGL 101. Students may not receive credit for both ENGL 100 and ENGL 101.

100 Composition for Nonnative Speakers of English (4:4:0). For nonnative speakers of English with limited proficiency in the language. Expository writing, ranging from paragraphs to essays of some length and complexity. Study of the logical, rhetorical, and linguistic structure of expository prose, with attention to particularly difficult aspects of the language for nonnative speakers. Methods and conventions of preparing research papers. Students must attain a minimum grade of C to fulfill degree requirements.

101 Composition (3:3:0). ENGL 101 (or 100) is prerequisite to all 200-level and above English courses. Ex-

http://catalog.gmu.edu
pository writing, ranging from paragraphs to essays of some length and complexity. Study of the logical, rhetorical, and linguistic structure of expository prose. Methods and conventions of preparing research papers. Students must attain a minimum grade of C to fulfill degree requirements.

203, 204 Western Literary Masterworks (3:3:0), (3:3:0). Great works of Western civilization. 203: Writers such as Homer, Sophocles, Euripides, Dante, Cervantes, Machiavelli, and Montaigne. 204: Writers such as Racine, Moliere, Flaubert, Dostoyevski, Tolstoy, Mann, Malraux, Ionesco, and Beckett. All readings in modern English.

205, 206 Readings in English and American Literature (3:3:0), (3:3:0). English and American literature by types. ENGL 205 focuses on selected English and American poetry and drama by such writers as Marlowe, Shakespeare, Shaw, O'Neill, Albee, Donne, Keats, Whitman, Frost, Eliot, and Auden. ENGL 206 focuses on selected English and American novels, short stories, and essays by such writers as Lawrence, Hemingway, Faulkner, Melville, Crane, E. Bronte, Fitzgerald, and Barth.

207, 208 Literature and Society I, II (3:3:0), (3:3:0). Study of the way in which literature has explored questions of continuing primary importance. Works are selected principally from English and American literature and a variety of genres is considered. ENGL 207 addresses a complex of related issues found in such topics as individuality, community, gender relationships, technology, social conflict, or war and considers how these issues are explored in the literature of at least two historical periods before the present. Each section of ENGL 208 deals intensively with a single topic as represented in the literature of a single historical moment.

251 Survey of English Literature I (3:3:0). Major movements and works of English literature focusing on the writings of such authors as Chaucer, Spenser, Shakespeare, Donne, and others.

252 Survey of English Literature II (3:3:0). Major movements and works of English literature, focusing on the writings of such authors as Wordsworth, Tennyson, the Brownings, Dickens, Yeats, Woolf, and others.

253 Survey of American Literature I (3:3:0). Major movements and works of American literature to 1877, focusing on the writings of such authors as Franklin, Poe, Emerson, Whitman, Hawthorne, Melville, Dickinson, Stowe, and others.

254 Survey of American Literature II (3:3:0). Major movements and works of American literature after 1877, focusing on such writers as Twain, Chopin, O'Neill, Frost, Faulkner, Stevens, Miller, Olsen, and others.

302 Advanced Composition (3:3:0). Prerequisite: Completion of 45 credit hours, 3 credits of composition, and 3 hours of literature. Intensive practice in writing and analyzing such expository forms as the essay, article, proposal, and technical or scientific report. The Schedule of Classes designates particular sections of ENGL 302 in the following broad areas: business, humanities, natural sciences, social sciences.

309 Independent Writing (3:3:0). Practice in analyzing and writing such expository forms as the essay, memo, article, and technical and scientific reports, depending on the needs of the individual student. (Not a remedial course.)

325 Dimensions of Literature (3:3:0). Intensive study of the basic concepts, questions, and assumptions of the study of literature. All sections address the study of genre and of literary history. Other issues such as author, region, ethnic, racial and sexual groups; and oral and popular culture are addressed in various sections of the course. Open to all majors; required of all English majors.

322 Introduction to Film (3:3:0). Introduction to film medium as an art form.

333 American Folklore (3:3:0). Topics include folktales, personal narratives, legends, proverbs, jokes, folksongs, folk art, folk craft, and folk architecture. Consideration of ethnicity, community, family, festival, folklore in literature, and oral history. Discussion of traditions in students' own lives.

334 Literary Approaches to Popular Culture (3:3:0). Emphasis on popular fiction and adaptation of popular prose genres to media that have strong verbal and visual elements. Relationship between verbal and nonverbal elements of such media as film, comics, and radio.

335, 336 Shakespeare (3:3:0), (3:3:0). Twenty selected plays: first semester emphasizes histories and comedies; second semester, tragedies and romances.

337 Myth and Literature (3:3:0). Study of the ways in which the traditional mythologies have been reflected in English and American literature as themes, motifs, and patterns.

340 American Visions (3:3:0). Survey of influential and representative American cultural texts that attempt to define the American community and the struggle of subordinate groups for fuller participation in the life of the nation. Emphasis on the close analysis of primary texts, especially literary works, and their relationship to the larger cultural context.

347, 348, 414, 415 Special Studies in English I, II, III, IV (3:3:0), (3:3:0), (3:3:0), (3:3:0). Prerequisite: Permission of department. Seminar sequence primarily, but not exclusively, for candidates for graduation with distinction and recognition in English, usually taken in order. A systematic consideration of the nature and implications of literary understanding. What is involved in "understanding" a text, an author's style, a genre? What do we mean by "literary history"? Specific texts and contexts from different periods of English and American literature are studied to consider the virtues and limitations of various perspectives on literary experience and their relation to other areas of humanistic learning.

Special Studies I: A single major work, studied systematically in several different ways. Emphasis on multiple critical perspectives, and what each reveals or fails to account for.

Special Studies II: The career of a major author: the gradual assumption of authority, development of themes and techniques, interaction of life and work, and adjustment of artistic vision to cultural change.

Special Studies III: An interdisciplinary cross-section of a particular historical moment: relations between lit-
erature and fine art, theology, philosophy, social and political history, and scientific thought.

**Special Studies IV:** A single theme or motif traced through many literary periods and in a variety of genres. Literary history as the evolution of the ways fundamental questions have been articulated.

**360, 363 Special Topics in Literature (3:3:0), (3:3:0).** Study of literature by topics, such as women in literature, science fiction, and literature of the avant garde. Topic changes each time the course is offered. May be repeated with permission of department.

**364 Significant Authors (3:3:0).** One or two major authors, such as Shakespeare, Dickens, and Hardy, or Tolkien and C. S. Lewis, as announced. May be repeated with permission of department.

**366 Jewish American Writers (3:3:0).** Major twentieth-century American Jewish writers, including works by such authors as Roth, Singer, Friedman, Malamud, and Bellow.

**367 Literature of the Modern South: 1920 to the Present (3:3:0).** Novels, short stories, drama, poetry, and essays of the American South from post-World War I to recent times. Southern writers include Faulkner, Warren, Tate, Wright, Porter, McCullers, Styron, and O'Connor.

**368 Literature of Black America (3:3:0).** Significant works of poetry, fiction, drama, and autobiography written by American black writers in the twentieth century and reflecting the black experience. Works by such authors as Toomer, Hughes, Wright, Brooks, Ellison, Barksa, and Bullins.

**369 Women and Literature (3:3:0).** An exploration of the experience of women as both authors of and subjects in imaginative literature. When subtitle is different, may be repeated once for credit when subtitle is different.

**380 Recent American Fiction (3:3:0).** American short story writers and novelists from World War II to the present, with emphasis on Mailer, Barth, Hawkes, Cheever, Oates, Sass, and Kosinski.

**390 Recent American Poetry (3:3:0).** Major American poets from World War II to the present, with emphasis on the work of such poets as Roethke, Wilbur, Dickey, Lowell, Merwin, Kinneil, and Ammons.

**397 Introduction to Poetry Writing (3:3:0).** Introduction to the theory and practice of poetry writing. Original student work is read and discussed in class and in conferences with the instructor. Includes technical exercises in the craft of poetry and may include reading assignments. Individual students may do some work in fiction or drama but the course concentrates on poetry.

**398 Introduction to Fiction Writing (3:3:0).** Introduction to theory and practice of fiction writing. Original student work is read and discussed in class and in conferences with the instructor. Includes technical exercises in the craft of fiction and may include reading assignments. Individual students may do some work in poetry or drama but the course concentrates on fiction.

**400 Literature of the Middle Ages (3:3:0).** Selected English narrative, dramatic, and homiletic literature written between 1300 and 1500, exclusive of Chaucer.
specific topic may vary. The primary emphasis is literary or historical, depending on the discipline of the instructor. Relevant material drawn from philosophy, theology, and art may be considered.

432 Selections from the Literature of the Indian Subcontinent (3:3:0). Selected literary masterpieces in translation from the ancient and modern literature of the Indian continent, including romances, plays, and poetry from Sanskrit, Hindi, Tamil, Urdu, and other literatures.

433 Japanese Literature in Translation (3:3:0). Selected literary masterpieces in translation from ancient and modern Japan, including a court romance (The Tale of Genji), essays (The Pillow Book), classical poetry, noh and Bunraku plays, haiku poetry and modern fiction. Review of the genres and traditions represented by those masterpieces.

434 Chinese Literature in Translation (3:3:0). Selected masterpieces of Chinese literature in translation, including the Confucian classics, ancient songs and poems, T’ang and Sung poetry and prose, Yuan and Ming plays, novels and short stories.

436 Selected Continental Novels in Translation (3:3:0). Selected European novels in translation. Course focus is the continental novel from the eighteenth century to the end of the nineteenth century, and includes works of such writers as Balzac, Gogol, Stendhal, Turgenev, Flaubert, Dostoyevsky, Tolstoy, and Galdos.

437 Selected Continental Novels in Translation (3:3:0). Course focus is the continental novel from the beginning of the twentieth century to the present and includes such writers as Proust, Mann, Gide, Silone, Kafka, Sartre, Cela, Moravia, and Grass. Attention to the influence of this literature on the novel in English. (Offered in cooperation with the Department of Foreign Languages and Literatures.)

439 Special Topics: Non-British or American Literature (3:3:0). Study of selected topics, periods, genres, or authors in Commonwealth or in Oriental literatures. May be repeated once for credit when subtitle is different, with permission of department.

440 English Renaissance Drama (3:3:0). Major dramas and dramatists of the English Renaissance, exclusive of Shakespeare.

443 Restoration and Eighteenth-Century Drama (3:3:0). Restoration comedy of manners, sentimental comedy, neoclassical and bourgeois tragedy. Theories of drama and staging and parallel developments in opera. Such writers as Wycherly, Farquhar, Etheredge, Congreve, and others.

445 English and Irish Drama of the Twentieth Century (3:3:0). English and Irish drama from Yeats to Pinter. Plays by such authors as O’Casey, Synge, Eliot, Frye, Osborne, Wesker, Behan, Delaney, and Pinter.

447 American Drama of the Twentieth Century (3:3:0). American drama of the twentieth century, with special attention to the plays of Eugene O’Neill, Thornton Wilder, Arthur Miller, Tennessee Williams, and Edward Albee.

448 Modern Drama (3:3:0), (3:3:0). Representative plays of contemporary dramatists of Europe and America, with emphasis on dramatic styles such as realism, expressionism, and existentialism. In alternate semesters, authors such as Ibsen, Strindberg, Hauptmann, Shaw, O’Neill, O’Casey, and others will be studied.

449 Special Topics in Drama (3:3:0). Study in depth of selected topics, periods, or playwrights. May be repeated once for credit when subtitle is different, with permission of department.

450 English Novel of the Eighteenth Century (3:3:0). The English novel from its beginnings through the turn of the nineteenth century. Works by such authors as Defoe, Richardson, Fielding, Sterne, Smollett, Scott, and Austen.

452 Development of the American Novel to 1914 (3:3:0). Major American novels of the pre-World War I period with emphasis on the work of Brown, Cooper, Hawthorne, Melville, Twain, Howells, James, Crane, Dreiser, Norris, and others.

453 English Novel of the Nineteenth Century (3:3:0). The English novel of the nineteenth century. Works by such authors as Dickens, Thackeray, E. Bronte, Eliot, Trollope, Meredith, and Hardy.

454 Development of the American Novel Since 1914 (3:3:0). The American novel from the end of World War I to the present, including works by such authors as Fitzgerald, Hemingway, Faulkner, Dos Passos, Wolfe, Bellow, and Nabokov.

456 English Novel of the Twentieth Century (3:3:0). The English novel from the beginning of the twentieth century to the present. Works by such authors as Conrad, Ford, Bennett, Forster, Lawrence, Joyce, Woolf, Huxley, Greene, and others.

458 Fiction Writing Workshop (3:3:0). Prerequisite: ENGL 397 or 398 or equivalent and permission of instructor. Students must submit a typed manuscript at least one week before they intend to register. For specific guidelines, consult the department’s Course Description Booklet, the instructor, or the department secretaries. A workshop course: intensive practice in creative writing and study of the creative process. The course concentrates on a specialized literary type other than the short story or poetry (for example, playwriting, screenwriting, children’s literature, travel literature, autobiography, the gothic novel, translation) and the concentration is announced in the department’s Course Description Booklet before preregistration. Intended for students already writing original creative work. (By permission of instructor, may be taken a second time for credit; the additional 3 hours, however, may not be counted toward the requirement for the English major. No more than a combined total of 9 hours may be taken in ENGL 464, 458, 497.)

459 Special Topics in Fiction (3:3:0). Study in depth of selected topics, periods, or authors. May be repeated once for credit when subtitle is different, with permission of department.

462 English Poetry of the Twentieth Century (3:3:0). English poetry from 1900 to present; emphasis on work of Hardy, Yeats, Lawrence, Graves, Auden, Thomas, and Hughes. A work of fiction which employs poetic techniques, such as Joyce’s Ulysses, may also be studied.
463 American Poetry of the Twentieth Century (3:3:0). Emphasis on the work of Robinson, Frost, Stevens, Williams, Pound, Crane, Eliot, and Lowell. A work of fiction employing poetic techniques, such as Faulkner’s The Sound and the Fury, may also be studied.

464 Poetry Workshop (3:3:0). Prerequisite: ENGL 397 or equivalent and permission of instructor. Students must submit a typed manuscript at least one week before they intend to register. For specific guidelines, consult the department’s Course Description Booklet, the instructor, or the department secretaries. Intensive practice in the craft of poetry and study of the imagination in the creative process. Intended for students already writing original poetry. At the discretion of the instructor, technical exercises and assigned reading may be required. (By permission of instructor, may be taken a second time for credit; the additional 3 hours, however, may not be counted toward the requirement for the English major. No more than a combined total of 9 hours may be taken in ENGL 464, 458, 497.)

468 Special Topics in Poetry (3:3:0). Study in depth of selected topics, periods, or poets. May be repeated once for credit when subtitle is different with permission of department.

471 Chaucer (3:3:0). The major works of Chaucer, with emphasis on The Canterbury Tales.

472 Spenser (3:3:0). Poetry of Edmund Spenser, with central emphasis on The Faerie Queene.

473 Special Studies in Shakespeare (3:3:0). Study in depth of one aspect of Shakespeare’s art or critical issues surrounding his work. May be repeated once for credit when subtitle is different, with permission of department.

474 Milton (3:3:0). Milton’s major poetic works, with emphasis on Paradise Lost.

477 Special Topics: British Authors (3:3:0). Study of one or two major figures in British literature. May be repeated once for credit when subtitle is different, with permission of department.

478 Special Topics: American Authors (3:3:0). Study of one or two major figures in American literature. May be repeated once for credit when subtitle is different, with permission of department.

485 Structure of Contemporary American English (3:3:0). Phonology, morphology and syntax of contemporary American English. Accepted norms are discussed in detail, but dialect variation due to region or social class is also covered.

489 Advanced Expository Writing (3:3:0). Theory and practice of advanced expository writing; practice in analyzing and writing essays, articles and other expository forms.

490 Special Topics in Film (3:3:0). American and foreign films selected by type, period, or director with the emphasis varying from year to year. Required viewings, student discussion, and written critiques. May be repeated with permission of department.

491 Special Topics in Folklore (3:3:0). An exploration of various aspects of folklore and folklife such as folklore and literature, folk arts, folk song, material culture. May be repeated once for credit when subtitle is different, with permission of department.

492 Science Fiction (3:3:0). Major works of science fiction in terms of mode, themes, and narrative techniques, especially the role of hypothesis in science fiction. Focus on novels and short stories from the early nineteenth century to the present.

493 Special Topics in Popular Literature (3:3:0). Study of a specific topic or theme in popular literature. May be repeated once for credit when subtitle is different, with permission of department.

494 Special Topics in Criticism (3:3:0). Study in depth of a selected approach to literary criticism, as announced, with exercises in critical analysis. Examples: new criticism, structuralism, psychoanalysis, Marxism. May be repeated with permission of department.

495 Literary Modes (3:3:0). Theory and practice of such modes as tragedy, comedy, tragicomedy, romance and satire, considered in separate semesters and drawn from a variety of periods ranging from biblical times to the present, with examples from drama, poetry, and fiction. May be repeated with permission of department.

496 Special Topics: British or American Literature (3:3:0). Study in depth of a selected literary topic, period or genre, as announced. May be repeated with permission of department.

497 Special Topics in Creative Writing (3:3:0). Prerequisite: ENGL 397 or 398 or equivalent and permission of instructor. Students must submit a typed manuscript at least one week before they intend to register. For specific guidelines, consult the department’s Course Description Booklet, the instructor, or the department secretaries. A workshop course: intensive practice in creative writing and study of the creative process. The course concentrates on a specialized literary type other than the short story or poetry (for example, play writing, screen writing, children’s literature, travel literature, autobiography, the gothic novel, translation) and the concentration is announced in the department’s Course Description Booklet before preregistration. Intended for students already writing original creative work. By permission of instructor, may be taken a second time for credit; the additional 3 hours, however, may not be counted toward requirements for the English major. No more than a combined total of 9 hours may be taken in ENGL 464, 458, 497.)

499 Independent Study (1-3:0:0). Prerequisite: Permission of department and permission of instructor. Open only to English majors with 84 hours and 15 hours in 300- and 400-level courses. Intensive study of a particular author, genre, period, or critical or theoretical problem in literature or linguistics, to be conducted by an individual student in close consultation with an instructor. The student produces at least one substantial piece of written work during the semester on the findings of his or her research. (By permission of department, the course may be taken twice for a maximum of 6 hours of credit.)

503 Theory and Practice of Editing (3:3:0). Prerequisite: 6 hours of English courses numbered above 300, including one advanced writing course—309, 310, 397, 398, 458, 464, 489, 497—or permission of department. Instruction in revising, editing, and preparing specialized writ-
504 Internship in Writing and Editing (3:0:0). Prerequisite: Open to senior English majors and graduate students pursuing the M.A. in English or the M.F.A. Contact the English Department once semester prior to enrollment. Internships are approved work-study positions in writing or editing established by the English Department with specific employers. Variable credit. Variable prerequisites.

507 Internship in Applied Linguistics (3:0:0). Prerequisite: ENGL 521 or EDCL 519 and ENGL 582. Contact the English Department once semester prior to enrollment. Internships provide experience working in a language teaching program or an educational research organization.

511 Styles and Modes in Literary History (3:3:0). Historical consideration (not a survey) of some of the principal styles, in prose and poetry, of English and American Literature.

512 Issues in Literature and Philosophy (4:3:0). Prerequisite: 84 hours, 6 hours of 300-level English, and 6 hours of 300-level philosophy, or permission of instructor. Topics vary: may include structuralism, technology, form and matter, conceptions of the future. Course is cross-listed with philosophy and sometimes team-taught.

513 Advanced Special Topics in English (3:3:0). Prerequisite: 15 hours of advanced undergraduate English courses and permission of department or possession of the baccalaureate degree. Intensive study of selected topics in English and American literature.

514 Theories of Comparative Literature (3:3:0). Prerequisite: CL 300 and senior standing, or baccalaureate degree or permission of instructor. Intensive study of the major theories of comparative literature with special emphasis on international movements and their characteristic themes. Students will work with texts in the foreign language of their competence; other texts are studied in translation.

520 Descriptive Linguistics (3:3:0). Introduction to the terminology and methodology of modern linguistics and a detailed analysis of English phonology, morphology, and syntax.

521 Applied Linguistics: Teaching English as a Second Language (3:3:0). Prerequisite: ENGL 481 or 520. Theories and basic principles of the acquisition of a second language, especially as they relate to the English language, supplying students with methods of teaching English to speakers of other languages.

522 Modern English Grammar (3:3:0). Prerequisite: ENGL 481 or 520. Overview of the structure of modern English beginning with word classes and ending with analyses of complex sentences. Most topics are introduced as problems of language description; in solving them, principles of syntactic argumentation are demonstrated as well. Students learn to tap their own intuitions about English to analyze grammatical structure.

551 Literary Criticism (3:3:0). Studies of major critical theories and techniques with emphasis on the twentieth century.

556 Literary Style (3:3:0). Theory and practical analysis of English literary style. Several methodologies, including impressionistic, rhetorical, and linguistic, are examined and applied to the language of various literary texts, including essays, poems, and novels.

557 Old English (3:3:0). Study of Old English language, including its phonology, morphology, syntax, and lexicon, aimed at preparing students to read Anglo-Saxon literature in its original form. Accompanied by reading from Anglo-Saxon prose and poetry of the seventh through the eleventh centuries. Selections from The Anglo-Saxon Chronicle, Aelfric’s Homilies, The Legend of St. Andrew, and other prose works, as well as such verse as The Dream of the Road, The Seafarer, and Judith, are read and translated.

564 Form of Poetry (3:3:0). Prerequisite: ENGL 464 or equivalent and permission of instructor. Students must submit a typed manuscript of original poetry at least one week before they intend to register. For specific guidelines, consult the department’s Course Description Booklet, the instructor, or the department secretaries. Intensive study of and practice in the formal elements of poetry through the analysis of models and weekly or biweekly writing assignments. Intended for students already writing original poetry. Students study rhyme, meter, rhythm, and other musical elements of poetry; lineation; stanza pattern; traditional and experimental forms; free verse and open form composition; lyric, narrative, and dramatic modes.

566 (565) Form of Fiction (3:3:0). Prerequisite: ENGL 465 or equivalent and permission of instructor. Students must submit a typed manuscript of original fiction at least one week before they intend to register. For specific guidelines, consult the department’s Course Description Booklet, the instructor, or the department secretaries. Intensive study of the elements of fiction, through the analysis of models and weekly or biweekly writing assignments. Intended for students already writing original fiction. Students study description, narration, plot, dialogue, voice, point of view, style, epiphany, and antifiction techniques.

581/PSYC 521 Psycholinguistics (3:3:0). Prerequisite: ENGL 481 or 520. Study of mental and psychological aspects of human language, including aphasia, association, autism, language acquisition, verbal concept formation, and perception.

582 Second Language Acquisition (3:3:0). Prerequisite: ENGL 481 or 520. Study of the applications of linguistic science to the teaching of English language and literature. Attention is given to linguistic foundations of teaching English as a second language, findings of linguistics with regard to composition instruction, and ways in which linguistics can support the teaching of literature and literary style.

592 History of the English Language (3:3:0). Introduction to the history and development of the English language, including study of the Indo-European language family and various stages of the English language from Old and Middle English to Early and Recent Modern English and American English; emphasis on historical principles and theory of language change as it affects phonology, morphology, syntax, and semantics.
European Studies (EUST)

Area Studies

300 Foundations of European Civilization (3:3:0). Prerequisite: 24 hours or permission of instructor. Examination of Greek, Roman, and Judeo-Christian origins of Europe's intellectual and cultural traditions, concentrating on the political ideas, philosophical precepts, and cultural values basic to European thought.

350 Classicism and Romanticism (3:3:0). Prerequisite: EUST 300 or permission of instructor. Examination of Classicism and Romanticism through literary and other cultural forms of expression in seventeenth-, eighteenth-, and nineteenth-century Europe.

400 The Arts in Modern European Culture (3:3:0). Prerequisite: EUST 300 or permission of instructor. Examination of how the arts interact to reflect historical, intellectual, and aesthetic aspects of nineteenth- and early twentieth-century European culture. Representative examples from music, theater, dance, architecture, and the visual arts.

450 The Twentieth Century in Europe (3:3:0). Prerequisite: EUST 300 or permission of instructor. Examination of the main currents of European life and thought in the twentieth century. Study of the principal influences and events of the period, culminating in an assessment of contemporary European problems and values.

Finance (FNAN)

School of Business Administration

If a student takes noncore, upper-level business administration courses prior to acceptance to the School of Business Administration, those courses will not count on an undergraduate degree application for any major in the School of Business Administration (except as general elective credit). A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Prerequisites are strictly enforced.

301 Financial Management (3:3:0). Prerequisite: Completion of at least 60 hours including ECON 103 and 104, ACCT 201 and 202, and DESC 202. Introduction to the management of a firm's financial resources given a wealth maximization decision criteria. Includes working capital management, fixed-asset investment, cost of capital, capital structure, and dividend decision analysis. Lecture, problems, and discussion.

311 Principles of Investment (3:3:0). Prerequisite: FNAN 301 and ECON 310. Introduction to the analysis of the valuation of equity and debt securities given modern capital market theory. Also includes a discussion of portfolio analysis as related to the valuation of securities. Lecture, discussion, and computer-assisted research.

321 Financial Institutions (3:3:0). Prerequisite: FNAN 301 and ECON 310. Discussion of the basic objectives of financial institutions in light of industry structure and regulative environment, and the decision variables which management should concentrate on in achieving its objectives. Includes the role that financial institutions play in the allocation of funds within the financial markets. Lecture, discussion, and computer-assisted research.

351 Principles of Real Estate (3:3:0). Dimensions and specialties involved in the public control and private development, sale, finance, and management of real estate. Subject areas include land planning, land use control, appraisal, finance, brokerage, property management, and investment. Lecture, discussion, and computer-assisted research.

401 Advanced Financial Management (3:3:0). Prerequisite: FNAN 301. Analysis of decision making within the firm emphasizing the conceptual structure of problems and the use of advanced analytic techniques. Specific topics covered include current asset management, capital budgeting, capital structure, dividend policy, long-term financing, mergers, and corporate planning models. Lecture, discussion, case analysis.

411 Investment Analysis and Portfolio Management (3:3:0). Prerequisite: FNAN 311. Analysis of the modern techniques of portfolio management including the evaluation of standards for the selection of individual securities for inclusion in or deletion from portfolios. Risk-return analysis for portfolios and portfolio performance measures are presented. Lecture, discussion, computer-assisted research.

412 Futures Markets (3:3:0). Prerequisite: FNAN 311. Introduction to options markets, commodity markets, and financial futures markets as they function to provide pricing mechanisms and alternative investment vehicles. Lecture, discussion, computer-based research.

421 Money and Capital Markets (3:3:0). Prerequisite: FNAN 321. Discussion of how financial markets are organized, their role in the allocation of funds to various market segments, and the interaction between markets. Topics covered include aggregate flow of funds analysis as well as money markets, government markets, corporate markets, and mortgage markets. Lecture, discussion, computer-assisted research.

423 Commercial Bank Management (3:3:0). Prerequisite: FNAN 321. Introduction to the management of commercial banks. Emphasis is placed on the management of deposits, cash and liquidity, lending, investing, trust services, capital structure and adequacy, international operations, current banking laws and regulations. Includes a discussion of bank holding companies, interstate banking proposals, and regulatory agency proposals for expanding banking powers.

440 International Financial Management (3:3:0). Prerequisite: FNAN 301. Introduction to the management of the contemporary firm's international financial operations. Topics include foreign exchange risk, political risk, returns and risks of international projects, international money and capital markets, financial accounting, capital structure, and the cost of capital. Lecture, discussion, readings, and problems.

451 Real Estate Finance (3:3:0). Prerequisite: FNAN 301 and 351. Mechanisms of estate finance, sources of funds, loan contracts, principles of mortgage risk analysis, and secondary mortgage markets. Students develop analytical skills including use of the microcomputer and appropriate software.

452 (413) Real Estate Appraisal (3:3:0). Prerequisite: FNAN 301 and 351. Economic theories of value applied.

http://catalog.gmu.edu
to real estate; estimation of value through the cost, income, and market data approaches; valuation of a guide to business decisions; market analysis techniques for the major types of real estate; development of analytical skills including use of the microcomputer and appropriate software.

453 Real Estate Investment (3:3:0). Prerequisite: FNAN 301 and 351. Introduction to the fundamentals of real estate investment, including an overall investment strategy, analytical skills, feasibility studies, and characteristics of various types of properties. Students learn to use microcomputers and appropriate software.

491 Seminar in Finance (3:3:0). Prerequisite: FNAN 311, 321, and 401. Seminar in contemporary developments in finance, including financial management, financial institutions, financial markets, and investment management. Lecture, discussion, simulation, computer-assisted research.

492 Field Experience in Finance (3:3:0). Prerequisite: Senior standing. Faculty-governed field experience in a Northern Virginia business. Teams of students, matched with client firms through the Entrepreneurship Center, propose action plans relating to a major problem or opportunity faced by the company.

499 Independent Study (1-3:0:0). Prerequisite: Finance majors with at least 9 upper-level finance credit hours. Research and analysis of selected problems or topics in finance. Must be arranged with an instructor and receive written approval of chair before registration. Written report required. May be repeated to a maximum of six hours if topics vary.

Foreign Language (FRLN)

Foreign Languages and Literatures

431/ENGL 431 and HIST 431 Medieval Intellectual Topics (3:3:0). May be taken for credit by English, history, or area studies majors. A topic in the intellectual history of the Middle Ages. Specific topics vary. Emphasis is literary or historical, depending on the discipline of the instructor. Relevant materials drawn from philosophy, theology, and art may be considered.

510 Bibliography and Research Problems in Foreign Languages and Literature (3:3:0). Prerequisite: Graduate standing or permission of department. Use of basic bibliographical tools and methodologies necessary to do scholarly research in French, German, and Spanish. Taught in cooperation with the university library staff. Conducted in English.

525 Literary Translation (3:3:0). Prerequisite: Graduate standing or permission of instructor. Advanced work in literary translation. The critical approach to and analysis of diverse literary texts ranging from poetry, drama, and essay to excerpts from novels.

565 Theory of Translation (3:3:0). Lectures on the nature and function of the translating process. Evaluation of theories of translation with respect to text-typology. Critiques of selected translations from the target languages to English and vice versa.

590 Internship and Seminar in Translation (3:3:0). Prerequisite: Admission to the translation certificate program. Internships are nonpaying, work-study positions that focus on the practice of translation. Qualified students are placed with area institutions, interest groups, agencies or corporations. Placement depends on availability of positions.

French (FREN)

Foreign Languages and Literatures

Placement: See Admission Procedures.

101 Elementary French I (3:3:1). Designed for students with no knowledge of French. Introduction to French, including elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Lab work required.

102 Elementary French II (3:3:1). Prerequisite: FREN 101 or permission of instructor. Continuation of FREN 101. Lab work required.

105 Review of Elementary French (3:3:1). Prerequisite: Appropriate placement score or permission of department. Review for students who have studied French previously. May not be taken for credit in combination with 101, 102, or 109. Lab work required.

109 Intensive Elementary French (6:6:2). Equivalent to FREN 101, 102 taught in a single semester. Recommended for students who desire an intensive introduction to French. May not be taken for credit in combination with 101, 102, or 105. Lab work required.

201 Intermediate French I (3:3:1). Prerequisite: FREN 102, 105 or 109, or appropriate placement score or permission of department. Further development of skills in listening, speaking, reading, and writing. FREN 201 and 202 must be taken in sequence. Lab work required.

202 Intermediate French II (3:3:1). Prerequisite: FREN 201, or appropriate placement score, or permission of department. Application of language skills to reading, composition, and class discussion. Lab work required.

209 Intensive Intermediate French (6:6:2). Prerequisite: FREN 102 or 105 or 109, or appropriate placement score, or permission of department. Equivalent to FREN 201 and 202 taught in a single semester. May not be taken for credit in combination with FREN 201 or 202. Lab work required.

300 Study Tour in France (1-6:0:0). Prerequisite: FREN 202 or permission of instructor. Directed study tour of cultural and literary points of interest in France. Briefing sessions and a reading selection are given before the trip. All papers and examinations required for credit are due by the end of the summer session.

325 Major French Writers (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Study of the works of major French writers. Writers to be studied vary. Course work in English. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees. May be repeated for credit with permission of department.

329 Problems of Western Civilization in French Literature (3:3:0). Prerequisite: ENGL 101 or equivalent
or permission of instructor. Basic philosophical, moral, social, and political dilemmas reflected in the literature of major French writers. Course work in English. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees. May be repeated for credit with permission of department.

350 French Conversation (3:3:0). Prerequisite: FREN 202 or equivalent. Development of conversational proficiency in French. Specifically designed for French majors who need practice in the spoken language beyond the intermediate level.

351 Advanced French Grammar (3:3:0). Prerequisite: FREN 202 or equivalent. Systematic review of French grammar with emphasis on syntax, idiomatic construction, vocabulary building, and literary style. Written and oral exercises.

352 French Composition (3:3:0). Prerequisite: FREN 202 or equivalent. Development of writing skills through written reports on current events and on literary topics. Specifically designed for French majors who need practice in the written language beyond the intermediate level.

355 Phonetics and Oral Expression (3:3:2). Prerequisite: FREN 202 or permission of instructor. Intensive study of French pronunciation and diction. Practice in discriminating French phonemes and allophones and in transcribing in phonetic symbols. Recitation of poems and rhythmic prose. Enrollment limited to 15.

356 Interpretation (3:3:0). Prerequisite: FREN 202 or permission of instructor. Initial orientation and practice in the techniques of simultaneous, consecutive, and contract interpretation. Recommended for students who wish to improve language skills or intend to use them professionally.

357 Translation of Texts in Specialized Fields (3:3:0). Prerequisite: FREN 202 or permission of instructor. Translations from French to English, English to French, of texts selected from current periodicals and newspapers in various fields. Recommended for students who wish to improve language skills.

375 French Civilization: From Ancient Gaul to the French Revolution (3:3:0). Prerequisite: FREN 202 or permission of instructor. Study of contributions of France to world civilization; emphasis on development of ideas, arts, sciences, and institutions. Offered in alternate years.

376 French Civilization: From the Revolution to Contemporary France (3:3:0). Prerequisite: FREN 202 or permission of instructor. See FREN 375.

377 Survey of French Literature: Middle Ages to 1800 (3:3:0). Prerequisite: FREN 202 or permission of instructor. French literature through the centuries, with reading and analysis of representative texts of the major authors. Offered in alternate years. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

378 Survey of French Literature: 1800 to Present (3:3:0). Prerequisite: FREN 202 or permission of instructor. See FREN 377.

381 Introduction to Literary Analysis (3:3:0). Prerequisite: 15 semester hours of French. A structured approach to the reading and analysis of French literary texts.

391 French for the Business World I (3:3:0). Prerequisite: 15 hours of French or permission of instructor. Introduction to study of styles used in commercial, private, and official formats for correspondence and various common business documents. Emphasis on written exercises. Designed to satisfy the needs of students equipping themselves for multinational business and foreign service.

392 French for the Business World II (3:3:0). Prerequisite: FREN 391 or permission of instructor. Continuing study of terminology used in business affairs, with attention to form and style of business documents. Oral and written practice of French used in everyday work situations. Students may use this course in preparation for the Paris Chamber of Commerce certificate in Business French.

405 French Literature of the Renaissance (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Development of the humanistic tradition in France during the sixteenth century, especially as reflected in the works of Rabelais and Montaigne. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

413 French Literature of the Seventeenth Century: Classical Drama (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Study of the dramatic literature of the seventeenth century. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

414 French Literature of the Seventeenth Century: Prose and Poetry (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Reading and analysis of representative texts of the major authors. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

421 French Literature of the Eighteenth Century: Montesquieu and Voltaire (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Study of Montesquieu, Voltaire, and other writers of the first half of the century. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

422 French Literature of the Eighteenth Century: Diderot and Rousseau (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Study of Diderot, Rousseau, and other writers of the second half of the century. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

431 French Literature: 1800-1850 (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Poetry, theater, and novel of the Romantic and Parnassian movements. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

432 French Literature: 1850-1900 (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Poetry, theater, and novel of the Realist, Naturalist, and Symbolist movements. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.
Course Descriptions

441 Twentieth-Century Prose Fiction (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Principal literary trends in contemporary French literature; emphasis on evolution of the novel from Proust and Gide to Beckett and the "Nouveau Roman." May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

442 Twentieth-Century Drama and Poetry (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. French drama from Surrealism to the "Nouveau Theatre." French poetry from Symbolism to contemporary poets. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

451 Writers of French-Speaking Africa and the Caribbean (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Study of selected poems, plays, tales, and novels expressing the culture and aspirations of the peoples of Africa and the Caribbean. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees. May also be taken to meet the non-Western requirement.

452 French-Canadian Literature (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Study of the Francophone literature of Canada with emphasis on contemporary works. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

460 Advanced Oral and Written Expression (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Intensive course designed to help students obtain fluency in oral and written French. Development of conversational skills and mastery of vocabulary. Class discussions, oral and written reports on current topics.

461 Linguistic Structure of Modern French (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Descriptive analysis of the phonology, morphology, and syntax of modern standard French. Optional lab work.

462 Stylistics (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Analysis of the more complex aspects of the French language and of various stylistic processes. Development of writing skills through readings, discussion, and composition.

480, 481 Special Topics (3:0:0), (3:3:0). Prerequisite: 18 semester hours of French or permission of instructor. Study in depth of a selected literary theme, topic, period, or genre. May be repeated for credit with permission of instructor.

490, 491 Independent Study (1-3:0:0), (1-3:0:0). Prerequisite: 84 hours as a major in French and permission of chair. Research and analysis of a selected problem in literature or linguistics in consultation with a member of the department. Only 6 hours of independent study may be applied to fulfillment of requirement in the major.

497, 498 Senior Honors Tutorial (3:0:0), (3:0:0). Prerequisite: 84 hours as a major in French, with GPA of 3.00 and 3.00 in the major field. Students who meet these requirements are admitted to candidacy upon submission of a letter of application to the departmental Honors Committee in the second half of the junior year, supported by a faculty recommendation and an interview by and with the approval of the Honors Committee. In the first semester, weekly meetings with a faculty member to discuss readings from a comprehensive list prepared by the French faculty. In the second semester, independent research and completion of an honors essay under the supervision of a member of the French faculty.

515 Medieval French Literature (3:3:0). Intensive study of the outstanding literary works of the Middle Ages. Course work in French.

518 Studies in Eighteenth-Century Literature (3:3:0). Selected writers, works, themes, or trends of French literature in the eighteenth century. Content varies. Course work in French. May be repeated for credit with permission of department.

519 Studies in Nineteenth-Century Literature (3:3:0). Selected works, themes, genres, and authors of nineteenth-century French literature. Content varies. Course work in French. May be repeated for credit with permission of department.

525 Studies in Modern French Literature (3:3:0). Selected works, works, themes, or trends of French literature in the modern era. Content varies. May be repeated for credit with permission of department. A maximum of 6 hours of credit may be earned. Course work in French.

550, 551 Special Topics (3:3:0), (3:3:0). Specialized topics relating to French culture and literature. Content varies. Course work in French.

561 Old French (3:3:0). Study of Old French phonology, morphology, syntax, and lexicography, aimed at preparing students to read medieval French literature in original versions. Linguistic study complemented by reading of Old French verse and prose texts from the ninth through the thirteenth centuries.

575 Grammatical Analysis (3:3:0). Study of characteristic features of contemporary French. Examination of spoken and written French, including syntactic analysis, distributional analysis, and generative-transformational grammar. Emphasis on problem areas for the American learner.

576 Advanced Translation (3:3:0). Advanced work in translation of topics selected from the humanities, the social and political sciences. Comparative terminology, sight translation, and precis writing. The importance, function, and techniques of documentation in translation. Translations from French to English and English to French.

580 Contemporary French Society and Culture (3:3:0). Study of structure and evolution of the society and culture of contemporary France. Also see FRLN listing.

http://catalog.gmu.edu
Geographic and Cartographic Sciences (GECA)

Public Affairs

503 Problems in Environmental Management (3:3:0). Prerequisite: 6 hours of geography, including GEOG 102. Case studies of the impacts of human activities on atmospheric, hydrologic, geomorphic, and biotic processes.

505 Transportation Geography (3:3:0). Prerequisite: 6 hours of geography. Structure, principles, location, and development of world transportation. Critical role of transportation in moving people, goods, and ideas at the international, national, regional, and urban levels.

520 Geography for Teachers (3:3:0). Prerequisite: Graduate standing or permission of instructor. Emphasis on problems and techniques in teaching geography and current developments in research, methodology, and philosophy in the discipline.

540 Medical Geography (3:3:0). Prerequisite: Graduate standing or permission of department and a course in statistics. Spatial approaches to the study of health and disease. Topics include disease ecology, disease dissemination, and geographic perspectives on improving health care delivery.

551 Thematic Cartography (3:3:0). Prerequisite: Graduate standing or permission of instructor. Analysis of the nature of perceptual organization and visual systems in thematic map communication portrayal, graphic handling, and data analysis.

553 Geographic Information Systems (3:3:0). Prerequisite: Course in computer science and graduate standing or permission of department. Sources of digital geographic information, methods of storage and processing for cartographic display, and geographical analysis.

554 History of Cartography (3:3:0). Prerequisite: Graduate standing or permission of department. History of cartographic portrayal of the earth from ancient times through the nineteenth century, with emphasis on the interrelation of human culture, technological development, and geographical knowledge as reflected in maps.

561 Analytic Photogrammetry (3:3:0). Prerequisite: GEOG 414, a course in matrix algebra, and graduate standing or permission of department. Analytic treatment of photogrammetric problems, including least squares adjustments, image coordination refinements, colinearity equation, resection, relative orientation, and analytic aerotriangulation.

579 Remote Sensing (3:3:0). Prerequisite: Course in physical geography or geology and course in aerial photo interpretation or permission of instructor. Analysis of the nature of electromagnetic radiation, principles and operations of sensors, techniques and systems of correction, enhancement, and production of imagery. Interpretation and applications in geomorphic, atmospheric, hydrologic, vegetation, land use, and regional analysis.

580 Digital Remote Sensing (3:3:0). Prerequisite: GEOG 416 or 579 or permission of instructor. Examination of the theory and techniques of using digital remotely sensed data for obtaining geographic information of the earth's surface, including both image enhancement methods and classification strategies for a variety of physical and cultural features.

581 World Food Population (3:3:0). Prerequisite: Graduate standing or permission of instructor. Topics include malnutrition, population, regional disparities in growth rates and income distribution, food production and world hunger. Discussion of population policies, with emphasis on Third World countries.

583 Spatial Dynamics of Political Systems (3:3:0). Prerequisite: Graduate standing or permission of instructor. Topics include territoriality, reapportionment, spatial allocation of public facilities, perception of boundaries. Emphasis on the spatial impact of political process upon land use.

585 Quantitative Methods (3:3:0). Prerequisite: Course in statistics or permission of department. Survey of quantitative methods commonly used in geographic research. Emphasis on spatial analysis techniques.

590 Selected Topics in Geography and Cartography (3:3:0). Prerequisite: Graduate standing or permission of department. Students analyze topics of immediate interest. Content varies.

Geography (GEOG)

Public Affairs

102 Physical Geography (3:3:0). Interrelated process affecting the global distribution and character of climate, soils, vegetation, hydrology, and landforms; elements of mapping.

103 Cultural Geography (3:3:0). Study of relationships between geography and human population distribution, cultural patterns, and economic development.

110 Maps and Map Reading (3:3:0). Reading, interpretation, and analysis of broad variety of maps.

301 Political Geography (3:3:0). Prerequisite: 24 hours. Structures and processes involved in the creation of political space at all levels—city, county, state, national, and international. Emphasizes interrelations between geographical-political units and problems created by overlapping units.

303 Conservation of Resources and Environment (3:3:0). Prerequisite: 24 hours. Analysis of spatial aspects of world resources and problems resulting from their unequal distribution or unwise use. Population growth, its implications for resource use, and pollution problems are stressed.

304 Geography of Population: Patterns and Problems (3:3:0). Prerequisite: 24 hours. Spatial distribution of population, its causes and effects, and the changing patterns resulting from population mobility. Emphasis on spatial characteristics of variables such as age, sex, race, education, and income. Population prob-
lems such as crowding and poverty are viewed in the spatial context.

305 Economic Geography (3:3:0). Prerequisite: 24 hours. Analysis of the pattern of distribution of world economic activity, the spatial economics behind this pattern, and the influence of this distribution on other spatial systems.

307 Agricultural Geography (3:3:0). Prerequisite: Combination of 6 hours of geography and economics or permission of instructor. Survey of major agricultural systems, including production, planning, and distribution.

309 Introduction to Meteorology and Climate (3:3:0). Prerequisite: GEOG 102 or equivalent or permission of instructor. Elements of meteorology; analysis of world distribution of meteorological controls as the bases of regional climatic variations.

310 Cartography I (4:3:2). Prerequisite: STAT 250 or equivalent in statistics or permission of instructor. Principles and methods of map making. Collection, analysis, and cartographic portrayal of geographic data.

311 Cartography II (4:3:2). Prerequisite: Or better in GEOG 310 or permission of instructor. Cartographic methods of compilation, construction, and reproduction with emphasis on planning and execution of complex maps.

315 Geography of the United States (3:3:0). Prerequisite: 6 hours of geography and/or American studies or permission of instructor. Diversity of physical and cultural landscapes in the U.S., emphasizing role of environment in shaping patterns of demographic distribution and economic activity.

316 Geography of Latin America (3:3:0). Prerequisite: 6 hours of geography and/or Latin American studies or permission of instructor. Regional survey of physical resources, populations, cultural characteristics, and economic activities in Latin America.

320 Geography of Europe (3:3:0). Prerequisite: 6 hours of geography and/or European studies or permission of instructor. Environmental, economic, social, and political factors influencing the regional structure of Europe. The effect of the new European economic and social communities upon the urban network, the regions, and their relationships.

325 Geography of North Africa and the Middle East (3:3:0). Prerequisite: 6 hours of geography and/or courses related to Middle East, or permission of instructor. Environmental, economic, and social factors of differentiation of the regional structure and distribution of resources in the North African and Middle Eastern countries.

330 Geography of the Soviet Union (3:3:0). Prerequisite: 6 hours of geography and/or Russian studies or permission of instructor. Analysis of the geographic factors involved in the history, economic development, and geopolitical situation of the Soviet Union. Ethnic diversity and population problems in a multinational state.

335 Geography of Canada (3:3:0). Prerequisite: 6 hours of geography and/or Canadian studies, or permission of instructor. Analysis of physical and human geographic factors affecting Canadian history, urban/rural settlement, economics, politics, and culture. Emphasis on the uniqueness of Canadian issues and problems as understood through a study of Canada's regions, resources, and urban system.

380 Geography of Virginia (3:3:0). Natural and cultural forces of Virginia. Study of regional makeup and analysis of human and environmental characteristics.

399 Selected Topics in Geography (3:0:0). Prerequisite: 24 hours. Content varies; determined by instructor.

406 Suburban Geography (3:3:0). Prerequisite: 24 hours. Analysis of the spatial aspect of man's social, economic, and political activities within suburbia. Suburbanization viewed both as an independent force and as a component of the larger urbanization process. Northern Virginia is used as a lab for suburban geographical study and student-initiated fieldwork projects.

411 Introduction to Computer Cartography (3:3:0). Prerequisite: 6 hours of geography and a course in computer programming. Concepts and techniques involved with production and use of computer-generated maps.

412 Aerial Photography Interpretation (3:3:0). Prerequisite: 54 hours and GEOG 102 or 103, or permission of instructor. Introduction to technology of gathering and managing information. Methods and techniques of interpreting and using information contained in aerial photography including applications to various aspects of the physical and cultural landscape.

413 Photogrammetry I (3:3:0). Prerequisite: 54 hours, course in mathematics or physics, or permission of instructor. Theories and processes involved in terrestrial measurement and mapping with remotely sensed imagery. Particular emphasis on current technology and applications of topographic and thematic mapping from photogrammetric images.

414 Photogrammetry II (3:3:0). Prerequisite: GEOG 413, course in statistics, or permission of instructor. Theory and methods of stereoscopic plotting, error adjustments, and aerotriangulation.

415 Seminar in Geography (3:3:0). Prerequisite: Open to geography majors with 54 hours. Opportunity to integrate previous course work into a comprehensive disciplinary framework and to study in depth some particular aspect of geography. The format varies but stresses fieldwork and readings in the current literature, history, and research techniques of the discipline.

416 Satellite Image Analysis (3:3:0). Prerequisite: GEOG 412 or permission of instructor. Examination of the methods and techniques of interpreting and using information obtained by non-photographic remote sensing systems, with particular emphasis on spaceborne platforms. Includes analysis of imagery for both physical and cultural environments.

420 Physiography of North America (3:3:0). Prerequisite: GEOG 102, 3 additional hours of geography or geology, or permission of instructor. Physiographic features of the North American continent, their spatial distribution and their influence on the cultural, demographic, and economic development of the U.S. and Canada.

http://catalog.gmu.edu
430 Land Use Geography (3:3:0). Prerequisite: 6 hours of geography to include one physical geography course, or permission of instructor. Analysis of the different categories of land use, the associations and regional distribution of agricultural land uses, the spatial distribution and competition of urban-suburban land uses, and the need for an evaluation of land capabilities.

480 Internship (3,6:0:0). Prerequisite: Open only to authorized majors with 84 hours. Internships are approved work-study programs with specific employers. Credit is determined by department. Contact department one semester prior to enrollment.

499 Independent Study in Geography (1-3:0:0). Prerequisite: Open only to geography majors with 54 hours and permission of department and instructor. Individual study of a selected area of geography. Directed research paper is required.

Geology (GEOL)

Geology

101 Introductory Geology I (4:3:3). The earth, processes that operate within the earth and on its surface, and human interaction with the earth. Topics include minerals, earthquakes and seismology, isotasy, igneous processes and rocks, paleomagnetism and plate tectonics, weathering, mass movements, rivers and streams, groundwater, glaciers, marine processes. May include field trips. (Course recommended as partial fulfillment of the general studies lab science requirement.)

102 Introductory Geology II (4:3:3). Prerequisite: GEOL 101 or 111. Earth processes in a historical context. Topics include sedimentary rocks and principles, deformation and metamorphism, mountain building and plate tectonics, geologic time, fossils, historical development of continents. May include field trips. (Course recommended as partial fulfillment of the general studies lab science requirement.)

105 Geology of Virginia (2:2:0). Geology, geomorphology, physiography, geological history, and natural resources of Virginia. May include field trips.

106 Environmental Geology (3:3:0). Investigation of geological principles directly related to environmental problems and geological causes and effects of natural disasters, geology of natural resources, geology of land use planning, and geology as related to health problems.

107 Colored Gemstones (2:1:2). Techniques used in the identification and preparation of colored gemstones, the economic factors which control their production, and the geological processes by which colored gemstones are formed.

108 Field Techniques I (2:0:4). Basic use of Brunton Compass and topographic maps for the purpose of location and making geologic measurements.

111 Physical Geology for Science Majors (4:3:3). Survey of the nature of the earth, and the means by which this information is determined. GEOL 102 and 111 may be used to satisfy the lab science requirement for the B.A. degree. Lab may include field trips.

201 Mineralogy (4:3:3). Prerequisite: GEOL 101 and basic knowledge of chemistry, or permission of instructor. Crystallographic, optical, chemical, and physical properties of minerals. Lab may include field trips. For geology and chemistry majors.

202 Invertebrate Paleontology (3:2:3). Classification, evolutionary trends, and distribution of the common invertebrate fossils. Lab includes field collection of fossils, their preparation and identification. For geology and biology majors.

206 Topics in Geology I (1-3:1-3:0). Discussion of many research programs in geology, presented by staff and visiting geologists. Each scientist discusses an unsolved problem, methods now being used to solve the problem, and possible solutions that are being evaluated.

207 Petrology (4:3:3). Prerequisite: GEOL 101, 102, and 201. The genesis, classification, and recognition of igneous, sedimentary, and metamorphic rocks. Lab may include field trips.

301 Structural Geology (4:3:3). Prerequisite: GEOL 101, 102, and 201 and knowledge of high school algebra, plane geometry, and trigonometry. Igneous and sedimentary rocks in folded, faulted, and metamorphosed terrains. Lab may include field trips to structurally deformed parts of the Appalachian Mountains.

303 Field Techniques II (2:0:4). Prerequisite: GEOL 101, 102, 108, 201, and 207. Surveying, geologic mapping techniques, and the collection of geologic field data.

304 Stratigraphy (3:2:3). Prerequisite: GEOL 101, 102, 201, 207. Principles of stratigraphic analysis with reference to the geology of various areas. Lab includes analysis of surface and subsurface stratigraphic data and a field exercise. Lab may include field trips.

305 Optical Mineralogy (3:2:3). Prerequisite: GEOL 101, 102, 201, and 207. Optical properties of minerals as a means of identification. Minerals are studied as crushed fragments, oriented mineral sections, and rock thin sections with the polarizing microscope.

306 Soil Mechanics for Geologists (3:3:0). Prerequisite: GEOL 101, 102, and 201. Physical and engineering properties of soil, including its origin, structure, mineralogy, strength, compressibility, and permeability. Applications to construction problems.

307 Micropaleontology (3:2:3). Prerequisite: GEOL 101, 102, and 202. Classification, evolutionary trends, and stratigraphic uses of microfossils. Lab includes identification and interpretation of fossil assemblages, and may include field trips.

309/BIOL 309 Introduction to Oceanography (3:3:0). Prerequisite: GEOL 101 or 111, BIOL 103 or 113, or permission of instructor. Introduction to physical, chemical, biological, and geological aspects of the oceanic environment. May include field trip to the Atlantic Coast.

310, 311 Geological Field Studies (2:0:0), (2:0:0). Prerequisite: GEOL 101, 102, 201. One or more field trips totaling 15 to 20 days in an area to be specified in the class schedule. Involves camping out (weather permitting). Students must pay costs (including transportation fee).

313 Hydrogeology (3:3:0). Prerequisite: GEOL 101 or GEOG 102, MATH 111, CHEM 211. Geological and hydrologic factors controlling the occurrence, distribu-
tion, movement, quality, and development of groundwater. Environmental considerations.

314 Sedimentary Facies Analyses (3:3:0). Prerequisite: GEOL 101, 102, 201, 202, 207. Analysis of modern depositional systems and environments with the purpose of developing analogs for the recognition of ancient sedimentary environments. May include field trips.

315 Topics in Geology II (1-3:1-3:0). Prerequisite: GEOL 101, 102, Discussions of a particular research program in geology, presented mostly by the teacher. Topic is designated in the class schedule. May include field trips.

316 Computers in Geology (3-3:0). Prerequisite: GEOL 101, 102, 201, one semester of mathematics, or permission of instructor. Uses of mainframe and microcomputers, with emphasis on geologic applications. No previous computer experience is assumed.

317 Geomorphology (3:2:3). Prerequisite: GEOL 101 or GEOG 102, or permission of instructor. Analysis of processes that occur at the earth's surface and the resulting landforms. Labs stress the recognition and evaluation of landforms using maps and aerial photos and the methods of data collection used in the study of surficial geology. Lab includes field trips.

401 Igneous and Metamorphic Petrology (4:3:3). Prerequisite: GEOL 101, 102, 201, 207, CHEM 211-212, or permission of instructor. Origin and evolution of igneous and metamorphic rocks; emphasis on principles of inorganic chemistry applied to crystalline rocks. Lab emphasizes study of rock fabric and role of coexisting minerals. Lab may include field trips.

403 Geochemistry (3:3:0). Prerequisite: GEOL 101; CHEM 211-212. Stable isotope geochemistry, crystal geochemistry, geochronology, water geochemistry, organic geochemistry, and the geochemistry of rocks.

405 Geology of Mineral and Energy Resources (3:3:0). Prerequisite: GEOL 101, 102, 201, 207, 301. Topics include metallic and nonmetallic ore deposits, fossil fuels, alternate energy resources, and methods by which each is used. May include field trips.

406 Topics in Geology III (1-3:1-3:0). Prerequisite: Geology major with 80 credit hours and permission of chair. Discussions of a particular research program in geology, presented mostly by the students. Topic is designated in the class schedule. May include field trips.

407 Field Techniques III (2:0:4). Prerequisite: GEOL 101, 102 106, 201, 204, 207, 301, 303. Interpretive geologic mapping in igneous, sedimentary, and metamorphic terrains.

408, 409 Practicum for Geology Laboratories (1:1:3), (1:1:3). Prerequisite: Geology major with 80 credit hours and permission of chair. Study of the techniques used to make the geology lab an effective compo-

net in geological education. Discussions of the development of testing materials, supplemented by experience in the operation of a lab section of a geology course.

410, 411 Special Projects in Geology (2:0:5), (2:0:5). Prerequisite: Geology major with 80 credit hours and permission of chair. Geological research conducted by the student. Includes a literature search, conferences, and field and/or lab work. Written and oral reports required.

417 Geophysics (3:3:0). Prerequisite: GEOL 101, MATH 113, one year of physics, or permission of instructor. Geology and physics are combined to understand the dynamic systems of the earth.

500, 501 Selected Topics in Modern Geology (1-3:1-3:0), (1-3:1-3:0). Prerequisite: Baccalaureate degree in geology or permission of instructor. Lecture/lab/fielid trip. Topic designated in the class schedule.

515 Advanced Structural Geology (4:3:3). Prerequisite: Baccalaureate degree in geology or permission of instructor. The concepts of stress and strain in rock materials, and the application of this theory to understanding complex three-dimensional structures in deformed rocks. Emphasis is placed on a quantitative approach to resource deposits. May include field trips.

516 Appalachian Stratigraphy (3:3:0). Prerequisite: Baccalaureate degree in geology or permission of instructor. Analysis of the stratigraphy and tectonics of sedimentary rocks of the Appalachian Mountain system with emphasis on the stratigraphic provinces that contain energy resources.

German (GERM)

Foreign Languages and Literatures

Placement: See Admission Procedures.

All 300- and 400-level courses in German literature may be taken toward fulfillment of the general requirement in literature for the baccalaureate degree.

101 Elementary German I (3:3:1). Designed for students with no knowledge of German. Introduction to German, including elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Lab work required.

102 Elementary German II (3:3:1). Prerequisite: GERM 101 or permission of department. Continuation of GERM 101. Lab work required.

105 Review of Elementary German (3:3:1). Prerequisite: Appropriate placement score or permission of department. Review of elements of German for students who have studied German previously. May not be taken for credit in combination with GERM 101, 102, or 109. Lab work required.

109 Intensive Elementary German (6:6:2). Equivalent to GERM 101 and 102 taught in a single semester. Recommended for students who desire an intensive introduction to German. May not be taken for credit in combination with GERM 101, 102, or 105. Lab work required.

201 Intermediate German I (3:3:1). Prerequisite: GERM 102, 105, or 109, appropriate placement score, or
permission of department. Further development of skills in listening, speaking, reading and writing. GERM 201 and 202 must be taken in sequence. Lab work required.

202 Intermediate German II (3:3:1). Prerequisite: GERM 201, appropriate placement score, or permission of department. Application of skills to reading, composition, and discussion. Lab work required.

209 Intensive Intermediate German (6:6:2). Prerequisite: GERM 102, 105, 109, or appropriate placement score or permission of department. Equivalent to GERM 201 and 202, taught in a single semester. May not be taken for credit in combination with GERM 201 or 202. Lab work required.

301 German Culture and Civilization (3:3:0). Prerequisite: 54 hours or permission of instructor. Development of German civilization from the eighteenth century to the present. German cultural contributions to world civilization. Taught in English.

302 Germany Today (3:3:0). Prerequisite: 54 hours or permission of instructor. Contemporary German life: its major aspects, problems, and goals, seen from the West German perspective. Taught in English.

305 Field Study in German Culture (1:1:0). Prerequisite or corequisite: GERM 301 or 302, or permission of instructor. Study tour of cultural centers in the German-speaking areas of Europe. In consultation with a designated faculty member, students undertake a research project on a previously chosen topic in German culture and present their findings in a substantial paper.

310 German Conversation and Composition (3:3:0). Prerequisite: GERM 202 or equivalent or permission of instructor. Development of fluency in speaking and proficiency in writing German through discussion, reports, and compositions based on texts dealing with contemporary events and issues. Not for native speakers.

312 Practical Stylistics (3:3:0). Prerequisite: GERM 202 or equivalent or permission of instructor. Presentation of the main stylistic and idiomatic features of German. Practice of these features (synonyms, idiomatic expressions, different levels of style).

316 German for the Business World (3:3:0). Prerequisite: GERM 202 or equivalent or permission of instructor. Introduction to the terminology and structural features of business German. Emphasis on acquiring vocabulary and on developing facility in reading German business articles and correspondence. Practice in preparing letters and forms used in routine business transactions.

318 Translation of Texts (3:3:0). Prerequisite: 12 hours of German or permission of instructor. Translation of texts from the natural and social sciences, current events, and contemporary culture. Translations mainly from German into English. Introduction to principles and techniques of translation.

325 Major German Writers (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Works of major German writers in translation. Writers to be studied vary. Course work in English. May be repeated for credit with permission of department.

340 Survey of German Literature (3:3:0). Prerequisite: GERM 202 or equivalent or permission of instructor. Required for German majors. Overview of the history of German literature from its beginnings to 1880.

355 Readings in German Poetry (3:3:0). Prerequisite: GERM 202 or equivalent or permission of instructor. Intensive reading of German poetry in its historical context. Study of genre characteristics and development. Types of poetry studied varies. May be repeated for credit with permission of department when subtitle is different.

365 Readings in German Narrative Prose (3:3:0). Prerequisite: GERM 202 or equivalent or permission of instructor. Intensive reading of German narrative prose, such as autobiographical fiction, fairy tales, and film. Study of genre characteristics and development. Topics vary. May be repeated for credit with permission of department when subtitle is different.

415 Advanced Grammar and Style (3:3:0). Prerequisite: 15 hours of German or permission of instructor. Study of syntax, idiomatic features, and levels of style. Extensive practice in different types of written expression.

418 Advanced Composition (3:3:0). Prerequisite: 15 hours of German or permission of instructor. Development of proficiency in writing German through intensive practice in preparing guided and original compositions.

430 Early German Literature (3:3:0). Prerequisite: 15 hours of German or permission of instructor. German literature from the heroic saga to the advent of the Enlightenment, with primary emphasis upon the medieval epic and Minnesang, and the drama and picturesque novel of the Baroque age.

442 The Age of Goethe (3:3:0). Prerequisite: 15 hours of German or permission of instructor. Major works of Enlightenment, Sturm und Drang, Classicism, and early Romanticism. Emphasis on drama and poetry by Goethe and Schiller; some Lessing and Kleist. This course may not be taken by anyone who has previously taken and satisfactorily completed GERM 440 or 441.

444 The Literature of German Romanticism (3:3:0). Prerequisite: 15 hours of German or permission of instructor. Background and some theory of German Romanticism, selected poetry and prose.

448 German Literature: 1830-1880 (3:3:0). Prerequisite: 15 hours of German or permission of instructor. Study of the literature of Young Germany, Biedermeier and Poetic Realism; prose, drama, and lyric poetry.

450 Modern German Literature: 1880-1925 (3:3:0). Prerequisite: 15 hours of German or permission of instructor. Naturalism, impressionism, the works of fin-de-siecle writers, and Expressionism.

451 Modern German Literature: 1925 to the Present (3:3:0). Prerequisite: 15 hours of German or permission of instructor. Literary trends since 1925.
Course Descriptions

480 Special Topics (3:3:0). Prerequisite: 15 hours of German or permission of instructor. Special topics in language, literature, or culture by theme, approach, or era. May be repeated for credit with permission of department.

490, 491 Independent Study (1-3:0:0). Prerequisite: German majors with 84 hours and permission of chair. Research and analysis of a selected problem in literature or linguistics in consultation with a department member. Maximum of six hours of independent study may be applied to fulfillment of requirements in the major.

497, 498 Senior Honors Tutorial (3:0:0). Prerequisite: German majors with 84 hours, a cumulative GPA of 3.00, and 3.00 in the major field. Students who meet these requirements are admitted to candidacy upon submission of a letter of application to the departmental Honors Committee in the second half of the junior year, supported by a faculty recommendation and an interview by and with the approval of the Honors Committee. In the first semester, students meet weekly with a faculty member to discuss readings from a comprehensive list. The second semester, students do independent research and complete an honors essay under the supervision of a member of the German faculty.

518 Studies in Eighteenth- and Early Nineteenth-Century German Literature (3:3:0). Major authors, movements, and themes in eighteenth- and early nineteenth-century German literature. Literary theory and practice, historical background, and critical reception. May be repeated for credit with permission of department.

525 Studies in Modern German Literature (3:3:0). Writers, themes, or genres of modern German literature. May be repeated for credit with permission of department.

550 Special Topics (3:3:0). Study of a special topic in the area of German language, literature, or culture. Specific topics are announced in advance. May be repeated for credit with permission of department.

560 History of the German Language (3:3:0). Development of the German language from the eighth century to the present. Phonological, morphological, and syntactic structures characteristic of the various stages of development.

Government and Politics (GOVT)

Public Affairs

103 Introduction to American Government (3:3:0). Analysis of American government examined in light of basic concepts and institutions of democracy.

132 Introduction to International Politics (3:3:0). Nature of international politics; approaches to study of international politics; states and nonstate actors in international system; patterns of action and interaction among nation-states; international institutions; major global issues.

133 Introduction to Comparative Politics (3:3:0). Introduction to the methods and subject matter of comparative political analysis: the major issues of political systems, the politics, participation in politics, government structures, the policy making process, and the evaluation of political performance.

241 Introduction to Public Administration (3:3:0). Prerequisite: GOVT 103 or permission of instructor. Administrative structure and processes, organization theory, administrative behavior, personnel, decision making, communications, leadership, management, budgetary processes, and administrative responsibility.

244 America in the Global System (3:3:0). Prerequisite: GOVT 132. Policies and role of the United States in the world community. Emphasis on analysis of internal and external factors that shaped conduct of the United States in the global system from independence to the present. Structure of foreign policymaking; selected major issues in American foreign policy.

250 Introduction to Political Analysis (3:3:0). Prerequisite: GOVT 103. Systematic analysis of political data. Application of scientific method to political subject. Research design, methodology. Use of computer to assist analysis of politics. Open to freshman and sophomore majors in government, public administration, international studies. Required for government and public administration majors.

300/PHYS 300 Nuclear Weapons: Technology and Politics (3:3:0). Prerequisite: 54 hours or permission of instructor. Study of the history and development of nuclear weapons and nuclear strategy, the physical basis of nuclear weapons and their biological and physical effects, the effects of a nuclear war and the possible effectiveness of civil defense, the possibility of limited and winnable nuclear wars, arms control, nuclear proliferation, and public opinion on nuclear issues. This course may not count toward the requirements of the physics major.

301 Public Law and the Judicial Process (3:3:0). Prerequisite: GOVT 103 and 54 hours. American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles.

303 Contemporary Constitutional Issues (3:3:0). Prerequisite: GOVT 103 and 54 hours. Contemporary issues in the application of basic American constitutional principles. U.S. courts' interpretation and clarification of constitutional rights and liberties in such areas as First Amendment freedoms, equal protection of the laws, state and national interrelations within the federal system, and social and economic protection and regulation.

305 Contemporary American Federalism (3:3:0). Prerequisite: GOVT 103, 204. Legal, administrative, fiscal, and political dimensions of evolving American federalism.

307 Legislative Behavior (3:3:0). Prerequisite: GOVT 103. Organization, processes, functions, and roles of the legislature and its members—the U.S. Congress. Includes state legislatures and cross-national comparisons as time and resources permit.

308 The American Presidency and Chief Executive (3:3:0). Prerequisite: GOVT 103. Institutions, authority, and duties of the American presidency; organization of
the executive staff and office; electoral trends; tactics of presidential influence; relations with other governmental and political institutions; comparison with other selected chief executive positions.

309 Government and Politics of Metropolitan Areas (3:3:0). Prerequisite: GOVT 103, GOVT 204, and 54 hours. Government, politics, and problems of metropolitan centers and surrounding areas.

312 Political Parties and Elections (3:3:0). Prerequisite: GOVT 103. Characteristics and functions of political parties, influence of parties and other political forces on electoral decisions, emphasis on parties' inability or ability to hold government accountable to citizens.

318 Interest Groups and the Political Process (3:3:0). Prerequisite: GOVT 103. The role, internal operations, strategies, and activities of interest groups. Evaluation of the ability of interest groups to influence or control government, and to enhance the democratic process. Consideration of conditions under which social movements become, or fail to become, effective interest groups.

320 Political Values (3:3:0). Prerequisite: 54 hours. Nature of man, origin and nature of the state, bases of political obligation, problems of consent, concepts of power, and sources of political authority as presented in the works of major writers.

331 Government and Politics of Latin America (3:3:0). Prerequisite: 54 hours. Contemporary political systems of Latin America, with emphasis on institutions, political processes, political behavior. Case studies of several key Latin American polities. Problems of political development in Latin America.

332 Government and Politics of the Middle East and North Africa (3:3:0). Prerequisite: GOVT 132 and 54 hours. Societies of the Middle East and North Africa and their response to the impact of internal sociocultural-political determinants and external forces. Focus on their contemporary politics—ideologies, popular manifestations, institutions, and operations.

334 Government and Politics of Western Europe (3:3:0). Prerequisite: 54 hours, GOVT 103, or permission of instructor. Contemporary democratic political systems of Western Europe, with emphasis on political processes, institutions, and behavior. Case studies of key Western European polities. Problems of multiparty systems, coalition governments, Eurocommunism, and stability and change in post-industrial societies.

335 Government and Politics of Canada (3:3:0). Prerequisite: 24 hours or permission of instructor. Survey of governmental and political systems of Canada, including political parties, parliamentary system, federal system, and specific policy issues of importance to Canadian politics.

336 Political Development and Change (3:3:0). Prerequisite: 54 hours. Process of political development and change in the context of modernization and industrialization. Patterns of political development, with emphasis on the Third World.

337 Ethnic Politics in Western Europe and North America (3:3:0). Prerequisite: GOVT 103 or 133, or permission of instructor. Study of the resurgence of ethnic nationalism in the industrial democracies of Western Europe and North America; the interplay of industrialization and ethnic awareness; the comparative analysis of policy issues related to ethnonationalism; case studies drawn from the industrial democracies.

339 Selected Issues in the Politics of Advanced Industrial Societies (3:3:0). Prerequisite: GOVT 103 or 133, or permission of instructor. Study of selected current political issues in the industrial democracies of Western Europe and North America. Specific topics will be chosen each semester to reflect contemporary political concerns in these countries, but the political process in advanced industrial countries is the organizing principle throughout the course.

340 Advanced International Relations (3:3:0). Prerequisite: GOVT 132 and 54 hours. Advanced inquiry into international relations. Theories and concepts of international relations. Major forces and issues in international politics.

341 Methods of International Relations Research (3:3:0). Prerequisite: GOVT 132, 340. Systematic research in international relations: identification of problems, research design, research techniques, and research report. Examples of applied research.

344 American Foreign Policy (3:3:0). Prerequisite: GOVT 132, HIST 122. The central issues surrounding the conduct of America's foreign relations, with special emphasis on structural and constitutional questions, national policy objectives abroad, and the conduct of foreign policy in a democracy.

355 Public Personnel Administration (3:3:0). Prerequisite: GOVT 241 and 54 hours or permission of instructor. Techniques and tools used in the management of personnel in government organizations, including the merit system, recruiting, placement, career systems, public pay systems, employee motivation, public employee labor relations, employee appraisals, manpower planning, employee separations, and retirement systems.

356 Public Budgeting and Finance (3:3:0). Prerequisite: GOVT 241 and 54 hours or permission of instructor. Tools and techniques used in budgeting and financial management in governments in the United States, including the management of public financial institutions, the budgetary process, budgetary reform, and the relat-
Course Descriptions

357 Introduction to Public Planning (3:3:0). Prerequisite: 54 hours or permission of instructor. Framework, subject matter, uses, methods, administration, and future of public planning. Emphasis on setting goals, defining objectives, and choosing among program alternatives. Political and bureaucratic constraints and problems of implementation. Illustrations of planning may be drawn from various levels of government.

359 Computers in Public Management (3:3:0). Prerequisite: GOVT 250 and CS 103. Application of computers and computer-based analytical techniques to management needs in the public sector. Focus on both mainframe and microcomputer applications.

372 Police Supervision (3:3:0). Prerequisite: Open to pre-and in-service law enforcement students and by permission of instructor. Police supervision as related to organizational environment and goals and to employee discipline, morale, safety, training and career development, cooperation, and behavior.

376 Collective Bargaining in the Public Sector (3:3:0). Collective bargaining and the broad concept of labor relations as involved in selection and hiring, seniority, promotions, and training. Labor relations and the bargaining process extending from initial hiring to retirement.

377 Public Safety Officers and the Law (3:3:0). Law applicable to fire and police protection, firefighters, and police officers and their relationship to the public, their employers, the courts, and other societal institutions. Rights and obligations of the uniformed services in tort and criminal law, historical development of each, Virginia law, and other local topics.

378 Risk and Insurance (3:3:0). Elements of risk control and management, applications of the same to the fields of insurance including fire, liability, accident, crime, surety, and property insurance.

401 Public Policy Making (3:3:0). Prerequisite: GOVT 103 and 54 hours. Processes, agencies, and politics involved in the proposal, making, implementation, evaluation, and revision of public policy in the United States.

402 Public Policy in Metropolitan Areas (3:3:0). Prerequisite: GOVT 204. Metropolitan policy problems and specific policies to deal with them. Substance and impact of such policies as housing, transportation, land use, crime prevention, service delivery, and health care.

403 Public Policy Analysis (3:3:0). Prerequisite: GOVT 250 or permission of instructor. Methods of public policy analysis, evaluation, and research. Design and development of alternative courses of government action and evaluation of results. Problems in applying systematic analysis to political issues.

410 The Individual Citizen in a Democracy (3:3:0). Prerequisite: GOVT 103. Aspects of various forces on attitudes and behavior of citizens in a democracy: personality, family and others, political communications, political culture, current political events. How attitudes and behavior of citizens facilitate or hinder operation of democratic system.

416 Political Persuasion and Propaganda (3:3:0). Prerequisite: GOVT 103. Techniques and processes of political argument and persuasion as used in campaigns, public education, and political debate. Propaganda in both domestic and international arenas. Political persuasion, myths, and symbols as used to induce conformity and form unified polity. Films and tapes supplement examples of classic political speeches.

420 American Political Thought (3:3:0). Prerequisite: GOVT 103 and 54 hours. Major political values and theories in America from the formation of the American Republic to the present. Changes in American political values in crisis periods and contemporary American political theory, including pluralism, elite theories of democracy, and empirical political theory.

421 Contemporary Political Ideologies (3:3:0). Prerequisite: 54 hours. Study of political ideologies which shape the values, beliefs, and actions of contemporary regimes and political movements. Liberalism, conservatism, socialism, communism, and fascism in theory and in contemporary practice. Problems of totalitarianism and nationalism in post-industrial and developing societies.

430 Comparative Political Leadership (3:3:0). Prerequisite: 54 hours. Comparative political leadership, relationships between political cultures and types of leadership, patterns of leadership recruitment, and linkages between political elites and citizenry.

431 COMM 431 Information Technology and the Political Process (3:3:0). Prerequisite: GOVT 103 or 133 or junior standing as a major in communication or permission of instructor. Study of the impact of the information network of wire and wireless communications and computers on the political process in advanced industrial countries.

445 Soviet Foreign Policy (3:3:0). Survey of the evolution of Soviet foreign policy toward the rest of the world and examination of motives of Soviet international behavior.

446 International Law (3:3:0). Prerequisite: GOVT 132 and 54 hours. Nature, sources, and subject of the law of nations; the law and the individual; territorial questions; international transactions; war and the present and future status of international law.

449 Senior Seminar in International Studies (3:3:0). Prerequisite: Open only to majors in International Studies with 84 hours. An integrative seminar that draws previous course material into an analytical framework and provides the opportunity for in-depth study of some aspect of international studies. Format varies, but involves the student in the current literature, research techniques, and major issues of the field.

http://catalog.gmu.edu
451 Administrative Management and Behavior (3:3:0). Prerequisite: GOVT 241 and 54 hours. American governmental administration: organizational theory and behavior, administrative responsibility, management systems, roles of the bureaucracy, and relationships between individuals and organizations.

452 Administrative Law and Procedures (3:3:0). Prerequisite: GOVT 241 and 54 hours. Law of public office; procedures followed by, and the legal limits on, the administrative agencies and their officers and employees.

459 Information Resources Utilization and Management in Government (3:3:0). Prerequisite: GOVT 359 or equivalent. Information, records, paperwork, and knowledge systems in government; information applications, access, preservation and security; high technology development, management and utilization; sociotechnical systems.

461 Citizen Participation in the Policy Process (3:3:0). Prerequisite: GOVT 204. The ways in which citizens participate in the policy process with an emphasis on recent innovations. Research skills to study participation in the local community, and experience in group process skills.

462 Political Campaign Organization (3:3:0). Prerequisite: GOVT 103 and 54 hours or permission of instructor. Campaign practices and techniques, including candidate recruitment and selection, campaign organization, use of volunteers, financing, polls, and media techniques. Implications of various campaign practices for the American political system.

463 Lobbying and the Policy Process (3:3:0). Prerequisite: GOVT 103 and 54 hours or permission of instructor. Lobbying techniques, activities, and characteristics of interest groups and the implications of their political behavior for the American political system.

471/SOCI 471 Prevention and Deterrence of Crime (3:3:0). Prerequisite: 54 hours in-service status or permission of instructor. Theoretical and practical strategies for crime prevention and deterrence. Social, environmental, and mechanical developments. The police, courts, and correctional elements of law enforcement in terms of current effectiveness and future potential for crime prevention.

480 Internship (3-6:0:0). Prerequisite: Open only to majors with 54 hours or 84 hours. Contact the department one semester before enrollment. Internships are approved work-study programs with specific employers. Credit is determined by the department.

490 Seminar (3:3:0). Prerequisite: Open to public affairs majors with 54 hours or 84 hours, and by permission of department to others with 84 hours who have completed at least 12 hours of work in government. May be repeated for elective credit. Subject varies according to the specialization of the faculty member in charge. Readings, individual or group projects, and discussions of seminar papers comprise the content and format. Only three credit hours may be counted within the major program.

496 Directed Readings and Research (1-3:0:0). Prerequisite: Open to majors in public affairs with 84 hours and permission of instructor and department. Reading and research on a specific topic, under the direction of a faculty member. A written report is required; an oral examination over the research and report may be required. May be used for elective credit only.

504 Theory and Practice of International Relations (3:3:0). Prerequisite: Acceptance in MPA program or permission of department. Theoretical and health education empirical examination of the international system which both affects and is affected by the decisions, behaviors, and subsystems of state and nonstate (organizational) actors.

537 Selected Problems of Third World Development (3:3:0). Prerequisite: Graduate standing or permission of department. Third World development problems, including development management, a new international economic order, foreign aid, multinational corporations, international organizations. May be repeated with permission of department.

631 The Dynamics of Development (3:3:0). Prerequisite: Graduate standing or permission of department. Factors and forces—both internal and external—that affect the political development of Third World countries, including North-South relations, dependency theory, and development strategy within the context of resource scarcity.

Greek (GREE)

Foreign Languages and Literatures

Placement: See Admission Procedures.

101, 102 Elementary Greek (3:3:1), (3:3:1). Grammar of the language and easy excerpts from classical authors. Development of ability to read. Discussion of elements of English vocabulary drawn from Greek. Must be taken in sequence.

201, 202 Intermediate Greek: Readings in Classical Literature (3:3:1), (3:3:1). Prerequisite: GREE 102 or equivalent. Review of grammar. Development of proficiency in reading, with emphasis on traits of syntax, vocabulary, dialect or style that will be met in authors to be read. Must be taken in sequence.

Health Education (HEAL)

Health, Sport, and Leisure Studies

110 Personal Health (3:3:0). Individual and family well-being through the integration of such topics as fitness, nutrition, human sexuality, consumer health, drug education, and mental health.

111 Advanced First Aid & Emergency Care (2:1:2). Identification, care, and treatment of various medical emergencies.

120 Community and Environmental Health (3:3:0). Environmental health concerns and organization of community health programs of official and voluntary local, state, and national health programs. Field observation required.

205 Principles of Accident Causation and Prevention (3:3:0). Investigation of safety-related problems; emphasis on fire, home, occupational, and vehicle safety; violent and property crime prevention.
220 Dimensions of Mental Health (3:3:0). Integration of behavioral and sociocultural factors in the study of mental health.

305 Teaching Methods in Health Education (K-12) (3:3:0). Content, methodology, and resource materials teaching health education for elementary and physical education teaching majors.

310 Drugs and Health (3:3:0). Prerequisite: HEAL 110. Analysis of drug use, with emphasis on its positive aspects; alternatives to drug misuse and abuse.

315 Foundations of Health Education (3:3:0). Prerequisite: HEAL 110 and 120, or permission of instructor. Historical and philosophical foundations of health education with emphasis on principles and theories governing contemporary programs.

323 Community Health Education Programs (3:3:0). Prerequisite: HEAL 120 or permission of instructor. Organization and principles in planning, developing, implementing, and evaluating community health education programs.

414 Student Teaching in Health Education (15:0:0). Prerequisite: Completion of all courses in the approved program, admission to and good standing in the teacher education program, and acceptance in student teaching. An intensive, supervised clinical experience of a full semester in an approved school in Virginia. Experience at the secondary level.

430 Seminar on Contemporary Health Problems (3:3:0). Overview of contemporary and often controversial health issues with analysis of selected problems of current concern to society.

450 Epidemiology (3:3:0). Study of the incidence, distribution, and causes of diseases and injuries in human populations. Emphasis is on essential diagnostics and planning for community health problem solving.

460 Internship in Community Health Education (15:0:0). Prerequisite: Permission of chair. Directed experience to observe and participate in the health education activities of a community health agency or professional health organization in cooperation with approved agency.

480 Special Topics (1-3:3:0). Selected health issues and/or problems are presented for each specific “Special Topics” course. Application of information to education programs receives special attention.

499 Independent Study in Health Education (1-3:0:0). Prerequisite: 84 hours and permission of department. Study of a problem area in health education research, theory, or practice under faculty direction. May be repeated but no more than three hours total credit may be given.

500 Workshop in Health Education (1,2,3:0:0). Analysis of selected health problems and issues involving readings, research, and group attention. Six semester hours of HEAL 500 may be applied to degree credit.

511 History and Philosophy of Health Education (3:3:0). Focus on evaluation of significant historical events that affected and contributed to health education development. Emphasis on personalities, institutions, and philosophical ideas of each area.

513 Current Issues in Health Education (3:3:0). Analysis of topical and often controversial health issues with emphasis on selected problems of concern to society.

515 Community Health Education Planning and Delivery (3:3:0). In-depth study of the processes of planning, organizing, delivering, and evaluating community health education programs.

516 Program Development and Resources in Health Education (3:3:0). Prerequisite: Baccalaureate degree in health education or related field, or permission of chair. Procedures used in planning, development, and organization of health education programs in school and health agency settings.

517 Health Education Process: School and Community (3:3:0). Prerequisite: Baccalaureate degree in health education or related field, or permission of chair. Examination of the health education process in a variety of health promotion, disease prevention, and rehabilitative settings.

599 Independent Study in Health Education (1-3:0:0). Prerequisite: Permission of department. Study of a problem area in health education research, theory, or practice under direction of faculty. May be repeated, but no more than three hours total credit may be given.

Hebrew (HEBR)

Foreign Languages and Literatures

101 Elementary Hebrew I (3:3:1). Designed for students with no knowledge of Hebrew. Introduction to Hebrew, including grammar, vocabulary, oral skills, listening comprehension, and reading. Lab work required.

102 Elementary Hebrew II (3:3:1). Prerequisite: HEBR 101 or equivalent. Continuation of HEBR 101.

201 Intermediate Hebrew I (3:3:1). Prerequisite: HEBR 102 or equivalent. Further development of skills acquired in HEBR 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing. Lab work required.

202 Intermediate Hebrew II (3:3:1). Prerequisite: HEBR 201 or equivalent. Continuation of HEBR 201. Lab work required.

History (HIST)

History

100 The Uses of History (3:3:0). Primarily for non-majors; may be taken by majors only as elective credit. Introduction to the nature of history and the historical method. Emphasis on distinguishing fact from interpre-
tation, synthesis of historical information, and critical analysis of historical writings.

101 Foundations of Western Civilization (3:3:0). Evolution of Western culture from the ancient Mediterranean world to the formation of modern Europe in the seventeenth century.

102 Development of Western Civilization (3:3:0). History of Western institutions and ideas from the seventeenth century to the present.

121 Formation of the American Republic (3:3:0). Social, political, economic, and intellectual growth of American institutions from colonization through the Civil War.

122 Development of Modern America (3:3:0). History of the United States from 1865 to the present.

130 History of the Modern Global System (3:3:0). Studies the interaction of major world regions that, under the impact of European expansion, became integrated within a single global cultural and economic network. Beginning with a description of regional civilizations around 1500, the course focuses on cultural interaction and economic change through the eras of mercantile expansion, industrial revolution, global imperialism, and twentieth-century crises and developments.

251, 252 Survey of East Asian Civilization (3:3:0), (3:3:0). HIST 251 is a survey of the history of China and Japan from prehistoric times until ca. 1600. HIST 252 is a survey of the history of China and Japan from early modern times (ca. 1600) until the present.

261, 262 Survey of African Civilization (3:3:0), (3:3:0). HIST 261 is a survey of African history from earliest times to the decline of Western Sudanic states in the sixteenth century. HIST 262 is a survey of African history from the beginnings of interaction with Europe in the fifteenth century to the recent emergence of new states.

281, 282 Survey of Middle Eastern Civilization (3:3:0), (3:3:0). Emphasis on significant cultural, intellectual, social, and political developments. HIST 281 is a survey of the history of the major civilizations of the Middle East from ancient to medieval times (ca. 1258). HIST 282 is a survey of the history of the major civilizations of the Middle East from medieval to modern times (ca. 1258 to the present).

300 Interpretations of History (3:3:0). Required of history majors with 54 hours. Study of development of historical writings in the West from ancient to modern times. Introduction to historical methodology.

301 Classical Greece (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Political, social, economic, and cultural history of classical Greece from development of the city-state through the fifth century.

302 Classical Rome (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Political, social, economic, and cultural history of classical Rome from founding of the city through fall of the Roman republic.

303 Western Europe in the Middle Ages (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Survey of the development of European society from the impact of the reforms of Diocletian and Constantine to the end of the fifteenth century. Emphasis on political, institutional, economic, and social developments, including influence of the Church.

304 The Eastern Roman Empire and Byzantium (3:3:0). Prerequisite: 6 hours of history or permission of instructor. The political, social, economic, cultural, and religious history of the Eastern Roman and Byzantine empires from the Age of Constantine to the fall of Constantinople in 1453.

305 The Renaissance (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Survey considering the Renaissance as a phenomenon rather than a chronological period. Emphasis on growth of Humanism in Italy in the fourteenth and fifteenth centuries, development of new political concepts, and laicization of society. Including transmission of these developments to transalpine Europe in the late fifteenth and sixteenth centuries.

306 The Reformation (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Late medieval ecclesiastical conditions and reform movements; late scholasticism; Protestant Reformation, Catholic Reformation, dynastic rivalries, and religious wars. Concludes with the Peace of Westphalia (1648).

308 Nineteenth-Century Europe (3:3:0). Prerequisite: 6 hours of history or permission of instructor. History of Europe from Congress of Vienna to outbreak of World War I.

309 Contemporary Europe (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Survey of major political changes in Europe since 1914 with emphasis on broad patterns of ideological conflict.

314 History of Germany (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Political, diplomatic, economic, social, and cultural development of Germany from the dissolution of Holy Roman Empire to present.

320 Anglo-Saxon and Medieval England (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Study of Roman Britain, Anglo-Saxon institutions, Norman Conquest, church-state relations, development of common law, rise of Parliament, War of Roses.

321 Tudor and Stuart England (3:3:0). Prerequisite: 6 hours of history or permission of instructor. England between 1485 and 1714: religious, social, and constitutional change during the English Reformation; the Stuarts and Parliament; the Civil War and interregnum; the Stuart restoration; the Glorious Revolution and the Bill of Rights; the era of Queen Anne.

322 Modern Britain from the Georgian Age to the Welfare State (3:3:0). Prerequisite: 6 hours of history or permission of instructor. England from 1714 to present: the first four Georges, growth and consequences of industrialization, reform of the franchise, foreign affairs and imperialism, transition from empire to commonwealth, the twentieth-century welfare state.
328 Rise of Russia (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Political, social, and cultural experience of Russia from the appearance of the Kievan state to the age of Pushkin.

329 Modern Russia and the Soviet Union (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Analysis of Russian civilization in nineteenth and twentieth centuries; focus on failure of tsarism, revolutionary response; and development of the Soviet Union.

330 Frontier America: The Westward Movement (3:3:0). Prerequisite: 6 hours of history or permission of instructor. History of exploration, settlement, and expansion of the frontier; emphasis on influence on cultural and political institutions.

335 The Afro-American Experience in the United States: African Background to 1865 (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Brief introduction to origin of man, concept of race, impact of color on black experience, moving from the African background to the U.S. Civil War. Attention directed to the effect of transplantation on certain African cultural survivals in the New World. Examination of genesis of American slavery and prejudice, colonial heritage, revolutionary legacy, colonization, abolitionist movement, and institutionalized slavery.

336 The Afro-American Experience in the United States: Reconstruction to the Present (3:3:0). Prerequisite: 6 hours of history or permission of instructor. General knowledge of the experience and development of black American society from 1865 to present. Focuses on the parallels between the nineteenth and twentieth centuries.

341 History of the United States Constitutional Law to 1865 (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Consideration of the development of the federal Constitution to 1865. Emphasis on Anglo-American origins in common law and American revolutionary ideology, as well as the interplay of politics and the courts. The development of broader understanding of the Bill of Rights' guarantees is a secondary theme.

342 History of the United States, Constitutional Law from Reconstruction to the Present (3:3:0). Prerequisite: 6 hours of history or permission of instructor. The history of the Constitution, its expansion and development, from 1865 to the present. Among the principal elements treated are the adoption and impact of the Fourteenth Amendment, and the consequences of war and reform on twentieth-century government.

345 From Colony to World Power: A History of American Foreign Relations (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Survey of American diplomacy from Revolutionary War to present, with emphasis on twentieth-century issues.

351 History of the Old South (3:3:0). Prerequisite: 6 hours of history or permission of instructor. History of the South to the outbreak of the Civil War, with particular emphasis on the rise of sectionalism. Development of a distinct Southern culture through emergence of economic, political, social, agricultural, and intellectual institutions.

352 The South Since 1865 (3:3:0). Prerequisite: 6 hours of history or permission of instructor. History of the South during Reconstruction, the Redeemer era and the New South, with particular emphasis on race relations. Political, economic, cultural, and intellectual development from aftermath of war.

353 History of Traditional China (3:3:0). Prerequisite: 6 hours of history or permission of instructor. China from earliest times to the period of modern Western intrusion. Development of traditional Chinese culture, society, and government.

354 Modern China (3:3:0). Prerequisite: 6 hours of history or permission of instructor. China from 1644 to the Peoples Republic of China. Emphasis on the coming of the West and the various stages of Chinese reaction.

356 Modern Japan (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Japan from the Meiji Restoration to World War II. Emphasis on Japan's modernization in the face of challenge.

363 The History of Argentina, Brazil and Chile (3:3:0). Prerequisite: HIST 271 or permission of instructor. Intensive study of evolution of Argentina, Brazil, and Chile from the Colonial period to the present with emphasis on changing social, political, and economic conditions.

379 History of Canada (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Introduction to history of Canada from French settlement to present. Emphasis on Canada's historical position in the British Empire and Commonwealth, its unique relations with the United States, and issues related to its French-speaking minority.

390 Topics in History (3:3:0). Study of historical topics or periods of special interest. Topics announced in advance. This course may be repeated for credit when topic is different and with permission of department.

391 History of Virginia to 1860 (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Discovery and settlement of Virginia. Colonial period with emphasis on development of representative government and race relations, the "Golden Age" of the Virginia dynasty, coming of Civil War.

392 History of Virginia Since 1860 (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Decision to secede, Civil War and Reconstruction, Readjustors and Populism, disfranchisement and Constitution of 1902, rise of Senator Harry F. Byrd. Recent developments.

393 History through Film (3:3:0). Study of historical periods or topics from perspective of feature films and documentaries. Topics available in advance in History Department. May be repeated with permission of department. Maximum of six hours may be applied toward the history major.

394 History of the Family in the United States and Europe, 1500-Present (3:3:0). Historical development of Western family life. Topics include attitudes toward infants and children, role of family in educating youth and in influencing marriage choice, relationship between parents and adult children, and interaction between nuclear and extended family. Change in family behavior in the context of wider social transformation.

395 History of Western Science I: Antiquity to the Age of Galileo (3:3:0). Prerequisite: 54 hours or permission of instructor. Examines the foundations and develop-
ment of scientific thought in Western Europe from antiquity to the seventeenth century. Emphasis on the historical context of science. No advanced background in mathematics or natural sciences is required.

395 History of Western Science II: From the Scientific Revolution to the Twentieth Century (3:3:0). Prerequisite: 54 hours or permission of instructor. Examines the foundations and development of scientific thought in Western Europe from the scientific revolution of the seventeenth century to the twentieth century. Emphasis on the historical context of science. No advanced background in mathematics or natural science is required.

398 The Social History of Technology (3:3:0). Prerequisite: 54 hours or permission of instructor. Introduction to the social, economic, and mechanical conditions that led to technological change. Major historical innovations in the use of machines and materials and their social consequences in Europe, the United States, and Latin America are considered.

401 Colonial America (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Intensive study of colonial American history from its European origins through the Revolutionary War.

403 Early National Period in American History, 1783-1820 (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Study of formative years of the new republic from the Treaty of Paris of 1783 to the election of 1820.

404 Jacksonian Democracy, 1820-1848 (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Study of the age of Andrew Jackson; emphasis on democratic institutions that emerged as dominant influences in American society.

406 Civil War and Reconstruction (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Course, conduct, and consequences of the American Civil War and aftermath. Emphasis on interconnectedness of political, military, and economic affairs.

409 Between the Wars: The United States, 1919-1941 (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Intensive study of political, social, economic, and diplomatic developments in the 1920s and the 1930s.

410 The United States Since World War II: Nation and Empire (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Examination of major domestic and foreign policy factors that shaped American experience from World War II to present. Political, social, and economic forces as they affected the nation's history.

411 Cultural and Intellectual History of the United States: 1600-1865 (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Cultural and intellectual currents to 1865.

412 Cultural and Intellectual History of the United States Since 1865 (3:3:0). Prerequisite: 6 hours of history or permission of instructor. American thought and society from 1865 to present. Effect of industrialization on American institutions; development of a business "credo"; growth of radical thought in economics, politics, and religion; changes in social structure; increasing power and influence of the state.

413, 414 War and the Military in American Life (3:3:0), (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Study of impact of war on American society; its influence on the shaping of national policy. Topics include role of the military in the economy, minorities in the armed forces, development of peace movements. The first semester covers colonial times to about 1917; the second semester covers American entry into World War I through the Vietnam conflict.

416 United States Urban History (3:3:0). Prerequisite: 54 hours or permission of instructor. Examines the process of urbanization in the United States, and the growth of American cities and suburbs from colonial times to the present.

417 History of Metropolitan Washington (3:3:0). Examines urban and suburban growth in Washington, D.C., and its suburbs in Maryland and Virginia since 1790, in the context of United States urban history.

418 Ethnic Groups in American Cities (3:3:0). Prerequisite: 54 hours or permission of instructor. Acquaints students with ethnicity and race in American urban society by comparing the experience of different ethnic groups as migrants to American cities.

420 Topics in Twentieth-Century U.S. Diplomacy (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Topics vary and are available in advance at the History Department.

431/ENGL 431 Medieval Intellectual Topics (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Selected topics in the intellectual history of the Middle Ages. Topics vary, depending on discipline of instructor. May be taken for credit by English, history, or area studies majors.

435 Social Transformation and Culture in Seventeenth- and Eighteenth-Century Europe (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Examination of the cultural lives of Europeans. Focus on religious, artistic, literary, and recreational behavior. In addition, political activity—riots and royal receptions, work stoppages, and chivalric disputes—are covered. Includes formal thinkers and popular culture and examines differences and interrelationships between the two.

436 European Society and Culture; Nineteenth and Twentieth Centuries (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Examination of major cultural trends in Europe since the French Revolution. Major themes include romanticism; socialism; Marxism; the social effect of modernization, science, and societies.

440 France, 1610-1789: Absolutism and Revolution (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Survey of French history from 1610 through the establishment, perfection, and decline of monarchical absolutism, to the opening stages of the Revolution.

441 France Since the Revolution (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Study and influence of domestic, foreign and cultural developments in France from 1789 to present.

443 History of Spain and Portugal (3:3:0). Prerequisite: 6 hours of history or permission of instructor. Devel-
opment of Spain and Portugal from prehistoric to mod-
era times, noting particularly factors related to their for-
mer empires in America.

451 The United States and China (3:3:0). Prerequi-
site: 6 hours of history or permission of instructor. History of foreign relations between U.S. and China in nine-
teenth and twentieth centuries, with emphasis on causes of
their cooperation and conflict.

455/COMM 455 History of Print Journalism (3:3:0).
Prerequisite: 3 hours COMM or HIST. Development of
print journalism from its inception to the present, with
emphasis on the interaction of technology, audience,
and government intervention. Topics include birth of
the press; development of the modern newspaper and
American development, including the Revolutionary
and Civil Wars; the rise of the independent press; and
the Yellow Journalism period.

463 Ancient India and Pakistan (3:3:0). Prerequi-
site: 6 hours of history or permission of instructor. History of
Indo-Pakistan subcontinent with special reference to
Indus Valley people, Hindus, Jains, Buddhists, and
Muslims from ancient to medieval times.

464 Modern India and Pakistan (3:3:0). Prerequi-
site: 6 hours of history or permission of instructor. Political his-
tory of Indo-Pakistan subcontinent from mid-eighteenth
century to present. Background of earlier cultures of
Hindus and Muslims as prelude to developments in
modern periods.

465 The Middle East in the Twentieth Century
(3:3:0). Prerequisite: 6 hours of history or permission of instructor. Political, social, and cultural history of the
Middle East since World War I. Emergence of Israel,
Arab nationalism, and political and economic influence
of the Middle East in world affairs.

466 Origins of Conflict in Southern Africa (3:3:0).
Explores the historical origins of conflict in South Af-
rica, focusing on themes of economic change, cultural
interaction, and political consolidation over the past
five centuries.

470 Diplomacy and War in Latin America (3:3:0).
Prerequisite: 6 hours of history or permission of instructor.
Balance of power diplomacy among nation states of
Latin America from independence to present. Emphasis
on sources of conflict.

475 History of Mexico (3:3:0). Prerequisite: 6 hours of
history or permission of instructor. Intensive study of Mex-
ican history from pre-Columbian era to present, with
emphasis on the national period.

478 Spanish Borderlands (3:3:0). Prerequisite: 6
hours of history or permission of instructor. U.S. frontier
from Carolinas to Pacific considered as a part of the
Kingdom of New Spain and, later, the United Mexican
States, 1500-1848; expeditions of discovery, explora-
tion, and settlement; political, cultural, and social develop-
ments; foreign encroachment; incorporation of the
area into the U.S.; and origins of present Mexican-
American minority.

480 Alexander the Great (3:3:0). Prerequisite: 6 hours
of history or permission of instructor. Rise of Persia, the
Persian wars with Greece, subjugation of Greece by
Philip II of Macedonia, life of Alexander the Great and
his conquest of the Persian empire.

Prerequisite: 84 hours, 6 hours of history or permission of
instructor. Manifestations of racism in U.S., as directed
against Indians, Orientals, Jews, Mexican-Americans,
and Afro-Americans.

496 Internship (3:6:0:0). Prerequisite: History majors with
54 hours and permission of department. Internships
are approved work-study programs in cooperation with
specific organizations including area museums; ar-
chives; historic sites; and local, state, and federal agen-
cies. Credit determined by department.

498 Directed Readings/Research in History (1-
3:3:0). Prerequisite: History majors with 84 hours and
permission of instructor. Readings/research conducted on
an individual basis in consultation with instructor. A
student may not present more than three hours for grad-
uation credit.

499 Senior Seminar in History (3:3:0). Prerequisite:
History majors with 84 hours and permission of instructor.
Research on a specialized historical topic culminating in
a seminar paper. Subject determined by instructor.
Permission must be obtained in advance. A student may
present not more than 3 hours for graduation credit.
A grade of C or better is required to graduate with a B.A.
in history.

Information Resource Management (IRM)

School of Business Administration

If a student takes noncore, upper-level business adminis-
tration courses prior to acceptance to the School of
Business Administration, those courses will not count
on an undergraduate degree application for any major
in the School of Business Administration (except gen-
eral elective credit). A grade of C or higher must be
presented on the graduation application for each
upper-level course in the major. Course prerequisites
are strictly enforced.

201 Introduction to Computer-Based Management
Information Systems (3:3:0). Prerequisite: CS 161 and
DESC 200 with a grade of C or better. Introduction to the
components of the management information system
(MIS) and their integration for managerial control and
decision support. Analysis, design, and implementation
of MIS software. Microcomputing lab for database and
spreadsheet applications.

403 Computer Systems Analysis and Design
(3:3:0). Prerequisite: IRM 201 and INF5 310. INF5 311
recommended. Treatment of the life cycle of a computer
information system with emphasis on information re-
quirements analysis, feasibility studies, economics, sys-
tem design, equipment selection, and the
implementation process. Term project required. Com-
puting lab.

410 Managerial Applications of Microcomputers
(3:3:0). Prerequisite: IRM 201 and knowledge of DOS
and electronic spreadsheets. Selection and use of mis-
computer hardware and software management for appli-
cations. Word processing, spreadsheet analysis,
graphics, communications, file management, and

http://catalog.gmu.edu
database management. Term project and microcomputing lab.

420 Business Data Communications (3:3:0). Prerequisite: DESC 352 and INFS 310. INFS 311 recommended. Broad introduction to business data communications. Emphasis on the integration of data communications into the automated business office. Term project.

440 Business Applications of Artificial Intelligence (3:3:0). Prerequisite: DESC 301 and INFS 310 or a 3-hour programming course. Broad introduction to applications of artificial intelligence. Emphasis on the use and application of expert systems and natural languages in business and public sector organizations. Term project.

480 Knowledge-Based Systems Development (3:3:0). Prerequisite: INFS 310 and IRM 440. IRM 403 recommended. Essential steps in knowledge engineering, what knowledge-based systems are, and how to manage development of knowledge-based systems. Course also touches on the evaluation and integration of knowledge-based systems into existing environments, as well as how to maintain and evolve a knowledge-based system.

491 Seminar in Information Resource Management (3:3:0). Prerequisite: DESC 202, DESC 301, IRM 201, and INFS 310. In-depth analysis of selected topics that highlight the latest developments in the information resource management field, including contemporary research findings and case studies of information systems in business and other organizations.

492 Field Experience in Information Resource Management (3:3:0). Prerequisite: Senior standing. Faculty-governed field experience in a Northern Virginia business. Teams of Students, matched with client firms through the Entrepreneurship Center, propose action plans relating to a major problem or opportunity faced by the company.

499 Independent Study in Information Resource Management (1-3:3:0). Prerequisite: Information resource management majors with at least 9 upper-level IRM or INFS credit hours. Research and analysis of selected problems or topics in information resource management. Must be arranged with an instructor and receive written approval of chair before registration. Written report required. May be repeated to a maximum of 6 hours if topics vary.

Information Systems (INFS)

Information Systems and Systems Engineering

311 Database Management (3:3:0). Prerequisite: INFS 310. Study of the logical and physical characteristics of data and its organization in computer processing. Emphasis on data as a resource in computer applications. Examination of Database Management System (DBMS) software and its design, implementation, and use. Lab exercises using one or more DBMS for business applications. Computing lab.

312 Computer Architecture and Operating Systems (3:3:0). Prerequisite: INFS 310. Introduction to computing system hardware components, architecture, organization, and operating system software concepts. Provides basic experience in assembly language programming for modern microprocessors and examines techniques for system evaluation and selection. Computing lab.

315 High-Level Programming Languages (3:3:0). Prerequisite: INFS 312. Study of the structure and application of high-level languages by stressing the design and implementation of data types, data structures, and algorithms. Computing lab.

316 Software Systems Engineering (3:3:0). Prerequisite: INFS 312. Study of programming environments, including software tools and control of software development for large information systems engineering projects. Computing lab.

491 Seminar in Information Systems (3:3:0). Prerequisite: Permission of instructor. In-depth analysis of selected topics which highlight the latest developments in information systems, including contemporary research findings and case studies of information systems.

492 Special Topics in Group Project Implementation (3:3:0). Prerequisite: 6 hours of INFS or CS programming courses including INFS 312 or equivalent. Examines computer system design practices and project management concepts, and gives students practical experience working on an information systems engineering project. With faculty guidance, students participate in a team design and implementation project. Typical projects are (1) an office automation system, (2) a student records information system, or (3) a software design and management effort.

499 (formerly BUAD 499) Independent Study in Information Systems (1-3:3:0). Prerequisite: At least 9 semester hours of upper-level IRM or INFS courses. Research and analysis of selected problems or topics in information systems. Must be arranged with an instructor and written approval of chair received before registration. Written report required. May be repeated to a maximum of six hours if topics vary.
Italian (ITAL)

Foreign Languages and Literatures

100 Survival Italian (3:3:0). Not part of a sequence that fulfills the foreign language requirement. Development of Italian communication skills stressing vocabulary, pronunciation, and idiomatic expressions.

101 Elementary Italian I (3:3:1). Designed for students with no knowledge of Italian. Introduction to Italian, including elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Lab work required.

102 Elementary Italian II (3:3:1). Prerequisite: ITAL 101 or permission of instructor. Continuation of Italian 101. Lab work required.

201 Intermediate Italian I (3:3:1). Prerequisite: ITAL 102 or permission of department. Further development of skills in listening, speaking, reading, and writing. ITAL 201 and 202 must be taken in sequence. Lab work required.

202 Intermediate Italian II (3:3:1). Prerequisite: ITAL 201 or permission of department. Application of language skills to reading, composition, and discussion. Lab work required.

Japanese (JAPA)

Foreign Languages and Literatures

101, 102 Introduction to the Japanese Language (3:3:1), (3:3:1). Must be taken in sequence. Introduction to Japanese, including basic grammar, oral expression, listening comprehension, and reading and writing. Lab work required.

201 Intermediate Japanese I (3:3:1). Prerequisite: JAPA 102 or equivalent. Further development of skills acquired in JAPA 101-102, including grammar, oral expression, listening comprehension, and reading and writing. The use of the written language (katakana, hiragana, and kanji) emphasized. Lab work required. JAPA 201 and 202 must be taken in sequence.

202 Intermediate Japanese II (3:3:1). Prerequisite: JAPA 201 or equivalent. Continuation of JAPA 201. Lab work required.

301 Japanese Culture and Civilization (3:3:0). Prerequisite: 54 hours or permission of instructor. Focus on Japanese behavior in cultural context. Problems of cross-cultural understanding in a multicultural society. Course work in English.

Korean (KORE)

Foreign Languages and Literatures

361, 362 Korean Literature (3:3:0), (3:3:0). Prerequisite: Knowledge of Korean language. Survey of Korean literature from the Three Kingdoms period to the twentieth century. Study of vernacular genres of verse and prose. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

450, 451 Korean Culture and Civilization (3:3:0), (3:3:0). Prerequisite: 54 hours or permission of instructor. Korean culture and civilization, including language, philosophy, religion, education, and family life; discussion of problems of cross-cultural understanding. Course work in English. For non-Western credit.

Latin American Studies (LAS)

Area Studies

489 Independent Study (1-6:0:0). Prerequisite: 54 hours, permission of chair and instructor. Intensive study of a period, problem or project related to Latin American Studies proposed by an individual student, to be conducted in close consultation with a LAS faculty member. May be repeated for a total of six credits.

490 Internship (2-6:0:0). Prerequisite: 54 hours and permission of chair. Internships are nonpaying, work-study positions that focus on interdisciplinary LAS issues. Qualified students are placed with area institutions, interest groups, agencies, museums, or corporations. Placement depends upon availability of positions.

491 Contemporary Latin America (3:3:0). Required of Latin American studies majors with 84 hours or permission of instructor. Interrelationship of economic, political, social, and cultural factors in explaining current Latin American reality. Topic announced. May be repeated for credit provided that course subtitle is different.

Latin (LATN)

Foreign Languages and Literatures

Placement: See Admission Procedures.

101, 102 Elementary Latin (3:3:1), (3:3:1). Must be taken in sequence. Introduction to Latin, including basic grammar and development of reading skills; introduction to Latin literature and Roman civilization.

201 Intermediate Latin: Prose and Poetry (3:3:1). Prerequisite: LATN 102 or equivalent. Intensive review of elementary grammar; introduction to more advanced grammatical constructions and patterns of usage; continued development of reading proficiency; study of origin and development of Latin literature.

202 Intermediate Latin: The Golden and Silver Ages (3:3:1). Prerequisite: LATN 201 or equivalent. Study of advanced grammatical constructions and patterns of usage; reading selection from various Latin authors who flourished during the late Republic and early Empire of Rome; study of the cultural and political background of classical Latin authors.

321, 322 Latin Tutorial (1-3:0:0), (1-3:0:0). Prerequisite: LATN 202 or equivalent and permission of department. Readings in Latin drawn from classical or post-classical literature. Selection of authors or genres by the instructor in consultation with the student. Meetings on a tutorial basis. May be repeated once under each number to a maximum of 4 separate topics and 12 semester hours of credit.

351 Latin Prose Authors (3:3:0). Prerequisite: LATN 202 or equivalent. Introduction to the basic themes and rhetorical and literary techniques in Latin prose works. Emphasis on interpretation, stylistic analysis, an-
cien literary theories and the role of prose literature in Roman society. Course concentrates on complete short works and extended prose passages, and includes texts from a representative sample of Latin prose authors.

352 Latin Poetry (3:3:0). Prerequisite: LATN 202 or equivalent. Introduction to the basic meters, genres, themes, and poetic techniques found in Latin poetry. Emphasis on interpretation, stylistic analysis, ancient theories of poetry, and the poet's role in society. A variety of poets are included, with concentration on Catullus, Virgil, Horace, and Ovid.

451, 452 Latin Authors and Literary Genres (3:3:0), (3:3:0). Prerequisite: LATN 351 or 352, equivalent, or permission of instructor. Courses focus on a single Latin author or literary genre, approaching the texts from a variety of interpretive perspectives, and using secondary literature as well as primary texts. Topics and authors vary. Sequence may be repeated for credit.

499 Senior Seminar in Classical Studies (3:3:0). Prerequisite: Classical studies major with 84 hours and permission of instructor. Research on a specialized interdisciplinary topic culminating in a seminar paper. Subject of seminar determined by instructor. Permission must be obtained in advance. Students may present no more than 3 hours for graduation credit. A grade of C or better is required to graduate with a B.A. in classical studies.

Management (MGMT)

School of Business Administration

If a student takes noncore upper-level business administration courses prior to acceptance to the School of Business Administration, those courses will not count on an undergraduate degree application for any major in the school (except as general elective credit). A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Prerequisites are strictly enforced.

300 Management of Organizations for Nonbusiness Majors (3:3:0). Examination of management functions and practices in private, public, and nonprofit organizations. Emphasis on managerial decision making and organization theory and behavior in domestic and multinational settings. (Course may not be taken for credit by business majors.)

302 Organizational Behavior and Administration (3:3:0). Prerequisite: Completion of at least 60 semester hours including COMM 100, 101, or 130. Review and application of major theoretical issues in organizational behavior. Analysis and critique of research methods used in the field. Particular emphasis on micro factors and their application to development of effective managerial styles.

321 Personnel Administration (3:3:0). Prerequisite: MGMT 302. Principles and procedures related to recruitment and selection of a labor force, grievance and disciplinary procedures, problems involved in collective bargaining, pay policies, merit rating, promotion, and training. Emphasis on their relationship to management.

331 Labor-Management Relations (3:3:0). Examination of American trade unions and of unionism. The labor contract; the bargaining processes; the philosophy of unionism; the use of bargaining techniques for nonwage issues; the legal context of labor-management relations; the responsibilities and duties of unions and management; the political-economic impact of unionism.

341 Business Communication (3:3:0). Introduction to theory and practice of effective business communication. Includes inquiry into principles of communication, communicating through correspondence and reports, and business research methods.

381 Management Problem Solving and Decision Making (3:3:0). Prerequisite: MGMT 302. Application of principles and techniques of management to cases drawn from business, public, and nonprofit organizations. Emphasis on internal management of organizations, applications of systems theory and methodology, and techniques used to analyze problems effectively.

421 Advanced Personnel Administration (3:3:0). Prerequisite: MGMT 321. In-depth, experience-based examination of the more complex areas of personnel administration: job and task analysis, performance appraisal, selection and placement, wage and salary field of personnel administration.

431 Labor Legislation and Collective Bargaining (3:3:0). Prerequisite: MGMT 302. Study of the institutional framework of collective bargaining, with two distinct focuses. The first is on major pieces of legislation from English Common Law through the present day; the second includes an in-depth analysis of collective bargaining—its participants, techniques, issues, and legal environment, and evaluation of the contract.

451 Small Business Management (3:3:0). Prerequisite: MGMT 312. Study of the entrepreneur and entrepreneurial organizations. Emphasis on the entrepreneurial process and social, economic, and cultural factors affecting behavior. Problems facing the small businessman in a variety of high-technology and service-related businesses.

471 Organizational Management and Environmental Change (3:3:0). Prerequisite: MGMT 302 or 312. An examination of organizational management concepts and applications in response to changing environments. The organizational impact of various stakeholders, as well as the interaction between organizations and processes will be reviewed. Management practices, structures, and processes will be emphasized.

481 Business Interviewing (3:3:0). Prerequisite: MGMT 302 or 312. Study of management and concepts relevant to business interviewing. Relevant theory, examples, and exercises that demonstrate the nuances of the most commonly used forms of the business interview.
will be introduced. Focus on survey, selection, appraisal, counseling, discipline, and exit interviews from the perspective of the interviewer.

491 Seminar in Management (3:3:0). Prerequisite: MGMT 302 and 312. Advanced study of management concepts and selected topics, intensive analysis of management problems which represent long-term strategic significance or current urgency for organizational planning and operations. Significant contemporary research findings.

492 Field Experience in Management (3:3:0). Prerequisite: MGMT 302 and 312. Faculty-governed field experience in a Northern Virginia business. Teams of students, matched with client firms through the Entrepreneurship Center, propose action plans relating to a major problem or opportunity faced by the company.

498 Business Strategy and Policy (3:3:0). Prerequisite: Final semester and FNAN 301, G111 302, and MKTG 301. A capstone course designed to acquaint the student with the nature of strategic management and the shaping of business policy. Emphasis on managerial decision making as it relates to business strategy formation and implementation in large, medium, and small enterprises, both domestic and international.

499 Independent Study (1-3:0:0). Prerequisite: Management majors with at least 9 upper-level management credit hours. Research and analysis of selected problems or topics in management must be arranged with an instructor and receive written approval of chair before registration. Written report required.

**Marketing (MKTG)**

**School of Business Administration**

If a student takes noncore, upper-level business administration courses prior to acceptance to the School of Business Administration, those courses will not count on an undergraduate degree application for any major in the school (except as general elective credit). A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Prerequisites are strictly enforced.

300 Contemporary Marketing for Nonbusiness Majors (3:3:0). A survey of the marketing of goods, services, and ideas in the economic, social, and international environment. Attention is given to public, private, profit and nonprofit organizations and how the management of the marketing functions is performed. (Course may not be taken for credit by business majors.)

301 Principles of Marketing (3:3:0). Prerequisite: Completion of at least 60 semester hours including ACCT 202 and ECON 103 and 104. Examination of marketing principles, concepts, strategies, tactics, and analytical tools used by profit and nonprofit organizations to market ideas, products, and/or services to selected target groups. Emphasis is on how to promote, distribute, and price the firm's offering in a dynamic economic, social, political, and international environment.

310 Business and Government Logistics (3:3:0). Prerequisite: MKTG 301. Overview of the physical distribution and logistics management systems in business and government. Attention is given to transportation and traffic management; warehouse, distribution centers, and plant location; and packaging and materials handling. Topics include activities required in design, test, and evaluation; production/construction, operational support, and retirement/disposal of business products; and major government systems.

311 Sales Management (3:3:0). Prerequisite: MKTG 301. Examination and evaluation of the sales effort as it relates to the consumer and participants within the marketing channel.

312 Consumer Behavior (3:3:0). Prerequisite: MKTG 301. Marketing strategy implications of the concepts and propositions that compose consumer decision processes. Emphasis is on life style, situation, and information processing. Lecture and case analysis.

313 Advertising Management (3:3:0). Prerequisite: MKTG 301. In-depth study and application of advertising and its role in marketing planning. Identification of relevant data to analyze the marketing situation, development of product position, marketing and advertising objectives, creative strategy, media planning, and evaluation.

330 Purchasing Materials and Management (3:3:0). Prerequisite: MKTG 301. Presents a broad view of the principles of industrial purchasing and management of inventories, including determination of requirements, prices, source selection, inventory policy, and professional ethics.

332 Retail Management (3:3:0). Prerequisite: MKTG 301. Comprehensive view of retailing as it relates to the total marketing process. Emphasis on retail decision alternatives used when formulating retail strategy.

333 Industrial and Governmental Marketing (3:3:0). Prerequisite: MKTG 301. In-depth description, analysis, and evaluation of industrial and governmental marketplaces. Emphasis on marketing procedures practiced and available to decision makers when considering pricing, promotion, and channels of distribution.

351 Marketing Research Techniques and Applications (3:3:0). Prerequisite: DESC 202 and MKTG 301. Study of concepts, theories, and principles underlying the marketing research process. Focus on development and evaluation of research designs for gathering marketing information.

407 International Business (3:3:0). Prerequisite: MKTG 301, G111 301 or 302, and FNAN 301. Multidisciplinary approach to international trade from the viewpoint of business management. Introduced are unique aspects of international transactions, including patterns and theories of international business, impact of foreign trade and international environment, and international business planning.

451 Marketing Information Systems (3:3:0). Prerequisite: MKTG 301. Design and study of internal and external systems that provide information to the marketing decision maker. Information provided by the system is used to make critical marketing decisions regarding product, segmentation, salesmen, channel, and related decisions.

471 Marketing Management (3:3:0). Prerequisite: Senior standing and 6 hours of marketing. 3 of which may be taken concurrently. Managerial aspects of marketing, emphasizing development of marketing strategies and
plans and integrating specific elements of the marketing process. Emphasis on case analysis.

481 Marketing in the Nonprofit Sector (3:3:0). 
Prerequisite: MKTG 301. Unique problems of marketing in nonprofit organizations, including government, and their solution through application of traditional and innovative techniques. Marketing commercial ventures owned by nonprofits. Lecture, discussion, and case analysis.

491 Seminar in Marketing (3:3:0). Prerequisite: 9 hours of marketing. In-depth treatment within a seminar format of timely topics. Emphasis on ability to synthesize and communicate contemporary issues.

492 Field Experience in Marketing (3:3:0). Prerequisite: Senior standing. Faculty-governed field experience in a Northern Virginia business. Teams of students, matched with client firms through the Entrepreneurship Center, propose action plans relating to a major problem or opportunity faced by the company.

499 Independent Study (1-3:0:0). Prerequisite: Senior class standing and a minimum of 24 hours of business courses including principles of marketing, finance, and management. A primary research proposal in a marketing area with prior approval of the instructor and faculty chairman.

Mathematics (MATH)

Mathematical Sciences
Knowledge of high school algebra is a prerequisite for all mathematics courses. In exceptional cases the prerequisite for a course above the calculus sequence may be waived at the discretion of the instructor.

101 Algebra and Elementary Functions (0:3:0). Meets three hours per week. No degree credit is given; however, tuition and fees are charged for three hours. Basic algebraic manipulations. Linear equations and graphing. A study of the properties of polynomial, logarithmic, exponential, trigonometric functions.

108 Introductory Calculus with Business Applications (3:3:0). Functions, limits, the derivative, the integral. Applications of differentiation and integration. Students who have received credit for MATH 113 or 115 may not receive credit for this course.

110 Finite Mathematics (3:3:0). Elementary set theory, probability, and statistics.

113 Analytic Geometry and Calculus I (4:4:1). Prerequisite: Thorough understanding of high school algebra and trigonometry. Functions, limits, the derivative, maximum and minimum problems, the integral, conic sections.

114 Analytic Geometry and Calculus II (4:4:1). Prerequisite: C or better in MATH 113. Transcendental functions, methods of integration, infinite series, analytic geometry.

125 Discrete Mathematics I (3:3:0). Introduction to the ideas of discrete mathematics including logic, proof techniques, sets, graphs and trees, and techniques of enumeration. Recommended for mathematics majors, science majors, and SITE students.

209 Introduction to Mathematical Modeling (3:3:0). Prerequisite: C or better in MATH 114. Calculus-based introduction to discrete and continuous models in the natural and social sciences. Topics include approximations, data analysis, model evaluation, optimization, difference and differential equations, deterministic and stochastic models.

213 Analytic Geometry and Calculus III (3:3:0). Prerequisite: MATH 114. Infinite series, partial differentiation, multiple integrals, line and surface integrals.

290 Foundations of Mathematics (3:3:0). Prerequisite: MATH 114. Axiomatic set theory; graphs; functions; equivalence relations and partitions; partially ordered sets; induction; construction of the natural, rational, real and complex number systems; well-ordering principle; and cardinality. Primarily intended for mathematics majors.

301 Number Theory (3:3:0). Prerequisite: 6 hours of math. Prime numbers, factorization, congruences, Diophantine equations.

303 Matrix Algebra (3:3:0). Prerequisite: MATH 114 or permission of instructor. Matrix operations, vector spaces, rank of a matrix, determinants, eigenvalues and eigenvectors.

305 Discrete Mathematical Structures (3:3:0). Prerequisite: MATH 114. Survey of topics in discrete mathematical structures essential to the study of computer science including notation schemes, lattices, Boolean algebra, graphs and directed graphs, combinatorics, and elementary introduction to graphs and finite fields and finite-state machines.

313, 314 Introduction to Applied Mathematics (3:3:0), (3:3:0). Prerequisite: MATH 304 or 306. Vector fields and integration, complex analysis, Fourier and orthogonal series, Laplace and Fourier transforms, Green's functions, partial differential equations, boundary value problems, special functions, and other topics arising in mathematical physics.
Course Descriptions

322 Linear Algebra (3:3:0). Prerequisite: MATH 290 and (303 or 306). Vector spaces, linear independence, bases, linear transformations, matrix algebra, inner product, special topics.

325 Discrete Mathematics II (3:3:0). Prerequisite: MATH 125 or 305. Further development of the ideas of discrete mathematics, including recurrence, generating functions, algorithms of graph theory, predicate calculus, finite state machines, modular arithmetic.

351 Probability (3:3:0). Prerequisite: MATH 213 or 215. Random variables, probability functions, special distributions, limit theorems.

371 Mathematics for the Elementary School I (3:3:0). Concepts and theories underlying elementary school mathematics, including sets, logic, systems of numeration, whole numbers and integers, operations with integers, equations, and inequalities. Intended for elementary education majors only; does not count toward a major in mathematics.

372 Mathematics for the Elementary School II (3:3:0). Continuation of MATH 371; MATH 371 is recommended prior to enrolling in MATH 372. Topics include elementary number theory, rational and real numbers, intuitive geometry and measurement including the metric system. Intended for elementary education majors only; does not count toward a major in mathematics.

411 Functions of a Complex Variable (3:3:0). Prerequisite: MATH 304 or 306. Analytic functions, contour integration, residues, and applications to such topics as integral transforms, generalized functions and boundary value problems.

413 Modern Applied Mathematics I (3:3:0). Prerequisite: Either MATH 306 or (MATH 303 and MATH 304) and MATH 315. Synthesis of "pure mathematics" and "computational mathematics." The interplay between discrete and continuous mathematics is emphasized throughout. Mathematical structure is revealed from equilibrium models in discrete and continuous systems.

414 Modern Applied Mathematics II (3:3:0). Prerequisite: MATH 413. Continuation of MATH 413 which involves a synthesis of "pure mathematics" and "computational mathematics." Fourier analysis and its role in applied mathematics is developed, e.g., differential equations and approximations. Discrete aspects are emphasized in computational models.

441 Operations Research I (3:3:0). Prerequisite: MATH 303 or 306 or permission of instructor. Survey of deterministic methods for solving "real-world" decision problems. The programming model and simplex method of solution, duality and sensitivity analysis, transportation and assignment problems, shortest path and maximal flow problems, project networks including PERT and CPM, introduction to integer and nonlinear programming, dynamic programming and game theory. Emphasis on modeling and problem solving.

446 Numerical Analysis I (3:3:0). Prerequisite: MATH 303 or 306 and knowledge of a scientific programming language. Significant figures, round-off errors, iterative methods of solution of nonlinear equations of a single variable, solutions of linear systems, iterative techniques in matrix algebra, interpolation and polynomial approximation.

447 Numerical Analysis II (3:3:0). Prerequisite: MATH 306 (or 304) and 446. Numerical differentiation and integration, initial-value and boundary-value problems for ordinary differential equations, methods of solution of partial differential equations, iterative methods of solution of nonlinear systems, approximation theory.

491, 492 Reading and Problems (1-3:0:0), (1-3:0:0). For mathematical sciences majors only. Independent study in math. Must be arranged with instructor before registering.

493 Topics in Applicable Mathematics (3:3:0). Prerequisite: 6 credits of math at or above the 310 level. Topics that have been successfully used in applications of mathematics. Subject determined by instructor.

494 Topics in Pure Mathematics (3:3:0). Prerequisite: 6 hours of math at or above the 310 level. Topics of pure math not covered in other courses. Topics might include Galois theory, cardinal and ordinal arithmetic, measure theory, mathematical logic, and differential geometry. Subject determined by instructor.

Medical Technology (MTCH)

Biology

200 Introduction to Medical Technology (1:1:0). Introduction to the profession of medical technology.

401 Orientation to the Problems and Practices of the Clinical Laboratory (1-2:0:0). Prerequisite: Completion of requirements for B.S. with a major in medical technology except for the 30 hours of professional study, and admission to a school of medical technology approved by the National Accrediting Agency for Clinical Laboratories. Orientation to clinical lab; specimen collection and record keeping; management principles and problems; educational theories as they apply to the

http://catalog.gmu.edu
teaching of clinical laboratory procedures; quality control principles. Not offered on campus.

402 Clinical Hematology and Coagulation (6-8:0:0). Prerequisite: Completion of requirements for B.S. with a major in medical technology except for the 30 hours of professional study, and admission to a school of medical technology approved by the National Accrediting Agency for Clinical Laboratories. Morphology of blood cells in health and disease; theories of hematopoiesis and coagulation; techniques for measurement of hematologic parameters; hematologic pathologies and their lab evaluation. Not offered on campus.

403 Clinical Microscopy (1-3:0:0). Prerequisite: Completion of requirements for B.S. with a major in medical technology except for the 30 hours of professional study, and admission to a school of medical technology approved by the National Accrediting Agency for Clinical Laboratories. Methods for the routine examination of urine, feces, and certain other body fluids, especially the microscopic identification of normal and pathologic components. Includes a study of the kidney and theories of microscopy. Not offered on campus.

404 Serology and Immunohematology (5-7:0:0). Prerequisite: Completion of requirements for B.S. with a major in medical technology except for the 30 hours of professional study, and admission to a school of medical technology approved by the National Accrediting Agency for Clinical Laboratories. Clinical lab procedures that involve antigen-antibody reactions and the theoretical bases of such procedures. Includes both diagnostic and blood bank techniques. Not offered on campus.

405 Clinical Microbiology (4-8:0:0). Prerequisite: Completion of requirements for B.S. with a major in medical technology except for the 30 hours of professional study, and admission to a school of medical technology approved by the National Accrediting Agency for Clinical Laboratories. The biology and pathology of bacteria, rickettsia, fungi, parasites, and viruses of clinical importance and their culture and identification. Not offered on campus.

406 Clinical Chemistry (6-10:0:0). Prerequisite: Completion of requirements for B.S. with a major in medical technology except for the 30 hours of professional study, and admission to a school of medical technology approved by the National Accrediting Agency for Clinical Laboratories. The chemical reactions and procedures used in clinical determinations on blood, urine, and cerebral spinal fluid. Includes manual and automated methods of chemical analyses. Not offered on campus.

Middle East Studies (MEST)

Area Studies

300 Middle East Seminar I: Dimensions of the Middle East (3:3:0). Interdisciplinary introduction to important dimensions of the Middle East. Emphasis on contemporary trends, problems, and conflicts in the region. Underlying themes are the unity and diversity of the peoples and cultures and change and continuity in the region’s societies and nations.

400 Middle East Seminar II: Interpretation of Islamic History (3:3:0). Seminar widens students’ reading on issues and topics covered in other courses on the Middle East, deepens their understanding of major problems in the Middle East and Islamic history, and suggests ways in which these problems might be approached. The approach is problem oriented, and topical rather than chronological. It focuses on classic and key works of scholarship and on various interpretations of major issues in Islamic and Middle East history.

Music (MUSI)

Music

100 Fundamentals of Music (3:3:0). Study of musical notation, interval and triad construction, the reading of treble and bass clefs, scale construction, rhythm, elementary sight singing and ear training, and application at the keyboard. Cannot be applied toward a degree in music.

101 Music Appreciation (3:3:0). For nonmusic majors only. Introduction to music appreciation through formal and aesthetic principles. The elements of music are examined separately and as combined in various musical forms.

103 Folk and Traditional Music of the World (3:3:0). For nonmusic majors only. Study of musical structure and cultural setting of folk music among diverse peoples, with an introduction to traditional art music of India, China, and Japan.

104 Introduction to Twentieth-Century Music (3:3:0). For nonmusic majors only. Survey of various styles found in twentieth-century music. Tonal, atonal, serial, and experimental music.

105 Music in the United States (3:3:0). For nonmusic majors only. Study of music in the U.S. from colonial times to present. Through interaction with musical examples, the student traces significant African and European influences on emerging style and artistic activity in the U.S.

106 Latin American Music (3:3:0). For nonmusic majors only. Survey of folk, popular, and artistic music of Latin American countries in a historical setting. Influences of other cultures on the musical life of representative countries.

107 The Development of Jazz (3:3:0). For nonmusic majors only. Historical, analytical, and aural survey of jazz from inception to present day. Trends resulting from synthesis of jazz with other musical idioms.

113 Sight Singing and Ear Training I (2:3:0). Prerequisite: MUSI 115 and 171 or permission of instructor. The student is taught to sing a line of music without the accompaniment of an instrument. Matching tones, major and minor scales, key signatures, intervals, rhythm. Treble, bass, alto, and tenor clefs. Rhythmic and melodic dictation.

114 Sight Singing and Ear Training II (2:3:0). Prerequisite: MUSI 113 or permission of instructor. Continuation of Sight Singing and Ear Training I. Modulation, various modes. Melodic and harmonic dictation.

115 Harmony I (3:3:0). Prerequisite: Student must be able to read music and have some proficiency on a musical instrument or in voice. Music notation, scales, key signatures, intervals, chords, cadences, figured bass.
116 Harmony II (3:3:0). Prerequisite: MUSI 115 or permission of instructor. First- and second-inversion chords, modulation, nonharmonic tones, figured bass, seventh chords. Analysis of Bach chorales; composition of four-part chorales in eighteenth-century style.

151 Class Strings: Violin and Viola (1:0:3). Prerequisite: Nonmusic majors must have permission of instructor. Study of techniques of playing and teaching the violin and viola. Survey of instructional materials and bow and instrument selection.

152 Class Strings: Cello and String Bass (1:0:3). Prerequisite: Nonmusic majors must have permission of instructor. Study of techniques of playing and teaching the cello and string bass. Survey of instructional materials and bow and instrument selection.

153 Class Woodwinds: Flute and Clarinet (1:0:3). Prerequisite: Nonmusic majors must have permission of instructor. Study of techniques of playing and teaching the flute and clarinet. Survey of instructional materials and mouthpiece and instrument selection.

154 Class Woodwinds: Oboe and Bassoon (1:0:3). Prerequisite: Nonmusic majors must have permission of instructor. Study of techniques of playing and teaching the oboe and bassoon. Survey of instructional materials, instrument selection, and reed adjustment.

155 Class Brass (1:0:3). Prerequisite: Nonmusic majors must have permission of instructor. Study of techniques of playing and teaching the brass instruments. Survey of instructional materials and mouthpiece and instrument selection.

156 Class Percussion (1:0:3). Prerequisite: Nonmusic majors must have permission of instructor. Study of techniques of playing and teaching the percussion instruments. Survey of instructional materials and instrument selection.

157 Class Guitar (1:0:3). Prerequisite: Nonmusic majors must have permission of instructor. Study of techniques of playing and teaching the guitar. Survey of instructional materials and instrument selection.

158 Class Voice I (1:0:2). Prerequisite: Nonmusic majors must have permission of instructor. Study of the human voice in artistic singing. Practical application of basic principles is emphasized.

159 Class Voice II (1:0:2). Prerequisite: MUSI 158 or permission of instructor. Continuation of voice study begun in MUSI 158. Emphasis on artistic singing in several styles.

171 Class Piano I (1:0:3). Prerequisite: Nonmusic majors must have permission of instructor. Study of piano keyboard as it is related to various clefs in music. Emphasis on solution of basic stylistic and technical problems.

172 Class Piano II (1:0:3). Prerequisite: MUSI 171 or permission of instructor. Study of piano keyboard as it is related to intermediate song and combined in various music forms.

173, etc. Private Music Instruction. See descriptions at end of music section.

181, 381 University Chorale (1:0:3). Prerequisite: Audition. Performance of works from the choral repertoire. Public concerts are given. Four credits must be earned at the 181 level before proceeding to the 381 level. May be taken eight times.

182 Collegiate Chorus (1:0:3). Prerequisite: Audition. Ensemble training for students who wish to acquire skills required for participation in advanced performance ensembles. A local public presentation is given. May be taken twice for credit.

183, 383 Symphonic Band (1:0:3). Prerequisite: Audition. Performance of work from the band repertoire. Public concerts are given. Four credits must be earned at the 183 level before proceeding to the 383 level. May be taken eight times.

184, 384 Symphonic Chorus (1:0:3). Prerequisite: Audition. Performance of major works from the choral repertoire. Public concerts are given. Four credits must be earned at the 184 level before proceeding to the 384 level. May be taken eight times.

187, 387 Symphony Orchestra (1:0:3). Prerequisite: Audition. Performance of works from the symphony orchestra repertoire. Public concerts are given. Four credits must be earned at the 187 level before proceeding to the 387 level. May be taken eight times.

189, 389 Jazz Ensemble (1:0:3). Prerequisite: Audition. Provides practical experience in various aspects of jazz performance: section work within a large aggregation, combo work, and improvisation. Public concerts are given. Four credits must be earned at the 189 level before proceeding to the 389 level. May be taken eight times.

215 Harmony III (3:3:0). Prerequisite: MUSI 116 or permission of instructor. Study of four-part chromatic harmony and analysis of nineteenth-century compositions.

216 Harmony IV (2:2:0). Prerequisite: MUSI 215 or permission of instructor. Continuation of study of chromatic harmony as it applies to classical forms.

218 Keyboard Harmony (1:0:2). Prerequisite: MUSI 172 and 215. For music majors only. Study of techniques of harmonization at the piano keyboard.

231 Survey of World Music (3:3:0). Prerequisite: MUSI 215 or permission of instructor. Survey of music literature in the four major theoretical systems of the world. Emphasis on influences of non-Western systems on Western music.

251 Music for the Elementary School (4:3:2). For nonmusic majors only. Study of fundamentals of sound, rhythm, melody, harmony, form, and their notation. Development of basic vocal, listening, and instrumental skills. Application of these understandings and skills to the development of the elementary school child's musicality by the nonspecialist classroom teacher.

271, 272 Techniques of Accompanying (1:0:3). Prerequisite: 4 credits earned in Private Music Instruction (keyboard instrument) or permission of instructor. Fourteen 1-hour classes and 28 hours of supervised practicum per semester. The latter consists of practical application concepts and techniques learned during class sessions. This practical application normally consists of assignments to function as accompanist for two Private Music Instruction students (in lessons, practice sessions, and public performances) and/or equivalent amount of work as accompanist for GMU ensembles (in
rehearsals and performances). MUSI 271 and 272 may each be taken three times.

285 Chamber Ensembles (1:0:3). Prerequisite: Audition. Performance of works from the chamber music repertoire. Public performances are given. May be taken for credit six times.

315/PHYS 315 Physics of Musical Sound (3:3:0). Prerequisite: MUSI 216 or permission of instructor. Topics include simple harmonic motion, vibration, temperament, the ear, architectural acoustics, sound recording and reproduction.

319 Class Composition and Arranging I (3:3:0). Prerequisite: MUSI 114, 216, or permission of instructor. Students write original compositions for specified instruments, voices, or combinations. They then apply compositional principles to the creative arrangement of existing music of various styles.

320 Class Composition II (3:3:0). Prerequisite: MUSI 319 or permission of instructor. Composition skills acquired in Class Composition and Arranging I are applied to larger forms of music and larger ensembles, with emphasis on twentieth-century techniques.

327 Choral Arranging (3:3:0). Prerequisite: MUSI 216 or permission of instructor. Practical application of various techniques used in composition and arrangement of choral music. Includes notation, text setting, choral voicing, choral texture, and contemporary vocal writing, as well as the composition of original materials as they apply to arranging techniques.

335 Historical, Theoretical and Analytical Study of Music I (3:3:0). Prerequisite: MUSI 116 or permission of instructor. Study of music in Western civilization from Greek antiquity through the Renaissance, with emphasis on historical, theoretical, and analytical aspects.

336 Historical, Theoretical and Analytical Study of Music II (3:3:0). Prerequisite: MUSI 116 or permission of instructor. Study of music in Western civilization from Monteverdi through Haydn, Mozart, and their contemporaries, with emphasis on historical, theoretical, and analytical aspects.

351 Keyboard Pedagogy (3:3:0). Prerequisite: MUSI 114, 216, 218, and 8 credits in piano or organ, or permission of instructor. Investigation of various methods, theories, techniques, and materials used in teaching of keyboard to children and adults, both in individual and group situations.

379 Improvisation (1:0:2). Prerequisite: MUSI 114, 216, and 218, or permission of instructor. Application of improvisation techniques used in various periods of music history on the student's major instruments and the piano.

380 Junior Recital (1:0:0). Corequisite: MUSI 377 or 378. A public recital given by students during their junior year.

382 Piano Ensemble (1:0:3). Prerequisite: Audition and 4 credits in Private Music Instruction—Piano. Study and performance of original four-hand works for one and two pianos. Public performances. May be taken four times.

385 Glorianna Singers (1:0:3). Prerequisite: Audition. Discovery, interpretation, and performance of choral music for vocal chamber music ensemble from all historical periods. Emphasis on achieving a high level of artistic performance and on bringing to the university and its surrounding community musical compositions which are not readily accessible in the regular concert repertoire. May be taken four times.

386 Laboratory Ensemble (1:0:3). Prerequisite: One semester of instrumental instruction on an instrument or permission of instructor for music majors only. Vocal and instrumental ensemble for music majors seeking state certification as music teachers; provides opportunities for performance on secondary instruments and voice and to serve as a lab for conducting, methods and materials, and composition and arranging classes. May be taken twice.

388 Musical Theatre Techniques (1:3:1:2:6). Prerequisite: Audition and permission of instructor. Preparation and presentation of works or parts of works from the musical theatre repertoire (opera, operetta, musical comedy). Students investigate applicable techniques in lab sessions and rehearsals. A public performance is given. May be taken for credit four times.

390 Improvisation Ensemble (1:0:3). Prerequisite: Audition. An ensemble experience designed to promote exploration of new sound sources inherent in each instrument voice. Emphasis on group interaction and sensitivity to musical texture, timbre, and tonal resources through aural awareness. Public concerts are given. May be repeated for a total of 4 credits.

391 General Conducting (2:0:3). Prerequisite: MUSI 114, 172, 216, and 218, or permission of instructor. Study of basic techniques of conducting a musical ensemble.

396 Advanced Conducting (2:0:3). Prerequisite: MUSI 391 or permission of instructor. Advanced conducting course emphasizing the techniques of bringing a musical ensemble to concert standard. Consideration of the interpretation of repertoire from the applicable historical periods.

417 Techniques of Twentieth-Century Style Analysis (3:3:0). Prerequisite: MUSI 216, 218, and 319, or permission of instructor. Various analytical methods for understanding the complex nature of twentieth-century music and the diverse styles of today's composers. Selected masterworks from contemporary music literature.

419 Orchestration (3:3:0). Prerequisite: MUSI 216, 218, and 319, or permission of instructor. Principles of combining and balancing instruments in orchestral and chamber contexts. Attention to orchestral terminology and general notation as well as timbre, range, clefs, transposition, special effects, and scoring procedures.

435 Historical, Theoretical, and Analytical Study of Music III (3:3:0). Prerequisite: MUSI 216 or permission of instructor. Study of development of Western music from Beethoven through the post-Romantic era, with emphasis on historical, theoretical, and analytical aspects.

436 Historical, Theoretical, and Analytical Study of Music IV (3:3:0). Prerequisite: MUSI 216 or permission of instructor. Development of Western music from late nineteenth-century Impressionism to the present, with emphasis on historical, theoretical, and analytical aspects.

437 Choral Literature (3:3:0). Prerequisite: MUSI 216 or permission of instructor. Survey of sacred and secular music for vocal chamber music ensemble from all historical periods. Emphasis on achieving a high level of artistic performance and on bringing to the university and its surrounding community musical compositions which are not readily accessible in the regular concert repertoire. May be taken four times.
choral literature from the Middle Ages to the present. Representative genres such as Mass, motet, madrigal, anthem, cantata, passion, oratorio, and part-song.

438 Operatic Literature (3-3:0). Prerequisite: MUSI 216 or permission of instructor. Opera from seventeenth century to present, with emphasis on historical stylistic development. Important works in the operatic repertory.

439 Keyboard Literature (3-3:0). Prerequisite: MUSI 216 or permission of instructor. Chronological survey of keyboard literature and its antecedents from sixteenth century to present. Solo keyboard genres such as choral Prelude, suite, sonata, theme and variations, and character piece in a historical context.

440 Orchestral Literature (3-3:0). Prerequisite: MUSI 216 or permission of instructor. Chronological survey of development of orchestra and its literature from sixteenth century to present. Solo keyboard genres such as choral Prelude, suite, sonata, theme and variations, and character piece in a historical context.

461 The Teaching of General Music in the Elementary School (3-3:0). Prerequisite: Corequisite: MUSI 114, 216, 218, 396, and EDUC 300 or 522 and 302. For music majors only. Study of theory, methods, practice and materials involved in teaching of general music in the elementary school. Field experience required.

463 The Teaching of Vocal Music in the Secondary School (3-3:0). Prerequisite: Corequisite: MUSI 114, 216, 218, 396, and EDUC 300 or 522 and 302. For music majors only. Survey of repertoire and methods for teaching high school choral groups, small ensembles and voice classes. Field experience required.

464 The Teaching of Instrumental Music in the Elementary and Middle School (3-3:0). Prerequisite: MUSI 114, 216, 218, 396, and EDUC 300 or 522 and 302. A study of theory, methods, practices, and materials for teaching instrumental music at the elementary school level. Emphasis on philosophical foundations, development of objectives, evaluation of student progress, recruiting techniques, and management of various phases of the instrumental music program. Field experiences in the public schools are required.

465 Selected Topics in Music Education (1-3:1-3:0). Prerequisite: 84 hours in a music degree program or permission of instructor. Topics of practical interest to prospective and practicing music educators covering pedagogy, performance, and logistics relating to teaching music in schools, private studios, and communities. Field experience required.

466 The Teaching of Instrumental Music in the High School (3-3:0). Prerequisite: MUSI 114, 216, 218, 396, and EDUC 300 or 522 and 302. A study of theory, methods, practices, and materials for teaching instrumental music at the secondary school level. Developing goals and objectives for large and small ensembles, and instrumental, theory, and music history/literature classes; creating and evaluating learning experiences; managing the classroom, the rehearsal, and the instrumental program in general. Field experiences in the public schools are required.

480 Senior Recital (1:0:0). Corequisite: MUSI 477 or 478. Public recital given by students during senior year.

481 Composition Recital (1:0:0). Prerequisite: 6 hours of undergraduate Private Music Instruction—Composition successfully taken after being admitted into the composition concentration of the B.M. degree program. Public recital given by composition students in senior year.

497, 498 Independent Study (1-3:1-3:0) (1-3:0:0). Prerequisite: Music majors with 84 hours and two of the following: MUSI 335, 336, 435, 436; and permission of instructor, chair, and the music faculty. Individual research and study of selected subject in close consultation with an instructor. A student may choose from the musicological, ethnomusicological, theoretical, compositional or educational areas of music and produce at least one major written work based on the research.

511 Analytical Techniques (3-3:0). Prerequisite: Baccalaureate in music or permission of instructor. Detailed formal and stylistic examination of music selected from the major style periods. Development of the analytical skills necessary for theoretical study at the graduate level.

512 Advanced Orchestration (3-3:0). Prerequisite: Baccalaureate in music with a minimum of 3 hours study in orchestration or permission of instructor. Intensive study through analysis and arrangement of advanced instrumentation methods. Scoring for large forces. Twentieth-century vocal and instrumental techniques such as multiphonics. Unusual instruments. New methods of notation. Late twentieth-century performance practices.

513 Advanced Topics in Music Theory (3-3:0). Prerequisite: Baccalaureate in music or permission of instructor. Intensive study and analysis of music from the theoretical point of view, comparing trends in compositional techniques through various works. May be repeated for credit as topics change.

515 Advanced Topics in Music History and Literature (3-3:0). Prerequisite: Baccalaureate in music or permission of instructor. Thorough examination of a specific musical style, genre, composer, compositional school, or historical development. Primary and secondary source materials studied in historical and/or analytical contexts. May be repeated for credit as topics change.

541 Chamber Music Literature (3-3:0). Prerequisite: Baccalaureate in music or permission of instructor. Historical and analytical study of the extensive literature for chamber ensembles (trios through nonets) in various instrumental combinations, from the seventeenth through the twentieth centuries.

543 Concerto Literature (3-3:0). Prerequisite: Baccalaureate in music or permission of instructor. Historical and analytical study of the concepts which produced the concerto form and its extensive literature, from the seventeenth through twentieth centuries.

561 Advanced Topics in Music Education (1-3:1-3:0). Prerequisite: Degree in music education or permission of instructor. Intensive examination of specific areas of concern to music educators engaged in teaching vocal, instrumental, and general music at all levels or functioning as private studio teachers. Individual research, group discussions, and participation in related activities. Field experience required.

562 The Psychology of Music Teaching and Learning (3-3:0). Prerequisite: Baccalaureate in music or permission of instructor. Study of the learner's musical behaviors (affective, cognitive, and psychomotor) in an
effort to devise an empirically based teaching method founded on learning principles.

581 Graduate Choral Ensembles (1:0:3). Prerequisite: Audition. Performance of works from the choral repertoire. Public concerts are given. May be taken for credit four times.

583 Symphonic Band (1:0:3). Prerequisite: Audition. Performance of works from the band repertoire. Public concerts are given. May be taken for credit four times.

585 Chamber Ensembles (1:0:3). Prerequisite: Audition and baccalaureate in music or permission of instructor. Performance of works from the chamber music repertoire. Public performances are given. May be taken for credit four times.

587 Symphony Orchestra (1:0:3). Prerequisite: Audition. Performance of works from the symphony orchestra repertoire. Public concerts are given. May be taken for credit four times.

597 Advanced Topics in Conducting (3:3:0). Prerequisite: Baccalaureate in music with a minimum of two semesters of study in conducting or permission of instructor. Intensive study of an advanced topic in conducting chosen according to interests of students and instructor from such topics as the following: (1) Choral Music Performance Techniques and Score Preparation, (2) Wind Ensemble Performance Techniques and Score Preparation, (3) Orchestral Performance Techniques and Score Preparation, (4) Performance Practices in Choral Music before 1750, (5) Rhythmic Analysis as a Guide to Score Interpretation in Music of All Periods. Maximum of six credits may be earned.

Private Music Instruction

Beginning Private Music Instruction
To earn one credit per semester, a student takes 14 half-hour private music lessons and is expected to practice 50 minutes each day. Only one credit can be earned each semester. Instruction is offered in piano, classical guitar, voice, and the standard band and orchestral instruments. Cannot be applied toward a degree in music. The private music instruction fee applies.

177, 178, 277, 278 Beginning Private Music Instruction—Instrumental/Vocal (1:0:.5 for each).

Undergraduate Private Music Instruction
To earn one credit per semester, a student takes 14 half-hour private music lessons; to earn two or three credits per semester, a student takes 14 one-hour private lessons. In Private Music Instruction—Accompanying, a student takes the equivalent of 14 half-hour private music lessons for one credit per semester or 14 one-hour lessons for two or three credits per semester, a number of which may be spent in a group-practicum situation at the instructor’s discretion.

The following amount of practice (or composing) is expected each day: one credit/50 minutes; two credits/1 hour and 40 minutes; and three credits/2 and one-half hours.

As part of the repertoire requirement, each student must attend at least 10 music programs sponsored by the Department of Music. Undergraduate Private Music Instruction is offered in piano, harp, harpsichord, classic guitar, voice, koto, the standard band and orchestral instruments, composition, conducting, and accompanying. The private music instruction fee applies.

173, 174, 273, 274, 373, 374, 473, 474 Undergraduate Private Music Instruction—Instrumental/Vocal (1:0:.5 for each).

179, 180, 279, 280 Undergraduate Private Music Instruction—Instrumental/Vocal (1:0:.5 for each).

214, 215, 274, 275, 374, 375, 474 Undergraduate Private Music Instruction—Instrumental/Vocal (2:0:1 for each).

377, 378, 477, 478 Undergraduate Private Music Instruction—Instruments/Vocal (3:0:1 for each). Prerequisite: for MUSI 173, 175, and 179; Audition; for MUSI 377, 8 credits on the major instrument and approval by an audition committee. Corequisite for MUSI 377 or 378: MUSI 380. Corequisite for MUSI 477 or 478: MUSI 480.

221, 222, 321, 322, 421, 422 Undergraduate Private Music Instruction—Composition (1:0:.5 for each).

223, 224, 323, 324, 423, 424 Undergraduate Private Music Instruction—Composition (2:0:1 for each). Prerequisite for MUSI 221: MUSI 114 and 319; prerequisite for MUSI 223: MUSI 114 and 319, portfolio of compositions, and an interview with a faculty committee.

491, 492 Undergraduate Private Music Instruction—Conducting (1:0:.5 for each).

493, 494 Undergraduate Private Music Instruction—Conducting (2:0:1 for each). Prerequisite for MUSI 491 and 493: MUSI 396 and an audition before a faculty committee.

125, 126, 225, 226 Undergraduate Private Music Instruction—Accompanying (1:0:.5 for each).

127, 128, 227, 228 Undergraduate Private Music Instruction—Accompanying (2:0:1 for each).

329, 330, 429, 430 Undergraduate Private Music Instruction—Accompanying (3:0:1 for each). Prerequisite for MUSI 1125 and 127: Undergraduate Private Music Instruction—Instrumental Audition or MUSI 1172; for MUSI 329, 8 credits on a keyboard instrument and approval by an audition committee. Corequisite for MUSI 329 or 330: MUSI 380. Corequisite for MUSI 429 or 430: MUSI 480.

Nursing (NURS)

Nursing

250 Concepts of Health Throughout the Life Span (3:3:0). Prerequisite: 3 hours of psychology and sociology. Consideration of health maintenance and health promotion behaviors throughout the life cycle. Examination of normal growth, development, nutrition.

254 Introduction to Professional Nursing (3:3:0). Prerequisite or corequisite: NURS 250 or permission of school. Introduction to nursing as an emerging discipline, profession, and occupation. Emphasis on development of a dynamic concept of nursing, essential behaviors of the profession, and the design of nursing systems.
262 Technologies in Nursing (4:2:6). Prerequisite: Anatomy and physiology. Prerequisite or corequisite: NURS 254. Skills required in the assessment, design, and control of nursing systems. Clinical practice arranged.

301, 302 Elements of Pathology and Medical Therapeutics (4:4:0), (4:4:0). Prerequisite: Anatomy and physiology, chemistry, microbiology, psychology (3 hours), sociology. NURS 250, 254, 262, or permission of school. Content foundational to nursing: pathology in psychological, sociological, and physiological system; medical technologies; selected modes of medical diagnosis and treatment.

314 Nursing Systems for Adults and Children (3:3:0). Prerequisite: NURS 250, 254, 262; prerequisite or corequisite: NURS 301. Design and implementation of nursing systems for adults and children. The self-care conceptual framework and the nursing process are used to identify (1) the agency of clients to manage their health care, and (2) the appropriate methods of nursing assistance. Selected health-related concepts are presented.

315 Application of Nursing Systems for Adults and Children (5:0:15). Prerequisite or corequisite: NURS 314. Application of nursing systems for adults and children in the acute care setting. Clinical experiences focus on using the nursing process to provide care to clients and families with health and self-care needs resulting from medical, surgical, and congenital problems.

318 Concepts of Health, Groups and Professional Issues in Nursing (3:3:0). Prerequisite: Degree in another field or R.N. Corequisite: NURS 254. Focus on small groups and families as participants in health care. The influence of professional issues on the nurse’s developing role is explored.

318 Concepts of Health, Groups and Professional Issues in Nursing (5:5:0). Prerequisite: Degree in another field. Corequisite: NURS 254. Focus on small groups and families as participants in health care. The influence of professional issues on the nurse’s developing role is explored. Life-span growth and development are discussed, focusing specifically on theories, self-care and health maintenance practices, implications of specific hazards as well as foundations of basic and age-related nutritional requirements.

324 Nursing Systems for Individuals, Small Groups, and Families (3:3:0). Prerequisite: NURS 250, 254, 262; prerequisite or corequisite: NURS 302. Design and implementation of nursing systems for individuals, small groups, and families. The nursing process will be used to identify the current and potential agency of clients to manage their health and self-care and the appropriate methods of nursing assistance for clients with developmental, maternal, and/or mental health self-care deficits.

325 Application of Nursing Systems for Individuals, Small Groups, and Families (5:0:15). Prerequisite or corequisite: NURS 324. Application of nursing systems for individuals, small groups, and families in the acute care setting. Clinical experiences focus on using the nursing process to provide care for clients with health and self-care needs resulting from developmental, maternal, and mental health problems. Attention is also given to health care coordination with the nursing subsystem.

400 Clinical Nursing Elective (3:0:9). Prerequisite: NURS 301, 302, 314, 315, 324, 325, or equivalent. Course allows students to synthesize previously learned knowledge and skills, acquire additional clinical experience, and observe and participate in nursing practice.

411 Research Dimensions in Nursing (3:3:0). Prerequisite: NURS 301, 302, 314, 315, 324, 325. Introductory research course presenting basic research concepts and methods used in nursing. Major nursing theories as a foundation for scholarship.

419 Theoretical Concepts of Nursing Systems for Individuals and Large Groups (3:3:0). Prerequisite: NURS 319, 320, 426, 430, 450. Corequisite: NURS 420, 411, 475. Course focuses on nursing concepts of complex care and includes concepts related to pathophysiology in individuals and groups. Emphasis on nursing systems for adult and aged populations in acute and chronic settings.

420 Implementing Complex Nursing Systems for Individuals and Large Groups (8:2:18). Prerequisite or corequisite: NURS 426, 430. Course includes health promotion, disease prevention, and complex care nursing in either acute or chronic settings. Application of nursing care concepts, demonstration of related clinical skills, and participation in nursing care planning and patient family teaching are essential components. Clinical experience focuses on understanding nursing as a subsystem within the larger health care system and is based on student's interest and goals in the provision of complex nursing care. (Intensive 7-week medical-surgical clinical experience for second degree students)

430 Nursing Systems for Individuals, Families, and Large Groups in Community Settings (3:3:0). Focus on identification of concepts used in designing nursing systems for individuals, families, and large groups in community settings. Emphasis on small and large group concepts: principles of epidemiology; principles of primary, secondary, and tertiary prevention; teaching and
431 Application of Nursing Systems for Individuals, Families, and Large Groups in Community Settings (5:0:15). Prerequisite: NURS 301, 302, 314, 315, 324, 325. Acquirement of skills necessary to collect data for health history and to carry out physical and psychosocial assessment of the individual. Lab experiences develop and validate health appraisal skills.

471 Professional Issues in Nursing Practice (3:3:0). The influence of professional issues on the nurse’s role in clinical practice will be explored in small group discussions.

475 Nursing Systems for Individuals and Groups with Complex Problems throughout the Life Span (3:3:0). Examination of nursing implications of selected major health problems that significantly affect individuals or groups throughout the life span. Course applies nursing process according to the self-care deficit theory. Incorporated within this are epidemiological statistics, health assessment, pathophysiology, stages of the nursing process, pharmacology, and application of appropriate nursing research findings. Course taught within intensive NURS 476-420 clinical experience.

476 Application of Nursing Systems for Individuals and Groups with Complex Problems (5:0:15). Prerequisite: NURS 301, 302, 314, 315, 324, 325. Application in an acute care setting of knowledge of nursing systems for individuals and small groups. Clinical experiences focus on understanding nursing as a subsystem within the larger health care system, and are based on student’s interest and goals in the provision of complex nursing care. Intensive 7-week medical-surgical experience.

480 Health Maintenance and Health Aspects of Aging (3:3:0). Study of physiological and psychological factors which influence health and have implications for preventive measures in disease and health disorders in the aging. Nutrition, the nature of health problems, and methods of assessing physical and psychological needs are examined.

495 Directed Reading in Nursing (2:0:0). Prerequisite: 84 hours and permission of school. Examination of literature on specialized topic in nursing practice, education, or scholarship. Conducted in consultation with faculty.

499 Independent Study in Nursing (1-3:0:0). Prerequisite: permission of school. Individual study of a particular problem area in nursing research, theory development, or education under the direction of faculty. Clinical practice may be arranged.

505 Case Management (3:3:0). Prerequisite: Bachelor’s degree or permission of instructor. Open to seniors. Course for health and human service professionals on case management program development and delivery. Study and application of the case manager’s role in identifying and coordinating cost-effective services. Topics include information management, sociological issues, funding, communication, and self-care/independent living.

550 Pathophysiological Bases for Major Health Deviations of Individuals (3:3:0). Health deviations in individuals occurring in U.S. which require long-term and/or terminal health care interventions. Presented within developmental framework, as they influence physiologic integrity at the cellular level. Focus on man as a whole, open system. Complex health programs from the perspective of maintaining homeodynamics.

565 Issues in Oncology Nursing (3:3:0). Course addresses the major professional nursing concerns in the field of cancer nursing. These include philosophical, ethical, and legal aspects of nursing, Collaborative roles, professional organizations, and research in oncology nursing are also addressed.

570 Cultural Dimension of Aging (3:3:0). Impact of cultural definitions of aging, research methodologies, and findings of cross-cultural studies. Implications for health care and nursing.

Operations Research (OR)

Operations Research and Applied Statistics

435 Computer Simulation Modeling (3:3:0). Prerequisite: STAT 344 and a scientific programming language. Introduction to the basic concepts of simulating complex systems by computer. Topics covered include Monte-Carlo methods, discrete-event modeling, a specialized simulation language, and the statistics of input and output analysis.

441/MATH 441 Deterministic Operations Research (3:3:0). Prerequisite: MATH 303 or permission of instructor. Survey of deterministic methods for solving "real-world" decision problems. The linear programming model and simplex method of solution, duality, and sensitivity analysis; transportation and assignment problems; shortest path and maximal flow problems; introduction to integer, nonlinear, and dynamic programming. Emphasis on modeling and problem solving.

451/DESC 451 Optimization Models (3:3:0). Prerequisite: DESC 352. An examination of optimization models as applied to business problems. Both linear and nonlinear models are considered, including dynamic, integer, and goal programming. Applications to management, finance, and marketing.

481 Numerical Methods in Engineering (3:3:0). Prerequisite: MATH 215 and MATH 303 or 322, or equivalent. Modern numerical methods and software. Emphasis on problems solving through software and assessing the quality of solutions obtained. Topics include computer arithmetic, linear equations and least squares data fitting, interpolation, nonlinear optimization, and differential equations.
540 Management Science (3:3:0). Prerequisite: MATH 108 and STAT 250 or DESC 200, or equivalent. Operations research techniques and their application to managerial decision making. Mathematical programming, Markov processes, queuing theory, inventory models, PERT, CPM, and computer simulation. Use of contemporary computer software for problem solving. OR/MS majors do not receive credit.

541 Operations Research: Deterministic Models (3:3:0). Prerequisite: MATH 303 or equivalent. Deterministic methods for solving "real-world" decision problems. The linear programming model and simplex method of solution, duality and sensitivity analysis; transportation and assignment problems; shortest path and maximal flow problems; introduction to integer, nonlinear, and dynamic programming. Emphasis on modeling and problem solving. Students who have taken OR/MATH 441 will not receive credit.

Plan for Alternative General Education (PAGE)

PAGE

Only students enrolled in the PAGE program are eligible to take PAGE courses.

Because PAGE is an integrative program, the courses in one semester are generally prerequisite for the courses in the following semester. (Exceptions for majors in certain departments have been arranged and are available in the PAGE office.)

120 Computers in Contemporary Society (4:4:0). Provides computer literacy through hands-on programming and information processing, as well as appreciation of the computer's role in modern society.

122 Reading the Arts (3:3:0). Explores the relationship of the parts to the whole in a work of art, the connections among different art forms, and the links between art and the outside world. Specific content and forms considered vary from section to section.

123 Reading Cultural Signs (3:3:0). Uses techniques developed in PAGE 122 and new methods introduced from sociology, economics, history, anthropology, and psychology to explore ways in which various media (art, architecture, movies, literature, and music) reflect and shape personal and social values.

125, 225 Analysis and Solution of Quantitative Problems I, II (3:3:0), (3:3:0). Discusses real-world modeling and problem solving techniques and, in conjunction with the computer and tools introduced from the mathematical sciences, applies these to the analysis and solution of a variety of quantitative problems in the natural and social sciences as well as the business environment.

130 Conceptions of Self (3:3:0). Drawing from appropriate works in the social sciences, arts and humanities, examines different conceptions of the self, characteristics of different cultures and historical eras.

131 Contemporary Society in Multiple Perspectives (3:3:0). Explores methods and perspectives in the social sciences and humanities to evaluate the contribution of different disciplines to an understanding of significant social issues and their global ramifications.

150, 152, 250 Symbols, Codes and Information (1:1:0), (1:1:0), (1:1:0). Prerequisite: Taken in sequence. Provides a synthesis of the PAGE courses emphasizing the various ways in which people communicate ideas to one another—through language, mathematics, the graphic and musical arts. Lectures by PAGE faculty and guest speakers.

151, 153, 251 Values, Themes, and Cultural Problems (1:1:0), (1:1:0), (1:1:0). Prerequisite: Taken in sequence. Integrates the material treated in the PAGE courses dealing with the interrelationship of the self and society as seen through the various social sciences, humanities, and arts. Lectures by PAGE faculty and guest speakers.

227, 228 Scientific Thought & Processes I, II (4:3:3), (4:3:3). Prerequisite: Taken in sequence. Explores and integrates the principles of classical and modern science through the study of such topics as cosmology, evolution, ecology, mechanics, relativity, and quantum physics.

230 Cross-Cultural Perspectives (3:3:0). Enables students to broaden cultural horizons and to understand human behavior by studying in depth a society different from their own.

252 The Decision Making Process and the Choice of Technologies (3:3:0). Examines decision making in large organizations, its effects on the choice of technologies, and the impact of these choices on values.

253 The Contemporary United States (3:3:0). Studies specific aspects of contemporary U.S. society from historical, sociological, political, economic, cultural, and global perspectives.

Parks, Recreation, and Leisure Studies (PRLS)

Health, Sport, and Leisure Studies

100 Introduction to Parks, Recreation, and Leisure Studies (3:3:0). Emergence of the recreation, park, and conservation movements since colonial times. Service and professional agency development and organization. Major specializations in leisure services (tourism, therapeutic recreation, outdoor education, etc.). Disciplinary and scientific components of parks, recreation, and leisure studies.

115 Fishing and Camping (2:0:3). Safety and functionality in selecting and using equipment and supplies for fishing and camping. Techniques suited to various conditions and objectives. Maintenance and enhancement of the environment. Fee.

119 Trap and Skeet Shooting (2:0:3). Fundamentals of shooting clay targets. Emphasis on safe handling of materials and equipment. Sport shooting competition. Fee.

120 Hiking, Backpacking, and Orienteering (2:0:3). Basic skills for comfort in and enjoyment of back-country environments. Preparation, materials, and equipment, and safety and stewardship of resources are stressed. Fee.

180 Whitewater Canoeing (2:0:3). Prerequisite: Ability to swim fully clothed for five minutes and to put on the PFD in water. Basic skills must be mastered on flat water prior to the two whitewater canoe trips. Fee.

190 Downhill and Cross-Country Skiing (2:0:3). Basic skills, safety, and equipment for downhill and cross-country skiing. Graded S-NC only. Fee.

255 Basic Scuba Diving (2:0:3). Prerequisite: Intermediate-level swimming ability. Basic skill and knowledge to prepare for the Open Water Diver Certificate (PADI). Fee. This course may not be taken by anyone who has previously taken and satisfactorily completed PHED 255.

300 People with Nature (3:3:1). Perceptions of and attitudes toward nature. Extensive reading and discussion of nature writers' works, including works of Thoreau, Olsen, Seaton, and others. Includes a 24-hour "solo" experience at the Center for Outdoor Education at Hemlock Overlook.

310 Recreation Program Marketing and Development (3:3:0). Prerequisite or corequisite: PRLS 100 or permission of instructor. Research for marketing decisions through environmental scan and needs assessment. Design and marketing of leisure services in profit and non-profit settings for individual and community satisfaction and growth. Program evaluation.

316 Recreation and Outdoor Education (3:3:0). Promotion of health and fitness via non-competitive and informal outdoor recreation activities. Safety and comfort in outdoor pursuits. Sustainable use, conservation, and stewardship of outdoor recreation resources.

317 Determinants and Outcomes of Play and Recreation (3:3:0). Prerequisite: PRLS 100 or permission of instructor. Explores theories of play and recreation behavior with emphasis on learning, effectance, and arousal theories. Empirical research evidence of antecedents to and consequences of play and recreation involvements, motivation for and satisfaction from play and recreation activity.

320 Leadership Principles and Techniques in Leisure Services (3:3:0). Prerequisite: PRLS 100 or permission of instructor. Theories of leadership and determinants of leadership effectiveness. Leadership styles and group facilitation techniques. Models for team effectiveness. Assessment of personal leadership styles and effectiveness.

326 Problem Solving in Recreation and Parks (3:3:0). Systematic application of problem-solving models to current problems in the provision of park and recreation services. Case study method is used to study problems faced by agencies in Washington and Northern Virginia and to explore alternatives for resolution.

402 Environmental Impacts of Recreational Use (3:3:0). Prerequisite: PRLS 100 or permission of instructor and 54 hours. Environmental consequences of recreational use of land and water resources. Compaction, erosion, pollution of land and water, noise, crowding, and conflicts among users are examined. Mitigation of deleterious impacts and deprecative behaviors. Introduction to proxemics, environmental influences on behavior, and environmentally sensitive design of facilities.

405 Planning, Design, and Maintenance of Leisure Facilities (4:3:2). Prerequisite: PRLS 310 or permission of instructor and 54 hours. Quantity, location, and design standards for facilities. Safety, functionality, durability, and maintenance demand criteria in planning and design. Programmatic and operational objectives to be met, including user comfort and convenience, crowd management, and traffic flow. Space relationships. Includes field study of local facilities.

410 Management and Administration of Recreation Services (3:3:0). Prerequisite: PRLS 320 or permission of instructor and 54 hours. Management of revenue budgeting and financing park and recreation systems. Organizational structure and development. Service contracts.

426 Heritage Interpretation and Visitor Services (3:3:0). Prerequisite: PRLS 402 or permission of instructor and 54 hours. Philosophies, concepts, and techniques associated with communication and dissemination of information pertaining to use of recreation resources. Design and implementation of programs to interpret cultural, historical, and natural resources to visitors and site users. Evaluation methodologies for interpretive and visitor services programs.

450 Senior Research Seminar (3:3:0). Prerequisite: PRLS 317 or permission of instructor and 54 hours. Development of empirical research designs for both practical and theoretical problems in time use or recreation service and resource management. Literature review of hypothesized relationships and formulation of research proposals.

460 Legal Aspects of Park and Recreation Administration (3:3:0). Prerequisite: PRLS 100 or permission of instructor and 54 hours. Emphasis on safety, liability, risk, and insurance. Legal jurisdictions, apparatus, and decision making. Current issues for administrators of park and recreation facilities and programs.

http://catalog.gmu.edu
Course Descriptions

490 Internship (12:0:0). Paid or voluntary work experience in a park and recreation agency. Minimum period of 10-12 weeks of full-time employment. Application of course work, theories, and research to work settings. Work sites are chosen by students after approval of faculty supervisors. Includes meetings and assignments prior to as well as during the internship.

499 Independent Study (1-3:0:0). Individual study of topic area in leisure research, theory, or practice under the direction of faculty.

Philosophy (PHIL)

Philosophy and Religious Studies

100 Introduction to Philosophy (3:3:0). Introduction to nature of philosophical reasoning and to some of the main problems of philosophy.

111 Introduction to Social and Political Philosophy (3:3:0). Examination of philosophical foundations of some of the major concepts and institutions in social and political thought.

151 Introduction to Ethics (3:3:0). Consideration of some of the perennial issues in ethical theory.

173 Introduction to Logic (3:3:0). Basic concepts and techniques of deduction, emphasizing the modern treatment of such topics as quantification and rules of inference, with study of the classical treatment. Basic principles of induction, informal fallacies, and uses of logic in everyday life.

212 Alternative Futures for Science and Society (3:3:0). Inquiry into how values of freedom and rationality are involved in the ways in which science and technology are being used to meet problems of our day.

253 Philosophy and Literature (3:3:0). This course can count for literature credit as well as philosophy credit. The philosophic significance of psychiatry, existentialism, and Marxism and their expression in twentieth-century literature in the stories of Mann, Kafka, Hesse, Camus, Sartre, Koesler, Bellow, and Pynchon. Themes include paradox, alienation, absurdism, narcissism, totalitarianism versus democracy, art and neurosis, sexuality, symbolism, freedom, and authenticity.

254 Contemporary Ethical Problems (3:3:0). Topics include homosexuality, abortion, drugs, civil disobedience, capital punishment, the rights of the individual versus the rights of society.

300 EUST 300 Foundations of European Civilization (3:3:0). Up to 3 credits in seminars listed under EUST 300 may be credited toward the philosophy major.

301 History of Western Philosophy: Ancient (3:3:0). Selected figures and problems in philosophy from the pre-Socratics to the Stoics and Epicureans. May not be taken by students who have previously taken PHIL 231.

302 History of Western Philosophy: Medieval (3:3:0). Figures and problems of medieval philosophy: in-depth study of leading thinkers from the fifth to the fifteenth centuries. May not be taken by students who have previously taken PHIL 234.

303 History of Western Philosophy: Modern (3:3:0). Figures and problems of modern philosophy: in-depth study of such philosophers as Descartes, Locke, Berkeley, Hume, Kant, and Hegel. May not be taken by students who have previously taken PHIL 232.

305 Business Ethics (3:3:0). An examination of some of the moral problems that arise with regard to the responsibilities of various segments of the business community—employers, management, stockholders—to one another, to the consumer, and to society at large.

306 Criminal Justice Ethics (3:3:0). Prerequisite: 54 hours or permission of instructor. In-depth analysis of the ethical principles relevant for those working in criminal justice.

309 Medicine and Human Values (3:3:0). Examination of some of the major moral issues involved in the practice of medicine and arising from research in the life sciences. Topics include medical experimentation, eugenics, definition of death, euthanasia, abortion, distribution of scarce resources, transplants, organ donation, and psychiatric medicine. May not be taken by students who have previously taken PHIL 310.

311 Philosophy of Law (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Investigation of theories of natural law, legal positivism, and legal realism as they pertain to some of the central philosophical questions about law: What is the nature of law? What is a legal system? What is a valid law? What is a good reason for a judicial decision?

313 Philosophy of Religion (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Study of classical appeals to philosophy in support of belief in God's existence (Phil, Augustine, Anselm, Aquinas, Descartes); the fideism of Hume and the metaphysical agnosticism of Kant; the concept of religious experience in the philosophies of Hegel, Schleiermacher, and Kierkegaard; the problem of religious language contemporary empirical philosophy.

315 Philosophy of History (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Investigation of development of historical consciousness of humanity. Intended to distinguish the historical from the unhistorical attitudes of human consciousness and to investigate the various forms of historical consciousness by studying different interpretations of history.

325 Karl Marx's Social and Political Thought (3:3:0). Prerequisite: 3 credits in PHIL or permission of instructor. Study and evaluation of Marx's social and political ideas based on writings selected from several phases of his career. Examination of relation of Marx's thought to post-Marxian socialist theory and practice.

326 Contemporary Theories of Justice (3:3:0) Prerequisite: 9 hours of philosophy or permission of instructor. Examination of alternative theories of justice, focusing on recent work by a major libertarian philosopher and recent work by a major egalitarian philosopher. The central questions of the course are: What constitutes a just distribution of property? How is the right to individual freedom to be weighed against the right to receive basic human necessities?
331 Philosophy in the United States (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Selected studies of American philosophers of the nineteenth and early twentieth centuries, such as Emerson, Thoreau, Peirce, James, Royce, Santayana, Dewey, and Whitehead. Emphasis on their relation to American culture.

332 Twentieth-Century Analytic Philosophy (3:3:0). Prerequisite: 3 hours of logic and PHIL 303 or permission of instructor. Examination of the attempts of twentieth-century philosophers to solve philosophical problems by an analysis of language. Figures and movements covered include Russell, Moore, Wittgenstein, logical positivism, and ordinary language philosophy.

333 Feminism and Philosophy: Issues (3:3:0) Prerequisite: 3 hours in philosophy. Examination of philosophical issues raised by the women's movement. Among the topics included are abortion, pornography, affirmative action, comparable worth, women's moral development, women's spirituality.

334 Latin American Thought (3:3:0). Historical sources and present range of Latin American thought. Metaphysical, ethical, and aesthetic themes from colonial-period scholasticism to modern personal and national philosophies. Distinguished philosophers of recent times such as Korn and Romero (Argentina), Farias Brito (Brazil), Varona (Cuba), Caso and Vásconcelos (Mexico), Deusta (Peru), and Vaz Ferreira (Uruguay). Contemporary thought touching religious, social, and political topics.

335 Nineteenth Century Philosophy (3:3:0) Prerequisite: 3 hours in philosophy or permission of instructor. Development of German Romanticism and Idealism during a brilliant period in the history of the West rivaled only by ancient Greece. Kant, Fichte, Hegel, Kierkegaard, Schopenhauer, Nietzsche mount a revolt against the rationalism and scientism of the modern world. They open up a new philosophic horizon with the concept of the creative powers of the self, the intertwining of self and society, the subordination of truth to the will of the artist or the group, and madness as the terror of modernity.

336 Contemporary Continental Thought: Existentialism (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Examination of existential philosophy from its 19th-century origins to its 20th-century expressions. Philosophers studied include Kierkegaard, Nietzsche, Sartre, De Beauvoir, and Buber.

337 Twentieth-Century Continental Thought: Phenomenology (3:3:0). Prerequisite: 3 hours of philosophy and permission of instructor. Examination of the phenomenological way of doing philosophy, its findings in regard to the "life-world," questions of "first philosophy," and the subject matter of the social sciences, as well as critical difficulties in its development. Texts by Husserl, Heidegger, Merleau-Ponty, Sartre, Schutz, and Derrida.

350/EUST 350 Classicism and Romanticism (3:3:0). Up to 3 credits of listed European Studies seminars may be credited toward the major.

355 Contemporary Ethical Theory (3:3:0). Prerequisite: PHIL 151 or permission of instructor. Major trends and issues in recent moral philosophy.

356 Philosophy of Art (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Basic problems that arise from an inquiry into the meaning and value of art and our response to art.

357 (SOCI 599) Philosophy of the Social Sciences (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Philosophical issues relating to competing methodologies for the social sciences. Analysis and critique of mainstream positivism and behaviorism; paradigm theory and scientific revolutions; interpretive understanding and hermeneutical science; phenomenology and the social construction of reality; ethnmethodology and situational meaning; analytic philosophy and action theory; the "idea" of a social science; sociology of knowledge and theory of ideology; Western Marxism and critical theory.

371 Philosophy of Natural Sciences (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. One semester of logic recommended. Study of aims and methodology of science. Among the questions of concern are: What constitutes a good scientific explanation? What grounds are used for comparing rival theories? Is there a special method of scientific discovery?

372 Philosophical Methods (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Study of the relationship between a philosopher's method, doctrine, and concept of truth. Philosophers studied vary, but include representatives from among the Empirical, Analytical, Phenomenological, Hermeneutical, and Structuralist movements.

373 Theory of Knowledge (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Discussion of basic problems concerning the nature of knowledge, with study of the relation of knowledge to perception, belief, and language.

374 Philosophy of Mind (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Investigation of such theories as dualism, behaviorism, and materialism as they pertain to some of the central philosophical questions about mind: What is mind? What is the relation of mind to body? What is the justification of our belief in minds other than our own?

375 Metaphysics (3:3:0). Prerequisite: 3 hours of philosophy or permission of instructor. Study of basic problems concerning being in general and foundations of individual being; traditional treatments of such problems and criticism of the possibility of such knowledge. Selected readings from figures such as Plato, Aristotle, Aquinas, Spinoza, Leibniz, Kant, Bradley, Heidegger, and others.

376 Symbolic Logic (3:3:0). Prerequisite: PHIL 173 or MATH 110 or permission of instructor. Study of predicate calculi by means of a step-by-step construction of artificial languages. Topics include procedures for constructing a calculus, proof techniques, significant properties of predicate calculi, and procedures for recognizing phrases.

391, 392 Special Topics in Philosophy (3:3:0), (3:3:0). Examination of topics of current interest, such as death and dying, the rights of children, or philosophical controversies in modern physics.
Course Descriptions

421, 422, 423, 424 Seminar (3:3:0) for each. Limited to philosophy majors with 9 hours of philosophy, but others may be admitted if the topic is sufficiently close to their fields of study. Topics vary.

425, 426 Independent Study (3:0:0), (3:0:0). Prerequisite: Philosophy majors with 34 hours and 15 hours of philosophy and permission of department.

450/EUST 450 The Twentieth Century in Europe (3:3:0). Up to 3 credits of seminars listed under EUST 450 may be credited toward the major.

510 Seminar in the Ethics of Health Care (3:3:0). Prerequisite: 84 hours, graduate standing, or permission of instructor. An examination of moral dilemmas within the health care profession on ethical theories and principles. Special emphasis on patients' rights, social justice of health care, and evolving health care technologies.

512 Issues in Philosophy and Literature (4:3:0). Prerequisite: 84 hours, 6 hours of 300-level English and 6 hours of 300-level philosophy, or permission of instructor. Topics vary; possible topics include structuralism, technology, form and matter, conceptions of the future. The course is cross-listed and team taught.

520 Current Issues in the Philosophy of Science (3:3:0). Prerequisite: 12 hours of philosophy, including either PHIL 173 or 376; or 12 hours in a single natural scientific discipline; or permission of instructor. Advanced exploration of the current issues addressing the structure of scientific knowledge. The fundamental question is, What are the rational standards for acquiring knowledge of the physical world? This question is explored from rival philosophical perspectives: the logical-empiricist perspective of the Received View, represented by R. Carnap and C. Hempel; the problem-solving perspective of the historicists T. Kuhn and L. Laudan; the rationalism of W. Newton-Smith; and the antirealism of V. van Fraassen.

531 Freud and Philosophy (3:3:0). Prerequisite: 6 hours of philosophy or a course in personality theory or permission of instructor. Exploration of philosophical aspects of Freud's thought, focusing on Freud's philosophy of human nature and culture and its influence on contemporary thought.

550 Contemporary Theories of Justice (3:3:0) Prerequisite: 9 hours in philosophy or permission of instructor. Examination of alternative theories of justice, focusing on recent work by a major libertarian philosopher and recent work by a major egalitarian philosopher. The central questions of the course are What constitutes a just distribution of property? How is the right to individual freedom to be weighed against the right to receive basic human necessities?

555 Environmental Ethics (3:3:0). Prerequisite: 84 hours or graduate standing, and 3 credits in philosophy plus a combined total of 9 additional credits in philosophy and sciences, or permission of instructor. An examination of ethical principles affecting environmental issues with special emphasis on the problems encountered by environmental biologists.

574 Current Issues in Philosophy of Psychology (3:3:0). Prerequisite: Combined total of at least 12 credits in philosophy or psychology, at least 3 of which must be in philosophy and at least 3 of which must be at 300 level or above, or permission of instructor. A careful examination of some issue or issues of current interest to both philosophers and psychologists. Typical issues examined include the mind-body problem, philosophical and psychological implications of work in artificial intelligence, philosophical issues in psycholinguistics.

591 Special Topics in Philosophy (3:3:0). An examination of specific topics in philosophy that are both of central interest in that field and of interdisciplinary interest. Topics will be selected with special reference to the areas of technology, aesthetics, philosophy of religion, and ethics and social and political philosophy.

Physical Education (PHED)

Health, Sport, and Leisure Studies

Activity Courses

All 100- and 200-level activity courses are open to students with handicapping conditions; accommodations for these students are made on an individual basis. Students unable to participate in regular activity classes may be placed in an individualized class (PHED 170, 171, 172, 173) if so desired.

100 Foundations of Exercise and Fitness (1:1:0). Develop an understanding of cardiovascular health and fitness through a personal exercise program. Special emphasis is given to strength, endurance, and weight management as components of health and wellness through conditioning. This course is a prerequisite or corequisite to all physical education activity classes (101-299). Physical education majors enrolled in activity classes are not required to take PHED 100 as a prerequisite or corequisite.

101 Soccer and Volleyball (1:0:2). Basic skills, rules, and strategies of each sport.

103 Beginning Fencing (1:0:2). Basic skills, techniques, and rules of foil fencing.

104 Noncontact Lacrosse (1:0:2). Basic skills, rules and strategies.

105 Aerobics, Basic Conditioning (1:0:2). Develop skills for cardiovascular fitness and personal conditioning programs.

106 Beginning Gymnastics (1:0:2). Basic skills and techniques of gymnastics. Fall semester only.

107 Folk, Square, and Social Dance (1:0:2). Basic steps, sequences, and style of each dance form.

108 Weight Training and Body Conditioning (1:0:2). Principles and techniques of individualized progressive resistance exercise and cardiovascular fitness programs.

109 Beginning Ice Skating (1:0:2). Criteria for selecting equipment and fundamental skills such as skating forward and backward. Fee.

110 Beginning Swimming (1:0:2). Introduction open only to nonswimmers. Emphasis on becoming safe swimmers. Fee.

111 Basketball and Soccer (1:0:2). Basic skills, strategies, and rules of each sport.

116 Combative Sports, Games, Unarmed Combat and Wrestling (1:0:2). Development and skill in combative sports.

http://catalog.gmu.edu
121 Flag Football and Basketball (1:0:2). Basic skills, rules, and strategies for each sport.

124 Basketball and Softball (1:0:2). Basic skills, rules, and strategies for each sport.

131 Volleyball and Field Hockey (1:0:2). Basic skills, rules, and strategies for each sport.

133 Tennis for All (1:0:2). Basic ground strokes, volley, serve and smash, rules, strategies, and terminology.

140 Golf (1:0:2). Grip, stance, swing, rules, and etiquette. Fee.

148 Badminton and Bowling (1:0:2). Basic skills, rules, terminology, and strategies. Fee.

150 Intermediate Swimming (1:0:2). Increase proficiency, endurance and versatility in aquatics. Fee.

151 Beginning Tennis (1:0:2).* Basic skills, rules, terminology, and strategies for beginners.

152 Tennis for the Advanced Beginner (1:0:2).* Prerequisite: PHED 151 or equivalent experience and permission of instructor. Continuation of basic ground strokes, serve, volley, and smash; racket selection, rules, terminology, and strategies.

153 Intermediate Tennis (1:0:2).* Prerequisite: PHED 152 or equivalent experience and permission of instructor. Basic skills with the introduction of the chop, slice, half volley and lob; singles and doubles strategy.

154 Advanced Tennis (1:0:2).* Prerequisite: PHED 153 or equivalent skill level and permission of instructor. For experienced players to strengthen skills, strategies, and tactics.

*Students taking tennis classes are required to purchase a can of new balls and a United States Tennis Association Rule Book.

161 Archery and Golf (1:0:2). Basic skills, techniques, and rules of target archery and golf.

165 Racquetball (1:0:2). Fundamental skills, techniques, and strategies of playing singles and doubles racquetball.

170, 171, 172, 173 Individual Physical Education (2:0:3 for each). Prerequisite: Permission of instructor. Students unable to participate in the regular program of physical education may register for this course. Activities based on the physician’s recommendation.

200 Swimmers (1:0:2). Prerequisite: Ability to swim 50 meters of crawl or breast stroke and permission of instructor. Speed, endurance and perfection of strokes and diving. Fee.

207 Intermediate Folk, Square and Social Dance (1:0:2). Prerequisite: PHED 107 or permission of instructor. Advanced skills in square and social dance with new steps and styles to folk and social dances.

210 Advanced Life Saving (1:0:2). Meets certification requirements for Advanced Life Saving for the American Red Cross. Fee.

250 Water Safety Instructor (2:0:3). Meets the Water Safety Instructor requirements for the American Red Cross. Fee.

255 Basic Scuba Diving (2:0:3). (See PRLS 255.)

Major Courses: 300 and 400 level

300 Kinesiology (3:3:0). Prerequisite: BIOL 124, 125. Anatomical and mechanical study of human movement.

301 Physical Education in Elementary School (3:3:0). Prerequisite: Major in elementary school education. Planning experiences in physical education for children. Field experience (10 to 15 hours) in public schools required.

302 Gymnastics for Children and Youth (3:1:4). Prerequisite: PHED 106 or permission of instructor, and major in physical education. Fundamentals and progressions in teaching gymnastics, preschool through secondary school age, with 12 to 15 hours of field experience involving lab. Spring semester only.

303 Professional Dimensions of Physical Education (3:3:0). Introduction to the professional practice of physical education.

304 Sport, Culture, and Society (3:3:0). Prerequisite: PHED 303 or permission of instructor. Sport viewed from historical, political, economic, and cultural perspectives. Spring only.

305 Sports Officiating and Intramural Administration (3:2:3). Application of officiating techniques and organization of intramural programs.

306 Psychomotor Learning (3:3:0). Prerequisite: Permission of instructor. Learning theory, processes, and conditions as they affect movement. Field experience required. Spring only.

308 Developmental Physical Education (3:2:2). Prerequisite: BIOL 124, 125, and permission of instructor. Chronic and functional impairments as they affect physical education and exercise.

330 Prevention and Care of Athletic Injuries (3:3:0). Prerequisite: BIOL 124, 125, and permission of instructor. Preventive, rehabilitative, and medical management of athletic injuries. Fall semester only.

331 Advanced Techniques of Athletic Training (2:1:2). Prerequisite: PHED 330 and permission of instructor. Injury evaluation and treatment modalities in athletic training. Spring semester only.

365 Measurement and Evaluation in Physical Education (3:3:0). Prerequisite: Permission of instructor. Selection, administration, evaluation, and construction of measurement and evaluation instruments and techniques in physical education; statistical analysis of data and survey of selected instruments. Spring only.

371 Curricular Experiences in Secondary School Physical Education (3:3:0). Prerequisite: PHED 303 and permission of instructor. Analysis and application of instructional experiences and methods of teaching physical fitness activities, basic motor skills, and games and sports at the secondary school level. Field experience (15-20 hours) in public schools required. Fall only.

380 (311) Tennis (1:0:3). For physical education majors to improve basic skills and knowledge through in-depth study of skill progressions and drills for teaching. Includes skill analysis and peer group teaching. Fall semester only.

381 (311) Folk, Square, and Social Dance (1:0:3). For physical education majors to improve their basic skills and knowledge through in-depth study of skill progressions and drills for teaching. Includes skill analysis and peer group teaching. Fall semester only.
382 (312) Flag Football (1:0:3). For physical education majors to improve their skills and knowledge through in-depth study of skill progressions and drills for teaching. Includes skill analysis and peer group teaching. Fall semester only.

383 (312) Volleyball (1:0:3). For physical education majors to improve their skills and knowledge through in-depth study of basic skill progressions and drills for teaching. Includes skill analysis and peer group teaching. Fall semester only.

384 (315) Archery and Badminton (1:0:3). For physical education majors to improve their skills and knowledge through in-depth study of basic skill progressions and drills for teaching. Includes skill analysis and peer group teaching. Fall semester only.

385 (315) Golf (1:0:3). For physical education majors to improve their skills and knowledge through in-depth study of basic skill progressions and drills for teaching. Includes skill analysis and peer group teaching. Fall semester only.

386 (317) Weight Training and Body Conditioning (1:0:3). For physical education majors to improve their skills and knowledge through in-depth study of basic skill progressions and drills for teaching. Includes skill analysis and peer group teaching. Spring semester only.

387 (317) Track and Field (1:0:3). For physical education majors to improve their skills and knowledge through in-depth study of basic skill progressions and drills for teaching. Includes skill analysis and peer group teaching. Spring semester only.

388 (318) Basketball (1:0:3). For physical education majors to improve their skills and knowledge through in-depth study of skill progressions and skills for teaching. Includes skill analysis and peer group teaching. Spring semester only.

389 (318) Soccer (1:0:3). For physical education majors to improve their skills and knowledge through in-depth study of skill progressions and drills for teaching. Includes skill analysis and peer group teaching. Spring semester only.

Students in teacher certification programs must apply to and be accepted in the teacher education program before registering for PHED 400-level courses.

403 Curricular Experiences in Elementary School Physical Education (3:3:0). Prerequisite: PHED 303 and permission of instructor. Curricular experiences and methods for elementary school physical education; requires 12 to 15 hours of field experience. Fall only.

410 Psychology of Sport and Coaching (3:3:0). Research, trends, and techniques of coaching.

415 Student Teaching in Physical Education (15:0:0). Prerequisite: Completion of all courses in the approved program; admission to and good standing in the teacher education program; acceptance in student teaching. Supervised clinical experience of a full semester in approved Virginia schools. Required experiences in elementary (seven weeks) and secondary (seven weeks) school settings. Includes participation of one week in school preservice workshops and related activities (fall) or one week special simulated workshop (spring), and weekly seminar sessions.

420, 421 Coaching of Sports (2:1:3), (2:1:3). Prerequisite: Permission of instructor. Sports usually coached at the secondary level with each activity scheduled on a semester basis and conducted independently for 2 credit hours. Principles and fundamentals of offensive and defensive play strategy, team and staff organization, and materials for coaching.

441 Practicum in Athletic Training (1:3:0:0). Prerequisite: PHED 330 and permission of instructor. Application of techniques and procedures in the care and prevention of athletic injuries in a selected environment under certified instructor supervision. Involves at least 100 hours of participation for each credit hour in athletic training.

442 Practicum in Physical Education (1:3:0:0). Prerequisite: 84 hours or 54 hours and permission of instructor. Supervised professional practice in a selected area of interest. Student may repeat this course but no more than 3 credit hours may be given. Each credit hour requires a minimum of 60 hours of participation in the specialty over a period of six weeks. Areas selected with faculty adviser approval.

450 Physiology of Exercise (3:3:0). Prerequisite: BIOL 124 and 125 and PHED 300. Human physiological response to environmental changes and exercise.

460 Management and Organization in Physical Education (3:3:0). Prerequisite: PHED 303 and permission of instructor. Management, administration, and evaluation of elementary and secondary school physical education programs. Includes physical education instructional programs, intramural programs, and interscholastic sports. Field experience required. Fall only.

490 Internship in Physical Education with Selected Specialization (15:0:0). Directed internship in a physical fitness or sports program in cooperation with a community agency, business, or industrial organization. Requires weekly seminar.

499 Independent Study in Physical Education (1-3:0:0). Prerequisite: 48 hours or permission of instructor. Study of a problem area in physical education research, theory, or practice under the direction of faculty. May be repeated, but no more than 3 hours total credit may be given.

Graduate courses on the 500-level are open to undergraduate students with permission.

500 Workshop in Physical Education (1, 2, 3:0:0). Prerequisite: Graduate standing or permission of instructor. Concentrated full-time workshops, weekend seminars, and workshops dealing with selected topics in physical education and ancillary fields. May be repeated. No more than 6 semester hours may be applied for degree credit.

506 Seminar in Special Physical Education (3:3:0). Prerequisite: Graduate standing or permission of instructor. Discussion of current problems, issues, and research in special physical education. Practica may be included.

599 Independent Study in Physical Education (1-3:0:0). Prerequisite: Graduate standing or permission of instructor. Study of a problem area in physical education research, theory, or practice under the direction of faculty. May be repeated, but no more than 3 hours total credit may be given.
Physics (PHYS)

Physics

100 Physics for Liberal Arts Majors (3:3:3). A study of the basic ideas of classical and modern physics and their applications in the context of contemporary social, economic, and political realities.

103, 104 Principles and Development of Modern Physics (4:3:3), (4:3:3). PHYS 103 prerequisite to PHYS 104. For nonscience majors. Topics include mechanics, relativity, cosmology, atomic physics, electricity and magnetism, nuclear physics, and elementary particles. Emphasis on historical, philosophical, and social aspects of modern physics.

106, 107 Physics for the Life Sciences (3:3:0) (3:3:0). Prerequisite: One year of college mathematics. Topics include mechanics, properties of fluids and gases, sound, heat, electricity, light, the atom, the nucleus, and radiation. Basic principles of physics emphasizing applications to biological sciences.

111 Frontiers of Physics (1:1:0). Overview of subfields of physics, their interrelation, and the relationship of physics to other disciplines. Discussion of current research topics in physics; career opportunities.

141 Elementary Physics (3:3:0). One-semester course for nonscience majors covering the basic concepts of classical and modern physics. PHYS 142 is an optional one-credit lab for this course.

142 Elementary Physics Lab (1:0:1). Corequisite: PHYS 141. Laboratory for PHYS 141.

201 Energy and Environment (3:3:0). Basic ideas of science and technology with emphasis on their interaction with our contemporary culture. Designed for science and nonscience majors with interests in current concerns of energy and environment. Origin, forms, uses, and distribution of energy and resulting environmental effects. Students who have taken PHYS 201 under the old title may not enroll for this course. May not be included for credit by physics majors within the 44 hours of physics courses required for B.S. degree or within the 31 hours of physics courses required for the B.A. degree.

225 Problems in Physics I (1-3:0:0). Prerequisite: 24 hours and 3.00 GPA in physics and mathematics. Individual study of physics problems of current interest. May be taken 3 times.

300/GOVT 300 Nuclear Weapons Technology and Politics (3:3:0). Prerequisite: 54 hours or permission of instructor. A study of the history and development of nuclear weapons and nuclear strategy, the physical basis of nuclear weapons and their biological and physical effects, the effects of a nuclear war and the possible effectiveness of civil defense, the possibility of limited and winnable nuclear wars, arms control, nuclear proliferation, and public opinion on nuclear issues. This course may not count toward the physics major requirement.

303 Classical Mechanics (3:3:0). Prerequisite: PHYS 352, 353 and MATH 304. Motion of a particle in one, two, and three dimensions; systems of particles; non-inertial coordinate systems; equations of Lagrange and Hamilton.

306 Wave Motion and Electromagnetic Radiation (3:3:0). Prerequisite: PHYS 305. Vibrating string, plane waves, interference, diffraction, polarization, electromagnetic waves, dispersion, and relativity.

307 Thermal Physics (3:3:0). Prerequisite: PHYS 352, 361, or permission of instructor. Classical concepts of energy and temperature, basic definitions, first and second laws of thermodynamics, properties of pure substances, equations of state, introduction to classical and quantum statistics and their application to physical systems.

311, 312 Mathematical Methods in Physics and Engineering (3:3:0), (3:3:0). Prerequisite: PHYS 352 and MATH 304 or 306; PHYS 311 or MATH 313 is prerequisite for PHYS 312. Math techniques as applied in physics and engineering. Ordinary and partial differential equations, special functions, Fourier series, Laplace transforms, integral equations, matrices, and complex variables.

315 Physics of Musical Sounds (3:3:0). Prerequisite: MUSI 101 or 115 or permission of instructor. Physics of music. Topics include simple harmonic motion, vibration, temperament, the ear, architectural acoustics, sound recording and reproduction. May not be included for credit by physics majors within the 44 hours of physics courses required for B.S., or within the 31 hours of physics courses required for B.A.

316 Sound and Light in the Arts (3:3:0). Nature of light, color and sound, mechanisms of vision and hearing, color addition; synthesis of musical sounds, computer-generated music and art; lasers; holography and fiber optics; recording and reproduction of sound and light. May not be included for credit by physics majors within the 44 hours of physics courses required for B.S., or within the 31 hours of physics courses required for B.A. Frequent demonstrations.

326 Problems in Physics II (1:0:0). Prerequisite: 54 hours and 2.50 GPA in physics and mathematical science. Individual study of physics problems of current interest. May be taken three times.

343-345 College Physics (3:3:0)-(3:3:0). (One hour recitation) Prerequisite: 54 hours or one year of college-level science and one semester of college-level mathematics, or permission of instructor. (See Note 2b) under Course Numbering at the beginning of Course Descriptions.) Two-semester basic physics course with emphasis on topics of classical and modern physics of particular importance to science majors. The principles of mechan-
ics, heat, electricity, magnetism, optics, atomic and nuclear physics.

344-346 College Physics Lab (1:0:1)-(1:0:1).
Corequisite: 343 (for 344) and 345 (for 346). (See Note 2(b) under Course Numbering at the beginning of Course Descriptions.) Laboratory portion of two-semester basic physics course.

350 University Physics II (3:3:0). (One hour recitation) Prerequisite: PHYS 250; corequisite: MATH 213 and PHYS 351. Waves, thermal physics, and electricity.

351 University Physics II Laboratory (2:0:3).

353 University Physics III Laboratory (2:0:3).
Corequisite: MATH 304 and PHYS 352. Experiments in optics and modern physics.

355 Computer Methods in Physics and Engineering (3:3:0). Prerequisite: MATH 304 and PHYS 352 or 342 and knowledge of FORTRAN. A study of algorithms used to solve problems in physics and engineering and their computer implementation, data handling and data processing techniques in physics and engineering.

361 Modern Physics with Applications (3:3:0). Prerequisite: MATH 304 and PHYS 352 or PHYS 342 and permission of instructor. Study of modern physics with emphasis on applications for scientists and engineers. Topics include modern optics, lasers, binding and energy bands in solids, electrical, thermal and magnetic properties of solids, semiconductors, radioactivity, nuclear reactions, radiation detectors, and applications of nuclear physics to other sciences.

402 Introduction to Quantum Mechanics and Atomic Physics (3:3:0). Prerequisite: PHYS 303 and 361, or permission of instructor. Experimental basis of quantum mechanics; the wave function; systems in one, two, and three dimensions.

407 Senior Laboratory in Modern Physics (3:0:9). Prerequisite: 84 hours. Experiments in modern physics involving advanced techniques in electronics, optics, nuclear physics, and solid state. Typical experiments: the Frank Hertz Experiment, Hall Effect, electron paramagnetic resonance, Mossbauer Effect.

408 Senior Research (2:3:0:0). Prerequisite: 84 hours. The student works under the guidance of a faculty member on a research project in experimental or theoretical physics.

416 Special Topics in Modern Physics (1:2:0). Prerequisite: 84 hours. Topics of major current interest in modern physics with emphasis on the breadth of physical understanding needed to approach many of today's problems. Seminar every other week.

417/GEOL 417 Geophysics (3:3:0). Prerequisite: GEOL 101, 102, 201, 301; MATH 113, 114; and PHYS 250. Corequisite: MATH 213; PHYS 350, 351. Seismological and gravitational theory and application to an understanding of the earth's interior. The geology requirement may be waived for physics and engineering students with sufficient background.

428/ASTR 428 Relativity and Cosmology (3:3:0). Prerequisite: PHYS 352, MATH 214 or 216; and PHYS 303, 305 or permission of instructor. Special relativity, four-dimensional space-time, general relativity, non-Euclidean geometries, geodesic and field equations, tests of general theory of relativity, black holes, cosmology, models of the universe, remnant blackbody radiation, big bang cosmology, thermodynamics and the universe.

500 Physics for High School Teachers (3:3:0). Prerequisite: certification as a secondary school physics instructor or permission of department. Techniques of teaching high school physics. Introduction to modern physics with emphasis on concepts rather than mathematical formalism. Recent developments in physics.

501 Physics Laboratory Techniques for High School Teachers (3:3:0). Prerequisite: Graduate standing. Theory and performance of experiments applicable to high school teaching with practical sessions on use of lab apparatus and computer. Recommended for high school teachers of physics.

502/PHYS 402 Introduction to Quantum Mechanics and Atomic Physics (3:3:0). Prerequisite: PHYS 303 or permission of instructor. Experimental basis of quantum mechanics; the wave function; systems in two, three, and four dimensions.

510 Mechanics of Continuous Media (3:3:0). Prerequisite: PHYS 303 and 305. Study of continuous media. Includes physical perspective, mathematical formulation and solution of problems in ideal fluids, viscous fluids, waves in fluid media, turbulence, thermal convection, stability considerations, elastic deformations, stress-strain tensor and body waves in elastic media.

512 Solid State Physics and Applications (3:3:0). Prerequisite: PHYS 402 or 502. Crystal structures, binding, lattice vibrations, the free electron model, metals, semiconductors and semiconductor devices, superconductivity, magnetism.

513 Applied Electromagnetic Theory (3:3:0). Prerequisite: PHYS 305, 306, MATH 313, 314 or equivalent. Classical electromagnetic theory with applications. Topics include electrostatics, magnetic fields and materials, electromagnetic wave propagation, wave guides, transmission lines, radiation and antennas.

520 The Physics of Energy and Environmental Technology (3:3:0). Prerequisite: B.A. or B.S. degree in natural science or mathematics or permission of instructor. Contemporary problems of energy and the environment with emphasis on the underlying principles of physics within the constraints of engineering and economics. Intended for those pursuing careers in energy research and development, business administration, economics, ecology, and high school science instruction.

530 Astrophysics (3:3:0). Prerequisite: PHYS 342 or 351 and MATH 113 or 115. Topics include physical con-
cepts, magnitudes of stars, Hertzsprung-Russell diagram, stellar radiation, interstellar matter, dust, molecules, and other topics.

531 Relativity and Cosmology (3:3:0). Prerequisite: PHYS 352; MATH 214 or 216, and PHYS 303, 305, or permission of instructor. Special relativity, 4-dimensional space-time, general relativity, non-Euclidian geometries, geodesic and field equations, tests of general theory of relativity, black holes, cosmology, models of the universe, remnant blackbody radiation, big bang cosmology, thermodynamics and the universe.

540 Nuclear and Particle Physics (3:3:0). Prerequisite: PHYS 502. Accelerators, detectors and related electronics; nuclear and elementary particle structure; symmetries and conservation laws; the electromagnetic, weak, and hadronic interactions; nuclear models; the quark model; nuclear science and technology.

590 Selected Topics in Physics (3:3:0). Prerequisite: Graduate standing or permission of instructor. Selected topics from recent theoretical developments and applications. Satisfies the needs of the professional community to keep abreast of current developments.

Plan for Alternative General Education: See PAGE

Portuguese (PORT)

Foreign Languages and Literatures
Placement: See Admission Procedures.

101, 102 Elementary Portuguese (3:3:1), (3:3:1). Introduction to Portuguese, including basic grammar, aural training, the development of oral skills and reading proficiency. Introduction to the life and culture of Portuguese-speaking countries through selected readings and through programs in the language lab. Must be taken in sequence.

201, 202 Intermediate Portuguese (3:3:1). Prerequisite: PORT 101, 102 or equivalent. Intensive review of basic grammar; introduction to more difficult grammatical constructions and patterns of usage; continued development of reading proficiency and of aural and oral skills; continued study of the life and culture of Portuguese-speaking countries.

Psychology (PSYC)

Psychology

100 Basic Concepts in Psychology (3:3:0). Prerequisite to all other courses in psychology. Introduction to psychology as a scientific discipline. Includes an examination of concepts and methods in learning, motivation, development, personality, and measurement.

211 Developmental Psychology (3:3:0). Prerequisite: PSYC 100 or permission of instructor. Review of major developmental theories include perspectives of childhood, adolescence, adulthood, and old age.

220 Personality Theory (3:3:0). Prerequisite: PSYC 100 or permission of instructor. Introduction to classical and contemporary theories of personality and a comparative evaluation of major theories in terms of relevant research studies.

230 Industrial and Organizational Psychology (3:3:0). Prerequisite: PSYC 100 or permission of instructor. Examination of application of psychological principles and methods to problems commonly encountered in business and industry.

231 Social Psychology (3:3:0). Prerequisite: PSYC 100 or permission of instructor. Study of human behavior development in a social matrix, including such topics as socialization, cultural behavior, group norms, and attitude formation.

300 Analysis and Interpretation of Psychological Data (4:3:2). Prerequisite: 6 hours of psychology including PSYC 100 (grade of C or better) or permission of instructor. Descriptive and inferential statistics in design, analysis, and interpretation of psychological research with practical application using computers in laboratory.

304 Principles of Learning (4:3:2). Prerequisite: PSYC 300 (grade of C or better) or permission of instructor. Experimental methodology within the context of the basic principles of animal learning, including such topics as classical and instrumental conditioning and discrimination learning.

305 Memory and Cognition (4:3:2). Prerequisite: PSYC 300 (grade of C or better) or permission of instructor. Experimental methodology within the context of discrimination, concept formation, verbal learning, psycholinguistics, and memory.

309 Sensation, Perception, and Information Processing (4:3:2). Prerequisite: PSYC 300 (grade of C or better) or permission of instructor. Experimental methodology within the context of perceptual psychology, including such topics as psychophysics, perceptual organization, and constancies.

313 Child Psychology (3:3:0). Prerequisite: 6 hours of psychology including PSYC 100, or permission of instructor. Study of human psychological development from conception to adolescence including such topics as genetic factors, emotional and intellectual growth, and environmental influences.

314 Adolescent Psychology (3:3:0). Prerequisite: 6 hours of psychology including PSYC 100, or permission of instructor. Study of the biological and cultural changes accompanying adolescence, including the effect of these changes on emotional, intellectual, and social development.
320 Psychological Tests and Measurements (4:3:2). Prerequisite: PSYC 300 or permission of instructor. Examination and application of principles underlying the theory, interpretation, and administration of psychological tests; including a study of tests of intelligence, achievement, and ability.

321 Counseling Psychology (3:3:0). Prerequisite: PSYC 325 or permission of instructor. Review of the theories and methods in psychological counseling.

322 Behavior Modification (3:3:0). Prerequisite: PSYC 220 or permission of instructor. Examination of experimental principles of human and animal learning within the theoretical framework of applied behavior analysis, including the design, implementation, and evaluation of operant intervention programs across a wide variety of human situations.

323 Clinical and Social Psychology Research Techniques (4:3:2). Prerequisite: PSYC 300 or permission of instructor. Review and application of some research techniques including interviewing, survey analysis, and process analysis.

325 Abnormal Psychology (3:3:0). Prerequisite: PSYC 100 or permission of instructor. Study of development of abnormal behavior patterns, including such topics as methods of diagnosis and prevention of serious mental disorders such as psychosomatic disorders, psychoses, character disorders, and mental retardation.

326 Therapeutic Communication Skills (3:3:0). Prerequisite: PSYC 325 or permission of instructor. Introduction to understanding and use of basic therapeutic communication skills used in clinical and counseling psychology.

330 Psychology of Adjustment (3:3:0). Prerequisite: PSYC 100 or SOCI 101 or NURS 250 or EDUC 200 or equivalent. Nature of effective and faulty patterns of adjustment. Factors in healthy and unhealthy personality development, unique motivation patterns of individuals, and influence of personally significant groups on adjustment. Resources for personal growth and application of contemporary psychological principles to achievement of increased intellectual, emotional, and social competence.

360 Theories and Systems of Psychology (3:3:0). Prerequisite: 9 hours of psychology or permission of instructor. Review of systems and theories that have played a role in contemporary psychology, including association theory, structuralism, behaviorism, functionalism, Gestalt psychology, and psychoanalysis.

362 Psychology of Women (3:3:0). Prerequisite: PSYC 100, BIOL 103, 104, or equivalent, or permission of instructor. Behavior and attitudes of women; influence of sex chromosomes and sex hormones on behavior; influence of culture on sex role differentiation; theories of sex role development.

365 History of Psychology (3:3:0). Prerequisite: 9 hours of psychology or permission of instructor. Survey of human attempts to understand human nature systematically from the classical age to the present, including various models of man.

373 Physiological Psychology Laboratory (1:0:1). Prerequisite: BIOL 103-104, or equivalent, or permission of instructor. Students are advised to take PSYC 300 and 372 before or concurrently with 373. Psychology majors are advised not to take PSYC 372 concurrently. Functional anatomy and physiology of the brain, including dissection of brain and eye, demonstration and practice in techniques of studying brain mechanisms of behavior.

410 Motivation and Emotion (3:3:0). Prerequisite: PSYC 100, BIOL 103, 104, or permission of instructor. Study of the concepts and principles that determine human and animal motivation, including such topics as instincts and drives.

411 Comparative Psychology (3:3:0). Prerequisite: PSYC 100, BIOL 103, 104, or permission of instructor. Study of behavior through the phylogenetic continuum, including such topics as species-specific behavior, early experience, and learning.

414 Behavior Disorders of Childhood (3:3:0). Prerequisite: Review of systems and theories that have played a role in contemporary psychology, including association theory, structuralism, behaviorism, functionalism, Gestalt psychology, and psychoanalysis.

416 Seminar in Developmental Psychology (3:3:0). Prerequisite: 6 hours of developmental psychology or permission of instructor. Rotation of topics (e.g., Cognitive and Perceptual Development, Personality and Social Development) to be announced in advance. May be repeated once for credit.

421, 422 Undergraduate Practicum in Psychology (3:3:0), (3:3:0). Prerequisite: PSYC 325 and 526 and permission of Clinical Review Committee. Supervised experience in application of psychological principles requiring work in a nonclassroom setting.

423 Group Psychotherapy Techniques (3:3:0). Prerequisite: PSYC 220 or permission of instructor. Review of theory and methods of group therapy with emphasis on humanistic and interpersonal approaches, including applications to family therapy, alcoholism, and drug abuse.

425 Seminar in Abnormal Psychology (3:3:0). Prerequisite: PSYC 325 or permission of instructor. Selected topics include stigma, specific forms of psychopathology, psychosocial issues, or deinstitutionalization.

435 Personnel Training and Development: A Psychological Perspective (3:3:0). Prerequisite: PSYC 230; prerequisite or corequisite: PSYC 320; or permission of instructor. An overview and critique of training methods currently used in industry from the viewpoint of psychological principles, including applications to on-the-job training, supervisory/leadership skills training, computer-assisted instruction, and programmed texts. Principles of needs analysis, program development, and program evaluation are discussed within the framework of industrial psychology.
460 Independent Study in Psychology (1-3:0:0). Prerequisite: Required experimental course, a 2.50 GPA in psychology, and a written proposal approved before registration by instructor and the department chair. Investigation of a psychological problem according to individual interest with stress on research methods. By permission of chair, a student may take a second semester for a maximum of 6 hours of credit. Students meet once a week to discuss their study.

461, 462 Special Topics (3:3:0), (3:3:0). Prerequisite: Permission of instructor. Selected topics reflecting interest in specialized areas. Announced in advance.

499 Senior Thesis (3:3:0). Prerequisite: Psychology major with 84 hours, an experimental psychology lab course, 3.00 GPA in psychology, PSYC 460, permission of instructor, and prior approval of thesis proposal. Directed research on a topic agreed on by student and adviser. The student should take PSYC 460 with the same adviser to develop a thesis proposal before registering for PSYC 499. The student must complete a thesis and defend it orally before the adviser and two faculty members. With permission of department, students may take a second semester for a maximum of 6 hours credit.

506 Theories of Personality (3:3:0). Prerequisite: PSYC 220. Comparative review of prevalent theories of personality with special emphasis on their fundamental models and their similarities and differences.

508 Theories of Development (3:3:0). Prerequisite: PSYC 313 or 211. Major theories of infant and child development including works of Piaget, Freud, Erikson, and Spitz.

513 Infant Development (3:3:0). Prerequisite: PSYC 313 or permission of instructor. Examination of current issues, research methods, and clinical evaluation techniques in the field of infant development.

530 Human Factors Engineering (3:3:0). Prerequisite: PSYC 230 or an experimental lab course or permission of instructor. Investigation of complex man-machine interactions found in industry today. Extensive empirical research findings are examined.

533 Seminar in Industrial/Organizational Psychology (3:3:0). Prerequisite: PSYC 230 or PSYC 636 or permission of instructor. Rotating topics (e.g., leadership theories and management development, performance appraisal) to be announced in advance. May be repeated for credit.

536 Psychology of Work Motivation (3:3:0). Prerequisite: PSYC 230 or permission of instructor. Examination of the psychological literature of (1) the need, cognitive, and reinforcement theories of motivation; (2) organizational attachment (commitment, absenteeism, and turnover); (3) job design and quality of work issues. Methodological and psychometric issues in the interpretation and evaluation of work motivation research are emphasized.

541 Survey Research (3:3:0). Prerequisite: PSYC 300 or SOCI 221 or equivalent. Introduction to theory, method, and practice of survey research; students complete a survey research project.

553 Quantitative Methods I: Advanced Statistics (4:3:2). Prerequisite: Passing grade on screening test given the first evening of class. Topics in introductory psychological statistics from an advanced perspective. Additional topics are included. Lab provides introduction to use of computer packages in data handling and analysis. Required for degree students. Requirement may be satisfied by demonstrating competence on an independent examination.

557 Psychometric Methods (3:3:0). Prerequisite: PSYC 553 or permission of instructor. Examination of the concepts of psychological measurement with emphasis on predictor test and criterion development. Discussion of reliability, validity, and specialized techniques used to develop tests of ability, interest, and personality.

559 Drugs, Hormones, and Behavior (3:3:0). Prerequisite: PSYC 372 or equivalent or permission of instructor. Overview of the chemistry of behavior, including neurotransmitters, mechanisms of action of therapeutic drugs such as antidepressants, actions of hallucinogens and other psychoactive drugs, chemical theories of memory, and effects of hormones on behavior.

560 Advanced Applied Social Psychology (3:3:0). Prerequisite: PSYC 231. Study of major trends in social psychological research with emphasis on the ethical and practical problems posed by human experimentation. Topics include attitude measurement, attitude change, conformity, social perception, and small group interaction.

565 Cognitive and Perceptual Development (3:3:0). Prerequisite: 6 hours of child psychology and a course in experimental psychology. Experimental study of child development. Topics include biogenetic factors in development, sensory processes, learning, perception, motivation, language, and cognitive development.

581/ENGL 581 Survey of Psycholinguistics (3:3:0). Prerequisite: ENGL 391 or PSYC 305 or permission of instructor. Study of the psychological basis of human language acquisition and competence, including research on aphasia, association, autism, second language learning, grammatical transformations, and the psychological reality of transformational rules.

592 Special Topics (3:3:0). Prerequisite: Permission of instructor. Special topics reflecting interest in specialized areas.

Public Administration (PUAD)

Public Affairs

502 Theory and Practice of Public Administration (3:3:0). Prerequisite: Graduate standing or permission of department. Survey and review of the field of public administration, including development of U.S. governmental administration, theories of administrative organization and behavior, administrative processes, management of people and money, administrative responsibility, and the nexus of public policy making and implementation.

Religious Studies (RELI)

Philosophy and Religious Studies

Areas of study may be identified by the second digit of the course numbers as follows:

1-History of Religions
2-Religion and Culture
3-Religious Literature
4-Religious Thought

100 The Human Religious Experience (3:3:0). Examination of the primary forms of expression that belong to religion, and of the nature and functions of religion. Topics to be considered may include the idea of ultimate reality; religious interpretations of nature; the person and the need for salvation; symbol, parable, and myth; magic and ritual; functions of religion in society; mystical experience. Efforts are made through considerations of more specific topics such as these, to address the general question of the nature of religion and to consider modern as well as classical interpretations of religious ideas. This course may not be taken by students who have taken RELI 132.

213 Hindu Religion and Philosophy (3:3:0). Hindu religious and philosophical developments from origins through formative periods.

231 Religion in America (3:3:0). Religious heritage in American culture; growth of denominations and sects; interrelationship of religion and socio-political life.

237 Religious Dimensions of Contemporary Dramatic Literature (3:3:0). Contemporary religious thinking through study of selected modern plays of the Western stage. Focuses on such themes as the self, human finitude, loneliness and alienation, love and redemption, personal guilt and social responsibility, suffering and death.

271 Contemporary Religious Ethics (3:3:0). Prerequisite: 24 hours or permission of instructor. Philosophical examination of major theoretical and practical issues in contemporary Judeo-Christian morality.

300 Approaches to the Study of Religion (3:3:0). Prerequisite: 3 credits in philosophy, 3 credits in religious studies, or permission of instructor. Methods used in study of religious phenomena. Diverse assumptions of different perspectives and how they affect the understanding of religious phenomena. Illustrative readings from a variety of perspectives are critically evaluated, including the anthropological, historical, linguistic, literary, philosophical, psychological, and sociological approaches.

314 Chinese Philosophies and Religious Traditions (3:3:0). Prerequisite: RELI 212 or permission of instructor. A survey of major religious traditions and philosophical themes of China including Confucianism, Taoism, and Chinese Buddhism and Neo-Confucianism. The course examines the foundation of the Chinese world view and spirituality by investigating the diverse religious traditions that have created tensions and harmony among them.

315 The Buddhist Tradition (3:3:0). Prerequisite: RELI 212 or permission of instructor. A survey of the Buddhist religious traditions. The main thrust of the course includes, but is not limited to, the historical development of Buddhism in India, China, and Japan, examining both Theravada and Mahayana traditions; philosophical and religious significance of Buddhism; social and political implications of the Buddhist traditions in the South Asian and East Asian countries.

331 Civil Religion in America: The Americanization of God (3:3:0). Prerequisite: RELI 231 or permission of instructor. Development of American political religion, or religious nationalism/Americanism; the concept of America as a New Israel; the myths, rituals, symbols, and liturgical calendar of the nation.

332 American Religion in Social Thought and Action (3:3:0). Prerequisite: RELI 231 or permission of instructor. Churches' involvement in social thought and action during the nineteenth and twentieth centuries.

333 Contemporary Religion in America: Diversity and Dissent (3:3:0). Prerequisite: RELI 231 or permission of instructor. Nature of consensus and dissent.

337 Mysticism: East and West (3:3:0). Prerequisite: 3 hours in religious studies or permission of instructor. A comparative treatment of major expressions of mysticism in East and West through exploration of various ways of understanding mystical experience. Readings and discussion emphasize one or more of the Eastern (Hinduism, Buddhism, Taoism, Zen) and Western traditions (Judaism, Christianity, Islam).

351 Nationalism and Universalism in the Quest for Jewish Identity (3:3:0). Prerequisite: 3 hours in RELI 211 or 251 or ANTH 207 or HIST 281, 282, or permission of instructor. Examination of the tension inherent in Israel's concept of herself as a chosen and covenanted people with a call to universal mission. Study focuses on the recurrence and attempted resolution of this tension, Zion and the issue of exclusivity versus universalism in Judaism in Biblical and modern times.

352 Judaism Between the Old and New Testaments (3:3:0). Prerequisite: 3 hours of RELI 251 or 252 or permission of instructor. A survey of Jewish religion, culture, and history in the period between the Old and New Testaments. Developments in Intertestamental Judaism crucial to the formation of later Judaism and Christianity will be examined.

370 Judaism: Life and Thought (3:3:0). Prerequisite: RELI 211 or RELI 251 or permission of instructor. A study of Judaism from Biblical times to contemporary American developments, with a focus on medieval and modern Judaic life and thought.

371 History of Western Christian Thought I: Classical and Medieval (3:3:0). Prerequisite: 3 credits in RELI or PHIL or permission of instructor. Development of Christian doctrine from the close of the New Testament period to the Reformation. Relationship between Greek, Roman, and Medieval philosophy and the theological expressions of belief.

372 History of Western Christian Thought II: Modern (3:3:0). Prerequisite: 3 credits in religious studies or philosophy or permission of instructor. Development of
Christian doctrine from Reformation to present. Effects of scientific empiricism, existentialism, and linguistic analysis on Protestant and Catholic theology.

373 Contemporary Issues in Religious Thought (3:3:0). Prerequisite: Junior standing or permission of instructor. Selected issues in contemporary religious thought, especially with reference to ways in which those issues are defined and treated in the light of unique demands made upon religion by modernity. Issues may include current redefinitions of the idea of God; symbol, myth, and interpretation; the impact of Eastern thought on Western religious experience; contemporary problems in religious ethics; secularization; role of religious institutions in modern society; religion, society, and technology.

374 Islamic Thought (3:3:0). Prerequisite: RELI 211; 54 hours or permission of instructor. Major components of Islamic thought and its role in regulating the various aspects of social life in the Muslim World. Emphasis on religious foundation of Islamic society and culture.

376, 377 Special Topics in Religious Thought (3:3:0), (3:3:0). Prerequisite: 3 hours in philosophy or religion or permission of instructor. Selected topics from a philosophical perspective.

490 Comparative Study of Religions (3:3:0). Prerequisite: 9 credits in religious studies including RELI 211 and 212, or permission of instructor. Cross-cultural examination of the comparative aspects of religious phenomena. Examines the significance of religious phenomena from diverse religious and cultural perspectives, and investigates patterns of religious phenomena that have appeared in world cultures and civilizations.

591 Current Issues in Religious Studies (3:3:0). Special topics in religious studies that are of central interest in that field and of interdisciplinary interest as well. Topics are selected with special reference to their current importance in the field of religious studies and their pertinence to discussions of the role of religion in contemporary social, cultural, and political life.

**Russian (RUSS)**

**Foreign Languages and Literatures**

Placement: See Admission Procedures.

101 Elementary Russian I (3:3:1). Designed for students with no knowledge of Russian. Introduction to Russian, including elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Lab work required.

102 Elementary Russian II (3:3:1). Prerequisite: RUSS 101 or permission of department. Continuation of RUSS 101. Lab work required.

109 Intensive Elementary Russian (6:6:2). Equivalent to RUSS 101 and 102 taught in a single semester. Recommended for students who desire an intensive introduction to Russian. May not be taken for credit in combination with RUSS 101 and 102. Lab work required.

201 Intermediate Russian I (3:3:1). Prerequisite: RUSS 102 or 109, or appropriate placement score, or permission of department. Further development of skills in listening, speaking, reading, and writing. RUSS 201 and 202 must be taken in sequence. Lab work required.

202 Intermediate Russian II (3:3:1). Prerequisite: RUSS 201 or appropriate placement score or permission of department. Application of language skills to reading, composition, and discussion. Lab work required.

209 Intensive Intermediate Russian (6:6:2). Prerequisite: RUSS 102 or 109, or appropriate placement score, or permission of department. Equivalent to RUSS 201 and 202 taught in a single semester. May not be taken for credit in combination with RUSS 201 or 202. Lab work required.

252 Russian Conversation and Composition (3:3:0). Prerequisite: RUSS 202 or permission of instructor. Development of students' ability to express themselves orally on topics of current interest and everyday situations; composition provides practice in more difficult forms of expression.

301 Field Study in Russian Culture (1-3:0:0). Prerequisite: HIST 328 or 329, GEOG 230, RUSS 333 or 354; or permission of instructor. Two- to three-week study tour to the Soviet Union. Students must attend a series of lectures before the tour and must consult with the designated faculty member on a research project on a topic in Russian culture resulting in a term paper or report.

303 Russian Advanced Conversation (3:3:0). Prerequisite: RUSS 202 or equivalent. Development of oral proficiency, including current Soviet expressions.

310 Readings in Russian Literature (3:3:0). Prerequisite: RUSS 202 or permission of instructor. Readings of Russian literary works in the original language with lectures, discussions, and examination in Russian. This course may not be taken by anyone who has previously taken and satisfactorily completed RUSS 254. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

311 Contemporary Soviet Short Fiction (3:3:0). Prerequisite: RUSS 202 or equivalent. Reading and discussion of recent short stories by the best-known Soviet writers of today. Readings in original language, with lectures and discussion in Russian. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

325 Major Russian Writers (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Study of the works of major Russian writers in translation; course work in English. Writers to be studied vary. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

326, 327 A Survey of Russian Literature (3:3:0), (3:3:0). Prerequisite: 54 hours or permission of instructor. RUSS 326 consists of a survey of Russian literature from its beginning to 1880. RUSS 327 consists of a survey of Russian literature of the late nineteenth and the twentieth centuries. Course work in English. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees.

353 Russian Civilization (3:3:0). Prerequisite: 54 hours or permission of instructor. Civilization and culture of Russia and the Soviet Union. Includes films, slides and music in addition to readings and lectures. Course work in English. May be taken toward fulfill-
ment of the non-Western culture requirement for the B.A. degree.

354 Contemporary Soviet Life (3:3:0). Prerequisite: 54 hours or permission of instructor. Social life, art, economics, education, view of life, and personal aspirations of the Soviet citizen today. Course work in English. May be taken toward fulfillment of the non-Western culture requirement for the B.A. degree.

380, 381 Advanced Russian (3:3:0), (3:3:0). Prerequisite: RUSS 202, 209, or equivalent. A comprehensive study of the more difficult characteristics of contemporary standard Russian in the areas of grammar, style, and vocabulary usage. Emphasis on developing fluency in oral and written expression.

401 Readings in the Social Sciences (3:3:0). Prerequisite: 15 hours of Russian or equivalent. Reading, translation, and discussion of Soviet materials in fields of history, politics, geography, and sociology.

402 Scientific Russian (3:3:0). Prerequisite: 15 hours of Russian or equivalent. Reading, translation, and discussion of Soviet materials in natural and physical sciences.

407 Russian Drama and Theater (3:3:0). Prerequisite: 54 hours or permission of instructor. Development of Russian theater including directing techniques in the Moscow Art Theater. Reading and discussion of major Russian plays of the nineteenth and twentieth centuries. Course work in English; knowledge of Russian not required. May be taken toward fulfillment of the general requirement in literature for the baccalaureate degree.

410 Russian Poetry (3:3:0). Prerequisite: 15 hours of Russian or equivalent. Historical development of Russian poetry and of representative works of the major poets. Reading in Russian. Course work in English and Russian. May be taken toward fulfillment of the general requirement in literature for the baccalaureate degree.

415 The Slavs: A Cultural Survey (3:3:0). Prerequisite: 54 hours or permission of instructor. Development of Slavic culture through the ages, with emphasis on the western (Polish, Czech) and southern (Yugoslav, Bulgarian) Slavs. Course work in English.

480, 481 Fourth Year Russian (3:3:0). Prerequisite: RUSS 380, 381 or equivalent or permission of instructor. Advanced work in major grammatical and lexical topics of Russian. Application of theoretical principles in guided written and oral exercises.

490, 491 Independent Study (1-3:3:0), (1-3:3:0). Prerequisite: Russian studies major with 84 hours or permission of instructor. Research and analysis of a selected problem in language, literature, or culture in consultation with a member of the Russian studies faculty.

Social Work (SOCW)

Social Work

100 Introduction to Social Work (1:1:0). Introductory classroom discussion and field observation on functions, values, methods, effectiveness, opportunities, and limitations of social work in helping people.

300 Alcohol and Substance Abuse: Policies and Programs (3:3:3). Primary issues related to alcoholism including key concepts, theories, policies, and research regarding the use and abuse of alcohol. Emphasis on the impact of the policies and programs on the well-being of ethnic minority and disadvantaged service populations.

301 Laboratory in Interpersonal Communication (3:3:0). Prerequisite: SOC 101, PSYC 100, or permission of instructor. Emphasis on experiential learning of the biological, psychological, social, and cultural influences on the behavior of those who need and those who give help. Students examine their own behavioral and learning patterns, values, and attitudes to increase their ability to understand and help social work clients. Field service of at least 60 hours required.

323, 324 Human Behavior in the Social Environment I, II (3:3:0), (3:3:0). (Must be taken in sequence) Prerequisite: SOC 101, BIOL 104, or permission of instructor. A social systems approach unifying and integrating concepts and knowledge from biology, anthropology, sociology, and psychology about human behavior. Applications in professional practice in the social work literature and in the field experience.

351 Social Welfare Policy and Services (3:3:0). Prerequisite: SOC 101, PSYC 100, or permission of instructor. Introduction to social welfare, including its historical development, central concepts, institutional nature, and the functions of social work as a profession. Field investigation and analyses of human service delivery systems, settings, and roles of social work.

352 Social Welfare Policy and Service II (3:3:0). Prerequisite: SOCW 351, 54 hours, or permission of instructor. Analysis of various social welfare policies; components of policy in our society. Examines the political, economic, and cultural influences on the policymaking process and the role of professors and citizen groups within it.

357 Methods of Social Work Intervention I (3:3:0). Prerequisite: SOCW 301 or permission of instructor. Social work practice from a systems perspective. Particular emphasis to problem-solving activities with Microsystems. The common core of knowledge, values, and skills essential to social work practice is analyzed to gain insight into social work functions and the role of the social worker as a change agent.

358 Methods of Social Work Intervention II (4:3:0). Prerequisite: SOCW 301, 357, or permission of instructor. Continues a generic problem-solving model, focusing on group and macrointervention systems, settings, and skills. Emphasis on working with groups from treatment to task purposes. Group processes as goal formulation, contract setting, composition, termination, skills, and techniques necessary for effective worker intervention are partial knowledge base of the course. Field service of 40-60 hours required.

423 Social Work with Adolescents (3:3:0). Prerequisite: 54 hours and concurrent field experience or permission of instructor. Major needs of adolescents with their implications for social work practice. Problems of family and peer group relationships; occupational choice; sexual and scholastic adjustment; and special problems of racial and cultural alienation; alcohol and drug abuse; and delinquency. Studies various theoretical ori-
entations and evidence from research. Analyzes both individual and group approaches to counseling and treatment.

424 Social Work Practice: Family and Group (3:3:0). Prerequisite: SOCW 358 or permission of instructor. This course should be taken simultaneously with SOCW 453 or 454 (Senior Practicum). Theoretical and applied concepts in social work practice with the family and the group. Opportunity through client contact in the practicum to develop skills and techniques in social group work and family practice.

425 Planning and Organizing for Community Change (3:3:0). Prerequisite: 84 hours or permission of instructor. Community organization and planning, with specifics in the practice of grass-roots community organizations. Includes the community development approach, neighborhood study and analysis, direct services in the neighborhood, relevant roles for neighborhood residents in service delivery, independent social action, role of social work in planned change.

453 Senior Practicum I (5:3:0). Prerequisite: SOCW 301, 323, 324, 351, 352, 357, and 358, with a grade of at least C and recommendation of faculty. Open only to social work majors. Under supervision instruction provided by field agencies, students are involved two days per week in learning through participation in the provision of service to individual clients, families, groups and/or communities, and in activities sponsored by or involving professional social workers. Weekly seminar and periodic faculty-agency consultations.

454 Senior Practicum II (5:0:0). Prerequisite: SOCW 453, with a grade of at least C and recommendation of faculty. Field experience and weekly seminar.

455 Senior Practicum/Block Placement (10:0:0). Prerequisite: SOCW 301, 323, 324, 351, 352, 357, 358, 471; completion of all required social work courses except electives; social work major with 84 hours; GPA of 3.50 (in social work) and recommendation of the faculty and the director of field instruction. Under supervision instruction provided by field agencies, students are involved four days per week in learning through participation in the provision of service to individual clients, families, groups and/or communities and in activities sponsored by or involving professional social workers. Weekly seminar, completion of a special project, and periodic faculty-agency visits.

471 Research in Social Work (3:0:0). Prerequisite: SOCI 221 or PSYC 300, SOCW 453, or permission of instructor. Principles and the theory underlying scientific inquiry. Emphasis on the use of research in social work practice, stops in conducting research, and utility of research efforts in developing and evaluating social work knowledge and skills.

475 Selected Topics in Social Work Policy (3:3:0). Prerequisite: 54 hours or permission of instructor. Opportunity to study in depth special areas of social work that are of interest to students, faculty, and the social work community. Topics vary.

483 Selected Approaches to Social Work Intervention (3:3:0). Prerequisite: 54 hours or permission of instructor. Taken simultaneously with SOCW 453 or 454 (Senior Practicum). Opportunity to examine critically personal use of different approaches to social work intervention currently employed in practice settings. Students thus have an opportunity to use with clients the technical skills these approaches require. May be taken more than once for credit.

499 Independent Study in Social Work (1-3:0:0). Prerequisite: 84 hours and a research proposal approved by instructor before enrollment. Investigation of a research problem in the field of social work.

500 The Family and Alcohol Dependence (3). Prerequisite: Senior or graduate standing. Examines the role played by the family in the etiology of alcohol dependence and the resources available in the community for prevention of this chronic and potentially fatal disease.

501 Case Management (3:3:0). Prerequisite Senior or graduate standing. Course for health and human service professionals on case management program development and delivery. Study and application of the role of the case manager in identifying and coordinating cost effective services. Topics include information management, sociolegal issues, funding, communication, and self-care/independent living.

Sociology (SOCI)

Sociology and Anthropology

101 Introductory Sociology (3:3:0). Introduction to basic sociological concepts. Aspects of human behavior; individual and group interaction; social mobility and stratification; status and class; race relations; urbanism; crime and criminology; social change and reform.

152 Modern Social Problems (3:3:0). Prerequisite: SOCI 101 or permission of instructor. Sociological analysis of the problems of modern society, including those related to stratification, urbanism, family and kinship, cultural change, and deviant behavior.

201 Marriage and the Family (3:3:0). Prerequisite: SOCI 101 or permission of instructor. Study of marriage and family in contemporary America. Human sexuality, premarital behavior, marital adjustment, socialization of children, family economics, divorce, and variations in family life.

206 Personal Worth and Collective Identity: The Socialization Process (3:3:0). Prerequisite: 3 hours of sociology or permission of instructor. Institutional and personal dimensions of the socialization process analyzed in terms of norms, roles, group processes, and stratification. Development of self-concept throughout the life cycle is examined in terms of major agents of socialization. Focus on influence of certain ascribed status prescriptions in contemporary society—such as race, age, sex, and handicaps.

221 Statistics for the Behavioral Sciences (4:3:2). Prerequisite: SOCI 101 or permission of instructor. Introduction to fundamentals of applied statistics as used in behavioral science to include descriptive statistics, inferential statistics, correlation-regression, analysis of variance, factor analysis, nonparametric statistics, and practical experience with calculators in applying statistical analysis to actual problems of the behavioral sciences.

240 Social Services in Society (3:3:0). Prerequisite: SOCI 101 or permission of instructor. Survey course covering the institutions of health and welfare in society.

http://catalog.gmu.edu
Emphasis on various ameliorative efforts made by organizations to combat effects of social problems and discussion of the variety of skills and resources involved.

299 Independent Study (1-3:0). Prerequisite: SOCI 101 and a written proposal approved before enrollment. Individual study of a sociological topic of interest to the student. Open to sociology majors only.

300 Social Control (3:3:0). Prerequisite: SOCI 101 or permission of instructor. How various social institutions function to organize and regulate society. Topics include family, education, ideology, law, media, work, governmental planning, and stratification. Course serves as a foundation of many specialized courses offered by the department, especially those that focus on control of crime and delinquency.

301 Criminology (3:3:0). Prerequisite: SOCI 101 or permission of instructor. Analysis of the nature, genesis, organization, and personal and social consequences of crime and criminal behavior. Examination of theories regarding punishment and treatment of criminals and prevention of crime; police and court systems, prisons and reformatories.

302 Sociology of Delinquency (3:3:0). Prerequisite: SOCI 101 or permission of instructor. Types, causes, treatment, and prevention of delinquent behavior.

303 Sociological Research Methodology (4:3:2). Prerequisite: SOCI 221 or permission of instructor. Introduction to empirical design in sociological research. Historical development, research design, sampling, methods of gathering data, sociometric scales, analysis and interpretation of results, and research reporting.

304 Sociology of Work (3:3:0). Prerequisite: 3 hours of sociology or permission of instructor. Meaning and structure of the world of work and its relationship to other spheres of life.

305 Sociology of Small Groups (3:3:0). Prerequisite: 6 hours of sociology or permission of instructor. Characteristics, structure, and processes of small group dynamics; theories and models of group analysis, techniques of observation and research in small groups; research theory and group knowledge; group dynamics of small and large groups; methods of research on group and intergroup processes; and theories of leadership and group decision making.

306 Demographic Analysis (Population Problems) (3:3:0). Prerequisite: 6 hours of sociology including SOCI 101 or permission of instructor; SOCI 322 recommended. Influence of population structure distribution and change in vital rates of ecological, social, economic, and political problems of human society.

307 Sociology of Collective Behavior (3:3:0). Prerequisite: 6 hours of sociology including SOCI 101 or permission of instructor. Analysis of crowds, mobs, and publics. Structure and function of social movements distinguished from other formal and collective behavior.

308 Sociology of Race Relations and Minorities (3:3:0). Prerequisite: 6 hours of sociology including SOCI 101, or permission of instructor. History and changes in racial, ethnic, and minority relations in modern society, with particular emphasis on blacks in American society.

310 Sociology of Deviance (3:3:0). Prerequisite: 3 hours of sociology or permission of instructor. Analysis of the macro- and micro-level deviance producing processes, of the meaning and control of deviance, and of the major theoretical approaches to deviance.

311 Classical Sociological Theory (3:3:0). Prerequisite: 9 hours of sociology including SOCI 101 or permission of instructor. Sociological tradition is explored through readings and discussions of ideas drawn from the writings of selected sociological thinkers such as Comte, Marx, Weber, Durkheim, and others.

315 Sociology of Sex Roles (3:3:0). Prerequisite: 54 hours or permission of instructor. Changing conceptions of sex roles, both female and male, in contemporary society. Using historical and comparative data, considers the differential socialization of males and females in relation to the changing social structure in which it takes place.

325 Sociology of War and Conflict (3:3:0). Prerequisite: 6 hours of sociology or permission of instructor. Study and analysis of war as a sociopolitical phenomenon in our society and in other societies. Total war and other conflict alternatives—such as limited war, nonnuclear war, subversion and sabotage, terrorism, guerilla war—are primary units of analysis.

326 Military Sociology (3:3:0). Prerequisite: 54 hours or permission of instructor. The military from a sociological perspective. Topics include role of military in society, revolutions, civil-military relations, military as a profession, and military culture.

332 Sociology of Urban Communities (3:3:0). Prerequisite: 6 hours of sociology including SOCI 101, or permission of instructor. The urban community: historical development, demography, and ecology of metropolitan areas; urbanism as a way of life; the emergence of suburbia; the future of cities.

340 Power in Society: Introduction to Political Sociology (3:3:0). Prerequisite: 6 hours of any social science including SOCI 101, or permission of instructor. Analysis of how political power is related to other aspects of social life, in terms of such sociological approaches as class conflict, social consensus, elite analysis, and protest and revolution.

350 The Sociology of the Life Cycle (3:3:0). Prerequisite: 3 hours of sociology or permission of instructor. Consideration of social influences on the timing of the life course. Topics include cultural variations in defining age roles, historical social development of generational subcultures, youth and age as new minorities, community structure and the aging process, the mass media and the American cult of youth, and explorations of alternative patterns of generational interaction.

373 The Community (3:3:0). Prerequisite: 6 hours of sociology including SOCI 101, or permission of instructor. Examination of small to moderately sized communities ranging through the village, rural community, small town, and city subcommunity. The latter category includes city localities, ethnic villages, and suburban communities.

382 Education in Contemporary Society (3:3:0). Prerequisite: 6 hours of sociology including SOCI 101 or permission of instructor. Study of education as a social institution, and its function as a socialization agency for social stability and social change. Emphasizes influences of social class elements on educational process and social organization of the U.S. public school system.
385 Sociology of Religion (3:3:0). Prerequisite: 3 hours of sociology or permission of instructor. The personal and institutional dimensions of religious life in relation to major sociological concepts such as role, status, norms, and social aggregates. The student selects an aspect of religion for in-depth study.

390 Medical Sociology (3:3:0). Prerequisite: 6 hours of sociology including SOCI 101, or permission of instructor. Examination of social context of disease and medical care, position of the professions in the medical care structure, delivery of medical care, and the physician-patient relationship under different systems practice. Etiology, incidence and prognosis of disease, and the restoration of patients to their normal social functions are studied in relation to the social environment.

401 Social Stratification: The Study of Inequality (3:3:0). Prerequisite: 12 hours of sociology including SOCI 101 or permission of instructor. Structure of social inequality from a stratification framework. Social class systems are analyzed through economic, political, and prestige structures. Includes the study of social mobility and differential life stages and opportunities.

402 Sociology of Punishment and Corrections (3:3:0). Prerequisite: 6 hours of sociology including SOCI 101 or permission of instructor. Historical overview and theory of justice; analysis of the treatment of adult and juvenile offenders. Includes discussion of the origin and development of punishment, correction, rehabilitation, residential treatment, and the halfway house. Roles of legal and social agencies in the treatment process are compared and contrasted.

403 Sociology of Law (3:3:0). Prerequisite: 54 hours or permission of instructor. Social relations and reciprocal influence between the law and (1) the American community, (2) special group interests in the U.S., (3) social change, and (4) social deviance.

405 Analysis of Social Data (4:3:3). Prerequisite: 54 hours, SOCI 221, or permission of instructor. Overview of the management and analysis of empirical social science data, including file construction, scaling and measurement, data transformation, and treatment of missing data. Manipulation, management, and analysis data sets using computers is emphasized.

410 Social Surveys and Attitude and Opinion Measurements (3:3:0). Prerequisite: 12 hours of sociology including SOCI 221 and 303 or permission of instructor. Survey research methods and techniques used in collecting and analyzing social data and techniques and methods of measuring social attitudes and opinions.

412 Contemporary Sociological Theory (3:3:0). Prerequisite: 12 hours of sociology including SOCI 101 and 311, or permission of instructor. Contemporary sociological theorists such as Parsons, Merton, Mills, Berger, and Gouldner are analyzed in terms of their relationship to major schools of contemporary sociological theory.

413 Seminar in Social Issues (3:3:0). Prerequisite: 84 hours and 12 hours of sociology. Opportunity to apply to contemporary relevant issues the theoretical perspectives and methodological skills previously learned.

414 Sociology of Language (3:3:0). Prerequisite: 54 hours and 3 hours of sociology, or permission of instructor. Interaction of language and social structure. Focus on language as revealing culturally specific rules of interaction; on the sex, class, race, and setting specific uniformities in the production of talk; and on language as it constrains the individual.

420 Regional and Societal Development (3:3:0). Prerequisite: 54 hours or permission of instructor. Social dimensions of economic growth and development with particular emphasis on Third World countries. Examines alternative definitions of development; problems related to the implementation of change strategies; and the contexts of national, regional, and institutional change.

421 Fieldwork in Social Change (3:3:0). Prerequisite: 6 hours of sociology or permission of instructor. In-depth investigation of planned social change through fieldwork internship with a change organization of student's choice. Groups may be involved in influencing peace, environment, civil rights, consumer protection, poverty, or other public issues. Topics include ideologies, targets, organizational structures, opposition, and strategies of change.

441 The Sociology of Aging (3:3:0). Prerequisite: 6 hours of sociology or permission of instructor. Aging from a sociological perspective. Topics covered include demographic trends and the aging population in America, the social construction of life stages and the creation of "old age," cultural labeling and human resistance.

471 Prevention and Deterrence of Crime (3:3:0). Prerequisite: 54 hours, inservice status, or permission of instructor. Theoretical and practical strategies for crime prevention and deterrence. Social, environmental, and mechanical developments. Police, courts, and correctional elements of law enforcement in terms of current effectiveness and future potential for crime prevention.

480 Seminar in Sociology (3:3:0). Prerequisite: Open only to senior majors in sociology. May be taken for credit only once. Topics of contemporary interest in sociology through individual class reports and group discussion. Topics vary.

492 Formal Organizations (3:3:0). Prerequisite: Junior standing or permission of instructor. Analysis of types of large, complex organizations in society; a study of bureaucracy and of the informal group formation which is often a part of the larger structure. Effectiveness of the formal organization and its administration.

495 Sociocultural Change (3:3:0). Prerequisite: 54 hours or permission of instructor. Sources, processes, and consequences of social and cultural alteration. Anthropological and sociological models for case analysis of social movements, culture contact and borrowing, innovation-adoption, and planned change.

499 Independent Research in Sociology (1-3:3:0). Prerequisite: 18 hours of sociology including SOCI 221, 303, 311 and 412, a 3.00 GPA in sociology, and a research proposal approved by instructor and department chair before enrollment. Investigation of a sociological problem according to individual interest with stress on research.

503 Family Law (3:3:0). Prerequisite: Undergraduate senior status in sociology, graduate standing, or permission of instructor. An examination of the salient aspects of the law as it affects the family in our dynamic society. Topics include the nature and formalities of the marital relationship; intrafamily torts and crimes; termination
of the marital relationship; child custody and support; adoption; separation agreements; and the economic and sociological aspects of marriage, separation, and divorce.

505 Sociology of Sex and Gender (3:3:0). Prerequisite: Undergraduate senior status in sociology, graduate standing, or permission of instructor. An advanced study of sex roles in contemporary society. Using historical and comparative data, course examines perceived, prescribed, and actual sex differentiation in social, political, and economic roles.

510 Employees, Employers, and the Changing Labor Force (3:3:0). Prerequisite: Undergraduate senior standing in sociology, graduate standing, or permission of instructor. Focus on the nature and origin of recent developments, for example, in technology, affirmative action policy and debates, migration and immigration, and public and private job training programs. Course examines their impact on the social structure of work.

515 Applying Sociology (3:3:0). Prerequisite: Undergraduate senior status in sociology or graduate status. Course provides overview of the ways sociologists have applied their theoretical and methodological skills and understanding in sociological practice in nonacademic settings.

517 Racial and Ethnic Relations: American and Selected Global Perspectives (3:3:0). Prerequisite: Undergraduate senior standing in sociology, graduate standing, or permission of instructor. Demographic purview of racial and ethnic groups in the United States; racial and ethnic groups as human-social-minority groups. Factors making for minority status including personality factors, group cultural factors; reactions of racial and ethnic minorities to minority status; programs, methods, social movements, and philosophies seeking to change minority group status.

525 Current Research in Sex and Gender (3:3:0). Prerequisite: Undergraduate senior status in sociology, graduate standing, or permission of instructor. Advanced study of the current social science research and research methodology used in the study of sex and gender.

541 Survey Research (3:3:0). Prerequisite: PSYC 300 or SOCI 221 or equivalent. Introduction to the theory, method, and practice of survey research design and analysis. Students complete a survey research project.

599 Issues in Sociology (3:3:0). Prerequisite: Undergraduate senior status in sociology or graduate status. Contemporary topics in sociology including issues in sociological theory, crime and delinquency, advanced research methods, social and cultural change, urban sociology, medical sociology, sociology of aging, and rural sociology. Course may be taken only once for credit.

Spanish (SPAN)

Foreign Languages and Literatures

Placement: See Admission Procedures.

100 Survival Spanish (3:3:0). Development of skills stressing vocabulary, pronunciation, and use of idiomatic expressions. Not part of sequence that fulfills foreign language requirement. May not be taken for credit by students who have previously earned any credit in Spanish. (Students with credit for SPAN 100 may take any Spanish course for credit for which they meet the prerequisite.)

101 Elementary Spanish I (3:3:1). For students with no knowledge of Spanish. Introduction to Spanish, including elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Lab work required.

102 Elementary Spanish II (3:3:1). Prerequisite: SPAN 101 or permission of department. Continuation of SPAN 101. Lab work required.

105 Review of Elementary Spanish (3:3:1). Prerequisite: Appropriate placement score or permission of department. Review of elements of Spanish for students who have studied Spanish previously. May not be taken for credit in combination with SPAN 101, 102 or 109. Lab work required.

109 Intensive Elementary Spanish (6:6:2). Equivalent to SPAN 101 and 102 taught in a single semester. Recommended for students who desire an intensive introduction to Spanish. May not be taken for credit in combination with SPAN 101, 102, or 105. Lab work required.

141, 142 Applied Spanish for the Social Services (4:4:2), (4:4:2). (Must be taken in sequence) Designed to meet the professional needs of majors in social service fields.

201 Intermediate Spanish I (3:3:1). Prerequisite: SPAN 102, 105, or 109; appropriate placement score; or permission of department. Further development of skills in listening, speaking, reading, and writing. SPAN 201 and 202 must be taken in sequence. Lab work required.

202 Intermediate Spanish II (3:3:1). Prerequisite: SPAN 201, appropriate placement score, or permission of department. Application of skills to reading, composition and discussion. Lab work required.

209 Intensive Intermediate Spanish (6:6:2). Prerequisite: SPAN 102, 105, or 109; appropriate placement score; or permission of department. Equivalent to SPAN 201 and 202, taught in a single semester. May not be taken for credit in combination with SPAN 201 or 202. Lab work required.

241 Applied Spanish for the Social Services (4:4:2). Prerequisite: SPAN 142 or equivalent. Continuation of SPAN 142.

301 Grammar and Syntax (3:3:0). Prerequisite: 12 hours of Spanish or permission of instructor. In-depth review of Spanish grammar and syntax. Extensive practice in controlled and free writing; emphasis on fundamental difficulties and points of interference which exist between English and Spanish.

311 Introduction to Hispanic Literary Analysis (3). Prerequisite: 15 hours of Spanish or permission of instructor. This required course prepares students for the study of Hispanic literatures. It introduces basic terminology of literary analysis and provides practice in the examination of texts in the major genres: poetry, narrative, and drama.

321 Introduction to Spanish Culture (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Designed for nonmajors. History, culture, economic and social development, scientific and artistic achieve-
ments that have contributed to the formation of modern Spain. Course work in English. Credit may be earned either in SPAN 321 or 461, but not in both.

322 Introduction to Latin American Culture (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Designed for nonmajors. History, culture, economic and social development, scientific and artistic achievements that have contributed to the formation of modern Latin America. Course work in English. Credit may be earned either in SPAN 322 or 466, but not in both.

323 Field Study in Hispanic Culture (1-3:6:0). Prerequisite: 54 hours or permission of instructor. Study tour to an area of the Spanish-speaking world. Students must attend a series of lectures before the tour and must consult with the designated faculty member on a research project on a topic in Hispanic culture resulting in a paper or report.

324 Study Abroad in Spanish (3:3:0). Prerequisite: SPAN 202 or 209 or equivalent, or permission of instructor. Study at an academic institution in a Spanish-speaking country including classroom studies with professors from the host country and field experiences.

325 Major Hispanic Writers (3:3:0). Prerequisite: ENGL 101 or equivalent or permission of instructor. Designed for nonmajors. Study of the works of major Hispanic writers in translation. Writers studied vary. Course work in English. May be taken toward fulfillment of the general requirement in literature for baccalaureate degrees. May be repeated for credit with permission of department.

329 Special Topics in Spanish and Latin American Literature (3:3:0). Prerequisite: ENGL 101 or permission of instructor. Designed for nonmajors. Course work in English. May be taken toward fulfillment of the humanities requirement in literature for the baccalaureate degree.

351 Spanish Conversation (3:3:0). Prerequisite: 12 hours of Spanish or equivalent or permission of instructor. Development of oral expression on topics of current interest and everyday situations, including written assignments. Not open to native speakers.

352 Spanish Composition (3:3:0). Prerequisite: 12 hours of Spanish or equivalent or permission of instructor. Development of ability in written expression on topics of current interest.

353 Spanish for the Business World (3:3:0). Prerequisite: 12 hours of Spanish or permission of instructor. Introduction to terminology and usage of Spanish in business transactions; practice in the composition of business reports and letters.

359 Introduction to Translation (3:3:0). Prerequisite: 12 hours of Spanish or permission of instructor. Readings and translation of texts selected from current periodicals and newspapers. Recommended for students who wish to improve reading and writing of Spanish and for Latin American Studies majors.

420 Studies in Spanish Linguistics (3:3:0). Prerequisite: SPAN 451, 452, or permission of instructor. Studies in Spanish phonetics, phonology, morphology, syntax, semantics, dialectology, or linguistic history. The topic for a given semester may be obtained from the department in advance. May be repeated for credit with permission of department.

425, 426 Independent Study (1-3:0:0), (1-3:0:0). Prerequisite: Major in Spanish, 84 hours, and permission of instructor. Research and analysis of a selected problem in literature or linguistics in consultation with a department member. Maximum of 6 hours of independent study may be applied to fulfillment of major requirements.

451 Advanced Oral Spanish (3:3:0). Prerequisite: 15 hours of Spanish or permission of instructor. Development of vocabulary and strengthening of conversational skills through class discussions and oral and written reports based on contemporary themes. Not open to native speakers.

452 Advanced Written Spanish (3:3:0). Prerequisite: 15 hours of Spanish or permission of instructor. Development of skills required in writing Spanish. Guided and original compositions. Grammatical structures reviewed and supplemented with individual corrections.

461 (361) Spanish Civilization and Culture (3:3:0). Prerequisite: 15 hours of Spanish or permission of instructor. Survey of Spanish culture and civilization from the pre-Roman era to the twentieth century.

466 (366) Latin American Civilization and Culture (3:3:0). Prerequisite: 15 hours of Spanish or permission of instructor. Introduction to the study of Latin American civilization and culture, from the pre-Columbian era to the twentieth century.

471 (317) The Literature of Spain (3:3:0). Prerequisite: SPAN 311 or permission of instructor. Examination of the main periods, trends, genres, and most representative works of Spanish peninsular literature from the twelfth century to the present. Required for Spanish majors.

472 (318) The Literature of Spanish America (3:3:0). Prerequisite: SPAN 311 or permission of instructor. Development of Spanish-American literature: main authors, periods, and literary trends. Required for Spanish majors.

480, 481 Special Topics in Hispanic Literature (3:3:0), (3:3:0). Prerequisite: SPAN 311 or permission of instructor. Study in depth of a selected theme, topic, period, or genre. May be repeated for credit with permission of department.

497, 498 Senior Honors Tutorial (3:0:0), (3:0:0). Prerequisite: Major in Spanish, 84 hours, and GPA of 3.00 and 3.00 in the major field. Students meeting these requirements are admitted to candidacy upon submission of a letter of application to the department Honors Committee in the second half of the junior year, supported by a faculty recommendation and an interview by and with the approval of the Honors Committee. In the first semester, weekly meetings with a faculty member to discuss readings from a comprehensive list prepared by the Spanish faculty. In the second semester, independent research and completion of an honors essay under the supervision of a member of the Spanish faculty.

500 History of the Spanish Language (3:3:0). Scientific study of the evolution of the Spanish language from its origin in vulgar Latin to its present forms.
501 Applied Spanish Grammar (3:3:0). Analysis of Spanish grammar as a basis for teaching language skills. Terminology and methodology for the teaching of syntax are stressed.

502 Hispanic Sociolinguistics (3:3:0). Introduction to sociolinguistics with emphasis on bilingualism and language contact in the Spanish-speaking world, including the United States.

520 Studies in Medieval Spanish Literature (3:3:0). Intensive study of a major work or a literary genre of this period.

525 Studies in Renaissance Literature (3:3:0). Study of a literary movement or selected authors of the Spanish Renaissance.

540 Studies in Nineteenth-Century Literature (3:3:0). Study of a writer, genre, theme, or movement of this period.

545 Studies in Hispanic Literature (3:3:0). Study of major writers in a particular generation or movement.

551 Special Topics in Spanish (3:3:0). Special studies in Spanish or Latin American language, literature, or culture. Specific topics are announced in advance. May be repeated for credit with the permission of the department.

565 Studies in Spanish American Drama (3:3:0). Study of playwrights who have made a major contribution to the development of the genre.

580 Contemporary Hispanic Institutions (3:3:0). In-depth study of twentieth-century cultural, social, and political institutions in Spain and Spanish America with emphasis on language and terminology used to describe their functions, regulations, and conditions.

Statistics (STAT)

Operations Research and Applied Statistics

250 Introductory Statistics I (3:3:0). Prerequisite: High school algebra. Elementary introduction to statistics with emphasis on applications and model formulation. Topics include descriptive statistics, sampling and sampling distributions, inference, correlation and regression, and survey sampling methods.

344 Applied Probability for Engineers and Scientists (3:3:0). Prerequisite: MATH 114. Introduction to probability with applications to the computer, information, engineering, and physical sciences. Probability laws, discrete and continuous random variables, joint probability distributions, conditional distributions, independence, expectations, variable transformation, system reliability, sampling distributions.

354 Statistical Methods for Engineers and Scientists (3:3:0). Prerequisite: STAT 344 or MATH 351. Introduction to statistical methods with applications to the computer, information, engineering, and physical sciences. Descriptive statistics, point and interval estimation, tests of hypothesis, regression, analysis of variance, categorical data analysis, nonparametric inference. Quality control, acceptance sampling, and reliability analysis.

362 Introduction to Computer Statistical Packages (3:3:0). Prerequisite: CS 103 or equivalent and a course in statistics. Use of computer packages in the statistical analysis of data. Topics include data entry, checking, and manipulation, as well as the use of computer statistical packages for regression and analysis of variance.

363 Introduction to Survey Sampling (3:3:0). Prerequisite: 200-level course in probability or statistics. Introduction to the design and analysis of sample surveys. Sample designs covered include simple random sampling; systematic sampling; stratified, cluster, and multistage sampling. Analytical methods include sample size determination, ratio and regression estimation, imputation of missing data, non-sampling error adjustment. Applications are to the decision, information, and social sciences, and engineering. Class project involves an actual survey.

381 Introduction to Decision Theory and Research (3:3:0). Prerequisite: STAT 250, DESC 202, or equivalent. Introduction to theory and research bearing on decisions made under uncertainty. Illustrations of the importance and interpretation of the uncertainty and value ingredients of choice are drawn from a number of contexts including business, medicine, law, and science. Topics include issues in the generation, assessment, and combination of these decision ingredients.

382 Introduction to Decision Analysis (3:3:0). Prerequisite: STAT 381. Survey of alternate strategies for assisting persons who face complex inference and decision tasks. Major topics include structuring inference/decision tasks and various schemes for eliciting and combining decision ingredients. Students analyze decisions through case studies selected from different contexts.

455 Experimental Design (3:3:0). Prerequisite: STAT 354 or DESC 353. Principles of analysis of variance and experimental design. Topics covered include computation and interpretation of analysis of variance; multiple comparisons; orthogonal contrasts; design of experiments including factorial, hierarchical, and split plot designs; principles of blocking and confounding in 2* n experiments; estimation of variance components. Op-
tional topics may include analysis of covariance, partial hierarchical designs, or incomplete block designs. Computer statistical packages are used to perform computations.

457 Applied Nonparametric Statistics (3:3:0). Prerequisite: STAT 354 or DESC 353 or equivalent. Introduction to nonparametric methods with applications to the decision and information sciences and operations analysis. Testing and estimation for one- and two-sample problems, independent and paired samples, location and dispersion problems, one- and two-way layouts, tests for independence, regression, discussion of efficiency.

 Systems Engineering (SYST)

Information Systems

301 Systems Methodology and Design I (3:3:0). Prerequisite: ENGR 107, MATH 213, or permission of instructor. Morphologies and methodologies of systems engineering, systems design, design for functionality, information requirement determination. Overview of selected methods for formulation, analysis, and interpretation of systemic issues and design alternatives.

302 Systems Methodology and Design II (3:3:0). Prerequisite: SYST 301 or permission of instructor. Systems life cycle, design for functionality, systems management, specification of system architecture, evaluation of alternatives, software systems engineering, operational test and evaluation.

390/ENGR 390 Engineering Economy (3:3:0). Prerequisite: ENGR 107 or 205 or 210, or permission of instructor. Introduction to economic decision process in engineering design and analysis. Topics include methodology for selection of alternatives, measures of investment worth, income and cost evaluation, depreciation methods, benefit-cost and cost-effectiveness techniques, and applications of decision trees to capital investment.

422 Data Communications and Networks (previously INFS 422) (3:3:0). Prerequisite: ECE 331 or INFS 311 and 312, or permission of instructor. Introduction to the concepts and design issues in data communications systems. Emphasis on the impact of communications technology on information systems. Term project.

430 Integration of Hardware and Software Systems (3:3:0) Prerequisite: SYST 302 or permission of instructor. Introduction to systems management that emphasizes systems definition, organization, design, and development. Operational feasibility determination. Design for verification and validation. Case studies from systems engineering.

431 Engineering of Large Scale Systems (3:3:0) Prerequisite: SYST 302 or permission of instructor. Integrated discussions and exercises concerning the engineering of large systems. Experiments concerning information systems design, information requirements determination, systems level architecture specification, and operational test and evaluation.

451 Knowledge-Based Support Systems Design (3:3:0). Prerequisite: SYST 301, OR 441, or permission of instructor. Introduction to the design of expert systems and decision support systems.

470 Human Factors Engineering (3:3:0). Prerequisite: SYST 302, PSYC 100, or permission of instructor. Human information processing, inferential analysis, biases and heuristics in human information processing, support systems to aid in human information processing, human-system interaction, software systems engineering considerations.

490 Senior Design Project I (3:3:0). Corequisite: SYST 431. The first portion of this lab includes familiarization with the systems design lab software packages at GMU and individual experiments with these packages. The latter portion of the course concerns formulation of a design project.

495 Senior Design Project II (3:3:0). Prerequisite: SYST 490. The design project plans formulated in SYST 490 are reviewed and modified. The systems design effort proposed is completed and a report prepared and evaluated. This is a "capstone" course in the systems engineering program. The primary goal is to produce a design and implementation software package to assist in the performance of a systems engineering function.

570 Quality Control Reliability, and Design for Functionality (3:3:0). Prerequisite: Course in statistics. Systems engineering, statistical and managerial techniques applied to quality control and assurance reliability, and design for functionality. Topics include quality considerations in design, process versus design tolerances, acceptance sampling, control chart methodology, and applications. Software reliability and quality control.

 Theatre (THR)

Dance and Theatre

101 Introduction to the Theatre Experience (3:3:0). Overview of the theatre as the composite art of playwright, director, actor, designer, and technician; and an examination of the interrelationship of play, physical theatre, and audience through the study of representative plays of various periods of theatre history.

150 Script Analysis (3:3:0). Principles and practice of critical analysis of dramatic literature as preparation for production and performance. Study of dramatic structure, genre, poetic elements, and mythic traditions through the reading of critical material, analysis of selected scripts, and attendance at theatrical performances.

220 Acting I (3:3:0). Basic training in acting, emphasizing the actor's use of voice and body in theatre games, improvisation, nonscripted situations, and short scenes.

222, 223 Voice for the Theatre I & II (3:3:0), (3:3:0). Prerequisite for 223 is 222. A two-semester course developing the voice as an effective instrument for stage characterization, with emphasis on voice production, flexibility, strength, and control.

224, 225 Movement for the Theatre I & II (3:3:0), (3:3:0). Prerequisite for 225 is 224. A two-semester course developing the body as an effective instrument
for stage characterization, with emphasis on relaxation, physical sensitivity, alignment, and control.

230, 231 (230, 245) Introduction to Theatre Technology I & II (4:3:3), (4:3:3). Two-semester sequence presenting the fundamentals of theatre organization and technology. Reviews basic theatre practice and techniques used in stage carpentry, rigging, painting, special effects, lighting, sound, properties, costumes and technical management. Participation in Theatre Division productions is required.

232 Fundamentals of Theatrical Design (3:3:0). Principles and practice of theatrical design. Study of aesthetic elements and development of design concepts through creative exercises, design projects, and attendance at theatrical performances.

239 Stage Management (3:3:0). Prerequisite: Permission of instructor. Lecture and lab in theories, techniques, and problem-solving skills necessary for stage management of plays and other performing arts events.

240 Stage Makeup (3:3:0). Lecture and lab in theories, principles, and practice of stage makeup.

270 Theatre Criticism (3:3:0). Basic understanding of how the elements of theatre work together, to facilitate critical appraisals of theatre productions and to enhance enjoyment of the theatre experience. Attendance at productions; discussion and evaluations of productions; professional reviews of productions; the writing of reviews.

302 Scripts in Performance (3:3:0). Designed for nonmajors. Emphasis on awareness and understanding of the process. Attendance at productions and rehearsals; interviews with directors, actors, designers and playwrights. Especially appropriate for students in literature who want or need additional work in how that literature becomes performance.

320 Play Performance Practicum (1-2:0:0). Prerequisite: Permission of instructor. Study and practice of acting and directing through rehearsal and public performance. Approximately 45 hours of rehearsal and performance per credit hour. Graded S-NC only. May be repeated for a maximum of 6 hours credit.

325 Acting II (3:3:0). Prerequisite: THR 150, 220, or permission of instructor. Scene-playing in a variety of genres and styles. Extensive work in subtext, characterization, and ensemble playing. Designed to extend the principles acquired in Acting I.

326 Acting III (3:3:0). Prerequisite: THR 325 or permission of instructor. Advanced lab-performance course given to acting theory and styles. Readings in Delsarte, Dolman, Stanislavski, Brecht, Artaud, Spolin, Chaikin, and Grotowski. Application of theories to the playing of selected scenes. Development of a personal approach to acting through experimentation.

328 Special Topics in Performance (3:3:0). Prerequisite: THR 220, 325, and 326, or permission of instructor. Specialized study of a particular aspect of performance. Topics may include stage combat, mime, dialects, mask work, improvisation, etc. Course may be repeated up to four times provided the suffix (specific course content) is different each time.

330 Scene Design (3:3:0). Prerequisite: THR 150, 230, 231, and 232, or permission of instructor. Basic scene design and scenicographic drawing. Analysis of a script for visual interpretation; the devising of a stage setting that will accommodate movement, dramatic action, character, and mood. The drafting of floor plan, builder's and painter's elevations. Experience with perspective drawing, color renderings, and scale models.

331 Scene Design Studio (3:0:3). Prerequisite: THR 330 or permission of instructor. Intermediate level lecture. Lab in scene design and scenicographic drawing. Emphasis on creation of workable visual metaphors, communication of design ideas, experience with perspective and mechanical drawing, color rendering, and scale models.

332 (231) Stage Lighting Design (3:3:0). Prerequisite: THR 150, 230, 231, and 232, or permission of instructor. Fundamentals of stage lighting design. Knowledge of tools, equipment, and techniques of stage lighting and an introduction to lighting design process. Includes terminology, basic electricity, design theories, projections, and specialized drafting techniques.

333 Lighting Design Studio (3:0:3). Prerequisite: THR 332 or permission of instructor. Intermediate-level lecture. Lab in lighting design with concentration on light as an artistic medium, creation of workable lighting metaphors, and communication of ideas.

336 Advanced Theatre Technology (3:3:0). Prerequisite: THR 150, 230, 231, 330, or permission of instructor. Technical theatre beyond the introductory level. In-depth examination of specialized materials and techniques, unusual stage machinery, safety practices, theatre sound, personnel management, and technical direction.

340 Play Production Practicum (1-2:0:0). Prerequisite: Permission of instructor. Study and practice of theatre production techniques through rehearsal and performance. 45 hours of production work per credit hour. Graded S-NC only and can be counted toward total needed for degree. May be repeated for a maximum of 6 credits.

341 Costume Design (3:3:0). Prerequisite: THR 150, 230, 231, 232, or permission of instructor. Lecture-lab in fundamentals of costume design for the stage. Costume is studied in relation to historical periods and the artistic demands of scripts.

342 Costume Design Studio (3:0:3). Prerequisite: THR 341 or permission of instructor. An intermediate-level lecture-lab course in costume design, with emphasis on visual metaphors, communication of design ideas, color rendering, and material selection.

351, 352 Survey of Theatre History (3:3:0), (3:3:0). Prerequisite: for 351 is 150 or permission of instructor; for 352 is 351 or permission of instructor. Development of the theatre from its beginnings to the present, with reference to theatrical movements, playwrights, producers, designers, actors, and companies. Emphasis on social, cultural, and philosophical factors shaping the theatre in successive historical periods.

358 Non-Western Theatre (3:3:0). Prerequisite: THR 150 or permission of instructor. Literature, theory, and practice of selected non-Western theatrical genres.

360 Directing I: Basic Concepts (3:3:0). Prerequisite: THR 150, 220, 230, 231, and 232, or permission of instructor. Basic concepts and techniques of directing for
Urban and Suburban Studies (USST) 251

Undergraduate Catalog 1990-1991
George Mason University

the stage. Emphasis on close textual analysis of script for use of space, characterization, tempo, and mood. Attention to reading ground plans, audition and rehearsal procedures, integrating production elements, and the historical evolution of the director. Practice in blocking, line reading, staging short scenes.

361 Directing II: Practicum (3:0:3). Prerequisite: THR 360 or permission of instructor. A lab course intended to complement Directing I, providing extensive application of basic concepts, culminating in production for public performance.

374 Creative Dramatics and Oral Interpretation in the Elementary School (3:3:0). Investigation and practice in effective communication in creative dramatics and oral interpretation of children's literature. Emphasis on didactic development in these areas.

376 Puppets, Plays and Poems: Theatre Techniques for Children and Young People (3:3:0). Prerequisite: Permission of instructor. Experiences in theatre techniques and activities such as storytelling, puppetry, improvisation, theatre games, the uses of fantasy and creative movement; the application of these techniques to work with children and young people. Each student designs a project related to specific needs and background. Although this course may be taken by majors as an elective, it is designed primarily for nonmajors, especially students who plan to work with children and young people or who are already working with them.

380 Playwriting Workshop (3:0:3). Prerequisite: 12 hours of English or permission of instructor. A practical workshop in writing plays, with emphasis on the one-act form. May be repeated once, but only 3 hours are accepted in the theatre major.

385 Special Topics in Dramatic Theory, Criticism and History (3:3:0). Prerequisite: THR 150 or permission of instructor. Specialized study of a particular problem or period in theatre history or dramatic theory and criticism. Topics may include history of black theatre, American musical theatre, genre, structuralism and theatre, etc. Course may be repeated up to four times provided the suffix citing specific course content is different in each case.

420, 421 Acting Styles I & II (3:0:3), (3:0:3). Prerequisite: THR 223, 225, 326, or permission of instructor. Should be taken after or simultaneously with 351, 352. A two-semester advanced lab-performance course given to the intensive study of acting period styles from Greek tragedy to the present.

422, 423 Acting Problems (3:0:3), (3:0:3). Prerequisite: 54 hours, acceptance into the B.F.A. program, permission of instructor and of the theatre faculty. An advanced lab-performance course given to in-depth individual or group research into specialized areas of acting theory and/or style.

430, 431 Design Problems (3:0:3), (3:0:3). Prerequisite: 54 hours, permission of instructor and permission of the theatre faculty. Advanced course in specialized areas of theatrical scenery design, lighting design, design history, or costume design.

435 History of Scene Design (3:3:0). Prerequisite: THR 351, 352 or permission of instructor. Study of the philosophy and practice of theatrical design from Classical Greece to the present with special emphasis on contemporary scenic solutions.

439 Performing Arts Management (3:3:0). Prerequisite: 54 hours or permission of instructor. Introduction to the economic and administrative aspects of a performing arts organization.

445 Costume History and Construction (3:3:0). Prerequisite: THR 341 or permission of instructor. Survey of the history of fashion from Classical Greece to the present day, including basic methods of constructing period costumes. Participation in theatre division productions is required.

460, 461 Directing Problems (3:0:3), (3:0:3). Prerequisite: 54 hours, permission of instructor, and permission of the theatre faculty. Advanced directing intended to complement Directing I and Directing II. Extensive applications of concepts in productions for public performance. The directing of two or more short plays or long play.

480 Seminar in the Shapers of Modern Theatre (3:3:0). Prerequisite: 351 and 352 or permission of instructor. While specific course content may vary, the seminar will deal with fundamental questions about the nature of theatre: the modes of theatrical production; the standards by which drama is judged; the relationship between performance, text, and audience; theatre as a unique form of knowledge, expertise, and thought; and the theatre's place in the liberal arts curriculum. These are raised through intensive study of ideas and practices of directors, designers, playwrights, and theorists who have significantly influenced modern Western theatre.

494 Field Experience (3:0:0). Prerequisite: 54 hours, permission of instructor and permission of the theatre faculty. An off-campus experience with educational community or professional theatre to provide the student with an opportunity to apply classroom training, knowledge, skills, and theory to an actual situation.

497, 498 Independent Study (3:0:0). Prerequisite: Open only to theatre majors with 54 hours and by special permission of chair. Individual research or a creative project in close consultation with instructor. Selection from projects in performance, directing, technical theatre and design, or theatre history and criticism.

Urban and Suburban Studies (USST)

Geography Program

301 Urban Growth in a Shrinking World (3:3:0). Course examines the process of urbanization and the way that process has transformed most of the world since the 18th century. It briefly examines the history of cities before modern urbanization and contrasts the role of cities in a mostly rural world with the role of cities in a society undergoing urbanization. The urbanization process is examined historically and comparatively. For major world regions, attention is given to the political economy of urbanization and its impact on social and economic relations. The course concludes with an examination of the growing globalization of the world economy and its implications for urban life and the urban political economy of the future.
Course Descriptions

390 Special Topics in Urban and Suburban Studies (3:3:0). Subject varies according to specialization of instructor.

401 Seminar: The Future of Metropolitan America (3:3:0). Prerequisite: 12 hours of USST approved courses, including USST 301. Course examines trends in the development of the American metropolis, including the impact of the information economy and technological developments on metropolitan form and life, continuing outward growth and increasing decentralization of metropolitan areas, changing functional organization of urban space, and continued social segregation in metropolitan areas. Students analyze contemporary predictions about the future of metropolitan life in America and explore how alternative public policies can shape that future. Students work on research projects on metropolitan life and form in Northern Virginia and other parts of the Washington metropolitan area.

490 Internship (3:0:0). Prerequisite: Open only to authorized students with 12 hours of USST; see USST coordinator. Internships are approved work-study programs that focus on urban and suburban issues with an approved agency or firm. Placement depends on the student's qualifications and the availability of positions. Students work with an on-site supervisor and the Director of Urban and Suburban Studies.

Urban Systems Engineering (USE)

Information Systems and Systems Engineering

210 Measurements and Surveying (3:3:0). Prerequisite: MATH 114 and ENGR 107. Introduction to state-of-the-art equipment and software for digitizing and computer utilization of field data, satellite positioning and other modern surveying procedures, with special emphasis on land measurements, mapping, and surveying. Inherent errors in these measurements and methods of diagnosis, detection, and correction of them. Laboratory exercises involving linear and angular measurements, open and closed traverses. Topographic mapping, video, remote sensing, and optical techniques in surveying.

300 Urban Systems Planning and Management I (3:3:0). Introduction to the complex relationships of overlapping urban systems such as land, transportation, energy, water, and communications. History of engineering, land, and infrastructure. The social, economic, environmental, political aspects of urban policy and decision making. Examination of current issues in the urban environment. Discussions of contemporary urban systems engineering design problems.

350 Water Supply and Distribution (3:3:0). Prerequisite: ENGR 308. Introduction to the design elements associated with providing a public water supply. Topics include criteria review for different water supply sources, water quality and quantity requirements, treatment requirements and methods, water distribution including line sizing, fire protection, pumping, and storage and the hydraulic analysis of systems. Tangible and intangible consequences of environmental policies; environmental impact assessments; federal, state, and local government laws and regulations related to public water systems.

351 Wastewater Management I (3:3:0). Prerequisite: USE 350. Introduction to the planning and design considerations in wastewater collection and disposal systems. Topics covered include wastewater flow rates, regulatory requirements, small on-site disposal systems, sewer collection systems, pump stations, wastewater treatment, effluent disposal, environmental considerations, financing and management. Tangible and intangible consequences of environmental policies; environmental impact assessments; federal, state, and local government laws and regulations related to wastewater collection, treatment, and disposal.

199, 299, 399 Industrial Internship I, II, III (1:1:0). Supervised 10-week summer work experience in urban systems engineering positions with land development, architecture/engineering, and construction firms or government. Written report and presentation.

400 Urban Systems Planning and Management II (3:3:0). Prerequisite: SYST 301 and USE 300. Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduction to the policies, programs, and regulations that influence land development, history enabling legislation, governing and regulating bodies, controlling the site plan development and approval process. Examination of the structure, function, and purpose of urban systems and ways in which urban systems design can be achieved. Impact assessment and cost benefit/effectiveness analysis. Contemporary theories of urban design. Physical relationships between development, land use, transportation, energy, communications, and water. National, state, and regional efforts in planning and environmental management. Politics of systems management and development. Evolution and development of housing, transportation, and taxing policies. Study of the public and private sector urban development industry including terminology, analytical techniques, evaluation techniques, and information sources at each phase in the life cycle of urban systems engineering. Overview of U.S. competitiveness in domestic and international urban systems markets. Policy and decision making process in the urban infrastructure. Issues and challenges associated with innovation and competition on the basis of new technology. Environmental issues in land use.

463 Construction Systems (3:3:0). Prerequisite: SYST 301. Overview of the urban construction industry, including its organizations and interactions. Project and
Women's Studies (WMST) 253

University (UNIV)

Office of the Provost

190 Freshman Seminar (3:3:0). Broad interdisciplinary subjects taught by distinguished scholars and teachers, including the Robinson Professor. Topics vary. Enrollments are by invitation only. Courses may be repeated for up to 12 credit hours.

290 Sophomore Seminar (3:3:0). Broad interdisciplinary subjects taught by distinguished scholars and teachers, including the Robinson Professor. Topics vary. Enrollments are by invitation only. Courses may be repeated for up to 12 credit hours.

301 Great Ideas in Science (3:3:0). A nontechnical introduction to the ideas that have shaped the growth of science from the building of Stonehenge to the modern theories of the Big Bang. The idea behind each major advance is treated in its historical context, with special attention to its importance in mankind's understanding of the nature of the universe. Examples are taken from the physical, geological, and biological sciences. The course is intended for non-science majors and uses little mathematics. Robinson Professor J. S. Trefil.

Vietnamese (VIET)

Foreign Languages and Literatures

301, 302 Vietnamese Culture and Civilization (3:3:0), (3:3:0). Prerequisite: 54 hours or permission of instructor. Survey of Vietnamese culture and civilization, including language, philosophy, religion and family life, and discussion of the problems of cross-cultural understanding. Course work in English. May be taken toward fulfillment of the non-Western culture requirement for B.A. Degree.

361, 362 Vietnamese Literature (3:3:0), (3:3:0). Prerequisite: Knowledge of Vietnamese. Survey of Vietnamese literature from the Early Period to the twentieth century. Study of the vernacular genres of verse and prose in Vietnam. May be taken toward fulfillment of the Humanities requirement in literature. For non-Western credit.

Women's Studies (WMST)

Women's Studies Program

100 Representation of Women (3:3:0). Course surveys representations of women in a variety of cultural forms, including art, advertising, costume, television, film, fiction, and science. By examining the diversity of representations of women, course uncovers the social negotiation of gender and the construction of cultural ideas of womanhood.

200 Introduction to Women's Studies (3:3:0). Prerequisite: 30 hours. Interdisciplinary introduction to the field of women's studies, encompassing key concepts in the field, history of women's movements and women's studies in America, cross-cultural constructions of gender, and a thematic emphasis on the diversity of women's experience across class, race, and cultural lines.
300 Current Issues in Women's Studies (3:3:0). Prerequisite: WMST 200 or permission of instructor. Detailed study of selected topics central to contemporary women's studies. Topics vary, but include subjects such as women and violence, women and international development, women's myth and ritual, the history and politics of sexuality, psychoanalysis, and religion.

330 Feminist Theory Across the Disciplines (3:3:0). Prerequisite: WMST 200 or permission of instructor. Course examines feminist critique and transformation of the theories, methods, and methodologies of the sciences and humanities.
General Policies
General Policies

Statement on Equal Opportunity/ Affirmative Action

George Mason University is an equal opportunity/affirmative action institution committed to the principle that access to study or employment opportunities afforded by the university, including all benefits and privileges, be accorded to each person—student, faculty, or staff member—on the basis of individual merit and without regard to race, color, religion, national origin, sex, or age (except where sex or age is a bona fide occupational qualification).

Appropriate procedures shall be adopted for the promotion of this principle in every phase of university operations. Furthermore, affirmative action will be taken to ensure that opportunities afforded by the university are fully available to handicapped persons, women, and minorities. The university will make every reasonable accommodation to enable handicapped students to undertake work or study for which they qualify.

Students should bring problems or questions regarding EEO/AA/Sexual Harassment policies to the attention of an academic dean, the dean of students, the director of Human Resources, the university ombudsperson, or the Office of the Assistant Senior Vice President (323-2519). Disabled Student Services can be reached by calling 323-2413.

As required by the Civil Rights Restoration Act of 1987, the university is committed to the broad application of Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and Title VI of the Education Act of 1964.

Conduct

The university respects and protects the individual dignity, integrity, and reputation of its students. Students must comply with the conventions and regulations of university life that are necessary to maintain order, protect individuals and property, and fulfill the purposes and responsibilities of a university.

Students enrolling in the university assume an obligation to conduct themselves in a manner compatible with the university's function as an educational institution. The Code of Virginia (Section 23-9:2) confers upon the university the responsibility for maintaining order within the university and the right to exclude those who are disruptive.

The Office of the Judicial Administrator is administratively responsible for supervising student conduct on campus. A system of courts administers nonacademic discipline. In addition to these courts, the student Honor Committee, described under Academic Policies, is responsible for adjudicating violations of the Honor Code that relate to academic matters. Questions regarding student conduct should be directed to the Judicial Affairs office, Room 308, Student Union I (323-3886).

Privacy of Student Records

Annually, George Mason University informs students of the Family Educational Rights and Privacy Act of 1974. This act, with which the institution intends to comply fully, protects the privacy of education records, to establish the right of students to inspect and review their education records, and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family Educational Rights and Privacy Act office (FERPA) concerning alleged failures by the institution to comply with the act.

Local policy explains in detail the procedures to be used by the institution for compliance with the provisions of the act. The Office of Student Records keeps a copy of the policy and also maintains a Directory of Records listing all education records maintained on students by this institution. Questions concerning the Family Education Rights and Privacy Act may be referred to the Office of Student Records.
Statement on Drugs and Alcohol

The abuse of drugs and alcohol by members of the George Mason University community is incompatible with the goals of the university. By defining standards of behavior and by providing educational programs to create an awareness of drug and alcohol-related problems, the university attempts to prepare individuals to act responsibly. Those in need of assistance in dealing with such problems are encouraged to seek the confidential services of the university’s Counseling Center, the Student Health Center, or the Drug Education Center.

Drugs

The university prohibits the possession and use of illegal drugs. Possession, sale, use, or distribution of controlled substances, including marijuana, is a violation of both federal and state laws and university regulations.

Alcohol

The use of alcoholic beverages on campus is at the discretion of the university and is subject to state alcoholic beverage regulations. Unless the university has specifically sanctioned the location and condition of alcohol use, the possession and consumption of alcohol on campus is prohibited.

Individuals involved in the sale, use, or distribution of controlled substances (drugs and alcohol) are subject to arrest and university disciplinary action. The university imposes a variety of sanctions, which include eviction from university housing and suspension or dismissal from the university.

Adopted by the Board of Visitors on May 12, 1987.

Computer Use Policy

George Mason University has established regulations regarding computer resources. These regulations define computer violations and actions that are taken when a violation is confirmed.

University computer resources are restricted to use for research, instructional support, and administrative purposes. Unauthorized access, including illegal use of passwords on mainframe systems, is prohibited. Also prohibited is use of legal access for unauthorized purposes, such as tampering with or destroying files, soliciting, or harassing. Illega use or copying of licensed software or student files is also an offense.

In all cases where a violation is reported, the user’s access to hardware and/or software is terminated until a final decision is made. Depending on the status of the person involved and the nature of the violation, referral may be made to Student Services, Human Resources, or University Police.

Section II of the Honor Code also applies to computer programs. A complete copy of the policy may be obtained from the Office of the Associate Vice President for Student Services or from University Computing and Information Services.

Motor Vehicles Policy

The privilege of operating and parking a motor-driven vehicle at George Mason University is extended to all students, subject to the following procedures:

Vehicles must be registered with the Traffic and Parking Office. At the time of registration, operators must certify that (a) vehicles have a valid state registration and valid insurance from a recognized insurance company, evidencing coverage for public liability in conformance with the laws of the Commonwealth of Virginia; (b) they have a valid state driver's license; and (c) they understand that they are governed by University Motor Vehicle and Traffic Rules and Regulations, a copy of which is furnished at the time of registration of the vehicle. A state vehicle registration card must be provided at the time of registration. Vehicular registration decals may be purchased for the full academic year or by the semester or summer session.

The Parking Services office is in the main lobby of Student Union I.

Registered vehicles must display in full view the university's vehicular registration decal, affixed immediately upon issue as per the instructions on the reverse side of the decal.

Other Regulations

Firearms

The unauthorized possession, storage, display, or use of any kind of ammunition, firearms, fireworks, explosives, air rifles, air pistols, or other lethal instruments is prohibited on university property. Any questions regarding this regulation should be directed to the Campus Police (323-2158).

Smoking

Smoking is not permitted in classrooms, lecture halls, theaters, or in the university libraries. Lounge areas in the student union buildings and other university buildings have been set aside for this purpose.

Bicycles/Skateboards

Bike racks are provided at various locations on campus for the convenience of students who bike.

http://catalog.gmu.edu
to and from the university. For resident students, storage areas for bikes are near Buildings 2, 4, and 8. Bikes may be parked only in these areas.

Bikes and skateboards are not permitted on sidewalks, ramps, footpaths, or grassy areas of campus or inside university buildings.

Pets
No pets are permitted in university buildings at any time. Additionally, pets that are on campus grounds must be on a leash and under supervision at all times.

Solicitors and Salesmen
Solicitors and salesmen, except on official business with the university, are not permitted on the campus without prior approval of the Business and Finance Office.
Administration and Faculty
Administration and Faculty

Board of Visitors
The Rector and Visitors
Edgar A. Prichard, Rector, Fairfax, VA
Val S. McWhorter, Vice Rector, Springfield, VA
Richard A. Barton, Secretary, Arlington, VA
C. Douglas Adams, Boyce, VA
Gayle Perkins Atkins, New York, NY
Giuseppe Cecchi, McLean, VA
Randolph W. Church, Jr., Fairfax, VA
Robert P. Crouch, Jr., Collinsville, VA
Myron P. Erkiletian, Alexandria, VA
Joseph A. Heastie, Vienna, VA
Nancy M. Hirst, McLean, VA
Helen Hill Miller, Washington, DC
Eric C. Neiderman, Fairfax, VA (student representative)
Charles H. Nance, Alexandria, VA
Hoan Dinh Nguyen, Arlington, VA
Martha V. Pennino, Vienna, VA
Elizabeth T. Walker, Alexandria, VA

Membership of the Board of Visitors is as of July 1989.

Academic Support Services
Vice Provost/Registrar: Suzanne Swope, Ph.D.
Associate Provost and Dean for Undergraduate Studies: James J. Fletcher, Ph.D.
Associate Provost and Director of Early Identification Program: James C. Renick, Ph.D.
Special Assistant to the Provost and Director of Minority Student Services: Charles Nathaniel Smith, M.S.
Special Assistant to the Provost/Director of Summer Session and Mason Scholars Program: Donna R. Bafundo, M.ED.
Associate Dean, Graduate School: James W. Fonseca, Ph.D.
Dean of Admissions: Patricia M. Riordan, Ed.D.
Director of Academic Advising and Orientation: Karole McKalip, M.ED.
Director of Career Development Center: Patricia J. Carretta, M.A.
Director of Counseling: Ralph K. Roberts, Ph.D.
Director of Fenwick Library: Charlene S. Hurt, M.L.S.
Director of International Student Services: Hamdesa Tuso, Ph.D.
Director of Student Financial Planning and Resources: Rita M. Bodie, M.S.
Director of Student Records: Michael DiSalvo
Assistant Director of Early Identification Program: Hortensia Cadenas, B.A.
Assistant Director of Minority Student Services: Carretta Cooke, M.ED.

Student Services
Associate Vice President for Administrative Services: Sara C. Looney, Ph.D.
Associate Vice President and Dean for Student Services: Kenneth E. Bumgarner, M.A.
Drug Education Coordinator: Nancy Schulte, L.C.S.W.
Associate Dean for Student Services: Girard M. Mulherin, Licentiate
Director of Housing and Residential Life: Ronald E. Campbell, M.A.

Administration
University President: George W. Johnson, Ph.D.

Executive Vice Presidents
Provost and Vice President for Academic Affairs: Clara M. Lovett, Ph.D.
Senior Vice President: J. Wade Gilley, Ph.D.
Executive Vice President for Finance and Planning: Maurice W. Scherrens, J.D., Ed.D.
Executive Vice President for Administration: H. Randall Edwards, Ph.D.
Executive Vice President for Advancement and Planning: Donald A. Danner, M.B.A.

http://catalog.gmu.edu
Assistant Dean for Student Services and Director of Student Organization Development: Lori Tiller, M.S.
Assistant Dean for Student Services and Director of Student Leadership Development: Adrienne Hillery, M.Ed.
Director of Student Health Center: Carol J. Sudol, R.N.
Health Educator, Student Health Center: Elizabeth Hagaman, M.Ed.

Faculty

Emeritus Faculty

Marjory Brown-Azarowicz, B.A., M.A., Ph.D., Emeritus Professor of Education
Evelyn Ellis Cobelan, B.S., M.S., Ed.D., Emeritus Professor of Nursing
David F. Condon, A.B., LL.B., I.L.M., D.L.M., Emeritus Professor of Law
John H. Cooper, B.A., M.A., H.S. Dir., P.E.D., Emeritus Professor of Health and Physical Education
Lloyd Martin DeBoer, B.S., M.B.A., Ph.D., Emeritus Dean of the School of Business Administration
Stephen T. Early, B.A., M.A., Ph.D., Emeritus Professor of Government and Politics
John James Hughes, A.B., M.S.W., D.S.W., Emeritus Associate Professor of Social Work
James Louis Jackson, B.A., M.A., Emeritus Professor of English
Emelia-Louise Kilby, B.S., M.A., Ph.D. Emeritus Professor of Health and Physical Education
Robert Charles Krug, B.S., M.S., Ph.D., Emeritus Professor of Chemistry
William H. McFarlane, B.A., Ph.D., Emeritus Professor of Philosophy
Jeanne C. Mellinger, B.A., Ph.D., Emeritus Associate Professor of Psychology
Ralph Norvell, B.A., J.D., LL.M., Emeritus Dean of the School of Law
Conrad D. Philos, A.B., J.D., Emeritus Professor of Law
Ben P. Sands, Jr., M.B.A., D.B.A, Emeritus Associate Professor of Management
William P. Snavely, B.A., M.A., Ph.D., Emeritus Professor of Economics
Lorin Andrew Thompson, B.A., M.S., Ph.D., President Emeritus
William S. Willis, B.A., M.A., Ph.D., Emeritus Professor of French

Faculty 1989-90

The faculty list below covers the 1989-90 academic year, and reflects appointments as of the end of the fall 1989 semester.

Ackerman, Helen J., Assistant Vice President for Public Relations. B.A. 1968, University of Western Australia; M.A. 1986, George Mason University.

Acquah, James B., Assistant Professor of Computer Science. B.S., M.A. 1979, Cambridge University; Ph.D. 1990, George Washington University.

Adamkewicz, Susan Laura, Associate Professor of Biology. A.B. 1962, Stanford University; Ph.D. 1968, University of Virginia.

Adler, Barry E., Assistant Professor of Law. B.S. 1982, Cornell University; J.D. 1985, University of Chicago.

Aiken, Peter, Assistant Professor of Information Systems and Systems Engineering. B.S. 1981, M.S. 1984, Virginia Commonwealth University; Ph.D. 1989, George Mason University.

Allinger, Rita Louise, Professor of Nursing. B.S. 1961, M.S. 1963, Boston University; M.A. 1972, Ph.D. 1974; The Catholic University of America.

Aksyonov, Vassily P., Robinson Professor of Russian Literature and Writing. M.D. 1956, Pavlov First Leningrad Medical Institute.

Akwule, Raymond U., Assistant Professor of Communication. B.A. 1977, M.A. 1979, University of Iowa; Ph.D. 1985, Howard University.

Albanese, Denise, Assistant Professor of English. B.A. 1978, New York University; Ph.D. 1987, Stanford University.

Alexander, Benjamin B., Lecturer in English. B.A. 1971, University of the South; M.A. 1976, Ph.D. 1979, University of Dallas.

Alexseev, Michael, Assistant Professor of Economics. Ph.D. 1984, Duke University.

Allen, John Ashley, Associate Professor of Psychology. A.B. 1963, Duke University; M.S. 1969, Ph.D. 1971, North Carolina State University.

Allen, Mary, Lecturer in English. B.A. 1962, M.A. 1963, Brigham Young University; Ph.D. 1973, University of Maryland.

Ambler, John Alden, Lecturer in Computer Science. B.S./M.E. 1968, University of South Florida; M.S. 1970, University of Southern California; M.B.A. 1971, Golden State University.

Ammann, Paul E., Assistant Professor of Information Systems and Systems Engineering. A.B. 1983, Dartmouth College; M.S. 1985, University of Virginia; Ph.D. 1988, University of Virginia.

http://catalog.gmu.edu
Anderson, Evan E., Professor of Decision Sciences; Chairman, Department of Decision Sciences. B.B.A. 1965, University of Iowa; M.B.A. 1966, University of Wisconsin-Madison; Ph.D. 1970, Cornell University.

Anderson, Karl Eric, Adjunct Associate Professor of Geography. B.S. 1967, Purdue University; M.S. 1969, Ph.D. 1978, Northwestern University.

Anderson, Mark Randolph, Instructor; Assistant Men's Basketball Coach. B.S. 1976, University of Missouri.

Anderson, Wayne F., Distinguished Professor of Public Administration. B.S. 1948, M.S. 1949, University of Wisconsin, Madison.

Andrykovitch, George Eugene, Associate Professor of Biology. B.S. 1962, M.S. 1965, University of Pittsburgh; Ph.D. 1968, University of Maryland.

Anthony, Robert A., Professor of Law. B.A. 1953, Yale University; B.A. Juris. 1955, Oxford University; J.D. 1975, Stanford University.

Athale, Ravindra Anant, Associate Professor of Electrical and Computer Engineering. B.S. 1972, Bombay University; M.S. 1974, Indian Institute of Technology; Ph.D. 1980, University of California, San Diego.

Auletta, Richard J., Assistant Professor of Electrical and Computer Engineering. Ph.D. 1987, University of Virginia.

Avrush, Kevin Andrew, Associate Professor of Anthropology. B.A. 1972, University of Chicago; M.A. 1973, Ph.D. 1978, University of California, San Diego.

Bafundo, Donna R., Assistant Professor; Director of Summer/Evening Sessions, Consortium Administrator. B.A. 1966, Trinity College; M.Ed. 1978, George Mason University.

Bakhash, Shaul, Robinson Professor of History. B.A. 1959, M.A. 1968, Harvard University; D.Phil. 1972, Oxford University.

Bante, Mary-Suzanne, Associate Director of Housing and Residential Life. B.A. 1979, University of Detroit; M.Ed., Kent State University.

Baranicki, Anna, Associate Professor of Engineering. M.Sc. 1970, Warsaw Technical University, Poland; Ph.D. 1980, University of Windsor, Canada.

Barba, Adrienne M., Assistant Professor; Counselor, Counseling Center. A.B. 1970, Drew University; Ed.M. 1972, Rutgers University; M.A. 1976, Ph.D. 1980, University of Maryland.

Barnes, Jeanne, Lecturer in English. B.A. 1971, South Dakota State University; M.A. 1986, University of Nebraska.
Berry, Alok K., Assistant Professor of Electrical and Computer Engineering. B.S. 1967, M.S. 1969, University of Delhi; M.S. 1981, Ph.D. 1985, University of Missouri.

Beslagic, Amer, Assistant Professor of Mathematics. B.S. 1981, University of Sarajevo; Ph.D. 1986, University of Wisconsin.

Bever, David L., Associate Professor of Health Education. B.S. 1970, University of Dayton; M.A. 1973, Ball State University; Ph.D. 1978, Purdue University.

Beveridge, Thomas G., Adjunct Professor of Music. A.B. 1959, Harvard University.

Beyer, Barry Keith, Professor of Education; Professor of American Studies. B.A. 1953, University of Rochester; M.A. 1954, Syracuse University; Ph.D. 1962, University of Rochester.

Bindel, Henry Joseph, Jr., Professor of Education. B.S. 1949, M.A. 1950, Eastern Kentucky University; Ed.D. 1971, University of Maryland.

Birchard, Geoffrey French, Assistant Professor of Biology. B.A. 1975, The Colorado College; M.A. 1979, University of Montana.

Bishop, William D., Foundation Professor of Law. B.A. 1971, Memorial University; M.A. 1972, University of Western Ontario; B.A. 1974, B.C.L. 1975, Magdalen College, Oxford; Ph.D. 1986, London School of Economics.

Black, Peter W., Associate Professor of Anthropology. B.S. 1964, Columbia University; M.A. 1971, Ph.D. 1977, University of California, San Diego.

Black, W.M., Associate Professor of Electrical and Computer Engineering. B.E.E. 1962, University of Virginia; M.S.E.E. 1967, Ph.D. 1971, Pennsylvania State University.

Blaha, John, Associate Professor of Psychology. B.S. 1965, State University of New York, Stony Brook; M.A. 1968, Ph.D. 1971, Ohio State University.

Blanchard, Phillip A., Instructor in Accounting. B.S. 1972, University of Maryland; M.B.A. 1971, Fairleigh Dickinson University; CPA, state of Colorado.

Bodie, Rita M., Assistant Professor; Director of Student Aid. B.A. 1974, Marymount Manhattan College; M.S. 1977, Polytechnic Institute of New York.

Boehm-Davis, Deborah A., Assistant Professor of Psychology. Ph.D. 1980, University of California.

Bohan, Doris K., Counselor, Counseling Center. B.A. 1972, George Mason College of the University of Virginia; M.A. 1974, George Mason University; Ed.D. 1983, Virginia Polytechnic Institute and State University.

Boileau, Don Michael, Professor of Communication; Chair, Department of Communication. A.B. 1964, Stanford University; M.A. 1965, Ph.D. 1972, University of Oregon.

Boland, M. Lucille, Assistant Professor of Nursing. B.S.N. 1968, University of Maryland; M.S.N. 1977, The Catholic University of America.

Boneau, Alan C., Professor of Psychology. B.A. 1950, M.A. 1951, University of Cincinnati; Ph.D. 1957, Duke University.

Bonfadini, John E., Associate Professor of Education. B.S. 1959, M.A. 1964, State Teachers College at California, Pennsylvania; Ph.D. 1976, Virginia Polytechnic Institute and State University.

Borkman, Thomasina Smith, Associate Professor of Sociology. B.A. 1958, Occidental College; M.A. 1959, Ph.D. 1969, Columbia University.

Boudreaux, Donald J., Assistant Professor of Economics. B.A. 1980, Nicholls State University; M.A. 1982, New York University; Ph.D. 1986, Auburn University.

Boulding, Kenneth, Visiting Robinson Professor of Social Sciences. B.A. 1931, M.A. 1939, Oxford University.

Bowen, Larry Sylvester, Professor of Education; Dean of the College of Education and Human Services. A.B. 1959, San Francisco State College; M.S. 1968, California State College, Hayward; Ph.D. 1970, Ohio State University.

Bowler, Michael Henry, Assistant Professor of Social Work. B.S. 1957, College of the Holy Cross; M.S.W. 1959, Boston College School of Social Work; Ph.D. 1979, Washington University.

Bracker, Jeffrey S., Associate Professor of Strategic Management. B.A. 1975, M.B.A. 1975, University of Dayton; Ph.D. 1982, Georgia State University.

Bradley, Gordon, Instructor; Men's Soccer Coach.

Bradwick, Faye L., Assistant Professor of Accounting. B.S. 1974, J.D. 1984, Syracuse University; LL.M. 1988, Georgetown University Law Center; CPA, State of New York.

Brady, Jody, Lecturer in English. B.A. 1979, University of Virginia; M.A. 1987, George Mason University.

Brady, Laura A., Assistant Professor of English. B.A. 1982, Marquette University; M.A. 1986, Ph.D. 1988, University of Minnesota.

Brady, Laura A., Assistant Professor of English. B.A. 1982, Marquette University; M.A. 1986, Ph.D. 1988, University of Minnesota.

Brawley, Thomas Michael, Associate Professor of Music. B.M. 1965, Greensboro College; M.M. 1967, Ph.D. 1975, Northwestern University.

Brenkus, Rosemarie, Assistant Professor of Nursing. B.S.N.Ed. 1964, Wilkes-Barre College; M.Ed. 1976, Virginia Polytechnic Institute and State University.

Brunette, Peter Clark, Jr., Professor of English. B.A. 1965, M.A. 1967, Duquesne University; Ph.D. 1975, University of Wisconsin, Madison.

Buchanan, James M., University Professor of Economics. B.S. 1940, Middle Tennessee State College; M.A. 1941, University of Tennessee; Ph.D. 1948, University of Chicago.

Buffardi, Louis C., Associate Professor of Psychology. A.B. 1964, University of Rochester; M.A. 1966, Fordham University; Ph.D. 1970, Kansas State University.

Buffill, Jose Angel, Assistant Professor of Spanish. B.L.C. 1942, Instituto del Vedado, La Habana; J.D. 1955, University of Havana; M.A. 1967, State University of New York, Buffalo; Ph.D. 1986, George Washington University.

Bumgarner, Kenneth Eugene, Assistant Professor; Associate Vice President and Dean for Student Services. B.S. 1963, State Teachers College, Lockhaven, Pennsylvania; M.A. 1966, George Washington University.

Burger, Christine, Research Assistant Professor of Education. B.S. 1975, M.Ed. 1977, Pennsylvania State University; Ph.D. 1977, Iowa State University.

Burns, John Barclay, Assistant Professor of Religious Studies. M.A. 1964, St. Andrew’s University, Scotland; B.D. 1967, Glasgow University, Scotland; Ph.D. 1971, St. Andrew’s University, Scotland.

Burns, Tom R., Robinson Professor of Sociology. B.S. 1959, M.A. 1962, Ph.D. 1969, Stanford University.

Bushnell, David S., Research Associate Professor; Director of Center for Improvement of Productivity. Ph.B. 1947, M.A. 1950, University of Chicago.

Butler, Henry N., Associate Professor of Law; Associate Director of Law and Economics Center. B.A. 1977, University of Richmond; M.A. 1979, Ph.D. 1982, Virginia Polytechnic Institute and State University; J.D. 1982, University of Miami.

Byrne, James E., Associate Professor of Law. B.A. 1968, University of Notre Dame; J.D. 1977, Stetson University; LL.M. 1978, University of Pennsylvania.

Cabell, Mary Katherine, Associate Professor of Mathematics. B.A. 1955, University of Tennessee; M.A. 1957, Ph.D. 1960, University of Virginia.

Campbell, Kathleen, Assistant Professor of Theatre. B.S. 1965, Northwestern University; M.A. 1971, Trinity University; M.A. 1980, Ph.D. 1980, University of Dallas.

Cameron, David H., Lecturer in Mathematics. B.S. 1950, United States Military Academy; M.S. 1960, Rensselaer Polytechnic Institute; Ph.D. 1970, Princeton University.

Cameron, Nancy W., Lecturer in Nursing. B.S.N. 1964, Duke University; M.S.N. 1967, Emory University.

Cao, Le Thi, Associate Professor of Accounting. B.S. 1965, The National Institute of Administration, Vietnam; M.B.A. 1969, Syracuse University; D.B.A. 1975, University of Southern California.

Capetanakis, John L., Associate Professor of Electrical and Computer Engineering. Ph.D. 1977, Massachusetts Institute of Technology.

Carew-Smith, Kathleen, Recruiter/Student Affairs Counselor, School of Nursing. B.S. 1971, M.S.N. 1973, Hunter College.

Carter, John C., Instructor; Admissions Counselor. A.A. 1966, Ferrum College; B.S. 1968, University of Tennessee; M.A. 1983, George Mason University.

Carty, Rita Mary, Professor of Nursing; Dean, School of Nursing. B.S.N. 1965, Duquesne University; M.S.N. 1966, D.N.Sc. 1977, The Catholic University of America.

Carvelly, Susan, Lecturer in History. B.Phil., Washington University; M.A., Washington University; Ph.D., George Washington University.

Cassara, Ernest, Professor of History; Professor of American Studies. A.B. 1952, B.D. 1954, Tufts University; Ph.D. 1957, Boston University.

Cato, Bertha M., Associate Professor of Parks, Recreation and Leisure Studies. B.S. 1971, Grambling State University; M.A. 1975, Indiana State University; Re.D., 1981, Indiana University.

Chamberlain, Jeffrey T., Associate Professor of French. B.A. 1971, Capital University; M.A. 1973, University of Rhode Island; Ph.D. 1982, University of Illinois, Urbana-Champaign.

Chamot, Dennis L., Lecturer in Management. B.S. 1964, M.S. 1964, Polytechnic Institute of Brooklyn; M.B.A. 1974, University of Pennsylvania; Ph.D. 1969, University of Illinois, Urbana-Champaign.

Chandler, Mary H., Instructor in Nursing. B.S. 1979, Michigan State University; M.S. 1985, The Catholic University of America.

Chang, Shih-Chun, Associate Professor of Electrical and Computer Engineering. B.S. 1970, National Cheng Kung University; Ph.D. 1977, University of Hawaii.

Chen, Holly Ho, Associate Professor of Chemistry. B.S. 1962, National Taiwan University; M.S. 1966, University of Southern California; Ph.D. 1969, University of California, San Diego.

Chen, Minder, Assistant Professor of Decision Sciences. B.S. 1979, National Taiwan University; M.B.A. 1963, National Chiao-Tung University; Ph.D. 1988, University of Arizona.

Cheuse, Alan, Associate Professor of English. B.A. 1961, Ph.D. 1974, Rutgers University.

Christensen, Alan H., Assistant Professor of Biology. B.S. 1977, Buena Vista College; Ph.D. 1983, Michigan State University.

Christensen, Julie A., Assistant Professor of Russian. B.A. 1970, University of Iowa; M.A. 1972, Ph.D. 1978, University of California, Berkeley.

Chu, Harold S., Associate Professor of Education; Director of Center for Bilingual/Multicultural Teacher Preparation. B.S. 1954, Seoul National University; M.A. 1968, Ph.D. 1973, University of Minnesota.

Chung, Jae Wan, Associate Professor of Economics. B.C. 1962, M.C. 1965, Seoul National University; M.A. 1969, State University of New York, Buffalo; Ph.D. 1972, New York University.

Cianci, Marlene, Assistant Professor of Nursing. B.S.N. 1965, M.S. 1966, University of Maryland, College Park.

Clapsaddle, Gerald Lee, Associate Professor of Art Studio. B.F.A. 1964, Drake University; M.F.A. 1966, Indiana University.

Clark, Robert Purdue, Professor of Government and Politics. B.A. 1962, Tulane University; M.A. 1964, Ph.D. 1966, Johns Hopkins University.

Clarke, James M., Assistant Dean for Administration and Finance, School of Law. B.A. 1967, Michigan State University; M.B.A. 1975, Widener University.

Clements, Frances Marion, Lecturer in English. B.A. 1950, Randolph-Macon Women's College; M.A. 1962, Ph.D. 1967, Ohio State University.

Coffinberger, Richard Lee, Associate Professor of Business Legal Studies; Associate Dean for Academic Programs. B.A. 1970, University of Florida; M.S. 1979, Virginia Polytechnic Institute and State University; J.D. 1974, Wake Forest University.

Cohen, Debra J., Assistant Professor of Management. B.S.C. 1979, Ohio University; M.L.H.R. 1982, Ph.D. 1987, Ohio State University.

Cohen, Martin Bernard, Assistant Professor of History; Assistant Professor of American Studies. A.B.

Cohn, Karen G., Instructor; Assistant Director, Regional Academic Services. B.A. 1970, University of Pittsburgh.

Cole, John D.R., Research Professor of Public Management; Director, Public Management Institute. B.A. 1949, M.A. 1951, University of Redlands; M.P.A. 1983, University of Southern California.

Collier, Virginia P., Associate Professor of Education; Associate Director of Bilingual/Multicultural Teacher Preparation. B.A. University of North Carolina; M.A. 1973, The American University; Ph.D. 1980, University of Southern California.

Collins, Susan Alice, Assistant Professor, Assistant Director of Athletics. B.S. 1970, University of Dayton; M.S. 1973, Northern Illinois University.

Colonna, Flavia, Assistant Professor of Mathematics. Laurea 1976, Universita degli Studi di Bari; M.A. 1980, Ph.D. 1985, University of Maryland.

Colvin, Mark, Assistant Professor of Sociology. B.A. 1972, M.A. 1974, North Texas State University; Ph.D. 1985, University of Colorado.

Coniglio, Jamie Wright, Associate Professor; Associate Librarian for Public Services. B.A. 1974, Saint Mary College; M.L.S. 1976, Indiana University.

Conlan, Timothy J., Assistant Professor of Government and Politics. A.B. 1974, University of Chicago; Ph.D. 1982, Harvard University.

Connelly, Catherine E., Associate Professor of Nursing; Associate Dean, Graduate Program, School of Nursing. B.S.N. 1964, The Catholic University of America; M.S.N. 1965, University of Pennsylvania; D.N.Sc. 1979, The Catholic University of America.

Conti, Roberta, Assistant Professor of Nursing. B.S.N. 1963, M.S.N. 1969, University of Maryland.

Cook, C. Barrie, Adjunct Professor of Biology. B.S. 1945, Hampden-Sydney College; M.D. 1948, The George Washington University.

Cook, Gerald, Earle C. Williams Professor of Information Technology and Electrical Engineering, Sc.D. 1965, Massachusetts Institute of Technology.

Cook, John A., Instructor; Men’s Track and Field Coach. B.A. 1965, University of Maryland; M.A. 1977, St. Thomas University.

Cook, Carretta, Assistant Director of Minority Student Services. M.Ed. 1982, Marygrove College.

Cooley, W.C., Associate Professor of Electrical and Computer Engineering. Sc.D., 1951, Massachusetts Institute of Technology.

Cooper, Bruce B., Instructor; Athletic Schedules Coordinator, Recreation Sports Complex. B.S. 1967, North Carolina State University.

Coperley, Peter Hutson, Associate Professor of Physics. B.S. 1967, University of Michigan; Ph.D. 1973, Stanford University.

Cordell, Victor V., Assistant Professor of Marketing. B.A. 1968, University of Texas; M.B.A. 1985, Ph.D. 1988, University of Houston.

Cordero, Anne Deing, Assistant Professor of French. Dipl. Dolmetscher 1955, University of Mainz; M.A. 1957, University of Florida; Ph.D. 1968, The George Washington University.

Costello, John L., Jr., Professor of Law. A.B. 1952, J.D. 1955, Dickinson School of Law; M.A. 1964, Fletcher School of Law and Diplomacy; LL.M. 1975, University of Virginia.

Cotton, Herbert S., Jr., Lecturer in Decision Sciences. B.A. 1967, Clemson University; M.S. 1971, Georgia Institute of Technology.

Coviello, Joan M., Assistant Professor of Nursing. B.S.N. 1980, Duquesne University; M.S.N. 1987, University of Pittsburgh.

Cowen, Tyler, Associate Professor of Economics. B.S. 1983, George Mason University, Ph.D. 1987, Harvard University.

Cozzens, Robert Francis, Professor of Chemistry; Deputy Director of the George Mason Institute. B.S. 1963, Ph.D. 1966, University of Virginia.

Cra^ton, Steven M., Associate Professor of Law. B.A. 1971, University of Arizona; J.D. 1984, Emory University; Ph.D. 1976, Texas A and M University.

Crain, W. Mark, Professor of Economics. B.S. 1972, University of Houston; Ph.D. 1976, Texas A and M University.

Crawford, Peggy Joyce, Associate Professor of Finance. B.S. 1966, University of Texas, Arlington; Ph.D. 1979, Purdue University.

Crockett, John H., Jr., Associate Professor of Finance/Real Estate and Urban Development. B.A. 1970,
Washington and Lee University; Ph.D. 1975, University of North Carolina.

Crouch, Mary Lou, Visiting Assistant Professor in English, B.A. 1970, M.A. 1982, George Mason University.

Dahl, Elizabeth Carlson, Professor; Vice President for University Development. B.A. 1953, Wellesley College; M.A. 1971, The George Washington University.

Das, Sidhartha R., Assistant Professor of Decision Sciences. B.S. 1979, India; M.S. 1980, University of Mississippi; M.B.A. 1985, Ph.D. 1987, University of Houston.

Davies, Keith Maurice, Associate Professor of Chemistry. B.Sc. 1964, Ph.D. 1967, University of Wales.

Davis, Molly E., Assistant Professor; Director of Field Instruction, Department of Social Work. B.A. 1971, Louisiana State University; M.S.W. 1973, Tulane University; Ed.D. 1984, Florida State University.

Davis, Stephen L., Associate Professor of Chemistry; Associate Chair, Chemistry Department. A.B. 1972, Washington University; M.S. 1973, Ph.D. 1976, Yale University.

Dear, Margaret, Professor of Nursing, Director of Research and Faculty Development. B.S. 1956, St. John's University, New York; M.S.N. 1970, Ph.D., The Catholic University of America.

Deaton, Ron, Lecturer in Government and Politics. B.A. 1966, Ouachita University; M.A. 1968, University of Arkansas; Ph.D. 1973, Kansas University.

DeBoer, Lloyd Martin, Special Assistant to the President for Community Relations; Dean Emeritus, Distinguished Professor, School of Business Administration. B.S. 1947, University of Illinois, Urbana-Champaign; M.B.A. 1950, Harvard University; Ph.D. 1957, University of Illinois, Urbana-Champaign.

Denham, Suzanne Ayers, Assistant Professor of Psychology. B.A. 1972, Western Maryland College; M.A. 1974, Johns Hopkins University; Ph.D. 1985, University of Maryland, Baltimore County.

De Nys, Martin John, Associate Professor of Philosophy. A.B. 1967, M.A. 1969, Ph.D. 1974, Loyola University, Chicago.

Derrick, Scott Steven, Assistant Professor of English. B.A. 1975, Albright College; M.A.T. 1978, University of Chicago; Ph.D. 1987, University of Pennsylvania.

Deshmukh, Marion Fishel, Associate Professor of History; Chair, Department of History. B.A. 1966, University of California, Los Angeles; M.A. 1967, Ph.D. 1975, Columbia University.

Di Bonaventura, Sam Albert, Professor of Music. B.S. 1951, Juilliard School of Music; B.M. 1953, M.M. 1954, Yale University; M.A. 1961, Harvard University; D.M.A. 1964, Peabody Conservatory of Music.

Dienemann, Jacqueline A., Assistant Professor of Nursing. B.S. 1964, Mt. St. Mary's College; M.S.N. 1973, Ph.D. 1983, The Catholic University of America.

Dietz, Thomas, Associate Professor of Sociology. B.G.S. 1972, Kent State University; Ph.D. 1979, University of California, Davis.

DiGilio, Deborah A., Lecturer in Health and Physical Education. B.S.E. 1976, State University of New York; M.P.H. 1982, University of North Carolina, Chapel Hill.

Dinan, Desmond, Adjunct Assistant Professor of History. B.A. 1978, National Institute for Higher Education; M.A. 1981, Georgetown University; Ph.D. 1985, National University of Ireland.

Dobson, Edward Clark, Jr., Associate Professor of Education; Executive Assistant to the Dean. B.M.E. 1961, M.S. 1969, Ph.D. 1972, Florida State University.

Domzal, Teresa J., Associate Professor of Marketing. B.S. 1976, Niagara University; M.B.A. 1977, Ph.D. 1981, University of Cincinnati.

Donelson, John III, Lecturer in Mathematics. B.A. 1963, Yale University; Ph.D. 1971, Stanford University.

Donnelly, Eugene M., Assistant Professor; Director of Regional Academic Services. B.S. 1954, United States Military Academy; M.A. 1975, The George Washington University.

Doyle, Warren E., Adjunct Assistant Professor of Parks, Recreation, and Leisure Studies; Director of Center for Outdoor Education. M.A. 1972, Ph.D. 1981, University of Connecticut.

Duara, Prasenjit, Assistant Professor of History. B.A. 1970, M.A. 1972, St. Stephen's College, Delhi, India; Ph.D. 1983, Harvard University.

Duck, Lloyd Earl, Associate Professor of Education. A.B. 1966, The College of William and Mary; M.A.T. 1968, Ph.D. 1974, University of Virginia.

Dumont, Jean-Paul, Robinson Professor of Anthropology. Ph.D. 1972, University of Pittsburgh.

Dunklee, Dennis R., Assistant Professor of Education. B.M.E. 1961, Wichita State University; M.Ed. 1969, Washburn University; Ph.D. 1985, Kansas State University.

Dworzecka, Maria, Professor of Physics. M.Sc. 1954, Ph.D. 1969, Warsaw University, Poland.

Dzama, Mary Ann, Associate Professor of Education. B.A. 1964, Carlow College, Pittsburgh; M.Ed. 1968, Duquesne University; D.Ed. 1972, University of Virginia.

Eagle, Steven J., Associate Dean; Professor of Law. B.B.A. 1965, City College of New York; J.D. 1970, Yale University.

Earp, S.L., Assistant Professor of Electrical and Computer Engineering. B.S., College of William and Mary; M.S., Ph.D. 1985, Duke University.

Edgemon, Albert Wesley, Professor of Education; Chair, Department of Educational Leadership and Human Development. B.A.E. 1954, University of Florida; M.A. 1960, Ed.D. 1964, Teachers College, Columbia University.

Egan, John Thomas, Adjunct Professor of Computer Science. B.S. 1965, St. Louis University; M.S. 1967, State University of New York, Buffalo.

Egghart, Elisabeth, Lecturer in Biology. Ph.D. 1955, University of Graz, Austria.

Ehike, Graceann, Assistant Professor of Nursing. B.S.N. 1969, M.S.N. 1972, University of Washington, Seattle; D.N.Sc. 1986, The Catholic University of America.

Ehrlich, Robert, Professor of Physics. B.S. 1959, Brooklyn College; Ph.D. 1964, Columbia University.

Eideh, Hany K., Assistant Professor of Electrical and Computer Engineering. B.S. 1975, M.S. 1979, Cairo University, Egypt; M.S. 1980, Ph.D. 1986, University of Virginia.

Eligg, Jerome R., Assistant Professor of Economics. B.A. 1984, Xavier University; M.A. 1986, George Mason University; Ph.D. 1988, George Mason University.

Ellsworth, Robert Waldo, Professor of Physics. B.S. 1960, Yale University; Ph.D. 1966, University of Rochester.

Elston, Esther Nies, Professor of German. B.A. 1960, Colorado College; M.A. 1964, Ph.D. 1969, Rice University.

Emsley, Michael Gordon, Professor of Biology. B.S. 1953, A.R.C.S. 1953, Imperial College of Science and Technology, University of London; Ph.D. 1964, University of London.

Engle, Charles R., Professor of Law. B.S.M.E. 1953, Kansas State University; LL.B. 1959, The American University.

English, Jon, Professor of Management, Chair, Department of Management. B.S.B.A. 1966, M.B.A. 1967, Ph.D. 1972, University of Florida.

Entrikin, Richard Lee, Associate Professor of Marketing. B.A. 1966, Western Illinois University; M.S. 1967, Northern Illinois University; Ph.D. 1976, St. Louis University.

Erdwins, Carol J., Associate Professor of Psychology. B.A. 1970, Rockford College; Ph.D. 1975, Washington University.

Erickson, Mary K., Lecturer in Finance/Real Estate and Urban Development. B.S. 1973, Pittsburgh State University; M.B.A. 1985, George Mason University.

Ernst, Carl Henry, Professor of Biology. B.S. 1960, Millersville State College; M.Ed. 1963, West Chester State College; Ph.D. 1969, University of Kentucky.

Esstman, Barbara, Lecturer in English. B.A. 1969, St. Louis University; M.F.A. 1987, George Mason University.

Evans, John Clement, Associate Professor of Physics. B.S. 1960, University of Oklahoma; M.S. 1962, Rensselaer Polytechnic Institute; M.S. 1964, Ph.D. 1966, University of Michigan.
Evans, Paul D., Assistant Professor of Decision Sciences. B.S. 1971, M.S. 1975, University of Dayton; Ph.D. 1989, University of Michigan.

Fagenson, Ellen A., Assistant Professor of Management. B.A. 1976, State University of New York, Buffalo; Ph.D. 1987, Princeton University.

Fairley, Richard E., Professor of Information Systems and Systems Engineering. M.S. 1965, University of New Mexico; Ph.D. 1971, University of California, Los Angeles.

Fant, Catherine T., Assistant Professor of Nursing. B.S.N. 1969, Columbia University; M.S.N. 1977, University of Nebraska.

Farfan, Victor Armando, Lecturer in Spanish. B.A. 1953, University of Cuzco, Peru; M.A. 1979, George Mason University.

Farrington, Mark, Lecturer in English. B.A. 1975, Colby College; M.F.A. 1989, George Mason University.

Feag, Veronica DeCarolis, Associate Professor in Nursing. B.S.N. 1971, Villanova University; M.A. 1975, New York University; Ph.D. 1979, Pennsylvania State University.

Ferrara, Peter J., Associate Professor of Law. B.A. 1976, Harvard College; J.D. 1979, Harvard University.

Ferré, Michael G., Professor of Finance; Chair, Department of Finance. A.B. 1967, Xavier University; M.A. 1969, University of Notre Dame; Ph.D. 1975, University of North Carolina, Chapel Hill.

Follitto, Sheila, Associate Professor of Art History. A.B. 1967, Vassar College; Ph.D. 1979, University of Pennsylvania.

Fink, Laurence S., Assistant Professor of Management. B.A. 1980, Albany University.

First, R. Douglas, Adjunct Assistant Professor of Government and Politics. B.A. 1952, Miami University; M.Ed. 1974, University of Hawaii; Ed.D. 1978, George Washington University.

Fischer, Klaus Gunter, Associate Professor of Mathematics. B.S. 1966, Lafayette College; M.A. 1968, Syracuse University; Ph.D. 1973, Northwestern University.

Fischer, Ruth, Lecturer in English. B.S. 1968, Our Lady of the Lake—University of San Antonio; M.A. 1983, George Mason University.

Fish, Michael T., Assistant Professor; Director of Office of Research. B.A. 1965, St. Joseph's College; M.A. 1971, The Catholic University of America.

Fisher, Myra H., Assistant Professor, B.S.N. 1965, University of Cincinnati; M.S.N. 1971, D.N.Sc. 1978, The Catholic University of America.

Fitzpatrick, Kathy E., Assistant Professor of Decision Sciences. B.A. 1969, University of North Carolina at Greensboro; M.S. 1970, Florida State University; M.S. 1978, Ph.D. 1984, Clemson University.

Fleishman, Edwin A., University Professor of Psychology. B.S. 1946, Loyola College; M.A. 1949, University of Maryland; Ph.D. 1951, Ohio State University; D.Sc. 1982, University of Edinburgh.

Fletcher, James J., Associate Provost and Dean for Undergraduate Studies; Associate Professor of Philosophy. B.A. 1963, Iona College; M.A. 1966, Marquette University; Ph.D. 1973, Indiana University.

Fonseca, James William, Associate Professor of Geographic and Cartographic Sciences; Acting Dean of the Graduate School. B.A. 1969, Bridgewater State College; Ph.D. 1974, Clark University.

Forche, Carolyn, Associate Professor of English. B.A. 1972, Michigan State University; M.F.A. 1975, Bowling Green State University.

Foster, Gregory D., Assistant Professor of Chemistry. B.S. 1978, University of California, Davis; M.S. 1981, California State University, Hayward; Ph.D. 1985, University of California, Davis.

Foster, John Burt, Jr., Associate Professor of English. B.A. 1967, Harvard University; M.Phil. 1971, Ph.D. 1974, Yale University.

Frame, Barbara S., Assistant Professor; Assistant Director of Conferences and Community Services. B.A. 1972, M.A. 1974, Washington University.

Francis, Carolyn, Lecturer in Nursing. B.S. 1983, George Washington University; M.S.N. 1989, George Mason University.

Friedlander, Melvin A., Assistant Professor of Government and Politics; Director of Center for Middle East Studies. A.B. 1962, Loyola College; M.A. 1968, Ph.D. 1982, The American University.
Friedley, Sheryl Ann, Associate Professor of Communication. B.S. 1971, M.A. 1972, Ball State University; Ph.D. 1977, Purdue University.

Friedman, Lee, Assistant Professor of Psychology. B.S. 1977, Bradley University; M.A. 1979, University of Missouri; Ph.D. 1986, Rice University.

Froman, Wayne J., Associate Professor of Philosophy; Chair, Department of Philosophy and Religious Studies. B.A. 1966, Yale University; M.A., Ph.D. 1975, Fordham University.

Fuller, Daniel L., Acting Assistant Professor of Accounting. B.S. 1971, University of Illinois; CPA, state of Illinois.

Gabel, Michael Randy, Associate Professor of Mathematics; Senior Associate Dean, College of Arts and Sciences. B.S. 1965, Massachusetts Institute of Technology; M.A. 1968, Ph.D. 1972, Brandeis University.

Gabriel, Arnold D., Professor of Music; Chair, Department of Music. B.S. 1950, M.S. 1953, Ithaca College.

Gaddy, Zack E., Lecturer in Accounting. B.S. 1979, Old Dominion University; M.S. 1982, Boston University; CPA.

Geffeny, Kathleen F., Assistant Professor of Nursing. B.S. 1967, St. Joseph College; M.S. 1971, Ph.D. 1984, University of Maryland.

Gallehr, Donald Raymond, Associate Professor of English. B.A. 1964, St. Bonaventure University; M.A. 1966, Fordham University; Ph.D. 1974, The Catholic University of America.

Gaudino, James, Adjunct Assistant Professor. B.S. 1972, United States Air Force Academy; M.S. 1976, Troy State University; Ph.D. 1985, Michigan State University.

Gertler, J., Professor of Electrical and Computer Engineering; Sc.D., 1980, Hungarian Academy of Sciences.

Gerton, Manuel I., Associate Professor of Psychology. B.A. 1976, University of Maryland; M.S. 1979, Ph.D. 1982, Ohio University.

Gessner, Theodore Lee, Associate Professor of Psychology. B.S. 1962, Fordham University; M.A. 1967, Ph.D. 1971, University of Maryland.

Gifford, Jonathan L., Assistant Professor of Government and Politics. B.S. 1976, Carnegie Mellon University; M.S. 1979, Ph.D. 1983, University of California, Berkeley.

Gilstrep, Robert L., Professor of Education; Associate Chair, Department of Education. B.S. 1954, M.Ed. 1960, North Texas State University; Ed.D. 1963, George Peabody College.

Ginsberg, Douglas H., University Foundation Professor of Law. B.S., 1970, Cornell University; J.D. 1973, University of Chicago.

Given, Barbara Knight, Associate Professor of Education. B.S. 1958, Kansas State University; M.Ed. 1967, University of Oregon; Ph.D. 1974, The Catholic University of America.

Gleissner, Richard Anthony, Associate Professor of History. B.S. 1958, University of Wisconsin; M.A. 1959, Marquette University; Ph.D. 1968, University of Maryland.

Godin, Andrea, Instructor; Head Athletic Trainer. B.S. 1979, University of Massachusetts; M.Ed. 1980, University of Virginia.

Goiccoechoa, Ambrose, Associate Professor of Information Systems and Systems Engineering. B.S. 1966, California State Polytechnic College; M.S. 1970, California State University, Los Angeles; Ph.D., 1977, University of Arizona.

Goldin, Mark G., Associate Professor of Spanish. B.S. 1965, Ph.D. 1968, Georgetown University.

http://catalog.gmu.edu

Golomb, Louis, Assistant Professor of Anthropology. B.S. 1968, Columbia University; M.A. 1971, Ph.D. 1976, Stanford University.

Gonzalez, Carlos M., Assistant Professor of Computer Science. B.S. 1968, Tecnológico y de Estudios Superiores de Monterrey; M.S. 1970, University of Oregon; Ph.D. 1975, Case Western Reserve University.

Goodman, Charles R., Lecturer in Psychology. A.B. 1968, Ohio University; M.A. 1977, Ph.D. 1979, California School of Professional Psychology.

Goodwin, Dorcas, Instructor; Director of University Activities. B.A. 1978, M.Ed. 1980, University of Maine, Orono.

Goodwin, Stephen Hardy, Associate Professor of English. A.B. 1965, Harvard University; M.A. 1969, University of Virginia.

Gopalakrishnan, V., Assistant Professor of Accounting. C.E. 1975, Indian Merchants' Chamber; M.B.A. 1982, Sam Houston State University; Ph.D. 1986, University of North Texas; Chartered Accountant India.

Gordon, Norman William, Instructor; Women's Track and Field Coach. B.S. 1973, Lock Haven State College; M.Ed. 1975, University of Virginia.

Gortner, Harold Franklin, Associate Professor of Government and Politics; Chair, Department of Public Affairs. A.B. 1963, Earlham College; M.P.A. 1966, M.A. 1969; Ph.D. 1971, Indiana University.

Green, James C., Lecturer in Decision Sciences. B.A. 1971, University of Washington; M.S. 1975, Air Force Institute of Technology; M.S. 1978, University Nebraska.

Gretz, Michael R., Assistant Professor of Biology. B.Bc. 1977, Central Michigan University; Ph.D. 1981, Arizona State University.

Grier, Kevin, Assistant Professor of Economics. Ph.D. 1984, Washington University in St. Louis.

Griffith, Hurdis M., Associate Professor. B.S.N. 1963, Jamestown College; M.N. 1969, University of Washington; Ph.D. 1984, University of Maryland.

Grissom, Helen H., Assistant Professor; Librarian. A.B. 1951, Syracuse University; M.L.S. 1973, University of Maryland.

Grotephorst, Clyde W., Assistant Professor; Librarian. B.A. 1976, Western Carolina University; M.S.L.S. 1978, University of Tennessee; M.A. 1980, Central Michigan University.

Gulledge, Thomas R., Jr., Associate Professor of Decision Sciences. B.S. 1975, University of South Carolina; M.A. 1977, Ph.D. 1981, Clemson University.

Gupton, John T., III, Professor of Chemistry. B.S. 1967, Virginia Military Institute; M.S. 1969, Ph.D. 1975, Georgia Institute of Technology.

Guzman, Louis Enrique, Lecturer in Geography. B.A. 1949, M.A. 1950, University of California, Los Angeles; Ph.D. 1956, University of Chicago.

Haack, Barry Norbert, Associate Professor of Geographic and Cartographic Sciences. B.S. 1969, University of Wisconsin; M.A. 1972, San Diego University; Ph.D. 1977, University of Michigan.

Habib, Muhammad, Associate Professor of Operations Research and Applied Statistics. B.S. 1968, Ain Shams University; Ph.D. 1979, University of North Carolina, Chapel Hill.

Hagaman, Elizabeth, Health Educator, Student Health Center. B.S. 1984, Appalachian State University; M.Ed. 1986, University of North Carolina, Greensboro.

Haggard, Stuart E., Lecturer in Management. B.S. 1971, University of North Carolina; M.B.A. 1978, Texas Tech University.

Hamburger, Henry James, Associate Professor of Computer Science. B.S. 1961, Massachusetts Institute of Technology; M.S. 1963, University of Minnesota; M.S. 1966, Ph.D. 1971, University of Michigan.

Hamilton, Kenneth L., Lecturer in Decision Sciences. B.S. 1964, University of Georgia; M.S. 1972, Ph.D. 1979, Georgia Institute of Technology.

Hampton, Felix Gene, Lecturer in Management. B.S. 1952, Boston University; M.B.A. 1954, Harvard University.

Harbin, Richard, Assistant Professor of Nursing. B.S.N. 1967, Florida State University; M.S.N., Indiana University.

Harper, Doreen C., Associate Professor. B.S.N. 1965, Oklahoma State University; M.P.A., State University of New York, Albany.

Harr, David J., Assistant Professor of Accounting. B.A. 1968, University of Wisconsin, Madison; M.S. 1969, Naval Postgraduate School; Ph.D. 1978, University of Wisconsin, Madison; CPA, State of Wisconsin.

Harrington, Richard Irving, Associate Professor; Men's Basketball Coach. B.S. 1968, University of Maryland.

Harris, Carl M., Professor and Chair of the Operations Research and Applied Statistics Department. B.S., Queens College of the City University of New York; M.S., Ph.D. 1966, Polytechnic University of New York.

Hart, Jayne Thompson, Professor of Biology; Assistant Dean, College of Arts and Sciences. B.A. 1964, North Central College; M.S. 1966, Ph.D. 1969, University of Wisconsin.

Harvey, James William, Associate Professor of Marketing. B.S. 1966, University of Illinois, Urbana-Champaign; M.B.A. 1968, University of Miami; Ph.D. 1977, Pennsylvania State University.

Hass, Marvin, Lecturer in Physics. B.S. 1950, City University of New York; M.S. 1952, Syracuse University; Ph.D. 1955, University of Michigan.

Hassmiller, Susan B., Lecturer in Nursing. B.S.N. 1977, Florida State University; M.S.N. 1983, University of Nebraska.

Hawkes, Robert Thomas, Jr., Assistant Professor of History; Dean of the School of Continuing and Alternative Learning. B.A. 1964, Randolph-Macon College; M.A. 1967, Ph.D. 1975, University of Virginia.

Haynie, William J., III, Assistant Professor of Education. B.S. 1970, Old Dominion University; M.Ed. 1975, Clemson University; Ph.D. 1978, Pennsylvania State University.

Haynes, Kingsley E., Graduate Dean and Professor of Public Affairs and Decision Sciences. B.A. 1964, Western Michigan University; M.A. 1965, Rutgers University; Ph.D. 1971, Johns Hopkins University.

Hogan, Arthur M. B., Assistant Professor of Finance. A.B. 1978, University of Chicago; M.S. 1979, University of Rochester; M.S. 1982, M.B.A. 1983, University of Alabama; Ph.D. 1988, University of Texas, Austin.

Hollingshead, Craig A., Lecturer in Marketing. B.A. 1964, Michigan State University; M.B.A. 1970, University of Texas; D.B.A. 1985, University of Tennessee.

Holman, Emmet Lou, Associate Professor of Philosophy. B.S. 1963, Pennsylvania State University; M.A. 1967, Ph.D. 1973, University of Maryland.

Holmes, Gerald V., Instructor; Librarian. B.S. 1981, University of North Carolina, Charlotte; M.S.L.S. 1984, University of North Carolina, Chapel Hill.

Holsinger, Donald Charles, Associate Professor of History. B.A. 1970, Bethel College; Ph.D. 1979, Northwestern University.

Holt, Mack P., Associate Professor of History. B.A. 1971, M.A. 1973, Georgia State University; Ph.D. 1982, Emory University.

Honeychurch, Robert V., Assistant Professor of Chemistry. B.S. 1977, Ohio State University; M.S. 1982, Ph.D. 1984, Michigan State University.

Horn, Betty C., Assistant Professor of Accounting. B.S. 1967, Oklahoma City University; MPA. 1984, Ph.D. 1987, Georgia State University; CPA, CMA.

Horton, Lois Elaine, Assistant Professor of Sociology. B.A. 1964, University of Buffalo; M.A. 1969, University of Hawaii; Ph.D. 1977, Brandeis University.

Houser, Edward C., Assistant Professor; Technical Director of Performing Arts. B.A. 1965, University of Texas, El Paso.

Hurt, Charlene S., Associate Professor; Director of Libraries. B.A. 1964, Culver-Stockton College; M.L. 1974, Emporia State University; M.P.A. 1979, University of Kansas.

Hutcherson, Janet L., Instructor; Admissions Counselor. B.S. 1979, George Mason University.

Hysom, John Leland, Associate Professor of Finance. B.S.B.A. 1957, University of Kansas; M.B.A. 1964, University of Missouri, Kansas City; Ph.D. 1973, The American University.

Ioannou, D.E., Associate Professor of Electrical and Computer Engineering. B.S. 1974, University of Thessaloniki; M.S. 1975, Ph.D. 1978, University of Manchester.

Irvin, Lorna Marie, Associate Professor of English; Assistant Professor of American Studies. B.A. 1959, McMaster University; M.A. 1965, Carleton University; Ph.D. 1977, The American University.

Isenberg, Joan P., Associate Professor of Education. B.S. 1963, M.S. 1968, Wheelock College; Ed.D. 1978, Rutgers University.

Jackson, Janice J., Assistant Professor of Management. B.A. 1971, Beloit College; M.E. 1973, Howard University; M.B.A. 1981, Memphis State University.

Jacob, Evelyn Joan, Associate Professor of Education. B.A. 1971, Ohio State University; Ph.D. 1977, University of Pennsylvania.

Jacobs, Mark D., Assistant Professor of Sociology. B.A. 1968, Columbia College, Columbia University; M.A. 1977, Ph.D. 1986, University of Chicago.

Jenkins, Helen M., Associate Professor of Nursing. M.S.N. 1976, The Catholic University of America; Ph.D. 1983, University of Maryland.

Jo, Kyung Yoon, Assistant Professor of Operations Research and Applied Statistics. B.S.E. 1972, Seoul Na-

Kerschberg, Larry, Professor of Information Systems and Systems Engineering; Chair, Department of Information Systems and Systems Engineering. B.S. 1964, Case Institute of Technology; M.S. 1966, University of Wisconsin; Ph.D. 1969, Case Western Reserve University.

Kianpour, Ahmad, Lecturer in Chemistry. B.S. 1945, College of Technology; M.S. 1950, University of Oklahoma; Ph.D. 1953, University of Colorado.

Killey, William Thomas, Associate Professor of Mathematics. B.S. 1960, St. Mary's College; Ph.D. 1969, Brown University.

Killian, Michael, Assistant Professor; Librarian. B.A. 1967, East Texas State University; M.S. 1970, University of Illinois; M.A. 1983, Morehead State University.

Kjell, Bradley P., Assistant Professor of Computer Science. B.A. 1970, University of Illinois; M.S. 1971, Illinois State University; Ph.D. 1985, University of Wisconsin.

Klapport, Peter, Associate Professor of English. A.B. 1964, Cornell University; M.A. 1967, M.F.A. 1968, University of Iowa.

Kline, Stephen Warren, Assistant Professor of Geology. B.S. 1973, Georgia State University; M.S. 1981, Georgia Institute of Technology; Ph.D. 1984, University of Georgia.

Knight, G. Diane, Assistant Professor; Counselor, Counseling Center. B.A. 1966, Bethany College; M.Div. 1970, Yale University; M.S. 1978, Loyola College; Ph.D. 1985, University of Maryland.

Knowles, Yereth K., Visiting Professor of Public Administration. B.A. 1942, M.A. 1945, University of Wisconsin; Ph.D. 1972, Institute of International Relations, University of Geneva.

Knutsen, T. L., Assistant Professor of Government and Politics. B.A. 1977, University of Oslo; M.A. 1979, Georgetown University; M.A. 1981, Ph.D. 1986, University of Denver.

Kolker, Aliza, Associate Professor of Sociology. B.A. 1969, Barnard College; M.Phil., 1974, Ph.D. 1975, Columbia University.

Lecoe, M.A., Associate Professor of Education. B.A. 1954, DePaul University; M.E. 1966, The American University; Ed.D. 1980, Virginia Polytechnic Institute and State University.

Lepard, David, Research Associate Professor of Education. B.M.E. 1954, Northwestern University; M.A. 1964, Claremont Graduate School; Ed.D. 1981, University of Massachusetts.

Leung, Hank, Instructor; Women's Soccer Coach. B.S. 1970, Drexel University.

Levy, Jack, Associate Professor of Education. B.A. 1967, City University of New York; M.A. 1970, Adelphi University; Ph.D. 1973, University of Southern California.

Lewis, Carolyn K., Lecturer in Nursing. B.S.N. 1987, M.S.N. 1988, University of Virginia.

Lewis, James III, Instructor; Women's Basketball Coach. B.S. 1968, West Virginia University; M.A. 1970, Tennessee State University.

Liberman, Lee S., Assistant Professor of Law. B.A. 1979, Yale University; J.D. 1983, University of Chicago.

Lieb, Bernard Joseph, Jr., Professor of Physics; Associate Chair, Department of Physics. B.S. 1965, M.S. 1967, Ph.D. 1971, The College of William and Mary.

Lieb-Brilhart, Barbara, Adjunct Professor of Communication. B.A. 1958, Queens College; M.A. 1960, Ph.D. 1966, Pennsylvania State University.

Lim, Teck Cheong, Associate Professor of Mathematics. B.S. 1970, Nanyang University; M.A. 1971, Ph.D. 1974, Dalhousie University.

Lin, Jeng-Eng, Assistant Professor of Mathematics. B.S. 1969, National Tsing Hua University; Ph.D. 1976, Brown University.

Lindberg, Mark Byron, Assistant Professor of Geographic and Cartographic Sciences. B.A. 1972, Macalester College; M.A. 1979, Kent State University; Ph.D. 1987, University of Kansas.

Linn, John R., Assistant Professor of Physical Education. B.S. 1960, Bowling Green University; A.M. 1967, The George Washington University.

Little, Barbara J., Acting Assistant Professor of Anthropology. B.A. 1980, Pennsylvania State University; M.A. 1984, New York University, Buffalo.

Littman, Davis C., Assistant Professor of Computer Science. B.S. 1971, Ph.D. 1976, University of Oregon; M.S. 1985, M.Phil. 1985, Ph.D. 1989, Yale University.

Liu, Yuen Chou, Associate Professor of Nursing. B.S.N. 1968, Incarnate Word College; M.S.N. 1960, The Catholic University of America; Ph.D. 1972, New York University School of Education.

Lont, Cynthia, Assistant Professor of Communication. B.A. 1974, State University of New York; M.A. 1976, Southern Illinois University; Ph.D. 1984, State University of Iowa.

Looney, Sara C., Assistant Professor of Communication; Associate Vice President for Administrative Services. B.A. 1966, Marillac College; M.A. 1969, Ph.D. 1974, University of Denver.

Lovett, Clara M., Provost and Vice President for Academic Affairs, Professor of History. Diploma in Modern Languages, 1962, University of Trieste, Italy; M.A. 1967, Ph.D. 1970, University of Texas.

Lytton, Randolph Hoopes, Associate Professor of History, Assistant Dean of the College of Arts and Sciences. B.A. 1966, Pennsylvania State University; M.A. 1968, University of Washington; Ph.D. 1973, Pennsylvania State University.

Maddox, Peggy Jo, Lecturer in Nursing. B.S.N. 1974, University of Nevada; M.S.N. 1981, The Catholic University of America.
Maddux, James Eugene, Associate Professor of Psychology. B.A. 1976, University of Richmond; M.A. 1979, Ph.D. 1982, University of Alabama.

Mahler, Julianne G., Associate Professor of Government and Politics; Director of MPA Program. B.A. 1968, Macalester College; M.A. 1970, Ph.D. 1976, State University of New York, Buffalo.

Malloy, Catherine, Professor; Associate Dean for Academic Programs, School of Nursing, B.S.N. 1971, Duquesne University; M.F.H. 1974, Dr.P.H. 1980, University of Pittsburgh.

Manchester, Bruce Borden, Professor of Communication. B.S. 1967, University of Rhode Island; M.A. 1970, Ph.D. 1971, Purdue University.

Manitz, A. Z., Professor of Electrical and Computer Engineering, M.S.E.E. 1960, Academy of Mining and Metallurgy, Cracow, Poland; Ph.D. 1968, Polytechnical School of Warsaw.

Manne, Henry G., Dean and University Professor of Law; Director of Law and Economics Center. B.A. 1950, Vanderbilt University; J.D. 1952, University of Chicago; J.S.D. 1966, Yale University.

Mao, Agnes Liu, Associate Professor; Librarian. B.L. 1966, National Chengchi University; M.L.S. 1970, University of Maryland.

Mark, Abraham, Visiting Professor in Computer Science. B.A. 1944, Brooklyn College; M.S. 1945, Ph.D. 1947, Cornell University.

Marquis, June H., Acting Assistant Professor of Education. B.A. 1976, George Mason University; M.Ed. 1982, University of Virginia.

Marsh, Jay W., Associate Professor; Associate Director of Athletics. B.S. 1973, George Mason University.

Martin, William Reed, Professor of Education. B.A. 1955, Gettysburg College; M.A. 1958, Syracuse University; Ph.D. 1968, University of Minnesota.

Matthews, Frank Lemar, Assistant Senior Vice President. B.A. 1971, Clemson University; J.D. 1972, M.B.A. 1976, University of South Carolina.

Mattusch, Carol C., Associate Professor of Art History; Chair, Department of Art and Art History. B.A. 1969, Bryn Mawr College; Ph.D. 1975, University of North Carolina.

McCann, Linda D., Assistant Professor; Assistant Librarian. B.S. 1976, State University of New York, Oneonta; M.L.S. 1980, The Catholic University of America.

McClanahan, Patricia R., Assistant Professor of Law. B.A. 1975, J.D. 1978, University of California, Davis; LL.M., 1982, New York University.

McDaniel, Andrew L., Assistant Professor of Mathematics. B.A. 1975, New College of the University of South Florida; M.S. 1978, University of Cincinnati; Ph.D. 1985, Brandeis University.

McDermott, Michael James, Jr., Assistant Vice Provost for Student Information; Associate Professor of Philosophy. A.B. 1958, Fordham University; Ph.L. 1959, Loyola Seminary.

McIntyre, James T., Jr., Lecturer in Government and Politics. A.B. 1963, University of Georgia; J.D. 1963, University of Georgia School of Law.

McIntyre, Katherine A., Assistant Professor; Acting Director, Conferences and Community Services. B.S. 1965, M.A. 1967, University of Alabama.

Melosh, Barbara, Associate Professor of English; Associate Professor of American Studies. B.A. 1972, Middlebury College; M.A. 1975, Ph.D. 1979, Brown University.

Meyer, Carrie A., Assistant Professor of Economics. Ph.D. 1988, University of Chicago.

Michalski, Ryszard S., Professor of Computer Science. B.S. 1959, Ph.D. 1969, Polytechnical University of Silesia, Poland; M.S. 1961, Leningrad Polytechnical Institute, USSR.

Mielczarek, Eugenie Vorburger, Professor of Physics. B.S. 1953, Queens College; M.S. 1957, Ph.D. 1963, The Catholic University of America.

Mill, Betty, Assistant Professor of Nursing. B.S.N. 1973, St. Louis University; M.S.N. 1976, Texas Woman's University.

Miller, Richard E., Associate Professor of Health Education. B.S.E. 1974, M.S.E. 1978, State University of New York College at Cortland; Ed.D. 1981, State University of New York at Buffalo.

Millesbaugh, Peter Edward, Associate Professor of Business Legal Studies. B.S. 1958, United States Military Academy; M.A. 1963, Georgetown University; J.D. 1968, The American University.

Mitchell, John, Associate Professor; Assistant Athletic Director. B.A. 1958, California State University, Los Angeles.

Mitchell, Joseph A., Lecturer in Government and Politics. B.S. 1965, Auburn University; M.S. 1968, University of North Dakota; J.D. 1976, Woodrow Wilson School of Law.

Mobley, Marilyn E., Assistant Professor of English. B.A. 1974, Barnard College; M.A. 1975, New York University; Ph.D. 1987, Case Western Reserve University.

Mones-Hattal, Barbara, Assistant Professor of Art Studio. B.F.A. 1974, M.F.A. 1979, Rhode Island School of Design.

Montobello, Mary S., Professor of Education. B.S. 1950, Ohio Dominican College; M.S. 1954, Ph.D. 1964, Ohio State University.

Moore, Charles A., Jr., Lecturer in Finance. B.S. 1955, University of Maryland.

Moore, Jean Burley, Associate Professor of Nursing. B.S.N. 1964, University of North Carolina, Chapel Hill; M.S.N. 1977, Ph.D. 1984, The Catholic University of America.

Moretz, Walter Jennings, Jr., Associate Professor of Psychology. A.B. 1955, Lenoir Rhyne College; B.D. 1959, Lutheran Seminary; Ph.D. 1970, Florida State University.

Morowitz, Harold J., Robinson Professor of Biology and Natural Philosophy. B.S. 1947, M.S. 1950, Ph.D. 1951, Yale University.

Morris, Walter D., Jr., Assistant Professor of Mathematics. B.S. 1980, Iowa State University; M.S. 1984, Ph.D. 1986, Cornell University.

Mose, Douglas George, Professor of Geology; Chair, Department of Geology. B.S. 1965, University of Illinois, Urbana-Champaign; M.S. 1968, Ph.D. 1971, University of Kansas.

Mosier, Tolula, Assistant Director of Inservice Education. B.A. 1964, Florida State University; M.Ed. 1989, George Mason University.

Moyer, Michael William, Instructor; Wrestling Coach/Administrative Assistant, Patriot Club. B.S. 1983, West Chester State College; M.S.Ed. 1985, James Madison University.

Muir, Janette, Instructor in Communication. B.S. 1979, Palm Beach Atlantic College; M.A. 1983, Wake Forest University; Ph.D. 1986, University of Massachusetts.

Mulherin, Girard M., Associate Professor. B.A. 1960, St. Mary's Seminary and University, Baltimore; S.T.B. 1962, Licentiate 1964, St. Mary's Seminary and University.

Mumford, Michael D., Associate Professor of Psychology. B.A. 1979, Bucknell University; M.S. 1981, Ph.D. 1983, University of Georgia.

Muris, Timothy J., Foundation Professor of Law. B.A. 1971, San Diego State University; J.D. 1974, University of California, Los Angeles.

Mulpuri, V.R., Associate Professor of Electrical and Computer Engineering. M.S. 1983, Ph.D. 1985, Oregon State University.

Murphy, Claudia Lynne, Associate Professor of Dance. B.A. 1969, Western College; M.A. 1972, The George Washington University.

Murphy, James Owen, Jr., Instructor; Director of Intramurals and Club Sports. B.S. 1975, George Mason University.

Mushrush, George William, Professor of Chemistry; Chair, Chemistry Department. B.S. 1962, Indiana University of Pennsylvania; M.S. 1965, Ph.D. 1968, The George Washington University.

Mutchler, Ruth Dunlap, Adjunct Assistant Professor of Psychology. B.A. 1951, George Washington University; M.A. 1979, George Mason University; Ph.D. 1987, University of Maryland.

Nadeau, Robert Lee, Associate Professor of English; Associate Professor of American Studies. B.A. 1966, University of the South; M.A. 1967, Ph.D. 1970, University of Florida.

Nathan, Betty, Assistant Professor; Assistant Director of Development for Research and Special Projects. B.A. 1950, Swarthmore College; M.S.L.S. 1971, Drexel University.

Nelson, Mary, Visiting Lecturer in Mathematics. B.S. 1970, Marquette University; M.S. 1988, George Mason University.

Nguyen, Hung M., Associate Professor of Government and Politics. B.A. 1959, Willamette University; M.A. 1963, Ph.D. 1965, University of Virginia.

Norris, Eugene Michael, Associate Professor of Computer Science. B.A. 1962, University of South Florida; Ph.D. 1969, University of Florida.

Norvell, Ralph, Dean Emeritus of the School of Law; Professor of Law. B.A. 1943, J.D. 1946, Baylor University; LL.M. 1948, University of Michigan.

O'Connor, John Sylvester, Associate Professor of English; Associate Professor of American Studies. A.B. 1968, University of Michigan; M.A. 1969, Ph.D. 1974, University of Virginia.

Olson, Carl Roger, Associate Research Professor of Psychology. B.A. 1966, Harvard University; M.A. 1968, Columbia University; Ph.D. 1978, University of California, Berkeley.

O'Malley, John W., Associate Dean for External Programs, School of Business Administration. B.S. 1954, University of Scranton; M.S. 1956, University of Delaware; M.B.A. 1978, Loyola of Baltimore.

Owena, Collin Don, Associate Professor of English. B.A. 1965, University of Notre Dame; M.A. 1968, National University of Ireland; Ph.D. 1975, Kent State University.

Pacheco, Josephine Fennell, Professor of History; Director, George Mason Center for the Study of Constitutional Rights. B.A. 1941, University of Richmond; M.A. 1943, Ph.D. 1950, University of Chicago.

Pachowicz, Peter W., Assistant Professor of Computer Science. M.S. 1981, Ph.D. 1984, Stanislaw Staszic University of Mining and Metallurgy.

Padaddock, Patric W., Visiting Lecturer in Mathematics. B.A. 1952, Willamette University; M.S. 1971, George Washington University; M.S. 1984, George Mason University.

Paden, John, Robinson Professor of International Studies. B.A. 1959, Occidental College; M.A. 1961, Oxford University; Ph.D. 1968, Harvard University.

Palmer, James C., Associate Director, Center for Community College Education. B.A. 1975, Pacific University; M.L.S. 1981, Ph.D. 1987, University of California, Los Angeles.

Palmer, James D., Professor of Information Technology and Engineering; Associate Dean, School of Information Technology and Engineering. B.S., M.S., University of California; Ph.D. 1963, University of Oklahoma.

Palmieri, Anthony Francis, Associate Professor of English. B.A. 1964, M.A. 1966, Ph.D. 1974, University of Maryland.

Papaconstantopoulos, Dimitrios A., Adjunct Professor of Physics. B.S. 1961, University of Athens; D.I.C. 1963, Imperial College of London; M.S. 1964, Ph.D. 1967, University of London.

Pasanak, Robert, Professor of Psychology. B.S. 1964, University of Maryland; M.S. 1965, Ph.D. 1969, Pennsylvania State University.

Pearson, Jane, Special Assistant to the President. B.A. 1970, DePauw University.

Pecorak, Phyllis A., Instructor; Assistant Director of Admissions. B.S. 1949, University of New Hampshire.

Perry, Allan, Adjunct Professor of Geology. B.S. 1961, Indiana University; M.S. 1972, Ph.D. 1977, Purdue University.

Perry, Katherine Ann, Assistant Professor; Director of University Development and the Annual Fund. B.A. 1972, M.L.I.S. 1974, University of California, Los Angeles.

Postal-Ranney, Marcia G., Lecturer in Nursing. B.S.N. 1967, University of Maryland; M.S.N., The Catholic University of America.

Prager, Iris, Assistant Professor of Health Education. B.S. 1965, Brooklyn College; M.A. 1968, Ph.D. 1978, University of Maryland.
Procaccino, Margaret Anne, Research Instructor in Health and Physical Education. B.S. 1978, Towson State University; M.A. 1981, Central Michigan University.

Prullt, B.E., Adjunct Assistant Professor. Ed. D. 1975, North Texas State University.

Prullt, France J., Assistant Professor; Director of the Office of International Programs and Services and the English Language Institute. B.A. 1956, Swarthmore College; M.A. 1973, State University of New York, Buffalo; Ph.D. 1981, University of Paris.

Pugh, Robert L., Assistant Professor of Decision Sciences. B.S. 1953, East Carolina University; M.A. 1964, Ph.D. 1975, The American University.

Pyrek, Carolyn, Lecturer in English. B.S. 1966, M.A. 1968, Louisiana State University; Ph.D. 1975, University of Tennessee.

Pyrek, Steven J., Lecturer in English. B.A. 1966, University of Virginia; M.A. 1967, University of Michigan; Ph.D. 1976, University of Tennessee.

Qu, Yaoshuang, Assistant Professor of Computer Science. B.S. 1968, Tsing Hua University, China; M.S. 1981, Ph.D. 1986, University of Wisconsin.

Quammen, Donna, Assistant Professor of Computer Science. B.S. 1971, California State; M.S. 1981, Ph.D. 1986, University of Pittsburgh.

Quarles, N. Ross, Assistant Professor of Accounting. B.A. 1968, East Texas State University; M.S. 1975, University of Southern California; Ph.D. 1988, University of North Texas; CPA, State of Texas.

Rader, Victoria Fries, Associate Professor of Sociology. B.A. 1966, University of California, Berkeley; M.A. 1968, Ph.D. 1973, University of Chicago.

Radner, John Barnet, Associate Professor of English. A.B. 1960, Harvard University; B.A. 1962, Trinity College; Ph.D. 1966, Harvard University.

Raines, Shirley C., Associate Professor of Education. B.S. 1967, M.S. 1972, Ed.D. 1979, University of Tennessee.

Rainey, Lloyd Daniel, Adjunct Assistant Professor of Communication. B.A. 1973, M.A. 1975, Memphis State University.

Raphael, Coleman, Dean of the School of Business Administration; Professor of Business Administration. B.C.E. 1945, City College of New York; M.C.E. 1951, Ph.D. 1966, Polytechnic Institute of Brooklyn.

Raskin, Miriam Susan, Associate Professor of Social Work; Acting Chair, Department of Social Work. B.A. 1965, Brooklyn College; M.S.W 1969, University of Maryland; Ed.D. 1981, Virginia Polytechnic Institute and State University.

Redmond, Georgine, Assistant Professor of Nursing; Assistant Dean, School of Nursing. B.S. 1959, College of Mount Saint Vincent; M.A. 1967, New York University.

Reithlinghofer, Sally Jane, Assistant Professor; Associate Dean of the School of Continuing and Alternative Learning. B.S. 1964, Indiana University of Pennsylvania; M.A. 1969, Northwestern University.

Renaud, Kim Young-Key, Lecturer in Korean. B.A. 1963, Ewha Woman's University, Seoul, Korea; M.A. 1965, University of California, Berkeley; Ph.D. 1974, University of Hawaii, Honolulu.

Renick, James C., Associate Provost, Associate Professor of Public Affairs. B.A. 1970, Central State (Ohio) University; M.S.W 1972, Kansas University; Ph.D. 1980, Florida State University.

Rendler, Barry, Professor of Decision Sciences; Chair, Department of Decision Sciences. B.S. 1969, Roosevelt University; M.S. 1971, Ph.D. 1975, University of Cincinnati.

Reynolds, Jesse E., Lecturer in Health and Physical Education. B.S.Ed. 1969, University of Houston.

Ribstein, Larry E., Professor of Law. B.A. 1968, Johns Hopkins University; J.D. 1972, University of Chicago.

Rice, Margaret D., Assistant Professor; Business Manager. B.S. 1981, Shenandoah College and Conservatory of Music; M.B.A. 1985, George Mason University.

Rice, Michael David, Associate Professor of Computer Science. B.S. 1969, M.S. 1970, Western Michigan University; Ph.D. 1973, Wesleyan University.

Richie, Michael B., Assistant Professor of Operations Research and Applied Statistics. B.S., M.S., University of Missouri, Rolla; Ph.D. 1985, Georgia Institute of Technology.

Ricouart, Janine M., Assistant Professor of French. Eng. Lic. 1973, Universite de Lille, France; Ph.D. 1986, University of California, Davis.

Rigney, Dawn Booth, Instructor in Nursing. B.S.N. 1969, University of Virginia; M.S.N. 1980, George Mason University.

Rine, David C., Professor of Computer Science. B.S. 1963, Illinois State University; M.S. 1966, Oklahoma State University; Ph.D. 1970, University of Iowa.

Riordan, Patricia M., Instructor; Dean of Admissions. B.S. 1963, Northeastern University; M.Ed. 1977, George Mason University.

Risbell, Lyle, Instructor in Marketing. B.S. 1955, University of Maryland; M.B.A. 1961, University of Arizona.
Riskind, John Haskell, Associate Professor of Psychology. B.A. 1970, University of Texas, Austin; Ph.D. 1977, Yale University.

Ro, Young-chan, Associate Professor of Religious Studies. B.Th. 1965, M.Th. 1969, Yonsei University; M.Th. 1973, Union Theological Seminary; Ph.D. 1982, University of California, Santa Barbara.

Roback, Jennifer A., Associate Professor of Economics. B.A. 1975, Ohio State University; M.S. 1978, Ph.D. 1980, University of Rochester.

Robbins, D. Keith, Jr., Assistant Professor of Strategic Management. B.S. 1977, M.S. 1979, Clemson State University; Ph.D. 1989, University of South Carolina.

Roberts, Francine E., Assistant Professor of Nursing. B.S. 1967, Brigham Young University; M.S. 1971, State University of New York, Buffalo.

Roberts, Ralph Kent, Associate Professor; Director of Counseling. B.A. 1965, Jamestown College; M.A. 1967, Ph.D. 1969, University of North Dakota.

Robinson, Victoria, Assistant Director, Career Services/Cooperative Education. B.A. 1972, State University of New York, Binghamton; M.Ed. 1977, Northwestern University.

Rockwood, Larry Lewis, Associate Professor of Biology; Chair, Department of Biology. B.S. 1965, Ph.D. 1972, University of Chicago.

Rosenblum, Don Harris, Assistant Dean for Student Services; Director of Research and Staff Development. B.A. 1980, University of Maryland; M.A. 1982, Ohio State University.

Rosenblum, Karen E., Associate Professor of Sociology. B.A. 1970, Ph.D. 1979, University of Colorado.

Rosenzweig, Roy Alan, Associate Professor of History; Associate Professor of American Studies. A.B. 1971, Columbia College; Ph.D. 1978, Harvard University.

Rosetti, Judith, Lecturer in Nursing. B.S. 1954, Skidmore College; M.A. 1968, Columbia University.

Rossell, David W., Assistant Provost for Administration and Budget. B.A. 1977, University of Montana; M.Ed. 1980, University of Virginia.

Rossini, Frederick A., Vice Provost for Faculty Affairs and Research, Professor of Information Systems and Systems Engineering. B.S. 1962, Spring Hill University; Ph.D. 1968, University of California-Berkeley.

Roth, Carolyn Beth, Assistant Professor; Librarian. B.A. 1962, M.L.S. 1970, University of Iowa.

Roth, Ronald John, Associate Professor of Chemistry. B.S. 1967, City College of New York; Ph.D. 1972, Columbia University.

Rothbart, Daniel, Associate Professor of Philosophy. B.A. 1972, Fairleigh Dickinson University; M.A. 1975, State University of New York, Binghamton; Ph.D. 1978, Washington University.

Rowley, Charles, Professor of Economics. Ph.D. 1964, University of Nottingham.

Roya, Paulene Anne, Associate Professor of Biology. B.S. 1967, M.S. 1971, The American University; Ph.D. 1974, University of Maryland.

Rudowski, Lorraine, Assistant Professor of Nursing. B.S.N. 1980, M.S.N. 1983, George Mason University.

Rugel, Robert Paul, Associate Professor of Psychology. B.A. 1965, Hiram College; Ph.D. 1971, Florida State University.

Ruhling, Robert O., Professor of Physical Education; Chair, Department of Health, Sport, and Leisure Studies. B.S. 1964, M.A. 1966, University of Maryland; Ph.D. 1970, Michigan State University.

Rundstrom, Robert Alan, Assistant Professor of Geographic and Cartographic Sciences. B.A. 1975, University of California, Berkeley; M.A. 1980, California State University, Northridge; Ph.D. 1987, University of Kansas.

Ruth, Stephen Ruddy, Professor of Decision Sciences. B.S. 1955, United States Naval Academy; Ph.D. 1971, University of Pennsylvania.

Rutledge, Amelia Ann, Associate Professor of English. B.A. 1968, Michigan State University; M.Phil., 1972, Ph.D. 1974, Yale University.

Ryan, Anna Gayle, Lecturer in English. B.A. 1962, Texas Technological University; M.A. 1964, Rice University; Ph.D. 1975, State University of New York, Stony Brook.

Ryan, Elizabeth, Adjunct Professor in Communication. B.A. 1974, University of Missouri; M.A. 1983, Antioch.

Ryan, Terry C., Visiting Professor of Information Systems and Systems Engineering. B.S. 1965, United States Military Academy; M.S. 1971, Ph.D. 1974, University of Illinois.

Sachs, George A., Instructor; Manager, Recreation Sports Complex. B.S. 1974, Old Dominion University.

Sachs, Robert L., Associate Professor of Mathematics. B.A. 1976, Harvard University; Ph.D. 1980, Courant Institute, New York University.

Saeed, Mian Muhammad, Associate Professor of History. B.A. 1955, M.A. 1956, Islamia College, University of the Punjab, Pakistan; Ph.D. 1965, University of London.

Sage, Andrew P., Professor of Information Technology; Dean, School of Information Technology and Engineer-
ing, B.S.E.E., Citadel; S.M.E.E., Massachusetts Institute of Technology; Ph.D. 1960, Purdue University.

Samuel, Linda Bartman, Associate Professor of Business Legal Studies. B.A. 1970, Queens College; M.P.A. 1971, State University of New York, Albany; J.D. 1975, University of Virginia.

Sanden, Bo, Associate Professor of Information Systems and Systems Engineering. B.A. 1971, M.S. 1970, Lund University; Ph.D. 1978, Royal Institute of Technology.

Sandole, Dennis Joseph Dominic, Associate Professor of Government and Politics. B.A. 1967, Temple University; Ph.D. 1979, University of Strathclyde.

Sanford, James Francis, III, Associate Professor of Psychology; Assistant Dean for Individualized Study Programs. B.A. 1966, Ohio Wesleyan University; M.S. 1968, Ph.D. 1973, Kansas State University.

Saperstone, Stephen Harold, Professor of Mathematics; Chair, Department of Mathematical Sciences. B.E.P. 1962, Cornell University; M.A. 1965, Ph.D. 1970, University of Maryland.

Sauer, Timothy D, Assistant Professor of Mathematics. B.S. 1977, Michigan State University; Ph.D. 1982, University of California, Berkeley.

Scheck, Frederick K., Associate Professor of Physical Education. B.A. 1965, M.A. 1972, California State University; Ph.D. 1976, Ohio State University.

Schaefle, David H., Associate Professor of Electrical and Computer Engineering. B.S. 1949, Tulane University.

Schank, John Frederic, Jr., Instructor in Decision Sciences. B.S.E.E. 1969, Drexel Institute of Technology; M.S. 1971, University of Pennsylvania.

Scherrren, Maurice William, Associate Professor; Vice President for Business and Finance. M.B.A. 1971, Central Michigan University; J.D. 1977, The George Washington University.

Schreifels, John A., Associate Professor of Chemistry. Ph.D. 1979, University of South Florida.

Schulman, Norma M., Assistant Professor of Communication. B.A. 1963, Barnard College; M.A. 1969, M.S. 1979, Boston University; Ph.D. 1972, Tufts University.

Schum, David A., Professor of Operations Research and Applied Statistics. B.S., M.S., Southern Methodist University; Ph.D. 1964, Ohio State University.

Schwamm, Jeffrey B., Associate Professor of Social Work. B.A. 1971, Brandeis University; M.S.W. 1973, Boston College; Ph.D. 1978, Brandeis University.

Schwartz, Marla J., Associate Professor; Librarian. A.B. 1971, Boston University; M.S. 1974, Simmons College; M. Phil. 1983, George Washington University.

Schwartz, Peter, Lecturer in German. Staatssdiploma 1969, Pedagogische Hochschule, Kaiserslautern; M.A. 1976, University of Richmond; M.A. 1978, University of Maryland.

Scott, Sherry, Lecturer in English. B.A. 1966, North Texas State University; M.A. 1983, American University; Ph.D. 1986, University of Maryland.

Sears, Carol Joyce, Associate Professor of Education. B.S. 1951, M.S. 1952, University of Wisconsin; Ph.D. 1976, The American University.

Sedgwick, Cynthia, Assistant Director, Career Services/Placement and Employer Relations. B.A. 1978, Hampton Institute.

Seidman, Stephen Benjamin, Professor of Computer Science. B.S. 1964, City College of New York; A.M. 1965, Ph.D. 1969, University of Michigan.

Seligman, Linda H., Associate Professor of Education. A.B. 1966, Brandeis University; M.A. 1968, Ph.D. 1974, Teachers College, Columbia University.

Sell, Carl Leroy, Jr., Instructor; Director of Sports Information.

Shafer, Stephanie Lynn, Lecturer in Communication. B.A. 1971, Meredith College; M.A. 1973, University of Miami.

Shaffer, Jay Charles, Professor of Biology. B.S. 1961, Bucknell University; Ph.D. 1967, Cornell University.

Shapiro, Jay A., Associate Professor of Mathematics. B.A. 1971, Rider College; Ph.D. 1975, Rutgers University.

Sherald, Allen Franklin, Associate Professor of Biology. B.S. 1964, Frostburg State College; Ph.D. 1973, University of Virginia.

Shevia, James, Lecturer in English. B.A. 1951, University of Maine; M.L.S. 1977, Georgetown University.

Shreve, Susan Richards, Professor of English. B.A. 1961, University of Pennsylvania; M.A. 1969, University of Virginia.

Sibley, Edgar, University Professor of Information Systems and Systems Engineering. B.S., University of London; Sc.D. 1967, Massachusetts Institute of Technology.

Siff, Frederick Howard, Associate Professor of Information Systems and Systems Engineering; Vice President for University Computing and Information Systems. B.S. 1964, Worcester Polytechnic Institute; M.S. 1966, Ph.D. 1974, New York University.

Sluby, Susan, Lecturer in History. B.F.A. 1976, Georgetown University; M.A., George Washington University; Ph.D., Georgetown University.

Silva, Mary Elizabeth, Professor of Nursing. B.S. 1962, M.S. 1963, Ohio State University; Ph.D. 1976, University of Maryland.

Sims, Henry P., Jr., Professor of Organizational Behavior. B.S. 1961, Purdue University; M.B.A. 1967, University of Detroit; Ph.D. 1971, Michigan State University.

Singman, David H., Assistant Professor of Mathematics. B.S. 1972, M.S. 1976, Ph.D. 1980, McGill University, Canada.

Siosodia, Rajendra S., Assistant Professor of Marketing. B.E. 1979, Birla Institute of Technology and Science; M.M.S. 1981, J. Bajaj Institute of Management Studies; M.Phil. 1986, Ph.D. 1988, Columbia University.

Skadden, Karin M., Visiting Assistant Professor. A.B. 1962, Wheaton College; M.P.A. 1976, West Texas State University; Ph.D. 1982, University of Michigan; CPA, state of Texas.

Skog, Judith Ellen, Associate Professor of Biology. B.S. 1966, Tufts University; M.S. 1968, University of Connecticut; Ph.D. 1972, Cornell University.

Slaght, Evelyn F., Assistant Professor of Social Work. B.A. 1962, Antioch College; M.S.W. 1963, University of Maryland, Baltimore; Ph.D. 1985, University of Maryland, College Park.

Slayden, Suzanne Weems, Associate Professor of Chemistry. B.S. 1970, Ph.D. 1976, University of Tennessee.

Smith, Becky Jeanne, Lecturer in Health and Physical Education. B.S.Ed. 1964, M.S.Ed. 1972, State University of New York, College at Brockport; Ph.D. 1976, University of Illinois.

Smith, Charles N., Director of Minority Student Services and Special Assistant to the Provost. B.S. 1976, M.S. 1980, Virginia Commonwealth University.

Smith, Donald Francis, Associate Professor of Education. B.S. 1960, M.A. 1960, East Carolina University; Ed.D. 1968, The American University.

Smith, John Melvina, Professor of Mathematics Education. B.S. 1959, University of Richmond; M.A. 1961, Ph.D. 1970, University of Maryland.

Smith, Kitty Simpson, Associate Professor of Nursing. B.S.N. 1958, M.S.N. 1960, The Catholic University of America.

Smith, Linda, Assistant Professor; Assistant Librarian. B.A. 1976, Dana Hall School, Wellesley and Boston College; M.L.S. 1979, Simmons College.

Smith, Robert F., Associate Professor of Psychology. B.S. 1971, University of Florida; M.A. 1973, Ph.D. 1976, University of Wisconsin.

Snyder, John P., Lecturer in Geography. B.A. 1948, Purdue University; M.S. 1949, Massachusetts Institute of Technology.

Sockeyt, Hugh T., Research Professor of Education; Director, Center for Applied Research and Development. B.A. 1959, M.A. 1964, Christ Church, University of Oxford; Ph.D. 1974, Kings College, University of London.

Soder, John, Professor of History. B.A. 1956, M.A. 1962, St. Bonaventure University; Ph.D. 1970, Georgetown University.

Sokolove, Deborah C., Assistant Professor of Art Studio. B.A. 1984, M.F.A. 1986, California State University-Los Angeles.

Sonnemann, Gail J., Assistant Professor; Librarian. B.A. 1974, Lawrence University; A.M.L.S. 1975, University of Michigan.

Sorrell, Jeanne L., Associate Professor of Nursing. B.S.N. 1962, University of Michigan; M.S.N., University of Wisconsin; D.A.Ed. 1987, George Mason University.

SpikeU, Mark A., Professor of Education. A.B. 1963, Miami University; M.Ed. 1967, Xavier University; Ed.D. 1972, Boston University.

Srebick, Alan Keith, Instructor; Associate Director of Development for Athletics. B.S. 1971, University of Connecticut.

Stalick, Wayne Myron, Professor of Chemistry. B.A. 1964, University of Oregon; Ph.D. 1969, Northwestern University.

Stanley, Melissa Sue, Professor of Biology. B.S. 1953, M.A. 1959, University of Oregon; Ph.D. 1965, University of Utah.

Stannard, Charlotte M., Instructor; Counselor, Counseling Center. B.A. 1955, San Jose State University; M.Ed. 1980, George Mason University.

Starosta, William, Adjunct Professor of Communications. B.A. 1968, University of Wisconsin, Oshkosh; A.M. 1979, Ph.D. 1973, Indiana University.

Stephanou, H. E., Associate Professor of Electrical and Computer Engineering. B.S., American University of Beirut; M.S., Ph.D. 1976, Purdue University.

Stephenson, Richard W., Lecturer in Geography. B.A. 1966, George Washington University; M.S. 1976, Catholic University of America.

Stevens, Scott M., Acting Assistant Professor of Education. B.S. 1973, M.S.Ed. 1975, Northern Illinois University.

Stewart, Jeffrey C., Assistant Professor of History. B.A. 1971, University of California; M.A. 1974, Ph.D. 1979, Yale University.

Stone, John, Professor of Sociology; Chair, Department of Sociology and Anthropology. B.A. 1966, M.A. 1970, Cambridge University; Ph.D. 1970 Oxford University.

Story, Patrick Lee, Associate Professor of English. A.B. 1962, University of Missouri; M.A. 1963, Ph.D. 1968, Northwestern University.

Struppa, Daniele C., Professor of Mathematics. B.A. 1977, University of Milano; Ph.D. 1981, University of Maryland.

Sugrue, Timothy F., Assistant Professor of Finance. B.S. 1975, US Military Academy; Ph.D. 1985, University of Massachusetts, Amherst.

Suter, Janice L., Instructor; Coordinator of Career Counseling. B.A. 1975, University of Delaware; M.A. 1977, Ohio State University.

Sypher, Eileen Bower, Associate Professor of English. A.B. 1968, Mount Holyoke College; Ph.D. 1976, University of Connecticut.

Tabak, D., Professor of Information Technology and Engineering. B.S.E.E. 1959, M.S. 1963, Technion, Haifa, Israel; Ph.D. 1967, University of Illinois.

Tackett, Lou Rae, Lecturer in Nursing. B.S. 1958, Al­derson-Broadus; M.S. 1968, The Catholic University of America.

Tangney, June Price, Assistant Professor of Psychology. B.A. 1979, State University of New York, Buffalo; M.A. 1981, Ph.D. 1985, University of California, Los Angeles.

Taub, Stephan Robert, Professor of Biology. A.B. 1955, University of Rochester; Ph.D. 1960, Indiana University.

Tavani, Nicholas John, Associate Professor of Sociology. A.B. 1951, Temple University; B.D. 1957, Reformed Episcopal Seminary; M.A. 1965, Ph.D. 1969, University of Maryland.

Taylor, Anita Marie Grimm, Professor of Communication. B.S. 1957, M.S. 1959, Kansas State University; Ph.D. 1971, University of Missouri.

Tatreault, Mary A. Stanfield, Assistant Professor of Marketing. B.A. 1977, Bryn Mawr College; M.B.A. 1981, University of Denver.

Thaiss, Christopher Jacob, Associate Professor of English. B.A. 1970, University of Virginia; M.A. 1971, Ph.D. 1975, Northwestern University.

Thomas, Barbara, Instructor in English as a Second Language, English Language Institute. B.A. 1968, Uni-

Wang, George H. K., Visiting Professor of Finance. B.S. 1963, Taiwan Chung-Hsing University; M.A. 1968, Northern Illinois University; Ph.D. 1976, Iowa State University.

Ward, Nicholas W., Associate Professor of Art Studio. M.F.A. 1971, Maryland College of Art.

Ward, Pamela, Lecturer in English. B.A. 1971, University of Houston; M.S. 1974, Northwestern University; M.F.A. 1988, George Mason University.

Warfield, John N., University Professor; Director of the Institute for Advanced Study in the Integrative Sciences. A.B. 1948, B.S.E.E. 1948, M.S.E.E. 1949, University of Missouri, Columbia; Ph.D. 1952, Purdue University.

Warner, Keith Q., Professor of French; Chair, Department of Foreign Languages and Literatures. Doctorat de l'Université 1969, Caen.

Warner, Peggy, Lecturer in English. B.A. 1972, M.A. 1977, Purdue University.

Webb, E. Penelope, Director of Undergraduate Student Support Services, School of Business Administration. B.A. 1985, Queens College; M.A. 1987, The George Washington University.

Weber, Jon P., Assistant Professor of Chemistry. B.S. 1974, University of California, Berkeley; Ph.D. 1980, University of California, Santa Cruz.

Webster, Dennis Wayne, Assistant Professor; Assistant Director of Counseling Center. B.A. 1974, Seton Hall University; M.A. 1977, Ph.D. 1982, University of Maryland.

Wechsler, Harry, Professor of Computer Science. B.S. 1971, Tel Aviv University, Israel; M.S. 1973, Weizmann Institute of Science, Israel; Ph.D. 1975, University of California, Irvine.

Wegman, Edward J., Dunn Professor of Information Technology and Applied Statistics. B.S. 1965, St. Louis University; M.S., Ph.D. 1968, University of Iowa.

Wehrle, Walter E., Assistant Professor of Philosophy. B.A. 1969, University of Texas, Austin; M.A. 1976, Ph.D. 1988, Florida State University, Tallahassee.

Weidner, John F., Lecturer in Mathematics. B.A. 1964, Yale University; M.S. 1965, Ph.D. 1973, Purdue University.

Weinberger, Steven H., Assistant Professor of English. B.A. 1978, University of Pittsburgh; Ph.D. 1988, University of Washington.

Weisman, David Schor, Adjunct Professor of Psychology. B.A. 1971, American University; M.A. 1973, Fairleigh Dickinson University; Ed.D. 1979, Catholic University of America.

Welsh, Taejung Kim, Lecturer in Foreign Languages and Literatures. B.A. 1964, Hankuk University of Foreign Studies, Korea; M.Ed. 1983, George Mason University.

Worth, Caroline, Executive Director, Center for the Arts. B.A. 1975, Queens College, N.Y.

White, E. Bernard, Associate Professor of Information Systems and Systems Engineering. B.S. 1966, Mississippi Industrial College; M.S. 1970, University of Illinois; M.S. 1973, Howard University; Ph.D. 1984, University of Virginia.

White, Ralph Edward, Instructor; Men's Track and Field Coach. B.S. 1974, Pennsylvania State University.

Whitney, Scott C., Professor of Law. A.B. 1949, University of Nevada; J.D. 1952, Harvard University.

Whittaker, Alan G., Lecturer in Government and Politics. B.A. 1973, North Texas State University; M.A. 1977, Southern Methodist University; Ph.D. 1983, University of Southern California; Ph.D. 1989, University of Southern California.

Wiederhorn, Nancy L., Assistant Professor of Nursing. B.S. 1960, Columbia University; M.S.N. 1974, D.N.Sc. 1980, The Catholic University of America.

Wiggins, David K., Professor of Physical Education. B.A. 1974, M.A. 1975, San Diego State University; Ph.D. 1979, University of Maryland.

Wilkins, Roger, Robinson Professor of History and American Culture. A.B. 1953, University of Michigan; LL.B. 1956, University of Michigan Law School.

Willett, James D., Professor of Biology. A.B. 1959, University of California, Berkeley; Ph.D. 1965, Massachusetts Institute of Technology.

Williams, Ashley, Lecturer in English. A.B.J. 1968, University of Georgia; M.A. 1987, George Mason University.

Williams, Charles K., Professor of English. B.A. 1959, University of Pennsylvania.

Williams, Joyce Knowles, Assistant Professor of Nursing. B.S. 1960, Brown University, Rhode Island Hospital School of Nursing; M.S. 1963, C.A.G.S. 1965, Boston University.
Williams, Marcus D., Lecturer in Business Legal Studies. B.A. 1973, Fisk University; J.D. 1977, Catholic University of America.

Williams, Thomas Rhy's, Professor of Anthropology. B.A. 1951, Miami University; M.A. 1956, University of Arizona; Ph.D. 1956, Syracuse University.

Williams, Walter E., John M. Olin Distinguished Professor of Economics. B.A. 1965, California State University; M.A. 1966, Ph.D. 1972, University of California, Los Angeles.

Wilson, George, Lecturer in Mathematics. M.S. 1977, University of Chicago; Ph.D. 1982, Brandeis University.

Wilson, John William, III, Associate Professor of Biology. B.A. 1966, Amherst College; Ph.D. 1972, University of Chicago.

Wilson, Novella H., Assistant Professor; Director of Extended Studies Enrollment Program. B.S. 1959, St. Paul's College; M.Ed. 1980, George Mason University.

Wilson, Patricia A., Instructor; Associate Director of Admissions. B.A. 1970, M.A. 1971, University of Michigan.

Winkler, Martin M., Assistant Professor of Classics, M.A. 1977, West Virginia University; Ph.D. 1982, University of Southern California.

Woehrle, Thomas, Lecturer in Business Legal Studies. B.A 1975, George Mason University; J.D. 1978, Valparaiso University.

Wright, Brett A., Assistant Professor of Parks, Recreation, and Leisure Studies. B.A. 1975, M.A. 1976, Morehead State University; Ph.D. 1985, Texas A and M University.

Wu, Chien, Yun, Lecturer in Nursing. B.S. 1973, Villanova University; M.S. 1982, D.N.Sc. 1989, George Mason University.

Yau, Jot K., Assistant Professor of Finance. B.Soc.Sc. 1980, University of Hong Kong; M.B.A. 1984, University of Toledo; Ph.D. 1988, University of Massachusetts, Amherst.

Yocom, Margaret Rose, Associate Professor of English; Associate Professor of American Studies. B.A. 1970, Pennsylvania State University; M.A. 1972, Ph.D. 1980, University of Massachusetts.

Young, Margaret Ruth, Assistant Professor of Decision Sciences. B.S. 1975, Bates College; M.S. 1982, Vanderbilt University; Ph.D. 1985, Pennsylvania State University.

Zaccaro, Stephen J., Associate Professor of Psychology. B.A. 1979, Fairfield University; M.A. 1980, Ph.D. 1981, University of Connecticut.

Zahra, Shaker A., Associate Professor of Strategic Management. B. Com. 1975, Alazhar University; M.B.A. 1978, National University; Ph.D. 1982, University of Mississippi.

Zaphiriou, George A., Professor of Law. LL.B. 1940, University of Athens, Greece; LL.M. 1950, University of London.

Zielinski, Gregory, Assistant Professor of Geology. B.S. 1977, Pennsylvania State University; M.S. 1980, Idaho State University; Ph.D. 1987, University of Massachusetts.

Zietz, Isidore, Adjunct Professor of Geology. B.S. 1939, M.S. 1940, City College of New York; Ph.D. 1976, The Catholic University of America.

Zoltek, Stanley Michael, Associate Professor of Mathematics. B.S. 1970, St. John's University; M.A. 1973, Ph.D. 1976, State University of New York, Stony Brook.
